STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WYDEN:

S. 1927. A bill to amend the Internal Revenue Code of 1986 to make the Federal income tax system simpler, fairer, and more fiscally responsible, and for other purposes; to the Committee on Finance.

Mr. WYDEN. Mr. President, today I am proposing a Fair Flat Tax Act that will finally provide real tax relief to America's hurting middle class. It will do so by making the tax system simpler, flatter and fairer. And at the same time, it will begin to reduce the deficit that is destabilizing our economy, our security and our future.

This tax reform proposal is simpler because it's easier to understand and use. My legislation will include a new, simplified 1040 form that is one page, 30 lines, for every individual taxpayer.

This plan is flatter because it collapses the current system of six individual tax brackets down to three—15, 25 and 35 percent—and creates a flat corporate rate of 35 percent.

Ultimately, this plan is fairer because it changes the laws that disproportionately favor the most affluent Americans and corporations at the expense of the middle class. Instead, it provides a major middle-class tax cut—paid for by the elimination of scores of tax breaks in the individual and corporate income tax breaks, and by repealing the Bush tax cuts that favored the most fortunate few at the expense of the many.

This plan is fairer for American taxpayers because it treats work and wealth equally.

This is a radical statement about tax law: America can do better than a two-tier system which forces a policeman to pay a higher effective tax rate than an investor who makes his income on capital gains and dividends.

Under the current Federal Tax Code, all income is not created equal in this country. Americans who work for wages, in effect, subsidize the tax cuts and credits and deferrals of those who make money through unearned income—the dividends from investments. It's time to treat all taxpayers the same.

Let me be clear: I am not interested in soaking investors. I am a Democrat who believes in markets, and creating wealth. But what our country is all about is equality, and our Tax Code should treat everyone's income more equally too.

My legislation, The Fair Flat Tax Act of 2005, adapts the flat tax idea to help reduce the deficit instead, through fewer exclusions, exemptions, deductions, deferrals, credits and special rates for certain businesses and activities, and through the setting of a single, flat corporate rate of 35 percent. On the individual side, it ends favoritism for itemizers while improving deductions across the board: The standard deduction would be tripled for single filers from \$5,000 to \$15,000 and raised from \$10,000 to \$30,000 for married couples. Six individual rates are collapsed into three progressive rates of 15 percent, 25 percent and 35 percent, and income from all sources is taxed the same.

Several deductions used most frequently by individuals, those for home mortgage interest and charitable contributions, and the credits for children, education and earned income are retained. No one would have to calculate their taxes twice: this proposal eliminates the individual Alternative Minimum Tax (AMT), which could snare as many as 21 million American taxpayers in 2006.

This proposal would eliminate an estimated \$20 billion each year in special breaks for corporations, and direct the Treasury Secretary to identify and report to Congress an additional \$10 billion in savings from tax expenditures that subsidize inefficiencies in the health care system. Eliminating these breaks would sustain current benefits for our men and women in uniform, our veterans and the elderly and disabled—as well as breaks that promote savings and help families pay for health care and education.

What makes the Fair Flat Tax Act truly unique is that it corrects one of the most glaring inequities in the current tax system: regressive State and local taxes. Under current law, low and middle income taxpayers get hit with a double whammy: compared to wealthy Americans, they pay more of their income in State and local taxes. Poor families pay more than 11 percent and middle income families pay about 10 percent of their income in State and local taxes, while wealthier taxpayers only pay five percent. And because many low and middle income taxpayers don't itemize, they get no credit on their Federal form for paying State and local taxes. In fact, two-thirds of the Federal deduction for State and local taxes goes to those with incomes above \$100,000. Under the Fair Flat Tax Act for the first time the Federal code would look at the entire picture, at an individual's combined Federal, State and local tax burden, and give credit to low and middle income individuals to correct for regressive State and local taxes.

Repealing some individual tax credits, deductions and exclusions from income—along with some serious changes to the corporate Tax Code—enables larger standard deductions and broader middle-class tax relief.

The deductions most important to most Americans remain in place: the home mortgage deduction stays, as do child credits and charitable contributions, higher education and health savings.

What all this means for American taxpayers is—the vast majority of taxpayers will see a cut, particularly the middle class. Congressional Research Service experts tell us that middle class families and families with wage and salary incomes up to \$150,000 will see tax relief.

On the corporate side—this plan does something that may not be popular, but it's right.

Each of us, including America's corporations, need to pay our fair share. Corporations that have used tax loopholes to avoid paying their fair share of taxes are going to see those loopholes close and they're going to contribute.

This legislation makes concrete progress toward deficit reduction. There's a long way to go to stop the hemorrhaging in the Federal budget, but this legislation makes a real start by whittling the deficit down approximately \$100 billion over five years.

Some may wonder if what I am proposing today is a response to the President's Tax Reform Advisory Panel. To date, the Panel hasn't officially released its recommendations. I can't respond to something that hasn't been introduced yet. But I am troubled by the fact that the recommendations trickling out from the Panel would continue to twist the Tax Code away from equal treatment of all income, widening the chasm between people who get wages and people who collect dividends.

I am introducing The Fair Flat Tax Act of 2005 today to provide Americans a plan based on common-sense principles that can make the Tax Code work better.

Making the Tax Code simpler and flatter is going to make it fairer. My legislation is going to provide real relief to the middle class. It will treat work and wealth equally. It will make a start at reducing the deficit. I am ready to get to work with my colleagues and move it forward.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

By Mr. REID (for himself and Mr. COCHRAN):

S. 1930. A bill to expand the research, prevention, and awareness activities of the National Institute of Diabetes and Digestive and Kidney Diseases and the Centers for Disease Control and Prevention with respect to inflammatory bowel disease; to the Committee on Health, Education, Labor, and Pensions.

