Congressional Record

PROCEEDINGS AND DEBATES OF THE 110th CONGRESS, FIRST SESSION

Vol. 153

WASHINGTON, THURSDAY, DECEMBER 6, 2007

No. 186

House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. OBEY).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
December 6, 2007.

I hereby appoint the Honorable DAVID R. OBEY to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord our God, down through the ages stories have grown in the retelling and legends have been handed down with little or no foundation in truth.

Many trace the icon status of Father Christmas coming from the Dutch Protestants in New Amsterdam in the American colonies as the story traveled back to England. All we truly know about St. Nicholas was his generosity and kindness toward children as a fourth century bishop in Myra, now a part of Turkey. By the ninth century his fame and devotion had spread throughout Europe. He remains

a patron saint in Greece and Russia to this day.

On this feast of St. Nicholas, we ask Your blessing upon all children. May their stories be treasured, their hopes and dreams preserved, and their innocence protected from all violence, poverty, and exploitation.

May this joyous season help all of us remember before all else, we are first Your children, Father of us all, now and forever.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

NOTICE

If the 110th Congress, 1st Session, adjourns sine die on or before December 21, 2007, a final issue of the *Congressional Record* for the 110th Congress, 1st Session, will be published on Friday, December 28, 2007, in order to permit Members to revise and extend their remarks.

All material for insertion must be signed by the Member and delivered to the respective offices of the Official Reporters of Debates (Room HT-60 or S-123 of the Capitol), Monday through Friday, between the hours of 10:00 a.m. and 3:00 p.m. through Thursday, December 27. The final issue will be dated Friday, December 28, 2007, and will be delivered on Wednesday, January 2, 2008.

None of the material printed in the final issue of the *Congressional Record* may contain subject matter, or relate to any event that occurred after the sine die date.

Senators' statements should also be formatted according to the instructions at http://webster/secretary/cong_record.pdf, and submitted electronically, either on a disk to accompany the signed statement, or by e-mail to the Official Reporters of Debates at "Record@Sec.Senate.gov".

Members of the House of Representatives' statements may also be submitted electronically by e-mail, to accompany the signed statement, and formatted according to the instructions for the Extensions of Remarks template at <http://clerk.house.gov/forms>. The Official Reporters will transmit to GPO the template formatted electronic file only after receipt of, and authentication with, the hard copy, and signed manuscript. Deliver statements to the Official Reporters in Room HT-60.

Members of Congress desiring to purchase reprints of material submitted for inclusion in the *Congressional Record* may do so by contacting the Office of Congressional Publishing Services, at the Government Printing Office, on 512-0224, between the hours of 8:00 a.m. and 4:00 p.m. daily.

By order of the Joint Committee on Printing.

ROBERT A. BRADY, *Chairman.*

This symbol represents the time of day during the House proceedings, e.g., 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Printed on recycled paper.

H14253

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Louisiana (Mr. JEFFERSON) come forward and lead the House in the Pledge of Allegiance.

Mr. JEFFERSON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has agreed to a concurrent resolution of the following title in which the concurrence of the House is requested:

S. Con. Res. 58. Concurrent resolution welcoming First Minister Dr. Ian Paisley and Deputy First Minister Martin McGuinness of Northern Ireland to the United States.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will recognize up to five 1-minute speeches on each side.

RECOGNIZING THE ACCOMPLISHMENTS OF NBA COACH AVERY JOHNSON

(Mr. JEFFERSON asked and was given permission to address the House for 1 minute.)

Mr. JEFFERSON. Mr. Speaker, I rise today to congratulate one of Louisiana's favorite sons, NBA coach Avery Johnson, on the occasion of his receiving an honorary doctorate degree from his alma mater, Southern University, at its upcoming fall commencement.

Born in New Orleans, Avery Johnson has known success at every level of basketball. In 1983 he led the St. Augustine High School Purple Knights to an undefeated season culminating with a Class 4A Louisiana State championship. He would go on to star on the Southern University Jaguars basketball team, setting NCAA Division I records for both season and career averages in assists that still stand today.

In 1988, Avery Johnson began his career in the NBA, where he would spend 16 seasons. Once again he found success with the San Antonio Spurs by taking them to their first NBA title in 1999 over the New York Knicks.

Presently, Avery Johnson serves as the head coach of the Dallas Mavericks, where his star has only continued to shine brighter. Now in his third full season as coach, he has led the Mavericks to their first Western Conference title, been named 2006 NBA Coach of the Year, and won 150 games faster than any other coach in NBA history.

Through his high achievement in sports and service to the community, Avery Johnson continues to leave a mark on the world, of which we are all very proud.

FUNDING OUR VETERANS

(Mrs. DRAKE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. DRAKE. Mr. Speaker, this is day 67. That's 67 days since the start of the new fiscal year and our veterans still do not have access to the increased funding provided in a bill that passed the House and Senate months ago and the President is waiting to sign.

The House-passed bill includes increased funding to improve access to medical services for all veterans, new initiatives for mental health and PTSD, increased funds for improved medical facilities and increased funding to assist homeless veterans, to name a few.

If the Democrats are acting in good faith and in the best interest of our Nation's veterans, why continue to delay this crucial funding?

The Democrats have failed in their earlier effort to use funding for our veterans as a bargaining chip for billions in unrelated spending. Why continue to delay this bill?

There are few things more important than ensuring that this Congress provides all possible benefits and health care for our veterans. I'm calling on the Speaker to move this bill forward, and I call on all Americans to contact their Representatives and tell the Democratic leadership to send a clean veterans appropriations bill to the President now.

ENERGY INDEPENDENCE AND SECURITY ACT

(Ms. SCHWARTZ asked and was given permission to address the House for 1 minute.)

Ms. SCHWARTZ. Mr. Speaker, I rise today in support of the Energy Independence and Security Act before us later today. This landmark energy bill moves our Nation forward towards a new, brighter energy future. It promotes clean homegrown energy by requiring our utilities to produce 15 percent of their power from renewable energy by 2020. It reduces our dependence on foreign oil by raising fuel efficiency standards on our cars by 40 percent. With the price of oil nearing \$100 per barrel, this will save consumers billions of dollars. And it saves energy through energy-efficiency standards and incentives like the effort I led to promote the construction of energy-efficient commercial buildings.

These policies will create new jobs and build new American industries, while reducing the greenhouse gas emissions that contribute to global warming. And it is all paid for by re-

claiming \$21 billion in taxpayer subsidies from the oil and gas industry.

I urge support of this fiscally responsible, smart new energy policy that embraces American ingenuity, innovation, and leadership and moves America forward towards a cleaner, more secure future.

HONORING THE LIFE OF JONI HERSCHDEDE

(Mrs. SCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHMIDT. Mr. Speaker, I rise today to honor the life of Joni Herschede, a true icon of Cincinnati.

Joni understood the Second Congressional District. You see, she grew up in Portsmouth in rural southern Ohio, one of eight siblings. She came to Cincinnati in the 1960s where she met and married Mark Herschede. She will always be best known for her passion and generosity to this community.

Joni never forgot her humble beginnings. Whenever Joni got behind a cause or an issue, others always followed because they knew if you didn't follow, you might as well get out of the way because she would succeed.

It is nearly impossible to find an organization in southern Ohio to which Joni did not give her time or her energy. Her son Donald said, "Mother wasn't happy unless she was doing something for someone else."

Her true passion was the University of Cincinnati. As an avid Bearcats fan, Joni's hats and outfits always proudly displayed her beloved red and black. But that passion went beyond just trappings of her clothing. It went to the philanthropy that she did for the University of Cincinnati as well.

Mr. Speaker, southern Ohio and Cincinnati will always be grateful for the kindness that Joni showed to so many and to so many organizations, the arts, the zoo, education, and her beloved Bearcats.

Joni's life should paint a path for future generations. Joni's legacy of public service will not be easily surpassed.

May she rest in peace.

THE BUSH-CHENEY ENERGY POLICY

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DEFAZIO. The Bush-Cheney energy policy has led America to a dead end, increasing dependence on imported oil and price gouging by big oil companies.

The new direction in energy policy to be considered here today puts America on a new path to energy independence and sustainability. It will be great for American consumers, saving billions at the pump; our businesses; our economy. And it will be great for the environment.

But it will be even better for millions of Americans in rural counties across

America. This bill also includes funding for critical county school payments. 780 counties in 42 States will get critical funding for law enforcement, search and rescue, and struggling rural schools.

My district, the Fourth Congressional District of Oregon, will avert a disaster if this legislation is adopted.

I thank the Democratic leadership for leading us in a new direction on energy and fulfilling their commitment to rural counties.

The ball was dropped by the Bush administration and by the Republicans. We're taking it up for all America here today by passing this bill.

THIRD ANNIVERSARY OF THE IMPRISONMENT OF AYMAN NOUR

(Mr. WICKER asked and was given permission to address the House for 1 minute.)

Mr. WICKER. Mr. Speaker, this week marks the third anniversary of the imprisonment of Egyptian parliamentarian and presidential candidate Ayman Nour. He was jailed on charges of forgery during the 2005 presidential elections in Egypt.

Nour suffers from numerous health problems. He has been subjected to documented physical abuse and has been denied visitation rights afforded to other prisoners. His health condition continues to worsen.

Many Members of Congress stand in solidarity with Ayman Nour and respectfully call on President Mubarak to grant his unconditional release. December 10 is Human Rights Day, marking the anniversary of the adoption of the Universal Declaration of Human Rights. In honor of that day, the Egyptian Government should release Ayman Nour. This action would symbolize a recommitment to the inherent dignity of all people and to their equal and inalienable rights.

THE UNITED STATES POSTAL SERVICE

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, the United States Postal Service, and I use that term because that's their formal name, has announced that they're going to stop using, having vending machines at the post office. That means that Americans will not be able to go to the post office when they need to get a stamp this holiday season, tax time or whatever, and realize they need stamps and be able to go to the postal service to buy a stamp. It seems the U.S. Postal Service is taking service out of their name.

Older people can't just very easily decide to learn how to use the Internet or have an Internet and poor people don't either. The postal service says people can buy stamps online. They can call an 800 number. They can buy them by mail. But if you need something for an

immediate postage, if you don't have the Internet, if you're old, and it's difficult to stand in line because you're handicapped or disabled, this is a great disservice to America.

They say the machines aren't working. Well, Federal Express wouldn't do something like this. They'd improve the machines or find a new machine. And if the machines didn't work at Coca-Cola, Coca-Cola would buy new machines.

The United States Postal Service should be for service and for the customer and maintain the vending machines. I'm preparing legislation, and I'll be sending a Dear Colleague out, Mr. Speaker, and hope all will join us in putting service back in the USPS.

□ 1015

THE TEDDY BEAR AND ISLAM

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, in the third world country of Sudan, the government is controlled by the religion of Islam. Religious hard-liners were successful in prosecuting a British first grade teacher for insulting Mohammed. She was sent to jail. Her crime: her 7-year-old students named a class Teddy Bear "Mohammed," and that was supposedly an insult to the Prophet. The punishment could have been worse. She could have received 40 lashes. In fact, thousands of Sudanese citizens marched demanding the school teacher be executed for the insult!

Of course, the teacher never meant to insult Islam, but the truth was not an issue in her trial.

The Sudan, this is the same "righteous" government that is allowing ethnic cleansing and genocide of its own citizens in Darfur.

But thanks to two Muslim members of the British House of Lords who disagreed with the arrest, the school teacher, Gillian Gibbon, was pardoned after serving 8 days in jail.

This case is an example of what happens when government punishes people for violating a religious doctrine.

And, by the way, the Teddy Bear was originally so named to honor the great President Theodore Roosevelt.

And that's just the way it is.

SUPPORT THE ENERGY BILL

(Mr. KAGEN asked and was given permission to address the House for 1 minute.)

Mr. KAGEN. Mr. Speaker, I rise today to urge my colleagues to support today's energy bill. This is the change we need, for America needs a reliable energy partner, one that is home grown.

This bill restores our Nation's independence and will help to secure our future. It will also stimulate our economy and protect our environment. It will allow for clean, renewable energy

and move us away from the dangerous dependency on Arabian oil. It will also decrease our imported oil by 2 million gallons per day. It will create jobs and strengthen our economy as we move towards efficient, clean, and renewable energy resources.

This bill answers the question whose side are we on. Do we stand with Big Oil and the past or do we stand with the future?

I stand with the future and will continue to fight to cut the price of energy and fight hard for the people of Northeast Wisconsin.

BUY PRODUCTS MADE IN THE USA

(Mr. TIM MURPHY of Pennsylvania asked and was given permission to address the House for 1 minute.)

Mr. TIM MURPHY of Pennsylvania. Mr. Speaker, defective, unsafe products, toys with poisonous lead paint, American jobs going overseas lured by cheap labor and unfair trade practices, these issues concern every American. But all of us can take a stand this holiday season.

One way is that instead of judging products by cheap prices, look for quality and safety that comes with American products. This holiday season shoppers will be buying gifts made from all over the world, but let's make an extra effort to look for American products.

This Christmas check the label for "Made in the USA" and support jobs for hardworking Americans and American quality. "Made in the USA" may be the best gift ever this Christmas.

PROVIDING FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 6, ENERGY INDEPENDENCE AND SECURITY ACT OF 2007

Mr. WELCH of Vermont. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 846 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 846

Resolved, That upon adoption of this resolution it shall be in order to take from the Speaker's table the bill (H.R. 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes, with Senate amendments thereto, and to consider in the House, without intervention of any point of order except those arising under clause 10 of rule XXI, a single motion offered by the Majority Leader or his designee that the House concur in each of the Senate amendments with the respective amendment printed in the report of the Committee on Rules accompanying this resolution. The Senate amendments and the motion shall be considered as read. The motion shall be debatable for one hour equally divided and controlled by the Majority Leader and the Minority Leader or their designees.

The previous question shall be considered as ordered on the motion to final adoption without intervening motion or demand for division of the question.

SEC. 2. During consideration in the House of the motion to concur pursuant to this resolution, notwithstanding the operation of the previous question, the Chair may postpone further consideration of the bill to such time as may be designated by the Speaker.

POINT OF ORDER

Mr. FLAKE. Mr. Speaker, I raise a point of order against consideration of the rule because the rule contains a waiver of all points of order against the bill and its consideration. Therefore, it is in violation of section 426 of the Congressional Budget Act.

The SPEAKER pro tempore. The gentleman from Arizona makes a point of order that the resolution violates section 426(a) of the Congressional Budget Act of 1974.

The gentleman has met the threshold burden to identify the specific language in the resolution on which the point of order is predicated. Such a point of order shall be disposed of by the question of consideration.

The gentleman from Arizona and the gentleman from Vermont each will control 10 minutes of debate on the question of consideration.

After that debate the Chair will put the question of consideration, to wit: "Will the House now consider the resolution?"

The Chair recognizes the gentleman from Arizona.

Mr. FLAKE. Mr. Speaker, the Congressional Budget Office says that there are unfunded mandates in this bill, but we really don't know what's there because we got this thousand-page bill, thousand-page bill, just about 12 hours ago.

As we know, we have a House rule that says we are supposed to get a bill like this 72 hours before instead of 12. Common practice has been if you can't get 72 hours, then at least 24. We've cut that in half, just 12. And most of that was during the time when most of us were asleep. I can guarantee you that few, if any, in this body have read this bill; yet we are voting on it, a billion dollar bill that virtually nobody knows what's in it.

We do know, however, and that's the reason this point of order lies against the bill, there are unfunded mandates in the bill.

We also have rules with regard to earmarks air-dropped in a bill like this. It's not a conference report of an appropriation bill but an actual bill where they are dropped in at the last minute. The truth is, with a bill that's over a thousand pages long, we simply don't know what's in there; yet we are being told we have got to pass it, we've got to move this thing today. That's simply wrong.

I would like the assurance of those from the Rules Committee that there are no unfunded mandates in the bill or there are no earmarks that have been added to the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. WELCH of Vermont. Mr. Speaker, this point of order is really essentially about whether or not we are going to consider the rule and, ultimately, the Energy Independence and Security Act. In fact, I would say that it may well be an effort by folks who are opposed to the legislation to find a way to kill the legislation itself. We believe that this legislation should proceed.

The fact is that the other side had absolute control in this body or had a majority in this body for 12 years, enjoyed control in both bodies and in the administration for the past 6, for most of that 6, and did not come up with an energy policy that did anything other than raise the cost of oil, home heating oil, gasoline, increase our dependence on foreign oil, weaken our national security and contribute to global warming. This legislation is about changing the direction of American energy policy, and the issues that have been raised in this legislation are ones that have been debated outside of this body for several years.

The legislation now brings to this body for its consideration such topics as increasing fuel efficiency, energy efficiency, green buildings, cellulosic agriculture-based energy efforts that will be vital to the farm sector and rural sectors of our economy.

So we believe that the House is going to have an opportunity to vote on this point of order and reach its judgment about whether it wants to proceed on the important question of changing the energy policy in this country.

Mr. Speaker, I reserve the balance of my time.

Mr. FLAKE. Mr. Speaker, I would gladly yield to the gentleman if he will answer the question if there are any unfunded mandates in this bill in violation of the rules, had the rules not been waived, or if there are any earmarks in the bill.

Would the gentleman answer that question? Are there unfunded mandates in the bill or any earmarks in the bill?

Mr. WELCH of Vermont. I am not aware of any earmarks in the bill. I'm completely unaware of any earmarks in the bill. There is CBO information suggesting that the unfunded mandates, which is a separate one, is not within any of the rule provisions as it applies to the public sector, maybe as it applies to the private sector.

Mr. FLAKE. I thank the gentleman.

Let me read from the CBO: "These provisions also contain several private sector earmarks. CBO estimates that their aggregate costs would well exceed the annual threshold established in the Unfunded Mandates Reform Act for private sector mandates, \$131 million in 2007, adjusted annually for inflation."

There is the answer to the question of unfunded mandates. They are in the bill. We're waiving those points of order so we can get around that.

I would suggest that at some point you've got to say, are we living up to the promises that were made at the beginning of the year?

Now, the majority has made a habit, and I don't blame them, of saying this is what you Republicans did while you were in the majority. That is true. Many of us stood here and raised these same points of order when our own party did it. I would love to see on the other side somebody stand up and say this is the wrong thing to do. If it was wrong when Republicans did it, it's wrong when Democrats do it.

With regard to earmarks in this legislation, nobody has been able to do anything more than a cursory read of a thousand-page bill that we got just 12 hours ago. But in the biofuels subtitle, we've found a university-based research and development competitive grant program. This grant will be for universities to conduct research and development of renewable energy technologies for "trees dying of disease or insects infestation as a source of woody biomass." This grant is for universities that are near "trees dying of disease or insect infestation as a source for woody biomass." That smells a lot like an earmark to me. It sounds like there is probably just one university, a particular university, or two that meet that qualification. That is certainly an earmark. And that's why these rules were waived again to get around that kind of thing.

The Democrats put in some good earmark rules at the beginning of the year, but your rules are only as good as your willingness to enforce them. And that's the problem here. We are not enforcing our own rules.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, will the gentleman yield?

Mr. FLAKE. I yield to the gentleman from Florida.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I would ask the gentleman, if he would be so kind, I have been reviewing the bill since it was made available to us last night, and I was wondering, that earmark that he referred to, if he has any idea where it would be.

Mr. FLAKE. I have no clue.

Mr. LINCOLN DIAZ-BALART of Florida. I will continue looking, then.

Mr. FLAKE. Thank you. I know it's a very difficult thing. That is a very large bill.

That earmark is somewhere in here. We have no idea where. My guess is there are a lot more of them.

Let me just talk about one other one. Another questionable provision that looks like an earmark to me is a provision terminating the remaining portions of the New York Liberty Zone tax incentives program. The House-passed previous version of the energy bill gave New York a tax credit of \$2 billion to build a rail line from JFK to Lower Manhattan.

□ 1030

The bill now purports to reduce the cost of the New York tax provision to \$1.1 billion, but the result is only true thanks to some very creative drafting.

In fact, passage of the bill would still let New York keep a total of \$2 billion of Federal taxpayer money, with at least \$900 million of that coming between the year 2018 and 2019.

Again, that creative drafting is somewhere in this document that we got last night, 12 hours ago. And we're expected to go through this and make sure that it complies with the rules. Why are we doing this? Why are we doing this when we have very specific rules?

And as I mentioned, I was the first to commend the majority for putting in some good transparency and accountability rules in January. I felt they were better than what we did last year. But your rules are only as good as your willingness to enforce them, and there seems to be no willingness here. That's the problem.

So I would be glad to hear from the other side. I will retain my time and hope to hear an explanation of whether or not there are actual earmarks in the bill or unfunded mandates.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The gentleman from Arizona has 3½ minutes remaining; the gentleman from Vermont has 8 minutes remaining.

Mr. WELCH of Vermont. I am going to yield to the gentlewoman from Florida (Ms. CASTOR). But before I do, I would like to thank the gentleman from Arizona; I would like to thank him for the good work that he has done on earmarks that he did when he was a member of the majority and now as a member of the minority.

But I would also remind the gentleman that, in fact, under the leadership of the current Chair of the Appropriations Committee, there has been a massive change in direction on earmarks. In fact, it's been a reason why some of the budget bills took longer than last year because there has been an exhaustive effort to go through and identify anything that can be called an earmark to allow Members who wish to address it to raise their points.

What I've said to the gentleman is that we are unaware of any earmarks in this legislation. And I appreciate your late-night work at finding provisions that, as you have presented them, you're characterizing as possible earmarks. I am aware of absolutely no earmarks.

The so-called unfunded mandate, there is language in a letter, Mr. Speaker, from the CBO that suggests that there may be a slightly above the threshold under the rule, but that's a decision that this body can make and will make. It's incidental, not significant, to the overall policy.

So having said that, I yield 2 minutes to the gentlelady from Florida (Ms. CASTOR).

Ms. CASTOR. I thank my colleague from the Rules Committee, and I rise in support of the Energy Independence and Security Act and this rule.

Today, we break the stranglehold that Big Oil and the special interests

have had over Washington, D.C. and over our country's energy policy.

We're going to hear many maneuvers today and protestations, delay, resistance, points of order because this is a fundamental shift in the Nation's energy policy.

The contrast between the policies of the past and our forward-looking bill could not be more clear. Remember just 7 years ago when the administration's Energy Task Force met behind closed doors? It consisted of oil executives, and the administration fought to keep everything secret. Renewable sources of energy were not a priority, the Earth's climate change was not a priority, and the recommendations involved more drilling, more mining, more of the same, which led to record gas prices for our families, and record profits for oil companies, and disastrous national security consequences.

In contrast, our ground-breaking effort today sets our country on a path towards energy independence, particularly from the Middle East and the most volatile parts of this world.

Better gas mileage for automobiles is the cornerstone of our bill. That alone will save families from \$700 to \$1,000 per year at the pump, and that is great news for our neighbors back home.

What has been missing is the political leadership and the political will to make this happen in America. So today we will cast aside the politics of the past and for the first time in decades set the right priorities for America. This bill repeals the subsidies to the big oil companies and instead invests in renewable energy and biofuels technologies.

And to the folks back home in Florida, whom I have the privilege to represent, we're going to demonstrate here today that there is no need to put our tourism economy and beautiful beaches at risk to more oil drilling offshore in the Gulf of Mexico. Instead, we're going to rely on American ingenuity and resourcefulness.

The status quo in Washington is not acceptable anymore, and we will chart a fundamental new direction on energy policy.

Mr. FLAKE. Mr. Speaker, the gentlelady's comments that we have finally removed special interests from the energy field with this bill, when you have a bill like this, I guarantee you it's full of special interest provisions, many of which we haven't discovered yet.

I mentioned you have one earmark in here, a grant for universities that are near "trees dying of disease or insect infestation as a source of woody biomass." I would suggest it's probably one particular university in mind, or some special interest, that an earmark will be going to. The New York Liberty Zone provision is another special interest provision.

I would also make the point that this is technically not a conference report; there wasn't a conference. This is a House amendment to a Senate amend-

ment to H.R. 6, if I'm not mistaken. What that means is the point of order that I would have liked to have raised against the provisions that may include earmarks in the bill doesn't lie against the bill because it's not a conference report, because it's a House amendment to a Senate amendment. That's another creative way to get around the rules that the majority themselves have put in place.

If you say that there are no problems with this bill, why are we waiving all points of order against it? Of course it's to hide things in it. People should be skeptical whenever they see something a thousand pages long, a thousand pages long that nobody, not anybody on the Rules Committee, not anybody anywhere has had the opportunity to read, 12 hours, 12 hours to read that. I don't think Evelyn Wood, with a speed-reading course, or anybody could get through this. And when the majority can simply say, We're not aware of anything, I mean, you can take the Fifth, you can plead the Fifth in court, but I don't think you can do it here. I don't think that that flies, certainly not outside of the Beltway. Certainly people around here should be skeptical of a multi-billion-dollar bill with special interest provisions rife throughout it that we've had 12 hours to review before voting on.

When all the majority can tell us is, We're not aware of things in there, let me remind the majority that we had an instance earlier this year, or several instances, where the chairman of the Appropriations Committee signed off on an appropriation bill saying, There are no earmarks in this bill, which prevented us in the minority from actually lodging a point of order against the bill, after Members had already issued press releases claiming credits for their earmarks in the bill.

So clearly you can pass some good rules, which you have, but you have got to enforce those rules, and they're not being enforced here. That's why we should uphold this point of order and not move forward and proceed with this bill. You cannot put a thousand-page bill, give it to us with 12 hours to review, with problems rife throughout it, and not have problems.

With that, Mr. Speaker, I yield back the balance of my time.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentlewoman from Ohio (Ms. SUTTON).

Ms. SUTTON. Mr. Speaker, this bill has been a long time coming. As a freshman Member of this body, I am proud to rise in support of the rule and this energy legislation that will make significant strides in our effort to address global warming, save our families money on their energy bills and at the pump, and bolster our national security by mapping out a more energy-independent future for our country.

This energy bill includes a long overdue increase in CAFE standards and improves vehicle efficiency standards to 35 miles per gallon by 2020, the first

increase of this kind since 1975. This significant increase in vehicle emission standards will save American families between \$700 and \$1,000 per year at the pump, reduce oil consumption by 1.1 million gallons per day by 2020, which is one-half of what we currently import from the Persian Gulf. And these new standards will reduce greenhouse gas emissions equivalent to taking 28 million of today's average cars and trucks off the road.

Science tells us that CAFE increases are possible and necessary, and we must implement them now. And while implementing necessary environmental protections, this legislation will preserve tens of thousands of American manufacturing jobs in places like Avon Lake, Ohio, where my constituents produce passenger vans.

This bill will provide our auto manufacturers domestically with the tools and incentives they need to produce the vehicles of tomorrow here in the United States, keeping jobs at home, and allowing us to all move forward together. Keeping high-paying auto manufacturing jobs in this country will in turn help retain hundreds of thousands of related jobs in the electronics, steel, textiles, glass, plastics and rubber, and countless other sectors that produce auto parts, while also laying the groundwork for jobs in the future.

The American people have spoken loud and clear that we cannot turn a blind eye to the crisis of global warming and astonishing gas prices squeezing the budgets for our working families.

I urge support for the rule and the bill.

Mr. FLAKE. Mr. Speaker, I would like to reclaim my time.

The SPEAKER pro tempore. The gentleman from Arizona has 30 seconds remaining.

Mr. FLAKE. Let me just make one point with regard to special interests, that they have been removed from this process. Because we were trying to get copies of this legislation and couldn't yesterday, we couldn't get it from the majority, so many of the Republicans were actually getting excerpts and pieces of this legislation from firms along K Street, from the special interests themselves. They seemed to have copies before we in the majority did. There is something wrong with this process. We only get it last night from the majority, but we were getting it yesterday from special interests downtown who already had copies of it, or portions, at least.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. WELCH of Vermont. Mr. Speaker, may I inquire as to how much time we have remaining on our side.

The SPEAKER pro tempore. The gentleman from Vermont has 2½ minutes remaining.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentlewoman from California (Ms. SOLIS).

Ms. SOLIS. Mr. Speaker, I also rise in strong support of this legislation, the bill, H.R. 6, and also on the rule.

H.R. 6, as you know, will lower energy costs, strengthen our national security, and reduce global warming emissions, and create what I say are "green collar" jobs. Major investments in renewable energy could create over 3 million jobs in 10 years. It would also eliminate the outsourcing of good-paying jobs.

Here I am in a classroom in East Los Angeles. If we have the political will to do this now, why can't we put our money where our mouth is and help the American public better understand that this new technology, the greening of our country, should be made available to everyone? Leave no one left behind, whether in the Bronx, whether in East Los Angeles, across this country. There is a whole new wave of emphasis and trust and hope that we here in the Congress are going to do the right thing.

I don't have any earmarks. I know my staff has worked very diligently with our committee and as a member of Energy and Commerce to see that we do the right thing. We spent laborious hours working on this legislation.

I ask for Members to support the bill and the rule.

Mr. WELCH of Vermont. Mr. Speaker, I yield myself such time as I may consume.

I want to thank the gentleman from Arizona for his comments and his arguments here on this point of order, and also for the work that he has done.

I happen to believe that process does matter, but I also think substance matters, and they have to go together. Ideally, when we're working in a perfect world, they do. But one of the major reasons that we don't have an actual conference committee report is because our friends in the other body refused to go to conference, refused, refused to go to conference to discuss our energy future, Mr. Speaker. How is that right? Is that a proper use of process?

The reason we are here and the way that we're here is because there has been a decision made by the majority of the American people that they want a new energy policy, and the basic question for this body is whether we want to give that new energy policy or we don't.

The best process is going to get the best bill, but it takes cooperation on both sides. And if we have, in the other body, a refusal to even go into conference, it leaves leadership in this body with a single choice: do nothing and capitulate, or move ahead.

On this question of earmarks, we have given you as much assurance as we can possibly give you that there are not earmarks in here. We have the CBO letter about so-called unfunded mandates in the private sector. That's going to be a decision for the body.

I urge all Members to vote "yes" on this motion to consider.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

The question is, Will the House now consider the resolution?

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FLAKE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 of rule XX, this 15-minute vote on the question of consideration will be followed by a 5-minute vote on suspending the rules and passing H.R. 3505.

The vote was taken by electronic device, and there were—yeas 214, nays 188, not voting 29, as follows:

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and pass the bill, H.R. 3505, as amended, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. SCOTT) that the House suspend the rules and pass the bill, H.R. 3505, as amended.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 404, nays 0, not voting 27, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are less than 2 minutes remaining in the vote.

□ 1116

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1107

Messrs. GILCHREST, BURTON of Indiana and MCHENRY changed their vote from “yea” to “nay.”

So the question of consideration was decided in the affirmative.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 6, ENERGY INDEPENDENCE AND SECURITY ACT OF 2007

The SPEAKER pro tempore. The gentleman from Vermont is recognized for 1 hour.

Mr. WELCH of Vermont. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. LINCOLN DIAZ-BALART). All time yielded during consideration of the rule is for debate only.

GENERAL LEAVE

Mr. WELCH of Vermont. Mr. Speaker, I ask unanimous consent that all Members be given 5 legislative days in which to revise and extend their remarks on House Resolution 846.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. WELCH of Vermont. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 846 provides for consideration of the Senate amendments to H.R. 6, the Energy Independence and Security Act. The rule provides for a motion by the majority leader to concur in the Senate amendments with the House amendments printed in the Rules Committee report. The rule provides for 1 hour of general debate, controlled by the majority and minority leaders, or their designees.

Mr. Speaker, many Members of this body have worked long and hard to change the direction of energy policy in this country. I can't mention them all, but I would be remiss not to pay special acknowledgment to the Speaker, to Mr. DINGELL, and to Mr. MARKEY.

Mr. Speaker, this House in a very short time will have an opportunity to turn the page on generations of energy policy. Perhaps the best way to characterize what has been the U.S. policy on energy is captured by looking at a photograph that serves as a metaphor. What it shows is the United States hand in hand with OPEC producers, on whom we have become increasingly reliant and dependent, pursuing an energy policy of drill-and-drill, consume-and-consume, spend-and-spend; all with ever-escalating and budget-busting expense inflicted on our families and businesses; all with reckless denial, reckless denial, to the environmental damage that we are doing by this policy to the Earth we all share; and all with cavalier disregard to our national security by depending on regimes that are not our friends.

Mr. Speaker, this bill brought before you does two fundamental things in changing the direction of energy policy. It says that we are going to consume less by taking practical steps, long overdue, to increase mileage standards, to allow American families going to and from work, picking up their kids, going to daycare, bringing

them to soccer games, to travel in safe vehicles manufactured by American workers that get 40 percent more miles per gallon. Mr. Speaker, that will save the average American family \$700 to \$1,000 a year.

Second, by making a strong national commitment to renewable energy, to having energy that we produce, that we keep our American dollars and our American jobs here at home, and by investing in cellulosic ethanol, wind and solar and technologies that have shown promise to give us the energy we need, the jobs we require and the environmental improvement that is essential, this turns the page on what has been an overdue time for change in our energy direction in this country.

Mr. Speaker, the current system just ain't going to work. The ever-escalating cost to our families is not sustainable. In December of 2002, the price of a gallon of gas was \$1.48. Today it is about \$3.09. Five years ago it cost an average Vermont family about \$600 to heat their home during the winter. It is over \$1,500 to \$2,000 now.

The environmental damage is indisputable. With 4 percent of the world's population, we are still consuming about 20 to 25 percent of the world's energy, and we generate roughly 6 billion tons of carbon dioxide into the air each year.

Mr. Speaker, we can't afford to be sending so many American dollars abroad; \$500,000 every minute from the pockets of American consumers and American businesses go to countries that provide us with the oil that we need, when they are not particularly good friends of ours. That is \$500,000 every minute, \$30 million every hour, \$5 billion every week.

This energy bill turns the page from a country that has been excessively dependent on oil consumption to a country that is going to be self-confident in its people, in its resources and its ingenuity, to take on the energy challenge and turn it into energy opportunity.

Mr. Speaker, I reserve the balance of my time.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I would like to thank the gentleman from Vermont, my friend, Mr. WELCH, for the time, and I yield myself such time as I may consume.

Mr. Speaker, fairness, openness, sunshine, transparency, bipartisanship, those are just some of the words the new majority used to describe the way they were going to run the 110th Congress. Today, just as we have seen during much of the new majority's stewardship of the House during this year, those have been, at best, hollow promises.

The rule we are considering is being called something similar to a standard conference report rule by the majority. Now, Mr. Speaker, normally considering a conference report under such a rule would not cause much controversy, but this is not a conference report. It never went through the usual

conference process. The majority never named conferees, never held a conference meeting nor gave the minority the chance to offer a motion to instruct conferees.

Last night in the Rules Committee, we met until late. We heard from our friends on the other side the aisle that, well, it is not a conference report because Republicans in the Senate didn't want a conference. But Mr. BARTON was there. He is, as you know, the ranking member of the Energy and Commerce Committee, and he said "I certainly wanted to be part of it. I wanted to be part of the conference." So, again, the blame was on the Republicans, even though, last I heard in November, it was the Democrats that won the majority in the House and in the Senate.

During their campaign, the new majority promised that they would allow for regular order for legislation. They even put their campaign promise in a book called "A New Direction for America," and yet they have consistently broken their campaign promises. And today is no exception.

Now, the rule specifically breaks two promises made by the majority during the campaign. First, they said in "A New Direction for America," "House-Senate conference committees should hold regular meetings at least weekly of all conference committee members. All duly appointed conferees should be informed of the schedule of conference committee activities in a timely manner and given ample opportunity for input and debate as decisions are made toward final bill language."

Now, why is it important, this difference between a conference report and what is being brought forth today? Again, the majority is saying that because the Senate couldn't go to conference, they were using this procedure in lieu of a conference, of a real conference.

Now, debate is structured like a conference report, and they are trying to argue that we are treating this bill like a conference report. But here is how this process differs: Republican Members were never given an opportunity to review the entire text, as conferees would have been; this bill is being considered with less than the 24 hours promised by the new majority for conference reports; there is no list of earmarks in the bill, as would be required in a conference report; and there is no list of air-dropped earmarks, as would be required in a conference report.

That is why it is important, what we are dealing with. It seems somewhat technical, but it is extremely important that a mechanism is being used that has circumvented the conference process. Circumventing the conference committee not only blocks Members from debating and amending the legislation in the committee, but it blocks the minority from using one of the few legislative tools at our disposal, which is, obviously, as I have said, the motion to instruct conferees.

Mr. Speaker, the one time we considered such a rule in the 109th Congress,

my colleague on the Rules Committee, Mr. MCGOVERN, closed his speech opposing the rule by saying things would be different under the new majority. I think his words are particularly relevant today. He said, "We should have a more open process. We should have regular order. We should have hearings. We should have committee markups. We should do this the right way. I hope that in the next Congress that we will set a new standard, one that we can all be proud of, Democrats and Republicans alike."

Well, as I said, I think those words are particularly relevant today, because they point to the vast difference between what was promised and the reality of the performance of the majority in this Congress, and we are already 1 year into that performance of the new Congress.

□ 1130

Mr. Speaker, this is not regular order, certainly not what the majority promised. I urge my colleagues to oppose this transparent procedural ploy so that we may have a full and open debate on this critical issue of importance to the Nation.

I reserve the balance of my time.

Mr. WELCH of Vermont. Mr. Speaker, I yield 4 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I thank the gentleman.

This is a historic debate. This is a historic day in the history of the United States. Today, we debate energy independence and global warming for the first time in a serious way in our history. This legislation will accomplish things that will send a signal to the world.

In this bill, we will increase the fuel economy standards of the vehicles Americans drive from 25 miles per gallon to 35 miles per gallon. We will produce enough ethanol and cellulosic fuel that we can substitute for oil that by the year 2030, when both provisions are completely implemented, we will be backing out twice the oil that we import on a daily basis from OPEC, from the Persian Gulf. What a signal to OPEC, twice the oil from the Persian Gulf eliminated in one vote.

And, at the same time, because of the efficiencies in light bulbs, in heating, in cooling, in furnaces, in all appliances, in buildings, in homes, we will in this one vote meet 35 percent of our entire goal by the year 2030 in reducing greenhouse gases to protect the planet from global warming. We will meet in this one vote 35 percent of the entire goal between now and 2030. What a moment for this Congress.

It will unleash a technological revolution in new technology so that, rather than importing those technologies, we will be exporting those technologies. It will send a signal to our consumers that we are not going to stand by and allow them to be tipped upside down and have money shaken out of their pocket by OPEC as the

price of oil has gone from \$26 a barrel in President Bush's first year in office to over \$90 a barrel today. Every week, the American consumers send \$5 billion overseas to OPEC and other countries; \$5 billion a week.

This bill today is really a signal to OPEC that we now mean business. And it is a signal to the rest of the world that we are serious about global warming, and it is a signal to our citizens that we are going to begin to create those new green jobs in our country so that we can produce the products that are going to revolutionize the energy sector.

So make no mistake about it as you cast this vote, my colleagues, you are casting the most important energy and environment vote of your career, and you will be remembered for this vote. So I ask you to give a signal to the American people that this Congress, when the Republicans took over in 1995, imported 43 percent of its oil; now we import 61 percent of our oil. It just keeps going up and up and up. So if we are to turn a corner historically and to engage these issues of energy efficiency, these issues of energy independence, these issues of global warming, this is the vote. One vote, later on today. I urge an "aye" vote by all of the Members of this body.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, if this were the serious effort that our distinguished colleague has just mentioned, the majority would permit amendments, would permit discussion, would permit a conference on this critical issue, if it were the serious effort that has been described by the previous speaker. Instead, we see a process to shut out debate, to shut out amendments, to shut out ideas. That is not the serious effort just described.

I yield 3 minutes to the distinguished colleague on the Rules Committee, Mr. HASTINGS of Washington.

Mr. HASTINGS of Washington. I want to thank my friend from Florida for yielding me the time.

Mr. Speaker, I rise in opposition to this closed rule as was described by my friend from Florida that allows not a single amendment to be offered on the floor of the House today and in opposition to the underlying bill.

Mr. Speaker, this bill won't become law, and it shouldn't become law. Its priorities are all wrong. It won't lower gas prices; it is going to increase them. It totally ignores nuclear power as a non-emitting energy source. It totally ignores hydropower as a clean, non-emitting energy source. It raises taxes by unknown billions. And, Mr. Speaker, it gives a tax credit to people for riding their bikes to work. I am sorry, but gas prices and climate change aren't going to be fixed by making people ride their bikes to work.

This isn't a plan to make America energy independent and to free us from foreign oil. It is just a dream for the political left in this country. And let me repeat, Mr. Speaker, it raises taxes,

it is anti-nuclear and anti-dams, it forces people out of their cars, and gives tax credits for riding their bike to work.

Mr. Speaker, I want to address an issue, the Secure Rural Schools issue. And you might ask, why do I want to address that issue, because it has nothing to do with energy. And that is a very good question. It has nothing to do with energy, but it is in this bill. It is another cynical way the Democrats have approached this issue.

Time after time this year, Democrat leaders have attached Secure Rural Schools to bills they know will never become law, like this bill, and blocked attempt after attempt to put it in bills that will become law. The way this bill is written, it abandons our rural schools and communities and it moves in the program.

Don't take my word for it. Just last Tuesday, Speaker PELOSI told the Oregonian newspaper in Portland, Oregon, during a visit to Portland that "where we go from here is to see how we can phase this system out."

Mr. Speaker, I submit the full text of the article for printing in the RECORD.

[From the Oregonian, Nov. 28, 2007]

PELOSI SAYS HEALTH CARE CHANGE CAN START HERE

(By Harry Esteve)

Oregon could become a leader in the drive to establish centralized computer health records for everyone who gets medical care, U.S. House Speaker Nancy Pelosi said Tuesday in Portland.

Pelosi, D-Calif., stressed the importance of records as a way to save billions of dollars in health care costs, reduce medical mistakes and ensure better care in rural communities.

"Electronic records are essential to improving health care," Pelosi said. "This is the future. I see Oregon taking the lead in that future."

Pelosi made her comments after holding a round-table discussion with a group of medical experts, hospital administrators and elected officials, including U.S. Rep. David Wu, D-Ore., and Gov. Ted Kulongoski. The discussion, held at Oregon Health & Science University's South Waterfront office tower, was closed to the media.

Pelosi's visit to Oregon was part of her "innovation agenda," an effort to boost technological progress, such as more broadband access and alternative energy systems, and to increase the number of scientists, mathematicians and engineers coming out of U.S. schools.

At the same news conference, Kulongoski announced the state has received a \$20 million federal grant to install broadband cable at rural hospitals and clinics throughout the state. The grant, from the Federal Communications Commission, would allow a doctor in a remote part of the state to send a digital MRI image to a specialist at OHSU Hospital, for example.

Kulongoski said the grant and Pelosi's initiative are part of a widespread movement toward better communication in the health care industry. He said he saw a recent study that showed savings of \$1 billion in Oregon alone if electronic health care records were in place.

In Oregon, as with much of the country, recent attention on medical issues has focused on the escalating cost of health care and the rapidly rising number of uninsured or underinsured.

After talking to reporters for about five minutes, Pelosi answered two questions. One was about the trade-off between her goal of improved record-keeping and efforts to make health care more affordable to everyone. The other was on an unrelated topic: federal timber payments to Oregon counties.

Pelosi said the push for centralized medical records would not take away from efforts to give health coverage to millions of people who lack it. Medical experts say the ability to transfer records with ease is as important as other medical breakthroughs, such as new medicines or therapies, Pelosi said.

"We're not talking about this as some kind of elitist thing for people who already have health care," Pelosi said. "We're talking about it as essential."

Pelosi all but brushed off the question on timber payments. Oregon's congressional delegation has been pushing to keep federal payments to counties that used to receive millions of dollars from logging on national forests.

That program expired, although Congress passed a one-year extension this year.

"Where we go from here is to see how to phase this system out" over the next few years, Pelosi said Tuesday.

Mr. Speaker, the Democrat leaders of this House need to stop with these false promises regarding rural schools. Let's get serious. Let's keep the promises that were made, the full promise, not one that dwindles towards nothing. Let's get it done as relates to rural schools in a responsible way before the year ends and before this program expires.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentleman from New Mexico (Mr. UDALL).

Mr. UDALL of New Mexico. Mr. Speaker, we stand today on the verge of a new energy horizon, one that promises a more secure America, an America with thousands upon thousands of new manufacturing and high-tech jobs, an America with lower and more stable energy prices, an America at long last responding to the threats of global warming. But this America will only be realized by ushering the legislation before us into law.

This bill reflects a bold vision, a vision to respond to many of the gravest threats facing our Nation, a vision befitting the United States Congress, the world's greatest deliberative body.

There is much to laud in this legislation. This bill would increase American energy independence, strengthen national security, lower energy costs, grow our economy, and create new jobs, reduce global warming. Now, the focus on the renewable electricity standard provision: a Federal RES is long overdue, and I thank you for your commitment to this provision. Thank you to my Democratic and Republican colleagues who joined me in offering this amendment in August and to the 220 Members who supported its passage.

In closing, I would like to remind my colleagues that we are not here to defend the status quo; we are here to lead. We are here to ensure America's standing as a model of ingenuity, creativity, cutting-edge thinking, and revolutionary ideas. Failing to usher this

legislation into law I fear will threaten that standing.

The renewables revolution which we will be ushering in through this bill and the RES provision is good for business, it is good for the environment, and it is good for the security of our Nation, and I urge my colleagues to support it.

Mr. Speaker, today, we stand on the verge of a new energy horizon. One that promises a more secure America. An America with thousands upon thousands of new manufacturing and high-tech jobs. An America with lower and more stable energy prices. An America at long last responding to the threats of global warming.

But this America will only be realized by ushering the legislation before us today into law.

This legislation reflects a bold vision. A vision on the scope needed to respond to many of the gravest threats facing our Nation. A vision befitting the United States Congress, the world's greatest deliberative body.

There is much to laud in this legislation. The first increase in CAFE requirements in over 30 years, which will save American families an estimated \$700 to \$1,000 per year at the pump. An historic commitment to American biofuels that will fuel our cars and trucks.

And, of great importance to me and my constituents, the inclusion of a renewable electricity standard. An RES, as it is known, requires electric utilities to generate 15 percent of their electricity through renewable resources and energy efficiency measures.

I would like to thank the Speaker in particular for her commitment to this provision, the several colleagues who joined me in offering this as an amendment in August, and the 220 Members who supported its passage at that time.

Opponents of an RES claim that it would increase electricity costs for consumers. Study after study has shown the contrary. It has consistently been found that a strong Federal RES could actually save American consumers money. A recent study conducted by the Union of Concerned Scientists found an RES would save consumers \$13 billion to \$18.1 billion on electricity and natural gas bills cumulatively by 2020. In March, the energy consulting firm Wood Mackenzie projected that consumers would save more than \$100 billion with an RES in place. They also found that with more diverse energy sources and a decrease in fossil fuel consumption, reduced demand for natural gas would lower prices by as much as 20 percent by 2026.

And while consumers are saving money, a Federal RES also helps make our Nation safer and less dependent on foreign sources of energy. Almost all new electricity generation in the last decade has been fueled by natural gas. The biggest sources for future natural gas supplies are Iran, Russia, and Qatar, which together hold 58 percent of the world's natural gas reserves. Increasing the production of domestic energy from biomass, solar, wind, and other renewable sources helps us reduce our dependence on foreign countries, thereby securing America's energy independence.

The requirements under this RES start modestly, and increase gradually. It includes many provisions both to help utilities meet the requirements, and to reward those utilities that

meet the requirements ahead of schedule. It allows States, many of whom have moved far ahead on this issue, to have standards that are more rigorous. It has support from the business community, the labor community, the faith community, and the environmental community.

It is an idea, Madame Speaker—like all included in this legislation—whose time is long overdue.

My colleagues, we are not here to defend the status quo. We are here to lead. We are here to make the difficult decisions necessary to ensure America's continued standing as a model of ingenuity, creativity, cutting edge thinking, and revolutionary ideas. Failing to usher this legislation into law will, I fear, threaten that standing.

Passing this legislation today should not be considered one of the difficult decisions we have to make. And to those for whom it is a difficult decision, I urge you to join me and the millions of Americans across the country who recognize that the renewables revolution is good for business, is good for the environment, and is good for the security of our Nation.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, it is my privilege to yield 2 minutes to the distinguished gentleman from Louisiana (Mr. BOUSTANY).

Mr. BOUSTANY. I thank the gentleman for yielding.

It has been almost a year now, and we have had a lot of discussion throughout committees and so forth on a number of areas that would promote green technology, and I want to say that I share your commitment. I think it is critical that we move in that direction. CAFE standards are good. Improving better gas mileage for our vehicles is a good thing. Unleashing American ingenuity is a good thing to solve our energy problems. But we should not be picking favorites. This Congress should not pick favorites at the outset with the new development of all these technologies. We need to be technology neutral in this approach, and this bill does not do that. It seeks to pick favorites, and it also does a number of things that would be devastating to our oil and gas industry as it exists today.

Let's be truthful with the American public. We are not going to see energy independence in the short term. We have to manage strategically our energy dependence. The provisions, such as getting rid of the 6 percent domestic manufacturing deduction for our oil and gas companies and our refineries would be devastating to our industry. Getting rid of the foreign tax credit provision as applied only to oil companies is going to be devastating. This will deny the ability of our oil companies to deduct their foreign taxes, in effect creating double taxation on our companies.

What does this mean? The big companies are the ones that have the technology to drill in deep water, to improve our supply; the smaller companies partner with them. If the big companies can't do it, smaller companies

won't be able to do it. And what are we going to do in the short term? The green technology that we all want is not there yet. So we have to strategically manage our dependence, and this bill will actually increase our dependence on foreign oil based on a number of these provisions. There is nearly \$13 billion in new taxes on our oil and gas companies. This is critical. This is going to hurt our energy security.

So for these reasons, I oppose the rule and I oppose the underlying bill. Let's work in a bipartisan way to get a good piece of energy legislation.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentlewoman from Arizona (Ms. GIFFORDS).

Ms. GIFFORDS. Mr. Speaker, there are three critical priorities that this Congress faces: our independence from foreign oil sources, addressing global warming, but also American competitiveness. I believe that solar energy technology offers one of the best solutions to challenging these great, great problems that we have.

Now, as the House takes up this energy independence bill, I commend the commitment that this legislation makes to solar energy. This bill authorizes new research and development into solar technologies. The bill authorizes programs to help train a qualified solar workforce to install and maintain these technologies, not just in Arizona, but across the country. This bill also contains some tax incentives from my Renewal Energy Assistance Act that will help solar become more affordable, not just to homeowners, but also to businesses. This is what is so critical to spur the innovation and investment that is vital to the creation of our reliable solar market for the country, not just Arizona. But with over 350 days of sunshine every single year, it is critical that we harness the power of the sun.

I urge my colleagues to support this bill.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Oklahoma (Mr. SULLIVAN).

Mr. SULLIVAN. Mr. Speaker, I rise today to wonder how Congress could possibly consider addressing an energy bill that has no energy in it.

The House is considering energy legislation which does nothing to expand domestic energy production, develop nuclear or coal-to-liquids technology, and only increases our Nation's dependence on foreign oil and hurts American jobs and the economy.

While promoting the use of alternative energy is a worthy and long-term goal, by mandating and increasing renewable fuels 36 billion gallons by 2022 without concern to the fact that this technology does not exist today and with almost no consideration of cost or price to consumers, it is not the right direction for our country or the Nation's energy industry.

□ 1145

In addition, the renewable portfolio standards mandates in this legislation,

which only nine States can currently meet, can increase the cost to Oklahomans by a whopping \$900 million.

Given our country's current energy needs and our long-term goal of energy independence and security, it is imperative for us to increase our domestic production of crude oil and natural gas while exploring innovative and renewable energy technologies.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentlewoman from New Hampshire (Ms. SHEA-PORTER).

Ms. SHEA-PORTER. Mr. Speaker, the American people are painfully aware that the 110th Congress inherited a failed energy policy. They feel the pain at the pump, they feel the pain in their heating bills, and they know our country is dependent on foreign oil. They know that is dangerous for us. They know that the oil will run out some time, and they know that fossil fuels are damaging our environment and causing health problems. They know that Congress has not increased miles per gallon standards for 32 years.

Now Americans want to know what Congress is going to do. Americans want to know if we are going to continue to fiddle, to delay, to stall, as some in Congress wish to do, or will Congress be bold and show leadership?

This 110th Congress must confront these problems or history will judge us harshly. The leadership is here. The time is now. The bill is good. I urge my colleagues to step up and forward into our future by voting "yes."

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. BRADY).

Mr. BRADY of Texas. Mr. Speaker, last November Democrats looked the American people in the eye and they promised, they promised they would lower gas prices and become energy independent. Instead, gas prices are almost a dollar higher at the pump and America is more dependent on foreign oil than ever.

This new Democrat Congress has failed miserably; unless, of course, you count promoting energy-efficient light bulbs and threatening to sue OPEC, for whatever that is worth.

To be fair, there are good things in this bill, such as increasing gas mileage for cars and trucks and extending Republican tax incentives to encourage more energy-efficient technology and more renewable energy such as solar, wind, biomass and geothermal.

But this bill is disappointing because it launches yet another attack on Texas and American energy producers who are trying to create jobs and explore for new energy here in America. It also cripples the emerging biodiesel industry which is important to the Nation as we seek alternatives to gasoline.

Let me tell you this: OPEC is going to love this bill. OPEC is going to love this bill, but families who are going to pay more at the pump and pay higher

electric bills at home are going to hate it. Thank goodness this bill is dead on arrival in the Senate.

We need more energy, a balanced approach, not more higher gas prices and higher electric prices. This bill deserves to be defeated.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I appreciate the gentleman's courtesy, his leadership on this bill and for yielding me this time.

Listening to the debate here on the rule, as I sat through the hearing last night in the Rules Committee, I am, frankly, more than a little disappointed in the discussion that has taken place.

First of all, this is a very large and complex bill, but the vast majority of this bill has actually already passed the House at least once, some of it twice. We have had 11 committees that have been involved in this process. It has not somehow been "sprung" on people. There is a large stack of paper that represents the bill, as is the case in most complex legislation. But most of it is familiar to the staff. It is familiar to the Members, if they choose to have been involved with this issue. It has been here before.

The process that has taken place is not one that we would have desired, but the Republicans in the Senate decided that there would not be a conference committee. But there has been a process that has gone on which I don't think it has been fairly characterized, frankly, where there has been extensive back-and-forth, where House and Senate staff committee members from the various jurisdictions met since September, have met in the same room going over these details. And, in fact, you can verify this is you talk to staff members on both sides. Republican staff members have been able to influence what has been going on here. Indeed I think majority staff members will acknowledge positively the technical expertise that has been provided and print out changes Republicans have influenced. But all of that is sort of swept away and ignored. That is wrong.

Fundamentally, we want to talk about what we are for. This deals with a significant increase in CAFE standards. There is lots of new energy here because we focus the alternatives on the energy sources that need tax support. And we pay for it, although it is scaled down from what has already passed the House. I think people ought to look at the RECORD.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, it is my privilege to yield 3 minutes to a distinguished leader on the issue of energy in this Congress, the gentleman from Pennsylvania (Mr. PETERSON).

Mr. PETERSON of Pennsylvania. Just yesterday, OPEC told the world that \$90 oil is okay and they won't be increasing production. They want \$100 oil. They want more.

Now, on the surface, Americans will say, Thank God. We have a Democrat energy bill coming to help us as energy prices continue to skyrocket as we move into the cold winter months. However, what hope does H.R. 6 actually give to young families with high home heating costs? Unquestionably, nothing.

What hope does H.R. 6 bring to poor folks living in rural and urban America that struggle to afford fuel to travel to work, to drive their kids to school and do Christmas shopping? Absolutely nothing.

What relief does H.R. 6 bring to seniors living on fixed incomes who struggle to make mortgage payments and stay warm? Absolutely nothing.

What does H.R. 6 do for rural and urban seniors who kept their thermostats at 58 degrees last winter with temperatures below zero because that is all they could afford? Nothing.

What does H.R. 6 do to prevent the tragedy that happened in my district last year when an elderly gentleman living alone tried to keep warm on a subzero night by putting coal in his wood-burning stove and perished when his modest home burned? It does nothing to prevent that.

What does H.R. 6 do for small business owners and manufacturers who happen to be high energy consumers to remain competitive and be able to keep America's best jobs here? It does nothing.

What does H.R. 6 do to the large manufacturers who have to compete in the global marketplace and provide jobs for middle-class America and compete against countries with cheap labor and cheap energy? It does nothing. In fact, it will continue to push more jobs offshore to countries like India and China where energy is cheaper and more accessible.

The working men and women of America who struggle to heat their homes and travel to and from work deserve action from this Congress. We need to provide them with available and affordable energy not 4 years from now but today.

Yes, Congress is the reason we have the highest world energy prices because we have continually locked up our abundant supplies of gas and oil and coal, increasing our dependence on unaffordable, high-priced oil and gas from foreign countries.

H.R. 6 is not an energy bill. Efficiency standards, conservation and renewables are vital to our future, but they are 4 and 5 years down the road before they provide energy. Americans need energy now, not tomorrow. We have the highest prices in the history of this country; and folks, I am going to tell you, they are going higher. The height has not been reached. We are going to have more than \$100 oil because OPEC is in control because we have decided that we are not going to produce energy for America; we are going to buy it from those who are holding us hostage. This bill has some

good futuristic parts, but nothing in the next 5 years to heat and cool this country and allow Americans to drive to work affordably. We need an energy bill.

I challenge the bill Democrats, let's do a bipartisan bill and let's argue the points. Let's bring affordable energy to America.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, every revolution has a start. May 25, 1961, John F. Kennedy, with full confidence in Americans' ability to innovate, said we are going to go to the Moon in 10 years.

Skip ahead a few years, December 6, 2007, the day we are starting a clean energy revolution to give America economic growth through technological progress, and that progress is happening all across America. In every State, that progress is going to take place, because this bill is going to help innovators.

Let's take a quick run-through where: In Michigan, where General Motors plans on building the plug-in hybrid that you can drive 40 miles with zero gasoline and get 100 miles per gallon with batteries designed in Massachusetts.

In Florida, California, Arizona, Mississippi, a whole host of States, where the Ausra Technology Company has designed a solar thermal process to make CO₂-free solar energy within 10 years to be competitive with coal-based electricity. For those who say we can't do energy everywhere, where the sun shines, solar thermal energy will work, including in my State, the State of Washington.

We move forward, virtually every State in the country has the potential for biofuels, and here is a picture of the Imperium Biofuels Company. It is located in a former dying timber town of Grays Harbor, Washington. It is the largest biodiesel plant in the world, something America can be proud about, that we will expand.

And lastly, emerging technologies, some of which people have not heard about. This is a picture of a wave power buoy on the coast of Oregon. We have enough energy in the Pacific coast in a 10-by-10 mile stretch to power all of the electrical needs of the State of California. And this doesn't even start to talk about gains from efficiency.

This bill will help Americans insulate their homes, make sure they are using fairly efficient lighting, and make sure that their furnaces and air conditioning are efficient. And a new report just out this week says that we can cut by 50 percent our growth. Pass this bill and start this clean energy revolution.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 7 minutes to the gentleman from Texas (Mr. BARTON), the distinguished ranking member of the Energy and Commerce Committee.

Mr. BARTON of Texas. Mr. Speaker, I want to thank the distinguished member of the Rules Committee for yielding to me.

I have, in the 23 years that I have been in this body, engaged in, I would say, approximately two dozen, maybe three dozen, debates on various energy bills. Almost every Congress we have some sort of energy bill that comes before this body.

I have to say that my heart is sad today because, in the debate so far in this Congress on energy legislation, it has been fairly one-sided. It has been the majority trying to put their blueprint for America on energy in the committee and on the floor and in the Rules Committee with really no input and no debate from the minority party.

I understand that the majority in the House has the right to work its will. We are not the other body, the Senate on the other side of the Capitol. We have a Rules Committee that is two to one plus one. We stack the deck so that the majority can make things happen. And that's a good thing.

But the majority has responsibilities. One of the responsibilities is to hear the minority and give the minority the opportunity to have input and to have a debate and have their ideas voted on.

In this Congress on energy legislation, the only Republican amendment that has been debated on the floor of the House is the motion to recommit. In the last energy bill, we were given a motion to recommit and we offered a full substitute that had clean coal technology, alternative fuels technology, that had some real energy, had some supply incentives. That motion to recommit was defeated, but at least it was debated. The rule before us today does not give the minority an option to have a motion to recommit. The rule before us today does not give the minority an option to have a substitute amendment.

Once again we are on the floor of the House with one of the major components of our economy, energy legislation, and it is the majority way or no way. Well, I hope we would vote this rule down and go back to the Rules Committee and let us have either a Republican substitute, a Republican motion to recommit, some amendments, the Shimkus amendment on alternative fuels, the Upton amendment on renewable portfolio standards. They were all offered in the Rules Committee last night. They are substantive and real. They would improve the bill if they were allowed to be made in order. But this rule once again is a closed rule with one amendment, a Democrat substitute, no motion to recommit.

The underlying bill is over a thousand pages. The underlying bill had not been seen in public until about 8:30 last evening. Obviously you can't digest a thousand-page bill overnight. I have been reading the table of contents trying to look at some summaries what is in the bill. Most is recycled. It is

things that have been here before, but there are some new things.

There is some provision for the State of New York, for example, in the tax title that diverts State income taxes that would normally be paid to the Federal Government, they are kept by either the State or the City of New York, and it is worth about \$2 billion. There has been no debate on that.

□ 1200

Now, I've got to give Chairman RANGEL, I would assume I would give him credit for easing the tax burden of the people of his city and the people of his State. But there's not been a public debate on that. That's just a little \$2 billion deal in the tax title of the bill. It may have showed up, it may have been there all along, but I just saw it reading through the summary about 10 minutes ago.

So I don't think, if you're going to have a major policy debate on energy, which is worthwhile, and if the majority wants to change the energy policy, that's worthwhile too. But there ought to be a real debate and there ought to be real amendments, and we ought to let this body vote. This rule doesn't do that. This rule doesn't do that.

And most of the things that are being extolled in the bill are things that were in the energy policy act 2 years ago. They're being extended. They're being expanded. That may or may not be a good thing, but we ought to have a debate about it.

Do we really want to put a 36-billion gallon mandate for renewable fuels that can't be met by the current technology on the backs of the American people? This bill does that.

I'm all for renewable fuels. The Energy Policy Act of 2005 had an \$8-billion gallon mandate for renewable fuels. The market is exceeding that. But it's a stretch to go from 8 billion, which is current law, to 36 billion. And the technology doesn't currently exist. So maybe we ought to have a debate, maybe we ought to have some off-ramps, some triggers that we set the goal, but make sure that we have the ability to meet that goal before we put that mandate in.

On the renewable portfolio standard for electricity generators, it only applies to investor owned; doesn't apply to nonprofits and to co-ops. I don't think that's a good idea. It doesn't allow all forms of renewable. For example, new hydro is not included as a renewable. You know, some sort of a clean coal alternative which would be an alternative form is not included. It's very restrictive.

The wind part of this bill, we're for wind power. The Energy Policy Act of 2005 expanded the tax credit for wind. This bill rescinds part of that. So there's a renewable form that they're being regressive.

So just in summary, I would hope that the majority understands that being in the majority gives you the right to set the agenda, but it

shouldn't give you the right to stifle debate so that the minority has absolutely no input. And in this bill that's before us today, the minority in the House of Representatives has had zero, nada, zip, no input; and that's not good for democracy.

So I hope that we'll defeat the rule, take it back to the Rules Committee, let's have a debate. Let's have some amendments made in order and then bring a real energy bill that's bipartisan back to the floor of the House of Representatives.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentleman from New Hampshire (Mr. HODES).

Mr. HODES. Mr. Speaker, I rise in support of this rule and in strong support of the underlying bill, the Energy Independence and Security Act, whose provisions, in the main, have been debated, reviewed, talked about and considered in this House for a year.

This legislation, while not perfect, and no legislation is, represents a historic opportunity to move our country toward a secure future. The bill marks a turning point in the Nation's history and answers the call for change that the American people sounded in 2006.

The harsh partisan rhetoric from the other side, Mr. Speaker, is a product of the same obsolete thinking which produced our existing energy policy, which has kept this country funneling petrodollars to countries that fund terrorism.

The people of my home State of New Hampshire are pressed by soaring gas prices; they're facing a cold winter. But they understand that energy independence, our economy and our national security are inseparable.

With this bill we take a firm stand for real security, for healthy families, for a thriving economy, and for a sustainable future for our planet. I urge my colleagues to vote for the rule and for the bill.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield myself such time as I may consume.

With regard to the protests, really the outrage that is being heard from this side of the aisle, the origin of that is because of the unfairness of the process, the fact that the minority has been, as was very, I think, clearly explained by the ranking member of the Energy and Commerce Committee when he just spoke, Mr. BARTON, the minority has been shut out. And this is an extremely important issue for the Nation. And if there is going to be a new energy policy, the new energy policy must be developed by the representatives of the American people in a way that represents, not only a strict numerical majority that controls the process of the House by virtue of the existence of the Rules Committee, et cetera, the ability to close out debate, but that it has to reflect genuine majority opinion. And that is reflected in the United States of America when there is dialogue, discussion, and agreement in a bipartisan fashion. So

that's where the complaining, the outrage is coming from.

And I would remind our friends on the other side of the aisle that this is too important an issue to have such an exclusivist process being used to develop it. Apparently, there is no genuine interest in passing a law, in having a law passed, become law, legislation become law; but, rather, there is interest in the exercise of press releases, of passage by the House, perhaps like we've seen with much of the appropriations process where, certainly in the 15 years that I've been here, I don't recall one bill having been sent and signed at this stage of the session.

But anyway, I wanted to remind my colleagues as to the origin of the outrage, of the discontent felt by the minority side of the aisle.

At this point, Mr. Speaker, I reserve.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentlewoman from South Dakota, a woman who has been a leader on this issue for years, Ms. HERSETH SANDLIN.

Ms. HERSETH SANDLIN. Mr. Speaker, I rise in support of the rule and this historic bill's commitment to clean, renewable energy and its positive impact on strengthening our national security and our economic prosperity.

One of the most important aspects of this bill is the appropriately aggressive renewable fuels standard it contains, which builds upon the first renewable fuel standard passed in the Energy Policy Act of 2005, which I supported. And it recognizes the contributions that rural America is ready, willing and able to make toward meeting our Nation's energy needs.

Like many of my fellow South Dakotans, like so many Americans, I strongly support expanding our commitment to the production and use of renewable fuels such as ethanol and biodiesel. This legislation will mandate that we produce at least 36 billion gallons of renewable fuels in this country by the year 2022, and 1 billion gallons of biodiesel by 2012.

For the past 2½ years we have seen how the first renewable fuel standard, an initial step forward reforming our Nation's approach to energy production, has resulted in tremendous technological change and tremendous opportunities. The new RFS will continue to drive the development of new and efficient processes to turn rural America's natural abundance into energy.

I urge my colleagues to support this rule and this bill, in large measure because of this renewable fuel standard which reflects a compromise with the Senate that improves the structure of the standard, while retaining the overall volume and schedule of the Senate bill. The RFS contained in the provisions we consider now include a 9 billion gallon requirement of conventional biofuels in 2008 to address the serious circumstances faced by the industry today. It accelerates to 2009 and 2010 the start dates for advanced and cellulosic biofuels and their significant

greenhouse gas reductions. It increases the total overall mandates in the intervening years, through 2016; and, importantly, it includes specific targets for biodiesel.

Again, I urge my colleagues to vote “yes” on the rule and to support this historic legislation.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I reserve.

Mr. WELCH of Vermont. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. HALL).

Mr. HALL of New York. Mr. Speaker, I’m proud to rise today in support of this rule because last November the American people sent a new majority to Congress with a clear mission, to reduce our energy dependence on foreign oil, fight skyrocketing energy prices, and to protect our environment. The landmark legislation before the House today makes good on that goal.

You know, in my district, we’re able to buy wind power on the back of our electric bill. My wife and I burn 20 percent soy biodiesel in our home heating oil in our furnace. We’re driving an American-made hybrid car which today gets 33 miles per gallon, although one can get 35 if one drives a little slower with a gentle foot on the accelerator. These things are attainable now. The technologies, many of them are available now.

We had a woman call our office and say, I’m all excited; I just got a flex fuel vehicle. Where can I get some flex fuel? And my staff had to tell her that there were two pumps in New York State for E-85.

There’s plenty of supply. We’ve heard in front of the select committee that there’s a surplus right now of both biodiesel and ethanol, but not the infrastructure to get them to market. And so we need to put the supply and the demand together, and that will produce more incentive for people to develop these biofuels. I believe that they can be produced, and they are being produced, in fact, by several producers in my district.

This sweeping array of provisions on this bill includes two historic measures. First of all, the first CAFE standard fuel economy increase in three decades, which will save drivers \$1,000 at the pump and cut Persian Gulf oil imports in half. And for the first time we will adopt a renewable energy standard so we can replace the polluting electric generation plants we rely on today with domestically produced power that helps us fight climate change.

With energy prices burdening our working families, dependence on foreign oil continuing to undermine our sovereignty, I urge my colleagues to support the rule and this bill.

Mr. LINCOLN DIAZ-BALART of Florida. I continue to reserve, Mr. Speaker.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. MCNERNEY).

Mr. MCNERNEY. Mr. Speaker, I spent two good decades working profes-

sionally in renewable energy, and I know the great potential that new energy technology offers. The steps we’re taking today will improve the world for future generations.

We should all feel proud as we pass this bill that will benefit our economy, our security, our children, and our planet. When future generations look back on the actions we’re taking today, they will see it as a monumental first step away from centuries of consumption and exploitation and towards a bright and clean future.

I’m very pleased that this bill includes incentives for renewable energy, higher fuel economy standards for vehicles, a 15 percent renewable energy standard, and my bill, which will encourage groundbreaking research and geothermal energy. States like California have blazed the trail on these issues, and now everyone else can follow.

I support this bill, this rule, and urge my colleagues to do the same.

Mr. LINCOLN DIAZ-BALART of Florida. I reserve, Mr. Speaker.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1½ minutes to the gentleman from Texas (Mr. DOGGETT).

Mr. DOGGETT. Mr. Speaker, most folks think of “CAFE” as a place to eat. Well, our cars and our trucks have been eating too much energy and emitting too much pollution for far too long, while our planet and our pocketbooks take a beating. Fuel efficiency standards have not been increased since 1975 when Paul Simon began singing “Still Crazy After All These Years.”

□ 1215

Well, it is still crazy that 32 years later fuel economy standards have not been increased and we cannot get more miles per gallon despite both our dangerous overdependence on foreign oil and the growing threat of global warming. We need 21st-century fuel economy standards for 21st-century vehicles. And thanks to this bill, many of those vehicles will be fuel-efficient, plug-in hybrids, following the lead that we have taken with the Plug-in Partners campaign in Austin, Texas.

Texans alone will save \$2 billion at the pump when these standards become fully effective. And consumers across America will save billions more from the requirement in this bill that utilities generate at least 15 percent of their energy from renewable energy. Keep in mind that even Governor Bush signed a renewable energy portfolio in Texas, and Texas is currently ahead of the country on this issue.

A green light for green energy encourages a new generation of job-creating innovation that we can export to the world—reducing our reliance on fossil fuels and, maybe even more importantly, fossilized thinking that we have heard so much of here this morning.

This bill will reduce the threat of both global war and global warming.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I reserve the balance of my time.

Mr. WELCH of Vermont. Mr. Speaker, I yield 1 minute to the gentlewoman from California (Ms. HARMAN).

(Ms. HARMAN asked and was given permission to revise and extend her remarks.)

Ms. HARMAN. Mr. Speaker, while the process has been difficult, this rule is worthy of support, and the underlying bill is a test of our will to solve the cataclysmic challenge of our time: global warming.

This rule and this bill give us many tools, from fuel efficiency to alternative fuels to renewable energy standards. They also incorporate thoughtful, thorough appliance efficiency standards reported on a bipartisan basis by the Commerce Committee and previously enacted by this House.

As co-author with Fred Upton of the light bulb provisions, let me underscore how important they are. In this bill, we ban, by 2012, the famously inefficient 100-watt incandescent bulb, which emits 10 percent of its energy as light and wastes the remaining 90 percent. Sounds like this House. We phase out remaining inefficient bulbs by 2014, and by 2020 light bulbs will be three times more efficient, paving the way for the use of superefficient LEDs manufactured in the U.S. by 2020.

Mr. Speaker, it takes 18 seconds to change a light bulb and even less time to vote “aye.”

Importantly, the bill gives the Department of Energy the authority to craft a rule to give the lighting industry the flexibility to sell a range of bulbs, but there are protections. The rule must save as much energy as a flat requirement that all bulbs be 3 times more efficient than today’s bulbs. And if DOE doesn’t get its act together, the flat requirement will automatically become law.

Though I believe that Compact Fluorescent Lightbulbs (CFLs) are an important technology, the intent of these standards is that at no time will CFLs be the only lighting choice available to American consumers. The bill also requires that DOE find ways to minimize the amount of mercury in CFLs and provides incentives for high-efficiency lighting to be manufactured in the United States.

I would like to thank Senators BINGAMAN, BOXER and Congressman UPTON (who has been my partner in all things light bulbs) for their tireless work on these provisions.

Finally, I’d like to thank Jay Hulings, my Legislative Director and Committee staff—notably John Jimison on the House side, and Deborah Estes on the Senate side—for their long hours and dedication to getting this job done.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I want to thank my friend again for yielding and all of those who participated in this debate on this rule that is so critical in the sense that it is bringing forth legislation of extraordinary importance to the Nation. Unfortunately, it has been brought forth in a process that has been most unfair and ultimately exclusivist, and that does not lead to good policy.

I have a friend who always remarks that in government, personnel is policy. I have realized now how process becomes policy when it is so exclusivist, not allowing the genuine will of the House to move forward.

Mr. Speaker, I will be asking for a "no" vote on the previous question so that we can amend this rule and move toward passing an AMT patch for the millions of American taxpayers who face the unintended consequences of that tax.

The AMT was enacted in 1969 to prevent a small number of wealthy taxpayers from using legitimate deductions and credits to avoid paying taxes altogether. Back then, the tax affected only 155 people, the "super rich." The AMT was never adjusted to match inflation; therefore, the AMT is affecting more and more taxpayers. Without fixing the AMT problem, 25 million taxpayers will be hit by the AMT, costing the average taxpayer an additional \$2,000. In Florida alone, it will affect over 1 million taxpayers, 6.5 times more than in 2005.

The longer we wait to fix the AMT, the longer it will take for the IRS to make the necessary changes to tax forms and to process tax returns under any changes to the law. As of now, the majority's failure to pass an AMT fix will force the IRS to delay processing tax refunds until mid March at the earliest. This is likely to delay returns for 21 million taxpayers who currently will be subject to the AMT but who, with the patch, would not have to pay the AMT. That comes out to about a \$75 billion interest-free loan to the Federal Government paid for by the American taxpayer.

We urgently need to fix the AMT so that American taxpayers will not have to wait to get their hard-earned money back from the Federal Government. I urge my colleagues to help move this important legislation and oppose the previous question.

Mr. Speaker, I ask unanimous consent to insert the text of the amendment and extraneous materials immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield back the balance of my time.

Mr. WELCH of Vermont. I thank my colleague from Florida (Mr. DIAZ-BALART), appreciate his arguments, and will close on behalf of our side.

There are two arguments that I heard in the course of this debate. One was about process and procedure. I happen to believe that process and procedure is important. It's important not in its own right; it's important for what it can do to help us in this body create better legislation. But process can be abused. It can be abused when the goal is not to make a better bill; it's to obstruct the passage of any bill. And the

choice that had to be made by leadership on this side, particularly in view of the decision in the other body to refuse to go to conference, was whether to accept that use of process that obstructed consideration of energy legislation this country needs or to move ahead. They made the right choice.

Second, this legislation, a thousand pages, as Mr. DIAZ-BALART and others mentioned, they had some fun holding up the bill. Mr. Speaker, the vast majority of that 1,000 pages contains provisions that have been considered in many cases passed by this House of Representatives. What this bill is is a compilation of the work that many people in this body have been doing for years. What's different is that it is actually coming to the House floor for a vote.

Substantively, this legislation does turn the page on energy policy. I showed a picture in the beginning. It's a metaphor really for the energy policy that we have had in this country for generations. It's the American administration hand in hand with OPEC leadership, OPEC countries, pursuing a policy of drill-and-drill, consume-and-consume, export our dollars and import their oil.

If we turn the page, we are going to have a new picture. We are going to have a picture of the American Congress and the American administration hand in hand with American farmers who are driving their tractors, creating energy alternatives. It is going to be a picture of the American Congress with young engineers who are creating better, more efficient appliances. It is going to be a picture of the American Congress and American families who are driving to and from their soccer games, to and from work, to and from day care in safe vehicles, manufactured by American workers, that get 40 percent higher mileage, saving that family \$1,000.

We know, we know that this is a hat trick. If we change our energy policy and we act like a confident Nation, not a dependent Nation, we can protect the planet, reverse global warming. We can create good jobs and keep American dollars at home, and we can increase our national security by reducing our dependence on regimes that have no particular interest in the security of the United States but whose primary interest is in the dollars from American consumers and American businesses.

I urge a "yes" vote on the previous question and on the rule.

The material previously referred to by Mr. LINCOLN DIAZ-BALART of Florida is as follows:

AMENDMENT TO H. RES. 846 OFFERED BY MR. LINCOLN DIAZ-BALART OF FLORIDA

Strike all after the resolved clause and insert:

"That upon adoption of this resolution, the bill (H.R. 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and

creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes, with Senate amendments thereto, shall be considered to have been taken from the Speaker's table. A single motion that the House concur in each of the Senate amendments with the respective amendment specified in section 2 of this resolution shall be considered as pending in the House without intervention of any point of order. The Senate amendments and the motion shall be considered as read. The motion shall be debatable for one hour equally divided and controlled by the Majority Leader and the Minority Leader or their designees. The previous question shall be considered as ordered on the motion to final adoption without intervening motion or demand for division of the question.

"Sec. 2. The amendments referred to in section I are as follows:

"In lieu of the matter proposed to be inserted for the text of the bill, H.R. 6, insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the 'Stealth Tax Relief Extension Act of 2007'.

SECTION 2. EXTENSION OF ALTERNATIVE MINIMUM TAX RELIEF FOR NONREFUNDABLE PERSONAL CREDITS.

(a) IN GENERAL.—Paragraph (2) of section 26(a) (relating to special rule for taxable years 2000 through 2006) is amended—

(1) by striking "or 2006" and inserting "2006, or 2007", and

(2) by striking "2006" in the heading thereof and inserting "2007".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2006.

SECTION 3. EXTENSION OF INCREASED ALTERNATIVE MINIMUM TAX EXEMPTION AMOUNT.

(a) IN GENERAL.—Paragraph (1) of section 55(d) (relating to exemption amount) is amended—

(1) by striking "\$62,550 in the case of taxable years beginning in 2006" in subparagraph (A) and inserting "\$66,250 in the case of taxable years beginning in 2007", and

(2) by striking "\$42,500 in the case of taxable years beginning in 2006" in subparagraph (B) and inserting; "(44,350 in the case of taxable years beginning in 2007)".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2006."

"In lieu of the matter proposed to be inserted for the title of the bill, H.R. 6, insert the following: "To amend the Internal Revenue Code of 1986 to provide individuals relief from the alternative minimum tax.'"

(The information contained herein was provided by Democratic Minority on multiple occasions throughout the 109th Congress.)

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote against the Democratic majority agenda and a vote to allow the opposition, at least for the moment, to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon's Precedents of the House of Representatives, (VI, 308-311) describes the vote on the previous question on the rule as "a motion to direct or control the consideration of the subject before the House being made by the Member in charge." To defeat the previous question is to give the opposition a chance to decide the subject before the House. Cannon cites the Speaker's

ruling of January 13, 1920, to the effect that "the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition" in order to offer an amendment. On March 15, 1909, a member of the majority party offered a rule resolution. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: "The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition."

Because the vote today may look bad for the Democratic majority they will say "the vote on the previous question is simply a vote on whether to proceed to an immediate vote on adopting the resolution . . . [and] has no substantive legislative or policy implications whatsoever." But that is not what they have always said. Listen to the definition of the previous question used in the Floor Procedures Manual published by the Rules Committee in the 109th Congress, (page 56). Here's how the Rules Committee described the rule using information from Congressional Quarterly's "American Congressional Dictionary": "If the previous question is defeated, control of debate shifts to the leading opposition member (usually the minority Floor Manager) who then manages an hour of debate and may offer a germane amendment to the pending business."

Deschler's Procedure in the U.S. House of Representatives, the subchapter titled "Amending Special Rules" states: "a refusal to order the previous question on such a rule [a special rule reported from the Committee on Rules] opens the resolution to amendment and further debate." (Chapter 21, section 21.2) Section 21.3 continues: Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer a proper amendment or motion and who controls the time for debate thereon."

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Democratic majority's agenda and allows those with alternative views the opportunity to offer an alternative plan.

Mr. WELCH of Vermont. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 and clause 9 of rule XX, this 15-minute vote on ordering the previous question will be followed by 5-minute votes on adopting House Resolution 846, if ordered, and suspending the rules and passing H.R. 4253.

The vote was taken by electronic device, and there were—yeas 216, nays 192, not voting 23, as follows:

[Roll No. 1136]

NOT VOTING—18

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE
 The SPEAKER pro tempore (during the vote). Members are advised there is 1 minute remaining on the vote.

□ 1255

So the resolution was agreed to.
 The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. FORTENBERRY. Mr. Speaker, on Thursday, December 6, 2007, I was inadvertently detained and thus I missed rollcall votes Nos. 1136 and 1137. Had I been present, I would have voted "nay" on both votes.

MILITARY RESERVIST AND VETERAN SMALL BUSINESS REAUTHORIZATION AND OPPORTUNITY ACT OF 2007

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and pass the bill, H.R. 4253, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELAZQUEZ) that the House suspend the rules and pass the bill, H.R. 4253.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 407, nays 2, not voting 22, as follows:

[Roll No. 1138]

YEAS—407

Aderholt	Camp (MI)	Franks (AZ)
Akin	Campbell (CA)	Frelinghuysen

Carson	Hooley	Paul
Cole (OK)	Jindal	Rangel
Cubin	Lucas	Young (AK)
Davis, Tom	Meeks (NY)	
Doggett	Miller, Gary	

□ 1303

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mrs. BOYDA of Kansas. Mr. Speaker, I was unable to cast my vote for rollcall vote 1138 for H.R. 4253 as I was visiting a constituent who was receiving treatment at Walter Reed Army Hospital. Had I been present, I would have voted "yea."

PERSONAL EXPLANATION

Mrs. MYRICK. Mr. Speaker, due to illness, I was unable to participate in the following votes. If I had been present, I would have voted as follows:

Rollcall vote 1134, on motion to consider the resolution—H. Res. 846, providing for the consideration of the Senate amendments to the bill (H.R. 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewable Reserve to invest in alternative energy, and for other purposes—I would have voted "nay."

Rollcall vote 1135, on motion to suspend the rules and pass, as amended—H.R. 3505, Securities Law Technical Corrections Act—I would have voted "aye."

Rollcall vote 1136, on ordering the previous question—H. Res. 846, providing for the con-

sideration of the Senate amendments to the bill (H.R. 6), Creating Long-Term Energy Alternatives for the Nation Act—I would have voted "nay."

Rollcall vote 1137, on agreeing to the resolution—H. Res. 846, providing for the consideration of the Senate amendments to the bill (H.R. 6), Creating Long-Term Energy Alternatives for the Nation Act—I would have voted "nay."

Rollcall vote 1138, on motion to suspend the rules and pass—H.R. 4253, Military Reservist and Veteran Small Business Reauthorization and Opportunity Act of 2007—I would have voted "aye."

ANNOUNCING THE BIRTH OF
EVELYN ROSE NUNES

(Mr. DREIER asked and was given permission to address the House for 1 minute.)

Mr. DREIER. Mr. Speaker, I am very pleased to announce to the House that our distinguished colleague DEVIN NUNES the proud parents of 6 pound, 13 ounce Evelyn Rose Nunes, who was born at 3:31 yesterday morning. I think all of us want to extend hardy congratulations to them. I am happy to report that mother and baby are doing very well.

REMOVAL OF NAME OF MEMBER
AS COSPONSOR OF H. Con. Res. 183

Mr. BONNER. Mr. Speaker, I ask unanimous consent to remove my name as a cosponsor of H. Con. Res. 183.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ENERGY INDEPENDENCE AND
SECURITY ACT OF 2007

Mr. DINGELL. Mr. Speaker, pursuant to House Resolution 846 and as designee of the majority leader, I call up from the Speaker's table the bill (H.R. 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes, with Senate amendments thereto, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The Clerk will designate the Senate amendments.

The text of the Senate amendments is as follows:

Senate amendments:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007".

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Relationship to other law.

TITLE I—BIOFUELS FOR ENERGY
SECURITY AND TRANSPORTATION

Sec. 101. Short title.

Sec. 102. Definitions.

Subtitle A—Renewable Fuel Standard

Sec. 111. Renewable fuel standard.

Sec. 112. Production of renewable fuel using renewable energy.

Sec. 113. Sense of Congress relating to the use of renewable resources to generate energy.

Subtitle B—Renewable Fuels Infrastructure

Sec. 121. Infrastructure pilot program for renewable fuels.

Sec. 122. Bioenergy research and development.

Sec. 123. Bioresearch centers for systems biology program.

Sec. 124. Loan guarantees for renewable fuel facilities.

Sec. 125. Grants for renewable fuel production research and development in certain States.

Sec. 126. Grants for infrastructure for transportation of biomass to local biorefineries.

Sec. 127. Biorefinery information center.

Sec. 128. Alternative fuel database and materials.

Sec. 129. Fuel tank cap labeling requirement.

Sec. 130. Biodiesel.

Sec. 131. Transitional assistance for farmers who plant dedicated energy crops for a local cellulose refinery.

Sec. 132. Research and development in support of low-carbon fuels.

Subtitle C—Studies

Sec. 141. Study of advanced biofuels technologies.

Sec. 142. Study of increased consumption of ethanol-blended gasoline with higher levels of ethanol.

Sec. 143. Pipeline feasibility study.

Sec. 144. Study of optimization of flexible fueled vehicles to use E-85 fuel.

Sec. 145. Study of credits for use of renewable electricity in electric vehicles.

Sec. 146. Study of engine durability associated with the use of biodiesel.

Sec. 147. Study of incentives for renewable fuels.

Sec. 148. Study of streamlined lifecycle analysis tools for the evaluation of renewable carbon content of biofuels.

Sec. 149. Study of effects of ethanol-blended gasoline on off-road vehicles.

Sec. 150. Study of offshore wind resources.

Subtitle D—Environmental Safeguards

Sec. 161. Grants for production of advanced biofuels.

Sec. 162. Studies of effects of renewable fuel use.

Sec. 163. Integrated consideration of water quality in determinations on fuels and fuel additives.

Sec. 164. Anti-backsliding.

TITLE II—ENERGY EFFICIENCY
PROMOTION

Sec. 201. Short title.

Sec. 202. Definition of Secretary.

Subtitle A—Promoting Advanced Lighting
Technologies

Sec. 211. Accelerated procurement of energy efficient lighting.

Sec. 212. Incandescent reflector lamp efficiency standards.

Sec. 213. Bright Tomorrow Lighting Prizes.

Sec. 214. Sense of Senate concerning efficient lighting standards.

Sec. 215. Renewable energy construction grants.

Subtitle B—Expediting New Energy Efficiency
Standards

Sec. 221. Definition of energy conservation standard.

Sec. 222. Regional efficiency standards for heating and cooling products.

- Sec. 223. Furnace fan rulemaking.
 Sec. 224. Expedited rulemakings.
 Sec. 225. Periodic reviews.
 Sec. 226. Energy efficiency labeling for consumer electronic products.
 Sec. 227. Residential boiler efficiency standards.
 Sec. 228. Technical corrections.
 Sec. 229. Electric motor efficiency standards.
 Sec. 230. Energy standards for home appliances.
 Sec. 231. Improved energy efficiency for appliances and buildings in cold climates.
 Sec. 232. Deployment of new technologies for high-efficiency consumer products.
 Sec. 233. Industrial efficiency program.
 Subtitle C—Promoting High Efficiency Vehicles, Advanced Batteries, and Energy Storage
 Sec. 241. Lightweight materials research and development.
 Sec. 242. Loan guarantees for fuel-efficient automobile parts manufacturers.
 Sec. 243. Advanced technology vehicles manufacturing incentive program.
 Sec. 244. Energy storage competitiveness.
 Sec. 245. Advanced transportation technology program.
 Sec. 246. Inclusion of electric drive in Energy Policy Act of 1992.
 Sec. 247. Commercial insulation demonstration program.
 Subtitle D—Setting Energy Efficiency Goals
 Sec. 251. Oil savings plan and requirements.
 Sec. 252. National energy efficiency improvement goals.
 Sec. 253. National media campaign.
 Sec. 254. Modernization of electricity grid system.
 Sec. 255. Smart grid system report.
 Sec. 256. Smart grid technology research, development, and demonstration.
 Sec. 257. Smart grid interoperability framework.
 Sec. 258. State consideration of smart grid.
 Sec. 259. Support for energy independence of the United States.
 Sec. 260. Energy Policy Commission.
 Subtitle E—Promoting Federal Leadership in Energy Efficiency and Renewable Energy
 Sec. 261. Federal fleet conservation requirements.
 Sec. 262. Federal requirement to purchase electricity generated by renewable energy.
 Sec. 263. Energy savings performance contracts.
 Sec. 264. Energy management requirements for Federal buildings.
 Sec. 265. Combined heat and power and district energy installations at Federal sites.
 Sec. 266. Federal building energy efficiency performance standards.
 Sec. 267. Application of International Energy Conservation Code to public and assisted housing.
 Sec. 268. Energy efficient commercial buildings initiative.
 Sec. 269. Clean energy corridors.
 Sec. 270. Federal standby power standard.
 Sec. 270A. Standard relating to solar hot water heaters.
 Sec. 270B. Renewable energy innovation manufacturing partnership.
 Sec. 270C. Express loans for renewable energy and energy efficiency.
 Sec. 270D. Small business energy efficiency.
 Subtitle F—Assisting State and Local Governments in Energy Efficiency
 Sec. 271. Weatherization assistance for low-income persons.
 Sec. 272. State energy conservation plans.
 Sec. 273. Utility energy efficiency programs.
 Sec. 274. Energy efficiency and demand response program assistance.
 Sec. 275. Energy and environmental block grant.
 Sec. 276. Energy sustainability and efficiency grants for institutions of higher education.
 Sec. 277. Energy efficiency and renewable energy worker training program.
 Sec. 278. Assistance to States to reduce school bus idling.
 Sec. 279. Definition of State.
 Sec. 280. Coordination of planned refinery outages.
 Sec. 281. Technical criteria for clean coal power initiative.
 Sec. 282. Administration.
 Sec. 283. Offshore renewable energy.
 Subtitle G—Marine and Hydrokinetic Renewable Energy Promotion
 Sec. 291. Definition of marine and hydrokinetic renewable energy.
 Sec. 292. Research and development.
 Sec. 293. National ocean energy research centers.
 TITLE III—CARBON CAPTURE AND STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION
 Sec. 301. Short title.
 Sec. 302. Carbon capture and storage research, development, and demonstration program.
 Sec. 303. Carbon dioxide storage capacity assessment.
 Sec. 304. Carbon capture and storage initiative.
 Sec. 305. Capitol power plant carbon dioxide emissions demonstration program.
 Sec. 306. Assessment of carbon sequestration and methane and nitrous oxide emissions from terrestrial ecosystems.
 Sec. 307. Abrupt climate change research program.
 TITLE IV—COST-EFFECTIVE AND ENVIRONMENTALLY SUSTAINABLE PUBLIC BUILDINGS
 Subtitle A—Public Buildings Cost Reduction
 Sec. 401. Short title.
 Sec. 402. Cost-effective and geothermal heat pump technology acceleration program.
 Sec. 403. Environmental Protection Agency demonstration grant program for local governments.
 Sec. 404. Definitions.
 Subtitle B—Installation of Photovoltaic System at Department of Energy Headquarters Building
 Sec. 411. Installation of photovoltaic system at Department of Energy headquarters building.
 Subtitle C—High-Performance Green Buildings
 Sec. 421. Short title.
 Sec. 422. Findings and purposes.
 Sec. 423. Definitions.
 PART I—OFFICE OF HIGH-PERFORMANCE GREEN BUILDINGS
 Sec. 431. Oversight.
 Sec. 432. Office of High-Performance Green Buildings.
 Sec. 433. Green Building Advisory Committee.
 Sec. 434. Public outreach.
 Sec. 435. Research and development.
 Sec. 436. Budget and life-cycle costing and contracting.
 Sec. 437. Authorization of appropriations.
 PART II—HEALTHY HIGH-PERFORMANCE SCHOOLS
 Sec. 441. Definition of high-performance school.
 Sec. 442. Grants for healthy school environments.
 Sec. 443. Model guidelines for siting of school facilities.
 Sec. 444. Public outreach.
 Sec. 445. Environmental health program.
 Sec. 446. Authorization of appropriations.
 PART III—STRENGTHENING FEDERAL LEADERSHIP
 Sec. 451. Incentives.
 Sec. 452. Federal procurement.
 Sec. 453. Federal green building performance.
 Sec. 454. Storm water runoff requirements for Federal development projects.
 PART IV—DEMONSTRATION PROJECT
 Sec. 461. Coordination of goals.
 Sec. 462. Authorization of appropriations.
 TITLE V—CORPORATE AVERAGE FUEL ECONOMY STANDARDS
 Sec. 501. Short title.
 Sec. 502. Average fuel economy standards for automobiles and certain other vehicles.
 Sec. 503. Amending Fuel Economy Standards.
 Sec. 504. Definitions.
 Sec. 505. Ensuring safety of automobiles.
 Sec. 506. Credit Trading Program.
 Sec. 507. Labels for fuel economy and greenhouse gas emissions.
 Sec. 508. Continued applicability of existing standards.
 Sec. 509. National Academy of Sciences Studies.
 Sec. 510. Standards for Executive agency automobiles.
 Sec. 511. Increasing Consumer Awareness of Flexible Fuel Automobiles.
 Sec. 512. Periodic review of accuracy of fuel economy labeling procedures.
 Sec. 513. Tire fuel efficiency consumer information.
 Sec. 514. Advanced Battery Initiative.
 Sec. 515. Biodiesel standards.
 Sec. 516. Use of Civil Penalties for research and development.
 Sec. 517. Energy Security Fund and Alternative Fuel Grant Program.
 Sec. 518. Authorization of appropriations.
 Sec. 519. Application with Clean Air Act.
 Sec. 520. Alternative fuel vehicle action plan.
 Sec. 521. Study of the adequacy of transportation of domestically-produced renewable fuel by railroads and other modes of transportation.
 TITLE VI—PRICE GOUGING
 Sec. 601. Short title.
 Sec. 602. Definitions.
 Sec. 603. Prohibition on price gouging during energy emergencies.
 Sec. 604. Prohibition on market manipulation.
 Sec. 605. Prohibition on false information.
 Sec. 606. Presidential declaration of energy emergency.
 Sec. 607. Enforcement by the Federal Trade Commission.
 Sec. 608. Enforcement by State Attorneys General.
 Sec. 609. Penalties.
 Sec. 610. Effect on other laws.
 TITLE VII—ENERGY DIPLOMACY AND SECURITY
 Sec. 701. Short title.
 Sec. 702. Definitions.
 Sec. 703. Sense of Congress on energy diplomacy and security.
 Sec. 704. Strategic energy partnerships.
 Sec. 705. International energy crisis response mechanisms.
 Sec. 706. Hemisphere energy cooperation forum.
 Sec. 707. National Security Council reorganization.
 Sec. 708. Annual national energy security strategy report.
 Sec. 709. Appropriate congressional committees defined.
 Sec. 710. No Oil Producing and Exporting Carrels Act of 2007.
 Sec. 711. Convention on Supplementary Compensation for Nuclear Damage contingent cost allocation.
 TITLE VIII—MISCELLANEOUS
 Sec. 801. Study of the effect of private wire laws on the development of combined heat and power facilities.
 SEC. 2. RELATIONSHIP TO OTHER LAW.
 Except to the extent expressly provided in this Act or an amendment made by this Act, nothing

in this Act or an amendment made by this Act supersedes, limits the authority provided or responsibility conferred by, or authorizes any violation of any provision of law (including a regulation), including any energy or environmental law or regulation.

TITLE I—BIOFUELS FOR ENERGY SECURITY AND TRANSPORTATION

SEC. 101. SHORT TITLE.

This title may be cited as the “Biofuels for Energy Security and Transportation Act of 2007”.

SEC. 102. DEFINITIONS.

In this title:

(1) **ADVANCED BIOFUEL.**—

(A) **IN GENERAL.**—The term “advanced biofuel” means fuel derived from renewable biomass other than corn starch.

(B) **INCLUSIONS.**—The term “advanced biofuel” includes—

(i) ethanol derived from cellulose, hemicellulose, or lignin;

(ii) ethanol derived from sugar or starch, other than ethanol derived from corn starch;

(iii) ethanol derived from waste material, including crop residue, other vegetative waste material, animal waste, and food waste and yard waste;

(iv) diesel-equivalent fuel derived from renewable biomass, including vegetable oil and animal fat;

(v) biogas (including landfill gas and sewage waste treatment gas) produced through the conversion of organic matter from renewable biomass;

(vi) butanol or other alcohols produced through the conversion of organic matter from renewable biomass; and

(vii) other fuel derived from cellulosic biomass.

(2) **CELLULOSIC BIOMASS ETHANOL.**—The term “cellulosic biomass ethanol” means ethanol derived from any cellulose, hemicellulose, or lignin that is derived from renewable biomass.

(3) **CONVENTIONAL BIOFUEL.**—The term “conventional biofuel” means ethanol derived from corn starch.

(4) **RENEWABLE BIOMASS.**—The term “renewable biomass” means—

(A) nonmerchantable materials or precommercial thinnings that—

(i) are byproducts of preventive treatments, such as trees, wood, brush, thinnings, chips, and slash, that are removed—

(I) to reduce hazardous fuels;

(II) to reduce or contain disease or insect infestation; or

(III) to restore forest health;

(ii) would not otherwise be used for higher-value products; and

(iii) are harvested from National Forest System land or public land (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702))—

(I) where permitted by law; and

(II) in accordance with—

(aa) applicable land management plans; and

(bb) the requirements for old-growth maintenance, restoration, and management direction of paragraphs (2), (3), and (4) of subsection (e) and the requirements for large-tree retention of subsection (f) of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512); or

(B) any organic matter that is available on a renewable or recurring basis from non-Federal land or from land belonging to an Indian tribe, or an Indian individual, that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including—

(i) renewable plant material, including—

(I) feed grains;

(II) other agricultural commodities;

(III) other plants and trees; and

(IV) algae; and

(ii) waste material, including—

(I) crop residue;

(II) other vegetative waste material (including wood waste and wood residues);

(III) animal waste and byproducts (including fats, oils, greases, and manure); and

(IV) food waste and yard waste.

(5) **RENEWABLE FUEL.**—

(A) **IN GENERAL.**—The term “renewable fuel” means motor vehicle fuel or home heating fuel that is—

(i) produced from renewable biomass; and

(ii) used to replace or reduce the quantity of fossil fuel present in a fuel or fuel mixture used to operate a motor vehicle or furnace.

(B) **INCLUSION.**—The term “renewable fuel” includes—

(i) conventional biofuel; and

(ii) advanced biofuel.

(6) **SECRETARY.**—The term “Secretary” means the Secretary of Energy

(7) **SMALL REFINERY.**—The term “small refinery” means a refinery for which the average aggregate daily crude oil throughput for a calendar year (as determined by dividing the aggregate throughput for the calendar year by the number of days in the calendar year) does not exceed 75,000 barrels.

Subtitle A—Renewable Fuel Standard

SEC. 111. RENEWABLE FUEL STANDARD.

(a) **RENEWABLE FUEL PROGRAM.**—

(1) **REGULATIONS.**—

(A) **IN GENERAL.**—Not later than 1 year after the date of enactment of this Act, the President shall promulgate regulations to ensure that motor vehicle fuel and home heating oil sold or introduced into commerce in the United States (except in noncontiguous States or territories), on an annual average basis, contains the applicable volume of renewable fuel determined in accordance with paragraph (2).

(B) **PROVISIONS OF REGULATIONS.**—Regardless of the date of promulgation, the regulations promulgated under subparagraph (A)—

(i) shall contain compliance provisions applicable to refineries, blenders, distributors, and importers, as appropriate, to ensure that—

(I) the requirements of this subsection are met; and

(II) renewable fuels produced from facilities that commence operations after the date of enactment of this Act achieve at least a 20 percent reduction in life cycle greenhouse gas emissions compared to gasoline; but

(ii) shall not—

(I) restrict geographic areas in the contiguous United States in which renewable fuel may be used; or

(II) impose any per-gallon obligation for the use of renewable fuel.

(C) **RELATIONSHIP TO OTHER REGULATIONS.**—Regulations promulgated under this paragraph shall, to the maximum extent practicable, incorporate the program structure, compliance, and reporting requirements established under the final regulations promulgated to implement the renewable fuel program established by the amendment made by section 1501(a)(2) of the Energy Policy Act of 2005 (Public Law 109–58; 119 Stat. 1067).

(2) **APPLICABLE VOLUME.**—

(A) **CALENDAR YEARS 2008 THROUGH 2022.**—

(i) **RENEWABLE FUEL.**—For the purpose of paragraph (1), subject to clause (ii), the applicable volume for any of calendar years 2008 through 2022 shall be determined in accordance with the following table:

Calendar year:	Applicable volume of renewable fuel (in billions of gallons):
2008	8.5
2009	10.5
2010	12.0
2011	12.6
2012	13.2
2013	13.8
2014	14.4
2015	15.0
2016	18.0
2017	21.0

Calendar year:	Applicable volume of renewable fuel (in billions of gallons):
2018	24.0
2019	27.0
2020	30.0
2021	33.0
2022	36.0

(ii) **ADVANCED BIOFUELS.**—For the purpose of paragraph (1), of the volume of renewable fuel required under clause (i), the applicable volume for any of calendar years 2016 through 2022 for advanced biofuels shall be determined in accordance with the following table:

Calendar year:	Applicable volume of advanced biofuels (in billions of gallons):
2016	3.0
2017	6.0
2018	9.0
2019	12.0
2020	15.0
2021	18.0
2022	21.0

(B) **CALENDAR YEAR 2023 AND THEREAFTER.**—Subject to subparagraph (C), for the purposes of paragraph (1), the applicable volume for calendar year 2023 and each calendar year thereafter shall be determined by the President, in coordination with the Secretary of Energy, the Secretary of Agriculture, and the Administrator of the Environmental Protection Agency, based on a review of the implementation of the program during calendar years 2007 through 2022, including a review of—

(i) the impact of renewable fuels on the energy security of the United States;

(ii) the expected annual rate of future production of renewable fuels, including advanced biofuels;

(iii) the impact of renewable fuels on the infrastructure of the United States, including deliverability of materials, goods, and products other than renewable fuel, and the sufficiency of infrastructure to deliver renewable fuel; and

(iv) the impact of the use of renewable fuels on other factors, including job creation, the price and supply of agricultural commodities, rural economic development, and the environment.

(C) **MINIMUM APPLICABLE VOLUME.**—Subject to subparagraph (D), for the purpose of paragraph (1), the applicable volume for calendar year 2023 and each calendar year thereafter shall be equal to the product obtained by multiplying—

(i) the number of gallons of gasoline that the President estimates will be sold or introduced into commerce in the calendar year; and

(ii) the ratio that—

(I) 36,000,000,000 gallons of renewable fuel; bears to

(II) the number of gallons of gasoline sold or introduced into commerce in calendar year 2022.

(D) **MINIMUM PERCENTAGE OF ADVANCED BIOFUEL.**—For the purpose of paragraph (1) and subparagraph (C), at least 60 percent of the minimum applicable volume for calendar year 2023 and each calendar year thereafter shall be advanced biofuel.

(b) **APPLICABLE PERCENTAGES.**—

(1) **PROVISION OF ESTIMATE OF VOLUMES OF GASOLINE SALES.**—Not later than October 31 of each of calendar years 2008 through 2021, the Administrator of the Energy Information Administration shall provide to the President an estimate, with respect to the following calendar year, of the volumes of gasoline projected to be sold or introduced into commerce in the United States.

(2) **DETERMINATION OF APPLICABLE PERCENTAGES.**—

(A) **IN GENERAL.**—Not later than November 30 of each of calendar years 2008 through 2022, based on the estimate provided under paragraph (1), the President shall determine and publish in

the Federal Register, with respect to the following calendar year, the renewable fuel obligation that ensures that the requirements of subsection (a) are met.

(B) REQUIRED ELEMENTS.—The renewable fuel obligation determined for a calendar year under subparagraph (A) shall—

(i) be applicable to refineries, blenders, and importers, as appropriate;

(ii) be expressed in terms of a volume percentage of gasoline sold or introduced into commerce in the United States; and

(iii) subject to paragraph (3)(A), consist of a single applicable percentage that applies to all categories of persons specified in clause (i).

(3) ADJUSTMENTS.—In determining the applicable percentage for a calendar year, the President shall make adjustments—

(A) to prevent the imposition of redundant obligations on any person specified in paragraph (2)(B)(i); and

(B) to account for the use of renewable fuel during the previous calendar year by small refineries that are exempt under subsection (g).

(c) VOLUME CONVERSION FACTORS FOR RENEWABLE FUELS BASED ON ENERGY CONTENT OR REQUIREMENTS.—

(1) IN GENERAL.—For the purpose of subsection (a), the President shall assign values to specific types of advanced biofuels for the purpose of satisfying the fuel volume requirements of subsection (a)(2) in accordance with this subsection.

(2) ENERGY CONTENT RELATIVE TO ETHANOL.—For advanced biofuel, 1 gallon of the advanced biofuel shall be considered to be the equivalent of 1 gallon of renewable fuel multiplied by the ratio that—

(A) the number of British thermal units of energy produced by the combustion of 1 gallon of the advanced biofuel (as measured under conditions determined by the Secretary); bears to

(B) the number of British thermal units of energy produced by the combustion of 1 gallon of pure ethanol (as measured under conditions determined by the Secretary to be comparable to conditions described in subparagraph (A)).

(3) TRANSITIONAL ENERGY-RELATED CONVERSION FACTORS FOR CELLULOSIC BIOMASS ETHANOL.—For any of calendar years 2008 through 2015, 1 gallon of cellulosic biomass ethanol shall be considered to be the equivalent of 2.5 gallons of renewable fuel.

(d) CREDIT PROGRAM.—

(1) IN GENERAL.—The President, in consultation with the Secretary and the Administrator of the Environmental Protection Agency, shall implement a credit program to manage the renewable fuel requirement of this section in a manner consistent with the credit program established by the amendment made by section 1501(a)(2) of the Energy Policy Act of 2005 (Public Law 109-58; 119 Stat. 1067).

(2) MARKET TRANSPARENCY.—In carrying out the credit program under this subsection, the President shall facilitate price transparency in markets for the sale and trade of credits, with due regard for the public interest, the integrity of those markets, fair competition, and the protection of consumers and agricultural producers.

(e) SEASONAL VARIATIONS IN RENEWABLE FUEL USE.—

(1) STUDY.—For each of calendar years 2008 through 2022, the Administrator of the Energy Information Administration shall conduct a study of renewable fuel blending to determine whether there are excessive seasonal variations in the use of renewable fuel.

(2) REGULATION OF EXCESSIVE SEASONAL VARIATIONS.—If, for any calendar year, the Administrator of the Energy Information Administration, based on the study under paragraph (1), makes the determinations specified in paragraph (3), the President shall promulgate regulations to ensure that 25 percent or more of the quantity of renewable fuel necessary to meet the requirements of subsection (a) is used during each of the 2 periods specified in paragraph (4) of each subsequent calendar year.

(3) DETERMINATIONS.—The determinations referred to in paragraph (2) are that—

(A) less than 25 percent of the quantity of renewable fuel necessary to meet the requirements of subsection (a) has been used during 1 of the 2 periods specified in paragraph (4) of the calendar year;

(B) a pattern of excessive seasonal variation described in subparagraph (A) will continue in subsequent calendar years; and

(C) promulgating regulations or other requirements to impose a 25 percent or more seasonal use of renewable fuels will not significantly—

(i) increase the price of motor fuels to the consumer; or

(ii) prevent or interfere with the attainment of national ambient air quality standards.

(4) PERIODS.—The 2 periods referred to in this subsection are—

(A) April through September; and

(B) January through March and October through December.

(f) WAIVERS.—

(1) IN GENERAL.—The President, in consultation with the Secretary of Energy, the Secretary of Agriculture, and the Administrator of the Environmental Protection Agency, may waive the requirements of subsection (a) in whole or in part on petition by one or more States by reducing the national quantity of renewable fuel required under subsection (a), based on a determination by the President (after public notice and opportunity for comment), that—

(A) implementation of the requirement would severely harm the economy or environment of a State, a region, or the United States; or

(B) extreme and unusual circumstances exist that prevent distribution of an adequate supply of domestically-produced renewable fuel to consumers in the United States.

(2) PETITIONS FOR WAIVERS.—The President, in consultation with the Secretary of Energy, the Secretary of Agriculture, and the Administrator of the Environmental Protection Agency, shall approve or disapprove a State petition for a waiver of the requirements of subsection (a) within 30 days after the date on which the petition is received by the President.

(3) TERMINATION OF WAIVERS.—A waiver granted under paragraph (1) shall terminate after 1 year, but may be renewed by the President after consultation with the Secretary of Energy, the Secretary of Agriculture, and the Administrator of the Environmental Protection Agency.

(g) SMALL REFINERIES.—

(1) TEMPORARY EXEMPTION.—

(A) IN GENERAL.—The requirements of subsection (a) shall not apply to—

(i) small refineries (other than a small refinery described in clause (ii)) until calendar year 2013; and

(ii) small refineries owned by a small business refiner (as defined in section 45H(c) of the Internal Revenue Code of 1986) until calendar year 2015.

(B) EXTENSION OF EXEMPTION.—

(i) STUDY BY SECRETARY.—Not later than December 31, 2008, the Secretary shall submit to the President and Congress a report describing the results of a study to determine whether compliance with the requirements of subsection (a) would impose a disproportionate economic hardship on small refineries.

(ii) EXTENSION OF EXEMPTION.—In the case of a small refinery that the Secretary determines under clause (i) would be subject to a disproportionate economic hardship if required to comply with subsection (a), the President shall extend the exemption under subparagraph (A) for the small refinery for a period of not less than 2 additional years.

(2) PETITIONS BASED ON DISPROPORTIONATE ECONOMIC HARDSHIP.—

(A) EXTENSION OF EXEMPTION.—A small refinery may at any time petition the President for an extension of the exemption under paragraph (1) for the reason of disproportionate economic hardship.

(B) EVALUATION OF PETITIONS.—In evaluating a petition under subparagraph (A), the President, in consultation with the Secretary, shall consider the findings of the study under paragraph (1)(B) and other economic factors.

(C) DEADLINE FOR ACTION ON PETITIONS.—The President shall act on any petition submitted by a small refinery for a hardship exemption not later than 90 days after the date of receipt of the petition.

(3) OPT-IN FOR SMALL REFINERIES.—A small refinery shall be subject to the requirements of subsection (a) if the small refinery notifies the President that the small refinery waives the exemption under paragraph (1).

(h) PENALTIES AND ENFORCEMENT.—

(1) CIVIL PENALTIES.—

(A) IN GENERAL.—Any person that violates a regulation promulgated under subsection (a), or that fails to furnish any information required under such a regulation, shall be liable to the United States for a civil penalty of not more than the total of—

(i) \$25,000 for each day of the violation; and

(ii) the amount of economic benefit or savings received by the person resulting from the violation, as determined by the President.

(B) COLLECTION.—Civil penalties under subparagraph (A) shall be assessed by, and collected in a civil action brought by, the Secretary or such other officer of the United States as is designated by the President.

(2) INJUNCTIVE AUTHORITY.—

(A) IN GENERAL.—The district courts of the United States shall have jurisdiction to—

(i) restrain a violation of a regulation promulgated under subsection (a);

(ii) award other appropriate relief; and

(iii) compel the furnishing of information required under the regulation.

(B) ACTIONS.—An action to restrain such violations and compel such actions shall be brought by and in the name of the United States.

(C) SUBPOENAS.—In the action, a subpoena for a witness who is required to attend a district court in any district may apply in any other district.

(i) VOLUNTARY LABELING PROGRAM.—

(1) IN GENERAL.—The President shall establish criteria for a system of voluntary labeling of renewable fuels based on life cycle greenhouse gas emissions.

(2) CONSUMER EDUCATION.—The President shall ensure that the labeling system under this subsection provides useful information to consumers making fuel purchases.

(3) FLEXIBILITY.—In carrying out this subsection, the President may establish more than 1 label, as appropriate.

(j) STUDY OF IMPACT OF RENEWABLE FUEL STANDARD.—

(1) IN GENERAL.—The Secretary shall enter into an arrangement with the National Academy of Sciences under which the Academy shall conduct a study to assess the impact of the requirements described in subsection (a)(2) on each industry relating to the production of feed grains, livestock, food, and energy.

(2) PARTICIPATION.—In conducting the study under paragraph (1), the National Academy of Sciences shall seek the participation, and consider the input, of—

(A) producers of feed grains;

(B) producers of livestock, poultry, and pork products;

(C) producers of food and food products;

(D) producers of energy;

(E) individuals and entities interested in issues relating to conservation, the environment, and nutrition; and

(F) users of renewable fuels.

(3) CONSIDERATIONS.—In conducting the study, the National Academy of Sciences shall consider—

(A) the likely impact on domestic animal agriculture feedstocks that, in any crop year, are significantly below current projections; and

(B) policy options to alleviate the impact on domestic animal agriculture feedstocks that are significantly below current projections.

(4) COMPONENTS.—The study shall include—

(A) a description of the conditions under which the requirements described in subsection (a)(2) should be suspended or reduced to prevent adverse impacts to domestic animal agriculture feedstocks described in paragraph (3)(B); and

(B) recommendations for the means by which the Federal Government could prevent or minimize adverse economic hardships and impacts.

(5) DEADLINE FOR COMPLETION OF STUDY.—Not later than 270 days after the date of enactment of this Act, the Secretary shall submit to Congress a report that describes the results of the study.

(6) PERIODIC REVIEWS.—

(A) IN GENERAL.—To allow for the appropriate adjustment of the requirements described in subsection (a)(2), the Secretary shall conduct periodic reviews of—

(i) existing technologies;

(ii) the feasibility of achieving compliance with the requirements; and

(iii) the impacts of the requirements described in subsection (a)(2) on each individual and entity described in paragraph (2).

(k) EFFECTIVE DATE.—Except as otherwise specifically provided in this section, this section takes effect on the date on which the National Academies of Science completes the study under subsection (j).

SEC. 112. PRODUCTION OF RENEWABLE FUEL USING RENEWABLE ENERGY.

(a) DEFINITIONS.—In this section:

(1) FACILITY.—The term “facility” means a facility used for the production of renewable fuel.

(2) RENEWABLE ENERGY.—

(A) IN GENERAL.—The term “renewable energy” has the meaning given the term in section 203(b) of the Energy Policy Act of 2005 (42 U.S.C. 15852(b)).

(B) INCLUSION.—The term “renewable energy” includes biogas produced through the conversion of organic matter from renewable biomass.

(b) ADDITIONAL CREDIT.—

(1) IN GENERAL.—The President shall provide a credit under the program established under section 111(d) to the owner of a facility that uses renewable energy to displace more than 90 percent of the fossil fuel normally used in the production of renewable fuel.

(2) CREDIT AMOUNT.—The President may provide the credit in a quantity that is not more than the equivalent of 1.5 gallons of renewable fuel for each gallon of renewable fuel produced in a facility described in paragraph (1).

SEC. 113. SENSE OF CONGRESS RELATING TO THE USE OF RENEWABLE RESOURCES TO GENERATE ENERGY.

(a) FINDINGS.—Congress finds that—

(1) the United States has a quantity of renewable energy resources that is sufficient to supply a significant portion of the energy needs of the United States;

(2) the agricultural, forestry, and working land of the United States can help ensure a sustainable domestic energy system;

(3) accelerated development and use of renewable energy technologies provide numerous benefits to the United States, including improved national security, improved balance of payments, healthier rural economies, improved environmental quality, and abundant, reliable, and affordable energy for all citizens of the United States;

(4) the production of transportation fuels from renewable energy would help the United States meet rapidly growing domestic and global energy demands, reduce the dependence of the United States on energy imported from volatile regions of the world that are politically unstable, stabilize the cost and availability of energy, and safeguard the economy and security of the United States;

(5) increased energy production from domestic renewable resources would attract substantial

new investments in energy infrastructure, create economic growth, develop new jobs for the citizens of the United States, and increase the income for farm, ranch, and forestry jobs in the rural regions of the United States;

(6) increased use of renewable energy is practical and can be cost effective with the implementation of supportive policies and proper incentives to stimulate markets and infrastructure; and

(7) public policies aimed at enhancing renewable energy production and accelerating technological improvements will further reduce energy costs over time and increase market demand.

(b) SENSE OF CONGRESS.—It is the sense of Congress that it is the goal of the United States that, not later than January 1, 2025, the agricultural, forestry, and working land of the United States should—

(1) provide from renewable resources not less than 25 percent of the total energy consumed in the United States; and

(2) continue to produce safe, abundant, and affordable food, feed, and fiber.

Subtitle B—Renewable Fuels Infrastructure SEC. 121. INFRASTRUCTURE PILOT PROGRAM FOR RENEWABLE FUELS.

(a) IN GENERAL.—The Secretary, in consultation with the Secretary of Transportation and the Administrator of the Environmental Protection Agency, shall establish a competitive grant pilot program (referred to in this section as the “pilot program”), to be administered through the Vehicle Technology Deployment Program of the Department of Energy, to provide not more than 10 geographically-dispersed project grants to State governments, Indian tribal governments, local governments, metropolitan transportation authorities, or partnerships of those entities to carry out 1 or more projects for the purposes described in subsection (b).

(b) GRANT PURPOSES.—A grant under this section shall be used for the establishment of refueling infrastructure corridors, as designated by the Secretary, for gasoline blends that contain not less than 11 percent, and not more than 85 percent, renewable fuel or diesel fuel that contains at least 10 percent renewable fuel, including—

(1) installation of infrastructure and equipment necessary to ensure adequate distribution of renewable fuels within the corridor;

(2) installation of infrastructure and equipment necessary to directly support vehicles powered by renewable fuels; and

(3) operation and maintenance of infrastructure and equipment installed as part of a project funded by the grant.

(c) APPLICATIONS.—

(1) REQUIREMENTS.—

(A) IN GENERAL.—Subject to subparagraph (B), not later than 90 days after the date of enactment of this Act, the Secretary shall issue requirements for use in applying for grants under the pilot program.

(B) MINIMUM REQUIREMENTS.—At a minimum, the Secretary shall require that an application for a grant under this section—

(i) be submitted by—

(1) the head of a State, tribal, or local government or a metropolitan transportation authority, or any combination of those entities; and

(II) a registered participant in the Vehicle Technology Deployment Program of the Department of Energy; and

(ii) include—

(I) a description of the project proposed in the application, including the ways in which the project meets the requirements of this section;

(II) an estimate of the degree of use of the project, including the estimated size of fleet of vehicles operated with renewable fuel available within the geographic region of the corridor, measured as a total quantity and a percentage;

(III) an estimate of the potential petroleum displaced as a result of the project (measured as a total quantity and a percentage), and a plan

to collect and disseminate petroleum displacement and other relevant data relating to the project to be funded under the grant, over the expected life of the project;

(IV) a description of the means by which the project will be sustainable without Federal assistance after the completion of the term of the grant;

(V) a complete description of the costs of the project, including acquisition, construction, operation, and maintenance costs over the expected life of the project; and

(VI) a description of which costs of the project will be supported by Federal assistance under this subsection.

(2) PARTNERS.—An applicant under paragraph (1) may carry out a project under the pilot program in partnership with public and private entities.

(d) SELECTION CRITERIA.—In evaluating applications under the pilot program, the Secretary shall—

(1) consider the experience of each applicant with previous, similar projects; and

(2) give priority consideration to applications that—

(A) are most likely to maximize displacement of petroleum consumption, measured as a total quantity and a percentage;

(B) are best able to incorporate existing infrastructure while maximizing, to the extent practicable, the use of advanced biofuels;

(C) demonstrate the greatest commitment on the part of the applicant to ensure funding for the proposed project and the greatest likelihood that the project will be maintained or expanded after Federal assistance under this subsection is completed;

(D) represent a partnership of public and private entities; and

(E) exceed the minimum requirements of subsection (c)(1)(B).

(e) PILOT PROJECT REQUIREMENTS.—

(1) MAXIMUM AMOUNT.—The Secretary shall provide not more than \$20,000,000 in Federal assistance under the pilot program to any applicant.

(2) COST SHARING.—The non-Federal share of the cost of any activity relating to renewable fuel infrastructure development carried out using funds from a grant under this section shall be not less than 20 percent.

(3) MAXIMUM PERIOD OF GRANTS.—The Secretary shall not provide funds to any applicant under the pilot program for more than 2 years.

(4) DEPLOYMENT AND DISTRIBUTION.—The Secretary shall seek, to the maximum extent practicable, to ensure a broad geographic distribution of project sites funded by grants under this section.

(5) TRANSFER OF INFORMATION AND KNOWLEDGE.—The Secretary shall establish mechanisms to ensure that the information and knowledge gained by participants in the pilot program are transferred among the pilot program participants and to other interested parties, including other applicants that submitted applications.

(f) SCHEDULE.—

(1) INITIAL GRANTS.—

(A) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall publish in the Federal Register, Commerce Business Daily, and such other publications as the Secretary considers to be appropriate, a notice and request for applications to carry out projects under the pilot program.

(B) DEADLINE.—An application described in subparagraph (A) shall be submitted to the Secretary by not later than 180 days after the date of publication of the notice under that subparagraph.

(C) INITIAL SELECTION.—Not later than 90 days after the date by which applications for grants are due under subparagraph (B), the Secretary shall select by competitive, peer-reviewed proposal up to 5 applications for projects to be awarded a grant under the pilot program.

(2) ADDITIONAL GRANTS.—

(A) *IN GENERAL*.—Not later than 2 years after the date of enactment of this Act, the Secretary shall publish in the Federal Register, Commerce Business Daily, and such other publications as the Secretary considers to be appropriate, a notice and request for additional applications to carry out projects under the pilot program that incorporate the information and knowledge obtained through the implementation of the first round of projects authorized under the pilot program.

(B) *DEADLINE*.—An application described in subparagraph (A) shall be submitted to the Secretary by not later than 180 days after the date of publication of the notice under that subparagraph.

(C) *INITIAL SELECTION*.—Not later than 90 days after the date by which applications for grants are due under subparagraph (B), the Secretary shall select by competitive, peer-reviewed proposal such additional applications for projects to be awarded a grant under the pilot program as the Secretary determines to be appropriate.

(g) *REPORTS TO CONGRESS*.—

(1) *INITIAL REPORT*.—Not later than 60 days after the date on which grants are awarded under this section, the Secretary shall submit to Congress a report containing—

(A) an identification of the grant recipients and a description of the projects to be funded under the pilot program;

(B) an identification of other applicants that submitted applications for the pilot program but to which funding was not provided; and

(C) a description of the mechanisms used by the Secretary to ensure that the information and knowledge gained by participants in the pilot program are transferred among the pilot program participants and to other interested parties, including other applicants that submitted applications.

(2) *EVALUATION*.—Not later than 2 years after the date of enactment of this Act, and annually thereafter until the termination of the pilot program, the Secretary shall submit to Congress a report containing an evaluation of the effectiveness of the pilot program, including an assessment of the petroleum displacement and benefits to the environment derived from the projects included in the pilot program.

(h) *AUTHORIZATION OF APPROPRIATIONS*.—There is authorized to be appropriated to the Secretary to carry out this section \$200,000,000, to remain available until expended.

SEC. 122. BIOENERGY RESEARCH AND DEVELOPMENT.

Section 931(c) of the Energy Policy Act of 2005 (42 U.S.C. 16231(c)) is amended—

(1) in paragraph (2), by striking “\$251,000,000” and inserting “\$377,000,000”; and

(2) in paragraph (3), by striking “\$274,000,000” and inserting “\$398,000,000”.

SEC. 123. BIORESEARCH CENTERS FOR SYSTEMS BIOLOGY PROGRAM.

Section 977(a)(1) of the Energy Policy Act of 2005 (42 U.S.C. 16317(a)(1)) is amended by inserting before the period at the end the following: “, including the establishment of at least 11 bio-research centers of varying sizes, as appropriate, that focus on biofuels, of which at least 2 centers shall be located in each of the 4 Petroleum Administration for Defense Districts with no subdistricts and 1 center shall be located in each of the subdistricts of the Petroleum Administration for Defense District with subdistricts”.

SEC. 124. LOAN GUARANTEES FOR RENEWABLE FUEL FACILITIES.

(a) *IN GENERAL*.—Section 1703 of the Energy Policy Act of 2005 (42 U.S.C. 16513) is amended by adding at the end the following:

“(f) *RENEWABLE FUEL FACILITIES*.—

“(1) *IN GENERAL*.—The Secretary may make guarantees under this title for projects that produce advanced biofuel (as defined in section 102 of the Biofuels for Energy Security and Transportation Act of 2007).

“(2) *REQUIREMENTS*.—A project under this subsection shall employ new or significantly improved technologies for the production of renewable fuels as compared to commercial technologies in service in the United States at the time that the guarantee is issued.

“(3) *ISSUANCE OF FIRST LOAN GUARANTEES*.—The requirement of section 20320(b) of division B of the Continuing Appropriations Resolution, 2007 (Public Law 109–289, Public Law 110–5), relating to the issuance of final regulations, shall not apply to the first 6 guarantees issued under this subsection.

“(4) *PROJECT DESIGN*.—A project for which a guarantee is made under this subsection shall have a project design that has been validated through the operation of a continuous process pilot facility with an annual output of at least 50,000 gallons of ethanol or the energy equivalent volume of other advanced biofuels.

“(5) *MAXIMUM GUARANTEED PRINCIPAL*.—The total principal amount of a loan guaranteed under this subsection may not exceed \$250,000,000 for a single facility.

“(6) *AMOUNT OF GUARANTEE*.—The Secretary shall guarantee 100 percent of the principal and interest due on 1 or more loans made for a facility that is the subject of the guarantee under paragraph (3).

“(7) *DEADLINE*.—The Secretary shall approve or disapprove an application for a guarantee under this subsection not later than 90 days after the date of receipt of the application.

“(8) *REPORT*.—Not later than 30 days after approving or disapproving an application under paragraph (7), the Secretary shall submit to Congress a report on the approval or disapproval (including the reasons for the action).”.

(b) *IMPROVEMENTS TO UNDERLYING LOAN GUARANTEE AUTHORITY*.—

(1) *DEFINITION OF COMMERCIAL TECHNOLOGY*.—Section 1701(1) of the Energy Policy Act of 2005 (42 U.S.C. 16511(1)) is amended by striking subparagraph (B) and inserting the following:

“(B) *EXCLUSION*.—The term ‘commercial technology’ does not include a technology if the sole use of the technology is in connection with—

“(i) a demonstration plant; or

“(ii) a project for which the Secretary approved a loan guarantee.”.

(2) *SPECIFIC APPROPRIATION OR CONTRIBUTION*.—Section 1702 of the Energy Policy Act of 2005 (42 U.S.C. 16512) is amended by striking subsection (b) and inserting the following:

“(b) *SPECIFIC APPROPRIATION OR CONTRIBUTION*.—

“(1) *IN GENERAL*.—No guarantee shall be made unless—

“(A) an appropriation for the cost has been made; or

“(B) the Secretary has received from the borrower a payment in full for the cost of the obligation and deposited the payment into the Treasury.

“(2) *LIMITATION*.—The source of payments received from a borrower under paragraph (1)(B) shall not be a loan or other debt obligation that is made or guaranteed by the Federal Government.

“(3) *RELATION TO OTHER LAWS*.—Section 504(b) of the Federal Credit Reform Act of 1990 (2 U.S.C. 661c(b)) shall not apply to a loan or loan guarantee made in accordance with paragraph (1)(B).”.

(3) *AMOUNT*.—Section 1702 of the Energy Policy Act of 2005 (42 U.S.C. 16512) is amended by striking subsection (c) and inserting the following:

“(c) *AMOUNT*.—

“(1) *IN GENERAL*.—Subject to paragraph (2), the Secretary shall guarantee up to 100 percent of the principal and interest due on 1 or more loans for a facility that are the subject of the guarantee.

“(2) *LIMITATION*.—The total amount of loans guaranteed for a facility by the Secretary shall

not exceed 80 percent of the total cost of the facility, as estimated at the time at which the guarantee is issued.”.

(4) *SUBROGATION*.—Section 1702(g)(2) of the Energy Policy Act of 2005 (42 U.S.C. 16512(g)(2)) is amended—

(A) by striking subparagraph (B); and

(B) by redesignating subparagraph (C) as subparagraph (B).

(5) *FEES*.—Section 1702(h) of the Energy Policy Act of 2005 (42 U.S.C. 16512(h)) is amended by striking paragraph (2) and inserting the following:

“(2) *AVAILABILITY*.—Fees collected under this subsection shall—

“(A) be deposited by the Secretary into a special fund in the Treasury to be known as the ‘Incentives For Innovative Technologies Fund’; and

“(B) remain available to the Secretary for expenditure, without further appropriation or fiscal year limitation, for administrative expenses incurred in carrying out this title.”.

SEC. 125. GRANTS FOR RENEWABLE FUEL PRODUCTION RESEARCH AND DEVELOPMENT IN CERTAIN STATES.

(a) *IN GENERAL*.—The Secretary shall provide grants to eligible entities to conduct research into, and develop and implement, renewable fuel production technologies in States with low rates of ethanol production, including low rates of production of cellulosic biomass ethanol, as determined by the Secretary.

(b) *ELIGIBILITY*.—To be eligible to receive a grant under the section, an entity shall—

(1)(A) be an institution of higher education (as defined in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801)) located in a State described in subsection (a);

(B) be an institution—

(i) referred to in section 532 of the Equity in Educational Land-Grant Status Act of 1994 (Public Law 103–382; 7 U.S.C. 301 note);

(ii) that is eligible for a grant under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.), including Diné College; or

(iii) that is eligible for a grant under the Navajo Community College Act (25 U.S.C. 640a et seq.); or

(C) be a consortium of such institutions of higher education, industry, State agencies, Indian tribal agencies, or local government agencies located in the State; and

(2) have proven experience and capabilities with relevant technologies.

(c) *AUTHORIZATION OF APPROPRIATIONS*.—There is authorized to be appropriated to carry out this section \$25,000,000 for each of fiscal years 2008 through 2010.

SEC. 126. GRANTS FOR INFRASTRUCTURE FOR TRANSPORTATION OF BIOMASS TO LOCAL BIOREFINERIES.

(a) *IN GENERAL*.—The Secretary shall conduct a program under which the Secretary shall provide grants to Indian tribal and local governments and other eligible entities (as determined by the Secretary) (referred to in this section as “eligible entities”) to promote the development of infrastructure to support the separation, production, processing, and transportation of biomass to local biorefineries, including by portable processing equipment.

(b) *PHASES*.—The Secretary shall conduct the program in the following phases:

(1) *DEVELOPMENT*.—In the first phase of the program, the Secretary shall make grants to eligible entities to assist the eligible entities in the development of local projects to promote the development of infrastructure to support the separation, production, processing, and transportation of biomass to local biorefineries, including by portable processing equipment.

(2) *IMPLEMENTATION*.—In the second phase of the program, the Secretary shall make competitive grants to eligible entities to implement projects developed under paragraph (1).

(c) *AUTHORIZATION OF APPROPRIATIONS*.—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 127. BIOREFINERY INFORMATION CENTER.

(a) *IN GENERAL.*—The Secretary, in cooperation with the Secretary of Agriculture, shall establish a biorefinery information center to make available to interested parties information on—

(1) renewable fuel resources, including information on programs and incentives for renewable fuels;

(2) renewable fuel producers;

(3) renewable fuel users; and

(4) potential renewable fuel users.

(b) *ADMINISTRATION.*—In administering the biorefinery information center, the Secretary shall—

(1) continually update information provided by the center;

(2) make information available to interested parties on the process for establishing a biorefinery; and

(3) make information and assistance provided by the center available through a toll-free telephone number and website.

(c) *AUTHORIZATION OF APPROPRIATIONS.*—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 128. ALTERNATIVE FUEL DATABASE AND MATERIALS.

The Secretary and the Director of the National Institute of Standards and Technology shall jointly establish and make available to the public—

(1) a database that describes the physical properties of different types of alternative fuel; and

(2) standard reference materials for different types of alternative fuel.

SEC. 129. FUEL TANK CAP LABELING REQUIREMENT.

Section 406(a) of the Energy Policy Act of 1992 (42 U.S.C. 13232(a)) is amended—

(1) by striking “The Federal Trade Commission” and inserting the following:

“(1) *IN GENERAL.*—The Federal Trade Commission”; and

(2) by adding at the end the following:

“(2) *FUEL TANK CAP LABELING REQUIREMENT.*—Beginning with model year 2010, the fuel tank cap of each alternative fueled vehicle manufactured for sale in the United States shall be clearly labeled to inform consumers that such vehicle can operate on alternative fuel.”

SEC. 130. BIODIESEL.

(a) *IN GENERAL.*—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to Congress a report on any research and development challenges inherent in increasing to 5 percent the proportion of diesel fuel sold in the United States that is biodiesel (as defined in section 757 of the Energy Policy Act of 2005 (42 U.S.C. 16105)).

(b) *REGULATIONS.*—The President shall promulgate regulations providing for the uniform labeling of biodiesel blends that are certified to meet applicable standards published by the American Society for Testing and Materials.

(c) *NATIONAL BIODIESEL FUEL QUALITY STANDARD.*—

(1) *QUALITY REGULATIONS.*—Not later than 180 days after the date of enactment of this Act, the President shall promulgate regulations to ensure that each diesel-equivalent fuel derived from renewable biomass and introduced into interstate commerce is tested and certified to comply with applicable standards of the American Society for Testing and Materials.

(2) *ENFORCEMENT.*—The President shall ensure that all biodiesel entering interstate commerce meets the requirements of paragraph (1).

(3) *FUNDING.*—There are authorized to be appropriated to the President to carry out this section:

(A) \$3,000,000 for fiscal year 2008.

(B) \$3,000,000 for fiscal year 2009.

(C) \$3,000,000 for fiscal year 2010.

SEC. 131. TRANSITIONAL ASSISTANCE FOR FARMERS WHO PLANT DEDICATED ENERGY CROPS FOR A LOCAL CELLULOSIC REFINERY.

(a) *DEFINITIONS.*—In this section:

(1) *CELLULOSIC CROP.*—The term “cellulosic crop” means a tree or grass that is grown specifically—

(A) to provide raw materials (including feedstocks) for conversion to liquid transportation fuels or chemicals through biochemical or thermochemical processes; or

(B) for energy generation through combustion, pyrolysis, or cofiring.

(2) *CELLULOSIC REFINER.*—The term “cellulosic refiner” means the owner or operator of a cellulosic refinery.

(3) *CELLULOSIC REFINERY.*—The term “cellulosic refinery” means a refinery that processes a cellulosic crop.

(4) *QUALIFIED CELLULOSIC CROP.*—The term “qualified cellulosic crop” means, with respect to an agricultural producer, a cellulosic crop that is—

(A) the subject of a contract or memorandum of understanding between the producer and a cellulosic refiner, under which the producer is obligated to sell the crop to the cellulosic refiner by a certain date; and

(B) produced not more than 70 miles from a cellulosic refinery owned or operated by the cellulosic refiner.

(5) *SECRETARY.*—The term “Secretary” means the Secretary of Agriculture.

