LETTER OF TRANSMITTAL

August 22, 1978

Honorable Edmund S. Muskie,
Chairman, Subcommittee on Intergovernmental Relations.
Honorable John Glenn,
Chairman, Subcommittee on Energy, Nuclear Proliferation
and Federal Services.
Committee on Government Affairs, U.S. Senate, Washington, D.C.

Dear Senators Muskie and Glenn:

For the forth year we have completed at your request an analysis of fuel adjustment clause increases and other actions in the electric and gas utility industries, based on information supplied to us in response to your questionnaire to State utility commissions. I am pleased to transmit the study product prepared from the 1977 data by Mr. Russell J. Profozich of our Economics Division and Dr. Douglas N. Jones, formerly of our Economics Division and presently Director of the National Regulatory Research Institute at Ohio State University.

We hope that this report will be of continued use to your Committee.

Sincerely yours,

Gilbert Gude

Gilbert Gude, Director

INTRODUCTION

By Senator Edmund S. Muskie and Senator John Glenn

BACKGROUND

Early this year we asked State regulatory commissions to provide our subcommittees with information on electric and gas utility fuel adjustment clause (FAC) and rate increases in 1977. The responses have been analyzed by Russell J. Profozich and Dr. Douglas N. Jones of the Economics Division of the Congressional Research Service of the Library of Congress.(*) The analysis is presented here as a committee print, for convenient reference, inasmuch as the data is not otherwise centrally available.

Participation by the state commissions was the best ever this year. Responses came from 50 commissions in 46 states, the District of Columbia, Puerto Rico and the Virgin Islands. Nebraska was not included in the survey because it has only public power systems, which are subject to local rather than state regulation. Responses were received from two Texas commissions because of split jurisdiction in that state; one commission regulates electricity, the other gas. Only Kentucky, New Mexico and Oklahoma did not join the survey.

(*) Dr. Jones is now director of the National Regulatory Research Institute at Ohio State University, Columbus, Ohio.

Similar studies were published by the Committee on Governmental Affairs in each of the three preceding years. CRS extrapolated data received to estimate revenue changes in states whose commissions did not report. The number of responding commissions has increased from the 37 and 35 which, respectively, provided 1974 and 1975 data, to the 47 and now 50 commissions which provided 1976 and 1977 data.

The utilities covered in this study are primarily investor-owned utilities (IOU's) which distribute approximately 80 percent of the nation's electricity and 94 percent of its natural gas. The rest of the nation's gas and electricity is distributed by publicly-owned systems (municipals and public utility districts) and privately-owned cooperatives. Some of them are subject to state commission regulation but many are not and therefore are not included in this study.

FINDINGS

(1) Consumers paid $13.4 billion more for electricity and natural gas in 1977 than they did in 1976. That annual increase is an all-time high. Electric utilities accounted for about 65 percent of the increase, gas utilities 35 percent. During the four years in which the committee has conducted surveys, electric and gas increases have amounted to $48.3 billion, an average of more than $12 billion a year.

From 1948 to 1973, electric and gas utility rates increased $6 billion. Thus every six months the average increase in utility bills equals the increase in the quarter century ending in 1973.

(2) Fuel adjustment clauses account for an increasing percentage of the total increases. FAC's (sometimes referred to as purchase gas adjustments--PGA's--in gas utilities) provided 68 percent of the increases in 1974 and 1975, 76% in 1976 and 82% in 1977. The remainder of the increases resulted from formal proceedings in rate cases. Rate increases resulting from such formal proceedings declined from $3.1 billion to $2.4 billion.

The dollar amounts of FAC and rate case increases for the four years were as follows:

ANNUAL INCREASES IN ELECTRIC AND NATURAL GAS RATES
(in billions of dollars)

Year	FAC	Rate Case	Total
1977	$11.0	$2.4	$13.4
1976	9.6	3.1	12.7
1975	8.5	4.1	12.6
1974	6.5	3.1	9.6
TOTALS	$35.6	$12.7	$48.3

In 15 states fuel adjustment clauses added more than $100 million to electric bills during 1977. In 8 states FAC's added more than $100 million to gas bills. FAC's accounted for more than 20 percent of utility gas and electric revenue in a dozen states.

(3) Increases due to fuel costs are even greater than they appear, because many fuel adjustment charges have been rolled into basic rates. Two-thirds of the commissions reported that some fuel costs had been transferred from FAC's into the basic rate structure of electric utilities. Half the commissions reported similar roll-ins for gas utilities. These roll-ins contributed to the decrease in the proportion of identifiable FAC revenue to total revenue for both electric and gas utilities.

The survey also shows that:

(1) both the allowed rate of return and the actual rate of return for gas and electric utilities increased in 1977;

(2) utilities received about 50 percent of what they requested in formal rate cases. This compares with 46 percent in 1976, and 67 percent in previous years;

(3) half the commissions see regulatory problems in letting power companies into the residential insulation business;

(4) one-third of the commissions do not have specific powers to deal with energy emergencies;

(5) only one-third of the commissions have attempted to make comparative evaluations of similar utilities, and

(6) only one-fourth of the commissions have looked into further opportunities for interconnecting electric utility systems, which could afford greater conservation and reliability.

IX

CONCLUSIONS

The survey shows that utilities fared well last year. The cost-plus regulatory system under which utilities operate provides them with operating and investment revenues plus profit. Fuel adjustment clauses--a boon to utilities and the bane of customers--have facilitated the collection of more than $35 billion in revenue in four years. As these fuel charges are rolled into the basic rate structure, the identifiable FAC charge on utility bills decreases, although the total bill often increases.

Many utility commissions have permitted use of fuel adjustment clauses as an alternative to the more difficult and time-consuming task of considering rate increase requests in formal hearings, where intervenors and commission staff can challenge, question and counter utility proposals. Commissions generally report that FAC's are subject to periodic review. The authors of the Congressional Research Service analysis make the point that "a periodic review is not the same as an evidentiary hearing, and care must be taken to ensure that such reviews do not simply 'rubber-stamp' the information provided by the utility companies."

Utilities whose rate increase requests were subjected to formal proceedings obtained only half of what they asked for in 1977. It is possible that the $11 billion increase obtained through automatic FAC's might have been similarly reduced had it been subjected to evidentiary hearings.

There are some indications that the states are tightening up on escalation of utility bills through use of FAC's. The number of commissions which did not roll any FAC charges into basic rates increased from seven in 1976 to 11 in 1977. Ten commissions--with Arizona making the choice in mid-August, 1978--now partially or totally prohibit use of FAC's.(*) The Arizona commission based its decision on the sound premise that abolition of the automatic devices would encourage utilities to fight harder for lower fuel costs.

Decision-making regarding retail electric and gas utility rates properly rests with the states rather than the Federal government. The Federal government assists consumers in utility regulatory matters through a grant program initiated through the Senate Committee on Governmental Affairs. This is Section 205 of Public Law 94-385, the Energy, Conservation and Production Act. It provides grants for establishment and operation of offices of consumer services, to assist consumers in their presentations before utility regulatory commissions.

Congress appropriated the full $2 million authorized for Section 205 for both fiscal 1977 and fiscal 1978. Initial grants were made to some states last fall and are being continued for the second year.

(*) Idaho, Montana, Oregon, Nevada, Washington and Utah commissions do not use either electric or gas FAC's. Colorado and Kansas FAC's apply to electricity only. The West Virginia legislature forbade use of FAC's by electric utilities in 1975.

Extension and expansion of this modest but worthwhile program is included in H.R. 4018, the Public Utility Energy Policies Act. It is one of the energy bills on which conferees have reached agreement but which has not been enacted pending resolution of the natural gas legislation. Continuance and expansion of the Section 205 program can be of some help in challenging and reducing unjustified utility rate increase requests.

