work, ingenuity, dedication, and sacrifice of the men and women of IOPA. IOPA was formed in 1904, in the wake of the discovery of vast amounts of crude oil and natural gas beneath the rugged terrain of the southern San Joaquin Valley, including Kern County. IOPA is proud to serve that smaller group of producers, many of them families, received a fair market price for the oil they produced, as can be seen in its mission statement: “It is the mission of the Independent Oil Producers’ Agency to secure equitable prices for its members’ crude oil and to serve these members at the government, business, and industry levels in matters relating to advocacy, legislative, and regulatory affairs.”

Utilizing the proven powers of a cooperative marketing agency, IOPA has succeeded in achieving its objective. During the past century, as it served its members, IOPA has also served our nation by providing a steady domestic source of oil during wars, shortages, and embargos. It is also important to note, and I appreciate the fact that, IOPA and its members have given back to the community by supporting community activities, education, scholarships, museums, and hospitals. Accordingly, I trust that my colleagues will join me in congratulating IOPA upon their 100th anniversary.

INTRODUCTION OF THE EFFECTER ACT “EFFICIENT ENERGY THROUGH CERTIFIED TECHNOLOGIES AND ELECTRICITY RELIABILITY ACT OF 2004”

HON. RANDY “DUKE” CUNNINGHAM OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 22, 2004

Mr. CUNNINGHAM. Mr. Speaker, I rise today as our country celebrates Earth Day to introduce the Efficient Energy Through Certified Technologies and Electricity Reliability EFFECTER Act of 2004. I am joined in this effort by a substantial and diverse coalition of my colleagues including Mr. Markey of Massachusetts, my Chairman Mr. Lewis of California, Mr. Matsui of California, as well as Senator Snowe of Maine and Senator Feinstein of California. This bill is a more developed version of the EFFECT Act that Mr. Markey and I introduced in March 2003.

With the President’s Energy Plan currently stalled in the other body, we believe that this bill can deliver on one of the less controversial issues when it comes to energy policy—energy efficiency. I support the President’s Energy Plan and voted in favor of H.R. 6 when it came before this body for final passage. Unfortunately, politics has prevented this fine legislation from implementing a desperately needed energy policy in this country.

My constituents in San Diego suffered through the Energy Crisis during the summer of 2001. The aftereffects of the rolling blackouts and outrageously high energy prices are still being felt. Gas prices in California are currently the highest in the country at over $2.50 per gallon. The entire Eastern seaboard suffered through a major blackout last August, also highlighting the consequences of needing the comprehensive energy policy of H.R. 6. We risk another major blackout and continually soaring fuel prices if we choose to wait for the policymaking to end and H.R. 6 to be implemented. My constituents, the American people need solutions now. I am introducing this bill in an effort to pass a portion of our long-term energy plan that can produce results now.

In our legislation introduced last year, Congressman Markey and I created legislation that would give builders and consumers a reason to construct housing and purchase equipment that not only saves the consumer money in the long run, but also helps save energy. We have taken this idea and have put it into this bill along with other cost-saving provisions. This legislation offers tax incentives to encourage the production and sale of technologically advanced, energy-efficient buildings and equipment. The incentives will reduce peak power demand, which can diffuse the risk of blackouts and high electricity prices. Peak power shortages cost California $15 billion in 2000 alone.

These tax incentives are performance based, not cost based. One dollar of federal tax incentives for energy efficiency offered today will not be paid until January–April 2005, but manufacturers will respond to the incentives by investing in production facilities for more efficient products immediately. This will promote the creation of competitive markets for new technologies and designs that are not widely available today, but have the possibility of being cost effective to the consumer in the future.

This bill will have the government lead by example by cutting our own energy bills by upgrading our building energy efficiency standards and purchase specifications, and reauthorizing Federal Energy Savings Performance Contracts, which allow private companies to partner with the government for mutually beneficial cost-effective energy savings. Finally, it includes mandatory electricity reliability requirements that address directly the failures that caused the blackout of 2003.

This bill increases the security and reliability of the electric grid, while reducing natural gas and electricity prices by cutting the demand for natural gas and electricity in the near term, as well as in the longer term. Grid security is improved by adopting mandatory standards for operation.

The EFFECTER Act seeks to address two key power supply issues—electricity reliability and natural gas prices. Reducing peak electric demand not only eases pressure on the electric grid but also reduces utility demand for natural gas, a major factor that has led to higher prices. Over the next ten years, this legislation can produce natural gas savings of over 3.3 quads annually—over 12 percent of total gas use; and peak electricity savings of 145,000 megawatts—equivalent to 350 new power plants of 400 MW capacity.

Mr. Speaker, as we celebrate Earth Day, please join me in supporting the EFFECTER Act which will help reduce energy needs and provide for a cleaner environment. Let’s respond to our country’s desperate needs today, before we have another energy crisis.

HON. JIM SAXTON OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 22, 2004

Mr. SAXTON. Mr. Speaker, I rise today to pay tribute to my long-time friend, Anna B. “Peg” Jacobi, a resident of the Borough of Tuckerton for more than a half century.

Peg served as Tuckerton’s Mayor from 1994 to 1998, after retiring from 36 years of public service. She served as Tuckerton Borough registrar, and secretary for the Board of Health, tax collector, treasurer and executive director of the Tuckerton Municipal Utilities Authority. She was also a member of the Pine Lands Regional Board of Education for a decade.

A charter member of both the Tuckerton Historical Society and the Tuckerton Seaport, Peg was the first president of the New Jersey Association of Rural Water and Watershed Utilities, and is currently President of Rural Water. She is also the current chairman of the Ocean County Utilities Authority, the Ocean County Board of Social Services, the Board of the Southern Ocean County Hospital Foundation, and finance chair of the Lutheran Church of the Holy Spirit and Ocean County Girl Scout Council, where she originated the community Christmas Tree on Lake Pohatcong.

Married for 48 years to the late Egbert M. “Jake” Jacobi, Peg is the mother of four, grandmother of two, and great-grandmother of two fine boys.

It has been a pleasure and a privilege working with Peg Jacobi through the years, and I am proud to recognize her for her many, many contributions to her community, county and State. I am proud, too, to call her my friend.

DISEASE KNOWN AS CUSHING’S SYNDROME

HON. JO ANN DAVIS OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 22, 2004

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I rise to recognize Americans suffering from a rare and debilitating disease known as Cushing’s syndrome. Named after Dr. Harvey Williams Cushing, the early 20th century surgeon who discovered the disease, Cushing’s is a hormonal disorder that affects only 5 to 10 adults for every million each year. Symptoms range from obesity to high blood pressure, and if left untreated may result in infertility and even death.

Unfortunately, like most other rare illnesses, Cushing’s patients are often mis-diagnosed, delaying important treatment options. This was the plight of my constituent, Jayne Kems of Spotsylvania, Virginia. Suffering from many of the typical symptoms of the disease, Mrs. Kems went undiagnosed through frequent physician visits and medical testing for over a year until an educated medical observation brought appropriate treatment.

I bring Mrs. Kern’s story to your attention, Mr. Speaker, to raise public and medical awareness about the Cushing’s syndrome, a serious and often elusive disease. Educating