(b) *TRANSITIONAL ASSISTANCE PAYMENTS.*—The Secretary shall make transitional assistance payments to an agricultural producer during the first year in which the producer devotes land to the production of a qualified cellulosic crop.

(c) *AMOUNT OF PAYMENT.*—

(1) *DETERMINED BY FORMULA.*—Subject to paragraph (2), the Secretary shall devise a formula to be used to calculate the amount of a payment to be made to an agricultural producer under this section, based on the opportunity cost (as determined in accordance with such standard as the Secretary may establish, taking into consideration land rental rates and other applicable costs) incurred by the producer during the first year in which the producer devotes land to the production of the qualified cellulosic crop.

(2) *LIMITATION.*—The total of the amount paid to a producer under this section shall not exceed an amount equal to 25 percent of the amounts made available under subsection (e) for the applicable fiscal year.

(d) *REGULATIONS.*—The Secretary shall promulgate such regulations as the Secretary determines to be necessary to carry out this section.

(e) *AUTHORIZATION OF APPROPRIATIONS.*—There is authorized to be appropriated to carry out this section \$4,088,000 for each of fiscal years 2008 through 2012, to remain available until expended.

SEC. 132. RESEARCH AND DEVELOPMENT IN SUPPORT OF LOW-CARBON FUELS.

(a) *DECLARATION OF POLICY.*—Congress declares that, in order to achieve maximum reductions in greenhouse gas emissions, enhance national security, and ensure the protection of wildlife habitat, biodiversity, water quality, air quality, and rural and regional economies throughout the lifecycle of each low-carbon fuel, it is necessary and desirable to undertake a combination of basic and applied research, as well as technology development and demonstration, involving the colleges and universities of the United States, in partnership with the Federal Government, State governments, and the private sector.

(b) *PURPOSE.*—The purpose of this section is to provide for research support to facilitate the development of sustainable markets and technologies to produce and use woody biomass and other low-carbon fuels for the production of thermal and electric energy, biofuels, and bio-products.

(c) *DEFINITION OF FUEL EMISSION BASELINE.*—In this section, the term “fuel emission baseline” means the average lifecycle greenhouse gas emissions per unit of energy of the fossil fuel

component of conventional transportation fuels in commerce in the United States in calendar year 2008, as determined by the President.

(d) *GRANT PROGRAM.*—The President shall establish a program to provide to eligible entities (as identified by the President) grants for use in—

(1) providing financial support for not more than 4 nor less than 6 demonstration facilities that—

(A) use woody biomass to deploy advanced technologies for production of thermal and electric energy, biofuels, and bioproducts; and

(B) are targeted at regional feedstocks and markets;

(2) conducting targeted research for the development of cellulosic ethanol and other liquid fuels from woody or other biomass that may be used in transportation or stationary applications, such as industrial processes or industrial, commercial, and residential heating;

(3) conducting research into the best scientifically-based and periodically-updated methods of assessing and certifying the impacts of each low-carbon fuel with respect to—

(A) the reduction in lifecycle greenhouse gas emissions of each fuel as compared to—

(i) the fuel emission baseline; and

(ii) the greenhouse gas emissions of other sectors, such as the agricultural, industrial, and manufacturing sectors;

(B) the contribution of the fuel toward enhancing the energy security of the United States by displacing imported petroleum and petroleum products;

(C) any impacts of the fuel on wildlife habitat, biodiversity, water quality, and air quality; and

(D) any effect of the fuel with respect to rural and regional economies;

(4) conducting research to determine to what extent the use of low-carbon fuels in the transportation sector would impact greenhouse gas emissions in other sectors, such as the agricultural, industrial, and manufacturing sectors;

(5) conducting research for the development of the supply infrastructure that may provide renewable biomass feedstocks in a consistent, predictable, and environmentally-sustainable manner;

(6) conducting research for the development of supply infrastructure that may provide renewable low-carbon fuels in a consistent, predictable, and environmentally-sustainable manner; and

(7) conducting policy research on the global movement of low-carbon fuels in a consistent, predictable, and environmentally-sustainable manner.

(e) *AUTHORIZATION OF APPROPRIATIONS.*—Of the funding authorized under section 122, there are authorized to be appropriated to carry out this section—

(1) \$45,000,000 for fiscal year 2009;

(2) \$50,000,000 for fiscal year 2010;

(3) \$55,000,000 for fiscal year 2011;

(4) \$60,000,000 for fiscal year 2012; and

(5) \$65,000,000 for fiscal year 2013.

Subtitle C—Studies**SEC. 141. STUDY OF ADVANCED BIOFUELS TECHNOLOGIES.**

(a) *IN GENERAL.*—Not later than October 1, 2012, the Secretary shall offer to enter into a contract with the National Academy of Sciences under which the Academy shall conduct a study of technologies relating to the production, transportation, and distribution of advanced biofuels.

(b) *SCOPE.*—In conducting the study, the Academy shall—

(1) include an assessment of the maturity of advanced biofuels technologies;

(2) consider whether the rate of development of those technologies will be sufficient to meet the advanced biofuel standards required under section 111;

(3) consider the effectiveness of the research and development programs and activities of the

Department of Energy relating to advanced biofuel technologies; and

(4) make policy recommendations to accelerate the development of those technologies to commercial viability, as appropriate.

(c) REPORT.—Not later than November 30, 2014, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report describing the results of the study conducted under this section.

SEC. 142. STUDY OF INCREASED CONSUMPTION OF ETHANOL-BLENDED GASOLINE WITH HIGHER LEVELS OF ETHANOL.

(a) IN GENERAL.—The Secretary, in cooperation with the Secretary of Agriculture, the Administrator of the Environmental Protection Agency, and the Secretary of Transportation, and after providing notice and an opportunity for public comment, shall conduct a study of the feasibility of increasing consumption in the United States of ethanol-blended gasoline with levels of ethanol that are not less than 10 percent and not more than 40 percent.

(b) STUDY.—The study under subsection (a) shall include—

(1) a review of production and infrastructure constraints on increasing consumption of ethanol;

(2) an evaluation of the economic, market, and energy-related impacts of State and regional differences in ethanol blends;

(3) an evaluation of the economic, market, and energy-related impacts on gasoline retailers and consumers of separate and distinctly labeled fuel storage facilities and dispensers;

(4) an evaluation of the environmental impacts of mid-level ethanol blends on evaporative and exhaust emissions from on-road, off-road, and marine engines, recreational boats, vehicles, and equipment;

(5) an evaluation of the impacts of mid-level ethanol blends on the operation, durability, and performance of on-road, off-road, and marine engines, recreational boats, vehicles, and equipment; and

(6) an evaluation of the safety impacts of mid-level ethanol blends on consumers that own and operate off-road and marine engines, recreational boats, vehicles, or equipment.

(c) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report describing the results of the study conducted under this section.

SEC. 143. PIPELINE FEASIBILITY STUDY.

(a) IN GENERAL.—The Secretary, in coordination with the Secretary of Agriculture and the Secretary of Transportation, shall conduct a study of the feasibility of the construction of dedicated ethanol pipelines.

(b) FACTORS.—In conducting the study, the Secretary shall consider—

(1) the quantity of ethanol production that would make dedicated pipelines economically viable;

(2) existing or potential barriers to dedicated ethanol pipelines, including technical, siting, financing, and regulatory barriers;

(3) market risk (including throughput risk) and means of mitigating the risk;

(4) regulatory, financing, and siting options that would mitigate risk in those areas and help ensure the construction of 1 or more dedicated ethanol pipelines;

(5) financial incentives that may be necessary for the construction of dedicated ethanol pipelines, including the return on equity that sponsors of the initial dedicated ethanol pipelines will require to invest in the pipelines;

(6) technical factors that may compromise the safe transportation of ethanol in pipelines, identifying remedial and preventative measures to ensure pipeline integrity; and

(7) such other factors as the Secretary considers appropriate.

(c) REPORT.—Not later than 15 months after the date of enactment of this Act, the Secretary shall submit to Congress a report describing the results of the study conducted under this section.

SEC. 144. STUDY OF OPTIMIZATION OF FLEXIBLE FUELED VEHICLES TO USE E-85 FUEL.

(a) IN GENERAL.—The Secretary shall conduct a study of methods of increasing the fuel efficiency of flexible fueled vehicles by optimizing flexible fueled vehicles to operate using E-85 fuel.

(b) REPORT.—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives a report that describes the results of the study, including any recommendations of the Secretary.

SEC. 145. STUDY OF CREDITS FOR USE OF RENEWABLE ELECTRICITY IN ELECTRIC VEHICLES.

(a) DEFINITION OF ELECTRIC VEHICLE.—In this section, the term “electric vehicle” means an electric motor vehicle (as defined in section 601 of the Energy Policy Act of 1992 (42 U.S.C. 13271)) for which the rechargeable storage battery—

(1) receives a charge directly from a source of electric current that is external to the vehicle; and

(2) provides a minimum of 80 percent of the motive power of the vehicle.

(b) STUDY.—The Secretary shall conduct a study on the feasibility of issuing credits under the program established under section 111(d) to electric vehicles powered by electricity produced from renewable energy sources.

(c) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report that describes the results of the study, including a description of—

(1) existing programs and studies on the use of renewable electricity as a means of powering electric vehicles; and

(2) alternatives for—
(A) designing a pilot program to determine the feasibility of using renewable electricity to power electric vehicles as an adjunct to a renewable fuels mandate;

(B) allowing the use, under the pilot program designed under subparagraph (A), of electricity generated from nuclear energy as an additional source of supply;

(C) identifying the source of electricity used to power electric vehicles; and

(D) equating specific quantities of electricity to quantities of renewable fuel under section 111(d).

SEC. 146. STUDY OF ENGINE DURABILITY ASSOCIATED WITH THE USE OF BIODIESEL.

(a) IN GENERAL.—Not later than 30 days after the date of enactment of this Act, the Secretary shall initiate a study on the effects of the use of biodiesel on engine durability.

(b) COMPONENTS.—The study under this section shall include—

(1) an assessment of whether the use of biodiesel in conventional diesel engines lessens engine durability; and

(2) an assessment of the effects referred to in subsection (a) with respect to biodiesel blends at varying concentrations, including—

(A) B5;

(B) B10;

(C) B20; and

(D) B30.

SEC. 147. STUDY OF INCENTIVES FOR RENEWABLE FUELS.

(a) STUDY.—The President shall conduct a study of the renewable fuels industry and markets in the United States, including—

(1) the costs to produce conventional and advanced biofuels;

(2) the factors affecting the future market prices for those biofuels, including world oil prices; and

(3) the financial incentives necessary to enhance, to the maximum extent practicable, the biofuels industry of the United States to reduce the dependence of the United States on foreign oil during calendar years 2011 through 2030.

(b) GOALS.—The study shall include an analysis of the options for financial incentives and the advantage and disadvantages of each option.

(c) REPORT.—Not later than 1 year after the date of enactment of this Act, the President shall submit to Congress a report that describes the results of the study.

SEC. 148. STUDY OF STREAMLINED LIFECYCLE ANALYSIS TOOLS FOR THE EVALUATION OF RENEWABLE CARBON CONTENT OF BIOFUELS.

(a) IN GENERAL.—The Secretary, in consultation with the Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall conduct a study of—

(1) published methods for evaluating the lifecycle fossil and renewable carbon content of fuels, including conventional and advanced biofuels; and

(2) methods for performing simplified, streamlined lifecycle analyses of the fossil and renewable carbon content of biofuels.

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report that describes the results of the study under subsection (a), including recommendations for a method for performing a simplified, streamlined lifecycle analysis of the fossil and renewable carbon content of biofuels that includes—

(1) carbon inputs to feedstock production; and

(2) carbon inputs to the biofuel production process, including the carbon associated with electrical and thermal energy inputs.

SEC. 149. STUDY OF EFFECTS OF ETHANOL-BLENDED GASOLINE ON OFF-ROAD VEHICLES.

(a) STUDY.—

(1) IN GENERAL.—The Secretary, in consultation with the Secretary of Transportation and the Administrator of the Environmental Protection Agency, shall conduct a study to determine the effects of ethanol-blended gasoline on off-road vehicles and recreational boats.

(2) EVALUATION.—The study shall include an evaluation of the operational, safety, durability, and environmental impacts of ethanol-blended gasoline on off-road and marine engines, recreational boats, and related equipment.

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report describing the results of the study.

SEC. 150. STUDY OF OFFSHORE WIND RESOURCES.

(a) DEFINITIONS.—In this section:

(1) ELIGIBLE INSTITUTION.—The term “eligible institution” means a college or university that—

(A) as of the date of enactment of this Act, has an offshore wind power research program; and

(B) is located in a region of the United States that is in reasonable proximity to the eastern outer Continental Shelf, as determined by the Secretary.

(2) SECRETARY.—The term “Secretary” means the Secretary of the Interior, acting through the Director of the Minerals Management Service.

(b) STUDY.—The Secretary, in cooperation with an eligible institution, as selected by the Secretary, shall conduct a study to assess each offshore wind resource located in the region of the eastern outer Continental Shelf.

(c) REPORT.—Upon completion of the study under subsection (b), the Secretary shall submit to Congress a report that includes—

(1) a description of—

(A) the locations and total power generation resources of the best offshore wind resources located in the region of the eastern outer Continental Shelf, as determined by the Secretary;

(B) based on conflicting zones relating to any infrastructure that, as of the date of enactment of this Act, is located in close proximity to any offshore wind resource, the likely exclusion zones of each offshore wind resource described in subparagraph (A);

(C) the relationship of the temporal variation of each offshore wind resource described in subparagraph (A) with—

(i) any other offshore wind resource; and

(ii) with loads and corresponding system operator markets;

(D) the geological compatibility of each offshore wind resource described in subparagraph (A) with any potential technology relating to sea floor towers; and

(E) with respect to each area in which an offshore wind resource described in subparagraph (A) is located, the relationship of the authority under any coastal management plan of the State in which the area is located with the Federal Government; and

(2) recommendations on the manner by which to handle offshore wind intermittence.

(d) INCORPORATION OF STUDY.—Effective beginning on the date on which the Secretary completes the study under subsection (b), the Secretary shall incorporate the findings included in the report under subsection (c) into the planning process documents for any wind energy lease sale—

(1) relating to any offshore wind resource located in any appropriate area of the outer Continental Shelf, as determined by the Secretary; and

(2) that is completed on or after the date of enactment of this Act.

(e) EFFECT.—Nothing in this section—

(1) delays any final regulation to be promulgated by the Secretary of the Interior to carry out section 8(p) of the Outer Continental Shelf Lands Act (43 U.S.C. 1337(p)); or

(2) limits the authority of the Secretary to lease any offshore wind resource located in any appropriate area of the outer Continental Shelf, as determined by the Secretary.

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$5,000,000, to remain available until expended.

Subtitle D—Environmental Safeguards

SEC. 161. GRANTS FOR PRODUCTION OF ADVANCED BIOFUELS.

(a) IN GENERAL.—The Secretary shall establish a grant program to encourage the production of advanced biofuels.

(b) REQUIREMENTS AND PRIORITY.—In making grants under this section, the Secretary—

(1) shall make awards to the proposals for advanced biofuels with the greatest reduction in lifecycle greenhouse gas emissions compared to the comparable motor vehicle fuel lifecycle emissions during calendar year 2007; and

(2) shall not make an award to a project that does not achieve at least a 50-percent reduction in such lifecycle greenhouse gas emissions.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$500,000,000 for the period of fiscal years 2008 through 2015.

SEC. 162. STUDIES OF EFFECTS OF RENEWABLE FUEL USE.

Section 211 of the Clean Air Act (42 U.S.C. 7545) is amended by adding at the end the following:

“(t) STUDIES OF EFFECTS OF RENEWABLE FUEL USE.—

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Administrator shall offer to enter into appropriate arrangements with the National Academy of Sciences and any other independent research in-

stitute determined to be appropriate by the Administrator, in consultation with appropriate Federal agencies, to conduct 2 studies on the effects of increased domestic use of renewable fuels under the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007.

“(2) MATTERS TO BE STUDIED.—

“(A) IN GENERAL.—The studies under this subsection shall assess, quantify, and recommend analytical methodologies in relation to environmental changes associated with the increased domestic use of renewable fuels under the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007, including production, handling, transportation, and use of the fuels.

“(B) SPECIFIC MATTERS.—The studies shall include an assessment and quantification, to the maximum extent practicable, of significant changes—

“(i) in air and water quality and the quality of other natural resources;

“(ii) in land use patterns;

“(iii) in the rate of deforestation in the United States and globally;

“(iv) to greenhouse gas emissions;

“(v) to significant geographic areas and habitats with high biodiversity values (including species richness, the presence of species that are exclusively native to a place, or the presence of endangered species); or

“(vi) in the long-term capacity of the United States to produce biomass feedstocks.

“(C) BASELINE COMPARISON.—In making an assessment or quantifying effects of increased use of renewable fuels, the studies shall use an appropriate baseline involving increased use of the conventional transportation fuels, if displacement by use of renewable fuels had not occurred.

“(3) REPORTS TO CONGRESS.—The Administrator shall submit to Congress a report summarizing the assessments and findings of—

“(A) the first study, along with any recommendations by the Administrator to mitigate adverse effects identified by the study, not later than 3 years after the date of enactment of this subsection; and

“(B) the second study, along with any recommendations by the Administrator to mitigate adverse effects identified by the study, not later December 31, 2015.”

SEC. 163. INTEGRATED CONSIDERATION OF WATER QUALITY IN DETERMINATIONS ON FUELS AND FUEL ADDITIVES.

Section 211(c)(1) of the Clean Air Act (42 U.S.C. 7545(c)(1)) is amended—

(1) by striking “nonroad vehicle (A) if in the judgment of the Administrator” and inserting “nonroad vehicle—

“(A) if, in the judgment of the Administrator, any fuel or fuel additive or”;

(2) in subparagraph (A), by striking “air pollution which” and inserting “air pollution or water pollution (including any degradation in the quality of groundwater) that”; and

(3) by striking “, or (B) if” and inserting the following: “; or

“(B) if”.

SEC. 164. ANTI-BACKSLIDING.

Section 211 of the Clean Air Act (42 U.S.C. 7545) (as amended by section 162) is amended by adding at the end the following:

“(u) PREVENTION OF AIR QUALITY DETERIORATION.—

“(1) STUDY.—

“(A) IN GENERAL.—Not later than 18 months after the date of enactment of the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007, the Administrator shall complete a study to determine whether the renewable fuel volumes required by that Act will adversely impact air quality as a result of changes in vehicle and engine emissions of air pollutants regulated under this Act.

“(B) CONSIDERATIONS.—The study shall include consideration of—

“(i) different blend levels, types of renewable fuels, and available vehicle technologies; and

“(ii) appropriate national, regional, and local air quality control measures.

“(2) REGULATIONS.—Not later than 3 years after the date of enactment of the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007, the Administrator shall—

“(A) promulgate regulations to implement appropriate measures to mitigate, to the greatest extent achievable, considering the results of the study under paragraph (1), any adverse impacts on air quality, as the result of the renewable volumes required by that Act; or

“(B) make a determination that no such measures are necessary.

“(3) OTHER REQUIREMENTS.—Nothing in title I of the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007 supercedes or otherwise affects any Federal or State requirement under any other provision of law that is more stringent than any requirement of this title.”

TITLE II—ENERGY EFFICIENCY PROMOTION

SEC. 201. SHORT TITLE.

This title may be cited as the “Energy Efficiency Promotion Act of 2007”.

SEC. 202. DEFINITION OF SECRETARY.

In this title, the term “Secretary” means the Secretary of Energy.

Subtitle A—Promoting Advanced Lighting Technologies

SEC. 211. ACCELERATED PROCUREMENT OF ENERGY EFFICIENT LIGHTING.

Section 553 of the National Energy Conservation Policy Act (42 U.S.C. 8259b) is amended by adding the following:

“(f) ACCELERATED PROCUREMENT OF ENERGY EFFICIENT LIGHTING.—

“(1) IN GENERAL.—Not later than October 1, 2013, in accordance with guidelines issued by the Secretary, all general purpose lighting in Federal buildings shall be Energy Star products or products designated under the Federal Energy Management Program.

“(2) GUIDELINES.—

“(A) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Secretary shall issue guidelines to carry out this subsection.

“(B) REPLACEMENT COSTS.—The guidelines shall take into consideration the costs of replacing all general service lighting and the reduced cost of operation and maintenance expected to result from such replacement.”

SEC. 212. INCANDESCENT REFLECTOR LAMP EFFICIENCY STANDARDS.

(a) DEFINITIONS.—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) is amended—

(1) in paragraph (30)(C)(ii)—

(A) in the matter preceding subclause (I)—

(i) by striking “or similar bulb shapes (excluding ER or BR)” and inserting “ER, BR, BPAR, or similar bulb shapes”; and

(ii) by striking “2.75” and inserting “2.25”; and

(B) by striking “is either—” and all that follows through subclause (II) and inserting “has a rated wattage that is 40 watts or higher”; and

(2) by adding at the end the following:

“(52) BPAR INCANDESCENT REFLECTOR LAMP.—The term ‘BPAR incandescent reflector lamp’ means a reflector lamp as shown in figure C78.21–278 on page 32 of ANSI C78.21–2003.

“(53) BR INCANDESCENT REFLECTOR LAMP; BR30; BR40.—

“(A) BR INCANDESCENT REFLECTOR LAMP.—The term ‘BR incandescent reflector lamp’ means a reflector lamp that has—

“(i) a bulged section below the major diameter of the bulb and above the approximate baseline of the bulb, as shown in figure 1 (RB) on page 7 of ANSI C79.1–1994, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph); and

“(ii) a finished size and shape shown in ANSI C78.21–1989, including the referenced reflective characteristics in part 7 of ANSI C78.21–1989, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph).”

“(B) BR30.—The term ‘BR30’ means a BR incandescent reflector lamp with a diameter of 30/8ths of an inch.

“(C) BR40.—The term ‘BR40’ means a BR incandescent reflector lamp with a diameter of 40/8ths of an inch.

“(54) ER INCANDESCENT REFLECTOR LAMP; ER30; ER40.—

“(A) ER INCANDESCENT REFLECTOR LAMP.—The term ‘ER incandescent reflector lamp’ means a reflector lamp that has—

“(i) an elliptical section below the major diameter of the bulb and above the approximate baseline of the bulb, as shown in figure 1 (RE)

on page 7 of ANSI C79.1–1994, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph); and

“(ii) a finished size and shape shown in ANSI C78.21–1989, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph).”

“(B) ER30.—The term ‘ER30’ means an ER incandescent reflector lamp with a diameter of 30/8ths of an inch.

“(C) ER40.—The term ‘ER40’ means an ER incandescent reflector lamp with a diameter of 40/8ths of an inch.

“(55) R20 INCANDESCENT REFLECTOR LAMP.—The term ‘R20 incandescent reflector lamp’ means a reflector lamp that has a face diameter of approximately 2.5 inches, as shown in figure 1(R) on page 7 of ANSI C79.1–1994.”

(b) STANDARDS FOR FLUORESCENT LAMPS AND INCANDESCENT REFLECTOR LAMPS.—Section 325(i) of the Energy Policy and Conservation Act (42 U.S.C. 6925(i)) is amended by striking paragraph (1) and inserting the following:

“(1) STANDARDS.—

“(A) DEFINITION OF EFFECTIVE DATE.—In this paragraph (other than subparagraph (D)), the term ‘effective date’ means, with respect to each type of lamp specified in a table contained in subparagraph (B), the last day of the period of months corresponding to that type of lamp (as specified in the table) that follows October 24, 1992.

“(B) MINIMUM STANDARDS.—Each of the following general service fluorescent lamps and incandescent reflector lamps manufactured after the effective date specified in the tables contained in this paragraph shall meet or exceed the following lamp efficacy and CRI standards:

“FLUORESCENT LAMPS

Lamp Type	Nominal Lamp Wattage	Minimum CRI	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
4-foot medium bi-pin	>35 W	69	75.0	36
	≤35 W	45	75.0	36
2-foot U-shaped	>35 W	69	68.0	36
	≤35 W	45	64.0	36
8-foot slimline	65 W	69	80.0	18
	≤65 W	45	80.0	18
8-foot high output	>100 W	69	80.0	100
	≤100 W	45	80.0	18

“INCANDESCENT REFLECTOR LAMPS

Nominal Lamp Wattage	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
40–50	10.5	36
51–66	11.0	36
67–85	12.5	36
86–115	14.0	36
116–155	14.5	36
156–205	15.0	36

“(C) EXEMPTIONS.—The standards specified in subparagraph (B) shall not apply to the following types of incandescent reflector lamps:

“(i) Lamps rated at 50 watts or less that are ER30, BR30, BR40, or ER40 lamps.

“(ii) Lamps rated at 65 watts that are BR30, BR40, or ER40 lamps.

“(iii) R20 incandescent reflector lamps rated 45 watts or less.

“(D) EFFECTIVE DATES.—

“(i) ER, BR, AND BPAR LAMPS.—The standards specified in subparagraph (B) shall apply with respect to ER incandescent reflector lamps, BR incandescent reflector lamps, BPAR incandescent reflector lamps, and similar bulb shapes on and after January 1, 2008.

“(ii) LAMPS BETWEEN 2.25–2.75 INCHES IN DIAMETER.—The standards specified in subparagraph (B) shall apply with respect to incandescent reflector lamps with a diameter of more than 2.25 inches, but not more than 2.75 inches, on and after January 1, 2008.”

SEC. 213. BRIGHT TOMORROW LIGHTING PRIZES.

(a) ESTABLISHMENT.—Not later than 1 year after the date of enactment of this Act, as part of the program carried out under section 1008 of the Energy Policy Act of 2005 (42 U.S.C. 16396), the Secretary shall establish and award Bright Tomorrow Lighting Prizes for solid state lighting in accordance with this section.

(b) PRIZE SPECIFICATIONS.—

(1) 60-WATT INCANDESCENT REPLACEMENT LAMP PRIZE.—The Secretary shall award a 60-Watt Incandescent Replacement Lamp Prize to an entrant that produces a solid-state light package simultaneously capable of—

(A) producing a luminous flux greater than 900 lumens;

(B) consuming less than or equal to 10 watts; (C) having an efficiency greater than 90 lumens per watt;

(D) having a color rendering index greater than 90;

(E) having a correlated color temperature of not less than 2,750, and not more than 3,000, degrees Kelvin;

(F) having 70 percent of the lumen value under subparagraph (A) exceeding 25,000 hours under typical conditions expected in residential use;

(G) having a light distribution pattern similar to a soft 60-watt incandescent A19 bulb;

(H) having a size and shape that fits within the maximum dimensions of an A19 bulb in accordance with American National Standards Institute standard C78.20–2003, figure C78.20–211;

(I) using a single contact medium screw socket; and

(J) mass production for a competitive sales commercial market satisfied by the submission of 10,000 such units equal to or exceeding the criteria described in subparagraphs (A) through (I).

(2) PAR TYPE 38 HALOGEN REPLACEMENT LAMP PRIZE.—The Secretary shall award a Parabolic Aluminized Reflector Type 38 Halogen Replacement Lamp Prize (referred to in this section as the “PAR Type 38 Halogen Replacement Lamp Prize”) to an entrant that produces a solid-state-light package simultaneously capable of—

(A) producing a luminous flux greater than or equal to 1,350 lumens;

(B) consuming less than or equal to 11 watts;

(C) having an efficiency greater than 123 lumens per watt;

(D) having a color rendering index greater than or equal to 90;

(E) having a correlated color coordinate temperature of not less than 2,750, and not more than 3,000, degrees Kelvin;

(F) having 70 percent of the lumen value under subparagraph (A) exceeding 25,000 hours under typical conditions expected in residential use;

(G) having a light distribution pattern similar to a PAR 38 halogen lamp;

(H) having a size and shape that fits within the maximum dimensions of a PAR 38 halogen lamp in accordance with American National

Standards Institute standard C78–21–2003, figure C78.21–238;

(I) using a single contact medium screw socket; and

(J) mass production for a competitive sales commercial market satisfied by the submission of 10,000 such units equal to or exceeding the criteria described in subparagraphs (A) through (I).

(3) TWENTY-FIRST CENTURY LAMP PRIZE.—The Secretary shall award a Twenty-First Century Lamp Prize to an entrant that produces a solid-state-light-light capable of—

(A) producing a light output greater than 1,200 lumens;

(B) having an efficiency greater than 150 lumens per watt;

(C) having a color rendering index greater than 90;

(D) having a color coordinate temperature between 2,800 and 3,000 degrees Kelvin; and

(E) having a lifetime exceeding 25,000 hours.

(c) PRIVATE FUNDS.—The Secretary may accept and use funding from private sources as part of the prizes awarded under this section.

(d) TECHNICAL REVIEW.—The Secretary shall establish a technical review committee composed of non-Federal officers to review entrant data submitted under this section to determine whether the data meets the prize specifications described in subsection (b).

(e) THIRD PARTY ADMINISTRATION.—The Secretary may competitively select a third party to administer awards under this section.

(f) AWARD AMOUNTS.—Subject to the availability of funds to carry out this section, the amount of—

(1) the 60-Watt Incandescent Replacement Lamp Prize described in subsection (b)(1) shall be \$10,000,000;

(2) the PAR Type 38 Halogen Replacement Lamp Prize described in subsection (b)(2) shall be \$5,000,000; and

(3) the Twenty-First Century Lamp Prize described in subsection (b)(3) shall be \$5,000,000.

(g) FEDERAL PROCUREMENT OF SOLID-STATE LIGHTS.—

(1) 60-WATT INCANDESCENT REPLACEMENT.—Subject to paragraph (3), as soon as practicable after the successful award of the 60-Watt Incandescent Replacement Lamp Prize under subsection (b)(1), the Secretary (in consultation

with the Administrator of General Services) shall develop governmentwide Federal purchase guidelines with a goal of replacing the use of 60-watt incandescent lamps in Federal Government buildings with a solid-state-light package described in subsection (b)(1) by not later than the date that is 5 years after the date the award is made.

(2) **PAR 38 HALOGEN REPLACEMENT LAMP REPLACEMENT.**—Subject to paragraph (3), as soon as practicable after the successful award of the PAR Type 38 Halogen Replacement Lamp Prize under subsection (b)(2), the Secretary (in consultation with the Administrator of General Services) shall develop governmentwide Federal purchase guidelines with the goal of replacing the use of PAR 38 halogen lamps in Federal Government buildings with a solid-state-light package described in subsection (b)(2) by not later than the date that is 5 years after the date the award is made.

(3) **WAIVERS.**—

(A) **IN GENERAL.**—The Secretary or the Administrator of General Services may waive the application of paragraph (1) or (2) if the Secretary or Administrator determines that the return on investment from the purchase of a solid-state-light package described in paragraph (1) or (2) of subsection (b), respectively, is cost prohibitive.

(B) **REPORT OF WAIVER.**—If the Secretary or Administrator waives the application of paragraph (1) or (2), the Secretary or Administrator, respectively, shall submit to Congress an annual report that describes the waiver and provides a detailed justification for the waiver.

(h) **REPORT.**—Not later than 2 years after the date of enactment of this Act, and annually thereafter, the Administrator of General Services shall submit to the Energy Information Agency a report describing the quantity, type, and cost of each lighting product purchased by the Federal Government.

(i) **BRIGHT LIGHT TOMORROW AWARD FUND.**—

(1) **ESTABLISHMENT.**—There is established in the United States Treasury a Bright Light Tomorrow permanent fund without fiscal year limitation to award prizes under paragraphs (1), (2), and (3) of subsection (b).

(2) **SOURCES OF FUNDING.**—The fund established under paragraph (1) shall accept—
(A) fiscal year appropriations; and
(B) private contributions authorized under subsection (c).

(j) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 214. SENSE OF SENATE CONCERNING EFFICIENT LIGHTING STANDARDS.

(a) **FINDINGS.**—The Senate finds that—

(1) there are approximately 4,000,000,000 screw-based sockets in the United States that contain traditional, energy-inefficient, incandescent light bulbs;

(2) incandescent light bulbs are based on technology that is more than 125 years old;

(3) there are radically more efficient lighting alternatives in the market, with the promise of even more choices over the next several years;

(4) national policy can support a rapid substitution of new, energy-efficient light bulbs for the less efficient products in widespread use; and

(5) transforming the United States market to use of more efficient lighting technologies can—
(A) reduce electric costs in the United States by more than \$18,000,000,000 annually;

(B) save the equivalent electricity that is produced by 80 base load coal-fired power plants; and

(C) reduce fossil fuel related emissions by approximately 158,000,000 tons each year.

(b) **SENSE OF THE SENATE.**—It is the sense of the Senate that the Senate should—

(1) pass a set of mandatory, technology-neutral standards to establish firm energy efficiency performance targets for lighting products;

(2) ensure that the standards become effective within the next 10 years; and

(3) in developing the standards—

(A) establish the efficiency requirements to ensure that replacement lamps will provide consumers with the same quantity of light while using significantly less energy;

(B) ensure that consumers will continue to have multiple product choices, including energy-saving halogen, incandescent, compact fluorescent, and LED light bulbs; and

(C) work with industry and key stakeholders on measures that can assist consumers and businesses in making the important transition to more efficient lighting.

SEC. 215. RENEWABLE ENERGY CONSTRUCTION GRANTS.

(a) **DEFINITIONS.**—In this section:

(1) **ALASKA SMALL HYDROELECTRIC POWER.**—The term “Alaska small hydroelectric power” means power that—

(A) is generated—

(i) in the State of Alaska;

(ii) without the use of a dam or impoundment of water; and

(iii) through the use of—

(I) a lake tap (but not a perched alpine lake); or

(II) a run-of-river screened at the point of diversion; and

(B) has a nameplate capacity rating of a wattage that is not more than 15 megawatts.

(2) **ELIGIBLE APPLICANT.**—The term “eligible applicant” means any—

(A) governmental entity;

(B) private utility;

(C) public utility;

(D) municipal utility;

(E) cooperative utility;

(F) Indian tribes; and

(G) Regional Corporation (as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602)).

(3) **OCEAN ENERGY.**—

(A) **INCLUSIONS.**—The term “ocean energy” includes current, wave, and tidal energy.

(B) **EXCLUSION.**—The term “ocean energy” excludes thermal energy.

(4) **RENEWABLE ENERGY PROJECT.**—The term “renewable energy project” means a project—

(A) for the commercial generation of electricity; and

(B) that generates electricity from—
(i) solar, wind, or geothermal energy or ocean energy;

(ii) biomass (as defined in section 203(b) of the Energy Policy Act of 2005 (42 U.S.C. 15852(b)));

(iii) landfill gas; or

(iv) Alaska small hydroelectric power.

(b) **RENEWABLE ENERGY CONSTRUCTION GRANTS.**—

(1) **IN GENERAL.**—The Secretary shall use amounts appropriated under this section to make grants for use in carrying out renewable energy projects.

(2) **CRITERIA.**—Not later than 180 days after the date of enactment of this Act, the Secretary shall set forth criteria for use in awarding grants under this section.

(3) **APPLICATION.**—To receive a grant from the Secretary under paragraph (1), an eligible applicant shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a written assurance that—

(A) all laborers and mechanics employed by contractors or subcontractors during construction, alteration, or repair that is financed, in whole or in part, by a grant under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with sections 3141–3144, 3146, and 3147 of title 40, United States Code; and

(B) the Secretary of Labor shall, with respect to the labor standards described in this paragraph, have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (5 U.S.C. App.) and section 3145 of title 40, United States Code.

(4) **NON-FEDERAL SHARE.**—Each eligible applicant that receives a grant under this subsection shall contribute to the total cost of the renewable energy project constructed by the eligible applicant an amount not less than 50 percent of the total cost of the project.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Fund such sums as are necessary to carry out this section.

Subtitle B—Expediting New Energy Efficiency Standards

SEC. 221. DEFINITION OF ENERGY CONSERVATION STANDARD.

Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) is amended by striking paragraph (6) and inserting the following:

“(6) **ENERGY CONSERVATION STANDARD.**—

“(A) **IN GENERAL.**—The term ‘energy conservation standard’ means 1 or more performance standards that—

“(i) for covered products (excluding clothes washers, dishwashers, showerheads, faucets, water closets, and urinals), prescribe a minimum level of energy efficiency or a maximum quantity of energy use, determined in accordance with test procedures prescribed under section 323;

“(ii) for showerheads, faucets, water closets, and urinals, prescribe a minimum level of water efficiency or a maximum quantity of water use, determined in accordance with test procedures prescribed under section 323; and

“(iii) for clothes washers and dishwashers—
“(I) prescribe a minimum level of energy efficiency or a maximum quantity of energy use, determined in accordance with test procedures prescribed under section 323; and

“(II) may include a minimum level of water efficiency or a maximum quantity of water use, determined in accordance with those test procedures.

“(B) **INCLUSIONS.**—The term ‘energy conservation standard’ includes—

“(i) 1 or more design requirements, if the requirements were established—

“(I) on or before the date of enactment of this subclause; or

“(II) as part of a consensus agreement under section 325(hh); and

“(ii) any other requirements that the Secretary may prescribe under section 325(r).

“(C) **EXCLUSION.**—The term ‘energy conservation standard’ does not include a performance standard for a component of a finished covered product, unless regulation of the component is authorized or established pursuant to this title.”.

SEC. 222. REGIONAL EFFICIENCY STANDARDS FOR HEATING AND COOLING PRODUCTS.

(a) **IN GENERAL.**—Section 327 of the Energy Policy and Conservation Act (42 U.S.C. 6297) is amended—

(1) by redesignating subsections (e), (f), and (g) as subsections (f), (g), and (h), respectively; and

(2) by inserting after subsection (d) the following:

“(e) **REGIONAL EFFICIENCY STANDARDS FOR HEATING AND COOLING PRODUCTS.**—

“(1) **IN GENERAL.**—

“(A) **DETERMINATION.**—The Secretary may determine, after notice and comment, that more stringent Federal energy conservation standards are appropriate for furnaces, boilers, or central air conditioning equipment than applicable Federal energy conservation standards.

“(B) **FINDING.**—The Secretary may determine that more stringent standards are appropriate for up to 2 different regions only after finding that the regional standards—

“(i) would contribute to energy savings that are substantially greater than that of a single national energy standard; and

“(ii) are economically justified.

“(C) REGIONS.—On making a determination described in subparagraph (B), the Secretary shall establish the regions so that the more stringent standards would achieve the maximum level of energy savings that is technologically feasible and economically justified.

“(D) FACTORS.—In determining the appropriateness of 1 or more regional standards for furnaces, boilers, and central and commercial air conditioning equipment, the Secretary shall consider all of the factors described in paragraphs (1) through (4) of section 325(o).

“(2) STATE PETITION.—After a determination made by the Secretary under paragraph (1), a State may petition the Secretary requesting a rule that a State regulation that establishes a standard for furnaces, boilers, or central air conditioners become effective at a level determined by the Secretary to be appropriate for the region that includes the State.

“(3) RULE.—Subject to paragraphs (4) through (7), the Secretary may issue the rule during the period described in paragraph (4) and after consideration of the petition and the comments of interested persons.

“(4) PROCEDURE.—

“(A) NOTICE.—The Secretary shall provide notice of any petition filed under paragraph (2) and afford interested persons a reasonable opportunity to make written comments, including rebuttal comments, on the petition.

“(B) DECISION.—Except as provided in subparagraph (C), during the 180-day period beginning on the date on which the petition is filed, the Secretary shall issue the requested rule or deny the petition.

“(C) EXTENSION.—The Secretary may publish in the Federal Register a notice—

“(i) extending the period to a specified date, but not longer than 1 year after the date on which the petition is filed; and

“(ii) describing the reasons for the delay.

“(D) DENIALS.—If the Secretary denies a petition under this subsection, the Secretary shall publish in the Federal Register notice of, and the reasons for, the denial.

“(5) FINDING OF SIGNIFICANT BURDEN ON MANUFACTURING, MARKETING, DISTRIBUTION, SALE, OR SERVICING OF COVERED PRODUCT ON NATIONAL BASIS.—

“(A) IN GENERAL.—The Secretary may not issue a rule under this subsection if the Secretary finds (and publishes the finding) that interested persons have established, by a preponderance of the evidence, that the State regulation will significantly burden manufacturing, marketing, distribution, sale, or servicing of a covered product on a national basis.

“(B) FACTORS.—In determining whether to make a finding described in subparagraph (A), the Secretary shall evaluate all relevant factors, including—

“(i) the extent to which the State regulation will increase manufacturing or distribution costs of manufacturers, distributors, and others;

“(ii) the extent to which the State regulation will disadvantage smaller manufacturers, distributors, or dealers or lessen competition in the sale of the covered product in the State; and

“(iii) the extent to which the State regulation would cause a burden to manufacturers to redesign and produce the covered product type (or class), taking into consideration the extent to which the regulation would result in a reduction—

“(I) in the current models, or in the projected availability of models, that could be shipped on the effective date of the regulation to the State and within the United States; or

“(II) in the current or projected sales volume of the covered product type (or class) in the State and the United States.

“(6) APPLICATION.—No State regulation shall become effective under this subsection with respect to any covered product manufactured before the date specified in the determination made by the Secretary under paragraph (1).

“(7) PETITION TO WITHDRAW FEDERAL RULE FOLLOWING AMENDMENT OF FEDERAL STANDARD.—

“(A) IN GENERAL.—If a State has issued a rule under paragraph (3) with respect to a covered product and subsequently a Federal energy conservation standard concerning the product is amended pursuant to section 325, any person subject to the State regulation may file a petition with the Secretary requesting the Secretary to withdraw the rule issued under paragraph (3) with respect to the product in the State.

“(B) BURDEN OF PROOF.—The Secretary shall consider the petition in accordance with paragraph (5) and the burden shall be on the petitioner to show by a preponderance of the evidence that the rule received by the State under paragraph (3) should be withdrawn as a result of the amendment to the Federal standard.

“(C) WITHDRAWAL.—If the Secretary determines that the petitioner has shown that the rule issued by the Secretary under paragraph (3) should be withdrawn in accordance with subparagraph (B), the Secretary shall withdraw the rule.”

(b) CONFORMING AMENDMENTS.—

(1) Section 327 of the Energy Policy and Conservation Act (42 U.S.C. 6297) is amended—

(A) in subsection (b)—

(i) in paragraph (2), by striking “subsection (e)” and inserting “subsection (f)”; and

(ii) in paragraph (3)—

(I) by striking “subsection (f)(1)” and inserting “subsection (g)(1)”; and

(II) by striking “subsection (f)(2)” and inserting “subsection (g)(2)”; and

(B) in subsection (c)(3), by striking “subsection (f)(3)” and inserting “subsection (g)(3)”.
(2) Section 345(b)(2) of the Energy Policy and Conservation Act (42 U.S.C. 6316(b)(2)) is amended by adding at the end the following:

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

“(E) RELATIONSHIP TO CERTAIN STATE REGULATIONS.—Notwithstanding subparagraph (A), a standard prescribed or established under section 342(a) with respect to the equipment specified in subparagraphs (B), (C), (D), (H), (I), and (J) of section 340 shall not supersede a State regulation that is effective under the terms, conditions, criteria, procedures, and other requirements of section 327(e).”

ment, the Secretary shall publish a notice of the determination, together with an explanation of the reasons for the determination.

“(B) PUBLIC COMMENT.—The Secretary shall—

“(i) solicit public comment with respect to each direct final rule issued by the Secretary under subparagraph (A)(i); and

“(ii) publish a response to each comment so received.

“(C) WITHDRAWAL OF DIRECT FINAL RULES.—

“(i) IN GENERAL.—Not later than 120 days after the date on which a direct final rule issued under subparagraph (A)(i) is published in the Federal Register, the Secretary shall withdraw the direct final rule if—

“(I) the Secretary receives 1 or more adverse public comments relating to the direct final rule under subparagraph (B)(i); and

“(II) based on the complete rulemaking record relating to the direct final rule, the Secretary tentatively determines that the adverse public comments are relevant under subsection (o), section 342(a)(6)(B), or any other applicable law.

“(ii) ACTION ON WITHDRAWAL.—On withdrawal of a direct final rule under clause (i), the Secretary shall—

“(I) proceed with the notice of proposed rulemaking published simultaneously with the direct final rule as described in subparagraph (A)(i); and

“(II) publish in the Federal Register the reasons why the direct final rule was withdrawn.

“(iii) TREATMENT OF WITHDRAWN DIRECT FINAL RULES.—A direct final rule that is withdrawn under clause (i) shall not be considered to be a final rule for purposes of subsection (o).

“(D) EFFECT OF PARAGRAPH.—Nothing in this paragraph authorizes the Secretary to issue a direct final rule based solely on receipt of more than 1 statement containing recommended standards relating to the direct final rule.”

(b) CONFORMING AMENDMENT.—Section 345(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6316(b)(1)) is amended in the first sentence by inserting “section 325(p)(5),” after “The provisions of”.

SEC. 225. PERIODIC REVIEWS.

(a) TEST PROCEDURES.—Section 323(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6293(b)(1)) is amended by striking “(1)” and all that follows through the end of the paragraph and inserting the following:

“(1) TEST PROCEDURES.—

“(A) AMENDMENT.—At least once every 7 years, the Secretary shall review test procedures for all covered products and—

“(i) amend test procedures with respect to any covered product, if the Secretary determines that amended test procedures would more accurately or fully comply with the requirements of paragraph (3); or

“(ii) publish notice in the Federal Register of any determination not to amend a test procedure.”

(b) ENERGY CONSERVATION STANDARDS.—Section 325(m) of the Energy Policy and Conservation Act (42 U.S.C. 6295(m)) is amended—

(1) by designating the first and second sentences as paragraphs (1) and (4), respectively;

(2) by striking paragraph (1) (as so designated) and inserting the following:

“(1) IN GENERAL.—After issuance of the last final rules required for a product under this part, the Secretary shall, not later than 5 years after the date of issuance of a final rule establishing or amending a standard or determining not to amend a standard, publish a final rule to determine whether standards for the product should or should not be amended based on the criteria in subsection (n)(2).

“(2) ANALYSIS.—Prior to publication of the determination, the Secretary shall publish a notice of availability describing the analysis of the Department and provide opportunity for written comment.

“(3) FINAL RULE.—Not later than 3 years after a positive determination under paragraph (1),

the Secretary shall publish a final rule amending the standard for the product.”; and

(3) in paragraph (4) (as so designated), by striking “(4) An” and inserting the following:

“(4) APPLICATION OF AMENDMENT.—An”.

(c) STANDARDS.—Section 342(a)(6) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)(6)) is amended by striking “(6)(A)(i)” and all that follows through the end of subparagraph (A) and inserting the following:

“(6) AMENDED ENERGY EFFICIENCY STANDARDS.—

“(A) IN GENERAL.—

“(i) ANALYSIS OF POTENTIAL ENERGY SAVINGS.—If ASHRAE/IES Standard 90.1 is amended with respect to any small commercial package air conditioning and heating equipment, large commercial package air conditioning and heating equipment, very large commercial package air conditioning and heating equipment, packaged terminal air conditioners, packaged terminal heat pumps, warm-air furnaces, packaged boilers, storage water heaters, instantaneous water heaters, or unfired hot water storage tanks, not later than 180 days after the amendment of the standard, the Secretary shall publish in the Federal Register for public comment an analysis of the energy savings potential of amended energy efficiency standards.

“(ii) AMENDED UNIFORM NATIONAL STANDARD FOR PRODUCTS.—

“(I) IN GENERAL.—Except as provided in subclause (II), not later than 18 months after the date of publication of the amendment to the ASHRAE/IES Standard 90.1 for a product described in clause (i), the Secretary shall establish an amended uniform national standard for the product at the minimum level specified in the amended ASHRAE/IES Standard 90.1.

“(II) MORE STRINGENT STANDARD.—Subclause (I) shall not apply if the Secretary determines, by rule published in the Federal Register, and supported by clear and convincing evidence, that adoption of a uniform national standard more stringent than the amended ASHRAE/IES Standard 90.1 for the product would result in significant additional conservation of energy and is technologically feasible and economically justified.

“(iii) RULE.—If the Secretary makes a determination described in clause (ii)(I) for a product described in clause (i), not later than 30 months after the date of publication of the amendment to the ASHRAE/IES Standard 90.1 for the product, the Secretary shall issue the rule establishing the amended standard.”.

(d) TEST PROCEDURES.—Section 343(a) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)) is amended by striking “(a)” and all that follows through the end of paragraph (1) and inserting the following:

“(a) PRESCRIPTION BY SECRETARY; REQUIREMENTS.—

“(I) TEST PROCEDURES.—

“(A) AMENDMENT.—At least once every 7 years, the Secretary shall conduct an evaluation of each class of covered equipment and—

“(i) if the Secretary determines that amended test procedures would more accurately or fully comply with the requirements of paragraphs (2) and (3), shall prescribe test procedures for the class in accordance with this section; or

“(ii) shall publish notice in the Federal Register of any determination not to amend a test procedure.”.

(e) EFFECTIVE DATE.—The amendments made by subsections (b) and (c) take effect on January 1, 2012.

SEC. 226. ENERGY EFFICIENCY LABELING FOR CONSUMER ELECTRONIC PRODUCTS.

(a) IN GENERAL.—Section 324(a) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)) is amended—

(1) in paragraph (2), by adding at the end the following:

“(H) LABELING REQUIREMENTS.—

“(i) IN GENERAL.—Subject to clauses (ii) through (iv), not later than 18 months after the

date of issuance of applicable Department of Energy testing procedures, the Commission, in consultation with the Secretary and the Administrator of the Environmental Protection Agency (acting through the Energy Star program), shall, by regulation, promulgate labeling or other disclosure requirements for the energy use of—

“(I) televisions;

“(II) personal computers;

“(III) cable or satellite set-top boxes;

“(IV) stand-alone digital video recorder boxes; and

“(V) personal computer monitors.

“(ii) ALTERNATE TESTING PROCEDURES.—In the absence of applicable testing procedures described in clause (i) for products described in subclauses (I) through (V) of that clause, the Commission may by regulation promulgate labeling requirements for a consumer product category described in clause (i) if the Commission—

“(I) identifies adequate non-Department of Energy testing procedures for those products; and

“(II) determines that labeling of those products is likely to assist consumers in making purchasing decisions.

“(iii) DEADLINE AND REQUIREMENTS FOR LABELING.—

“(I) DEADLINE.—Not later than 18 months after the date of promulgation of any requirements under clause (i) or (ii), the Commission shall require labeling of electronic products described in clause (i).

“(II) REQUIREMENTS.—The requirements promulgated under clause (i) or (ii) may include specific requirements for each electronic product to be labeled with respect to the placement, size, and content of Energy Guide labels.

“(iv) DETERMINATION OF FEASIBILITY.—Clause (i) or (ii) shall not apply in any case in which the Commission determines that labeling in accordance with this subsection—

“(I) is not technologically or economically feasible; or

“(II) is not likely to assist consumers in making purchasing decisions.”; and

(2) by adding at the end the following:

“(6) AUTHORITY TO INCLUDE ADDITIONAL PRODUCT CATEGORIES.—The Commission may require labeling in accordance with this subsection for any consumer product not specified in this subsection or section 322 if the Commission determines that labeling for the product is likely to assist consumers in making purchasing decisions.”.

(b) CONTENT OF LABEL.—Section 324(c) of the Energy Policy and Conservation Act (42 U.S.C. 6294(c)) is amended by adding at the end the following:

“(9) DISCRETIONARY APPLICATION.—The Commission may apply paragraphs (1), (2), (3), (5), and (6) of this subsection to the labeling of any product covered by paragraph (2)(H) or (6) of subsection (a).”.

SEC. 227. RESIDENTIAL BOILER EFFICIENCY STANDARDS.

Section 325(f) of the Energy Policy and Conservation Act (42 U.S.C. 6295(f)) is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2) the following:

“(3) BOILERS.—

“(A) IN GENERAL.—Subject to subparagraphs (B) and (C), boilers manufactured on or after September 1, 2012, shall meet the following requirements:

Boiler Type	Minimum Annual Fuel Utilization Efficiency	Design Requirements
Gas Hot Water	82%	No Constant Burning Pilot, Automatic Means for Adjusting Water Temperature
Gas Steam	80%	No Constant Burning Pilot
Oil Hot Water	84%	Automatic Means for Adjusting Temperature
Oil Steam	82%	None
Electric Hot Water	None	Automatic Means for Adjusting Temperature
Electric Steam	None	None

“(B) PILOTS.—The manufacturer shall not equip gas hot water or steam boilers with constant-burning pilot lights.

“(C) AUTOMATIC MEANS FOR ADJUSTING WATER TEMPERATURE.—

“(i) IN GENERAL.—The manufacturer shall equip each gas, oil, and electric hot water boiler (other than a boiler equipped with tankless domestic water heating coils) with an automatic means for adjusting the temperature of the water supplied by the boiler to ensure that an incremental change in inferred heat load produces a corresponding incremental change in the temperature of water supplied.

“(ii) CERTAIN BOILERS.—For a boiler that fires at 1 input rate, the requirements of this subparagraph may be satisfied by providing an automatic means that allows the burner or heating element to fire only when the means has determined that the inferred heat load cannot be met by the residual heat of the water in the system.

“(iii) NO INFERRED HEAT LOAD.—When there is no inferred heat load with respect to a hot water boiler, the automatic means described in clauses (i) and (ii) shall limit the temperature of the water in the boiler to not more than 140 degrees Fahrenheit.

“(iv) OPERATION.—A boiler described in clause (i) or (ii) shall be operable only when the automatic means described in clauses (i), (ii), and (iii) is installed.”.

SEC. 228. TECHNICAL CORRECTIONS.

(a) DEFINITION OF FLUORESCENT LAMP.—Section 321(30)(B)(viii) of the Energy Policy and Conservation Act (42 U.S.C. 6291(30)(B)(viii)) is amended by striking “82” and inserting “87”.

(b) STANDARDS FOR COMMERCIAL PACKAGE AIR CONDITIONING AND HEATING EQUIPMENT.—Section 342(a)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)(1)) is amended in the matter preceding subparagraph (A) by striking “but before January 1, 2010.”.

(c) MERCURY VAPOR LAMP BALLASTS.—

(1) DEFINITIONS.—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) (as amended by section 212(a)(2)) is amended—

(A) in paragraph (46)(A)—

(i) in clause (i), by striking “bulb” and inserting “the arc tube”; and

(ii) in clause (ii), by striking “has a bulb” and inserting “wall loading is”;

(B) in paragraph (47)(A), by striking “operating at a partial” and inserting “typically operating at a partial vapor”;

(C) in paragraph (48), by inserting “intended for general illumination” after “lamps”; and

(D) by adding at the end the following:
 “(56) The term ‘specialty application mercury vapor lamp ballast’ means a mercury vapor lamp ballast that—

“(A) is designed and marketed for medical use, optical comparators, quality inspection, industrial processing, or scientific use, including fluorescent microscopy, ultraviolet curing, and the manufacture of microchips, liquid crystal displays, and printed circuit boards; and

“(B) in the case of a specialty application mercury vapor lamp ballast, is labeled as a specialty application mercury vapor lamp ballast.”.

(2) STANDARD SETTING AUTHORITY.—Section 325(ee) of the Energy Policy and Conservation Act (42 U.S.C. 6295(ee)) is amended by inserting “(other than specialty application mercury vapor lamp ballasts)” after “ballasts”.

SEC. 229. ELECTRIC MOTOR EFFICIENCY STANDARDS.

(a) DEFINITIONS.—Section 340(13) of the Energy Policy and Conservation Act (42 U.S.C. 6311(13)) is amended by striking subparagraph (A) and inserting the following:

“(A)(i) The term ‘electric motor’ means—
 “(I) a general purpose electric motor—subtype I; and

“(II) a general purpose electric motor—subtype II.

“(ii) The term ‘general purpose electric motor—subtype I’ means any motor that is considered a general purpose motor under section 431.12 of title 10, Code of Federal Regulations (or successor regulations).

“(iii) The term ‘general purpose electric motor—subtype II’ means a motor that, in addition to the design elements for a general purpose electric motor—subtype I, incorporates the design elements (as established in National Electrical Manufacturers Association MG-1 (2006)) for any of the following:

“(I) A U-Frame Motor.

“(II) A Design C Motor.

“(III) A close-coupled pump motor.

“(IV) A footless motor.

“(V) A vertical solid shaft normal thrust (tested in a horizontal configuration).

“(VI) An 8-pole motor.

“(VII) A poly-phase motor with voltage of not more than 600 volts (other than 230 or 460 volts).”.

(b) STANDARDS.—Section 342(b) of the Energy Policy and Conservation Act (42 U.S.C. 6313(13)) is amended by striking paragraph (1) and inserting the following:

“(1) STANDARDS.—

“(A) GENERAL PURPOSE ELECTRIC MOTORS—SUBTYPE I.—

“(i) IN GENERAL.—Except as otherwise provided in this subparagraph, a general purpose electric motor—subtype I with a power rating of not less than 1, and not more than 200, horsepower manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of this subparagraph, shall have a nominal full load efficiency established in Table 12–12 of National Electrical Manufacturers Association (referred to in this paragraph as ‘NEMA’) MG-1 (2006).

“(ii) FIRE PUMP MOTORS.—A fire pump motor shall have a nominal full load efficiency established in Table 12–11 of NEMA MG-1 (2006).

“(B) GENERAL PURPOSE ELECTRIC MOTORS—SUBTYPE II.—A general purpose electric motor—subtype II with a power rating of not less than 1, and not more than 200, horsepower manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of this subparagraph, shall have a nominal full load efficiency established in Table 12–11 of NEMA MG-1 (2006).

“(C) DESIGN B, GENERAL PURPOSE ELECTRIC MOTORS.—A NEMA Design B, general purpose electric motor with a power rating of not less than 201, and not more than 500, horsepower manufactured (alone or as a component of another piece of equipment) after the 3-year period

beginning on the date of the enactment of this subparagraph shall have a nominal full load efficiency established in Table 12–11 of NEMA MG-1 (2006).”.

(c) EFFECTIVE DATE.—The amendments made by this section take effect on the date that is 3 years after the date of enactment of this Act.

SEC. 230. ENERGY STANDARDS FOR HOME APPLIANCES.

(a) DEFINITION OF ENERGY CONSERVATION STANDARD.—Section 321(6)(A) of the Energy Policy and Conservation Act (42 U.S.C. 6291(6)(A)) is amended by striking “or, in the case of” and inserting “and, in the case of residential clothes washers, residential dishwashers.”.

(b) REFRIGERATORS, REFRIGERATOR-FREEZERS, AND FREEZERS.—Section 325(b) of the Energy Policy and Conservation Act (42 U.S.C. 6295(b)) is amended by adding at the end the following:

“(4) REFRIGERATORS, REFRIGERATOR-FREEZERS, AND FREEZERS MANUFACTURED ON OR AFTER JANUARY 1, 2014.—Not later than December 31, 2010, the Secretary shall publish a final rule determining whether to amend the standards in effect for refrigerators, refrigerator-freezers, and freezers manufactured on or after January 1, 2014, and including any amended standards.”.

(c) RESIDENTIAL CLOTHES WASHERS AND DISHWASHERS.—Section 325(g)(4) of the Energy Policy and Conservation Act (42 U.S.C. 6295(g)(4)) is amended by adding at the end the following:

“(D) CLOTHES WASHERS.—

“(i) CLOTHES WASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2011.—A residential clothes washer manufactured on or after January 1, 2011, shall have—

“(I) a modified energy factor of at least 1.26; and

“(II) a water factor of not more than 9.5.

“(ii) CLOTHES WASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2015.—Not later than January 1, 2015, the Secretary shall publish a final rule determining whether to amend the standards in effect for residential clothes washers manufactured on or after January 1, 2015, and including any amended standards.

“(E) DISHWASHERS.—

“(i) DISHWASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2010.—A dishwasher manufactured on or after January 1, 2010, shall use not more than—

“(I) in the case of a standard-size dishwasher, 355 kWh per year or 6.5 gallons of water per cycle; and

“(II) in the case of a compact-size dishwasher, 260 kWh per year or 4.5 gallons of water per cycle.

“(ii) DISHWASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2018.—Not later than January 1, 2015, the Secretary shall publish a final rule determining whether to amend the standards for dishwashers manufactured on or after January 1, 2018, and including any amended standards.”.

(d) DEHUMIDIFIERS.—Section 325(cc) of the Energy Policy and Conservation Act (42 U.S.C. 6295(cc)) is amended—

(1) in paragraph (1), by inserting “and before October 1, 2012,” after “2007,”; and

(2) by striking paragraph (2) and inserting the following:

“(2) DEHUMIDIFIERS MANUFACTURED ON OR AFTER OCTOBER 1, 2012.—Dehumidifiers manufactured on or after October 1, 2012, shall have an Energy Factor that meets or exceeds the following values:

Product Capacity (pints/day):	Minimum Energy Factor liters/kWh
Up to 35.00	1.35
35.01–45.00	1.50
45.01–54.00	1.60
54.01–75.00	1.70
Greater than 75.00	2.5.”.

(e) ENERGY STAR PROGRAM.—Section 324A(d)(2) of the Energy Policy and Conservation Act (42 U.S.C. 6294A(d)(2)) is amended by striking “2010” and inserting “2009”.

SEC. 231. IMPROVED ENERGY EFFICIENCY FOR APPLIANCES AND BUILDINGS IN COLD CLIMATES.

(a) RESEARCH.—Section 911(a)(2) of the Energy Policy Act of 2005 (42 U.S.C. 16191(a)(2)) is amended—

(1) in subparagraph (C), by striking “and” at the end;

(2) in subparagraph (D), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following:
 “(E) technologies to improve the energy efficiency of appliances and mechanical systems for buildings in cold climates, including combined heat and power units and increased use of renewable resources, including fuel.”.

(b) REBATES.—Section 124 of the Energy Policy Act of 2005 (42 U.S.C. 15821) is amended—

(1) in subsection (b)(1), by inserting “, or products with improved energy efficiency in cold climates,” after “residential Energy Star products”; and

(2) in subsection (e), by inserting “or product with improved energy efficiency in a cold climate” after “residential Energy Star product” each place it appears.

SEC. 232. DEPLOYMENT OF NEW TECHNOLOGIES FOR HIGH-EFFICIENCY CONSUMER PRODUCTS.

(a) DEFINITIONS.—In this section:

(1) ENERGY SAVINGS.—The term “energy savings” means megawatt-hours of electricity or million British thermal units of natural gas saved by a product, in comparison to projected energy consumption under the energy efficiency standard applicable to the product.

(2) HIGH-EFFICIENCY CONSUMER PRODUCT.—The term “high-efficiency consumer product” means a product that exceeds the energy efficiency of comparable products available in the market by a percentage determined by the Secretary to be an appropriate benchmark for the consumer product category competing for an award under this section.

(b) FINANCIAL INCENTIVES PROGRAM.—Effective beginning October 1, 2007, the Secretary shall competitively award financial incentives under this section for the manufacture of high-efficiency consumer products.

(c) REQUIREMENTS.—

(1) IN GENERAL.—The Secretary shall make awards under this section to manufacturers of high-efficiency consumer products, based on the bid of each manufacturer in terms of dollars per megawatt-hour or million British thermal units saved.

(2) ACCEPTANCE OF BIDS.—In making awards under this section, the Secretary shall—

(A) solicit bids for reverse auction from appropriate manufacturers, as determined by the Secretary; and

(B) award financial incentives to the manufacturers that submit the lowest bids that meet the requirements established by the Secretary.

(d) FORMS OF AWARDS.—An award for a high-efficiency consumer product under this section shall be in the form of a lump sum payment in an amount equal to the product obtained by multiplying—

(1) the amount of the bid by the manufacturer of the high-efficiency consumer product; and

(2) the energy savings during the projected useful life of the high-efficiency consumer product, not to exceed 10 years, as determined under regulations issued by the Secretary.

SEC. 233. INDUSTRIAL EFFICIENCY PROGRAM.

(a) DEFINITIONS.—In this section:

(1) ELIGIBLE ENTITY.—The term eligible entity means—

(A) an institution of higher education under contract or in partnership with a nonprofit or for-profit private entity acting on behalf of an industrial or commercial sector or subsector;

(B) a nonprofit or for-profit private entity acting on behalf of an industrial or commercial sector or subsector; or

(C) a consortia of entities acting on behalf of an industrial or commercial sector or subsector.

(2) **ENERGY-INTENSIVE COMMERCIAL APPLICATIONS.**—The term “energy-intensive commercial applications” means processes and facilities that use significant quantities of energy as part of the primary economic activities of the processes and facilities, including—

(A) information technology data centers;

(B) product manufacturing; and

(C) food processing.

(3) **FEEDSTOCK.**—The term “feedstock” means the raw material supplied for use in manufacturing, chemical, and biological processes.

(4) **MATERIALS MANUFACTURERS.**—The term “materials manufacturers” means the energy-intensive primary manufacturing industries, including the aluminum, chemicals, forest and paper products, glass, metal casting, and steel industries.

(5) **PARTNERSHIP.**—The term “partnership” means an energy efficiency and utilization partnership established under subsection (c)(1)(A).

(6) **PROGRAM.**—The term “program” means the industrial efficiency program established under subsection (b).

(b) **ESTABLISHMENT OF PROGRAM.**—The Secretary shall establish a program under which the Secretary, in cooperation with materials manufacturers, companies engaged in energy-intensive commercial applications, and national industry trade associations representing the manufactures and companies, shall support, develop, and promote the use of new materials manufacturing and industrial and commercial processes, technologies, and techniques to optimize energy efficiency and the economic competitiveness of the United States.

(c) **PARTNERSHIPS.**—

(1) **IN GENERAL.**—As part of the program, the Secretary shall—

(A) establish energy efficiency and utilization partnerships between the Secretary and eligible entities to conduct research on, develop, and demonstrate new processes, technologies, and operating practices and techniques to significantly improve energy efficiency and utilization by materials manufacturers and in energy-intensive commercial applications, including the conduct of activities to—

(i) increase the energy efficiency of industrial and commercial processes and facilities in energy-intensive commercial application sectors;

(ii) research, develop, and demonstrate advanced technologies capable of energy intensity reductions and increased environmental performance in energy-intensive commercial application sectors; and

(iii) promote the use of the processes, technologies, and techniques described in clauses (i) and (ii); and

(B) pay the Federal share of the cost of any eligible partnership activities for which a proposal has been submitted and approved in accordance with paragraph (3)(B).

(2) **ELIGIBLE ACTIVITIES.**—Partnership activities eligible for financial assistance under this subsection include—

(A) feedstock and recycling research, development, and demonstration activities to identify and promote—

(i) opportunities for meeting manufacturing feedstock requirements with more energy efficient and flexible sources of feedstock or energy supply;

(ii) strategies to develop and deploy technologies that improve the quality and quantity of feedstocks recovered from process and waste streams; and

(iii) other methods using recycling, reuse, and improved industrial materials;

(B) industrial and commercial energy efficiency and sustainability assessments to—

(i) assist individual industrial and commercial sectors in developing tools, techniques, and methodologies to assess—

(1) the unique processes and facilities of the sectors;

(II) the energy utilization requirements of the sectors; and

(III) the application of new, more energy efficient technologies; and

(ii) conduct energy savings assessments;

(C) the incorporation of technologies and innovations that would significantly improve the energy efficiency and utilization of energy-intensive commercial applications; and

(D) any other activities that the Secretary determines to be appropriate.

(3) **PROPOSALS.**—

(A) **IN GENERAL.**—To be eligible for financial assistance under this subsection, a partnership shall submit to the Secretary a proposal that describes the proposed research, development, or demonstration activity to be conducted by the partnership.

(B) **REVIEW.**—After reviewing the scientific, technical, and commercial merit of a proposals submitted under subparagraph (A), the Secretary shall approve or disapprove the proposal.

(C) **COMPETITIVE AWARDS.**—The provision of financial assistance under this subsection shall be on a competitive basis.

(4) **COST-SHARING REQUIREMENT.**—In carrying out this section, the Secretary shall require cost sharing in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(d) **AUTHORIZATION OF APPROPRIATIONS.**—

(1) **IN GENERAL.**—There are authorized to be appropriated to the Secretary to carry out this section—

(A) \$184,000,000 for fiscal year 2008;

(B) \$190,000,000 for fiscal year 2009;

(C) \$196,000,000 for fiscal year 2010;

(D) \$202,000,000 for fiscal year 2011;

(E) \$208,000,000 for fiscal year 2012; and

(F) such sums as are necessary for fiscal year 2013 and each fiscal year thereafter.

(2) **PARTNERSHIP ACTIVITIES.**—Of the amounts made available under paragraph (1), not less than 50 percent shall be used to pay the Federal share of partnership activities under subsection (c).

Subtitle C—Promoting High Efficiency Vehicles, Advanced Batteries, and Energy Storage

SEC. 241. LIGHTWEIGHT MATERIALS RESEARCH AND DEVELOPMENT.

(a) **IN GENERAL.**—As soon as practicable after the date of enactment of this Act, the Secretary shall establish a research and development program to determine ways in which—

(1) the weight of vehicles may be reduced to improve fuel efficiency without compromising passenger safety; and

(2) the cost of lightweight materials (such as steel alloys, fiberglass, and carbon composites) required for the construction of lighter-weight vehicles may be reduced.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section \$60,000,000 for each of fiscal years 2007 through 2012.

SEC. 242. LOAN GUARANTEES FOR FUEL-EFFICIENT AUTOMOBILE PARTS MANUFACTURERS.

(a) **IN GENERAL.**—Section 712(a) of the Energy Policy Act of 2005 (42 U.S.C. 16062(a)) is amended in the second sentence by striking “grants to automobile manufacturers” and inserting “grants and loan guarantees under section 1703 to automobile manufacturers and suppliers”.

(b) **CONFORMING AMENDMENT.**—Section 1703(b) of the Energy Policy Act of 2005 (42 U.S.C. 16513(b)) is amended by striking paragraph (8) and inserting the following:

“(8) Production facilities for the manufacture of fuel efficient vehicles or parts of those vehicles, including electric drive vehicles and advanced diesel vehicles.”.

SEC. 243. ADVANCED TECHNOLOGY VEHICLES MANUFACTURING INCENTIVE PROGRAM.

(a) **DEFINITIONS.**—In this section:

(1) **ADJUSTED AVERAGE FUEL ECONOMY.**—The term “adjusted average fuel economy” means the average fuel economy of a manufacturer for all light duty vehicles produced by the manufacturer, adjusted such that the fuel economy of each vehicle that qualifies for an award shall be considered to be equal to the average fuel economy for vehicles of a similar footprint for model year 2005.

(2) **ADVANCED TECHNOLOGY VEHICLE.**—The term “advanced technology vehicle” means a light duty vehicle that meets—

(A) the Bin 5 Tier II emission standard established in regulations issued by the Administrator of the Environmental Protection Agency under section 202(i) of the Clean Air Act (42 U.S.C. 7521(i)), or a lower-numbered Bin emission standard;

(B) any new emission standard for fine particulate matter prescribed by the Administrator under that Act (42 U.S.C. 7401 et seq.); and

(C) at least 125 percent of the average base year combined fuel economy, calculated on an energy-equivalent basis, for vehicles of a substantially similar footprint.

(3) **COMBINED FUEL ECONOMY.**—The term “combined fuel economy” means—

(A) the combined city/highway miles per gallon values, as reported in accordance with section 32908 of title 49, United States Code; and

(B) in the case of an electric drive vehicle with the ability to recharge from an off-board source, the reported mileage, as determined in a manner consistent with the Society of Automotive Engineers recommended practice for that configuration or a similar practice recommended by the Secretary, using a petroleum equivalence factor for the off-board electricity (as defined in section 474 of title 10, Code of Federal Regulations).

(4) **ENGINEERING INTEGRATION COSTS.**—The term “engineering integration costs” includes the cost of engineering tasks relating to—

(A) incorporating qualifying components into the design of advanced technology vehicles; and

(B) designing new tooling and equipment and developing new manufacturing processes and material suppliers for production facilities that produce qualifying components or advanced technology vehicles.

(5) **QUALIFYING COMPONENTS.**—The term “qualifying components” means components that the Secretary determines to be—

(A) specially designed for advanced technology vehicles; and

(B) installed for the purpose of meeting the performance requirements of advanced technology vehicles.

(b) **ADVANCED VEHICLES MANUFACTURING FACILITY.**—The Secretary shall provide facility funding awards under this section to automobile manufacturers and component suppliers to pay not more than 30 percent of the cost of—

(1) reequipping, expanding, or establishing a manufacturing facility in the United States to produce—

(A) qualifying advanced technology vehicles; or

(B) qualifying components; and

(2) engineering integration performed in the United States of qualifying vehicles and qualifying components.

(c) **PERIOD OF AVAILABILITY.**—An award under subsection (b) shall apply to—

(1) facilities and equipment placed in service before December 30, 2017; and

(2) engineering integration costs incurred during the period beginning on the date of enactment of this Act and ending on December 30, 2017.

(d) **IMPROVEMENT.**—The Secretary shall issue regulations that require that, in order for an automobile manufacturer to be eligible for an award under this section during a particular year, the adjusted average fuel economy of the manufacturer for light duty vehicles produced by the manufacturer during the most recent year for which data are available shall be not

less than the average fuel economy for all light duty vehicles of the manufacturer for model year 2005.

(e) SET ASIDE FOR SMALL AUTOMOBILE MANUFACTURERS AND COMPONENT SUPPLIERS.—

(1) DEFINITION OF COVERED FIRM.—In this subsection, the term “covered firm” means a firm that—

(A) employs less than 500 individuals; and
(B) manufactures automobiles or components of automobiles.

(2) SET ASIDE.—Of the amount of funds that are used to provide awards for each fiscal year under this section, the Secretary shall use not less than 30 percent of the amount to provide awards to covered firms or consortia led by a covered firm.

SEC. 244. ENERGY STORAGE COMPETITIVENESS.

(a) SHORT TITLE.—This section may be cited as the “United States Energy Storage Competitiveness Act of 2007”.

(b) ENERGY STORAGE SYSTEMS FOR MOTOR TRANSPORTATION AND ELECTRICITY TRANSMISSION AND DISTRIBUTION.—

(1) DEFINITIONS.—In this subsection:

(A) COUNCIL.—The term “Council” means the Energy Storage Advisory Council established under paragraph (3).

(B) COMPRESSED AIR ENERGY STORAGE.—The term “compressed air energy storage” means, in the case of an electricity grid application, the storage of energy through the compression of air.

(C) DEPARTMENT.—The term “Department” means the Department of Energy.

(D) FLYWHEEL.—The term “flywheel” means, in the case of an electricity grid application, a device used to store rotational kinetic energy.

(E) ULTRACAPACITOR.—The term “ultracapacitor” means an energy storage device that has a power density comparable to conventional capacitors but capable of exceeding the energy density of conventional capacitors by several orders of magnitude.

(2) PROGRAM.—The Secretary shall carry out a research, development, and demonstration program to support the ability of the United States to remain globally competitive in energy storage systems for motor transportation and electricity transmission and distribution.

(3) ENERGY STORAGE ADVISORY COUNCIL.—

(A) ESTABLISHMENT.—Not later than 90 days after the date of enactment of this Act, the Secretary shall establish an Energy Storage Advisory Council.

(B) COMPOSITION.—

(i) IN GENERAL.—Subject to clause (ii), the Council shall consist of not less than 15 individuals appointed by the Secretary, based on recommendations of the National Academy of Sciences.

(ii) ENERGY STORAGE INDUSTRY.—The Council shall consist primarily of representatives of the energy storage industry of the United States.

(iii) CHAIRPERSON.—The Secretary shall select a Chairperson for the Council from among the members appointed under clause (i).

(C) MEETINGS.—

(i) IN GENERAL.—The Council shall meet not less than once a year.

(ii) FEDERAL ADVISORY COMMITTEE ACT.—The Federal Advisory Committee Act (5 U.S.C. App. 2) shall apply to a meeting of the Council.

(D) PLANS.—No later than 1 year after the date of enactment of this Act, in conjunction with the Secretary, the Council shall develop 5-year plans for integrating basic and applied research so that the United States retains a globally competitive domestic energy storage industry for motor transportation and electricity transmission and distribution.

(E) REVIEW.—The Council shall—

(i) assess the performance of the Department in meeting the goals of the plans developed under subparagraph (D); and

(ii) make specific recommendations to the Secretary on programs or activities that should be established or terminated to meet those goals.

(4) BASIC RESEARCH PROGRAM.—

(A) BASIC RESEARCH.—The Secretary shall conduct a basic research program on energy storage systems to support motor transportation and electricity transmission and distribution, including—

- (i) materials design;
- (ii) materials synthesis and characterization;
- (iii) electrode-active materials, including electrolytes and bioelectrolytes;
- (iv) surface and interface dynamics;
- (v) modeling and simulation; and
- (vi) thermal behavior and life degradation mechanisms; and
- (vii) thermal behavior and life degradation mechanisms.

(B) NANOSCIENCE CENTERS.—The Secretary, in cooperation with the Council, shall coordinate the activities of the nanoscience centers of the Department to help the nanoscience centers of the Department maintain a globally competitive posture in energy storage systems for motor transportation and electricity transmission and distribution.

(5) APPLIED RESEARCH PROGRAM.—The Secretary shall conduct an applied research program on energy storage systems to support motor transportation and electricity transmission and distribution technologies, including—

- (A) ultracapacitors;
- (B) flywheels;
- (C) batteries and battery systems (including flow batteries);
- (D) compressed air energy systems;
- (E) power conditioning electronics;
- (F) manufacturing technologies for energy storage systems; and
- (G) thermal management systems.

(6) ENERGY STORAGE RESEARCH CENTERS.—

(A) IN GENERAL.—The Secretary shall establish, through competitive bids, not more than 4 energy storage research centers to translate basic research into applied technologies to advance the capability of the United States to maintain a globally competitive posture in energy storage systems for motor transportation and electricity transmission and distribution.

(B) PROGRAM MANAGEMENT.—The centers shall be jointly managed by the Under Secretary for Science of the Department.

(C) PARTICIPATION AGREEMENTS.—As a condition of participating in a center, a participant shall enter into a participation agreement with the center that requires that activities conducted by the participant for the center promote the goal of enabling the United States to compete successfully in global energy storage markets.

(D) PLANS.—A center shall conduct activities that promote the achievement of the goals of the plans of the Council under paragraph (3)(D).

(E) COST SHARING.—In carrying out this paragraph, the Secretary shall require cost-sharing in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(F) NATIONAL LABORATORIES.—A national laboratory (as defined in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801)) may participate in a center established under this paragraph, including a cooperative research and development agreement (as defined in section 12(d) of the Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3710a(d))).

(7) DISCLOSURE.—Section 623 of the Energy Policy Act of 1992 (42 U.S.C. 13293) may apply to any project carried out through a grant, contract, or cooperative agreement under this section.

(8) INTELLECTUAL PROPERTY.—In accordance with section 202(a)(ii) of title 35, United States Code, section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182), and section 9 of the Federal Nonnuclear Research and Development Act of 1974 (42 U.S.C. 5908), the Secretary may require, for any new invention developed under paragraph (6)—

(A) that any industrial participant that is active in a Energy Storage Research Center estab-

lished under paragraph (6) related to the advancement of energy storage technologies carried out, in whole or in part, with Federal funding, be granted the first option to negotiate with the invention owner, at least in the field of energy storage technologies, nonexclusive licenses and royalties on terms that are reasonable, as determined by the Secretary;

(B) that, during a 2-year period beginning on the date on which an invention is made, the patent holder shall not negotiate any license or royalty agreement with any entity that is not an industrial participant under paragraph (6);

(C) that, during the 2-year period described in subparagraph (B), the patent holder shall negotiate nonexclusive licenses and royalties in good faith with any interested industrial participant under paragraph (6); and

(D) such other terms as the Secretary determines to be necessary to promote the accelerated commercialization of inventions made under paragraph (6) to advance the capability of the United States to successfully compete in global energy storage markets.

(9) REVIEW BY NATIONAL ACADEMY OF SCIENCES.—Not later than 3 years after the date of enactment of this Act, the Secretary shall offer to enter into an arrangement with the National Academy of Sciences to assess the performance of the Department in carrying out this section.

(10) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out—

(A) the basic research program under paragraph (4) \$50,000,000 for each of fiscal years 2008 through 2017;

(B) the applied research program under paragraph (5) \$80,000,000 for each of fiscal years 2008 through 2017; and

(C) the energy storage research center program under paragraph (6) \$100,000,000 for each of fiscal years 2008 through 2017.

SEC. 245. ADVANCED TRANSPORTATION TECHNOLOGY PROGRAM.

(a) ELECTRIC DRIVE VEHICLE DEMONSTRATION PROGRAM.—

(1) DEFINITIONS.—In this subsection—

(A) BATTERY.—The term “battery” means an electrochemical energy storage device powered directly by electrical current.

(B) PLUG-IN ELECTRIC DRIVE VEHICLE.—The term “plug-in electric drive vehicle” means a precommercial vehicle that—

- (i) draws motive power from a battery with a capacity of at least 4 kilowatt-hours;
- (ii) can be recharged from an external source of electricity for motive power; and
- (iii) is a light-, medium-, or heavy-duty onroad or nonroad vehicle.

(2) PROGRAM.—The Secretary shall establish a competitive program to provide grants for demonstrations of plug-in electric drive vehicles.

(3) ELIGIBILITY.—

(A) IN GENERAL.—A State government, local government, metropolitan transportation authority, air pollution control district, private entity, and nonprofit entity shall be eligible to receive a grant under this subsection.

(B) CERTAIN APPLICANTS.—A battery manufacturer that proposes to supply to an applicant for a grant under this section a battery with a capacity of greater than 1 kilowatt-hour for use in a plug-in electric drive vehicle shall—

- (i) ensure that the applicant includes in the application a description of the price of the battery per kilowatt-hour;
- (ii) on approval by the Secretary of the application, publish, or permit the Secretary to publish, the price described in clause (i); and
- (iii) for any order received by the battery manufacturer for at least 1,000 batteries, offer the batteries at that price.

(4) PRIORITY.—In making grants under this subsection, the Secretary shall give priority to proposals that—

(A) are likely to contribute to the commercialization and production of plug-in electric drive vehicles in the United States; and

(B) reduce petroleum usage.

(5) SCOPE OF DEMONSTRATIONS.—The Secretary shall ensure, to the extent practicable, that the program established under this subsection includes a variety of applications, manufacturers, and end-uses.

(6) REPORTING.—The Secretary shall require a grant recipient under this subsection to submit to the Secretary, on an annual basis, data relating to vehicle, performance, life cycle costs, and emissions of vehicles demonstrated under the grant, including emissions of greenhouse gases.

(7) COST SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a grant made under this subsection.

(8) AUTHORIZATIONS OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this subsection \$60,000,000 for each of fiscal years 2008 through 2012, of which not less than \$20,000,000 shall be available each fiscal year only to make grants local and municipal governments.

(b) NEAR-TERM ELECTRIC DRIVE TRANSPORTATION DEPLOYMENT PROGRAM.—

(1) DEFINITION OF QUALIFIED ELECTRIC TRANSPORTATION PROJECT.—

(A) IN GENERAL.—In this subsection, the term “qualified electric transportation project” means a project that would simultaneously reduce emissions of criteria pollutants, greenhouse gas emissions, and petroleum usage by at least 40 percent as compared to commercially available, petroleum-based technologies.

(B) INCLUSIONS.—In this subsection, the term “qualified electric transportation project” includes a project relating to—

- (i) shipside or shoreside electrification for vessels;
- (ii) truck-stop electrification;
- (iii) electric truck refrigeration units;
- (iv) battery powered auxiliary power units for trucks;
- (v) electric airport ground support equipment;
- (vi) electric material and cargo handling equipment;
- (vii) electric or dual-mode electric freight rail;
- (viii) any distribution upgrades needed to supply electricity to the project; and
- (ix) any ancillary infrastructure, including panel upgrades, battery chargers, in-situ transformers, and trenching.

(2) ESTABLISHMENT.—Not later than 1 year after the date of enactment of this Act, the Secretary, in consultation with the Secretary of Transportation and the Administrator of the Environmental Protection Agency, shall establish a program to provide grants and loans to eligible entities for the conduct of qualified electric transportation projects.

(3) GRANTS.—

(A) IN GENERAL.—Of the amounts made available for grants under paragraph (2)—

(i) $\frac{2}{3}$ shall be made available by the Secretary on a competitive basis for qualified electric transportation projects based on the overall cost-effectiveness of a qualified electric transportation project in reducing emissions of criteria pollutants, emissions of greenhouse gases, and petroleum usage; and

(ii) $\frac{1}{3}$ shall be made available by the Secretary for qualified electric transportation projects in the order that the grant applications are received, if the qualified electric transportation projects meet the minimum standard for the reduction of emissions of criteria pollutants, emissions of greenhouse gases, and petroleum usage described in paragraph (1)(A).

(B) PRIORITY.—In providing grants under this paragraph, the Secretary shall give priority to large-scale projects and large-scale aggregators of projects.

(C) COST SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a grant made under this paragraph.

(4) REVOLVING LOAN PROGRAM.—

(A) IN GENERAL.—The Secretary shall establish a revolving loan program to provide loans to eligible entities for the conduct of qualified elec-

tric transportation projects under paragraph (2).

(B) CRITERIA.—The Secretary shall establish criteria for the provision of loans under this paragraph.

(C) FUNDING.—Of amounts made available to carry out this subsection, the Secretary shall use any amounts not used to provide grants under paragraph (3) to carry out the revolving loan program under this paragraph.

(c) MARKET ASSESSMENT PROGRAM.—The Administrator of the Environmental Protection Agency, in consultation with the Secretary and private industry, shall carry out a program—

(1) to inventory and analyze existing electric drive transportation technologies and hybrid technologies and markets; and

(2) to identify and implement methods of removing barriers for existing and emerging applications of electric drive transportation technologies and hybrid transportation technologies.

(d) ELECTRICITY USAGE PROGRAM.—

(1) IN GENERAL.—The Secretary, in consultation with the Administrator of the Environmental Protection Agency and private industry, shall carry out a program—

(A) to work with utilities to develop low-cost, simple methods of—

- (i) using off-peak electricity; or
- (ii) managing on-peak electricity use;

(B) to develop systems and processes—

(i) to enable plug-in electric vehicles to enhance the availability of emergency back-up power for consumers;

(ii) to study and demonstrate the potential value to the electric grid to use the energy stored in the on-board storage systems to improve the efficiency and reliability of the grid generation system; and

(iii) to work with utilities and other interested stakeholders to study and demonstrate the implications of the introduction of plug-in electric vehicles and other types of electric transportation on the production of electricity from renewable resources.

(2) OFF-PEAK ELECTRICITY USAGE GRANTS.—In carrying out the program under paragraph (1), the Secretary shall provide grants to assist eligible public and private electric utilities for the conduct of programs or activities to encourage owners of electric drive transportation technologies—

- (A) to use off-peak electricity; or
- (B) to have the load managed by the utility.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out subsections (b), (c), and (d) \$125,000,000 for each of fiscal years 2008 through 2013.

(f) ELECTRIC DRIVE TRANSPORTATION TECHNOLOGIES.—

(1) DEFINITIONS.—In this subsection:

(A) BATTERY.—The term “battery” means an electrochemical energy storage device powered directly by electrical current.

(B) ELECTRIC DRIVE TRANSPORTATION TECHNOLOGY.—The term “electric drive transportation technology” means—

(i) technology used in vehicles that use an electric motor for all or part of the motive power of the vehicles, including battery electric, hybrid electric, plug-in hybrid electric, fuel cell, and plug-in fuel cell vehicles, or rail transportation; or

(ii) equipment relating to transportation or mobile sources of air pollution that use an electric motor to replace an internal combustion engine for all or part of the work of the equipment, including—

- (I) corded electric equipment linked to transportation or mobile sources of air pollution; and
- (II) electrification technologies at airports, ports, truck stops, and material-handling facilities.

(C) ENERGY STORAGE DEVICE.—

(i) IN GENERAL.—The term “energy storage device” means the onboard device used in an on-road or nonroad vehicle to store energy, or a battery, ultracapacitor, compressed air energy

storage system, or flywheel used to store energy in a stationary application.

(ii) INCLUSIONS.—The term “energy storage device” includes—

(I) in the case of an electric or hybrid electric or fuel cell vehicle, a battery, ultracapacitor, or similar device; and

(II) in the case of a hybrid hydraulic vehicle, an accumulator or similar device.

(D) ENGINE DOMINANT HYBRID VEHICLE.—The term “engine dominant hybrid vehicle” means an on-road or nonroad vehicle that—

(i) is propelled by an internal combustion engine or heat engine using—

(I) any combustible fuel; and

(II) an on-board, rechargeable energy storage device; and

(ii) has no means of using an off-board source of energy.

(E) NONROAD VEHICLE.—The term “nonroad vehicle” means a vehicle—

(i) powered by—

(I) a nonroad engine, as that term is defined in section 216 of the Clean Air Act (42 U.S.C. 7550); or

(II) fully or partially by an electric motor powered by a fuel cell, a battery, or an off-board source of electricity; and

(ii) that is not a motor vehicle or a vehicle used solely for competition.

(F) PLUG-IN ELECTRIC DRIVE VEHICLE.—In this section, the term “plug-in electric drive vehicle” means a precommercial vehicle that—

- (i) draws motive power from a battery with a capacity of at least 4 kilowatt-hours;
- (ii) can be recharged from an external source of electricity for motive power; and
- (iii) is a light-, medium-, or heavy-duty onroad or nonroad vehicle.

(2) EVALUATION OF PLUG-IN ELECTRIC DRIVE TRANSPORTATION TECHNOLOGY BENEFITS.—

(A) IN GENERAL.—The Secretary, in cooperation with the Administrator of the Environmental Protection Agency, the heads of other appropriate Federal agencies, and appropriate interested stakeholders, shall evaluate and, as appropriate, modify existing test protocols for fuel economy and emissions to ensure that any protocols for electric drive transportation technologies, including plug-in electric drive vehicles, accurately measure the fuel economy and emissions performance of the electric drive transportation technologies.

(B) REQUIREMENTS.—Test protocols (including any modifications to test protocols) for electric drive transportation technologies under subparagraph (A) shall—

(i) be designed to assess the full potential of benefits in terms of reduction of emissions of criteria pollutants, reduction of energy use, and petroleum reduction; and

(ii) consider—

(I) the vehicle and fuel as a system, not just an engine;

(II) nightly off-board charging, as applicable; and

(III) different engine-turn on speed control strategies.

(3) PLUG-IN ELECTRIC DRIVE VEHICLE RESEARCH AND DEVELOPMENT.—The Secretary shall conduct an applied research program for plug-in electric drive vehicle technology and engine dominant hybrid vehicle technology, including—

(A) high-capacity, high-efficiency energy storage devices that, as compared to existing technologies that are in commercial service, have improved life, energy storage capacity, and power delivery capacity;

(B) high-efficiency on-board and off-board charging components;

(C) high-power and energy-efficient drivetrain systems for passenger and commercial vehicles and for nonroad vehicles;

(D) development and integration of control systems and power trains for plug-in electric vehicles, plug-in hybrid fuel cell vehicles, and engine dominant hybrid vehicles, including—

(i) development of efficient cooling systems;

(ii) analysis and development of control systems that minimize the emissions profile in cases in which clean diesel engines are part of a plug-in hybrid drive system; and

(iii) development of different control systems that optimize for different goals, including—

(I) prolonging energy storage device life;

(II) reduction of petroleum consumption; and

(III) reduction of greenhouse gas emissions;

(E) application of nanomaterial technology to energy storage devices and fuel cell systems; and

(F) use of smart vehicle and grid interconnection devices and software that enable communications between the grid of the future and electric drive transportation technology vehicles.

(4) EDUCATION PROGRAM.—

(A) IN GENERAL.—The Secretary shall develop a nationwide electric drive transportation technology education program under which the Secretary shall provide—

(i) teaching materials to secondary schools and high schools; and

(ii) assistance for programs relating to electric drive system and component engineering to institutions of higher education.

(B) ELECTRIC VEHICLE COMPETITION.—The program established under subparagraph (A) shall include a plug-in hybrid electric vehicle competition for institutions of higher education, which shall be known as the “Dr. Andrew Frank Plug-In Electric Vehicle Competition”.

(C) ENGINEERS.—In carrying out the program established under subparagraph (A), the Secretary shall provide financial assistance to institutions of higher education to create new, or support existing, degree programs to ensure the availability of trained electrical and mechanical engineers with the skills necessary for the advancement of—

(i) plug-in electric drive vehicles; and

(ii) other forms of electric drive transportation technology vehicles.

(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for each of fiscal years 2008 through 2013—

(A) to carry out paragraph (3) \$200,000,000; and

(B) to carry out paragraph (4) \$5,000,000.

(g) COLLABORATION AND MERIT REVIEW.—

(1) COLLABORATION WITH NATIONAL LABORATORIES.—To the maximum extent practicable, National Laboratories shall collaborate with the public, private, and academic sectors and with other National Laboratories in the design, conduct, and dissemination of the results of programs and activities authorized under this section.

(2) COLLABORATION WITH MOBILE ENERGY STORAGE PROGRAM.—To the maximum extent practicable, the Secretary shall seek to coordinate the stationary and mobile energy storage programs of the Department of the Energy with the programs and activities authorized under this section.

(3) MERIT REVIEW.—Notwithstanding section 989 of the Energy Policy Act of 2005 (42 U.S.C. 16353), of the amounts made available to carry out this section, not more than 30 percent shall be provided to National Laboratories.

SEC. 246. INCLUSION OF ELECTRIC DRIVE IN ENERGY POLICY ACT OF 1992.

Section 508 of the Energy Policy Act of 1992 (42 U.S.C. 13258) is amended—

(1) by redesignating subsections (a) through (d) as subsections (b) through (e), respectively;

(2) by inserting before subsection (b) the following:

“(a) DEFINITIONS.—In this section:

“(1) FUEL CELL ELECTRIC VEHICLE.—The term ‘fuel cell electric vehicle’ means an on-road or nonroad vehicle that uses a fuel cell (as defined in section 803 of the Spark M. Matsunaga Hydrogen Act of 2005 (42 U.S.C. 16152)).

“(2) HYBRID ELECTRIC VEHICLE.—The term ‘hybrid electric vehicle’ means a new qualified hybrid motor vehicle (as defined in section 30B(d)(3) of the Internal Revenue Code of 1986).

“(3) MEDIUM- OR HEAVY-DUTY ELECTRIC VEHICLE.—The term ‘medium- or heavy-duty electric vehicle’ means an electric, hybrid electric, or plug-in hybrid electric vehicle with a gross vehicle weight of more than 8,501 pounds.

“(4) NEIGHBORHOOD ELECTRIC VEHICLE.—The term ‘neighborhood electric vehicle’ means a 4-wheeled on-road or nonroad vehicle that—

“(A) has a top attainable speed in 1 mile of more than 20 mph and not more than 25 mph on a paved level surface; and

“(B) is propelled by an electric motor and on-board, rechargeable energy storage system that is rechargeable using an off-board source of electricity.

“(5) PLUG-IN HYBRID ELECTRIC VEHICLE.—The term ‘plug-in hybrid electric vehicle’ means a light-duty, medium-duty, or heavy-duty on-road or nonroad vehicle that is propelled by any combination of—

“(A) an electric motor and on-board, rechargeable energy storage system capable of operating the vehicle in intermittent or continuous all-electric mode and which is rechargeable using an off-board source of electricity; and

“(B) an internal combustion engine or heat engine using any combustible fuel.”;

(3) in subsection (b) (as redesignated by paragraph (1))—

(A) by striking “The Secretary” and inserting the following:

“(1) ALLOCATION.—The Secretary”; and

(B) by adding at the end the following:

“(2) ELECTRIC VEHICLES.—Not later than January 31, 2009, the Secretary shall—

“(A) allocate credit in an amount to be determined by the Secretary for—

“(i) acquisition of—

“(I) a hybrid electric vehicle;

“(II) a plug-in hybrid electric vehicle;

“(III) a fuel cell electric vehicle;

“(IV) a neighborhood electric vehicle; or

“(V) a medium- or heavy-duty electric vehicle; and

“(ii) investment in qualified alternative fuel infrastructure or nonroad equipment, as determined by the Secretary; and

“(B) allocate more than 1, but not to exceed 5, credits for investment in an emerging technology relating to any vehicle described in subparagraph (A) to encourage—

“(i) a reduction in petroleum demand;

“(ii) technological advancement; and

“(iii) a reduction in vehicle emissions.”;

(4) in subsection (c) (as redesignated by paragraph (1)), by striking “subsection (a)” and inserting “subsection (b)”;

(5) by adding at the end the following:

“(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section for each of fiscal years 2008 through 2013.”.

SEC. 247. COMMERCIAL INSULATION DEMONSTRATION PROGRAM.

(a) DEFINITIONS.—In this section:

(1) ADVANCED INSULATION.—The term “advanced insulation” means insulation that has an R value of not less than R35 per inch.

(2) COVERED REFRIGERATION UNIT.—The term “covered refrigeration unit” means any—

(A) commercial refrigerated truck;

(B) commercial refrigerated trailer; and

(C) commercial refrigerator, freezer, or refrigerator-freezer described in section 342(c) of the Energy Policy and Conservation Act (42 U.S.C. 6313(c)).

(b) REPORT.—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit to Congress a report that includes an evaluation of—

(1) the state of technological advancement of advanced insulation; and

(2) the projected amount of cost savings that would be generated by implementing advanced insulation into covered refrigeration units.

(c) DEMONSTRATION PROGRAM.—

(1) ESTABLISHMENT.—If the Secretary determines in the report described in subsection (b)

that the implementation of advanced insulation into covered refrigeration units would generate an economically justifiable amount of cost savings, the Secretary, in cooperation with manufacturers of covered refrigeration units, shall establish a demonstration program under which the Secretary shall demonstrate the cost-effectiveness of advanced insulation.

(2) DISCLOSURE.—Section 623 of the Energy Policy Act of 1992 (42 U.S.C. 13293) may apply to any project carried out under this subsection.

(3) COST-SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to any project carried out under this subsection.

(d) AUTHORIZATION OF APPROPRIATIONS.—Of the funds authorized under section 911(b) of Public Law 109-58, the Energy Policy Act of 2005, such sums shall be allocated to carry out this program.

Subtitle D—Setting Energy Efficiency Goals

SEC. 251. OIL SAVINGS PLAN AND REQUIREMENTS.

(a) OIL SAVINGS TARGET AND ACTION PLAN.—Not later than 270 days after the date of enactment of this Act, the Director of the Office of Management and Budget (referred to in this section as the “Director”) shall publish in the Federal Register an action plan consisting of—

(1) a list of requirements proposed or to be proposed pursuant to subsection (b) that are authorized to be issued under law in effect on the date of enactment of this Act, and this Act, that will be sufficient, when taken together, to save from the baseline determined under subsection (e)—

(A) 2,500,000 barrels of oil per day on average during calendar year 2016;

(B) 7,000,000 barrels of oil per day on average during calendar year 2026; and

(C) 10,000,000 barrels per day on average during calendar year 2031; and

(2) a Federal Government-wide analysis demonstrating—

(A) the expected oil savings from the baseline to be accomplished by each requirement; and

(B) that all such requirements, taken together, will achieve the oil savings specified in this subsection.

(b) STANDARDS AND REQUIREMENTS.—

(1) IN GENERAL.—On or before the date of publication of the action plan under subsection (a), the Secretary of Energy, the Secretary of Transportation, the Secretary of Defense, the Secretary of Agriculture, the Secretary of the Treasury, the Administrator of the Environmental Protection Agency, and the head of any other agency the President determines appropriate shall each propose, or issue a notice of intent to propose, regulations establishing each standard or other requirement listed in the action plan that is under the jurisdiction of the respective agency using authorities described in paragraph (2).

(2) AUTHORITIES.—The head of each agency described in paragraph (1) shall use to carry out this subsection—

(A) any authority in existence on the date of enactment of this Act (including regulations); and

(B) any new authority provided under this Act (including an amendment made by this Act).

(3) FINAL REGULATIONS.—Not later than 18 months after the date of enactment of this Act, the head of each agency described in paragraph (1) shall promulgate final versions of the regulations required under this subsection.

(4) CONTENT OF REGULATIONS.—Each proposed and final regulation promulgated under this subsection shall—

(A) be sufficient to achieve at least the oil savings resulting from the regulation under the action plan published under subsection (a); and

(B) be accompanied by an analysis by the applicable agency demonstrating that the regulation will achieve the oil savings from the baseline determined under subsection (e).

(c) INITIAL EVALUATION.—

(1) *IN GENERAL.*—Not later than 2 years after the date of enactment of this Act, the Director shall—

(A) publish in the Federal Register a Federal Government-wide analysis of—

(i) the oil savings achieved from the baseline established under subsection (e); and

(ii) the expected oil savings under the standards and requirements of this Act (and amendments made by this Act); and

(B) determine whether oil savings will meet the targets established under subsection (a).

(2) *INSUFFICIENT OIL SAVINGS.*—If the oil savings are less than the targets established under subsection (a), simultaneously with the analysis required under paragraph (1)—

(A) the Director shall publish a revised action plan that is sufficient to achieve the targets; and

(B) the head of each agency referred to in subsection (b)(1) shall propose new or revised regulations that are sufficient to achieve the targets under paragraphs (1), (2), and (3), respectively, of subsection (b).

(3) *FINAL REGULATIONS.*—Not later than 180 days after the date on which regulations are proposed under paragraph (2)(B), the head of each agency referred to in subsection (b)(1) shall promulgate final versions of those regulations that comply with subsection (b)(1).

(d) *REVIEW AND UPDATE OF ACTION PLAN.*—

(1) *REVIEW.*—Not later than January 1, 2011, and every 3 years thereafter, the Director shall submit to Congress, and publish, a report that—

(A) evaluates the progress achieved in implementing the oil savings targets established under subsection (a);

(B) analyzes the expected oil savings under the standards and requirements established under this Act and the amendments made by this Act; and

(C)(i) analyzes the potential to achieve oil savings that are in addition to the savings required by subsection (a); and

(ii) if the President determines that it is in the national interest, establishes a higher oil savings target for calendar year 2017 or any subsequent calendar year.

(2) *INSUFFICIENT OIL SAVINGS.*—If the oil savings are less than the targets established under subsection (a), simultaneously with the report required under paragraph (1)—

(A) the Director shall publish a revised action plan that is sufficient to achieve the targets; and

(B) the head of each agency referred to in subsection (b)(1) shall propose new or revised regulations that are sufficient to achieve the targets under paragraphs (1), (2), and (3), respectively, of subsection (b).

(3) *FINAL REGULATIONS.*—Not later than 180 days after the date on which regulations are proposed under paragraph (2)(B), the head of each agency referred to in subsection (b)(1) shall promulgate final versions of those regulations that comply with subsection (b)(1).

(e) *BASELINE AND ANALYSIS REQUIREMENTS.*—In performing the analyses and promulgating proposed or final regulations to establish standards and other requirements necessary to achieve the oil savings required by this section, the Secretary of Energy, the Secretary of Transportation, the Secretary of Defense, the Secretary of Agriculture, the Administrator of the Environmental Protection Agency, and the head of any other agency the President determines to be appropriate shall—

(1) determine oil savings as the projected reduction in oil consumption from the baseline established by the reference case contained in the report of the Energy Information Administration entitled “Annual Energy Outlook 2005”;

(2) determine the oil savings projections required on an annual basis for each of calendar years 2009 through 2026; and

(3) account for any overlap among the standards and other requirements to ensure that the projected oil savings from all the promulgated

standards and requirements, taken together, are as accurate as practicable.

(f) *NONREGULATORY MEASURES.*—The action plan required under subsection (a) and the revised action plans required under subsections (c) and (d) shall include—

(1) a projection of the barrels of oil displaced by efficiency and sources of energy other than oil, including biofuels, electricity, and hydrogen; and

(2) a projection of the barrels of oil saved through enactment of this Act and the Energy Policy Act of 2005 (42 U.S.C. 15801 et seq.).

SEC. 252. NATIONAL ENERGY EFFICIENCY IMPROVEMENT GOALS.

(a) *GOALS.*—The goals of the United States are—

(1) to achieve an improvement in the overall energy productivity of the United States (measured in gross domestic product per unit of energy input) of at least 2.5 percent per year by the year 2012; and

(2) to maintain that annual rate of improvement each year through 2030.

(b) *STRATEGIC PLAN.*—

(1) *IN GENERAL.*—Not later than 1 year after the date of enactment of this Act, the Secretary, in cooperation with the Administrator of the Environmental Protection Agency and the heads of other appropriate Federal agencies, shall develop a strategic plan to achieve the national goals for improvement in energy productivity established under subsection (a).

(2) *PUBLIC INPUT AND COMMENT.*—The Secretary shall develop the plan in a manner that provides appropriate opportunities for public input and comment.

(c) *PLAN CONTENTS.*—The strategic plan shall—

(1) establish future regulatory, funding, and policy priorities to ensure compliance with the national goals;

(2) include energy savings estimates for each sector; and

(3) include data collection methodologies and compilations used to establish baseline and energy savings data.

(d) *PLAN UPDATES.*—

(1) *IN GENERAL.*—The Secretary shall—

(A) update the strategic plan biennially; and

(B) include the updated strategic plan in the national energy policy plan required by section 801 of the Department of Energy Organization Act (42 U.S.C. 7321).

(2) *CONTENTS.*—In updating the plan, the Secretary shall—

(A) report on progress made toward implementing efficiency policies to achieve the national goals established under subsection (a); and

(B) verify, to the maximum extent practicable, energy savings resulting from the policies.

(e) *REPORT TO CONGRESS AND PUBLIC.*—The Secretary shall submit to Congress, and make available to the public, the initial strategic plan developed under subsection (b) and each updated plan.

SEC. 253. NATIONAL MEDIA CAMPAIGN.

(a) *IN GENERAL.*—The Secretary, acting through the Assistant Secretary for Energy Efficiency and Renewable Energy (referred to in this section as the “Secretary”), shall develop and conduct a national media campaign—

(1) to increase energy efficiency throughout the economy of the United States over the next decade;

(2) to promote the national security benefits associated with increased energy efficiency; and

(3) to decrease oil consumption in the United States over the next decade.

(b) *CONTRACT WITH ENTITY.*—The Secretary shall carry out subsection (a) directly or through—

(1) competitively bid contracts with 1 or more nationally recognized media firms for the development and distribution of monthly television, radio, and newspaper public service announcements; or

(2) collective agreements with 1 or more nationally recognized institutes, businesses, or nonprofit organizations for the funding, development, and distribution of monthly television, radio, and newspaper public service announcements.

(c) *USE OF FUNDS.*—

(1) *IN GENERAL.*—Amounts made available to carry out this section shall be used for the following:

(A) *ADVERTISING COSTS.*—

(i) The purchase of media time and space.

(ii) Creative and talent costs.

(iii) Testing and evaluation of advertising.

(iv) Evaluation of the effectiveness of the media campaign.

(B) *ADMINISTRATIVE COSTS.*—Operational and management expenses.

(2) *LIMITATIONS.*—In carrying out this section, the Secretary shall allocate not less than 85 percent of funds made available under subsection (e) for each fiscal year for the advertising functions specified under paragraph (1)(A).

(d) *REPORTS.*—The Secretary shall annually submit to Congress a report that describes—

(1) the strategy of the national media campaign and whether specific objectives of the campaign were accomplished, including—

(A) determinations concerning the rate of change of energy consumption, in both absolute and per capita terms; and

(B) an evaluation that enables consideration whether the media campaign contributed to reduction of energy consumption;

(2) steps taken to ensure that the national media campaign operates in an effective and efficient manner consistent with the overall strategy and focus of the campaign;

(3) plans to purchase advertising time and space;

(4) policies and practices implemented to ensure that Federal funds are used responsibly to purchase advertising time and space and eliminate the potential for waste, fraud, and abuse; and

(5) all contracts or cooperative agreements entered into with a corporation, partnership, or individual working on behalf of the national media campaign.

(e) *AUTHORIZATION OF APPROPRIATIONS.*—

(1) *IN GENERAL.*—There is authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2008 through 2012.

(2) *DECREASED OIL CONSUMPTION.*—The Secretary shall use not less than 50 percent of the amount that is made available under this section for each fiscal year to develop and conduct a national media campaign to decrease oil consumption in the United States over the next decade.

SEC. 254. MODERNIZATION OF ELECTRICITY GRID SYSTEM.

(a) *STATEMENT OF POLICY.*—It is the policy of the United States that developing and deploying advanced technology to modernize and increase the efficiency of the electricity grid system of the United States is essential to maintain a reliable and secure electricity transmission and distribution infrastructure that can meet future demand growth.

(b) *PROGRAMS.*—The Secretary, the Federal Energy Regulatory Commission, and other Federal agencies, as appropriate, shall carry out programs to support the use, development, and demonstration of advanced transmission and distribution technologies, including real-time monitoring and analytical software—

(1) to maximize the capacity and efficiency of electricity networks;

(2) to enhance grid reliability;

(3) to reduce line losses;

(4) to facilitate the transition to real-time electricity pricing;

(5) to allow grid incorporation of more onsite renewable energy generators;

(6) to enable electricity to displace a portion of the petroleum used to power the national transportation system of the United States; and

(7) to enable broad deployment of distributed generation and demand side management technology.

SEC. 255. SMART GRID SYSTEM REPORT.

(a) *IN GENERAL.*—The Secretary, acting through the Director of the Office of Electricity Delivery and Energy Reliability (referred to in this section as the “Secretary”), shall, after consulting with any interested individual or entity as appropriate, no later than one year after enactment, report to Congress concerning the status of smart grid deployments nationwide and any regulatory or government barriers to continued deployment.

SEC. 256. SMART GRID TECHNOLOGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION.

(a) *POWER GRID DIGITAL INFORMATION TECHNOLOGY.*—The Secretary, in consultation with the Federal Energy Regulatory Commission and other appropriate agencies, electric utilities, the States, and other stakeholders, shall carry out a program—

(1) to develop advanced techniques for measuring peak load reductions and energy-efficiency savings from smart metering, demand response, distributed generation, and electricity storage systems;

(2) to investigate means for demand response, distributed generation, and storage to provide ancillary services;

(3) to conduct research to advance the use of wide-area measurement and control networks, including data mining, visualization, advanced computing, and secure and dependable communications in a highly-distributed environment;

(4) to test new reliability technologies in a grid control room environment against a representative set of local outage and wide area blackout scenarios;

(5) to investigate the feasibility of a transition to time-of-use and real-time electricity pricing;

(6) to develop algorithms for use in electric transmission system software applications;

(7) to promote the use of underutilized electricity generation capacity in any substitution of electricity for liquid fuels in the transportation system of the United States; and

(8) in consultation with the Federal Energy Regulatory Commission, to propose interconnection protocols to enable electric utilities to access electricity stored in vehicles to help meet peak demand loads.

(b) SMART GRID REGIONAL DEMONSTRATION INITIATIVE.—

(1) *IN GENERAL.*—The Secretary shall establish a smart grid regional demonstration initiative (referred to in this subsection as the “Initiative”) composed of demonstration projects specifically focused on advanced technologies for use in power grid sensing, communications, analysis, and power flow control. The Secretary shall seek to leverage existing smart grid deployments.

(2) *GOALS.*—The goals of the Initiative shall be—

(A) to demonstrate the potential benefits of concentrated investments in advanced grid technologies on a regional grid;

(B) to facilitate the commercial transition from the current power transmission and distribution system technologies to advanced technologies;

(C) to facilitate the integration of advanced technologies in existing electric networks to improve system performance, power flow control, and reliability;

(D) to demonstrate protocols and standards that allow for the measurement and validation of the energy savings and fossil fuel emission reductions associated with the installation and use of energy efficiency and demand response technologies and practices; and

(E) to investigate differences in each region and regulatory environment regarding best practices in implementing smart grid technologies.

(3) DEMONSTRATION PROJECTS.—

(A) *IN GENERAL.*—In carrying out the initiative, the Secretary shall carry out smart grid demonstration projects in up to 5 electricity control areas, including rural areas and at least 1 area in which the majority of generation and transmission assets are controlled by a tax-exempt entity.

(B) *COOPERATION.*—A demonstration project under subparagraph (A) shall be carried out in cooperation with the electric utility that owns the grid facilities in the electricity control area in which the demonstration project is carried out.

(C) *FEDERAL SHARE OF COST OF TECHNOLOGY INVESTMENTS.*—The Secretary shall provide to an electric utility described in subparagraph (B) financial assistance for use in paying an amount equal to not more than 50 percent of the cost of qualifying advanced grid technology investments made by the electric utility to carry out a demonstration project.

(4) *AUTHORIZATION OF APPROPRIATIONS.*—There are authorized to be appropriated—

(A) to carry out subsection (a), such sums as are necessary for each of fiscal years 2008 through 2012; and

(B) to carry out subsection (b), \$100,000,000 for each of fiscal years 2008 through 2012.

SEC. 257. SMART GRID INTEROPERABILITY FRAMEWORK.

(a) *INTEROPERABILITY FRAMEWORK.*—The Federal Energy Regulatory Commission (referred to in this section as the “Commission”), in cooperation with other relevant federal agencies, shall coordinate with smart grid stakeholders to develop protocols for the establishment of a flexible framework for the connection of smart grid devices and systems that would align policy, business, and technology approaches in a manner that would enable all electric resources, including demand-side resources, to contribute to an efficient, reliable electricity network.

(c) *SCOPE OF FRAMEWORK.*—The framework developed under subsection (b) shall be designed—

(1) to accommodate traditional, centralized generation and transmission resources and consumer distributed resources, including distributed generation, renewable generation, energy storage, energy efficiency, and demand response and enabling devices and systems;

(2) to be flexible to incorporate—

(A) regional and organizational differences; and

(B) technological innovations; and

(3) to consider include voluntary uniform standards for certain classes of mass-produced electric appliances and equipment for homes and businesses that enable customers, at their election and consistent with applicable State and federal laws, and are manufactured with the ability to respond to electric grid emergencies and demand response signals by curtailing all, or a portion of, the electrical power consumed by the appliances or equipment in response to an emergency or demand response signal, including through—

(A) load reduction to reduce total electrical demand;

(B) adjustment of load to provide grid ancillary services; and

(C) in the event of a reliability crisis that threatens an outage, short-term load shedding to help preserve the stability of the grid.

(4) Such voluntary standards should incorporate appropriate manufacturer lead time.

SEC. 258. STATE CONSIDERATION OF SMART GRID.

Section 111(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(d)) is amended by adding at the end the following:

“(16) *CONSIDERATION OF SMART GRID INVESTMENTS.*—Each State shall consider requiring that, prior to undertaking investments in non-advanced grid technologies, an electric utility of

the State demonstrate to the State that the electric utility considered an investment in a qualified smart grid system based on appropriate factors, including—

“(i) total costs;

“(ii) cost-effectiveness;

“(iii) improved reliability;

“(iv) security;

“(v) system performance; and

“(vi) societal benefit.

“(B) *RATE RECOVERY.*—Each State shall consider authorizing each electric utility of the State to recover from ratepayers any capital, operating expenditure, or other costs of the electric utility relating to the deployment of a qualified smart grid system, including a reasonable rate of return on the capital expenditures of the electric utility for the deployment of the qualified smart grid system.

“(C) *OBSOLETE EQUIPMENT.*—Each State shall consider authorizing any electric utility or other party of the State to deploy a qualified smart grid system to recover in a timely manner the remaining book-value costs of any equipment rendered obsolete by the deployment of the qualified smart grid system, based on the remaining depreciable life of the obsolete equipment.”.

SEC. 259. SUPPORT FOR ENERGY INDEPENDENCE OF THE UNITED STATES.

It is the policy of the United States to provide support for projects and activities to facilitate the energy independence of the United States so as to ensure that all but 10 percent of the energy needs of the United States are supplied by domestic energy sources.

SEC. 260. ENERGY POLICY COMMISSION.

(a) *ESTABLISHMENT.*—

(1) *IN GENERAL.*—There is established a commission, to be known as the “National Commission on Energy Independence” (referred to in this section as the “Commission”).

(2) *MEMBERSHIP.*—The Commission shall be composed of 15 members, of whom—

(A) 3 shall be appointed by the President;

(B) 3 shall be appointed by the majority leader of the Senate;

(C) 3 shall be appointed by the minority leader of the Senate;

(D) 3 shall be appointed by the Speaker of the House of Representatives; and

(E) 3 shall be appointed by the minority leader of the House of Representatives.

(3) *CO-CHAIRPERSONS.*—

(A) *IN GENERAL.*—The President shall designate 2 co-chairpersons from among the members of the Commission appointed.

(B) *POLITICAL AFFILIATION.*—The co-chairpersons designated under subparagraph (A) shall not both be affiliated with the same political party.

(4) *DEADLINE FOR APPOINTMENT.*—Members of the Commission shall be appointed not later than 90 days after the date of enactment of this Act.

(5) *TERM; VACANCIES.*—

(A) *TERM.*—A member of the Commission shall be appointed for the life of the Commission.

(B) *VACANCIES.*—Any vacancy in the Commission—

(i) shall not affect the powers of the Commission; and

(ii) shall be filled in the same manner as the original appointment.

(b) *PURPOSE.*—The Commission shall conduct a comprehensive review of the energy policy of the United States by—

(1) reviewing relevant analyses of the current and long-term energy policy of, and conditions in, the United States;

(2) identifying problems that may threaten the achievement by the United States of long-term energy policy goals, including energy independence;

(3) analyzing potential solutions to problems that threaten the long-term ability of the United States to achieve those energy policy goals; and

(4) providing recommendations that will ensure, to the maximum extent practicable, that

the energy policy goals of the United States are achieved.

(c) REPORT AND RECOMMENDATIONS.—

(1) IN GENERAL.—Not later than December 31 of each of calendar years 2009, 2011, 2013, and 2015, the Commission shall submit to Congress and the President a report on the progress of United States in meeting the long-term energy policy goal of energy independence, including a detailed statement of the consensus findings, conclusions, and recommendations of the Commission.

(2) LEGISLATIVE LANGUAGE.—If a recommendation submitted under paragraph (1) involves legislative action, the report shall include proposed legislative language to carry out the action.

(d) COMMISSION PERSONNEL MATTERS.—

(1) STAFF AND DIRECTOR.—The Commission shall have a staff headed by an Executive Director.

(2) STAFF APPOINTMENT.—The Executive Director may appoint such personnel as the Executive Director and the Commission determine to be appropriate.

(3) EXPERTS AND CONSULTANTS.—With the approval of the Commission, the Executive Director may procure temporary and intermittent services under section 3109(b) of title 5, United States Code.

(4) FEDERAL AGENCIES.—

(A) DETAIL OF GOVERNMENT EMPLOYEES.—

(i) IN GENERAL.—Upon the request of the Commission, the head of any Federal agency may detail, without reimbursement, any of the personnel of the Federal agency to the Commission to assist in carrying out the duties of the Commission.

(ii) NATURE OF DETAIL.—Any detail of a Federal employee under clause (i) shall not interrupt or otherwise affect the civil service status or privileges of the Federal employee.

(B) TECHNICAL ASSISTANCE.—Upon the request of the Commission, the head of a Federal agency shall provide such technical assistance to the Commission as the Commission determines to be necessary to carry out the duties of the Commission.

(e) RESOURCES.—

(1) IN GENERAL.—The Commission shall have reasonable access to materials, resources, statistical data, and such other information from Executive agencies as the Commission determines to be necessary to carry out the duties of the Commission.

(2) FORM OF REQUESTS.—The co-chairpersons of the Commission shall make requests for access described in paragraph (1) in writing, as necessary.

Subtitle E—Promoting Federal Leadership in Energy Efficiency and Renewable Energy

SEC. 261. FEDERAL FLEET CONSERVATION REQUIREMENTS.

(a) FEDERAL FLEET CONSERVATION REQUIREMENTS.—

(1) IN GENERAL.—Part J of title III of the Energy Policy and Conservation Act (42 U.S.C. 6374 et seq.) is amended by adding at the end the following:

“SEC. 400FF. FEDERAL FLEET CONSERVATION REQUIREMENTS.

“(a) MANDATORY REDUCTION IN PETROLEUM CONSUMPTION.—

“(1) IN GENERAL.—The Secretary shall issue regulations (including provisions for waivers from the requirements of this section) for Federal fleets subject to section 400AA requiring that not later than October 1, 2015, each Federal agency achieve at least a 20 percent reduction in petroleum consumption, and that each Federal agency increase alternative fuel consumption by 10 percent annually, as calculated from the baseline established by the Secretary for fiscal year 2005.

“(2) PLAN.—

“(A) REQUIREMENT.—The regulations shall require each Federal agency to develop a plan to meet the required petroleum reduction levels and the alternative fuel consumption increases.

“(B) MEASURES.—The plan may allow an agency to meet the required petroleum reduction level through—

“(i) the use of alternative fuels;

“(ii) the acquisition of vehicles with higher fuel economy, including hybrid vehicles, neighborhood electric vehicles, electric vehicles, and plug-in hybrid vehicles if the vehicles are commercially available;

“(iii) the substitution of cars for light trucks;

“(iv) an increase in vehicle load factors;

“(v) a decrease in vehicle miles traveled;

“(vi) a decrease in fleet size; and

“(vii) other measures.

“(b) FEDERAL EMPLOYEE INCENTIVE PROGRAMS FOR REDUCING PETROLEUM CONSUMPTION.—

“(1) IN GENERAL.—Each Federal agency shall actively promote incentive programs that encourage Federal employees and contractors to reduce petroleum usage through the use of practices such as—

“(A) telecommuting;

“(B) public transit;

“(C) carpooling; and

“(D) bicycling and the use of 2-wheeled electric drive devices.

“(2) MONITORING AND SUPPORT FOR INCENTIVE PROGRAMS.—The Administrator of General Services, the Director of the Office of Personnel Management, and the Secretary of Energy shall monitor and provide appropriate support to agency programs described in paragraph (1).

“(3) RECOGNITION.—The Secretary may establish a program under which the Secretary recognizes private sector employers and State and local governments for outstanding programs to reduce petroleum usage through practices described in paragraph (1).

“(c) REPLACEMENT TIRES.—

“(1) IN GENERAL.—Except as provided in paragraph (2), the regulations issued under subsection (a)(1) shall include a requirement that, to the maximum extent practicable, each Federal agency purchase energy-efficient replacement tires for the respective fleet vehicles of the agency.

“(2) EXCEPTIONS.—This section does not apply to—

“(A) law enforcement motor vehicles;

“(B) emergency motor vehicles; or

“(C) motor vehicles acquired and used for military purposes that the Secretary of Defense has certified to the Secretary must be exempt for national security reasons.

“(d) ANNUAL REPORTS ON COMPLIANCE.—The Secretary shall submit to Congress an annual report that summarizes actions taken by Federal agencies to comply with this section.”

(2) TABLE OF CONTENTS AMENDMENT.—The table of contents of the Energy Policy and Conservation Act (42 U.S.C. prec. 6201) is amended by adding at the end of the items relating to part J of title III the following:

“Sec. 400FF. Federal fleet conservation requirements.”

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the amendment made by this section \$10,000,000 for the period of fiscal years 2008 through 2013.

SEC. 262. FEDERAL REQUIREMENT TO PURCHASE ELECTRICITY GENERATED BY RENEWABLE ENERGY.

Section 203 of the Energy Policy Act of 2005 (42 U.S.C. 15852) is amended—

(1) by striking subsection (a) and inserting the following:

“(a) REQUIREMENT.—

“(1) IN GENERAL.—The President, acting through the Secretary, shall require that, to the extent economically feasible and technically practicable, of the total quantity of domestic electric energy the Federal Government consumes during any fiscal year, the following percentages shall be renewable energy from facilities placed in service after January 1, 1999:

“(A) Not less than 10 percent in fiscal year 2010.

“(B) Not less than 15 percent in fiscal year 2015.

“(2) CAPITOL COMPLEX.—The Architect of the Capitol, in consultation with the Secretary, shall ensure that, of the total quantity of electric energy the Capitol complex consumes during any fiscal year, the percentages prescribed in paragraph (1) shall be renewable energy.

“(3) WAIVER AUTHORITY.—The President may reduce or waive the requirement under paragraph (1) on a fiscal-year basis if the President determines that complying with paragraph (1) for a fiscal year would result in—

“(A) a negative impact on military training or readiness activities conducted by the Department of Defense;

“(B) a negative impact on domestic preparedness activities conducted by the Department of Homeland Security; or

“(C) a requirement that a Federal agency provide emergency response services in the event of a natural disaster or terrorist attack.”; and

(2) by adding at the end the following:

“(e) CONTRACTS FOR RENEWABLE ENERGY FROM PUBLIC UTILITY SERVICES.—Notwithstanding section 501(b)(1)(B) of title 40, United States Code, a contract for renewable energy may be made for a period of not more than 50 years.”

SEC. 263. ENERGY SAVINGS PERFORMANCE CONTRACTS.

(a) RETENTION OF SAVINGS.—Section 546(c) of the National Energy Conservation Policy Act (42 U.S.C. 8256(c)) is amended by striking paragraph (5).

(b) SUNSET AND REPORTING REQUIREMENTS.—Section 801 of the National Energy Conservation Policy Act (42 U.S.C. 8287) is amended by striking subsection (c).

(c) DEFINITION OF ENERGY SAVINGS.—Section 804(2) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(2)) is amended—

(1) by redesignating subparagraphs (A), (B), and (C) as clauses (i), (ii), and (iii), respectively, and indenting appropriately;

(2) by striking “means a reduction” and inserting “means—

“(A) a reduction”;

(3) by striking the period at the end and inserting a semicolon; and

(4) by adding at the end the following:

“(B) the increased efficient use of an existing energy source by cogeneration or heat recovery, and installation of renewable energy systems;

“(C) if otherwise authorized by Federal or State law (including regulations), the sale or transfer of electrical or thermal energy generated on-site from renewable energy sources or cogeneration, but in excess of Federal needs, to utilities or non-Federal energy users; and

“(D) the increased efficient use of existing water sources in interior or exterior applications.”

(d) NOTIFICATION.—

(1) AUTHORITY TO ENTER INTO CONTRACTS.—Section 801(a)(2)(D) of the National Energy Conservation Policy Act (42 U.S.C. 8287(a)(2)(D)) is amended—

(A) in clause (ii), by inserting “and” after the semicolon at the end;

(B) by striking clause (iii); and

(C) by redesignating clause (iv) as clause (iii).

(2) REPORTS.—Section 548(a)(2) of the National Energy Conservation Policy Act (42 U.S.C. 8258(a)(2)) is amended by inserting “and any termination penalty exposure” after “the energy and cost savings that have resulted from such contracts”.

(3) CONFORMING AMENDMENT.—Section 2913 of title 10, United States Code, is amended by striking subsection (e).

(e) ENERGY AND COST SAVINGS IN NONBUILDING APPLICATIONS.—

(1) DEFINITIONS.—In this subsection:

(A) NONBUILDING APPLICATION.—The term “nonbuilding application” means—

(i) any class of vehicles, devices, or equipment that is transportable under the power of the applicable vehicle, device, or equipment by land, sea, or air and that consumes energy from any fuel source for the purpose of—

- (I) that transportation; or
(II) maintaining a controlled environment within the vehicle, device, or equipment; and
(ii) any federally-owned equipment used to generate electricity or transport water.

(B) SECONDARY SAVINGS.—
(i) IN GENERAL.—The term “secondary savings” means additional energy or cost savings that are a direct consequence of the energy savings that result from the energy efficiency improvements that were financed and implemented pursuant to an energy savings performance contract.

(ii) INCLUSIONS.—The term “secondary savings” includes—

- (I) energy and cost savings that result from a reduction in the need for fuel delivery and logistical support;
(II) personnel cost savings and environmental benefits; and
(III) in the case of electric generation equipment, the benefits of increased efficiency in the production of electricity, including revenues received by the Federal Government from the sale of electricity so produced.

(2) STUDY.—
(A) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary and the Secretary of Defense shall jointly conduct, and submit to Congress and the President a report of, a study of the potential for the use of energy savings performance contracts to reduce energy consumption and provide energy and cost savings in nonbuilding applications.

(B) REQUIREMENTS.—The study under this subsection shall include—

- (i) an estimate of the potential energy and cost savings to the Federal Government, including secondary savings and benefits, from increased efficiency in nonbuilding applications;
(ii) an assessment of the feasibility of extending the use of energy savings performance contracts to nonbuilding applications, including an identification of any regulatory or statutory barriers to such use; and
(iii) such recommendations as the Secretary and Secretary of Defense determine to be appropriate.

SEC. 264. ENERGY MANAGEMENT REQUIREMENTS FOR FEDERAL BUILDINGS.

Section 543(a)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(1)) is amended by striking the table and inserting the following:

Table with 2 columns: Fiscal Year, Percentage reduction. Rows for years 2006 through 2015 with corresponding percentage values.

SEC. 265. COMBINED HEAT AND POWER AND DISTRICT ENERGY INSTALLATIONS AT FEDERAL SITES.

Section 543 of the National Energy Conservation Policy Act (42 U.S.C. 8253) is amended by adding at the end the following:

“(f) COMBINED HEAT AND POWER AND DISTRICT ENERGY INSTALLATIONS AT FEDERAL SITES.—

“(1) IN GENERAL.—Not later than 18 months after the date of enactment of this subsection, the Secretary, in consultation with the Administrator of General Services and the Secretary of Defense, shall identify Federal sites that could achieve significant cost-effective energy savings through the use of combined heat and power or district energy installations.

“(2) INFORMATION AND TECHNICAL ASSISTANCE.—The Secretary shall provide agencies with information and technical assistance that will enable the agencies to take advantage of the energy savings described in paragraph (1).

“(3) ENERGY PERFORMANCE REQUIREMENTS.—Any energy savings from the installations described in paragraph (1) may be applied to meet the energy performance requirements for an agency under subsection (a)(1).”

SEC. 266. FEDERAL BUILDING ENERGY EFFICIENCY PERFORMANCE STANDARDS.

Section 305(a)(3)(A) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(A)) is amended—

(1) in the matter preceding clause (i), by striking “this paragraph” and by inserting “the Energy Efficiency Promotion Act of 2007”; and

(2) in clause (i)—
(A) in subclause (I), by striking “and” at the end;

(B) by redesignating subclause (II) as subclause (III); and

(C) by inserting after subclause (I) the following:

“(II) the buildings be designed, to the extent economically feasible and technically practicable, so that the fossil fuel-generated energy consumption of the buildings is reduced, as compared with the fossil fuel-generated energy consumption by a similar Federal building in fiscal year 2003 (as measured by Commercial Buildings Energy Consumption Survey or Residential Energy Consumption Survey data from the Energy Information Agency), by the percentage specified in the following table:

Table with 2 columns: Fiscal Year, Percentage reduction. Rows for years 2007 through 2030 with corresponding percentage values.

SEC. 267. APPLICATION OF INTERNATIONAL ENERGY CONSERVATION CODE TO PUBLIC AND ASSISTED HOUSING.

Section 109 of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 12709) is amended—

(1) in subsection (a)(1)(C), by striking “, where such standards are determined to be cost effective by the Secretary of Housing and Urban Development”;

(2) in subsection (a)(2)—
(A) by striking “the Council of American Building Officials Model Energy Code, 1992” and inserting “2006 International Energy Conservation Code”; and

(B) by striking “, and, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(3) in subsection (b)—
(A) in the heading, by striking “MODEL ENERGY CODE.—” and inserting “INTERNATIONAL ENERGY CONSERVATION CODE.—”;

(B) after “all new construction” in the first sentence insert “and rehabilitation”;

(C) by striking “, and, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(4) in subsection (c)—
(A) in the heading, by striking “MODEL ENERGY CODE AND”;

(B) by striking “, or, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(5) by adding at the end the following:

“(d) FAILURE TO AMEND THE STANDARDS.—If the Secretaries have not, within 1 year after the requirements of the 2006 IECC or the ASHRAE Standard 90.1–2004 are revised, amended the standards or made a determination under subsection (c) of this section, the Secretary of Housing and Urban Development or the Secretary of Agriculture make a determination that the revised codes do not negatively affect the availability or affordability of new construction of assisted housing and single family and multifamily residential housing (other than manufactured homes) subject to mortgages insured under the National Housing Act (12 U.S.C. 1701 et seq.) or insured, guaranteed, or made by the Secretary of Agriculture under title V of the Housing Act of 1949 (42 U.S.C. 1471 et seq.), respectively, and the Secretary of Energy has made a determination under section 304 of the Energy Conservation and Production Act (42 U.S.C. 6833) that the revised code or standard would improve energy efficiency, all new construction and rehabilitation of housing specified in subsection (a) shall meet the requirements of the revised code or standard.”;

(6) by striking “CABO Model Energy Code, 1992” each place it appears and inserting “the 2006 IECC”; and

(7) by striking “1989” each place it appears and inserting “2004”.

SEC. 268. ENERGY EFFICIENT COMMERCIAL BUILDINGS INITIATIVE.

(a) DEFINITIONS.—In this section:

(1) CONSORTIUM.—The term “consortium” means a working group that is comprised of—

- (A) individuals representing—
(i) 1 or more businesses engaged in—
(I) commercial building development;
(II) construction; or
(III) real estate;
(ii) financial institutions;
(iii) academic or research institutions;
(iv) State or utility energy efficiency programs;
(v) nongovernmental energy efficiency organizations; and
(vi) the Federal Government;
(B) 1 or more building designers; and
(C) 1 or more individuals who own or operate 1 or more buildings.

(2) ENERGY EFFICIENT COMMERCIAL BUILDING.—The term “energy efficient commercial building” means a commercial building that is designed, constructed, and operated—

- (A) to require a greatly reduced quantity of energy;
(B) to meet, on an annual basis, the balance of energy needs of the commercial building from renewable sources of energy; and
(C) to be economically viable.

(3) INITIATIVE.—The term “initiative” means the Energy Efficient Commercial Buildings Initiative.

(b) INITIATIVE.—
(1) IN GENERAL.—The Secretary shall enter into an agreement with the consortium to develop and carry out the initiative—

- (A) to reduce the quantity of energy consumed by commercial buildings located in the United States; and
(B) to achieve the development of energy efficient commercial buildings in the United States.
(2) GOAL OF INITIATIVE.—The goal of the initiative shall be to develop technologies and practices and implement policies that lead to energy efficient commercial buildings for—
(A) any commercial building newly constructed in the United States by 2030;
(B) 50 percent of the commercial building stock of the United States by 2040; and
(C) all commercial buildings in the United States by 2050.

(3) COMPONENTS.—In carrying out the initiative, the Secretary, in collaboration with the consortium, may—

- (A) conduct research and development on building design, materials, equipment and controls, operation and other practices, integration,

energy use measurement and benchmarking, and policies;

(B) conduct demonstration projects to evaluate replicable approaches to achieving energy efficient commercial buildings for a variety of building types in a variety of climate zones;

(C) conduct deployment activities to disseminate information on, and encourage widespread adoption of, technologies, practices, and policies to achieve energy efficient commercial buildings; and

(D) conduct any other activity necessary to achieve any goal of the initiative, as determined by the Secretary, in collaboration with the consortium.

(c) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated such sums as are necessary to carry out this section.

(2) ADDITIONAL FUNDING.—In addition to amounts authorized to be appropriated under paragraph (1), the Secretary may allocate funds from other appropriations to the initiative without changing the purpose for which the funds are appropriated.

SEC. 269. CLEAN ENERGY CORRIDORS.

Section 216 of the Federal Power Act (16 U.S.C. 824p) is amended—

(1) in subsection (a)—

(A) by striking “(1) Not later than” and inserting the following:

“(1) IN GENERAL.—Not later than”;

(B) by striking paragraph (2) and inserting the following:

“(2) REPORT AND DESIGNATIONS.—

“(A) IN GENERAL.—After considering alternatives and recommendations from interested parties (including an opportunity for comment from affected States), the Secretary shall issue a report, based on the study conducted under paragraph (1), in which the Secretary may designate as a national interest electric transmission corridor any geographic area experiencing electric energy transmission capacity constraints or congestion that adversely affects consumers, including constraints or congestion that—

“(i) increases costs to consumers;

“(ii) limits resource options to serve load growth; or

“(iii) limits access to sources of clean energy, such as wind, solar energy, geothermal energy, and biomass.