MR. REID. Mr. President, I rise today to introduce legislation focused on a devastating condition known as inflammatory bowel disease (IBD). I am pleased that Senator COCHRAN has once again joined me in the fight against this painful and debilitating disease.

Crohn's disease and ulcerative colitis, collectively known as inflammatory bowel disease, are chronic disorders of the gastrointestinal tract which afflict approximately 1.4 million Americans, 30 percent whom are diagnosed in their childhood years. IBD can cause severe abdominal pain, fever, and intestinal bleeding. Complications related to the disease include: arthritis, osteoporosis, anemia, liver disease, growth and developmental challenges, and colorectal cancer. Inflammatory bowel disease represents a major cause of morbidity from digestive illness and has a devastating impact on patients and families.

In the 108th Congress I was proud to sponsor bipartisan legislation focused

on IBD that attracted 36 co-sponsors. Several important provisions of that bill were incorporated into legislation known as the "Research Review Act" which was signed into law by the President last November. Specifically, the "Research Review Act" called on the Government Accountability Office and the Centers for Disease Control and Prevention to submit reports to Congress on three issues of critical importance to the IBD community, 1. Social Security Disability, 2. Medicare and Medicaid coverage, and 3. the epidemiology of the disease in the United States.

The legislation I am introducing today builds upon the progress made last year by calling for an increased Federal investment in biomedical research on IBD. The hope for a better quality of life patients and families depends on basic and clinical research sponsored by the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health (NIDDK). The "Inflammatory Bowel Disease Research Act" calls for an expansion of NIDDK's research portfolio on Crohn's disease and ulcerative colitis in order to capitalize on several exciting discoveries that have broadened our understanding of IBD in recent years. By increasing our investment in this area, we will maximize the possibility that we will be able to offer hope to millions of Americans who suffer from this debilitating disease. At the same time, progress in this area could also mean we would save millions of dollars in net health care expenditures through reduced hospitalizations and surgeries.

In addition to biomedical research, this legislation also calls on the Centers for Disease Control and Prevention to develop a "National Inflammatory Bowel Disease Action Plan." This plan will provide a comprehensive approach to addressing the burden of IBD in the United States, including strategies for raising awareness of the disease among the general public and health care community, expanding epidemiological research focused on the prevalence of IBD, and preventing the progression of the disease and its complications.

The Crohn's and Colitis Foundation of America, an organization that has been a leader in the battle against IBD, has strongly endorsed this legislation. In addition to CCFA, the following organizations have endorsed this bill: The North American Society for Pediatric Gastroenterology, Hepatology and Nutrition, the American Gastroenterological Association, the American Society for Gastrointestinal Endoscopy, the Digestive Disease National Coalition, the Society of Gastroenterology Nurses and Associates, and the Pennsylvania Society of Gastroenterology.

I urge all Senators to join Senator COCHRAN and me in this important cause by co-sponsoring the "Inflammatory Bowel Disease Research Act."

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1930

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Inflammatory Bowel Disease Research Act".

SEC. 2. FINDINGS.

The Congress finds as follows:

(1) Crohn's disease and ulcerative colitis are serious inflammatory diseases of the gastrointestinal tract.

(2) Crohn's disease may occur in any section of the gastrointestinal tract but is predominately found in the lower part of the small intestine and the large intestine. Ulcerative colitis is characterized by inflammation and ulceration of the innermost lining of the colon. Complete removal of the colon in patients with ulcerative colitis can potentially alleviate and cure symptoms.

(3) Because Crohn's disease and ulcerative colitis behave similarly, they are collectively known as inflammatory bowel disease. Both diseases present a variety of symptoms, including severe diarrhea; abdominal pain with cramps; fever; and rectal bleeding. There is no known cause of inflammatory bowel disease, or medical cure.

(4) It is estimated that up to 1,400,000 people in the United States suffer from inflammatory bowel disease, 30 percent of whom are diagnosed during their childhood years.

(5) Children with inflammatory bowel disease miss school activities because of bloody diarrhea and abdominal pain, and many adults who had onset of inflammatory bowel disease as children had delayed puberty and impaired growth and have never reached their full genetic growth potential.

(6) Inflammatory bowel disease patients are at high risk for developing colorectal cancer.

(7) The total annual medical costs for inflammatory bowel disease patients is estimated at more than \$2,000,000,000.

SEC. 3. NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND KIDNEY DISEASES; INFLAMMATORY BOWEL DISEASE RESEARCH EXPANSION.

(a) IN GENERAL.—The Director of the National Institute of Diabetes and Digestive and Kidney Diseases shall expand, intensify, and coordinate the activities of the Institute with respect to research on inflammatory bowel disease, with particular emphasis on the following areas:

(1) Genetic research on susceptibility for inflammatory bowel disease, including the interaction of genetic and environmental factors in the development of the disease.

(2) Research targeted to increase knowledge about the causes and complications of inflammatory bowel disease in children.

(3) Animal model research on inflammatory bowel disease, including genetics in animals.

(4) Clinical inflammatory bowel disease research, including clinical studies and treatment trials.

(5) Expansion of the Institute's Inflammatory Bowel Disease Centers program with a focus on pediatric research.

(6) Other research initiatives identified by the scientific document entitled "Challenges in Inflammatory Bowel Disease" and the research agenda for pediatric gastroenterology, hepatology and nutrition entitled "Chronic Inflammatory Bowel Disease".

(b) AUTHORIZATION OF APPROPRIATIONS.—