ELECTRIC AND GAS UTILITY RATE AND FUEL ADJUSTMENT CLAUSE INCREASES, 1977 1/

I. Introduction

This report is the fourth in the series of annual studies done on rate increases in the electric and gas utility industries for the preceding year. These increases (or decreases) to ratepayers result either from general rate changes or through the operation of fuel adjustment clauses (FAC's) in utility tariffs. These latter changes are viewed by some industry observers as not consistent with good commission regulation in the public interest where they are automatic, i.e., no full hearings are undertaken; they are supported by other industry observers as necessary to the financial soundness of utility companies where the alternative is lengthy delay in recovering changes in the prices paid to fuel suppliers.

In gathering the necessary data for 1977, State-by-State and utility-by-utility, the procedure this year as in previous years employed a questionnaire sent to each State regulatory commission (plus Puerto Rico, the Virgin Islands and the District of Columbia). The questionnaire and letter (Appendix A) signed jointly by Chairmen Muskie and Glenn of the Subcommittee on Intergovernmental Relations and Subcommittee on Energy, Nuclear Proliferation and Federal Service, respectively, of the Senate Governmental Affairs Committee, included (for comparability of data for previous years) questions concerning

32-909 O - 78 - 2

general rate increases requested, granted, and pending for gas and electric utilities; revenues occasioned through the operation of FAC's; and the amount of fuel-related increases which were "folded into" the basic rates throughout 1977. New questions included in this year's survey inquired into the proportion of State commission time spent on the regulation of electric and gas companies; opportunities for further system interconnections for wheeling or transmission of electric power; difficulties which may arise from allowing power companies into the residential insulation business; average costs of the various fuels consumed in generating power; commission evaluation of utility performance; and commission authority to deal with energy emergency situations.

By the end of June responses were received from forty-eight commissions, as compared with 46 commissions responding in 1977, 35 in 1976 and 37 in 1975.[1/] A response to this year's questionnaire was also received from the Texas Public Utility Commission and the Nevada Public Service Commission. However, these responses were received too late to be included in the statistical analysis and are therefore included as Appendix C to this report.

1/ The reason that the number of responses differs from table to table is that State commissions often answered some questions but not others, or answered them incompletely.

Taken together with the earlier studies, the present report provides a five-year analysis (1973-1977) of several aspects of the regulatory process and its response to changes in energy (and other) prices.

The 1976 report which analyzed 1975 data found that both general rate increases granted and FAC charges rose significantly over 1974 levels.[1/] The 1977 report, in its analysis of 1976 data, found that both general rate increases granted and FAC charges for the year were below the levels for 1975.[2/] However, the tendency for commissions to "roll-in" FAC charges into the basic rates for service increased during 1976, i.e., while the FAC charges decreased, the amount of fuel costs included in basic rates increased.

This year's survey shows a reduction in the amount of general rate increases granted in 1977 as compared with 1976[3/] ($2.43 billion versus $3.1 billion) and an increase in FAC charges ($10.98 billion

1/ Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1975: by Douglas N. Jones and Angela Lancaster, Senate Committee on Government Operations, Committee print, dated September 1976.

2/ Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1976; by Douglas N. Jones and Russell J. Profozich, Senate Committee on Government Operations, Committee print, dated July 1977.

3/ The figures presented here are those reported by the 48 responding commissions (although the number of commissions responding to specific questions varied) extrapolated to represent the total 52 jurisdictions.

versus $9.6 billion) with the largest increase represented in gas adjustment charges (a 23.89 percent increase over 1976). The amount of rate increases pending in 1977 is the same as in 1976 ($3.89 billion versus $3.9 billion).[1/] Appendix B contains the detailed data compiled from responses to this year's questionnaire.

II. Summary and Interpretation of Responses-- Questions I, II, III

Summary Table I shows a summary of general rate increases requested, granted, and pending for electric utilities as reported by the 48 commissions responding. Approximately $3.79 billion in general rate increases was requested, and $1.92 billion was granted in 1977. The ratio of granted to requested was therefore approximately 50 percent as compared to 46 percent in 1976 and about 67 percent for the previous several years. The total amount of rate increases pending is reported as $2.37 billion. Therefore, if the ratio of granted to requested were to be maintained for the pending cases, the total amount of general increases attributable to 1977 would be upwards of $3.1 billion ($1.92 + 1/2 x $2.37).

1/ See Summary Table V.

SUMMARY TABLE I

ELECTRIC UTILITY GENERAL RATE INCREASES GRANTED AND PENDING SINCE DECEMBER 31, 1976, BY STATES
(in thousands of dollars)

State	Amount Requested	Amount Granted	Amount Pending
Alabama	$205,300	$91,100	$--

Mississippi	--	--	--
Missouri	135,223	58,618	30,963
Montana	19,140	3,591	47,713
New Hampshire	336	336	29,170
New Jersey	117,918	26,507	430,851
New York	495,412	162,182	183,511
North Carolina	77,754	49,640	293
North Dakota	18,012	13,681	--
Ohio	127,603	82,423	109,056
Oregon	85,784	66,398	771
Pennsylvania	100,087	72,657	228,588
Puerto Rico	--	--	--
Rhode Island	5,122	3,658	6,997
South Carolina	30,269	21,797	--
South Dakota	11,142	3,842	967
Tennessee	--	--	2,401
Texas	--	--	--
Utah	43,146	32,297	7,968
Vermont	3,715	3,392	14,261
Virginia	44,360	26,893	7,423
Virgin Islands	--	--	--
Washington	4,100	3,112	19,827
West Virginia	90,385	42,533	12,679
Wisconsin	14,203	7,537	55,995
Wyoming	8,664	7,593	618
Total	$3,790,811	$1,924,156	$2,373,427

SOURCE: Appendix Tables B-V and B-VI.

Comparing these figures with the 1976 totals, we find that with three additional commissions responding in 1977 over 1976 (48 versus 45), the amount of rate increases requested declined by approximately $840 million ($3.79 billion versus $4.63 billion). The amount granted also declined from $2.13 billion in 1976 to $1.92 billion in 1977, as did the amount pending from $2.89 billion to $2.37 billion.

Summary Table II presents similar information for gas utilities. During 1977, $500 million in rate increases was requested and $293 (58.6 percent) was granted by reporting commissions, with $1.13 billion pending at the end of the year. If the ratio of granted to requested continues, the final total of rate increases granted for gas utilities occasioned by 1976 filings would be $1.162 billion ($500 million + 58.6% x $1.13 billion).

Again, comparing the 1977 totals representing 48 jurisdictions with 1976 data for 45 jurisdictions, we find that the amount of rate increases requested declined from $978 million in 1976 to $500 million in 1977. The amount granted declined from $560 million to $293 million, but the amount pending increased from $490 million in 1976 to $1.13 billion in 1977. The ratio of granted to requested for gas utilities increased to 58.6 percent in 1977 from 57 percent in 1976.

Total	$500,588	$292,874	$1,131,739

SOURCE: Appendix Tables B-V and B-VI.

Summing the electric and gas utility general rate increase data for 1977, the 48 responding commissions reported $4.29 billion requested, $2.21 billion granted, and $3.5 billion pending. The comparable totals for 1976 with 45 jurisdictions responding are $5.6 billion requested, $2.7 billion granted, and $3.4 billion pending.

Summary Table III shows electric utility rate increases through the operation of fuel adjustment clauses for 1974, 1975, 1976 and 1977. Although the number of jurisdictions providing information varies for the several years reported, this table shows a large increase in FAC revenues from 1974 to 1975 and a decline in FAC revenues in 1976. FAC revenues for 1977, however, show a slight increase over the 1976 totals. The pattern of rate increases occasioned by FAC's varies dramatically among the various States. California shows an increase in FAC revenues from $586 million in 1974 to $875 million in 1976, with a decline to $374 million in 1977. New Jersey's reported FAC revenues reached a high of $605 million in 1975 and declined to $511 million in 1976 and to $482 million in 1977. Virginia reported FAC revenues $245 million in 1975, $201 million in 1976, and $403 million in 1977.