“(B) ADDITIONAL DESIGNATIONS.—In addition to the corridor designations made under subparagraph (A), the Secretary may designate additional corridors in accordance with that subparagraph upon the application by an interested person, on the condition that the Secretary provides for an opportunity for notice and comment by interested persons and affected States on the application.”;

(C) in paragraph (3), the striking “(3) The Secretary” and inserting the following:

“(3) CONSULTATION.—The Secretary”;

(D) in paragraph (4)—

(i) by striking “(4) In determining” and inserting the following:

“(4) BASIS FOR DETERMINATION.—In determining”;

(ii) by striking subparagraphs (A) through (E) and inserting the following:

“(A) the economic vitality and development of the corridor, or the end markets served by the corridor, may be constrained by lack of adequate or reasonably priced electricity;

“(B)(i) economic growth in the corridor, or the end markets served by the corridor, may be jeopardized by reliance on limited sources of energy; and

“(ii) a diversification of supply is warranted;

“(C) the energy independence of the United States would be served by the designation;

“(D) the designation would be in the interest of national energy policy; and

“(E) the designation would enhance national defense and homeland security.”; and

(2) by adding at the end the following:

“(1) RATES AND RECOVERY OF COSTS.—

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Commission shall promulgate regulations pro-

viding for the allocation and recovery of costs prudently incurred by public utilities in building and operating facilities authorized under this section for transmission of electric energy generated from clean sources (such as wind, solar energy, geothermal energy, and biomass).

“(2) APPLICABLE PROVISIONS.—All rates approved under the regulations promulgated under paragraph (1), including any revisions to the regulations, shall be subject to the requirements under sections 205 and 206 that all rates, charges, terms, and conditions be just and reasonable and not unduly discriminatory or preferential.”

SEC. 270. FEDERAL STANDBY POWER STANDARD.

(a) DEFINITIONS.—In this section:

(1) AGENCY.—

(A) IN GENERAL.—The term “Agency” has the meaning given the term “Executive agency” in section 105 of title 5, United States Code.

(B) INCLUSIONS.—The term “Agency” includes military departments, as the term is defined in section 102 of title 5, United States Code.

(2) ELIGIBLE PRODUCT.—The term “eligible product” means a commercially available, off-the-shelf product that—

(A)(i) uses external standby power devices; or

(ii) contains an internal standby power function; and

(B) is included on the list compiled under subsection (d).

(b) FEDERAL PURCHASING REQUIREMENT.—Subject to subsection (c), if an Agency purchases an eligible product, the Agency shall purchase—

(1) an eligible product that uses not more than 1 watt in the standby power consuming mode of the eligible product; or

(2) if an eligible product described in paragraph (1) is not available, the eligible product with the lowest available standby power wattage in the standby power consuming mode of the eligible product.

(c) LIMITATION.—The requirements of subsection (b) shall apply to a purchase by an Agency only if—

(1) the lower-wattage eligible product is—

(A) lifecycle cost-effective; and

(B) practicable; and

(2) the utility and performance of the eligible product is not compromised by the lower wattage requirement.

(d) ELIGIBLE PRODUCTS.—The Secretary of Energy, in consultation with the Secretary of Defense, the Administrator of the Environmental Protection Agency, and the Administrator of General Services, shall compile a publicly accessible list of cost-effective eligible products that shall be subject to the purchasing requirements of subsection (b).

SEC. 270A. STANDARD RELATING TO SOLAR HOT WATER HEATERS.

Section 305(a)(3)(A) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(A)) (as amended by section 266) is amended—

(1) in clause (i)(III), by striking “and” at the end;

(2) in clause (ii), by striking the period at the end and inserting “; and”;

(3) by adding at the end the following:

“(iii) if life-cycle cost-effective, as compared to other reasonably available technologies, not less than 30 percent of the hot water demand for each new or substantially modified Federal building be met through the installation and use of solar hot water heaters.”

SEC. 270B. RENEWABLE ENERGY INNOVATION MANUFACTURING PARTNERSHIP.

(a) ESTABLISHMENT.—The Secretary shall carry out a program, to be known as the Renewable Energy Innovation Manufacturing Partnership Program (referred to in this section as the “Program”), to make assistance awards to eligible entities for use in carrying out research, development, and demonstration relating to the manufacturing of renewable energy technologies.

(b) SOLICITATION.—To carry out the Program, the Secretary shall annually conduct a competitive solicitation for assistance awards for an eligible project described in subsection (e).

(c) PROGRAM PURPOSES.—The purposes of the Program are—

(1) to develop, or aid in the development of, advanced manufacturing processes, materials, and infrastructure;

(2) to increase the domestic production of renewable energy technology and components; and

(3) to better coordinate Federal, State, and private resources to meet regional and national renewable energy goals through advanced manufacturing partnerships.

(d) ELIGIBLE ENTITIES.—An entity shall be eligible to receive an assistance award under the Program to carry out an eligible project described in subsection (e) if the entity is composed of—

(1) 1 or more public or private nonprofit institutions or national laboratories engaged in research, development, demonstration, or technology transfer, that would participate substantially in the project; and

(2) 1 or more private entities engaged in the manufacturing or development of renewable energy system components (including solar energy, wind energy, biomass, geothermal energy, energy storage, or fuel cells).

(e) ELIGIBLE PROJECTS.—An eligible entity may use an assistance award provided under this section to carry out a project relating to—

(1) the conduct of studies of market opportunities for component manufacturing of renewable energy systems;

(2) the conduct of multiyear applied research, development, demonstration, and deployment projects for advanced manufacturing processes, materials, and infrastructure for renewable energy systems; and

(3) other similar ventures, as approved by the Secretary, that promote advanced manufacturing of renewable technologies.

(f) CRITERIA AND GUIDELINES.—The Secretary shall establish criteria and guidelines for the submission, evaluation, and funding of proposed projects under the Program.

(g) COST SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a project carried out under this section.

(h) DISCLOSURE.—Section 623 of the Energy Policy Act of 1992 (42 U.S.C. 13293) shall apply to a project carried out under this subsection.

(i) SENSE OF THE SENATE.—It is the sense of the Senate that the Secretary should ensure that small businesses engaged in renewable manufacturing be considered for loan guarantees authorized under title XVII of the Energy Policy Act of 2005 (42 U.S.C. 16511 et seq.).

(j) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated out of funds already authorized to carry out this section \$25,000,000 for each of fiscal years 2008 through 2013, to remain available until expended.

SEC. 270C. EXPRESS LOANS FOR RENEWABLE ENERGY AND ENERGY EFFICIENCY.

Section 7(a)(31) of the Small Business Act (15 U.S.C. 636(a)(31)) is amended by adding at the end the following:

“(F) EXPRESS LOANS FOR RENEWABLE ENERGY AND ENERGY EFFICIENCY.—

“(i) DEFINITIONS.—In this subparagraph—

“(I) the term ‘biomass’—

“(aa) means any organic material that is available on a renewable or recurring basis, including—

“(AA) agricultural crops;

“(BB) trees grown for energy production;

“(CC) wood waste and wood residues;

“(DD) plants (including aquatic plants and grasses);

“(EE) residues;

“(FF) fibers;

“(GG) animal wastes and other waste materials; and

“(HH) fats, oils, and greases (including recycled fats, oils, and greases); and

“(bb) does not include—

“(AA) paper that is commonly recycled; or

“(BB) unsegregated solid waste;

“(II) the term ‘energy efficiency project’ means the installation or upgrading of equipment that results in a significant reduction in energy usage; and

“(III) the term ‘renewable energy system’ means a system of energy derived from—

“(aa) a wind, solar, biomass (including biodiesel), or geothermal source; or

“(bb) hydrogen derived from biomass or water using an energy source described in item (aa).

“(ii) LOANS.—Loans may be made under the ‘Express Loan Program’ for the purpose of—

“(I) purchasing a renewable energy system; or

“(II) an energy efficiency project for an existing business.”.

SEC. 270D. SMALL BUSINESS ENERGY EFFICIENCY.

(a) DEFINITIONS.—In this section—

(1) the terms “Administration” and “Administrator” mean the Small Business Administration and the Administrator thereof, respectively;

(2) the term “association” means the association of small business development centers established under section 21(a)(3)(A) of the Small Business Act (15 U.S.C. 648(a)(3)(A));

(3) the term “disability” has the meaning given that term in section 3 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12102);

(4) the term “electric utility” has the meaning given that term in section 3 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2602);

(5) the term “on-bill financing” means a low interest or no interest financing agreement between a small business concern and an electric utility for the purchase or installation of equipment, under which the regularly scheduled payment of that small business concern to that electric utility is not reduced by the amount of the reduction in cost attributable to the new equipment and that amount is credited to the electric utility, until the cost of the purchase or installation is repaid;

(6) the term “small business concern” has the meaning given that term in section 3 of the Small Business Act (15 U.S.C. 636);

(7) the term “small business development center” means a small business development center described in section 21 of the Small Business Act (15 U.S.C. 648);

(8) the term “telecommuting” means the use of telecommunications to perform work functions under circumstances which reduce or eliminate the need to commute; and

(9) the term “veteran” has the meaning given that term in section 101 of title 38, United States Code.

(b) IMPLEMENTATION OF SMALL BUSINESS ENERGY EFFICIENCY PROGRAM.—

(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Administrator shall promulgate final rules establishing the Government-wide program authorized under subsection (d) of section 337 of the Energy Policy and Conservation Act (42 U.S.C. 6307) that ensure compliance with that subsection by not later than 6 months after such date of enactment.

(2) PLAN.—Not later than 90 days after the date of enactment of this Act, the Administrator shall publish a detailed plan regarding how the Administrator will—

(A) assist small business concerns in becoming more energy efficient; and

(B) build on the Energy Star for Small Business Program of the Department of Energy and the Environmental Protection Agency.

(3) ASSISTANT ADMINISTRATOR FOR SMALL BUSINESS ENERGY POLICY.—

(A) IN GENERAL.—There is in the Administration an Assistant Administrator for Small Business Energy Policy, who shall be appointed by, and report to, the Administrator.

(B) DUTIES.—The Assistant Administrator for Small Business Energy Policy shall—

(i) oversee and administer the requirements under this subsection and section 337(d) of the Energy Policy and Conservation Act (42 U.S.C. 6307(d)); and

(ii) promote energy efficiency efforts for small business concerns and reduce energy costs of small business concerns.

(4) REPORTS.—The Administrator shall submit to the Committee on Small Business and Entre-

preneurship of the Senate and the Committee on Small Business of the House of Representatives an annual report on the progress of the Administrator in encouraging small business concerns to become more energy efficient, including data on the rate of use of the Small Business Energy Clearinghouse established under section 337(d)(4) of the Energy Policy and Conservation Act (42 U.S.C. 6307(d)(4)).

(c) SMALL BUSINESS ENERGY EFFICIENCY.—

(1) AUTHORITY.—The Administrator shall establish a Small Business Energy Efficiency Pilot Program (in this subsection referred to as the “Efficiency Pilot Program”) to provide energy efficiency assistance to small business concerns through small business development centers.

(2) SMALL BUSINESS DEVELOPMENT CENTERS.—

(A) IN GENERAL.—In carrying out the Efficiency Pilot Program, the Administrator shall enter into agreements with small business development centers under which such centers shall—

(i) provide access to information and resources on energy efficiency practices, including on-bill financing options;

(ii) conduct training and educational activities;

(iii) offer confidential, free, one-on-one, in-depth energy audits to the owners and operators of small business concerns regarding energy efficiency practices;

(iv) give referrals to certified professionals and other providers of energy efficiency assistance who meet such standards for educational, technical, and professional competency as the Administrator shall establish; and

(v) act as a facilitator between small business concerns, electric utilities, lenders, and the Administration to facilitate on-bill financing arrangements.

(B) REPORTS.—Each small business development center participating in the Efficiency Pilot Program shall submit to the Administrator and the Administrator of the Environmental Protection Agency an annual report that includes—

(i) a summary of the energy efficiency assistance provided by that center under the Efficiency Pilot Program;

(ii) the number of small business concerns assisted by that center under the Efficiency Pilot Program;

(iii) statistics on the total amount of energy saved as a result of assistance provided by that center under the Efficiency Pilot Program; and

(iv) any additional information determined necessary by the Administrator, in consultation with the association.

(C) REPORTS TO CONGRESS.—Not later than 60 days after the date on which all reports under subparagraph (B) relating to a year are submitted, the Administrator shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report summarizing the information regarding the Efficiency Pilot Program submitted by small business development centers participating in that program.

(3) ELIGIBILITY.—A small business development center shall be eligible to participate in the Efficiency Pilot Program only if that center is certified under section 21(k)(2) of the Small Business Act (15 U.S.C. 648(k)(2)).

(4) SELECTION OF PARTICIPATING STATE PROGRAMS.—

(A) GROUPINGS.—

(i) SELECTION OF PROGRAMS.—The Administrator shall select the small business development center programs of 2 States from each of the groupings of States described in clauses (ii) through (xi) to participate in the pilot program established under this subsection.

(ii) GROUP 1.—Group 1 shall consist of Maine, Massachusetts, New Hampshire, Connecticut, Vermont, and Rhode Island.

(iii) GROUP 2.—Group 2 shall consist of New York, New Jersey, Puerto Rico, and the Virgin Islands.

(iv) GROUP 3.—Group 3 shall consist of Pennsylvania, Maryland, West Virginia, Virginia, the District of Columbia, and Delaware.

(v) GROUP 4.—Group 4 shall consist of Georgia, Alabama, North Carolina, South Carolina, Mississippi, Florida, Kentucky, and Tennessee.

(vi) GROUP 5.—Group 5 shall consist of Illinois, Ohio, Michigan, Indiana, Wisconsin, and Minnesota.

(vii) GROUP 6.—Group 6 shall consist of Texas, New Mexico, Arkansas, Oklahoma, and Louisiana.

(viii) GROUP 7.—Group 7 shall consist of Missouri, Iowa, Nebraska, and Kansas.

(ix) GROUP 8.—Group 8 shall consist of Colorado, Wyoming, North Dakota, South Dakota, Montana, and Utah.

(x) GROUP 9.—Group 9 shall consist of California, Guam, American Samoa, Hawaii, Nevada, and Arizona.

(xi) GROUP 10.—Group 10 shall consist of Washington, Alaska, Idaho, and Oregon.

(5) MATCHING REQUIREMENT.—Subparagraphs (A) and (B) of section 21(a)(4) of the Small Business Act (15 U.S.C. 648(a)(4)) shall apply to assistance made available under the Efficiency Pilot Program.

(6) GRANT AMOUNTS.—Each small business development center selected to participate in the Efficiency Pilot Program under paragraph (4) shall be eligible to receive a grant in an amount equal to—

(A) not less than \$100,000 in each fiscal year; and

(B) not more than \$300,000 in each fiscal year.

(7) EVALUATION AND REPORT.—The Comptroller General of the United States shall—

(A) not later than 30 months after the date of disbursement of the first grant under the Efficiency Pilot Program, initiate an evaluation of that pilot program; and

(B) not later than 6 months after the date of the initiation of the evaluation under subparagraph (A), submit to the Administrator, the Committee on Small Business and Entrepreneurship of the Senate, and the Committee on Small Business of the House of Representatives, a report containing—

(i) the results of the evaluation; and

(ii) any recommendations regarding whether the Efficiency Pilot Program, with or without modification, should be extended to include the participation of all small business development centers.

(8) GUARANTEE.—The Administrator may guarantee the timely payment of a loan made to a small business concern through an on-bill financing agreement on such terms and conditions as the Administrator shall establish through a formal rule making, after providing notice and an opportunity for comment.

(9) AUTHORIZATION OF APPROPRIATIONS.—

(A) IN GENERAL.—There are authorized to be appropriated from such sums as are already authorized under section 21 of the Small Business Act to carry out this subsection—

(i) \$5,000,000 for the first fiscal year beginning after the date of enactment of this Act; and

(ii) \$5,000,000 for each of the 3 fiscal years following the fiscal year described in clause (i).

(B) LIMITATION ON USE OF OTHER FUNDS.—The Administrator may carry out the Efficiency Pilot Program only with amounts appropriated in advance specifically to carry out this subsection.

(10) TERMINATION.—The authority under this subsection shall terminate 4 years after the date of disbursement of the first grant under the Efficiency Pilot Program.

(d) SMALL BUSINESS TELECOMMUTING.—

(1) PILOT PROGRAM.—

(A) IN GENERAL.—In accordance with this subsection, the Administrator shall conduct, in not more than 5 of the regions of the Administration, a pilot program to provide information regarding telecommuting to employers that are small business concerns and to encourage such employers to offer telecommuting options to employees (in this subsection referred to as the “Telecommuting Pilot Program”).

(B) **SPECIAL OUTREACH TO INDIVIDUALS WITH DISABILITIES.**—In carrying out the Telecommuting Pilot Program, the Administrator shall make a concerted effort to provide information to—

(i) small business concerns owned by or employing individuals with disabilities, particularly veterans who are individuals with disabilities;

(ii) Federal, State, and local agencies having knowledge and expertise in assisting individuals with disabilities, including veterans who are individuals with disabilities; and

(iii) any group or organization, the primary purpose of which is to aid individuals with disabilities or veterans who are individuals with disabilities.

(C) **PERMISSIBLE ACTIVITIES.**—In carrying out the Telecommuting Pilot Program, the Administrator may—

(i) produce educational materials and conduct presentations designed to raise awareness in the small business community of the benefits and the ease of telecommuting;

(ii) conduct outreach—

(I) to small business concerns that are considering offering telecommuting options; and

(II) as provided in subparagraph (B); and

(iii) acquire telecommuting technologies and equipment to be used for demonstration purposes.

(D) **SELECTION OF REGIONS.**—In determining which regions will participate in the Telecommuting Pilot Program, the Administrator shall give priority consideration to regions in which Federal agencies and private-sector employers have demonstrated a strong regional commitment to telecommuting.

(2) **REPORT TO CONGRESS.**—Not later than 2 years after the date on which funds are first appropriated to carry out this subsection, the Administrator shall transmit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report containing the results of an evaluation of the Telecommuting Pilot Program and any recommendations regarding whether the pilot program, with or without modification, should be extended to include the participation of all regions of the Administration.

(3) **TERMINATION.**—The Telecommuting Pilot Program shall terminate 4 years after the date on which funds are first appropriated to carry out this subsection.

(4) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to the Administration \$5,000,000 to carry out this subsection.

(e) **ENCOURAGING INNOVATION IN ENERGY EFFICIENCY.**—Section 9 of the Small Business Act (15 U.S.C. 638) is amended by adding at the end the following:

“(z) **ENCOURAGING INNOVATION IN ENERGY EFFICIENCY.**—

“(1) **FEDERAL AGENCY ENERGY-RELATED PRIORITY.**—In carrying out its duties under this section to SBIR and STTR solicitations by Federal agencies, the Administrator shall—

“(A) ensure that such agencies give high priority to small business concerns that participate in or conduct energy efficiency or renewable energy system research and development projects; and

“(B) include in the annual report to Congress under subsection (b)(7) a determination of whether the priority described in subparagraph (A) is being carried out.

“(2) **CONSULTATION REQUIRED.**—The Administrator shall consult with the heads of other Federal agencies and departments in determining whether priority has been given to small business concerns that participate in or conduct energy efficiency or renewable energy system research and development projects, as required by this section.

“(3) **GUIDELINES.**—The Administrator shall, as soon as is practicable after the date of enact-

ment of this subsection, issue guidelines and directives to assist Federal agencies in meeting the requirements of this section.

“(4) **DEFINITIONS.**—In this subsection—

“(A) the term ‘biomass’—

“(i) means any organic material that is available on a renewable or recurring basis, including—

“(I) agricultural crops;

“(II) trees grown for energy production;

“(III) wood waste and wood residues;

“(IV) plants (including aquatic plants and grasses);

“(V) residues;

“(VI) fibers;

“(VII) animal wastes and other waste materials; and

“(VIII) fats, oils, and greases (including recycled fats, oils, and greases); and

“(ii) does not include—

“(I) paper that is commonly recycled; or

“(II) unsegregated solid waste;

“(B) the term ‘energy efficiency project’ means the installation or upgrading of equipment that results in a significant reduction in energy usage; and

“(C) the term ‘renewable energy system’ means a system of energy derived from—

“(i) a wind, solar, biomass (including biodiesel), or geothermal source; or

“(ii) hydrogen derived from biomass or water using an energy source described in clause (i).”.

Subtitle F—Assisting State and Local Governments in Energy Efficiency

SEC. 271. WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS.

Section 422 of the Energy Conservation and Production Act (42 U.S.C. 6872) is amended by striking “\$700,000,000 for fiscal year 2008” and inserting “\$750,000,000 for each of fiscal years 2008 through 2012”.

SEC. 272. STATE ENERGY CONSERVATION PLANS.

Section 365(f) of the Energy Policy and Conservation Act (42 U.S.C. 6325(f)) is amended by striking “fiscal year 2008” and inserting “each of fiscal years 2008 through 2012”.

SEC. 273. UTILITY ENERGY EFFICIENCY PROGRAMS.

(a) **ELECTRIC UTILITIES.**—Section 111(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(d)) is amended by adding at the end the following:

“(16) **INTEGRATED RESOURCE PLANNING.**—Each electric utility shall—

“(A) integrate energy efficiency resources into utility, State, and regional plans; and

“(B) adopt policies establishing cost-effective energy efficiency as a priority resource.

“(17) **RATE DESIGN MODIFICATIONS TO PROMOTE ENERGY EFFICIENCY INVESTMENTS.**—

“(A) **IN GENERAL.**—The rates allowed to be charged by any electric utility shall—

“(i) align utility incentives with the delivery of cost-effective energy efficiency; and

“(ii) promote energy efficiency investments.

“(B) **POLICY OPTIONS.**—In complying with subparagraph (A), each State regulatory authority and each nonregulated utility shall consider—

“(i) removing the throughput incentive and other regulatory and management disincentives to energy efficiency;

“(ii) providing utility incentives for the successful management of energy efficiency programs;

“(iii) including the impact on adoption of energy efficiency as 1 of the goals of retail rate design, recognizing that energy efficiency must be balanced with other objectives;

“(iv) adopting rate designs that encourage energy efficiency for each customer class; and

“(v) allowing timely recovery of energy efficiency-related costs.”.

(b) **NATURAL GAS UTILITIES.**—Section 303(b) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 3203(b)) is amended by adding at the end the following:

“(5) **ENERGY EFFICIENCY.**—Each natural gas utility shall—

“(A) integrate energy efficiency resources into the plans and planning processes of the natural gas utility; and

“(B) adopt policies that establish energy efficiency as a priority resource in the plans and planning processes of the natural gas utility.

“(6) **RATE DESIGN MODIFICATIONS TO PROMOTE ENERGY EFFICIENCY INVESTMENTS.**—

“(A) **IN GENERAL.**—The rates allowed to be charged by a natural gas utility shall align utility incentives with the deployment of cost-effective energy efficiency.

“(B) **POLICY OPTIONS.**—In complying with subparagraph (A), each State regulatory authority and each nonregulated utility shall consider—

“(i) separating fixed-cost revenue recovery from the volume of transportation or sales service provided to the customer;

“(ii) providing to utilities incentives for the successful management of energy efficiency programs, such as allowing utilities to retain a portion of the cost-reducing benefits accruing from the programs;

“(iii) promoting the impact on adoption of energy efficiency as 1 of the goals of retail rate design, recognizing that energy efficiency must be balanced with other objectives; and

“(iv) adopting rate designs that encourage energy efficiency for each customer class.”.

SEC. 274. ENERGY EFFICIENCY AND DEMAND RESPONSE PROGRAM ASSISTANCE.

The Secretary shall provide technical assistance regarding the design and implementation of the energy efficiency and demand response programs established under this title, and the amendments made by this title, to State energy offices, public utility regulatory commissions, and nonregulated utilities through the appropriate national laboratories of the Department of Energy.

SEC. 275. ENERGY AND ENVIRONMENTAL BLOCK GRANT.

Title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 et seq.) is amended by adding at the end the following:

“SEC. 123. ENERGY AND ENVIRONMENTAL BLOCK GRANT.

“(a) **DEFINITIONS.**—In this section

“(1) **ELIGIBLE ENTITY.**—The term ‘eligible entity’ means—

“(A) a State;

“(B) an eligible unit of local government within a State; and

“(C) an Indian tribe.

“(2) **ELIGIBLE UNIT OF LOCAL GOVERNMENT.**—The term ‘eligible unit of local government’ means—

“(A) a city with a population—

“(i) of at least 35,000; or

“(ii) that causes the city to be 1 of the top 10 most populous cities of the State in which the city is located; and

“(B) a county with a population—

“(i) of at least 200,000; or

“(ii) that causes the county to be 1 of the top 10 most populous counties of the State in which the county is located.

“(3) **SECRETARY.**—The term ‘Secretary’ means the Secretary of Energy.

“(4) **STATE.**—The term ‘State’ means—

“(A) a State;

“(B) the District of Columbia;

“(C) the Commonwealth of Puerto Rico; and

“(D) any other territory or possession of the United States.

“(b) **PURPOSE.**—The purpose of this section is to assist State, Indian tribal, and local governments in implementing strategies—

“(1) to reduce fossil fuel emissions created as a result of activities within the boundaries of the States or units of local government in an environmentally sustainable way that, to the maximum extent practicable, maximizes benefits for local and regional communities;

“(2) to reduce the total energy use of the States, Indian tribes, and units of local government; and

“(3) to improve energy efficiency in the transportation sector, building sector, and any other appropriate sectors.

“(c) PROGRAM.—

“(1) IN GENERAL.—The Secretary shall provide to eligible entities block grants to carry out eligible activities (as specified under paragraph (2)) relating to the implementation of environmentally beneficial energy strategies.

“(2) ELIGIBLE ACTIVITIES.—The Secretary, in consultation with the Administrator of the Environmental Protection Agency, the Secretary of Transportation, and the Secretary of Housing and Urban Development, shall establish a list of activities that are eligible for assistance under the grant program.

“(3) ALLOCATION TO STATES, INDIAN TRIBES, AND ELIGIBLE UNITS OF LOCAL GOVERNMENT.—

“(A) IN GENERAL.—Of the amounts made available to provide grants under this subsection, the Secretary shall allocate—

“(i) 68 percent to eligible units of local government;

“(ii) 28 percent to States; and

“(iii) 4 percent to Indian tribes.

“(B) DISTRIBUTION TO ELIGIBLE UNITS OF LOCAL GOVERNMENT.—

“(i) IN GENERAL.—The Secretary shall establish a formula for the distribution of amounts under subparagraph (A)(i) to eligible units of local government, taking into account any factors that the Secretary determines to be appropriate, including the residential and daytime population of the eligible units of local government.

“(ii) CRITERIA.—Amounts shall be distributed to eligible units of local government under clause (i) only if the eligible units of local government meet the criteria for distribution established by the Secretary for units of local government.

“(C) DISTRIBUTION TO STATES.—

“(i) IN GENERAL.—Of the amounts provided to States under subparagraph (A)(ii), the Secretary shall distribute—

“(I) at least 1.25 percent to each State; and

“(II) the remainder among the States, based on a formula, to be determined by the Secretary, that takes into account the population of the States and any other criteria that the Secretary determines to be appropriate.

“(ii) CRITERIA.—Amounts shall be distributed to States under clause (i) only if the States meet the criteria for distribution established by the Secretary for States.

“(iii) LIMITATION ON USE OF STATE FUNDS.—At least 40 percent of the amounts distributed to States under this subparagraph shall be used by the States for the conduct of eligible activities in nonentitlement areas in the States, in accordance with any criteria established by the Secretary.

“(D) DISTRIBUTION TO INDIAN TRIBES.—

“(i) IN GENERAL.—The Secretary shall establish a formula for the distribution of amounts under subparagraph (A)(iii) to eligible Indian tribes, taking into account any factors that the Secretary determines to be appropriate, including the residential and daytime population of the eligible Indian tribes.

“(ii) CRITERIA.—Amounts shall be distributed to eligible Indian tribes under clause (i) only if the eligible Indian tribes meet the criteria for distribution established by the Secretary for Indian tribes.

“(4) REPORT.—Not later than 2 years after the date on which an eligible entity first receives a grant under this section, and every 2 years thereafter, the eligible entity shall submit to the Secretary a report that describes any eligible activities carried out using assistance provided under this subsection.

“(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this sub-

section for each of fiscal years 2008 through 2012.

“(d) ENVIRONMENTALLY BENEFICIAL ENERGY STRATEGIES SUPPLEMENTAL GRANT PROGRAM.—

“(1) IN GENERAL.—The Secretary shall provide to each eligible entity that meets the applicable criteria under subparagraph (B)(ii), (C)(ii), or (D)(ii) of subsection (c)(3) a supplemental grant to pay the Federal share of the total costs of carrying out an activity relating to the implementation of an environmentally beneficial energy strategy.

“(2) REQUIREMENTS.—To be eligible for a grant under paragraph (1), an eligible entity shall—

“(A) demonstrate to the satisfaction of the Secretary that the eligible entity meets the applicable criteria under subparagraph (B)(ii), (C)(ii), or (D)(ii) of subsection (c)(3); and

“(B) submit to the Secretary for approval a plan that describes the activities to be funded by the grant.

“(3) COST-SHARING REQUIREMENT.—

“(A) FEDERAL SHARE.—The Federal share of the cost of carrying out any activities under this subsection shall be 75 percent.

“(B) NON-FEDERAL SHARE.—

“(i) FORM.—Not more than 50 percent of the non-Federal share may be in the form of in-kind contributions.

“(ii) LIMITATION.—Amounts provided to an eligible entity under subsection (c) shall not be used toward the non-Federal share.

“(4) MAINTENANCE OF EFFORT.—An eligible entity shall provide assurances to the Secretary that funds provided to the eligible entity under this subsection will be used only to supplement, not to supplant, the amount of Federal, State, tribal, and local funds otherwise expended by the eligible entity for eligible activities under this subsection.

“(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this subsection for each of fiscal years 2008 through 2012.

“(e) GRANTS TO OTHER STATES AND COMMUNITIES.—

“(1) IN GENERAL.—Of the total amount of funds that are made available each fiscal year to carry out this section, the Secretary shall use 2 percent of the amount to make competitive grants under this section to States, Indian tribes, and units of local government that are not eligible entities or to consortia of such units of local government.

“(2) APPLICATIONS.—To be eligible for a grant under this subsection, a State, Indian tribe, unit of local government, or consortia described in paragraph (1) shall apply to the Secretary for a grant to carry out an activity that would otherwise be eligible for a grant under subsection (c) or (d).

“(3) PRIORITY.—In awarding grants under this subsection, the Secretary shall give priority to—

“(A) States with populations of less than 2,000,000; and

“(B) projects that would result in significant energy efficiency improvements, reductions in fossil fuel use, or capital improvements.”.

SEC. 276. ENERGY SUSTAINABILITY AND EFFICIENCY GRANTS FOR INSTITUTIONS OF HIGHER EDUCATION.

Part G of title III of the Energy Policy and Conservation Act is amended by inserting after section 399 (42 U.S.C. 371h) the following:

“SEC. 399A. ENERGY SUSTAINABILITY AND EFFICIENCY GRANTS FOR INSTITUTIONS OF HIGHER EDUCATION.

“(a) DEFINITIONS.—In this section:

“(1) ENERGY SUSTAINABILITY.—The term ‘energy sustainability’ includes using a renewable energy resource and a highly efficient technology for electricity generation, transportation, heating, or cooling.

“(2) INSTITUTION OF HIGHER EDUCATION.—The term ‘institution of higher education’ has the

meaning given the term in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801).

“(b) GRANTS FOR ENERGY EFFICIENCY IMPROVEMENT.—

“(1) IN GENERAL.—The Secretary shall award not more than 100 grants to institutions of higher education to carry out projects to improve energy efficiency on the grounds and facilities of the institution of higher education, including not less than 1 grant to an institution of higher education in each State.

“(2) CONDITION.—As a condition of receiving a grant under this subsection, an institution of higher education shall agree to—

“(A) implement a public awareness campaign concerning the project in the community in which the institution of higher education is located; and

“(B) submit to the Secretary, and make available to the public, reports on any efficiency improvements, energy cost savings, and environmental benefits achieved as part of a project carried out under paragraph (1).

“(c) GRANTS FOR INNOVATION IN ENERGY SUSTAINABILITY.—

“(1) IN GENERAL.—The Secretary shall award not more than 250 grants to institutions of higher education to engage in innovative energy sustainability projects, including not less than 2 grants to institutions of higher education in each State.

“(2) INNOVATION PROJECTS.—An innovation project carried out with a grant under this subsection shall—

“(A) involve—

“(i) an innovative technology that is not yet commercially available; or

“(ii) available technology in an innovative application that maximizes energy efficiency and sustainability;

“(B) have the greatest potential for testing or demonstrating new technologies or processes; and

“(C) ensure active student participation in the project, including the planning, implementation, evaluation, and other phases of the project.

“(3) CONDITION.—As a condition of receiving a grant under this subsection, an institution of higher education shall agree to submit to the Secretary, and make available to the public, reports that describe the results of the projects carried out under paragraph (1).

“(d) AWARDING OF GRANTS.—

“(1) APPLICATION.—An institution of higher education that seeks to receive a grant under this section may submit to the Secretary an application for the grant at such time, in such form, and containing such information as the Secretary may prescribe.

“(2) SELECTION.—The Secretary shall establish a committee to assist in the selection of grant recipients under this section.

“(e) ALLOCATION TO INSTITUTIONS OF HIGHER EDUCATION WITH SMALL ENDOWMENTS.—Of the amount of grants provided for a fiscal year under this section, the Secretary shall provide not less 50 percent of the amount to institutions of higher education that have an endowment of not more than \$100,000,000, with 50 percent of the allocation set aside for institutions of higher education that have an endowment of not more than \$50,000,000.

“(f) GRANT AMOUNTS.—The maximum amount of grants for a project under this section shall not exceed—

“(1) in the case of grants for energy efficiency improvement under subsection (b), \$1,000,000; or

“(2) in the case of grants for innovation in energy sustainability under subsection (c), \$500,000.

“(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section for each of fiscal years 2008 through 2012.”.

SEC. 277. ENERGY EFFICIENCY AND RENEWABLE ENERGY WORKER TRAINING PROGRAM.

Section 1101 of the Energy Policy Act of 2005 (42 U.S.C. 16411) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c), the following:

“(d) ENERGY EFFICIENCY AND RENEWABLE ENERGY WORKER TRAINING PROGRAM.—

“(1) PURPOSE.—It is the purpose of this subsection to—

“(A) create a sustainable, comprehensive public program that provides quality training that is linked to jobs that are created through renewable energy and energy efficiency initiatives;

“(B) satisfy industry demand for a skilled workforce, to support economic growth, to boost America’s global competitiveness in the expanding energy efficiency and renewable energy industries, and to provide economic self-sufficiency and family-sustaining jobs for America’s workers, including low wage workers, through quality training and placement in job opportunities in the growing energy efficiency and renewable energy industries;

“(C) provide grants for the safety, health, and skills training and education of workers who are, or may be engaged in, activities related to the energy efficiency and renewable energy industries; and

“(D) provide funds for national and State industry-wide research, labor market information and labor exchange programs, and the development of nationally and State administered training programs.

“(2) GRANT PROGRAM.—

“(A) IN GENERAL.—Not later than 6 months after the date of enactment of this Act, the Secretary of Labor (referred to in this subsection as the ‘Secretary’), in consultation with the Secretary of Energy, shall establish an energy efficiency and renewable energy worker training program under which the Secretary shall carry out the activities described in paragraph (3) to achieve the purposes of this subsection.

“(B) ELIGIBILITY.—For purposes of providing assistance and services under the program established under this subsection—

“(i) target populations of individuals eligible for training and other services shall include, but not be limited to—

“(I) veterans, or past and present members of the reserve components of the Armed Forces;

“(II) workers affected by national energy and environmental policy;

“(III) workers displaced by the impacts of economic globalization;

“(IV) individuals, including at-risk youth, seeking employment pathways out of poverty and into economic self-sufficiency;

“(V) formerly incarcerated, adjudicated, non-violent offenders; and

“(VI) individuals in need of updated training related to the energy efficiency and renewable energy industries; and

“(ii) energy efficiency and renewable energy industries eligible for such assistance and services shall include—

“(I) the energy-efficient building, construction, and retrofits industries;

“(II) the renewable electric power industry;

“(III) the energy efficient and advanced drive train vehicle industry;

“(IV) the bio-fuels industry; and

“(V) the deconstruction and materials use industries.

“(3) ACTIVITIES.—

“(A) NATIONAL RESEARCH PROGRAM.—Under the program established under paragraph (2), the Secretary, acting through the Bureau of Labor Statistics, shall provide assistance to support national research to develop labor market data and to track future workforce trends resulting from energy-related initiatives carried out under this section. Activities carried out under this paragraph shall include—

“(i) linking research and development in renewable energy and energy efficiency technology with the development of standards and curricula for current and future jobs;

“(ii) the tracking and documentation of academic and occupational competencies as well as

future skill needs with respect to renewable energy and energy efficiency technology;

“(iii) tracking and documentation of occupational information and workforce training data with respect to renewable energy and energy efficiency technology;

“(iv) assessing new employment and work practices including career ladder and upgrade training as well as high performance work systems; and

“(v) collaborating with State agencies, industry, organized labor, and community and non-profit organizations to disseminate successful innovations for labor market services and worker training with respect to renewable energy and energy efficiency technology.

“(B) NATIONAL ENERGY TRAINING PARTNERSHIP GRANTS.—

“(i) IN GENERAL.—Under the program established under paragraph (2), the Secretary shall award National Energy Training Partnerships Grants on a competitive basis to eligible entities to enable such entities to carry out national training that leads to economic self-sufficiency and to develop an energy efficiency and renewable energy industries workforce. Grants shall be awarded under this subparagraph so as to ensure geographic diversity with at least 2 grants awarded to entities located in each of the 4 Petroleum Administration for Defense Districts with no subdistricts and at least 1 grant awarded to an entity located in each of the subdistricts of the Petroleum Administration for Defense District with subdistricts.

“(ii) ELIGIBILITY.—To be eligible to receive a grant under clause (i), an entity shall be a non-profit partnership that—

“(I) includes the equal participation of industry, including public or private employers, and labor organizations, including joint labor-management training programs, and may include community-based organizations, educational institutions, small businesses, cooperatives, State and local veterans agencies, and veterans service organizations; and

“(II) demonstrates—

“(aa) experience in implementing and operating worker skills training and education programs;

“(bb) the ability to identify and involve in training programs carried out under this grant, target populations of workers who are, or will be engaged in, activities related to energy efficiency and renewable energy industries; and

“(cc) the ability to help workers achieve economic self-sufficiency.

“(iii) ACTIVITIES.—Activities to be carried out under a grant under this subparagraph may include—

“(I) the provision of occupational skills training, including curriculum development, on-the-job training, and classroom training;

“(II) the provision of safety and health training;

“(III) the provision of basic skills, literacy, GED, English as a second language, and job readiness training;

“(IV) individual referral and tuition assistance for a community college training program;

“(V) the provision of customized training in conjunction with an existing registered apprenticeship program or labor-management partnership;

“(VI) the provision of career ladder and upgrade training; and

“(VII) the implementation of transitional jobs strategies.

“(C) STATE LABOR MARKET RESEARCH, INFORMATION, AND LABOR EXCHANGE RESEARCH PROGRAM.—

“(i) IN GENERAL.—Under the program established under paragraph (2), the Secretary shall award competitive grants to States to enable such States to administer labor market and labor exchange informational programs that include the implementation of the activities described in clause (ii).

“(ii) ACTIVITIES.—A State shall use amounts awarded under a grant under this subpara-

graph to provide funding to the State agency that administers the Wagner-Peyser Act and State unemployment compensation programs to carry out the following activities using State agency merit staff:

“(I) The identification of job openings in the renewable energy and energy efficiency sector.

“(II) The administration of skill and aptitude testing and assessment for workers.

“(III) The counseling, case management, and referral of qualified job seekers to openings and training programs, including energy efficiency and renewable energy training programs.

“(D) STATE ENERGY TRAINING PARTNERSHIP PROGRAM.—

“(i) IN GENERAL.—Under the program established under paragraph (2), the Secretary shall award competitive grants to States to enable such States to administer renewable energy and energy efficiency workforce development programs that include the implementation of the activities described in clause (ii).

“(ii) ACTIVITIES.—

“(I) IN GENERAL.—A State shall use amounts awarded under a grant under this subparagraph to award competitive grants to eligible State Energy Sector Partnerships to enable such Partnerships to coordinate with existing apprenticeship and labor management training programs and implement training programs that lead to the economic self-sufficiency of trainees.

“(II) ELIGIBILITY.—To be eligible to receive a grant under this subparagraph, a State Energy Sector Partnership shall—

“(aa) consist of non-profit organizations that include equal participation from industry, including public or private nonprofit employers, and labor organizations, including joint labor-management training programs, and may include representatives from local governments, worker investment agency one-stop career centers, community based organizations, community colleges, other post-secondary institutions, small businesses, cooperatives, State and local veterans agencies, and veterans service organizations;

“(bb) demonstrate experience in implementing and operating worker skills training and education programs; and

“(cc) demonstrate the ability to identify and involve in training programs, target populations of workers who are, or will be engaged in, activities related to energy efficiency and renewable energy industries.

“(iii) PRIORITY.—In awarding grants under this subparagraph, the Secretary shall give priority to States that demonstrate linkages of activities under the grant with—

“(I) meeting national energy policies associated with energy efficiency, renewable energy, and the reduction of emissions of greenhouse gases; and

“(II) meeting State energy policies associated with energy efficiency, renewable energy, and the reduction of emissions of greenhouse gases.

“(iv) COORDINATION.—A grantee under this subparagraph shall coordinate activities carried out under the grant with existing apprenticeship and labor management training programs and implement training programs that lead to the economic self-sufficiency of trainees, including providing—

“(I) outreach and recruitment services, in coordination with the appropriate State agency;

“(II) occupational skills training, including curriculum development, on-the-job training, and classroom training;

“(III) safety and health training;

“(IV) basic skills, literacy, GED, English as a second language, and job readiness training;

“(V) individual referral and tuition assistance for a community college training program;

“(VI) customized training in conjunction with an existing registered apprenticeship program or labor-management partnership;

“(VII) career ladder and upgrade training; and

“(VIII) services under transitional jobs strategies.

“(4) WORKER PROTECTIONS AND NON-DISCRIMINATION REQUIREMENTS.—

“(A) APPLICATION OF WIA.—The provisions of sections 181 and 188 of the Workforce Investment Act of 1998 (29 U.S.C. 2931 and 2938) shall apply to all programs carried out with assistance under this subsection.

“(B) CONSULTATION WITH LABOR ORGANIZATIONS.—If a labor organization represents a substantial number of workers who are engaged in similar work or training in an area that is the same as the area that is proposed to be funded under this subsection, the labor organization shall be provided an opportunity to be consulted and to submit comments in regard to such a proposal.

“(5) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection, \$100,000,000 for each fiscal year, of which—

“(A) not to exceed 20 percent of the amount appropriated in each fiscal year shall be made available for, and shall be equally divided between, national labor market research and information under paragraph (3)(A) and State labor market information and labor exchange research under paragraph (3)(C); and

“(B) the remainder shall be divided equally between National Energy Partnership Training Grants under paragraph (3)(B) and State energy training partnership grants under paragraph (3)(D).

“(6) DEFINITION.—In this subsection, the term ‘renewable electric power’ has the meaning given the term ‘renewable energy’ in section 203(b)(2) of the Energy Policy Act of 2005 (Public Law 109–58).”

SEC. 278. ASSISTANCE TO STATES TO REDUCE SCHOOL BUS IDLING.

(a) STATEMENT OF POLICY.—Congress encourages each local educational agency (as defined in section 9101(26) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801(26))) that receives Federal funds under the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6301 et seq.) to develop a policy to reduce the incidence of school bus idling at schools while picking up and unloading students.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary, working in coordination with the Secretary of Education, \$5,000,000 for each of fiscal years 2007 through 2012 for use in educating States and local education agencies about—

- (1) benefits of reducing school bus idling; and
- (2) ways in which school bus idling may be reduced.

SEC. 279. DEFINITION OF STATE.

Section 412 of the Energy Conservation and Production Act (42 U.S.C. 6862) is amended by striking paragraph (8) and inserting the following:

“(8) STATE.—The term ‘State’ means—

- “(A) a State;
- “(B) the District of Columbia; and
- “(C) the Commonwealth of Puerto Rico.”

SEC. 280. COORDINATION OF PLANNED REFINERY OUTAGES.

(a) DEFINITIONS.—In this section:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of the Energy Information Administration.

(2) PLANNED REFINERY OUTAGE.—

(A) IN GENERAL.—The term “planned refinery outage” means a removal, scheduled before the date on which the removal occurs, of a refinery, or any unit of a refinery, from service for maintenance, repair, or modification.

(B) EXCLUSION.—The term “planned refinery outage” does not include any necessary and unplanned removal of a refinery, or any unit of a refinery, from service as a result of a component failure, safety hazard, emergency, or action reasonably anticipated to be necessary to prevent such events.

(3) REFINED PETROLEUM PRODUCT.—The term “refined petroleum product” means any gasoline, diesel fuel, fuel oil, lubricating oil, liquid petroleum gas, or other petroleum distillate that is produced through the refining or processing of crude oil or an oil derived from tar sands, shale, or coal.

(4) REFINERY.—The term “refinery” means a facility used in the production of a refined petroleum product through distillation, cracking, or any other process.

(5) SECRETARY.—The term “Secretary” means the Secretary of Energy.

(b) REVIEW AND ANALYSIS OF AVAILABLE INFORMATION.—The Administrator shall, on an ongoing basis—

(1) review information on planned refinery outages that is available from commercial reporting services;

(2) analyze that information to determine whether the scheduling of a planned refinery outage may nationally or regionally affect the price or supply of any refined petroleum product by—

(A) decreasing the production of the refined petroleum product; and

(B) causing or contributing to a retail or wholesale supply shortage or disruption;

(3) not less frequently than twice each year, submit to the Secretary a report describing the results of the review and analysis under paragraphs (1) and (2); and

(4) specifically alert the Secretary of any planned refinery outage that the Administrator determines may nationally or regionally affect the price or supply of a refined petroleum product.

(c) ACTION BY SECRETARY.—On a determination by the Secretary, based on a report or alert under paragraph (3) or (4) of subsection (b), that a planned refinery outage may affect the price or supply of a refined petroleum product, the Secretary shall make available to refinery operators information on planned refinery outages to encourage reductions of the quantity of refinery capacity that is out of service at any time.

(d) LIMITATION.—Nothing in this section shall alter any existing legal obligation or responsibility of a refinery operator, or create any legal right of action, nor shall this section authorize the Secretary—

(1) to prohibit a refinery operator from conducting a planned refinery outage; or

(2) to require a refinery operator to continue to operate a refinery.

SEC. 281. TECHNICAL CRITERIA FOR CLEAN COAL POWER INITIATIVE.

Section 402(b)(1)(B)(ii) of the Energy Policy Act of 2005 (42 U.S.C. 15962(b)(1)(B)(ii)) is amended by striking subclause (I) and inserting the following:

“(I)(aa) to remove at least 99 percent of sulfur dioxide; or

“(bb) to emit not more than 0.04 pound SO₂ per million Btu, based on a 30-day average;”

SEC. 282. ADMINISTRATION.

Section 106 of the Alaska Natural Gas Pipeline Act (15 U.S.C. 720d) is amended by adding at the end the following:

“(h) ADMINISTRATION.—

“(1) PERSONNEL APPOINTMENTS.—

“(A) IN GENERAL.—The Federal Coordinator may appoint and terminate such personnel as the Federal Coordinator determines to be appropriate.

“(B) AUTHORITY OF FEDERAL COORDINATOR.—Personnel appointed by the Federal Coordinator under subparagraph (A) shall be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service.

“(2) COMPENSATION.—

“(A) IN GENERAL.—Subject to subparagraph (B), personnel appointed by the Federal Coordinator under paragraph (1)(A) shall be paid without regard to the provisions of chapter 51

and subchapter III of chapter 53 of title 5, United States Code (relating to classification and General Schedule pay rates).

“(B) MAXIMUM LEVEL OF COMPENSATION.—The rate of pay for personnel appointed by the Federal Coordinator under paragraph (1)(A) shall not exceed the maximum level of rate payable for level III of the Executive Schedule.

“(C) APPLICABILITY OF SECTION 5941.—Section 5941 of title 5, United States Code, shall apply to personnel appointed by the Federal Coordinator under paragraph (1)(A).

“(3) TEMPORARY SERVICES.—

“(A) IN GENERAL.—The Federal Coordinator may procure temporary and intermittent services in accordance with section 3109(b) of title 5, United States Code.

“(B) MAXIMUM LEVEL OF COMPENSATION.—The level of compensation of an individual employed on a temporary or intermittent basis under subparagraph (A) shall not exceed the maximum level of rate payable for level III of the Executive Schedule.

“(4) FEES, CHARGES, AND COMMISSIONS.—

“(A) IN GENERAL.—The Federal Coordinator shall have the authority to establish, change, and abolish reasonable filing and service fees, charges, and commissions, require deposits of payments, and provide refunds as provided to the Secretary of the Interior in section 304 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734), except that the authority shall be with respect to the duties of the Federal Coordinator, as delineated in the Alaska Natural Gas Pipeline Act (15 U.S.C. 720 et seq.), as amended.

“(B) AUTHORITY OF SECRETARY OF THE INTERIOR.—Subparagraph (A) shall not affect the authority of the Secretary of the Interior to establish, change, and abolish reasonable filing and service fees, charges, and commissions, require deposits of payments, and provide refunds under section 304 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734).

“(C) USE OF FUNDS.—The Federal Coordinator is authorized to use, without further appropriation, amounts collected under subparagraph (A) to carry out this section.”

SEC. 283. OFFSHORE RENEWABLE ENERGY.

(a) LEASES, EASEMENTS, OR RIGHTS-OF-WAY FOR ENERGY AND RELATED PURPOSES.—Section 8(p) of the Outer Continental Shelf Lands Act (43 U.S.C. 1337(p)) is amended—

(1) by inserting after “Secretary of the Department in which the Coast Guard is operating” the following: “, the Secretary of Commerce;”;

(2) by striking paragraph (3) and inserting the following:

“(3) COMPETITIVE OR NONCOMPETITIVE BASIS.—Any lease, easement, or right-of-way under paragraph (1) shall be issued on a competitive basis, unless—

“(A) the lease, easement, or right-of-way relates to a project that meets the criteria established under section 388(d) of the Energy Policy Act of 2005 (43 U.S.C. 1337 note; Public Law 109–58);

“(B) the lease, easement, or right-of-way—

“(i) is for the placement and operation of a meteorological or marine data collection facility; and

“(ii) has a term of not more than 5 years; or

“(C) the Secretary determines, after providing public notice of a proposed lease, easement, or right-of-way, that no competitive interest exists.”; and

(3) by adding at the end the following:

“(1) CLARIFICATION.—

“(A) IN GENERAL.—Subject to subparagraph (B), the Federal Energy Regulatory Commission shall not have authority to approve or license a wave or current energy project on the outer Continental Shelf under part I of the Federal Power Act (16 U.S.C. 792 et seq.)

“(B) TRANSMISSION OF POWER.—Subparagraph (A) shall not affect any authority of the

Commission with respect to the transmission of power generated from a project described in subparagraph (A).”.

(b) **CONSIDERATION OF CERTAIN REQUESTS FOR AUTHORIZATION.**—In considering a request for authorization of a project pending before the Commission on the outer Continental Shelf as of the date of enactment of this Act, the Secretary of the Interior shall rely, to the maximum extent practicable, on the materials submitted to the Commission before that date.

(c) **SAVINGS PROVISION.**—Nothing in this section or an amendment made by this section requires the resubmission of any document that was previously submitted, or the reauthorization of any action that was previously authorized, with respect to a project on the outer Continental Shelf, for which a preliminary permit was issued by the Commission before the date of enactment of this Act.

Subtitle G—Marine and Hydrokinetic Renewable Energy Promotion

SEC. 291. DEFINITION OF MARINE AND HYDROKINETIC RENEWABLE ENERGY.

(a) **IN GENERAL.**—In this subtitle, the term “marine and hydrokinetic renewable energy” means electrical energy from—

(1) waves, tides, and currents in oceans, estuaries, and tidal areas;

(2) free flowing water in rivers, lakes, and streams;

(3) free flowing water in man-made channels, including projects that utilize nonmechanical structures to accelerate the flow of water for electric power production purposes; and

(4) differentials in ocean temperature (ocean thermal energy conversion).

(b) **EXCLUSION.**—Except as provided in subsection (a)(3), the term “marine and hydrokinetic renewable energy” does not include energy from any source that uses a dam, diversionary structure, or impoundment for electric power purposes.

SEC. 292. RESEARCH AND DEVELOPMENT.

(a) **PROGRAM.**—The Secretary, in consultation with the Secretary of Commerce and the Secretary of the Interior, shall establish a program of marine and hydrokinetic renewable energy research, including—

(1) developing and demonstrating marine and hydrokinetic renewable energy technologies;

(2) reducing the manufacturing and operation costs of marine and hydrokinetic renewable energy technologies;

(3) increasing the reliability and survivability of marine and hydrokinetic renewable energy facilities;

(4) integrating marine and hydrokinetic renewable energy into electric grids;

(5) identifying opportunities for cross fertilization and development of economies of scale between offshore wind and marine and hydrokinetic renewable energy sources;

(6) identifying, in conjunction with the Secretary of Commerce and the Secretary of the Interior, the potential environmental impacts of marine and hydrokinetic renewable energy technologies and measures to minimize or prevent adverse impacts, and technologies and other means available for monitoring and determining environmental impacts;

(7) identifying, in conjunction with the Commandant of the United States Coast Guard, the potential navigational impacts of marine and hydrokinetic renewable energy technologies and measures to minimize or prevent adverse impacts;

(8) standards development, demonstration, and technology transfer for advanced systems engineering and system integration methods to identify critical interfaces; and

(9) providing public information and opportunity for public comment concerning all technologies.

(b) **REPORT.**—Not later than 18 months after the date of enactment of this Act, the Secretary,

in consultation with the Secretary of Commerce and the Secretary of the Interior, shall provide to the appropriate committees of Congress a report that addresses—

(1) the potential environmental impacts of hydrokinetic renewable energy technologies in free-flowing water in rivers, lakes, and streams;

(2) the means by which to minimize or prevent any adverse environmental impacts;

(3) the potential role of monitoring and adaptive management in addressing any adverse environmental impacts; and

(4) the necessary components of such an adaptive management program.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary to carry out this section \$50,000,000 for each of the fiscal years 2008 through 2017.

SEC. 293. NATIONAL OCEAN ENERGY RESEARCH CENTERS.

(a) **IN GENERAL.**—Subject to the availability of appropriations under subsection (e), the Secretary shall establish not less than 1, and not more than 6, national ocean energy research centers at institutions of higher education for the purpose of conducting research, development, demonstration, and testing of ocean energy technologies and associated equipment.

(b) **EVALUATIONS.**—Each Center shall (in consultation with developers, utilities, and manufacturers) conduct evaluations of technologies and equipment described in subsection (a).

(c) **LOCATION.**—In establishing centers under this section, the Secretary shall locate the centers in coastal regions of the United States in a manner that, to the maximum extent practicable, is geographically dispersed.

(d) **COORDINATION.**—Prior to carrying out any activity under this section in waters subject to the jurisdiction of the United States, the Secretary shall identify, in conjunction with the Secretary of Commerce and the Secretary of the Interior, the potential environmental impacts of such activity and measures to minimize or prevent adverse impacts.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriate such sums as are necessary to carry out this section.

TITLE III—CARBON CAPTURE AND STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION

SEC. 301. SHORT TITLE.

This title may be cited as the “Carbon Capture and Sequestration Act of 2007”.

SEC. 302. CARBON CAPTURE AND STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.

Section 963 of the Energy Policy Act of 2005 (42 U.S.C. 16293) is amended—

(1) in the section heading, by striking “**RESEARCH AND DEVELOPMENT**” and inserting “**AND STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION**”;

(2) in subsection (a)—

(A) by striking “research and development” and inserting “and storage research, development, and demonstration”; and

(B) by striking “capture technologies on combustion-based systems” and inserting “capture and storage technologies related to energy systems”;

(3) in subsection (b)—

(A) in paragraph (3), by striking “and” at the end;

(B) in paragraph (4), by striking the period at the end and inserting “; and”; and

(C) by adding at the end the following:

“(5) to expedite and carry out large-scale testing of carbon sequestration systems in a range of geological formations that will provide information on the cost and feasibility of deployment of sequestration technologies.”; and

(4) by striking subsection (c) and inserting the following:

“(c) **PROGRAMMATIC ACTIVITIES.**—

“(1) **ENERGY RESEARCH AND DEVELOPMENT UNDERLYING CARBON CAPTURE AND STORAGE TECHNOLOGIES AND CARBON USE ACTIVITIES.**—

“(A) **IN GENERAL.**—The Secretary shall carry out fundamental science and engineering research (including laboratory-scale experiments, numeric modeling, and simulations) to develop and document the performance of new approaches to capture and store, recycle, or reuse carbon dioxide.

“(B) **PROGRAM INTEGRATION.**—The Secretary shall ensure that fundamental research carried out under this paragraph is appropriately applied to energy technology development activities, the field testing of carbon sequestration, and carbon use activities, including—

“(i) development of new or improved technologies for the capture and storage of carbon dioxide;

“(ii) development of new or improved technologies that reduce the cost and increase the efficacy of advanced compression of carbon dioxide required for the storage of carbon dioxide;

“(iii) modeling and simulation of geological sequestration field demonstrations;

“(iv) quantitative assessment of risks relating to specific field sites for testing of sequestration technologies;

“(v) research and development of new and improved technologies for—

“(I) carbon use, including recycling and reuse of carbon dioxide; and

“(II) the containment of carbon dioxide in the form of solid materials or products derived from a gasification technology that does not involve geologic containment or injection; and

“(vi) research and development of new and improved technologies for oxygen separation from air.

“(2) **FIELD VALIDATION TESTING ACTIVITIES.**—

“(A) **IN GENERAL.**—The Secretary shall promote, to the maximum extent practicable, regional carbon sequestration partnerships to conduct geologic sequestration tests involving carbon dioxide injection and monitoring, mitigation, and verification operations in a variety of candidate geological settings, including—

“(i) operating oil and gas fields;

“(ii) depleted oil and gas fields;

“(iii) unmineable coal seams;

“(iv) deep saline formations;

“(v) deep geological systems that may be used as engineered reservoirs to extract economical quantities of heat from geothermal resources of low permeability or porosity;

“(vi) deep geologic systems containing basalt formations; and

“(vii) coal-bed methane recovery.

“(B) **OBJECTIVES.**—The objectives of tests conducted under this paragraph shall be—

“(i) to develop and validate geophysical tools, analysis, and modeling to monitor, predict, and verify carbon dioxide containment;

“(ii) to validate modeling of geological formations;

“(iii) to refine storage capacity estimated for particular geological formations;

“(iv) to determine the fate of carbon dioxide concurrent with and following injection into geological formations;

“(v) to develop and implement best practices for operations relating to, and monitoring of, injection and storage of carbon dioxide in geologic formations;

“(vi) to assess and ensure the safety of operations related to geological storage of carbon dioxide; and

“(vii) to allow the Secretary to promulgate policies, procedures, requirements, and guidance to ensure that the objectives of this subparagraph are met in large-scale testing and deployment activities for carbon capture and storage that are funded by the Department of Energy.

“(3) **LARGE-SCALE TESTING AND DEPLOYMENT.**—

“(A) **IN GENERAL.**—The Secretary shall conduct not less than 7 initial large-volume sequestration tests involving at least 1,000,000 tons of carbon dioxide per year for geological containment of carbon dioxide (at least 1 of which shall be international in scope) to collect and validate

information on the cost and feasibility of commercial deployment of technologies for geological containment of carbon dioxide.

“(B) DIVERSITY OF FORMATIONS TO BE STUDIED.—In selecting formations for study under this paragraph, the Secretary shall consider a variety of geological formations across the United States, and require characterization and modeling of candidate formations, as determined by the Secretary.

“(4) PREFERENCE IN PROJECT SELECTION FROM MERITORIOUS PROPOSALS.—In making competitive awards under this subsection, subject to the requirements of section 989, the Secretary shall give preference to proposals from partnerships among industrial, academic, and government entities.

“(5) COST SHARING.—Activities under this subsection shall be considered research and development activities that are subject to the cost-sharing requirements of section 988(b).

“(6) PROGRAM REVIEW AND REPORT.—During fiscal year 2011, the Secretary shall—

“(A) conduct a review of programmatic activities carried out under this subsection; and

“(B) make recommendations with respect to continuation of the activities.

“(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section—

“(1) \$150,000,000 for fiscal year 2008;

“(2) \$200,000,000 for fiscal year 2009;

“(3) \$200,000,000 for fiscal year 2010;

“(4) \$180,000,000 for fiscal year 2011; and

“(5) \$165,000,000 for fiscal year 2012.”

SEC. 303. CARBON DIOXIDE STORAGE CAPACITY ASSESSMENT.

(a) DEFINITIONS.—In this section

(1) ASSESSMENT.—The term “assessment” means the national assessment of capacity for carbon dioxide completed under subsection (f).

(2) CAPACITY.—The term “capacity” means the portion of a storage formation that can retain carbon dioxide in accordance with the requirements (including physical, geological, and economic requirements) established under the methodology developed under subsection (b).

(3) ENGINEERED HAZARD.—The term “engineered hazard” includes the location and completion history of any well that could affect potential storage.

(4) RISK.—The term “risk” includes any risk posed by geomechanical, geochemical, hydrogeological, structural, and engineered hazards.

(5) SECRETARY.—The term “Secretary” means the Secretary of the Interior, acting through the Director of the United States Geological Survey.

(6) STORAGE FORMATION.—The term “storage formation” means a deep saline formation, unmineable coal seam, or oil or gas reservoir that is capable of accommodating a volume of industrial carbon dioxide.

(b) METHODOLOGY.—Not later than 1 year after the date of enactment of this Act, the Secretary shall develop a methodology for conducting an assessment under subsection (f), taking into consideration—

(1) the geographical extent of all potential storage formations in all States;

(2) the capacity of the potential storage formations;

(3) the injectivity of the potential storage formations;

(4) an estimate of potential volumes of oil and gas recoverable by injection and storage of industrial carbon dioxide in potential storage formations;

(5) the risk associated with the potential storage formations; and

(6) the work done to develop the Carbon Sequestration Atlas of the United States and Canada that was completed by the Department of Energy.

(c) COORDINATION.—

(1) FEDERAL COORDINATION.—

(A) CONSULTATION.—The Secretary shall consult with the Secretary of Energy and the Ad-

ministrator of the Environmental Protection Agency on issues of data sharing, format, development of the methodology, and content of the assessment required under this title to ensure the maximum usefulness and success of the assessment.

(B) COOPERATION.—The Secretary of Energy and the Administrator shall cooperate with the Secretary to ensure, to the maximum extent practicable, the usefulness and success of the assessment.

(2) STATE COORDINATION.—The Secretary shall consult with State geological surveys and other relevant entities to ensure, to the maximum extent practicable, the usefulness and success of the assessment.

(d) EXTERNAL REVIEW AND PUBLICATION.—On completion of the methodology under subsection (b), the Secretary shall—

(1) publish the methodology and solicit comments from the public and the heads of affected Federal and State agencies;

(2) establish a panel of individuals with expertise in the matters described in paragraphs (1) through (5) of subsection (b) composed, as appropriate, of representatives of Federal agencies, institutions of higher education, nongovernmental organizations, State organizations, industry, and international geoscience organizations to review the methodology and comments received under paragraph (1); and

(3) on completion of the review under paragraph (2), publish in the Federal Register the revised final methodology.

(e) PERIODIC UPDATES.—The methodology developed under this section shall be updated periodically (including at least once every 5 years) to incorporate new data as the data becomes available.

(f) NATIONAL ASSESSMENT.—

(1) IN GENERAL.—Not later than 2 years after the date of publication of the methodology under subsection (d)(1), the Secretary, in consultation with the Secretary of Energy and State geological surveys, shall complete a national assessment of capacity for carbon dioxide in accordance with the methodology.

(2) GEOLOGICAL VERIFICATION.—As part of the assessment under this subsection, the Secretary shall carry out a drilling program to supplement the geological data relevant to determining storage capacity of carbon dioxide in geological storage formations, including—

(A) well log data;

(B) core data; and

(C) fluid sample data.

(3) PARTNERSHIP WITH OTHER DRILLING PROGRAMS.—As part of the drilling program under paragraph (2), the Secretary shall enter, as appropriate, into partnerships with other entities to collect and integrate data from other drilling programs relevant to the storage of carbon dioxide in geologic formations.

(4) INCORPORATION INTO NATCARB.—

(A) IN GENERAL.—On completion of the assessment, the Secretary of Energy and the Secretary of the Interior shall incorporate the results of the assessment using—

(i) the NatCarb database, to the maximum extent practicable; or

(ii) a new database developed by the Secretary of Energy, as the Secretary of Energy determines to be necessary.

(B) RANKING.—The database shall include the data necessary to rank potential storage sites for capacity and risk, across the United States, within each State, by formation, and within each basin.

(5) REPORT.—Not later than 180 days after the date on which the assessment is completed, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Science and Technology of the House of Representatives a report describing the findings under the assessment.

(6) PERIODIC UPDATES.—The national assessment developed under this section shall be updated periodically (including at least once every

5 years) to support public and private sector decisionmaking.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$30,000,000 for the period of fiscal years 2008 through 2012.

SEC. 304. CARBON CAPTURE AND STORAGE INITIATIVE.

(a) DEFINITIONS.—In this section:

(1) INDUSTRIAL SOURCES OF CARBON DIOXIDE.—The term “industrial sources of carbon dioxide” means one or more facilities to—

(A) generate electric energy from fossil fuels;

(B) refine petroleum;

(C) manufacture iron or steel;

(D) manufacture cement or cement clinker;

(E) manufacture commodity chemicals (including from coal gasification);

(F) manufacture transportation fuels from coal; or

(G) manufacture biofuels.

(2) SECRETARY.—The term “Secretary” means the Secretary of Energy.

(b) PROGRAM ESTABLISHMENT.—

(1) IN GENERAL.—The Secretary shall carry out a program to demonstrate technologies for the large-scale capture of carbon dioxide from industrial sources of carbon dioxide.

(2) SCOPE OF AWARD.—An award under this section shall be only for the portion of the project that—

(A) carries out the large-scale capture (including purification and compression) of carbon dioxide;

(B) provides for the cost of transportation and injection of carbon dioxide; and

(C) incorporates a comprehensive measurement, monitoring, and validation program.

(3) QUALIFICATIONS FOR AWARD.—To be eligible for an award under this section, a project proposal must include the following:

(A) CAPACITY.—The capture of not less than eighty-five percent of the produced carbon dioxide at the facility, and not less than 500,000 short tons of carbon dioxide per year.

(B) STORAGE AGREEMENT.—A binding agreement for the storage of all of the captured carbon dioxide in—

(i) a field testing validation activity under section 963 of the Energy Policy Act of 2005, as amended by this Act; or

(ii) other geological storage projects approved by the Secretary.

(C) PURITY LEVEL.—A purity level of at least 95 percent carbon dioxide by volume for the captured carbon dioxide delivered for storage.

(D) COMMITMENT TO CONTINUED OPERATION OF SUCCESSFUL UNIT.—If the project successfully demonstrates capture and storage of carbon dioxide, a commitment to continued capture and storage of carbon dioxide after the conclusion of the demonstration.

(4) COST-SHARING.—The cost-sharing requirements of section 988 of the Energy Policy Act of 2005 shall apply to this section.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to carry out this section \$100,000,000 per year for fiscal years 2009 through 2013.

SEC. 305. CAPITOL POWER PLANT CARBON DIOXIDE EMISSIONS DEMONSTRATION PROGRAM.

The first section of the Act of March 4, 1911 (2 U.S.C. 2162; 36 Stat. 1414, chapter 285), is amended in the seventh undesignated paragraph (relating to the Capitol power plant), under the heading “PUBLIC BUILDINGS”, under the heading “UNDER THE DEPARTMENT OF THE INTERIOR”—

(1) by striking “ninety thousand dollars.” and inserting “\$90,000.”; and

(2) by striking “Provided, That hereafter the” and all that follows through the end of the proviso and inserting the following:

“(a) DESIGNATION.—The heating, lighting, and power plant constructed under the terms of the Act approved April 28, 1904 (33 Stat. 479, chapter 1762), shall be known as the ‘Capitol

power plant', and all vacancies occurring in the force operating that plant and the substations in connection with the plant shall be filled by the Architect of the Capitol, with the approval of the commission in control of the House Office Building appointed under the first section of the Act of March 4, 1907 (2 U.S.C. 2001).

“(b) CAPITOL POWER PLANT CARBON DIOXIDE EMISSIONS DEMONSTRATION PROGRAM.—

“(1) DEFINITIONS.—In this subsection:

“(A) ADMINISTRATOR.—The term ‘Administrator’ means the Administrator of the Environmental Protection Agency.

“(B) CARBON DIOXIDE ENERGY EFFICIENCY.—The term ‘carbon dioxide energy efficiency’, with respect to a project, means the quantity of electricity used to power equipment for carbon dioxide capture and storage or use.

“(C) PROGRAM.—The term ‘program’ means the competitive grant demonstration program established under paragraph (2)(B).

“(2) ESTABLISHMENT OF PROGRAM.—

“(A) FEASIBILITY STUDY.—Not later than 180 days after the date of enactment of this section, the Architect of the Capitol, in cooperation with the Administrator, shall complete a feasibility study evaluating the available methods to proceed with the project and program established under this section, taking into consideration—

“(i) the availability of carbon capture technologies;

“(ii) energy conservation and carbon reduction strategies; and

“(iii) security of operations at the Capitol power plant.

“(B) COMPETITIVE GRANT PROGRAM.—The Architect of the Capitol, in cooperation with the Administrator, shall establish a competitive grant demonstration program under which the Architect of the Capitol shall, subject to the availability of appropriations, provide to eligible entities, as determined by the Architect of the Capitol, in cooperation with the Administrator, grants to carry out projects to demonstrate, during the 2-year period beginning on the date of enactment of this subsection, the capture and storage or use of carbon dioxide emitted from the Capitol power plant as a result of burning coal.

“(3) REQUIREMENTS.—

“(A) PROVISION OF GRANTS.—

“(i) IN GENERAL.—The Architect of the Capitol, in cooperation with the Administrator, shall provide the grants under the program on a competitive basis.

“(ii) FACTORS FOR CONSIDERATION.—In providing grants under the program, the Architect of the Capitol, in cooperation with the Administrator, shall take into consideration—

“(I) the practicability of conversion by the proposed project of carbon dioxide into useful products, such as transportation fuel;

“(II) the carbon dioxide energy efficiency of the proposed project; and

“(III) whether the proposed project is able to reduce more than 1 air pollutant regulated under this Act.

“(B) REQUIREMENTS FOR ENTITIES.—An entity that receives a grant under the program shall—

“(i) use to carry out the project of the entity a technology designed to reduce or eliminate emission of carbon dioxide that is in existence on the date of enactment of this subsection that has been used—

“(I) by not less than 3 other facilities (including a coal-fired power plant); and

“(II) on a scale of not less than 5 times the size of the proposed project of the entity at the Capitol power plant; and

“(ii) carry out the project of the entity in consultation with, and with the concurrence of, the Architect of the Capitol and the Administrator.

“(C) CONSISTENCY WITH CAPITOL POWER PLANT MODIFICATIONS.—The Architect of the Capitol may require changes to a project under the program that are necessary to carry out any modifications to be made to the Capitol power plant.

“(4) INCENTIVE.—In addition to the grant under this subsection, the Architect of the Cap-

itol may provide to an entity that receives such a grant an incentive award in an amount equal to not more than \$50,000, of which—

“(A) \$15,000 shall be provided after the project of the entity has sustained operation for a period of 100 days, as determined by the Architect of the Capitol;

“(B) \$15,000 shall be provided after the project of the entity has sustained operation for a period of 200 days, as determined by the Architect of the Capitol; and

“(C) \$20,000 shall be provided after the project of the entity has sustained operation for a period of 300 days, as determined by the Architect of the Capitol.

“(5) TERMINATION.—The program shall terminate on the date that is 2 years after the date of enactment of this subsection.

“(6) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the program \$3,000,000.”

SEC. 306. ASSESSMENT OF CARBON SEQUESTRATION AND METHANE AND NITROUS OXIDE EMISSIONS FROM TERRESTRIAL ECOSYSTEMS.

(a) DEFINITIONS.—In this section:

(1) ADAPTATION STRATEGY.—The term “adaptation strategy” means a land use and management strategy that can be used to increase the sequestration capabilities of any terrestrial ecosystem.

(2) ASSESSMENT.—The term “assessment” means the national assessment authorized under subsection (b).

(3) COVERED GREENHOUSE GAS.—The term “covered greenhouse gas” means carbon dioxide, nitrous oxide, and methane gas.

(4) NATIVE PLANT SPECIES.—The term “native plant species” means any noninvasive, naturally occurring plant species within a terrestrial ecosystem.

(5) SECRETARY.—The term “Secretary” means the Secretary of the Interior.

(6) FEDERAL LAND.—The term “Federal land” means—

(A) land of the National Forest System (as defined in section 11(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1609(a))) administered by the Secretary of Agriculture, acting through the Chief of the Forest Service; and

(B) public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)), the surface of which is administered by the Secretary of the Interior, acting through the Director of the Bureau of Land Management.

(7) TERRESTRIAL ECOSYSTEM.—

(A) IN GENERAL.—The term “terrestrial ecosystem” means any ecological and surficial geological system on Federal land.

(B) INCLUSIONS.—The term “terrestrial ecosystem” includes—

(i) forest land;

(ii) grassland; and

(iii) freshwater aquatic ecosystems.

(b) AUTHORIZATION OF ASSESSMENT.—Not later than 2 years after the date on which the final methodology is published under subsection (f)(3)(D), the Secretary shall complete a national assessment of—

(1) the quantity of carbon stored in and released from terrestrial ecosystems; including from man-caused and natural fires; and

(2) the annual flux of covered greenhouse gases in and out of terrestrial ecosystems.

(c) COMPONENTS.—In conducting the assessment under subsection (b), the Secretary shall—

(1) determine the processes that control the flux of covered greenhouse gases in and out of each terrestrial ecosystem;

(2) estimate the technical and economic potential for increasing carbon sequestration in natural and managed terrestrial ecosystems through management activities or restoration activities in each terrestrial ecosystem;

(3) develop near-term and long-term adaptation strategies or mitigation strategies that can be employed—

(A) to enhance the sequestration of carbon in each terrestrial ecosystem;

(B) to reduce emissions of covered greenhouse gases; and

(C) to adapt to climate change; and

(4) estimate annual carbon sequestration capacity of terrestrial ecosystems under a range of policies in support of management activities to optimize sequestration.

(d) USE OF NATIVE PLANT SPECIES.—In developing restoration activities under subsection (c)(2) and management strategies and adaptation strategies under subsection (c)(3), the Secretary shall emphasize the use of native plant species (including mixtures of many native plant species) for sequestering covered greenhouse gas in each terrestrial ecosystem.

(e) CONSULTATION.—In conducting the assessment under subsection (b) and developing the methodology under subsection (f), the Secretary shall consult with—

(1) the Secretary of Energy;

(2) the Secretary of Agriculture;

(3) the Administrator of the Environmental Protection Agency;

(4) the heads of other relevant agencies;

(5) consortia based at institutions of higher education and with research corporations; and

(6) Federal forest and grassland managers.

(f) METHODOLOGY.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary shall develop a methodology for conducting the assessment.

(2) REQUIREMENTS.—The methodology developed under paragraph (1)—

(A) shall—

(i) determine the method for measuring, monitoring, quantifying, and monetizing covered greenhouse gas emissions and reductions, including methods for allocating and managing offsets or credits; and

(ii) estimate the total capacity of each terrestrial ecosystem to—

(I) sequester carbon; and

(II) reduce emissions of covered greenhouse gases; and

(B) may employ economic and other systems models, analyses, and estimations, to be developed in consultation with each of the individuals described in subsection (e).

(3) EXTERNAL REVIEW AND PUBLICATION.—On completion of a proposed methodology, the Secretary shall—

(A) publish the proposed methodology;

(B) at least 60 days before the date on which the final methodology is published, solicit comments from—

(i) the public; and

(ii) heads of affected Federal and State agencies;

(C) establish a panel to review the proposed methodology published under subparagraph (A) and any comments received under subparagraph (B), to be composed of members—

(i) with expertise in the matters described in subsections (c) and (d); and

(ii) that are, as appropriate, representatives of Federal agencies, institutions of higher education, nongovernmental organizations, State organizations, industry, and international organizations; and

(D) on completion of the review under subparagraph (C), publish in the Federal register the revised final methodology.

(g) ESTIMATE; REVIEW.—The Secretary shall—

(1) based on the assessment, prescribe the data, information, and analysis needed to establish a scientifically sound estimate of—

(A) the carbon sequestration capacity of relevant terrestrial ecosystems;

(B) a national inventory of covered greenhouse gas sources that is consistent with the inventory prepared by the Environmental Protection Agency entitled the “Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990-2005”; and

(C) the willingness of covered greenhouse gas emitters to pay to sequester the covered greenhouse gases emitted by the applicable emitters in designated terrestrial ecosystems; and

(2) not later than 180 days after the date on which the assessment is completed, submit to the heads of applicable Federal agencies and the appropriate committees of Congress a report that describes the results of the assessment.

(h) **DATA AND REPORT AVAILABILITY.**—On completion of the assessment, the Secretary shall incorporate the results of the assessment into a web-accessible database for public use.

SEC. 307. ABRUPT CLIMATE CHANGE RESEARCH PROGRAM.

(a) **ESTABLISHMENT OF PROGRAM.**—The Secretary of Commerce shall establish within the Office of Oceanic and Atmospheric Research of the National Oceanic and Atmospheric Administration, and shall carry out, a program of scientific research on abrupt climate change.

(b) **PURPOSES OF PROGRAM.**—The purposes of the program are as follows:

(1) To develop a global array of terrestrial and oceanographic indicators of paleoclimate in order to sufficiently identify and describe past instances of abrupt climate change.

(2) To improve understanding of thresholds and nonlinearities in geophysical systems related to the mechanisms of abrupt climate change.

(3) To incorporate such mechanisms into advanced geophysical models of climate change.

(4) To test the output of such models against an improved global array of records of past abrupt climate changes.

(c) **ABRUPT CLIMATE CHANGE DEFINED.**—In this section, the term “abrupt climate change” means a change in the climate that occurs so rapidly or unexpectedly that human or natural systems have difficulty adapting to the climate as changed.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—Of such sums previously authorized, there is authorized to be appropriated to the Department of Commerce for each of fiscal years 2009 through 2014, to remain available until expended, such sums as are necessary, not to exceed \$10,000,000, to carry out the research program required under this section.

TITLE IV—COST-EFFECTIVE AND ENVIRONMENTALLY SUSTAINABLE PUBLIC BUILDINGS

Subtitle A—Public Buildings Cost Reduction

SEC. 401. SHORT TITLE.

This subtitle may be cited as the “Public Buildings Cost Reduction Act of 2007”.

SEC. 402. COST-EFFECTIVE AND GEOTHERMAL HEAT PUMP TECHNOLOGY ACCELERATION PROGRAM.

(a) **DEFINITION OF ADMINISTRATOR.**—In this section, the term “Administrator” means the Administrator of General Services.

(b) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—The Administrator shall establish a program to accelerate the use of more cost-effective technologies and practices and geothermal heat pumps at GSA facilities.

(2) **REQUIREMENTS.**—The program established under this subsection shall—

(A) ensure centralized responsibility for the coordination of cost reduction-related and geothermal heat pump-related recommendations, practices, and activities of all relevant Federal agencies;

(B) provide technical assistance and operational guidance to applicable tenants to achieve the goal identified in subsection (c)(2)(B)(ii); and

(C) establish methods to track the success of Federal departments and agencies with respect to that goal.

(c) **ACCELERATED USE OF TECHNOLOGIES.**—

(1) **REVIEW.**—

(A) **IN GENERAL.**—As part of the program under this section, not later than 90 days after the date of enactment of this Act, the Administrator shall conduct a review of—

(i) current use of cost-effective lighting technologies and geothermal heat pumps in GSA facilities; and

(ii) the availability to managers of GSA facilities of cost-effective lighting technologies and geothermal heat pumps.

(B) **REQUIREMENTS.**—The review under subparagraph (A) shall—

(i) examine the use of cost-effective lighting technologies, geothermal heat pumps, and other cost-effective technologies and practices by Federal agencies in GSA facilities; and

(ii) as prepared in consultation with the Administrator of the Environmental Protection Agency, identify cost-effective lighting technology and geothermal heat pump technology standards that could be used for all types of GSA facilities.

(2) **REPLACEMENT.**—

(A) **IN GENERAL.**—As part of the program under this section, not later than 180 days after the date of enactment of this Act, the Administrator shall establish, using available appropriations, a cost-effective lighting technology and geothermal heat pump technology acceleration program to achieve maximum feasible replacement of existing lighting, heating, cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies in each GSA facility.

(B) **ACCELERATION PLAN TIMETABLE.**—

(i) **IN GENERAL.**—To implement the program established under subparagraph (A), not later than 1 year after the date of enactment of this Act, the Administrator shall establish a timetable, including milestones for specific activities needed to replace existing lighting, heating, cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies, to the maximum extent feasible (including at the maximum rate feasible), at each GSA facility.

(ii) **GOAL.**—The goal of the timetable under clause (i) shall be to complete, using available appropriations, maximum feasible replacement of existing lighting, heating, and cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies by not later than the date that is 5 years after the date of enactment of this Act.

(d) **GSA FACILITY TECHNOLOGIES AND PRACTICES.**—Not later than 180 days after the date of enactment of this Act, and annually thereafter, the Administrator shall—

(1) ensure that a manager responsible for accelerating the use of cost-effective technologies and practices and geothermal heat pump technologies is designated for each GSA facility; and

(2) submit to Congress a plan, to be implemented to the maximum extent feasible (including at the maximum rate feasible) using available appropriations, by not later than the date that is 5 years after the date of enactment of this Act, that—

(A) with respect to cost-effective technologies and practices—

(i) identifies the specific activities needed to achieve a 20-percent reduction in operational costs through the application of cost-effective technologies and practices from 2003 levels at GSA facilities by not later than 5 years after the date of enactment of this Act;

(ii) describes activities required and carried out to estimate the funds necessary to achieve the reduction described in clause (i);

(B) includes an estimate of the funds necessary to carry out this section;

(C) describes the status of the implementation of cost-effective technologies and practices and geothermal heat pump technologies and practices at GSA facilities, including—

(i) the extent to which programs, including the program established under subsection (b), are being carried out in accordance with this subtitle; and

(ii) the status of funding requests and appropriations for those programs;

(D) identifies within the planning, budgeting, and construction processes, all types of GSA facility-related procedures that inhibit new and existing GSA facilities from implementing cost-

effective technologies or geothermal heat pump technologies;

(E) recommends language for uniform standards for use by Federal agencies in implementing cost-effective technologies and practices and geothermal heat pump technologies and practices;

(F) in coordination with the Office of Management and Budget, reviews the budget process for capital programs with respect to alternatives for—

(i) permitting Federal agencies to retain all identified savings accrued as a result of the use of cost-effective technologies and geothermal heat pump technologies; and

(ii) identifying short- and long-term cost savings that accrue from the use of cost-effective technologies and practices and geothermal heat pump technologies and practices;

(G)(i) with respect to geothermal heat pump technologies, achieves substantial operational cost savings through the application of the technologies; and

(ii) with respect to cost-effective technologies and practices, achieves cost savings through the application of cost-effective technologies and practices sufficient to pay the incremental additional costs of installing the cost-effective technologies and practices by not later than the date that is 5 years after the date of installation; and

(H) includes recommendations to address each of the matters, and a plan for implementation of each recommendation, described in subparagraphs (A) through (G).

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out this section, to remain available until expended.

SEC. 403. ENVIRONMENTAL PROTECTION AGENCY DEMONSTRATION GRANT PROGRAM FOR LOCAL GOVERNMENTS.

(a) **GRANT PROGRAM.**—

(1) **IN GENERAL.**—The Administrator of the Environmental Protection Agency (referred to in this section as the “Administrator”) shall establish a demonstration program under which the Administrator shall provide competitive grants to assist local governments (such as municipalities and counties), with respect to local government buildings—

(A) to deploy cost-effective technologies and practices; and

(B) to achieve operational cost savings, through the application of cost-effective technologies and practices, as verified by the Administrator.

(2) **COST SHARING.**—

(A) **IN GENERAL.**—The Federal share of the cost of an activity carried out using a grant provided under this section shall be 40 percent.

(B) **WAIVER OF NON-FEDERAL SHARE.**—The Administrator may waive up to 100 percent of the local share of the cost of any grant under this section should the Administrator determine that the community is economically distressed, pursuant to objective economic criteria established by the Administrator in published guidelines.

(3) **MAXIMUM AMOUNT.**—The amount of a grant provided under this subsection shall not exceed \$1,000,000.

(b) **GUIDELINES.**—

(1) **IN GENERAL.**—Not later than 1 year after the date of enactment of this Act, the Administrator shall issue guidelines to implement the grant program established under subsection (a).

(2) **REQUIREMENTS.**—The guidelines under paragraph (1) shall establish—

(A) standards for monitoring and verification of operational cost savings through the application of cost-effective technologies and practices reported by grantees under this section;

(B) standards for grantees to implement training programs, and to provide technical assistance and education, relating to the retrofit of buildings using cost-effective technologies and practices; and

(C) a requirement that each local government that receives a grant under this section shall

achieve facility-wide cost savings, through renovation of existing local government buildings using cost-effective technologies and practices, of at least 40 percent as compared to the baseline operational costs of the buildings before the renovation (as calculated assuming a 3-year, weather-normalized average).

(c) **COMPLIANCE WITH STATE AND LOCAL LAW.**—Nothing in this section or any program carried out using a grant provided under this section supersedes or otherwise affects any State or local law, to the extent that the State or local law contains a requirement that is more stringent than the relevant requirement of this section.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section \$20,000,000 for each of fiscal years 2007 through 2012.

(e) **REPORTS.**—

(1) **IN GENERAL.**—The Administrator shall provide annual reports to Congress on cost savings achieved and actions taken and recommendations made under this section, and any recommendations for further action.

(2) **FINAL REPORT.**—The Administrator shall issue a final report at the conclusion of the program, including findings, a summary of total cost savings achieved, and recommendations for further action.

(f) **TERMINATION.**—The program under this section shall terminate on September 30, 2012.

SEC. 404. DEFINITIONS.

In this subtitle:

(1) **COST-EFFECTIVE LIGHTING TECHNOLOGY.**—

(A) **IN GENERAL.**—The term “cost-effective lighting technology” means a lighting technology that—

(i) will result in substantial operational cost savings by ensuring an installed consumption of not more than 1 watt per square foot; or

(ii) is contained in a list under—

(I) section 553 of Public Law 95-619 (42 U.S.C. 8259b); and

(II) Federal acquisition regulation 23-203.

(B) **INCLUSIONS.**—The term “cost-effective lighting technology” includes—

(i) lamps;

(ii) ballasts;

(iii) luminaires;

(iv) lighting controls;

(v) daylighting; and

(vi) early use of other highly cost-effective lighting technologies.

(2) **COST-EFFECTIVE TECHNOLOGIES AND PRACTICES.**—The term “cost-effective technologies and practices” means a technology or practice that—

(A) will result in substantial operational cost savings by reducing utility costs; and

(B) complies with the provisions of section 553 of Public Law 95-619 (42 U.S.C. 8259b) and Federal acquisition regulation 23-203.

(3) **OPERATIONAL COST SAVINGS.**—

(A) **IN GENERAL.**—The term “operational cost savings” means a reduction in end-use operational costs through the application of cost-effective technologies and practices or geothermal heat pumps, including a reduction in electricity consumption relative to consumption by the same customer or at the same facility in a given year, as defined in guidelines promulgated by the Administrator pursuant to section 403(b), that achieves cost savings sufficient to pay the incremental additional costs of using cost-effective technologies and practices or geothermal heat pumps by not later than—

(i) for cost-effective technologies and practices, the date that is 5 years after the date of installation; and

(ii) for geothermal heat pumps, as soon as practical after the date of installation of the applicable geothermal heat pump.

(B) **INCLUSIONS.**—The term “operational cost savings” includes savings achieved at a facility as a result of—

(i) the installation or use of cost-effective technologies and practices; or

(ii) the planting of vegetation that shades the facility and reduces the heating, cooling, or lighting needs of the facility.

(C) **EXCLUSION.**—The term “operational cost savings” does not include savings from measures that would likely be adopted in the absence of cost-effective technology and practices programs, as determined by the Administrator.

(4) **GEOTHERMAL HEAT PUMP.**—The term “geothermal heat pump” means any heating or air conditioning technology that—

(A) uses the ground or ground water as a thermal energy source to heat, or as a thermal energy sink to cool, a building; and

(B) meets the requirements of the Energy Star program of the Environmental Protection Agency applicable to geothermal heat pumps on the date of purchase of the technology.

(5) **GSA FACILITY.**—

(A) **IN GENERAL.**—The term “GSA facility” means any building, structure, or facility, in whole or in part (including the associated support systems of the building, structure, or facility) that—

(i) is constructed (including facilities constructed for lease), renovated, or purchased, in whole or in part, by the Administrator for use by the Federal Government; or

(ii) is leased, in whole or in part, by the Administrator for use by the Federal Government—

(I) except as provided in subclause (II), for a term of not less than 5 years; or

(II) for a term of less than 5 years, if the Administrator determines that use of cost-effective technologies and practices would result in the payback of expenses.

(B) **INCLUSION.**—The term “GSA facility” includes any group of buildings, structures, or facilities described in subparagraph (A) (including the associated energy-consuming support systems of the buildings, structures, and facilities).

(C) **EXEMPTION.**—The Administrator may exempt from the definition of “GSA facility” under this paragraph a building, structure, or facility that meets the requirements of section 543(c) of Public Law 95-619 (42 U.S.C. 8253(c)).

Subtitle B—Installation of Photovoltaic System at Department of Energy Headquarters Building

SEC. 411. INSTALLATION OF PHOTOVOLTAIC SYSTEM AT DEPARTMENT OF ENERGY HEADQUARTERS BUILDING.

(a) **IN GENERAL.**—The Administrator of General Services shall install a photovoltaic system, as set forth in the Sun Wall Design Project, for the headquarters building of the Department of Energy located at 1000 Independence Avenue, Southwest, Washington, D.C., commonly known as the Forrestal Building.

(b) **FUNDING.**—There shall be available from the Federal Buildings Fund established by section 592 of title 40, United States Code, \$30,000,000 to carry out this section. Such sums shall be derived from the unobligated balance of amounts made available from the Fund for fiscal year 2007, and prior fiscal years, for repairs and alterations and other activities (excluding amounts made available for the energy program). Such sums shall remain available until expended.

(c) **OBLIGATION OF FUNDS.**—None of the funds made available pursuant to subsection (b) may be obligated prior to September 30, 2007.

Subtitle C—High-Performance Green Buildings

SEC. 421. SHORT TITLE.

This subtitle may be cited as the “High-Performance Green Buildings Act of 2007”.

SEC. 422. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) high-performance green buildings—

(A) reduce energy, water, and material resource use and the generation of waste;

(B) improve indoor environmental quality, and protect indoor air quality by, for example, using materials that emit fewer or no toxic chemicals into the indoor air;

(C) improve thermal comfort;

(D) improve lighting and the acoustic environment;

(E) improve the health and productivity of individuals who live and work in the buildings;

(F) improve indoor and outdoor impacts of the buildings on human health and the environment;

(G) increase the use of environmentally preferable products, including biobased, recycled, and nontoxic products with lower lifecycle impacts; and

(H) increase opportunities for reuse of materials and for recycling;

(2) during the planning, design, and construction of a high-performance green building, the environmental and energy impacts of building location and site design, the minimization of energy and materials use, and the environmental impacts of the building are considered;

(3) according to the United States Green Building Council, certified green buildings, as compared to conventional buildings—

(A) use an average of 36 percent less total energy (and in some cases up to 50 to 70 percent less total energy);

(B) use 30 percent less water; and

(C) reduce waste costs, often by 50 to 90 percent;

(4) the benefits of high-performance green buildings are important, because in the United States, buildings are responsible for approximately—

(A) 39 percent of primary energy use;

(B) 12 percent of potable water use;

(C) 136,000,000 tons of building-related construction and demolition debris;

(D) 70 percent of United States resource consumption; and

(E) 70 percent of electricity consumption;

(5) green building certification programs can be highly beneficial by disseminating up-to-date information and expertise regarding high-performance green buildings, and by providing third-party verification of green building design, practices, and materials, and other aspects of buildings; and

(6) a July 2006 study completed for the General Services Administration, entitled “Sustainable Building Rating Systems Summary,” concluded that—

(A) green building standards are an important means to encourage better practices;

(B) the Leadership in Energy and Environmental Design (LEED) standard for green building certification is “currently the dominant system in the United States market and is being adapted to multiple markets worldwide”; and

(C) there are other useful green building certification or rating programs in various stages of development and adoption, including the Green Globes program and other rating systems.

(b) **PURPOSES.**—The purposes of this subtitle are—

(1) to encourage the Federal Government to act as an example for State and local governments, the private sector, and individuals by building high-performance green buildings that reduce energy use and environmental impacts;

(2) to establish an Office within the General Services Administration, and a Green Building Advisory Committee, to advance the goals of conducting research and development and public outreach, and to move the Federal Government toward construction of high-performance green buildings;

(3) to encourage States, local governments, and school systems to site, build, renovate, and operate high-performance green schools through the adoption of voluntary guidelines for those schools, the dissemination of grants, and the adoption of environmental health plans and programs;

(4) to strengthen Federal leadership on high-performance green buildings through the adoption of incentives for high-performance green buildings, and improved green procurement by Federal agencies; and

(5) to demonstrate that high-performance green buildings can and do provide significant benefits, in order to encourage wider adoption of green building practices, through the adoption of demonstration projects.

SEC. 423. DEFINITIONS.

In this subtitle:

(1) **ADMINISTRATOR.**—The term “Administrator” means the Administrator of General Services.

(2) **COMMITTEE.**—The term “Committee” means the Green Building Advisory Committee established under section 433(a).

(3) **DIRECTOR.**—The term “Director” means the individual appointed to the position established under section 431(a).

(4) **FEDERAL FACILITY.**—

(A) **IN GENERAL.**—The term “Federal facility” means any building or facility the intended use of which requires the building or facility to be—

(i) accessible to the public; and

(ii) constructed or altered by or on behalf of the United States.

(B) **EXCLUSIONS.**—The term “Federal facility” does not include a privately-owned residential or commercial structure that is not leased by the Federal Government.

(5) **HIGH-PERFORMANCE GREEN BUILDING.**—The term “high-performance green building” means a building—

(A) that, during its life-cycle—

(i) reduces energy, water, and material resource use and the generation of waste;

(ii) improves indoor environmental quality, including protecting indoor air quality during construction, using low-emitting materials, improving thermal comfort, and improving lighting and acoustic environments that affect occupant health and productivity;

(iii) improves indoor and outdoor impacts of the building on human health and the environment;

(iv) increases the use of environmentally preferable products, including biobased, recycled content, and nontoxic products with lower life-cycle impacts;

(v) increases reuse and recycling opportunities; and

(vi) integrates systems in the building; and

(B) for which, during its planning, design, and construction, the environmental and energy impacts of building location and site design are considered.

(6) **LIFE CYCLE.**—The term “life cycle”, with respect to a high-performance green building, means all stages of the useful life of the building (including components, equipment, systems, and controls of the building) beginning at conception of a green building project and continuing through site selection, design, construction, landscaping, commissioning, operation, maintenance, renovation, deconstruction or demolition, removal, and recycling of the green building.

(7) **LIFE-CYCLE ASSESSMENT.**—The term “life-cycle assessment” means a comprehensive system approach for measuring the environmental performance of a product or service over the life of the product or service, beginning at raw materials acquisition and continuing through manufacturing, transportation, installation, use, reuse, and end-of-life waste management.

(8) **LIFE-CYCLE COSTING.**—The term “life-cycle costing”, with respect to a high-performance green building, means a technique of economic evaluation that—

(A) sums, over a given study period, the costs of initial investment (less resale value), replacements, operations (including energy use), and maintenance and repair of an investment decision; and

(B) is expressed—

(i) in present value terms, in the case of a study period equivalent to the longest useful life of the building, determined by taking into consideration the typical life of such a building in the area in which the building is to be located; or

(ii) in annual value terms, in the case of any other study period.

(9) **OFFICE.**—The term “Office” means the Office of High-Performance Green Buildings established under section 432(a).

PART I—OFFICE OF HIGH-PERFORMANCE GREEN BUILDINGS

SEC. 431. OVERSIGHT.

(a) **IN GENERAL.**—The Administrator shall establish within the General Services Administration, and appoint an individual to serve as Director in, a position in the career-reserved Senior Executive Service, to—

(1) establish and manage the Office in accordance with section 432; and

(2) carry out other duties as required under this subtitle.

(b) **COMPENSATION.**—The compensation of the Director shall not exceed the maximum rate of basic pay for the Senior Executive Service under section 5382 of title 5, United States Code, including any applicable locality-based comparability payment that may be authorized under section 5304(h)(2)(C) of that title.

SEC. 432. OFFICE OF HIGH-PERFORMANCE GREEN BUILDINGS.

(a) **ESTABLISHMENT.**—The Director shall establish within the General Services Administration an Office of High-Performance Green Buildings.

(b) **DUTIES.**—The Director shall—

(1) ensure full coordination of high-performance green building information and activities within the General Services Administration and all relevant Federal agencies, including, at a minimum—

(A) the Environmental Protection Agency;

(B) the Office of the Federal Environmental Executive;

(C) the Office of Federal Procurement Policy;

(D) the Department of Energy;

(E) the Department of Health and Human Services;

(F) the Department of Defense; and

(G) such other Federal agencies as the Director considers to be appropriate;

(2) establish a senior-level green building advisory committee, which shall provide advice and recommendations in accordance with section 433;

(3) identify and biennially reassess improved or higher rating standards recommended by the Committee;

(4) establish a national high-performance green building clearinghouse in accordance with section 434, which shall provide green building information through—

(A) outreach;

(B) education; and

(C) the provision of technical assistance;

(5) ensure full coordination of research and development information relating to high-performance green building initiatives under section 435;

(6) identify and develop green building standards that could be used for all types of Federal facilities in accordance with section 435;

(7) establish green practices that can be used throughout the life of a Federal facility;

(8) review and analyze current Federal budget practices and life-cycle costing issues, and make recommendations to Congress, in accordance with section 436; and

(9) complete and submit the report described in subsection (c).

(c) **REPORT.**—Not later than 2 years after the date of enactment of this Act, and biennially thereafter, the Director shall submit to Congress a report that—

(1) describes the status of the green building initiatives under this subtitle and other Federal programs in effect as of the date of the report, including—

(A) the extent to which the programs are being carried out in accordance with this subtitle; and

(B) the status of funding requests and appropriations for those programs;

(2) identifies within the planning, budgeting, and construction process all types of Federal facility procedures that inhibit new and existing Federal facilities from becoming high-performance green buildings, as measured by the standard for high-performance green buildings identified in accordance with subsection (d);

(3) identifies inconsistencies, as reported to the Committee, in Federal law with respect to product acquisition guidelines and high-performance product guidelines;

(4) recommends language for uniform standards for use by Federal agencies in environmentally responsible acquisition;

(5) in coordination with the Office of Management and Budget, reviews the budget process for capital programs with respect to alternatives for—

(A) restructuring of budgets to require the use of complete energy- and environmental-cost accounting;

(B) using operations expenditures in budget-related decisions while simultaneously incorporating productivity and health measures (as those measures can be quantified by the Office, with the assistance of universities and national laboratories);

(C) permitting Federal agencies to retain all identified savings accrued as a result of the use of life cycle costing; and

(D) identifying short- and long-term cost savings that accrue from high-performance green buildings, including those relating to health and productivity;

(6) identifies green, self-sustaining technologies to address the operational needs of Federal facilities in times of national security emergencies, natural disasters, or other dire emergencies;

(7) summarizes and highlights development, at the State and local level, of green building initiatives, including Executive orders, policies, or laws adopted promoting green building (including the status of implementation of those initiatives); and

(8) includes, for the 2-year period covered by the report, recommendations to address each of the matters, and a plan for implementation of each recommendation, described in paragraphs (1) through (6).

(d) **IDENTIFICATION OF STANDARD.**—

(1) **IN GENERAL.**—For the purpose of subsection (c)(2), not later than 60 days after the date of enactment of this Act, the Director shall identify a standard that the Director determines to be the most likely to encourage a comprehensive and environmentally-sound approach to certification of green buildings.

(2) **BASIS.**—The standard identified under paragraph (1) shall be based on—

(A) a biennial study, which shall be carried out by the Director to compare and evaluate standards;

(B) the ability and availability of assessors and auditors to independently verify the criteria and measurement of metrics at the scale necessary to implement this subtitle;

(C) the ability of the applicable standard-setting organization to collect and reflect public comment;

(D) the ability of the standard to be developed and revised through a consensus-based process;

(E) an evaluation of the adequacy of the standard, which shall give credit for—

(i) efficient and sustainable use of water, energy, and other natural resources;

(ii) use of renewable energy sources;

(iii) improved indoor environmental quality through enhanced indoor air quality, thermal comfort, acoustics, day lighting, pollutant source control, and use of low-emission materials and building system controls; and

(iv) such other criteria as the Director determines to be appropriate; and

(F) national recognition within the building industry.

(3) **BIENNIAL REVIEW.**—The Director shall—

(A) conduct a biennial review of the standard identified under paragraph (1); and

(B) include the results of each biennial review in the report required to be submitted under subsection (c).

(e) IMPLEMENTATION.—The Office shall carry out each plan for implementation of recommendations under subsection (c)(7).

SEC. 433. GREEN BUILDING ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—Not later than 180 days after the date of enactment of this Act, the Director shall establish an advisory committee, to be known as the “Green Building Advisory Committee”.

(b) MEMBERSHIP.—

(1) IN GENERAL.—The Committee shall be composed of representatives of, at a minimum—

(A) each agency referred to in section 432(b)(1); and

(B) other relevant agencies and entities, as determined by the Director, including at least 1 representative of each of—

(i) State and local governmental green building programs;

(ii) independent green building associations or councils;

(iii) building experts, including architects, material suppliers, and construction contractors;

(iv) security advisors focusing on national security needs, natural disasters, and other dire emergency situations; and

(v) environmental health experts, including those with experience in children’s health.

(2) NON-FEDERAL MEMBERS.—The total number of non-Federal members on the Committee at any time shall not exceed 15.

(c) MEETINGS.—The Director shall establish a regular schedule of meetings for the Committee.

(d) DUTIES.—The Committee shall provide advice and expertise for use by the Director in carrying out the duties under this subtitle, including such recommendations relating to Federal activities carried out under sections 434 through 436 as are agreed to by a majority of the members of the Committee.

(e) FACILITY EXEMPTION.—The Committee shall not be subject to section 14 of the Federal Advisory Committee Act (5 U.S.C. App.).

SEC. 434. PUBLIC OUTREACH.

The Director, in coordination with the Committee, shall carry out public outreach to inform individuals and entities of the information and services available Government-wide by—

(1) establishing and maintaining a national high-performance green building clearinghouse, including on the Internet, that—

(A) identifies existing similar efforts and coordinates activities of common interest; and

(B) provides information relating to high-performance green buildings, including hyperlinks to Internet sites that describe related activities, information, and resources of—

(i) the Federal Government;

(ii) State and local governments;

(iii) the private sector (including nongovernmental and nonprofit entities and organizations); and

(iv) other relevant organizations, including those from other countries;

(2) identifying and recommending educational resources for implementing high-performance green building practices, including security and emergency benefits and practices;

(3) providing access to technical assistance on using tools and resources to make more cost-effective, energy-efficient, health-protective, and environmentally beneficial decisions for constructing high-performance green buildings, including tools available to conduct life-cycle costing and life-cycle assessment;

(4) providing information on application processes for certifying a high-performance green building, including certification and commissioning;

(5) providing technical information, market research, or other forms of assistance or advice that would be useful in planning and constructing high-performance green buildings; and

(6) using such other methods as are determined by the Director to be appropriate.

SEC. 435. RESEARCH AND DEVELOPMENT.

(a) ESTABLISHMENT.—The Director, in coordination with the Committee, shall—

(1)(A) survey existing research and studies relating to high-performance green buildings; and

(B) coordinate activities of common interest;

(2) develop and recommend a high-performance green building research plan that—

(A) identifies information and research needs, including the relationships between human health, occupant productivity, and each of—

(i) emissions from materials and products in the building;

(ii) natural day lighting;

(iii) ventilation choices and technologies;

(iv) heating, cooling, and system control choices and technologies;

(v) moisture control and mold;

(vi) maintenance, cleaning, and pest control activities;

(vii) acoustics; and

(viii) other issues relating to the health, comfort, productivity, and performance of occupants of the building; and

(B) promotes the development and dissemination of high-performance green building measurement tools that, at a minimum, may be used—

(i) to monitor and assess the life-cycle performance of facilities (including demonstration projects) built as high-performance green buildings; and

(ii) to perform life-cycle assessments;

(3) assist the budget and life-cycle costing functions of the Office under section 436;

(4) study and identify potential benefits of green buildings relating to security, natural disaster, and emergency needs of the Federal Government; and

(5) support other research initiatives determined by the Office.

(b) INDOOR AIR QUALITY.—The Director, in consultation with the Committee, shall develop and carry out a comprehensive indoor air quality program for all Federal facilities to ensure the safety of Federal workers and facility occupants—

(1) during new construction and renovation of facilities; and

(2) in existing facilities.

SEC. 436. BUDGET AND LIFE-CYCLE COSTING AND CONTRACTING.

(a) ESTABLISHMENT.—The Director, in coordination with the Committee, shall—

(1) identify, review, and analyze current budget and contracting practices that affect achievement of high-performance green buildings, including the identification of barriers to green building life-cycle costing and budgetary issues;

(2) develop guidance and conduct training sessions with budget specialists and contracting personnel from Federal agencies and budget examiners to apply life-cycle cost criteria to actual projects;

(3) identify tools to aid life-cycle cost decision-making; and

(4) explore the feasibility of incorporating the benefits of green buildings, such as security benefits, into a cost-budget analysis to aid in life-cycle costing for budget and decision making processes.

SEC. 437. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out this part \$4,000,000 for each of fiscal years 2008 through 2012, to remain available until expended.

PART II—HEALTHY HIGH-PERFORMANCE SCHOOLS

SEC. 441. DEFINITION OF HIGH-PERFORMANCE SCHOOL.

In this part, the term “high-performance school” has the meaning given the term “healthy, high-performance school building” in section 5586 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7277e).

SEC. 442. GRANTS FOR HEALTHY SCHOOL ENVIRONMENTS.

The Administrator of the Environmental Protection Agency, in consultation with the Secretary of Education, may provide grants to qualified State agencies for use in—

(1) providing technical assistance for programs of the Environmental Protection Agency (including the Tools for Schools Program and the Healthy School Environmental Assessment Tool) to schools for use in addressing environmental issues; and

(2) development of State school environmental quality plans that include—

(A) standards for school building design, construction, and renovation; and

(B) identification of ongoing school building environmental problems in the State and recommended solutions to address those problems, including assessment of information on the exposure of children to environmental hazards in school facilities.

SEC. 443. MODEL GUIDELINES FOR SITING OF SCHOOL FACILITIES.

The Administrator of the Environmental Protection Agency, in consultation with the Secretary of Education and the Secretary of Health and Human Services, shall develop voluntary school site selection guidelines that account for—

(1) the special vulnerability of children to hazardous substances or pollution exposures in any case in which the potential for contamination at a potential school site exists;

(2) modes of transportation available to students and staff;

(3) the efficient use of energy; and

(4) the potential use of a school at the site as an emergency shelter.

SEC. 444. PUBLIC OUTREACH.

(a) IN GENERAL.—The Administrator of the Environmental Protection Agency shall provide to the Director information relating to all activities carried out under this part, which the Director shall include in the report described in section 432(c).

(b) PUBLIC OUTREACH.—The Director shall ensure, to the maximum extent practicable, that the public clearinghouse established under section 434 receives and makes available information on the exposure of children to environmental hazards in school facilities, as provided by the Administrator of the Environmental Protection Agency.

SEC. 445. ENVIRONMENTAL HEALTH PROGRAM.

(a) IN GENERAL.—The Administrator of the Environmental Protection Agency, in consultation with the Secretary of Education, the Secretary of Health and Human Services, and other relevant agencies, shall issue voluntary guidelines for use by the State in developing and implementing an environmental health program for schools that—

(1) takes into account the status and findings of Federal research initiatives established under this subtitle and other relevant Federal law with respect to school facilities, including relevant updates on trends in the field, such as the impact of school facility environments on student and staff—

(A) health, safety, and productivity; and

(B) disabilities or special needs;

(2) provides research using relevant tools identified or developed in accordance with section 435(a) to quantify the relationships between—

(A) human health, occupant productivity, and student performance; and

(B) with respect to school facilities, each of—

(i) pollutant emissions from materials and products;

(ii) natural day lighting;

(iii) ventilation choices and technologies;

(iv) heating and cooling choices and technologies;

(v) moisture control and mold;

(vi) maintenance, cleaning, and pest control activities;

(vii) acoustics; and
 (viii) other issues relating to the health, comfort, productivity, and performance of occupants of the school facilities;

(3) provides technical assistance on siting, design, management, and operation of school facilities, including facilities used by students with disabilities or special needs;

(4) collaborates with federally funded pediatric environmental health centers to assist in on-site school environmental investigations;

(5) assists States and the public in better understanding and improving the environmental health of children; and

(6) provides to the Office a biennial report of all activities carried out under this part, which the Director shall include in the report described in section 432(c).

(b) PUBLIC OUTREACH.—The Director shall ensure, to the maximum extent practicable, that the public clearinghouse established under section 434 receives and makes available—

(1) information from the Administrator of the Environmental Protection Agency that is contained in the report described in subsection (a)(6); and

(2) information on the exposure of children to environmental hazards in school facilities, as provided by the Administrator of the Environmental Protection Agency.

SEC. 446. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out this part \$10,000,000 for the period of fiscal years 2008 through 2012, to remain available until expended.

PART III—STRENGTHENING FEDERAL LEADERSHIP

SEC. 451. INCENTIVES.

As soon as practicable after the date of enactment of this Act, the Director shall identify incentives to encourage the use of green buildings and related technology in the operations of the Federal Government, including through—

(1) the provision of recognition awards; and

(2) the maximum feasible retention of financial savings in the annual budgets of Federal agencies.

SEC. 452. FEDERAL PROCUREMENT.

(a) IN GENERAL.—Not later than 2 years after the date of enactment of this Act, the Director of the Office of Federal Procurement Policy, in consultation with the Director and the Under Secretary of Defense for Acquisition, Technology, and Logistics, shall promulgate revisions of the applicable acquisition regulations, to take effect as of the date of promulgation of the revisions—

(1) to direct any Federal procurement executives involved in the acquisition, construction, or major renovation (including contracting for the construction or major renovation) of any facility, to the maximum extent practicable—

(A) to employ integrated design principles;

(B) to optimize building and systems energy performance;

(C) to protect and conserve water;

(D) to enhance indoor environmental quality; and

(E) to reduce environmental impacts of materials and waste flows; and

(2) to direct Federal procurement executives involved in leasing buildings, to give preference to the lease of facilities that, to the maximum extent practicable—

(A) are energy-efficient; and

(B) have applied contemporary high-performance and sustainable design principles during construction or renovation.

(b) GUIDANCE.—Not later than 90 days after the date of promulgation of the revised regulations under subsection (a), the Director shall issue guidance to all Federal procurement executives providing direction and the option to renegotiate the design of proposed facilities, renovations for existing facilities, and leased facilities to incorporate improvements that are consistent with this section.

SEC. 453. FEDERAL GREEN BUILDING PERFORMANCE.

(a) IN GENERAL.—Not later than October 31 of each of the 2 fiscal years following the fiscal year in which this Act is enacted, and at such times thereafter as the Comptroller General of the United States determines to be appropriate, the Comptroller General of the United States shall, with respect to the fiscal years that have passed since the preceding report—

(1) conduct an audit of the implementation of this subtitle; and

(2) submit to the Office, the Committee, the Administrator, and Congress a report describing the results of the audit.

(b) CONTENTS.—An audit under subsection (a) shall include a review, with respect to the period covered by the report under subsection (a)(2), of—

(1) budget, life-cycle costing, and contracting issues, using best practices identified by the Comptroller General of the United States and heads of other agencies in accordance with section 436;

(2) the level of coordination among the Office, the Office of Management and Budget, and relevant agencies;

(3) the performance of the Office in carrying out the implementation plan;

(4) the design stage of high-performance green building measures;

(5) high-performance building data that were collected and reported to the Office; and

(6) such other matters as the Comptroller General of the United States determines to be appropriate.

(c) ENVIRONMENTAL STEWARDSHIP SCORECARD.—The Director shall consult with the Committee to enhance, and assist in the implementation of, the Environmental Stewardship Scorecard announced at the White House summit on Federal sustainable buildings in January 2006, to measure the implementation by each Federal agency of sustainable design and green building initiatives.

SEC. 454. STORM WATER RUNOFF REQUIREMENTS FOR FEDERAL DEVELOPMENT PROJECTS.

The sponsor of any development or redevelopment project involving a Federal facility with a footprint that exceeds 5,000 square feet shall use site planning, design, construction, and maintenance strategies for the property to maintain, to the maximum extent technically feasible, the predevelopment hydrology of the property with regard to the temperature, rate, volume, and duration of flow.

PART IV—DEMONSTRATION PROJECT

SEC. 461. COORDINATION OF GOALS.

(a) IN GENERAL.—The Director shall establish guidelines to implement a demonstration project to contribute to the research goals of the Office.

(b) PROJECTS.—

(1) IN GENERAL.—In accordance with guidelines established by the Director under subsection (a) and the duties of the Director described in part I, the Director shall carry out 3 demonstration projects.

(2) LOCATION OF PROJECTS.—Each project carried out under paragraph (1) shall be located in a Federal building in a State recommended by the Director in accordance with subsection (c).

(3) REQUIREMENTS.—Each project carried out under paragraph (1) shall—

(A) provide for the evaluation of the information obtained through the conduct of projects and activities under this subtitle; and

(B) achieve the highest available rating under the standard identified pursuant to section 432(d).

(c) CRITERIA.—With respect to the existing or proposed Federal facility at which a demonstration project under this section is conducted, the Federal facility shall—

(1) be an appropriate model for a project relating to—

(A) the effectiveness of high-performance technologies;

(B) analysis of materials, components, and systems, including the impact on the health of building occupants;

(C) life-cycle costing and life-cycle assessment of building materials and systems; and

(D) location and design that promote access to the Federal facility through walking, biking, and mass transit; and

(2) possess sufficient technological and organizational adaptability.

(d) REPORT.—Not later than 1 year after the date of enactment of this Act, and annually thereafter through September 30, 2013, the Director shall submit to the Administrator a report that describes the status of and findings regarding the demonstration project.

SEC. 462. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out the Federal demonstration project described in section 461(b) \$10,000,000 for the period of fiscal years 2008 through 2012, to remain available until expended.

TITLE V—CORPORATE AVERAGE FUEL ECONOMY STANDARDS

SEC. 501. SHORT TITLE.

This title may be cited as the “Ten-in-Ten Fuel Economy Act”.

SEC. 502. AVERAGE FUEL ECONOMY STANDARDS FOR AUTOMOBILES AND CERTAIN OTHER VEHICLES.

(a) INCREASED STANDARDS.—Section 32902 of title 49, United States Code, is amended—

(1) by striking “NON-PASSENGER AUTOMOBILES.” in subsection (a) and inserting “PRESCRIPTION OF STANDARDS BY REGULATION.”;

(2) by striking “(except passenger automobiles)” in subsection (a); and

(3) by striking subsection (b) and inserting the following:

“(b) STANDARDS FOR AUTOMOBILES AND CERTAIN OTHER VEHICLES.—

“(1) IN GENERAL.—The Secretary of Transportation, after consultation with the Administrator of the Environmental Protection Agency, shall prescribe average fuel economy standards for—

“(A) automobiles manufactured by manufacturers in each model year beginning with model year 2011 in accordance with subsection (c); and

“(B) commercial medium-duty or heavy-duty on-highway vehicles in accordance with subsection (k).

“(2) FUEL ECONOMY TARGET FOR AUTOMOBILES.—

“(A) AUTOMOBILE FUEL ECONOMY AVERAGE FOR MODEL YEARS 2011 THROUGH 2020.—The Secretary shall prescribe average fuel economy standards for automobiles in each model year beginning with model year 2011 to achieve a combined fuel economy average for model year 2020 of at least 35 miles per gallon for the fleet of automobiles manufactured or sold in the United States. The average fuel economy standards prescribed by the Secretary shall be the maximum feasible average fuel economy standards for model years 2011 through 2019.

“(B) AUTOMOBILE FUEL ECONOMY AVERAGE FOR MODEL YEARS 2021 THROUGH 2030.—For model years 2021 through 2030, the average fuel economy required to be attained by the fleet of automobiles manufactured or sold in the United States shall be the maximum feasible average fuel economy standard for the fleet.

“(C) PROGRESS TOWARD STANDARD REQUIRED.—In prescribing average fuel economy standards under subparagraph (A), the Secretary shall prescribe annual fuel economy standard increases that increase the applicable average fuel economy standard ratably beginning with model year 2011 and ending with model year 2020.”.

(b) FUEL ECONOMY TARGET FOR COMMERCIAL MEDIUM-DUTY AND HEAVY-DUTY ON-HIGHWAY VEHICLES.—Section 32902 of title 49, United States Code, is amended by adding at the end thereof the following:

“(k) **COMMERCIAL MEDIUM- AND HEAVY-DUTY ON-HIGHWAY VEHICLES.**—

“(1) **STUDY.**—No later than 18 months after the date of enactment of the Ten-in-Ten Fuel Economy Act, the Secretary of Transportation, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall examine the fuel efficiency of commercial medium- and heavy-duty on-highway vehicles and determine—

“(A) the appropriate test procedures and methodologies for measuring commercial medium- and heavy-duty on-highway vehicle fuel efficiency;

“(B) the appropriate metric for measuring and expressing commercial medium- and heavy-duty on-highway vehicle fuel efficiency performance, taking into consideration, among other things, the work performed by such on-highway vehicles and types of operations in which they are used;

“(C) the range of factors, including, without limitation, design, functionality, use, duty cycle, infrastructure, and total overall energy consumption and operating costs that effect commercial medium- and heavy-duty on-highway vehicle fuel efficiency; and

“(D) such other factors and conditions that could have an impact on a program to improve commercial medium- and heavy-duty on-highway vehicle fuel efficiency.

“(2) **RULEMAKING.**—No later than 24 months after completion of the study required by paragraph (1), the Secretary, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, by regulation, shall determine in a rulemaking procedure how to implement a commercial medium- and heavy-duty on-highway vehicle fuel efficiency improvement program designed to achieve the maximum feasible improvement, and shall adopt appropriate test methods, measurement metrics, fuel economy standards, and compliance and enforcement protocols that are appropriate, cost-effective, and technologically feasible for commercial medium- and heavy-duty on-highway vehicles.

“(3) **LEAD-TIME; REGULATORY STABILITY.**—Any commercial medium- and heavy-duty on-highway vehicle fuel efficiency regulatory program adopted pursuant to this subsection shall provide no less than 4 full model years of regulatory lead-time and 3 full model years of regulatory stability.

“(4) **COMMERCIAL MEDIUM- AND HEAVY-DUTY ON-HIGHWAY VEHICLE DEFINED.**—In this subsection, the term ‘commercial medium- and heavy-duty on-highway vehicle’ means an on-highway vehicle with a gross vehicle weight rating of more than 8,500 pounds, and that, in the case of a vehicle with a gross vehicle weight rating of less than 10,000 pounds, is not an automobile.”.

(c) **AUTHORITY OF SECRETARY.**—Section 32902 of title 49, United States Code, as amended by subsection (b), is further amended by adding at the end thereof the following:

“(1) **AUTHORITY OF THE SECRETARY.**—

“(1) **VEHICLE ATTRIBUTES; MODEL YEARS COVERED.**—The Secretary shall—

“(A) prescribe by regulation average fuel economy standards for automobiles based on vehicle attributes related to fuel economy and to express the standards in the form of a mathematical function; and

“(B) issue regulations under this title prescribing average fuel economy standards for 1 or more model years.

“(2) **PROHIBITION OF UNIFORM PERCENTAGE INCREASE.**—When the Secretary prescribes a standard, or prescribes an amendment under this section that changes a standard, the standard may not be expressed as a uniform percentage increase from the fuel-economy performance of attribute classes or categories already achieved in a model year by a manufacturer.”.

SEC. 503. AMENDING FUEL ECONOMY STANDARDS.

(a) **IN GENERAL.**—Section 32902(c) of title 49, United States Code, is amended to read as follows:

“(c) **AMENDING FUEL ECONOMY STANDARDS.**—Notwithstanding subsections (a) and (b), the Secretary of Transportation—

“(1) may prescribe a standard higher than that required under subsection (b); or

“(2) may prescribe an average fuel economy standard for automobiles that is the maximum feasible level for the model year, despite being lower than the standard required under subsection (b), if the Secretary determines, based on clear and convincing evidence, that the average fuel economy standard prescribed in accordance with subsections (a) and (b) for automobiles in that model year is shown not to be cost-effective.”.

(b) **FEASIBILITY CRITERIA.**—Section 32902(f) of title 49, United States Code, is amended to read as follows:

“(f) **DECISIONS ON MAXIMUM FEASIBLE AVERAGE FUEL ECONOMY.**—

“(1) **IN GENERAL.**—When deciding maximum feasible average fuel economy under this section, the Secretary shall consider—

“(A) economic practicability;

“(B) the effect of other motor vehicle standards of the Government on fuel economy;

“(C) environmental impacts; and

“(D) the need of the United States to conserve energy.

“(2) **LIMITATIONS.**—In setting any standard under subsection (b), (c), or (d), the Secretary shall ensure that each standard is the highest standard that—

“(A) is technologically achievable;

“(B) can be achieved without materially reducing the overall safety of automobiles manufactured or sold in the United States;

“(C) is not less than the standard for that class of vehicles from any prior year; and

“(D) is cost-effective.

“(3) **COST-EFFECTIVE DEFINED.**—In this subsection, the term ‘cost-effective’ means that the value to the United States of reduced fuel use from a proposed fuel economy standard is greater than or equal to the cost to the United States of such standard. In determining cost-effectiveness, the Secretary shall give priority to those technologies and packages of technologies that offer the largest reduction in fuel use relative to their costs.

“(4) **FACTORS FOR CONSIDERATION BY SECRETARY IN DETERMINING COST-EFFECTIVENESS.**—The Secretary shall consult with the Administrator of the Environmental Protection Agency, and may consult with such other departments and agencies as the Secretary deems appropriate, and shall consider in the analysis the following factors:

“(A) Economic security.

“(B) The impact of the oil or energy intensity of the United States economy on the sensitivity of the economy to oil and other fuel price changes, including the magnitude of gross domestic product losses in response to short term price shocks or long term price increases.

“(C) National security, including the impact of United States payments for oil and other fuel imports on political, economic, and military developments in unstable or unfriendly oil-exporting countries.

“(D) The uninternalized costs of pipeline and storage oil seepage, and for risk of oil spills from production, handling, and transport, and related landscape damage.

“(E) The emissions of pollutants including greenhouse gases over the lifecycle of the fuel and the resulting costs to human health, the economy, and the environment.

“(F) Such additional factors as the Secretary deems relevant.

“(5) **MINIMUM VALUATION.**—When considering the value to consumers of a gallon of gasoline saved, the Secretary of Transportation shall use as a minimum value the greater of—

“(A) the average value of gasoline prices projected by the Energy Information Administration over the period covered by the standard; or

“(B) the average value of gasoline prices for the 5-year period immediately preceding the year in which the standard is established.”.

(c) **CONSULTATION REQUIREMENT.**—Section 32902(i) of title 49, United States Code, is amended by inserting “and the Administrator of the Environmental Protection Agency” after “Energy”.

(d) **COMMENTS.**—Section 32902(j) of title 49, United States Code, is amended—

(1) by striking paragraph (1) and inserting “(1) Before issuing a notice proposing to prescribe or amend an average fuel economy standard under subsection (b), (c), or (g) of this section, the Secretary of Transportation shall give the Secretary of Energy and Administrator of the Environmental Protection Agency at least 30 days after the receipt of the notice during which the Secretary of Energy and Administrator may, if the Secretary of Energy or Administrator concludes that the proposed standard would adversely affect the conservation goals of the Secretary of Energy or environmental protection goals of the Administrator, provide written comments to the Secretary of Transportation about the impact of the standard on those goals. To the extent the Secretary of Transportation does not revise a proposed standard to take into account comments of the Secretary of Energy or Administrator on any adverse impact of the standard, the Secretary of Transportation shall include those comments in the notice.”; and

(2) by inserting “and the Administrator” after “Energy” each place it appears in paragraph (2).

(e) **ALTERNATIVE FUEL ECONOMY STANDARDS FOR LOW VOLUME MANUFACTURERS AND NEW ENTRANTS.**—Section 32902(d) of title 49, United States Code, is amended to read as follows:

“(d) **ALTERNATIVE AVERAGE FUEL ECONOMY STANDARD.**—

“(1) **IN GENERAL.**—Upon the application of an eligible manufacturer, the Secretary of Transportation may prescribe an alternative average fuel economy standard for automobiles manufactured by that manufacturer if the Secretary determines that—

“(A) the applicable standard prescribed under subsection (a), (b), or (c) is more stringent than the maximum feasible average fuel economy level that manufacturer can achieve; and

“(B) the alternative average fuel economy standard prescribed under this subsection is the maximum feasible average fuel economy level that manufacturer can achieve.

“(2) **APPLICATION OF ALTERNATIVE STANDARD.**—The Secretary may provide for the application of an alternative average fuel economy standard prescribed under paragraph (1) to—

“(A) the manufacturer that applied for the alternative average fuel economy standard;

“(B) all automobiles to which this subsection applies; or

“(C) classes of automobiles manufactured by eligible manufacturers.

“(3) **IMPORTERS.**—Notwithstanding paragraph (1), an importer registered under section 30141(c) may not be exempted as a manufacturer under paragraph (1) for an automobile that the importer—

“(A) imports; or

“(B) brings into compliance with applicable motor vehicle safety standards prescribed under chapter 301 for an individual described in section 30142.

“(4) **APPLICATION.**—The Secretary of Transportation may prescribe the contents of an application for an alternative average fuel economy standard.

“(5) **ELIGIBLE MANUFACTURER DEFINED.**—In this section, the term ‘eligible manufacturer’ means a manufacturer that—

“(A) is not owned in whole or in part by another manufacturer that sold greater than 0.5 percent of the number of automobiles sold in the

United States in the model year prior to the model year to which the application relates;

“(B) sold in the United States fewer than 0.4 percent of the number of automobiles sold in the United States in the model year that is 2 years before the model year to which the application relates; and

“(C) will sell in the United States fewer than 0.4 percent of the automobiles sold in the United States for the model year for which the alternative average fuel economy standard will apply.

“(6) LIMITATION.—For purposes of this subsection, notwithstanding section 32901(a)(4), the term ‘automobile manufactured by a manufacturer’ includes every automobile manufactured by a person that controls, is controlled by, or is under common control with the manufacturer.

(f) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 32902(d) of title 49, United States Code, is amended by striking “passenger” each place it appears.

(2) Section 32902(g) of title 49, United States Code, is amended—

(A) by striking “subsection (a) or (d)” each place it appears in paragraph (1) and inserting “subsection (b), (c), or (d)”; and

(B) striking “(and submit the amendment to Congress when required under subsection (c)(2) of this section)” in paragraph (2).

SEC. 504. DEFINITIONS.

(a) IN GENERAL.—Section 32901(a) of title 49, United States Code, is amended—

(1) by striking paragraph (3) and inserting the following:

“(3) except as provided in section 32908 of this title, ‘automobile’ means a 4-wheeled vehicle that is propelled by fuel, or by alternative fuel, manufactured primarily for use on public streets, roads, and highways and rated at not more than 10,000 pounds gross vehicle weight, except—

“(A) a vehicle operated only on a rail line;

“(B) a vehicle manufactured by 2 or more manufacturers in different stages and less than 10,000 of which are manufactured per year; or

“(C) a work truck.”; and

(2) by adding at the end the following:

“(17) ‘work truck’ means an automobile that the Secretary determines by regulation—

“(A) is rated at between 8,500 and 10,000 pounds gross vehicle weight; and

“(B) is not a medium-duty passenger vehicle (as defined in section 86.1803-01 of title 40, Code of Federal Regulations).”.

(b) DEADLINE FOR REGULATIONS.—The Secretary of Transportation—

(1) shall issue proposed regulations implementing the amendments made by subsection (a) not later than 1 year after the date of enactment of this Act; and

(2) shall issue final regulations implementing the amendments not later than 18 months after the date of the enactment of this Act.

(c) EFFECTIVE DATE.—Regulations prescribed under subsection (b) shall apply beginning with model year 2010.

SEC. 505. ENSURING SAFETY OF AUTOMOBILES.

(a) IN GENERAL.—Subchapter II of chapter 301 of title 49, United States Code, is amended by adding at the end the following:

“§30129. Vehicle compatibility standard

“(a) STANDARDS.—The Secretary of Transportation shall issue a motor vehicle safety standard to reduce automobile incompatibility. The standard shall address characteristics necessary to ensure better management of crash forces in multiple vehicle frontal and side impact crashes between different types, sizes, and weights of automobiles with a gross vehicle weight of 10,000 pounds or less in order to decrease occupant deaths and injuries.

“(b) CONSUMER INFORMATION.—The Secretary shall develop and implement a public information side and frontal compatibility crash test program with vehicle ratings based on risks to

occupants, risks to other motorists, and combined risks by vehicle make and model.”.

(b) RULEMAKING DEADLINES.—

(1) RULEMAKING.—The Secretary of Transportation shall issue—

(A) a notice of a proposed rulemaking under section 30129 of title 49, United States Code, not later than January 1, 2012; and

(B) a final rule under such section not later than December 31, 2014.

(2) EFFECTIVE DATE OF REQUIREMENTS.—Any requirement imposed under the final rule issued under paragraph (1) shall become fully effective not later than September 1, 2018.

(c) CONFORMING AMENDMENT.—The chapter analysis for chapter 301 is amended by inserting after the item relating to section 30128 the following:

“30129. Vehicle compatibility standard”.

SEC. 506. CREDIT TRADING PROGRAM.

Section 32903 of title 49, United States Code, is amended—

(1) by striking “passenger” each place it appears;

(2) by striking “section 32902(b)-(d) of this title” each place it appears and inserting “subsection (a), (c), or (d) of section 32902”; and

(3) by striking “3 consecutive model years” in subsection (a)(2) and inserting “5 consecutive model years”;

(4) in subsection (a)(2), by striking “clause (1) of this subsection,” and inserting “paragraph (1)”; and

(5) by striking subsection (e) and inserting the following:

“(e) CREDIT TRADING AMONG MANUFACTURERS.—The Secretary of Transportation may establish, by regulation, a corporate average fuel economy credit trading program to allow manufacturers whose automobiles exceed the average fuel economy standards prescribed under section 32902 to earn credits to be sold to manufacturers whose automobiles fail to achieve the prescribed standards such that the total oil savings associated with manufacturers that exceed the prescribed standards are preserved when transferring credits to manufacturers that fail to achieve the prescribed standards.”.

SEC. 507. LABELS FOR FUEL ECONOMY AND GREENHOUSE GAS EMISSIONS.

Section 32908 of title 49, United States Code, is amended—

(1) by redesignating subparagraph (F) of subsection (b)(1) as subparagraph (H) and inserting after subparagraph (E) the following:

“(F) a label (or a logo imprinted on a label required by this paragraph) that—

“(i) reflects an automobile’s performance on the basis of criteria developed by the Administrator to reflect the fuel economy and greenhouse gas and other emissions consequences of operating the automobile over its likely useful life;

“(ii) permits consumers to compare performance results under clause (i) among all automobiles; and

“(iii) is designed to encourage the manufacture and sale of automobiles that meet or exceed applicable fuel economy standards under section 32902.

“(G) a fuelstar under paragraph (5).”; and

(2) by adding at the end of subsection (b) the following:

“(4) GREEN LABEL PROGRAM.—

“(A) MARKETING ANALYSIS.—Not later than 2 years after the date of the enactment of the Ten-in-Ten Fuel Economy Act, the Administrator shall implement a consumer education program and execute marketing strategies to improve consumer understanding of automobile performance described in paragraph (1)(F).

“(B) ELIGIBILITY.—Not later than 3 years after the date described in subparagraph (A), the Administrator shall issue requirements for the label or logo required under paragraph (1)(F) to ensure that an automobile is not eligible for the label or logo unless it—

“(i) meets or exceeds the applicable fuel economy standard; or

“(ii) will have the lowest greenhouse gas emissions over the useful life of the vehicle of all vehicles in the vehicle attribute class to which it belongs in that model year.

“(5) FUELSTAR PROGRAM.—

“(A) IN GENERAL.—The Secretary shall establish a program, to be known as the ‘Fuelstar Program’, under which stars shall be imprinted on or attached to the label required by paragraph (1).

“(B) GREEN STARS.—Under the Fuelstar Program, a manufacturer may include on the label maintained on an automobile under paragraph (1)—

“(i) 1 green star for any automobile that meets the average fuel economy standard for the model year under section 32902; and

“(ii) 1 additional green star for each 2 miles per gallon by which the automobile exceeds such standard.

“(C) GOLD STARS.—Under the Fuelstar Program, a manufacturer may include a gold star on the label maintained on an automobile under paragraph (1) if the automobile attains a fuel economy of at least 50 miles per gallon.”.

SEC. 508. CONTINUED APPLICABILITY OF EXISTING STANDARDS.

Nothing in this title, or the amendments made by this title, shall be construed to affect the application of section 32902 of title 49, United States Code, to passenger automobiles or non-passenger automobiles manufactured before model year 2011.

SEC. 509. NATIONAL ACADEMY OF SCIENCES STUDIES.

(a) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary of Transportation shall execute an agreement with the National Academy of Sciences to develop a report evaluating vehicle fuel economy standards, including—

(1) an assessment of automotive technologies and costs to reflect developments since the Academy’s 2002 report evaluating the corporate average fuel economy standards was conducted;

(2) an analysis of existing and potential technologies that may be used practically to improve automobile and medium-duty and heavy-duty truck fuel economy;

(3) an analysis of how such technologies may be practically integrated into the automotive and medium-duty and heavy-duty truck manufacturing process; and

(4) an assessment of how such technologies may be used to meet the new fuel economy standards under chapter 329 of title 49, United States Code, as amended by this title.

(b) QUINQUENNIAL UPDATES.—After submitting the initial report, the Academy shall update the report at 5 year intervals thereafter through 2025.

(c) REPORT.—The Academy shall submit the report to the Secretary, the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Energy and Commerce, with its findings and recommendations no later than 18 months after the date on which the Secretary executes the agreement with the Academy.

SEC. 510. STANDARDS FOR EXECUTIVE AGENCY AUTOMOBILES.

(a) IN GENERAL.—Section 32917 of title 49, United States Code, is amended to read as follows:

“§32917. Standards for Executive agency automobiles

“(a) FUEL EFFICIENCY.—The head of an Executive agency shall ensure that each new automobile procured by the Executive agency is as fuel efficient as practicable.

“(b) DEFINITIONS.—In this section:

“(1) EXECUTIVE AGENCY.—The term ‘Executive agency’ has the meaning given that term in section 105 of title 5.

“(2) NEW AUTOMOBILE.—The term ‘new automobile’, with respect to the fleet of automobiles

of an executive agency, means an automobile that is leased for at least 60 consecutive days or bought, by or for the Executive agency, after September 30, 2008. The term does not include any vehicle designed for combat-related missions, law enforcement work, or emergency rescue work.”.

