and the Czech citizenship law still left tens of thousands of former Czechoslovaks stateless, every one a Rom. Moreover, there was an important principle at stake: citizenship laws in newly independent states which discriminate against permanent residents who were citizens of the former state on the basis of race, language, religion or nationality are not compatible with international norms. That failure to uphold this principle in the Czech Republic could have critical reverberations in every former Soviet Republic and, more to the point, every former Yugoslav Republic.

Many people working on this issue believed that the 1996 amendment was all that was politically possible; that we would simply have to resign ourselves to a generation of stateless Roma. The leadership of the Helsinki Commission, including the current Chairman, Congressman Chris Smith, held our ground and insisted that the Czech law should be amended again, to bring it into line with international norms.

Meanwhile, throughout this first post-Communist decade, the number of violent attacks against Roma climbed, year after year. By the fall of 1997, some 2000 Czech Roma had requested asylum in Canada. By 1998, NGO’s reported that there had been more than 40 racially motivated murders in the Czech Republic since 1990, more than the number of racially motivated murders in Bulgaria, Romania, and Slovakia combined—countries with much larger Romani populations. Midway through 1998, the city of Usti nad Labem announced plans to build a wall to segregate Romani residents from ethnic Czechs—a ghetto in the heart of Europe.

Fortunately, the Czech Government elected last year appears to take the human rights violation of Czech Roma much more seriously. Early after taking office, Deputy Prime Minister Pavel Rychtinsky announced that amending the Czech citizenship law would be a priority for his government. Acting on that commitment, the Chamber of Deputies has upheld an important principle and, even more importantly, upheld the rights of the Romani minority.

But by doing so, you may be putting your family in danger. Counterfeit police badges—and fraudulently obtained real ones—have allowed criminals to invade people’s homes and terrorize their families.

In 1997, Los Angeles police arrested two men who had more than 30 home-invasion robberies by impersonating police officers. Among the more than 100 items confiscated from the suspects’ home were official Los Angeles police badges.

Despite state statutes against impersonating police officers, counterfeit badges appear to have disturbingly easy access to police badges and the means to manufacture counterfeit badges. The local Fox television affiliate in Los Angeles found out just how easy it is in an undercover investigation. The undercover reporter bought a fake Los Angeles Police Department badge from a dealer for $1,000, a fake California Highway Patrol badge for $40, and for $60 a fake badge from the police department of Signal Hill (a city in my Congressional District).

The threat of counterfeit police badges reaches across state lines. Criminals can purchase badges on the Internet and through mail-order catalogs. The interstate nature of the counterfeit badge market calls for a national response to this problem. There is currently no federal law dealing with counterfeit badges of state and local law enforcement agencies.

H.R. 2633, the Police Badge Fraud Prevention Act, would ban the interstate or foreign trafficking of counterfeit badges and genuine badges (among those not authorized to possess a genuine badge). This legislation would complement state statutes against impersonating a police officer, addressing in particular the problems posed by Internet and mail-order badge sales. The bill is similar to H.R. 4282 in the 105th Congress. The new version of the bill includes exceptions for cases where the badge is used exclusively in a collection or exhibit; for decorative purposes; or for a dramatic presentation, such as theatrical, film, or television production.

The term ‘genuine police badge’ means an official badge issued by public authority for a dramatic presentation, such as theatrical, film, or television production.

The term ‘could’ means an item that resembles a police badge that it would deceive an ordinary individual into believing it was a genuine police badge.

The Connecticut State Technology Extension Program (CONN/STEP) provides onsite technical assistance, detailed assessments, outlines potential solutions, and identifies external service providers. CONN/STEP is funded jointly by the State Department of Economic and Community Development and the National Institute of Standards and Technology (NIST) under the Department of Commerce.

Here’s how CONN/STEP helped one local company in Bristol, Connecticut. Ultimate Wireforms manufactures arch wires and other orthodontic alloys and stainless steel for orthodontic or denture applications. The arch wires apply pressure to teeth, slowly causing them to move a predetermined amount to correctly position teeth. The company has provided...