For all of the jurisdictions responding, Summary Table III reports that electric utility FAC revenues in 1977 were 13.39 percent of total revenues and that these revenues increased by 2.43

Footnotes - Summary Table III

1/ Taken from data submitted in the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increase, 1976, Committee on Government Operations, U.S. Senate, Committee Print, Dated July 1977.

2/ No FAC.

3/ Under Massachusetts law any change in the fuel adjustment changes of electric utilities must be approved by the Dept. of Public Utilities.

4/ Five months ending December 1976.

5/ No State regulation.

6/ FAC included in tariffs of only 2 utilities and has never been applied.

7/ Oregon has no electric FAC. A temporary surcharge was implemented to offset excess power costs because of drought.

8/ None, all require semi-annual hearings.

9/ Fuel Adjustment Clauses were eliminated for electric utilities effective April 1, 1975.

Source: Appendix Table B-VII

percent over the previous year. In 1976, FAC revenues represented 15.1 percent of total revenues, and in 1975 they were 16.5 percent of total revenues. In 1976 FAC revenues declined by 18.3 percent from the previous year, and in 1975 they showed a 23.4 percent increase over the year earlier figure.[1/] Although total FAC revenues in 1977 increased slightly over the previous year, they show a continued decline as a percentage of total electric utility revenues. This decline may represent a slower increase in fuel costs as compared with other costs of providing service or an increase in the amount of fuel charges rolled-in to basic electric utility rates. The subject of fuel adjustment charges rolled-in to basic rates will be taken up in the following section of this report.

Of the 48 jurisdictions providing data for 1977, Summary Table III shows that the range of FAC revenues as a percent of total revenues varied from a low of -0.72[2/] percent in Michigan to highs of 32.27 percent in the District of Columbia and 50.51 percent in Puerto Rico. Changes in 1977 FAC revenues over those in 1976 varied

---

1/ See the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1976, U.S. Senate, Committee on Government Operations, Committee print, dated July 1977, page 7 and Summary Table III.

2/ FAC revenues as a percent of total revenues may be negative in those jurisdictions where utilities made refunds to customers due to a previous over-collection of revenues.

from -127.42 percent in Michigan to 2573.35 percent in Wisconsin. Of the 36 jurisdictions reporting, 23 showed an increase in FAC revenues over the previous year.

Summary Table IV displays similar FAC revenue data for natural gas utilities. Again, with the number of jurisdictions providing information for the various years showing considerable variation, this table shows a general increase in FAC revenues from 1974 to 1977, with some moderation in the rate of increase between 1976 and 1977. For example, New Jersey displays a slight decline in FAC revenues in 1977 as compared with 1976 after reporting a substantial increase in FAC revenues for the previous several years. New York displays a similar pattern, while West Virginia shows a continued increase in FAC revenues from 1974 to 1977. For all the commissions responding, Summary Table IV shows a 5.74 percent increase in FAC revenues for 1977 over 1976. The same table last year reported a 17.92 percent increase in 1976 FAC revenues over 1975.[1/] For 1977, the percentage change in FAC revenues from the previous year varied from -77.91 percent in North Dakota to 391.04 percent in North Carolina. FAC revenues as a percent of total revenues for the jurisdictions

Footnotes - Summary Table IV

1/ Taken from data submitted in the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increase, 1976, Committee on Government Operations, U.S. Senate, Committee Print, dated July 1977.

2/ There are no automatic PGA Clauses in Colorado. All purchased gas cost pass-ons are by application.

3/ No FAC.

4/ No State regulation.

5/ FAC included in tariffs of only 2 utilities and has never been applied.

6/ None, all require semi-annual hearing.

Source: Appendix Table B-VII

reporting averaged 16.50 percent with the range varying from 1.64 percent in Alaska to 47.99 percent in Georgia. In 1976, FAC revenues were 23.04 percent of total revenues for all responding jurisdictions.

Summary Table V presents the actual and derived amounts of rate increases in the electric and gas utility industries based on the 1977 data provided by the responding commissions. This master table also contains national aggregate figures for the previous two years so that certain comparisons can be made with the totals for 1976 and 1975.

Step 1 of Summary Table V merely records the actual totals for rate increases requested, granted, and pending which result from summing the data provided by the 48 commissions responding. Step 2 extrapolates these data to 52 jurisdictions. Note that the $4.73 billion (new) total requested is $1.77 billion less than the similar figure for 1976, also $670 million less was granted in 1977 as compared with 1976 while the total amount pending is vertically the same ($3.89 billion versus $3.9 billion). If the ratio of granted to requested for 1977 were to hold in resolving the pending rate cases, then the grand total for general rate increases assignable to 1977 filings would be $4.41 billion ($2.43 + 51 percent of $3.89 billion). This figure would compare with similarly calculated totals of $5 billion for 1976 and $7.6 billion for 1975.

32-909 O - 78 - 3

SUMMARY TABLE V

CALCULATIONS OF THE ACTUAL AND DERIVED AMOUNTS OF RATE INCREASES IN THE ELECTRIC AND GAS UTILITY INDUSTRIES BASED ON 1976 DATA PROVIDED
(in billions of dollars)

	Step 1			Step 2				
General Rate Increases	Actual Jurisdictions, 1977			Extrapolated to 52 Jurisdictions 1/, 1977			(1976 Grand Total) 2/	(1975 Grand Total) 2/
	Electric	Gas	Total	Electric	Gas	Total		
Requested	$3.79	$0.50	$4.29	$4.19	$0.54	$4.73	($+6.5)	($+6.0)
Granted	1.92	0.29	2.21	2.12	0.31	2.43	($+3.1)	($+4.1)
Pending	2.37	1.13	3.50	2.62	1.25	3.89	($+3.9)	($ 5.2)

	Step 3			Step 4			
Fuel Adjustment Charge Increases	Actual Jurisdictions Reporting, 1977			Extrapolated to 52 Jurisdictions 1/, 1977			
	Electric	Gas	Total	Electric	Gas	Total	
	$5.65	$2.95	$8.60	$6.52	$4.46	$10.98	
				($+6.0)	($+3.6)	($+9.6)	(Grand Total 1976) 2/
				($+7.9)	($+3.6)	($+11.5)	(Grand Total 1975) 2/

Footnotes - Summary Table V

1/ Assumes non-responses are proportional to actual response.

2/ Taken from data submitted for the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increase, 1976, Committee on Government Operations, U.S. Senate Committee Print, dated July 1977, Summary Table V, Page 13.

Source: Commission response to 1977 data request and data submitted for the earlier report.

Step 3 presents the actual FAC electric and gas utility revenue totals for the jurisdictions responding, and step 4 extrapolates these data to 52 jurisdictions. The $5.65 billion of reported FAC increases for electric utilities extrapolates to $6.52 billion; the $2.95 billion for gas utility FAC increases extrapolated to $4.46 billion; the 1977 total thus becomes $10.98 billion. Comparing these figures with those similarly calculated for 1976, we find that electric utility FAC revenues have increased by $500 million ($6.5 billion versus $6.0 billion) and gas utility FAC revenues have increased by $860 million ($4.46 billion versus $3.6 billion). Thus, total FAC increases for 1977 of $10.98 billion compare with $9.6 billion for 1976. The rather large increase in gas utility FAC revenues for 1977 is likely a reflection of the continued shortage of national gas supplies and the recent price increases granted for interstate sales of this commodity.

Finally, then, if the FAC increases are added to the actual and likely general rate increases, the national aggregate resulting from electric and gas utility filings for 1977 would be $15.39 billion ($2.43 billion + $1.98 billion + $10.98 billion). This figure compares with the similarly calculated figure of $14.6 billion for 1976 and $18.0 billion for 1975.