(b) **REPORT.**—The Administrator of the General Services Administration shall develop a report describing and evaluating the efforts of the heads of the Executive agencies to comply with section 32917 of title 49, United States Code, for fiscal year 2009. The Administrator shall submit the report to Congress no later than December 31, 2009.

SEC. 511. INCREASING CONSUMER AWARENESS OF FLEXIBLE FUEL AUTOMOBILES.

Section 32908 of title 49, United States Code, is amended by adding at the end the following:

“(g) **INCREASING CONSUMER AWARENESS OF FLEXIBLE FUEL AUTOMOBILES.**—(1) The Secretary of Energy, in consultation with the Secretary of Transportation, shall prescribe regulations that require the manufacturer of automobiles distributed in interstate commerce for sale in the United States—

“(A) to prominently display a permanent badge or emblem on the quarter panel or tailgate of each such automobile that indicates such vehicle is capable of operating on alternative fuel; and

“(B) to include information in the owner’s manual of each such automobile information that describes—

“(i) the capability of the automobile to operate using alternative fuel;

“(ii) the benefits of using alternative fuel, including the renewable nature, and the environmental benefits of using alternative fuel; and

“(C) to contain a fuel tank cap that is clearly labeled to inform consumers that the automobile is capable of operating on alternative fuel.

“(2) The Secretary of Transportation shall collaborate with automobile retailers to develop voluntary methods for providing prospective purchasers of automobiles with information regarding the benefits of using alternative fuel in automobiles, including—

“(A) the renewable nature of alternative fuel; and

“(B) the environmental benefits of using alternative fuel.”.

SEC. 512. PERIODIC REVIEW OF ACCURACY OF FUEL ECONOMY LABELING PROCEDURES.

Beginning in December, 2009, and not less often than every 5 years thereafter, the Administrator of the Environmental Protection Agency, in consultation with the Secretary of Transportation, shall—

(1) reevaluate the fuel economy labeling procedures described in the final rule published in the Federal Register on December 27, 2006 (71 Fed. Reg. 77,872; 40 C.F.R. parts 86 and 600) to determine whether changes in the factors used to establish the labeling procedures warrant a revision of that process; and

(2) submit a report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Energy and Commerce that describes the results of the reevaluation process.

SEC. 513. TIRE FUEL EFFICIENCY CONSUMER INFORMATION.

(a) **IN GENERAL.**—Chapter 301 of title 49, United States Code, is amended by inserting after section 30123 the following new section:

“§30123A. Tire fuel efficiency consumer information

“(a) **RULEMAKING.**—

“(1) **IN GENERAL.**—Not later than 18 months after the date of enactment of the Ten-in-Ten Fuel Economy Act, the Secretary of Transportation shall, after notice and opportunity for comment, promulgate rules establishing a national tire fuel efficiency consumer information program for tires designed for use on motor vehi-

cles to educate consumers about the effect of tires on automobile fuel efficiency.

“(2) **ITEMS INCLUDED IN RULE.**—The rule-making shall include—

“(A) a national tire fuel efficiency rating system for motor vehicle tires to assist consumers in making more educated tire purchasing decisions;

“(B) requirements for providing information to consumers, including information at the point of sale and other potential information dissemination methods, including the Internet;

“(C) specifications for test methods for manufacturers to use in assessing and rating tires to avoid variation among test equipment and manufacturers; and

“(D) a national tire maintenance consumer education program including, information on tire inflation pressure, alignment, rotation, and tread wear to maximize fuel efficiency.

“(3) **APPLICABILITY.**—This section shall not apply to tires excluded from coverage under section 575.104(c)(2) of title 49, Code of Federal Regulations, as in effect on date of enactment of the Ten-in-Ten Fuel Economy Act.

“(b) **CONSULTATION.**—The Secretary shall consult with the Secretary of Energy and the Administrator of the Environmental Protection Agency on the means of conveying tire fuel efficiency consumer information.

“(c) **REPORT TO CONGRESS.**—The Secretary shall conduct periodic assessments of the rules promulgated under this section to determine the utility of such rules to consumers, the level of cooperation by industry, and the contribution to national goals pertaining to energy consumption. The Secretary shall transmit periodic reports detailing the findings of such assessments to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Energy and Commerce.

“(d) **TIRE MARKING.**—The Secretary shall not require permanent labeling of any kind on a tire for the purpose of tire fuel efficiency information.

“(e) **PREEMPTION.**—When a requirement under this section is in effect, a State or political subdivision of a State may adopt or enforce a law or regulation on tire fuel efficiency consumer information only if the law or regulation is identical to that requirement. Nothing in this section shall be construed to preempt a State or political subdivision of a State from regulating the fuel efficiency of tires not otherwise preempted under this chapter.”.

(b) **ENFORCEMENT.**—Section 30165(a) of title 49, United States Code, is amended by adding at the end the following:

“(4) **SECTION 30123a.**—Any person who fails to comply with the national tire fuel efficiency consumer information program under section 30123A is liable to the United States Government for a civil penalty of not more than \$50,000 for each violation.”.

(c) **Conforming Amendment.**—The chapter analysis for chapter 301 of title 49, United States Code, is amended by inserting after the item relating to section 30123 the following:

“30123A. Tire fuel efficiency consumer information”.

SEC. 514. ADVANCED BATTERY INITIATIVE.

(a) **IN GENERAL.**—The Secretary of Energy, in consultation with the Secretary of Transportation, shall establish and carry out an Advanced Battery Initiative in accordance with this section to support research, development, demonstration, and commercial application of battery technologies.

(b) **INDUSTRY ALLIANCE.**—Not later than 180 days after the date of enactment of this Act, the Secretary shall competitively select an Industry Alliance to represent participants who are private, for-profit firms headquartered in the United States, the primary business of which is the manufacturing of batteries.

(c) **RESEARCH.**—

(1) **GRANTS.**—The Secretary shall carry out research activities of the Initiative through competitively-awarded grants to—

(A) researchers, including Industry Alliance participants;

(B) small businesses;

(C) National Laboratories; and

(D) institutions of higher education.

(2) **INDUSTRY ALLIANCE.**—The Secretary shall annually solicit from the Industry Alliance—

(A) comments to identify advanced battery technology and battery systems needs relevant to—

(i) electric drive technology; and

(ii) other applications the Secretary deems appropriate;

(B) an assessment of the progress of research activities of the Initiative; and

(C) assistance in annually updating advanced battery technology and battery systems roadmaps.

(d) **AVAILABILITY TO THE PUBLIC.**—The information and roadmaps developed under this section shall be available to the public.

(e) **PREFERENCE.**—In making awards under this subsection, the Secretary shall give preference to participants in the Industry Alliance.

(f) **COST SHARING.**—In carrying out this section, the Secretary shall require cost sharing in accordance with section 120(b) of title 23, United States Code.

(g) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section such sums as may be necessary for each of fiscal years 2008 through 2012.

SEC. 515. BIODIESEL STANDARDS.

(a) **IN GENERAL.**—Not later than 180 days after the date of enactment of this Act, the Administrator of the Environmental Protection Agency, in consultation with the Secretary of Transportation and the Secretary of Energy, shall promulgate regulations to ensure that all diesel-equivalent fuels derived from renewable biomass that are introduced into interstate commerce are tested and certified to comply with appropriate American Society for Testing and Materials standards.

(b) **DEFINITIONS.**—In this section:

(1) **BIODIESEL.**—

(A) **IN GENERAL.**—The term “biodiesel” means the monoalkyl esters of long chain fatty acids derived from plant or animal matter that meet—

(i) the registration requirements for fuels and fuel additives established by the Environmental Protection Agency under section 211 of the Clean Air Act (42 U.S.C. 7545); and

(ii) the requirements of the American Society of Testing and Materials D6751.

(B) **INCLUSIONS.**—The term “biodiesel” includes esters described in subparagraph (A) derived from—

(i) animal waste, including poultry fat, poultry waste, and other waste material; and

(ii) municipal solid waste, sludge, and oil derived from wastewater or the treatment of wastewater.

(2) **BIODIESEL BLEND.**—The term “biodiesel blend” means a mixture of biodiesel and diesel fuel, including—

(A) a blend of biodiesel and diesel fuel approximately 5 percent of the content of which is biodiesel (commonly known as “B5”); and

(B) a blend of biodiesel and diesel fuel approximately 20 percent of the content of which is biodiesel (commonly known as “B20”).

SEC. 516. USE OF CIVIL PENALTIES FOR RESEARCH AND DEVELOPMENT.

Section 32912 of title 49, United States Code, is amended by adding at the end thereof the following:

“(e) **USE OF CIVIL PENALTIES.**—For fiscal year 2008 and each fiscal year thereafter, from the total amount deposited in the general fund of the Treasury during the preceding fiscal year from fines, penalties, and other funds obtained through enforcement actions conducted pursuant to this section (including funds obtained under consent decrees), the Secretary of the Treasury, subject to the availability of appropriations, shall—

“(1) transfer 50 percent of such total amount to the account providing appropriations to the Secretary of Transportation for the administration of this chapter, which shall be used by the Secretary to carry out a program of research and development into fuel saving automotive technologies and to support rulemaking under this chapter; and

“(2) transfer 50 percent of such total amount to the Energy Security Fund established by section 517(a) of the Ten-in-Ten Fuel Economy Act.”

SEC. 517. ENERGY SECURITY FUND AND ALTERNATIVE FUEL GRANT PROGRAM.

(a) **ESTABLISHMENT OF FUND.**—

(1) **IN GENERAL.**—There is established in the Treasury a fund, to be known as the “Energy Security Fund” (referred to in this section as the “Fund”), consisting of—

(A) amounts transferred to the Fund under section 32912(e)(2) of title 49, United States Code; and

(B) amounts credited to the Fund under paragraph (2)(C).

(2) **INVESTMENT OF AMOUNTS.**—

(A) **IN GENERAL.**—The Secretary of the Treasury shall invest in interest-bearing obligations of the United States such portion of the Fund as is not, in the judgment of the Secretary of the Treasury, required to meet current withdrawals.

(B) **SALE OF OBLIGATIONS.**—Any obligation acquired by the Fund may be sold by the Secretary of the Treasury at the market price.

(C) **CREDITS TO FUND.**—The interest on, and the proceeds from the sale or redemption of, any obligations held in the Fund shall be credited to, and form a part of, the Fund in accordance with section 9602 of the Internal Revenue Code of 1986.

(3) **USE OF AMOUNTS IN FUND.**—Amounts in the Fund shall be made available to the Secretary of Energy, subject to the availability of appropriations, to carry out the grant program under subsection (b).

(b) **ALTERNATIVE FUELS GRANT PROGRAM.**—

(1) **IN GENERAL.**—Not later than 90 days after the date of enactment of this Act, the Secretary of Energy, acting through the Clean Cities Program of the Department of Energy, shall establish and carry out a program under which the Secretary shall provide grants to expand the availability to consumers of alternative fuels (as defined in section 32901(a) of title 49, United States Code).

(2) **ELIGIBILITY.**—

(A) **IN GENERAL.**—Except as provided in subparagraph (B), any entity that is eligible to receive assistance under the Clean Cities Program shall be eligible to receive a grant under this subsection.

(B) **EXCEPTIONS.**—

(i) **CERTAIN OIL COMPANIES.**—A large, vertically-integrated oil company shall not be eligible to receive a grant under this subsection.

(ii) **PROHIBITION OF DUAL BENEFITS.**—An entity that receives any other Federal funds for the construction or expansion of alternative refueling infrastructure shall not be eligible to receive a grant under this subsection for the construction or expansion of the same alternative refueling infrastructure.

(C) **ENSURING COMPLIANCE.**—Not later than 30 days after the date of enactment of this Act, the Secretary of Energy shall promulgate regulations to ensure that, before receiving a grant under this subsection, an eligible entity meets applicable standards relating to the installation, construction, and expansion of infrastructure necessary to increase the availability to consumers of alternative fuels (as defined in section 32901(a) of title 49, United States Code).

(3) **MAXIMUM AMOUNT.**—

(A) **GRANTS.**—The amount of a grant provided under this subsection shall not exceed \$30,000.

(B) **AMOUNT PER STATION.**—An eligible entity shall receive not more than \$90,000 under this subsection for any station of the eligible entity during a fiscal year.

(4) **USE OF FUNDS.**—

(A) **IN GENERAL.**—A grant provided under this subsection shall be used for the construction or expansion of alternative fueling infrastructure.

(B) **ADMINISTRATIVE EXPENSES.**—Not more than 3 percent of the amount of a grant provided under this subsection shall be used for administrative expenses.

SEC. 518. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Transportation \$25,000,000 for each of fiscal years 2009 through 2021 to carry out the provisions of chapter 329 of title 49, United States Code.

SEC. 519. APPLICATION WITH CLEAN AIR ACT.

Nothing in this title shall be construed to conflict with the authority provided by sections 202 and 209 of the Clean Air Act (42 U.S.C. 7521 and 7543, respectively).

SEC. 520. ALTERNATIVE FUEL VEHICLE ACTION PLAN.

(a) **IN GENERAL.**—The Secretary of Transportation shall, establish and implement an action plan which takes into consideration the availability and cost effectiveness of alternative fuels, which will ensure that, beginning with model year 2015, the percentage of new automobiles for sale in the United States that are alternative fuel automobiles is not less than 50 percent.

(b) **DEFINITIONS.**—In this section:

(1) **ALTERNATIVE FUEL AUTOMOBILE.**—The term “alternative fuel automobile” means the following but not limited to—

(A) a new advanced lean burn technology motor vehicle (as defined in section 30B(c)(3) of the Internal Revenue Code of 1986) that achieves at least 125 percent of the model year 2002 city fuel economy;

(B) an alternative fueled automobile;

(C) a flexible fuel automobile;

(D) a new qualified fuel cell motor vehicle (as defined in section 30B(e)(4) of such Code).

(E) a new qualified hybrid motor vehicle (as defined in section 30B(d)(3) of such Code);

(F) a plug-in hybrid automobile;

(G) an electric automobile;

(H) a hydrogen internal combustion engine automobile; and

(I) any other automobile that uses substantially new technology and achieves at least 175 percent of the model year 2002 city fuel economy, as determined by the Secretary of Transportation, by regulation.

(2) **OTHER TERMS.**—Any term used in this section that is defined in section 32901 of title 49, United States Code, has the meaning given that term in that section.

SEC. 521. STUDY OF THE ADEQUACY OF TRANSPORTATION OF DOMESTICALLY-PRODUCED RENEWABLE FUEL BY RAILROADS AND OTHER MODES OF TRANSPORTATION.

(a) **STUDY.**—

(1) **IN GENERAL.**—The Secretary of Transportation and the Secretary of Energy shall jointly conduct a study of the adequacy of transportation of domestically-produced renewable fuels by railroad and other modes of transportation as designated by the Secretaries.

(2) **COMPONENTS.**—In conducting the study under paragraph (1), the Secretaries shall—

(A) consider the adequacy of existing railroad and other transportation infrastructure, equipment, service and capacity to move the necessary quantities of domestically-produced renewable fuel within the timeframes required by section 111;

(B)(i) consider the projected costs of moving the domestically-produced renewable fuel by railroad and other modes transportation; and

(ii) consider the impact of the projected costs on the marketability of the domestically-produced renewable fuel;

(C) identify current and potential impediments to the reliable transportation of adequate supplies of domestically-produced renewable

fuel at reasonable prices, including practices currently utilized by domestic producers, shippers, and receivers of renewable fuels;

(D) consider whether inadequate competition exists within and between modes of transportation for the transportation of domestically-produced renewable fuel and, if such inadequate competition exists, whether such inadequate competition leads to an unfair price for the transportation of domestically-produced renewable fuel or unacceptable service for transportation of domestically-produced renewable fuel;

(E) consider whether Federal agencies have adequate legal authority to address instances of inadequate competition when inadequate competition is found to prevent domestic producers for renewable fuels from obtaining a fair and reasonable transportation price or acceptable service for the transportation of domestically-produced renewable fuels;

(F) consider whether Federal agencies have adequate legal authority to address railroad and transportation service problems that may be resulting in inadequate supplies of domestically-produced renewable fuel in any area of the United States;

(G) consider what transportation infrastructure capital expenditures may be necessary to ensure the reliable transportation of adequate supplies of domestically-produced renewable fuel at reasonable prices within the United States and which public and private entities should be responsible for making such expenditures; and

(K) provide recommendations on ways to facilitate the reliable transportation of adequate supplies of domestically-produced renewable fuel at reasonable prices.

(b) **REPORT.**—Not later than 180 days after the date of enactment of this Act, the Secretaries shall jointly submit to the Committee on Commerce, Science and Transportation, the Committee on Energy and Natural Resources, and the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure and the Committee on Energy and Commerce of the House of Representatives a report that describes the results of the study conducted under subsection (a).

TITLE VI—PRICE GOUGING

SEC. 601. SHORT TITLE.

This title may be cited as the “Petroleum Consumer Price Gouging Protection Act”.

SEC. 602. DEFINITIONS.

In this title:

(1) **AFFECTED AREA.**—The term “affected area” means an area covered by a Presidential declaration of energy emergency.

(2) **SUPPLIER.**—The term “supplier” means any person engaged in the trade or business of selling or reselling, at retail or wholesale, or distributing crude oil, gasoline, or petroleum distillates.

(3) **PRICE GOUGING.**—The term “price gouging” means the charging of an unconscionably excessive price by a supplier in an affected area.

(4) **UNCONSCIONABLY EXCESSIVE PRICE.**—The term “unconscionably excessive price” means an average price charged during an energy emergency declared by the President in an area and for a product subject to the declaration, that—

(A)(i)(I) constitutes a gross disparity from the average price at which it was offered for sale in the usual course of the supplier’s business during the 30 days prior to the President’s declaration of an energy emergency; and

(II) grossly exceeds the prices at which the same or similar crude oil gasoline or petroleum distillate was readily obtainable by purchasers from other suppliers in the same relevant geographic market within the affected area; or

(ii) represents an exercise of unfair leverage or unconscionable means on the part of the supplier, during a period of declared energy emergency; and

(B) is not attributable to increased wholesale or operational costs, including replacement costs, outside the control of the supplier, incurred in connection with the sale of crude oil, gasoline, or petroleum distillates; and is not attributable to local, regional, national, or international market conditions.

(5) COMMISSION.—The term “Commission” means the Federal Trade Commission.

SEC. 603. PROHIBITION ON PRICE GOUGING DURING ENERGY EMERGENCIES.

(a) IN GENERAL.—During any energy emergency declared by the President under section 606 of this Act, it is unlawful for any supplier to sell, or offer to sell crude oil, gasoline or petroleum distillates subject to that declaration in, or for use in, the area to which that declaration applies at an unconscionably excessive price.

(b) FACTORS CONSIDERED.—In determining whether a violation of subsection (a) has occurred, there shall be taken into account, among other factors, whether—

(1) the price charged was a price that would reasonably exist in a competitive and freely functioning market; and

(2) the amount of gasoline or other petroleum distillate the seller produced, distributed, or sold during the period the Proclamation was in effect increased over the average amount during the preceding 30 days.

SEC. 604. PROHIBITION ON MARKET MANIPULATION.

It is unlawful for any person, directly or indirectly, to use or employ, in connection with the purchase or sale of crude oil gasoline or petroleum distillates at wholesale, any manipulative or deceptive device or contrivance, in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of United States citizens.

SEC. 605. PROHIBITION ON FALSE INFORMATION.

(a) IN GENERAL.—It is unlawful for any person to report information related to the wholesale price of crude oil gasoline or petroleum distillates to a Federal department or agency if—

(1) that person knew, or reasonably should have known, the information to be false or misleading;

(2) the information was required by law to be reported; and

(3) the person intended the false or misleading data to affect data compiled by the department or agency for statistical or analytical purposes with respect to the market for crude oil, gasoline, or petroleum distillates.

SEC. 606. PRESIDENTIAL DECLARATION OF ENERGY EMERGENCY.

(a) IN GENERAL.—If the President finds that the health, safety, welfare, or economic well-being of the citizens of the United States is at risk because of a shortage or imminent shortage of adequate supplies of crude oil, gasoline or petroleum distillates due to a disruption in the national distribution system for crude oil, gasoline or petroleum distillates (including such a shortage related to a major disaster (as defined in section 102(2) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122(2))), or significant pricing anomalies in national energy markets for crude oil, gasoline, or petroleum distillates, the President may declare that a Federal energy emergency exists.

(b) SCOPE AND DURATION.—The emergency declaration shall specify—

(1) the period, not to exceed 30 days, for which the declaration applies;

(2) the circumstance or condition necessitating the declaration; and

(3) the area or region to which it applies which may not be limited to a single State; and

(4) the product or products to which it applies.

(c) EXTENSIONS.—The President may—

(1) extend a declaration under subsection (a) for a period of not more than 30 days;

(2) extend such a declaration more than once; and

(3) discontinue such a declaration before its expiration.

SEC. 607. ENFORCEMENT BY THE FEDERAL TRADE COMMISSION.

(a) ENFORCEMENT.—This title shall be enforced by the Federal Trade Commission in the same manner, by the same means, and with the same jurisdiction as though all applicable terms of the Federal Trade Commission Act were incorporated into and made a part of this title. In enforcing section 603 of this Act, the Commission shall give priority to enforcement actions concerning companies with total United States wholesale or retail sales of crude oil, gasoline, and petroleum distillates in excess of \$500,000,000 per year but shall not exclude enforcement actions against companies with total United States wholesale sales of \$500,000,000 or less per year.

(b) VIOLATION IS TREATED AS UNFAIR OR DECEPTIVE ACT OR PRACTICE.—The violation of any provision of this title shall be treated as an unfair or deceptive act or practice proscribed under a rule issued under section 18(a)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)(B)).

(c) COMMISSION ACTIONS.—Following the declaration of an energy emergency by the President under section 606 of this Act, the Commission shall—

(1) maintain within the Commission—

(A) a toll-free hotline that a consumer may call to report an incident of price gouging in the affected area; and

(B) a program to develop and distribute to the public informational materials to assist residents of the affected area in detecting, avoiding, and reporting price gouging;

(2) consult with the Attorney General, the United States Attorney for the districts in which a disaster occurred (if the declaration is related to a major disaster), and State and local law enforcement officials to determine whether any supplier in the affected area is charging or has charged an unconscionably excessive price for crude oil, gasoline, or petroleum distillates in the affected area; and

(3) conduct investigations as appropriate to determine whether any supplier in the affected area has violated section 603 of this Act, and upon such finding, take any action the Commission determines to be appropriate to remedy the violation.

SEC. 608. ENFORCEMENT BY STATE ATTORNEYS GENERAL.

(a) IN GENERAL.—A State, as *parens patriae*, may bring a civil action on behalf of its residents in an appropriate district court of the United States to enforce the provisions of section 603 of this Act, or to impose the civil penalties authorized by section 609 for violations of section 603, whenever the attorney general of the State has reason to believe that the interests of the residents of the State have been or are being threatened or adversely affected by a supplier engaged in the sale or resale, at retail or wholesale, or distribution of crude oil, gasoline or petroleum distillates in violation of section 603 of this Act.

(b) NOTICE.—The State shall serve written notice to the Commission of any civil action under subsection (a) prior to initiating the action. The notice shall include a copy of the complaint to be filed to initiate the civil action, except that if it is not feasible for the State to provide such prior notice, the State shall provide such notice immediately upon instituting the civil action.

(c) AUTHORITY TO INTERVENE.—Upon receiving the notice required by subsection (b), the Commission may intervene in the civil action and, upon intervening—

(1) may be heard on all matters arising in such civil action; and

(2) may file petitions for appeal of a decision in such civil action.

(d) CONSTRUCTION.—For purposes of bringing any civil action under subsection (a), nothing in

this section shall prevent the attorney general of a State from exercising the powers conferred on the Attorney General by the laws of such State to conduct investigations or to administer oaths or affirmations or to compel the attendance of witnesses or the production of documentary and other evidence.

(e) VENUE; SERVICE OF PROCESS.—In a civil action brought under subsection (a)—

(1) the venue shall be a judicial district in which—

(A) the defendant operates;

(B) the defendant was authorized to do business; or

(C) where the defendant in the civil action is found;

(2) process may be served without regard to the territorial limits of the district or of the State in which the civil action is instituted; and

(3) a person who participated with the defendant in an alleged violation that is being litigated in the civil action may be joined in the civil action without regard to the residence of the person.

(f) LIMITATION ON STATE ACTION WHILE FEDERAL ACTION IS PENDING.—If the Commission has instituted a civil action or an administrative action for violation of this title, a State attorney general, or official or agency of a State, may not bring an action under this section during the pendency of that action against any defendant named in the complaint of the Commission or the other agency for any violation of this title alleged in the Commission's civil or administrative action.

(g) NO PREEMPTION.—Nothing contained in this section shall prohibit an authorized State official from proceeding in State court to enforce a civil or criminal statute of that State.

SEC. 609. PENALTIES.

(a) CIVIL PENALTY.—

(1) IN GENERAL.—In addition to any penalty applicable under the Federal Trade Commission Act, any supplier—

(A) that violates section 604 or section 605 of this Act is punishable by a civil penalty of not more than \$1,000,000; and

(B) that violates section 603 of this Act is punishable by a civil penalty of—

(i) not more than \$500,000, in the case of an independent small business marketer of gasoline (within the meaning of section 324(c) of the Clean Air Act (42 U.S.C. 7625(c))); and

(ii) not more than \$5,000,000 in the case of any other supplier.

(2) METHOD.—The penalties provided by paragraph (1) shall be obtained in the same manner as civil penalties imposed under section 5 of the Federal Trade Commission Act (15 U.S.C. 45).

(3) MULTIPLE OFFENSES; MITIGATING FACTORS.—In assessing the penalty provided by subsection (a)—

(A) each day of a continuing violation shall be considered a separate violation; and

(B) the court shall take into consideration, among other factors, the seriousness of the violation and the efforts of the person committing the violation to remedy the harm caused by the violation in a timely manner.

(b) CRIMINAL PENALTY.—Violation of section 603 of this Act is punishable by a fine of not more than \$5,000,000, imprisonment for not more than 5 years, or both.

SEC. 610. EFFECT ON OTHER LAWS.

(a) OTHER AUTHORITY OF THE COMMISSION.—Nothing in this title shall be construed to limit or affect in any way the Commission's authority to bring enforcement actions or take any other measure under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) or any other provision of law.

(b) STATE LAW.—Nothing in this title preempts any State law.

TITLE VII—ENERGY DIPLOMACY AND SECURITY

SEC. 701. SHORT TITLE.

This title may be cited as the “Energy Diplomacy and Security Act of 2007”.

SEC. 702. DEFINITIONS.

In this title:

(1) **MAJOR ENERGY PRODUCER.**—The term “major energy producer” means a country that—

(A) had crude oil, oil sands, or natural gas to liquids production of 1,000,000 barrels per day or greater average in the previous year;

(B) has crude oil, shale oil, or oil sands reserves of 6,000,000,000 barrels or greater, as recognized by the Department of Energy;

(C) had natural gas production of 30,000,000,000 cubic meters or greater in the previous year;

(D) has natural gas reserves of 1,250,000,000,000 cubic meters or greater, as recognized by the Department of Energy; or

(E) is a direct supplier of natural gas or liquefied natural gas to the United States.

(2) **MAJOR ENERGY CONSUMER.**—The term “major energy consumer” means a country that—

(A) had an oil consumption average of 1,000,000 barrels per day or greater in the previous year;

(B) had an oil consumption growth rate of 8 percent or greater in the previous year;

(C) had a natural gas consumption of 30,000,000,000 cubic meters or greater in the previous year; or

(D) had a natural gas consumption growth rate of 15 percent or greater in the previous year.

SEC. 703. SENSE OF CONGRESS ON ENERGY DIPLOMACY AND SECURITY.

(a) **FINDINGS.**—Congress makes the following findings:

(1) It is imperative to the national security and prosperity of the United States to have reliable, affordable, clean, sufficient, and sustainable sources of energy.

(2) United States dependence on oil imports causes tremendous costs to the United States national security, economy, foreign policy, military, and environmental sustainability.

(3) Energy security is a priority for the governments of many foreign countries and increasingly plays a central role in the relations of the United States Government with foreign governments. Global reserves of oil and natural gas are concentrated in a small number of countries. Access to these oil and natural gas supplies depends on the political will of these producing states. Competition between governments for access to oil and natural gas reserves can lead to economic, political, and armed conflict. Oil exporting states have received dramatically increased revenues due to high global prices, enhancing the ability of some of these states to act in a manner threatening to global stability.

(4) Efforts to combat poverty and protect the environment are hindered by the continued predominance of oil and natural gas in meeting global energy needs. Development of renewable energy through sustainable practices will help lead to a reduction in greenhouse gas emissions and enhance international development.

(5) Cooperation on energy issues between the United States Government and the governments of foreign countries is critical for securing the strategic and economic interests of the United States and of partner governments. In the current global energy situation, the energy policies and activities of the governments of foreign countries can have dramatic impacts on United States energy security.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) United States national security requires that the United States Government have an energy policy that pursues the strategic goal of achieving energy security through access to clean, affordable, sufficient, reliable, and sustainable sources of energy;

(2) achieving energy security is a priority for United States foreign policy and requires continued and enhanced engagement with foreign governments and entities in a variety of areas,

including activities relating to the promotion of alternative and renewable fuels, trade and investment in oil, coal, and natural gas, energy efficiency, climate and environmental protection, data transparency, advanced scientific research, public-private partnerships, and energy activities in international development;

(3) the President should ensure that the international energy activities of the United States Government are given clear focus to support the national security needs of the United States, and to this end, there should be established a mechanism to coordinate the implementation of United States international energy policy among the Federal agencies engaged in relevant agreements and activities; and

(4) the Secretary of State should ensure that energy security is integrated into the core mission of the Department of State, and to this end, there should be established within the Office of the Secretary of State a Coordinator for International Energy Affairs with responsibility for—

(A) developing United States international energy policy in coordination with the Department of Energy and other relevant Federal agencies;

(B) working with appropriate United States Government officials to develop and update analyses of the national security implications of global energy developments;

(C) incorporating energy security priorities into the activities of the Department;

(D) coordinating activities with relevant Federal agencies; and

(E) coordinating energy security and other relevant functions currently undertaken by offices within the Bureau of Economic, Business, and Agricultural Affairs, the Bureau of Democracy and Global Affairs, and other offices within the Department of State.

(5) the Department of Energy should be designated as the lead United States Government agency in charge of formulating and coordinating the national energy security policy of the United States, and in furtherance of these goals, there should be established within the Department of Energy an Assistant Secretary of Energy for Energy Security whose responsibilities should include—

(A) directing the development of the national energy security strategy of the United States;

(B) coordinating the national energy security policy of the United States with the Department of Defense, the Department of State, and the National Security Council, as appropriate, to address the impact of, and integrate national security and foreign policy on, the national energy security policy of the United States;

(C) monitoring international and domestic energy developments to gauge their impact on the national energy security policy of the United States and implementing changes in such policy as necessary to maintain the national security and energy security of the United States;

(D) identifying foreign sources of energy critical to the national energy security of the United States and developing strategies in conjunction with the Department of State for ensuring United States access to critical foreign energy resources;

(E) developing strategies for reducing United States dependence on foreign sources of energy, including demand reduction, efficiency improvement, and development of alternative and new sources of domestic energy; and

(F) developing strategies in conjunction with the Department of State for working with major international producers and consumers, including China, Russia, the European Union, and Africa, to minimize politicization of global energy resources while ensuring access through global energy markets.

SEC. 704. STRATEGIC ENERGY PARTNERSHIPS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) United States Government partnership with foreign governments and entities, including partnership with the private sector, for securing

reliable and sustainable energy is imperative to ensuring United States security and economic interests, promoting international peace and security, expanding international development, supporting democratic reform, fostering economic growth, and safeguarding the environment.

(2) Democracy and freedom should be promoted globally by partnership with foreign governments, including in particular governments of emerging democracies such as those of Ukraine and Georgia, in their efforts to reduce their dependency on oil and natural gas imports.

(3) The United States Government and the governments of foreign countries have common needs for adequate, reliable, affordable, clean, and sustainable energy in order to ensure national security, economic growth, and high standards of living in their countries. Cooperation by the United States Government with foreign governments on meeting energy security needs is mutually beneficial. United States Government partnership with foreign governments should include cooperation with major energy consuming countries, major energy producing countries, and other governments seeking to advance global energy security through reliable and sustainable means.

(4) The United States Government participates in hundreds of bilateral and multilateral energy agreements and activities with foreign governments and entities. These agreements and activities should reflect the strategic need for energy security.

(b) **STATEMENT OF POLICY.**—It is the policy of the United States—

(1) to advance global energy security through cooperation with foreign governments and entities;

(2) to promote reliable, diverse, and sustainable sources of all types of energy;

(3) to increase global availability of renewable and clean sources of energy;

(4) to decrease global dependence on oil and natural gas energy sources; and

(5) to engage in energy cooperation to strengthen strategic partnerships that advance peace, security, and democratic prosperity.

(c) **AUTHORITY.**—The Secretary of State, in coordination with the Secretary of Energy, should immediately seek to establish and expand strategic energy partnerships with the governments of major energy producers and major energy consumers, and with governments of other countries (but excluding any countries that are ineligible to receive United States economic or military assistance).

(d) **PURPOSES.**—The purposes of the strategic energy partnerships established pursuant to subsection (c) are—

(1) to strengthen global relationships to promote international peace and security through fostering cooperation in the energy sector on a mutually beneficial basis in accordance with respective national energy policies;

(2) to promote the policy set forth in subsection (b), including activities to advance—

(A) the mutual understanding of each country's energy needs, priorities, and policies, including interparliamentary understanding;

(B) measures to respond to acute energy supply disruptions, particularly in regard to petroleum and natural gas resources;

(C) long-term reliability and sustainability in energy supply;

(D) the safeguarding and safe handling of nuclear fuel;

(E) human and environmental protection;

(F) renewable energy production;

(G) access to reliable and affordable energy for underdeveloped areas, in particular energy access for the poor;

(H) appropriate commercial cooperation;

(I) information reliability and transparency; and

(J) research and training collaboration;

(3) to advance the national security priority of developing sustainable and clean energy

sources, including through research and development related to, and deployment of—

(A) renewable electrical energy sources, including biomass, wind, and solar;

(B) renewable transportation fuels, including biofuels;

(C) clean coal technologies;

(D) carbon sequestration, including in conjunction with power generation, agriculture, and forestry; and

(E) energy and fuel efficiency, including hybrids and plug-in hybrids, flexible fuel, advanced composites, hydrogen, and other transportation technologies; and

(4) to provide strategic focus for current and future United States Government activities in energy cooperation to meet the global need for energy security.

(e) DETERMINATION OF AGENDAS.—In general, the specific agenda with respect to a particular strategic energy partnership, and the Federal agencies designated to implement related activities, shall be determined by the Secretary of State and the Secretary of Energy.

(f) USE OF CURRENT AGREEMENTS TO ESTABLISH PARTNERSHIPS.—Some or all of the purposes of the strategic energy partnerships established under subsection (c) may be pursued through existing bilateral or multilateral agreements and activities. Such agreements and activities shall be subject to the reporting requirements in subsection (g).

(g) REPORTS REQUIRED.—

(1) INITIAL PROGRESS REPORT.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State shall submit to the appropriate congressional committees a report on progress made in developing the strategic energy partnerships authorized under this section.

(2) ANNUAL PROGRESS REPORTS.—

(A) IN GENERAL.—Not later than one year after the date of the enactment of this Act, and annually thereafter for 20 years, the Secretary of State shall submit to the appropriate congressional committees an annual report on agreements entered into and activities undertaken pursuant to this section, including international environment activities.

(B) CONTENT.—Each report submitted under this paragraph shall include details on—

(i) agreements and activities pursued by the United States Government with foreign governments and entities, the implementation plans for such agreements and progress measurement benchmarks, United States Government resources used in pursuit of such agreements and activities, and legislative changes recommended for improved partnership; and

(ii) policies and actions in the energy sector of partnership countries pertinent to United States economic, security, and environmental interests.

SEC. 705. INTERNATIONAL ENERGY CRISIS RESPONSE MECHANISMS.

(a) FINDINGS.—Congress makes the following findings:

(1) Cooperation between the United States Government and governments of other countries during energy crises promotes the national security of the United States.

(2) The participation of the United States in the International Energy Program established under the Agreement on an International Energy Program, done at Paris November 18, 1974 (27 U.S.T. 1685), including in the coordination of national strategic petroleum reserves, is a national security asset that—

(A) protects the consumers and the economy of the United States in the event of a major disruption in petroleum supply;

(B) maximizes the effectiveness of the United States strategic petroleum reserve through cooperation in accessing global reserves of various petroleum products;

(C) provides market reassurance in countries that are members of the International Energy Program; and

(D) strengthens United States Government relationships with members of the International Energy Program.

(3) The International Energy Agency projects that the largest growth in demand for petroleum products, other than demand from the United States, will come from China and India, which are not members of the International Energy Program. The Governments of China and India vigorously pursue access to global oil reserves and are attempting to develop national petroleum reserves. Participation of the Governments of China and India in an international petroleum reserve mechanism would promote global energy security, but such participation should be conditional on the Governments of China and India abiding by customary petroleum reserve management practices.

(4) In the Western Hemisphere, only the United States and Canada are members of the International Energy Program. The vulnerability of most Western Hemisphere countries to supply disruptions from political, natural, or terrorism causes may introduce instability in the hemisphere and can be a source of conflict, despite the existence of major oil reserves in the hemisphere.

(5) Countries that are not members of the International Energy Program and are unable to maintain their own national strategic reserves are vulnerable to petroleum supply disruption. Disruption in petroleum supply and spikes in petroleum costs could devastate the economies of developing countries and could cause internal or interstate conflict.

(6) The involvement of the United States Government in the extension of international mechanisms to coordinate strategic petroleum reserves and the extension of other emergency preparedness measures should strengthen the current International Energy Program.

(b) ENERGY CRISIS RESPONSE MECHANISMS WITH INDIA AND CHINA.—

(1) AUTHORITY.—The Secretary of State, in coordination with the Secretary of Energy, should immediately seek to establish a petroleum crisis response mechanism or mechanisms with the Governments of China and India.

(2) SCOPE.—The mechanism or mechanisms established under paragraph (1) should include—

(A) technical assistance in the development and management of national strategic petroleum reserves;

(B) agreements for coordinating drawdowns of strategic petroleum reserves with the United States, conditional upon reserve holdings and management conditions established by the Secretary of Energy;

(C) emergency demand restraint measures;

(D) fuel switching preparedness and alternative fuel production capacity; and

(E) ongoing demand intensity reduction programs.

(3) USE OF EXISTING AGREEMENTS TO ESTABLISH MECHANISM.—The Secretary may, after consultation with Congress and in accordance with existing international agreements, including the International Energy Program, include China and India in a petroleum crisis response mechanism through existing or new agreements.

(c) ENERGY CRISIS RESPONSE MECHANISM FOR THE WESTERN HEMISPHERE.—

(1) AUTHORITY.—The Secretary of State, in coordination with the Secretary of Energy, should immediately seek to establish a Western Hemisphere energy crisis response mechanism.

(2) SCOPE.—The mechanism established under paragraph (1) should include—

(A) an information sharing and coordinating mechanism in case of energy supply emergencies;

(B) technical assistance in the development and management of national strategic petroleum reserves within countries of the Western Hemisphere;

(C) technical assistance in developing national programs to meet the requirements of membership in a future international energy application procedure as described in subsection (d);

(D) emergency demand restraint measures;

(E) energy switching preparedness and alternative energy production capacity; and

(F) ongoing demand intensity reduction programs.

(3) MEMBERSHIP.—The Secretary should seek to include in the Western Hemisphere energy crisis response mechanism membership for each major energy producer and major energy consumer in the Western Hemisphere and other members of the Hemisphere Energy Cooperation Forum authorized under section 706.

(d) INTERNATIONAL ENERGY PROGRAM APPLICATION PROCEDURE.—

(1) AUTHORITY.—The President should place on the agenda for discussion at the Governing Board of the International Energy Agency, as soon as practicable, the merits of establishing an international energy program application procedure.

(2) PURPOSE.—The purpose of such procedure is to allow countries that are not members of the International Energy Program to apply to the Governing Board of the International Energy Agency for allocation of petroleum reserve stocks in times of emergency on a grant or loan basis. Such countries should also receive technical assistance for, and be subject to, conditions requiring development and management of national programs for energy emergency preparedness, including demand restraint, fuel switching preparedness, and development of alternative fuels production capacity.

(e) REPORTS REQUIRED.—

(1) PETROLEUM RESERVES.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Energy shall submit to the appropriate congressional committees a report that evaluates the options for adapting the United States national strategic petroleum reserve and the international petroleum reserve coordinating mechanism in order to carry out this section.

(2) CRISIS RESPONSE MECHANISMS.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in coordination with the Secretary of Energy, shall submit to the appropriate congressional committees a report on the status of the establishment of the international petroleum crisis response mechanisms described in subsections (b) and (c). The report shall include recommendations of the Secretary of State and the Secretary of Energy for any legislation necessary to establish or carry out such mechanisms.

(3) EMERGENCY APPLICATION PROCEDURE.—Not later than 60 days after a discussion by the Governing Board of the International Energy Agency of the application procedure described under subsection (d), the President should submit to Congress a report that describes—

(A) the actions the United States Government has taken pursuant to such subsection; and

(B) a summary of the debate on the matter before the Governing Board of the International Energy Agency, including any decision that has been reached by the Governing Board with respect to the matter.

SEC. 706. HEMISPHERE ENERGY COOPERATION FORUM.

(a) FINDINGS.—Congress makes the following findings:

(1) The engagement of the United States Government with governments of countries in the Western Hemisphere is a strategic priority for reducing the potential for tension over energy resources, maintaining and expanding reliable energy supplies, expanding use of renewable energy, and reducing the detrimental effects of energy import dependence within the hemisphere. Current energy dialogues should be expanded and refocused as needed to meet this challenge.

(2) Countries of the Western Hemisphere can most effectively meet their common needs for energy security and sustainability through partnership and cooperation. Cooperation between governments on energy issues will enhance bilateral relationships among countries of the hemisphere. The Western Hemisphere is rich in natural resources, including biomass, oil, natural gas, coal, and has significant opportunity

for production of renewable hydro, solar, wind, and other energies. Countries of the Western Hemisphere can provide convenient and reliable markets for trade in energy goods and services.

(3) Development of sustainable energy alternatives in the countries of the Western Hemisphere can improve energy security, balance of trade, and environmental quality and provide markets for energy technology and agricultural products. Brazil and the United States have led the world in the production of ethanol, and deeper cooperation on biofuels with other countries of the hemisphere would extend economic and security benefits.

(4) Private sector partnership and investment in all sources of energy is critical to providing energy security in the Western Hemisphere.

(b) **HEMISPHERE ENERGY COOPERATION FORUM.**—

(1) **ESTABLISHMENT.**—The Secretary of State, in coordination with the Secretary of Energy, should immediately seek to establish a regional-based ministerial forum to be known as the Hemisphere Energy Cooperation Forum.

(2) **PURPOSES.**—The Hemisphere Energy Cooperation Forum should seek—

(A) to strengthen relationships between the United States and other countries of the Western Hemisphere through cooperation on energy issues;

(B) to enhance cooperation between major energy producers and major energy consumers in the Western Hemisphere, particularly among the governments of Brazil, Canada, Mexico, the United States, and Venezuela;

(C) to ensure that energy contributes to the economic, social, and environmental enhancement of the countries of the Western Hemisphere;

(D) to provide an opportunity for open dialogue and joint commitments between member governments and with private industry; and

(E) to provide participating countries the flexibility necessary to cooperatively address broad challenges posed to the energy supply of the Western Hemisphere that are practical in policy terms and politically acceptable.

(3) **ACTIVITIES.**—The Hemisphere Energy Cooperation Forum should implement the following activities:

(A) An Energy Crisis Initiative that will establish measures to respond to temporary energy supply disruptions, including through—

(i) strengthening sea-lane and infrastructure security;

(ii) implementing a real-time emergency information sharing system;

(iii) encouraging members to have emergency mechanisms and contingency plans in place; and

(iv) establishing a Western Hemisphere energy crisis response mechanism as authorized under section 705(c).

(B) An Energy Sustainability Initiative to facilitate long-term supply security through fostering reliable supply sources of fuels, including development, deployment, and commercialization of technologies for sustainable renewable fuels within the region, including activities that—

(i) promote production and trade in sustainable energy, including energy from biomass;

(ii) facilitate investment, trade, and technology cooperation in energy infrastructure, petroleum products, natural gas (including liquefied natural gas), energy efficiency (including automotive efficiency), clean fossil energy, renewable energy, and carbon sequestration;

(iii) promote regional infrastructure and market integration;

(iv) develop effective and stable regulatory frameworks;

(v) develop renewable fuels standards and renewable portfolio standards;

(vi) establish educational training and exchange programs between member countries; and

(vii) identify and remove barriers to trade in technology, services, and commodities.

(C) An Energy for Development Initiative to promote energy access for underdeveloped areas through energy policy and infrastructure development, including activities that—

(i) increase access to energy services for the poor;

(ii) improve energy sector market conditions;

(iii) promote rural development through biomass energy production and use;

(iv) increase transparency of, and participation in, energy infrastructure projects;

(v) promote development and deployment of technology for clean and sustainable energy development, including biofuel and clean coal technologies; and

(vi) facilitate use of carbon sequestration methods in agriculture and forestry and linking greenhouse gas emissions reduction programs to international carbon markets.

(c) **HEMISPHERE ENERGY INDUSTRY GROUP.**—

(1) **AUTHORITY.**—The Secretary of State, in coordination with the Secretary of Commerce and the Secretary of Energy, should approach the governments of other countries in the Western Hemisphere to seek cooperation in establishing a Hemisphere Energy Industry Group, to be coordinated by the United States Government, involving industry representatives and government representatives from the Western Hemisphere.

(2) **PURPOSE.**—The purpose of the forum should be to increase public-private partnerships, foster private investment, and enable countries of the Western Hemisphere to devise energy agendas compatible with industry capacity and cognizant of industry goals.

(3) **TOPICS OF DIALOGUES.**—Topics for the forum should include—

(A) promotion of a secure investment climate;

(B) development and deployment of biofuels and other alternative fuels and clean electrical production facilities, including clean coal and carbon sequestration;

(C) development and deployment of energy efficient technologies and practices, including in the industrial, residential, and transportation sectors;

(D) investment in oil and natural gas production and distribution;

(E) transparency of energy production and reserves data;

(F) research promotion; and

(G) training and education exchange programs.

(d) **ANNUAL REPORT.**—The Secretary of State, in coordination with the Secretary of Energy, shall submit to the appropriate congressional committees an annual report on the implementation of this section, including the strategy and benchmarks for measurement of progress developed under this section.

SEC. 707. NATIONAL SECURITY COUNCIL REORGANIZATION.

Section 101(a) of the National Security Act of 1947 (50 U.S.C. 402(a)) is amended—

(1) by redesignating paragraphs (5), (6), and (7) as paragraphs (6), (7), and (8), respectively; and

(2) by inserting after paragraph (4) the following:

“(5) the Secretary of Energy;”.

SEC. 708. ANNUAL NATIONAL ENERGY SECURITY STRATEGY REPORT.

(a) **REPORTS.**—

(1) **IN GENERAL.**—Subject to paragraph (2), on the date on which the President submits to Congress the budget for the following fiscal year under section 1105 of title 31, United States Code, the President shall submit to Congress a comprehensive report on the national energy security of the United States.

(2) **NEW PRESIDENTS.**—In addition to the reports required under paragraph (1), the President shall submit a comprehensive report on the national energy security of the United States by not later than 150 days after the date on which the President assumes the office of President after a presidential election.

(b) **CONTENTS.**—Each report under this section shall describe the national energy security strategy of the United States, including a comprehensive description of—

(1) the worldwide interests, goals, and objectives of the United States that are vital to the national energy security of the United States;

(2) the foreign policy, worldwide commitments, and national defense capabilities of the United States necessary—

(A) to deter political manipulation of world energy resources; and

(B) to implement the national energy security strategy of the United States;

(3) the proposed short-term and long-term uses of the political, economic, military, and other authorities of the United States—

(A) to protect or promote energy security; and

(B) to achieve the goals and objectives described in paragraph (1);

(4) the adequacy of the capabilities of the United States to protect the national energy security of the United States, including an evaluation of the balance among the capabilities of all elements of the national authority of the United States to support the implementation of the national energy security strategy; and

(5) such other information as the President determines to be necessary to inform Congress on matters relating to the national energy security of the United States.

(c) **CLASSIFIED AND UNCLASSIFIED FORM.**—Each national energy security strategy report shall be submitted to Congress in—

(1) a classified form; and

(2) an unclassified form.

SEC. 709. APPROPRIATE CONGRESSIONAL COMMITTEES DEFINED.

In this title, the term “appropriate congressional committees” means the Committee on Foreign Relations and the Committee on Energy and Natural Resources of the Senate and the Committee on Foreign Affairs and the Committee on Energy and Commerce of the House of Representatives.

SEC. 710. NO OIL PRODUCING AND EXPORTING CARTELS ACT OF 2007.

(a) **SHORT TITLE.**—This section may be cited as the “No Oil Producing and Exporting Cartels Act of 2007” or “NOPEC”.

(b) **SHERMAN ACT.**—The Sherman Act (15 U.S.C. 1 et seq.) is amended by adding after section 7 the following:

“**SEC. 7A. OIL PRODUCING CARTELS.**

“(a) **IN GENERAL.**—It shall be illegal and a violation of this Act for any foreign state, or any instrumentality or agent of any foreign state, to act collectively or in combination with any other foreign state, any instrumentality or agent of any other foreign state, or any other person, whether by cartel or any other association or form of cooperation or joint action—

“(1) to limit the production or distribution of oil, natural gas, or any other petroleum product;

“(2) to set or maintain the price of oil, natural gas, or any petroleum product; or

“(3) to otherwise take any action in restraint of trade for oil, natural gas, or any petroleum product;

when such action, combination, or collective action has a direct, substantial, and reasonably foreseeable effect on the market, supply, price, or distribution of oil, natural gas, or other petroleum product in the United States.

“(b) **SOVEREIGN IMMUNITY.**—A foreign state engaged in conduct in violation of subsection (a) shall not be immune under the doctrine of sovereign immunity from the jurisdiction or judgments of the courts of the United States in any action brought to enforce this section.

“(c) **INAPPLICABILITY OF ACT OF STATE DOCTRINE.**—No court of the United States shall decline, based on the act of state doctrine, to make a determination on the merits in an action brought under this section.

“(d) **ENFORCEMENT.**—The Attorney General of the United States may bring an action to enforce this section in any district court of the

United States as provided under the antitrust laws.”.

(c) SOVEREIGN IMMUNITY.—Section 1605(a) of title 28, United States Code, is amended—

(1) in paragraph (6), by striking “or” after the semicolon;

(2) in paragraph (7), by striking the period and inserting “; or”; and

(3) by adding at the end the following:

“(B) in which the action is brought under section 7A of the Sherman Act.”.

SEC. 711. CONVENTION ON SUPPLEMENTARY COMPENSATION FOR NUCLEAR DAMAGE CONTINGENT COST ALLOCATION.

(a) FINDINGS AND PURPOSE.—

(1) FINDINGS.—Congress finds that—

(A) section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) (commonly known as the “Price-Anderson Act”)—

(i) provides a predictable legal framework necessary for nuclear projects; and

(ii) ensures prompt and equitable compensation in the event of a nuclear incident in the United States;

(B) section 170 of that Act, in effect, provides operators of nuclear powerplants with insurance for damage arising out of a nuclear incident and funds the insurance primarily through the assessment of a retrospective premium from each operator after the occurrence of a nuclear incident;

(C) the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997, will establish a global system—

(i) to provide a predictable legal framework necessary for nuclear energy projects; and

(ii) to ensure prompt and equitable compensation in the event of a nuclear incident;

(D) the Convention benefits United States nuclear suppliers that face potentially unlimited liability for a nuclear incidents outside the coverage of section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) by replacing a potentially open-ended liability with a predictable liability regime that, in effect, provides nuclear suppliers with insurance for damage arising out of such an incident;

(E) the Convention also benefits United States nuclear facility operators that may be publicly liable for a Price-Anderson incident by providing an additional early source for a Price-Anderson incident by providing an additional early source of funds to compensate damage arising out of the Price-Anderson incident;

(F) the combined operation of the Convention, section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210), and this section will augment the quantity of assured funds available for victims in a wider variety of nuclear incidents while reducing the potential liability of United States suppliers without increasing potential costs to United States operators;

(G) the cost of those benefits is the obligation of the United States to contribute to the supplementary compensation fund established by the Convention;

(H) any such contribution should be funded in a manner that neither upsets settled expectations based on the liability regime established under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) nor shifts to Federal taxpayers liability risks for nuclear incidents at foreign installations;

(I) with respect to a Price-Anderson incident, funds already available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) should be used; and

(J) with respect to a nuclear incident outside the United States not covered by section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210), a retrospective premium should be prorated among nuclear suppliers relieved from potential liability for which insurance is not available.

(2) PURPOSE.—The purpose of this section is to allocate the contingent costs associated with participation by the United States in the inter-

national nuclear liability compensation system established by the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997—

(A) with respect to a Price-Anderson incident, by using funds made available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) to cover the contingent costs in a manner that neither increases the burdens nor decreases the benefits under section 170 of that Act; and

(B) with respect to a covered incident outside the United States that is not a Price-Anderson incident, by allocating the contingent costs equitably, on the basis of risk, among the class of nuclear suppliers relieved by the Convention from the risk of potential liability resulting from any covered incident outside the United States.

(b) DEFINITIONS.—In this section:

(1) COMMISSION.—The term “Commission” means the Nuclear Regulatory Commission.

(2) CONTINGENT COST.—The term “contingent cost” means the cost to the United States in the event of a covered incident the amount of which is equal to the amount of funds the United States is obligated to make available under paragraph 1(b) of Article III of the Convention.

(3) CONVENTION.—The term “Convention” means the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997.

(4) COVERED INCIDENT.—The term “covered incident” means a nuclear incident the occurrence of which results in a request for funds pursuant to Article VII of the Convention.

(5) COVERED INSTALLATION.—The term “covered installation” means a nuclear installation at which the occurrence of a nuclear incident could result in a request for funds under Article VII of the Convention.

(6) COVERED PERSON.—

(A) IN GENERAL.—The term “covered person” means—

(i) a United States person; and
(ii) an individual or entity (including an agency or instrumentality of a foreign country) that—

(I) is located in the United States; or
(II) carries out an activity in the United States.

(B) EXCLUSIONS.—The term “covered person” does not include—

(i) the United States; or
(ii) any agency or instrumentality of the United States.

(7) NUCLEAR SUPPLIER.—The term “nuclear supplier” means a covered person (or a successor in interest of a covered person) that—

(A) supplies facilities, equipment, fuel, services, or technology pertaining to the design, construction, operation, or decommissioning of a covered installation; or

(B) transports nuclear materials that could result in a covered incident.

(8) PRICE-ANDERSON INCIDENT.—The term “Price-Anderson incident” means a covered incident for which section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) would make funds available to compensate for public liability (as defined in section 11 of that Act (42 U.S.C. 2014)).

(9) SECRETARY.—The term “Secretary” means the Secretary of Energy.

(10) UNITED STATES.—

(A) IN GENERAL.—The term “United States” has the meaning given the term in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014).

(B) INCLUSIONS.—The term “United States” includes—

(i) the Commonwealth of Puerto Rico;
(ii) any other territory or possession of the United States;
(iii) the Canal Zone; and
(iv) the waters of the United States territorial sea under Presidential Proclamation Number 5928, dated December 27, 1988 (43 U.S.C. 1331 note).

(11) UNITED STATES PERSON.—The term “United States person” means—

(A) any individual who is a resident, national, or citizen of the United States (other than an individual residing outside of the United States and employed by a person who is not a United States person); and

(B) any corporation, partnership, association, joint stock company, business trust, unincorporated organization, or sole proprietorship that is organized under the laws of the United States.

(c) USE OF PRICE-ANDERSON FUNDS.—

(1) IN GENERAL.—Funds made available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) shall be used to cover the contingent cost resulting from any Price-Anderson incident.

(2) EFFECT.—The use of funds pursuant to paragraph (1) shall not reduce the limitation on public liability established under section 170 e. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)).

(d) EFFECT ON AMOUNT OF PUBLIC LIABILITY.—

(1) IN GENERAL.—Funds made available to the United States under Article VII of the Convention with respect to a Price-Anderson incident shall be used to satisfy public liability resulting from the Price-Anderson incident.

(2) AMOUNT.—The amount of public liability allowable under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) relating to a Price-Anderson incident under paragraph (1) shall be increased by an amount equal to the difference between—

(A) the amount of funds made available for the Price-Anderson incident under Article VII of the Convention; and

(B) the amount of funds used under subsection (c) to cover the contingent cost resulting from the Price-Anderson incident.

(e) RETROSPECTIVE RISK POOLING PROGRAM.—

(1) IN GENERAL.—Except as provided in paragraph (2), each nuclear supplier shall participate in a retrospective risk pooling program in accordance with this section to cover the contingent cost resulting from a covered incident outside the United States that is not a Price-Anderson incident.

(2) DEFERRED PAYMENT.—

(A) IN GENERAL.—The obligation of a nuclear supplier to participate in the retrospective risk pooling program shall be deferred until the United States is called on to provide funds pursuant to Article VII of the Convention with respect to a covered incident that is not a Price-Anderson incident.

(B) AMOUNT OF DEFERRED PAYMENT.—The amount of a deferred payment of a nuclear supplier under subparagraph (A) shall be based on the risk-informed assessment formula determined under subparagraph (C).

(C) RISK-INFORMED ASSESSMENT FORMULA.—

(i) IN GENERAL.—Not later than 3 years after the date of enactment of this Act, and every 5 years thereafter, the Secretary shall, by regulation, determine the risk-informed assessment formula for the allocation among nuclear suppliers of the contingent cost resulting from a covered incident that is not a Price-Anderson incident, taking into account risk factors such as—

(I) the nature and intended purpose of the goods and services supplied by each nuclear supplier to each covered installation outside the United States;

(II) the quantity of the goods and services supplied by each nuclear supplier to each covered installation outside the United States;

(III) the hazards associated with the supplied goods and services if the goods and services fail to achieve the intended purposes;

(IV) the hazards associated with the covered installation outside the United States to which the goods and services are supplied;

(V) the legal, regulatory, and financial infrastructure associated with the covered installation outside the United States to which the goods and services are supplied; and

(VI) the hazards associated with particular forms of transportation.

(ii) **FACTORS FOR CONSIDERATION.**—In determining the formula, the Secretary may—

- (I) exclude—
- (aa) goods and services with negligible risk;
 - (bb) classes of goods and services not intended specifically for use in a nuclear installation;
 - (cc) a nuclear supplier with a de minimis share of the contingent cost; and
 - (dd) a nuclear supplier no longer in existence for which there is no identifiable successor; and
- (II) establish the period on which the risk assessment is based.

(iii) **APPLICATION.**—In applying the formula, the Secretary shall not consider any covered installation or transportation for which funds would be available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210).

(iv) **REPORT.**—Not later than 5 years after the date of enactment of this Act and every 5 years thereafter, the Secretary shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on whether there is a need for continuation or amendment of this section, taking into account the effects of the implementation of the Convention on the United States nuclear industry and suppliers.

(f) **REPORTING.**—

(I) **COLLECTION OF INFORMATION.**—

(A) **IN GENERAL.**—The Secretary may collect information necessary for developing and implementing the formula for calculating the deferred payment of a nuclear supplier under subsection (e)(2).

(B) **PROVISION OF INFORMATION.**—Each nuclear supplier and other appropriate persons shall make available to the Secretary such information, reports, records, documents, and other data as the Secretary determines, by regulation, to be necessary or appropriate to develop and implement the formula under subsection (e)(2)(C).

(2) **PRIVATE INSURANCE.**—The Secretary shall make available to nuclear suppliers, and insurers of nuclear suppliers, information to support the voluntary establishment and maintenance of private insurance against any risk for which nuclear suppliers may be required to pay deferred payments under this section.

(g) **EFFECT ON LIABILITY.**—Nothing in any other law (including regulations) limits liability for a covered incident to an amount equal to less than the amount prescribed in paragraph 1(a) of Article IV of the Convention, unless the law—

- (1) specifically refers to this section; and
- (2) explicitly repeals, alters, amends, modifies, impairs, displaces, or supersedes the effect of this subsection.

(h) **PAYMENTS TO AND BY THE UNITED STATES.**—

(I) **ACTION BY NUCLEAR SUPPLIERS.**—

(A) **NOTIFICATION.**—In the case of a request for funds under Article VII of the Convention resulting from a covered incident that is not a Price-Anderson incident, the Secretary shall notify each nuclear supplier of the amount of the deferred payment required to be made by the nuclear supplier.

(B) **PAYMENTS.**—

(i) **IN GENERAL.**—Except as provided in clause (ii), not later than 60 days after receipt of a notification under subparagraph (A), a nuclear supplier shall pay to the general fund of the Treasury the deferred payment of the nuclear supplier required under subparagraph (A).

(ii) **ANNUAL PAYMENTS.**—A nuclear supplier may elect to prorate payment of the deferred payment required under subparagraph (A) in 5 equal annual payments (including interest on the unpaid balance at the prime rate prevailing at the time the first payment is due).

(C) **VOUCHERS.**—A nuclear supplier shall submit payment certification vouchers to the Secretary of the Treasury in accordance with section 3325 of title 31, United States Code.

(2) **USE OF FUNDS.**—

(A) **IN GENERAL.**—Amounts paid into the Treasury under paragraph (1) shall be available to the Secretary of the Treasury, without further appropriation and without fiscal year limitation, for the purpose of making the contributions of public funds required to be made by the United States under the Convention.

(B) **ACTION BY SECRETARY OF TREASURY.**—The Secretary of the Treasury shall pay the contribution required under the Convention to the court of competent jurisdiction under Article XIII of the Convention with respect to the applicable covered incident.

(3) **FAILURE TO PAY.**—If a nuclear supplier fails to make a payment required under this subsection, the Secretary may take appropriate action to recover from the nuclear supplier—

- (A) the amount of the payment due from the nuclear supplier;
- (B) any applicable interest on the payment; and
- (C) a penalty of not more than twice the amount of the deferred payment due from the nuclear supplier.

(i) **LIMITATION ON JUDICIAL REVIEW; CAUSE OF ACTION.**—

(1) **LIMITATION ON JUDICIAL REVIEW.**—

(A) **IN GENERAL.**—In any civil action arising under the Convention over which Article XIII of the Convention grants jurisdiction to the courts of the United States, any appeal or review by writ of mandamus or otherwise with respect to a nuclear incident that is not a Price-Anderson incident shall be in accordance with chapter 83 of title 28, United States Code, except that the appeal or review shall occur in the United States Court of Appeals for the District of Columbia Circuit.

(B) **SUPREME COURT JURISDICTION.**—Nothing in this paragraph affects the jurisdiction of the Supreme Court of the United States under chapter 81 of title 28, United States Code.

(2) **CAUSE OF ACTION.**—

(A) **IN GENERAL.**—Subject to subparagraph (B), in any civil action arising under the Convention over which Article XIII of the Convention grants jurisdiction to the courts of the United States, in addition to any other cause of action that may exist, an individual or entity shall have a cause of action against the operator to recover for nuclear damage suffered by the individual or entity.

(B) **REQUIREMENT.**—Subparagraph (A) shall apply only if the individual or entity seeks a remedy for nuclear damage (as defined in Article I of the Convention) that was caused by a nuclear incident (as defined in Article I of the Convention) that is not a Price-Anderson incident.

(C) **EFFECT OF PARAGRAPH.**—Nothing in this paragraph limits, modifies, extinguishes, or otherwise affects any cause of action that would have existed in the absence of enactment of this paragraph.

(j) **RIGHT OF RECOURSE.**—This section does not provide to an operator of a covered installation any right of recourse under the Convention.

(k) **PROTECTION OF SENSITIVE UNITED STATES INFORMATION.**—Nothing in the Convention or this section requires the disclosure of—

(1) any data that, at any time, was Restricted Data (as defined in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014));

(2) information relating to intelligence sources or methods protected by section 102A(i) of the National Security Act of 1947 (50 U.S.C. 403-1(i)); or

(3) national security information classified under Executive Order 12958 (50 U.S.C. 435 note; relating to classified national security information) (or a successor regulation).

(l) **REGULATIONS.**—

(1) **IN GENERAL.**—The Secretary or the Commission, as appropriate, may prescribe regulations to carry out section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) and this section.

(2) **REQUIREMENT.**—Rules prescribed under this subsection shall ensure, to the maximum extent practicable, that—

(A) the implementation of section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) and this section is consistent and equitable; and

(B) the financial and operational burden on a Commission licensee in complying with section 170 of that Act is not greater as a result of the enactment of this section.

(3) **APPLICABILITY OF PROVISION.**—Section 553 of title 5, United States Code, shall apply with respect to the promulgation of regulations under this subsection.

(4) **EFFECT OF SUBSECTION.**—The authority provided under this subsection is in addition to, and does not impair or otherwise affect, any other authority of the Secretary or the Commission to prescribe regulations.

(m) **EFFECTIVE DATE.**—This section takes effect on the date of enactment of this Act.

TITLE VIII—MISCELLANEOUS

SEC. 801. STUDY OF THE EFFECT OF PRIVATE WIRE LAWS ON THE DEVELOPMENT OF COMBINED HEAT AND POWER FACILITIES.

(a) **STUDY.**—

(1) **IN GENERAL.**—The Secretary, in consultation with the States and other appropriate entities, shall conduct a study of the laws (including regulations) affecting the siting of privately owned electric distribution wires on and across public rights-of-way.

(2) **REQUIREMENTS.**—The study under paragraph (1) shall include—

- (A) an evaluation of—
 - (i) the purposes of the laws; and
 - (ii) the effect the laws have on the development of combined heat and power facilities;
- (B) a determination of whether a change in the laws would have any operating, reliability, cost, or other impacts on electric utilities and the customers of the electric utilities; and

(C) an assessment of—

- (i) whether privately owned electric distribution wires would result in duplicative facilities; and
- (ii) whether duplicative facilities are necessary or desirable.

(b) **REPORT.**—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report that describes the results of the study conducted under subsection (a).

Amend the title so as to read: “An Act to move the United States toward greater energy independence and security, to increase the production of clean renewable fuels, to protect consumers from price gouging, to increase the energy efficiency of products, buildings, and vehicles, to promote research on and deploy greenhouse gas capture and storage options, and to improve the energy performance of the Federal Government, and for other purposes.”.

MOTION OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Speaker, pursuant to House Resolution 846, I have a motion at the desk.

The SPEAKER pro tempore. The Clerk will designate the motion.

The text of the motion is as follows:

Mr. Dingell moves that the House concur in each of the Senate amendments to H.R. 6 with the respective amendment printed in the report of the Committee on Rules accompanying such resolution.

The text of the House amendments to the Senate amendments is as follows:

House amendments to Senate amendments:

In lieu of the matter proposed to be inserted for the text of the bill, H.R. 6, insert the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the “Energy Independence and Security Act of 2007”.

(b) **TABLE OF CONTENTS.**—The table of contents of this Act is as follows:

- Sec. 1. Short title; table of contents.
 Sec. 2. Definitions.
 Sec. 3. Relationship to other law.
- TITLE I—ENERGY SECURITY THROUGH IMPROVED VEHICLE FUEL ECONOMY**
- Subtitle A—Increased Corporate Average Fuel Economy Standards
- Sec. 101. Short title.
 Sec. 102. Average fuel economy standards for automobiles and certain other vehicles.
 Sec. 103. Definitions.
 Sec. 104. Credit trading program.
 Sec. 105. Consumer information.
 Sec. 106. Continued applicability of existing standards.
 Sec. 107. National Academy of Sciences studies.
 Sec. 108. National Academy of Sciences study of medium-duty and heavy-duty truck fuel economy.
 Sec. 109. Extension of flexible fuel vehicle credit program.
 Sec. 110. Periodic review of accuracy of fuel economy labeling procedures.
 Sec. 111. Consumer tire information.
 Sec. 112. Use of civil penalties for research and development.
 Sec. 113. Exemption from separate calculation requirement.
- Subtitle B—Improved Vehicle Technology
- Sec. 131. Transportation electrification.
 Sec. 132. Domestic manufacturing conversion grant program.
 Sec. 133. Inclusion of electric drive in Energy Policy Act of 1992.
 Sec. 134. Loan guarantees for fuel-efficient automobile parts manufacturers.
 Sec. 135. Advanced battery loan guarantee program.
 Sec. 136. Advanced technology vehicles manufacturing incentive program.
- Subtitle C—Federal Vehicle Fleets
- Sec. 141. Federal vehicle fleets.
 Sec. 142. Federal fleet conservation requirements.
- TITLE II—ENERGY SECURITY THROUGH INCREASED PRODUCTION OF BIOFUELS**
- Subtitle A—Renewable Fuel Standard
- Sec. 201. Definitions.
 Sec. 202. Renewable fuel standard.
 Sec. 203. Study of impact of Renewable Fuel Standard.
 Sec. 204. Environmental and resource conservation impacts.
 Sec. 205. Biomass based diesel and biodiesel labeling.
 Sec. 206. Study of credits for use of renewable electricity in electric vehicles.
 Sec. 207. Grants for production of advanced biofuels.
 Sec. 208. Integrated consideration of water quality in determinations on fuels and fuel additives.
 Sec. 209. Anti-backsliding.
 Sec. 210. Effective date, savings provision, and transition rules.
- Subtitle B—Biofuels Research and Development
- Sec. 221. Biodiesel.
 Sec. 222. Biogas.
 Sec. 223. Grants for biofuel production research and development in certain States.
 Sec. 224. Biorefinery energy efficiency.
 Sec. 225. Study of optimization of flexible fueled vehicles to use E-85 fuel.
 Sec. 226. Study of engine durability and performance associated with the use of biodiesel.
 Sec. 227. Study of optimization of biogas used in natural gas vehicles.
 Sec. 228. Algal biomass.
- Sec. 229. Biofuels and biorefinery information center.
 Sec. 230. Cellulosic ethanol and biofuels research.
 Sec. 231. Bioenergy research and development, authorization of appropriation.
 Sec. 232. Environmental research and development.
 Sec. 233. Bioenergy research centers.
 Sec. 234. University based research and development grant program.
- Subtitle C—Biofuels Infrastructure
- Sec. 241. Prohibition on franchise agreement restrictions related to renewable fuel infrastructure.
 Sec. 242. Renewable fuel dispenser requirements.
 Sec. 243. Ethanol pipeline feasibility study.
 Sec. 244. Renewable fuel infrastructure grants.
 Sec. 245. Study of the adequacy of transportation of domestically-produced renewable fuel by railroads and other modes of transportation.
 Sec. 246. Federal fleet fueling centers.
 Sec. 247. Standard specifications for biodiesel.
 Sec. 248. Biofuels distribution and advanced biofuels infrastructure.
- Subtitle D—Environmental Safeguards
- Sec. 251. Waiver for fuel or fuel additives.
- TITLE III—ENERGY SAVINGS THROUGH IMPROVED STANDARDS FOR APPLIANCE AND LIGHTING**
- Subtitle A—Appliance Energy Efficiency
- Sec. 301. External power supply efficiency standards.
 Sec. 302. Updating appliance test procedures.
 Sec. 303. Residential boilers.
 Sec. 304. Furnace fan standard process.
 Sec. 305. Improving schedule for standards updating and clarifying State authority.
 Sec. 306. Regional standards for furnaces, central air conditioners, and heat pumps.
 Sec. 307. Procedure for prescribing new or amended standards.
 Sec. 308. Expedited rulemakings.
 Sec. 309. Battery chargers.
 Sec. 310. Standby mode.
 Sec. 311. Energy standards for home appliances.
 Sec. 312. Walk-in coolers and walk-in freezers.
 Sec. 313. Electric motor efficiency standards.
 Sec. 314. Standards for single package vertical air conditioners and heat pumps.
 Sec. 315. Improved energy efficiency for appliances and buildings in cold climates.
 Sec. 316. Technical corrections.
- Subtitle B—Lighting Energy Efficiency
- Sec. 321. Efficient light bulbs.
 Sec. 322. Incandescent reflector lamp efficiency standards.
 Sec. 323. Public building energy efficient and renewable energy systems.
 Sec. 324. Metal halide lamp fixtures.
 Sec. 325. Energy efficiency labeling for consumer electronic products.
- TITLE IV—ENERGY SAVINGS IN BUILDINGS AND INDUSTRY**
- Sec. 401. Definitions.
- Subtitle A—Residential Building Efficiency
- Sec. 411. Reauthorization of weatherization assistance program.
 Sec. 412. Study of renewable energy rebate programs.
 Sec. 413. Energy code improvements applicable to manufactured housing.
- Subtitle B—High-Performance Commercial Buildings
- Sec. 421. Commercial high-performance green buildings.
 Sec. 422. Zero Net Energy Commercial Buildings Initiative.
 Sec. 423. Public outreach.
- Subtitle C—High-Performance Federal Buildings
- Sec. 431. Energy reduction goals for Federal buildings.
 Sec. 432. Management of energy and water efficiency in Federal buildings.
 Sec. 433. Federal building energy efficiency performance standards.
 Sec. 434. Management of Federal building efficiency.
 Sec. 435. Leasing.
 Sec. 436. High-performance green Federal buildings.
 Sec. 437. Federal green building performance.
 Sec. 438. Storm water runoff requirements for Federal development projects.
 Sec. 439. Cost-effective technology acceleration program.
 Sec. 440. Authorization of appropriations.
 Sec. 441. Public building life-cycle costs.
- Subtitle D—Industrial Energy Efficiency
- Sec. 451. Industrial energy efficiency.
 Sec. 452. Energy-intensive industries program.
 Sec. 453. Energy efficiency for data center buildings.
- Subtitle E—Healthy High-Performance Schools
- Sec. 461. Healthy high-performance schools.
 Sec. 462. Study on indoor environmental quality in schools.
- Subtitle F—Institutional Entities
- Sec. 471. Energy sustainability and efficiency grants and loans for institutions.
- Subtitle G—Public and Assisted Housing
- Sec. 481. Application of International Energy Conservation Code to public and assisted housing.
- Subtitle H—General Provisions
- Sec. 491. Demonstration project.
 Sec. 492. Research and development.
 Sec. 493. Environmental Protection Agency demonstration grant program for local governments.
 Sec. 494. Green Building Advisory Committee.
 Sec. 495. Advisory Committee on Energy Efficiency Finance.
- TITLE V—ENERGY SAVINGS IN GOVERNMENT AND PUBLIC INSTITUTIONS**
- Subtitle A—United States Capitol Complex
- Sec. 501. Capitol complex photovoltaic roof feasibility studies.
 Sec. 502. Capitol complex E-85 refueling station.
 Sec. 503. Energy and environmental measures in Capitol complex master plan.
 Sec. 504. Promoting maximum efficiency in operation of Capitol power plant.
 Sec. 505. Capitol power plant carbon dioxide emissions feasibility study and demonstration projects.
- Subtitle B—Energy Savings Performance Contracting
- Sec. 511. Authority to enter into contracts; reports.
 Sec. 512. Financing flexibility.
 Sec. 513. Promoting long-term energy savings performance contracts and verifying savings.
 Sec. 514. Permanent reauthorization.

- Sec. 515. Definition of energy savings.
 Sec. 516. Retention of savings.
 Sec. 517. Training Federal contracting officers to negotiate energy efficiency contracts.
 Sec. 518. Study of energy and cost savings in nonbuilding applications.
- Subtitle C—Energy Efficiency in Federal Agencies**
- Sec. 521. Installation of photovoltaic system at Department of Energy headquarters building.
 Sec. 522. Prohibition on incandescent lamps by Coast Guard.
 Sec. 523. Standard relating to solar hot water heaters.
 Sec. 524. Federally-procured appliances with standby power.
 Sec. 525. Federal procurement of energy efficient products.
 Sec. 526. Procurement and acquisition of alternative fuels.
 Sec. 527. Government efficiency status reports.
 Sec. 528. OMB government efficiency reports and scorecards.
 Sec. 529. Electricity sector demand response.
- Subtitle D—Energy Efficiency of Public Institutions**
- Sec. 531. Reauthorization of State energy programs.
 Sec. 532. Utility energy efficiency programs.
- Subtitle E—Energy Efficiency and Conservation Block Grants**
- Sec. 541. Definitions.
 Sec. 542. Energy Efficiency and Conservation Block Grant Program.
 Sec. 543. Allocation of funds.
 Sec. 544. Use of funds.
 Sec. 545. Requirements for eligible entities.
 Sec. 546. Competitive grants.
 Sec. 547. Review and evaluation.
 Sec. 548. Funding.
- TITLE VI—ACCELERATED RESEARCH AND DEVELOPMENT**
- Subtitle A—Solar Energy**
- Sec. 601. Short title.
 Sec. 602. Thermal energy storage research and development program.
 Sec. 603. Concentrating solar power commercial application studies.
 Sec. 604. Solar energy curriculum development and certification grants.
 Sec. 605. Daylighting systems and direct solar light pipe technology.
 Sec. 606. Solar Air Conditioning Research and Development Program.
 Sec. 607. Photovoltaic demonstration program.
- Subtitle B—Geothermal Energy**
- Sec. 611. Short title.
 Sec. 612. Definitions.
 Sec. 613. Hydrothermal research and development.
 Sec. 614. General geothermal systems research and development.
 Sec. 615. Enhanced geothermal systems research and development.
 Sec. 616. Geothermal energy production from oil and gas fields and recovery and production of geopressured gas resources.
 Sec. 617. Cost sharing and proposal evaluation.
 Sec. 618. Center for geothermal technology transfer.
 Sec. 619. GeoPowering America.
 Sec. 620. Educational pilot program.
 Sec. 621. Reports.
 Sec. 622. Applicability of other laws.
 Sec. 623. Authorization of appropriations.
 Sec. 624. International geothermal energy development.
 Sec. 625. High cost region geothermal energy grant program.
- Subtitle C—Marine and Hydrokinetic Renewable Energy Technologies**
- Sec. 631. Short title.
 Sec. 632. Definition.
 Sec. 633. Marine and hydrokinetic renewable energy research and development.
 Sec. 634. National Marine Renewable Energy Research, Development, and Demonstration Centers.
 Sec. 635. Applicability of other laws.
 Sec. 636. Authorization of appropriations.
- Subtitle D—Energy Storage for Transportation and Electric Power**
- Sec. 641. Energy storage competitiveness.
- Subtitle E—Miscellaneous Provisions**
- Sec. 651. Lightweight materials research and development.
 Sec. 652. Commercial insulation demonstration program.
 Sec. 653. Technical criteria for clean coal power Initiative.
 Sec. 654. H-Prize.
 Sec. 655. Bright Tomorrow Lighting Prizes.
 Sec. 656. Renewable Energy innovation manufacturing partnership.
- TITLE VII—CARBON CAPTURE AND SEQUESTRATION**
- Subtitle A—Carbon Capture and Sequestration Research, Development, and Demonstration**
- Sec. 701. Short title.
 Sec. 702. Carbon capture and sequestration research, development, and demonstration program.
 Sec. 703. Carbon capture.
 Sec. 704. Review of large-scale programs.
 Sec. 705. Geologic sequestration training and research.
 Sec. 706. Relation to Safe Drinking Water Act.
 Sec. 707. Safety research.
 Sec. 708. University based research and development grant program.
- Subtitle B—Carbon Capture and Sequestration Assessment and Framework**
- Sec. 711. Carbon dioxide sequestration capacity assessment.
 Sec. 712. Assessment of carbon sequestration and methane and nitrous oxide emissions from ecosystems.
 Sec. 713. Carbon dioxide sequestration inventory.
 Sec. 714. Framework for geological carbon sequestration on public land.
- TITLE VIII—IMPROVED MANAGEMENT OF ENERGY POLICY**
- Subtitle A—Management Improvements**
- Sec. 801. National media campaign.
 Sec. 802. Alaska Natural Gas Pipeline administration.
 Sec. 803. Renewable energy deployment.
 Sec. 804. Coordination of planned refinery outages.
 Sec. 805. Assessment of resources.
 Sec. 806. Sense of Congress relating to the use of renewable resources to generate energy.
 Sec. 807. Geothermal assessment, exploration information, and priority activities.
- Subtitle B—Prohibitions on Market Manipulation and False Information**
- Sec. 811. Prohibition on market manipulation.
 Sec. 812. Prohibition on false information.
 Sec. 813. Enforcement by the Federal Trade Commission.
 Sec. 814. Penalties.
 Sec. 815. Effect on other laws.
- TITLE IX—INTERNATIONAL ENERGY PROGRAMS**
- Sec. 901. Definitions.
- Subtitle A—Assistance to Promote Clean and Efficient Energy Technologies in Foreign Countries**
- Sec. 911. United States assistance for developing countries.
 Sec. 912. United States exports and outreach programs for India, China, and other countries.
 Sec. 913. United States trade missions to encourage private sector trade and investment.
 Sec. 914. Actions by Overseas Private Investment Corporation.
 Sec. 915. Actions by United States Trade and Development Agency.
 Sec. 916. Deployment of international clean and efficient energy technologies and investment in global energy markets.
 Sec. 917. United States-Israel energy cooperation.
- Subtitle B—International Clean Energy Foundation**
- Sec. 921. Definitions.
 Sec. 922. Establishment and management of Foundation.
 Sec. 923. Duties of Foundation.
 Sec. 924. Annual report.
 Sec. 925. Powers of the Foundation; related provisions.
 Sec. 926. General personnel authorities.
 Sec. 927. Authorization of appropriations.
- Subtitle C—Miscellaneous Provisions**
- Sec. 931. Energy diplomacy and security within the Department of State.
 Sec. 932. National Security Council reorganization.
 Sec. 933. Annual national energy security strategy report.
 Sec. 934. Convention on Supplementary Compensation for Nuclear Damage contingent cost allocation.
 Sec. 935. Transparency in extractive industries resource payments.
- TITLE X—GREEN JOBS**
- Sec. 1001. Short title.
 Sec. 1002. Energy efficiency and renewable energy worker training program.
- TITLE XI—ENERGY TRANSPORTATION AND INFRASTRUCTURE**
- Subtitle A—Department of Transportation**
- Sec. 1101. Office of Climate Change and Environment.
- Subtitle B—Railroads**
- Sec. 1111. Advanced technology locomotive grant pilot program.
 Sec. 1112. Capital grants for class II and class III railroads.
- Subtitle C—Marine Transportation**
- Sec. 1121. Short sea transportation initiative.
 Sec. 1122. Short sea shipping eligibility for capital construction fund.
 Sec. 1123. Short sea transportation report.
- Subtitle D—Highways**
- Sec. 1131. Increased Federal share for CMAQ projects.
 Sec. 1132. Distribution of rescissions.
 Sec. 1133. Sense of Congress regarding use of complete streets design techniques.
- TITLE XII—SMALL BUSINESS ENERGY PROGRAMS**
- Sec. 1201. Express loans for renewable energy and energy efficiency.
 Sec. 1202. Pilot program for reduced 7(a) fees for purchase of energy efficient technologies.
 Sec. 1203. Small business energy efficiency.
 Sec. 1204. Larger 504 loan limits to help business develop energy efficient technologies and purchases.

Sec. 1205. Energy saving debentures.
 Sec. 1206. Investments in energy saving small businesses.
 Sec. 1207. Renewable fuel capital investment company.
 Sec. 1208. Study and report.

TITLE XIII—SMART GRID

Sec. 1301. Statement of policy on modernization of electricity grid.
 Sec. 1302. Smart grid system report.
 Sec. 1303. Smart grid advisory committee and smart grid task force.
 Sec. 1304. Smart grid technology research, development, and demonstration.
 Sec. 1305. Smart grid interoperability framework.
 Sec. 1306. Federal matching fund for smart grid investment costs.
 Sec. 1307. State consideration of smart grid.
 Sec. 1308. Study of the effect of private wire laws on the development of combined heat and power facilities.
 Sec. 1309. DOE study of security attributes of smart grid systems.

TITLE XIV—RENEWABLE ELECTRICITY STANDARD

Sec. 1401. Renewable electricity standard.

TITLE XV—CLEAN RENEWABLE ENERGY AND CONSERVATION TAX ACT OF 2007

Sec. 1500. Short title; amendment of 1986 Code; table of contents.

Subtitle A—Clean Renewable Energy Production Incentives

PART I—PROVISIONS RELATING TO RENEWABLE ENERGY

Sec. 1501. Extension and modification of renewable energy credit.
 Sec. 1502. Production credit for electricity produced from marine renewables.
 Sec. 1503. Extension and modification of energy credit.
 Sec. 1504. Extension and modification of credit for residential energy efficient property.
 Sec. 1505. Extension and modification of special rule to implement FERC and State electric restructuring policy.
 Sec. 1506. New clean renewable energy bonds.

PART II—PROVISIONS RELATING TO CARBON MITIGATION AND COAL

Sec. 1507. Expansion and modification of advanced coal project investment credit.
 Sec. 1508. Expansion and modification of coal gasification investment credit.
 Sec. 1509. Seven-year applicable recovery period for depreciation of qualified carbon dioxide pipeline property.
 Sec. 1510. Special rules for refund of the coal excise tax to certain coal producers and exporters.
 Sec. 1511. Extension of temporary increase in coal excise tax.
 Sec. 1512. Carbon audit of the tax code.

Subtitle B—Transportation and Domestic Fuel Security

PART I—BIOFUELS

Sec. 1521. Credit for production of cellulosic biomass alcohol.
 Sec. 1522. Expansion of special allowance to cellulosic biomass alcohol fuel plant property.
 Sec. 1523. Modification of alcohol credit.
 Sec. 1524. Extension and modification of credits for biodiesel and renewable diesel.
 Sec. 1525. Clarification of eligibility for renewable diesel credit.

Sec. 1526. Provisions clarifying treatment of fuels with no nexus to the United States.
 Sec. 1527. Comprehensive study of biofuels.

PART II—ADVANCED TECHNOLOGY MOTOR VEHICLES

Sec. 1528. Credit for new qualified plug-in electric drive motor vehicles.
 Sec. 1529. Exclusion from heavy truck tax for idling reduction units and advanced insulation.

PART III—OTHER TRANSPORTATION PROVISIONS

Sec. 1530. Restructuring of New York Liberty Zone tax credits.
 Sec. 1531. Extension of transportation fringe benefit to bicycle commuters.

Subtitle C—Energy Conservation and Efficiency

PART I—CONSERVATION TAX CREDIT BONDS

Sec. 1541. Qualified energy conservation bonds.
 Sec. 1542. Qualified forestry conservation bonds.

PART II—EFFICIENCY

Sec. 1543. Extension and modification of energy efficient existing homes credit.
 Sec. 1544. Extension and modification of energy efficient commercial buildings deduction.
 Sec. 1545. Modifications of energy efficient appliance credit for appliances produced after 2007.
 Sec. 1546. Seven-year applicable recovery period for depreciation of qualified energy management devices.

Subtitle D—Other Provisions

PART I—FORESTRY PROVISIONS

Sec. 1551. Deduction for qualified timber gain.
 Sec. 1552. Excise tax not applicable to section 1203 deduction of real estate investment trusts.
 Sec. 1553. Timber REIT modernization.
 Sec. 1554. Mineral royalty income qualifying income for timber REITs.
 Sec. 1555. Modification of taxable REIT subsidiary asset test for timber REITs.
 Sec. 1556. Safe harbor for timber property.

PART II—EXXON VALDEZ

Sec. 1557. Income averaging for amounts received in connection with the Exxon Valdez litigation.

Subtitle E—Revenue Provisions

Sec. 1561. Limitation of deduction for income attributable to domestic production of oil, gas, or a primary products thereof.
 Sec. 1562. Elimination of the different treatment of foreign oil and gas extraction income and foreign oil related income for purposes of the foreign tax credit.
 Sec. 1563. 7-year amortization of geological and geophysical expenditures for certain major integrated oil companies.
 Sec. 1564. Broker reporting of customer's basis in securities transactions.
 Sec. 1565. Extension of additional 0.2 percent FUTA surtax.
 Sec. 1566. Termination of treatment of natural gas distribution lines as 15-year property.
 Sec. 1567. Time for payment of corporate estimated taxes.
 Sec. 1568. Modification of penalty for failure to file partnership returns.

Subtitle F—Secure Rural Schools

Sec. 1571. Secure rural schools and community self-determination program.

SEC. 2. DEFINITIONS.

In this Act:
 (1) **DEPARTMENT.**—The term “Department” means the Department of Energy.
 (2) **INSTITUTION OF HIGHER EDUCATION.**—The term “institution of higher education” has the meaning given the term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).
 (3) **SECRETARY.**—The term “Secretary” means the Secretary of Energy.

SEC. 3. RELATIONSHIP TO OTHER LAW.

Except to the extent expressly provided in this Act or an amendment made by this Act, nothing in this Act or an amendment made by this Act supersedes, limits the authority provided or responsibility conferred by, or authorizes any violation of any provision of law (including a regulation), including any energy or environmental law or regulation.

TITLE I—ENERGY SECURITY THROUGH IMPROVED VEHICLE FUEL ECONOMY
Subtitle A—Increased Corporate Average Fuel Economy Standards

SEC. 101. SHORT TITLE.

This subtitle may be cited as the “Ten-in-Ten Fuel Economy Act”.

SEC. 102. AVERAGE FUEL ECONOMY STANDARDS FOR AUTOMOBILES AND CERTAIN OTHER VEHICLES.

(a) **INCREASED STANDARDS.**—Section 32902 of title 49, United States Code, is amended—
 (1) in subsection (a)—
 (A) by striking “NON-PASSENGER AUTOMOBILES.” and inserting “PRESCRIPTION OF STANDARDS BY REGULATION.—”;
 (B) by striking “(except passenger automobiles)” in subsection (a); and
 (C) by striking the last sentence;
 (2) by striking subsection (b) and inserting the following:
 “(b) **STANDARDS FOR AUTOMOBILES AND CERTAIN OTHER VEHICLES.**—
 “(1) **IN GENERAL.**—The Secretary of Transportation, after consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall prescribe separate average fuel economy standards for—
 “(A) passenger automobiles manufactured by manufacturers in each model year beginning with model year 2011 in accordance with this subsection;
 “(B) non-passenger automobiles manufactured by manufacturers in each model year beginning with model year 2011 in accordance with this subsection;
 “(C) work trucks in accordance with subsection (k); and
 “(D) commercial medium-duty or heavy-duty on-highway vehicles in accordance with subsection (l).
 “(2) **FUEL ECONOMY STANDARDS FOR AUTOMOBILES.**—
 “(A) **AUTOMOBILE FUEL ECONOMY AVERAGE FOR MODEL YEARS 2011 THROUGH 2020.**—The Secretary shall prescribe a separate average fuel economy standard for passenger automobiles and a separate average fuel economy standard for non-passenger automobiles for each model year beginning with model year 2011 to achieve a combined fuel economy average for model year 2020 of at least 35 miles per gallon for the total fleet of passenger and non-passenger automobiles manufactured for sale in the United States for that model year.
 “(B) **AUTOMOBILE FUEL ECONOMY AVERAGE FOR MODEL YEARS 2021 THROUGH 2030.**—For model years 2021 through 2030, the average fuel economy required to be attained by each fleet of passenger and non-passenger automobiles manufactured for sale in the United States shall be the maximum feasible average fuel economy standard for each fleet for that model year.

“(C) PROGRESS TOWARD STANDARD REQUIRED.—In prescribing average fuel economy standards under subparagraph (A), the Secretary shall prescribe annual fuel economy standard increases that increase the applicable average fuel economy standard ratably beginning with model year 2011 and ending with model year 2020.

“(3) AUTHORITY OF THE SECRETARY.—The Secretary shall—

“(A) prescribe by regulation separate average fuel economy standards for passenger and non-passenger automobiles based on 1 or more vehicle attributes related to fuel economy and express each standard in the form of a mathematical function; and

“(B) issue regulations under this title prescribing average fuel economy standards for at least 1, but not more than 5, model years.

“(4) MINIMUM STANDARD.—In addition to any standard prescribed pursuant to paragraph (3), each manufacturer shall also meet the minimum standard for domestically manufactured passenger automobiles, which shall be the greater of—

“(A) 27.5 miles per gallon; or

“(B) 92 percent of the average fuel economy projected by the Secretary for the combined domestic and non-domestic passenger automobile fleets manufactured for sale in the United States by all manufacturers in the model year, which projection shall be published in the Federal Register when the standard for that model year is promulgated in accordance with this section.”; and

(3) in subsection (c)—

(A) by striking “(1) Subject to paragraph (2) of this subsection, the” and inserting “The”; and

(B) by striking paragraph (2).

(b) FUEL ECONOMY STANDARD FOR WORK TRUCKS.—Section 32902 of title 49, United States Code, is amended by adding at the end the following:

“(k) WORK TRUCKS.—

“(1) STUDY.—Not later than 1 year after the date of the enactment of the Ten-in-Ten Fuel Economy Act, the Secretary of Transportation, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall examine the fuel efficiency of work trucks and determine—

“(A) the appropriate test procedures and methodologies for measuring the fuel efficiency of work trucks;

“(B) the appropriate metric for measuring and expressing work truck fuel efficiency performance, taking into consideration, among other things, the work performed by work trucks and types of operations in which they are used;

“(C) the range of factors, including, without limitation, design, functionality, use, duty cycle, infrastructure, and total overall energy consumption and operating costs that affect work truck fuel efficiency; and

“(D) such other factors and conditions that could have an impact on a program to improve work truck fuel efficiency.

“(2) RULEMAKING.—Not later than 24 months after completion of the study required under paragraph (1), the Secretary, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, by regulation, shall determine in a rulemaking proceeding how to implement a work truck fuel efficiency improvement program designed to achieve the maximum feasible improvement, and shall adopt and implement appropriate test methods, measurement metrics, fuel economy standards, and compliance and enforcement protocols that are appropriate, cost-effective, and technologically feasible for work trucks. Any fuel economy standard prescribed under this section shall be prescribed at least 18 months before the model year to

which it applies. The Secretary may prescribe separate standards for different classes of vehicles under this subsection.”.

(c) FUEL ECONOMY STANDARD FOR COMMERCIAL MEDIUM-DUTY AND HEAVY-DUTY ON-HIGHWAY VEHICLES.—Section 32902 of title 49, United States Code, as amended by subsection (b), is further amended by adding at the end the following:

“(1) COMMERCIAL MEDIUM- AND HEAVY-DUTY ON-HIGHWAY VEHICLES.—

“(1) STUDY.—Not later than 1 year after the National Academy of Sciences publishes the results of its study under section 108 of the Ten-in-Ten Fuel Economy Act, the Secretary of Transportation, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall examine the fuel efficiency of commercial medium- and heavy-duty on-highway vehicles and determine—

“(A) the appropriate test procedures and methodologies for measuring the fuel efficiency of such vehicles;

“(B) the appropriate metric for measuring and expressing commercial medium- and heavy-duty on-highway vehicle fuel efficiency performance, taking into consideration, among other things, the work performed by such on-highway vehicles and types of operations in which they are used;

“(C) the range of factors, including, without limitation, design, functionality, use, duty cycle, infrastructure, and total overall energy consumption and operating costs that affect commercial medium- and heavy-duty on-highway vehicle fuel efficiency; and

“(D) such other factors and conditions that could have an impact on a program to improve commercial medium- and heavy-duty on-highway vehicle fuel efficiency.

“(2) RULEMAKING.—Not later than 24 months after completion of the study required under paragraph (1), the Secretary, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, by regulation, shall determine in a rulemaking proceeding how to implement a commercial medium- and heavy-duty on-highway vehicle fuel efficiency improvement program designed to achieve the maximum feasible improvement, and shall adopt and implement appropriate test methods, measurement metrics, fuel economy standards, and compliance and enforcement protocols that are appropriate, cost-effective, and technologically feasible for commercial medium- and heavy-duty on-highway vehicles. Any fuel economy standard prescribed under this section shall be prescribed at least 18 months before the model year to which it applies. The Secretary may prescribe separate standards for different classes of vehicles under this subsection.

“(3) LEAD-TIME; REGULATORY STABILITY.—The first commercial medium- and heavy-duty on-highway vehicle fuel efficiency regulatory program adopted pursuant to this subsection shall provide not less than—

“(A) 4 full model years of regulatory lead-time; and

“(B) 3 full model years of regulatory stability.”.

SEC. 103. DEFINITIONS.

(a) IN GENERAL.—Section 32901(a) of title 49, United States Code, is amended—

(1) by striking paragraph (3) and inserting the following:

“(3) except as provided in section 32908 of this title, ‘automobile’ means a 4-wheeled vehicle that is propelled by fuel, or by alternative fuel, manufactured primarily for use on public streets, roads, and highways and rated at less than 10,000 pounds gross vehicle weight, except—

“(A) a vehicle operated only on a rail line;

“(B) a vehicle manufactured in different stages by 2 or more manufacturers, if no intermediate or final-stage manufacturer of that vehicle manufactures more than 10,000 multi-stage vehicles per year; or

“(C) a work truck.”;

(2) by redesignating paragraphs (7) through (16) as paragraphs (8) through (17), respectively;

(3) by inserting after paragraph (6) the following:

“(7) ‘commercial medium- and heavy-duty on-highway vehicle’ means an on-highway vehicle with a gross vehicle weight rating of 10,000 pounds or more.”;

(4) in paragraph (9)(A), as redesignated, by inserting “or a mixture of biodiesel and diesel fuel meeting the standard established by the American Society for Testing and Materials or under section 211(u) of the Clean Air Act (42 U.S.C. 7545(u)) for fuel containing 20 percent biodiesel (commonly known as ‘B20’)” after “alternative fuel”;

(5) by redesignating paragraph (17), as redesignated, as paragraph (18);

(6) by inserting after paragraph (16), as redesignated, the following:

“(17) ‘non-passenger automobile’ means an automobile that is not a passenger automobile or a work truck.”; and

(7) by adding at the end the following:

“(19) ‘work truck’ means a vehicle that—

“(A) is rated at between 8,500 and 10,000 pounds gross vehicle weight; and

“(B) is not a medium-duty passenger vehicle (as defined in section 86.1803-01 of title 40, Code of Federal Regulations, as in effect on the date of the enactment of the Ten-in-Ten Fuel Economy Act).”.

SEC. 104. CREDIT TRADING PROGRAM.

(a) IN GENERAL.—Section 32903 of title 49, United States Code, is amended—

(1) by striking “section 32902(b)-(d) of this title” each place it appears and inserting “subsections (a) through (d) of section 32902”;

(2) in subsection (a)(2)—

(A) by striking “3 consecutive model years” and inserting “5 consecutive model years”;

(B) by striking “clause (1) of this subsection,” and inserting “paragraph (1)”;

(3) by redesignating subsection (f) as subsection (h); and

(4) by inserting after subsection (e) the following:

“(f) CREDIT TRADING AMONG MANUFACTURERS.—

“(1) IN GENERAL.—The Secretary of Transportation may establish, by regulation, a fuel economy credit trading program to allow manufacturers whose automobiles exceed the average fuel economy standards prescribed under section 32902 to earn credits to be sold to manufacturers whose automobiles fail to achieve the prescribed standards such that the total oil savings associated with manufacturers that exceed the prescribed standards are preserved when trading credits to manufacturers that fail to achieve the prescribed standards.

“(2) LIMITATION.—The trading of credits by a manufacturer to the category of passenger automobiles manufactured domestically is limited to the extent that the fuel economy level of such automobiles shall comply with the requirements of section 32902(b)(4), without regard to any trading of credits from other manufacturers.

“(g) CREDIT TRANSFERRING WITHIN A MANUFACTURER’S FLEET.—

“(1) IN GENERAL.—The Secretary of Transportation shall establish by regulation a fuel economy credit transferring program to allow any manufacturer whose automobiles exceed any of the average fuel economy standards prescribed under section 32902 to

transfer the credits earned under this section and to apply such credits within that manufacturer's fleet to a compliance category of automobiles that fails to achieve the prescribed standards.

“(2) YEARS FOR WHICH USED.—Credits transferred under this subsection are available to be used in the same model years that the manufacturer could have applied such credits under subsections (a), (b), (d), and (e), as well as for the model year in which the manufacturer earned such credits.

“(3) MAXIMUM INCREASE.—The maximum increase in any compliance category attributable to transferred credits is—

“(A) for model years 2011 through 2013, 1.0 mile per gallon;

“(B) for model years 2014 through 2017, 1.5 miles per gallon; and

“(C) for model year 2018 and subsequent model years, 2.0 miles per gallon.

“(4) LIMITATION.—The transfer of credits by a manufacturer to the category of passenger automobiles manufactured domestically is limited to the extent that the fuel economy level of such automobiles shall comply with the requirements under section 32904(b)(4), without regard to any transfer of credits from other categories of automobiles described in paragraph (6)(B).

“(5) YEARS AVAILABLE.—A credit may be transferred under this subsection only if it is earned after model year 2010.

“(6) DEFINITIONS.—In this subsection:

“(A) FLEET.—The term ‘fleet’ means all automobiles manufactured by a manufacturer in a particular model year.

“(B) COMPLIANCE CATEGORY OF AUTOMOBILES.—The term ‘compliance category of automobiles’ means any of the following 3 categories of automobiles for which compliance is separately calculated under this chapter:

“(i) Passenger automobiles manufactured domestically.

“(ii) Passenger automobiles not manufactured domestically.

“(iii) Non-passenger automobiles.”.

(b) CONFORMING AMENDMENTS.—

(1) LIMITATIONS.—Section 32902(h) of title 49, United States Code, is amended—

(A) in paragraph (1), by striking “and” at the end;

(B) in paragraph (2), by striking the period at the end and inserting “; and”; and

(C) by adding at the end the following:

“(3) may not consider, when prescribing a fuel economy standard, the trading, transferring, or availability of credits under section 32903.”.

(2) SEPARATE CALCULATIONS.—Section 32904(b)(1)(B) is amended by striking “chapter.” and inserting “chapter, except for the purposes of section 32903.”.

SEC. 105. CONSUMER INFORMATION.

Section 32908 of title 49, United States Code, is amended by adding at the end the following:

“(g) CONSUMER INFORMATION.—

“(1) PROGRAM.—The Secretary of Transportation, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall develop and implement by rule a program to require manufacturers—

“(A) to label new automobiles sold in the United States with—

“(i) information reflecting an automobile's performance on the basis of criteria that the Administrator shall develop, not later than 18 months after the date of the enactment of the Ten-in-Ten Fuel Economy Act, to reflect fuel economy and greenhouse gas and other emissions over the useful life of the automobile;

“(ii) a rating system that would make it easy for consumers to compare the fuel econ-

omy and greenhouse gas and other emissions of automobiles at the point of purchase, including a designation of automobiles—

“(I) with the lowest greenhouse gas emissions over the useful life of the vehicles; and

“(II) the highest fuel economy; and

“(iii) a permanent and prominent display that an automobile is capable of operating on an alternative fuel; and

“(B) to include in the owner's manual for vehicles capable of operating on alternative fuels information that describes that capability and the benefits of using alternative fuels, including the renewable nature and environmental benefits of using alternative fuels.

“(2) CONSUMER EDUCATION.—

“(A) IN GENERAL.—The Secretary of Transportation, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall develop and implement by rule a consumer education program to improve consumer understanding of automobile performance described in paragraph (1)(A)(i) and to inform consumers of the benefits of using alternative fuel in automobiles and the location of stations with alternative fuel capacity.

“(B) FUEL SAVINGS EDUCATION CAMPAIGN.—The Secretary of Transportation shall establish a consumer education campaign on the fuel savings that would be recognized from the purchase of vehicles equipped with thermal management technologies, including energy efficient air conditioning systems and glass.

“(3) FUEL TANK LABELS FOR ALTERNATIVE FUEL AUTOMOBILES.—The Secretary of Transportation shall by rule require a label to be attached to the fuel compartment of vehicles capable of operating on alternative fuels, with the form of alternative fuel stated on the label. A label attached in compliance with the requirements of section 32905(h) is deemed to meet the requirements of this paragraph.

“(4) RULEMAKING DEADLINE.—The Secretary of Transportation shall issue a final rule under this subsection not later than 42 months after the date of the enactment of the Ten-in-Ten Fuel Economy Act.”.

SEC. 106. CONTINUED APPLICABILITY OF EXISTING STANDARDS.

Nothing in this subtitle, or the amendments made by this subtitle, shall be construed to affect the application of section 32902 of title 49, United States Code, to passenger automobiles or non-passenger automobiles manufactured before model year 2011.

SEC. 107. NATIONAL ACADEMY OF SCIENCES STUDIES.

(a) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary of Transportation shall execute an agreement with the National Academy of Sciences to develop a report evaluating vehicle fuel economy standards, including—

(1) an assessment of automotive technologies and costs to reflect developments since the Academy's 2002 report evaluating the corporate average fuel economy standards was conducted;

(2) an analysis of existing and potential technologies that may be used practically to improve automobile and medium-duty and heavy-duty truck fuel economy;

(3) an analysis of how such technologies may be practically integrated into the automotive and medium-duty and heavy-duty truck manufacturing process; and

(4) an assessment of how such technologies may be used to meet the new fuel economy standards under chapter 329 of title 49, United States Code, as amended by this subtitle.

(b) REPORT.—The Academy shall submit the report to the Secretary, the Committee

on Commerce, Science, and Transportation of the Senate, and the Committee on Energy and Commerce of the House of Representatives, with its findings and recommendations not later than 5 years after the date on which the Secretary executes the agreement with the Academy.

(c) QUINQUENNIAL UPDATES.—After submitting the initial report, the Academy shall update the report at 5 year intervals thereafter through 2025.

SEC. 108. NATIONAL ACADEMY OF SCIENCES STUDY OF MEDIUM-DUTY AND HEAVY-DUTY TRUCK FUEL ECONOMY.

(a) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary of Transportation shall execute an agreement with the National Academy of Sciences to develop a report evaluating medium-duty and heavy-duty truck fuel economy standards, including—

(1) an assessment of technologies and costs to evaluate fuel economy for medium-duty and heavy-duty trucks;

(2) an analysis of existing and potential technologies that may be used practically to improve medium-duty and heavy-duty truck fuel economy;

(3) an analysis of how such technologies may be practically integrated into the medium-duty and heavy-duty truck manufacturing process;

(4) an assessment of how such technologies may be used to meet fuel economy standards to be prescribed under section 32902(l) of title 49, United States Code, as amended by this subtitle; and

(5) associated costs and other impacts on the operation of medium-duty and heavy-duty trucks, including congestion.

(b) REPORT.—The Academy shall submit the report to the Secretary, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Energy and Commerce of the House of Representatives, with its findings and recommendations not later than 1 year after the date on which the Secretary executes the agreement with the Academy.

SEC. 109. EXTENSION OF FLEXIBLE FUEL VEHICLE CREDIT PROGRAM.

(a) IN GENERAL.—Section 32906 of title 49, United States Code, is amended to read as follows:

“§ 32906. Maximum fuel economy increase for alternative fuel automobiles

“(a) IN GENERAL.—For each of model years 1993 through 2019 for each category of automobile (except an electric automobile), the maximum increase in average fuel economy for a manufacturer attributable to dual fueled automobiles is—

“(1) 1.2 miles a gallon for each of model years 1993 through 2014;

“(2) 1.0 miles per gallon for model year 2015;

“(3) 0.8 miles per gallon for model year 2016;

“(4) 0.6 miles per gallon for model year 2017;

“(5) 0.4 miles per gallon for model year 2018;

“(6) 0.2 miles per gallon for model year 2019; and

“(7) 0 miles per gallon for model years after 2019.

“(b) CALCULATION.—In applying subsection (a), the Administrator of the Environmental Protection Agency shall determine the increase in a manufacturer's average fuel economy attributable to dual fueled automobiles by subtracting from the manufacturer's average fuel economy calculated under section 32905(e) the number equal to what the manufacturer's average fuel economy would be if

it were calculated by the formula under section 32904(a)(1) by including as the denominator for each model of dual fueled automobiles the fuel economy when the automobiles are operated on gasoline or diesel fuel.”.

(b) CONFORMING AMENDMENTS.—Section 32905 of title 49, United States Code, is amended—

(1) in subsection (b), by striking “1993-2010,” and inserting “1993 through 2019,”;

(2) in subsection (d), by striking “1993-2010,” and inserting “1993 through 2019,”;

(3) by striking subsections (f) and (g); and

(4) by redesignating subsection (h) as subsection (f).

(c) B20 BIODIESEL FLEXIBLE FUEL CREDIT.—Section 32905(b)(2) of title 49, United States Code, is amended to read as follows:

“(2) .5 divided by the fuel economy—

“(A) measured under subsection (a) when operating the model on alternative fuel; or

“(B) measured based on the fuel content of B20 when operating the model on B20, which is deemed to contain 0.15 gallon of fuel.”.

SEC. 110. PERIODIC REVIEW OF ACCURACY OF FUEL ECONOMY LABELING PROCEDURES.

Beginning in December, 2009, and not less often than every 5 years thereafter, the Administrator of the Environmental Protection Agency, in consultation with the Secretary of Transportation, shall—

(1) reevaluate the fuel economy labeling procedures described in the final rule published in the Federal Register on December 27, 2006 (71 Fed. Reg. 77,872; 40 C.F.R. parts 86 and 600) to determine whether changes in the factors used to establish the labeling procedures warrant a revision of that process; and

(2) submit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives that describes the results of the reevaluation process.

SEC. 111. CONSUMER TIRE INFORMATION.

(a) IN GENERAL.—Chapter 323 of title 49, United States Code, is amended by inserting after section 32304 the following:

“§ 32304A. Consumer tire information

“(a) RULEMAKING.—

“(1) IN GENERAL.—Not later than 24 months after the date of enactment of the Ten-in-Ten Fuel Economy Act, the Secretary of Transportation shall, after notice and opportunity for comment, promulgate rules establishing a national tire fuel efficiency consumer information program for replacement tires designed for use on motor vehicles to educate consumers about the effect of tires on automobile fuel efficiency, safety, and durability.

“(2) ITEMS INCLUDED IN RULE.—The rulemaking shall include—

“(A) a national tire fuel efficiency rating system for motor vehicle replacement tires to assist consumers in making more educated tire purchasing decisions;

“(B) requirements for providing information to consumers, including information at the point of sale and other potential information dissemination methods, including the Internet;

“(C) specifications for test methods for manufacturers to use in assessing and rating tires to avoid variation among test equipment and manufacturers; and

“(D) a national tire maintenance consumer education program including, information on tire inflation pressure, alignment, rotation, and tread wear to maximize fuel efficiency, safety, and durability of replacement tires.

“(3) APPLICABILITY.—This section shall apply only to replacement tires covered under section 575.104(c) of title 49, Code of Federal Regulations, in effect on the date of

the enactment of the Ten-in-Ten Fuel Economy Act.

“(b) CONSULTATION.—The Secretary shall consult with the Secretary of Energy and the Administrator of the Environmental Protection Agency on the means of conveying tire fuel efficiency consumer information.

“(c) REPORT TO CONGRESS.—The Secretary shall conduct periodic assessments of the rules promulgated under this section to determine the utility of such rules to consumers, the level of cooperation by industry, and the contribution to national goals pertaining to energy consumption. The Secretary shall transmit periodic reports detailing the findings of such assessments to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Energy and Commerce.

“(d) TIRE MARKING.—The Secretary shall not require permanent labeling of any kind on a tire for the purpose of tire fuel efficiency information.

“(e) APPLICATION WITH STATE AND LOCAL LAWS AND REGULATIONS.—Nothing in this section prohibits a State or political subdivision thereof from enforcing a law or regulation on tire fuel efficiency consumer information that was in effect on January 1, 2006. After a requirement promulgated under this section is in effect, a State or political subdivision thereof may adopt or enforce a law or regulation on tire fuel efficiency consumer information enacted or promulgated after January 1, 2006, if the requirements of that law or regulation are identical to the requirement promulgated under this section. Nothing in this section shall be construed to preempt a State or political subdivision thereof from regulating the fuel efficiency of tires (including establishing testing methods for determining compliance with such standards) not otherwise preempted under this chapter.”.

(b) ENFORCEMENT.—Section 32308 of title 49, United States Code, is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the following:

“(c) SECTION 32304A.—Any person who fails to comply with the national tire fuel efficiency information program under section 32304A is liable to the United States Government for a civil penalty of not more than \$50,000 for each violation.”.

(c) CONFORMING AMENDMENT.—The chapter analysis for chapter 323 of title 49, United States Code, is amended by inserting after the item relating to section 32304 the following:

“32304A. Consumer tire information”.

SEC. 112. USE OF CIVIL PENALTIES FOR RESEARCH AND DEVELOPMENT.

Section 32912 of title 49, United States Code, is amended by adding at the end the following:

“(e) USE OF CIVIL PENALTIES.—For fiscal year 2008 and each fiscal year thereafter, from the total amount deposited in the general fund of the Treasury during the preceding fiscal year from fines, penalties, and other funds obtained through enforcement actions conducted pursuant to this section (including funds obtained under consent decrees), the Secretary of the Treasury, subject to the availability of appropriations, shall—

“(1) transfer 50 percent of such total amount to the account providing appropriations to the Secretary of Transportation for the administration of this chapter, which shall be used by the Secretary to support rulemaking under this chapter; and

“(2) transfer 50 percent of such total amount to the account providing appropriations to the Secretary of Transportation for

the administration of this chapter, which shall be used by the Secretary to carry out a program to make grants to manufacturers for retooling, reequipping, or expanding existing manufacturing facilities in the United States to produce advanced technology vehicles and components.”.

SEC. 113. EXEMPTION FROM SEPARATE CALCULATION REQUIREMENT.

(a) REPEAL.—Paragraphs (6), (7), and (8) of section 32904(b) of title 49, United States Code, are repealed.

(b) EFFECT OF REPEAL ON EXISTING EXEMPTIONS.—Any exemption granted under section 32904(b)(6) of title 49, United States Code, prior to the date of the enactment of this Act shall remain in effect subject to its terms through model year 2013.

(c) ACCRUAL AND USE OF CREDITS.—Any manufacturer holding an exemption under section 32904(b)(6) of title 49, United States Code, prior to the date of the enactment of this Act may accrue and use credits under sections 32903 and 32905 of such title beginning with model year 2011.

Subtitle B—Improved Vehicle Technology

SEC. 131. TRANSPORTATION ELECTRIFICATION.

(a) DEFINITIONS.—In this section:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of the Environmental Protection Agency.

(2) BATTERY.—The term “battery” means an electrochemical energy storage system powered directly by electrical current.

(3) ELECTRIC TRANSPORTATION TECHNOLOGY.—The term “electric transportation technology” means—

(A) technology used in vehicles that use an electric motor for all or part of the motive power of the vehicles, including battery electric, hybrid electric, plug-in hybrid electric, fuel cell, and plug-in fuel cell vehicles, or rail transportation; or

(B) equipment relating to transportation or mobile sources of air pollution that use an electric motor to replace an internal combustion engine for all or part of the work of the equipment, including—

(i) corded electric equipment linked to transportation or mobile sources of air pollution; and

(ii) electrification technologies at airports, ports, truck stops, and material-handling facilities.

(4) NONROAD VEHICLE.—The term “nonroad vehicle” means a vehicle—

(A) powered—

(i) by a nonroad engine, as that term is defined in section 216 of the Clean Air Act (42 U.S.C. 7550); or

(ii) fully or partially by an electric motor powered by a fuel cell, a battery, or an off-board source of electricity; and

(B) that is not a motor vehicle or a vehicle used solely for competition.

(5) PLUG-IN ELECTRIC DRIVE VEHICLE.—The term “plug-in electric drive vehicle” means a vehicle that—

(A) draws motive power from a battery with a capacity of at least 4 kilowatt-hours;

(B) can be recharged from an external source of electricity for motive power; and

(C) is a light-, medium-, or heavy-duty motor vehicle or nonroad vehicle (as those terms are defined in section 216 of the Clean Air Act (42 U.S.C. 7550)).

(6) QUALIFIED ELECTRIC TRANSPORTATION PROJECT.—The term “qualified electric transportation project” means an electric transportation technology project that would significantly reduce emissions of criteria pollutants, greenhouse gas emissions, and petroleum, including—

(A) shipside or shoreside electrification for vessels;

(B) truck-stop electrification;

(C) electric truck refrigeration units;

(D) battery powered auxiliary power units for trucks;

(E) electric airport ground support equipment;

(F) electric material and cargo handling equipment;

(G) electric or dual-mode electric rail;

(H) any distribution upgrades needed to supply electricity to the project; and

(I) any ancillary infrastructure, including panel upgrades, battery chargers, in-situ transformers, and trenching.

(b) **PLUG-IN ELECTRIC DRIVE VEHICLE PROGRAM.**—

(1) **ESTABLISHMENT.**—The Secretary shall establish a competitive program to provide grants on a cost-shared basis to State governments, local governments, metropolitan transportation authorities, air pollution control districts, private or nonprofit entities, or combinations of those governments, authorities, districts, and entities, to carry out 1 or more projects to encourage the use of plug-in electric drive vehicles or other emerging electric vehicle technologies, as determined by the Secretary.

(2) **ADMINISTRATION.**—The Secretary shall, in consultation with the Secretary of Transportation and the Administrator, establish requirements for applications for grants under this section, including reporting of data to be summarized for dissemination to grantees and the public, including safety, vehicle, and component performance, and vehicle and component life cycle costs.

(3) **PRIORITY.**—In making awards under this subsection, the Secretary shall—

(A) give priority consideration to applications that—

(i) encourage early widespread use of vehicles described in paragraph (1); and

(ii) are likely to make a significant contribution to the advancement of the production of the vehicles in the United States; and

(B) ensure, to the maximum extent practicable, that the program established under this subsection includes a variety of applications, manufacturers, and end-uses.

(4) **REPORTING.**—The Secretary shall require a grant recipient under this subsection to submit to the Secretary, on an annual basis, data relating to safety, vehicle performance, life cycle costs, and emissions of vehicles demonstrated under the grant, including emissions of greenhouse gases.

(5) **COST SHARING.**—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a grant made under this subsection.

(6) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this subsection \$90,000,000 for each of fiscal years 2008 through 2012, of which not less than 1/3 of the total amount appropriated shall be available each fiscal year to make grants to local and municipal governments.

(c) **NEAR-TERM TRANSPORTATION SECTOR ELECTRIFICATION PROGRAM.**—

(1) **IN GENERAL.**—Not later than 1 year after the date of enactment of this Act, the Secretary, in consultation with the Secretary of Transportation and the Administrator, shall establish a program to provide grants for the conduct of qualified electric transportation projects.

(2) **PRIORITY.**—In providing grants under this subsection, the Secretary shall give priority to large-scale projects and large-scale aggregators of projects.

(3) **COST SHARING.**—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a grant made under this subsection.

(4) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this subsection \$95,000,000 for each of fiscal years 2008 through 2013.

(d) **EDUCATION PROGRAM.**—

(1) **IN GENERAL.**—The Secretary shall develop a nationwide electric drive transpor-

tation technology education program under which the Secretary shall provide—

(A) teaching materials to secondary schools and high schools; and

(B) assistance for programs relating to electric drive system and component engineering to institutions of higher education.

(2) **ELECTRIC VEHICLE COMPETITION.**—The program established under paragraph (1) shall include a plug-in hybrid electric vehicle competition for institutions of higher education, which shall be known as the “Dr. Andrew Frank Plug-In Electric Vehicle Competition”.

(3) **ENGINEERS.**—In carrying out the program established under paragraph (1), the Secretary shall provide financial assistance to institutions of higher education to create new, or support existing, degree programs to ensure the availability of trained electrical and mechanical engineers with the skills necessary for the advancement of—

(A) plug-in electric drive vehicles; and

(B) other forms of electric drive transportation technology vehicles.

(4) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as may be necessary to carry out this subsection.

SEC. 132. DOMESTIC MANUFACTURING CONVERSION GRANT PROGRAM.

Section 712 of the Energy Policy Act of 2005 (42 U.S.C. 16062) is amended to read as follows:

“SEC. 712. DOMESTIC MANUFACTURING CONVERSION GRANT PROGRAM.

“(a) PROGRAM.—

“(1) IN GENERAL.—The Secretary shall establish a program to encourage domestic production and sales of efficient hybrid and advanced diesel vehicles and components of those vehicles.

“(2) INCLUSIONS.—The program shall include grants to automobile manufacturers and suppliers and hybrid component manufacturers to encourage domestic production of efficient hybrid, plug-in electric hybrid, plug-in electric drive, and advanced diesel vehicles.

“(3) PRIORITY.—Priority shall be given to the refurbishment or retooling of manufacturing facilities that have recently ceased operation or will cease operation in the near future.

“(b) COORDINATION WITH STATE AND LOCAL PROGRAMS.—The Secretary may coordinate implementation of this section with State and local programs designed to accomplish similar goals, including the retention and retraining of skilled workers from the manufacturing facilities, including by establishing matching grant arrangements.

“(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary such sums as may be necessary to carry out this section.”

SEC. 133. INCLUSION OF ELECTRIC DRIVE IN ENERGY POLICY ACT OF 1992.

Section 508 of the Energy Policy Act of 1992 (42 U.S.C. 13258) is amended—

(1) by redesignating subsections (a) through (d) as subsections (b) through (e), respectively;

(2) by inserting before subsection (b) the following:

“(a) DEFINITIONS.—In this section:

“(1) FUEL CELL ELECTRIC VEHICLE.—The term ‘fuel cell electric vehicle’ means an on-road or nonroad vehicle that uses a fuel cell (as defined in section 803 of the Spark M. Matsunaga Hydrogen Act of 2005 (42 U.S.C. 16152)).

“(2) HYBRID ELECTRIC VEHICLE.—The term ‘hybrid electric vehicle’ means a new qualified hybrid motor vehicle (as defined in section 30B(d)(3) of the Internal Revenue Code of 1986).

“(3) MEDIUM- OR HEAVY-DUTY ELECTRIC VEHICLE.—The term ‘medium- or heavy-duty electric vehicle’ means an electric, hybrid electric, or plug-in hybrid electric vehicle with a gross vehicle weight of more than 8,501 pounds.

“(4) NEIGHBORHOOD ELECTRIC VEHICLE.—The term ‘neighborhood electric vehicle’ means a 4-wheeled on-road or nonroad vehicle that—

“(A) has a top attainable speed in 1 mile of more than 20 mph and not more than 25 mph on a paved level surface; and

“(B) is propelled by an electric motor and on-board, rechargeable energy storage system that is rechargeable using an off-board source of electricity.

“(5) PLUG-IN ELECTRIC DRIVE VEHICLE.—The term ‘plug-in electric drive vehicle’ means a vehicle that—

“(A) draws motive power from a battery with a capacity of at least 4 kilowatt-hours;

“(B) can be recharged from an external source of electricity for motive power; and

“(C) is a light-, medium-, or heavy duty motor vehicle or nonroad vehicle (as those terms are defined in section 216 of the Clean Air Act (42 U.S.C. 7550)).”;

(3) in subsection (b) (as redesignated by paragraph (1))—

(A) by striking “The Secretary” and inserting the following:

“(1) ALLOCATION.—The Secretary”; and

(B) by adding at the end the following:

“(2) ELECTRIC VEHICLES.—Not later than January 31, 2009, the Secretary shall—

“(A) allocate credit in an amount to be determined by the Secretary for—

“(i) acquisition of—

“(I) a hybrid electric vehicle;

“(II) a plug-in electric drive vehicle;

“(III) a fuel cell electric vehicle;

“(IV) a neighborhood electric vehicle; or

“(V) a medium- or heavy-duty electric vehicle; and

“(ii) investment in qualified alternative fuel infrastructure or nonroad equipment, as determined by the Secretary; and

“(B) allocate more than 1, but not to exceed 5, credits for investment in an emerging technology relating to any vehicle described in subparagraph (A) to encourage—

“(i) a reduction in petroleum demand;

“(ii) technological advancement; and

“(iii) a reduction in vehicle emissions.”;

(4) in subsection (c) (as redesignated by paragraph (1)), by striking “subsection (a)” and inserting “subsection (b)”; and

(5) by adding at the end the following:

“(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section for each of fiscal years 2008 through 2013.”

SEC. 134. LOAN GUARANTEES FOR FUEL-EFFICIENT AUTOMOBILE PARTS MANUFACTURERS.

(a) **IN GENERAL.**—Section 712(a)(2) of the Energy Policy Act of 2005 (42 U.S.C. 16062(a)(2)) (as amended by section 132) is amended by inserting “and loan guarantees under section 1703” after “grants”.

(b) **CONFORMING AMENDMENT.**—Section 1703(b) of the Energy Policy Act of 2005 (42 U.S.C. 16513(b)) is amended by striking paragraph (8) and inserting the following:

“(8) Production facilities for the manufacture of fuel efficient vehicles or parts of those vehicles, including electric drive vehicles and advanced diesel vehicles.”

SEC. 135. ADVANCED BATTERY LOAN GUARANTEE PROGRAM.

(a) **ESTABLISHMENT OF PROGRAM.**—The Secretary shall establish a program to provide guarantees of loans by private institutions for the construction of facilities for the manufacture of advanced vehicle batteries and

battery systems that are developed and produced in the United States, including advanced lithium ion batteries and hybrid electrical system and component manufacturers and software designers.

(b) **REQUIREMENTS.**—The Secretary may provide a loan guarantee under subsection (a) to an applicant if—

(1) without a loan guarantee, credit is not available to the applicant under reasonable terms or conditions sufficient to finance the construction of a facility described in subsection (a);

(2) the prospective earning power of the applicant and the character and value of the security pledged provide a reasonable assurance of repayment of the loan to be guaranteed in accordance with the terms of the loan; and

(3) the loan bears interest at a rate determined by the Secretary to be reasonable, taking into account the current average yield on outstanding obligations of the United States with remaining periods of maturity comparable to the maturity of the loan.

(c) **CRITERIA.**—In selecting recipients of loan guarantees from among applicants, the Secretary shall give preference to proposals that—

(1) meet all applicable Federal and State permitting requirements;

(2) are most likely to be successful; and

(3) are located in local markets that have the greatest need for the facility.

(d) **MATURITY.**—A loan guaranteed under subsection (a) shall have a maturity of not more than 20 years.

(e) **TERMS AND CONDITIONS.**—The loan agreement for a loan guaranteed under subsection (a) shall provide that no provision of the loan agreement may be amended or waived without the consent of the Secretary.

(f) **ASSURANCE OF REPAYMENT.**—The Secretary shall require that an applicant for a loan guarantee under subsection (a) provide an assurance of repayment in the form of a performance bond, insurance, collateral, or other means acceptable to the Secretary in an amount equal to not less than 20 percent of the amount of the loan.

(g) **GUARANTEE FEE.**—The recipient of a loan guarantee under subsection (a) shall pay the Secretary an amount determined by the Secretary to be sufficient to cover the administrative costs of the Secretary relating to the loan guarantee.

(h) **FULL FAITH AND CREDIT.**—The full faith and credit of the United States is pledged to the payment of all guarantees made under this section. Any such guarantee made by the Secretary shall be conclusive evidence of the eligibility of the loan for the guarantee with respect to principal and interest. The validity of the guarantee shall be incontestable in the hands of a holder of the guaranteed loan.

(i) **REPORTS.**—Until each guaranteed loan under this section has been repaid in full, the Secretary shall annually submit to Congress a report on the activities of the Secretary under this section.

(j) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out this section.

(k) **TERMINATION OF AUTHORITY.**—The authority of the Secretary to issue a loan guarantee under subsection (a) terminates on the date that is 10 years after the date of enactment of this Act.

SEC. 136. ADVANCED TECHNOLOGY VEHICLES MANUFACTURING INCENTIVE PROGRAM.

(a) **DEFINITIONS.**—In this section:

(1) **ADVANCED TECHNOLOGY VEHICLE.**—The term “advanced technology vehicle” means a light duty vehicle that meets—

(A) the Bin 5 Tier II emission standard established in regulations issued by the Administrator of the Environmental Protection Agency under section 202(i) of the Clean Air Act (42 U.S.C. 7521(i)), or a lower-numbered Bin emission standard;

(B) any new emission standard in effect for fine particulate matter prescribed by the Administrator under that Act (42 U.S.C. 7401 et seq.); and

(C) at least 125 percent of the average base year combined fuel economy for vehicles with substantially similar attributes.

(2) **COMBINED FUEL ECONOMY.**—The term “combined fuel economy” means—

(A) the combined city/highway miles per gallon values, as reported in accordance with section 32904 of title 49, United States Code; and

(B) in the case of an electric drive vehicle with the ability to recharge from an off-board source, the reported mileage, as determined in a manner consistent with the Society of Automotive Engineers recommended practice for that configuration or a similar practice recommended by the Secretary.

(3) **ENGINEERING INTEGRATION COSTS.**—The term “engineering integration costs” includes the cost of engineering tasks relating to—

(A) incorporating qualifying components into the design of advanced technology vehicles; and

(B) designing tooling and equipment and developing manufacturing processes and material suppliers for production facilities that produce qualifying components or advanced technology vehicles.

(4) **QUALIFYING COMPONENTS.**—The term “qualifying components” means components that the Secretary determines to be—

(A) designed for advanced technology vehicles; and

(B) installed for the purpose of meeting the performance requirements of advanced technology vehicles.

(b) **ADVANCED VEHICLES MANUFACTURING FACILITY.**—The Secretary shall provide facility funding awards under this section to automobile manufacturers and component suppliers to pay not more than 30 percent of the cost of—

(1) reequipping, expanding, or establishing a manufacturing facility in the United States to produce—

(A) qualifying advanced technology vehicles; or

(B) qualifying components; and

(2) engineering integration performed in the United States of qualifying vehicles and qualifying components.

(c) **PERIOD OF AVAILABILITY.**—An award under subsection (b) shall apply to—

(1) facilities and equipment placed in service before December 30, 2020; and

(2) engineering integration costs incurred during the period beginning on the date of enactment of this Act and ending on December 30, 2020.

(d) **DIRECT LOAN PROGRAM.**—

(1) **IN GENERAL.**—Not later than 1 year after the date of enactment of this Act, and subject to the availability of appropriated funds, the Secretary shall carry out a program to provide a total of not more than \$25,000,000,000 in loans to eligible individuals and entities (as determined by the Secretary) for the costs of activities described in subsection (b).

(2) **APPLICATION.**—An applicant for a loan under this subsection shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a written assurance that—

(A) all laborers and mechanics employed by contractors or subcontractors during construction, alteration, or repair that is fi-

nanced, in whole or in part, by a loan under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with sections 3141–3144, 3146, and 3147 of title 40, United States Code; and

(B) the Secretary of Labor shall, with respect to the labor standards described in this paragraph, have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (5 U.S.C. App.) and section 3145 of title 40, United States Code.

(3) **SELECTION OF ELIGIBLE PROJECTS.**—The Secretary shall select eligible projects to receive loans under this subsection in cases in which, as determined by the Secretary, the award recipient—

(A) is financially viable without the receipt of additional Federal funding associated with the proposed project;

(B) will provide sufficient information to the Secretary for the Secretary to ensure that the qualified investment is expended efficiently and effectively; and

(C) has met such other criteria as may be established and published by the Secretary.

(4) **RATES, TERMS, AND REPAYMENT OF LOANS.**—A loan provided under this subsection—

(A) shall have an interest rate that, as of the date on which the loan is made, is equal to the cost of funds to the Department of the Treasury for obligations of comparable maturity;

(B) shall have a term equal to the lesser of—

(i) the projected life, in years, of the eligible project to be carried out using funds from the loan, as determined by the Secretary; and

(ii) 25 years;

(C) may be subject to a deferral in repayment for not more than 5 years after the date on which the eligible project carried out using funds from the loan first begins operations, as determined by the Secretary; and

(D) shall be made by the Federal Financing Bank.

(e) **IMPROVEMENT.**—The Secretary shall issue regulations that require that, in order for an automobile manufacturer to be eligible for an award or loan under this section during a particular year, the adjusted average fuel economy of the manufacturer for light duty vehicles produced by the manufacturer during the most recent year for which data are available shall be not less than the average fuel economy for all light duty vehicles of the manufacturer for model year 2005. In order to determine fuel economy baselines for eligibility of a new manufacturer or a manufacturer that has not produced previously produced equivalent vehicles, the Secretary may substitute industry averages.

(f) **FEEES.**—Administrative costs shall be no more than \$100,000 or 10 basis point of the loan.

(g) **PRIORITY.**—The Secretary shall, in making awards or loans to those manufacturers that have existing facilities, give priority to those facilities that are oldest or have been in existence for at least 20 years. Such facilities can currently be sitting idle.

(h) **SET ASIDE FOR SMALL AUTOMOBILE MANUFACTURERS AND COMPONENT SUPPLIERS.**—

(1) **DEFINITION OF COVERED FIRM.**—In this subsection, the term “covered firm” means a firm that—

(A) employs less than 500 individuals; and

(B) manufactures automobiles or components of automobiles.

(2) **SET ASIDE.**—Of the amount of funds that are used to provide awards for each fiscal year under subsection (b), the Secretary shall use not less than 10 percent to provide awards to covered firms or consortia led by a covered firm.

(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section for each of fiscal years 2008 through 2012.

Subtitle C—Federal Vehicle Fleets

SEC. 141. FEDERAL VEHICLE FLEETS.

Section 303 of the Energy Policy Act of 1992 (42 U.S.C. 13212) is amended—

(1) by redesignating subsection (f) as subsection (g); and

(2) by inserting after subsection (e) the following new subsection:

“(f) VEHICLE EMISSION REQUIREMENTS.—

“(1) DEFINITIONS.—In this subsection:

“(A) FEDERAL AGENCY.—The term ‘Federal agency’ does not include any office of the legislative branch, except that it does include the House of Representatives with respect to an acquisition described in paragraph (2)(C).

“(B) MEDIUM DUTY PASSENGER VEHICLE.—The term ‘medium duty passenger vehicle’ has the meaning given that term section 523.2 of title 49 of the Code of Federal Regulations, as in effect on the date of enactment of this paragraph.

“(C) MEMBER’S REPRESENTATIONAL ALLOWANCE.—The term ‘Member’s Representational Allowance’ means the allowance described in section 101(a) of the House of Representatives Administrative Reform Technical Corrections Act (2 U.S.C. 57b(a)).

“(2) PROHIBITION.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), no Federal agency shall acquire a light duty motor vehicle or medium duty passenger vehicle that is not a low greenhouse gas emitting vehicle.

“(B) EXCEPTION.—The prohibition in subparagraph (A) shall not apply to acquisition of a vehicle if the head of the agency certifies in writing, in a separate certification for each individual vehicle purchased, either—

“(i) that no low greenhouse gas emitting vehicle is available to meet the functional needs of the agency and details in writing the functional needs that could not be met with a low greenhouse gas emitting vehicle; or

“(ii) that the agency has taken specific alternative more cost-effective measures to reduce petroleum consumption that—

“(I) have reduced a measured and verified quantity of greenhouse gas emissions equal to or greater than the quantity of greenhouse gas reductions that would have been achieved through acquisition of a low greenhouse gas emitting vehicle over the lifetime of the vehicle; or

“(II) will reduce each year a measured and verified quantity of greenhouse gas emissions equal to or greater than the quantity of greenhouse gas reductions that would have been achieved each year through acquisition of a low greenhouse gas emitting vehicle.

“(C) SPECIAL RULE FOR VEHICLES PROVIDED BY FUNDS CONTAINED IN MEMBERS’ REPRESENTATIONAL ALLOWANCE.—This paragraph shall apply to the acquisition of a light duty motor vehicle or medium duty passenger vehicle using any portion of a Member’s Representational Allowance, including an acquisition under a long-term lease.

“(3) GUIDANCE.—

“(A) IN GENERAL.—Each year, the Administrator of the Environmental Protection Agency shall issue guidance identifying the makes and model numbers of vehicles that are low greenhouse gas emitting vehicles.

“(B) CONSIDERATION.—In identifying vehicles under subparagraph (A), the Administrator shall take into account the most stringent standards for vehicle greenhouse gas emissions applicable to and enforceable against motor vehicle manufacturers for vehicles sold anywhere in the United States.