An examination of the detailed information contained in Appendix Table B-V and B-VI reveals that of 306 general rate increases

requested in the electric and gas industries, eight companies asked for a percentage increase in excess of 50 percent, and five companies requested a reduction in rates. The average percentage increase requested was 15 percent, the comparable figure for 1976 was 18 percent, and for 1975 20 percent.

The average allowed rate of return in 1977 for the 270 gas and electric companies for which information was reported was 9 percent, compared with 8.3 percent in 1976 and 8.24 percent in 1975. The actual rate of return experienced by the 106 companies for which data was provided was 7.7 percent in 1977 and for 105 companies in 1976 the figure was 7.5 percent.[1/] Thirteen of the rate increase requests reported for 1977 resulted in either no increase granted or a reduction in rates to customers.

III. Summary and Interpretation of Responses-- Questions IV and VIII

A. Fuel Adjustment Clauses Rolled In to Basic Rates

As was the case in previous years, the commissions were asked several questions relating to the operation of automatic fuel adjustment clauses (FAC's). Question IV asked the commissions to indicate

---

1/ See the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1976, op. cit., p. 14.

the amount of fuel charges which had previously been included in the FAC which during 1977 have been folded into basic rates. The purpose of this question is to get some indication of the extent of the recovery of fuel costs in the basic rates of utilities as opposed to recovering these costs through the operation of FAC's. Also, in order to determine the total change in electric and gas utility revenues attributable to changes in fuel costs, both FAC revenues and FAC roll-ins must be considered. Appendix Table B-VIII shows commission responses to question IV for electric and gas utilities.

Of the commissions which allow FAC's within their jurisdiction, 32 responded to question IV and provided usable data. Of these 32 responses, 2 commissions reported some electric utility roll-ins but stated there were none for gas utilities, and 9 commissions reported no roll-ins for either electric or gas utilities. Of the total number of responses, 23 commissions reported some gas and/or electric utility roll-ins for 71 utility companies.

For electric utilities, 21 commissions covering 44 companies reported some roll-in of fuel charges for 1977. The highest roll-ins reported were Alaska at 2.78 and 1.536 cents/kwh and Rhode Island at 1.448 cents/kwh. The lowest roll-ins reported include reductions of 0.170 cents/kwh in North Carolina, 0.022 cents/kwh in North Dakota, and 0.128 cents/kwh in Michigan, and a 0.01 cent/kwh increase in Alaska. Nine commissions reported no FAC roll-ins for 1977.

For gas utilities, 11 commissions covering 27 companies reported some roll-ins of gas fuel adjustment charges. The highest roll-ins reported were in Illinois at 11.31 and 11.25 cents/therm and North Dakota at 15.632 cents/therm. The lowest roll-in reported was also in Illinois at 0.77 cents/therm. Eleven commissions reported no gas FAC roll-ins for 1977.

Appendix Table B-IX was prepared from data supplied by the commissions in response to question III, giving FAC's for December 1976 and December 1977, and question IV, giving the amount of FAC roll-ins for 1977. Only those commissions responding to both question III and question IV are included in this table in an attempt to determine the total increase (or decrease) in fuel costs reflected in utility rates in 1977. Appendix Table B-IX shows separately for electric and gas utilities the amount of the roll-in in 1977 [Col. (1)] and the December 1976 and December 1977 FAC's [Col. (2) and (3), respectively]. From these data are calculated the percent that 1977 roll-ins were of December 1977 fuel adjustment charges [Col (4)], and the percentage increase (or decrease) in FAC's from December 1976 to December 1977 [Col. (5)]. The sum of these data [shown in Col. (6)] indicates the total increase (or decrease) in fuel charges for the various utilities since December 1976, as reflected both in FAC's and in the fuel portion of the basic tariffs. There are 30 commissions representing 101 electric and 104 gas utilities included in this table.

The data contained in Appendix Table B-IX show a continuation of the trend which was displayed in the same table in last year's report; i.e., for the utilities which show an inclusion of fuel charges in the basic tariffs, this increase in the fuel portion of utility rates is offset (partially or totally) by a decrease in the fuel adjustment clause. A greater number of commissions, however, reported no FAC roll-ins for 1977. (Commissions in 11 jurisdictions reported no FAC roll-ins for 1977, whereas 7 commissions reported no FAC roll-ions for 1976.) Also, a number of commissions reported that changes in the fuel adjustment charges of the utilities within their jurisdiction are subject to periodic review. These two conditions may indicate a closer review of utility fuel-related expenses on behalf of commissions than has been the case in the past.

Of the 101 electric utility companies listed in Appendix Table B-IX, 58 had no change in the rolled-in portion of fuel charges (i.e., the commission reported no roll-ins), and 3 companies had a decrease in the amount of fuel charges included in basic rates. Of these 61 companies, 21 also had a negative percentage change in the December 1976 to December 1977 FAC, resulting in a negative (decrease) total percentage change in fuel charges in 1977 (as reported in column 6 of the table). A total number of 33 electric utilities of those for which data was tabulated show a decrease in the amount of fuel charges

for 1977, thus total fuel charges are continuing to increase for about two-thirds of the companies reported.

For the gas utilities, 77 of the 104 companies listed have zero roll-ins for 1977. However, only 22 of the companies have a negative total percentage changes in fuel charges for 1977, indicating that even with the lower number of roll-ins total fuel charges continued to increase during 1977.

B. Average Costs of Fuels Consumed in Generating Power, December 1975, 1976 and 1977

In an attempt to determine the percentage increase in the cost of fuels used in generating electricity with which to compare the percentage increase in utility fuel adjustment changes, the commissions this year were asked to supply data on the average costs of the various fuels consumed in generating power for the utilities within their jurisdiction as of December 1975, 1976 and 1977. Eighteen commissions responded to this question and provided data on the average cost of fuels used in generating electric power. However, in most instances the cost figures provided were not for individual utility companies but rather an average cost figure for all the electric utility companies within a particular jurisdiction. Also, in most instances, the cost figure provided is not on a per kwh generated basis but rather on a per million Btu basis (which is a measure of the heat content

of the fuel), or on a cost per ton (for coal), or per barrel (for oil), or per therm (for gas). Thus a direct comparison of the percentage increase in fuel costs with the percentage increase in FAC charges is not possible. This is due to the fact that fuels consumed in generating power are converted from a per Btu basis to a per kwh basis at various levels of efficiency, depending on the efficiency of each generating facility on a utility's system. The cost per kwh generated for an entire system is the weighted average of the cost per kwh generated at each power plant on the system.

The data supplied by the commissions in answering the question on average fuel costs is contained in Appendix Table B-X. Although a direct comparison with increases in fuel adjustment clauses cannot be made, some useful comparisons of the data provided can still be accomplished. The data in this table shows a wide variation in the change in fuel costs among the various States and within the same State. In Florida, for example, the combined cost of fuel on a per kwh basis decreased by 16 percent for one utility between 1975 and 1977 but increased by 35 percent for another utility. With 11 jurisdictions providing data, the average cost of nuclear fuel increased by 26.42 percent from 1975 to 1977 with the largest increase of 95.23 percent reported in California and a reduction in cost of 44.47 percent reported by Connecticut. Thirteen jurisdictions reported an

average increase in the cost of oil used to generate power of 16.57 percent, with the largest increase of 39.32 percent occurring in Illinois and a reduction in cost of 39.55 percent reported in Louisiana. The average increase in the cost of gas for 1975-1977, with 13 jurisdictions reporting, was 66.66 percent with Mississippi reporting both the largest increase; 148.24 percent, and the lowest; a 5.73 percent reduction. Coal averaged a 13.29 percent increase for 21 jurisdictions, the highest increase of 54.34 percent reported by Utah, and the lowest, a negative 30.27 percent, reported by South Carolina.

IV. Summary and Interpretation of Responses-- Questions V, VI, VII, IX and X

With each annual survey, questions in addition to FAC information are asked of the commissions treating several current or continuing issues. Answers to five questions (numbers V, VI, VII, IX and X on this year's questionnaire) are displayed in Summary Table B-XI and are discussed below.

In this year's survey, a question was asked about the relative amount of commission time devoted to the regulation of electric and gas companies where a comission has jurisdiction over the transport and/or communications sectors as well (Ouestion V). The answers to this question appear in Column 1 of Appendix Table B-XI.

With 44 jurisdictions replying, the average time spent on electric and gas utility regulation by commissions with multiple jurisdiction was 50 percent. The range of responses varied from 10 percent (Tennessee) to 85 percent (Wyoming). Of note also is that 19 commissions spent 60 percent or more of their time on this aspect of their regulatory authority. Footnotes to the table indicate that the basis for estimation varied somewhat in these responses--one State using relative budgets, another reporting according to time spent by the functional divisions within the commission (e.g., Engineering, Accounting, etc.), and another estimating by number of hearing days attributable.

Ouestion VI asked if commissions had looked into further opportunities for system interconnection for the purpose of pooling or wheeling of electric power. The summary of replies to this question appears in Column 2 of the table.

Of the 46 States responding, only 11 said that they had examined such opportunities during 1977. In answering in the negative, some commissions indicated that they largely left the issue up to utilities to determine; others felt that all opportunities have already been exhausted; and one (Wisconsin) reported that the exception is where the commission looks for potential for joint ownership of new generating capacity by municipal or other small utilities.

Puerto Rico and the Virgin Islands concluded that the question doesn't apply to their circumstances.

It would seem fair to say that passage of the National Energy Act with its emphasis on power interties might well see a larger percentage of commissions active in this aspect of their regulatory authority. Admittedly, however, it is a difficult undertaking in that interconnects, pooling and wheeling arrangements are often fraught with substantial technical, legal and institutional obstacles for individual State commissions.

Question VII asked if the commissions foresaw any regulatory difficulties arising out of placing the power companies into the residential insulation business. Answers from the 46 commissions replying to this question appear in Column (3), with 18 saying "yes", 18 saying "no", and 7 stating that they are currently studying the matter.

The actual or presumed difficulties, as seen by the regulator, were several in number. Some cited the problems of raising capital in an industry already worried about its substantial capital needs (Delaware, Hawaii, Wyoming); some said that the utility companies lacked expertise in the field (South Carolina, Texas); most worried about the problems posed directly for ratemaking (Georgia, Iowa) and for cost-of-service separations and accounting (Louisiana, Maine,

New Jersey, Oregon, Tennessee, Washington). While some said it was too early to tell (New York) or that its relation to ratemaking was yet to be determined (Massachusetts), others were adamant that insulation-related costs and assets not get mixed up with allowable utility expenses or rate base (Maine). The Indiana response was, perhaps, most vehement in stating

> ... it would take an entire volume ... to explain the problems ... from allowing power companies into the insulation business. [I] can see very little good and much potential difficulty with regulated electric and gas utilities becoming involved.... We've only recently been successful with getting them out of the appliance sales business....

The status of the several programs varies a great deal. Two States have experimental programs (Virginia, New Jersey); the issue is pending before the Arkansas Commission: the Idaho Commission opposed the power company's application to promote and guarantee loans for insulation (not to make loans), but required that loan guarantees be available to all customers--not only electric heating customers as requested by the company.

Question IX inquired of the commissions to acknowledge if they make any attempt to evaluate explicitly, one against another, the performance of utilities similarly circumstanced. As presented in Column (4) of the Appendix Table B-XI, of the 42 jurisdictions replying only 14 answered in the affirmative, with 23 answering in the negative and 5 saying "not explicitly."

Methods of comparison included rate level comparisons (Iowa) and efficiency audits (Michigan and Missouri). Some felt that the question was not applicable to their commission because there is only one generating utility within its jurisdiction (Delaware, Puerto Rico, Virgin Islands). This is to take a very limited view of possible comparabilities, however, in that there may be utilities similarly circumstanced against which efficiency and other comparisons might be made, though this is somewhat more difficult when they are located in other jurisdictions. In any event, this area of State commission regulation--the setting and measuring of standards of utility company performance, one against another--has long been viewed by academics and other professionals in the public utility field as holding great potential for improving regulation in the public interest. The major resistance has come, not surprisingly, from the utilities which argue the uniqueness of each utility system.

The matter of extraordinary authority for dealing with declared or undeclared energy emergency situations was the subject of Question X. As indicated in Column (5), the results show that 29 commissions feel that they have such authority and 16 reported that such powers were not specifically provided them. Most of the emergency authorities (in addition to rate relief) have to do with curtailment and allocation plans, either filed by the utility companies for commission

approval or initiated by the commissions. The Missouri Commission has authority to order the sharing of fuel and power inventories; New York has electric load shedding procedures; Texas can order augmentation of natural gas supplies; the Georgia Commission must approve emergency purchases of natural gas.

A number of State commissions look to the Governor's Office in energy emergencies. In Iowa, the commission chairman is energy adviser to the Governor; the Maryland Commisioner may administer the Governor's executive orders; Massachusetts counts on "voluntarism and the Governor"; the Michigan Energy Administration has the responsibility in that State; in North Carolina, the Governor's emergency powers are said to "take care of it"; and in Virginia, the Governor with the commission allocates emergency natural gas supplies.

Considering the information supplied, it appears that a good deal more could be done before one could conclude that the State regulatory commissions taken as a whole have comprehensive contingency plans able to be quickly implemented should the need arise.

V. Summary

The data supplied by the various regulatory commissions and summarized in the preceding sections of this report show that substantial general rate and fuel cost adjustment charge increases are

continuing to impact upon the ratepayer. General rate increases of $2.4 billion and FAC increases of $11 billion during 1977, as extrapolated to 52 jurisdictions from those reporting, are ample evidence of a continued increase in the rates of charge for electric and gas utility service. The figures obtained in this year's report, however, represent some interesting variations from those obtained in the previous two years.

Total general rate increases requested in 1977 were reported to be $4.7 billion, as opposed to $6.5 billion in 1976 and $6.0 billion in 1975. This substantial reduction in the amount of rate relief requested by the Nation's electric and gas utilities may reflect the gradually improving financial health of the industry and the fact that some $11-12 billion in general rate increases was granted during the previous two-year period.[1/] The amount of rate relief granted during 1977, some $2.4 billion, is also below the 1976 figure of $3.1 billion, while the amount pending is identical ($3.9 billion). These figures may indicate a lengthening of the time taken to resolve a formal rate request since the percentage of rate increases pending to requested is higher than it has been in the past two years.

1/ As reported in last year's report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1976, op. cit., p. 12.

32-909 O - 78 - 4

Although the amount of rate increases requested and granted has declined during 1977, the amount of fuel adjustment charge increases has increased. The total amount of fuel adjustment charge increases reported in 1975 was $11.5 billion (as extrapolated to 52 jurisdictions). The same figure for 1976 was $9.6 billion, and for 1977 it is $11 billion. The largest increase in the FAC charges occurred among the gas utilities, as recent price increases seem to have worked their way through the system. The latest figures for fuel cost adjustments offer little reason for optimism that the fuel portion of a consumer's utility bill will cease its recent precipitous increase.

The practice of "rolling-in" changes in fuel supply cost into the basic rate schedules of utility company tariffs continued this year, although at what appears to be a somewhat slower rate than during 1976. This year (1977) the number of commissions reporting no FAC roll-ins increased to 11, from a reported 7 commissions in 1976. Also, a number of commissions this year reported a periodic review of FAC charges, an occurrence which may become a trend in future years. However, it is important to remember that a periodic review is not the same as an evidentiary hearing, and care must be taken to ensure that such reviews do not simply "rubber-stamp" the information provided by the utility companies.