“(C) REQUIREMENT.—The Administrator shall not identify any vehicle as a low greenhouse gas emitting vehicle if the vehicle emits greenhouse gases at a higher rate than such standards allow for the manufacturer’s fleet average grams per mile of carbon dioxide-equivalent emissions for that class of vehicle, taking into account any emissions allowances and adjustment factors such standards provide.”.

SEC. 142. FEDERAL FLEET CONSERVATION REQUIREMENTS.

Part J of title III of the Energy Policy and Conservation Act (42 U.S.C. 6374 et seq.) is amended by adding at the end the following: “SEC. 400FF. FEDERAL FLEET CONSERVATION REQUIREMENTS.

“(a) MANDATORY REDUCTION IN PETROLEUM CONSUMPTION.—

“(1) IN GENERAL.—Not later than 18 months after the date of enactment of this section, the Secretary shall issue regulations for Federal fleets subject to section 400AA to require that, beginning in fiscal year 2010, each Federal agency shall reduce petroleum consumption and increase alternative fuel consumption each year by an amount necessary to meet the goals described in paragraph (2).

“(2) GOALS.—The goals of the requirements under paragraph (1) are that not later than October 1, 2015, and for each year thereafter, each Federal agency shall achieve at least a 20 percent reduction in annual petroleum consumption and a 10 percent increase in annual alternative fuel consumption, as calculated from the baseline established by the Secretary for fiscal year 2005.

“(3) MILESTONES.—The Secretary shall include in the regulations described in paragraph (1)—

“(A) interim numeric milestones to assess annual agency progress towards accomplishing the goals described in that paragraph; and

“(B) a requirement that agencies annually report on progress towards meeting each of the milestones and the 2015 goals.

“(b) PLAN.—

“(1) REQUIREMENT.—

“(A) IN GENERAL.—The regulations under subsection (a) shall require each Federal agency to develop a plan, and implement the measures specified in the plan by dates specified in the plan, to meet the required petroleum reduction levels and the alternative fuel consumption increases, including the milestones specified by the Secretary.

“(B) INCLUSIONS.—The plan shall—

“(i) identify the specific measures the agency will use to meet the requirements of subsection (a)(2); and

“(ii) quantify the reductions in petroleum consumption or increases in alternative fuel consumption projected to be achieved by each measure each year.

“(2) MEASURES.—The plan may allow an agency to meet the required petroleum reduction level through—

“(A) the use of alternative fuels;

“(B) the acquisition of vehicles with higher fuel economy, including hybrid vehicles, neighborhood electric vehicles, electric vehicles, and plug-in hybrid vehicles if the vehicles are commercially available;

“(C) the substitution of cars for light trucks;

“(D) an increase in vehicle load factors;

“(E) a decrease in vehicle miles traveled;

“(F) a decrease in fleet size; and

“(G) other measures.”.

TITLE II—ENERGY SECURITY THROUGH INCREASED PRODUCTION OF BIOFUELS

Subtitle A—Renewable Fuel Standard

SEC. 201. DEFINITIONS.

Section 211(o)(1) of the Clean Air Act (42 U.S.C. 7545(o)) is amended to read as follows:

“(1) DEFINITIONS.—In this section:

“(A) ADDITIONAL RENEWABLE FUEL.—The term ‘additional renewable fuel’ means fuel that is produced from renewable biomass and that is used to replace or reduce the quantity of fossil fuel present in home heating oil or jet fuel.

“(B) ADVANCED BIOFUEL.—

“(i) IN GENERAL.—The term ‘advanced biofuel’ means renewable fuel, other than ethanol derived from corn starch, that has lifecycle greenhouse gas emissions, as determined by the Administrator, after notice and opportunity for comment, that are at least 50 percent less than baseline lifecycle greenhouse gas emissions.

“(ii) INCLUSIONS.—The types of fuels eligible for consideration as ‘advanced biofuel’ may include any of the following:

“(I) Ethanol derived from cellulose, hemicellulose, or lignin.

“(II) Ethanol derived from sugar or starch (other than corn starch).

“(III) Ethanol derived from waste material, including crop residue, other vegetative waste material, animal waste, and food waste and yard waste.

“(IV) Biomass-based diesel.

“(V) Biogas (including landfill gas and sewage waste treatment gas) produced through the conversion of organic matter from renewable biomass.

“(VI) Butanol or other alcohols produced through the conversion of organic matter from renewable biomass.

“(VII) Other fuel derived from cellulosic biomass.

“(C) BASELINE LIFECYCLE GREENHOUSE GAS EMISSIONS.—The term ‘baseline lifecycle greenhouse gas emissions’ means the average lifecycle greenhouse gas emissions, as determined by the Administrator, after notice and opportunity for comment, for gasoline or diesel (whichever is being replaced by the renewable fuel) sold or distributed as transportation fuel in 2005.

“(D) BIOMASS-BASED DIESEL.—The term ‘biomass-based diesel’ means renewable fuel that is biodiesel as defined in section 312(f) of the Energy Policy Act of 1992 (42 U.S.C. 13220(f)) and that has lifecycle greenhouse gas emissions, as determined by the Administrator, after notice and opportunity for comment, that are at least 50 percent less than the baseline lifecycle greenhouse gas emissions. Notwithstanding the preceding sentence, renewable fuel derived from coprocessing biomass with a petroleum feedstock shall be advanced biofuel if it meets the requirements of subparagraph (B), but is not biomass-based diesel.

“(E) CELLULOSIC BIOFUEL.—The term ‘cellulosic biofuel’ means renewable fuel derived from any cellulose, hemicellulose, or lignin that is derived from renewable biomass and that has lifecycle greenhouse gas emissions, as determined by the Administrator, that are at least 60 percent less than the baseline lifecycle greenhouse gas emissions.

“(F) CONVENTIONAL BIOFUEL.—The term ‘conventional biofuel’ means renewable fuel that is ethanol derived from corn starch.

“(G) GREENHOUSE GAS.—The term ‘greenhouse gas’ means carbon dioxide, hydrofluorocarbons, methane, nitrous oxide, perfluorocarbons, sulfur hexafluoride. The Administrator may include any other anthropogenically-emitted gas that is determined by the Administrator, after notice and comment, to contribute to global warming.

“(H) LIFECYCLE GREENHOUSE GAS EMISSIONS.—The term ‘lifecycle greenhouse gas emissions’ means the aggregate quantity of greenhouse gas emissions (including direct emissions and significant indirect emissions such as significant emissions from land use

changes), as determined by the Administrator, related to the full fuel lifecycle, including all stages of fuel and feedstock production and distribution, from feedstock generation or extraction through the distribution and delivery and use of the finished fuel to the ultimate consumer, where the mass values for all greenhouse gases are adjusted to account for their relative global warming potential.

“(I) RENEWABLE BIOMASS.—The term ‘renewable biomass’ means each of the following:

“(i) Planted crops and crop residue harvested from agricultural land cleared or cultivated at any time prior to the enactment of this sentence that is either actively managed or fallow, and nonforested.

“(ii) Planted trees and tree residue from actively managed tree plantations on non-federal land cleared at any time prior to enactment of this sentence, including land belonging to an Indian tribe or an Indian individual, that is held in trust by the United States or subject to a restriction against alienation imposed by the United States.

“(iii) Animal waste material and animal byproducts.

“(iv) Slash and pre-commercial thinnings that are from non-federal forestlands, including forestlands belonging to an Indian tribe or an Indian individual, that are held in trust by the United States or subject to a restriction against alienation imposed by the United States, but not forests or forestlands that are ecological communities with a global or State ranking of critically imperiled, imperiled, or rare pursuant to a State Natural Heritage Program, old growth forest, or late successional forest.

“(v) Biomass obtained from the immediate vicinity of buildings and other areas regularly occupied by people, or of public infrastructure, at risk from wildfire.

“(vi) Algae.

“(vii) Separated yard waste or food waste, including recycled cooking and trap grease.

“(J) RENEWABLE FUEL.—The term ‘renewable fuel’ means fuel that is produced from renewable biomass and that is used to replace or reduce the quantity of fossil fuel present in a transportation fuel.

“(K) SMALL REFINERY.—The term ‘small refinery’ means a refinery for which the average aggregate daily crude oil throughput for a calendar year (as determined by dividing the aggregate throughput for the calendar year by the number of days in the calendar year) does not exceed 75,000 barrels.

“(L) TRANSPORTATION FUEL.—The term ‘transportation fuel’ means fuel for use in motor vehicles, motor vehicle engines, nonroad vehicles, or nonroad engines (except for ocean-going vessels).”

SEC. 202. RENEWABLE FUEL STANDARD.

(a) RENEWABLE FUEL PROGRAM.—Paragraph (2) of section 211(o) (42 U.S.C. 7545(o)(2)) of the Clean Air Act is amended as follows:

(1) REGULATIONS.—Clause (i) of subparagraph (A) is amended by adding the following at the end thereof: “Not later than 1 year after the date of enactment of this sentence, the Administrator shall revise the regulations under this paragraph to ensure that transportation fuel sold or introduced into commerce in the United States (except in noncontiguous States or territories), on an annual average basis, contains at least the applicable volume of renewable fuel, advanced biofuel, cellulosic biofuel, and biomass-based diesel, determined in accordance with subparagraph (B) and, in the case of any such renewable fuel produced from new facilities that commence construction after the date of enactment of this sentence, achieves at least a 20 percent reduction in lifecycle greenhouse gas emissions compared

to baseline lifecycle greenhouse gas emissions.”

(2) APPLICABLE VOLUMES OF RENEWABLE FUEL.—Subparagraph (B) is amended to read as follows:

“(B) APPLICABLE VOLUMES.—

“(i) CALENDAR YEARS AFTER 2005.—

“(I) RENEWABLE FUEL.—For the purpose of subparagraph (A), the applicable volume of renewable fuel for the calendar years 2006 through 2022 shall be determined in accordance with the following table:

“Calendar year:	Applicable volume of renewable fuel (in billions of gallons):
2006	4.0
2007	4.7
2008	9.0
2009	11.1
2010	12.95
2011	13.95
2012	15.2
2013	16.55
2014	18.15
2015	20.5
2016	22.25
2017	24.0
2018	26.0
2019	28.0
2020	30.0
2021	33.0
2022	36.0

“(II) ADVANCED BIOFUEL.—For the purpose of subparagraph (A), of the volume of renewable fuel required under subclause (I), the applicable volume of advanced biofuel for the calendar years 2009 through 2022 shall be determined in accordance with the following table:

“Calendar year:	Applicable volume of advanced biofuel (in billions of gallons):
2009	0.6
2010	0.95
2011	1.35
2012	2.0
2013	2.75
2014	3.75
2015	5.5
2016	7.25
2017	9.0
2018	11.0
2019	13.0
2020	15.0
2021	18.0
2022	21.0

“(III) CELLULOSIC BIOFUEL.—For the purpose of subparagraph (A), of the volume of advanced biofuel required under subclause (II), the applicable volume of cellulosic biofuel for the calendar years 2010 through 2022 shall be determined in accordance with the following table:

“Calendar year:	Applicable volume of cellulosic biofuel (in billions of gallons):
2010	0.1
2011	0.25
2012	0.5
2013	1.0
2014	1.75
2015	3.0
2016	4.25
2017	5.5
2018	7.0
2019	8.5
2020	10.5
2021	13.5
2022	16.0

“(IV) BIOMASS-BASED DIESEL.—For the purpose of subparagraph (A), of the volume of advanced biofuel required under subclause (II), the applicable volume of biomass-based diesel for the calendar years 2009 through

2012 shall be determined in accordance with the following table:

“Calendar year:	Applicable volume of biomass-based diesel (in billions of gallons):
2009	0.5
2010	0.65
2011	0.80
2012	1.0

“(ii) OTHER CALENDAR YEARS.—For the purposes of subparagraph (A), the applicable volumes of each fuel specified in the tables in clause (i) for calendar years after the calendar years specified in the tables shall be determined by the Administrator, in coordination with the Secretary of Energy and the Secretary of Agriculture, based on a review of the implementation of the program during calendar years specified in the tables, and an analysis of—

“(I) the impact of the production and use of renewable fuels on the environment, including on air quality, climate change, conversion of wet lands, eco-systems, wildlife habitat, water quality, and water supply;

“(II) the impact of renewable fuels on the energy security of the United States;

“(III) the expected annual rate of future commercial production of renewable fuels, including advanced biofuels in each category (cellulosic biofuel and biomass-based diesel);

“(IV) the impact of renewable fuels on the infrastructure of the United States, including deliverability of materials, goods, and products other than renewable fuel, and the sufficiency of infrastructure to deliver and use renewable fuel;

“(V) the impact of the use of renewable fuels on the cost to consumers of transportation fuel and on the cost to transport goods; and

“(VI) the impact of the use of renewable fuels on other factors, including job creation, the price and supply of agricultural commodities, rural economic development, and food prices.

The Administrator shall promulgate rules establishing the applicable volumes under this clause no later than 14 months before the first year for which such applicable volume will apply.

“(iii) APPLICABLE VOLUME OF ADVANCED BIOFUEL.—For the purpose of making the determinations in clause (ii), for each calendar year, the applicable volume of advanced biofuel shall be at least the same percentage of the applicable volume of renewable fuel as in calendar year 2022.

“(iv) APPLICABLE VOLUME OF CELLULOSIC BIOFUEL.—For the purpose of making the determinations in clause (ii), for each calendar year, the applicable volume of cellulosic biofuel established by the Administrator shall be based on the assumption that the Administrator will not need to issue a waiver for such years under paragraph (7)(D).

“(v) MINIMUM APPLICABLE VOLUME OF BIOMASS-BASED DIESEL.—For the purpose of making the determinations in clause (ii), the applicable volume of biomass-based diesel shall not be less than the applicable volume listed in clause (i)(IV) for calendar year 2012.”

(b) APPLICABLE PERCENTAGES.—Paragraph (3) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(3)) is amended as follows:

(1) In subparagraph (A), by striking “2011” and inserting “2021.”

(2) In subparagraph (A), by striking “gasoline” and inserting “transportation fuel, biomass-based diesel, and cellulosic biofuel”.

(3) In subparagraph (B), by striking “2012” and inserting “2021” in clause (ii)(I).

(4) In subparagraph (B), by striking “gasoline” and inserting “transportation fuel” in clause (ii)(II).

(c) MODIFICATION OF GREENHOUSE GAS PERCENTAGES.—Paragraph (4) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(4)) is amended to read as follows:

“(4) MODIFICATION OF GREENHOUSE GAS REDUCTION PERCENTAGES.—

“(A) IN GENERAL.—The Administrator may, in the regulations under the last sentence of paragraph (2)(A)(i), adjust the 20 percent, 50 percent, and 60 percent reductions in lifecycle greenhouse gas emissions specified in paragraphs (2)(A)(i)(relating to renewable fuel), (1)(D) (relating to biomass-based diesel), (1)(B)(i)(relating to advanced biofuel), and (1)(E) (relating to cellulosic biofuel) to a lower percentage. For the 50 and 60 percent reductions, the Administrator may make such an adjustment only if he determines that generally such reduction is not commercially feasible for fuels made using a variety of feedstocks, technologies, and processes to meet the applicable reduction.

“(B) AMOUNT OF ADJUSTMENT.—In promulgating regulations under this paragraph, the specified 50 percent reduction in greenhouse gas emissions from advanced biofuel and in biomass-based diesel may not be reduced below 40 percent. The specified 20 percent reduction in greenhouse gas emissions from renewable fuel may not be reduced below 10 percent, and the specified 60 percent reduction in greenhouse gas emissions from cellulosic biofuel may not be reduced below 50 percent.

“(C) ADJUSTED REDUCTION LEVELS.—An adjustment under this paragraph to a percent less than the specified 20 percent greenhouse gas reduction for renewable fuel shall be the minimum possible adjustment, and the adjusted greenhouse gas reduction shall be established by the Administrator at the maximum achievable level, taking cost in consideration, for natural gas fired corn-based ethanol plants, allowing for the use of a variety of technologies and processes. An adjustment in the 50 or 60 percent greenhouse gas levels shall be the minimum possible adjustment for the fuel or fuels concerned, and the adjusted greenhouse gas reduction shall be established at the maximum achievable level, taking cost in consideration, allowing for the use of a variety of feedstocks, technologies, and processes.

“(D) 5-YEAR REVIEW.—Whenever the Administrator makes any adjustment under this paragraph, not later than 5 years thereafter he shall review and revise (based upon the same criteria and standards as required for the initial adjustment) the regulations establishing the adjusted level.

“(E) SUBSEQUENT ADJUSTMENTS.—After the Administrator has promulgated a final rule under the last sentence of paragraph (2)(A)(i) with respect to the method of determining lifecycle greenhouse gas emissions, except as provided in subparagraph (D), the Administrator may not adjust the percent greenhouse gas reduction levels unless he determines that there has been a significant change in the analytical methodology used for determining the lifecycle greenhouse gas emissions. If he makes such determination, he may adjust the 20, 50, or 60 percent reduction levels through rulemaking using the criteria and standards set forth in this paragraph.

“(F) LIMIT ON UPWARD ADJUSTMENTS.—If, under subparagraph (D) or (E), the Administrator revises a percent level adjusted as provided in subparagraph (A), (B), and (C) to a higher percent, such higher percent may not exceed the applicable percent specified in paragraph (2)(A)(i), (1)(D), (1)(B)(i), or (1)(E).

“(G) APPLICABILITY OF ADJUSTMENTS.—If the Administrator adjusts, or revises, a percent level referred to in this paragraph or makes a change in the analytical methodology used for determining the lifecycle

greenhouse gas emissions, such adjustment, revision, or change (or any combination thereof) shall only apply to renewable fuel from new facilities that commence construction after the effective date of such adjustment, revision, or change.”.

(d) CREDITS FOR ADDITIONAL RENEWABLE FUEL.—Paragraph (5) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(5)) is amended by adding the following new subparagraph at the end thereof:

“(E) CREDITS FOR ADDITIONAL RENEWABLE FUEL.—The Administrator may issue regulations providing (i) for the generation of an appropriate amount of credits by any person that refines, blends, or imports additional renewable fuels specified by the Administrator and (ii) for the use of such credits by the generator, or the transfer of all or a portion of the credits to another person, for the purpose of complying with paragraph (2).”.

(e) WAIVERS.—

(1) IN GENERAL.—Paragraph (7)(A) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(7)(A)) is amended by inserting “, by any person subject to the requirements of this subsection, or by the Administrator on his own motion” after “one or more States” in subparagraph (A) and by striking out “State” in subparagraph (B).

(2) CELLULOSIC BIOFUEL.—Paragraph (7) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(7)) is amended by adding the following at the end thereof:

“(D) CELLULOSIC BIOFUEL.—(i) For any calendar year for which the projected volume of cellulosic biofuel production is less than the minimum applicable volume established under paragraph (2)(B), as determined by the Administrator based on the estimate provided under paragraph (3)(A), not later than November 30 of the preceding calendar year, the Administrator shall reduce the applicable volume of cellulosic biofuel required under paragraph (2)(B) to the projected volume available during that calendar year. For any calendar year in which the Administrator makes such a reduction, the Administrator may also reduce the applicable volume of renewable fuel and advanced biofuels requirement established under paragraph (2)(B) by the same or a lesser volume.

“(ii) Whenever the Administrator reduces the minimum cellulosic biofuel volume under this subparagraph, the Administrator shall make available for sale cellulosic biofuel credits at the higher of \$0.25 per gallon or the amount by which \$3.00 per gallon exceeds the average wholesale price of a gallon of gasoline in the United States. Such amounts shall be adjusted for inflation by the Administrator for years after 2008.

“(iii) 18 months after date of enactment of this subparagraph, the Administrator shall promulgate regulations to govern the issuance of credits under this subparagraph. The regulations shall set forth the method for determining the exact price of credits in the event of a waiver. The price of such credits shall not be changed more frequently than once each quarter. These regulations shall include such provisions, including limiting the credits’ uses and useful life, as the Administrator deems appropriate to assist market liquidity and transparency, to provide appropriate certainty for regulated entities and renewable fuel producers, and to limit any potential misuse of cellulosic biofuel credits to reduce the use of other renewable fuels, and for such other purposes as the Administrator determines will help achieve the goals of this subsection. The regulations shall limit the number of cellulosic biofuel credits for any calendar year to the minimum applicable volume (as reduced under this subparagraph) of cellulosic biofuel for that year.”.

(3) BIOMASS-BASED DIESEL.—Paragraph (7) of section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)(7)) is amended by adding the following at the end thereof:

“(E) BIOMASS-BASED DIESEL.—

“(i) MARKET EVALUATION.—The Administrator, in consultation with the Secretary of Energy and the Secretary of Agriculture, shall periodically evaluate the impact of the biomass-based diesel requirements established under this paragraph on the price of diesel fuel.

“(ii) WAIVER.—If the Administrator determines that there is a significant renewable feedstock disruption or other market circumstances that would make the price of biomass-based diesel fuel increase significantly, the Administrator, in consultation with the Secretary of Energy and the Secretary of Agriculture, shall issue an order to reduce, for up to a 60-day period, the quantity of biomass-based diesel required under subparagraph (A) by an appropriate quantity that does not exceed 15 percent of the applicable annual requirement for biomass-based diesel. For any calendar year in which the Administrator makes a reduction under this subparagraph, the Administrator may also reduce the applicable volume of renewable fuel and advanced biofuels requirement established under paragraph (2)(B) by the same or a lesser volume.

“(iii) EXTENSIONS.—If the Administrator determines that the feedstock disruption or circumstances described in clause (ii) is continuing beyond the 60-day period described in clause (ii) or this clause, the Administrator, in consultation with the Secretary of Energy and the Secretary of Agriculture, may issue an order to reduce, for up to an additional 60-day period, the quantity of biomass-based diesel required under subparagraph (A) by an appropriate quantity that does not exceed an additional 15 percent of the applicable annual requirement for biomass-based diesel.

“(F) MODIFICATION OF APPLICABLE VOLUMES.—For any of the tables in paragraph (2)(B), if the Administrator waives—

“(i) at least 20 percent of the applicable volume requirement set forth in any such table for 2 consecutive years; or

“(ii) at least 50 percent of such volume requirement for a single year,

the Administrator shall promulgate a rule (within one year after issuing such waiver) that modifies the applicable volumes set forth in the table concerned for all years following the final year to which the waiver applies, except that no such modification in applicable volumes shall be made for any year before 2016. In promulgating such a rule, the Administrator shall comply with the processes, criteria, and standards set forth in paragraph (2)(B)(ii).”.

SEC. 203. STUDY OF IMPACT OF RENEWABLE FUEL STANDARD.

(a) IN GENERAL.—The Secretary of Energy, in consultation with the Secretary of Agriculture and the Administrator of the Environmental Protection Agency, shall enter into an arrangement with the National Academy of Sciences under which the Academy shall conduct a study to assess the impact of the requirements described in section 211(o) of the Clean Air Act on each industry relating to the production of feed grains, livestock, food, forest products, and energy.

(b) PARTICIPATION.—In conducting the study under this section, the National Academy of Sciences shall seek the participation, and consider the input, of—

- (1) producers of feed grains;
- (2) producers of livestock, poultry, and pork products;
- (3) producers of food and food products;
- (4) producers of energy;

(5) individuals and entities interested in issues relating to conservation, the environment, and nutrition;

(6) users and consumer of renewable fuels;

(7) producers and users of biomass feedstocks; and

(8) land grant universities.

(c) **CONSIDERATIONS.**—In conducting the study, the National Academy of Sciences shall consider—

(1) the likely impact on domestic animal agriculture feedstocks that, in any crop year, are significantly below current projections;

(2) policy options to alleviate the impact on domestic animal agriculture feedstocks that are significantly below current projections; and

(3) policy options to maintain regional agricultural and silvicultural capability.

(d) **COMPONENTS.**—The study shall include—

(1) a description of the conditions under which the requirements described in section 211(o) of the Clean Air Act should be suspended or reduced to prevent adverse impacts to domestic animal agriculture feedstocks described in subsection (c)(2) or regional agricultural and silvicultural capability described in subsection (c)(3); and

(2) recommendations for the means by which the Federal Government could prevent or minimize adverse economic hardships and impacts.

(e) **DEADLINE FOR COMPLETION OF STUDY.**—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit to Congress a report that describes the results of the study under this section.

(f) **PERIODIC REVIEWS.**—Section 211(o) of the Clean Air Act is amended by adding the following at the end thereof:

“(12) **PERIODIC REVIEWS.**—To allow for the appropriate adjustment of the requirements described in subparagraph (B) of paragraph (2), the Administrator shall conduct periodic reviews of—

“(A) existing technologies;

“(B) the feasibility of achieving compliance with the requirements; and

“(C) the impacts of the requirements described in subsection (a)(2) on each individual and entity described in paragraph (2).”.

SEC. 204. ENVIRONMENTAL AND RESOURCE CONSERVATION IMPACTS.

(a) **IN GENERAL.**—Not later than 3 years after the enactment of this section and every 3 years thereafter, the Administrator of the Environmental Protection Agency, in consultation with the Secretary of Agriculture and the Secretary of Energy, shall assess and report to Congress on the impacts to date and likely future impacts of the requirements of section 211(o) of the Clean Air Act on the following:

(1) Environmental issues, including air quality, effects on hypoxia, pesticides, sediment, nutrient and pathogen levels in waters, acreage and function of waters, and soil environmental quality.

(2) Resource conservation issues, including soil conservation, water availability, and ecosystem health and biodiversity, including impacts on forests, grasslands, and wetlands.

(3) The growth and use of cultivated invasive or noxious plants and their impacts on the environment and agriculture.

In advance of preparing the report required by this subsection, the Administrator may seek the views of the National Academy of Sciences or another appropriate independent research institute. The report shall include the annual volume of imported renewable fuels and feedstocks for renewable fuels, and the environmental impacts outside the United States of producing such fuels and feedstocks. The report required by this sub-

section shall include recommendations for actions to address any adverse impacts found.

(b) **EFFECT ON AIR QUALITY AND OTHER ENVIRONMENTAL REQUIREMENTS.**—Except as provided in section 211(o)(13) of the Clean Air Act, nothing in the amendments made by this title to section 211(o) of the Clean Air Act shall be construed as superseding, or limiting, any more environmentally protective requirement under the Clean Air Act, or under any other provision of State or Federal law or regulation, including any environmental law or regulation.

SEC. 205. BIOMASS BASED DIESEL AND BIODIESEL LABELING.

(a) **IN GENERAL.**—Each retail diesel fuel pump shall be labeled in a manner that informs consumers of the percent of biomass-based diesel or biodiesel that is contained in the biomass-based diesel blend or biodiesel blend that is offered for sale, as determined by the Federal Trade Commission.

(b) **LABELING REQUIREMENTS.**—Not later than 180 days after the date of enactment of this section, the Federal Trade Commission shall promulgate biodiesel labeling requirements as follows:

(1) Biomass-based diesel blends or biodiesel blends that contain less than or equal to 5 percent biomass-based diesel or biodiesel by volume and that meet ASTM D975 diesel specifications shall not require any additional labels.

(2) Biomass based diesel blends or biodiesel blends that contain more than 5 percent biomass-based diesel or biodiesel by volume but not more than 20 percent by volume shall be labeled “contains biomass-based diesel or biodiesel in quantities between 5 percent and 20 percent”.

(3) Biomass-based diesel or biodiesel blends that contain more than 20 percent biomass based or biodiesel by volume shall be labeled “contains more than 20 percent biomass-based diesel or biodiesel”.

(c) **DEFINITIONS.**—In this section:

(1) **ASTM.**—The term “ASTM” means the American Society of Testing and Materials.

(2) **BIOMASS-BASED DIESEL.**—The term “biomass-based diesel” means biodiesel as defined in section 312(f) of the Energy Policy Act of 1992 (42 U.S.C. 13220(f)).

(3) **BIODIESEL.**—The term “biodiesel” means the monoalkyl esters of long chain fatty acids derived from plant or animal matter that meet—

(A) the registration requirements for fuels and fuel additives under this section; and

(B) the requirements of ASTM standard D6751.

(4) **BIOMASS-BASED DIESEL AND BIODIESEL BLENDS.**—The terms “biomass-based diesel blend” and “biodiesel blend” means a blend of “biomass-based diesel” or “biodiesel” fuel that is blended with petroleum based diesel fuel.

SEC. 206. STUDY OF CREDITS FOR USE OF RENEWABLE ELECTRICITY IN ELECTRIC VEHICLES.

(a) **DEFINITION OF ELECTRIC VEHICLE.**—In this section, the term “electric vehicle” means an electric motor vehicle (as defined in section 601 of the Energy Policy Act of 1992 (42 U.S.C. 13271)) for which the rechargeable storage battery—

(1) receives a charge directly from a source of electric current that is external to the vehicle; and

(2) provides a minimum of 80 percent of the motive power of the vehicle.

(b) **STUDY.**—The Administrator of the Environmental Protection Agency shall conduct a study on the feasibility of issuing credits under the program established under section 211(o) of the Clean Air Act to electric vehicles powered by electricity produced from renewable energy sources.

(c) **REPORT.**—Not later than 18 months after the date of enactment of this Act, the Administrator shall submit to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Energy and Commerce of the United States House of Representatives a report that describes the results of the study, including a description of—

(1) existing programs and studies on the use of renewable electricity as a means of powering electric vehicles; and

(2) alternatives for—

(A) designing a pilot program to determine the feasibility of using renewable electricity to power electric vehicles as an adjunct to a renewable fuels mandate;

(B) allowing the use, under the pilot program designed under subparagraph (A), of electricity generated from nuclear energy as an additional source of supply;

(C) identifying the source of electricity used to power electric vehicles; and

(D) equating specific quantities of electricity to quantities of renewable fuel under section 211(o) of the Clean Air Act.

SEC. 207. GRANTS FOR PRODUCTION OF ADVANCED BIOFUELS.

(a) **IN GENERAL.**—The Secretary of Energy shall establish a grant program to encourage the production of advanced biofuels.

(b) **REQUIREMENTS AND PRIORITY.**—In making grants under this section, the Secretary—

(1) shall make awards to the proposals for advanced biofuels with the greatest reduction in lifecycle greenhouse gas emissions compared to the comparable motor vehicle fuel lifecycle emissions during calendar year 2005; and

(2) shall not make an award to a project that does not achieve at least a 80 percent reduction in such lifecycle greenhouse gas emissions.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section \$500,000,000 for the period of fiscal years 2008 through 2015.

SEC. 208. INTEGRATED CONSIDERATION OF WATER QUALITY IN DETERMINATIONS ON FUELS AND FUEL ADDITIVES.

Section 211(c)(1) of the Clean Air Act (42 U.S.C. 7545(c)(1)) is amended as follows:

(1) By striking “nonroad vehicle (A) if in the judgment of the Administrator” and inserting “nonroad vehicle if, in the judgment of the Administrator, any fuel or fuel additive or” ; and

(2) In subparagraph (A), by striking “air pollution which” and inserting “air pollution or water pollution (including any degradation in the quality of groundwater) that”.

SEC. 209. ANTI-BACKSLIDING.

Section 211 of the Clean Air Act (42 U.S.C. 7545) is amended by adding at the end the following:

“(v) **PREVENTION OF AIR QUALITY DETERIORATION.**—

“(1) **STUDY.**—

“(A) **IN GENERAL.**—Not later than 18 months after the date of enactment of this subsection, the Administrator shall complete a study to determine whether the renewable fuel volumes required by this section will adversely impact air quality as a result of changes in vehicle and engine emissions of air pollutants regulated under this Act.

“(B) **CONSIDERATIONS.**—The study shall include consideration of—

“(i) different blend levels, types of renewable fuels, and available vehicle technologies; and

“(ii) appropriate national, regional, and local air quality control measures.

“(2) **REGULATIONS.**—Not later than 3 years after the date of enactment of this subsection, the Administrator shall—

“(A) promulgate fuel regulations to implement appropriate measures to mitigate, to the greatest extent achievable, considering the results of the study under paragraph (1), any adverse impacts on air quality, as the result of the renewable volumes required by this section; or

“(B) make a determination that no such measures are necessary.”.

SEC. 210. EFFECTIVE DATE, SAVINGS PROVISION, AND TRANSITION RULES.

(a) **TRANSITION RULES.**—(1) For calendar year 2008, transportation fuel sold or introduced into commerce in the United States (except in noncontiguous States or territories), that is produced from facilities that commence construction after the date of enactment of this Act shall be treated as renewable fuel within the meaning of section 211(o) of the Clean Air Act only if it achieves at least a 20 percent reduction in lifecycle greenhouse gas emissions compared to baseline lifecycle greenhouse gas emissions. For calendar years 2008 and 2009, any ethanol plant that is fired with natural gas, biomass, or any combination thereof is deemed to be in compliance with such 20 percent reduction requirement and with the 20 percent reduction requirement of section 211(o)(1) of the Clean Air Act. The terms used in this subsection shall have the same meaning as provided in the amendment made by this Act to section 211(o) of the Clean Air Act.

(2) Until January 1, 2009, the Administrator of the Environmental Protection Agency shall implement section 211(o) of the Clean Air Act and the rules promulgated under that section in accordance with the provisions of that section as in effect before the enactment of this Act and in accordance with the rules promulgated before the enactment of this Act, except that for calendar year 2008, the number “8.5” shall be substituted for the number “5.4” in the table in section 211(o)(2)(B) and in the corresponding rules promulgated to carry out those provisions. The Administrator is authorized to take such other actions as may be necessary to carry out this paragraph notwithstanding any other provision of law.

(b) **SAVINGS CLAUSE.**—Section 211(o) of the Clean Air Act (42 U.S.C. 7545(o)) is amended by adding the following new paragraph at the end thereof:

“(13) **EFFECT ON OTHER PROVISIONS.**—Nothing in this subsection, or regulations issued pursuant to this subsection, shall affect or be construed to affect the regulatory status of carbon dioxide or any other greenhouse gas, or to expand or limit regulatory authority regarding carbon dioxide or any other greenhouse gas, for purposes of other provisions (including section 165) of this Act. The previous sentence shall not affect implementation and enforcement of this subsection.”.

(c) **EFFECTIVE DATE.**—The amendments made by this title to section 211(o) of the Clean Air Act shall take effect January 1, 2009, except that the Administrator shall promulgate regulations to carry out such amendments not later than one year after the enactment of this Act.

Subtitle B—Biofuels Research and Development

SEC. 221. BIODIESEL.

(a) **BIODIESEL STUDY.**—Not later than 180 days after the date of enactment of this Act, the Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall submit to Congress a report on any research and development challenges inherent in increasing the proportion of diesel fuel sold in the United States that is biodiesel.

(b) **MATERIAL FOR THE ESTABLISHMENT OF STANDARDS.**—The Director of the National Institute of Standards and Technology, in

consultation with the Secretary, shall make publicly available the physical property data and characterization of biodiesel and other biofuels as appropriate.

SEC. 222. BIOGAS.

Not later than 180 days after the date of enactment of this Act, the Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall submit to Congress a report on any research and development challenges inherent in increasing the amount of transportation fuels sold in the United States that are fuel with biogas or a blend of biogas and natural gas.

SEC. 223. GRANTS FOR BIOFUEL PRODUCTION RESEARCH AND DEVELOPMENT IN CERTAIN STATES.

(a) **IN GENERAL.**—The Secretary shall provide grants to eligible entities for research, development, demonstration, and commercial application of biofuel production technologies in States with low rates of ethanol production, including low rates of production of cellulosic biomass ethanol, as determined by the Secretary.

(b) **ELIGIBILITY.**—To be eligible to receive a grant under this section, an entity shall—

(1)(A) be an institution of higher education (as defined in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801)), including tribally controlled colleges or universities, located in a State described in subsection (a); or

(B) be a consortium including at least 1 such institution of higher education, and industry, State agencies, Indian tribal agencies, National Laboratories, or local government agencies located in the State; and

(2) have proven experience and capabilities with relevant technologies.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary to carry out this section \$25,000,000 for each of fiscal years 2008 through 2010.

SEC. 224. BIOREFINERY ENERGY EFFICIENCY.

Section 932 of Energy Policy Act of 2005 (42 U.S.C. 16232) is amended by adding at the end the following new subsections:

“(g) **BIOREFINERY ENERGY EFFICIENCY.**—The Secretary shall establish a program of research, development, demonstration, and commercial application for increasing energy efficiency and reducing energy consumption in the operation of biorefinery facilities.

“(h) **RETROFIT TECHNOLOGIES FOR THE DEVELOPMENT OF ETHANOL FROM CELLULOSIC MATERIALS.**—The Secretary shall establish a program of research, development, demonstration, and commercial application on technologies and processes to enable biorefineries that exclusively use corn grain or corn starch as a feedstock to produce ethanol to be retrofitted to accept a range of biomass, including lignocellulosic feedstocks.”.

SEC. 225. STUDY OF OPTIMIZATION OF FLEXIBLE FUELED VEHICLES TO USE E-85 FUEL.

(a) **IN GENERAL.**—The Secretary, in consultation with the Secretary of Transportation and the Administrator of the Environmental Protection Agency, shall conduct a study of whether optimizing flexible fueled vehicles to operate using E-85 fuel would increase the fuel efficiency of flexible fueled vehicles.

(b) **REPORT.**—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Science and Technology and the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Commerce, Science,

and Transportation of the Senate, a report that describes the results of the study under this section, including any recommendations of the Secretary.

SEC. 226. STUDY OF ENGINE DURABILITY AND PERFORMANCE ASSOCIATED WITH THE USE OF BIODIESEL.

(a) **IN GENERAL.**—Not later than 30 days after the date of enactment of this Act, the Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall initiate a study on the effects of the use of biodiesel on the performance and durability of engines and engine systems.

(b) **COMPONENTS.**—The study under this section shall include—

(1) an assessment of whether the use of biodiesel lessens the durability and performance of conventional diesel engines and engine systems; and

(2) an assessment of the effects referred to in subsection (a) with respect to biodiesel blends at varying concentrations, including the following percentage concentrations of biodiesel:

- (A) 5 percent biodiesel.
- (B) 10 percent biodiesel.
- (C) 20 percent biodiesel.
- (D) 30 percent biodiesel.
- (E) 100 percent biodiesel.

(c) **REPORT.**—Not later than 24 months after the date of enactment of this Act, the Secretary shall submit to the Committee on Science and Technology and the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works of the Senate, a report that describes the results of the study under this section, including any recommendations of the Secretary.

SEC. 227. STUDY OF OPTIMIZATION OF BIOGAS USED IN NATURAL GAS VEHICLES.

(a) **IN GENERAL.**—The Secretary, in consultation with the Administrator of the Environmental Protection Agency and the Secretary of Transportation, shall conduct a study of methods of increasing the fuel efficiency of vehicles using biogas by optimizing natural gas vehicle systems that can operate on biogas, including the advancement of vehicle fuel systems and the combination of hybrid-electric and plug-in hybrid electric drive platforms with natural gas vehicle systems using biogas.

(b) **REPORT.**—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Commerce, Science, and Transportation of the Senate, and to the Committee on Science and Technology and the Committee on Energy and Commerce of the House of Representatives, a report that describes the results of the study, including any recommendations of the Secretary.

SEC. 228. ALGAL BIOMASS.

(a) **IN GENERAL.**—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report on the progress of the research and development that is being conducted on the use of algae as a feedstock for the production of biofuels.

(b) **CONTENTS.**—The report shall identify continuing research and development challenges and any regulatory or other barriers found by the Secretary that hinder the use of this resource, as well as recommendations on how to encourage and further its development as a viable transportation fuel.

SEC. 229. BIOFUELS AND BIOREFINERY INFORMATION CENTER.

(a) IN GENERAL.—The Secretary, in cooperation with the Secretary of Agriculture, shall establish a biofuels and biorefinery information center to make available to interested parties information on—

(1) renewable fuel feedstocks, including the varieties of fuel capable of being produced from various feedstocks;

(2) biorefinery processing techniques related to various renewable fuel feedstocks;

(3) the distribution, blending, storage, and retail dispensing infrastructure necessary for the transport and use of renewable fuels;

(4) Federal and State laws and incentives related to renewable fuel production and use;

(5) renewable fuel research and development advancements;

(6) renewable fuel development and biorefinery processes and technologies;

(7) renewable fuel resources, including information on programs and incentives for renewable fuels;

(8) renewable fuel producers;

(9) renewable fuel users; and

(10) potential renewable fuel users.

(b) ADMINISTRATION.—In administering the biofuels and biorefinery information center, the Secretary shall—

(1) continually update information provided by the center;

(2) make information available relating to processes and technologies for renewable fuel production;

(3) make information available to interested parties on the process for establishing a biorefinery; and

(4) make information and assistance provided by the center available through a toll-free telephone number and website.

(c) COORDINATION AND NONDUPLICATION.—To maximum extent practicable, the Secretary shall ensure that the activities under this section are coordinated with, and do not duplicate the efforts of, centers at other government agencies.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 230. CELLULOSIC ETHANOL AND BIOFUELS RESEARCH.

(a) DEFINITION OF ELIGIBLE ENTITY.—In this section, the term “eligible entity” means—

(1) an 1890 Institution (as defined in section 2 of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7061));

(2) a part B institution (as defined in section 322 of the Higher Education Act of 1965 (20 U.S.C. 1061)) (commonly referred to as “Historically Black Colleges and Universities”);

(3) a tribal college or university (as defined in section 316(b) of the Higher Education Act of 1965 (20 U.S.C. 1059c(b)); or

(4) a Hispanic-serving institution (as defined in section 502(a) of the Higher Education Act of 1965 (20 U.S.C. 1101a(a)).

(b) GRANTS.—The Secretary shall make cellulosic ethanol and biofuels research and development grants to 10 eligible entities selected by the Secretary to receive a grant under this section through a peer-reviewed competitive process.

(c) COLLABORATION.—An eligible entity that is selected to receive a grant under subsection (b) shall collaborate with 1 of the Bioenergy Research Centers of the Office of Science of the Department.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to make grants described in subsection (b) \$50,000,000 for fiscal year 2008, to remain available until expended.

SEC. 231. BIOENERGY RESEARCH AND DEVELOPMENT, AUTHORIZATION OF APPROPRIATION.

Section 931 of the Energy Policy Act of 2005 (42 U.S.C. 16231) is amended—

(1) in subsection (b)—

(A) in paragraph (2), by striking “and” at the end;

(B) in paragraph (3), by striking the period at the end and inserting “; and”; and

(C) by adding at the end the following:

“(4) \$963,000,000 for fiscal year 2010.”; and

(2) in subsection (c)—

(A) in paragraph (2)—

(i) by striking “\$251,000,000” and inserting “\$377,000,000”; and

(ii) by striking “and” at the end;

(B) in paragraph (3)—

(i) by striking “\$274,000,000” and inserting “\$398,000,000”; and

(ii) by striking the period at the end and inserting “; and”; and

(C) by adding at the end the following:

“(4) \$419,000,000 for fiscal year 2010, of which \$150,000,000 shall be for section 932(d).”.

SEC. 232. ENVIRONMENTAL RESEARCH AND DEVELOPMENT.

(a) IN GENERAL.—Section 977 of the Energy Policy Act of 2005 (42 U.S.C. 16317) is amended—

(1) in subsection (a)(1), by striking “and computational biology” and inserting “computational biology, and environmental science”; and

(2) in subsection (b)—

(A) in paragraph (1), by inserting “in sustainable production systems that reduce greenhouse gas emissions” after “hydrogen”;

(B) in paragraph (3), by striking “and” at the end;

(C) by redesignating paragraph (4) as paragraph (5); and

(D) by inserting after paragraph (3) the following:

“(4) develop cellulosic and other feedstocks that are less resource and land intensive and that promote sustainable use of resources, including soil, water, energy, forests, and land, and ensure protection of air, water, and soil quality; and”.

(b) TOOLS AND EVALUATION.—Section 307(d) of the Biomass Research and Development Act of 2000 (7 U.S.C. 8606(d)) is amended—

(1) in paragraph (3)(E), by striking “and” at the end;

(2) in paragraph (4), by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

“(5) the improvement and development of analytical tools to facilitate the analysis of life-cycle energy and greenhouse gas emissions, including emissions related to direct and indirect land use changes, attributable to all potential biofuel feedstocks and production processes; and

“(6) the systematic evaluation of the impact of expanded biofuel production on the environment, including forest lands, and on the food supply for humans and animals.”.

(c) SMALL-SCALE PRODUCTION AND USE OF BIOFUELS.—Section 307(e) of the Biomass Research and Development Act of 2000 (7 U.S.C. 8606(e)) is amended—

(1) in paragraph (2), by striking “and” at the end;

(2) in paragraph (3), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following:

“(4) to facilitate small-scale production, local, and on-farm use of biofuels, including the development of small-scale gasification technologies for production of biofuel from cellulosic feedstocks.”.

SEC. 233. BIOENERGY RESEARCH CENTERS.

Section 977 of the Energy Policy Act of 2005 (42 U.S.C. 16317) is amended by adding at the end the following:

“(f) BIOENERGY RESEARCH CENTERS.—

“(1) ESTABLISHMENT OF CENTERS.—In carrying out the program under subsection (a), the Secretary shall establish at least 7 bioenergy research centers, which may be of varying size.

“(2) GEOGRAPHIC DISTRIBUTION.—The Secretary shall establish at least 1 bioenergy research center in each Petroleum Administration for Defense District or Subdistrict of a Petroleum Administration for Defense District.

“(3) GOALS.—The goals of the centers established under this subsection shall be to accelerate basic transformational research and development of biofuels, including biological processes.

“(4) SELECTION AND DURATION.—

“(A) IN GENERAL.—A center under this subsection shall be selected on a competitive basis for a period of 5 years.

“(B) REAPPLICATION.—After the end of the period described in subparagraph (A), a grantee may reapply for selection on a competitive basis.

“(5) INCLUSION.—A center that is in existence on the date of enactment of this subsection—

“(A) shall be counted towards the requirement for establishment of at least 7 bioenergy research centers; and

“(B) may continue to receive support for a period of 5 years beginning on the date of establishment of the center.”.

SEC. 234. UNIVERSITY BASED RESEARCH AND DEVELOPMENT GRANT PROGRAM.

(a) ESTABLISHMENT.—The Secretary shall establish a competitive grant program, in a geographically diverse manner, for projects submitted for consideration by institutions of higher education to conduct research and development of renewable energy technologies. Each grant made shall not exceed \$2,000,000.

(b) ELIGIBILITY.—Priority shall be given to institutions of higher education with—

(1) established programs of research in renewable energy;

(2) locations that are low income or outside of an urbanized area;

(3) a joint venture with an Indian tribe; and

(4) proximity to trees dying of disease or insect infestation as a source of woody biomass.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary \$25,000,000 for carrying out this section.

(d) DEFINITIONS.—In this section:

(1) INDIAN TRIBE.—The term “Indian tribe” has the meaning as defined in section 126(c) of the Energy Policy Act of 2005.

(2) RENEWABLE ENERGY.—The term “renewable energy” has the meaning as defined in section 902 of the Energy Policy Act of 2005.

(3) URBANIZED AREA.—The term “urbanized area” has the mean as defined by the U.S. Bureau of the Census.

Subtitle C—Biofuels Infrastructure**SEC. 241. PROHIBITION ON FRANCHISE AGREEMENT RESTRICTIONS RELATED TO RENEWABLE FUEL INFRASTRUCTURE.**

(a) IN GENERAL.—Title I of the Petroleum Marketing Practices Act (15 U.S.C. 2801 et seq.) is amended by adding at the end the following:

“**SEC. 107. PROHIBITION ON RESTRICTION OF INSTALLATION OF RENEWABLE FUEL PUMPS.**

“(a) DEFINITION.—In this section:

“(1) RENEWABLE FUEL.—The term ‘renewable fuel’ means any fuel—

“(A) at least 85 percent of the volume of which consists of ethanol; or

“(B) any mixture of biodiesel and diesel or renewable diesel (as defined in regulations

adopted pursuant to section 211(o) of the Clean Air Act (40 CFR, Part 80), determined without regard to any use of kerosene and containing at least 20 percent biodiesel or renewable diesel.

“(2) **FRANCHISE-RELATED DOCUMENT.**—The term ‘franchise-related document’ means—

“(A) a franchise under this Act; and

“(B) any other contract or directive of a franchisor relating to terms or conditions of the sale of fuel by a franchisee.

“(b) **PROHIBITIONS.**—

“(1) **IN GENERAL.**—No franchise-related document entered into or renewed on or after the date of enactment of this section shall contain any provision allowing a franchisor to restrict the franchisee or any affiliate of the franchisee from—

“(A) installing on the marketing premises of the franchisee a renewable fuel pump or tank, except that the franchisee’s franchisor may restrict the installation of a tank on leased marketing premises of such franchisor;

“(B) converting an existing tank or pump on the marketing premises of the franchisee for renewable fuel use, so long as such tank or pump and the piping connecting them are either warranted by the manufacturer or certified by a recognized standards setting organization to be suitable for use with such renewable fuel;

“(C) advertising (including through the use of signage) the sale of any renewable fuel;

“(D) selling renewable fuel in any specified area on the marketing premises of the franchisee (including any area in which a name or logo of a franchisor or any other entity appears);

“(E) purchasing renewable fuel from sources other than the franchisor if the franchisor does not offer its own renewable fuel for sale by the franchisee;

“(F) listing renewable fuel availability or prices, including on service station signs, fuel dispensers, or light poles; or

“(G) allowing for payment of renewable fuel with a credit card,

so long as such activities described in subparagraphs (A) through (G) do not constitute mislabeling, misbranding, willful adulteration, or other trademark violations by the franchisee.

“(2) **EFFECT OF PROVISION.**—Nothing in this section shall be construed to preclude a franchisor from requiring the franchisee to obtain reasonable indemnification and insurance policies.

“(c) **EXCEPTION TO 3-GRADE REQUIREMENT.**—No franchise-related document that requires that 3 grades of gasoline be sold by the applicable franchisee shall prevent the franchisee from selling a renewable fuel in lieu of 1, and only 1, grade of gasoline.”

(b) **ENFORCEMENT.**—Section 105 of the Petroleum Marketing Practices Act (15 U.S.C. 2805) is amended by striking “102 or 103” each place it appears and inserting “102, 103, or 107”.

(c) **CONFORMING AMENDMENTS.**—

(1) **IN GENERAL.**—Section 101(13) of the Petroleum Marketing Practices Act (15 U.S.C. 2801(13)) is amended by aligning the margin of subparagraph (C) with subparagraph (B).

(2) **TABLE OF CONTENTS.**—The table of contents of the Petroleum Marketing Practices Act (15 U.S.C. 2801 note) is amended—

(A) by inserting after the item relating to section 106 the following:

“Sec. 107. Prohibition on restriction of installation of renewable fuel pumps.”; and

(B) by striking the item relating to section 202 and inserting the following:

“Sec. 202. Automotive fuel rating testing and disclosure requirements.”.

SEC. 242. RENEWABLE FUEL DISPENSER REQUIREMENTS.

(a) **MARKET PENETRATION REPORTS.**—The Secretary, in consultation with the Secretary of Transportation, shall determine and report to Congress annually on the market penetration for flexible-fuel vehicles in use within geographic regions to be established by the Secretary.

(b) **DISPENSER FEASIBILITY STUDY.**—Not later than 24 months after the date of enactment of this Act, the Secretary, in consultation with the Department of Transportation, shall report to the Congress on the feasibility of requiring motor fuel retailers to install E-85 compatible dispensers and related systems at retail fuel facilities in regions where flexible-fuel vehicle market penetration has reached 15 percent of motor vehicles. In conducting such study, the Secretary shall consider and report on the following factors:

(1) The commercial availability of E-85 fuel and the number of competing E-85 wholesale suppliers in a given region.

(2) The level of financial assistance provided on an annual basis by the Federal Government, State governments, and nonprofit entities for the installation of E-85 compatible infrastructure.

(3) The number of retailers whose retail locations are unable to support more than 2 underground storage tank dispensers.

(4) The expense incurred by retailers in the installation and sale of E-85 compatible dispensers and related systems and any potential effects on the price of motor vehicle fuel.

SEC. 243. ETHANOL PIPELINE FEASIBILITY STUDY.

(a) **IN GENERAL.**—The Secretary, in coordination with the Secretary of Transportation, shall conduct a study of the feasibility of the construction of pipelines dedicated to the transportation of ethanol.

(b) **FACTORS FOR CONSIDERATION.**—In conducting the study under subsection (a), the Secretary shall take into consideration—

(1) the quantity of ethanol production that would make dedicated pipelines economically viable;

(2) existing or potential barriers to the construction of pipelines dedicated to the transportation of ethanol, including technical, siting, financing, and regulatory barriers;

(3) market risk (including throughput risk) and means of mitigating the risk;

(4) regulatory, financing, and siting options that would mitigate the risk and help ensure the construction of 1 or more pipelines dedicated to the transportation of ethanol;

(5) financial incentives that may be necessary for the construction of pipelines dedicated to the transportation of ethanol, including the return on equity that sponsors of the initial dedicated ethanol pipelines will require to invest in the pipelines;

(6) technical factors that may compromise the safe transportation of ethanol in pipelines, including identification of remedial and preventive measures to ensure pipeline integrity; and

(7) such other factors as the Secretary considers to be appropriate.

(c) **REPORT.**—Not later than 15 months after the date of enactment of this Act, the Secretary shall submit to Congress a report describing the results of the study conducted under this section.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to the Secretary to carry out this section \$1,000,000 for each of fiscal years 2008 and 2009, to remain available until expended.

SEC. 244. RENEWABLE FUEL INFRASTRUCTURE GRANTS.

(a) **DEFINITION OF RENEWABLE FUEL BLEND.**—For purposes of this section, the term “renewable fuel blend” means gasoline blend that contain not less than 11 percent, and not more than 85 percent, renewable fuel or diesel fuel that contains at least 10 percent renewable fuel.

(b) **INFRASTRUCTURE DEVELOPMENT GRANTS.**—

(1) **ESTABLISHMENT.**—The Secretary shall establish a program for making grants for providing assistance to retail and wholesale motor fuel dealers or other entities for the installation, replacement, or conversion of motor fuel storage and dispensing infrastructure to be used exclusively to store and dispense renewable fuel blends.

(2) **SELECTION CRITERIA.**—Not later than 12 months after the date of enactment of this Act, the Secretary shall establish criteria for evaluating applications for grants under this subsection that will maximize the availability and use of renewable fuel blends, and that will ensure that renewable fuel blends are available across the country. Such criteria shall provide for—

(A) consideration of the public demand for each renewable fuel blend in a particular geographic area based on State registration records showing the number of flexible-fuel vehicles;

(B) consideration of the opportunity to create or expand corridors of renewable fuel blend stations along interstate or State highways;

(C) consideration of the experience of each applicant with previous, similar projects;

(D) consideration of population, number of flexible-fuel vehicles, number of retail fuel outlets, and saturation of flexible-fuel vehicles; and

(E) priority consideration to applications that—

(i) are most likely to maximize displacement of petroleum consumption, measured as a total quantity and a percentage;

(ii) are best able to incorporate existing infrastructure while maximizing, to the extent practicable, the use of renewable fuel blends; and

(iii) demonstrate the greatest commitment on the part of the applicant to ensure funding for the proposed project and the greatest likelihood that the project will be maintained or expanded after Federal assistance under this subsection is completed.

(3) **LIMITATIONS.**—Assistance provided under this subsection shall not exceed—

(A) 33 percent of the estimated cost of the installation, replacement, or conversion of motor fuel storage and dispensing infrastructure; or

(B) \$180,000 for a combination of equipment at any one retail outlet location.

(4) **OPERATION OF RENEWABLE FUEL BLEND STATIONS.**—The Secretary shall establish rules that set forth requirements for grant recipients under this section that include providing to the public the renewable fuel blends, establishing a marketing plan that informs consumers of the price and availability of the renewable fuel blends, clearly labeling the dispensers and related equipment, and providing periodic reports on the status of the renewable fuel blend sales, the type and amount of the renewable fuel blends dispensed at each location, and the average price of such fuel.

(5) **NOTIFICATION REQUIREMENTS.**—Not later than the date on which each renewable fuel blend station begins to offer renewable fuel blends to the public, the grant recipient that used grant funds to construct or upgrade such station shall notify the Secretary of such opening. The Secretary shall add each

new renewable fuel blend station to the renewable fuel blend station locator on its Website when it receives notification under this subsection.

(6) **DOUBLE COUNTING.**—No person that receives a credit under section 30C of the Internal Revenue Code of 1986 may receive assistance under this section.

(7) **RESERVATION OF FUNDS.**—The Secretary shall reserve funds appropriated for the renewable fuel blends infrastructure development grant program for technical and marketing assistance described in subsection (c).

(C) **RETAIL TECHNICAL AND MARKETING ASSISTANCE.**—The Secretary shall enter into contracts with entities with demonstrated experience in assisting retail fueling stations in installing refueling systems and marketing renewable fuel blends nationally, for the provision of technical and marketing assistance to recipients of grants under this section. Such assistance shall include—

(1) technical advice for compliance with applicable Federal and State environmental requirements;

(2) help in identifying supply sources and securing long-term contracts; and

(3) provision of public outreach, education, and labeling materials.

(D) **REFUELING INFRASTRUCTURE CORRIDORS.**—

(1) **IN GENERAL.**—The Secretary shall establish a competitive grant pilot program (referred to in this subsection as the “pilot program”), to be administered through the Vehicle Technology Deployment Program of the Department, to provide not more than 10 geographically-dispersed project grants to State governments, Indian tribal governments, local governments, metropolitan transportation authorities, or partnerships of those entities to carry out 1 or more projects for the purposes described in paragraph (2).

(2) **GRANT PURPOSES.**—A grant under this subsection shall be used for the establishment of refueling infrastructure corridors, as designated by the Secretary, for renewable fuel blends, including—

(A) installation of infrastructure and equipment necessary to ensure adequate distribution of renewable fuel blends within the corridor;

(B) installation of infrastructure and equipment necessary to directly support vehicles powered by renewable fuel blends; and

(C) operation and maintenance of infrastructure and equipment installed as part of a project funded by the grant.

(3) **APPLICATIONS.**—

(A) **REQUIREMENTS.**—

(i) **IN GENERAL.**—Subject to clause (ii), not later than 90 days after the date of enactment of this Act, the Secretary shall issue requirements for use in applying for grants under the pilot program.

(ii) **MINIMUM REQUIREMENTS.**—At a minimum, the Secretary shall require that an application for a grant under this subsection—

(I) be submitted by—

(aa) the head of a State, tribal, or local government or a metropolitan transportation authority, or any combination of those entities; and

(bb) a registered participant in the Vehicle Technology Deployment Program of the Department; and

(II) include—

(aa) a description of the project proposed in the application, including the ways in which the project meets the requirements of this subsection;

(bb) an estimate of the degree of use of the project, including the estimated size of fleet of vehicles operated with renewable fuels blend available within the geographic region

of the corridor, measured as a total quantity and a percentage;

(cc) an estimate of the potential petroleum displaced as a result of the project (measured as a total quantity and a percentage), and a plan to collect and disseminate petroleum displacement and other relevant data relating to the project to be funded under the grant, over the expected life of the project;

(dd) a description of the means by which the project will be sustainable without Federal assistance after the completion of the term of the grant;

(ee) a complete description of the costs of the project, including acquisition, construction, operation, and maintenance costs over the expected life of the project; and

(ff) a description of which costs of the project will be supported by Federal assistance under this subsection.

(B) **PARTNERS.**—An applicant under subparagraph (A) may carry out a project under the pilot program in partnership with public and private entities.

(4) **SELECTION CRITERIA.**—In evaluating applications under the pilot program, the Secretary shall—

(A) consider the experience of each applicant with previous, similar projects; and

(B) give priority consideration to applications that—

(i) are most likely to maximize displacement of petroleum consumption, measured as a total quantity and a percentage;

(ii) are best able to incorporate existing infrastructure while maximizing, to the extent practicable, the use of advanced biofuels;

(iii) demonstrate the greatest commitment on the part of the applicant to ensure funding for the proposed project and the greatest likelihood that the project will be maintained or expanded after Federal assistance under this subsection is completed;

(iv) represent a partnership of public and private entities; and

(v) exceed the minimum requirements of paragraph (3)(A)(ii).

(5) **PILOT PROJECT REQUIREMENTS.**—

(A) **MAXIMUM AMOUNT.**—The Secretary shall provide not more than \$20,000,000 in Federal assistance under the pilot program to any applicant.

(B) **COST SHARING.**—The non-Federal share of the cost of any activity relating to renewable fuel blend infrastructure development carried out using funds from a grant under this subsection shall be not less than 20 percent.

(C) **MAXIMUM PERIOD OF GRANTS.**—The Secretary shall not provide funds to any applicant under the pilot program for more than 2 years.

(D) **DEPLOYMENT AND DISTRIBUTION.**—The Secretary shall seek, to the maximum extent practicable, to ensure a broad geographic distribution of project sites funded by grants under this subsection.

(E) **TRANSFER OF INFORMATION AND KNOWLEDGE.**—The Secretary shall establish mechanisms to ensure that the information and knowledge gained by participants in the pilot program are transferred among the pilot program participants and to other interested parties, including other applicants that submitted applications.

(6) **SCHEDULE.**—

(A) **INITIAL GRANTS.**—

(i) **IN GENERAL.**—Not later than 90 days after the date of enactment of this Act, the Secretary shall publish in the Federal Register, Commerce Business Daily, and such other publications as the Secretary considers to be appropriate, a notice and request for applications to carry out projects under the pilot program.

(ii) **DEADLINE.**—An application described in clause (i) shall be submitted to the Secretary

by not later than 180 days after the date of publication of the notice under that clause.

(iii) **INITIAL SELECTION.**—Not later than 90 days after the date by which applications for grants are due under clause (ii), the Secretary shall select by competitive, peer-reviewed proposal up to 5 applications for projects to be awarded a grant under the pilot program.

(B) **ADDITIONAL GRANTS.**—

(i) **IN GENERAL.**—Not later than 2 years after the date of enactment of this Act, the Secretary shall publish in the Federal Register, Commerce Business Daily, and such other publications as the Secretary considers to be appropriate, a notice and request for additional applications to carry out projects under the pilot program that incorporate the information and knowledge obtained through the implementation of the first round of projects authorized under the pilot program.

(ii) **DEADLINE.**—An application described in clause (i) shall be submitted to the Secretary by not later than 180 days after the date of publication of the notice under that clause.

(iii) **INITIAL SELECTION.**—Not later than 90 days after the date by which applications for grants are due under clause (ii), the Secretary shall select by competitive, peer-reviewed proposal such additional applications for projects to be awarded a grant under the pilot program as the Secretary determines to be appropriate.

(7) **REPORTS TO CONGRESS.**—

(A) **INITIAL REPORT.**—Not later than 60 days after the date on which grants are awarded under this subsection, the Secretary shall submit to Congress a report containing—

(i) an identification of the grant recipients and a description of the projects to be funded under the pilot program;

(ii) an identification of other applicants that submitted applications for the pilot program but to which funding was not provided; and

(iii) a description of the mechanisms used by the Secretary to ensure that the information and knowledge gained by participants in the pilot program are transferred among the pilot program participants and to other interested parties, including other applicants that submitted applications.

(B) **EVALUATION.**—Not later than 2 years after the date of enactment of this Act, and annually thereafter until the termination of the pilot program, the Secretary shall submit to Congress a report containing an evaluation of the effectiveness of the pilot program, including an assessment of the petroleum displacement and benefits to the environment derived from the projects included in the pilot program.

(e) **RESTRICTION.**—No grant shall be provided under subsection (b) or (c) to a large, vertically integrated oil company.

(f) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary for carrying out this section \$200,000,000 for each of the fiscal years 2008 through 2014.

SEC. 245. STUDY OF THE ADEQUACY OF TRANSPORTATION OF DOMESTICALLY-PRODUCED RENEWABLE FUEL BY RAILROADS AND OTHER MODES OF TRANSPORTATION.

(a) **STUDY.**—

(1) **IN GENERAL.**—The Secretary, in coordination with the Secretary of Transportation, shall jointly conduct a study of the adequacy of transportation of domestically-produced renewable fuels by railroad and other modes of transportation as designated by the Secretaries.

(2) **COMPONENTS.**—In conducting the study under paragraph (1), the Secretaries shall—

(A) consider the adequacy of existing railroad and other transportation and distribution infrastructure, equipment, service and

capacity to move the necessary quantities of domestically-produced renewable fuel within the timeframes;

(B)(i) consider the projected costs of moving the domestically-produced renewable fuel by railroad and other modes transportation; and

(ii) consider the impact of the projected costs on the marketability of the domestically-produced renewable fuel;

(C) identify current and potential impediments to the reliable transportation and distribution of adequate supplies of domestically-produced renewable fuel at reasonable prices, including practices currently utilized by domestic producers, shippers, and receivers of renewable fuels;

(D) consider whether adequate competition exists within and between modes of transportation for the transportation and distribution of domestically-produced renewable fuel and, whether inadequate competition leads to an unfair price for the transportation and distribution of domestically-produced renewable fuel or unacceptable service for transportation of domestically-produced renewable fuel;

(E) consider whether Federal agencies have adequate legal authority to address instances of inadequate competition when inadequate competition is found to prevent domestic producers for renewable fuels from obtaining a fair and reasonable transportation price or acceptable service for the transportation and distribution of domestically-produced renewable fuels;

(F) consider whether Federal agencies have adequate legal authority to address railroad and transportation service problems that may be resulting in inadequate supplies of domestically-produced renewable fuel in any area of the United States;

(G) consider what transportation infrastructure capital expenditures may be necessary to ensure the reliable transportation of adequate supplies of domestically-produced renewable fuel at reasonable prices within the United States and which public and private entities should be responsible for making such expenditures; and

(H) provide recommendations on ways to facilitate the reliable transportation of adequate supplies of domestically-produced renewable fuel at reasonable prices.

(b) **REPORT.**—Not later than 180 days after the date of enactment of this Act, the Secretaries shall jointly submit to the Committee on Commerce, Science and Transportation, the Committee on Energy and Natural Resources, and the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure and the Committee on Energy and Commerce of the House of Representatives a report that describes the results of the study conducted under subsection (a).

SEC. 246. FEDERAL FLEET FUELING CENTERS.

(a) **IN GENERAL.**—Not later than January 1, 2010, the head of each Federal agency shall install at least 1 renewable fuel pump at each Federal fleet fueling center in the United States under the jurisdiction of the head of the Federal agency.

(b) **REPORT.**—Not later than October 31 of the first calendar year beginning after the date of the enactment of this Act, and each October 31 thereafter, the President shall submit to Congress a report that describes the progress toward complying with subsection (a), including identifying—

(1) the number of Federal fleet fueling centers that contain at least 1 renewable fuel pump; and

(2) the number of Federal fleet fueling centers that do not contain any renewable fuel pumps.

(c) **DEPARTMENT OF DEFENSE FACILITY.**—This section shall not apply to a Department

of Defense fueling center with a fuel turnover rate of less than 100,000 gallons of fuel per year.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 247. STANDARD SPECIFICATIONS FOR BIO-DIESEL.

Section 211 of the Clean Air Act (42 U.S.C. 7545) is amended by redesignating subsection (s) as subsection (t), redesignating subsection (r) (relating to conversion assistance for cellulosic biomass, waste-derived ethanol, approved renewable fuels) as subsection (s) and by adding the following new subsection at the end thereof:

“(u) **STANDARD SPECIFICATIONS FOR BIO-DIESEL.**—(1) Unless the American Society for Testing and Materials has adopted a standard for diesel fuel containing 20 percent biodiesel (commonly known as ‘B20’) within 1 year after the date of enactment of this subsection, the Administrator shall initiate a rulemaking to establish a uniform per gallon fuel standard for such fuel and designate an identification number so that vehicle manufacturers are able to design engines to use fuel meeting such standard.

“(2) Unless the American Society for Testing and Materials has adopted a standard for diesel fuel containing 5 percent biodiesel (commonly known as ‘B5’) within 1 year after the date of enactment of this subsection, the Administrator shall initiate a rulemaking to establish a uniform per gallon fuel standard for such fuel and designate an identification so that vehicle manufacturers are able to design engines to use fuel meeting such standard.

“(3) Whenever the Administrator is required to initiate a rulemaking under paragraph (1) or (2), the Administrator shall promulgate a final rule within 18 months after the date of the enactment of this subsection.

“(4) Not later than 180 days after the enactment of this subsection, the Administrator shall establish an annual inspection and enforcement program to ensure that diesel fuel containing biodiesel sold or distributed in interstate commerce meets the standards established under regulations under this section, including testing and certification for compliance with applicable standards of the American Society for Testing and Materials. There are authorized to be appropriated to carry out the inspection and enforcement program under this paragraph \$3,000,000 for each of fiscal years 2008 through 2010.

“(5) For purposes of this subsection, the term ‘biodiesel’ has the meaning provided by section 312(f) of Energy Policy Act of 1992 (42 U.S.C. 13220(f)).”

SEC. 248. BIOFUELS DISTRIBUTION AND ADVANCED BIOFUELS INFRASTRUCTURE.

(a) **IN GENERAL.**—The Secretary, in coordination with the Secretary of Transportation and in consultation with the Administrator of the Environmental Protection Agency, shall carry out a program of research, development, and demonstration relating to existing transportation fuel distribution infrastructure and new alternative distribution infrastructure.

(b) **FOCUS.**—The program described in subsection (a) shall focus on the physical and chemical properties of biofuels and efforts to prevent or mitigate against adverse impacts of those properties in the areas of—

(1) corrosion of metal, plastic, rubber, cork, fiberglass, glues, or any other material used in pipes and storage tanks;

(2) dissolving of storage tank sediments;

(3) clogging of filters;

(4) contamination from water or other adulterants or pollutants;

(5) poor flow properties related to low temperatures;

(6) oxidative and thermal instability in long-term storage and uses;

(7) microbial contamination;

(8) problems associated with electrical conductivity; and

(9) such other areas as the Secretary considers appropriate.

Subtitle D—Environmental Safeguards

SEC. 251. WAIVER FOR FUEL OR FUEL ADDITIVES.

Section 211(f)(4) of the Clean Air Act (42 U.S.C. 7545(f)) is amended to read as follows:

“(4) The Administrator, upon application of any manufacturer of any fuel or fuel additive, may waive the prohibitions established under paragraph (1) or (3) of this subsection or the limitation specified in paragraph (2) of this subsection, if he determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, and the emission products of such fuel or fuel additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the useful life of the motor vehicle, motor vehicle engine, nonroad engine or nonroad vehicle in which such device or system is used) to achieve compliance by the vehicle or engine with the emission standards with respect to which it has been certified pursuant to sections 206 and 213(a). The Administrator shall take final action to grant or deny an application submitted under this paragraph, after public notice and comment, within 270 days of the receipt of such an application.”

TITLE III—ENERGY SAVINGS THROUGH IMPROVED STANDARDS FOR APPLIANCE AND LIGHTING

Subtitle A—Appliance Energy Efficiency

SEC. 301. EXTERNAL POWER SUPPLY EFFICIENCY STANDARDS.

(a) **DEFINITIONS.**—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) is amended—

(1) in paragraph (36)—

(A) by striking “(36) The” and inserting the following:

“(36) **EXTERNAL POWER SUPPLY.**—

“(A) **IN GENERAL.**—The” and

(B) by adding at the end the following:

“(B) **ACTIVE MODE.**—The term ‘active mode’ means the mode of operation when an external power supply is connected to the main electricity supply and the output is connected to a load.

“(C) **CLASS A EXTERNAL POWER SUPPLY.**—

“(i) **IN GENERAL.**—The term ‘class A external power supply’ means a device that—

“(I) is designed to convert line voltage AC input into lower voltage AC or DC output;

“(II) is able to convert to only 1 AC or DC output voltage at a time;

“(III) is sold with, or intended to be used with, a separate end-use product that constitutes the primary load;

“(IV) is contained in a separate physical enclosure from the end-use product;

“(V) is connected to the end-use product via a removable or hard-wired male/female electrical connection, cable, cord, or other wiring; and

“(VI) has nameplate output power that is less than or equal to 250 watts.

“(ii) **EXCLUSIONS.**—The term ‘class A external power supply’ does not include any device that—

“(I) requires Federal Food and Drug Administration listing and approval as a medical device in accordance with section 513 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c); or

“(II) powers the charger of a detachable battery pack or charges the battery of a product that is fully or primarily motor operated.

“(D) NO-LOAD MODE.—The term ‘no-load mode’ means the mode of operation when an external power supply is connected to the main electricity supply and the output is not connected to a load.”; and

(2) by adding at the end the following:
 “(52) DETACHABLE BATTERY.—The term ‘detachable battery’ means a battery that is—
 “(A) contained in a separate enclosure from the product; and

“(B) intended to be removed or disconnected from the product for recharging.”.

(b) TEST PROCEDURES.—Section 323(b) of the Energy Policy and Conservation Act (42

U.S.C. 6293(b)) is amended by adding at the end the following:

“(17) CLASS A EXTERNAL POWER SUPPLIES.—Test procedures for class A external power supplies shall be based on the ‘Test Method for Calculating the Energy Efficiency of Single-Voltage External AC-DC and AC-AC Power Supplies’ published by the Environmental Protection Agency on August 11, 2004, except that the test voltage specified in section 4(d) of that test method shall be only 115 volts, 60 Hz.”.

(c) EFFICIENCY STANDARDS FOR CLASS A EXTERNAL POWER SUPPLIES.—Section 325(u) of

the Energy Policy and Conservation Act (42 U.S.C. 6295(u)) is amended by adding at the end the following:

“(6) EFFICIENCY STANDARDS FOR CLASS A EXTERNAL POWER SUPPLIES.—

“(A) IN GENERAL.—Subject to subparagraphs (B) through (D), a class A external power supply manufactured on or after the later of July 1, 2008, or the date of enactment of this paragraph shall meet the following standards:

“Active Mode	
“Nameplate Output	Required Efficiency (decimal equivalent of a percentage)
Less than 1 watt	0.5 times the Nameplate Output
From 1 watt to not more than 51 watts	The sum of 0.09 times the Natural Logarithm of the Nameplate Output and 0.5
Greater than 51 watts	0.85
“No-Load Mode	
“Nameplate Output	Maximum Consumption
Not more than 250 watts	0.5 watts

“(B) NONCOVERED SUPPLIES.—A class A external power supply shall not be subject to subparagraph (A) if the class A external power supply is—

“(i) manufactured during the period beginning on July 1, 2008, and ending on June 30, 2015; and

“(ii) made available by the manufacturer as a service part or a spare part for an end-use product—

“(I) that constitutes the primary load; and

“(II) was manufactured before July 1, 2008.

“(C) MARKING.—Any class A external power supply manufactured on or after the later of July 1, 2008 or the date of enactment of this paragraph shall be clearly and permanently marked in accordance with the External Power Supply International Efficiency Marking Protocol, as referenced in the ‘Energy Star Program Requirements for Single Voltage External AC-DC and AC-AC Power Supplies, version 1.1’ published by the Environmental Protection Agency.

“(D) AMENDMENT OF STANDARDS.—

“(i) FINAL RULE BY JULY 1, 2011.—

“(I) IN GENERAL.—Not later than July 1, 2011, the Secretary shall publish a final rule to determine whether the standards established under subparagraph (A) should be amended.

“(II) ADMINISTRATION.—The final rule shall—

“(aa) contain any amended standards; and

“(bb) apply to products manufactured on or after July 1, 2013.

“(ii) FINAL RULE BY JULY 1, 2015.—

“(I) IN GENERAL.—Not later than July 1, 2015 the Secretary shall publish a final rule to determine whether the standards then in effect should be amended.

“(II) ADMINISTRATION.—The final rule shall—

“(aa) contain any amended standards; and

“(bb) apply to products manufactured on or after July 1, 2017.

“(7) END-USE PRODUCTS.—An energy conservation standard for external power supplies shall not constitute an energy conservation standard for the separate end-use product to which the external power supplies is connected.”.

SEC. 302. UPDATING APPLIANCE TEST PROCEDURES.

(a) CONSUMER APPLIANCES.—Section 323(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6293(b)(1)) is amended by striking “(1)” and all that follows through the end of the paragraph and inserting the following:

“(1) TEST PROCEDURES.—

“(A) AMENDMENT.—At least once every 7 years, the Secretary shall review test procedures for all covered products and—

“(i) amend test procedures with respect to any covered product, if the Secretary determines that amended test procedures would more accurately or fully comply with the requirements of paragraph (3); or

“(ii) publish notice in the Federal Register of any determination not to amend a test procedure.”.

(b) INDUSTRIAL EQUIPMENT.—Section 343(a) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)) is amended by striking “(a)” and all that follows through the end of paragraph (1) and inserting the following:

“(a) PRESCRIPTION BY SECRETARY; REQUIREMENTS.—

“(1) TEST PROCEDURES.—

“(A) AMENDMENT.—At least once every 7 years, the Secretary shall conduct an evaluation of each class of covered equipment and—

“(i) if the Secretary determines that amended test procedures would more accurately or fully comply with the requirements of paragraphs (2) and (3), shall prescribe test procedures for the class in accordance with this section; or

“(ii) shall publish notice in the Federal Register of any determination not to amend a test procedure.”.

SEC. 303. RESIDENTIAL BOILERS.

Section 325(f) of the Energy Policy and Conservation Act (42 U.S.C. 6295(f)) is amended—

(1) in the subsection heading, by inserting “AND BOILERS” after “FURNACES”;

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by inserting after paragraph (2) the following:

“(3) BOILERS.—

“(A) IN GENERAL.—Subject to subparagraphs (B) and (C), boilers manufactured on or after September 1, 2012, shall meet the following requirements:

Boiler Type	Minimum Annual Fuel Utilization Efficiency	Design Requirements
Gas Hot Water	82%	No Constant Burning Pilot, Automatic Means for Adjusting Water Temperature
Gas Steam	80%	No Constant Burning Pilot
Oil Hot Water	84%	Automatic Means for Adjusting Temperature
Oil Steam	82%	None
Electric Hot Water	None	Automatic Means for Adjusting Temperature
Electric Steam	None	None

“(B) AUTOMATIC MEANS FOR ADJUSTING WATER TEMPERATURE.—

“(i) IN GENERAL.—The manufacturer shall equip each gas, oil, and electric hot water

boiler (other than a boiler equipped with a tankless domestic water heating coil) with

automatic means for adjusting the temperature of the water supplied by the boiler to ensure that an incremental change in inferred heat load produces a corresponding incremental change in the temperature of water supplied.

“(ii) SINGLE INPUT RATE.—For a boiler that fires at 1 input rate, the requirements of this subparagraph may be satisfied by providing an automatic means that allows the burner or heating element to fire only when the means has determined that the inferred heat load cannot be met by the residual heat of the water in the system.

“(iii) NO INFERRED HEAT LOAD.—When there is no inferred heat load with respect to a hot water boiler, the automatic means described in clause (i) and (ii) shall limit the temperature of the water in the boiler to not more than 140 degrees Fahrenheit.

“(iv) OPERATION.—A boiler described in clause (i) or (ii) shall be operable only when the automatic means described in clauses (i), (ii), and (iii) is installed.

“(C) EXCEPTION.—A boiler that is manufactured to operate without any need for electricity or any electric connection, electric gauges, electric pumps, electric wires, or electric devices shall not be required to meet the requirements of this paragraph.”

SEC. 304. FURNACE FAN STANDARD PROCESS.

Paragraph (4)(D) of section 325(f) of the Energy Policy and Conservation Act (42 U.S.C. 6295(f)) (as redesignated by section 303(4)) is amended by striking “the Secretary may” and inserting “not later than December 31, 2013, the Secretary shall”.

SEC. 305. IMPROVING SCHEDULE FOR STANDARDS UPDATING AND CLARIFYING STATE AUTHORITY.

(a) CONSUMER APPLIANCES.—Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) is amended by striking subsection (m) and inserting the following:

“(m) AMENDMENT OF STANDARDS.—

“(1) IN GENERAL.—Not later than 6 years after issuance of any final rule establishing or amending a standard, as required for a product under this part, the Secretary shall publish—

“(A) a notice of the determination of the Secretary that standards for the product do not need to be amended, based on the criteria established under subsection (n)(2); or

“(B) a notice of proposed rulemaking including new proposed standards based on the criteria established under subsection (o) and the procedures established under subsection (p).

“(2) NOTICE.—If the Secretary publishes a notice under paragraph (1), the Secretary shall—

“(A) publish a notice stating that the analysis of the Department is publicly available; and

“(B) provide an opportunity for written comment.

“(3) AMENDMENT OF STANDARD; NEW DETERMINATION.—

“(A) AMENDMENT OF STANDARD.—Not later than 2 years after a notice is issued under paragraph (1)(B), the Secretary shall publish a final rule amending the standard for the product.

“(B) NEW DETERMINATION.—Not later than 3 years after a determination under paragraph (1)(A), the Secretary shall make a new determination and publication under subparagraph (A) or (B) of paragraph (1).

“(4) APPLICATION TO PRODUCTS.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), an amendment prescribed under this subsection shall apply to—

“(i) with respect to refrigerators, refrigerator-freezers, freezers, room air conditioners, dishwashers, clothes washers, clothes dryers, fluorescent lamp ballasts,

and kitchen ranges and ovens, such a product that is manufactured after the date that is 3 years after publication of the final rule establishing an applicable standard; and

“(ii) with respect to central air conditioners, heat pumps, water heaters, pool heaters, direct heating equipment, and furnaces, such a product that is manufactured after the date that is 5 years after publication of the final rule establishing an applicable standard.

“(B) OTHER NEW STANDARDS.—A manufacturer shall not be required to apply new standards to a product with respect to which other new standards have been required during the prior 6-year period.

“(5) REPORTS.—The Secretary shall promptly submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate—

“(A) a progress report every 180 days on compliance with this section, including a specific plan to remedy any failures to comply with deadlines for action established under this section; and

“(B) all required reports to the Court or to any party to the Consent Decree in State of New York v. Bodman, Consolidated Civil Actions No.05 Civ. 7807 and No.05 Civ. 7808.”

(b) INDUSTRIAL EQUIPMENT.—Section 342(a)(6) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)(6)) is amended—

(1) by redesignating subparagraph (C) as subparagraph (D); and

(2) by striking “(6)(A)(i)” and all that follows through the end of subparagraph (B) and inserting the following:

“(6) AMENDED ENERGY EFFICIENCY STANDARDS.—

“(A) IN GENERAL.—

“(i) ANALYSIS OF POTENTIAL ENERGY SAVINGS.—If ASHRAE/IES Standard 90.1 is amended with respect to any small commercial package air conditioning and heating equipment, large commercial package air conditioning and heating equipment, very large commercial package air conditioning and heating equipment, packaged terminal air conditioners, packaged terminal heat pumps, warm-air furnaces, packaged boilers, storage water heaters, instantaneous water heaters, or unfired hot water storage tanks, not later than 180 days after the amendment of the standard, the Secretary shall publish in the Federal Register for public comment an analysis of the energy savings potential of amended energy efficiency standards.

“(ii) AMENDED UNIFORM NATIONAL STANDARD FOR PRODUCTS.—

“(I) IN GENERAL.—Except as provided in subclause (II), not later than 18 months after the date of publication of the amendment to the ASHRAE/IES Standard 90.1 for a product described in clause (i), the Secretary shall establish an amended uniform national standard for the product at the minimum level specified in the amended ASHRAE/IES Standard 90.1.

“(II) MORE STRINGENT STANDARD.—Subclause (I) shall not apply if the Secretary determines, by rule published in the Federal Register, and supported by clear and convincing evidence, that adoption of a uniform national standard more stringent than the amended ASHRAE/IES Standard 90.1 for the product would result in significant additional conservation of energy and is technologically feasible and economically justified.

“(B) RULE.—If the Secretary makes a determination described in clause (ii)(II) for a product described in clause (i), not later than 30 months after the date of publication of the amendment to the ASHRAE/IES Standard 90.1 for the product, the Secretary shall issue the rule establishing the amended standard.

“(C) AMENDMENT OF STANDARD.—

“(i) IN GENERAL.—Not later than 6 years after issuance of any final rule establishing or amending a standard, as required for a product under this part, the Secretary shall publish—

“(I) a notice of the determination of the Secretary that standards for the product do not need to be amended, based on the criteria established under subparagraph (A); or

“(II) a notice of proposed rulemaking including new proposed standards based on the criteria and procedures established under subparagraph (B).

“(ii) NOTICE.—If the Secretary publishes a notice under clause (i), the Secretary shall—

“(I) publish a notice stating that the analysis of the Department is publicly available; and

“(II) provide an opportunity for written comment.

“(iii) AMENDMENT OF STANDARD; NEW DETERMINATION.—

“(I) AMENDMENT OF STANDARD.—Not later than 2 years after a notice is issued under clause (i)(II), the Secretary shall publish a final rule amending the standard for the product.

“(II) NEW DETERMINATION.—Not later than 3 years after a determination under clause (i)(I), the Secretary shall make a new determination and publication under subclause (I) or (II) of clause (i).

“(iv) APPLICATION TO PRODUCTS.—An amendment prescribed under this subsection shall apply to products manufactured after a date that is the later of—

“(I) the date that is 3 years after publication of the final rule establishing a new standard; or

“(II) the date that is 6 years after the effective date of the current standard for a covered product.

“(v) REPORTS.—The Secretary shall promptly submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a progress report every 180 days on compliance with this subparagraph, including a specific plan to remedy any failures to comply with deadlines for action established under this subparagraph.”

SEC. 306. REGIONAL STANDARDS FOR FURNACES, CENTRAL AIR CONDITIONERS, AND HEAT PUMPS.

(a) IN GENERAL.—Section 325(o) of the Energy Policy and Conservation Act (42 U.S.C. 6295(o)) is amended by adding at the end the following:

“(6) REGIONAL STANDARDS FOR FURNACES, CENTRAL AIR CONDITIONERS, AND HEAT PUMPS.—

“(A) IN GENERAL.—In any rulemaking to establish a new or amended standard, the Secretary may consider the establishment of separate standards by geographic region for furnaces (except boilers), central air conditioners, and heat pumps.

“(B) NATIONAL AND REGIONAL STANDARDS.—

“(i) NATIONAL STANDARD.—If the Secretary establishes a regional standard for a product, the Secretary shall establish a base national standard for the product.

“(ii) REGIONAL STANDARDS.—If the Secretary establishes a regional standard for a product, the Secretary may establish more restrictive standards for the product by geographic region as follows:

“(I) For furnaces, the Secretary may establish 1 additional standard that is applicable in a geographic region defined by the Secretary.

“(II) For any cooling product, the Secretary may establish 1 or 2 additional standards that are applicable in 1 or 2 geographic regions as may be defined by the Secretary.

“(C) BOUNDARIES OF GEOGRAPHIC REGIONS.—

“(i) IN GENERAL.—Subject to clause (ii), the boundaries of additional geographic regions established by the Secretary under this paragraph shall include only contiguous States.

“(ii) ALASKA AND HAWAII.—The States of Alaska and Hawaii may be included under this paragraph in a geographic region that the States are not contiguous to.

“(iii) INDIVIDUAL STATES.—Individual States shall be placed only into a single region under this paragraph.

“(D) PREREQUISITES.—In establishing additional regional standards under this paragraph, the Secretary shall—

“(i) establish additional regional standards only if the Secretary determines that—

“(I) the establishment of additional regional standards will produce significant energy savings in comparison to establishing only a single national standard; and

“(II) the additional regional standards are economically justified under this paragraph; and

“(ii) consider the impact of the additional regional standards on consumers, manufacturers, and other market participants, including product distributors, dealers, contractors, and installers.

“(E) APPLICATION; EFFECTIVE DATE.—

“(i) BASE NATIONAL STANDARD.—Any base national standard established for a product under this paragraph shall—

“(I) be the minimum standard for the product; and

“(II) apply to all products manufactured or imported into the United States on and after the effective date for the standard.

“(ii) REGIONAL STANDARDS.—Any additional and more restrictive regional standard established for a product under this paragraph shall apply to any such product installed on or after the effective date of the standard in States in which the Secretary has designated the standard to apply.

“(F) CONTINUATION OF REGIONAL STANDARDS.—

“(i) IN GENERAL.—In any subsequent rulemaking for any product for which a regional standard has been previously established, the Secretary shall determine whether to continue the establishment of separate regional standards for the product.

“(ii) REGIONAL STANDARD NO LONGER APPROPRIATE.—Except as provided in clause (iii), if the Secretary determines that regional standards are no longer appropriate for a product, beginning on the effective date of the amended standard for the product—

“(I) there shall be 1 base national standard for the product with Federal enforcement; and

“(II) State authority for enforcing a regional standard for the product shall terminate.

“(iii) REGIONAL STANDARD APPROPRIATE BUT STANDARD OR REGION CHANGED.—

“(I) STATE NO LONGER CONTAINED IN REGION.—Subject to subclause (III), if a State is no longer contained in a region in which a regional standard that is more stringent than the base national standard applies, the authority of the State to enforce the regional standard shall terminate.

“(II) STANDARD OR REGION REVISED SO THAT EXISTING REGIONAL STANDARD EQUALS BASE NATIONAL STANDARD.—If the Secretary revises a base national standard for a product or the geographic definition of a region so that an existing regional standard for a State is equal to the revised base national standard—

“(aa) the authority of the State to enforce the regional standard shall terminate on the effective date of the revised base national standard; and

“(bb) the State shall be subject to the revised base national standard.

“(III) STANDARD OR REGION REVISED SO THAT EXISTING REGIONAL STANDARD EQUALS BASE NATIONAL STANDARD.—If the Secretary revises a base national standard for a product or the geographic definition of a region so that the standard for a State is lower than the previously approved regional standard, the State may continue to enforce the previously approved standard level.

“(iv) WAIVER OF FEDERAL PREEMPTION.—Nothing in this paragraph diminishes the authority of a State to enforce a State regulation for which a waiver of Federal preemption has been granted under section 327(d).

“(G) ENFORCEMENT.—

“(i) BASE NATIONAL STANDARD.—

“(I) IN GENERAL.—The Secretary shall enforce any base national standard.

“(II) TRADE ASSOCIATION CERTIFICATION PROGRAMS.—In enforcing the base national standard, the Secretary shall use, to the maximum extent practicable, national standard nationally recognized certification programs of trade associations.

“(ii) REGIONAL STANDARDS.—

“(I) ENFORCEMENT PLAN.—Not later than 90 days after the date of the issuance of a final rule that establishes a regional standard, the Secretary shall initiate a rulemaking to develop and implement an effective enforcement plan for regional standards for the products that are covered by the final rule.

“(II) RESPONSIBLE ENTITIES.—Any rules regarding enforcement of a regional standard shall clearly specify which entities are legally responsible for compliance with the standards and for making any required information or labeling disclosures.

“(III) FINAL RULE.—Not later than 15 months after the date of the issuance of a final rule that establishes a regional standard for a product, the Secretary shall promulgate a final rule covering enforcement of regional standards for the product.

“(IV) INCORPORATION BY STATES AND LOCALITIES.—A State or locality may incorporate any Federal regional standard into State or local building codes or State appliance standards.

“(V) STATE ENFORCEMENT.—A State agency may seek enforcement of a Federal regional standard in a Federal court of competent jurisdiction.

“(H) INFORMATION DISCLOSURE.—

“(i) IN GENERAL.—Not later than 90 days after the date of the publication of a final rule that establishes a regional standard for a product, the Federal Trade Commission shall undertake a rulemaking to determine the appropriate 1 or more methods for disclosing information so that consumers, distributors, contractors, and installers can easily determine whether a specific piece of equipment that is installed in a specific building is in conformance with the regional standard that applies to the building.

“(ii) METHODS.—A method of disclosing information under clause (i) may include—

“(I) modifications to the Energy Guide label; or

“(II) other methods that make it easy for consumers and installers to use and understand at the point of installation.

“(iii) COMPLETION OF RULEMAKING.—The rulemaking shall be completed not later 15 months after the date of the publication of a final rule that establishes a regional standard for a product.”

(b) PROHIBITED ACTS.—Section 332(a) of the Energy Policy and Conservation Act (42 U.S.C. 6302(a)) is amended—

(1) in paragraph (4), by striking “or” after the semicolon at the end;

(2) in paragraph (5), by striking “part.” and inserting “part, except to the extent that the new covered product is covered by a regional standard that is more stringent than the base national standard; or”; and

(3) by adding at the end the following:

“(6) for any manufacturer or private labeler to knowingly sell a product to a distributor, contractor, or dealer with knowledge that the entity routinely violates any regional standard applicable to the product.”

(c) CONSIDERATION OF PRICES AND OPERATING PATTERNS.—Section 342(a)(6)(B) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)(6)(B)) is amended by adding at the end the following:

“(iii) CONSIDERATION OF PRICES AND OPERATING PATTERNS.—If the Secretary is considering revised standards for air-cooled 3-phase central air conditioners and central air conditioning heat pumps with less 65,000 Btu per hour (cooling capacity), the Secretary shall use commercial energy prices and operating patterns in all analyses conducted by the Secretary.”

SEC. 307. PROCEDURE FOR PRESCRIBING NEW OR AMENDED STANDARDS.

Section 325(p) of the Energy Policy and Conservation Act (42 U.S.C. 6295(p)) is amended—

(1) by striking paragraph (1); and

(2) by redesignating paragraphs (2) through (4) as paragraphs (1) through (3), respectively.

SEC. 308. EXPEDITED RULEMAKINGS.

(a) PROCEDURE FOR PRESCRIBING NEW OR AMENDED STANDARDS.—Section 325(p) of the Energy Policy and Conservation Act (42 U.S.C. 6295(p)) (as amended by section 307) is amended by adding at the end the following:

“(4) DIRECT FINAL RULES.—

“(A) IN GENERAL.—On receipt of a statement that is submitted jointly by interested persons that are fairly representative of relevant points of view (including representatives of manufacturers of covered products, States, and efficiency advocates), as determined by the Secretary, and contains recommendations with respect to an energy or water conservation standard—

“(i) if the Secretary determines that the recommended standard contained in the statement is in accordance with subsection (o) or section 342(a)(6)(B), as applicable, the Secretary may issue a final rule that establishes an energy or water conservation standard and is published simultaneously with a notice of proposed rulemaking that proposes a new or amended energy or water conservation standard that is identical to the standard established in the final rule to establish the recommended standard (referred to in this paragraph as a ‘direct final rule’); or

“(ii) if the Secretary determines that a direct final rule cannot be issued based on the statement, the Secretary shall publish a notice of the determination, together with an explanation of the reasons for the determination.

“(B) PUBLIC COMMENT.—The Secretary shall solicit public comment for a period of at least 110 days with respect to each direct final rule issued by the Secretary under subparagraph (A)(i).

“(C) WITHDRAWAL OF DIRECT FINAL RULES.—

“(i) IN GENERAL.—Not later than 120 days after the date on which a direct final rule issued under subparagraph (A)(i) is published in the Federal Register, the Secretary shall withdraw the direct final rule if—

“(I) the Secretary receives 1 or more adverse public comments relating to the direct final rule under subparagraph (B)(i) or any alternative joint recommendation; and

“(II) based on the rulemaking record relating to the direct final rule, the Secretary determines that such adverse public comments or alternative joint recommendation may provide a reasonable basis for withdrawing the direct final rule under subsection (o),

section 342(a)(6)(B), or any other applicable law.

“(ii) ACTION ON WITHDRAWAL.—On withdrawal of a direct final rule under clause (i), the Secretary shall—

“(I) proceed with the notice of proposed rulemaking published simultaneously with the direct final rule as described in subparagraph (A)(i); and

“(II) publish in the Federal Register the reasons why the direct final rule was withdrawn.

“(iii) TREATMENT OF WITHDRAWN DIRECT FINAL RULES.—A direct final rule that is withdrawn under clause (i) shall not be considered to be a final rule for purposes of subsection (o).

“(D) EFFECT OF PARAGRAPH.—Nothing in this paragraph authorizes the Secretary to issue a direct final rule based solely on receipt of more than 1 statement containing recommended standards relating to the direct final rule.”.

(b) CONFORMING AMENDMENT.—Section 345(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6316(b)(1)) is amended in the first sentence by inserting “section 325(p)(5),” after “The provisions of”.

SEC. 309. BATTERY CHARGERS.

Section 325(u)(1)(E) of the Energy Policy and Conservation Act (42 U.S.C. 6295(u)(1)(E)) is amended—

(1) by striking “(E)(i) Not” and inserting the following:

“(E) EXTERNAL POWER SUPPLIES AND BATTERY CHARGERS.—

“(i) ENERGY CONSERVATION STANDARDS.—“(I) EXTERNAL POWER SUPPLIES.—Not”;

(2) by striking “3 years” and inserting “2 years”;

(3) by striking “battery chargers and” each place it appears; and

(4) by adding at the end the following :

“(II) BATTERY CHARGERS.—Not later than July 1, 2011, the Secretary shall issue a final rule that prescribes energy conservation standards for battery chargers or classes of battery chargers or determine that no energy conservation standard is technically feasible and economically justified.”.

SEC. 310. STANDBY MODE.

Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) is amended—

(1) in subsection (u)—
(A) by striking paragraphs (2), (3), and (4); and

(B) by redesignating paragraph (5) and (6) as paragraphs (2) and (3), respectively;

(2) by redesignating subsection (gg) as subsection (hh);

(3) by inserting after subsection (ff) the following:

“(gg) STANDBY MODE ENERGY USE.—“(I) DEFINITIONS.—

“(A) IN GENERAL.—Unless the Secretary determines otherwise pursuant to subparagraph (B), in this subsection:

“(i) ACTIVE MODE.—The term ‘active mode’ means the condition in which an energy-using product—

“(I) is connected to a main power source;“(II) has been activated; and

“(III) provides 1 or more main functions.

“(ii) OFF MODE.—The term ‘off mode’ means the condition in which an energy-using product—

“(I) is connected to a main power source; and

“(II) is not providing any standby or active mode function.

“(iii) STANDBY MODE.—The term ‘standby mode’ means the condition in which an energy-using product—

“(I) is connected to a main power source; and

“(II) offers 1 or more of the following user-oriented or protective functions:

“(aa) To facilitate the activation or deactivation of other functions (including active mode) by remote switch (including remote control), internal sensor, or timer.

“(bb) Continuous functions, including information or status displays (including clocks) or sensor-based functions.

“(B) AMENDED DEFINITIONS.—The Secretary may, by rule, amend the definitions under subparagraph (A), taking into consideration the most current versions of Standards 62301 and 62087 of the International Electrotechnical Commission.

“(2) TEST PROCEDURES.—

“(A) IN GENERAL.—Test procedures for all covered products shall be amended pursuant to section 323 to include standby mode and off mode energy consumption, taking into consideration the most current versions of Standards 62301 and 62087 of the International Electrotechnical Commission, with such energy consumption integrated into the overall energy efficiency, energy consumption, or other energy descriptor for each covered product, unless the Secretary determines that—

“(i) the current test procedures for a covered product already fully account for and incorporate the standby mode and off mode energy consumption of the covered product; or

“(ii) such an integrated test procedure is technically infeasible for a particular covered product, in which case the Secretary shall prescribe a separate standby mode and off mode energy use test procedure for the covered product, if technically feasible.

“(B) DEADLINES.—The test procedure amendments required by subparagraph (A) shall be prescribed in a final rule no later than the following dates:

“(i) December 31, 2008, for battery chargers and external power supplies.

“(ii) March 31, 2009, for clothes dryers, room air conditioners, and fluorescent lamp ballasts.

“(iii) June 30, 2009, for residential clothes washers.

“(iv) September 30, 2009, for residential furnaces and boilers.

“(v) March 31, 2010, for residential water heaters, direct heating equipment, and pool heaters.

“(vi) March 31, 2011, for residential dishwashers, ranges and ovens, microwave ovens, and dehumidifiers.

“(C) PRIOR PRODUCT STANDARDS.—The test procedure amendments adopted pursuant to subparagraph (B) shall not be used to determine compliance with product standards established prior to the adoption of the amended test procedures.

“(3) INCORPORATION INTO STANDARD.—

“(A) IN GENERAL.—Subject to subparagraph (B), based on the test procedures required under paragraph (2), any final rule establishing or revising a standard for a covered product, adopted after July 1, 2010, shall incorporate standby mode and off mode energy use into a single amended or new standard, pursuant to subsection (o), if feasible.

“(B) SEPARATE STANDARDS.—If not feasible, the Secretary shall prescribe within the final rule a separate standard for standby mode and off mode energy consumption, if justified under subsection (o).”; and

(4) in paragraph (2) of subsection (hh) (as redesignated by paragraph (2)), by striking “(ff)” each place it appears and inserting “(gg)”.

SEC. 311. ENERGY STANDARDS FOR HOME APPLIANCES.

(a) APPLIANCES.—

(1) DEHUMIDIFIERS.—Section 325(cc) of the Energy Policy and Conservation Act (42 U.S.C. 6295(cc)) is amended by striking paragraph (2) and inserting the following:

“(2) DEHUMIDIFIERS MANUFACTURED ON OR AFTER OCTOBER 1, 2012.—Dehumidifiers manufactured on or after October 1, 2012, shall have an Energy Factor that meets or exceeds the following values:

“Product Capacity (pints/day):	Minimum Energy Factor (liters/KWh)
Up to 35.00	1.35
35.01–45.00	1.50
45.01–54.00	1.60
54.01–75.00	1.70
Greater than 75.00	2.5.”.

(2) RESIDENTIAL CLOTHES WASHERS AND RESIDENTIAL DISHWASHERS.—Section 325(g) of the Energy Policy and Conservation Act (42 U.S.C. 6295(g)) is amended by adding at the end the following:

“(9) RESIDENTIAL CLOTHES WASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2011.—

“(A) IN GENERAL.—A top-loading or front-loading standard-size residential clothes washer manufactured on or after January 1, 2011, shall have—

“(i) a Modified Energy Factor of at least 1.26; and

“(ii) a water factor of not more than 9.5.

“(B) AMENDMENT OF STANDARDS.—

“(i) IN GENERAL.—Not later than December 31, 2011, the Secretary shall publish a final rule determining whether to amend the standards in effect for clothes washers manufactured on or after January 1, 2015.

“(ii) AMENDED STANDARDS.—The final rule shall contain any amended standards.

“(10) RESIDENTIAL DISHWASHERS MANUFACTURED ON OR AFTER JANUARY 1, 2010.—

“(A) IN GENERAL.—A dishwasher manufactured on or after January 1, 2010, shall—

“(i) for a standard size dishwasher not exceed 355 kwh/year and 6.5 gallon per cycle; and

“(ii) for a compact size dishwasher not exceed 260 kwh/year and 4.5 gallons per cycle.

“(B) AMENDMENT OF STANDARDS.—

“(i) IN GENERAL.—Not later than January 1, 2015, the Secretary shall publish a final rule determining whether to amend the standards for dishwashers manufactured on or after January 1, 2018.

“(ii) AMENDED STANDARDS.—The final rule shall contain any amended standards.”.

(3) REFRIGERATORS AND FREEZERS.—Section 325(b) of the Energy Policy and Conservation Act (42 U.S.C. 6295(b)) is amended by adding at the end the following:

“(4) REFRIGERATORS AND FREEZERS MANUFACTURED ON OR AFTER JANUARY 1, 2014.—

“(A) IN GENERAL.—Not later than December 31, 2010, the Secretary shall publish a final rule determining whether to amend the standards in effect for refrigerators, refrigerator-freezers, and freezers manufactured on or after January 1, 2014.

“(B) AMENDED STANDARDS.—The final rule shall contain any amended standards.”.

(b) ENERGY STAR.—Section 324A(d)(2) of the Energy Policy and Conservation Act (42 U.S.C. 6294a(d)(2)) is amended by striking “January 1, 2010” and inserting “July 1, 2009”.

SEC. 312. WALK-IN COOLERS AND WALK-IN FREEZERS.

(a) DEFINITIONS.—Section 340 of the Energy Policy and Conservation Act (42 U.S.C. 6311) is amended—

(1) in paragraph (1)—

(A) by redesignating subparagraphs (G) through (K) as subparagraphs (H) through (L), respectively; and

(B) by inserting after subparagraph (F) the following:

“(G) Walk-in coolers and walk-in freezers.”;

(2) by redesignating paragraphs (20) and (21) as paragraphs (21) and (22), respectively; and

(3) by inserting after paragraph (19) the following:

“(20) WALK-IN COOLER; WALK-IN FREEZER.—

“(A) IN GENERAL.—The terms ‘walk-in cooler’ and ‘walk-in freezer’ mean an enclosed storage space refrigerated to temperatures, respectively, above, and at or below 32 degrees Fahrenheit that can be walked into, and has a total chilled storage area of less than 3,000 square feet.

“(B) EXCLUSION.—The terms ‘walk-in cooler’ and ‘walk-in freezer’ do not include products designed and marketed exclusively for medical, scientific, or research purposes.”.

(b) STANDARDS.—Section 342 of the Energy Policy and Conservation Act (42 U.S.C. 6313) is amended by adding at the end the following:

“(f) WALK-IN COOLERS AND WALK-IN FREEZERS.—

“(1) IN GENERAL.—Subject to paragraphs (2) through (5), each walk-in cooler or walk-in freezer manufactured on or after January 1, 2009, shall—

“(A) have automatic door closers that firmly close all walk-in doors that have been closed to within 1 inch of full closure, except that this subparagraph shall not apply to doors wider than 3 feet 9 inches or taller than 7 feet;

“(B) have strip doors, spring hinged doors, or other method of minimizing infiltration when doors are open;

“(C) contain wall, ceiling, and door insulation of at least R-25 for coolers and R-32 for freezers, except that this subparagraph shall not apply to glazed portions of doors nor to structural members;

“(D) contain floor insulation of at least R-28 for freezers;

“(E) for evaporator fan motors of under 1 horsepower and less than 460 volts, use—

“(i) electronically commutated motors (brushless direct current motors); or

“(ii) 3-phase motors;

“(F) for condenser fan motors of under 1 horsepower, use—

“(i) electronically commutated motors;

“(ii) permanent split capacitor-type motors; or

“(iii) 3-phase motors; and

“(G) for all interior lights, use light sources with an efficacy of 40 lumens per watt or more, including ballast losses (if any), except that light sources with an efficacy of 40 lumens per watt or less, including ballast losses (if any), may be used in conjunction with a timer or device that turns off the lights within 15 minutes of when the walk-in cooler or walk-in freezer is not occupied by people.

“(2) ELECTRONICALLY COMMUTATED MOTORS.—

“(A) IN GENERAL.—The requirements of paragraph (1)(E)(i) for electronically commutated motors shall take effect January 1, 2009, unless, prior to that date, the Secretary determines that such motors are only available from 1 manufacturer.

“(B) OTHER TYPES OF MOTORS.—In carrying out paragraph (1)(E)(i) and subparagraph (A), the Secretary may allow other types of motors if the Secretary determines that, on average, those other motors use no more energy in evaporator fan applications than electronically commutated motors.

“(C) MAXIMUM ENERGY CONSUMPTION LEVEL.—The Secretary shall establish the maximum energy consumption level under subparagraph (B) not later than January 1, 2010.

“(3) ADDITIONAL SPECIFICATIONS.—Each walk-in cooler or walk-in freezer with transparent reach-in doors manufactured on or

after January 1, 2009, shall also meet the following specifications:

“(A) Transparent reach-in doors for walk-in freezers and windows in walk-in freezer doors shall be of triple-pane glass with either heat-reflective treated glass or gas fill.

“(B) Transparent reach-in doors for walk-in coolers and windows in walk-in cooler doors shall be—

“(i) double-pane glass with heat-reflective treated glass and gas fill; or

“(ii) triple-pane glass with either heat-reflective treated glass or gas fill.

“(C) If the appliance has an antisweat heater without antisweat heat controls, the appliance shall have a total door rail, glass, and frame heater power draw of not more than 7.1 watts per square foot of door opening (for freezers) and 3.0 watts per square foot of door opening (for coolers).

“(D) If the appliance has an antisweat heater with antisweat heat controls, and the total door rail, glass, and frame heater power draw is more than 7.1 watts per square foot of door opening (for freezers) and 3.0 watts per square foot of door opening (for coolers), the antisweat heat controls shall reduce the energy use of the antisweat heater in a quantity corresponding to the relative humidity in the air outside the door or to the condensation on the inner glass pane.

“(4) PERFORMANCE-BASED STANDARDS.—

“(A) IN GENERAL.—Not later than January 1, 2012, the Secretary shall publish performance-based standards for walk-in coolers and walk-in freezers that achieve the maximum improvement in energy that the Secretary determines is technologically feasible and economically justified.

“(B) APPLICATION.—

“(i) IN GENERAL.—Except as provided in clause (ii), the standards shall apply to products described in subparagraph (A) that are manufactured beginning on the date that is 3 years after the final rule is published.

“(ii) DELAYED EFFECTIVE DATE.—If the Secretary determines, by rule, that a 3-year period is inadequate, the Secretary may establish an effective date for products manufactured beginning on the date that is not more than 5 years after the date of publication of a final rule for the products.

“(5) AMENDMENT OF STANDARDS.—

“(A) IN GENERAL.—Not later than January 1, 2020, the Secretary shall publish a final rule to determine if the standards established under paragraph (4) should be amended.

“(B) APPLICATION.—

“(i) IN GENERAL.—Except as provided in clause (ii), the rule shall provide that the standards shall apply to products manufactured beginning on the date that is 3 years after the final rule is published.

“(ii) DELAYED EFFECTIVE DATE.—If the Secretary determines, by rule, that a 3-year period is inadequate, the Secretary may establish an effective date for products manufactured beginning on the date that is not more than 5 years after the date of publication of a final rule for the products.”.

(c) TEST PROCEDURES.—Section 343(a) of the Energy Policy and Conservation Act (42 U.S.C. 6314(a)) is amended by adding at the end the following:

“(9) WALK-IN COOLERS AND WALK-IN FREEZERS.—

“(A) IN GENERAL.—For the purpose of test procedures for walk-in coolers and walk-in freezers:

“(i) The R value shall be the 1/K factor multiplied by the thickness of the panel.

“(ii) The K factor shall be based on ASTM test procedure C518-2004.

“(iii) For calculating the R value for freezers, the K factor of the foam at 20°F (average foam temperature) shall be used.

“(iv) For calculating the R value for coolers, the K factor of the foam at 55°F (average foam temperature) shall be used.

“(B) TEST PROCEDURE.—

“(i) IN GENERAL.—Not later than January 1, 2010, the Secretary shall establish a test procedure to measure the energy-use of walk-in coolers and walk-in freezers.

“(ii) COMPUTER MODELING.—The test procedure may be based on computer modeling, if the computer model or models have been verified using the results of laboratory tests on a significant sample of walk-in coolers and walk-in freezers.”.

(d) LABELING.—Section 344(e) of the Energy Policy and Conservation Act (42 U.S.C. 6315(e)) is amended by inserting “walk-in coolers and walk-in freezers,” after “commercial clothes washers,” each place it appears.

(e) ADMINISTRATION, PENALTIES, ENFORCEMENT, AND PREEMPTION.—Section 345 of the Energy Policy and Conservation Act (42 U.S.C. 6316) is amended—

(1) by striking “subparagraphs (B), (C), (D), (E), and (F)” each place it appears and inserting “subparagraphs (B) through (G)”;

and

(2) by adding at the end the following:

“(h) WALK-IN COOLERS AND WALK-IN FREEZERS.—

“(1) COVERED TYPES.—

“(A) RELATIONSHIP TO OTHER LAW.—

“(i) IN GENERAL.—Except as otherwise provided in this subsection, section 327 shall apply to walk-in coolers and walk-in freezers for which standards have been established under paragraphs (1), (2), and (3) of section 342(f) to the same extent and in the same manner as the section applies under part A on the date of enactment of this subsection.

“(ii) STATE STANDARDS.—Any State standard prescribed before the date of enactment of this subsection shall not be preempted until the standards established under paragraphs (1) and (2) of section 342(f) take effect.

“(B) ADMINISTRATION.—In applying section 327 to equipment under subparagraph (A), paragraphs (1), (2), and (3) of subsection (a) shall apply.

“(2) FINAL RULE NOT TIMELY.—

“(A) IN GENERAL.—If the Secretary does not issue a final rule for a specific type of walk-in cooler or walk-in freezer within the time frame established under paragraph (4) or (5) of section 342(f), subsections (b) and (c) of section 327 shall no longer apply to the specific type of walk-in cooler or walk-in freezer during the period—

“(i) beginning on the day after the scheduled date for a final rule; and

“(ii) ending on the date on which the Secretary publishes a final rule covering the specific type of walk-in cooler or walk-in freezer.

“(B) STATE STANDARDS.—Any State standard issued before the publication of the final rule shall not be preempted until the standards established in the final rule take effect.

“(3) CALIFORNIA.—Any standard issued in the State of California before January 1, 2011, under title 20 of the California Code of Regulations, that refers to walk-in coolers and walk-in freezers, for which standards have been established under paragraphs (1), (2), and (3) of section 342(f), shall not be preempted until the standards established under section 342(f)(3) take effect.”.

SEC. 313. ELECTRIC MOTOR EFFICIENCY STANDARDS.

(a) DEFINITIONS.—Section 340(13) of the Energy Policy and Conservation Act (42 U.S.C. 6311(13)) is amended—

(1) by redesignating subparagraphs (B) through (H) as subparagraphs (C) through (I), respectively; and

(2) by striking “(13)(A)” and all that follows through the end of subparagraph (A) and inserting the following:

“(13) ELECTRIC MOTOR.—

“(A) GENERAL PURPOSE ELECTRIC MOTOR (SUBTYPE I).—The term ‘general purpose electric motor (subtype I)’ means any motor that meets the definition of ‘General Purpose’ as established in the final rule issued by the Department of Energy entitled ‘Energy Efficiency Program for Certain Commercial and Industrial Equipment: Test Procedures, Labeling, and Certification Requirements for Electric Motors’ (10 C.F.R. 431), as in effect on the date of enactment of the Energy Independence and Security Act of 2007.

“(B) GENERAL PURPOSE ELECTRIC MOTOR (SUBTYPE II).—The term ‘general purpose electric motor (subtype II)’ means motors incorporating the design elements of a general purpose electric motor (subtype I) that are configured as 1 of the following:

“(i) A U-Frame Motor.

“(ii) A Design C Motor.

“(iii) A close-coupled pump motor.

“(iv) A Footless motor.

“(v) A vertical solid shaft normal thrust motor (as tested in a horizontal configuration).

“(vi) An 8-pole motor (900 rpm).

“(vii) A poly-phase motor with voltage of not more than 600 volts (other than 230 or 460 volts.”.

(b) STANDARDS.—

(1) AMENDMENT.—Section 342(b) of the Energy Policy and Conservation Act (42 U.S.C. 6313(b)) is amended—

(A) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(B) by inserting after paragraph (1) the following:

“(2) ELECTRIC MOTORS.—

“(A) GENERAL PURPOSE ELECTRIC MOTORS (SUBTYPE I).—Except as provided in subparagraph (B), each general purpose electric motor (subtype I) with a power rating of 1 horsepower or greater, but not greater than 200 horsepower, manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of the Energy Independence and Security Act of 2007, shall have a nominal full load efficiency that is not less than as defined in NEMA MG-1 (2006) Table 12-12.

“(B) FIRE PUMP MOTORS.—Each fire pump motor manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of the Energy Independence and Security Act of 2007 shall have nominal full load efficiency that is not less than as defined in NEMA MG-1 (2006) Table 12-11.

“(C) GENERAL PURPOSE ELECTRIC MOTORS (SUBTYPE II).—Each general purpose electric motor (subtype II) with a power rating of 1 horsepower or greater, but not greater than 200 horsepower, manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of the Energy Independence and Security Act of 2007, shall have a nominal full load efficiency that is not less than as defined in NEMA MG-1 (2006) Table 12-11.

“(D) NEMA DESIGN B, GENERAL PURPOSE ELECTRIC MOTORS.—Each NEMA Design B, general purpose electric motor with a power rating of more than 200 horsepower, but not greater than 500 horsepower, manufactured (alone or as a component of another piece of equipment) after the 3-year period beginning on the date of enactment of the Energy Independence and Security Act of 2007, shall have a nominal full load efficiency that is not less than as defined in NEMA MG-1 (2006) Table 12-11.”.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) take effect on the

date that is 3 years after the date of enactment of this Act.

SEC. 314. STANDARDS FOR SINGLE PACKAGE VERTICAL AIR CONDITIONERS AND HEAT PUMPS.

(a) DEFINITIONS.—Section 340 of the Energy Policy and Conservation Act (42 U.S.C. 6311) is amended by adding at the end the following:

“(22) SINGLE PACKAGE VERTICAL AIR CONDITIONER.—The term ‘single package vertical air conditioner’ means air-cooled commercial package air conditioning and heating equipment that—

“(A) is factory-assembled as a single package that—

“(i) has major components that are arranged vertically;

“(ii) is an encased combination of cooling and optional heating components; and

“(iii) is intended for exterior mounting on, adjacent interior to, or through an outside wall;

“(B) is powered by a single- or 3-phase current;

“(C) may contain 1 or more separate indoor grilles, outdoor louvers, various ventilation options, indoor free air discharges, ductwork, well plenum, or sleeves; and

“(D) has heating components that may include electrical resistance, steam, hot water, or gas, but may not include reverse cycle refrigeration as a heating means.

“(23) SINGLE PACKAGE VERTICAL HEAT PUMP.—The term ‘single package vertical heat pump’ means a single package vertical air conditioner that—

“(A) uses reverse cycle refrigeration as its primary heat source; and

“(B) may include secondary supplemental heating by means of electrical resistance, steam, hot water, or gas.”.

(b) STANDARDS.—Section 342(a) of the Energy Policy and Conservation Act (42 U.S.C. 6313(a)) is amended—

(1) in the first sentence of each of paragraphs (1) and (2), by inserting “(including single package vertical air conditioners and single package vertical heat pumps)” after “heating equipment” each place it appears;

(2) in paragraph (1), by striking “but before January 1, 2010,”;

(3) in the first sentence of each of paragraphs (7), (8), and (9), by inserting “(other than single package vertical air conditioners and single package vertical heat pumps)” after “heating equipment” each place it appears;

(4) in paragraph (7)—

(A) by striking “manufactured on or after January 1, 2010,”;

(B) in each of subparagraphs (A), (B), and (C), by striking “The” and inserting “For equipment manufactured on or after January 1, 2010, the”;

(C) by adding at the end the following:

“(D) For equipment manufactured on or after the later of January 1, 2008, or the date that is 180 days after the date of enactment of the Energy Independence and Security Act of 2007—

“(i) the minimum seasonal energy efficiency ratio of air-cooled 3-phase electric central air conditioners and central air conditioning heat pumps less than 65,000 Btu per hour (cooling capacity), split systems, shall be 13.0;

“(ii) the minimum seasonal energy efficiency ratio of air-cooled 3-phase electric central air conditioners and central air conditioning heat pumps less than 65,000 Btu per hour (cooling capacity), single package, shall be 13.0;

“(iii) the minimum heating seasonal performance factor of air-cooled 3-phase electric central air conditioning heat pumps less than 65,000 Btu per hour (cooling capacity), split systems, shall be 7.7; and

“(iv) the minimum heating seasonal performance factor of air-cooled three-phase electric central air conditioning heat pumps less than 65,000 Btu per hour (cooling capacity), single package, shall be 7.7.”; and

(5) by adding at the end the following:

“(10) SINGLE PACKAGE VERTICAL AIR CONDITIONERS AND SINGLE PACKAGE VERTICAL HEAT PUMPS.—

“(A) IN GENERAL.—Single package vertical air conditioners and single package vertical heat pumps manufactured on or after January 1, 2010, shall meet the following standards:

“(i) The minimum energy efficiency ratio of single package vertical air conditioners less than 65,000 Btu per hour (cooling capacity), single-phase, shall be 9.0.

“(ii) The minimum energy efficiency ratio of single package vertical air conditioners less than 65,000 Btu per hour (cooling capacity), three-phase, shall be 9.0.

“(iii) The minimum energy efficiency ratio of single package vertical air conditioners at or above 65,000 Btu per hour (cooling capacity) but less than 135,000 Btu per hour (cooling capacity), shall be 8.9.

“(iv) The minimum energy efficiency ratio of single package vertical air conditioners at or above 135,000 Btu per hour (cooling capacity) but less than 240,000 Btu per hour (cooling capacity), shall be 8.6.

“(v) The minimum energy efficiency ratio of single package vertical heat pumps less than 65,000 Btu per hour (cooling capacity), single-phase, shall be 9.0 and the minimum coefficient of performance in the heating mode shall be 3.0.

“(vi) The minimum energy efficiency ratio of single package vertical heat pumps less than 65,000 Btu per hour (cooling capacity), three-phase, shall be 9.0 and the minimum coefficient of performance in the heating mode shall be 3.0.

“(vii) The minimum energy efficiency ratio of single package vertical heat pumps at or above 65,000 Btu per hour (cooling capacity) but less than 135,000 Btu per hour (cooling capacity), shall be 8.9 and the minimum coefficient of performance in the heating mode shall be 3.0.

“(viii) The minimum energy efficiency ratio of single package vertical heat pumps at or above 135,000 Btu per hour (cooling capacity) but less than 240,000 Btu per hour (cooling capacity), shall be 8.6 and the minimum coefficient of performance in the heating mode shall be 2.9.

“(B) REVIEW.—Not later than 3 years after the date of enactment of this paragraph, the Secretary shall review the most recently published ASHRAE/IES Standard 90.1 with respect to single package vertical air conditioners and single package vertical heat pumps in accordance with the procedures established under paragraph (6).”.

SEC. 315. IMPROVED ENERGY EFFICIENCY FOR APPLIANCES AND BUILDINGS IN COLD CLIMATES.

(a) RESEARCH.—Section 911(a)(2) of the Energy Policy Act of 2005 (42 U.S.C. 16191(a)(2)) is amended—

(1) in subparagraph (C), by striking “and” at the end;

(2) in subparagraph (D), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following:

“(E) technologies to improve the energy efficiency of appliances and mechanical systems for buildings in cold climates, including combined heat and power units and increased use of renewable resources, including fuel.”.

(b) REBATES.—Section 124 of the Energy Policy Act of 2005 (42 U.S.C. 15821) is amended—

(1) in subsection (b)(1), by inserting “, or products with improved energy efficiency in

cold climates," after "residential Energy Star products"; and

(2) in subsection (e), by inserting "or product with improved energy efficiency in a cold climate" after "residential Energy Star product" each place it appears.

SEC. 316. TECHNICAL CORRECTIONS.

(a) DEFINITION OF F96T12 LAMP.—

(1) IN GENERAL.—Section 135(a)(1)(A)(ii) of the Energy Policy Act of 2005 (Public Law 109-58; 119 Stat. 624) is amended by striking "C78.1-1978(R1984)" and inserting "C78.3-1978(R1984)".

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) takes effect on August 8, 2005.

(b) DEFINITION OF FLUORESCENT LAMP.—Section 321(30)(B)(viii) of the Energy Policy and Conservation Act (42 U.S.C. 6291(30)(B)(viii)) is amended by striking "82" and inserting "87".

(c) MERCURY VAPOR LAMP BALLASTS.—

(1) DEFINITIONS.—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) (as amended by section 301(a)(2)) is amended—

(A) by striking paragraphs (46) through (48) and inserting the following:

"(46) HIGH INTENSITY DISCHARGE LAMP.—

"(A) IN GENERAL.—The term 'high intensity discharge lamp' means an electric-discharge lamp in which—

"(i) the light-producing arc is stabilized by the arc tube wall temperature; and

"(ii) the arc tube wall loading is in excess of 3 Watts/cm².

"(B) INCLUSIONS.—The term 'high intensity discharge lamp' includes mercury vapor, metal halide, and high-pressure sodium lamps described in subparagraph (A).

"(47) MERCURY VAPOR LAMP.—

"(A) IN GENERAL.—The term 'mercury vapor lamp' means a high intensity discharge lamp in which the major portion of the light is produced by radiation from mercury typically operating at a partial vapor pressure in excess of 100,000 Pa (approximately 1 atm).

"(B) INCLUSIONS.—The term 'mercury vapor lamp' includes clear, phosphor-coated, and self-ballasted screw base lamps described in subparagraph (A).

"(48) MERCURY VAPOR LAMP BALLAST.—The term 'mercury vapor lamp ballast' means a device that is designed and marketed to start and operate mercury vapor lamps intended for general illumination by providing the necessary voltage and current."; and

(B) by adding at the end the following:

"(53) SPECIALTY APPLICATION MERCURY VAPOR LAMP BALLAST.—The term 'specialty application mercury vapor lamp ballast' means a mercury vapor lamp ballast that—

"(A) is designed and marketed for operation of mercury vapor lamps used in quality inspection, industrial processing, or scientific use, including fluorescent microscopy and ultraviolet curing; and

"(B) in the case of a specialty application mercury vapor lamp ballast, the label of which—

"(i) provides that the specialty application mercury vapor lamp ballast is 'For specialty applications only, not for general illumination'; and

"(ii) specifies the specific applications for which the ballast is designed."

(2) STANDARD SETTING AUTHORITY.—Section 325(ee) of the Energy Policy and Conservation Act (42 U.S.C. 6295(ee)) is amended by inserting "(other than specialty application mercury vapor lamp ballasts)" after "ballasts".

(d) ENERGY CONSERVATION STANDARDS.—Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) is amended—

(1) in subsection (v)—

(A) in the subsection heading, by striking "CEILING FANS AND";

(B) by striking paragraph (1); and

(C) by redesignating paragraphs (2) through (4) as paragraphs (1) through (3), respectively; and

(2) in subsection (ff)—

(A) in paragraph (1)(A)—

(i) by striking clause (iii);

(ii) by redesignating clause (iv) as clause (iii); and

(iii) in clause (iii)(II) (as so redesignated), by inserting "fans sold for" before "outdoor"; and

(B) in paragraph (4)(C)—

(i) in the matter preceding clause (i), by striking "subparagraph (B)" and inserting "subparagraph (A)"; and

(ii) by striking clause (ii) and inserting the following:

"(ii) shall be packaged with lamps to fill all sockets.";

(C) in paragraph (6), by redesignating subparagraphs (C) and (D) as clauses (i) and (ii), respectively, of subparagraph (B); and

(D) in paragraph (7), by striking "327" the second place it appears and inserting "324".

Subtitle B—Lighting Energy Efficiency

SEC. 321. EFFICIENT LIGHT BULBS.

(a) ENERGY EFFICIENCY STANDARDS FOR GENERAL SERVICE INCANDESCENT LAMPS.—

(1) DEFINITION OF GENERAL SERVICE INCANDESCENT LAMP.—Section 321(30) of the Energy Policy and Conservation Act (42 U.S.C. 6291(30)) is amended—

(A) by striking subparagraph (D) and inserting the following:

"(D) GENERAL SERVICE INCANDESCENT LAMP.—

"(i) IN GENERAL.—The term 'general service incandescent lamp' means a standard incandescent or halogen type lamp that—

"(I) is intended for general service applications;

"(II) has a medium screw base;

"(III) has a lumen range of not less than 310 lumens and not more than 2,600 lumens; and

"(IV) is capable of being operated at a voltage range at least partially within 110 and 130 volts.

"(ii) EXCLUSIONS.—The term 'general service incandescent lamp' does not include the following incandescent lamps:

"(I) An appliance lamp.

"(II) A black light lamp.

"(III) A bug lamp.

"(IV) A colored lamp.

"(V) An infrared lamp.

"(VI) A left-hand thread lamp.

"(VII) A marine lamp.

"(VIII) A marine signal service lamp.

"(IX) A mine service lamp.

"(X) A plant light lamp.

"(XI) A reflector lamp.

"(XII) A rough service lamp.

"(XIII) A shatter-resistant lamp (including a shatter-proof lamp and a shatter-protected lamp).

"(XIV) A sign service lamp.

"(XV) A silver bowl lamp.

"(XVI) A showcase lamp.

"(XVII) A 3-way incandescent lamp.

"(XVIII) A traffic signal lamp.

"(XIX) A vibration service lamp.

"(XX) A G shape lamp (as defined in ANSI C78.20-2003 and C79.1-2002 with a diameter of 5 inches or more.

"(XXI) A T shape lamp (as defined in ANSIC78.20-2003 and C79.1-2002) and that uses not more than 40 watts or has a length of more than 10 inches.

"(XXII) A B, BA, CA, F, G16-1/2, G-25, G30, S, or M-14 lamp (as defined in ANSI C79.1-2002 and ANSI C78.20-2003) of 40 watts or less."; and

(B) by adding at the end the following:

"(T) APPLIANCE LAMP.—The term 'appliance lamp' means any lamp that—

"(i) is specifically designed to operate in a household appliance, has a maximum wattage of 40 watts, and is sold at retail, including an oven lamp, refrigerator lamp, and vacuum cleaner lamp; and

"(ii) is designated and marketed for the intended application, with—

"(I) the designation on the lamp packaging; and

"(II) marketing materials that identify the lamp as being for appliance use.

"(U) CANDELABRA BASE INCANDESCENT LAMP.—The term 'candelabra base incandescent lamp' means a lamp that uses candelabra screw base as described in ANSI C81.61-2006, Specifications for Electric Bases, common designations E11 and E12.

"(V) INTERMEDIATE BASE INCANDESCENT LAMP.—The term 'intermediate base incandescent lamp' means a lamp that uses an intermediate screw base as described in ANSI C81.61-2006, Specifications for Electric Bases, common designation E17.

"(W) MODIFIED SPECTRUM.—The term 'modified spectrum' means, with respect to an incandescent lamp, an incandescent lamp that—

"(i) is not a colored incandescent lamp; and

"(ii) when operated at the rated voltage and wattage of the incandescent lamp—

"(I) has a color point with (x,y) chromaticity coordinates on the Commission Internationale de l'Eclairage (C.I.E.) 1931 chromaticity diagram that lies below the black-body locus; and

"(II) has a color point with (x,y) chromaticity coordinates on the C.I.E. 1931 chromaticity diagram that lies at least 4 MacAdam steps (as referenced in IESNA LM16) distant from the color point of a clear lamp with the same filament and bulb shape, operated at the same rated voltage and wattage.

"(X) ROUGH SERVICE LAMP.—The term 'rough service lamp' means a lamp that—

"(i) has a minimum of 5 supports with filament configurations that are C-7A, C-11, C-17, and C-22 as listed in Figure 6-12 of the 9th edition of the IESNA Lighting handbook, or similar configurations where lead wires are not counted as supports; and

"(ii) is designated and marketed specifically for 'rough service' applications, with—

"(I) the designation appearing on the lamp packaging; and

"(II) marketing materials that identify the lamp as being for rough service.

"(Y) 3-WAY INCANDESCENT LAMP.—The term '3-way incandescent lamp' includes an incandescent lamp that—

"(i) employs 2 filaments, operated separately and in combination, to provide 3 light levels; and

"(ii) is designated on the lamp packaging and marketing materials as being a 3-way incandescent lamp.

"(Z) SHATTER-RESISTANT LAMP, SHATTER-PROOF LAMP, OR SHATTER-PROTECTED LAMP.—The terms 'shatter-resistant lamp', 'shatter-proof lamp', and 'shatter-protected lamp' mean a lamp that—

"(i) has a coating or equivalent technology that is compliant with NSF/ANSI 51 and is designed to contain the glass if the glass envelope of the lamp is broken; and

"(ii) is designated and marketed for the intended application, with—

"(I) the designation on the lamp packaging; and

"(II) marketing materials that identify the lamp as being shatter-resistant, shatter-proof, or shatter-protected.

"(AA) VIBRATION SERVICE LAMP.—The term 'vibration service lamp' means a lamp that—

"(i) has filament configurations that are C-5, C-7A, or C-9, as listed in Figure 6-12 of

the 9th Edition of the IESNA Lighting Handbook or similar configurations;

“(ii) has a maximum wattage of 60 watts;“(iii) is sold at retail in packages of 2 lamps or less; and

“(iv) is designated and marketed specifically for vibration service or vibration-resistant applications, with—

“(I) the designation appearing on the lamp packaging; and

“(II) marketing materials that identify the lamp as being vibration service only.

“(BB) GENERAL SERVICE LAMP.—

“(i) IN GENERAL.—The term ‘general service lamp’ includes—

“(I) general service incandescent lamps;

“(II) compact fluorescent lamps;

“(III) general service light-emitting diode (LED or OLED) lamps; and

“(IV) any other lamps that the Secretary determines are used to satisfy lighting applications traditionally served by general service incandescent lamps.

“(ii) EXCLUSIONS.—The term ‘general service lamp’ does not include—

“(I) any lighting application or bulb shape described in any of subclauses (I) through (XXII) of subparagraph (D)(ii); or

“(II) any general service fluorescent lamp or incandescent reflector lamp.

“(CC) LIGHT-EMITTING DIODE; LED.—

“(i) IN GENERAL.—The terms ‘light-emitting diode’ and ‘LED’ means a p-n junction solid state device the radiated output of which is a function of the physical construction, material used, and exciting current of the device.

“(ii) OUTPUT.—The output of a light-emitting diode may be in—

“(I) the infrared region;

“(II) the visible region; or

“(III) the ultraviolet region.

“(DD) ORGANIC LIGHT-EMITTING DIODE; OLED.—The terms ‘organic light-emitting diode’ and ‘OLED’ mean a thin-film light-emitting device that typically consists of a series of organic layers between 2 electrical contacts (electrodes).

“(EE) COLORED INCANDESCENT LAMP.—The term ‘colored incandescent lamp’ means an incandescent lamp designated and marketed as a colored lamp that has—

“(i) a color rendering index of less than 50, as determined according to the test method given in C.I.E. publication 13.3-1995; or

“(ii) a correlated color temperature of less than 2,500K, or greater than 4,600K, where

correlated temperature is computed according to the Journal of Optical Society of America, Vol. 58, pages 1528-1595 (1986).”.

(2) COVERAGE.—Section 322(a)(14) of the Energy Policy and Conservation Act (42 U.S.C. 6292(a)(14)) is amended by inserting “, general service incandescent lamps,” after “fluorescent lamps”.

(3) ENERGY CONSERVATION STANDARDS.—Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) is amended—

(A) in subsection (i)—

(i) in the section heading, by inserting “, GENERAL SERVICE INCANDESCENT LAMPS, INTERMEDIATE BASE INCANDESCENT LAMPS, CANDELABRA BASE INCANDESCENT LAMPS,” after “FLUORESCENT LAMPS”;

(ii) in paragraph (1)—

(I) in subparagraph (A)—(aa) by inserting “, general service incandescent lamps, intermediate base incandescent lamps, candelabra base incandescent lamps,” after “fluorescent lamps”;

(bb) by inserting “, new maximum wattage,” after “lamp efficacy”; and

(cc) by inserting after the table entitled “INCANDESCENT REFLECTOR LAMPS” the following:

GENERAL SERVICE INCANDESCENT LAMPS

Rated Lumen Ranges	Maximum Rate Wattage	Minimum Rate Lifetime	Effective Date
1490-2600	72	1,000 hrs	1/1/2012
1050-1489	53	1,000 hrs	1/1/2013
750-1049	43	1,000 hrs	1/1/2014
310-749	29	1,000 hrs	1/1/2014

MODIFIED SPECTRUM GENERAL SERVICE INCANDESCENT LAMPS

Rated Lumen Ranges	Maximum Rate Wattage	Minimum Rate Lifetime	Effective Date
1118-1950	72	1,000 hrs	1/1/2012
788-1117	53	1,000 hrs	1/1/2013
563-787	43	1,000 hrs	1/1/2014
232-562	29	1,000 hrs	1/1/2014”;

and

(II) by striking subparagraph (B) and inserting the following:

“(B) APPLICATION.—

“(i) APPLICATION CRITERIA.—This subparagraph applies to each lamp that—

“(I) is intended for a general service or general illumination application (whether incandescent or not);

“(II) has a medium screw base or any other screw base not defined in ANSI C81.61-2006;

“(III) is capable of being operated at a voltage at least partially within the range of 110 to 130 volts; and

“(IV) is manufactured or imported after December 31, 2011.

“(ii) REQUIREMENT.—For purposes of this paragraph, each lamp described in clause (i) shall have a color rendering index that is greater than or equal to—

“(I) 80 for nonmodified spectrum lamps; or

“(II) 75 for modified spectrum lamps.

“(C) CANDELABRA INCANDESCENT LAMPS AND INTERMEDIATE BASE INCANDESCENT LAMPS.—

“(i) CANDELABRA BASE INCANDESCENT LAMPS.—A candelabra base incandescent lamp shall not exceed 60 rated watts.