(202) 224-4718
(PURSUANT TO S. RES. 4 AND S. RES. 78, 95TH CONGRESS)
WASHINGTON, D.C. 20510

Letter sent to all state commission chairman

March 14, 1978

Dear :

Each of the past three years Senate Governmental Affairs subcommittees have jointly surveyed State utility commissions regarding fuel adjustment clauses and other matters related to utility rates. The information collected, and published after tabulation and analysis by the Congressional Research Service of the Library of Congress, has proven useful to regulators, other Federal and State officals and the energy industry.

Last year 45 State Commissions--the most ever--cooperated in this survey. So that all affected parties can better gauge the impact of rate and automatic adjustment clause changes and update information collected previously, we would appreciate your completion of the enclosed questionnaire, as it applies to electric and gas utilities regulated by your commission.

This survey has been discussed with the National Association of Regulatory Utility Commissioners, which verified that this questionnaire would not duplicate data which it or others collect, and that your and other commissions' responses will be useful to NARUC and its constituent commissions. In addition, the data will be helpful to the Department of Energy and the Congress, whose energy conferees have called for studies of the operation of automatic adjustment clauses.

The questionnaire is designed for reporting information for calendar year 1977. It will be most helpful if you complete and return it no later than April 21, 1978. If you have any questions or difficulties regarding the questionnaire, please call Russell J. Profozich at the Library of Congress

please call Russell J. Profozich at the Library of Congress (202) 426-6408, David Johnson, counsel to the Subcommittee on Intergovernmental Relations (202) 224-4718 or Vic Reinemer of the Subcommittee on Energy, Nuclear Proliferation and Federal Services (202) 224-1474.

The completed questionnaire should be sent to Mr. Profozich, Economics Division, Congressional Research Service, Library of Congress, Washington, D.C. 20450.

Your cooperation will be deeply appreciated.

Enclosed for convenient reference is last years's committee print, "Electric and Gas Utility Rate and Fuel Adjustment Clause Increases 1976."

Enclosure

QUESTIONNAIRE TO STATE COMMISSION CHAIRMEN
Table of Energy Utility Rate Increases, 1977

I. Rate Increases Granted by _____ during 1977
(Type in state regulatory body name)

Utility	Type	Amount Requested $ Amount	Amount Requested % Increase	Amount Granted	Allowed Rate of Return (1977)	Actual Rate of Return (1977)	Fair Value or Original Cost Basis	Date of Disposition
	A. Electric							
	B. Gas							

II. Rate Increases Pending Before Your Commission

Utility	Type	Amount Requested $ Amount	Amount Requested % Increase	Allowed Rate of Return (1977)	Requested Rate of Return (if different)	Fair Value or Original Cost Basis	Date Filed
	A. Electric						
	B. Gas						

III. Rate Increase Through Operation of Fuel Adjustment Clauses (i.e., granted without full evidentiary hearings)*

Utility	Type	Total Revenue (1977) from Utility Sales	1977 Revenues Derived from FAC	1976 Revenue Derived from FAC	December 1977 FAC in cents/kwh or cents/therm	December 1976 FAC Revenues in cents/kwh or cents/therm
	A. Electric					
	B. Gas					

* FAC includes both fuel adjustment clauses (electric utilities) and purchased gas adjustment clauses (gas utilities).

Questionnaire to State Commission Chairmen (Cont.)

IV. If during 1977 fuel charges previously handled through FACs have been folded into basic rates, please give date and total dollar amount folded in.

V. Where your commission has jurisdiction over several public utility sectors (e.g., power, communications, transportation) what proportion of commission time would you estimate is spent on the regulation of the electric and gas companies?

VI. Has your commission in 1977 examined any opportunities for further system interconnections for the wheeling or transmission of electric power? If so, what are the results?

VII. Does your commission foresee any regulatory difficulties arising from allowing the power companies into the residential insulation business as proposed in various legislative initiatives? Please elaborate.

VIII. For utilities under your jurisdiction, what were the average costs for the various fuels consumed in generating power as of December 1975, December 1976, and December 1977?

IX. Does your commission make any attempt to evaluate explicitly, one against another, the performance of utilities similarly circumstanced?

X. What extraordinary authorities does your commission possess to deal with energy emergency situations, whether formally declared or not? If exercised in 1977, please give details.

Footnotes to Table VII

N/A = not available.

N.A. = not applicable.

1. = Flow through not effective.

2. = These figures do not include the fourth quarter.

3. = Surcharge not in effect.

4. = These figures do not include the third or fourth quarters.

5. = These figures do not include the second, third, or fourth quarters.

6. = Public Service Company's FCA is not automatic. Monthly applications are submitted and reviewed.

7. = There are no automatic PGA clauses in Colorado. All purchased gas cost pass-ons are by application.

8. = Firm.

9. = Off-peak.

10. = High-tension.

11. = Low-tension.

12. = Residential.

13. = Commercial.

14. = Inside Chicago.

15. = Outside Chicago.

16. = These utilities do not have fuel adjustment clauses.

17. = 1st half of month.

18. = 2nd half of month.

19. = North.

Footnotes to Table VII (continued)

20. = South.

21. = Area A.

22. = Area B.

23. = Farm Top.

24. = Town.

25. = Vandalia.

26. = Harrisburg.

27. = Metropolis.

28. = Louisiana only.

29. = Under Massachusetts law any change in the fuel adjustment charges of electric companies must be approved by the Dep't. of Public Utilities.

30. = Firm customer revenue only, interruptible sales omitted.

31. = Five months ending December 1976.

32. = Levelized July 1, 1977.

33. = Oregon has no electric FAC. A temporary surcharge was implemented to offset excess power costs because of drought.

34. = Penn Fuels Gas, Inc.

35. = None, all require semi-annual hearings.

36. = FAC went into effect June of 1977.

37. = No fuel clause contained in rate schedules.

38. = No rate increases were granted through the operation of Fuel Adjustment Clauses.

39. = Total company, not just Vermont.

Footnotes to Table VII (continued)

40. = First 500 kwh at 0.123 cents; 0.444 cents/kwh thereafter.

41. = Fuel Adjustment Clauses were eliminated for electric utilities effective April 1, 1975. See 30-B proceedings for pass-through of increased costs, which is a tariff adjustment, not a monthly changing surcharge. 30-B's may be processed without a hearing.

cbf

1/ Taken from data submitted in the earlier report, Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1976, Committee on Government Operations, U.S. Senate, Committee Print, dated July, 1977.

2/ Includes electric and gas utility fuel adjustment charges.

3/ There are no automatic PGA clauses in Colorado. All purchased gas cost pass-ons are by application.

4/ No FAC.

5/ Under Massachusetts law any change in the fuel adjustment charges of electric utilities must be approved by the Department of Public Utilities.

6/ FAC included in tariffs of only 2 utilities and has never been applied.

7/ Oregon has no FAC. A temporary surcharge for electric rates was implemented to offset excess power costs because of drought.

SUMMARY OF TABLE B-VII (Continued)

8/ None. All require semi-annual hearings.

9/ Fuel Adjustment Clauses were eliminated for electric utilities effective April 1, 1975.