“(ii) INTERMEDIATE BASE INCANDESCENT LAMPS.—An intermediate base incandescent lamp shall not exceed 40 rated watts.

“(D) EXEMPTIONS.—

“(i) PETITION.—Any person may petition the Secretary for an exemption for a type of general service lamp from the requirements of this subsection.

“(ii) CRITERIA.—The Secretary may grant an exemption under clause (i) only to the ex-

tent that the Secretary finds, after a hearing and opportunity for public comment, that it is not technically feasible to serve a specialized lighting application (such as a military, medical, public safety, or certified historic lighting application) using a lamp that meets the requirements of this subsection.

“(iii) ADDITIONAL CRITERION.—To grant an exemption for a product under this subparagraph, the Secretary shall include, as an additional criterion, that the exempted product is unlikely to be used in a general service lighting application.

“(E) EXTENSION OF COVERAGE.—

“(i) PETITION.—Any person may petition the Secretary to establish standards for lamp shapes or bases that are excluded from the definition of general service lamps.

“(ii) INCREASED SALES OF EXEMPTED LAMPS.—The petition shall include evidence that the availability or sales of exempted incandescent lamps have increased significantly since the date on which the standards on general service incandescent lamps were established.

“(iii) CRITERIA.—The Secretary shall grant a petition under clause (i) if the Secretary finds that—

“(I) the petition presents evidence that demonstrates that commercial availability or sales of exempted incandescent lamp types have increased significantly since the standards on general service lamps were established and likely are being widely used in general lighting applications; and

“(II) significant energy savings could be achieved by covering exempted products, as

determined by the Secretary based on sales data provided to the Secretary from manufacturers and importers.

“(iv) NO PRESUMPTION.—The grant of a petition under this subparagraph shall create no presumption with respect to the determination of the Secretary with respect to any criteria under a rulemaking conducted under this section.

“(v) EXPEDITED PROCEEDING.—If the Secretary grants a petition for a lamp shape or base under this subparagraph, the Secretary shall—

“(I) conduct a rulemaking to determine standards for the exempted lamp shape or base; and

“(II) complete the rulemaking not later than 18 months after the date on which notice is provided granting the petition.

“(F) DEFINITION OF EFFECTIVE DATE.—In this paragraph, except as otherwise provided in a table contained in subparagraph (A), the term ‘effective date’ means the last day of the month specified in the table that follows October 24, 1992.”;

(iii) in paragraph (5), in the first sentence, by striking “and general service incandescent lamps”;

(iv) by redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(v) by inserting after paragraph (5) the following:

“(6) STANDARDS FOR GENERAL SERVICE LAMPS.—

“(A) RULEMAKING BEFORE JANUARY 1, 2014.—

“(i) IN GENERAL.—Not later than January 1, 2014, the Secretary shall initiate a rulemaking procedure to determine whether—

“(I) standards in effect for general service lamps should be amended to establish more stringent standards than the standards specified in paragraph (1)(A); and

“(II) the exemptions for certain incandescent lamps should be maintained or discontinued based, in part, on exempted lamp sales collected by the Secretary from manufacturers.

“(ii) SCOPE.—The rulemaking—

“(I) shall not be limited to incandescent lamp technologies; and

“(II) shall include consideration of a minimum standard of 45 lumens per watt for general service lamps.

“(iii) AMENDED STANDARDS.—If the Secretary determines that the standards in effect for general service incandescent lamps should be amended, the Secretary shall publish a final rule not later than January 1, 2017, with an effective date that is not earlier than 3 years after the date on which the final rule is published.

“(iv) PHASED-IN EFFECTIVE DATES.—The Secretary shall consider phased-in effective dates under this subparagraph after considering—

“(I) the impact of any amendment on manufacturers, retiring and repurposing existing equipment, stranded investments, labor contracts, workers, and raw materials; and

“(II) the time needed to work with retailers and lighting designers to revise sales and marketing strategies.

“(v) BACKSTOP REQUIREMENT.—If the Secretary fails to complete a rulemaking in accordance with clauses (i) through (iv) or if the final rule does not produce savings that are greater than or equal to the savings from a minimum efficacy standard of 45 lumens per watt, effective beginning January 1, 2020, the Secretary shall prohibit the sale of any general service lamp that does not meet a minimum efficacy standard of 45 lumens per watt.

“(vi) STATE PREEMPTION.—Neither section 327(b) nor any other provision of law shall preclude California or Nevada from adopting, effective beginning on or after January 1, 2018—

“(I) a final rule adopted by the Secretary in accordance with clauses (i) through (iv);

“(II) if a final rule described in subclause (I) has not been adopted, the backstop requirement under clause (v); or

“(III) in the case of California, if a final rule described in subclause (I) has not been adopted, any California regulations relating to these covered products adopted pursuant to State statute in effect as of the date of enactment of the Energy Independence and Security Act of 2007.

“(B) RULEMAKING BEFORE JANUARY 1, 2020.—

“(i) IN GENERAL.—Not later than January 1, 2020, the Secretary shall initiate a rulemaking procedure to determine whether—

“(I) standards in effect for general service incandescent lamps should be amended to reflect lumen ranges with more stringent maximum wattage than the standards specified in paragraph (1)(A); and

“(II) the exemptions for certain incandescent lamps should be maintained or discontinued based, in part, on exempted lamp sales data collected by the Secretary from manufacturers.

“(ii) SCOPE.—The rulemaking shall not be limited to incandescent lamp technologies.

“(iii) AMENDED STANDARDS.—If the Secretary determines that the standards in effect for general service incandescent lamps should be amended, the Secretary shall publish a final rule not later than January 1, 2022, with an effective date that is not earlier

than 3 years after the date on which the final rule is published.

“(iv) PHASED-IN EFFECTIVE DATES.—The Secretary shall consider phased-in effective dates under this subparagraph after considering—

“(I) the impact of any amendment on manufacturers, retiring and repurposing existing equipment, stranded investments, labor contracts, workers, and raw materials; and

“(II) the time needed to work with retailers and lighting designers to revise sales and marketing strategies.”; and

(B) in subsection (1), by adding at the end the following:

“(4) ENERGY EFFICIENCY STANDARDS FOR CERTAIN LAMPS.—

“(A) IN GENERAL.—The Secretary shall prescribe an energy efficiency standard for rough service lamps, vibration service lamps, 3-way incandescent lamps, 2,601–3,300 lumen general service incandescent lamps, and shatter-resistant lamps only in accordance with this paragraph.

“(B) BENCHMARKS.—Not later than 1 year after the date of enactment of this paragraph, the Secretary, in consultation with the National Electrical Manufacturers Association, shall—

“(i) collect actual data for United States unit sales for each of calendar years 1990 through 2006 for each of the 5 types of lamps described in subparagraph (A) to determine the historical growth rate of the type of lamp; and

“(ii) construct a model for each type of lamp based on coincident economic indicators that closely match the historical annual growth rate of the type of lamp to provide a neutral comparison benchmark to model future unit sales after calendar year 2006.

“(C) ACTUAL SALES DATA.—

“(i) IN GENERAL.—Effective for each of calendar years 2010 through 2025, the Secretary, in consultation with the National Electrical Manufacturers Association, shall—

“(I) collect actual United States unit sales data for each of 5 types of lamps described in subparagraph (A); and

“(II) not later than 90 days after the end of each calendar year, compare the lamp sales in that year with the sales predicted by the comparison benchmark for each of the 5 types of lamps described in subparagraph (A).

“(ii) CONTINUATION OF TRACKING.—

“(I) DETERMINATION.—Not later than January 1, 2023, the Secretary shall determine if actual sales data should be tracked for the lamp types described in subparagraph (A) after calendar year 2025.

“(II) CONTINUATION.—If the Secretary finds that the market share of a lamp type described in subparagraph (A) could significantly erode the market share for general service lamps, the Secretary shall continue to track the actual sales data for the lamp type.

“(D) ROUGH SERVICE LAMPS.—

“(i) IN GENERAL.—Effective beginning with the first year that the reported annual sales rate for rough service lamps demonstrates actual unit sales of rough service lamps that achieve levels that are at least 100 percent higher than modeled unit sales for that same year, the Secretary shall—

“(I) not later than 90 days after the end of the previous calendar year, issue a finding that the index has been exceeded; and

“(II) not later than the date that is 1 year after the end of the previous calendar year, complete an accelerated rulemaking to establish an energy conservation standard for rough service lamps.

“(ii) BACKSTOP REQUIREMENT.—If the Secretary fails to complete an accelerated rulemaking in accordance with clause (i)(II), effective beginning 1 year after the date of the

issuance of the finding under clause (i)(I), the Secretary shall require rough service lamps to—

“(I) have a shatter-proof coating or equivalent technology that is compliant with NSF/ANSI 51 and is designed to contain the glass if the glass envelope of the lamp is broken and to provide effective containment over the life of the lamp;

“(II) have a maximum 40-watt limitation; and

“(III) be sold at retail only in a package containing 1 lamp.

“(E) VIBRATION SERVICE LAMPS.—

“(i) IN GENERAL.—Effective beginning with the first year that the reported annual sales rate for vibration service lamps demonstrates actual unit sales of vibration service lamps that achieve levels that are at least 100 percent higher than modeled unit sales for that same year, the Secretary shall—

“(I) not later than 90 days after the end of the previous calendar year, issue a finding that the index has been exceeded; and

“(II) not later than the date that is 1 year after the end of the previous calendar year, complete an accelerated rulemaking to establish an energy conservation standard for vibration service lamps.

“(ii) BACKSTOP REQUIREMENT.—If the Secretary fails to complete an accelerated rulemaking in accordance with clause (i)(II), effective beginning 1 year after the date of the issuance of the finding under clause (i)(I), the Secretary shall require vibration service lamps to—

“(I) have a maximum 40-watt limitation; and

“(II) be sold at retail only in a package containing 1 lamp.

“(F) 3-WAY INCANDESCENT LAMPS.—

“(i) IN GENERAL.—Effective beginning with the first year that the reported annual sales rate for 3-way incandescent lamps demonstrates actual unit sales of 3-way incandescent lamps that achieve levels that are at least 100 percent higher than modeled unit sales for that same year, the Secretary shall—

“(I) not later than 90 days after the end of the previous calendar year, issue a finding that the index has been exceeded; and

“(II) not later than the date that is 1 year after the end of the previous calendar year, complete an accelerated rulemaking to establish an energy conservation standard for 3-way incandescent lamps.

“(ii) BACKSTOP REQUIREMENT.—If the Secretary fails to complete an accelerated rulemaking in accordance with clause (i)(II), effective beginning 1 year after the date of issuance of the finding under clause (i)(I), the Secretary shall require that—

“(I) each filament in a 3-way incandescent lamp meet the new maximum wattage requirements for the respective lumen range established under subsection (i)(1)(A); and

“(II) 3-way lamps be sold at retail only in a package containing 1 lamp.

“(G) 2,601–3,300 LUMEN GENERAL SERVICE INCANDESCENT LAMPS.—Effective beginning with the first year that the reported annual sales rate demonstrates actual unit sales of 2,601–3,300 lumen general service incandescent lamps in the lumen range of 2,601 through 3,300 lumens (or, in the case of a modified spectrum, in the lumen range of 1,951 through 2,475 lumens) that achieve levels that are at least 100 percent higher than modeled unit sales for that same year, the Secretary shall impose—

“(i) a maximum 95-watt limitation on general service incandescent lamps in the lumen range of 2,601 through 3,300 lumens; and

“(ii) a requirement that those lamps be sold at retail only in a package containing 1 lamp.

“(H) SHATTER-RESISTANT LAMPS.—

“(i) IN GENERAL.—Effective beginning with the first year that the reported annual sales rate for shatter-resistant lamps demonstrates actual unit sales of shatter-resistant lamps that achieve levels that are at least 100 percent higher than modeled unit sales for that same year, the Secretary shall—

“(I) not later than 90 days after the end of the previous calendar year, issue a finding that the index has been exceeded; and

“(II) not later than the date that is 1 year after the end of the previous calendar year, complete an accelerated rulemaking to establish an energy conservation standard for shatter-resistant lamps.

“(ii) BACKSTOP REQUIREMENT.—If the Secretary fails to complete an accelerated rulemaking in accordance with clause (i)(II), effective beginning 1 year after the date of issuance of the finding under clause (i)(I), the Secretary shall impose—

“(I) a maximum wattage limitation of 40 watts on shatter resistant lamps; and

“(II) a requirement that those lamps be sold at retail only in a package containing 1 lamp.

“(I) RULEMAKINGS BEFORE JANUARY 1, 2025.—

“(i) IN GENERAL.—Except as provided in clause (ii), if the Secretary issues a final rule prior to January 1, 2025, establishing an energy conservation standard for any of the 5 types of lamps for which data collection is required under any of subparagraphs (D) through (G), the requirement to collect and model data for that type of lamp shall terminate unless, as part of the rulemaking, the Secretary determines that continued tracking is necessary.

“(ii) BACKSTOP REQUIREMENT.—If the Secretary imposes a backstop requirement as a result of a failure to complete an accelerated rulemaking in accordance with clause (i)(II) of any of subparagraphs (D) through (G), the requirement to collect and model data for the applicable type of lamp shall continue for an additional 2 years after the effective date of the backstop requirement.”

(b) CONSUMER EDUCATION AND LAMP LABELING.—Section 324(a)(2)(C) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)(2)(C)) is amended by adding at the end the following:

“(iii) RULEMAKING TO CONSIDER EFFECTIVENESS OF LAMP LABELING.—

“(I) IN GENERAL.—Not later than 1 year after the date of enactment of this clause, the Commission shall initiate a rulemaking to consider—

“(aa) the effectiveness of current lamp labeling for power levels or watts, light output or lumens, and lamp lifetime; and

“(bb) alternative labeling approaches that will help consumers to understand new high-efficiency lamp products and to base the purchase decisions of the consumers on the most appropriate source that meets the requirements of the consumers for lighting level, light quality, lamp lifetime, and total lifecycle cost.

“(II) COMPLETION.—The Commission shall—

“(aa) complete the rulemaking not later than the date that is 30 months after the date of enactment of this clause; and

“(bb) consider reopening the rulemaking not later than 180 days before the effective dates of the standards for general service incandescent lamps established under section 325(i)(1)(A), if the Commission determines that further labeling changes are needed to help consumers understand lamp alternatives.”

(c) MARKET ASSESSMENTS AND CONSUMER AWARENESS PROGRAM.—

(1) IN GENERAL.—In cooperation with the Administrator of the Environmental Protection Agency, the Secretary of Commerce, the

Federal Trade Commission, lighting and retail industry associations, energy efficiency organizations, and any other entities that the Secretary of Energy determines to be appropriate, the Secretary of Energy shall—

(A) conduct an annual assessment of the market for general service lamps and compact fluorescent lamps—

(i) to identify trends in the market shares of lamp types, efficiencies, and light output levels purchased by residential and nonresidential consumers; and

(ii) to better understand the degree to which consumer decisionmaking is based on lamp power levels or watts, light output or lumens, lamp lifetime, and other factors, including information required on labels mandated by the Federal Trade Commission;

(B) provide the results of the market assessment to the Federal Trade Commission for consideration in the rulemaking described in section 324(a)(2)(C)(iii) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)(2)(C)(iii)); and

(C) in cooperation with industry trade associations, lighting industry members, utilities, and other interested parties, carry out a proactive national program of consumer awareness, information, and education that broadly uses the media and other effective communication techniques over an extended period of time to help consumers understand the lamp labels and make energy-efficient lighting choices that meet the needs of consumers.

(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection \$10,000,000 for each of fiscal years 2009 through 2012.

(d) GENERAL RULE OF PREEMPTION FOR ENERGY CONSERVATION STANDARDS BEFORE FEDERAL STANDARD BECOMES EFFECTIVE FOR A PRODUCT.—Section 327(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6297(b)(1)) is amended—

(1) by inserting “(A)” after “(1)”;
(2) by inserting “or” after the semicolon at the end; and

(3) by adding at the end the following:

“(B) in the case of any portion of any regulation that establishes requirements for general service incandescent lamps, intermediate base incandescent lamps, or candlebase lamps, was enacted or adopted by the States of California or Nevada before December 4, 2007, except that—

“(i) the regulation adopted by the California Energy Commission with an effective date of January 1, 2008, shall only be effective until the effective date of the Federal standard for the applicable lamp category under subparagraphs (A), (B), and (C) of section 325(i)(1);

“(ii) the States of California and Nevada may, at any time, modify or adopt a State standard for general service lamps to conform with Federal standards with effective dates no earlier than 12 months prior to the Federal effective dates prescribed under subparagraphs (A), (B), and (C) of section 325(i)(1), at which time any prior regulations adopted by the States of California or Nevada shall no longer be effective; and

“(iii) all other States may, at any time, modify or adopt a State standard for general service lamps to conform with Federal standards and effective dates.”

(e) PROHIBITED ACTS.—Section 332(a) of the Energy Policy and Conservation Act (42 U.S.C. 6302(a)) is amended—

(1) in paragraph (4), by striking “or” at the end;

(2) in paragraph (5), by striking the period at the end and inserting “; or”; and

(3) by adding at the end the following:

“(6) for any manufacturer, distributor, retailer, or private labeler to distribute in commerce an adapter that—

“(A) is designed to allow an incandescent lamp that does not have a medium screw base to be installed into a fixture or lampholder with a medium screw base socket; and

“(B) is capable of being operated at a voltage range at least partially within 110 and 130 volts.”

(f) ENFORCEMENT.—Section 334 of the Energy Policy and Conservation Act (42 U.S.C. 6304) is amended by inserting after the second sentence the following: “Any such action to restrain any person from distributing in commerce a general service incandescent lamp that does not comply with the applicable standard established under section 325(i) or an adapter prohibited under section 332(a)(6) may also be brought by the attorney general of a State in the name of the State.”

(g) RESEARCH AND DEVELOPMENT PROGRAM.—

(1) IN GENERAL.—The Secretary may carry out a lighting technology research and development program—

(A) to support the research, development, demonstration, and commercial application of lamps and related technologies sold, offered for sale, or otherwise made available in the United States; and

(B) to assist manufacturers of general service lamps in the manufacturing of general service lamps that, at a minimum, achieve the wattage requirements imposed as a result of the amendments made by subsection (a).

(2) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this subsection \$10,000,000 for each of fiscal years 2008 through 2013.

(3) TERMINATION OF AUTHORITY.—The program under this subsection shall terminate on September 30, 2015.

(h) REPORTS TO CONGRESS.—

(1) REPORT ON MERCURY USE AND RELEASE.—Not later than 1 year after the date of enactment of this Act, the Secretary, in cooperation with the Administrator of the Environmental Protection Agency, shall submit to Congress a report describing recommendations relating to the means by which the Federal Government may reduce or prevent the release of mercury during the manufacture, transportation, storage, or disposal of light bulbs.

(2) REPORT ON RULEMAKING SCHEDULE.—Beginning on July 1, 2013 and semiannually through July 1, 2016, the Secretary shall submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report on—

(A) whether the Secretary will meet the deadlines for the rulemakings required under this section;

(B) a description of any impediments to meeting the deadlines; and

(C) a specific plan to remedy any failures, including recommendations for additional legislation or resources.

(3) NATIONAL ACADEMY REVIEW.—

(A) IN GENERAL.—Not later than December 31, 2009, the Secretary shall enter into an arrangement with the National Academy of Sciences to provide a report by December 31, 2013, and an updated report by July 31, 2015. The report should include—

(i) the status of advanced solid state lighting research, development, demonstration and commercialization;

(ii) the impact on the types of lighting available to consumers of an energy conservation standard requiring a minimum of 45 lumens per watt for general service lighting effective in 2020; and

(iii) the time frame for the commercialization of lighting that could replace current incandescent and halogen incandescent lamp

technology and any other new technologies developed to meet the minimum standards required under subsection (a) (3) of this section.

(B) REPORTS.—The reports shall be transmitted to the Committee on Energy and Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

SEC. 322. INCANDESCENT REFLECTOR LAMP EFFICIENCY STANDARDS.

(a) DEFINITIONS.—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291) (as amended by section 316(c)(1)(D)) is amended—

(1) in paragraph (30)(C)(ii)—

(A) in the matter preceding subclause (I)— (i) by striking “or similar bulb shapes (excluding ER or BR)” and inserting “ER, BR, BPAR, or similar bulb shapes”; and

(ii) by striking “2.75” and inserting “2.25”; and

(B) by striking “is either—” and all that follows through subclause (II) and inserting “has a rated wattage that is 40 watts or higher”; and

(2) by adding at the end the following:

“(54) BPAR INCANDESCENT REFLECTOR LAMP.—The term ‘BPAR incandescent reflector lamp’ means a reflector lamp as shown in figure C78.21-278 on page 32 of ANSI C78.21-2003.

“(55) BR INCANDESCENT REFLECTOR LAMP; BR30; BR40.—

“(A) BR INCANDESCENT REFLECTOR LAMP.—The term ‘BR incandescent reflector lamp’ means a reflector lamp that has—

“(i) a bulged section below the major diameter of the bulb and above the approximate baseline of the bulb, as shown in figure 1 (RB) on page 7 of ANSI C79.1-1994, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph); and

“(ii) a finished size and shape shown in ANSI C78.21-1989, including the referenced reflective characteristics in part 7 of ANSI C78.21-1989, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph).

“(B) BR30.—The term ‘BR30’ means a BR incandescent reflector lamp with a diameter of 30/8ths of an inch.

“(C) BR40.—The term ‘BR40’ means a BR incandescent reflector lamp with a diameter of 40/8ths of an inch.

“(56) ER INCANDESCENT REFLECTOR LAMP; ER30; ER40.—

“(A) ER INCANDESCENT REFLECTOR LAMP.—The term ‘ER incandescent reflector lamp’ means a reflector lamp that has—

“(i) an elliptical section below the major diameter of the bulb and above the approximate baseline of the bulb, as shown in figure 1 (RE) on page 7 of ANSI C79.1-1994, incorporated by reference in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph); and

“(ii) a finished size and shape shown in ANSI C78.21-1989, incorporated by reference

in section 430.22 of title 10, Code of Federal Regulations (as in effect on the date of enactment of this paragraph).

“(B) ER30.—The term ‘ER30’ means an ER incandescent reflector lamp with a diameter of 30/8ths of an inch.

“(C) ER40.—The term ‘ER40’ means an ER incandescent reflector lamp with a diameter of 40/8ths of an inch.

“(57) R20 INCANDESCENT REFLECTOR LAMP.—The term ‘R20 incandescent reflector lamp’ means a reflector lamp that has a face diameter of approximately 2.5 inches, as shown in figure 1(R) on page 7 of ANSI C79.1-1994.”.

(b) STANDARDS FOR FLUORESCENT LAMPS AND INCANDESCENT REFLECTOR LAMPS.—Section 325(i) of the Energy Policy and Conservation Act (42 U.S.C. 6995(i)) is amended by striking paragraph (1) and inserting the following:

“(1) STANDARDS.—

“(A) DEFINITION OF EFFECTIVE DATE.—In this paragraph (other than subparagraph (D)), the term ‘effective date’ means, with respect to each type of lamp specified in a table contained in subparagraph (B), the last day of the period of months corresponding to that type of lamp (as specified in the table) that follows October 24, 1992.

“(B) MINIMUM STANDARDS.—Each of the following general service fluorescent lamps and incandescent reflector lamps manufactured after the effective date specified in the tables contained in this paragraph shall meet or exceed the following lamp efficacy and CRI standards:

FLUORESCENT LAMPS

Lamp Type	Nominal Lamp Wattage	Minimum CRI	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
4-foot medium bi-pin	>35 W	69	75.0	36
	≤35 W	45	75.0	36
2-foot U-shaped	>35 W	69	68.0	36
	≤35 W	45	64.0	36
8-foot slimline	65 W	69	80.0	18
	≤65 W	45	80.0	18
8-foot high output	>100 W	69	80.0	18
	≤100 W	45	80.0	18

INCANDESCENT REFLECTOR LAMPS

Nominal Lamp Wattage	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
40-50	10.5	36
51-66	11.0	36
67-85	12.5	36
86-115	14.0	36
116-155	14.5	36
156-205	15.0	36

“(C) EXEMPTIONS.—The standards specified in subparagraph (B) shall not apply to the following types of incandescent reflector lamps:

“(i) Lamps rated at 50 watts or less that are ER30, BR30, BR40, or ER40 lamps.

“(ii) Lamps rated at 65 watts that are BR30, BR40, or ER40 lamps.

“(iii) R20 incandescent reflector lamps rated 45 watts or less.

“(D) EFFECTIVE DATES.—

“(i) ER, BR, AND BPAR LAMPS.—The standards specified in subparagraph (B) shall apply with respect to ER incandescent reflector lamps, BR incandescent reflector lamps, BPAR incandescent reflector lamps, and similar bulb shapes on and after January 1, 2008.

“(ii) LAMPS BETWEEN 2.25-2.75 INCHES IN DIAMETER.—The standards specified in subpara-

graph (B) shall apply with respect to incandescent reflector lamps with a diameter of more than 2.25 inches, but not more than 2.75 inches, on and after the later of January 1, 2008, or the date that is 180 days after the date of enactment of the Energy Independence and Security Act of 2007.”.

SEC. 323. PUBLIC BUILDING ENERGY EFFICIENT AND RENEWABLE ENERGY SYSTEMS.

(a) ESTIMATE OF ENERGY PERFORMANCE IN PROSPECTUS.—Section 3307(b) of title 40, United States Code, is amended—

(1) by striking “and” at the end of paragraph (5);

(2) by striking the period at the end of paragraph (6) and inserting “; and”; and

(3) by inserting after paragraph (6) the following:

“(7) with respect to any prospectus for the construction, alteration, or acquisition of any building or space to be leased, an estimate of the future energy performance of the building or space and a specific description of the use of energy efficient and renewable energy systems, including photovoltaic systems, in carrying out the project.”.

(b) MINIMUM PERFORMANCE REQUIREMENTS FOR LEASED SPACE.—Section 3307 of such title is amended—

(1) by redesignating subsections (f) and (g) as subsections (g) and (h), respectively; and

(2) by inserting after subsection (e) the following:

“(f) MINIMUM PERFORMANCE REQUIREMENTS FOR LEASED SPACE.—With respect to space to be leased, the Administrator shall include, to the maximum extent practicable, minimum performance requirements requiring energy efficiency and the use of renewable energy.”.

(c) USE OF ENERGY EFFICIENT LIGHTING FIXTURES AND BULBS.—

(1) IN GENERAL.—Chapter 33 of such title is amended—

(A) by redesignating sections 3313, 3314, and 3315 as sections 3314, 3315, and 3316, respectively; and

(B) by inserting after section 3312 the following:

“§ 3313. Use of energy efficient lighting fixtures and bulbs

“(a) CONSTRUCTION, ALTERATION, AND ACQUISITION OF PUBLIC BUILDINGS.—Each public building constructed, altered, or acquired by the Administrator of General Services shall be equipped, to the maximum extent feasible as determined by the Administrator, with lighting fixtures and bulbs that are energy efficient.

“(b) MAINTENANCE OF PUBLIC BUILDINGS.—Each lighting fixture or bulb that is replaced by the Administrator in the normal course of maintenance of public buildings shall be replaced, to the maximum extent feasible, with a lighting fixture or bulb that is energy efficient.

“(c) CONSIDERATIONS.—In making a determination under this section concerning the

feasibility of installing a lighting fixture or bulb that is energy efficient, the Administrator shall consider—

“(1) the life-cycle cost effectiveness of the fixture or bulb;

“(2) the compatibility of the fixture or bulb with existing equipment;

“(3) whether use of the fixture or bulb could result in interference with productivity;

“(4) the aesthetics relating to use of the fixture or bulb; and

“(5) such other factors as the Administrator determines appropriate.

“(d) ENERGY STAR.—A lighting fixture or bulb shall be treated as being energy efficient for purposes of this section if—

“(1) the fixture or bulb is certified under the Energy Star program established by section 324A of the Energy Policy and Conservation Act (42 U.S.C. 6294a);

“(2) in the case of all light-emitting diode (LED) luminaires, lamps, and systems whose efficacy (lumens per watt) and Color Rendering Index (CRI) meet the Department of Energy requirements for minimum luminaire efficacy and CRI for the Energy Star certification, as verified by an independent third-party testing laboratory that the Administrator and the Secretary of Energy determine conducts its tests according to the procedures and recommendations of the Illuminating Engineering Society of North America, even if the luminaires, lamps, and systems have not received such certification; or

“(3) the Administrator and the Secretary of Energy have otherwise determined that the fixture or bulb is energy efficient.

“(e) ADDITIONAL ENERGY EFFICIENT LIGHTING DESIGNATIONS.—The Administrator of the Environmental Protection Agency and the Secretary of Energy shall give priority to establishing Energy Star performance criteria or Federal Energy Management Program designations for additional lighting product categories that are appropriate for use in public buildings.

“(f) GUIDELINES.—The Administrator shall develop guidelines for the use of energy efficient lighting technologies that contain mercury in child care centers in public buildings.

“(g) APPLICABILITY OF BUY AMERICAN ACT.—Acquisitions carried out pursuant to this section shall be subject to the requirements of the Buy American Act (41 U.S.C. 10c et seq.).

“(h) EFFECTIVE DATE.—The requirements of subsections (a) and (b) shall take effect one year after the date of enactment of this subsection.”.

(2) CLERICAL AMENDMENT.—The analysis for such chapter is amended by striking the items relating to sections 3313, 3314, and 3315 and inserting the following:

“3313. Use of energy efficient lighting fixtures and bulbs.

“3314. Delegation.

“3315. Report to Congress.

“3316. Certain authority not affected.”.

(d) EVALUATION FACTOR.—Section 3310 of such title is amended—

(1) by redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively; and

(2) by inserting after paragraph (2) the following:

“(3) shall include in the solicitation for any lease requiring a prospectus under section 3307 an evaluation factor considering the extent to which the offeror will promote energy efficiency and the use of renewable energy”.

SEC. 324. METAL HALIDE LAMP FIXTURES.

(a) DEFINITIONS.—Section 321 of the Energy Policy and Conservation Act (42 U.S.C. 6291)

(as amended by section 322(a)(2)) is amended by adding at the end the following:

“(58) BALLAST.—The term ‘ballast’ means a device used with an electric discharge lamp to obtain necessary circuit conditions (voltage, current, and waveform) for starting and operating.

“(59) BALLAST EFFICIENCY.—

“(A) IN GENERAL.—The term ‘ballast efficiency’ means, in the case of a high intensity discharge fixture, the efficiency of a lamp and ballast combination, expressed as a percentage, and calculated in accordance with the following formula: Efficiency = P_{out}/P_{in} .

“(B) EFFICIENCY FORMULA.—For the purpose of subparagraph (A)—

“(i) P_{out} shall equal the measured operating lamp wattage;

“(ii) P_{in} shall equal the measured operating input wattage;

“(iii) the lamp, and the capacitor when the capacitor is provided, shall constitute a nominal system in accordance with the ANSI Standard C78.43-2004;

“(iv) for ballasts with a frequency of 60 Hz, P_{in} and P_{out} shall be measured after lamps have been stabilized according to section 4.4 of ANSI Standard C82.6-2005 using a wattmeter with accuracy specified in section 4.5 of ANSI Standard C82.6-2005; and

“(v) for ballasts with a frequency greater than 60 Hz, P_{in} and P_{out} shall have a basic accuracy of ± 0.5 percent at the higher of—

“(I) 3 times the output operating frequency of the ballast; or

“(II) 2 kHz for ballast with a frequency greater than 60 Hz.

“(C) MODIFICATION.—The Secretary may, by rule, modify the definition of ‘ballast efficiency’ if the Secretary determines that the modification is necessary or appropriate to carry out the purposes of this Act.

“(60) ELECTRONIC BALLAST.—The term ‘electronic ballast’ means a device that uses semiconductors as the primary means to control lamp starting and operation.

“(61) GENERAL LIGHTING APPLICATION.—The term ‘general lighting application’ means lighting that provides an interior or exterior area with overall illumination.

“(62) METAL HALIDE BALLAST.—The term ‘metal halide ballast’ means a ballast used to start and operate metal halide lamps.

“(63) METAL HALIDE LAMP.—The term ‘metal halide lamp’ means a high intensity discharge lamp in which the major portion of the light is produced by radiation of metal halides and their products of dissociation, possibly in combination with metallic vapors.

“(64) METAL HALIDE LAMP FIXTURE.—The term ‘metal halide lamp fixture’ means a light fixture for general lighting application designed to be operated with a metal halide lamp and a ballast for a metal halide lamp.

“(65) PROBE-START METAL HALIDE BALLAST.—The term ‘probe-start metal halide ballast’ means a ballast that—

“(A) starts a probe-start metal halide lamp that contains a third starting electrode (probe) in the arc tube; and

“(B) does not generally contain an igniter but instead starts lamps with high ballast open circuit voltage.

“(66) PULSE-START METAL HALIDE BALLAST.—

“(A) IN GENERAL.—The term ‘pulse-start metal halide ballast’ means an electronic or electromagnetic ballast that starts a pulse-start metal halide lamp with high voltage pulses.

“(B) STARTING PROCESS.—For the purpose of subparagraph (A)—

“(i) lamps shall be started by first providing a high voltage pulse for ionization of the gas to produce a glow discharge; and

“(ii) to complete the starting process, power shall be provided by the ballast to sus-

tain the discharge through the glow-to-arc transition.”.

(b) COVERAGE.—Section 322(a) of the Energy Policy and Conservation Act (42 U.S.C. 6292(a)) is amended—

(1) by redesignating paragraph (19) as paragraph (20); and

(2) by inserting after paragraph (18) the following:

“(19) Metal halide lamp fixtures.”.

(c) TEST PROCEDURES.—Section 323(b) of the Energy Policy and Conservation Act (42 U.S.C. 6293(b)) (as amended by section 301(b)) is amended by adding at the end the following:

“(18) METAL HALIDE LAMP BALLASTS.—Test procedures for metal halide lamp ballasts shall be based on ANSI Standard C82.6-2005, entitled ‘Ballasts for High Intensity Discharge Lamps—Method of Measurement’.”.

(d) LABELING.—Section 324(a)(2) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)(2)) is amended—

(1) by redesignating subparagraphs (C) through (G) as subparagraphs (D) through (H), respectively; and

(2) by inserting after subparagraph (B) the following:

“(C) METAL HALIDE LAMP FIXTURES.—

“(i) IN GENERAL.—The Commission shall issue labeling rules under this section applicable to the covered product specified in section 322(a)(19) and to which standards are applicable under section 325.

“(ii) LABELING.—The rules shall provide that the labeling of any metal halide lamp fixture manufactured on or after the later of January 1, 2009, or the date that is 270 days after the date of enactment of this subparagraph, shall indicate conspicuously, in a manner prescribed by the Commission under subsection (b) by July 1, 2008, a capital letter ‘E’ printed within a circle on the packaging of the fixture, and on the ballast contained in the fixture.”.

(e) STANDARDS.—Section 325 of the Energy Policy and Conservation Act (42 U.S.C. 6295) (as amended by section 310) is amended—

(1) by redesignating subsection (hh) as subsection (ii);

(2) by inserting after subsection (gg) the following:

“(hh) METAL HALIDE LAMP FIXTURES.—

“(1) STANDARDS.—

“(A) IN GENERAL.—Subject to subparagraphs (B) and (C), metal halide lamp fixtures designed to be operated with lamps rated greater than or equal to 150 watts but less than or equal to 500 watts shall contain—

“(i) a pulse-start metal halide ballast with a minimum ballast efficiency of 88 percent;

“(ii) a magnetic probe-start ballast with a minimum ballast efficiency of 94 percent; or

“(iii) a nonpulse-start electronic ballast with—

“(I) a minimum ballast efficiency of 92 percent for wattages greater than 250 watts; and

“(II) a minimum ballast efficiency of 90 percent for wattages less than or equal to 250 watts.

“(B) EXCLUSIONS.—The standards established under subparagraph (A) shall not apply to—

“(i) fixtures with regulated lag ballasts;

“(ii) fixtures that use electronic ballasts that operate at 480 volts; or

“(iii) fixtures that—

“(I) are rated only for 150 watt lamps;

“(II) are rated for use in wet locations, as specified by the National Electrical Code 2002, section 410.4(A); and

“(III) contain a ballast that is rated to operate at ambient air temperatures above 50°C, as specified by UL 1029-2001.

“(C) APPLICATION.—The standards established under subparagraph (A) shall apply to

metal halide lamp fixtures manufactured on or after the later of—

“(i) January 1, 2009; or

“(ii) the date that is 270 days after the date of enactment of this subsection.

“(2) FINAL RULE BY JANUARY 1, 2012.—

“(A) IN GENERAL.—Not later than January 1, 2012, the Secretary shall publish a final rule to determine whether the standards established under paragraph (1) should be amended.

“(B) ADMINISTRATION.—The final rule shall—

“(i) contain any amended standard; and

“(ii) apply to products manufactured on or after January 1, 2015.

“(3) FINAL RULE BY JANUARY 1, 2019.—

“(A) IN GENERAL.—Not later than January 1, 2019, the Secretary shall publish a final rule to determine whether the standards then in effect should be amended.

“(B) ADMINISTRATION.—The final rule shall—

“(i) contain any amended standards; and

“(ii) apply to products manufactured after January 1, 2022.

“(4) DESIGN AND PERFORMANCE REQUIREMENTS.—Notwithstanding any other provision of law, any standard established pursuant to this subsection may contain both design and performance requirements.”; and

(3) in paragraph (2) of subsection (ii) (as redesignated by paragraph (2)), by striking “(gg)” each place it appears and inserting “(hh)”.

(f) EFFECT ON OTHER LAW.—Section 327(c) of the Energy Policy and Conservation Act (42 U.S.C. 6297(c)) is amended—

(1) in paragraph (8)(B), by striking the period at the end and inserting “; and”; and

(2) by adding at the end the following:

“(9) is a regulation concerning metal halide lamp fixtures adopted by the California Energy Commission on or before January 1, 2011, except that—

“(A) if the Secretary fails to issue a final rule within 180 days after the deadlines for rulemakings in section 325(hh), notwithstanding any other provision of this section, preemption shall not apply to a regulation concerning metal halide lamp fixtures adopted by the California Energy Commission—

“(i) on or before July 1, 2015, if the Secretary fails to meet the deadline specified in section 325(hh)(2); or

“(ii) on or before July 1, 2022, if the Secretary fails to meet the deadline specified in section 325(hh)(3).”.

SEC. 325. ENERGY EFFICIENCY LABELING FOR CONSUMER ELECTRONIC PRODUCTS.

(a) IN GENERAL.—Section 324(a) of the Energy Policy and Conservation Act (42 U.S.C. 6294(a)) (as amended by section 324(d)) is amended—

(1) in paragraph (2), by adding at the end the following:

“(I) LABELING REQUIREMENTS.—

“(i) IN GENERAL.—Subject to clauses (ii) through (iv), not later than 18 months after the date of issuance of applicable Department of Energy testing procedures, the Commission, in consultation with the Secretary and the Administrator of the Environmental Protection Agency (acting through the Energy Star program), shall, by regulation, prescribe labeling or other disclosure requirements for the energy use of—

“(I) televisions;

“(II) personal computers;

“(III) cable or satellite set-top boxes;

“(IV) stand-alone digital video recorder boxes; and

“(V) personal computer monitors.

“(ii) ALTERNATE TESTING PROCEDURES.—In the absence of applicable testing procedures described in clause (i) for products described in subclauses (I) through (V) of that clause,

the Commission may, by regulation, prescribe labeling or other disclosure requirements for a consumer product category described in clause (i) if the Commission—

“(I) identifies adequate non-Department of Energy testing procedures for those products; and

“(II) determines that labeling of, or other disclosures relating to, those products is likely to assist consumers in making purchasing decisions.

“(iii) DEADLINE AND REQUIREMENTS FOR LABELING.—

“(I) DEADLINE.—Not later than 18 months after the date of promulgation of any requirements under clause (i) or (ii), the Commission shall require labeling of, or other disclosure requirements for, electronic products described in clause (i).

“(II) REQUIREMENTS.—The requirements prescribed under clause (i) or (ii) may include specific requirements for each electronic product to be labeled with respect to the placement, size, and content of Energy Guide labels.

“(iv) DETERMINATION OF FEASIBILITY.—Clause (i) or (ii) shall not apply in any case in which the Commission determines that labeling in accordance with this subsection—

“(I) is not technologically or economically feasible; or

“(II) is not likely to assist consumers in making purchasing decisions.”; and

(2) by adding at the end the following:

“(6) AUTHORITY TO INCLUDE ADDITIONAL PRODUCT CATEGORIES.—The Commission may, by regulation, require labeling or other disclosures in accordance with this subsection for any consumer product not specified in this subsection or section 322 if the Commission determines that labeling for the product is likely to assist consumers in making purchasing decisions.”.

(b) CONTENT OF LABEL.—Section 324(c) of the Energy Policy and Conservation Act (42 U.S.C. 6924(c)) is amended by adding at the end the following:

“(9) DISCRETIONARY APPLICATION.—The Commission may apply paragraphs (1), (2), (3), (5), and (6) of this subsection to the labeling of any product covered by paragraph (2)(I) or (6) of subsection (a).”.

TITLE IV—ENERGY SAVINGS IN BUILDINGS AND INDUSTRY

SEC. 401. DEFINITIONS.

In this title:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of General Services.

(2) ADVISORY COMMITTEE.—The term “Advisory Committee” means the Green Building Advisory Committee established under section 484.

(3) COMMERCIAL DIRECTOR.—The term “Commercial Director” means the individual appointed to the position established under section 421.

(4) CONSORTIUM.—The term “Consortium” means the High-Performance Green Building Partnership Consortium created in response to section 436(c)(1) to represent the private sector in a public-private partnership to promote high-performance green buildings and zero-net-energy commercial buildings.

(5) COST-EFFECTIVE LIGHTING TECHNOLOGY.—

(A) IN GENERAL.—The term “cost-effective lighting technology” means a lighting technology that—

(i) will result in substantial operational cost savings by ensuring an installed consumption of not more than 1 watt per square foot; or

(ii) is contained in a list under—

(I) section 553 of Public Law 95-619 (42 U.S.C. 8259b);

(II) Federal acquisition regulation 23-203; and

(III) is at least as energy-conserving as required by other provisions of this Act, including the requirements of this title and title III which shall be applicable to the extent that they would achieve greater energy savings than provided under clause (i) or this clause.

(B) INCLUSIONS.—The term “cost-effective lighting technology” includes—

(i) lamps;

(ii) ballasts;

(iii) luminaires;

(iv) lighting controls;

(v) daylighting; and

(vi) early use of other highly cost-effective lighting technologies.

(6) COST-EFFECTIVE TECHNOLOGIES AND PRACTICES.—The term “cost-effective technologies and practices” means a technology or practice that—

(A) will result in substantial operational cost savings by reducing electricity or fossil fuel consumption, water, or other utility costs, including use of geothermal heat pumps;

(B) complies with the provisions of section 553 of Public Law 95-619 (42 U.S.C. 8259b) and Federal acquisition regulation 23-203; and

(C) is at least as energy and water conserving as required under this title, including sections 431 through 435, and title V, including section 511 through 525, which shall be applicable to the extent that they are more stringent or require greater energy or water savings than required by this section.

(7) FEDERAL DIRECTOR.—The term “Federal Director” means the individual appointed to the position established under section 436(a).

(8) FEDERAL FACILITY.—The term “Federal facility” means any building that is constructed, renovated, leased, or purchased in part or in whole for use by the Federal Government.

(9) OPERATIONAL COST SAVINGS.—

(A) IN GENERAL.—The term “operational cost savings” means a reduction in end-use operational costs through the application of cost-effective technologies and practices or geothermal heat pumps, including a reduction in electricity consumption relative to consumption by the same customer or at the same facility in a given year, as defined in guidelines promulgated by the Administrator pursuant to section 329(b) of the Clean Air Act, that achieves cost savings sufficient to pay the incremental additional costs of using cost-effective technologies and practices including geothermal heat pumps by not later than the later of the date established under sections 431 through 434, or—

(i) for cost-effective technologies and practices, the date that is 5 years after the date of installation; and

(ii) for geothermal heat pumps, as soon as practical after the date of installation of the applicable geothermal heat pump.

(B) INCLUSIONS.—The term “operational cost savings” includes savings achieved at a facility as a result of—

(i) the installation or use of cost-effective technologies and practices; or

(ii) the planting of vegetation that shades the facility and reduces the heating, cooling, or lighting needs of the facility.

(C) EXCLUSION.—The term “operational cost savings” does not include savings from measures that would likely be adopted in the absence of cost-effective technology and practices programs, as determined by the Administrator.

(10) GEOTHERMAL HEAT PUMP.—The term “geothermal heat pump” means any heating or air conditioning technology that—

(A) uses the ground or ground water as a thermal energy source to heat, or as a thermal energy sink to cool, a building; and

(B) meets the requirements of the Energy Star program of the Environmental Protection Agency applicable to geothermal heat pumps on the date of purchase of the technology.

(11) GSA FACILITY.—

(A) IN GENERAL.—The term “GSA facility” means any building, structure, or facility, in whole or in part (including the associated support systems of the building, structure, or facility) that—

(i) is constructed (including facilities constructed for lease), renovated, or purchased, in whole or in part, by the Administrator for use by the Federal Government; or

(ii) is leased, in whole or in part, by the Administrator for use by the Federal Government—

(I) except as provided in subclause (II), for a term of not less than 5 years; or

(II) for a term of less than 5 years, if the Administrator determines that use of cost-effective technologies and practices would result in the payback of expenses.

(B) INCLUSION.—The term “GSA facility” includes any group of buildings, structures, or facilities described in subparagraph (A) (including the associated energy-consuming support systems of the buildings, structures, and facilities).

(C) EXEMPTION.—The Administrator may exempt from the definition of “GSA facility” under this paragraph a building, structure, or facility that meets the requirements of section 543(c) of Public Law 95-619 (42 U.S.C. 8253(c)).

(12) HIGH-PERFORMANCE BUILDING.—The term “high performance building” means a building that integrates and optimizes on a life cycle basis all major high performance attributes, including energy conservation, environment, safety, security, durability, accessibility, cost-benefit, productivity, sustainability, functionality, and operational considerations.

(13) HIGH-PERFORMANCE GREEN BUILDING.—The term “high-performance green building” means a high-performance building that, during its life-cycle, as compared with similar buildings (as measured by Commercial Buildings Energy Consumption Survey or Residential Energy Consumption Survey data from the Energy Information Agency)—

(A) reduces energy, water, and material resource use;

(B) improves indoor environmental quality, including reducing indoor pollution, improving thermal comfort, and improving lighting and acoustic environments that affect occupant health and productivity;

(C) reduces negative impacts on the environment throughout the life-cycle of the building, including air and water pollution and waste generation;

(D) increases the use of environmentally preferable products, including biobased, recycled content, and nontoxic products with lower life-cycle impacts;

(E) increases reuse and recycling opportunities;

(F) integrates systems in the building;

(G) reduces the environmental and energy impacts of transportation through building location and site design that support a full range of transportation choices for users of the building; and

(H) considers indoor and outdoor effects of the building on human health and the environment, including—

(i) improvements in worker productivity;

(ii) the life-cycle impacts of building materials and operations; and

(iii) other factors that the Federal Director or the Commercial Director consider to be appropriate.

(14) LIFE-CYCLE.—The term “life-cycle”, with respect to a high-performance green building, means all stages of the useful life

of the building (including components, equipment, systems, and controls of the building) beginning at conception of a high-performance green building project and continuing through site selection, design, construction, landscaping, commissioning, operation, maintenance, renovation, deconstruction or demolition, removal, and recycling of the high-performance green building.

(15) LIFE-CYCLE ASSESSMENT.—The term “life-cycle assessment” means a comprehensive system approach for measuring the environmental performance of a product or service over the life of the product or service, beginning at raw materials acquisition and continuing through manufacturing, transportation, installation, use, reuse, and end-of-life waste management.

(16) LIFE-CYCLE COSTING.—The term “life-cycle costing”, with respect to a high-performance green building, means a technique of economic evaluation that—

(A) sums, over a given study period, the costs of initial investment (less resale value), replacements, operations (including energy use), and maintenance and repair of an investment decision; and

(B) is expressed—

(i) in present value terms, in the case of a study period equivalent to the longest useful life of the building, determined by taking into consideration the typical life of such a building in the area in which the building is to be located; or

(ii) in annual value terms, in the case of any other study period.

(17) OFFICE OF COMMERCIAL HIGH-PERFORMANCE GREEN BUILDINGS.—The term “Office of Commercial High-Performance Green Buildings” means the Office of Commercial High-Performance Green Buildings established under section 421(a).

(18) OFFICE OF FEDERAL HIGH-PERFORMANCE GREEN BUILDINGS.—The term “Office of Federal High-Performance Green Buildings” means the Office of Federal High-Performance Green Buildings established under section 436(a).

(19) PRACTICES.—The term “practices” means design, financing, permitting, construction, commissioning, operation and maintenance, and other practices that contribute to achieving zero-net-energy buildings or facilities.

(20) ZERO-NET-ENERGY COMMERCIAL BUILDING.—The term “zero-net-energy commercial building” means a commercial building that is designed, constructed, and operated to—

(A) require a greatly reduced quantity of energy to operate;

(B) meet the balance of energy needs from sources of energy that do not produce greenhouse gases;

(C) therefore result in no net emissions of greenhouse gases; and

(D) be economically viable.

Subtitle A—Residential Building Efficiency

SEC. 411. REAUTHORIZATION OF WEATHERIZATION ASSISTANCE PROGRAM.

(a) IN GENERAL.—Section 422 of the Energy Conservation and Production Act (42 U.S.C. 6872) is amended by striking “appropriated \$500,000,000 for fiscal year 2006, \$600,000,000 for fiscal year 2007, and \$700,000,000 for fiscal year 2008” and inserting “appropriated—

“(1) \$750,000,000 for fiscal year 2008;

“(2) \$900,000,000 for fiscal year 2009;

“(3) \$1,050,000,000 for fiscal year 2010;

“(4) \$1,200,000,000 for fiscal year 2011; and

“(5) \$1,400,000,000 for fiscal year 2012.”.

(b) SUSTAINABLE ENERGY RESOURCES FOR CONSUMERS GRANTS.—

(1) IN GENERAL.—The Secretary may make funding available to local weatherization agencies from amounts authorized under the amendment made by subsection (a) to ex-

pand the weatherization assistance program for residential buildings to include materials, benefits, and renewable and domestic energy technologies not covered by the program (as of the date of enactment of this Act), if the State weatherization grantee certifies that the applicant has the capacity to carry out the proposed activities and that the grantee will include the project in the financial oversight of the grantee of the weatherization assistance program.

(2) PRIORITY.—In selecting grant recipients under this subsection, the Secretary shall give priority to—

(A) the expected effectiveness and benefits of the proposed project to low- and moderate-income energy consumers;

(B) the potential for replication of successful results;

(C) the impact on the health and safety and energy costs of consumers served; and

(D) the extent of partnerships with other public and private entities that contribute to the resources and implementation of the program, including financial partnerships.

(3) FUNDING.—

(A) IN GENERAL.—Except as provided in paragraph (2), the amount of funds used for projects described in paragraph (1) may equal up to 2 percent of the amount of funds made available for any fiscal year under section 422 of the Energy Conservation and Production Act (42 U.S.C. 6872).

(B) EXCEPTION.—No funds may be used for sustainable energy resources for consumers grants for a fiscal year under this subsection if the amount of funds made available for the fiscal year to carry out the Weatherization Assistance Program for Low-Income Persons established under part A of title IV of the Energy Conservation and Production Act (42 U.S.C. 6861 et seq.) is less than \$275,000,000.

(c) DEFINITION OF STATE.—Section 412 of the Energy Conservation and Production Act (42 U.S.C. 6862) is amended by striking paragraph (8) and inserting the following:

“(8) STATE.—The term ‘State’ means—

“(A) a State;

“(B) the District of Columbia;

“(C) the Commonwealth of Puerto Rico; and

“(D) any other territory or possession of the United States.”.

SEC. 412. STUDY OF RENEWABLE ENERGY REBATE PROGRAMS.

(a) IN GENERAL.—Not later than 120 days after the date of enactment of this Act, the Secretary shall conduct, and submit to Congress a report on, a study regarding the rebate programs established under sections 124 and 206(c) of the Energy Policy Act of 2005 (42 U.S.C. 15821, 15853).

(b) COMPONENTS.—In conducting the study, the Secretary shall—

(1) develop a plan for how the rebate programs would be carried out if the programs were funded; and

(2) determine the minimum amount of funding the program would need to receive in order to accomplish the goals of the programs.

SEC. 413. ENERGY CODE IMPROVEMENTS APPLICABLE TO MANUFACTURED HOUSING.

(a) ESTABLISHMENT OF STANDARDS.—

(1) IN GENERAL.—Not later than 4 years after the date of enactment of this Act, the Secretary shall by regulation establish standards for energy efficiency in manufactured housing.

(2) NOTICE, COMMENT, AND CONSULTATION.—Standards described in paragraph (1) shall be established after—

(A) notice and an opportunity for comment by manufacturers of manufactured housing and other interested parties; and

(B) consultation with the Secretary of Housing and Urban Development, who may

seek further counsel from the Manufactured Housing Consensus Committee.

(b) REQUIREMENTS.—

(1) INTERNATIONAL ENERGY CONSERVATION CODE.—The energy conservation standards established under this section shall be based on the most recent version of the International Energy Conservation Code (including supplements), except in cases in which the Secretary finds that the code is not cost-effective, or a more stringent standard would be more cost-effective, based on the impact of the code on the purchase price of manufactured housing and on total life-cycle construction and operating costs.

(2) CONSIDERATIONS.—The energy conservation standards established under this section may—

(A) take into consideration the design and factory construction techniques of manufactured homes;

(B) be based on the climate zones established by the Department of Housing and Urban Development rather than the climate zones under the International Energy Conservation Code; and

(C) provide for alternative practices that result in net estimated energy consumption equal to or less than the specified standards.

(3) UPDATING.—The energy conservation standards established under this section shall be updated not later than—

(A) 1 year after the date of enactment of this Act; and

(B) 1 year after any revision to the International Energy Conservation Code.

(c) ENFORCEMENT.—Any manufacturer of manufactured housing that violates a provision of the regulations under subsection (a) is liable to the United States for a civil penalty in an amount not exceeding 1 percent of the manufacturer's retail list price of the manufactured housing.

Subtitle B—High-Performance Commercial Buildings

SEC. 421. COMMERCIAL HIGH-PERFORMANCE GREEN BUILDINGS.

(a) DIRECTOR OF COMMERCIAL HIGH-PERFORMANCE GREEN BUILDINGS.—Notwithstanding any other provision of law, the Secretary, acting through the Assistant Secretary of Energy Efficiency and Renewable Energy, shall appoint a Director of Commercial High-Performance Green Buildings to a position in the career-reserved Senior Executive service, with the principal responsibility to—

(1) establish and manage the Office of Commercial High-Performance Green Buildings; and

(2) carry out other duties as required under this subtitle.

(b) QUALIFICATIONS.—The Commercial Director shall be an individual, who by reason of professional background and experience, is specifically qualified to carry out the duties required under this subtitle.

(c) DUTIES.—The Commercial Director shall, with respect to development of high-performance green buildings and zero-energy commercial buildings nationwide—

(1) coordinate the activities of the Office of Commercial High-Performance Green Buildings with the activities of the Office of Federal High-Performance Green Buildings;

(2) develop the legal predicates and agreements for, negotiate, and establish one or more public-private partnerships with the Consortium, members of the Consortium, and other capable parties meeting the qualifications of the Consortium, to further such development;

(3) represent the public and the Department in negotiating and performing in accord with such public-private partnerships;

(4) use appropriated funds in an effective manner to encourage the maximum invest-

ment of private funds to achieve such development;

(5) promote research and development of high performance green buildings, consistent with section 423; and

(6) jointly establish with the Federal Director a national high-performance green building clearinghouse in accordance with section 423(1), which shall provide high-performance green building information and disseminate research results through—

(A) outreach;

(B) education; and

(C) the provision of technical assistance.

(d) REPORTING.—The Commercial Director shall report directly to the Assistant Secretary for Energy Efficiency and Renewable Energy, or to other senior officials in a way that facilitates the integrated program of this subtitle for both energy efficiency and renewable energy and both technology development and technology deployment.

(e) COORDINATION.—The Commercial Director shall ensure full coordination of high-performance green building information and activities, including activities under this subtitle, within the Federal Government by working with the General Services Administration and all relevant agencies, including, at a minimum—

(1) the Environmental Protection Agency;

(2) the Office of the Federal Environmental Executive;

(3) the Office of Federal Procurement Policy;

(4) the Department of Energy, particularly the Federal Energy Management Program;

(5) the Department of Health and Human Services;

(6) the Department of Housing and Urban Development;

(7) the Department of Defense;

(8) the National Institute of Standards and Technology;

(9) the Department of Transportation;

(10) the Office of Science Technology and Policy; and

(11) such nonprofit high-performance green building rating and analysis entities as the Commercial Director determines can offer support, expertise, and review services.

(f) HIGH-PERFORMANCE GREEN BUILDING PARTNERSHIP CONSORTIUM.—

(1) RECOGNITION.—Not later than 90 days after the date of enactment of this Act, the Commercial Director shall formally recognize one or more groups that qualify as a high-performance green building partnership consortium.

(2) REPRESENTATION TO QUALIFY.—To qualify under this section, any consortium shall include representation from—

(A) the design professions, including national associations of architects and of professional engineers;

(B) the development, construction, financial, and real estate industries;

(C) building owners and operators from the public and private sectors;

(D) academic and research organizations, including at least one national laboratory with extensive commercial building energy expertise;

(E) building code agencies and organizations, including a model energy code-setting organization;

(F) independent high-performance green building associations or councils;

(G) experts in indoor air quality and environmental factors;

(H) experts in intelligent buildings and integrated building information systems;

(I) utility energy efficiency programs;

(J) manufacturers and providers of equipment and techniques used in high performance green buildings;

(K) public transportation industry experts; and

(L) nongovernmental energy efficiency organizations.

(3) FUNDING.—The Secretary may make payments to the Consortium pursuant to the terms of a public-private partnership for such activities of the Consortium undertaken under such a partnership as described in this subtitle directly to the Consortium or through one or more of its members.

(g) REPORT.—Not later than 2 years after the date of enactment of this Act, and biennially thereafter, the Commercial Director, in consultation with the Consortium, shall submit to Congress a report that—

(1) describes the status of the high-performance green building initiatives under this subtitle and other Federal programs affecting commercial high-performance green buildings in effect as of the date of the report, including—

(A) the extent to which the programs are being carried out in accordance with this subtitle; and

(B) the status of funding requests and appropriations for those programs; and

(2) summarizes and highlights development, at the State and local level, of high-performance green building initiatives, including executive orders, policies, or laws adopted promoting high-performance green building (including the status of implementation of those initiatives).

SEC. 422. ZERO NET ENERGY COMMERCIAL BUILDINGS INITIATIVE.

(a) DEFINITIONS.—In this section:

(1) CONSORTIUM.—The term “consortium” means a High-Performance Green Building Consortium selected by the Commercial Director.

(2) INITIATIVE.—The term “initiative” means the Zero-Net-Energy Commercial Buildings Initiative established under subsection (b)(1).

(3) ZERO-NET-ENERGY COMMERCIAL BUILDING.—The term “zero-net-energy commercial building” means a high-performance commercial building that is designed, constructed, and operated—

(A) to require a greatly reduced quantity of energy to operate;

(B) to meet the balance of energy needs from sources of energy that do not produce greenhouse gases;

(C) in a manner that will result in no net emissions of greenhouse gases; and

(D) to be economically viable.

(b) ESTABLISHMENT.—

(1) IN GENERAL.—The Commercial Director shall establish an initiative, to be known as the “Zero-Net-Energy Commercial Buildings Initiative”.

(A) to reduce the quantity of energy consumed by commercial buildings located in the United States; and

(B) to achieve the development of zero net energy commercial buildings in the United States.

(2) CONSORTIUM.—

(A) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Commercial Director shall competitively select, and enter into an agreement with, a consortium to develop and carry out the initiative.

(B) AGREEMENTS.—In entering into an agreement with a consortium under subparagraph (A), the Commercial Director shall use the authority described in section 646(g) of the Department of Energy Organization Act (42 U.S.C. 7256(g)), to the maximum extent practicable.

(c) GOAL OF INITIATIVE.—The goal of the initiative shall be to develop and disseminate technologies, practices, and policies for the development and establishment of zero net energy commercial buildings for—

(1) any commercial building newly constructed in the United States by 2030;

(2) 50 percent of the commercial building stock of the United States by 2040; and

(3) all commercial buildings in the United States by 2050.

(d) COMPONENTS.—In carrying out the initiative, the Commercial Director, in consultation with the consortium, may—

(1) conduct research and development on building science, design, materials, components, equipment and controls, operation and other practices, integration, energy use measurement, and benchmarking;

(2) conduct pilot programs and demonstration projects to evaluate replicable approaches to achieving energy efficient commercial buildings for a variety of building types in a variety of climate zones;

(3) conduct deployment, dissemination, and technical assistance activities to encourage widespread adoption of technologies, practices, and policies to achieve energy efficient commercial buildings;

(4) conduct other research, development, demonstration, and deployment activities necessary to achieve each goal of the initiative, as determined by the Commercial Director, in consultation with the consortium;

(5) develop training materials and courses for building professionals and trades on achieving cost-effective high-performance energy efficient buildings;

(6) develop and disseminate public education materials to share information on the benefits and cost-effectiveness of high-performance energy efficient buildings;

(7) support code-setting organizations and State and local governments in developing minimum performance standards in building codes that recognize the ready availability of many technologies utilized in high-performance energy efficient buildings;

(8) develop strategies for overcoming the split incentives between builders and purchasers, and landlords and tenants, to ensure that energy efficiency and high-performance investments are made that are cost-effective on a lifecycle basis; and

(9) develop improved means of measurement and verification of energy savings and performance for public dissemination.

(e) COST SHARING.—In carrying out this section, the Commercial Director shall require cost sharing in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section—

(1) \$20,000,000 for fiscal year 2008;

(2) \$50,000,000 for each of fiscal years 2009 and 2010;

(3) \$100,000,000 for each of fiscal years 2011 and 2012; and

(4) \$200,000,000 for each of fiscal years 2013 through 2018.

SEC. 423. PUBLIC OUTREACH.

The Commercial Director and Federal Director, in coordination with the Consortium, shall carry out public outreach to inform individuals and entities of the information and services available Governmentwide by—

(1) establishing and maintaining a national high-performance green building clearinghouse, including on the internet, that—

(A) identifies existing similar efforts and coordinates activities of common interest; and

(B) provides information relating to high-performance green buildings, including hyperlinks to internet sites that describe the activities, information, and resources of—

(i) the Federal Government;

(ii) State and local governments;

(iii) the private sector (including non-governmental and nonprofit entities and organizations); and

(iv) international organizations;

(2) identifying and recommending educational resources for implementing high-performance green building practices, including security and emergency benefits and practices;

(3) providing access to technical assistance, tools, and resources for constructing high-performance green buildings, particularly tools to conduct life-cycle costing and life-cycle assessment;

(4) providing information on application processes for certifying a high-performance green building, including certification and commissioning;

(5) providing to the public, through the Commercial Director, technical and research information or other forms of assistance or advice that would be useful in planning and constructing high-performance green buildings;

(6) using such additional methods as are determined by the Commercial Director to be appropriate to conduct public outreach;

(7) surveying existing research and studies relating to high-performance green buildings; and

(8) coordinating activities of common interest.

Subtitle C—High-Performance Federal Buildings

SEC. 431. ENERGY REDUCTION GOALS FOR FEDERAL BUILDINGS.

Section 543(a)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(1)) is amended by striking the table and inserting the following:

Fiscal Year	Percentage reduction
2006	2
2007	4
2008	9
2009	12
2010	15
2011	18
2012	21
2013	24
2014	27
2015	30.

SEC. 432. MANAGEMENT OF ENERGY AND WATER EFFICIENCY IN FEDERAL BUILDINGS.

Section 543 of the National Energy Conservation Policy Act (42 U.S.C. 8253) is amended by adding at the end the following:

“(f) USE OF ENERGY AND WATER EFFICIENCY MEASURES IN FEDERAL BUILDINGS.—

“(1) DEFINITIONS.—In this subsection:

“(A) COMMISSIONING.—The term ‘commissioning’, with respect to a facility, means a systematic process—

“(i) of ensuring, using appropriate verification and documentation, during the period beginning on the initial day of the design phase of the facility and ending not earlier than 1 year after the date of completion of construction of the facility, that all facility systems perform interactively in accordance with—

“(I) the design documentation and intent of the facility; and

“(II) the operational needs of the owner of the facility, including preparation of operation personnel; and

“(ii) the primary goal of which is to ensure fully functional systems that can be properly operated and maintained during the useful life of the facility.

“(B) ENERGY MANAGER.—

“(i) IN GENERAL.—The term ‘energy manager’, with respect to a facility, means the individual who is responsible for—

“(I) ensuring compliance with this subsection by the facility; and

“(II) reducing energy use at the facility.

“(ii) INCLUSIONS.—The term ‘energy manager’ may include—

“(I) a contractor of a facility;

“(II) a part-time employee of a facility; and

“(III) an individual who is responsible for multiple facilities.

“(C) FACILITY.—

“(i) IN GENERAL.—The term ‘facility’ means any building, installation, structure, or other property (including any applicable fixtures) owned or operated by, or constructed or manufactured and leased to, the Federal Government.

“(ii) INCLUSIONS.—The term ‘facility’ includes—

“(I) a group of facilities at a single location or multiple locations managed as an integrated operation; and

“(II) contractor-operated facilities owned by the Federal Government.

“(iii) EXCLUSIONS.—The term ‘facility’ does not include any land or site for which the cost of utilities is not paid by the Federal Government.

“(D) LIFE CYCLE COST-EFFECTIVE.—The term ‘life cycle cost-effective’, with respect to a measure, means a measure the estimated savings of which exceed the estimated costs over the lifespan of the measure, as determined in accordance with section 544.

“(E) PAYBACK PERIOD.—

“(i) IN GENERAL.—Subject to clause (ii), the term ‘payback period’, with respect to a measure, means a value equal to the quotient obtained by dividing—

“(I) the estimated initial implementation cost of the measure (other than financing costs); by

“(II) the annual cost savings resulting from the measure, including—

“(aa) net savings in estimated energy and water costs; and

“(bb) operations, maintenance, repair, replacement, and other direct costs.

“(ii) MODIFICATIONS AND EXCEPTIONS.—The Secretary, in guidelines issued pursuant to paragraph (6), may make such modifications and provide such exceptions to the calculation of the payback period of a measure as the Secretary determines to be appropriate to achieve the purposes of this Act.

“(F) RECOMMISSIONING.—The term ‘re-commissioning’ means a process—

“(i) of commissioning a facility or system beyond the project development and warranty phases of the facility or system; and

“(ii) the primary goal of which is to ensure optimum performance of a facility, in accordance with design or current operating needs, over the useful life of the facility, while meeting building occupancy requirements.

“(G) RETROCOMMISSIONING.—The term ‘retrocommissioning’ means a process of commissioning a facility or system that was not commissioned at time of construction of the facility or system.

“(2) FACILITY ENERGY MANAGERS.—

“(A) IN GENERAL.—Each Federal agency shall designate an energy manager responsible for implementing this subsection and reducing energy use at each facility that meets criteria under subparagraph (B).

“(B) COVERED FACILITIES.—The Secretary shall develop criteria, after consultation with affected agencies, energy efficiency advocates, and energy and utility service providers, that cover, at a minimum, Federal facilities, including central utility plants and distribution systems and other energy intensive operations, that constitute at least 75 percent of facility energy use at each agency.

“(3) ENERGY AND WATER EVALUATIONS.—

“(A) EVALUATIONS.—Effective beginning on the date that is 180 days after the date of enactment of this subsection and annually thereafter, energy managers shall complete, for each calendar year, a comprehensive energy and water evaluation for approximately 25 percent of the facilities of each agency that meet the criteria under paragraph (2)(B)

in a manner that ensures that an evaluation of each such facility is completed at least once every 4 years.

“(B) RECOMMISSIONING AND RETROCOMMISSIONING.—As part of the evaluation under subparagraph (A), the energy manager shall identify and assess recommissioning measures (or, if the facility has never been commissioned, retrocommissioning measures) for each such facility.

“(4) IMPLEMENTATION OF IDENTIFIED ENERGY AND WATER EFFICIENCY MEASURES.—Not later than 2 years after the completion of each evaluation under paragraph (3), each energy manager may—

“(A) implement any energy- or water-saving measure that the Federal agency identified in the evaluation conducted under paragraph (3) that is life cycle cost-effective; and

“(B) bundle individual measures of varying paybacks together into combined projects.

“(5) FOLLOW-UP ON IMPLEMENTED MEASURES.—For each measure implemented under paragraph (4), each energy manager shall ensure that—

“(A) equipment, including building and equipment controls, is fully commissioned at acceptance to be operating at design specifications;

“(B) a plan for appropriate operations, maintenance, and repair of the equipment is in place at acceptance and is followed;

“(C) equipment and system performance is measured during its entire life to ensure proper operations, maintenance, and repair; and

“(D) energy and water savings are measured and verified.

“(6) GUIDELINES.—

“(A) IN GENERAL.—The Secretary shall issue guidelines and necessary criteria that each Federal agency shall follow for implementation of—

“(i) paragraphs (2) and (3) not later than 180 days after the date of enactment of this subsection; and

“(ii) paragraphs (4) and (5) not later than 1 year after the date of enactment of this subsection.

“(B) RELATIONSHIP TO FUNDING SOURCE.—The guidelines issued by the Secretary under subparagraph (A) shall be appropriate and uniform for measures funded with each type of funding made available under paragraph (10), but may distinguish between different types of measures project size, and other criteria the Secretary determines are relevant.

“(7) WEB-BASED CERTIFICATION.—

“(A) IN GENERAL.—For each facility that meets the criteria established by the Secretary under paragraph (2)(B), the energy manager shall use the web-based tracking system under subparagraph (B) to certify compliance with the requirements for—

“(i) energy and water evaluations under paragraph (3);

“(ii) implementation of identified energy and water measures under paragraph (4); and

“(iii) follow-up on implemented measures under paragraph (5).

“(B) DEPLOYMENT.—

“(i) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Secretary shall develop and deploy a web-based tracking system required under this paragraph in a manner that tracks, at a minimum—

“(I) the covered facilities;

“(II) the status of meeting the requirements specified in subparagraph (A);

“(III) the estimated cost and savings for measures required to be implemented in a facility;

“(IV) the measured savings and persistence of savings for implemented measures; and

“(V) the benchmarking information disclosed under paragraph (8)(C).

“(ii) EASE OF COMPLIANCE.—The Secretary shall ensure that energy manager compliance with the requirements in this paragraph, to the maximum extent practicable—

“(I) can be accomplished with the use of streamlined procedures and templates that minimize the time demands on Federal employees; and

“(II) is coordinated with other applicable energy reporting requirements.

“(C) AVAILABILITY.—

“(i) IN GENERAL.—Subject to clause (ii), the Secretary shall make the web-based tracking system required under this paragraph available to Congress, other Federal agencies, and the public through the Internet.

“(ii) EXEMPTIONS.—At the request of a Federal agency, the Secretary may exempt specific data for specific facilities from disclosure under clause (i) for national security purposes.

“(8) BENCHMARKING OF FEDERAL FACILITIES.—

“(A) IN GENERAL.—The energy manager shall enter energy use data for each metered building that is (or is a part of) a facility that meets the criteria established by the Secretary under paragraph (2)(B) into a building energy use benchmarking system, such as the Energy Star Portfolio Manager.

“(B) SYSTEM AND GUIDANCE.—Not later than 1 year after the date of enactment of this subsection, the Secretary shall—

“(i) select or develop the building energy use benchmarking system required under this paragraph for each type of building; and

“(ii) issue guidance for use of the system.

“(C) PUBLIC DISCLOSURE.—Each energy manager shall post the information entered into, or generated by, a benchmarking system under this subsections, on the web-based tracking system under paragraph (7)(B). The energy manager shall update such information each year, and shall include in such reporting previous years' information to allow changes in building performance to be tracked over time.

“(9) FEDERAL AGENCY SCORECARDS.—

“(A) IN GENERAL.—The Director of the Office of Management and Budget shall issue semiannual scorecards for energy management activities carried out by each Federal agency that includes—

“(i) summaries of the status of implementing the various requirements of the agency and its energy managers under this subsection; and

“(ii) any other means of measuring performance that the Director considers appropriate.

“(B) AVAILABILITY.—The Director shall make the scorecards required under this paragraph available to Congress, other Federal agencies, and the public through the Internet.

“(10) FUNDING AND IMPLEMENTATION.—

“(A) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this subsection.

“(B) FUNDING OPTIONS.—

“(i) IN GENERAL.—To carry out this subsection, a Federal agency may use any combination of—

“(I) appropriated funds made available under subparagraph (A); and

“(II) private financing otherwise authorized under Federal law, including financing available through energy savings performance contracts or utility energy service contracts.

“(ii) COMBINED FUNDING FOR SAME MEASURE.—A Federal agency may use any combination of appropriated funds and private financing described in clause (i) to carry out the same measure under this subsection.

“(C) IMPLEMENTATION.—Each Federal agency may implement the requirements under

this subsection itself or may contract out performance of some or all of the requirements.

“(11) RULE OF CONSTRUCTION.—This subsection shall not be construed to require or to obviate any contractor savings guarantees.”.

SEC. 433. FEDERAL BUILDING ENERGY EFFICIENCY PERFORMANCE STANDARDS.

(a) STANDARDS.—Section 305(a)(3) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)) is amended by adding at the end the following new subparagraph:

“(D) Not later than 1 year after the date of enactment of the Energy Independence and Security Act of 2007, the Secretary shall establish, by rule, revised Federal building energy efficiency performance standards that require that:

“(i) For new Federal buildings and Federal buildings undergoing major renovations, with respect to which the Administrator of General Services is required to transmit a prospectus to Congress under section 3307 of title 40, United States Code, in the case of public buildings (as defined in section 3301 of title 40, United States Code), or of at least \$2,500,000 in costs adjusted annually for inflation for other buildings:

“(I) The buildings shall be designed so that the fossil fuel-generated energy consumption of the buildings is reduced, as compared with such energy consumption by a similar building in fiscal year 2003 (as measured by Commercial Buildings Energy Consumption Survey or Residential Energy Consumption Survey data from the Energy Information Agency), by the percentage specified in the following table:

Fiscal Year	Percentage Reduction
2010	55
2015	65
2020	80
2025	90
2030	100

“(II) Upon petition by an agency subject to this subparagraph, the Secretary may adjust the applicable numeric requirement under subclause (I) downward with respect to a specific building, if the head of the agency designing the building certifies in writing that meeting such requirement would be technically impracticable in light of the agency's specified functional needs for that building and the Secretary concurs with the agency's conclusion. This subclause shall not apply to the General Services Administration.

“(III) Sustainable design principles shall be applied to the siting, design, and construction of such buildings. Not later than 90 days after the date of enactment of the Energy Independence and Security Act of 2007, the Secretary, after reviewing the findings of the Federal Director under section 436(h) of that Act, in consultation with the Administrator of General Services, and in consultation with the Secretary of Defense for considerations relating to those facilities under the custody and control of the Department of Defense, shall identify a certification system and level for green buildings that the Secretary determines to be the most likely to encourage a comprehensive and environmentally-sound approach to certification of green buildings. The identification of the certification system and level shall be based on a review of the Federal Director's findings under section 436(h) of the Energy Independence and Security Act of 2007 and the criteria specified in clause (iii), shall identify the highest level the Secretary determines is appropriate above the minimum level required for certification under the system selected, and shall achieve results at least comparable to the system used by and highest level referenced by the General Services

Administration as of the date of enactment of the Energy Independence and Security Act of 2007. Within 90 days of the completion of each study required by clause (iv), the Secretary, in consultation with the Administrator of General Services, and in consultation with the Secretary of Defense for considerations relating to those facilities under the custody and control of the Department of Defense, shall review and update the certification system and level, taking into account the conclusions of such study.

“(ii) In establishing criteria for identifying major renovations that are subject to the requirements of this subparagraph, the Secretary shall take into account the scope, degree, and types of renovations that are likely to provide significant opportunities for substantial improvements in energy efficiency.

“(iii) In identifying the green building certification system and level, the Secretary shall take into consideration—

“(I) the ability and availability of assessors and auditors to independently verify the criteria and measurement of metrics at the scale necessary to implement this subparagraph;

“(II) the ability of the applicable certification organization to collect and reflect public comment;

“(III) the ability of the standard to be developed and revised through a consensus-based process;

“(IV) an evaluation of the robustness of the criteria for a high-performance green building, which shall give credit for promoting—

“(aa) efficient and sustainable use of water, energy, and other natural resources;

“(bb) use of renewable energy sources;

“(cc) improved indoor environmental quality through enhanced indoor air quality, thermal comfort, acoustics, day lighting, pollutant source control, and use of low-emission materials and building system controls; and

“(dd) such other criteria as the Secretary determines to be appropriate; and

“(V) national recognition within the building industry.

“(iv) At least once every five years, and in accordance with section 436 of the Energy Independence and Security Act of 2007, the Administrator of General Services shall conduct a study to evaluate and compare available third-party green building certification systems and levels, taking into account the criteria listed in clause (iii).

“(v) The Secretary may by rule allow Federal agencies to develop internal certification processes, using certified professionals, in lieu of certification by the certification entity identified under clause (i)(III). The Secretary shall include in any such rule guidelines to ensure that the certification process results in buildings meeting the applicable certification system and level identified under clause (i)(III). An agency employing an internal certification process must continue to obtain external certification by the certification entity identified under clause (i)(III) for at least 5 percent of the total number of buildings certified annually by the agency.

“(vi) With respect to privatized military housing, the Secretary of Defense, after consultation with the Secretary may, through rulemaking, develop alternative criteria to those established by subclauses (I) and (III) of clause (i) that achieve an equivalent result in terms of energy savings, sustainable design, and green building performance.

“(vii) In addition to any use of water conservation technologies otherwise required by this section, water conservation technologies shall be applied to the extent that the technologies are life-cycle cost-effective.”

(b) DEFINITIONS.—Section 303(6) of the Energy Conservation and Production Act (42 U.S.C. 6832(6)) is amended by striking “which is not legally subject to State or local building codes or similar requirements.” and inserting “. Such term shall include buildings built for the purpose of being leased by a Federal agency, and privatized military housing.”

(c) REVISION OF FEDERAL ACQUISITION REGULATION.—Not later than 2 years after the date of the enactment of this Act, the Federal Acquisition Regulation shall be revised to require Federal officers and employees to comply with this section and the amendments made by this section in the acquisition, construction, or major renovation of any facility. The members of the Federal Acquisition Regulatory Council (established under section 25 of the Office of Federal Procurement Policy Act (41 U.S.C. 421)) shall consult with the Federal Director and the Commercial Director before promulgating regulations to carry out this subsection.

(d) GUIDANCE.—Not later than 90 days after the date of promulgation of the revised regulations under subsection (c), the Administrator for Federal Procurement Policy shall issue guidance to all Federal procurement executives providing direction and instructions to renegotiate the design of proposed facilities and major renovations for existing facilities to incorporate improvements that are consistent with this section.

SEC. 434. MANAGEMENT OF FEDERAL BUILDING EFFICIENCY.

(a) LARGE CAPITAL ENERGY INVESTMENTS.—Section 543 of the National Energy Conservation Policy Act (42 U.S.C. 8253) is amended by adding at the end the following:

“(f) LARGE CAPITAL ENERGY INVESTMENTS.—

“(1) IN GENERAL.—Each Federal agency shall ensure that any large capital energy investment in an existing building that is not a major renovation but involves replacement of installed equipment (such as heating and cooling systems), or involves renovation, rehabilitation, expansion, or remodeling of existing space, employs the most energy efficient designs, systems, equipment, and controls that are life-cycle cost effective.

“(2) PROCESS FOR REVIEW OF INVESTMENT DECISIONS.—Not later than 180 days after the date of enactment of this subsection, each Federal agency shall—

“(A) develop a process for reviewing each decision made on a large capital energy investment described in paragraph (1) to ensure that the requirements of this subsection are met; and

“(B) report to the Director of the Office of Management and Budget on the process established.

“(3) COMPLIANCE REPORT.—Not later than 1 year after the date of enactment of this subsection, the Director of the Office of Management and Budget shall evaluate and report to Congress on the compliance of each agency with this subsection.”

(b) METERING.—Section 543(e)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8253(e)(1)) is amended by inserting after the second sentence the following: “Not later than October 1, 2016, each agency shall provide for equivalent metering of natural gas and steam, in accordance with guidelines established by the Secretary under paragraph (2).”

SEC. 435. LEASING.

(a) IN GENERAL.—Except as provided in subsection (b), effective beginning on the date that is 3 years after the date of enactment of this Act, no Federal agency shall enter into a contract to lease space in a building that has not earned the Energy Star label in the most recent year.

(b) EXCEPTION.—

(1) APPLICATION.—This subsection applies if—

(A) no space is available in a building described in subsection (a) that meets the functional requirements of an agency, including locational needs;

(B) the agency proposes to remain in a building that the agency has occupied previously;

(C) the agency proposes to lease a building of historical, architectural, or cultural significance (as defined in section 3306(a)(4) of title 40, United States Code) or space in such a building; or

(D) the lease is for not more than 10,000 gross square feet of space.

(2) BUILDINGS WITHOUT ENERGY STAR LABEL.—If 1 of the conditions described in paragraph (2) is met, the agency may enter into a contract to lease space in a building that has not earned the Energy Star label in the most recent year if the lease contract includes provisions requiring that, prior to occupancy or, in the case of a contract described in paragraph (1)(B), not later than 1 year after signing the contract, the space will be renovated for all energy efficiency and conservation improvements that would be cost effective over the life of the lease, including improvements in lighting, windows, and heating, ventilation, and air conditioning systems.

(c) REVISION OF FEDERAL ACQUISITION REGULATION.—

(1) IN GENERAL.—Not later than 3 years after the date of the enactment of this Act, the Federal Acquisition Regulation described in section 6(a) of the Office of Federal Procurement Policy Act (41 U.S.C. 405(a)) shall be revised to require Federal officers and employees to comply with this section in leasing buildings.

(2) CONSULTATION.—The members of the Federal Acquisition Regulatory Council established under section 25 of the Office of Federal Procurement Policy Act (41 U.S.C. 421) shall consult with the Federal Director and the Commercial Director before promulgating regulations to carry out this subsection.

SEC. 436. HIGH-PERFORMANCE GREEN FEDERAL BUILDINGS.

(a) ESTABLISHMENT OF OFFICE.—Not later than 60 days after the date of enactment of this Act, the Administrator shall establish within the General Services Administration an Office of Federal High-Performance Green Buildings, and appoint an individual to serve as Federal Director in, a position in the career-reserved Senior Executive service, to—

(1) establish and manage the Office of Federal High-Performance Green Buildings; and

(2) carry out other duties as required under this subtitle.

(b) COMPENSATION.—The compensation of the Federal Director shall not exceed the maximum rate of basic pay for the Senior Executive Service under section 5382 of title 5, United States Code, including any applicable locality-based comparability payment that may be authorized under section 5304(h)(2)(C) of that title.

(c) DUTIES.—The Federal Director shall—

(1) coordinate the activities of the Office of Federal High-Performance Green Buildings with the activities of the Office of Commercial High-Performance Green Buildings, and the Secretary, in accordance with section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D));

(2) ensure full coordination of high-performance green building information and activities within the General Services Administration and all relevant agencies, including, at a minimum—

(A) the Environmental Protection Agency;

(B) the Office of the Federal Environmental Executive;

(C) the Office of Federal Procurement Policy;

(D) the Department of Energy;

(E) the Department of Health and Human Services;

(F) the Department of Defense;

(G) the Department of Transportation;

(H) the National Institute of Standards and Technology; and

(I) the Office of Science and Technology Policy;

(3) establish a senior-level Federal Green Building Advisory Committee under section 474, which shall provide advice and recommendations in accordance with that section and subsection (d);

(4) identify and every 5 years reassess improved or higher rating standards recommended by the Advisory Committee;

(5) ensure full coordination, dissemination of information regarding, and promotion of the results of research and development information relating to Federal high-performance green building initiatives;

(6) identify and develop Federal high-performance green building standards for all types of Federal facilities, consistent with the requirements of this subtitle and section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D));

(7) establish green practices that can be used throughout the life of a Federal facility;

(8) review and analyze current Federal budget practices and life-cycle costing issues, and make recommendations to Congress, in accordance with subsection (d); and

(9) identify opportunities to demonstrate innovative and emerging green building technologies and concepts.

(d) **ADDITIONAL DUTIES.**—The Federal Director, in consultation with the Commercial Director and the Advisory Committee, and consistent with the requirements of section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D)) shall—

(1) identify, review, and analyze current budget and contracting practices that affect achievement of high-performance green buildings, including the identification of barriers to high-performance green building life-cycle costing and budgetary issues;

(2) develop guidance and conduct training sessions with budget specialists and contracting personnel from Federal agencies and budget examiners to apply life-cycle cost criteria to actual projects;

(3) identify tools to aid life-cycle cost decisionmaking; and

(4) explore the feasibility of incorporating the benefits of high-performance green buildings, such as security benefits, into a cost-budget analysis to aid in life-cycle costing for budget and decisionmaking processes.

(e) **INCENTIVES.**—Within 90 days after the date of enactment of this Act, the Federal Director shall identify incentives to encourage the expedited use of high-performance green buildings and related technology in the operations of the Federal Government, in accordance with the requirements of section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D)), including through—

(1) the provision of recognition awards; and

(2) the maximum feasible retention of financial savings in the annual budgets of Federal agencies for use in reinvesting in future high-performance green building initiatives.

(f) **REPORT.**—Not later than 2 years after the date of enactment of this Act, and biennially thereafter, the Federal Director, in consultation with the Secretary, shall submit to Congress a report that—

(1) describes the status of compliance with this subtitle, the requirements of section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D)), and other Federal high-performance green building initiatives in effect as of the date of the report, including—

(A) the extent to which the programs are being carried out in accordance with this subtitle and the requirements of section 305(a)(3)(D) of that Act; and

(B) the status of funding requests and appropriations for those programs;

(2) identifies within the planning, budgeting, and construction process all types of Federal facility procedures that may affect the certification of new and existing Federal facilities as high-performance green buildings under the provisions of section 305(a)(3)(D) of that Act and the criteria established in subsection (h);

(3) identifies inconsistencies, as reported to the Advisory Committee, in Federal law with respect to product acquisition guidelines and high-performance product guidelines;

(4) recommends language for uniform standards for use by Federal agencies in environmentally responsible acquisition;

(5) in coordination with the Office of Management and Budget, reviews the budget process for capital programs with respect to alternatives for—

(A) restructuring of budgets to require the use of complete energy and environmental cost accounting;

(B) using operations expenditures in budget-related decisions while simultaneously incorporating productivity and health measures (as those measures can be quantified by the Office of Federal High-Performance Green Buildings, with the assistance of universities and national laboratories);

(C) streamlining measures for permitting Federal agencies to retain all identified savings accrued as a result of the use of life-cycle costing for future high-performance green building initiatives; and

(D) identifying short-term and long-term cost savings that accrue from high-performance green buildings, including those relating to health and productivity;

(6) identifies green, self-sustaining technologies to address the operational needs of Federal facilities in times of national security emergencies, natural disasters, or other dire emergencies;

(7) summarizes and highlights development, at the State and local level, of high-performance green building initiatives, including executive orders, policies, or laws adopted promoting high-performance green building (including the status of implementation of those initiatives); and

(8) includes, for the 2-year period covered by the report, recommendations to address each of the matters, and a plan for implementation of each recommendation, described in paragraphs (1) through (7).

(g) **IMPLEMENTATION.**—The Office of Federal High-Performance Green Buildings shall carry out each plan for implementation of recommendations under subsection (f)(8).

(h) **IDENTIFICATION OF CERTIFICATION SYSTEM.**—

(1) **IN GENERAL.**—For the purpose of this section, not later than 60 days after the date of enactment of this Act, the Federal Director shall identify and shall provide to the Secretary pursuant to section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D)), a certification system that the Director determines to be the most likely to encourage a comprehensive and environmentally-sound approach to certification of green buildings.

(2) **BASIS.**—The system identified under paragraph (1) shall be based on—

(A) a study completed every 5 years and provided to the Secretary pursuant to section 305(a)(3)(D) of that Act, which shall be carried out by the Federal Director to compare and evaluate standards;

(B) the ability and availability of assessors and auditors to independently verify the criteria and measurement of metrics at the scale necessary to implement this subtitle;

(C) the ability of the applicable standard-setting organization to collect and reflect public comment;

(D) the ability of the standard to be developed and revised through a consensus-based process;

(E) an evaluation of the robustness of the criteria for a high performance green building, which shall give credit for promoting—

(i) efficient and sustainable use of water, energy, and other natural resources;

(ii) use of renewable energy sources;

(iii) improved indoor environmental quality through enhanced indoor air quality, thermal comfort, acoustics, day lighting, pollutant source control, and use of low-emission materials and building system controls;

(iv) reduced impacts from transportation through building location and site design that promote access by public transportation; and

(v) such other criteria as the Federal Director determines to be appropriate; and

(F) national recognition within the building industry.

SEC. 437. FEDERAL GREEN BUILDING PERFORMANCE.

(a) **IN GENERAL.**—Not later than October 31 of each of the 2 fiscal years following the fiscal year in which this Act is enacted, and at such times thereafter as the Comptroller General of the United States determines to be appropriate, the Comptroller General of the United States shall, with respect to the fiscal years that have passed since the preceding report—

(1) conduct an audit of the implementation of this subtitle, section 305(a)(3)(D) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(D)), and section 435; and

(2) submit to the Federal Director, the Advisory Committee, the Administrator, and Congress a report describing the results of the audit.

(b) **CONTENTS.**—An audit under subsection (a) shall include a review, with respect to the period covered by the report under subsection (a)(2), of—

(1) budget, life-cycle costing, and contracting issues, using best practices identified by the Comptroller General of the United States and heads of other agencies in accordance with section 436(d);

(2) the level of coordination among the Federal Director, the Office of Management and Budget, the Department of Energy, and relevant agencies;

(3) the performance of the Federal Director and other agencies in carrying out the implementation plan;

(4) the design stage of high-performance green building measures;

(5) high-performance building data that were collected and reported to the Office; and

(6) such other matters as the Comptroller General of the United States determines to be appropriate.

(c) **ENVIRONMENTAL STEWARDSHIP SCORECARD.**—The Federal Director shall consult with the Advisory Committee to enhance, and assist in the implementation of, the Office of Management and Budget government efficiency reports and scorecards under section 528 and the Environmental Stewardship Scorecard announced at the White House summit on Federal sustainable buildings in

January 2006, to measure the implementation by each Federal agency of sustainable design and green building initiatives.

SEC. 438. STORM WATER RUNOFF REQUIREMENTS FOR FEDERAL DEVELOPMENT PROJECTS.

The sponsor of any development or redevelopment project involving a Federal facility with a footprint that exceeds 5,000 square feet shall use site planning, design, construction, and maintenance strategies for the property to maintain or restore, to the maximum extent technically feasible, the predevelopment hydrology of the property with regard to the temperature, rate, volume, and duration of flow.

SEC. 439. COST-EFFECTIVE TECHNOLOGY ACCELERATION PROGRAM.

(a) **DEFINITION OF ADMINISTRATOR.**—In this section, the term “Administrator” means the Administrator of General Services.

(b) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—The Administrator shall establish a program to accelerate the use of more cost-effective technologies and practices at GSA facilities.

(2) **REQUIREMENTS.**—The program established under this subsection shall—

(A) ensure centralized responsibility for the coordination of cost reduction-related recommendations, practices, and activities of all relevant Federal agencies;

(B) provide technical assistance and operational guidance to applicable tenants to achieve the goal identified in subsection (c)(2)(B)(ii);

(C) establish methods to track the success of Federal departments and agencies with respect to that goal; and

(D) be fully coordinated with and no less stringent nor less energy-conserving or water-conserving than required by other provisions of this Act and other applicable law, including sections 321 through 324, 431 through 438, 461, 511 through 518, and 523 through 525 and amendments made by those sections.

(c) **ACCELERATED USE OF TECHNOLOGIES.**—

(1) **REVIEW.**—

(A) **IN GENERAL.**—As part of the program under this section, not later than 90 days after the date of enactment of this Act, the Administrator shall conduct a review of—

(i) current use of cost-effective lighting technologies and geothermal heat pumps in GSA facilities; and

(ii) the availability to managers of GSA facilities of cost-effective lighting technologies and geothermal heat pumps.

(B) **REQUIREMENTS.**—The review under subparagraph (A) shall—

(i) examine the use of cost-effective lighting technologies, geothermal heat pumps, and other cost-effective technologies and practices by Federal agencies in GSA facilities; and

(ii) as prepared in consultation with the Administrator of the Environmental Protection Agency, identify cost-effective lighting technology and geothermal heat pump technology standards that could be used for all types of GSA facilities.

(2) **REPLACEMENT.**—

(A) **IN GENERAL.**—As part of the program under this section, not later than 180 days after the date of enactment of this Act, the Administrator shall establish, using available appropriations and programs implementing sections 432 and 525 (and amendments made by those sections), a cost-effective lighting technology and geothermal heat pump technology acceleration program to achieve maximum feasible replacement of existing lighting, heating, cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies in each GSA facility. Such program shall fully comply with the requirements of

sections 321 through 324, 431 through 438, 461, 511 through 518, and 523 through 525 and amendments made by those sections and any other provisions of law, which shall be applicable to the extent that they are more stringent or would achieve greater energy savings than required by this section.

(B) **ACCELERATION PLAN TIMETABLE.**—

(i) **IN GENERAL.**—To implement the program established under subparagraph (A), not later than 1 year after the date of enactment of this Act, the Administrator shall establish a timetable of actions to comply with the requirements of this section and sections 431 through 435, whichever achieves greater energy savings most expeditiously, including milestones for specific activities needed to replace existing lighting, heating, cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies, to the maximum extent feasible (including at the maximum rate feasible), at each GSA facility.

(ii) **GOAL.**—The goal of the timetable under clause (i) shall be to complete, using available appropriations and programs implementing sections 431 through 435 (and amendments made by those sections), maximum feasible replacement of existing lighting, heating, and cooling technologies with cost-effective lighting technologies and geothermal heat pump technologies consistent with the requirements of this section and sections 431 through 435, whichever achieves greater energy savings most expeditiously. Notwithstanding any provision of this section, such program shall fully comply with the requirements of the Act including sections 321 through 324, 431 through 438, 461, 511 through 518, and 523 through 525 and amendments made by those sections and other provisions of law, which shall be applicable to the extent that they are more stringent or would achieve greater energy or water savings than required by this section.

(d) **GSA FACILITY TECHNOLOGIES AND PRACTICES.**—

(1) **IN GENERAL.**—Not later than 180 days after the date of enactment of this Act, and annually thereafter, the Administrator shall—

(A) ensure that a manager responsible for implementing section 432 and for accelerating the use of cost-effective technologies and practices is designated for each GSA facility; and

(B) submit to Congress a plan to comply with section 432, this section, and other applicable provisions of this Act and applicable law with respect to energy and water conservation at GSA facilities.

(2) **MEASURES.**—The plan shall implement measures required by such other provisions of law in accordance with those provisions, and shall implement the measures required by this section to the maximum extent feasible (including at the maximum rate feasible) using available appropriations and programs implementing sections 431 through 435 and 525 (and amendments made by those sections), by not later than the date that is 5 years after the date of enactment of this Act.

(3) **CONTENTS OF PLAN.**—The plan shall—

(A) with respect to cost-effective technologies and practices—

(i) identify the specific activities needed to comply with sections 431 through 435;

(ii) identify the specific activities needed to achieve at least a 20-percent reduction in operational costs through the application of cost-effective technologies and practices from 2003 levels at GSA facilities by not later than 5 years after the date of enactment of this Act;

(iii) describe activities required and carried out to estimate the funds necessary to

achieve the reduction described in clauses (i) and (ii);

(B) include an estimate of the funds necessary to carry out this section;

(C) describe the status of the implementation of cost-effective technologies and practices at GSA facilities, including—

(i) the extent to which programs, including the program established under subsection (b), are being carried out in accordance with this subtitle; and

(ii) the status of funding requests and appropriations for those programs;

(D) identify within the planning, budgeting, and construction processes, all types of GSA facility-related procedures that inhibit new and existing GSA facilities from implementing cost-effective technologies;

(E) recommend language for uniform standards for use by Federal agencies in implementing cost-effective technologies and practices;

(F) in coordination with the Office of Management and Budget, review the budget process for capital programs with respect to alternatives for—

(i) implementing measures that will assure that Federal agencies retain all identified savings accrued as a result of the use of cost-effective technologies, consistent with section 543(a)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(1)), and other applicable law; and

(ii) identifying short- and long-term cost savings that accrue from the use of cost-effective technologies and practices;

(G) with respect to cost-effective technologies and practices, achieve substantial operational cost savings through the application of the technologies; and

(H) include recommendations to address each of the matters, and a plan for implementation of each recommendation, described in subparagraphs (A) through (G).

(4) **ADMINISTRATION.**—Notwithstanding any provision of this section, the program required under this section shall fully comply with the requirements of sections 321 through 324, 431 through 438, 461, 511 through 518, and 523 through 525 and amendments made by those sections, which shall be applicable to the extent that they are more stringent or would achieve greater energy or water savings than required by this section.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—

There are authorized to be appropriated such sums as are necessary to carry out this section, to remain available until expended.

SEC. 440. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out sections 434 through 439 and 482 \$4,000,000 for each of fiscal years 2008 through 2012, to remain available until expended.

SEC. 441. PUBLIC BUILDING LIFE-CYCLE COSTS.

Section 544(a)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8254(a)(1))

is amended by striking “25” and inserting “40”.

Subtitle D—Industrial Energy Efficiency

SEC. 451. INDUSTRIAL ENERGY EFFICIENCY.

(a) **IN GENERAL.**—Title III of the Energy Policy and Conservation Act (42 U.S.C. 6291 et seq.) is amended by inserting after part D the following:

“PART E—INDUSTRIAL ENERGY EFFICIENCY

“SEC. 371. DEFINITIONS.

“In this part:

“(1) **ADMINISTRATOR.**—The term ‘Administrator’ means the Administrator of the Environmental Protection Agency.

“(2) **COMBINED HEAT AND POWER.**—The term ‘combined heat and power system’ means a facility that—

“(A) simultaneously and efficiently produces useful thermal energy and electricity; and

“(B) recovers not less than 60 percent of the energy value in the fuel (on a higher-heating-value basis) in the form of useful thermal energy and electricity.

“(3) NET EXCESS POWER.—The term ‘net excess power’ means, for any facility, recoverable waste energy recovered in the form of electricity in quantities exceeding the total consumption of electricity at the specific time of generation on the site at which the facility is located.

“(4) PROJECT.—The term ‘project’ means a recoverable waste energy project or a combined heat and power system project.

“(5) RECOVERABLE WASTE ENERGY.—The term ‘recoverable waste energy’ means waste energy from which electricity or useful thermal energy may be recovered through modification of an existing facility or addition of a new facility.

“(6) REGISTRY.—The term ‘Registry’ means the Registry of Recoverable Waste Energy Sources established under section 372(d).

“(7) USEFUL THERMAL ENERGY.—The term ‘useful thermal energy’ means energy—

“(A) in the form of direct heat, steam, hot water, or other thermal form that is used in production and beneficial measures for heating, cooling, humidity control, process use, or other valid thermal end-use energy requirements; and

“(B) for which fuel or electricity would otherwise be consumed.

“(8) WASTE ENERGY.—The term ‘waste energy’ means—

“(A) exhaust heat or flared gas from any industrial process;

“(B) waste gas or industrial tail gas that would otherwise be flared, incinerated, or vented;

“(C) a pressure drop in any gas, excluding any pressure drop to a condenser that subsequently vents the resulting heat; and

“(D) such other forms of waste energy as the Administrator may determine.

“(9) OTHER TERMS.—The terms ‘electric utility’, ‘nonregulated electric utility’, ‘State regulated electric utility’, and other terms have the meanings given those terms in title I of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2611 et seq.).

“SEC. 372. SURVEY AND REGISTRY.

“(a) RECOVERABLE WASTE ENERGY INVENTORY PROGRAM.—

“(1) IN GENERAL.—The Administrator, in cooperation with the Secretary and State energy offices, shall establish a recoverable waste energy inventory program.

“(2) SURVEY.—The program shall include—

“(A) an ongoing survey of all major industrial and large commercial combustion sources in the United States (as defined by the Administrator) and the sites at which the sources are located; and

“(B) a review of each source for the quantity and quality of waste energy produced at the source.

“(b) CRITERIA.—

“(1) IN GENERAL.—Not later than 270 days after the date of enactment of the Energy Independence and Security Act of 2007, the Administrator shall publish a rule for establishing criteria for including sites in the Registry.

“(2) INCLUSIONS.—The criteria shall include—

“(A) a requirement that, to be included in the Registry, a project at the site shall be determined to be economically feasible by virtue of offering a payback of invested costs not later than 5 years after the date of first full project operation (including incentives offered under this part);

“(B) standards to ensure that projects proposed for inclusion in the Registry are not developed or used for the primary purpose of making sales of excess electric power under the regulatory provisions of this part; and

“(C) procedures for contesting the listing of any source or site on the Registry by any State, utility, or other interested person.

“(c) TECHNICAL SUPPORT.—On the request of the owner or operator of a source or site included in the Registry, the Secretary shall—

“(1) provide to owners or operators of combustion sources technical support; and

“(2) offer partial funding (in an amount equal to not more than ½ of total costs) for feasibility studies to confirm whether or not investment in recovery of waste energy or combined heat and power at a source would offer a payback period of 5 years or less.

“(d) REGISTRY.—

“(1) ESTABLISHMENT.—

“(A) IN GENERAL.—Not later than 1 year after the date of enactment of the Energy Independence and Security Act of 2007, the Administrator shall establish a Registry of Recoverable Waste Energy Sources, and sites on which the sources are located, that meet the criteria established under subsection (b).

“(B) UPDATES; AVAILABILITY.—The Administrator shall—

“(i) update the Registry on a regular basis; and

“(ii) make the Registry available to the public on the website of the Environmental Protection Agency.

“(C) CONTESTING LISTING.—Any State, electric utility, or other interested person may contest the listing of any source or site by submitting a petition to the Administrator.

“(2) CONTENTS.—

“(A) IN GENERAL.—The Administrator shall register and include on the Registry all sites meeting the criteria established under subsection (b).

“(B) QUANTITY OF RECOVERABLE WASTE ENERGY.—The Administrator shall—

“(i) calculate the total quantities of potentially recoverable waste energy from sources at the sites, nationally and by State; and

“(ii) make public—

“(I) the total quantities described in clause (i); and

“(II) information on the criteria pollutant and greenhouse gas emissions savings that might be achieved with recovery of the waste energy from all sources and sites listed on the Registry.

“(3) AVAILABILITY OF INFORMATION.—

“(A) IN GENERAL.—The Administrator shall notify owners or operators of recoverable waste energy sources and sites listed on the Registry prior to publishing the listing.

“(B) DETAILED QUANTITATIVE INFORMATION.—

“(1) IN GENERAL.—Except as provided in clause (ii), the owner or operator of a source at a site may elect to have detailed quantitative information concerning the site not made public by notifying the Administrator of the election.

“(ii) LIMITED AVAILABILITY.—The information shall be made available to—

“(I) the applicable State energy office; and

“(II) any utility requested to support recovery of waste energy from the source pursuant to the incentives provided under section 374.

“(iii) STATE TOTALS.—Information concerning the site shall be included in the total quantity of recoverable waste energy for a State unless there are fewer than 3 sites in the State.

“(4) REMOVAL OF PROJECTS FROM REGISTRY.—

“(A) IN GENERAL.—Subject to subparagraph (B), as a project achieves successful recovery of waste energy, the Administrator shall—

“(i) remove the related sites or sources from the Registry; and

“(ii) designate the removed projects as eligible for incentives under section 374.

“(B) LIMITATION.—No project shall be removed from the Registry without the consent of the owner or operator of the project if—

“(i) the owner or operator has submitted a petition under section 374; and

“(ii) the petition has not been acted on or denied.

“(5) INELIGIBILITY OF CERTAIN SOURCES.—The Administrator shall not list any source constructed after the date of the enactment of the Energy Independence and Security Act of 2007 on the Registry if the Administrator determines that the source—

“(A) was developed for the primary purpose of making sales of excess electric power under the regulatory provisions of this part; or

“(B) does not capture at least 60 percent of the total energy value of the fuels used (on a higher-heating-value basis) in the form of useful thermal energy, electricity, mechanical energy, chemical output, or any combination thereof.

“(e) SELF-CERTIFICATION.—

“(1) IN GENERAL.—Subject to any procedures that are established by the Administrator, an owner, operator, or third-party developer of a recoverable waste energy project that qualifies under standards established by the Administrator may self-certify the sites or sources of the owner, operator, or developer to the Administrator for inclusion in the Registry.

“(2) REVIEW AND APPROVAL.—To prevent a fraudulent listing, a site or source shall be included on the Registry only if the Administrator reviews and approves the self-certification.

“(f) NEW FACILITIES.—As a new energy-consuming industrial facility is developed after the date of enactment of the Energy Independence and Security Act of 2007, to the extent the facility may constitute a site with recoverable waste energy that may qualify for inclusion on the Registry, the Administrator may elect to include the facility on the Registry, at the request of the owner, operator, or developer of the facility, on a conditional basis with the site to be removed from the Registry if the development ceases or the site fails to qualify for listing under this part.

“(g) OPTIMUM MEANS OF RECOVERY.—For each site listed in the Registry, at the request of the owner or operator of the site, the Administrator shall offer, in cooperation with Clean Energy Application Centers operated by the Secretary of Energy, suggestions for optimum means of recovery of value from waste energy stream in the form of electricity, useful thermal energy, or other energy-related products.

“(h) REVISION.—Each annual report of a State under section 548(a) of the National Energy Conservation Policy Act (42 U.S.C. 8258(a)) shall include the results of the survey for the State under this section.

“(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to—

“(1) the Administrator to create and maintain the Registry and services authorized by this section, \$1,000,000 for each of fiscal years 2008 through 2012; and

“(2) the Secretary—

“(A) to assist site or source owners and operators in determining the feasibility of projects authorized by this section, \$2,000,000 for each of fiscal years 2008 through 2012; and

“(B) to provide funding for State energy office functions under this section, \$5,000,000.

“SEC. 373. WASTE ENERGY RECOVERY INCENTIVE GRANT PROGRAM.

“(a) ESTABLISHMENT.—The Secretary shall establish in the Department of Energy a waste energy recovery incentive grant program to provide incentive grants to—

“(1) owners and operators of projects that successfully produce electricity or incremental useful thermal energy from waste energy recovery;

“(2) utilities purchasing or distributing the electricity; and

“(3) States that have achieved 80 percent or more of recoverable waste heat recovery opportunities.

“(b) GRANTS TO PROJECTS AND UTILITIES.—“(1) IN GENERAL.—The Secretary shall make grants under this section—

“(A) to the owners or operators of waste energy recovery projects; and

“(B) in the case of excess power purchased or transmitted by a electric utility, to the utility.

“(2) PROOF.—Grants may only be made under this section on receipt of proof of waste energy recovery or excess electricity generation, or both, from the project in a form prescribed by the Secretary.

“(3) EXCESS ELECTRIC ENERGY.—

“(A) IN GENERAL.—In the case of waste energy recovery, a grant under this section shall be made at the rate of \$10 per megawatt hour of documented electricity produced from recoverable waste energy (or by prevention of waste energy in the case of a new facility) by the project during the first 3 calendar years of production, beginning on or after the date of enactment of the Energy Independence and Security Act of 2007.

“(B) UTILITIES.—If the project produces net excess power and an electric utility purchases or transmits the excess power, 50 percent of so much of the grant as is attributable to the net excess power shall be paid to the electric utility purchasing or transporting the net excess power.

“(4) USEFUL THERMAL ENERGY.—In the case of waste energy recovery that produces useful thermal energy that is used for a purpose different from that for which the project is principally designed, a grant under this section shall be made to the owner or operator of the waste energy recovery project at the rate of \$10 for each 3,412,000 Btus of the excess thermal energy used for the different purpose.

“(c) GRANTS TO STATES.—In the case of any State that has achieved 80 percent or more of waste heat recovery opportunities identified by the Secretary under this part, the Administrator shall make a 1-time grant to the State in an amount of not more than \$1,000 per megawatt of waste-heat capacity recovered (or a thermal equivalent) to support State-level programs to identify and achieve additional energy efficiency.

“(d) ELIGIBILITY.—The Secretary shall—

“(1) establish rules and guidelines to establish eligibility for grants under subsection (b);

“(2) publicize the availability of the grant program known to owners or operators of recoverable waste energy sources and sites listed on the Registry; and

“(3) award grants under the program on the basis of the merits of each project in recovering or preventing waste energy throughout the United States on an impartial, objective, and not unduly discriminatory basis.

“(e) LIMITATION.—The Secretary shall not award grants to any person for a combined heat and power project or a waste heat recovery project that qualifies for specific Federal tax incentives for combined heat and power or for waste heat recovery.

“(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary—

“(1) to make grants to projects and utilities under subsection (b)—

“(A) \$100,000,000 for fiscal year 2008 and \$200,000,000 for each of fiscal years 2009 through 2012; and

“(B) such additional amounts for fiscal year 2008 and each fiscal year thereafter as may be necessary for administration of the waste energy recovery incentive grant program; and

“(2) to make grants to States under subsection (b), \$10,000,000 for each of fiscal years 2008 through 2012, to remain available until expended.

“SEC. 374. ADDITIONAL INCENTIVES FOR RECOVERY, USE, AND PREVENTION OF INDUSTRIAL WASTE ENERGY.

“(a) CONSIDERATION OF STANDARD.—

“(1) IN GENERAL.—Not later than 180 days after the receipt by a State regulatory authority (with respect to each electric utility for which the authority has ratemaking authority), or nonregulated electric utility, of a request from a project sponsor or owner or operator, the State regulatory authority or nonregulated electric utility shall—

“(A) provide public notice and conduct a hearing respecting the standard established by subsection (b); and

“(B) on the basis of the hearing, consider and make a determination whether or not it is appropriate to implement the standard to carry out the purposes of this part.

“(2) RELATIONSHIP TO STATE LAW.—For purposes of any determination under paragraph (1) and any review of the determination in any court, the purposes of this section supplement otherwise applicable State law.

“(3) NONADOPTION OF STANDARD.—Nothing in this part prohibits any State regulatory authority or nonregulated electric utility from making any determination that it is not appropriate to adopt any standard described in paragraph (1), pursuant to authority under otherwise applicable State law.

“(b) STANDARD FOR SALES OF EXCESS POWER.—For purposes of this section, the standard referred to in subsection (a) shall provide that an owner or operator of a waste energy recovery project identified on the Registry that generates net excess power shall be eligible to benefit from at least 1 of the options described in subsection (c) for disposal of the net excess power in accordance with the rate conditions and limitations described in subsection (d).

“(c) OPTIONS.—The options referred to in subsection (b) are as follows:

“(1) SALE OF NET EXCESS POWER TO UTILITY.—The electric utility shall purchase the net excess power from the owner or operator of the eligible waste energy recovery project during the operation of the project under a contract entered into for that purpose.

“(2) TRANSPORT BY UTILITY FOR DIRECT SALE TO THIRD PARTY.—The electric utility shall transmit the net excess power on behalf of the project owner or operator to up to 3 separate locations on the system of the utility for direct sale by the owner or operator to third parties at those locations.

“(3) TRANSPORT OVER PRIVATE TRANSMISSION LINES.—The State and the electric utility shall permit, and shall waive or modify such laws as would otherwise prohibit, the construction and operation of private electric wires constructed, owned, and operated by the project owner or operator, to transport the power to up to 3 purchasers within a 3-mile radius of the project, allowing the wires to use or cross public rights-of-way, without subjecting the project to regulation as a public utility, and according the wires the same treatment for safety, zoning, land use, and other legal privileges as apply or would apply to the wires of the utility, except that—

“(A) there shall be no grant of any power of eminent domain to take or cross private property for the wires; and

“(B) the wires shall be physically segregated and not interconnected with any portion of the system of the utility, except

on the customer side of the revenue meter of the utility and in a manner that precludes any possible export of the electricity onto the utility system, or disruption of the system.

“(4) AGREED ON ALTERNATIVES.—The utility and the owner or operator of the project may reach agreement on any alternate arrangement and payments or rates associated with the arrangement that is mutually satisfactory and in accord with State law.

“(d) RATE CONDITIONS AND CRITERIA.—

“(1) DEFINITIONS.—In this subsection:

“(A) PER UNIT DISTRIBUTION COSTS.—The term ‘per unit distribution costs’ means (in kilowatt hours) the quotient obtained by dividing—

“(i) the depreciated book-value distribution system costs of a utility; by

“(ii) the volume of utility electricity sales or transmission during the previous year at the distribution level.

“(B) PER UNIT DISTRIBUTION MARGIN.—The term ‘per unit distribution margin’ means—

“(i) in the case of a State-regulated electric utility, a per-unit gross pretax profit equal to the product obtained by multiplying—

“(I) the State-approved percentage rate of return for the utility for distribution system assets; by

“(II) the per unit distribution costs; and

“(ii) in the case of a nonregulated utility, a per unit contribution to net revenues determined multiplying—

“(I) the percentage (but not less than 10 percent) obtained by dividing—

“(aa) the amount of any net revenue payment or contribution to the owners or subscribers of the nonregulated utility during the prior year; by

“(bb) the gross revenues of the utility during the prior year to obtain a percentage; by

“(II) the per unit distribution costs.

“(C) PER UNIT TRANSMISSION COSTS.—The term ‘per unit transmission costs’ means the total cost of those transmission services purchased or provided by a utility on a per-kilowatt-hour basis as included in the retail rate of the utility.

“(2) OPTIONS.—The options described in paragraphs (1) and (2) in subsection (c) shall be offered under purchase and transport rate conditions that reflect the rate components defined under paragraph (1) as applicable under the circumstances described in paragraph (3).

“(3) APPLICABLE RATES.—

“(A) RATES APPLICABLE TO SALE OF NET EXCESS POWER.—

“(i) IN GENERAL.—Sales made by a project owner or operator of a facility under the option described in subsection (c)(1) shall be paid for on a per kilowatt hour basis that shall equal the full undiscounted retail rate paid to the utility for power purchased by the facility minus per unit distribution costs, that applies to the type of utility purchasing the power.

“(ii) VOLTAGES EXCEEDING 25 KILOVOLTS.—If the net excess power is made available for purchase at voltages that must be transformed to or from voltages exceeding 25 kilovolts to be available for resale by the utility, the purchase price shall further be reduced by per unit transmission costs.

“(B) RATES APPLICABLE TO TRANSPORT BY UTILITY FOR DIRECT SALE TO THIRD PARTIES.—

“(i) IN GENERAL.—Transportation by utilities of power on behalf of the owner or operator of a project under the option described in subsection (c)(2) shall incur a transportation rate that shall equal the per unit distribution costs and per unit distribution margin, that applies to the type of utility transporting the power.

“(ii) VOLTAGES EXCEEDING 25 KILOVOLTS.—If the net excess power is made available for

transportation at voltages that must be transformed to or from voltages exceeding 25 kilovolts to be transported to the designated third-party purchasers, the transport rate shall further be increased by per unit transmission costs.

“(iii) STATES WITH COMPETITIVE RETAIL MARKETS FOR ELECTRICITY.—In a State with a competitive retail market for electricity, the applicable transportation rate for similar transportation shall be applied in lieu of any rate calculated under this paragraph.

“(4) LIMITATIONS.—

“(A) IN GENERAL.—Any rate established for sale or transportation under this section shall—

“(i) be modified over time with changes in the underlying costs or rates of the electric utility; and

“(ii) reflect the same time-sensitivity and billing periods as are established in the retail sales or transportation rates offered by the utility.

“(B) LIMITATION.—No utility shall be required to purchase or transport a quantity of net excess power under this section that exceeds the available capacity of the wires, meter, or other equipment of the electric utility serving the site unless the owner or operator of the project agrees to pay necessary and reasonable upgrade costs.

“(e) PROCEDURAL REQUIREMENTS FOR CONSIDERATION AND DETERMINATION.—

“(1) PUBLIC NOTICE AND HEARING.—

“(A) IN GENERAL.—The consideration referred to in subsection (a) shall be made after public notice and hearing.

“(B) ADMINISTRATION.—The determination referred to in subsection (a) shall be—

“(i) in writing;

“(ii) based on findings included in the determination and on the evidence presented at the hearing; and

“(iii) available to the public.

“(2) INTERVENTION BY ADMINISTRATOR.—The Administrator may intervene as a matter of right in a proceeding conducted under this section—

“(A) to calculate—

“(i) the energy and emissions likely to be saved by electing to adopt 1 or more of the options; and

“(ii) the costs and benefits to ratepayers and the utility; and

“(B) to advocate for the waste-energy recovery opportunity.

“(3) PROCEDURES.—

“(A) IN GENERAL.—Except as otherwise provided in paragraphs (1) and (2), the procedures for the consideration and determination referred to in subsection (a) shall be the procedures established by the State regulatory authority or the nonregulated electric utility.

“(B) MULTIPLE PROJECTS.—If there is more than 1 project seeking consideration simultaneously in connection with the same utility, the proceeding may encompass all such projects, if full attention is paid to individual circumstances and merits and an individual judgment is reached with respect to each project.

“(f) IMPLEMENTATION.—

“(1) IN GENERAL.—The State regulatory authority (with respect to each electric utility for which the authority has ratemaking authority) or nonregulated electric utility may, to the extent consistent with otherwise applicable State law—

“(A) implement the standard determined under this section; or

“(B) decline to implement any such standard.

“(2) NONIMPLEMENTATION OF STANDARD.—

“(A) IN GENERAL.—If a State regulatory authority (with respect to each electric utility for which the authority has ratemaking authority) or nonregulated electric utility de-

clines to implement any standard established by this section, the authority or nonregulated electric utility shall state in writing the reasons for declining to implement the standard.

“(B) AVAILABILITY TO PUBLIC.—The statement of reasons shall be available to the public.

“(C) ANNUAL REPORT.—The Administrator shall include in an annual report submitted to Congress a description of the lost opportunities for waste-heat recovery from the project described in subparagraph (A), specifically identifying the utility and stating the quantity of lost energy and emissions savings calculated.

“(D) NEW PETITION.—If a State regulatory authority (with respect to each electric utility for which the authority has ratemaking authority) or nonregulated electric utility declines to implement the standard established by this section, the project sponsor may submit a new petition under this section with respect to the project at any time after the date that is 2 years after the date on which the State regulatory authority or nonregulated utility declined to implement the standard.

“SEC. 375. CLEAN ENERGY APPLICATION CENTERS.

“(a) RENAMING.—

“(1) IN GENERAL.—The Combined Heat and Power Application Centers of the Department of Energy are redesignated as Clean Energy Application Centers.

“(2) REFERENCES.—Any reference in any law, rule, regulation, or publication to a Combined Heat and Power Application Center shall be treated as a reference to a Clean Energy Application Center.

“(b) RELOCATION.—

“(1) IN GENERAL.—In order to better coordinate efforts with the separate Industrial Assessment Centers and to ensure that the energy efficiency and, when applicable, the renewable nature of deploying mature clean energy technology is fully accounted for, the Secretary shall relocate the administration of the Clean Energy Application Centers to the Office of Energy Efficiency and Renewable Energy within the Department of Energy.

“(2) OFFICE OF ELECTRICITY DELIVERY AND ENERGY RELIABILITY.—The Office of Electricity Delivery and Energy Reliability shall—

“(A) continue to perform work on the role of technology described in paragraph (1) in support of the grid and the reliability and security of the technology; and

“(B) shall assist the Clean Energy Application Centers in the work of the Centers with regard to the grid and with electric utilities.

“(c) GRANTS.—

“(1) IN GENERAL.—The Secretary shall make grants to universities, research centers, and other appropriate institutions to ensure the continued operations and effectiveness of 8 Regional Clean Energy Application Centers in each of the following regions (as designated for such purposes as of the date of the enactment of the Energy Independence and Security Act of 2007):

“(A) Gulf Coast.

“(B) Intermountain.

“(C) Mid-Atlantic.

“(D) Midwest.

“(E) Northeast.

“(F) Northwest.

“(G) Pacific.

“(H) Southeast.

“(2) ESTABLISHMENT OF GOALS AND COMPLIANCE.—In making grants under this subsection, the Secretary shall ensure that sufficient goals are established and met by each Center throughout the program duration concerning outreach and technology deployment.

“(d) ACTIVITIES.—

“(1) IN GENERAL.—Each Clean Energy Application Center shall—

“(A) operate a program to encourage deployment of clean energy technologies through education and outreach to building and industrial professionals; and other individuals and organizations with an interest in efficient energy use; and

“(B) provide project specific support to building and industrial professionals through assessments and advisory activities.

“(2) TYPES OF ACTIVITIES.—Funds made available under this section may be used—

“(A) to develop and distribute informational materials on clean energy technologies, including continuation of the 8 websites in existence on the date of enactment of the Energy Independence and Security Act of 2007;

“(B) to develop and conduct target market workshops, seminars, internet programs, and other activities to educate end users, regulators, and stakeholders in a manner that leads to the deployment of clean energy technologies;

“(C) to provide or coordinate onsite assessments for sites and enterprises that may consider deployment of clean energy technology;

“(D) to perform market research to identify high profile candidates for clean energy deployment;

“(E) to provide consulting support to sites considering deployment of clean energy technologies;

“(F) to assist organizations developing clean energy technologies to overcome barriers to deployment; and

“(G) to assist companies and organizations with performance evaluations of any clean energy technology implemented.

“(e) DURATION.—

“(1) IN GENERAL.—A grant awarded under this section shall be for a period of 5 years

“(2) ANNUAL EVALUATIONS.—Each grant shall be evaluated annually for the continuation of the grant based on the activities and results of the grant.

“(f) AUTHORIZATION.—There is authorized to be appropriated to carry out this section \$10,000,000 for each of fiscal years 2008 through 2012.”.

(b) TABLE OF CONTENTS.—The table of contents of the Energy Policy and Conservation Act (42 U.S.C. prec. 6201) is amended by inserting after the items relating to part D of title III the following:

“PART E—INDUSTRIAL ENERGY EFFICIENCY

“Sec. 371. Definitions.

“Sec. 372. Survey and Registry.

“Sec. 373. Waste energy recovery incentive grant program.

“Sec. 374. Additional incentives for recovery, utilization and prevention of industrial waste energy.

“Sec. 375. Clean Energy Application Centers.”.

SEC. 452. ENERGY-INTENSIVE INDUSTRIES PROGRAM.

(a) DEFINITIONS.—In this section:

(1) ELIGIBLE ENTITY.—The term “eligible entity” means—

(A) an energy-intensive industry;

(B) a national trade association representing an energy-intensive industry; or

(C) a person acting on behalf of 1 or more energy-intensive industries or sectors, as determined by the Secretary.

(2) ENERGY-INTENSIVE INDUSTRY.—The term “energy-intensive industry” means an industry that uses significant quantities of energy as part of its primary economic activities, including—

(A) information technology, including data centers containing electrical equipment used in processing, storing, and transmitting digital information;

(B) consumer product manufacturing;
 (C) food processing;
 (D) materials manufacturers, including—
 (i) aluminum;
 (ii) chemicals;
 (iii) forest and paper products;
 (iv) metal casting;
 (v) glass;
 (vi) petroleum refining;
 (vii) mining; and
 (viii) steel;
 (E) other energy-intensive industries, as determined by the Secretary.

(3) **FEEDSTOCK.**—The term “feedstock” means the raw material supplied for use in manufacturing, chemical, and biological processes.

(4) **PARTNERSHIP.**—The term “partnership” means an energy efficiency partnership established under subsection (c)(1)(A).

(5) **PROGRAM.**—The term “program” means the energy-intensive industries program established under subsection (b).

(b) **ESTABLISHMENT OF PROGRAM.**—The Secretary shall establish a program under which the Secretary, in cooperation with energy-intensive industries and national industry trade associations representing the energy-intensive industries, shall support, research, develop, and promote the use of new materials processes, technologies, and techniques to optimize energy efficiency and the economic competitiveness of the United States’ industrial and commercial sectors.

(c) **PARTNERSHIPS.**—

(1) **IN GENERAL.**—As part of the program, the Secretary shall establish energy efficiency partnerships between the Secretary and eligible entities to conduct research on, develop, and demonstrate new processes, technologies, and operating practices and techniques to significantly improve the energy efficiency of equipment and processes used by energy-intensive industries, including the conduct of activities to—

(A) increase the energy efficiency of industrial processes and facilities;

(B) research, develop, and demonstrate advanced technologies capable of energy intensity reductions and increased environmental performance; and

(C) promote the use of the processes, technologies, and techniques described in subparagraphs (A) and (B).

(2) **ELIGIBLE ACTIVITIES.**—Partnership activities eligible for funding under this subsection include—

(A) feedstock and recycling research, development, and demonstration activities to identify and promote—

(i) opportunities for meeting industry feedstock requirements with more energy efficient and flexible sources of feedstock or energy supply;

(ii) strategies to develop and deploy technologies that improve the quality and quantity of feedstocks recovered from process and waste streams; and

(iii) other methods using recycling, reuse, and improved industrial materials;

(B) research to develop and demonstrate technologies and processes that utilize alternative energy sources to supply heat, power, and new feedstocks for energy-intensive industries;

(C) research to achieve energy efficiency in steam, power, control system, and process heat technologies, and in other manufacturing processes; and

(D) industrial and commercial energy efficiency and sustainability assessments to—

(i) assist individual industrial and commercial sectors in developing tools, techniques, and methodologies to assess—

(I) the unique processes and facilities of the sectors;

(II) the energy utilization requirements of the sectors; and

(III) the application of new, more energy efficient technologies; and

(ii) conduct energy savings assessments;

(E) the incorporation of technologies and innovations that would significantly improve the energy efficiency and utilization of energy-intensive commercial applications; and

(F) any other activities that the Secretary determines to be appropriate.

(3) **PROPOSALS.**—

(A) **IN GENERAL.**—To be eligible for funding under this subsection, a partnership shall submit to the Secretary a proposal that describes the proposed research, development, or demonstration activity to be conducted by the partnership.

(B) **REVIEW.**—After reviewing the scientific, technical, and commercial merit of a proposal submitted under subparagraph (A), the Secretary shall approve or disapprove the proposal.

(C) **COMPETITIVE AWARDS.**—The provision of funding under this subsection shall be on a competitive basis.

(4) **COST-SHARING REQUIREMENT.**—In carrying out this section, the Secretary shall require cost sharing in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(d) **GRANTS.**—The Secretary may award competitive grants for innovative technology research, development and demonstrations to universities, individual inventors, and small companies, based on energy savings potential, commercial viability, and technical merit.

(e) **INSTITUTION OF HIGHER EDUCATION-BASED INDUSTRIAL RESEARCH AND ASSESSMENT CENTERS.**—The Secretary shall provide funding to institution of higher education-based industrial research and assessment centers, whose purpose shall be—

(1) to identify opportunities for optimizing energy efficiency and environmental performance;

(2) to promote applications of emerging concepts and technologies in small and medium-sized manufacturers;

(3) to promote research and development for the use of alternative energy sources to supply heat, power, and new feedstocks for energy-intensive industries;

(4) to coordinate with appropriate Federal and State research offices, and provide a clearinghouse for industrial process and energy efficiency technical assistance resources; and

(5) to coordinate with State-accredited technical training centers and community colleges, while ensuring appropriate services to all regions of the United States.

(f) **AUTHORIZATION OF APPROPRIATIONS.**—

(1) **IN GENERAL.**—There are authorized to be appropriated to the Secretary to carry out this section—

(A) \$184,000,000 for fiscal year 2008;

(B) \$190,000,000 for fiscal year 2009;

(C) \$196,000,000 for fiscal year 2010;

(D) \$202,000,000 for fiscal year 2011;

(E) \$208,000,000 for fiscal year 2012; and

(F) such sums as are necessary for fiscal year 2013 and each fiscal year thereafter.

(2) **PARTNERSHIP ACTIVITIES.**—Of the amounts made available under paragraph (1), not less than 50 percent shall be used to pay the Federal share of partnership activities under subsection (c).

(3) **COORDINATION AND NONDUPLICATION.**—The Secretary shall coordinate efforts under this section with other programs of the Department and other Federal agencies to avoid duplication of effort.

SEC. 453. ENERGY EFFICIENCY FOR DATA CENTER BUILDINGS.

(a) **DEFINITIONS.**—In this section:

(1) **DATA CENTER.**—The term “data center” means any facility that primarily contains

electronic equipment used to process, store, and transmit digital information, which may be—

(A) a free-standing structure; or

(B) a facility within a larger structure, that uses environmental control equipment to maintain the proper conditions for the operation of electronic equipment.

(2) **DATA CENTER OPERATOR.**—The term “data center operator” means any person or government entity that builds or operates a data center or purchases data center services, equipment, and facilities.

(b) **VOLUNTARY NATIONAL INFORMATION PROGRAM.**—

(1) **IN GENERAL.**—Not later than 90 days after the date of enactment of this Act, the Secretary and the Administrator of the Environmental Protection Agency shall, after consulting with information technology industry and other interested parties, initiate a voluntary national information program for those types of data centers and data center equipment and facilities that are widely used and for which there is a potential for significant data center energy savings as a result of the program.

(2) **REQUIREMENTS.**—The program described in paragraph (1) shall—

(A) address data center efficiency holistically, reflecting the total energy consumption of data centers as whole systems, including both equipment and facilities;

(B) consider prior work and studies undertaken in this area, including by the Environmental Protection Agency and the Department of Energy;

(C) consistent with the objectives described in paragraph (1), determine the type of data center and data center equipment and facilities to be covered under the program;

(D) produce specifications, measurements, best practices, and benchmarks that will enable data center operators to make more informed decisions about the energy efficiency and costs of data centers, and that take into account—

(i) the performance and use of servers, data storage devices, and other information technology equipment;

(ii) the efficiency of heating, ventilation, and air conditioning, cooling, and power conditioning systems, provided that no modification shall be required of a standard then in effect under the Energy Policy and Conservation Act (42 U.S.C. 6201 et seq.) for any covered heating, ventilation, air-conditioning, cooling or power-conditioning product;

(iii) energy savings from the adoption of software and data management techniques; and

(iv) other factors determined by the organization described in subsection (c);

(E) allow for creation of separate specifications, measurements, and benchmarks based on data center size and function, as well as other appropriate characteristics;

(F) advance the design and implementation of efficiency technologies to the maximum extent economically practical;

(G) provide to data center operators in the private sector and the Federal Government information about best practices and purchasing decisions that reduce the energy consumption of data centers; and

(H) publish the information described in subparagraph (G), which may be disseminated through catalogs, trade publications, the Internet, or other mechanisms, that will allow data center operators to assess the energy consumption and potential cost savings of alternative data centers and data center equipment and facilities.

(3) PROCEDURES.—The program described in paragraph (1) shall be developed in consultation with and coordinated by the organization described in subsection (c) according to commonly accepted procedures for the development of specifications, measurements, and benchmarks.

(c) DATA CENTER EFFICIENCY ORGANIZATION.—

(1) IN GENERAL.—After the establishment of the program described in subsection (b), the Secretary and the Administrator shall jointly designate an information technology industry organization to consult with and to coordinate the program.

(2) REQUIREMENTS.—The organization designated under paragraph (1), whether pre-existing or formed specifically for the purposes of subsection (b), shall—

(A) consist of interested parties that have expertise in energy efficiency and in the development, operation, and functionality of computer data centers, information technology equipment, and software, as well as representatives of hardware manufacturers, data center operators, and facility managers;

(B) obtain and address input from Department of Energy National Laboratories or any college, university, research institution, industry association, company, or public interest group with applicable expertise in any of the areas listed in paragraph (1);

(C) follow commonly accepted procedures for the development of specifications and accredited standards development processes;

(D) have a mission to develop and promote energy efficiency for data centers and information technology; and

(E) have the primary responsibility to consult in the development and publishing of the information, measurements, and benchmarks described in subsection (b) and transmission of the information to the Secretary and the Administrator for consideration under subsection (d).

(d) MEASUREMENTS AND SPECIFICATIONS.—

(1) IN GENERAL.—The Secretary and the Administrator shall consider the specifications, measurements, and benchmarks described in subsection (b) for use by the Federal Energy Management Program, the Energy Star Program, and other efficiency programs of the Department of Energy and Environmental Protection Agency, respectively.

(2) REJECTIONS.—If the Secretary or the Administrator rejects 1 or more specifications, measurements, or benchmarks described in subsection (b), the rejection shall be made consistent with section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note; Public Law 104-113).

(3) DETERMINATION OF IMPRACTICABILITY.—A determination that a specification, measurement, or benchmark described in subsection (b) is impractical may include consideration of the maximum efficiency that is technologically feasible and economically justified.

(e) MONITORING.—The Secretary and the Administrator shall—

(1) monitor and evaluate the efforts to develop the program described in subsection (b); and

(2) not later than 3 years after the date of enactment of this Act, make a determination as to whether the program is consistent with the objectives of subsection (b).

(f) ALTERNATIVE SYSTEM.—If the Secretary and the Administrator make a determination under subsection (e) that a voluntary national information program for data centers consistent with the objectives of subsection (b) has not been developed, the Secretary and the Administrator shall, after consultation with the National Institute of Standards and Technology and not later than 2 years after the determination, develop

and implement the program under subsection (b).

(g) PROTECTION OF PROPRIETARY INFORMATION.—The Secretary, the Administrator, or the data center efficiency organization shall not disclose any proprietary information or trade secrets provided by any individual or company for the purposes of carrying out this section or the program established under this section.

Subtitle E—Healthy High-Performance Schools

SEC. 461. HEALTHY HIGH-PERFORMANCE SCHOOLS.

(a) AMENDMENT.—The Toxic Substances Control Act (15 U.S.C. 2601 et seq.) is amended by adding at the end the following new title:

“TITLE V—HEALTHY HIGH-PERFORMANCE SCHOOLS

“SEC. 501. GRANTS FOR HEALTHY SCHOOL ENVIRONMENTS.

“(a) IN GENERAL.—The Administrator, in consultation with the Secretary of Education, may provide grants to States for use in—

“(1) providing technical assistance for programs of the Environmental Protection Agency (including the Tools for Schools Program and the Healthy School Environmental Assessment Tool) to schools for use in addressing environmental issues; and

“(2) development and implementation of State school environmental health programs that include—

“(A) standards for school building design, construction, and renovation; and

“(B) identification of ongoing school building environmental problems, including contaminants, hazardous substances, and pollutant emissions, in the State and recommended solutions to address those problems, including assessment of information on the exposure of children to environmental hazards in school facilities.

“(b) SUNSET.—The authority of the Administrator to carry out this section shall expire 5 years after the date of enactment of this section.

“SEC. 502. MODEL GUIDELINES FOR SITING OF SCHOOL FACILITIES.

“Not later than 18 months after the date of enactment of this section, the Administrator, in consultation with the Secretary of Education and the Secretary of Health and Human Services, shall issue voluntary school site selection guidelines that account for—

“(1) the special vulnerability of children to hazardous substances or pollution exposures in any case in which the potential for contamination at a potential school site exists;

“(2) modes of transportation available to students and staff;

“(3) the efficient use of energy; and

“(4) the potential use of a school at the site as an emergency shelter.

“SEC. 503. PUBLIC OUTREACH.

“(a) REPORTS.—The Administrator shall publish and submit to Congress an annual report on all activities carried out under this title, until the expiration of authority described in section 501(b).

“(b) PUBLIC OUTREACH.—The Federal Director appointed under section 436(a) of the Energy Independence and Security Act of 2007 (in this title referred to as the ‘Federal Director’) shall ensure, to the maximum extent practicable, that the public clearinghouse established under section 423(1) of the Energy Independence and Security Act of 2007 receives and makes available information on the exposure of children to environmental hazards in school facilities, as provided by the Administrator.

“SEC. 504. ENVIRONMENTAL HEALTH PROGRAM.

“(a) IN GENERAL.—Not later than 2 years after the date of enactment of this section,

the Administrator, in consultation with the Secretary of Education, the Secretary of Health and Human Services, and other relevant agencies, shall issue voluntary guidelines for use by the State in developing and implementing an environmental health program for schools that—

“(1) takes into account the status and findings of Federal initiatives established under this title or subtitle C of title IV of the Energy Independence and Security Act of 2007 and other relevant Federal law with respect to school facilities, including relevant updates on trends in the field, such as the impact of school facility environments on student and staff—

“(A) health, safety, and productivity; and

“(B) disabilities or special needs;

“(2) takes into account studies using relevant tools identified or developed in accordance with section 492 of the Energy Independence and Security Act of 2007;

“(3) takes into account, with respect to school facilities, each of—

“(A) environmental problems, contaminants, hazardous substances, and pollutant emissions, including—

“(i) lead from drinking water;

“(ii) lead from materials and products;

“(iii) asbestos;

“(iv) radon;

“(v) the presence of elemental mercury releases from products and containers;

“(vi) pollutant emissions from materials and products; and

“(vii) any other environmental problem, contaminant, hazardous substance, or pollutant emission that present or may present a risk to the health of occupants of the school facilities or environment;

“(B) natural day lighting;

“(C) ventilation choices and technologies;

“(D) heating and cooling choices and technologies;

“(E) moisture control and mold;

“(F) maintenance, cleaning, and pest control activities;

“(G) acoustics; and

“(H) other issues relating to the health, comfort, productivity, and performance of occupants of the school facilities;

“(4) provides technical assistance on siting, design, management, and operation of school facilities, including facilities used by students with disabilities or special needs;

“(5) collaborates with federally funded pediatric environmental health centers to assist in on-site school environmental investigations;

“(6) assists States and the public in better understanding and improving the environmental health of children; and

“(7) takes into account the special vulnerability of children in low-income and minority communities to exposures from contaminants, hazardous substances, and pollutant emissions.

“(b) PUBLIC OUTREACH.—The Federal Director and Commercial Director shall ensure, to the maximum extent practicable, that the public clearinghouse established under section 423 of the Energy Independence and Security Act of 2007 receives and makes available—

“(1) information from the Administrator that is contained in the report described in section 503(a); and

“(2) information on the exposure of children to environmental hazards in school facilities, as provided by the Administrator.

“SEC. 505. AUTHORIZATION OF APPROPRIATIONS.

“There are authorized to be appropriated to carry out this title \$1,000,000 for fiscal year 2009, and \$1,500,000 for each of fiscal years 2010 through 2013, to remain available until expended.”

(b) TABLE OF CONTENTS AMENDMENT.—The table of contents for the Toxic Substances

Control Act (15 U.S.C. 2601 et seq.) is amended by adding at the end the following:

“TITLE V—HEALTHY HIGH-PERFORMANCE SCHOOLS

“Sec. 501. Grants for healthy school environments.

“Sec. 502. Model guidelines for siting of school facilities.

“Sec. 503. Public outreach.

“Sec. 504. Environmental health program.

“Sec. 505. Authorization of appropriations.”.

SEC. 462. STUDY ON INDOOR ENVIRONMENTAL QUALITY IN SCHOOLS.

(a) IN GENERAL.—The Administrator of the Environmental Protection Agency shall enter into an arrangement with the Secretary of Education and the Secretary of Energy to conduct a detailed study of how sustainable building features such as energy efficiency affect multiple perceived indoor environmental quality stressors on students in K–12 schools.

(b) CONTENTS.—The study shall—

(1) investigate the combined effect building stressors such as heating, cooling, humidity, lighting, and acoustics have on building occupants’ health, productivity, and overall well-being;

(2) identify how sustainable building features, such as energy efficiency, are influencing these human outcomes singly and in concert; and

(3) ensure that the impacts of the indoor environmental quality are evaluated as a whole.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for carrying out this section \$200,000 for each of the fiscal years 2008 through 2012.

Subtitle F—Institutional Entities

SEC. 471. ENERGY SUSTAINABILITY AND EFFICIENCY GRANTS AND LOANS FOR INSTITUTIONS.

Part G of title III of the Energy Policy and Conservation Act is amended by inserting after section 399 (42 U.S.C. 6371h) the following:

“SEC. 399A. ENERGY SUSTAINABILITY AND EFFICIENCY GRANTS AND LOANS FOR INSTITUTIONS.

“(a) DEFINITIONS.—In this section:

“(1) COMBINED HEAT AND POWER.—The term ‘combined heat and power’ means the generation of electric energy and heat in a single, integrated system, with an overall thermal efficiency of 60 percent or greater on a higher-heating-value basis.

“(2) DISTRICT ENERGY SYSTEMS.—The term ‘district energy systems’ means systems providing thermal energy from a renewable energy source, thermal energy source, or highly efficient technology to more than 1 building or fixed energy-consuming use from 1 or more thermal-energy production facilities through pipes or other means to provide space heating, space conditioning, hot water, steam, compression, process energy, or other end uses for that energy.

“(3) ENERGY SUSTAINABILITY.—The term ‘energy sustainability’ includes using a renewable energy source, thermal energy source, or a highly efficient technology for transportation, electricity generation, heating, cooling, lighting, or other energy services in fixed installations.

“(4) INSTITUTION OF HIGHER EDUCATION.—The term ‘institution of higher education’ has the meaning given the term in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801).

“(5) INSTITUTIONAL ENTITY.—The term ‘institutional entity’ means an institution of higher education, a public school district, a local government, a municipal utility, or a designee of 1 of those entities.

“(6) RENEWABLE ENERGY SOURCE.—The term ‘renewable energy source’ has the meaning

given the term in section 609 of the Public Utility Regulatory Policies Act of 1978 (7 U.S.C. 918c).

“(7) SUSTAINABLE ENERGY INFRASTRUCTURE.—The term ‘sustainable energy infrastructure’ means—

“(A) facilities for production of energy from renewable energy sources, thermal energy sources, or highly efficient technologies, including combined heat and power or other waste heat use; and

“(B) district energy systems.

“(8) THERMAL ENERGY SOURCE.—The term ‘thermal energy source’ means—

“(A) a natural source of cooling or heating from lake or ocean water; and

“(B) recovery of useful energy that would otherwise be wasted from ongoing energy uses.

“(b) TECHNICAL ASSISTANCE GRANTS.—

“(1) IN GENERAL.—Subject to the availability of appropriated funds, the Secretary shall implement a program of information dissemination and technical assistance to institutional entities to assist the institutional entities in identifying, evaluating, designing, and implementing sustainable energy infrastructure projects in energy sustainability.

“(2) ASSISTANCE.—The Secretary shall support institutional entities in—

“(A) identification of opportunities for sustainable energy infrastructure;

“(B) understanding the technical and economic characteristics of sustainable energy infrastructure;

“(C) utility interconnection and negotiation of power and fuel contracts;

“(D) understanding financing alternatives;

“(E) permitting and siting issues;

“(F) obtaining case studies of similar and successful sustainable energy infrastructure systems; and

“(G) reviewing and obtaining computer software for assessment, design, and operation and maintenance of sustainable energy infrastructure systems.

“(3) ELIGIBLE COSTS FOR TECHNICAL ASSISTANCE GRANTS.—On receipt of an application of an institutional entity, the Secretary may make grants to the institutional entity to fund a portion of the cost of—

“(A) feasibility studies to assess the potential for implementation or improvement of sustainable energy infrastructure;

“(B) analysis and implementation of strategies to overcome barriers to project implementation, including financial, contracting, siting, and permitting barriers; and

“(C) detailed engineering of sustainable energy infrastructure.

“(c) GRANTS FOR ENERGY EFFICIENCY IMPROVEMENT AND ENERGY SUSTAINABILITY.—

“(1) GRANTS.—

“(A) IN GENERAL.—The Secretary shall award grants to institutional entities to carry out projects to improve energy efficiency on the grounds and facilities of the institutional entity.

“(B) REQUIREMENT.—To the extent that applications have been submitted, grants under subparagraph (A) shall include not less than 1 grant each year to an institution of higher education in each State.

“(C) MINIMUM FUNDING.—Not less than 50 percent of the total funding for all grants under this subsection shall be awarded in grants to institutions of higher education.

“(2) CRITERIA.—Evaluation of projects for grant funding shall be based on criteria established by the Secretary, including criteria relating to—

“(A) improvement in energy efficiency;

“(B) reduction in greenhouse gas emissions and other air emissions, including criteria air pollutants and ozone-depleting refrigerants;

“(C) increased use of renewable energy sources or thermal energy sources;

“(D) reduction in consumption of fossil fuels;

“(E) active student participation; and

“(F) need for funding assistance.

“(3) CONDITION.—As a condition of receiving a grant under this subsection, an institutional entity shall agree—

“(A) to implement a public awareness campaign concerning the project in the community in which the institutional entity is located; and

“(B) to submit to the Secretary, and make available to the public, reports on any efficiency improvements, energy cost savings, and environmental benefits achieved as part of a project carried out under paragraph (1), including quantification of the results relative to the criteria described under paragraph (2).

“(d) GRANTS FOR INNOVATION IN ENERGY SUSTAINABILITY.—

“(1) GRANTS.—

“(A) IN GENERAL.—The Secretary shall award grants to institutional entities to engage in innovative energy sustainability projects.

“(B) REQUIREMENT.—To the extent that applications have been submitted, grants under subparagraph (A) shall include not less than 2 grants each year to institutions of higher education in each State.

“(C) MINIMUM FUNDING.—Not less than 50 percent of the total funding for all grants under this subsection shall be awarded in grants to institutions of higher education.

“(2) INNOVATION PROJECTS.—An innovation project carried out with a grant under this subsection shall—

“(A) involve—

“(i) an innovative technology that is not yet commercially available; or

“(ii) available technology in an innovative application that maximizes energy efficiency and sustainability;

“(B) have the greatest potential for testing or demonstrating new technologies or processes; and

“(C) to the extent undertaken by an institution of higher education, ensure active student participation in the project, including the planning, implementation, evaluation, and other phases of projects.

“(3) CONDITION.—As a condition of receiving a grant under this subsection, an institutional entity shall agree to submit to the Secretary, and make available to the public, reports that describe the results of the projects carried out using grant funds.

“(e) ALLOCATION TO INSTITUTIONS OF HIGHER EDUCATION WITH SMALL ENDOWMENTS.—

“(1) IN GENERAL.—Of the total amount of grants provided to institutions of higher education for a fiscal year under this section, the Secretary shall provide not less than 50 percent of the amount to institutions of higher education that have an endowment of not more than \$100,000,000.

“(2) REQUIREMENT.—To the extent that applications have been submitted, at least 50 percent of the amount described in paragraph (1) shall be provided to institutions of higher education that have an endowment of not more than \$50,000,000.

“(f) GRANT AMOUNTS.—

“(1) IN GENERAL.—If the Secretary determines that cost sharing is appropriate, the amounts of grants provided under this section shall be limited as provided in this subsection.

“(2) TECHNICAL ASSISTANCE GRANTS.—In the case of grants for technical assistance under subsection (b), grant funds shall be available for not more than—

“(A) an amount equal to the lesser of—

“(i) \$50,000; or

“(ii) 75 percent of the cost of feasibility studies to assess the potential for implementation or improvement of sustainable energy infrastructure;

“(B) an amount equal to the lesser of—

“(i) \$90,000; or

“(ii) 60 percent of the cost of guidance on overcoming barriers to project implementation, including financial, contracting, siting, and permitting barriers; and

“(C) an amount equal to the lesser of—

“(i) \$250,000; or

“(ii) 40 percent of the cost of detailed engineering and design of sustainable energy infrastructure.

“(3) GRANTS FOR EFFICIENCY IMPROVEMENT AND ENERGY SUSTAINABILITY.—In the case of grants for efficiency improvement and energy sustainability under subsection (c), grant funds shall be available for not more than an amount equal to the lesser of—

“(A) \$1,000,000; or

“(B) 60 percent of the total cost.

“(4) GRANTS FOR INNOVATION IN ENERGY SUSTAINABILITY.—In the case of grants for innovation in energy sustainability under subsection (d), grant funds shall be available for not more than an amount equal to the lesser of—

“(A) \$500,000; or

“(B) 75 percent of the total cost.

“(g) LOANS FOR ENERGY EFFICIENCY IMPROVEMENT AND ENERGY SUSTAINABILITY.—

“(1) IN GENERAL.—Subject to the availability of appropriated funds, the Secretary shall provide loans to institutional entities for the purpose of implementing energy efficiency improvements and sustainable energy infrastructure.

“(2) TERMS AND CONDITIONS.—

“(A) IN GENERAL.—Except as otherwise provided in this paragraph, loans made under this subsection shall be on such terms and conditions as the Secretary may prescribe.

“(B) MATURITY.—The final maturity of loans made within a period shall be the lesser of, as determined by the Secretary—

“(i) 20 years; or

“(ii) 90 percent of the useful life of the principal physical asset to be financed by the loan.

“(C) DEFAULT.—No loan made under this subsection may be subordinated to another debt contracted by the institutional entity or to any other claims against the institutional entity in the case of default.

“(D) BENCHMARK INTEREST RATE.—

“(i) IN GENERAL.—Loans under this subsection shall be at an interest rate that is set by reference to a benchmark interest rate (yield) on marketable Treasury securities with a similar maturity to the direct loans being made.

“(ii) MINIMUM.—The minimum interest rate of loans under this subsection shall be at the interest rate of the benchmark financial instrument.

“(iii) NEW LOANS.—The minimum interest rate of new loans shall be adjusted each quarter to take account of changes in the interest rate of the benchmark financial instrument.

“(E) CREDIT RISK.—The Secretary shall—

“(i) prescribe explicit standards for use in periodically assessing the credit risk of making direct loans under this subsection; and

“(ii) find that there is a reasonable assurance of repayment before making a loan.

“(F) ADVANCE BUDGET AUTHORITY REQUIRED.—New direct loans may not be obligated under this subsection except to the extent that appropriations of budget authority to cover the costs of the new direct loans are made in advance, as required by section 504 of the Federal Credit Reform Act of 1990 (2 U.S.C. 661c).

“(3) CRITERIA.—Evaluation of projects for potential loan funding shall be based on cri-

teria established by the Secretary, including criteria relating to—

“(A) improvement in energy efficiency;

“(B) reduction in greenhouse gas emissions and other air emissions, including criteria air pollutants and ozone-depleting refrigerants;

“(C) increased use of renewable electric energy sources or renewable thermal energy sources;

“(D) reduction in consumption of fossil fuels; and

“(E) need for funding assistance, including consideration of the size of endowment or other financial resources available to the institutional entity.

“(4) LABOR STANDARDS.—

“(A) IN GENERAL.—All laborers and mechanics employed by contractors or subcontractors in the performance of construction, repair, or alteration work funded in whole or in part under this section shall be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with sections 3141 through 3144, 3146, and 3147 of title 40, United States Code. The Secretary shall not approve any such funding without first obtaining adequate assurance that required labor standards will be maintained upon the construction work.

“(B) AUTHORITY AND FUNCTIONS.—The Secretary of Labor shall have, with respect to the labor standards specified in paragraph (1), the authority and functions set forth in Reorganization Plan Number 14 of 1950 (15 Fed. Reg. 3176; 64 Stat. 1267) and section 3145 of title 40, United States Code.

“(h) PROGRAM PROCEDURES.—Not later than 180 days after the date of enactment of this section, the Secretary shall establish procedures for the solicitation and evaluation of potential projects for grant and loan funding and administration of the grant and loan programs.

“(1) AUTHORIZATION.—

“(1) GRANTS.—There is authorized to be appropriated for the cost of grants authorized in subsections (b), (c), and (d) \$250,000,000 for each of fiscal years 2009 through 2013, of which not more than 5 percent may be used for administrative expenses.

“(2) LOANS.—There is authorized to be appropriated for the initial cost of direct loans authorized in subsection (g) \$500,000,000 for each of fiscal years 2009 through 2013, of which not more than 5 percent may be used for administrative expenses.”

Subtitle G—Public and Assisted Housing

SEC. 481. APPLICATION OF INTERNATIONAL ENERGY CONSERVATION CODE TO PUBLIC AND ASSISTED HOUSING.

Section 109 of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 12709) is amended—

(1) in subsection (a)—

(A) in paragraph (1)(C), by striking “, where such standards are determined to be cost effective by the Secretary of Housing and Urban Development”; and

(B) in the first sentence of paragraph (2)—

(i) by striking “Council of American Building Officials Model Energy Code, 1992” and inserting “2006 International Energy Conservation Code”; and

(ii) by striking “, and, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(2) in subsection (b)—

(A) in the heading, by striking “MODEL ENERGY CODE.—” and inserting “INTERNATIONAL ENERGY CONSERVATION CODE.—”;

(B) by inserting “and rehabilitation” after “all new construction”; and

(C) by striking “, and, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(3) in subsection (c)—

(A) in the heading, by striking “MODEL ENERGY CODE AND”; and

(B) by striking “, or, with respect to rehabilitation and new construction of public and assisted housing funded by HOPE VI revitalization grants under section 24 of the United States Housing Act of 1937 (42 U.S.C. 1437v), the 2003 International Energy Conservation Code”;

(4) by adding at the end the following:

“(d) FAILURE TO AMEND THE STANDARDS.—If the Secretary of Housing and Urban Development and the Secretary of Agriculture have not, within 1 year after the requirements of the 2006 IECC or the ASHRAE Standard 90.1-2004 are revised, amended the standards or made a determination under subsection (c), all new construction and rehabilitation of housing specified in subsection (a) shall meet the requirements of the revised code or standard if—

“(1) the Secretary of Housing and Urban Development or the Secretary of Agriculture make a determination that the revised codes do not negatively affect the availability or affordability of new construction of assisted housing and single family and multifamily residential housing (other than manufactured homes) subject to mortgages insured under the National Housing Act (12 U.S.C. 1701 et seq.) or insured, guaranteed, or made by the Secretary of Agriculture under title V of the Housing Act of 1949 (42 U.S.C. 1471 et seq.), respectively; and

“(2) the Secretary of Energy has made a determination under section 304 of the Energy Conservation and Production Act (42 U.S.C. 6833) that the revised code or standard would improve energy efficiency.”;

(5) by striking “CABO Model Energy Code, 1992” each place it appears and inserting “the 2006 IECC”; and

(6) by striking “1989” each place it appears and inserting “2004”.

Subtitle H—General Provisions

SEC. 491. DEMONSTRATION PROJECT.

(a) IN GENERAL.—The Federal Director and the Commercial Director shall establish guidelines to implement a demonstration project to contribute to the research goals of the Office of Commercial High-Performance Green Buildings and the Office of Federal High-Performance Green Buildings.

(b) PROJECTS.—In accordance with guidelines established by the Federal Director and the Commercial Director under subsection (a) and the duties of the Federal Director and the Commercial Director described in this title, the Federal Director or the Commercial Director shall carry out—

(1) for each of fiscal years 2009 through 2014, 1 demonstration project per year of green features in a Federal building selected by the Federal Director in accordance with relevant agencies and described in subsection (c)(1), that—

(A) provides for instrumentation, monitoring, and data collection related to the green features, for study of the impact of the features on overall energy use and operational costs, and for the evaluation of the information obtained through the conduct of projects and activities under this title; and

(B) achieves the highest rating offered by the high performance green building system identified pursuant to section 436(h);

(2) no fewer than 4 demonstration projects at 4 universities, that, as competitively selected by the Commercial Director in accordance with subsection (c)(2), have—

(A) appropriate research resources and relevant projects to meet the goals of the demonstration project established by the Office of Commercial High-Performance Green Buildings; and

(B) the ability—

(i) to serve as a model for high-performance green building initiatives, including research and education by achieving the highest rating offered by the high performance green building system identified pursuant to section 436(h);

(ii) to identify the most effective ways to use high-performance green building and landscape technologies to engage and educate undergraduate and graduate students;

(iii) to effectively implement a high-performance green building education program for students and occupants;

(iv) to demonstrate the effectiveness of various high-performance technologies, including their impacts on energy use and operational costs, in each of the 4 climatic regions of the United States described in subsection (c)(2)(B); and

(v) to explore quantifiable and nonquantifiable beneficial impacts on public health and employee and student performance;

(3) demonstration projects to evaluate replicable approaches of achieving high performance in actual building operation in various types of commercial buildings in various climates; and

(4) deployment activities to disseminate information on and encourage widespread adoption of technologies, practices, and policies to achieve zero-net-energy commercial buildings or low energy use and effective monitoring of energy use in commercial buildings.

(C) CRITERIA.—

(1) FEDERAL FACILITIES.—With respect to the existing or proposed Federal facility at which a demonstration project under this section is conducted, the Federal facility shall—

(A) be an appropriate model for a project relating to—

(i) the effectiveness of high-performance technologies;

(ii) analysis of materials, components, systems, and emergency operations in the building, and the impact of those materials, components, and systems, including the impact on the health of building occupants;

(iii) life-cycle costing and life-cycle assessment of building materials and systems; and

(iv) location and design that promote access to the Federal facility through walking, biking, and mass transit; and

(B) possess sufficient technological and organizational adaptability.

(2) UNIVERSITIES.—With respect to the 4 universities at which a demonstration project under this section is conducted—

(A) the universities should be selected, after careful review of all applications received containing the required information, as determined by the Commercial Director, based on—

(i) successful and established public-private research and development partnerships;

(ii) demonstrated capabilities to construct or renovate buildings that meet high indoor environmental quality standards;

(iii) organizational flexibility;

(iv) technological adaptability;

(v) the demonstrated capacity of at least 1 university to replicate lessons learned among nearby or sister universities, preferably by participation in groups or consortia that promote sustainability;

(vi) the demonstrated capacity of at least 1 university to have officially-adopted, insti-

tution-wide “high-performance green building” guidelines for all campus building projects; and

(vii) the demonstrated capacity of at least 1 university to have been recognized by similar institutions as a national leader in sustainability education and curriculum for students of the university; and

(B) each university shall be located in a different climatic region of the United States, each of which regions shall have, as determined by the Office of Commercial High-Performance Green Buildings—

(i) a hot, dry climate;

(ii) a hot, humid climate;

(iii) a cold climate; or

(iv) a temperate climate (including a climate with cold winters and humid summers).

(D) APPLICATIONS.—To receive a grant under subsection (b), an eligible applicant shall submit to the Federal Director or the Commercial Director an application at such time, in such manner, and containing such information as the Director may require, including a written assurance that all laborers and mechanics employed by contractors or subcontractors during construction, alteration, or repair that is financed, in whole or in part, by a grant under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with sections 3141 through 3144, 3146, and 3147 of title 40, United States Code. The Secretary of Labor shall, with respect to the labor standards described in this subsection, have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (5 U.S.C. App.) and section 3145 of title 40, United States Code.

(E) REPORT.—Not later than 1 year after the date of enactment of this Act, and annually thereafter through September 30, 2014—

(1) the Federal Director and the Commercial Director shall submit to the Secretary a report that describes the status of the demonstration projects; and

(2) each University at which a demonstration project under this section is conducted shall submit to the Secretary a report that describes the status of the demonstration projects under this section.

(F) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the demonstration project described in section (b)(1) \$10,000,000 for the period of fiscal years 2008 through 2012, and to carry out the demonstration project described in section (b)(2), \$10,000,000 for the period of fiscal years 2008 through 2012, to remain available until expended.

SEC. 492. RESEARCH AND DEVELOPMENT.

(A) ESTABLISHMENT.—The Federal Director and the Commercial Director, jointly and in coordination with the Advisory Committee, shall—

(1)(A) survey existing research and studies relating to high-performance green buildings; and

(B) coordinate activities of common interest;

(2) develop and recommend a high-performance green building research plan that—

(A) identifies information and research needs, including the relationships between human health, occupant productivity, safety, security, and accessibility and each of—

(i) emissions from materials and products in the building;

(ii) natural day lighting;

(iii) ventilation choices and technologies;

(iv) heating, cooling, and system control choices and technologies;

(v) moisture control and mold;

(vi) maintenance, cleaning, and pest control activities;

(vii) acoustics;

(viii) access to public transportation; and

(ix) other issues relating to the health, comfort, productivity, and performance of occupants of the building;

(B) promotes the development and dissemination of high-performance green building measurement tools that, at a minimum, may be used—

(i) to monitor and assess the life-cycle performance of facilities (including demonstration projects) built as high-performance green buildings; and

(ii) to perform life-cycle assessments; and

(C) identifies and tests new and emerging technologies for high performance green buildings;

(3) assist the budget and life-cycle costing functions of the Directors’ Offices under section 436(d);

(4) study and identify potential benefits of green buildings relating to security, natural disaster, and emergency needs of the Federal Government; and

(5) support other research initiatives determined by the Directors’ Offices.

(b) INDOOR AIR QUALITY.—The Federal Director, in consultation with the Administrator of the Environmental Protection Agency and the Advisory Committee, shall develop and carry out a comprehensive indoor air quality program for all Federal facilities to ensure the safety of Federal workers and facility occupants—

(1) during new construction and renovation of facilities; and

(2) in existing facilities.

SEC. 493. ENVIRONMENTAL PROTECTION AGENCY DEMONSTRATION GRANT PROGRAM FOR LOCAL GOVERNMENTS.

Title III of the Clean Air Act (42 U.S.C. 7601 et seq.) is amended by adding at the end the following:

“SEC. 329. DEMONSTRATION GRANT PROGRAM FOR LOCAL GOVERNMENTS.

“(a) GRANT PROGRAM.—

“(1) IN GENERAL.—The Administrator shall establish a demonstration program under which the Administrator shall provide competitive grants to assist local governments (such as municipalities and counties), with respect to local government buildings—

“(A) to deploy cost-effective technologies and practices; and

“(B) to achieve operational cost savings, through the application of cost-effective technologies and practices, as verified by the Administrator.

“(2) COST SHARING.—

“(A) IN GENERAL.—The Federal share of the cost of an activity carried out using a grant provided under this section shall be 40 percent.

“(B) WAIVER OF NON-FEDERAL SHARE.—The Administrator may waive up to 100 percent of the local share of the cost of any grant under this section should the Administrator determine that the community is economically distressed, pursuant to objective economic criteria established by the Administrator in published guidelines.

“(3) MAXIMUM AMOUNT.—The amount of a grant provided under this subsection shall not exceed \$1,000,000.

“(b) GUIDELINES.—

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this section, the Administrator shall issue guidelines to implement the grant program established under subsection (a).

“(2) REQUIREMENTS.—The guidelines under paragraph (1) shall establish—

“(A) standards for monitoring and verification of operational cost savings through the application of cost-effective technologies and practices reported by grantees under this section;

“(B) standards for grantees to implement training programs, and to provide technical

assistance and education, relating to the retrofit of buildings using cost-effective technologies and practices; and

“(C) a requirement that each local government that receives a grant under this section shall achieve facility-wide cost savings, through renovation of existing local government buildings using cost-effective technologies and practices, of at least 40 percent as compared to the baseline operational costs of the buildings before the renovation (as calculated assuming a 3-year, weather-normalized average).

“(c) COMPLIANCE WITH STATE AND LOCAL LAW.—Nothing in this section or any program carried out using a grant provided under this section supersedes or otherwise affects any State or local law, to the extent that the State or local law contains a requirement that is more stringent than the relevant requirement of this section.

“(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$20,000,000 for each of fiscal years 2007 through 2012.

“(e) REPORTS.—

“(1) IN GENERAL.—The Administrator shall provide annual reports to Congress on cost savings achieved and actions taken and recommendations made under this section, and any recommendations for further action.

“(2) FINAL REPORT.—The Administrator shall issue a final report at the conclusion of the program, including findings, a summary of total cost savings achieved, and recommendations for further action.

“(f) TERMINATION.—The program under this section shall terminate on September 30, 2012.

“(g) DEFINITIONS.—In this section, the terms ‘cost effective technologies and practices’ and ‘operating cost savings’ shall have the meanings defined in section 401 of the Energy Independence and Security Act of 2007.”

SEC. 494. GREEN BUILDING ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—Not later than 180 days after the date of enactment of this Act, the Federal Director, in coordination with the Commercial Director, shall establish an advisory committee, to be known as the ‘Green Building Advisory Committee’.

(b) MEMBERSHIP.—

(1) IN GENERAL.—The Committee shall be composed of representatives of, at a minimum—

(A) each agency referred to in section 421(e); and

(B) other relevant agencies and entities, as determined by the Federal Director, including at least 1 representative of each of—

(i) State and local governmental green building programs;

(ii) independent green building associations or councils;

(iii) building experts, including architects, material suppliers, and construction contractors;

(iv) security advisors focusing on national security needs, natural disasters, and other dire emergency situations;

(v) public transportation industry experts; and

(vi) environmental health experts, including those with experience in children’s health.

(2) NON-FEDERAL MEMBERS.—The total number of non-Federal members on the Committee at any time shall not exceed 15.

(c) MEETINGS.—The Federal Director shall establish a regular schedule of meetings for the Committee.

(d) DUTIES.—The Committee shall provide advice and expertise for use by the Federal Director in carrying out the duties under this subtitle, including such recommendations relating to Federal activities carried

out under sections 434 through 436 as are agreed to by a majority of the members of the Committee.

(e) FACA EXEMPTION.—The Committee shall not be subject to section 14 of the Federal Advisory Committee Act (5 U.S.C. App.).

SEC. 495. ADVISORY COMMITTEE ON ENERGY EFFICIENCY FINANCE.

(a) ESTABLISHMENT.—The Secretary, acting through the Assistant Secretary of Energy for Energy Efficiency and Renewable Energy, shall establish an Advisory Committee on Energy Efficiency Finance to provide advice and recommendations to the Department on energy efficiency finance and investment issues, options, ideas, and trends, and to assist the energy community in identifying practical ways of lowering costs and increasing investments in energy efficiency technologies.

(b) MEMBERSHIP.—The advisory committee established under this section shall have a balanced membership that shall include members with expertise in—

(1) availability of seed capital;

(2) availability of venture capital;

(3) availability of other sources of private equity;

(4) investment banking with respect to corporate finance;

(5) investment banking with respect to mergers and acquisitions;

(6) equity capital markets;

(7) debt capital markets;

(8) research analysis;

(9) sales and trading;

(10) commercial lending; and

(11) residential lending.

(c) TERMINATION.—The Advisory Committee on Energy Efficiency Finance shall terminate on the date that is 10 years after the date of enactment of this Act.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to the Secretary for carrying out this section.

TITLE V—ENERGY SAVINGS IN GOVERNMENT AND PUBLIC INSTITUTIONS

Subtitle A—United States Capitol Complex

SEC. 501. CAPITOL COMPLEX PHOTOVOLTAIC ROOF FEASIBILITY STUDIES.

(a) STUDIES.—The Architect of the Capitol may conduct feasibility studies regarding construction of photovoltaic roofs for the Rayburn House Office Building and the Hart Senate Office Building.

(b) REPORT.—Not later than 6 months after the date of enactment of this Act, the Architect of the Capitol shall transmit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Rules and Administration of the Senate a report on the results of the feasibility studies and recommendations regarding construction of photovoltaic roofs for the buildings referred to in subsection (a).

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$500,000.

SEC. 502. CAPITOL COMPLEX E-85 REFUELING STATION.

(a) CONSTRUCTION.—The Architect of the Capitol may construct a fuel tank and pumping system for E-85 fuel at or within close proximity to the Capitol Grounds Fuel Station.

(b) USE.—The E-85 fuel tank and pumping system shall be available for use by all legislative branch vehicles capable of operating with E-85 fuel, subject to such other legislative branch agencies reimbursing the Architect of the Capitol for the costs of E-85 fuel used by such other legislative branch vehicles.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to

carry out this section \$640,000 for fiscal year 2008.

SEC. 503. ENERGY AND ENVIRONMENTAL MEASURES IN CAPITOL COMPLEX MASTER PLAN.

(a) IN GENERAL.—To the maximum extent practicable, the Architect of the Capitol shall include energy efficiency and conservation measures, greenhouse gas emission reduction measures, and other appropriate environmental measures in the Capitol Complex Master Plan.

(b) REPORT.—Not later than 6 months after the date of enactment of this Act, the Architect of the Capitol shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Rules and Administration of the Senate a report on the energy efficiency and conservation measures, greenhouse gas emission reduction measures, and other appropriate environmental measures included in the Capitol Complex Master Plan pursuant to subsection (a).

SEC. 504. PROMOTING MAXIMUM EFFICIENCY IN OPERATION OF CAPITOL POWER PLANT.

(a) STEAM BOILERS.—

(1) IN GENERAL.—The Architect of the Capitol shall take such steps as may be necessary to operate the steam boilers at the Capitol Power Plant in the most energy efficient manner possible to minimize carbon emissions and operating costs, including adjusting steam pressures and adjusting the operation of the boilers to take into account variations in demand, including seasonality, for the use of the system.

(2) EFFECTIVE DATE.—The Architect shall implement the steps required under paragraph (1) not later than 30 days after the date of the enactment of this Act.

(b) CHILLER PLANT.—

(1) IN GENERAL.—The Architect of the Capitol shall take such steps as may be necessary to operate the chiller plant at the Capitol Power Plant in the most energy efficient manner possible to minimize carbon emissions and operating costs, including adjusting water temperatures and adjusting the operation of the chillers to take into account variations in demand, including seasonality, for the use of the system.

(2) EFFECTIVE DATE.—The Architect shall implement the steps required under paragraph (1) not later than 30 days after the date of the enactment of this Act.

(c) METERS.—Not later than 90 days after the date of the enactment of this Act, the Architect of the Capitol shall evaluate the accuracy of the meters in use at the Capitol Power Plant and correct them as necessary.

(d) REPORT ON IMPLEMENTATION.—Not later than 180 days after the date of the enactment of this Act, the Architect of the Capitol shall complete the implementation of the requirements of this section and submit a report describing the actions taken and the energy efficiencies achieved to the Committee on Transportation and Infrastructure of the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, the Committee on House Administration of the House of Representatives, and the Committee on Rules and Administration of the Senate.

SEC. 505. CAPITOL POWER PLANT CARBON DIOXIDE EMISSIONS FEASIBILITY STUDY AND DEMONSTRATION PROJECTS.

The first section of the Act of March 4, 1911 (2 U.S.C. 2162; 36 Stat. 1414, chapter 285) is amended in the seventh undesignated paragraph (relating to the Capitol power plant) under the heading ‘‘Public Buildings’’, under the heading ‘‘Under the Department of Interior’’—

(1) by striking ‘‘ninety thousand dollars.’’ and inserting ‘‘\$90,000.’’; and

(2) by striking “Provided, That hereafter the” and all that follows through the end of the proviso and inserting the following:

“(a) DESIGNATION.—The heating, lighting, and power plant constructed under the terms of the Act approved April 28, 1904 (33 Stat. 479, chapter 1762) shall be known as the ‘Capitol Power Plant’.

“(b) DEFINITION.—In this section, the term ‘carbon dioxide energy efficiency’ means the quantity of electricity used to power equipment for carbon dioxide capture and storage or use.

“(c) FEASIBILITY STUDY.—The Architect of the Capitol shall conduct a feasibility study evaluating the available methods to capture, store, and use carbon dioxide emitted from the Capitol Power Plant as a result of burning fossil fuels. In carrying out the feasibility study, the Architect of the Capitol is encouraged to consult with individuals with expertise in carbon capture and storage or use, including experts with the Environmental Protection Agency, Department of Energy, academic institutions, non-profit organizations, and industry, as appropriate. The study shall consider—

“(1) the availability of technologies to capture and store or use Capitol Power Plant carbon dioxide emissions;

“(2) strategies to conserve energy and reduce carbon dioxide emissions at the Capitol Power Plant; and

“(3) other factors as determined by the Architect of the Capitol.

“(d) DEMONSTRATION PROJECTS.—

“(1) IN GENERAL.—If the feasibility study determines that a demonstration project to capture and store or use Capitol Power Plant carbon dioxide emissions is technologically feasible and economically justified (including direct and indirect economic and environmental benefits), the Architect of the Capitol may conduct one or more demonstration projects to capture and store or use carbon dioxide emitted from the Capitol Power Plant as a result of burning fossil fuels.

“(2) FACTORS FOR CONSIDERATION.—In carrying out such demonstration projects, the Architect of the Capitol shall consider—

“(A) the amount of Capitol Power Plant carbon dioxide emissions to be captured and stored or used;

“(B) whether the proposed project is able to reduce air pollutants other than carbon dioxide;

“(C) the carbon dioxide energy efficiency of the proposed project;

“(D) whether the proposed project is able to use carbon dioxide emissions;

“(E) whether the proposed project could be expanded to significantly increase the amount of Capitol Power Plant carbon dioxide emissions to be captured and stored or used;

“(F) the potential environmental, energy, and educational benefits of demonstrating the capture and storage or use of carbon dioxide at the U.S. Capitol; and

“(G) other factors as determined by the Architect of the Capitol.

“(3) TERMS AND CONDITIONS.—A demonstration project funded under this section shall be subject to such terms and conditions as the Architect of the Capitol may prescribe.

“(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the feasibility study and demonstration project \$3,000,000. Such sums shall remain available until expended.”

Subtitle B—Energy Savings Performance Contracting

SEC. 511. AUTHORITY TO ENTER INTO CONTRACTS; REPORTS.

(a) IN GENERAL.—Section 801(a)(2)(D) of the National Energy Conservation Policy Act (42 U.S.C. 8287(a)(2)(D)) is amended—

(1) in clause (ii), by inserting “and” after the semicolon at the end;

(2) by striking clause (iii); and

(3) by redesignating clause (iv) as clause (iii).

(b) REPORTS.—Section 548(a)(2) of the National Energy Conservation Policy Act (42 U.S.C. 8258(a)(2)) is amended by inserting “and any termination penalty exposure” after “the energy and cost savings that have resulted from such contracts”.

(c) CONFORMING AMENDMENT.—Section 2913 of title 10, United States Code, is amended by striking subsection (e).

SEC. 512. FINANCING FLEXIBILITY.

Section 801(a)(2) of the National Energy Conservation Policy Act (42 U.S.C. 8287(a)(2)) is amended by adding at the end the following:

“(E) FUNDING OPTIONS.—In carrying out a contract under this title, a Federal agency may use any combination of—

“(i) appropriated funds; and

“(ii) private financing under an energy savings performance contract.”

SEC. 513. PROMOTING LONG-TERM ENERGY SAVINGS PERFORMANCE CONTRACTS AND VERIFYING SAVINGS.

Section 801(a)(2) of the National Energy Conservation Policy Act (42 U.S.C. 8287(a)(2)) (as amended by section 512) is amended—

(1) in subparagraph (D), by inserting “beginning on the date of the delivery order” after “25 years”; and

(2) by adding at the end the following:

“(F) PROMOTION OF CONTRACTS.—In carrying out this section, a Federal agency shall not—

“(i) establish a Federal agency policy that limits the maximum contract term under subparagraph (D) to a period shorter than 25 years; or

“(ii) limit the total amount of obligations under energy savings performance contracts or other private financing of energy savings measures.

“(G) MEASUREMENT AND VERIFICATION REQUIREMENTS FOR PRIVATE FINANCING.—

“(i) IN GENERAL.—In the case of energy savings performance contracts, the evaluations and savings measurement and verification required under paragraphs (2) and (4) of section 543(f) shall be used by a Federal agency to meet the requirements for the need for energy audits, calculation of energy savings, and any other evaluation of costs and savings needed to implement the guarantee of savings under this section.

“(ii) MODIFICATION OF EXISTING CONTRACTS.—Not later than 18 months after the date of enactment of this subparagraph, each Federal agency shall, to the maximum extent practicable, modify any indefinite delivery and indefinite quantity energy savings performance contracts, and other indefinite delivery and indefinite quantity contracts using private financing, to conform to the amendments made by subtitle B of title V of the Energy Independence and Security Act of 2007.”

SEC. 514. PERMANENT REAUTHORIZATION.

Section 801 of the National Energy Conservation Policy Act (42 U.S.C. 8287) is amended by striking subsection (c).

SEC. 515. DEFINITION OF ENERGY SAVINGS.

Section 804(2) of the National Energy Conservation Policy Act (42 U.S.C. 8287c(2)) is amended—

(1) by redesignating subparagraphs (A), (B), and (C) as clauses (i), (ii), and (iii), respectively, and indenting appropriately;

(2) by striking “means a reduction” and inserting “means—

“(A) a reduction”;

(3) by striking the period at the end and inserting a semicolon; and

(4) by adding at the end the following:

“(B) the increased efficient use of an existing energy source by cogeneration or heat recovery;

“(C) if otherwise authorized by Federal or State law (including regulations), the sale or transfer of electrical or thermal energy generated on-site from renewable energy sources or cogeneration, but in excess of Federal needs, to utilities or non-Federal energy users; and

“(D) the increased efficient use of existing water sources in interior or exterior applications.”

SEC. 516. RETENTION OF SAVINGS.

Section 546(c) of the National Energy Conservation Policy Act (42 U.S.C. 8256(c)) is amended by striking paragraph (5).

SEC. 517. TRAINING FEDERAL CONTRACTING OFFICERS TO NEGOTIATE ENERGY EFFICIENCY CONTRACTS.

(a) PROGRAM.—The Secretary shall create and administer in the Federal Energy Management Program a training program to educate Federal contract negotiation and contract management personnel so that the contract officers are prepared to—

(1) negotiate energy savings performance contracts;

(2) conclude effective and timely contracts for energy efficiency services with all companies offering energy efficiency services; and

(3) review Federal contracts for all products and services for the potential energy efficiency opportunities and implications of the contracts.

(b) SCHEDULE.—Not later than 1 year after the date of enactment of this Act, the Secretary shall plan, staff, announce, and begin training under the Federal Energy Management Program.

(c) PERSONNEL TO BE TRAINED.—Personnel appropriate to receive training under the Federal Energy Management Program shall be selected by and sent for the training from—

(1) the Department of Defense;

(2) the Department of Veterans Affairs;

(3) the Department;

(4) the General Services Administration;

(5) the Department of Housing and Urban Development;

(6) the United States Postal Service; and

(7) all other Federal agencies and departments that enter contracts for buildings, building services, electricity and electricity services, natural gas and natural gas services, heating and air conditioning services, building fuel purchases, and other types of procurement or service contracts determined by the Secretary, in carrying out the Federal Energy Management Program, to offer the potential for energy savings and greenhouse gas emission reductions if negotiated with taking into account those goals.

(d) TRAINERS.—Training under the Federal Energy Management Program may be conducted by—

(1) attorneys or contract officers with experience in negotiating and managing contracts described in subsection (c)(7) from any agency, except that the Secretary shall reimburse the related salaries and expenses of the attorneys or contract officers from amounts made available for carrying out this section to the extent the attorneys or contract officers are not employees of the Department; and

(2) private experts hired by the Secretary for the purposes of this section, except that the Secretary may not hire experts who are simultaneously employed by any company under contract to provide energy efficiency services to the Federal Government.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary to carry out this section

\$750,000 for each of fiscal years 2008 through 2012.

SEC. 518. STUDY OF ENERGY AND COST SAVINGS IN NONBUILDING APPLICATIONS.

(a) DEFINITIONS.—In this section:

(1) NONBUILDING APPLICATION.—The term “nonbuilding application” means—

(A) any class of vehicles, devices, or equipment that is transportable under the power of the applicable vehicle, device, or equipment by land, sea, or air and that consumes energy from any fuel source for the purpose of—

(i) that transportation; or

(ii) maintaining a controlled environment within the vehicle, device, or equipment; and

(B) any federally-owned equipment used to generate electricity or transport water.

(2) SECONDARY SAVINGS.—

(A) IN GENERAL.—The term “secondary savings” means additional energy or cost savings that are a direct consequence of the energy savings that result from the energy efficiency improvements that were financed and implemented pursuant to an energy savings performance contract.

(B) INCLUSIONS.—The term “secondary savings” includes—

(i) energy and cost savings that result from a reduction in the need for fuel delivery and logistical support;

(ii) personnel cost savings and environmental benefits; and

(iii) in the case of electric generation equipment, the benefits of increased efficiency in the production of electricity, including revenues received by the Federal Government from the sale of electricity so produced.

(b) STUDY.—

(1) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary and the Secretary of Defense shall jointly conduct, and submit to Congress and the President a report of, a study of the potential for the use of energy savings performance contracts to reduce energy consumption and provide energy and cost savings in nonbuilding applications.

(2) REQUIREMENTS.—The study under this subsection shall include—

(A) an estimate of the potential energy and cost savings to the Federal Government, including secondary savings and benefits, from increased efficiency in nonbuilding applications;

(B) an assessment of the feasibility of extending the use of energy savings performance contracts to nonbuilding applications, including an identification of any regulatory or statutory barriers to that use; and

(C) such recommendations as the Secretary and Secretary of Defense determine to be appropriate.

Subtitle C—Energy Efficiency in Federal Agencies

SEC. 521. INSTALLATION OF PHOTOVOLTAIC SYSTEM AT DEPARTMENT OF ENERGY HEADQUARTERS BUILDING.

(a) IN GENERAL.—The Administrator of General Services shall install a photovoltaic system, as set forth in the Sun Wall Design Project, for the headquarters building of the Department located at 1000 Independence Avenue, SW., Washington, DC, commonly known as the Forrestal Building.

(b) FUNDING.—There shall be available from the Federal Buildings Fund established by section 592 of title 40, United States Code, \$30,000,000 to carry out this section. Such sums shall be derived from the unobligated balance of amounts made available from the Fund for fiscal year 2007, and prior fiscal years, for repairs and alternations and other activities (excluding amounts made available for the energy program). Such sums shall remain available until expended.

SEC. 522. PROHIBITION ON INCANDESCENT LAMPS BY COAST GUARD.

(a) PROHIBITION.—Except as provided by subsection (b), on and after January 1, 2009, a general service incandescent lamp shall not be purchased or installed in a Coast Guard facility by or on behalf of the Coast Guard.

(b) EXCEPTION.—A general service incandescent lamp may be purchased, installed, and used in a Coast Guard facility whenever the application of a general service incandescent lamp is—

(1) necessary due to purpose or design, including medical, security, and industrial applications;

(2) reasonable due to the architectural or historical value of a light fixture installed before January 1, 2009; or

(3) the Commandant of the Coast Guard determines that operational requirements necessitate the use of a general service incandescent lamp.

(c) LIMITATION.—In this section, the term “facility” does not include a vessel or aircraft of the Coast Guard.

SEC. 523. STANDARD RELATING TO SOLAR HOT WATER HEATERS.

Section 305(a)(3)(A) of the Energy Conservation and Production Act (42 U.S.C. 6834(a)(3)(A)) is amended—

(1) in clause (i)(II), by striking “and” at the end;

(2) in clause (ii), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following:

“(iii) if lifecycle cost-effective, as compared to other reasonably available technologies, not less than 30 percent of the hot water demand for each new Federal building or Federal building undergoing a major renovation be met through the installation and use of solar hot water heaters.”.

SEC. 524. FEDERALLY-PROCURED APPLIANCES WITH STANDBY POWER.

Section 553 of the National Energy Conservation Policy Act (42 U.S.C. 8259b) is amended—

(1) by redesignating subsection (e) as subsection (f); and

(2) by inserting after subsection (d) the following:

“(e) FEDERALLY-PROCURED APPLIANCES WITH STANDBY POWER.—

“(1) DEFINITION OF ELIGIBLE PRODUCT.—In this subsection, the term ‘eligible product’ means a commercially available, off-the-shelf product that—

“(A)(i) uses external standby power devices; or

“(ii) contains an internal standby power function; and

“(B) is included on the list compiled under paragraph (4).

“(2) FEDERAL PURCHASING REQUIREMENT.—Subject to paragraph (3), if an agency purchases an eligible product, the agency shall purchase—

“(A) an eligible product that uses not more than 1 watt in the standby power consuming mode of the eligible product; or

“(B) if an eligible product described in subparagraph (A) is not available, the eligible product with the lowest available standby power wattage in the standby power consuming mode of the eligible product.

“(3) LIMITATION.—The requirements of paragraph (2) shall apply to a purchase by an agency only if—

“(A) the lower-wattage eligible product is—

“(i) lifecycle cost-effective; and

“(ii) practicable; and

“(B) the utility and performance of the eligible product is not compromised by the lower wattage requirement.

“(4) ELIGIBLE PRODUCTS.—The Secretary, in consultation with the Secretary of Defense,

the Administrator of the Environmental Protection Agency, and the Administrator of General Services, shall compile a publicly accessible list of cost-effective eligible products that shall be subject to the purchasing requirements of paragraph (2).”.

SEC. 525. FEDERAL PROCUREMENT OF ENERGY EFFICIENT PRODUCTS.

(a) AMENDMENTS.—Section 553 of the National Energy Conservation Policy Act (42 U.S.C. 8259b) is amended—

(1) in subsection (b)(1), by inserting “in a product category covered by the Energy Star program or the Federal Energy Management Program for designated products” after “energy consuming product”; and

(2) in the second sentence of subsection (c)—

(A) by inserting “list in their catalogues, represent as available, and” after “Logistics Agency shall”; and

(B) by striking “where the agency” and inserting “in which the head of the agency”.

(b) CATALOGUE LISTING DEADLINE.—Not later than 9 months after the date of enactment of this Act, the General Services Administration and the Defense Logistics Agency shall ensure that the requirement established by the amendment made by subsection (a)(2)(A) has been fully complied with.

SEC. 526. PROCUREMENT AND ACQUISITION OF ALTERNATIVE FUELS.

No Federal agency shall enter into a contract for procurement of an alternative or synthetic fuel, including a fuel produced from nonconventional petroleum sources, for any mobility-related use, other than for research or testing, unless the contract specifies that the lifecycle greenhouse gas emissions associated with the production and combustion of the fuel supplied under the contract must, on an ongoing basis, be less than or equal to such emissions from the equivalent conventional fuel produced from conventional petroleum sources.

SEC. 527. GOVERNMENT EFFICIENCY STATUS REPORTS.

(a) IN GENERAL.—Each Federal agency subject to any of the requirements of this title or the amendments made by this title shall compile and submit to the Director of the Office of Management and Budget an annual Government efficiency status report on—

(1) compliance by the agency with each of the requirements of this title and the amendments made by this title;

(2) the status of the implementation by the agency of initiatives to improve energy efficiency, reduce energy costs, and reduce emissions of greenhouse gases; and

(3) savings to the taxpayers of the United States resulting from mandated improvements under this title and the amendments made by this title

(b) SUBMISSION.—The report shall be submitted—

(1) to the Director at such time as the Director requires;

(2) in electronic, not paper, format; and

(3) consistent with related reporting requirements.

SEC. 528. OMB GOVERNMENT EFFICIENCY REPORTS AND SCORECARDS.

(a) REPORTS.—Not later than April 1 of each year, the Director of the Office of Management and Budget shall submit an annual Government efficiency report to the Committee on Oversight and Government Reform of the House of Representatives and the Committee on Governmental Affairs of the Senate, which shall contain—

(1) a summary of the information reported by agencies under section 527;

(2) an evaluation of the overall progress of the Federal Government toward achieving the goals of this title and the amendments made by this title; and

(3) recommendations for additional actions necessary to meet the goals of this title and the amendments made by this title.

(b) SCORECARDS.—The Director of the Office of Management and Budget shall include in any annual energy scorecard the Director is otherwise required to submit a description of the compliance of each agency with the requirements of this title and the amendments made by this title.

SEC. 529. ELECTRICITY SECTOR DEMAND RESPONSE.

(a) IN GENERAL.—Title V of the National Energy Conservation Policy Act (42 U.S.C. 8241 et seq.) is amended by adding at the end the following:

“PART 5—PEAK DEMAND REDUCTION

“SEC. 571. NATIONAL ACTION PLAN FOR DEMAND RESPONSE.

“(a) NATIONAL ASSESSMENT AND REPORT.—The Federal Energy Regulatory Commission (“Commission”) shall conduct a National Assessment of Demand Response. The Commission shall, within 18 months of the date of enactment of this part, submit a report to Congress that includes each of the following:

“(1) Estimation of nationwide demand response potential in 5 and 10 year horizons, including data on a State-by-State basis, and a methodology for updates of such estimates on an annual basis.

“(2) Estimation of how much of this potential can be achieved within 5 and 10 years after the enactment of this part accompanied by specific policy recommendations that if implemented can achieve the estimated potential. Such recommendations shall include options for funding and/or incentives for the development of demand response resources.

“(3) The Commission shall further note any barriers to demand response programs offering flexible, non-discriminatory, and fairly compensatory terms for the services and benefits made available, and shall provide recommendations for overcoming such barriers.

“(4) The Commission shall seek to take advantage of preexisting research and ongoing work, and shall insure that there is no duplication of effort.

“(b) NATIONAL ACTION PLAN ON DEMAND RESPONSE.—The Commission shall further develop a National Action Plan on Demand Response, soliciting and accepting input and participation from a broad range of industry stakeholders, State regulatory utility commissioners, and non-governmental groups. The Commission shall seek consensus where possible, and decide on optimum solutions to issues that defy consensus. Such Plan shall be completed within one year after the completion of the National Assessment of Demand Response, and shall meet each of the following objectives:

“(1) Identification of requirements for technical assistance to States to allow them to maximize the amount of demand response resources that can be developed and deployed.

“(2) Design and identification of requirements for implementation of a national communications program that includes broad-based customer education and support.

“(3) Development or identification of analytical tools, information, model regulatory provisions, model contracts, and other support materials for use by customers, states, utilities and demand response providers.

“(c) Upon completion, the National Action Plan on Demand Response shall be published, together with any favorable and dissenting comments submitted by participants in its preparation. Six months after publication, the Commission, together with the Secretary of Energy, shall submit to Congress a proposal to implement the Action Plan, includ-

ing specific proposed assignments of responsibility, proposed budget amounts, and any agreements secured for participation from State and other participants.

“(d) AUTHORIZATION.—There are authorized to be appropriated to the Commission to carry out this section not more than \$10,000,000 for each of the fiscal years 2008, 2009, and 2010.”

(b) TABLE OF CONTENTS.—The table of contents for the National Energy Conservation Policy Act (42 U.S.C. 8201 note) is amended by adding after the items relating to part 4 of title V the following:

“PART 5—PEAK DEMAND REDUCTION

“Sec. 571. National Action Plan for Demand Response.”

Subtitle D—Energy Efficiency of Public Institutions

SEC. 531. REAUTHORIZATION OF STATE ENERGY PROGRAMS.

Section 365(f) of the Energy Policy and Conservation Act (42 U.S.C. 6325(f)) is amended by striking “\$100,000,000 for each of the fiscal years 2006 and 2007 and \$125,000,000 for fiscal year 2008” and inserting “\$125,000,000 for each of fiscal years 2007 through 2012”.

SEC. 532. UTILITY ENERGY EFFICIENCY PROGRAMS.

(a) ELECTRIC UTILITIES.—Section 111(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(d)) is amended by adding at the end the following:

“(16) INTEGRATED RESOURCE PLANNING.—Each electric utility shall—

“(A) integrate energy efficiency resources into utility, State, and regional plans; and

“(B) adopt policies establishing cost-effective energy efficiency as a priority resource.

“(17) RATE DESIGN MODIFICATIONS TO PROMOTE ENERGY EFFICIENCY INVESTMENTS.—

“(A) IN GENERAL.—The rates allowed to be charged by any electric utility shall—

“(i) align utility incentives with the delivery of cost-effective energy efficiency; and

“(ii) promote energy efficiency investments.

“(B) POLICY OPTIONS.—In complying with subparagraph (A), each State regulatory authority and each nonregulated utility shall consider—

“(i) removing the throughput incentive and other regulatory and management disincentives to energy efficiency;

“(ii) providing utility incentives for the successful management of energy efficiency programs;

“(iii) including the impact on adoption of energy efficiency as 1 of the goals of retail rate design, recognizing that energy efficiency must be balanced with other objectives;

“(iv) adopting rate designs that encourage energy efficiency for each customer class;

“(v) allowing timely recovery of energy efficiency-related costs; and

“(vi) offering home energy audits, offering demand response programs, publicizing the financial and environmental benefits associated with making home energy efficiency improvements, and educating homeowners about all existing Federal and State incentives, including the availability of low-cost loans, that make energy efficiency improvements more affordable.”

(b) NATURAL GAS UTILITIES.—Section 303(b) of the Public Utility Regulatory Policies Act of 1978 (15 U.S.C. 3203(b)) is amended by adding at the end the following:

“(5) ENERGY EFFICIENCY.—Each natural gas utility shall—

“(A) integrate energy efficiency resources into the plans and planning processes of the natural gas utility; and

“(B) adopt policies that establish energy efficiency as a priority resource in the plans and planning processes of the natural gas utility.

“(6) RATE DESIGN MODIFICATIONS TO PROMOTE ENERGY EFFICIENCY INVESTMENTS.—

“(A) IN GENERAL.—The rates allowed to be charged by a natural gas utility shall align utility incentives with the deployment of cost-effective energy efficiency.

“(B) POLICY OPTIONS.—In complying with subparagraph (A), each State regulatory authority and each nonregulated utility shall consider—

“(i) separating fixed-cost revenue recovery from the volume of transportation or sales service provided to the customer;

“(ii) providing to utilities incentives for the successful management of energy efficiency programs, such as allowing utilities to retain a portion of the cost-reducing benefits accruing from the programs;

“(iii) promoting the impact on adoption of energy efficiency as 1 of the goals of retail rate design, recognizing that energy efficiency must be balanced with other objectives; and

“(iv) adopting rate designs that encourage energy efficiency for each customer class.

For purposes of applying the provisions of this subtitle to this paragraph, any reference in this subtitle to the date of enactment of this Act shall be treated as a reference to the date of enactment of this paragraph.”

(c) CONFORMING AMENDMENT.—Section 303(a) of the Public Utility Regulatory Policies Act of 1978 U.S.C. 3203(a)) is amended by striking “and (4)” inserting “(4), (5), and (6)”.

Subtitle E—Energy Efficiency and Conservation Block Grants

SEC. 541. DEFINITIONS.

In this subtitle:

(1) ELIGIBLE ENTITY.—The term “eligible entity” means—

(A) a State;

(B) an eligible unit of local government; and

(C) an Indian tribe.

(2) ELIGIBLE UNIT OF LOCAL GOVERNMENT.—The term “eligible unit of local government” means—

(A) an eligible unit of local government—alternative 1; and

(B) an eligible unit of local government—alternative 2.

(3)(A) ELIGIBLE UNIT OF LOCAL GOVERNMENT—ALTERNATIVE 1.—The term “eligible unit of local government—alternative 1” means—

(i) a city with a population—

(I) of at least 35,000; or

(II) that causes the city to be 1 of the 10 highest-populated cities of the State in which the city is located; and

(ii) a county with a population—

(I) of at least 200,000; or

(II) that causes the county to be 1 of the 10 highest-populated counties of the State in which the county is located.

(B) ELIGIBLE UNIT OF LOCAL GOVERNMENT—ALTERNATIVE 2.—The term “eligible unit of local government—alternative 2” means—

(i) a city with a population of at least 50,000; or

(ii) a county with a population of at least 200,000.

(4) INDIAN TRIBE.—The term “Indian tribe” has the meaning given the term in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(5) PROGRAM.—The term “program” means the Energy Efficiency and Conservation Block Grant Program established under section 542(a).

(6) STATE.—The term “State” means—

(A) a State;

(B) the District of Columbia;

(C) the Commonwealth of Puerto Rico; and

(D) any other territory or possession of the United States.

SEC. 542. ENERGY EFFICIENCY AND CONSERVATION BLOCK GRANT PROGRAM.

(a) **ESTABLISHMENT.**—The Secretary shall establish a program, to be known as the “Energy Efficiency and Conservation Block Grant Program”, under which the Secretary shall provide grants to eligible entities in accordance with this subtitle.

(b) **PURPOSE.**—The purpose of the program shall be to assist eligible entities in implementing strategies—

(1) to reduce fossil fuel emissions created as a result of activities within the jurisdictions of eligible entities in manner that—

(A) is environmentally sustainable; and
(B) to the maximum extent practicable, maximizes benefits for local and regional communities;

(2) to reduce the total energy use of the eligible entities; and

(3) to improve energy efficiency in—

(A) the transportation sector;
(B) the building sector; and
(C) other appropriate sectors.

SEC. 543. ALLOCATION OF FUNDS.

(a) **IN GENERAL.**—Of amounts made available to provide grants under this subtitle for each fiscal year, the Secretary shall allocate—

(1) 68 percent to eligible units of local government in accordance with subsection (b);

(2) 28 percent to States in accordance with subsection (c);

(3) 2 percent to Indian tribes in accordance with subsection (d); and

(4) 2 percent for competitive grants under section 546.

(b) **ELIGIBLE UNITS OF LOCAL GOVERNMENT.**—Of amounts available for distribution to eligible units of local government under subsection (a)(1), the Secretary shall provide grants to eligible units of local government under this section based on a formula established by the Secretary according to—

(1) the populations served by the eligible units of local government, according to the latest available decennial census; and

(2) the daytime populations of the eligible units of local government and other similar factors (such as square footage of commercial, office, and industrial space), as determined by the Secretary.

(c) **STATES.**—Of amounts available for distribution to States under subsection (a)(2), the Secretary shall provide—

(1) not less than 1.25 percent to each State; and

(2) the remainder among the States, based on a formula to be established by the Secretary that takes into account—

(A) the population of each State; and
(B) any other criteria that the Secretary determines to be appropriate.

(d) **INDIAN TRIBES.**—Of amounts available for distribution to Indian tribes under subsection (a)(3), the Secretary shall establish a formula for allocation of the amounts to Indian tribes, taking into account any factors that the Secretary determines to be appropriate.

(e) **PUBLICATION OF ALLOCATION FORMULAS.**—Not later than 90 days before the beginning of each fiscal year for which grants are provided under this subtitle, the Secretary shall publish in the Federal Register the formulas for allocation established under this section.

(f) **STATE AND LOCAL ADVISORY COMMITTEE.**—The Secretary shall establish a State and local advisory committee to advise the Secretary regarding administration, implementation, and evaluation of the program.

SEC. 544. USE OF FUNDS.

An eligible entity may use a grant received under this subtitle to carry out activities to achieve the purposes of the program, including—

(1) development and implementation of an energy efficiency and conservation strategy under section 545(b);

(2) retaining technical consultant services to assist the eligible entity in the development of such a strategy, including—

(A) formulation of energy efficiency, energy conservation, and energy usage goals;

(B) identification of strategies to achieve those goals—

(i) through efforts to increase energy efficiency and reduce energy consumption; and
(ii) by encouraging behavioral changes among the population served by the eligible entity;

(C) development of methods to measure progress in achieving the goals;

(D) development and publication of annual reports to the population served by the eligible entity describing—

(i) the strategies and goals; and
(ii) the progress made in achieving the strategies and goals during the preceding calendar year; and

(E) other services to assist in the implementation of the energy efficiency and conservation strategy;

(3) conducting residential and commercial building energy audits;

(4) establishment of financial incentive programs for energy efficiency improvements;

(5) the provision of grants to nonprofit organizations and governmental agencies for the purpose of performing energy efficiency retrofits;

(6) development and implementation of energy efficiency and conservation programs for buildings and facilities within the jurisdiction of the eligible entity, including—

(A) design and operation of the programs;

(B) identifying the most effective methods for achieving maximum participation and efficiency rates;

(C) public education;

(D) measurement and verification protocols; and

(E) identification of energy efficient technologies;

(7) development and implementation of programs to conserve energy used in transportation, including—

(A) use of flex time by employers;

(B) satellite work centers;

(C) development and promotion of zoning guidelines or requirements that promote energy efficient development;

(D) development of infrastructure, such as bike lanes and pathways and pedestrian walkways;

(E) synchronization of traffic signals; and

(F) other measures that increase energy efficiency and decrease energy consumption;

(8) development and implementation of building codes and inspection services to promote building energy efficiency;

(9) application and implementation of energy distribution technologies that significantly increase energy efficiency, including—

(A) distributed resources; and

(B) district heating and cooling systems;

(10) activities to increase participation and efficiency rates for material conservation programs, including source reduction, recycling, and recycled content procurement programs that lead to increases in energy efficiency;

(11) the purchase and implementation of technologies to reduce, capture, and, to the maximum extent practicable, use methane and other greenhouse gases generated by landfills or similar sources;

(12) replacement of traffic signals and street lighting with energy efficient lighting technologies, including—

(A) light emitting diodes; and

(B) any other technology of equal or greater energy efficiency;

(13) development, implementation, and installation on or in any government building of the eligible entity of onsite renewable energy technology that generates electricity from renewable resources, including—

(A) solar energy;

(B) wind energy;

(C) fuel cells; and

(D) biomass; and

(14) any other appropriate activity, as determined by the Secretary, in consultation with—

(A) the Administrator of the Environmental Protection Agency;

(B) the Secretary of Transportation; and

(C) the Secretary of Housing and Urban Development.

SEC. 545. REQUIREMENTS FOR ELIGIBLE ENTITIES.

(a) **CONSTRUCTION REQUIREMENT.**—

(1) **IN GENERAL.**—To be eligible to receive a grant under the program, each eligible applicant shall submit to the Secretary a written assurance that all laborers and mechanics employed by any contractor or subcontractor of the eligible entity during any construction, alteration, or repair activity funded, in whole or in part, by the grant shall be paid wages at rates not less than the prevailing wages for similar construction activities in the locality, as determined by the Secretary of Labor, in accordance with sections 3141 through 3144, 3146, and 3147 of title 40, United States Code.

(2) **SECRETARY OF LABOR.**—With respect to the labor standards referred to in paragraph (1), the Secretary of Labor shall have the authority and functions described in—

(A) Reorganization Plan Numbered 14 of 1950 (5 U.S.C. 903 note); and

(B) section 3145 of title 40, United States Code.

(b) **ELIGIBLE UNITS OF LOCAL GOVERNMENT AND INDIAN TRIBES.**—

(1) **PROPOSED STRATEGY.**—

(A) **IN GENERAL.**—Not later than 1 year after the date on which an eligible unit of local government or Indian tribe receives a grant under this subtitle, the eligible unit of local government or Indian tribe shall submit to the Secretary a proposed energy efficiency and conservation strategy in accordance with this paragraph.

(B) **INCLUSIONS.**—The proposed strategy under subparagraph (A) shall include—

(i) a description of the goals of the eligible unit of local government or Indian tribe, in accordance with the purposes of this subtitle, for increased energy efficiency and conservation in the jurisdiction of the eligible unit of local government or Indian tribe; and

(ii) a plan for the use of the grant to assist the eligible unit of local government or Indian tribe in achieving those goals, in accordance with section 544.

(C) **REQUIREMENTS FOR ELIGIBLE UNITS OF LOCAL GOVERNMENT.**—In developing the strategy under subparagraph (A), an eligible unit of local government shall—

(i) take into account any plans for the use of funds by adjacent eligible units of local governments that receive grants under the program; and

(ii) coordinate and share information with the State in which the eligible unit of local government is located regarding activities carried out using the grant to maximize the energy efficiency and conservation benefits under this subtitle.

(2) **APPROVAL BY SECRETARY.**—

(A) **IN GENERAL.**—The Secretary shall approve or disapprove a proposed strategy under paragraph (1) by not later than 120 days after the date of submission of the proposed strategy.

(B) **DISAPPROVAL.**—If the Secretary disapproves a proposed strategy under subparagraph (A)—

(i) the Secretary shall provide to the eligible unit of local government or Indian tribe the reasons for the disapproval; and

(ii) the eligible unit of local government or Indian tribe may revise and resubmit the proposed strategy as many times as necessary until the Secretary approves a proposed strategy.

(C) **REQUIREMENT.**—The Secretary shall not provide to an eligible unit of local government or Indian tribe any grant under the program until a proposed strategy of the eligible unit of local government or Indian tribe is approved by the Secretary under this paragraph.

(3) **LIMITATIONS ON USE OF FUNDS.**—Of amounts provided to an eligible unit of local government or Indian tribe under the program, an eligible unit of local government or Indian tribe may use—

(A) for administrative expenses, excluding the cost of meeting the reporting requirements of this subtitle, an amount equal to the greater of—

- (i) 10 percent; and
- (ii) \$75,000;

(B) for the establishment of revolving loan funds, an amount equal to the greater of—

- (i) 20 percent; and
- (ii) \$250,000; and

(C) for the provision of subgrants to non-governmental organizations for the purpose of assisting in the implementation of the energy efficiency and conservation strategy of the eligible unit of local government or Indian tribe, an amount equal to the greater of—

- (i) 20 percent; and
- (ii) \$250,000.

(4) **ANNUAL REPORT.**—Not later than 2 years after the date on which funds are initially provided to an eligible unit of local government or Indian tribe under the program, and annually thereafter, the eligible unit of local government or Indian tribe shall submit to the Secretary a report describing—

(A) the status of development and implementation of the energy efficiency and conservation strategy of the eligible unit of local government or Indian tribe; and

(B) as practicable, an assessment of energy efficiency gains within the jurisdiction of the eligible unit of local government or Indian tribe.

(C) **STATES.**—

(1) **DISTRIBUTION OF FUNDS.**—

(A) **IN GENERAL.**—A State that receives a grant under the program shall use not less than 60 percent of the amount received to provide subgrants to units of local government in the State that are not eligible units of local government.

(B) **DEADLINE.**—The State shall provide the subgrants required under subparagraph (A) by not later than 180 days after the date on which the Secretary approves a proposed energy efficiency and conservation strategy of the State under paragraph (3).

(2) **REVISION OF CONSERVATION PLAN; PROPOSED STRATEGY.**—Not later than 120 days after the date of enactment of this Act, each State shall—

(A) modify the State energy conservation plan of the State under section 362 of the Energy Policy and Conservation Act (42 U.S.C. 6322) to establish additional goals for increased energy efficiency and conservation in the State; and

(B) submit to the Secretary a proposed energy efficiency and conservation strategy that—

(i) establishes a process for providing subgrants as required under paragraph (1); and

(ii) includes a plan of the State for the use of funds received under a the program to as-

sist the State in achieving the goals established under subparagraph (A), in accordance with sections 542(b) and 544.

(3) **APPROVAL BY SECRETARY.**—

(A) **IN GENERAL.**—The Secretary shall approve or disapprove a proposed strategy under paragraph (2)(B) by not later than 120 days after the date of submission of the proposed strategy.

(B) **DISAPPROVAL.**—If the Secretary disapproves a proposed strategy under subparagraph (A)—

(i) the Secretary shall provide to the State the reasons for the disapproval; and

(ii) the State may revise and resubmit the proposed strategy as many times as necessary until the Secretary approves a proposed strategy.

(C) **REQUIREMENT.**—The Secretary shall not provide to a State any grant under the program until a proposed strategy of the State is approved the Secretary under this paragraph.

(4) **LIMITATIONS ON USE OF FUNDS.**—A State may use not more than 10 percent of amounts provided under the program for administrative expenses.

(5) **ANNUAL REPORTS.**—Each State that receives a grant under the program shall submit to the Secretary an annual report that describes—

(A) the status of development and implementation of the energy efficiency and conservation strategy of the State during the preceding calendar year;

(B) the status of the subgrant program of the State under paragraph (1);

(C) the energy efficiency gains achieved through the energy efficiency and conservation strategy of the State during the preceding calendar year; and

(D) specific energy efficiency and conservation goals of the State for subsequent calendar years.

SEC. 546. COMPETITIVE GRANTS.

(A) **IN GENERAL.**—Of the total amount made available for each fiscal year to carry out this subtitle, the Secretary shall use not less than 2 percent to provide grants under this section, on a competitive basis, to—

(1) units of local government (including Indian tribes) that are not eligible entities; and

(2) consortia of units of local government described in paragraph (1).

(B) **APPLICATIONS.**—To be eligible to receive a grant under this section, a unit of local government or consortia shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a plan of the unit of local government to carry out an activity described in section 544.

(C) **PRIORITY.**—In providing grants under this section, the Secretary shall give priority to units of local government—

(1) located in States with populations of less than 2,000,000; or

(2) that plan to carry out projects that would result in significant energy efficiency improvements or reductions in fossil fuel use.

SEC. 547. REVIEW AND EVALUATION.

(A) **IN GENERAL.**—The Secretary may review and evaluate the performance of any eligible entity that receives a grant under the program, including by conducting an audit, as the Secretary determines to be appropriate.

(B) **WITHHOLDING OF FUNDS.**—The Secretary may withhold from an eligible entity any portion of a grant to be provided to the eligible entity under the program if the Secretary determines that the eligible entity has failed to achieve compliance with—

(1) any applicable guideline or regulation of the Secretary relating to the program, in-

cluding the misuse or misappropriation of funds provided under the program; or

(2) the energy efficiency and conservation strategy of the eligible entity.

SEC. 548. FUNDING.

(A) **AUTHORIZATION OF APPROPRIATIONS.**—

(1) **GRANTS.**—There is authorized to be appropriated to the Secretary for the provision of grants under the program \$2,000,000,000 for each of fiscal years 2008 through 2012; provided that 49 percent of the appropriated funds shall be distributed using the definition of eligible unit of local government—alternative 1 in section 541(3)(A) and 49 percent of the appropriated funds shall be distributed using the definition of eligible unit of local government—alternative 2 in section 541(3)(B).

(2) **ADMINISTRATIVE COSTS.**—There are authorized to be appropriated to the Secretary for administrative expenses of the program—

(A) \$20,000,000 for each of fiscal years 2008 and 2009;

(B) \$25,000,000 for each of fiscal years 2010 and 2011; and

(C) \$30,000,000 for fiscal year 2012.

(b) **MAINTENANCE OF FUNDING.**—The funding provided under this section shall supplement (and not supplant) other Federal funding provided under—

(1) a State energy conservation plan established under part D of title III of the Energy Policy and Conservation Act (42 U.S.C. 6321 et seq.); or

(2) the Weatherization Assistance Program for Low-Income Persons established under part A of title IV of the Energy Conservation and Production Act (42 U.S.C. 6361 et seq.).

TITLE VI—ACCELERATED RESEARCH AND DEVELOPMENT

Subtitle A—Solar Energy

SEC. 601. SHORT TITLE.

This subtitle may be cited as the “Solar Energy Research and Advancement Act of 2007”.

SEC. 602. THERMAL ENERGY STORAGE RESEARCH AND DEVELOPMENT PROGRAM.

(A) **ESTABLISHMENT.**—The Secretary shall establish a program of research and development to provide lower cost and more viable thermal energy storage technologies to enable the shifting of electric power loads on demand and extend the operating time of concentrating solar power electric generating plants.

(B) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary for carrying out this section \$5,000,000 for fiscal year 2008, \$7,000,000 for fiscal year 2009, \$9,000,000 for fiscal year 2010, \$10,000,000 for fiscal year 2011, and \$12,000,000 for fiscal year 2012.

SEC. 603. CONCENTRATING SOLAR POWER COMMERCIAL APPLICATION STUDIES.

(A) **INTEGRATION.**—The Secretary shall conduct a study on methods to integrate concentrating solar power and utility-scale photovoltaic systems into regional electricity transmission systems, and to identify new transmission or transmission upgrades needed to bring electricity from high concentrating solar power resource areas to growing electric power load centers throughout the United States. The study shall analyze and assess cost-effective approaches for management and large-scale integration of concentrating solar power and utility-scale photovoltaic systems into regional electric transmission grids to improve electric reliability, to efficiently manage load, and to reduce demand on the natural gas transmission system for electric power. The Secretary shall submit a report to Congress on the results of this study not later than 12 months after the date of enactment of this Act.

(b) WATER CONSUMPTION.—Not later than 6 months after the date of the enactment of this Act, the Secretary of Energy shall transmit to Congress a report on the results of a study on methods to reduce the amount of water consumed by concentrating solar power systems.

SEC. 604. SOLAR ENERGY CURRICULUM DEVELOPMENT AND CERTIFICATION GRANTS.

(a) ESTABLISHMENT.—The Secretary shall establish in the Office of Solar Energy Technologies a competitive grant program to create and strengthen solar industry workforce training and internship programs in installation, operation, and maintenance of solar energy products. The goal of this program is to ensure a supply of well-trained individuals to support the expansion of the solar energy industry.

(b) AUTHORIZED ACTIVITIES.—Grant funds may be used to support the following activities:

(1) Creation and development of a solar energy curriculum appropriate for the local educational, entrepreneurial, and environmental conditions, including curriculum for community colleges.

(2) Support of certification programs for individual solar energy system installers, instructors, and training programs.

(3) Internship programs that provide hands-on participation by students in commercial applications.

(4) Activities required to obtain certification of training programs and facilities by an industry-accepted quality-control certification program.

(5) Incorporation of solar-specific learning modules into traditional occupational training and internship programs for construction-related trades.

(6) The purchase of equipment necessary to carry out activities under this section.

(7) Support of programs that provide guidance and updates to solar energy curriculum instructors.

(c) ADMINISTRATION OF GRANTS.—Grants may be awarded under this section for up to 3 years. The Secretary shall award grants to ensure sufficient geographic distribution of training programs nationally. Grants shall only be awarded for programs certified by an industry-accepted quality-control certification institution, or for new and growing programs with a credible path to certification. Due consideration shall be given to women, underrepresented minorities, and persons with disabilities.

(d) REPORT.—The Secretary shall make public, on the website of the Department or upon request, information on the name and institution for all grants awarded under this section, including a brief description of the project as well as the grant award amount.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this section \$10,000,000 for each of the fiscal years 2008 through 2012.

SEC. 605. DAYLIGHTING SYSTEMS AND DIRECT SOLAR LIGHT PIPE TECHNOLOGY.

(a) ESTABLISHMENT.—The Secretary shall establish a program of research and development to provide assistance in the demonstration and commercial application of direct solar renewable energy sources to provide alternatives to traditional power generation for lighting and illumination, including light pipe technology, and to promote greater energy conservation and improved efficiency. All direct solar renewable energy devices supported under this program shall have the capability to provide measurable data on the amount of kilowatt-hours saved over the traditionally powered light sources they have replaced.

(b) REPORTING.—The Secretary shall transmit to Congress an annual report assessing

the measurable data derived from each project in the direct solar renewable energy sources program and the energy savings resulting from its use.

(c) DEFINITIONS.—For purposes of this section—

(1) the term “direct solar renewable energy” means energy from a device that converts sunlight into useable light within a building, tunnel, or other enclosed structure, replacing artificial light generated by a light fixture and doing so without the conversion of the sunlight into another form of energy; and

(2) the term “light pipe” means a device designed to transport visible solar radiation from its collection point to the interior of a building while excluding interior heat gain in the nonheating season.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this section \$3,500,000 for each of the fiscal years 2008 through 2012.

SEC. 606. SOLAR AIR CONDITIONING RESEARCH AND DEVELOPMENT PROGRAM.

(a) ESTABLISHMENT.—The Secretary shall establish a research, development, and demonstration program to promote less costly and more reliable decentralized distributed solar-powered air conditioning for individuals and businesses.

(b) AUTHORIZED ACTIVITIES.—Grants made available under this section may be used to support the following activities:

(1) Advancing solar thermal collectors, including concentrating solar thermal and electric systems, flat plate and evacuated tube collector performance.

(2) Achieving technical and economic integration of solar-powered distributed air-conditioning systems with existing hot water and storage systems for residential applications.

(3) Designing and demonstrating mass manufacturing capability to reduce costs of modular standardized solar-powered distributed air conditioning systems and components.

(4) Improving the efficiency of solar-powered distributed air-conditioning to increase the effectiveness of solar-powered absorption chillers, solar-driven compressors and condensers, and cost-effective precooling approaches.

(5) Researching and comparing performance of solar-powered distributed air conditioning systems in different regions of the country, including potential integration with other onsite systems, such as solar, biogas, geothermal heat pumps, and propane assist or combined propane fuel cells, with a goal to develop site-specific energy production and management systems that ease fuel and peak utility loading.

(c) COST SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a project carried out under this section.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this section \$2,500,000 for each of the fiscal years 2008 through 2012.

SEC. 607. PHOTOVOLTAIC DEMONSTRATION PROGRAM.

(a) IN GENERAL.—The Secretary shall establish a program of grants to States to demonstrate advanced photovoltaic technology.

(b) REQUIREMENTS.—

(1) ABILITY TO MEET REQUIREMENTS.—To receive funding under the program under this section, a State must submit a proposal that demonstrates, to the satisfaction of the Secretary, that the State will meet the requirements of subsection (f).

(2) COMPLIANCE WITH REQUIREMENTS.—If a State has received funding under this section for the preceding year, the State must demonstrate, to the satisfaction of the Secretary, that it complied with the requirements of subsection (f) in carrying out the program during that preceding year, and that it will do so in the future, before it can receive further funding under this section.

(c) COMPETITION.—The Secretary shall award grants on a competitive basis to the States with the proposals the Secretary considers most likely to encourage the widespread adoption of photovoltaic technologies. The Secretary shall take into consideration the geographic distribution of awards.

(d) PROPOSALS.—Not later than 6 months after the date of enactment of this Act, and in each subsequent fiscal year for the life of the program, the Secretary shall solicit proposals from the States to participate in the program under this section.

(e) COMPETITIVE CRITERIA.—In awarding funds in a competitive allocation under subsection (c), the Secretary shall consider—

(1) the likelihood of a proposal to encourage the demonstration of, or lower the costs of, advanced photovoltaic technologies; and

(2) the extent to which a proposal is likely to—

(A) maximize the amount of photovoltaics demonstrated;

(B) maximize the proportion of non-Federal cost share; and

(C) limit State administrative costs.

(f) STATE PROGRAM.—A program operated by a State with funding under this section shall provide competitive awards for the demonstration of advanced photovoltaic technologies. Each State program shall—

(1) require a contribution of at least 60 percent per award from non-Federal sources, which may include any combination of State, local, and private funds, except that at least 10 percent of the funding must be supplied by the State;

(2) endeavor to fund recipients in the commercial, industrial, institutional, governmental, and residential sectors;

(3) limit State administrative costs to no more than 10 percent of the grant;

(4) report annually to the Secretary on—

(A) the amount of funds disbursed;

(B) the amount of photovoltaics purchased; and

(C) the results of the monitoring under paragraph (5);

(5) provide for measurement and verification of the output of a representative sample of the photovoltaics systems demonstrated throughout the average working life of the systems, or at least 20 years; and

(6) require that applicant buildings must have received an independent energy efficiency audit during the 6-month period preceding the filing of the application.

(g) UNEXPENDED FUNDS.—If a State fails to expend any funds received under this section within 3 years of receipt, such remaining funds shall be returned to the Treasury.

(h) REPORTS.—The Secretary shall report to Congress 5 years after funds are first distributed to the States under this section—

(1) the amount of photovoltaics demonstrated;

(2) the number of projects undertaken;

(3) the administrative costs of the program;

(4) the results of the monitoring under subsection (f)(5); and

(5) the total amount of funds distributed, including a breakdown by State.

(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for the purposes of carrying out this section—

(1) \$15,000,000 for fiscal year 2008;

- (2) \$30,000,000 for fiscal year 2009;
- (3) \$45,000,000 for fiscal year 2010;
- (4) \$60,000,000 for fiscal year 2011; and
- (5) \$70,000,000 for fiscal year 2012.

Subtitle B—Geothermal Energy

SEC. 611. SHORT TITLE.

This subtitle may be cited as the “Advanced Geothermal Energy Research and Development Act of 2007”.

SEC. 612. DEFINITIONS.

For purposes of this subtitle:

(1) **ENGINEERED.**—When referring to enhanced geothermal systems, the term “engineered” means subjected to intervention, including intervention to address one or more of the following issues:

(A) Lack of effective permeability or porosity or open fracture connectivity within the reservoir.

(B) Insufficient contained geofluid in the reservoir.

(C) A low average geothermal gradient, which necessitates deeper drilling.

(2) **ENHANCED GEOTHERMAL SYSTEMS.**—The term “enhanced geothermal systems” means geothermal reservoir systems that are engineered, as opposed to occurring naturally.

(3) **GEOFLUID.**—The term “geofluid” means any fluid used to extract thermal energy from the Earth which is transported to the surface for direct use or electric power generation, except that such term shall not include oil or natural gas.

(4) **GEOPRESSURED RESOURCES.**—The term “geopressured resources” mean geothermal deposits found in sedimentary rocks under higher than normal pressure and saturated with gas or methane.

(5) **GEOTHERMAL.**—The term “geothermal” refers to heat energy stored in the Earth’s crust that can be accessed for direct use or electric power generation.

(6) **HYDROTHERMAL.**—The term “hydrothermal” refers to naturally occurring subsurface reservoirs of hot water or steam.

(7) **SYSTEMS APPROACH.**—The term “systems approach” means an approach to solving problems or designing systems that attempts to optimize the performance of the overall system, rather than a particular component of the system.

SEC. 613. HYDROTHERMAL RESEARCH AND DEVELOPMENT.

(a) **IN GENERAL.**—The Secretary shall support programs of research, development, demonstration, and commercial application to expand the use of geothermal energy production from hydrothermal systems, including the programs described in subsection (b).

(b) **PROGRAMS.**—

(1) **ADVANCED HYDROTHERMAL RESOURCE TOOLS.**—The Secretary, in consultation with other appropriate agencies, shall support a program to develop advanced geophysical, geochemical, and geologic tools to assist in locating hidden hydrothermal resources, and to increase the reliability of site characterization before, during, and after initial drilling. The program shall develop new prospecting techniques to assist in prioritization of targets for characterization. The program shall include a field component.

(2) **INDUSTRY COUPLED EXPLORATORY DRILLING.**—The Secretary shall support a program of cost-shared field demonstration programs, to be pursued, simultaneously and independently, in collaboration with industry partners, for the demonstration of advanced technologies and techniques of siting and exploratory drilling for undiscovered resources in a variety of geologic settings. The program shall include incentives to encourage the use of advanced technologies and techniques.

SEC. 614. GENERAL GEOTHERMAL SYSTEMS RESEARCH AND DEVELOPMENT.

(a) **SUBSURFACE COMPONENTS AND SYSTEMS.**—The Secretary shall support a program of research, development, demonstration, and commercial application of components and systems capable of withstanding extreme geothermal environments and necessary to cost-effectively develop, produce, and monitor geothermal reservoirs and produce geothermal energy. These components and systems shall include advanced casing systems (expandable tubular casing, low-clearance casing designs, and others), high-temperature cements, high-temperature submersible pumps, and high-temperature packers, as well as technologies for under-reaming, multilateral completions, high-temperature and high-pressure logging, logging while drilling, deep fracture stimulation, and reservoir system diagnostics.

(b) **RESERVOIR PERFORMANCE MODELING.**—The Secretary shall support a program of research, development, demonstration, and commercial application of models of geothermal reservoir performance, with an emphasis on accurately modeling performance over time. Models shall be developed to assist both in the development of geothermal reservoirs and to more accurately account for stress-related effects in stimulated hydrothermal and enhanced geothermal systems production environments.

(c) **ENVIRONMENTAL IMPACTS.**—The Secretary shall—

(1) support a program of research, development, demonstration, and commercial application of technologies and practices designed to mitigate or preclude potential adverse environmental impacts of geothermal energy development, production or use, and seek to ensure that geothermal energy development is consistent with the highest practicable standards of environmental stewardship;

(2) in conjunction with the Assistant Administrator for Research and Development at the Environmental Protection Agency, support a research program to identify potential environmental impacts of geothermal energy development, production, and use, and ensure that the program described in paragraph (1) addresses such impacts, including effects on groundwater and local hydrology; and

(3) support a program of research to compare the potential environmental impacts identified as part of the development, production, and use of geothermal energy with the potential emission reductions of greenhouse gases gained by geothermal energy development, production, and use.

SEC. 615. ENHANCED GEOTHERMAL SYSTEMS RESEARCH AND DEVELOPMENT.

(a) **IN GENERAL.**—The Secretary shall support a program of research, development, demonstration, and commercial application for enhanced geothermal systems, including the programs described in subsection (b).

(b) **PROGRAMS.**—

(1) **ENHANCED GEOTHERMAL SYSTEMS TECHNOLOGIES.**—The Secretary shall support a program of research, development, demonstration, and commercial application of the technologies and knowledge necessary for enhanced geothermal systems to advance to a state of commercial readiness, including advances in—

- (A) reservoir stimulation;
- (B) reservoir characterization, monitoring, and modeling;
- (C) stress mapping;
- (D) tracer development;
- (E) three-dimensional tomography; and
- (F) understanding seismic effects of reservoir engineering and stimulation.

(2) **ENHANCED GEOTHERMAL SYSTEMS RESERVOIR STIMULATION.**—

(A) **PROGRAM.**—In collaboration with industry partners, the Secretary shall support a

program of research, development, and demonstration of enhanced geothermal systems reservoir stimulation technologies and techniques. A minimum of 4 sites shall be selected in locations that show particular promise for enhanced geothermal systems development. Each site shall—

(i) represent a different class of subsurface geologic environments; and

(ii) take advantage of an existing site where subsurface characterization has been conducted or existing drill holes can be utilized, if possible.

(B) **CONSIDERATION OF EXISTING SITE.**—The Desert Peak, Nevada, site, where a Department of Energy and industry cooperative enhanced geothermal systems project is already underway, may be considered for inclusion among the sites selected under subparagraph (A).

SEC. 616. GEOTHERMAL ENERGY PRODUCTION FROM OIL AND GAS FIELDS AND RECOVERY AND PRODUCTION OF GEOPRESSURED GAS RESOURCES.

(a) **IN GENERAL.**—The Secretary shall establish a program of research, development, demonstration, and commercial application to support development of geothermal energy production from oil and gas fields and production and recovery of energy, including electricity, from geopressured resources. In addition, the Secretary shall conduct such supporting activities including research, resource characterization, and technology development as necessary.

(b) **GEOTHERMAL ENERGY PRODUCTION FROM OIL AND GAS FIELDS.**—The Secretary shall implement a grant program in support of geothermal energy production from oil and gas fields. The program shall include grants for a total of not less than three demonstration projects of the use of geothermal techniques such as advanced organic rankine cycle systems at marginal, unproductive, and productive oil and gas wells. The Secretary shall, to the extent practicable and in the public interest, make awards that—

(1) include not less than five oil or gas well sites per project award;

(2) use a range of oil or gas well hot water source temperatures from 150 degrees Fahrenheit to 300 degrees Fahrenheit;

(3) cover a range of sizes up to one megawatt;

(4) are located at a range of sites;

(5) can be replicated at a wide range of sites;

(6) facilitate identification of optimum techniques among competing alternatives;

(7) include business commercialization plans that have the potential for production of equipment at high volumes and operation and support at a large number of sites; and

(8) satisfy other criteria that the Secretary determines are necessary to carry out the program and collect necessary data and information.

The Secretary shall give preference to assessments that address multiple elements contained in paragraphs (1) through (8).

(c) **GRANT AWARDS.**—Each grant award for demonstration of geothermal technology such as advanced organic rankine cycle systems at oil and gas wells made by the Secretary under subsection (b) shall include—

(1) necessary and appropriate site engineering study;

(2) detailed economic assessment of site specific conditions;

(3) appropriate feasibility studies to determine whether the demonstration can be replicated;

(4) design or adaptation of existing technology for site specific circumstances or conditions;

(5) installation of equipment, service, and support;

(6) operation for a minimum of one year and monitoring for the duration of the demonstration; and

(7) validation of technical and economic assumptions and documentation of lessons learned.

(d) **GEOPRESSURED GAS RESOURCE RECOVERY AND PRODUCTION.**—(1) The Secretary shall implement a program to support the research, development, demonstration, and commercial application of cost-effective techniques to produce energy from geopressured resources.

(2) The Secretary shall solicit preliminary engineering designs for geopressured resources production and recovery facilities.

(3) Based upon a review of the preliminary designs, the Secretary shall award grants, which may be cost-shared, to support the detailed development and completion of engineering, architectural and technical plans needed to support construction of new designs.

(4) Based upon a review of the final design plans above, the Secretary shall award cost-shared development and construction grants for demonstration geopressured production facilities that show potential for economic recovery of the heat, kinetic energy and gas resources from geopressured resources.

(e) **COMPETITIVE GRANT SELECTION.**—Not less than 90 days after the date of the enactment of this Act, the Secretary shall conduct a national solicitation for applications for grants under the programs outlined in subsections (b) and (d). Grant recipients shall be selected on a competitive basis based on criteria in the respective subsection.

(f) **WELL DRILLING.**—No funds may be used under this section for the purpose of drilling new wells.

SEC. 617. COST SHARING AND PROPOSAL EVALUATION.

(a) **FEDERAL SHARE.**—The Federal share of costs of projects funded under this subtitle shall be in accordance with section 988 of the Energy Policy Act of 2005.

(b) **ORGANIZATION AND ADMINISTRATION OF PROGRAMS.**—Programs under this subtitle shall incorporate the following elements:

(1) The Secretary shall coordinate with, and where appropriate may provide funds in furtherance of the purposes of this subtitle to, other Department of Energy research and development programs focused on drilling, subsurface characterization, and other related technologies.

(2) In evaluating proposals, the Secretary shall give priority to proposals that demonstrate clear evidence of employing a systems approach.

(3) The Secretary shall coordinate and consult with the appropriate Federal land management agencies in selecting proposals for funding under this subtitle.

(4) Nothing in this subtitle shall be construed to alter or affect any law relating to the management or protection of Federal lands.

SEC. 618. CENTER FOR GEOTHERMAL TECHNOLOGY TRANSFER.

(a) **IN GENERAL.**—The Secretary shall award to an institution of higher education (or consortium thereof) a grant to establish a Center for Geothermal Technology Transfer (referred to in this section as the “Center”).

(b) **DUTIES.**—The Center shall—

(1) serve as an information clearinghouse for the geothermal industry by collecting and disseminating information on best practices in all areas relating to developing and utilizing geothermal resources;

(2) make data collected by the Center available to the public; and

(3) seek opportunities to coordinate efforts and share information with domestic and

international partners engaged in research and development of geothermal systems and related technology.

(c) **SELECTION CRITERIA.**—In awarding the grant under subsection (a) the Secretary shall select an institution of higher education (or consortium thereof) best suited to provide national leadership on geothermal related issues and perform the duties enumerated under subsection (b).

(d) **DURATION OF GRANT.**—A grant made under subsection (a)—

(1) shall be for an initial period of 5 years; and

(2) may be renewed for additional 5-year periods on the basis of—

(A) satisfactory performance in meeting the duties outlined in subsection (b); and

(B) any other requirements specified by the Secretary.

SEC. 619. GEOPOWERING AMERICA.

The Secretary shall expand the Department of Energy’s GeoPowering the West program to extend its geothermal technology transfer activities throughout the entire United States. The program shall be renamed “GeoPowering America”. The program shall continue to be based in the Department of Energy office in Golden, Colorado.

SEC. 620. EDUCATIONAL PILOT PROGRAM.

The Secretary shall seek to award grant funding, on a competitive basis, to an institution of higher education for a geothermal-powered energy generation facility on the institution’s campus. The purpose of the facility shall be to provide electricity and space heating. The facility shall also serve as an educational resource to students in relevant fields of study, and the data generated by the facility shall be available to students and the general public. The total funding award shall not exceed \$2,000,000.

SEC. 621. REPORTS.

(a) **REPORTS ON ADVANCED USES OF GEOTHERMAL ENERGY.**—Not later than 3 years and 5 years after the date of enactment of this Act, the Secretary shall report to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate on advanced concepts and technologies to maximize the geothermal resource potential of the United States. The reports shall include—

(1) the use of carbon dioxide as an alternative geofluid with potential carbon sequestration benefits;

(2) mineral recovery from geofluids;

(3) use of geothermal energy to produce hydrogen;

(4) use of geothermal energy to produce biofuels;

(5) use of geothermal heat for oil recovery from oil shales and tar sands; and

(6) other advanced geothermal technologies, including advanced drilling technologies and advanced power conversion technologies.

(b) **PROGRESS REPORTS.**—(1) Not later than 36 months after the date of enactment of this Act, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate an interim report describing the progress made under this subtitle. At the end of 60 months, the Secretary shall submit to Congress a report on the results of projects undertaken under this subtitle and other such information the Secretary considers appropriate.

(2) As necessary, the Secretary shall report to the Congress on any legal, regulatory, or other barriers encountered that hinder economic development of these resources, and provide recommendations on legislative or

other actions needed to address such impediments.

SEC. 622. APPLICABILITY OF OTHER LAWS.

Nothing in this subtitle shall be construed as waiving, modifying, or superseding the applicability of any requirement under any environmental or other Federal or State law. To the extent that activities authorized in this subtitle take place in coastal and ocean areas, the Secretary shall consult with the Secretary of Commerce, acting through the Under Secretary of Commerce for Oceans and Atmosphere, regarding the potential marine environmental impacts and measures to address such impacts.

SEC. 623. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary to carry out this subtitle \$90,000,000 for each of the fiscal years 2008 through 2012, of which \$10,000,000 for each fiscal year shall be for carrying out section 616. There are also authorized to be appropriated to the Secretary for the Intermountain West Geothermal Consortium \$5,000,000 for each of the fiscal years 2008 through 2012.

SEC. 624. INTERNATIONAL GEOTHERMAL ENERGY DEVELOPMENT.

(a) **IN GENERAL.**—The Secretary of Energy, in coordination with other appropriate Federal and multilateral agencies (including the United States Agency for International Development) shall support international collaborative efforts to promote the research, development, and deployment of geothermal technologies used to develop hydrothermal and enhanced geothermal system resources, including as partners (as appropriate) the African Rift Geothermal Development Facility, Australia, China, France, the Republic of Iceland, India, Japan, and the United Kingdom.

(b) **UNITED STATES TRADE AND DEVELOPMENT AGENCY.**—The Director of the United States Trade and Development Agency may—

(1) encourage participation by United States firms in actions taken to carry out subsection (a); and

(2) provide grants and other financial support for feasibility and resource assessment studies conducted in, or intended to benefit, less developed countries.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2008 through 2012.

SEC. 625. HIGH COST REGION GEOTHERMAL ENERGY GRANT PROGRAM.

(a) **DEFINITIONS.**—In this section:

(1) **ELIGIBLE ENTITY.**—The term “eligible entity” means—

(A) a utility;

(B) an electric cooperative;

(C) a State;

(D) a political subdivision of a State;

(E) an Indian tribe; or

(F) a Native corporation.

(2) **HIGH-COST REGION.**—The term “high-cost region” means a region in which the average cost of electrical power exceeds 150 percent of the national average retail cost, as determined by the Secretary.

(b) **PROGRAM.**—The Secretary shall use amounts made available to carry out this section to make grants to eligible entities for activities described in subsection (c).

(c) **ELIGIBLE ACTIVITIES.**—An eligible entity may use grant funds under this section, with respect to a geothermal energy project in a high-cost region, only—

(1) to conduct a feasibility study, including a study of exploration, geochemical testing, geomagnetic surveys, geologic information gathering, baseline environmental studies, well drilling, resource characterization, permitting, and economic analysis;

(2) for design and engineering costs, relating to the project; and

(3) to demonstrate and promote commercial application of technologies related to geothermal energy as part of the project.

(d) COST SHARING.—The cost-sharing requirements of section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to any project carried out under this section.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

Subtitle C—Marine and Hydrokinetic Renewable Energy Technologies

SEC. 631. SHORT TITLE.

This subtitle may be cited as the “Marine and Hydrokinetic Renewable Energy Research and Development Act”.

SEC. 632. DEFINITION.

For purposes of this subtitle, the term “marine and hydrokinetic renewable energy” means electrical energy from—:

- (1) waves, tides, and currents in oceans, estuaries, and tidal areas;
- (2) free flowing water in rivers, lakes, and streams;
- (3) free flowing water in man-made channels; and
- (4) differentials in ocean temperature (ocean thermal energy conversion).

The term “marine and hydrokinetic renewable energy” does not include energy from any source that uses a dam, diversionary structure, or impoundment for electric power purposes.

SEC. 633. MARINE AND HYDROKINETIC RENEWABLE ENERGY RESEARCH AND DEVELOPMENT.

(a) IN GENERAL.—The Secretary, in consultation with the Secretary of the Interior and the Secretary of Commerce, acting through the Under Secretary of Commerce for Oceans and Atmosphere, shall establish a program of research, development, demonstration, and commercial application to expand marine and hydrokinetic renewable energy production, including programs to—

- (1) study and compare existing marine and hydrokinetic renewable energy technologies;
- (2) research, develop, and demonstrate marine and hydrokinetic renewable energy systems and technologies;
- (3) reduce the manufacturing and operation costs of marine and hydrokinetic renewable energy technologies;
- (4) investigate efficient and reliable integration with the utility grid and intermittency issues;
- (5) advance wave forecasting technologies;
- (6) conduct experimental and numerical modeling for optimization of marine energy conversion devices and arrays;
- (7) increase the reliability and survivability of marine and hydrokinetic renewable energy technologies, including development of corrosive-resistant materials;
- (8) identify, in conjunction with the Secretary of Commerce, acting through the Under Secretary of Commerce for Oceans and Atmosphere, and other Federal agencies as appropriate, the potential environmental impacts, including potential impacts on fisheries and other marine resources, of marine and hydrokinetic renewable energy technologies, measures to prevent adverse impacts, and technologies and other means available for monitoring and determining environmental impacts;

(9) identify, in conjunction with the Secretary of the Department in which the United States Coast Guard is operating, acting through the Commandant of the United States Coast Guard, the potential navigational impacts of marine and hydrokinetic renewable energy technologies and measures to prevent adverse impacts on navigation;

(10) develop power measurement standards for marine and hydrokinetic renewable energy;

(11) develop identification standards for marine and hydrokinetic renewable energy devices;

(12) address standards development, demonstration, and technology transfer for advanced systems engineering and system integration methods to identify critical interfaces;

(13) identifying opportunities for cross fertilization and development of economies of scale between other renewable sources and marine and hydrokinetic renewable energy sources; and

(14) providing public information and opportunity for public comment concerning all technologies.

(b) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary, in conjunction with the Secretary of Commerce, acting through the Under Secretary of Commerce for Oceans and Atmosphere, and the Secretary of the Interior, shall provide to the Congress a report that addresses—

- (1) the potential environmental impacts, including impacts to fisheries and marine resources, of marine and hydrokinetic renewable energy technologies;
- (2) options to prevent adverse environmental impacts;
- (3) the potential role of monitoring and adaptive management in identifying and addressing any adverse environmental impacts; and
- (4) the necessary components of such an adaptive management program.

SEC. 634. NATIONAL MARINE RENEWABLE ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION CENTERS.

(a) CENTERS.—The Secretary shall award grants to institutions of higher education (or consortia thereof) for the establishment of 1 or more National Marine Renewable Energy Research, Development, and Demonstration Centers. In selecting locations for Centers, the Secretary shall consider sites that meet one of the following criteria:

- (1) Hosts an existing marine renewable energy research and development program in coordination with an engineering program at an institution of higher education.
- (2) Has proven expertise to support environmental and policy-related issues associated with harnessing of energy in the marine environment.
- (3) Has access to and utilizes the marine resources in the Gulf of Mexico, the Atlantic Ocean, or the Pacific Ocean.

The Secretary may give special consideration to historically black colleges and universities and land grant universities that also meet one of these criteria. In establishing criteria for the selection of the Centers, the Secretary shall consult with the Secretary of Commerce, acting through the Under Secretary of Commerce for Oceans and Atmosphere, on the criteria related to ocean waves, tides, and currents including those for advancing wave forecasting technologies, ocean temperature differences, and studying the compatibility of marine renewable energy technologies and systems with the environment, fisheries, and other marine resources.

(b) PURPOSES.—The Centers shall advance research, development, demonstration, and commercial application of marine renewable energy, and shall serve as an information clearinghouse for the marine renewable energy industry, collecting and disseminating information on best practices in all areas related to developing and managing enhanced marine renewable energy systems resources.

(c) DEMONSTRATION OF NEED.—When applying for a grant under this section, an applicant shall include a description of why Federal support is necessary for the Center, in-

cluding evidence that the research of the Center will not be conducted in the absence of Federal support.

SEC. 635. APPLICABILITY OF OTHER LAWS.

Nothing in this subtitle shall be construed as waiving, modifying, or superseding the applicability of any requirement under any environmental or other Federal or State law.

SEC. 636. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary to carry out this subtitle \$50,000,000 for each of the fiscal years 2008 through 2012, except that no funds shall be appropriated under this section for activities that are receiving funds under section 931(a)(2)(E)(i) of the Energy Policy Act of 2005 (42 U.S.C. 16231(a)(2)(E)(i)).

Subtitle D—Energy Storage for Transportation and Electric Power

SEC. 641. ENERGY STORAGE COMPETITIVENESS.

(a) SHORT TITLE.—This section may be cited as the “United States Energy Storage Competitiveness Act of 2007”.

(b) DEFINITIONS.—In this section:

(1) COUNCIL.—The term “Council” means the Energy Storage Advisory Council established under subsection (e).

(2) COMPRESSED AIR ENERGY STORAGE.—The term “compressed air energy storage” means, in the case of an electricity grid application, the storage of energy through the compression of air.

(3) ELECTRIC DRIVE VEHICLE.—The term “electric drive vehicle” means—

(A) a vehicle that uses an electric motor for all or part of the motive power of the vehicle, including battery electric, hybrid electric, plug-in hybrid electric, fuel cell, and plug-in fuel cell vehicles and rail transportation vehicles; or

(B) mobile equipment that uses an electric motor to replace an internal combustion engine for all or part of the work of the equipment.

(4) ISLANDING.—The term “islanding” means a distributed generator or energy storage device continuing to power a location in the absence of electric power from the primary source.

(5) FLYWHEEL.—The term “flywheel” means, in the case of an electricity grid application, a device used to store rotational kinetic energy.

(6) MICROGRID.—The term “microgrid” means an integrated energy system consisting of interconnected loads and distributed energy resources (including generators and energy storage devices), which as an integrated system can operate in parallel with the utility grid or in an intentional islanding mode.

(7) SELF-HEALING GRID.—The term “self-healing grid” means a grid that is capable of automatically anticipating and responding to power system disturbances (including the isolation of failed sections and components), while optimizing the performance and service of the grid to customers.

(8) SPINNING RESERVE SERVICES.—The term “spinning reserve services” means a quantity of electric generating capacity in excess of the quantity needed to meet peak electric demand.

(9) ULTRACAPACITOR.—The term “ultracapacitor” means an energy storage device that has a power density comparable to a conventional capacitor but is capable of exceeding the energy density of a conventional capacitor by several orders of magnitude.

(c) PROGRAM.—The Secretary shall carry out a research, development, and demonstration program to support the ability of the United States to remain globally competitive in energy storage systems for electric drive vehicles, stationary applications, and electricity transmission and distribution.

(d) **COORDINATION.**—In carrying out the activities of this section, the Secretary shall coordinate relevant efforts with appropriate Federal agencies, including the Department of Transportation.

(e) **ENERGY STORAGE ADVISORY COUNCIL.**—

(1) **ESTABLISHMENT.**—Not later than 90 days after the date of enactment of this Act, the Secretary shall establish an Energy Storage Advisory Council.

(2) **COMPOSITION.**—

(A) **IN GENERAL.**—Subject to subparagraph (B), the Council shall consist of not less than 15 individuals appointed by the Secretary, based on recommendations of the National Academy of Sciences.

(B) **ENERGY STORAGE INDUSTRY.**—The Council shall consist primarily of representatives of the energy storage industry of the United States.

(C) **CHAIRPERSON.**—The Secretary shall select a Chairperson for the Council from among the members appointed under subparagraph (A).

(3) **MEETINGS.**—

(A) **IN GENERAL.**—The Council shall meet not less than once a year.

(B) **FEDERAL ADVISORY COMMITTEE ACT.**—The Federal Advisory Committee Act (5 U.S.C. App.) shall apply to a meeting of the Council.

(4) **PLANS.**—No later than 1 year after the date of enactment of this Act and every 5 years thereafter, the Council, in conjunction with the Secretary, shall develop a 5-year plan for integrating basic and applied research so that the United States retains a globally competitive domestic energy storage industry for electric drive vehicles, stationary applications, and electricity transmission and distribution.

(5) **REVIEW.**—The Council shall—

(A) assess, every 2 years, the performance of the Department in meeting the goals of the plans developed under paragraph (4); and

(B) make specific recommendations to the Secretary on programs or activities that should be established or terminated to meet those goals.

(f) **BASIC RESEARCH PROGRAM.**—

(1) **BASIC RESEARCH.**—The Secretary shall conduct a basic research program on energy storage systems to support electric drive vehicles, stationary applications, and electricity transmission and distribution, including—

(A) materials design;

(B) materials synthesis and characterization;

(C) electrode-active materials, including electrolytes and bioelectrolytes;

(D) surface and interface dynamics;

(E) modeling and simulation; and

(F) thermal behavior and life degradation mechanisms.

(2) **NANOSCIENCE CENTERS.**—The Secretary, in cooperation with the Council, shall coordinate the activities of the nanoscience centers of the Department to help the energy storage research centers of the Department maintain a globally competitive posture in energy storage systems for electric drive vehicles, stationary applications, and electricity transmission and distribution.

(3) **FUNDING.**—For activities carried out under this subsection, in addition to funding activities at National Laboratories, the Secretary shall award funds to, and coordinate activities with, a range of stakeholders including the public, private, and academic sectors.

(g) **APPLIED RESEARCH PROGRAM.**—

(1) **IN GENERAL.**—The Secretary shall conduct an applied research program on energy storage systems to support electric drive vehicles, stationary applications, and electricity transmission and distribution technologies, including—

(A) ultracapacitors;

(B) flywheels;

(C) batteries and battery systems (including flow batteries);

(D) compressed air energy systems;

(E) power conditioning electronics;

(F) manufacturing technologies for energy storage systems;

(G) thermal management systems; and

(H) hydrogen as an energy storage medium.

(2) **FUNDING.**—For activities carried out under this subsection, in addition to funding activities at National Laboratories, the Secretary shall provide funds to, and coordinate activities with, a range of stakeholders, including the public, private, and academic sectors.

(h) **ENERGY STORAGE RESEARCH CENTERS.**—

(1) **IN GENERAL.**—The Secretary shall establish, through competitive bids, not more than 4 energy storage research centers to translate basic research into applied technologies to advance the capability of the United States to maintain a globally competitive posture in energy storage systems for electric drive vehicles, stationary applications, and electricity transmission and distribution.

(2) **PROGRAM MANAGEMENT.**—The centers shall be managed by the Under Secretary for Science of the Department.

(3) **PARTICIPATION AGREEMENTS.**—As a condition of participating in a center, a participant shall enter into a participation agreement with the center that requires that activities conducted by the participant for the center promote the goal of enabling the United States to compete successfully in global energy storage markets.

(4) **PLANS.**—A center shall conduct activities that promote the achievement of the goals of the plans of the Council under subsection (e)(4).

(5) **NATIONAL LABORATORIES.**—A national laboratory (as defined in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801)) may participate in a center established under this subsection, including a cooperative research and development agreement (as defined in section 12(d) of the Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3710a(d))).

(6) **DISCLOSURE.**—Section 623 of the Energy Policy Act of 1992 (42 U.S.C. 13293) may apply to any project carried out through a grant, contract, or cooperative agreement under this subsection.

(7) **INTELLECTUAL PROPERTY.**—In accordance with section 202(a)(ii) of title 35, United States Code, section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182), and section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908), the Secretary may require, for any new invention developed under this subsection, that—

(A) if an industrial participant is active in a energy storage research center established under this subsection relating to the advancement of energy storage technologies carried out, in whole or in part, with Federal funding, the industrial participant be granted the first option to negotiate with the invention owner, at least in the field of energy storage technologies, nonexclusive licenses, and royalties on terms that are reasonable, as determined by the Secretary;

(B) if 1 or more industry participants are active in a center, during a 2-year period beginning on the date on which an invention is made—

(i) the patent holder shall not negotiate any license or royalty agreement with any entity that is not an industrial participant under this subsection; and

(ii) the patent holder shall negotiate non-exclusive licenses and royalties in good faith

with any interested industrial participant under this subsection; and

(C) the new invention be developed under such other terms as the Secretary determines to be necessary to promote the accelerated commercialization of inventions made under this subsection to advance the capability of the United States to successfully compete in global energy storage markets.

(i) **ENERGY STORAGE SYSTEMS DEMONSTRATIONS.**—

(1) **IN GENERAL.**—The Secretary shall carry out a program of new demonstrations of advanced energy storage systems.

(2) **SCOPE.**—The demonstrations shall—

(A) be regionally diversified; and

(B) expand on the existing technology demonstration program of the Department.

(3) **STAKEHOLDERS.**—In carrying out the demonstrations, the Secretary shall, to the maximum extent practicable, include the participation of a range of stakeholders, including—

(A) rural electric cooperatives;

(B) investor owned utilities;

(C) municipally owned electric utilities;

(D) energy storage systems manufacturers;

(E) electric drive vehicle manufacturers;

(F) the renewable energy production industry;

(G) State or local energy offices;

(H) the fuel cell industry; and

(I) institutions of higher education.

(4) **OBJECTIVES.**—Each of the demonstrations shall include 1 or more of the following:

(A) Energy storage to improve the feasibility of microgrids or islanding, or transmission and distribution capability, to improve reliability in rural areas.

(B) Integration of an energy storage system with a self-healing grid.

(C) Use of energy storage to improve security to emergency response infrastructure and ensure availability of emergency backup power for consumers.

(D) Integration with a renewable energy production source, at the source or away from the source.

(E) Use of energy storage to provide ancillary services, such as spinning reserve services, for grid management.

(F) Advancement of power conversion systems to make the systems smarter, more efficient, able to communicate with other inverters, and able to control voltage.

(G) Use of energy storage to optimize transmission and distribution operation and power quality, which could address overloaded lines and maintenance of transformers and substations.

(H) Use of advanced energy storage for peak load management of homes, businesses, and the grid.

(I) Use of energy storage devices to store energy during nonpeak generation periods to make better use of existing grid assets.

(j) **VEHICLE ENERGY STORAGE DEMONSTRATION.**—

(1) **IN GENERAL.**—The Secretary shall carry out a program of electric drive vehicle energy storage technology demonstrations.

(2) **CONSORTIA.**—The technology demonstrations shall be conducted through consortia, which may include—

(A) energy storage systems manufacturers and suppliers of the manufacturers;

(B) electric drive vehicle manufacturers;

(C) rural electric cooperatives;

(D) investor owned utilities;

(E) municipal and rural electric utilities;

(F) State and local governments;

(G) metropolitan transportation authorities; and

(H) institutions of higher education.

(3) **OBJECTIVES.**—The program shall demonstrate 1 or more of the following:

(A) Novel, high capacity, high efficiency energy storage, charging, and control systems, along with the collection of data on performance characteristics, such as battery life, energy storage capacity, and power delivery capacity.

(B) Advanced onboard energy management systems and highly efficient battery cooling systems.

(C) Integration of those systems on a prototype vehicular platform, including with drivetrain systems for passenger, commercial, and nonroad electric drive vehicles.

(D) New technologies and processes that reduce manufacturing costs.

(E) Integration of advanced vehicle technologies with electricity distribution system and smart metering technology.

(F) Control systems that minimize emissions profiles in cases in which clean diesel engines are part of a plug-in hybrid drive system.

(k) SECONDARY APPLICATIONS AND DISPOSAL OF ELECTRIC DRIVE VEHICLE BATTERIES.—The Secretary shall carry out a program of research, development, and demonstration of—

(1) secondary applications of energy storage devices following service in electric drive vehicles; and

(2) technologies and processes for final recycling and disposal of the devices.

(l) COST SHARING.—The Secretary shall carry out the programs established under this section in accordance with section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352).

(m) MERIT REVIEW OF PROPOSALS.—The Secretary shall carry out the programs established under subsections (i), (j), and (k) in accordance with section 989 of the Energy Policy Act of 2005 (42 U.S.C. 16353).

(n) COORDINATION AND NONDUPLICATION.—To the maximum extent practicable, the Secretary shall coordinate activities under this section with other programs and laboratories of the Department and other Federal research programs.

(o) REVIEW BY NATIONAL ACADEMY OF SCIENCES.—On the business day that is 5 years after the date of enactment of this Act, the Secretary shall offer to enter into an arrangement with the National Academy of Sciences to assess the performance of the Department in carrying out this section.

(p) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out—

(1) the basic research program under subsection (f) \$50,000,000 for each of fiscal years 2009 through 2018;

(2) the applied research program under subsection (g) \$80,000,000 for each of fiscal years 2009 through 2018; and

(3) the energy storage research center program under subsection (h) \$100,000,000 for each of fiscal years 2009 through 2018;

(4) the energy storage systems demonstration program under subsection (i) \$30,000,000 for each of fiscal years 2009 through 2018;

(5) the vehicle energy storage demonstration program under subsection (j) \$30,000,000 for each of fiscal years 2009 through 2018; and

(6) the secondary applications and disposal of electric drive vehicle batteries program under subsection (k) \$5,000,000 for each of fiscal years 2009 through 2018.

Subtitle E—Miscellaneous Provisions

SEC. 651. LIGHTWEIGHT MATERIALS RESEARCH AND DEVELOPMENT.

(a) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary of Energy shall establish a program to determine ways in which the weight of motor vehicles could be reduced to improve fuel efficiency without compromising passenger safety by conducting research, development, and demonstration relating to—

(1) the development of new materials (including cast metal composite materials formed by autocombustion synthesis) and material processes that yield a higher strength-to-weight ratio or other properties that reduce vehicle weight; and

(2) reducing the cost of—

(A) lightweight materials (including high-strength steel alloys, aluminum, magnesium, metal composites, and carbon fiber reinforced polymer composites) with the properties required for construction of lighter-weight vehicles; and

(B) materials processing, automated manufacturing, joining, and recycling lightweight materials for high-volume applications.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$80,000,000 for the period of fiscal years 2008 through 2012.

SEC. 652. COMMERCIAL INSULATION DEMONSTRATION PROGRAM.

(a) DEFINITIONS.—In this section:

(1) ADVANCED INSULATION.—The term “advanced insulation” means insulation that has an R value of not less than R35 per inch.

(2) COVERED REFRIGERATION UNIT.—The term “covered refrigeration unit” means any—

(A) commercial refrigerated truck;

(B) commercial refrigerated trailer; or

(C) commercial refrigerator, freezer, or refrigerator-freezer described in section 342(c) of the Energy Policy and Conservation Act (42 U.S.C. 6313(c)).

(b) REPORT.—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit to Congress a report that includes an evaluation of—

(1) the state of technological advancement of advanced insulation; and

(2) the projected amount of cost savings that would be generated by implementing advanced insulation into covered refrigeration units.

(c) DEMONSTRATION PROGRAM.—

(1) ESTABLISHMENT.—If the Secretary determines in the report described in subsection (b) that the implementation of advanced insulation into covered refrigeration units would generate an economically justifiable amount of cost savings, the Secretary, in cooperation with manufacturers of covered refrigeration units, shall establish a demonstration program under which the Secretary shall demonstrate the cost-effectiveness of advanced insulation.

(2) DISCLOSURE.—The Secretary may, for a period of up to five years after an award is granted under the demonstration program, exempt from mandatory disclosure under section 552 of title 5, United States Code (popularly known as the Freedom of Information Act) information that the Secretary determines would be a privileged or confidential trade secret or commercial or financial information under subsection (b)(4) of such section if the information had been obtained from a non-Government party.

(3) COST-SHARING.—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to any project carried out under this subsection.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$8,000,000 for the period of fiscal years 2009 through 2014.

SEC. 653. TECHNICAL CRITERIA FOR CLEAN COAL POWER INITIATIVE.

Section 402(b)(1)(B)(ii) of the Energy Policy Act of 2005 (42 U.S.C. 15962(b)(1)(B)(ii)) is amended by striking subclause (I) and inserting the following:

“(I)(aa) to remove at least 99 percent of sulfur dioxide; or

“(bb) to emit not more than 0.04 pound SO₂ per million Btu, based on a 30-day average;”.

SEC. 654. H-PRIZE.

Section 1008 of the Energy Policy Act of 2005 (42 U.S.C. 16396) is amended by adding at the end the following new subsection:

“(f) H-PRIZE.—

“(1) PRIZE AUTHORITY.—

“(A) IN GENERAL.—As part of the program under this section, the Secretary shall carry out a program to competitively award cash prizes in conformity with this subsection to advance the research, development, demonstration, and commercial application of hydrogen energy technologies.

“(B) ADVERTISING AND SOLICITATION OF COMPETITORS.—

“(i) ADVERTISING.—The Secretary shall widely advertise prize competitions under this subsection to encourage broad participation, including by individuals, universities (including historically Black colleges and universities and other minority serving institutions), and large and small businesses (including businesses owned or controlled by socially and economically disadvantaged persons).

“(ii) ANNOUNCEMENT THROUGH FEDERAL REGISTER NOTICE.—The Secretary shall announce each prize competition under this subsection by publishing a notice in the Federal Register. This notice shall include essential elements of the competition such as the subject of the competition, the duration of the competition, the eligibility requirements for participation in the competition, the process for participants to register for the competition, the amount of the prize, and the criteria for awarding the prize.

“(C) ADMINISTERING THE COMPETITIONS.—The Secretary shall enter into an agreement with a private, nonprofit entity to administer the prize competitions under this subsection, subject to the provisions of this subsection (in this subsection referred to as the ‘administering entity’). The duties of the administering entity under the agreement shall include—

“(i) advertising prize competitions under this subsection and their results;

“(ii) raising funds from private entities and individuals to pay for administrative costs and to contribute to cash prizes, including funds provided in exchange for the right to name a prize awarded under this subsection;

“(iii) developing, in consultation with and subject to the final approval of the Secretary, the criteria for selecting winners in prize competitions under this subsection, based on goals provided by the Secretary;

“(iv) determining, in consultation with the Secretary, the appropriate amount and funding sources for each prize to be awarded under this subsection, subject to the final approval of the Secretary with respect to Federal funding;

“(v) providing advice and consultation to the Secretary on the selection of judges in accordance with paragraph (2)(D), using criteria developed in consultation with and subject to the final approval of the Secretary; and

“(vi) protecting against the administering entity’s unauthorized use or disclosure of a registered participant’s trade secrets and confidential business information. Any information properly identified as trade secrets or confidential business information that is submitted by a participant as part of a competitive program under this subsection may be withheld from public disclosure.

“(D) FUNDING SOURCES.—Prizes under this subsection shall consist of Federal appropriated funds and any funds provided by the administering entity (including funds raised pursuant to subparagraph (C)(ii)) for such cash prize programs. The Secretary may accept funds from other Federal agencies for

such cash prizes and, notwithstanding section 3302(b) of title 31, United States Code, may use such funds for the cash prize program under this subsection. Other than publication of the names of prize sponsors, the Secretary may not give any special consideration to any private sector entity or individual in return for a donation to the Secretary or administering entity.

“(E) ANNOUNCEMENT OF PRIZES.—The Secretary may not issue a notice required by subparagraph (B)(ii) until all the funds needed to pay out the announced amount of the prize have been appropriated or committed in writing by the administering entity. The Secretary may increase the amount of a prize after an initial announcement is made under subparagraph (B)(ii) if—

“(i) notice of the increase is provided in the same manner as the initial notice of the prize; and

“(ii) the funds needed to pay out the announced amount of the increase have been appropriated or committed in writing by the administering entity.

“(F) SUNSET.—The authority to announce prize competitions under this subsection shall terminate on September 30, 2018.

“(2) PRIZE CATEGORIES.—

“(A) CATEGORIES.—The Secretary shall establish prizes under this subsection for—

“(i) advancements in technologies, components, or systems related to—

“(I) hydrogen production;

“(II) hydrogen storage;

“(III) hydrogen distribution; and

“(IV) hydrogen utilization;

“(ii) prototypes of hydrogen-powered vehicles or other hydrogen-based products that best meet or exceed objective performance criteria, such as completion of a race over a certain distance or terrain or generation of energy at certain levels of efficiency; and

“(iii) transformational changes in technologies for the distribution or production of hydrogen that meet or exceed far-reaching objective criteria, which shall include minimal carbon emissions and which may include cost criteria designed to facilitate the eventual market success of a winning technology.

“(B) AWARDS.—

“(i) ADVANCEMENTS.—To the extent permitted under paragraph (1)(E), the prizes authorized under subparagraph (A)(i) shall be awarded biennially to the most significant advance made in each of the four subcategories described in subclauses (I) through (IV) of subparagraph (A)(i) since the submission deadline of the previous prize competition in the same category under subparagraph (A)(i) or the date of enactment of this subsection, whichever is later, unless no such advance is significant enough to merit an award. No one such prize may exceed \$1,000,000. If less than \$4,000,000 is available for a prize competition under subparagraph (A)(i), the Secretary may omit one or more subcategories, reduce the amount of the prizes, or not hold a prize competition.

“(ii) PROTOTYPES.—To the extent permitted under paragraph (1)(E), prizes authorized under subparagraph (A)(ii) shall be awarded biennially in alternate years from the prizes authorized under subparagraph (A)(i). The Secretary is authorized to award up to one prize in this category in each 2-year period. No such prize may exceed \$4,000,000. If no registered participants meet the objective performance criteria established pursuant to subparagraph (C) for a competition under this clause, the Secretary shall not award a prize.

“(iii) TRANSFORMATIONAL TECHNOLOGIES.—To the extent permitted under paragraph (1)(E), the Secretary shall announce one prize competition authorized under subparagraph (A)(iii) as soon after the date of enactment of this subsection as is practicable. A

prize offered under this clause shall be not less than \$10,000,000, paid to the winner in a lump sum, and an additional amount paid to the winner as a match for each dollar of private funding raised by the winner for the hydrogen technology beginning on the date the winner was named. The match shall be provided for 3 years after the date the prize winner is named or until the full amount of the prize has been paid out, whichever occurs first. A prize winner may elect to have the match amount paid to another entity that is continuing the development of the winning technology. The Secretary shall announce the rules for receiving the match in the notice required by paragraph (1)(B)(ii). The Secretary shall award a prize under this clause only when a registered participant has met the objective criteria established for the prize pursuant to subparagraph (C) and announced pursuant to paragraph (1)(B)(ii). Not more than \$10,000,000 in Federal funds may be used for the prize award under this clause. The administering entity shall seek to raise \$40,000,000 toward the matching award under this clause.

“(C) CRITERIA.—In establishing the criteria required by this subsection, the Secretary—

“(i) shall consult with the Department’s Hydrogen Technical and Fuel Cell Advisory Committee;

“(ii) shall consult with other Federal agencies, including the National Science Foundation; and

“(iii) may consult with other experts such as private organizations, including professional societies, industry associations, and the National Academy of Sciences and the National Academy of Engineering.

“(D) JUDGES.—For each prize competition under this subsection, the Secretary in consultation with the administering entity shall assemble a panel of qualified judges to select the winner or winners on the basis of the criteria established under subparagraph (C). Judges for each prize competition shall include individuals from outside the Department, including from the private sector. A judge, spouse, minor children, and members of the judge’s household may not—

“(i) have personal or financial interests in, or be an employee, officer, director, or agent of, any entity that is a registered participant in the prize competition for which he or she will serve as a judge; or

“(ii) have a familial or financial relationship with an individual who is a registered participant in the prize competition for which he or she will serve as a judge.

“(3) ELIGIBILITY.—To be eligible to win a prize under this subsection, an individual or entity—

“(A) shall have complied with all the requirements in accordance with the Federal Register notice required under paragraph (1)(B)(ii);

“(B) in the case of a private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen of, or an alien lawfully admitted for permanent residence in, the United States; and

“(C) shall not be a Federal entity, a Federal employee acting within the scope of his employment, or an employee of a national laboratory acting within the scope of his employment.

“(4) INTELLECTUAL PROPERTY.—The Federal Government shall not, by virtue of offering or awarding a prize under this subsection, be entitled to any intellectual property rights derived as a consequence of, or direct relation to, the participation by a registered participant in a competition authorized by this subsection. This paragraph shall not be construed to prevent the Federal Government from negotiating a license for the use of in-

tellectual property developed for a prize competition under this subsection.

“(5) LIABILITY.—

“(A) WAIVER OF LIABILITY.—The Secretary may require registered participants to waive claims against the Federal Government and the administering entity (except claims for willful misconduct) for any injury, death, damage, or loss of property, revenue, or profits arising from the registered participants’ participation in a competition under this subsection. The Secretary shall give notice of any waiver required under this subparagraph in the notice required by paragraph (1)(B)(ii). The Secretary may not require a registered participant to waive claims against the administering entity arising out of the unauthorized use or disclosure by the administering entity of the registered participant’s trade secrets or confidential business information.

“(B) LIABILITY INSURANCE.—

“(i) REQUIREMENTS.—Registered participants in a prize competition under this subsection shall be required to obtain liability insurance or demonstrate financial responsibility, in amounts determined by the Secretary, for claims by—

“(I) a third party for death, bodily injury, or property damage or loss resulting from an activity carried out in connection with participation in a competition under this subsection; and

“(II) the Federal Government for damage or loss to Government property resulting from such an activity.

“(ii) FEDERAL GOVERNMENT INSURED.—The Federal Government shall be named as an additional insured under a registered participant’s insurance policy required under clause (i)(I), and registered participants shall be required to agree to indemnify the Federal Government against third party claims for damages arising from or related to competition activities under this subsection.

“(6) REPORT TO CONGRESS.—Not later than 60 days after the awarding of the first prize under this subsection, and annually thereafter, the Secretary shall transmit to the Congress a report that—

“(A) identifies each award recipient;

“(B) describes the technologies developed by each award recipient; and

“(C) specifies actions being taken toward commercial application of all technologies with respect to which a prize has been awarded under this subsection.

“(7) AUTHORIZATION OF APPROPRIATIONS.—

“(A) IN GENERAL.—

“(i) AWARDS.—There are authorized to be appropriated to the Secretary for the period encompassing fiscal years 2008 through 2017 for carrying out this subsection—

“(I) \$20,000,000 for awards described in paragraph (2)(A)(i);

“(II) \$20,000,000 for awards described in paragraph (2)(A)(ii); and

“(III) \$10,000,000 for the award described in paragraph (2)(A)(iii).

“(ii) ADMINISTRATION.—In addition to the amounts authorized in clause (i), there are authorized to be appropriated to the Secretary for each of fiscal years 2008 and 2009 \$2,000,000 for the administrative costs of carrying out this subsection.

“(B) CARRYOVER OF FUNDS.—Funds appropriated for prize awards under this subsection shall remain available until expended, and may be transferred, reprogrammed, or expended for other purposes only after the expiration of 10 fiscal years after the fiscal year for which the funds were originally appropriated. No provision in this subsection permits obligation or payment of funds in violation of section 1341 of title 31 of the United States Code (commonly referred to as the Anti-Deficiency Act).

“(8) NONSUBSTITUTION.—The programs created under this subsection shall not be considered a substitute for Federal research and development programs.”.

SEC. 655. BRIGHT TOMORROW LIGHTING PRIZES.

(a) ESTABLISHMENT.—Not later than 1 year after the date of enactment of this Act, as part of the program carried out under section 1008 of the Energy Policy Act of 2005 (42 U.S.C. 16396), the Secretary shall establish and award Bright Tomorrow Lighting Prizes for solid state lighting in accordance with this section.

(b) PRIZE SPECIFICATIONS.—

(1) 60-WATT INCANDESCENT REPLACEMENT LAMP PRIZE.—The Secretary shall award a 60-Watt Incandescent Replacement Lamp Prize to an entrant that produces a solid-state light package simultaneously capable of—

(A) producing a luminous flux greater than 900 lumens;

(B) consuming less than or equal to 10 watts;

(C) having an efficiency greater than 90 lumens per watt;

(D) having a color rendering index greater than 90;

(E) having a correlated color temperature of not less than 2,750, and not more than 3,000, degrees Kelvin;

(F) having 70 percent of the lumen value under subparagraph (A) exceeding 25,000 hours under typical conditions expected in residential use;

(G) having a light distribution pattern similar to a soft 60-watt incandescent A19 bulb;

(H) having a size and shape that fits within the maximum dimensions of an A19 bulb in accordance with American National Standards Institute standard C78.20–2003, figure C78.20–211;

(I) using a single contact medium screw socket; and

(J) mass production for a competitive sales commercial market satisfied by producing commercially accepted quality control lots of such units equal to or exceeding the criteria described in subparagraphs (A) through (I).

(2) PAR TYPE 38 HALOGEN REPLACEMENT LAMP PRIZE.—The Secretary shall award a Parabolic Aluminized Reflector Type 38 Halogen Replacement Lamp Prize (referred to in this section as the “PAR Type 38 Halogen Replacement Lamp Prize”) to an entrant that produces a solid-state-light package simultaneously capable of—

(A) producing a luminous flux greater than or equal to 1,350 lumens;

(B) consuming less than or equal to 11 watts;

(C) having an efficiency greater than 123 lumens per watt;

(D) having a color rendering index greater than or equal to 90;

(E) having a correlated color coordinate temperature of not less than 2,750, and not more than 3,000, degrees Kelvin;

(F) having 70 percent of the lumen value under subparagraph (A) exceeding 25,000 hours under typical conditions expected in residential use;

(G) having a light distribution pattern similar to a PAR 38 halogen lamp;

(H) having a size and shape that fits within the maximum dimensions of a PAR 38 halogen lamp in accordance with American National Standards Institute standard C78–21–2003, figure C78.21–238;

(I) using a single contact medium screw socket; and

(J) mass production for a competitive sales commercial market satisfied by producing commercially accepted quality control lots of such units equal to or exceeding the criteria described in subparagraphs (A) through (I).

(3) TWENTY-FIRST CENTURY LAMP PRIZE.—The Secretary shall award a Twenty-First Century Lamp Prize to an entrant that produces a solid-state-light package capable of—

(A) producing a light output greater than 1,200 lumens;

(B) having an efficiency greater than 150 lumens per watt;

(C) having a color rendering index greater than 90;

(D) having a color coordinate temperature between 2,800 and 3,000 degrees Kelvin; and

(E) having a lifetime exceeding 25,000 hours.

(c) PRIVATE FUNDS.—

(1) IN GENERAL.—Subject to paragraph (2), and notwithstanding section 3302 of title 31, United States Code, the Secretary may accept, retain, and use funds contributed by any person, government entity, or organization for purposes of carrying out this subsection—

(A) without further appropriation; and

(B) without fiscal year limitation.

(2) PRIZE COMPETITION.—A private source of funding may not participate in the competition for prizes awarded under this section.

(d) TECHNICAL REVIEW.—The Secretary shall establish a technical review committee composed of non-Federal officers to review entrant data submitted under this section to determine whether the data meets the prize specifications described in subsection (b).

(e) THIRD PARTY ADMINISTRATION.—The Secretary may competitively select a third party to administer awards under this section.

(f) ELIGIBILITY FOR PRIZES.—To be eligible to be awarded a prize under this section—

(1) in the case of a private entity, the entity shall be incorporated in and maintain a primary place of business in the United States; and

(2) in the case of an individual (whether participating as a single individual or in a group), the individual shall be a citizen or lawful permanent resident of the United States.

(g) AWARD AMOUNTS.—Subject to the availability of funds to carry out this section, the amount of—

(1) the 60-Watt Incandescent Replacement Lamp Prize described in subsection (b)(1) shall be \$10,000,000;

(2) the PAR Type 38 Halogen Replacement Lamp Prize described in subsection (b)(2) shall be \$5,000,000; and

(3) the Twenty-First Century Lamp Prize described in subsection (b)(3) shall be \$5,000,000.

(h) FEDERAL PROCUREMENT OF SOLID-STATE-LIGHTS.—

(1) 60-WATT INCANDESCENT REPLACEMENT.—Subject to paragraph (3), as soon as practicable after the successful award of the 60-Watt Incandescent Replacement Lamp Prize under subsection (b)(1), the Secretary (in consultation with the Administrator of General Services) shall develop governmentwide Federal purchase guidelines with a goal of replacing the use of 60-watt incandescent lamps in Federal Government buildings with a solid-state-light package described in subsection (b)(1) by not later than the date that is 5 years after the date the award is made.