APPENDIX TABLE B-XI

SUMMARY OF STATE COMMISSION REPLIES TO QUESTIONS V, VI, VII, IX AND X OF QUESTIONNAIRE ON NON-FAC ITEMS, 1977

State	(1) Question V % Time On Utility Regulation	(2) Question VI Further System Interconnection	(3) Question VII Utility Participation in Insulation	(4) Question IX Performance Comparisons	(5) Question X Energy Emergency Extraordinary Authority
Alabama	50%	No	No	No	None
Alaska	30	No	Yes	Not explicitly	No express authority.
Arizona	40	No	No	No	None
Arkansas	67	No	Pending issue	No	Gas and elec. must file curtailment plans.
California	35-40	Yes	No	Yes	End-user priority system re. curtailment; gas & elec. 1/
Colorado 2/	--	--	--	--	--
Connecticut	60	No	Currently studying	No	State curtailment plan--national gas; residential
Delaware	50	No	Yes, capital financing	NA	None
District of Columbia	70	Yes	No	No	Authority to curtail or discontinue service.
Florida	20	Yes	No	Not explicitly	Approval of utility disaster and emergency plans.
Georgia	35	No	Yes; financing	No	Approval of emergency purchases of natural gas.
Hawaii	50	No	Yes; cost of of capital 3/	Not explicitly	Has emergency authority but not exercised in 1977.
Idaho	60	No	Requires loan guarantees	No	Power to declare emergencies and order curtailment.
Illinois	25 4/	Yes	No	Not explicitly	Yes; curtailment plan approved.
Indiana	50	No	Yes, much potential difficulty	No	Yes; including curtailment of electric power.

APPENDIX TABLE B-XI (Continued)

SUMMARY OF STATE COMMISSION REPLIES TO QUESTIONS V, VI, VII, IX AND X OF QUESTIONNAIRE ON NON-FAC ITEMS, 1977

State	(1) Ouestion V % Time On Utility Regulation	(2) Ouestion VI Further System Interconnection	(3) Ouestion VII Utility Participation in Insulation	(4) Question IX Performance Comparisons	(5) Question X Energy Emergency Extraordinary Authority
Iowa	60%	Yes	Yes, in ratemaking	Yes, rate level comparisons	Commission chairman is energy adviser to Governor.
Kansas 2/	--	--	--	--	--
Kentucky	--	--	--	--	--
Louisiana	30	No	Yes, separtion of revenue & costs	No	None
Maine	25	No	Yes, disallowing expenses, rate base 5/	Yes	Has limited emergency powers re. suspension or amendment.
Maryland	67	Yes	No	--	Commission may administer Governor's executive order.
Massachusetts	65-70	Not in 1977 6/	No, but rate-making not decided	No, but implicit efficiency audits are used	Not expressly provided for.
Michigan	67-75	Yes, new interconnections	No	Efficiency audits	Mich. Energy Admin. has comprehensive contingency plan.
Minnesota	50	No	No	No	None
Mississippi	70	No	No	No	None
Missouri	70	No	No	Yes, efficiency audits	Rate & surcharge relief; sharing of fuel & power inventories.
Montana	60	No	NA	Yes	None
Nebraska	--	--	--	--	--
Nevada	--	--	--	--	--
New Hampshire	50	No	No	No	Has emergency authority.
New Jersey	40-45	No	Yes, accounting and administration 7/	No	Has curtailment plan power.

APPENDIX TABLE B-XI (Continued)

SUMMARY OF STATE COMMISSION REPLIES TO OUESTIONS V, VI, VII, IX AND X OF OUESTIONNAIRE ON NON-FAC ITEMS, 1977

State	(1) Ouestion V % Time On Utility Regulation	(2) Ouestion VI Further System Interconnection	(3) Ouestion VII Utility Participation in Insulation	(4) Ouestion IX Performance Comparisons	(5) Question X Energy Emergency Extraordinary Authority
New Mexico	--	--	--	--	--
New York	60%	Yes	Too early to tell	Yes	Yes, electric load shedding procedures during fuel shortage.
North Carolina	50-67	Yes	Currently studying	Yes, implictly	Part of Governor's emergency powers.
North Dakota	15	No	No	Yes	None
Ohio	35	Yes	Yes, non-payments	Yes	Commission has statutory authority.
Oklahoma	--	--	--	--	--
Oregon	60-70	No	Reviewing	No	Gas & Elec. must file curtailment plans for approval.
Pennsylvania	44	No	Yes, currently studying	Yes	Has emergency authority re. curtailment, allocations, rates.
Puerto Rico	100	NA	No	NA	Can make immediate changes in rate structure.
Rhode Island	65-70	No	No	No	Partial moratorium on shutoffs for non-payment.
South Carolina	--	No	Yes, expertise and ratemaking	No	--
South Dakota	Majority 9/	No	Yes, size 10/ and allowable expenses	No	None
Tennessee	10	No	Yes, cost separation	No	Not expressly provided; has "emergency rule" re. gas purchases.
Texas	11	NA	Yes, rate base determination	No	Yes, ordering augmentation of natural gas supplies.
Utah	46 11/	No	No	No	None

APPENDIX TABLE B-XI (Continued)

SUMMARY OF STATE COMMISSION REPLIES TO QUESTIONS V, VI, VII, IX AND X OF QUESTIONNAIRE ON NON-FAC ITEMS, 1977

State	(1) Question V % Time On Utility Regulation	(2) Question VI Further System Interconnection	(3) Question VII Utility Participation in Insulation	(4) Question IX Performance Comparisons	(5) Question X Energy Emergency Extraordinary Authority
Vermont	60%	No	Under review	Yes	None
Virgin Islands	10	NA	No	NA	None
Virginia	-- 12/	No	Experimental program	Yes	With Governor, can allocate natural gas.
Washington	25	Yes	Yes, if funded through rate of return	No	Curtailment tariff filing.
West Virginia	--	No	No	No	Power to regulate curtailments.
Wisconsin	80	No 13/	Yes	Yes	Has adequate authority for emergency orders.
Wyoming	85	No	Yes, obtaining capital to finance	No	None specifically.

1/ Utility customers classified into five different categories depending upon usage of gas regarding curtailment priorities. Commission can direct apportionments or let utility companies allocate short supplies.

2/ Replied to questionnaire but did not treat this question.

3/ Idaho Power can promote and guarantee loans for insulation but cannot make loans; must be available to all customers not only electric heating customers as requested by utility.

4/ As measured by commission funding.

APPENDIX TABLE B-XI (Continued)

SUMMARY OF STATE COMMISSION REPLIES TO OUESTIONS V, VI,
VII, IX AND X OF OUESTIONNAIRE ON NON-FAC ITEMS, 1977

5/ Commission feels that ratepayers should pay neither expenses nor return on assets associated with insulation business, and complete accounting separation is required.

6/ May examine interconnection opportunities in 1978.

7/ Had trial program during 1977; utilities had initially opposed; results not reported.

8/ Excluding transportation.

9/ The majority of time spent on communications, gas and electric regulation.

10/ Mentions concern that an already large (Power) industry would become even larger.

11/ As measured by hearing days attributable.

12/ By manhours according to the several divisions of the commission: Engineering, 58 percent; Accounting, 75 percent; Economics, Research and Analysis, 75 percent; General Counsel, 32 percent.

13/ Except for potential for joint-ownership of new generating capacity by municipal or other small utilities.

Public Utility Commission of Texas

April 20, 1978

George M. Cowden
Chairman

Garrett Morris
Commissioner

Alan R. Erwin
Commissioner

GOVERNMENTAL AFFAIRS COMM.
RECEIVED
APR 24 1978
WASHINGTON, D.C. 20510

Committee on Governmental Affairs
U. S. Senate
3308 Dirksen Senate Office Bldg.
Washington, D.C. 20510

Dear Sirs:

Chairman Cowden has asked me to respond to your subcommittees' questionnaire concerning rate increases and fuel adjustment clauses. The Public Utility Commission of Texas was created in 1975 and assumed jurisdictional powers as of September 1, 1976. As a result, some of the information requested pertaining to data prior to our creation do not exist. Secondly, while the Public Utility Commission of Texas regulates the electric, telephone, water, and sewer utilities within the state, the natural gas utilities are under the jurisdiction of the Railroad Commission of Texas. A copy of your questionnaire has been sent to the Railroad Commission for their response.

If you have any further questions, please feel free to contact us. We would appreciate receiving a copy of the survey results at such time it is printed.

Sincerely,

William E. Avera
Director of Economic Research

QUESTIONNAIRE TO STATE COMMISSION CHAIRMEN
Table of Energy Utility Rate Increases, 1977

I. Rate Increases Granted by Public Utility Commission of Texas (Type in state regulatory body name) during 1977

Utility	Type	Amount Requested $ Amount	Amount Requested % Increase	Amount Granted	Allowed Rate of Return (1977)	Actual Rate of Return (1977)	Fair Value or Original Cost Basis	Date of Disposition
	A. Electric							
	B. Gas							

II. Rate Increases Pending Before Your Commission

Utility	Type	Amount Requested $ Amount	Amount Requested % Increase	Allowed Rate of Return (1977)	Requested Rate of Return (if different)	Fair Value or Original Cost Basis	Date Filed
Dallas Power and Light Co.	A. Electric	$76,862,276	22.7%	n/a	15.5% *	Adj. Value	12/28/77
	B. Gas						

*Book common equity

III. Rate Increase Through Operation of Fuel Adjustment Clauses (i.e., granted without full evidentiary hearings)*

Utility	Type	Total Revenue (1977) from Utility Sales	1977 Revenues Derived from FAC	1976 Revenue Derived from FAC	December 1977 FAC in cents/kwh or cents/therm	December 1976 FAC Revenues in cents/kwh or cents/therm
	A. Electric					
	B. Gas					

* FAC includes both fuel adjustment clauses (electric utilities) and purchased gas adjustment clauses (gas utilities).

	B. Gas					

* Includes revenue @ 40¢/MMBTU and @21¢/MMBTU which were in base rate
** 100% of recoverable fuel cost on December kwh sales.

* FAC includes both fuel adjustment clauses (electric utilities) and purchased gas adjustment clauses (gas utilities).

2.3.3 Guidelines for Electricity Shortages

The Public Utility Commission approach to energy emergency allocation in the electrical area is based on two primary principles:

1) Emergency measures must be built on long-range efforts to foster conservation, increase public awareness, and maximize the efficiency of electric generation and distribution. The PUC has ongoing efforts in all these areas.

2) Voluntary actions by the public and utilities are the preferred basis of response. The history of the 1977 crisis showed the willingness and effectiveness of voluntary actions. The PUC has developed a communication link and data base to facilitate rapid response.

Several guidelines were adopted by the Public Utility Commission during the winter of 1976-77 after communications with the Governor's Office and The Federal Power Commission concerning the sale of excess fuels held by Texas generating utilities into the inter-state market. These guidelines will be followed if future shortages require:

1) any utility participating in the voluntary program will be compensated at the cost of replacement fuels;

2) that the program will provide maximum relief possible to our sister states;

3) that electric service to Texas customers will not be interrupted; and

4) that no party participating in the program will realize a windfall profit from its participation.

The PUC is presently building a data base through the UDARS (Utility Data and Reporting System). The Commission has assigned a Manager of Public Utility Reporting and Data Analysis who has a designated person in each utility from whom he can obtain information on current fuel inventories and usage.

Through the data base and formalized communication link, the Commission can estimate the energy availability in the electric sector at a given point in time. The staff has initiated studies of seasonal patterns of usage, fuel inventories, and other characteristics to allow the Commission to anticipate emergency energy availability and to construct alternate response scenarios.

The Public Utility Commission, with a grant from the Governor's Office, is in the process of establishing numerous regional workshops throughout Texas to familiarize the public utilities, lending institutions, and contractors of the benefits of retrofitting older homes with energy saving devices. These workshops are expected to accelerate the trend toward efficiency in the residential sector.

(From the Texas Energy Emergency Planning Guide, January 27, 1978

Responses to CRS - 2

IV. N/A

V. 50% (Electric Only)

VI. Yes. See attached Amended Final Order Docket #14.

VII. No. Presently, some electrical cooperatives sell lamps and electric fixtures as a service to their customers. There is nothing in our Commission Substantive Rules and Regulation that would prohibit either the sale of electrical fixtures or insulation to their ratepayers.

VIII.	Dec. 1976	Dec. 1977
Houston Lighting & Power	$1.07 / MMBTU	$1.07 / MMBTU
Lower Colorado River Authority	$1.98 / MMBTU $2.38 / MMBTU (Fuel Oil)	$1.95 / MMBTU
Texas Electric Service Co.	$0.85 / MMBTU $2.05 / MMBTU (Fuel Oil)	$0.88 / MMBTU $0.45 / MMBTU (Lignite)
Texas Power & Light	$1.35 / MMBTU $0.29 / MMBTU (Lignite)	$1.53 / MMBTU $0.41 / MMBTU (Lignite)
Central Power & Light	$2.00 / MMBTU $1.65 / MMBTU (Fuel Oil)	$1.96 / MMBTU
Dallas Power & Light	$1.66 / MMBTU	$1.90 / MMBTU $0.39 / MMBTU (Lignite)

(All figures relate to natural gas unless otherwise noted)

(December 1975 figures not available).

IX. No.

PUBLIC SERVICE COMMISSION
STATE OF NEVADA

July 20, 1978

Address all communications to the Commission
Telephone (702) 885-4180

KINKEAD BUILDING
505 EAST KING STREET
CARSON CITY, NEVADA 89710

Russell J. Profozich
Economics Division
Congressional Research Service
Library of Congress
Washington, D.C. 20450

Dear Mr. Profozich:

Following are responses to your recent inquiry. The responses are keyed to your questionnaire:

I. See attachment.

II. See attachment.

III. See attachment.

IV. On April 1, 1976 the Public Service Commission of Nevada adopted General Order 21, rules relating to deferred energy accounting procedures. General Order 21 allows for the deferral and amortization of increased or decreased costs for fuel, purchased power and natural gas through the use of deferred energy accounting.

V. It is estimated that approximately 30-35% of Commission time is spent on regulation of electric and gas companies.

VI. The Commission has examined two specific utilities as regards interconnections of electric power in 1977. These utilities are Sierra Pacific Power Company and Nevada Power Company. The Commission was involved with Sierra Pacific Power Company in 1977 which pursued interconnection between Idaho Power Company and itself by means of a 230 KV transmission line. The Commission has previously approved this line. Also, the Commission approved in 1977 an interconnection between Harney Electric Cooperative and Sierra Pacific Power Company in order to establish a direct wire path between the Bonneville Power Administration and Sierra Pacific Power Company. Nevada Power Company has renewed its contracts with numerous companies in California, Arizona and Utah which the Commission monitored in 1977.

In addition to reviewing interconnection contracts the Commission has been actively pursuing a power pooling

study through the Western Conference of Public Service Commissions. The Nevada Commission has played an important role in pursuing federal funding in order to investigate power pooling on a regional basis in the Western United States and will continue to do so in the future.

VII. To date the Commission has not addressed the potential difficulties arising from power companies getting into the residential insulation business. The utilities are currently into insulation programs with respect to financing only.

VIII.

Company	1975	1976	1977
Sierra Pacific Power Co. (Combined)	1.40¢/Kw hr	1.80¢/Kw hr	2.11¢/Kw hr
Nevada Power Company:			
Coal	.539¢/Kw hr	.630¢/Kw hr	.798¢/Kw hr
Natural Gas	.984¢/Kw hr	1.205¢/Kw hr	1.631¢/Kw hr
Oil	2.385¢/Kw hr	2.415¢/Kw hr	2.739¢/Kw hr

IX. Commission makes attempts to evaluate the performance of utilities on a comparative basis as regards the cost of capital. However, it has not explicitly pursued comparative analysis as regards the operations of the specific utilities involved.

X. The Commission has on file emergency plans of both major utilities in the state which are to be implemented by the utilities during emergency situations. Both the utilities emergency energy plans involve load shedding schemes based on frequency response in their systems.

I trust that the above is responsive to your inquiry.

Very truly yours,

PUBLIC SERVICE COMMISSION OF NEVADA

Wm. W. Prokscb, Jr.