(2) PAR 38 HALOGEN REPLACEMENT LAMP REPLACEMENT.—Subject to paragraph (3), as soon as practicable after the successful award of the PAR Type 38 Halogen Replacement Lamp Prize under subsection (b)(2), the Secretary (in consultation with the Administrator of General Services) shall develop governmentwide Federal purchase guidelines with the goal of replacing the use of PAR 38 halogen lamps in Federal Government buildings with a solid-state-light package described in subsection (b)(2) by not later than the date that is 5 years after the date the award is made.

(3) WAIVERS.—

(A) IN GENERAL.—The Secretary or the Administrator of General Services may waive the application of paragraph (1) or (2) if the Secretary or Administrator determines that the return on investment from the purchase of a solid-state-light package described in paragraph (1) or (2) of subsection (b), respectively, is cost prohibitive.

(B) REPORT OF WAIVER.—If the Secretary or Administrator waives the application of paragraph (1) or (2), the Secretary or Administrator, respectively, shall submit to Congress an annual report that describes the waiver and provides a detailed justification for the waiver.

(i) REPORT.—Not later than 2 years after the date of enactment of this Act, and annually thereafter, the Administrator of General Services shall submit to the Energy Information Agency a report describing the quantity, type, and cost of each lighting product purchased by the Federal Government.

(j) BRIGHT TOMORROW LIGHTING AWARD FUND.—

(1) ESTABLISHMENT.—There is established in the United States Treasury a Bright Tomorrow Lighting permanent fund without fiscal year limitation to award prizes under paragraphs (1), (2), and (3) of subsection (b).

(2) SOURCES OF FUNDING.—The fund established under paragraph (1) shall accept—

(A) fiscal year appropriations; and

(B) private contributions authorized under subsection (c).

(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

SEC. 656. RENEWABLE ENERGY INNOVATION MANUFACTURING PARTNERSHIP.

(a) ESTABLISHMENT.—The Secretary shall carry out a program, to be known as the Renewable Energy Innovation Manufacturing Partnership Program (referred to in this section as the “Program”), to make assistance awards to eligible entities for use in carrying out research, development, and demonstration relating to the manufacturing of renewable energy technologies.

(b) SOLICITATION.—To carry out the Program, the Secretary shall annually conduct a competitive solicitation for assistance awards for an eligible project described in subsection (e).

(c) PROGRAM PURPOSES.—The purposes of the Program are—

(1) to develop, or aid in the development of, advanced manufacturing processes, materials, and infrastructure;

(2) to increase the domestic production of renewable energy technology and components; and

(3) to better coordinate Federal, State, and private resources to meet regional and national renewable energy goals through advanced manufacturing partnerships.

(d) ELIGIBLE ENTITIES.—An entity shall be eligible to receive an assistance award under the Program to carry out an eligible project described in subsection (e) if the entity is composed of—

(1) 1 or more public or private nonprofit institutions or national laboratories engaged in research, development, demonstration, or technology transfer, that would participate substantially in the project; and

(2) 1 or more private entities engaged in the manufacturing or development of renewable energy system components (including solar energy, wind energy, biomass, geothermal energy, energy storage, or fuel cells).

(e) ELIGIBLE PROJECTS.—An eligible entity may use an assistance award provided under this section to carry out a project relating to—

(1) the conduct of studies of market opportunities for component manufacturing of renewable energy systems;

(2) the conduct of multiyear applied research, development, demonstration, and deployment projects for advanced manufacturing processes, materials, and infrastructure for renewable energy systems; and

(3) other similar ventures, as approved by the Secretary, that promote advanced manufacturing of renewable technologies.

(f) **CRITERIA AND GUIDELINES.**—The Secretary shall establish criteria and guidelines for the submission, evaluation, and funding of proposed projects under the Program.

(g) **COST SHARING.**—Section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) shall apply to a project carried out under this section.

(h) **DISCLOSURE.**—The Secretary may, for a period of up to five years after an award is granted under this section, exempt from mandatory disclosure under section 552 of title 5, United States Code (popularly known as the Freedom of Information Act) information that the Secretary determines would be a privileged or confidential trade secret or commercial or financial information under subsection (b)(4) of such section if the information had been obtained from a non-Government party.

(i) **SENSE OF THE CONGRESS.**—It is the sense of the Congress that the Secretary should ensure that small businesses engaged in renewable manufacturing be given priority consideration for the assistance awards provided under this section.

(j) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated out of funds already authorized to carry out this section \$25,000,000 for each of fiscal years 2008 through 2013, to remain available until expended.

TITLE VII—CARBON CAPTURE AND SEQUESTRATION

Subtitle A—Carbon Capture and Sequestration Research, Development, and Demonstration

SEC. 701. SHORT TITLE.

This subtitle may be cited as the “Department of Energy Carbon Capture and Sequestration Research, Development, and Demonstration Act of 2007”.

SEC. 702. CARBON CAPTURE AND SEQUESTRATION RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.

(a) **AMENDMENT.**—Section 963 of the Energy Policy Act of 2005 (42 U.S.C. 16293) is amended—

(1) in the section heading, by striking “**RESEARCH AND DEVELOPMENT**” and inserting “**AND SEQUESTRATION RESEARCH, DEVELOPMENT, AND DEMONSTRATION**”;

(2) in subsection (a)—

(A) by striking “research and development” and inserting “and sequestration research, development, and demonstration”;

(B) by striking “capture technologies on combustion-based systems” and inserting “capture and sequestration technologies related to industrial sources of carbon dioxide”;

(3) in subsection (b)—

(A) in paragraph (3), by striking “and” at the end;

(B) in paragraph (4), by striking the period at the end and inserting “; and”;

(C) by adding at the end the following:

“(5) to expedite and carry out large-scale testing of carbon sequestration systems in a range of geologic formations that will provide information on the cost and feasibility of deployment of sequestration technologies.”; and

(4) by striking subsection (c) and inserting the following:

“(c) **PROGRAMMATIC ACTIVITIES.**—

“(1) **FUNDAMENTAL SCIENCE AND ENGINEERING RESEARCH AND DEVELOPMENT AND DEMONSTRATION SUPPORTING CARBON CAPTURE AND SEQUESTRATION TECHNOLOGIES AND CARBON USE ACTIVITIES.**—

“(A) **IN GENERAL.**—The Secretary shall carry out fundamental science and engineering research (including laboratory-scale experiments, numeric modeling, and simulations) to develop and document the performance of new approaches to capture and sequester, or use carbon dioxide to lead to an overall reduction of carbon dioxide emissions.

“(B) **PROGRAM INTEGRATION.**—The Secretary shall ensure that fundamental research carried out under this paragraph is appropriately applied to energy technology development activities, the field testing of carbon sequestration, and carbon use activities, including—

“(i) development of new or advanced technologies for the capture and sequestration of carbon dioxide;

“(ii) development of new or advanced technologies that reduce the cost and increase the efficacy of advanced compression of carbon dioxide required for the sequestration of carbon dioxide;

“(iii) modeling and simulation of geologic sequestration field demonstrations;

“(iv) quantitative assessment of risks relating to specific field sites for testing of sequestration technologies;

“(v) research and development of new and advanced technologies for carbon use, including recycling and reuse of carbon dioxide; and

“(vi) research and development of new and advanced technologies for the separation of oxygen from air.

“(2) **FIELD VALIDATION TESTING ACTIVITIES.**—

“(A) **IN GENERAL.**—The Secretary shall promote, to the maximum extent practicable, regional carbon sequestration partnerships to conduct geologic sequestration tests involving carbon dioxide injection and monitoring, mitigation, and verification operations in a variety of candidate geologic settings, including—

“(i) operating oil and gas fields;

“(ii) depleted oil and gas fields;

“(iii) unmineable coal seams;

“(iv) deep saline formations;

“(v) deep geologic systems that may be used as engineered reservoirs to extract economical quantities of heat from geothermal resources of low permeability or porosity; and

“(vi) deep geologic systems containing basalt formations.

“(B) **OBJECTIVES.**—The objectives of tests conducted under this paragraph shall be—

“(i) to develop and validate geophysical tools, analysis, and modeling to monitor, predict, and verify carbon dioxide containment;

“(ii) to validate modeling of geologic formations;

“(iii) to refine sequestration capacity estimated for particular geologic formations;

“(iv) to determine the fate of carbon dioxide concurrent with and following injection into geologic formations;

“(v) to develop and implement best practices for operations relating to, and monitoring of, carbon dioxide injection and sequestration in geologic formations;

“(vi) to assess and ensure the safety of operations related to geologic sequestration of carbon dioxide;

“(vii) to allow the Secretary to promulgate policies, procedures, requirements, and guidance to ensure that the objectives of this subparagraph are met in large-scale testing and deployment activities for carbon capture

and sequestration that are funded by the Department of Energy; and

“(viii) to provide information to States, the Environmental Protection Agency, and other appropriate entities to support development of a regulatory framework for commercial-scale sequestration operations that ensure the protection of human health and the environment.

“(3) **LARGE-SCALE CARBON DIOXIDE SEQUESTRATION TESTING.**—

“(A) **IN GENERAL.**—The Secretary shall conduct not less than 7 initial large-scale sequestration tests, not including the FutureGen project, for geologic containment of carbon dioxide to collect and validate information on the cost and feasibility of commercial deployment of technologies for geologic containment of carbon dioxide. These 7 tests may include any Regional Partnership projects awarded as of the date of enactment of the Department of Energy Carbon Capture and Sequestration Research, Development, and Demonstration Act of 2007.

“(B) **DIVERSITY OF FORMATIONS TO BE STUDIED.**—In selecting formations for study under this paragraph, the Secretary shall consider a variety of geologic formations across the United States, and require characterization and modeling of candidate formations, as determined by the Secretary.

“(C) **SOURCE OF CARBON DIOXIDE FOR LARGE-SCALE SEQUESTRATION TESTS.**—In the process of any acquisition of carbon dioxide for sequestration tests under subparagraph (A), the Secretary shall give preference to sources of carbon dioxide from industrial sources. To the extent feasible, the Secretary shall prefer tests that would facilitate the creation of an integrated system of capture, transportation and sequestration of carbon dioxide. The preference provided for under this subparagraph shall not delay the implementation of the large-scale sequestration tests under this paragraph.

“(D) **DEFINITION.**—For purposes of this paragraph, the term ‘large-scale’ means the injection of more than 1,000,000 tons of carbon dioxide from industrial sources annually or a scale that demonstrates the ability to inject and sequester several million metric tons of industrial source carbon dioxide for a large number of years.

“(4) **PREFERENCE IN PROJECT SELECTION FROM MERITORIOUS PROPOSALS.**—In making competitive awards under this subsection, subject to the requirements of section 989, the Secretary shall—

“(A) give preference to proposals from partnerships among industrial, academic, and government entities; and

“(B) require recipients to provide assurances that all laborers and mechanics employed by contractors and subcontractors in the construction, repair, or alteration of new or existing facilities performed in order to carry out a demonstration or commercial application activity authorized under this subsection shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code, and the Secretary of Labor shall, with respect to the labor standards in this paragraph, have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 Fed. Reg. 3176; 5 U.S.C. Appendix) and section 3145 of title 40, United States Code.

“(5) **COST SHARING.**—Activities under this subsection shall be considered research and development activities that are subject to the cost sharing requirements of section 988(b).

“(6) **PROGRAM REVIEW AND REPORT.**—During fiscal year 2011, the Secretary shall—

“(A) conduct a review of programmatic activities carried out under this subsection; and

“(B) make recommendations with respect to continuation of the activities.

“(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section—

“(1) \$240,000,000 for fiscal year 2008;

“(2) \$240,000,000 for fiscal year 2009;

“(3) \$240,000,000 for fiscal year 2010;

“(4) \$240,000,000 for fiscal year 2011; and

“(5) \$240,000,000 for fiscal year 2012.”

(b) TABLE OF CONTENTS AMENDMENT.—The item relating to section 963 in the table of contents for the Energy Policy Act of 2005 is amended to read as follows:

“Sec. 963. Carbon capture and sequestration research, development, and demonstration program.”

SEC. 703. CARBON CAPTURE.

(a) PROGRAM ESTABLISHMENT.—

(1) IN GENERAL.—The Secretary shall carry out a program to demonstrate technologies for the large-scale capture of carbon dioxide from industrial sources. In making awards under this program, the Secretary shall select, as appropriate, a diversity of capture technologies to address the need to capture carbon dioxide from a range of industrial sources.

(2) SCOPE OF AWARD.—Awards under this section shall be only for the portion of the project that—

(A) carries out the large-scale capture (including purification and compression) of carbon dioxide from industrial sources;

(B) provides for the transportation and injection of carbon dioxide; and

(C) incorporates a comprehensive measurement, monitoring, and validation program.

(3) PREFERENCES FOR AWARD.—To ensure reduced carbon dioxide emissions, the Secretary shall take necessary actions to provide for the integration of the program under this paragraph with the large-scale carbon dioxide sequestration tests described in section 963(c)(3) of the Energy Policy Act of 2005 (42 U.S.C. 16293(c)(3)), as added by section 702 of this subtitle. These actions should not delay implementation of these tests. The Secretary shall give priority consideration to projects with the following characteristics:

(A) CAPACITY.—Projects that will capture a high percentage of the carbon dioxide in the treated stream and large volumes of carbon dioxide as determined by the Secretary.

(B) SEQUESTRATION.—Projects that capture carbon dioxide from industrial sources that are near suitable geological reservoirs and could continue sequestration including—

(i) a field testing validation activity under section 963 of the Energy Policy Act of 2005 (42 U.S.C. 16293), as amended by this Act; or

(ii) other geologic sequestration projects approved by the Secretary.

(4) REQUIREMENT.—For projects that generate carbon dioxide that is to be sequestered, the carbon dioxide stream shall be of a sufficient purity level to allow for safe transport and sequestration.

(5) COST-SHARING.—The cost-sharing requirements of section 988 of the Energy Policy Act of 2005 (42 U.S.C. 16352) for research and development projects shall apply to this section.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to carry out this section \$200,000,000 per year for fiscal years 2009 through 2013.

SEC. 704. REVIEW OF LARGE-SCALE PROGRAMS.

The Secretary shall enter into an arrangement with the National Academy of Sciences for an independent review and oversight, beginning in 2011, of the programs under sec-

tion 963(c)(3) of the Energy Policy Act of 2005 (42 U.S.C. 16293(c)(3)), as added by section 702 of this subtitle, and under section 703 of this subtitle, to ensure that the benefits of such programs are maximized. Not later than January 1, 2012, the Secretary shall transmit to the Congress a report on the results of such review and oversight.

SEC. 705. GEOLOGIC SEQUESTRATION TRAINING AND RESEARCH.

(a) STUDY.—

(1) IN GENERAL.—The Secretary shall enter into an arrangement with the National Academy of Sciences to undertake a study that—

(A) defines an interdisciplinary program in geology, engineering, hydrology, environmental science, and related disciplines that will support the Nation's capability to capture and sequester carbon dioxide from anthropogenic sources;

(B) addresses undergraduate and graduate education, especially to help develop graduate level programs of research and instruction that lead to advanced degrees with emphasis on geologic sequestration science;

(C) develops guidelines for proposals from colleges and universities with substantial capabilities in the required disciplines that seek to implement geologic sequestration science programs that advance the Nation's capacity to address carbon management through geologic sequestration science; and

(D) outlines a budget and recommendations for how much funding will be necessary to establish and carry out the grant program under subsection (b).

(2) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall transmit to the Congress a copy of the results of the study provided by the National Academy of Sciences under paragraph (1).

(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this subsection \$1,000,000 for fiscal year 2008.

(b) GRANT PROGRAM.—

(1) ESTABLISHMENT.—The Secretary shall establish a competitive grant program through which colleges and universities may apply for and receive 4-year grants for—

(A) salary and startup costs for newly designated faculty positions in an integrated geologic carbon sequestration science program; and

(B) internships for graduate students in geologic sequestration science.

(2) RENEWAL.—Grants under this subsection shall be renewable for up to 2 additional 3-year terms, based on performance criteria, established by the National Academy of Sciences study conducted under subsection (a), that include the number of graduates of such programs.

(3) INTERFACE WITH REGIONAL GEOLOGIC CARBON SEQUESTRATION PARTNERSHIPS.—To the greatest extent possible, geologic carbon sequestration science programs supported under this subsection shall interface with the research of the Regional Carbon Sequestration Partnerships operated by the Department to provide internships and practical training in carbon capture and geologic sequestration.

(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this subsection such sums as may be necessary.

SEC. 706. RELATION TO SAFE DRINKING WATER ACT.

The injection and geologic sequestration of carbon dioxide pursuant to this subtitle and the amendments made by this subtitle shall be subject to the requirements of the Safe Drinking Water Act (42 U.S.C. 300f et seq.), including the provisions of part C of such

Act (42 U.S.C. 300h et seq.; relating to protection of underground sources of drinking water). Nothing in this subtitle and the amendments made by this subtitle imposes or authorizes the promulgation of any requirement that is inconsistent or in conflict with the requirements of the Safe Drinking Water Act (42 U.S.C. 300f et seq.) or regulations thereunder.

SEC. 707. SAFETY RESEARCH.

(a) PROGRAM.—The Administrator of the Environmental Protection Agency shall conduct a research program to address public health, safety, and environmental impacts that may be associated with capture, injection, and sequestration of greenhouse gases in geologic reservoirs.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for carrying out this section \$5,000,000 for each fiscal year.

SEC. 708. UNIVERSITY BASED RESEARCH AND DEVELOPMENT GRANT PROGRAM.

(a) ESTABLISHMENT.—The Secretary, in consultation with other appropriate agencies, shall establish a university based research and development program to study carbon capture and sequestration using the various types of coal.

(b) RURAL AND AGRICULTURAL INSTITUTIONS.—The Secretary shall give special consideration to rural or agricultural based institutions in areas that have regional sources of coal and that offer interdisciplinary programs in the area of environmental science to study carbon capture and sequestration.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are to be authorized to be appropriated \$10,000,000 to carry out this section.

Subtitle B—Carbon Capture and Sequestration Assessment and Framework

SEC. 711. CARBON DIOXIDE SEQUESTRATION CAPACITY ASSESSMENT.

(a) DEFINITIONS.—In this section

(1) ASSESSMENT.—The term “assessment” means the national assessment of onshore capacity for carbon dioxide completed under subsection (f).

(2) CAPACITY.—The term “capacity” means the portion of a sequestration formation that can retain carbon dioxide in accordance with the requirements (including physical, geological, and economic requirements) established under the methodology developed under subsection (b).

(3) ENGINEERED HAZARD.—The term “engineered hazard” includes the location and completion history of any well that could affect potential sequestration.

(4) RISK.—The term “risk” includes any risk posed by geomechanical, geochemical, hydrogeological, structural, and engineered hazards.

(5) SECRETARY.—The term “Secretary” means the Secretary of the Interior, acting through the Director of the United States Geological Survey.

(6) SEQUESTRATION FORMATION.—The term “sequestration formation” means a deep saline formation, unmineable coal seam, or oil or gas reservoir that is capable of accommodating a volume of industrial carbon dioxide.

(b) METHODOLOGY.—Not later than 1 year after the date of enactment of this Act, the Secretary shall develop a methodology for conducting an assessment under subsection (f), taking into consideration—

(1) the geographical extent of all potential sequestration formations in all States;

(2) the capacity of the potential sequestration formations;

(3) the injectivity of the potential sequestration formations;

(4) an estimate of potential volumes of oil and gas recoverable by injection and sequestration of industrial carbon dioxide in potential sequestration formations;

(5) the risk associated with the potential sequestration formations; and

(6) the work done to develop the Carbon Sequestration Atlas of the United States and Canada that was completed by the Department.

(c) COORDINATION.—

(1) FEDERAL COORDINATION.—

(A) CONSULTATION.—The Secretary shall consult with the Secretary of Energy and the Administrator of the Environmental Protection Agency on issues of data sharing, format, development of the methodology, and content of the assessment required under this section to ensure the maximum usefulness and success of the assessment.

(B) COOPERATION.—The Secretary of Energy and the Administrator shall cooperate with the Secretary to ensure, to the maximum extent practicable, the usefulness and success of the assessment.

(2) STATE COORDINATION.—The Secretary shall consult with State geological surveys and other relevant entities to ensure, to the maximum extent practicable, the usefulness and success of the assessment.

(d) EXTERNAL REVIEW AND PUBLICATION.—On completion of the methodology under subsection (b), the Secretary shall—

(1) publish the methodology and solicit comments from the public and the heads of affected Federal and State agencies;

(2) establish a panel of individuals with expertise in the matters described in paragraphs (1) through (5) of subsection (b) composed, as appropriate, of representatives of Federal agencies, institutions of higher education, nongovernmental organizations, State organizations, industry, and international geoscience organizations to review the methodology and comments received under paragraph (1); and

(3) on completion of the review under paragraph (2), publish in the Federal Register the revised final methodology.

(e) PERIODIC UPDATES.—The methodology developed under this section shall be updated periodically (including at least once every 5 years) to incorporate new data as the data becomes available.

(f) NATIONAL ASSESSMENT.—

(1) IN GENERAL.—Not later than 2 years after the date of publication of the methodology under subsection (d)(1), the Secretary, in consultation with the Secretary of Energy and State geological surveys, shall complete a national assessment of capacity for carbon dioxide in accordance with the methodology.

(2) GEOLOGICAL VERIFICATION.—As part of the assessment under this subsection, the Secretary shall carry out a drilling program to supplement the geological data relevant to determining sequestration capacity of carbon dioxide in geological sequestration formations, including—

- (A) well log data;
- (B) core data; and
- (C) fluid sample data.

(3) PARTNERSHIP WITH OTHER DRILLING PROGRAMS.—As part of the drilling program under paragraph (2), the Secretary shall enter, as appropriate, into partnerships with other entities to collect and integrate data from other drilling programs relevant to the sequestration of carbon dioxide in geological formations.

(4) INCORPORATION INTO NATCARB.—

(A) IN GENERAL.—On completion of the assessment, the Secretary of Energy and the Secretary of the Interior shall incorporate the results of the assessment using—

(i) the NatCarb database, to the maximum extent practicable; or

(ii) a new database developed by the Secretary of Energy, as the Secretary of Energy determines to be necessary.

(B) RANKING.—The database shall include the data necessary to rank potential seques-

tration sites for capacity and risk, across the United States, within each State, by formation, and within each basin.

(5) REPORT.—Not later than 180 days after the date on which the assessment is completed, the Secretary shall submit to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives a report describing the findings under the assessment.

(6) PERIODIC UPDATES.—The national assessment developed under this section shall be updated periodically (including at least once every 5 years) to support public and private sector decisionmaking.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$30,000,000 for the period of fiscal years 2008 through 2012.

SEC. 712. ASSESSMENT OF CARBON SEQUESTRATION AND METHANE AND NITROUS OXIDE EMISSIONS FROM ECOSYSTEMS.

(a) DEFINITIONS.—In this section:

(1) ADAPTATION STRATEGY.—The term “adaptation strategy” means a land use and management strategy that can be used—

(A) to increase the sequestration capabilities of covered greenhouse gases of any ecosystem; or

(B) to reduce the emissions of covered greenhouse gases from any ecosystem.

(2) ASSESSMENT.—The term “assessment” means the national assessment authorized under subsection (b).

(3) COVERED GREENHOUSE GAS.—The term “covered greenhouse gas” means carbon dioxide, nitrous oxide, and methane gas.

(4) ECOSYSTEM.—The term “ecosystem” means any terrestrial, freshwater aquatic, or coastal ecosystem, including an estuary.

(5) NATIVE PLANT SPECIES.—The term “native plant species” means any noninvasive, naturally occurring plant species within an ecosystem.

(6) SECRETARY.—The term “Secretary” means the Secretary of the Interior.

(b) AUTHORIZATION OF ASSESSMENT.—Not later than 2 years after the date on which the final methodology is published under subsection (f)(3)(D), the Secretary shall complete a national assessment of—

(1) the quantity of carbon stored in and released from ecosystems, including from managed and natural fires; and

(2) the annual flux of covered greenhouse gases in and out of ecosystems.

(c) COMPONENTS.—In conducting the assessment under subsection (b), the Secretary shall—

(1) determine the processes that control the flux of covered greenhouse gases in and out of each ecosystem;

(2) estimate the potential for increasing carbon sequestration in natural and managed ecosystems through management activities or restoration activities in each ecosystem;

(3) develop near-term and long-term adaptation strategies or mitigation strategies that can be employed—

(A) to enhance the sequestration of carbon in each ecosystem;

(B) to reduce emissions of covered greenhouse gases from ecosystems; and

(C) to adapt to climate change; and

(4) estimate the annual carbon sequestration capacity of ecosystems under a range of policies in support of management activities to optimize sequestration.

(d) USE OF NATIVE PLANT SPECIES.—In developing restoration activities under subsection (c)(2) and management strategies and adaptation strategies under subsection (c)(3), the Secretary shall emphasize the use of native plant species (including mixtures of many native plant species) for sequestering covered greenhouse gas in each ecosystem.

(e) CONSULTATION.—

(1) IN GENERAL.—In conducting the assessment under subsection (b) and developing the methodology under subsection (f), the Secretary shall consult with—

(A) the Secretary of Energy;

(B) the Secretary of Agriculture;

(C) the Administrator of the Environmental Protection Agency;

(D) the Secretary of Commerce, acting through the Under Secretary for Oceans and Atmosphere; and

(E) the heads of other relevant agencies.

(2) OCEAN AND COASTAL ECOSYSTEMS.—In carrying out this section with respect to ocean and coastal ecosystems (including estuaries), the Secretary shall work jointly with the Secretary of Commerce, acting through the Under Secretary for Oceans and Atmosphere.

(f) METHODOLOGY.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary shall develop a methodology for conducting the assessment.

(2) REQUIREMENTS.—The methodology developed under paragraph (1)—

(A) shall—

(i) determine the method for measuring, monitoring, and quantifying covered greenhouse gas emissions and reductions;

(ii) estimate the total capacity of each ecosystem to sequester carbon; and

(iii) estimate the ability of each ecosystem to reduce emissions of covered greenhouse gases through management practices; and

(B) may employ economic and other systems models, analyses, and estimates, to be developed in consultation with each of the individuals described in subsection (e).

(3) EXTERNAL REVIEW AND PUBLICATION.—On completion of a proposed methodology, the Secretary shall—

(A) publish the proposed methodology;

(B) at least 60 days before the date on which the final methodology is published, solicit comments from—

(i) the public; and

(ii) heads of affected Federal and State agencies;

(C) establish a panel to review the proposed methodology published under subparagraph (A) and any comments received under subparagraph (B), to be composed of members—

(i) with expertise in the matters described in subsections (c) and (d); and

(ii) that are, as appropriate, representatives of Federal agencies, institutions of higher education, nongovernmental organizations, State organizations, industry, and international organizations; and

(D) on completion of the review under subparagraph (C), publish in the Federal register the revised final methodology.

(g) ESTIMATE; REVIEW.—The Secretary shall—

(1) based on the assessment, prescribe the data, information, and analysis needed to establish a scientifically sound estimate of the carbon sequestration capacity of relevant ecosystems; and

(2) not later than 180 days after the date on which the assessment is completed, submit to the heads of applicable Federal agencies and the appropriate committees of Congress a report that describes the results of the assessment.

(h) DATA AND REPORT AVAILABILITY.—On completion of the assessment, the Secretary shall incorporate the results of the assessment into a web-accessible database for public use.

(i) AUTHORIZATION.—There is authorized to be appropriated to carry out this section \$20,000,000 for the period of fiscal years 2008 through 2012.

SEC. 713. CARBON DIOXIDE SEQUESTRATION INVENTORY.

Section 354 of the Energy Policy Act of 2005 (42 U.S.C. 15910) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following:

“(d) RECORDS AND INVENTORY.—The Secretary of the Interior, acting through the Bureau of Land Management, shall maintain records on, and an inventory of, the quantity of carbon dioxide stored within Federal mineral leaseholds.”.

SEC. 714. FRAMEWORK FOR GEOLOGICAL CARBON SEQUESTRATION ON PUBLIC LAND.

(a) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary of the Interior shall submit to the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report on a recommended framework for managing geological carbon sequestration activities on public land.

(b) CONTENTS.—The report required by subsection (a) shall include the following:

(1) Recommended criteria for identifying candidate geological sequestration sites in each of the following types of geological settings:

(A) Operating oil and gas fields.

(B) Depleted oil and gas fields.

(C) Unmineable coal seams.

(D) Deep saline formations.

(E) Deep geological systems that may be used as engineered reservoirs to extract economical quantities of heat from geothermal resources of low permeability or porosity.

(F) Deep geological systems containing basalt formations.

(G) Coalbeds being used for methane recovery.

(2) A proposed regulatory framework for the leasing of public land or an interest in public land for the long-term geological sequestration of carbon dioxide, which includes an assessment of options to ensure that the United States receives fair market value for the use of public land or an interest in public land for geological sequestration.

(3) A proposed procedure for ensuring that any geological carbon sequestration activities on public land—

(A) provide for public review and comment from all interested persons; and

(B) protect the quality of natural and cultural resources of the public land overlaying a geological sequestration site.

(4) A description of the status of Federal leasehold or Federal mineral estate liability issues related to the geological subsurface trespass of or caused by carbon dioxide stored in public land, including any relevant experience from enhanced oil recovery using carbon dioxide on public land.

(5) Recommendations for additional legislation that may be required to ensure that public land management and leasing laws are adequate to accommodate the long-term geological sequestration of carbon dioxide.

(6) An identification of the legal and regulatory issues specific to carbon dioxide sequestration on land in cases in which title to mineral resources is held by the United States but title to the surface estate is not held by the United States.

(7)(A) An identification of the issues specific to the issuance of pipeline rights-of-way on public land under the Mineral Leasing Act (30 U.S.C. 181 et seq.) or the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) for natural or anthropogenic carbon dioxide.

(B) Recommendations for additional legislation that may be required to clarify the appropriate framework for issuing rights-of-

way for carbon dioxide pipelines on public land.

(c) CONSULTATION WITH OTHER AGENCIES.—In preparing the report under this section, the Secretary of the Interior shall coordinate with—

(1) the Administrator of the Environmental Protection Agency;

(2) the Secretary of Energy; and

(3) the heads of other appropriate agencies.

(d) COMPLIANCE WITH SAFE DRINKING WATER ACT.—The Secretary shall ensure that all recommendations developed under this section are in compliance with all Federal environmental laws, including the Safe Drinking Water Act (42 U.S.C. 300f et seq.) and regulations under that Act.

TITLE VIII—IMPROVED MANAGEMENT OF ENERGY POLICY**Subtitle A—Management Improvements****SEC. 801. NATIONAL MEDIA CAMPAIGN.**

(a) IN GENERAL.—The Secretary, acting through the Assistant Secretary for Energy Efficiency and Renewable Energy (referred to in this section as the “Secretary”), shall develop and conduct a national media campaign—

(1) to increase energy efficiency throughout the economy of the United States during the 10-year period beginning on the date of enactment of this Act;

(2) to promote the national security benefits associated with increased energy efficiency; and

(3) to decrease oil consumption in the United States during the 10-year period beginning on the date of enactment of this Act.

(b) CONTRACT WITH ENTITY.—The Secretary shall carry out subsection (a) directly or through—

(1) competitively bid contracts with 1 or more nationally recognized media firms for the development and distribution of monthly television, radio, and newspaper public service announcements; or

(2) collective agreements with 1 or more nationally recognized institutes, businesses, or nonprofit organizations for the funding, development, and distribution of monthly television, radio, and newspaper public service announcements.

(c) USE OF FUNDS.—

(1) IN GENERAL.—Amounts made available to carry out this section shall be used for—

(A) advertising costs, including—

(i) the purchase of media time and space;

(ii) creative and talent costs;

(iii) testing and evaluation of advertising; and

(iv) evaluation of the effectiveness of the media campaign; and

(B) administrative costs, including operational and management expenses.

(2) LIMITATIONS.—In carrying out this section, the Secretary shall allocate not less than 85 percent of funds made available under subsection (e) for each fiscal year for the advertising functions specified under paragraph (1)(A).

(d) REPORTS.—The Secretary shall annually submit to Congress a report that describes—

(1) the strategy of the national media campaign and whether specific objectives of the campaign were accomplished, including—

(A) determinations concerning the rate of change of energy consumption, in both absolute and per capita terms; and

(B) an evaluation that enables consideration of whether the media campaign contributed to reduction of energy consumption;

(2) steps taken to ensure that the national media campaign operates in an effective and efficient manner consistent with the overall strategy and focus of the campaign;

(3) plans to purchase advertising time and space;

(4) policies and practices implemented to ensure that Federal funds are used responsibly to purchase advertising time and space and eliminate the potential for waste, fraud, and abuse; and

(5) all contracts or cooperative agreements entered into with a corporation, partnership, or individual working on behalf of the national media campaign.

(e) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There is authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2008 through 2012.

(2) DECREASED OIL CONSUMPTION.—The Secretary shall use not less than 50 percent of the amount that is made available under this section for each fiscal year to develop and conduct a national media campaign to decrease oil consumption in the United States over the next decade.

SEC. 802. ALASKA NATURAL GAS PIPELINE ADMINISTRATION.

Section 106 of the Alaska Natural Gas Pipeline Act (15 U.S.C. 720d) is amended by adding at the end the following:

“(h) ADMINISTRATION.—

“(1) PERSONNEL APPOINTMENTS.—

“(A) IN GENERAL.—The Federal Coordinator may appoint and terminate such personnel as the Federal Coordinator determines to be appropriate.

“(B) AUTHORITY OF FEDERAL COORDINATOR.—Personnel appointed by the Federal Coordinator under subparagraph (A) shall be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service.

“(2) COMPENSATION.—

“(A) IN GENERAL.—Subject to subparagraph (B), personnel appointed by the Federal Coordinator under paragraph (1)(A) shall be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code (relating to classification and General Schedule pay rates).

“(B) MAXIMUM LEVEL OF COMPENSATION.—The rate of pay for personnel appointed by the Federal Coordinator under paragraph (1)(A) shall not exceed the maximum level of rate payable for level III of the Executive Schedule (5 U.S.C. 5314).

“(C) ALLOWANCES.—Section 5941 of title 5, United States Code, shall apply to personnel appointed by the Federal Coordinator under paragraph (1)(A).

“(3) TEMPORARY SERVICES.—

“(A) IN GENERAL.—The Federal Coordinator may procure temporary and intermittent services in accordance with section 3109(b) of title 5, United States Code.

“(B) MAXIMUM LEVEL OF COMPENSATION.—The level of compensation of an individual employed on a temporary or intermittent basis under subparagraph (A) shall not exceed the maximum level of rate payable for level III of the Executive Schedule (5 U.S.C. 5314).

“(4) FEES, CHARGES, AND COMMISSIONS.—

“(A) IN GENERAL.—With respect to the duties of the Federal Coordinator, as described in this Act, the Federal Coordinator shall have similar authority to establish, change, and abolish reasonable filing and service fees, charges, and commissions, require deposits of payments, and provide refunds as provided to the Secretary of the Interior in section 304 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734).

“(B) AUTHORITY OF SECRETARY OF THE INTERIOR.—Subparagraph (A) shall not affect the authority of the Secretary of the Interior to establish, change, and abolish reasonable filing and service fees, charges, and commissions, require deposits of payments, and provide refunds under section 304 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734).

“(C) USE OF FUNDS.—The Federal Coordinator is authorized to use, without further appropriation, amounts collected under subparagraph (A) to carry out this section.”.

SEC. 803. RENEWABLE ENERGY DEPLOYMENT.

(a) DEFINITIONS.—In this section:

(1) ALASKA SMALL HYDROELECTRIC POWER.—The term “Alaska small hydroelectric power” means power that—

- (A) is generated—
- (i) in the State of Alaska;
- (ii) without the use of a dam or impoundment of water; and
- (iii) through the use of—
- (I) a lake tap (but not a perched alpine lake); or
- (II) a run-of-river screened at the point of diversion; and
- (B) has a nameplate capacity rating of a wattage that is not more than 15 megawatts.

(2) ELIGIBLE APPLICANT.—The term “eligible applicant” means any—

- (A) governmental entity;
- (B) private utility;
- (C) public utility;
- (D) municipal utility;
- (E) cooperative utility;
- (F) Indian tribes; and
- (G) Regional Corporation (as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602)).

(3) OCEAN ENERGY.—

(A) INCLUSIONS.—The term “ocean energy” includes current, wave, and tidal energy.

(B) EXCLUSION.—The term “ocean energy” excludes thermal energy.

(4) RENEWABLE ENERGY PROJECT.—The term “renewable energy project” means a project—

- (A) for the commercial generation of electricity; and
- (B) that generates electricity from—
- (i) solar, wind, or geothermal energy or ocean energy;
- (ii) biomass (as defined in section 203(b) of the Energy Policy Act of 2005 (42 U.S.C. 15852(b)));
- (iii) landfill gas; or
- (iv) Alaska small hydroelectric power.

(b) RENEWABLE ENERGY CONSTRUCTION GRANTS.—

(1) IN GENERAL.—The Secretary shall use amounts appropriated under this section to make grants for use in carrying out renewable energy projects.

(2) CRITERIA.—Not later than 180 days after the date of enactment of this Act, the Secretary shall set forth criteria for use in awarding grants under this section.

(3) APPLICATION.—To receive a grant from the Secretary under paragraph (1), an eligible applicant shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a written assurance that—

(A) all laborers and mechanics employed by contractors or subcontractors during construction, alteration, or repair that is financed, in whole or in part, by a grant under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with sections 3141–3144, 3146, and 3147 of title 40, United States Code; and

(B) the Secretary of Labor shall, with respect to the labor standards described in this paragraph, have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (5 U.S.C. App.) and section 3145 of title 40, United States Code.

(4) NON-FEDERAL SHARE.—Each eligible applicant that receives a grant under this subsection shall contribute to the total cost of the renewable energy project constructed by the eligible applicant an amount not less

than 50 percent of the total cost of the project.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Fund such sums as are necessary to carry out this section.

SEC. 804. COORDINATION OF PLANNED REFINERY OUTAGES.

(a) DEFINITIONS.—In this section:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of the Energy Information Administration.

(2) PLANNED REFINERY OUTAGE.—

(A) IN GENERAL.—The term “planned refinery outage” means a removal, scheduled before the date on which the removal occurs, of a refinery, or any unit of a refinery, from service for maintenance, repair, or modification.

(B) EXCLUSION.—The term “planned refinery outage” does not include any necessary and unplanned removal of a refinery, or any unit of a refinery, from service as a result of a component failure, safety hazard, emergency, or action reasonably anticipated to be necessary to prevent such events.

(3) REFINED PETROLEUM PRODUCT.—The term “refined petroleum product” means any gasoline, diesel fuel, fuel oil, lubricating oil, liquid petroleum gas, or other petroleum distillate that is produced through the refining or processing of crude oil or an oil derived from tar sands, shale, or coal.

(4) REFINERY.—The term “refinery” means a facility used in the production of a refined petroleum product through distillation, cracking, or any other process.

(b) REVIEW AND ANALYSIS OF AVAILABLE INFORMATION.—The Administrator shall, on an ongoing basis—

(1) review information on refinery outages that is available from commercial reporting services;

(2) analyze that information to determine whether the scheduling of a refinery outage may nationally or regionally substantially affect the price or supply of any refined petroleum product by—

(A) decreasing the production of the refined petroleum product; and

(B) causing or contributing to a retail or wholesale supply shortage or disruption;

(3) not less frequently than twice each year, submit to the Secretary a report describing the results of the review and analysis under paragraphs (1) and (2); and

(4) specifically alert the Secretary of any refinery outage that the Administrator determines may nationally or regionally substantially affect the price or supply of a refined petroleum product.

(c) ACTION BY SECRETARY.—On a determination by the Secretary, based on a report or alert under paragraph (3) or (4) of subsection (b), that a refinery outage may affect the price or supply of a refined petroleum product, the Secretary shall make available to refinery operators information on planned refinery outages to encourage reductions of the quantity of refinery capacity that is out of service at any time.

(d) LIMITATION.—Nothing in this section shall alter any existing legal obligation or responsibility of a refinery operator, or create any legal right of action, nor shall this section authorize the Secretary—

(1) to prohibit a refinery operator from conducting a planned refinery outage; or

(2) to require a refinery operator to continue to operate a refinery.

SEC. 805. ASSESSMENT OF RESOURCES.

(a) 5-YEAR PLAN.—

(1) ESTABLISHMENT.—The Administrator of the Energy Information Administration (referred to in this section as the “Administrator”) shall establish a 5-year plan to enhance the quality and scope of the data col-

lection necessary to ensure the scope, accuracy, and timeliness of the information needed for efficient functioning of energy markets and related financial operations.

(2) REQUIREMENT.—In establishing the plan under paragraph (1), the Administrator shall pay particular attention to—

(A) data series terminated because of budget constraints;

(B) data on demand response;

(C) timely data series of State-level information;

(D) improvements in the area of oil and gas data;

(E) improvements in data on solid byproducts from coal-based energy-producing facilities; and

(F) the ability to meet applicable deadlines under Federal law (including regulations) to provide data required by Congress.

(b) SUBMISSION TO CONGRESS.—The Administrator shall submit to Congress the plan established under subsection (a), including a description of any improvements needed to enhance the ability of the Administrator to collect and process energy information in a manner consistent with the needs of energy markets.

(c) GUIDELINES.—

(1) IN GENERAL.—The Administrator shall—

(A) establish guidelines to ensure the quality, comparability, and scope of State energy data, including data on energy production and consumption by product and sector and renewable and alternative sources, required to provide a comprehensive, accurate energy profile at the State level;

(B) share company-level data collected at the State level with each State involved, in a manner consistent with the legal authorities, confidentiality protections, and stated uses in effect at the time the data were collected, subject to the condition that the State shall agree to reasonable requirements for use of the data, as the Administrator may require;

(C) assess any existing gaps in data obtained and compiled by the Energy Information Administration; and

(D) evaluate the most cost-effective ways to address any data quality and quantity issues in conjunction with State officials.

(2) CONSULTATION.—The Administrator shall consult with State officials and the Federal Energy Regulatory Commission on a regular basis in—

(A) establishing guidelines and determining the scope of State-level data under paragraph (1); and

(B) exploring ways to address data needs and serve data uses.

(d) ASSESSMENT OF STATE DATA NEEDS.—Not later than 1 year after the date of enactment of this Act, the Administrator shall submit to Congress an assessment of State-level data needs, including a plan to address the needs.

(e) AUTHORIZATION OF APPROPRIATIONS.—In addition to any other amounts made available to the Administrator, there are authorized to be appropriated to the Administrator to carry out this section—

(1) \$10,000,000 for fiscal year 2008;

(2) \$10,000,000 for fiscal year 2009;

(3) \$10,000,000 for fiscal year 2010;

(4) \$15,000,000 for fiscal year 2011;

(5) \$20,000,000 for fiscal year 2012; and

(6) such sums as are necessary for subsequent fiscal years.

SEC. 806. SENSE OF CONGRESS RELATING TO THE USE OF RENEWABLE RESOURCES TO GENERATE ENERGY.

(a) FINDINGS.—Congress finds that—

(1) the United States has a quantity of renewable energy resources that is sufficient to supply a significant portion of the energy needs of the United States;

(2) the agricultural, forestry, and working land of the United States can help ensure a sustainable domestic energy system;

(3) accelerated development and use of renewable energy technologies provide numerous benefits to the United States, including improved national security, improved balance of payments, healthier rural economies, improved environmental quality, and abundant, reliable, and affordable energy for all citizens of the United States;

(4) the production of transportation fuels from renewable energy would help the United States meet rapidly growing domestic and global energy demands, reduce the dependence of the United States on energy imported from volatile regions of the world that are politically unstable, stabilize the cost and availability of energy, and safeguard the economy and security of the United States;

(5) increased energy production from domestic renewable resources would attract substantial new investments in energy infrastructure, create economic growth, develop new jobs for the citizens of the United States, and increase the income for farm, ranch, and forestry jobs in the rural regions of the United States;

(6) increased use of renewable energy is practical and can be cost effective with the implementation of supportive policies and proper incentives to stimulate markets and infrastructure; and

(7) public policies aimed at enhancing renewable energy production and accelerating technological improvements will further reduce energy costs over time and increase market demand.

(b) SENSE OF CONGRESS.—It is the sense of Congress that it is the goal of the United States that, not later than January 1, 2025, the agricultural, forestry, and working land of the United States should—

(1) provide from renewable resources not less than 25 percent of the total energy consumed in the United States; and

(2) continue to produce safe, abundant, and affordable food, feed, and fiber.

SEC. 807. GEOTHERMAL ASSESSMENT, EXPLORATION INFORMATION, AND PRIORITY ACTIVITIES.

(a) IN GENERAL.—Not later than January 1, 2012, the Secretary of the Interior, acting through the Director of the United States Geological Survey, shall—

(1) complete a comprehensive nationwide geothermal resource assessment that examines the full range of geothermal resources in the United States; and

(2) submit to the the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report describing the results of the assessment.

(b) PERIODIC UPDATES.—At least once every 10 years, the Secretary shall update the national assessment required under this section to support public and private sector decisionmaking.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of the Interior to carry out this section—

(1) \$15,000,000 for each of fiscal years 2008 through 2012; and

(2) such sums as are necessary for each of fiscal years 2013 through 2022.

Subtitle B—Prohibitions on Market Manipulation and False Information

SEC. 811. PROHIBITION ON MARKET MANIPULATION.

It is unlawful for any person, directly or indirectly, to use or employ, in connection with the purchase or sale of crude oil gasoline or petroleum distillates at wholesale, any manipulative or deceptive device or con-

trivance, in contravention of such rules and regulations as the Federal Trade Commission may prescribe as necessary or appropriate in the public interest or for the protection of United States citizens.

SEC. 812. PROHIBITION ON FALSE INFORMATION.

It is unlawful for any person to report information related to the wholesale price of crude oil gasoline or petroleum distillates to a Federal department or agency if—

(1) the person knew, or reasonably should have known, the information to be false or misleading;

(2) the information was required by law to be reported; and

(3) the person intended the false or misleading data to affect data compiled by the department or agency for statistical or analytical purposes with respect to the market for crude oil, gasoline, or petroleum distillates.

SEC. 813. ENFORCEMENT BY THE FEDERAL TRADE COMMISSION.

(a) ENFORCEMENT.—This subtitle shall be enforced by the Federal Trade Commission in the same manner, by the same means, and with the same jurisdiction as though all applicable terms of the Federal Trade Commission Act (15 U.S.C. 41 et seq.) were incorporated into and made a part of this subtitle.

(b) VIOLATION IS TREATED AS UNFAIR OR DECEPTIVE ACT OR PRACTICE.—The violation of any provision of this subtitle shall be treated as an unfair or deceptive act or practice proscribed under a rule issued under section 18(a)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)(B)).

SEC. 814. PENALTIES.

(a) CIVIL PENALTY.—In addition to any penalty applicable under the Federal Trade Commission Act (15 U.S.C. 41 et seq.), any supplier that violates section 811 or 812 shall be punishable by a civil penalty of not more than \$1,000,000.

(b) METHOD.—The penalties provided by subsection (a) shall be obtained in the same manner as civil penalties imposed under section 5 of the Federal Trade Commission Act (15 U.S.C. 45).

(c) MULTIPLE OFFENSES; MITIGATING FACTORS.—In assessing the penalty provided by subsection (a)—

(1) each day of a continuing violation shall be considered a separate violation; and

(2) the court shall take into consideration, among other factors—

(A) the seriousness of the violation; and
(B) the efforts of the person committing the violation to remedy the harm caused by the violation in a timely manner.

SEC. 815. EFFECT ON OTHER LAWS.

(a) OTHER AUTHORITY OF THE COMMISSION.—Nothing in this subtitle limits or affects the authority of the Federal Trade Commission to bring an enforcement action or take any other measure under the Federal Trade Commission Act (15 U.S.C. 41 et seq.) or any other provision of law.

(b) ANTITRUST LAW.—Nothing in this subtitle shall be construed to modify, impair, or supersede the operation of any of the antitrust laws. For purposes of this subsection, the term “antitrust laws” shall have the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12), except that it includes section 5 of the Federal Trade Commission Act (15 U.S.C. 45) to the extent that such section 5 applies to unfair methods of competition.

(c) STATE LAW.—Nothing in this subtitle preempts any State law.

TITLE IX—INTERNATIONAL ENERGY PROGRAMS

SEC. 901. DEFINITIONS.

In this title:

(1) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term “appropriate congressional committees” means—

(A) the Committee on Foreign Affairs and the Committee on Energy and Commerce of the House of Representatives; and

(B) the Committee on Foreign Relations, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works of the Senate, and the Committee on Commerce, Science, and Transportation.

(2) CLEAN AND EFFICIENT ENERGY TECHNOLOGY.—The term “clean and efficient energy technology” means an energy supply or end-use technology that, compared to a similar technology already in widespread commercial use in a recipient country, will—

(A) reduce emissions of greenhouse gases; or

(B)(i) increase efficiency of energy production; or

(ii) decrease intensity of energy usage.

(3) GREENHOUSE GAS.—The term “greenhouse gas” means—

(A) carbon dioxide;

(B) methane;

(C) nitrous oxide;

(D) hydrofluorocarbons;

(E) perfluorocarbons; or

(F) sulfur hexafluoride.

Subtitle A—Assistance to Promote Clean and Efficient Energy Technologies in Foreign Countries

SEC. 911. UNITED STATES ASSISTANCE FOR DEVELOPING COUNTRIES.

(a) ASSISTANCE AUTHORIZED.—The Administrator of the United States Agency for International Development shall support policies and programs in developing countries that promote clean and efficient energy technologies—

(1) to produce the necessary market conditions for the private sector delivery of energy and environmental management services;

(2) to create an environment that is conducive to accepting clean and efficient energy technologies that support the overall purpose of reducing greenhouse gas emissions, including—

(A) improving policy, legal, and regulatory frameworks;

(B) increasing institutional abilities to provide energy and environmental management services; and

(C) increasing public awareness and participation in the decision-making of delivering energy and environmental management services; and

(3) to promote the use of American-made clean and efficient energy technologies, products, and energy and environmental management services.

(b) REPORT.—The Administrator of the United States Agency for International Development shall submit to the appropriate congressional committees an annual report on the implementation of this section for each of the fiscal years 2008 through 2012.

(c) AUTHORIZATION OF APPROPRIATIONS.—To carry out this section, there are authorized to be appropriated to the Administrator of the United States Agency for International Development \$200,000,000 for each of the fiscal years 2008 through 2012.

SEC. 912. UNITED STATES EXPORTS AND OUTREACH PROGRAMS FOR INDIA, CHINA, AND OTHER COUNTRIES.

(a) ASSISTANCE AUTHORIZED.—The Secretary of Commerce shall direct the United States and Foreign Commercial Service to expand or create a corps of the Foreign Commercial Service officers to promote United States exports in clean and efficient energy technologies and build the capacity of government officials in India, China, and any other country the Secretary of Commerce determines appropriate, to become more familiar with the available technologies—

(1) by assigning or training Foreign Commercial Service attachés, who have expertise in clean and efficient energy technologies from the United States, to embark on business development and outreach efforts to such countries; and

(2) by deploying the attachés described in paragraph (1) to educate provincial, state, and local government officials in such countries on the variety of United States-based technologies in clean and efficient energy technologies for the purposes of promoting United States exports and reducing global greenhouse gas emissions.

(b) REPORT.—The Secretary of Commerce shall submit to the appropriate congressional committees an annual report on the implementation of this section for each of the fiscal years 2008 through 2012.

(c) AUTHORIZATION OF APPROPRIATIONS.—To carry out this section, there are authorized to be appropriated to the Secretary of Commerce such sums as may be necessary for each of the fiscal years 2008 through 2012.

SEC. 913. UNITED STATES TRADE MISSIONS TO ENCOURAGE PRIVATE SECTOR TRADE AND INVESTMENT.

(a) ASSISTANCE AUTHORIZED.—The Secretary of Commerce shall direct the International Trade Administration to expand or create trade missions to and from the United States to encourage private sector trade and investment in clean and efficient energy technologies—

(1) by organizing and facilitating trade missions to foreign countries and by matching United States private sector companies with opportunities in foreign markets so that clean and efficient energy technologies can help to combat increases in global greenhouse gas emissions; and

(2) by creating reverse trade missions in which the Department of Commerce facilitates the meeting of foreign private and public sector organizations with private sector companies in the United States for the purpose of showcasing clean and efficient energy technologies in use or in development that could be exported to other countries.

(b) REPORT.—The Secretary of Commerce shall submit to the appropriate congressional committees an annual report on the implementation of this section for each of the fiscal years 2008 through 2012.

(c) AUTHORIZATION OF APPROPRIATIONS.—To carry out this section, there are authorized to be appropriated to the Secretary of Commerce such sums as may be necessary for each of the fiscal years 2008 through 2012.

SEC. 914. ACTIONS BY OVERSEAS PRIVATE INVESTMENT CORPORATION.

(a) SENSE OF CONGRESS.—It is the sense of Congress that the Overseas Private Investment Corporation should promote greater investment in clean and efficient energy technologies by—

(1) proactively reaching out to United States companies that are interested in investing in clean and efficient energy technologies in countries that are significant contributors to global greenhouse gas emissions;

(2) giving preferential treatment to the evaluation and awarding of projects that involve the investment or utilization of clean and efficient energy technologies; and

(3) providing greater flexibility in supporting projects that involve the investment or utilization of clean and efficient energy technologies, including financing, insurance, and other assistance.

(b) REPORT.—The Overseas Private Investment Corporation shall include in its annual report required under section 240A of the Foreign Assistance Act of 1961 (22 U.S.C. 2200a)—

(1) a description of the activities carried out to implement this section; or

(2) if the Corporation did not carry out any activities to implement this section, an explanation of the reasons therefor.

SEC. 915. ACTIONS BY UNITED STATES TRADE AND DEVELOPMENT AGENCY.

(a) ASSISTANCE AUTHORIZED.—The Director of the Trade and Development Agency shall establish or support policies that—

(1) proactively seek opportunities to fund projects that involve the utilization of clean and efficient energy technologies, including in trade capacity building and capital investment projects;

(2) where appropriate, advance the utilization of clean and efficient energy technologies, particularly to countries that have the potential for significant reduction in greenhouse gas emissions; and

(3) recruit and retain individuals with appropriate expertise or experience in clean, renewable, and efficient energy technologies to identify and evaluate opportunities for projects that involve clean and efficient energy technologies and services.

(b) REPORT.—The President shall include in the annual report on the activities of the Trade and Development Agency required under section 661(d) of the Foreign Assistance Act of 1961 (22 U.S.C. 2421(d)) a description of the activities carried out to implement this section.

SEC. 916. DEPLOYMENT OF INTERNATIONAL CLEAN AND EFFICIENT ENERGY TECHNOLOGIES AND INVESTMENT IN GLOBAL ENERGY MARKETS.

(a) TASK FORCE.—

(1) ESTABLISHMENT.—Not later than 90 days after the date of the enactment of this Act, the President shall establish a Task Force on International Cooperation for Clean and Efficient Energy Technologies (in this section referred to as the “Task Force”).

(2) COMPOSITION.—The Task Force shall be composed of representatives, appointed by the head of the respective Federal department or agency, of—

- (A) the Council on Environmental Quality;
- (B) the Department of Energy;
- (C) the Department of Commerce;
- (D) the Department of the Treasury;
- (E) the Department of State;
- (F) the Environmental Protection Agency;
- (G) the United States Agency for International Development;
- (H) the Export-Import Bank of the United States;

(I) the Overseas Private Investment Corporation;

- (J) the Trade and Development Agency;
- (K) the Small Business Administration;
- (L) the Office of the United States Trade Representative; and

(M) other Federal departments and agencies, as determined by the President.

(3) CHAIRPERSON.—The President shall designate a Chairperson or Co-Chairpersons of the Task Force.

(4) DUTIES.—The Task Force—

(A) shall develop and assist in the implementation of the strategy required under subsection (c); and

(B)(i) shall analyze technology, policy, and market opportunities for the development, demonstration, and deployment of clean and efficient energy technologies on an international basis; and

(ii) shall examine relevant trade, tax, finance, international, and other policy issues to assess which policies, in the United States and in developing countries, would help open markets and improve the export of clean and efficient energy technologies from the United States.

(5) TERMINATION.—The Task Force, including any working group established by the Task Force pursuant to subsection (b), shall terminate 12 years after the date of the enactment of this Act.

(b) WORKING GROUPS.—

(1) ESTABLISHMENT.—The Task Force—

(A) shall establish an Interagency Working Group on the Export of Clean and Efficient Energy Technologies (in this section referred to as the “Interagency Working Group”); and

(B) may establish other working groups as may be necessary to carry out this section.

(2) COMPOSITION.—The Interagency Working Group shall be composed of—

(A) the Secretary of Energy, the Secretary of Commerce, and the Secretary of State, who shall serve as Co-Chairpersons of the Interagency Working Group; and

(B) other members, as determined by the Chairperson or Co-Chairpersons of the Task Force.

(3) DUTIES.—The Interagency Working Group shall coordinate the resources and relevant programs of the Department of Energy, the Department of Commerce, the Department of State, and other relevant Federal departments and agencies to support the export of clean and efficient energy technologies developed or demonstrated in the United States to other countries and the deployment of such clean and efficient energy technologies in such other countries.

(4) INTERAGENCY CENTER.—The Interagency Working Group—

(A) shall establish an Interagency Center on the Export of Clean and Efficient Energy Technologies (in this section referred to as the “Interagency Center”) to assist the Interagency Working Group in carrying out its duties required under paragraph (3); and

(B) shall locate the Interagency Center at a site agreed upon by the Co-Chairpersons of the Interagency Working Group, with the approval of Chairperson or Co-Chairpersons of the Task Force.

(c) STRATEGY.—

(1) IN GENERAL.—Not later than 1 year after the date of the enactment of this Act, the Task Force shall develop and submit to the President and the appropriate congressional committees a strategy to—

(A) support the development and implementation of programs, policies, and initiatives in developing countries to promote the adoption and deployment of clean and efficient energy technologies, with an emphasis on those developing countries that are expected to experience the most significant growth in energy production and use over the next 20 years;

(B) open and expand clean and efficient energy technology markets and facilitate the export of clean and efficient energy technologies to developing countries, in a manner consistent with United States obligations as member of the World Trade Organization;

(C) integrate into the foreign policy objectives of the United States the promotion of—

(i) the deployment of clean and efficient energy technologies and the reduction of greenhouse gas emissions in developing countries; and

(ii) the export of clean and efficient energy technologies; and

(D) develop financial mechanisms and instruments, including securities that mitigate the political and foreign exchange risks of uses that are consistent with the foreign policy objectives of the United States by combining the private sector market and government enhancements, that—

(i) are cost-effective; and

(ii) facilitate private capital investment in clean and efficient energy technology projects in developing countries.

(2) UPDATES.—Not later than 3 years after the date of submission of the strategy under paragraph (1), and every 3 years thereafter, the Task Force shall update the strategy in

accordance with the requirements of paragraph (1).

(d) REPORT.—

(1) IN GENERAL.—Not later than 3 years after the date of submission of the strategy under subsection (c)(1), and every 3 years thereafter, the President shall transmit to the appropriate congressional committees a report on the implementation of this section for the prior 3-year period.

(2) MATTERS TO BE INCLUDED.—The report required under paragraph (1) shall include the following:

(A) The update of the strategy required under subsection (c)(2) and a description of the actions taken by the Task Force to assist in the implementation of the strategy.

(B) A description of actions taken by the Task Force to carry out the duties required under subsection (a)(4)(B).

(C) A description of assistance provided under this section.

(D) The results of programs, projects, and activities carried out under this section.

(E) A description of priorities for promoting the diffusion and adoption of clean and efficient energy technologies and strategies in developing countries, taking into account economic and security interests of the United States and opportunities for the export of technology of the United States.

(F) Recommendations to the heads of appropriate Federal departments and agencies on methods to streamline Federal programs and policies to improve the role of such Federal departments and agencies in the development, demonstration, and deployment of clean and efficient energy technologies on an international basis.

(G) Strategies to integrate representatives of the private sector and other interested groups on the export and deployment of clean and efficient energy technologies.

(H) A description of programs to disseminate information to the private sector and the public on clean and efficient energy technologies and opportunities to transfer such clean and efficient energy technologies.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section \$5,000,000 for each of fiscal years 2008 through 2020.

SEC. 917. UNITED STATES-ISRAEL ENERGY COOPERATION.

(a) FINDINGS.—Congress finds that—

(1) it is in the highest national security interests of the United States to develop renewable energy sources;

(2) the State of Israel is a steadfast ally of the United States;

(3) the special relationship between the United States and Israel is manifested in a variety of cooperative scientific research and development programs, such as—

(A) the United States-Israel Binational Science Foundation; and

(B) the United States-Israel Binational Industrial Research and Development Foundation;

(4) those programs have made possible many scientific, technological, and commercial breakthroughs in the fields of life sciences, medicine, bioengineering, agriculture, biotechnology, communications, and others;

(5) on February 1, 1996, the Secretary of Energy (referred to in this section as the “Secretary”) and the Israeli Minister of Energy and Infrastructure signed an agreement to establish a framework for collaboration between the United States and Israel in energy research and development activities;

(6) Israeli scientists and engineers are at the forefront of research and development in the field of renewable energy sources; and

(7) enhanced cooperation between the United States and Israel for the purpose of research and development of renewable en-

ergy sources would be in the national interests of both countries.

(b) GRANT PROGRAM.—

(1) ESTABLISHMENT.—In implementing the agreement entitled the “Agreement between the Department of Energy of the United States of America and the Ministry of Energy and Infrastructure of Israel Concerning Energy Cooperation”, dated February 1, 1996, the Secretary shall establish a grant program in accordance with the requirements of sections 988 and 989 of the Energy Policy Act of 2005 (42 U.S.C. 16352, 16353) to support research, development, and commercialization of renewable energy or energy efficiency.

(2) TYPES OF ENERGY.—In carrying out paragraph (1), the Secretary may make grants to promote—

- (A) solar energy;
- (B) biomass energy;
- (C) energy efficiency;
- (D) wind energy;
- (E) geothermal energy;
- (F) wave and tidal energy; and
- (G) advanced battery technology.

(3) ELIGIBLE APPLICANTS.—An applicant shall be eligible to receive a grant under this subsection if the project of the applicant—

(A) addresses a requirement in the area of improved energy efficiency or renewable energy sources, as determined by the Secretary; and

(B) is a joint venture between—

(i)(I) a for-profit business entity, academic institution, National Laboratory (as defined in section 2 of the Energy Policy Act of 2005 (42 U.S.C. 15801)), or nonprofit entity in the United States; and

(II) a for-profit business entity, academic institution, or nonprofit entity in Israel; or

(ii)(I) the Federal Government; and

(II) the Government of Israel.

(4) APPLICATIONS.—To be eligible to receive a grant under this subsection, an applicant shall submit to the Secretary an application for the grant in accordance with procedures established by the Secretary, in consultation with the advisory board established under paragraph (5).

(5) ADVISORY BOARD.—

(A) ESTABLISHMENT.—The Secretary shall establish an advisory board—

(i) to monitor the method by which grants are awarded under this subsection; and

(ii) to provide to the Secretary periodic performance reviews of actions taken to carry out this subsection.

(B) COMPOSITION.—The advisory board established under subparagraph (A) shall be composed of 3 members, to be appointed by the Secretary, of whom—

(i) 1 shall be a representative of the Federal Government;

(ii) 1 shall be selected from a list of nominees provided by the United States-Israel Binational Science Foundation; and

(iii) 1 shall be selected from a list of nominees provided by the United States-Israel Binational Industrial Research and Development Foundation.

(6) CONTRIBUTED FUNDS.—Notwithstanding section 3302 of title 31, United States Code, the Secretary may accept, retain, and use funds contributed by any person, government entity, or organization for purposes of carrying out this subsection—

(A) without further appropriation; and

(B) without fiscal year limitation.

(7) REPORT.—Not later than 180 days after the date of completion of a project for which a grant is provided under this subsection, the grant recipient shall submit to the Secretary a report that contains—

(A) a description of the method by which the recipient used the grant funds; and

(B) an evaluation of the level of success of each project funded by the grant.

(8) CLASSIFICATION.—Grants shall be awarded under this subsection only for projects that are considered to be unclassified by both the United States and Israel.

(c) TERMINATION.—The grant program and the advisory committee established under this section terminate on the date that is 7 years after the date of enactment of this Act.

(d) AUTHORIZATION OF APPROPRIATIONS.—The Secretary shall use amounts authorized to be appropriated under section 931 of the Energy Policy Act of 2005 (42 U.S.C. 16231) to carry out this section.

Subtitle B—International Clean Energy Foundation

SEC. 921. DEFINITIONS.

In this subtitle:

(1) BOARD.—The term “Board” means the Board of Directors of the Foundation established pursuant to section 922(c).

(2) CHIEF EXECUTIVE OFFICER.—The term “Chief Executive Officer” means the chief executive officer of the Foundation appointed pursuant to section 922(b).

(3) FOUNDATION.—The term “Foundation” means the International Clean Energy Foundation established by section 922(a).

SEC. 922. ESTABLISHMENT AND MANAGEMENT OF FOUNDATION.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established in the executive branch a foundation to be known as the “International Clean Energy Foundation” that shall be responsible for carrying out the provisions of this subtitle. The Foundation shall be a government corporation, as defined in section 103 of title 5, United States Code.

(2) BOARD OF DIRECTORS.—The Foundation shall be governed by a Board of Directors in accordance with subsection (c).

(3) INTENT OF CONGRESS.—It is the intent of Congress, in establishing the structure of the Foundation set forth in this subsection, to create an entity that serves the long-term foreign policy and energy security goals of reducing global greenhouse gas emissions.

(b) CHIEF EXECUTIVE OFFICER.—

(1) IN GENERAL.—There shall be in the Foundation a Chief Executive Officer who shall be responsible for the management of the Foundation.

(2) APPOINTMENT.—The Chief Executive Officer shall be appointed by the Board, with the advice and consent of the Senate, and shall be a recognized leader in clean and efficient energy technologies and climate change and shall have experience in energy security, business, or foreign policy, chosen on the basis of a rigorous search.

(3) RELATIONSHIP TO BOARD.—The Chief Executive Officer shall report to, and be under the direct authority of, the Board.

(4) COMPENSATION AND RANK.—

(A) IN GENERAL.—The Chief Executive Officer shall be compensated at the rate provided for level III of the Executive Schedule under section 5314 of title 5, United States Code.

(B) AMENDMENT.—Section 5314 of title 5, United States Code, is amended by adding at the end the following:

“Chief Executive Officer, International Clean Energy Foundation.”.

(C) AUTHORITIES AND DUTIES.—The Chief Executive Officer shall be responsible for the management of the Foundation and shall exercise the powers and discharge the duties of the Foundation.

(D) AUTHORITY TO APPOINT OFFICERS.—In consultation and with approval of the Board, the Chief Executive Officer shall appoint all officers of the Foundation.

(c) BOARD OF DIRECTORS.—

(1) ESTABLISHMENT.—There shall be in the Foundation a Board of Directors.

(2) DUTIES.—The Board shall perform the functions specified to be carried out by the Board in this subtitle and may prescribe, amend, and repeal bylaws, rules, regulations, and procedures governing the manner in which the business of the Foundation may be conducted and in which the powers granted to it by law may be exercised.

(3) MEMBERSHIP.—The Board shall consist of—

(A) the Secretary of State (or the Secretary's designee), the Secretary of Energy (or the Secretary's designee), and the Administrator of the United States Agency for International Development (or the Administrator's designee); and

(B) four other individuals with relevant experience in matters relating to energy security (such as individuals who represent institutions of energy policy, business organizations, foreign policy organizations, or other relevant organizations) who shall be appointed by the President, by and with the advice and consent of the Senate, of whom—

(i) one individual shall be appointed from among a list of individuals submitted by the majority leader of the House of Representatives;

(ii) one individual shall be appointed from among a list of individuals submitted by the minority leader of the House of Representatives;

(iii) one individual shall be appointed from among a list of individuals submitted by the majority leader of the Senate; and

(iv) one individual shall be appointed from among a list of individuals submitted by the minority leader of the Senate.

(4) CHIEF EXECUTIVE OFFICER.—The Chief Executive Officer of the Foundation shall serve as a nonvoting, ex officio member of the Board.

(5) TERMS.—

(A) OFFICERS OF THE FEDERAL GOVERNMENT.—Each member of the Board described in paragraph (3)(A) shall serve for a term that is concurrent with the term of service of the individual's position as an officer within the other Federal department or agency.

(B) OTHER MEMBERS.—Each member of the Board described in paragraph (3)(B) shall be appointed for a term of 3 years and may be reappointed for a term of an additional 3 years.

(C) VACANCIES.—A vacancy in the Board shall be filled in the manner in which the original appointment was made.

(D) ACTING MEMBERS.—A vacancy in the Board may be filled with an appointment of an acting member by the Chairperson of the Board for up to 1 year while a nominee is named and awaits confirmation in accordance with paragraph (3)(B).

(6) CHAIRPERSON.—There shall be a Chairperson of the Board. The Secretary of State (or the Secretary's designee) shall serve as the Chairperson.

(7) QUORUM.—A majority of the members of the Board described in paragraph (3) shall constitute a quorum, which, except with respect to a meeting of the Board during the 135-day period beginning on the date of the enactment of this Act, shall include at least 1 member of the Board described in paragraph (3)(B).

(8) MEETINGS.—The Board shall meet at the call of the Chairperson, who shall call a meeting no less than once a year.

(9) COMPENSATION.—

(A) OFFICERS OF THE FEDERAL GOVERNMENT.—

(i) IN GENERAL.—A member of the Board described in paragraph (3)(A) may not receive additional pay, allowances, or benefits by reason of the member's service on the Board.

(ii) TRAVEL EXPENSES.—Each such member of the Board shall receive travel expenses,

including per diem in lieu of subsistence, in accordance with applicable provisions under subchapter I of chapter 57 of title 5, United States Code.

(B) OTHER MEMBERS.—

(i) IN GENERAL.—Except as provided in clause (ii), a member of the Board described in paragraph (3)(B)—

(I) shall be paid compensation out of funds made available for the purposes of this subtitle at the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, for each day (including travel time) during which the member is engaged in the actual performance of duties as a member of the Board; and

(II) while away from the member's home or regular place of business on necessary travel in the actual performance of duties as a member of the Board, shall be paid per diem, travel, and transportation expenses in the same manner as is provided under subchapter I of chapter 57 of title 5, United States Code.

(ii) LIMITATION.—A member of the Board may not be paid compensation under clause (i)(II) for more than 90 days in any calendar year.

SEC. 923. DUTIES OF FOUNDATION.

The Foundation shall—

(1) use the funds authorized by this subtitle to make grants to promote projects outside of the United States that serve as models of how to significantly reduce the emissions of global greenhouse gases through clean and efficient energy technologies, processes, and services;

(2) seek contributions from foreign governments, especially those rich in energy resources such as member countries of the Organization of the Petroleum Exporting Countries, and private organizations to supplement funds made available under this subtitle;

(3) harness global expertise through collaborative partnerships with foreign governments and domestic and foreign private actors, including nongovernmental organizations and private sector companies, by leveraging public and private capital, technology, expertise, and services towards innovative models that can be instituted to reduce global greenhouse gas emissions;

(4) create a repository of information on best practices and lessons learned on the utilization and implementation of clean and efficient energy technologies and processes to be used for future initiatives to tackle the climate change crisis;

(5) be committed to minimizing administrative costs and to maximizing the availability of funds for grants under this subtitle; and

(6) promote the use of American-made clean and efficient energy technologies, processes, and services by giving preference to entities incorporated in the United States and whose technology will be substantially manufactured in the United States.

SEC. 924. ANNUAL REPORT.

(a) REPORT REQUIRED.—Not later than March 31, 2008, and each March 31 thereafter, the Foundation shall submit to the appropriate congressional committees a report on the implementation of this subtitle during the prior fiscal year.

(b) CONTENTS.—The report required by subsection (a) shall include—

(1) the total financial resources available to the Foundation during the year, including appropriated funds, the value and source of any gifts or donations accepted pursuant to section 925(a)(6), and any other resources;

(2) a description of the Board's policy priorities for the year and the basis upon which competitive grant proposals were solicited and awarded to nongovernmental institutions and other organizations;

(3) a list of grants made to nongovernmental institutions and other organizations that includes the identity of the institutional recipient, the dollar amount, and the results of the program; and

(4) the total administrative and operating expenses of the Foundation for the year, as well as specific information on—

(A) the number of Foundation employees and the cost of compensation for Board members, Foundation employees, and personal service contractors;

(B) costs associated with securing the use of real property for carrying out the functions of the Foundation;

(C) total travel expenses incurred by Board members and Foundation employees in connection with Foundation activities; and

(D) total representational expenses.

SEC. 925. POWERS OF THE FOUNDATION; RELATED PROVISIONS.

(a) POWERS.—The Foundation—

(1) shall have perpetual succession unless dissolved by a law enacted after the date of the enactment of this Act;

(2) may adopt, alter, and use a seal, which shall be judicially noticed;

(3) may make and perform such contracts, grants, and other agreements with any person or government however designated and wherever situated, as may be necessary for carrying out the functions of the Foundation;

(4) may determine and prescribe the manner in which its obligations shall be incurred and its expenses allowed and paid, including expenses for representation;

(5) may lease, purchase, or otherwise acquire, improve, and use such real property wherever situated, as may be necessary for carrying out the functions of the Foundation;

(6) may accept money, funds, services, or property (real, personal, or mixed), tangible or intangible, made available by gift, bequest grant, or otherwise for the purpose of carrying out the provisions of this title from domestic or foreign private individuals, charities, nongovernmental organizations, corporations, or governments;

(7) may use the United States mails in the same manner and on the same conditions as the executive departments;

(8) may contract with individuals for personal services, who shall not be considered Federal employees for any provision of law administered by the Office of Personnel Management;

(9) may hire or obtain passenger motor vehicles; and

(10) shall have such other powers as may be necessary and incident to carrying out this subtitle.

(b) PRINCIPAL OFFICE.—The Foundation shall maintain its principal office in the metropolitan area of Washington, District of Columbia.

(c) APPLICABILITY OF GOVERNMENT CORPORATION CONTROL ACT.—

(1) IN GENERAL.—The Foundation shall be subject to chapter 91 of subtitle VI of title 31, United States Code, except that the Foundation shall not be authorized to issue obligations or offer obligations to the public.

(2) CONFORMING AMENDMENT.—Section 9101(3) of title 31, United States Code, is amended by adding at the end the following: “(R) the International Clean Energy Foundation.”

(d) INSPECTOR GENERAL.—

(1) IN GENERAL.—The Inspector General of the Department of State shall serve as Inspector General of the Foundation, and, in acting in such capacity, may conduct reviews, investigations, and inspections of all aspects of the operations and activities of the Foundation.

(2) **AUTHORITY OF THE BOARD.**—In carrying out the responsibilities under this subsection, the Inspector General shall report to and be under the general supervision of the Board.

(3) **REIMBURSEMENT AND AUTHORIZATION OF SERVICES.**—

(A) **REIMBURSEMENT.**—The Foundation shall reimburse the Department of State for all expenses incurred by the Inspector General in connection with the Inspector General's responsibilities under this subsection.

(B) **AUTHORIZATION FOR SERVICES.**—Of the amount authorized to be appropriated under section 927(a) for a fiscal year, up to \$500,000 is authorized to be made available to the Inspector General of the Department of State to conduct reviews, investigations, and inspections of operations and activities of the Foundation.

SEC. 926. GENERAL PERSONNEL AUTHORITIES.

(a) **DETAIL OF PERSONNEL.**—Upon request of the Chief Executive Officer, the head of an agency may detail any employee of such agency to the Foundation on a reimbursable basis. Any employee so detailed remains, for the purpose of preserving such employee's allowances, privileges, rights, seniority, and other benefits, an employee of the agency from which detailed.

(b) **REEMPLOYMENT RIGHTS.**—

(1) **IN GENERAL.**—An employee of an agency who is serving under a career or career conditional appointment (or the equivalent), and who, with the consent of the head of such agency, transfers to the Foundation, is entitled to be reemployed in such employee's former position or a position of like seniority, status, and pay in such agency, if such employee—

(A) is separated from the Foundation for any reason, other than misconduct, neglect of duty, or malfeasance; and

(B) applies for reemployment not later than 90 days after the date of separation from the Foundation.

(2) **SPECIFIC RIGHTS.**—An employee who satisfies paragraph (1) is entitled to be reemployed (in accordance with such paragraph) within 30 days after applying for reemployment and, on reemployment, is entitled to at least the rate of basic pay to which such employee would have been entitled had such employee never transferred.

(c) **HIRING AUTHORITY.**—Of persons employed by the Foundation, no more than 30 persons may be appointed, compensated, or removed without regard to the civil service laws and regulations.

(d) **BASIC PAY.**—The Chief Executive Officer may fix the rate of basic pay of employees of the Foundation without regard to the provisions of chapter 51 of title 5, United States Code (relating to the classification of positions), subchapter III of chapter 53 of such title (relating to General Schedule pay rates), except that no employee of the Foundation may receive a rate of basic pay that exceeds the rate for level IV of the Executive Schedule under section 5315 of such title.

(e) **DEFINITIONS.**—In this section—

(1) the term "agency" means an executive agency, as defined by section 105 of title 5, United States Code; and

(2) the term "detail" means the assignment or loan of an employee, without a change of position, from the agency by which such employee is employed to the Foundation.

SEC. 927. AUTHORIZATION OF APPROPRIATIONS.

(a) **AUTHORIZATION OF APPROPRIATIONS.**—To carry out this subtitle, there are authorized to be appropriated \$20,000,000 for each of the fiscal years 2009 through 2013.

(b) **ALLOCATION OF FUNDS.**—

(1) **IN GENERAL.**—The Foundation may allocate or transfer to any agency of the United

States Government any of the funds available for carrying out this subtitle. Such funds shall be available for obligation and expenditure for the purposes for which the funds were authorized, in accordance with authority granted in this subtitle or under authority governing the activities of the United States Government agency to which such funds are allocated or transferred.

(2) **NOTIFICATION.**—The Foundation shall notify the appropriate congressional committees not less than 15 days prior to an allocation or transfer of funds pursuant to paragraph (1).

Subtitle C—Miscellaneous Provisions

SEC. 931. ENERGY DIPLOMACY AND SECURITY WITHIN THE DEPARTMENT OF STATE.

(a) **STATE DEPARTMENT COORDINATOR FOR INTERNATIONAL ENERGY AFFAIRS.**—

(1) **IN GENERAL.**—The Secretary of State should ensure that energy security is integrated into the core mission of the Department of State.

(2) **COORDINATOR FOR INTERNATIONAL ENERGY AFFAIRS.**—There is established within the Office of the Secretary of State a Coordinator for International Energy Affairs, who shall be responsible for—

(A) representing the Secretary of State in interagency efforts to develop the international energy policy of the United States;

(B) ensuring that analyses of the national security implications of global energy and environmental developments are reflected in the decision making process within the Department of State;

(C) incorporating energy security priorities into the activities of the Department of State;

(D) coordinating energy activities of the Department of State with relevant Federal agencies; and

(E) coordinating energy security and other relevant functions within the Department of State currently undertaken by offices within—

(i) the Bureau of Economic, Energy and Business Affairs;

(ii) the Bureau of Oceans and International Environmental and Scientific Affairs; and

(iii) other offices within the Department of State.

(3) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as may be necessary to carry out this subsection.

(b) **ENERGY EXPERTS IN KEY EMBASSIES.**—Not later than 180 days after the date of the enactment of this Act, the Secretary of State shall submit a report to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives that includes—

(1) a description of the Department of State personnel who are dedicated to energy matters and are stationed at embassies and consulates in countries that are major energy producers or consumers;

(2) an analysis of the need for Federal energy specialist personnel in United States embassies and other United States diplomatic missions; and

(3) recommendations for increasing energy expertise within United States embassies among foreign service officers and options for assigning to such embassies energy attachés from the National Laboratories or other agencies within the Department of Energy.

(c) **ENERGY ADVISORS.**—The Secretary of Energy may make appropriate arrangements with the Secretary of State to assign personnel from the Department of Energy or the National Laboratories of the Department of Energy to serve as dedicated advisors on energy matters in embassies of the United

States or other United States diplomatic missions.

(d) **REPORT.**—Not later than 180 days after the date of the enactment of this Act, and every 2 years thereafter for the following 20 years, the Secretary of State shall submit a report to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives that describes—

(1) the energy-related activities being conducted by the Department of State, including activities within—

(A) the Bureau of Economic, Energy and Business Affairs;

(B) the Bureau of Oceans and Environmental and Scientific Affairs; and

(C) other offices within the Department of State;

(2) the amount of funds spent on each activity within each office described in paragraph (1); and

(3) the number and qualification of personnel in each embassy (or relevant foreign posting) of the United States whose work is dedicated exclusively to energy matters.

SEC. 932. NATIONAL SECURITY COUNCIL REORGANIZATION.

Section 101(a) of the National Security Act of 1947 (50 U.S.C. 402(a)) is amended—

(1) by redesignating paragraphs (5), (6), and (7) as paragraphs (6), (7), and (8), respectively; and

(2) by inserting after paragraph (4) the following:

“(5) the Secretary of Energy;”.

SEC. 933. ANNUAL NATIONAL ENERGY SECURITY STRATEGY REPORT.

(a) **REPORTS.**—

(1) **IN GENERAL.**—Subject to paragraph (2), on the date on which the President submits to Congress the budget for the following fiscal year under section 1105 of title 31, United States Code, the President shall submit to Congress a comprehensive report on the national energy security of the United States.

(2) **NEW PRESIDENTS.**—In addition to the reports required under paragraph (1), the President shall submit a comprehensive report on the national energy security of the United States by not later than 150 days after the date on which the President assumes the office of President after a presidential election.

(b) **CONTENTS.**—Each report under this section shall describe the national energy security strategy of the United States, including a comprehensive description of—

(1) the worldwide interests, goals, and objectives of the United States that are vital to the national energy security of the United States;

(2) the foreign policy, worldwide commitments, and national defense capabilities of the United States necessary—

(A) to deter political manipulation of world energy resources; and

(B) to implement the national energy security strategy of the United States;

(3) the proposed short-term and long-term uses of the political, economic, military, and other authorities of the United States—

(A) to protect or promote energy security; and

(B) to achieve the goals and objectives described in paragraph (1);

(4) the adequacy of the capabilities of the United States to protect the national energy security of the United States, including an evaluation of the balance among the capabilities of all elements of the national authority of the United States to support the implementation of the national energy security strategy; and

(5) such other information as the President determines to be necessary to inform Congress on matters relating to the national energy security of the United States.

(c) CLASSIFIED AND UNCLASSIFIED FORM.—Each national energy security strategy report shall be submitted to Congress in—

- (1) a classified form; and
- (2) an unclassified form.

SEC. 934. CONVENTION ON SUPPLEMENTARY COMPENSATION FOR NUCLEAR DAMAGE CONTINGENT COST ALLOCATION.

(a) FINDINGS AND PURPOSE.—

(1) FINDINGS.—Congress finds that—

(A) section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) (commonly known as the “Price-Anderson Act”)—

(i) provides a predictable legal framework necessary for nuclear projects; and

(ii) ensures prompt and equitable compensation in the event of a nuclear incident in the United States;

(B) the Price-Anderson Act, in effect, provides operators of nuclear powerplants with insurance for damage arising out of a nuclear incident and funds the insurance primarily through the assessment of a retrospective premium from each operator after the occurrence of a nuclear incident;

(C) the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997, will establish a global system—

(i) to provide a predictable legal framework necessary for nuclear energy projects; and

(ii) to ensure prompt and equitable compensation in the event of a nuclear incident;

(D) the Convention benefits United States nuclear suppliers that face potentially unlimited liability for nuclear incidents that are not covered by the Price-Anderson Act by replacing a potentially open-ended liability with a predictable liability regime that, in effect, provides nuclear suppliers with insurance for damage arising out of such an incident;

(E) the Convention also benefits United States nuclear facility operators that may be publicly liable for a Price-Anderson incident by providing an additional early source of funds to compensate damage arising out of the Price-Anderson incident;

(F) the combined operation of the Convention, the Price-Anderson Act, and this section will augment the quantity of assured funds available for victims in a wider variety of nuclear incidents while reducing the potential liability of United States suppliers without increasing potential costs to United States operators;

(G) the cost of those benefits is the obligation of the United States to contribute to the supplementary compensation fund established by the Convention;

(H) any such contribution should be funded in a manner that does not—

(i) upset settled expectations based on the liability regime established under the Price-Anderson Act; or

(ii) shift to Federal taxpayers liability risks for nuclear incidents at foreign installations;

(I) with respect to a Price-Anderson incident, funds already available under the Price-Anderson Act should be used; and

(J) with respect to a nuclear incident outside the United States not covered by the Price-Anderson Act, a retrospective premium should be prorated among nuclear suppliers relieved from potential liability for which insurance is not available.

(2) PURPOSE.—The purpose of this section is to allocate the contingent costs associated with participation by the United States in the international nuclear liability compensation system established by the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997—

(A) with respect to a Price-Anderson incident, by using funds made available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) to cover the contingent costs in a manner that neither increases the burdens nor decreases the benefits under section 170 of that Act; and

(B) with respect to a covered incident outside the United States that is not a Price-Anderson incident, by allocating the contingent costs equitably, on the basis of risk, among the class of nuclear suppliers relieved by the Convention from the risk of potential liability resulting from any covered incident outside the United States.

(b) DEFINITIONS.—In this section:

(1) COMMISSION.—The term “Commission” means the Nuclear Regulatory Commission.

(2) CONTINGENT COST.—The term “contingent cost” means the cost to the United States in the event of a covered incident the amount of which is equal to the amount of funds the United States is obligated to make available under paragraph 1(b) of Article III of the Convention.

(3) CONVENTION.—The term “Convention” means the Convention on Supplementary Compensation for Nuclear Damage, done at Vienna on September 12, 1997.

(4) COVERED INCIDENT.—The term “covered incident” means a nuclear incident the occurrence of which results in a request for funds pursuant to Article VII of the Convention.

(5) COVERED INSTALLATION.—The term “covered installation” means a nuclear installation at which the occurrence of a nuclear incident could result in a request for funds under Article VII of the Convention.

(6) COVERED PERSON.—

(A) IN GENERAL.—The term “covered person” means—

(i) a United States person; and

(ii) an individual or entity (including an agency or instrumentality of a foreign country) that—

(I) is located in the United States; or

(II) carries out an activity in the United States.

(B) EXCLUSIONS.—The term “covered person” does not include—

(i) the United States; or

(ii) any agency or instrumentality of the United States.

(7) NUCLEAR SUPPLIER.—The term “nuclear supplier” means a covered person (or a successor in interest of a covered person) that—

(A) supplies facilities, equipment, fuel, services, or technology pertaining to the design, construction, operation, or decommissioning of a covered installation; or

(B) transports nuclear materials that could result in a covered incident.

(8) PRICE-ANDERSON INCIDENT.—The term “Price-Anderson incident” means a covered incident for which section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) would make funds available to compensate for public liability (as defined in section 11 of that Act (42 U.S.C. 2014)).

(9) SECRETARY.—The term “Secretary” means the Secretary of Energy.

(10) UNITED STATES.—

(A) IN GENERAL.—The term “United States” has the meaning given the term in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014).

(B) INCLUSIONS.—The term “United States” includes—

(i) the Commonwealth of Puerto Rico;

(ii) any other territory or possession of the United States;

(iii) the Canal Zone; and

(iv) the waters of the United States territorial sea under Presidential Proclamation Number 5928, dated December 27, 1988 (43 U.S.C. 1331 note).

(11) UNITED STATES PERSON.—The term “United States person” means—

(A) any individual who is a resident, national, or citizen of the United States (other than an individual residing outside of the United States and employed by a person who is not a United States person); and

(B) any corporation, partnership, association, joint stock company, business trust, unincorporated organization, or sole proprietorship that is organized under the laws of the United States.

(c) USE OF PRICE-ANDERSON FUNDS.—

(1) IN GENERAL.—Funds made available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) shall be used to cover the contingent cost resulting from any Price-Anderson incident.

(2) EFFECT.—The use of funds pursuant to paragraph (1) shall not reduce the limitation on public liability established under section 170 e. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)).

(d) EFFECT ON AMOUNT OF PUBLIC LIABILITY.—

(1) IN GENERAL.—Funds made available to the United States under Article VII of the Convention with respect to a Price-Anderson incident shall be used to satisfy public liability resulting from the Price-Anderson incident.

(2) AMOUNT.—The amount of public liability allowable under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) relating to a Price-Anderson incident under paragraph (1) shall be increased by an amount equal to the difference between—

(A) the amount of funds made available for the Price-Anderson incident under Article VII of the Convention; and

(B) the amount of funds used under subsection (c) to cover the contingent cost resulting from the Price-Anderson incident.

(e) RETROSPECTIVE RISK POOLING PROGRAM.—

(1) IN GENERAL.—Except as provided under paragraph (2), each nuclear supplier shall participate in a retrospective risk pooling program in accordance with this section to cover the contingent cost resulting from a covered incident outside the United States that is not a Price-Anderson incident.

(2) DEFERRED PAYMENT.—

(A) IN GENERAL.—The obligation of a nuclear supplier to participate in the retrospective risk pooling program shall be deferred until the United States is called on to provide funds pursuant to Article VII of the Convention with respect to a covered incident that is not a Price-Anderson incident.

(B) AMOUNT OF DEFERRED PAYMENT.—The amount of a deferred payment of a nuclear supplier under subparagraph (A) shall be based on the risk-informed assessment formula determined under subparagraph (C).

(C) RISK-INFORMED ASSESSMENT FORMULA.—

(i) IN GENERAL.—Not later than 3 years after the date of the enactment of this Act, and every 5 years thereafter, the Secretary shall, by regulation, determine the risk-informed assessment formula for the allocation among nuclear suppliers of the contingent cost resulting from a covered incident that is not a Price-Anderson incident, taking into account risk factors such as—

(I) the nature and intended purpose of the goods and services supplied by each nuclear supplier to each covered installation outside the United States;

(II) the quantity of the goods and services supplied by each nuclear supplier to each covered installation outside the United States;

(III) the hazards associated with the supplied goods and services if the goods and services fail to achieve the intended purposes;

(IV) the hazards associated with the covered installation outside the United States to which the goods and services are supplied;

(V) the legal, regulatory, and financial infrastructure associated with the covered installation outside the United States to which the goods and services are supplied; and

(VI) the hazards associated with particular forms of transportation.

(ii) **FACTORS FOR CONSIDERATION.**—In determining the formula, the Secretary may—

(I) exclude—

(aa) goods and services with negligible risk;

(bb) classes of goods and services not intended specifically for use in a nuclear installation;

(cc) a nuclear supplier with a de minimis share of the contingent cost; and

(dd) a nuclear supplier no longer in existence for which there is no identifiable successor; and

(II) establish the period on which the risk assessment is based.

(iii) **APPLICATION.**—In applying the formula, the Secretary shall not consider any covered installation or transportation for which funds would be available under section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210).

(iv) **REPORT.**—Not later than 5 years after the date of the enactment of this Act, and every 5 years thereafter, the Secretary shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on whether there is a need for continuation or amendment of this section, taking into account the effects of the implementation of the Convention on the United States nuclear industry and suppliers.

(f) **REPORTING.**—

(1) **COLLECTION OF INFORMATION.**—

(A) **IN GENERAL.**—The Secretary may collect information necessary for developing and implementing the formula for calculating the deferred payment of a nuclear supplier under subsection (e)(2).

(B) **PROVISION OF INFORMATION.**—Each nuclear supplier and other appropriate persons shall make available to the Secretary such information, reports, records, documents, and other data as the Secretary determines, by regulation, to be necessary or appropriate to develop and implement the formula under subsection (e)(2)(C).

(2) **PRIVATE INSURANCE.**—The Secretary shall make available to nuclear suppliers, and insurers of nuclear suppliers, information to support the voluntary establishment and maintenance of private insurance against any risk for which nuclear suppliers may be required to pay deferred payments under this section.

(g) **EFFECT ON LIABILITY.**—Nothing in any other law (including regulations) limits liability for a covered incident to an amount equal to less than the amount prescribed in paragraph 1(a) of Article IV of the Convention, unless the law—

(1) specifically refers to this section; and

(2) explicitly repeals, alters, amends, modifies, impairs, displaces, or supersedes the effect of this subsection.

(h) **PAYMENTS TO AND BY THE UNITED STATES.**—

(1) **ACTION BY NUCLEAR SUPPLIERS.**—

(A) **NOTIFICATION.**—In the case of a request for funds under Article VII of the Convention resulting from a covered incident that is not a Price-Anderson incident, the Secretary shall notify each nuclear supplier of the amount of the deferred payment required to be made by the nuclear supplier.

(B) **PAYMENTS.**—

(i) **IN GENERAL.**—Except as provided under clause (ii), not later than 60 days after re-

ceipt of a notification under subparagraph (A), a nuclear supplier shall pay to the general fund of the Treasury the deferred payment of the nuclear supplier required under subparagraph (A).

(ii) **ANNUAL PAYMENTS.**—A nuclear supplier may elect to prorate payment of the deferred payment required under subparagraph (A) in 5 equal annual payments (including interest on the unpaid balance at the prime rate prevailing at the time the first payment is due).

(C) **VOUCHERS.**—A nuclear supplier shall submit payment certification vouchers to the Secretary of the Treasury in accordance with section 3325 of title 31, United States Code.

(2) **USE OF FUNDS.**—

(A) **IN GENERAL.**—Amounts paid into the Treasury under paragraph (1) shall be available to the Secretary of the Treasury, without further appropriation and without fiscal year limitation, for the purpose of making the contributions of public funds required to be made by the United States under the Convention.

(B) **ACTION BY SECRETARY OF TREASURY.**—The Secretary of the Treasury shall pay the contribution required under the Convention to the court of competent jurisdiction under Article XIII of the Convention with respect to the applicable covered incident.

(3) **FAILURE TO PAY.**—If a nuclear supplier fails to make a payment required under this subsection, the Secretary may take appropriate action to recover from the nuclear supplier—

(A) the amount of the payment due from the nuclear supplier;

(B) any applicable interest on the payment; and

(C) a penalty of not more than twice the amount of the deferred payment due from the nuclear supplier.

(i) **LIMITATION ON JUDICIAL REVIEW; CAUSE OF ACTION.**—

(1) **LIMITATION ON JUDICIAL REVIEW.**—

(A) **IN GENERAL.**—In any civil action arising under the Convention over which Article XIII of the Convention grants jurisdiction to the courts of the United States, any appeal or review by writ of mandamus or otherwise with respect to a nuclear incident that is not a Price-Anderson incident shall be in accordance with chapter 83 of title 28, United States Code, except that the appeal or review shall occur in the United States Court of Appeals for the District of Columbia Circuit.

(B) **SUPREME COURT JURISDICTION.**—Nothing in this paragraph affects the jurisdiction of the Supreme Court of the United States under chapter 81 of title 28, United States Code.

(2) **CAUSE OF ACTION.**—

(A) **IN GENERAL.**—Subject to subparagraph (B), in any civil action arising under the Convention over which Article XIII of the Convention grants jurisdiction to the courts of the United States, in addition to any other cause of action that may exist, an individual or entity shall have a cause of action against the operator to recover for nuclear damage suffered by the individual or entity.

(B) **REQUIREMENT.**—Subparagraph (A) shall apply only if the individual or entity seeks a remedy for nuclear damage (as defined in Article I of the Convention) that was caused by a nuclear incident (as defined in Article I of the Convention) that is not a Price-Anderson incident.

(C) **SAVINGS PROVISION.**—Nothing in this paragraph may be construed to limit, modify, extinguish, or otherwise affect any cause of action that would have existed in the absence of enactment of this paragraph.

(j) **RIGHT OF RECOURSE.**—This section does not provide to an operator of a covered installation any right of recourse under the Convention.

(k) **PROTECTION OF SENSITIVE UNITED STATES INFORMATION.**—Nothing in the Convention or this section requires the disclosure of—

(1) any data that, at any time, was Restricted Data (as defined in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014));

(2) information relating to intelligence sources or methods protected by section 102A(i) of the National Security Act of 1947 (50 U.S.C. 403–1(i)); or

(3) national security information classified under Executive Order 12958 (50 U.S.C. 435 note; relating to classified national security information) (or a successor Executive Order or regulation).

(1) **REGULATIONS.**—

(1) **IN GENERAL.**—The Secretary or the Commission, as appropriate, may prescribe regulations to carry out section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) and this section.

(2) **REQUIREMENT.**—Rules prescribed under this subsection shall ensure, to the maximum extent practicable, that—

(A) the implementation of section 170 of the Atomic Energy Act of 1954 (42 U.S.C. 2210) and this section is consistent and equitable; and

(B) the financial and operational burden on a Commission licensee in complying with section 170 of that Act is not greater as a result of the enactment of this section.

(3) **APPLICABILITY OF PROVISION.**—Section 553 of title 5, United States Code, shall apply with respect to the promulgation of regulations under this subsection.

(4) **EFFECT OF SUBSECTION.**—The authority provided under this subsection is in addition to, and does not impair or otherwise affect, any other authority of the Secretary or the Commission to prescribe regulations.

(m) **EFFECTIVE DATE.**—This section shall take effect on the date of the enactment of this Act.

SEC. 935. TRANSPARENCY IN EXTRACTIVE INDUSTRIES RESOURCE PAYMENTS.

(a) **PURPOSE.**—The purpose of this section is to—

(1) ensure greater United States energy security by combating corruption in the governments of foreign countries that receive revenues from the sale of their natural resources; and

(2) enhance the development of democracy and increase political and economic stability in such resource rich foreign countries.

(b) **STATEMENT OF POLICY.**—It is the policy of the United States—

(1) to increase energy security by promoting anti-corruption initiatives in oil and natural gas rich countries; and

(2) to promote global energy security through promotion of programs such as the Extractive Industries Transparency Initiative (EITI) that seek to instill transparency and accountability into extractive industries resource payments.

(c) **SENSE OF CONGRESS.**—It is the sense of Congress that the United States should further global energy security and promote democratic development in resource-rich foreign countries by—

(1) encouraging further participation in the EITI by eligible countries and companies; and

(2) promoting the efficacy of the EITI program by ensuring a robust and candid review mechanism.

(d) **REPORT.**—

(1) **REPORT REQUIRED.**—Not later than 180 days after the date of the enactment of this Act, and annually thereafter, the Secretary of State, in consultation with the Secretary of Energy, shall submit to the appropriate congressional committees a report on progress made in promoting transparency in extractive industries resource payments.

(2) MATTERS TO BE INCLUDED.—The report required by paragraph (1) shall include a detailed description of United States participation in the EITI, bilateral and multilateral diplomatic efforts to further participation in the EITI, and other United States initiatives to strengthen energy security, deter energy kleptocracy, and promote transparency in the extractive industries.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated \$3,000,000 for the purposes of United States contributions to the Multi-Donor Trust Fund of the EITI.

TITLE X—GREEN JOBS

SEC. 1001. SHORT TITLE.

This title may be cited as the “Green Jobs Act of 2007”.

SEC. 1002. ENERGY EFFICIENCY AND RENEWABLE ENERGY WORKER TRAINING PROGRAM.

Section 171 of the Workforce Investment Act of 1998 (29 U.S.C. 2916) is amended by adding at the end the following:

“(e) ENERGY EFFICIENCY AND RENEWABLE ENERGY WORKER TRAINING PROGRAM.—

“(1) GRANT PROGRAM.—

“(A) IN GENERAL.—Not later than 6 months after the date of enactment of the Green Jobs Act of 2007, the Secretary, in consultation with the Secretary of Energy, shall establish an energy efficiency and renewable energy worker training program under which the Secretary shall carry out the activities described in paragraph (2) to achieve the purposes of this subsection.

“(B) ELIGIBILITY.—For purposes of providing assistance and services under the program established under this subsection—

“(i) target populations of eligible individuals to be given priority for training and other services shall include—

“(I) workers impacted by national energy and environmental policy;

“(II) individuals in need of updated training related to the energy efficiency and renewable energy industries;

“(III) veterans, or past and present members of reserve components of the Armed Forces;

“(IV) unemployed individuals;

“(V) individuals, including at-risk youth, seeking employment pathways out of poverty and into economic self-sufficiency; and

“(VI) formerly incarcerated, adjudicated, nonviolent offenders; and

“(ii) energy efficiency and renewable energy industries eligible to participate in a program under this subsection include—

“(I) the energy-efficient building, construction, and retrofits industries;

“(II) the renewable electric power industry;

“(III) the energy efficient and advanced drive train vehicle industry;

“(IV) the biofuels industry;

“(V) the deconstruction and materials use industries;

“(VI) the energy efficiency assessment industry serving the residential, commercial, or industrial sectors; and

“(VII) manufacturers that produce sustainable products using environmentally sustainable processes and materials.

“(2) ACTIVITIES.—

“(A) NATIONAL RESEARCH PROGRAM.—Under the program established under paragraph (1), the Secretary, acting through the Bureau of Labor Statistics, where appropriate, shall collect and analyze labor market data to track workforce trends resulting from energy-related initiatives carried out under this subsection. Activities carried out under this paragraph shall include—

“(i) tracking and documentation of academic and occupational competencies as well as future skill needs with respect to renew-

able energy and energy efficiency technology;

“(ii) tracking and documentation of occupational information and workforce training data with respect to renewable energy and energy efficiency technology;

“(iii) collaborating with State agencies, workforce investments boards, industry, organized labor, and community and nonprofit organizations to disseminate information on successful innovations for labor market services and worker training with respect to renewable energy and energy efficiency technology;

“(iv) serving as a clearinghouse for best practices in workforce development, job placement, and collaborative training partnerships;

“(v) encouraging the establishment of workforce training initiatives with respect to renewable energy and energy efficiency technologies;

“(vi) linking research and development in renewable energy and energy efficiency technology with the development of standards and curricula for current and future jobs;

“(vii) assessing new employment and work practices including career ladder and upgrade training as well as high performance work systems; and

“(viii) providing technical assistance and capacity building to national and State energy partnerships, including industry and labor representatives.

“(B) NATIONAL ENERGY TRAINING PARTNERSHIP GRANTS.—

“(i) IN GENERAL.—Under the program established under paragraph (1), the Secretary shall award National Energy Training Partnerships Grants on a competitive basis to eligible entities to enable such entities to carry out training that leads to economic self-sufficiency and to develop an energy efficiency and renewable energy industries workforce. Grants shall be awarded under this subparagraph so as to ensure geographic diversity with at least 2 grants awarded to entities located in each of the 4 Petroleum Administration for Defense Districts with no subdistricts, and at least 1 grant awarded to an entity located in each of the subdistricts of the Petroleum Administration for Defense District with subdistricts.

“(ii) ELIGIBILITY.—To be eligible to receive a grant under clause (i), an entity shall be a nonprofit partnership that—

“(I) includes the equal participation of industry, including public or private employers, and labor organizations, including joint labor-management training programs, and may include workforce investment boards, community-based organizations, qualified service and conservation corps, educational institutions, small businesses, cooperatives, State and local veterans agencies, and veterans service organizations; and

“(II) demonstrates—

“(aa) experience in implementing and operating worker skills training and education programs;

“(bb) the ability to identify and involve in training programs carried out under this grant, target populations of individuals who would benefit from training and be actively involved in activities related to energy efficiency and renewable energy industries; and

“(cc) the ability to help individuals achieve economic self-sufficiency.

“(iii) PRIORITY.—Priority shall be given to partnerships which leverage additional public and private resources to fund training programs, including cash or in-kind matches from participating employers.

“(C) STATE LABOR MARKET RESEARCH, INFORMATION, AND LABOR EXCHANGE RESEARCH PROGRAM.—

“(i) IN GENERAL.—Under the program established under paragraph (1), the Secretary

shall award competitive grants to States to enable such States to administer labor market and labor exchange information programs that include the implementation of the activities described in clause (ii), in coordination with the one-stop delivery system.

“(ii) ACTIVITIES.—A State shall use amounts awarded under a grant under this subparagraph to provide funding to the State agency that administers the Wagner-Peyser Act and State unemployment compensation programs to carry out the following activities using State agency merit staff:

“(I) The identification of job openings in the renewable energy and energy efficiency sector.

“(II) The administration of skill and aptitude testing and assessment for workers.

“(III) The counseling, case management, and referral of qualified job seekers to openings and training programs, including energy efficiency and renewable energy training programs.

“(D) STATE ENERGY TRAINING PARTNERSHIP PROGRAM.—

“(i) IN GENERAL.—Under the program established under paragraph (1), the Secretary shall award competitive grants to States to enable such States to administer renewable energy and energy efficiency workforce development programs that include the implementation of the activities described in clause (ii).

“(ii) PARTNERSHIPS.—A State shall use amounts awarded under a grant under this subparagraph to award competitive grants to eligible State Energy Sector Partnerships to enable such Partnerships to coordinate with existing apprenticeship and labor management training programs and implement training programs that lead to the economic self-sufficiency of trainees.

“(iii) ELIGIBILITY.—To be eligible to receive a grant under this subparagraph, a State Energy Sector Partnership shall—

“(I) consist of nonprofit organizations that include equal participation from industry, including public or private nonprofit employers, and labor organizations, including joint labor-management training programs, and may include representatives from local governments, the workforce investment system, including one-stop career centers, community based organizations, qualified service and conservation corps, community colleges, and other post-secondary institutions, small businesses, cooperatives, State and local veterans agencies, and veterans service organizations;

“(II) demonstrate experience in implementing and operating worker skills training and education programs; and

“(III) demonstrate the ability to identify and involve in training programs, target populations of workers who would benefit from training and be actively involved in activities related to energy efficiency and renewable energy industries.

“(iv) PRIORITY.—In awarding grants under this subparagraph, the Secretary shall give priority to States that demonstrate that activities under the grant—

“(I) meet national energy policies associated with energy efficiency, renewable energy, and the reduction of emissions of greenhouse gases;

“(II) meet State energy policies associated with energy efficiency, renewable energy, and the reduction of emissions of greenhouse gases; and

“(III) leverage additional public and private resources to fund training programs, including cash or in-kind matches from participating employers.

“(v) COORDINATION.—A grantee under this subparagraph shall coordinate activities carried out under the grant with existing other

appropriate training programs, including apprenticeship and labor management training programs, including such activities referenced in paragraph (3)(A), and implement training programs that lead to the economic self-sufficiency of trainees.

“(E) PATHWAYS OUT OF POVERTY DEMONSTRATION PROGRAM.—

“(i) IN GENERAL.—Under the program established under paragraph (1), the Secretary shall award competitive grants of sufficient size to eligible entities to enable such entities to carry out training that leads to economic self-sufficiency. The Secretary shall give priority to entities that serve individuals in families with income of less than 200 percent of the sufficiency standard for the local areas where the training is conducted that specifies, as defined by the State, or where such standard is not established, the income needs of families, by family size, the number and ages of children in the family, and sub-State geographical considerations. Grants shall be awards to ensure geographic diversity.

“(ii) ELIGIBLE ENTITIES.—To be eligible to receive a grant an entity shall be a partnership that—

“(I) includes community-based nonprofit organizations, educational institutions with expertise in serving low-income adults or youth, public or private employers from the industry sectors described in paragraph (1)(B)(ii), and labor organizations representing workers in such industry sectors;

“(II) demonstrates a record of successful experience in implementing and operating worker skills training and education programs;

“(III) coordinates activities, where appropriate, with the workforce investment system; and

“(IV) demonstrates the ability to recruit individuals for training and to support such individuals to successful completion in training programs carried out under this grant, targeting populations of workers who are or will be engaged in activities related to energy efficiency and renewable energy industries.

“(iii) PRIORITIES.—In awarding grants under this paragraph, the Secretary shall give priority to applicants that—

“(I) target programs to benefit low-income workers, unemployed youth and adults, high school dropouts, or other underserved sectors of the workforce within areas of high poverty;

“(II) ensure that supportive services are integrated with education and training, and delivered by organizations with direct access to and experience with targeted populations;

“(III) leverage additional public and private resources to fund training programs, including cash or in-kind matches from participating employers;

“(IV) involve employers and labor organizations in the determination of relevant skills and competencies and ensure that the certificates or credentials that result from the training are employer-recognized;

“(V) deliver courses at alternative times (such as evening and weekend programs) and locations most convenient and accessible to participants and link adult remedial education with occupational skills training; and

“(VI) demonstrate substantial experience in administering local, municipal, State, Federal, foundation, or private entity grants.

“(iv) DATA COLLECTION.—Grantees shall collect and report the following information:

“(I) The number of participants.

“(II) The demographic characteristics of participants, including race, gender, age, parenting status, participation in other Federal programs, education and literacy level at entry, significant barriers to employment

(such as limited English proficiency, criminal record, addiction or mental health problem requiring treatment, or mental disability).

“(III) The services received by participants, including training, education, and supportive services.

“(IV) The amount of program spending per participant.

“(V) Program completion rates.

“(VI) Factors determined as significantly interfering with program participation or completion.

“(VII) The rate of Job placement and the rate of employment retention after 1 year.

“(VIII) The average wage at placement, including any benefits, and the rate of average wage increase after 1 year.

“(IX) Any post-employment supportive services provided.

The Secretary shall assist grantees in the collection of data under this clause by making available, where practicable, low-cost means of tracking the labor market outcomes of participants, and by providing standardized reporting forms, where appropriate.

“(3) ACTIVITIES.—

“(A) IN GENERAL.—Activities to be carried out under a program authorized by subparagraph (B), (D), or (E) of paragraph (2) shall be coordinated with existing systems or providers, as appropriate. Such activities may include—

“(i) occupational skills training, including curriculum development, on-the-job training, and classroom training;

“(ii) safety and health training;

“(iii) the provision of basic skills, literacy, GED, English as a second language, and job readiness training;

“(iv) individual referral and tuition assistance for a community college training program, or any training program leading to an industry-recognized certificate;

“(v) internship programs in fields related to energy efficiency and renewable energy;

“(vi) customized training in conjunction with an existing registered apprenticeship program or labor-management partnership;

“(vii) incumbent worker and career ladder training and skill upgrading and retraining;

“(viii) the implementation of transitional jobs strategies; and

“(ix) the provision of supportive services.

“(B) OUTREACH ACTIVITIES.—In addition to the activities authorized under subparagraph (A), activities authorized for programs under subparagraph (E) of paragraph (2) may include the provision of outreach, recruitment, career guidance, and case management services.

“(4) WORKER PROTECTIONS AND NON-DISCRIMINATION REQUIREMENTS.—

“(A) APPLICATION OF WIA.—The provisions of sections 181 and 188 of the Workforce Investment Act of 1998 (29 U.S.C. 2931 and 2938) shall apply to all programs carried out with assistance under this subsection.

“(B) CONSULTATION WITH LABOR ORGANIZATIONS.—If a labor organization represents a substantial number of workers who are engaged in similar work or training in an area that is the same as the area that is proposed to be funded under this Act, the labor organization shall be provided an opportunity to be consulted and to submit comments in regard to such a proposal.

“(5) PERFORMANCE MEASURES.—

“(A) IN GENERAL.—The Secretary shall negotiate and reach agreement with the eligible entities that receive grants and assistance under this section on performance measures for the indicators of performance referred to in subparagraphs (A) and (B) of section 136(b)(2) that will be used to evaluate the performance of the eligible entity in car-

rying out the activities described in subsection (e)(2). Each performance measure shall consist of such an indicator of performance, and a performance level referred to in subparagraph (B).

“(B) PERFORMANCE LEVELS.—The Secretary shall negotiate and reach agreement with the eligible entity regarding the levels of performance expected to be achieved by the eligible entity on the indicators of performance.

“(6) REPORT.—

“(A) STATUS REPORT.—Not later than 18 months after the date of enactment of the Green Jobs Act of 2007, the Secretary shall transmit a report to the Senate Committee on Energy and Natural Resources, the Senate Committee on Health, Education, Labor, and Pensions, the House Committee on Education and Labor, and the House Committee on Energy and Commerce on the training program established by this subsection. The report shall include a description of the entities receiving funding and the activities carried out by such entities.

“(B) EVALUATION.—Not later than 3 years after the date of enactment of such Act, the Secretary shall transmit to the Senate Committee on Energy and Natural Resources, the Senate Committee on Health, Education, Labor, and Pensions, the House Committee on Education and Labor, and the House Committee on Energy and Commerce an assessment of such program and an evaluation of the activities carried out by entities receiving funding from such program.

“(7) DEFINITION.—As used in this subsection, the term ‘renewable energy’ has the meaning given such term in section 203(b)(2) of the Energy Policy Act of 2005 (Public Law 109-58).

“(8) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection, \$125,000,000 for each fiscal year, of which—

“(A) not to exceed 20 percent of the amount appropriated in each such fiscal year shall be made available for, and shall be equally divided between, national labor market research and information under paragraph (2)(A) and State labor market information and labor exchange research under paragraph (2)(C), and not more than 2 percent of such amount shall be for the evaluation and report required under paragraph (4);

“(B) 20 percent shall be dedicated to Pathways Out of Poverty Demonstration Programs under paragraph (2)(E); and

“(C) the remainder shall be divided equally between National Energy Partnership Training Grants under paragraph (2)(B) and State energy training partnership grants under paragraph (2)(D).”

TITLE XI—ENERGY TRANSPORTATION AND INFRASTRUCTURE

Subtitle A—Department of Transportation

SEC. 1101. OFFICE OF CLIMATE CHANGE AND ENVIRONMENT.

(a) IN GENERAL.—Section 102 of title 49, United States Code, is amended—

(1) by redesignating subsection (g) as subsection (h); and

(2) by inserting after subsection (f) the following:

“(g) OFFICE OF CLIMATE CHANGE AND ENVIRONMENT.—

“(1) ESTABLISHMENT.—There is established in the Department an Office of Climate Change and Environment to plan, coordinate, and implement—

“(A) department-wide research, strategies, and actions under the Department’s statutory authority to reduce transportation-related energy use and mitigate the effects of climate change; and

“(B) department-wide research strategies and actions to address the impacts of climate change on transportation systems and infrastructure.

“(2) CLEARINGHOUSE.—The Office shall establish a clearinghouse of solutions, including cost-effective congestion reduction approaches, to reduce air pollution and transportation-related energy use and mitigate the effects of climate change.”.

(b) COORDINATION.—The Office of Climate Change and Environment of the Department of Transportation shall coordinate its activities with the United States Global Change Research Program.

(c) TRANSPORTATION SYSTEM’S IMPACT ON CLIMATE CHANGE AND FUEL EFFICIENCY.—

(1) STUDY.—The Office of Climate Change and Environment, in coordination with the Environmental Protection Agency and in consultation with the United States Global Change Research Program, shall conduct a study to examine the impact of the Nation’s transportation system on climate change and the fuel efficiency savings and clean air impacts of major transportation projects, to identify solutions to reduce air pollution and transportation-related energy use and mitigate the effects of climate change, and to examine the potential fuel savings that could result from changes in the current transportation system and through the use of intelligent transportation systems that help businesses and consumers to plan their travel and avoid delays, including Web-based real-time transit information systems, congestion information systems, carpool information systems, parking information systems, freight route management systems, and traffic management systems.

(2) REPORT.—Not later than one year after the date of enactment of this Act, the Secretary of Transportation, in coordination with the Administrator of the Environmental Protection Agency, shall transmit to the Committee on Transportation and Infrastructure and the Committee on Energy and Commerce of the House of Representatives and the Committee on Commerce, Science, and Transportation and the Committee on Environment and Public Works of the Senate a report that contains the results of the study required under this section.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation for the Office of Climate Change and Environment to carry out its duties under section 102(g) of title 49, United States Code (as amended by this Act), such sums as may be necessary for fiscal years 2008 through 2011.

Subtitle B—Railroads

SEC. 1111. ADVANCED TECHNOLOGY LOCOMOTIVE GRANT PILOT PROGRAM.

(a) IN GENERAL.—The Secretary of Transportation, in consultation with the Administrator of the Environmental Protection Agency, shall establish and carry out a pilot program for making grants to railroad carriers (as defined in section 20102 of title 49, United States Code) and State and local governments—

(1) for assistance in purchasing hybrid or other energy-efficient locomotives, including hybrid switch and generator-set locomotives; and

(2) to demonstrate the extent to which such locomotives increase fuel economy, reduce emissions, and lower costs of operation.

(b) LIMITATION.—Notwithstanding subsection (a), no grant under this section may be used to fund the costs of emissions reductions that are mandated under Federal law.

(c) GRANT CRITERIA.—In selecting applicants for grants under this section, the Secretary of Transportation shall consider—

(1) the level of energy efficiency that would be achieved by the proposed project;

(2) the extent to which the proposed project would assist in commercial deployment of hybrid or other energy-efficient locomotive technologies;

(3) the extent to which the proposed project complements other private or governmental partnership efforts to improve air quality or fuel efficiency in a particular area; and

(4) the extent to which the applicant demonstrates innovative strategies and a financial commitment to increasing energy efficiency and reducing greenhouse gas emissions of its railroad operations.

(d) COMPETITIVE GRANT SELECTION PROCESS.—

(1) APPLICATIONS.—A railroad carrier or State or local government seeking a grant under this section shall submit for approval by the Secretary of Transportation an application for the grant containing such information as the Secretary of Transportation may require.

(2) COMPETITIVE SELECTION.—The Secretary of Transportation shall conduct a national solicitation for applications for grants under this section and shall select grantees on a competitive basis.

(e) FEDERAL SHARE.—The Federal share of the cost of a project under this section shall not exceed 80 percent of the project cost.

(f) REPORT.—Not later than 3 years after the date of enactment of this Act, the Secretary of Transportation shall submit to Congress a report on the results of the pilot program carried out under this section.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary of Transportation \$10,000,000 for each of the fiscal years 2008 through 2011 to carry out this section. Such funds shall remain available until expended.

SEC. 1112. CAPITAL GRANTS FOR CLASS II AND CLASS III RAILROADS.

(a) AMENDMENT.—Chapter 223 of title 49, United States Code, is amended to read as follows:

“CHAPTER 223—CAPITAL GRANTS FOR CLASS II AND CLASS III RAILROADS

“Sec.
“22301. Capital grants for class II and class III railroads.

“§ 22301. Capital grants for class II and class III railroads

“(a) ESTABLISHMENT OF PROGRAM.—

“(1) ESTABLISHMENT.—The Secretary of Transportation shall establish a program for making capital grants to class II and class III railroads. Such grants shall be for projects in the public interest that—

“(A)(i) rehabilitate, preserve, or improve railroad track (including roadbed, bridges, and related track structures) used primarily for freight transportation;

“(ii) facilitate the continued or greater use of railroad transportation for freight shipments; and

“(iii) reduce the use of less fuel efficient modes of transportation in the transportation of such shipments; and

“(B) demonstrate innovative technologies and advanced research and development that increase fuel economy, reduce greenhouse gas emissions, and lower the costs of operation.

“(2) PROVISION OF GRANTS.—Grants may be provided under this chapter—

“(A) directly to the class II or class III railroad; or

“(B) with the concurrence of the class II or class III railroad, to a State or local government.

“(3) STATE COOPERATION.—Class II and class III railroad applicants for a grant under this chapter are encouraged to utilize the expertise and assistance of State transportation agencies in applying for and administering

such grants. State transportation agencies are encouraged to provide such expertise and assistance to such railroads.

“(4) REGULATIONS.—Not later than October 1, 2008, the Secretary shall issue final regulations to implement the program under this section.

“(b) MAXIMUM FEDERAL SHARE.—The maximum Federal share for carrying out a project under this section shall be 80 percent of the project cost. The non-Federal share may be provided by any non-Federal source in cash, equipment, or supplies. Other in-kind contributions may be approved by the Secretary on a case-by-case basis consistent with this chapter.

“(c) USE OF FUNDS.—Grants provided under this section shall be used to implement track capital projects as soon as possible. In no event shall grant funds be contractually obligated for a project later than the end of the third Federal fiscal year following the year in which the grant was awarded. Any funds not so obligated by the end of such fiscal year shall be returned to the Secretary for reallocation.

“(d) EMPLOYEE PROTECTION.—The Secretary shall require as a condition of any grant made under this section that the recipient railroad provide a fair arrangement at least as protective of the interests of employees who are affected by the project to be funded with the grant as the terms imposed under section 11326(a), as in effect on the date of the enactment of this chapter.

“(e) LABOR STANDARDS.—

“(1) PREVAILING WAGES.—The Secretary shall ensure that laborers and mechanics employed by contractors and subcontractors in construction work financed by a grant made under this section will be paid wages not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor under subchapter IV of chapter 31 of title 40 (commonly known as the ‘Davis-Bacon Act’). The Secretary shall make a grant under this section only after being assured that required labor standards will be maintained on the construction work.

“(2) WAGE RATES.—Wage rates in a collective bargaining agreement negotiated under the Railway Labor Act (45 U.S.C. 151 et seq.) are deemed for purposes of this subsection to comply with the subchapter IV of chapter 31 of title 40.

“(f) STUDY.—The Secretary shall conduct a study of the projects carried out with grant assistance under this section to determine the extent to which the program helps promote a reduction in fuel use associated with the transportation of freight and demonstrates innovative technologies that increase fuel economy, reduce greenhouse gas emissions, and lower the costs of operation. Not later than March 31, 2009, the Secretary shall submit a report to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the study, including any recommendations the Secretary considers appropriate regarding the program.

“(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary \$50,000,000 for each of fiscal years 2008 through 2011 for carrying out this section.”.

(b) CLERICAL AMENDMENT.—The item relating to chapter 223 in the table of chapters of subtitle V of title 49, United States Code, is amended to read as follows:

“223. CAPITAL GRANTS FOR CLASS II AND CLASS III RAILROADS 22301”.

Subtitle C—Marine Transportation**SEC. 1121. SHORT SEA TRANSPORTATION INITIATIVE.**

(a) IN GENERAL.—Title 46, United States Code, is amended by adding after chapter 555 the following:

“CHAPTER 556—SHORT SEA TRANSPORTATION

“Sec. 55601. Short sea transportation program.

“Sec. 55602. Cargo and shippers.

“Sec. 55603. Interagency coordination.

“Sec. 55604. Research on short sea transportation.

“Sec. 55605. Short sea transportation defined.

“§ 55601. Short sea transportation program

“(a) ESTABLISHMENT.—The Secretary of Transportation shall establish a short sea transportation program and designate short sea transportation projects to be conducted under the program to mitigate landside congestion.

“(b) PROGRAM ELEMENTS.—The program shall encourage the use of short sea transportation through the development and expansion of—

“(1) documented vessels;

“(2) shipper utilization;

“(3) port and landside infrastructure; and

“(4) marine transportation strategies by State and local governments.

“(c) SHORT SEA TRANSPORTATION ROUTES.—The Secretary shall designate short sea transportation routes as extensions of the surface transportation system to focus public and private efforts to use the waterways to relieve landside congestion along coastal corridors. The Secretary may collect and disseminate data for the designation and delineation of short sea transportation routes.

“(d) PROJECT DESIGNATION.—The Secretary may designate a project to be a short sea transportation project if the Secretary determines that the project may—

“(1) offer a waterborne alternative to available landside transportation services using documented vessels; and

“(2) provide transportation services for passengers or freight (or both) that may reduce congestion on landside infrastructure using documented vessels.

“(e) ELEMENTS OF PROGRAM.—For a short sea transportation project designated under this section, the Secretary may—

“(1) promote the development of short sea transportation services;

“(2) coordinate, with ports, State departments of transportation, localities, other public agencies, and the private sector and on the development of landside facilities and infrastructure to support short sea transportation services; and

“(3) develop performance measures for the short sea transportation program.

“(f) MULTISTATE, STATE AND REGIONAL TRANSPORTATION PLANNING.—The Secretary, in consultation with Federal entities and State and local governments, shall develop strategies to encourage the use of short sea transportation for transportation of passengers and cargo. The Secretary shall—

“(1) assess the extent to which States and local governments include short sea transportation and other marine transportation solutions in their transportation planning;

“(2) encourage State departments of transportation to develop strategies, where appropriate, to incorporate short sea transportation, ferries, and other marine transportation solutions for regional and interstate transport of freight and passengers in their transportation planning; and

“(3) encourage groups of States and multi-State transportation entities to determine how short sea transportation can address

congestion, bottlenecks, and other interstate transportation challenges.

“§ 55602. Cargo and shippers

“(a) MEMORANDUMS OF AGREEMENT.—The Secretary of Transportation shall enter into memorandums of understanding with the heads of other Federal entities to transport federally owned or generated cargo using a short sea transportation project designated under section 55601 when practical or available.

“(b) SHORT-TERM INCENTIVES.—The Secretary shall consult shippers and other participants in transportation logistics and develop proposals for short-term incentives to encourage the use of short sea transportation.

“§ 55603. Interagency coordination

“The Secretary of Transportation shall establish a board to identify and seek solutions to impediments hindering effective use of short sea transportation. The board shall include representatives of the Environmental Protection Agency and other Federal, State, and local governmental entities and private sector entities.

“§ 55604. Research on short sea transportation

“The Secretary of Transportation, in consultation with the Administrator of the Environmental Protection Agency, may conduct research on short sea transportation, regarding—

“(1) the environmental and transportation benefits to be derived from short sea transportation alternatives for other forms of transportation;

“(2) technology, vessel design, and other improvements that would reduce emissions, increase fuel economy, and lower costs of short sea transportation and increase the efficiency of intermodal transfers; and

“(3) solutions to impediments to short sea transportation projects designated under section 55601.

“§ 55605. Short sea transportation defined

“In this chapter, the term ‘short sea transportation’ means the carriage by vessel of cargo—

“(1) that is—

“(A) contained in intermodal cargo containers and loaded by crane on the vessel; or

“(B) loaded on the vessel by means of wheeled technology; and

“(2) that is—

“(A) loaded at a port in the United States and unloaded either at another port in the United States or at a port in Canada located in the Great Lakes Saint Lawrence Seaway System; or

“(B) loaded at a port in Canada located in the Great Lakes Saint Lawrence Seaway System and unloaded at a port in the United States.”.

(b) CLERICAL AMENDMENT.—The table of chapters at the beginning of subtitle V of such title is amended by inserting after the item relating to chapter 555 the following:

“556. Short Sea Transportation 55601”.

(c) REGULATIONS.—

(1) INTERIM REGULATIONS.—Not later than 90 days after the date of enactment of this Act, the Secretary of Transportation shall issue temporary regulations to implement the program under this section. Subchapter II of chapter 5 of title 5, United States Code, does not apply to a temporary regulation issued under this paragraph or to an amendment to such a temporary regulation.

(2) FINAL REGULATIONS.—Not later than October 1, 2008, the Secretary of Transportation shall issue final regulations to implement the program under this section.

SEC. 1122. SHORT SEA SHIPPING ELIGIBILITY FOR CAPITAL CONSTRUCTION FUND.

(a) DEFINITION OF QUALIFIED VESSEL.—Section 53501 of title 46, United States Code, is amended—

(1) in paragraph (5)(A)(iii) by striking “or noncontiguous domestic” and inserting “noncontiguous domestic, or short sea transportation trade”; and

(2) by inserting after paragraph (6) the following:

“(7) SHORT SEA TRANSPORTATION TRADE.—The term ‘short sea transportation trade’ means the carriage by vessel of cargo—

“(A) that is—

“(i) contained in intermodal cargo containers and loaded by crane on the vessel; or

“(ii) loaded on the vessel by means of wheeled technology; and

“(B) that is—

“(i) loaded at a port in the United States and unloaded either at another port in the United States or at a port in Canada located in the Great Lakes Saint Lawrence Seaway System; or

“(ii) loaded at a port in Canada located in the Great Lakes Saint Lawrence Seaway System and unloaded at a port in the United States.”.

(b) ALLOWABLE PURPOSE.—Section 53503(b) of such title is amended by striking “or noncontiguous domestic trade” and inserting “noncontiguous domestic, or short sea transportation trade”.

SEC. 1123. SHORT SEA TRANSPORTATION REPORT.

Not later than one year after the date of enactment of this Act, the Secretary of Transportation, in consultation with the Administrator of the Environmental Protection Agency, shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on the short sea transportation program established under the amendments made by section 1121. The report shall include a description of the activities conducted under the program, and any recommendations for further legislative or administrative action that the Secretary of Transportation considers appropriate.

Subtitle D—Highways**SEC. 1131. INCREASED FEDERAL SHARE FOR CMAQ PROJECTS.**

Section 120(c) of title 23, United States Code, is amended—

(1) in the subsection heading by striking “FOR CERTAIN SAFETY PROJECTS”;

(2) by striking “The Federal share” and inserting the following:

“(1) CERTAIN SAFETY PROJECTS.—The Federal share”; and

(3) by adding at the end the following:

“(2) CMAQ PROJECTS.—The Federal share payable on account of a project or program carried out under section 149 with funds obligated in fiscal year 2008 or 2009, or both, shall be not less than 80 percent and, at the discretion of the State, may be up to 100 percent of the cost thereof.”.

SEC. 1132. DISTRIBUTION OF RESCISSIONS.

(a) IN GENERAL.—Any unobligated balances of amounts that are appropriated from the Highway Trust Fund for a fiscal year, and apportioned under chapter 1 of title 23, United States Code, before, on, or after the date of enactment of this Act and that are rescinded in fiscal year 2008 or fiscal year 2009 shall be distributed by the Secretary of Transportation within each State (as defined in section 101 of such title) among all programs for which funds are apportioned under such chapter for such fiscal year, to the extent sufficient funds remain available for obligation, in the ratio that the amount of funds apportioned for each program under

such chapter for such fiscal year, bears to the amount of funds apportioned for all such programs under such chapter for such fiscal year.

(b) ADJUSTMENTS.—A State may make adjustments to the distribution of a rescission within the State for a fiscal year under subsection (a) by transferring the amounts to be rescinded among the programs for which funds are apportioned under chapter 1 of title 23, United States Code, for such fiscal year, except that in making such adjustments the State may not rescind from any such program more than 110 percent of the funds to be rescinded from the program for the fiscal year as determined by the Secretary of Transportation under subsection (a).

(c) TREATMENT OF TRANSPORTATION ENHANCEMENT SET-ASIDE AND FUNDS SUBALLOTTED TO SUBSTATE AREAS.—Funds set aside under sections 133(d)(2) and 133(d)(3) of title 23, United States Code, shall be treated as being apportioned under chapter 1 of such title for purposes of subsection (a).

SEC. 1133. SENSE OF CONGRESS REGARDING USE OF COMPLETE STREETS DESIGN TECHNIQUES.

It is the sense of Congress that in constructing new roadways or rehabilitating existing facilities, State and local governments should consider policies designed to accommodate all users, including motorists, pedestrians, cyclists, transit riders, and people of all ages and abilities, in order to—

(1) serve all surface transportation users by creating a more interconnected and intermodal system;

(2) create more viable transportation options; and

(3) facilitate the use of environmentally friendly options, such as public transportation, walking, and bicycling.

TITLE XII—SMALL BUSINESS ENERGY PROGRAMS

SEC. 1201. EXPRESS LOANS FOR RENEWABLE ENERGY AND ENERGY EFFICIENCY.

Section 7(a)(31) of the Small Business Act (15 U.S.C. 636(a)(31)) is amended by adding at the end the following:

“(F) EXPRESS LOANS FOR RENEWABLE ENERGY AND ENERGY EFFICIENCY.—

“(i) DEFINITIONS.—In this subparagraph—

“(I) the term ‘biomass’—

“(aa) means any organic material that is available on a renewable or recurring basis, including—

“(AA) agricultural crops;

“(BB) trees grown for energy production;

“(CC) wood waste and wood residues;

“(DD) plants (including aquatic plants and grasses);

“(EE) residues;

“(FF) fibers;

“(GG) animal wastes and other waste materials; and

“(HH) fats, oils, and greases (including recycled fats, oils, and greases); and

“(bb) does not include—

“(AA) paper that is commonly recycled; or

“(BB) unsegregated solid waste;

“(ii) the term ‘energy efficiency project’ means the installation or upgrading of equipment that results in a significant reduction in energy usage; and

“(iii) the term ‘renewable energy system’ means a system of energy derived from—

“(aa) a wind, solar, biomass (including biodiesel), or geothermal source; or

“(bb) hydrogen derived from biomass or water using an energy source described in item (aa).

“(ii) LOANS.—The Administrator may make a loan under the Express Loan Program for the purpose of—

“(I) purchasing a renewable energy system; or

“(II) carrying out an energy efficiency project for a small business concern.”.

SEC. 1202. PILOT PROGRAM FOR REDUCED 7(a) FEES FOR PURCHASE OF ENERGY EFFICIENT TECHNOLOGIES.

Section 7(a) of the Small Business Act (15 U.S.C. 636(a)) is amended by adding at the end the following:

“(32) LOANS FOR ENERGY EFFICIENT TECHNOLOGIES.—

“(A) DEFINITIONS.—In this paragraph—

“(i) the term ‘cost’ has the meaning given that term in section 502 of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a);

“(ii) the term ‘covered energy efficiency loan’ means a loan—

“(I) made under this subsection; and

“(II) the proceeds of which are used to purchase energy efficient designs, equipment, or fixtures, or to reduce the energy consumption of the borrower by 10 percent or more; and

“(iii) the term ‘pilot program’ means the pilot program established under subparagraph (B)

“(B) ESTABLISHMENT.—The Administrator shall establish and carry out a pilot program under which the Administrator shall reduce the fees for covered energy efficiency loans.

“(C) DURATION.—The pilot program shall terminate at the end of the second full fiscal year after the date that the Administrator establishes the pilot program.

“(D) MAXIMUM PARTICIPATION.—A covered energy efficiency loan shall include the maximum participation levels by the Administrator permitted for loans made under this subsection.

“(E) FEES.—

“(i) IN GENERAL.—The fee on a covered energy efficiency loan shall be equal to 50 percent of the fee otherwise applicable to that loan under paragraph (18).

“(ii) WAIVER.—The Administrator may waive clause (i) for a fiscal year if—

“(I) for the fiscal year before that fiscal year, the annual rate of default of covered energy efficiency loans exceeds that of loans made under this subsection that are not covered energy efficiency loans;

“(II) the cost to the Administration of making loans under this subsection is greater than zero and such cost is directly attributable to the cost of making covered energy efficiency loans; and

“(III) no additional sources of revenue authority are available to reduce the cost of making loans under this subsection to zero.

“(iii) EFFECT OF WAIVER.—If the Administrator waives the reduction of fees under clause (ii), the Administrator—

“(I) shall not assess or collect fees in an amount greater than necessary to ensure that the cost of the program under this subsection is not greater than zero; and

“(II) shall reinstate the fee reductions under clause (i) when the conditions in clause (ii) no longer apply.

“(iv) NO INCREASE OF FEES.—The Administrator shall not increase the fees under paragraph (18) on loans made under this subsection that are not covered energy efficiency loans as a direct result of the pilot program.

“(F) GAO REPORT.—

“(i) IN GENERAL.—Not later than 1 year after the date that the pilot program terminates, the Comptroller General of the United States shall submit to the Committee on Small Business of the House of Representatives and the Committee on Small Business and Entrepreneurship of the Senate a report on the pilot program.

“(ii) CONTENTS.—The report submitted under clause (i) shall include—

“(I) the number of covered energy efficiency loans for which fees were reduced under the pilot program;

“(II) a description of the energy efficiency savings with the pilot program;

“(III) a description of the impact of the pilot program on the program under this subsection;

“(IV) an evaluation of the efficacy and potential fraud and abuse of the pilot program; and

“(V) recommendations for improving the pilot program.”.

SEC. 1203. SMALL BUSINESS ENERGY EFFICIENCY.

(a) DEFINITIONS.—In this section—

(1) the terms “Administration” and “Administrator” mean the Small Business Administration and the Administrator thereof, respectively;

(2) the term “association” means the association of small business development centers established under section 21(a)(3)(A) of the Small Business Act (15 U.S.C. 648(a)(3)(A));

(3) the term “disability” has the meaning given that term in section 3 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12102);

(4) the term “Efficiency Program” means the Small Business Energy Efficiency Program established under subsection (c)(1);

(5) the term “electric utility” has the meaning given that term in section 3 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2602);

(6) the term “high performance green building” has the meaning given that term in section 401;

(7) the term “on-bill financing” means a low interest or no interest financing agreement between a small business concern and an electric utility for the purchase or installation of equipment, under which the regularly scheduled payment of that small business concern to that electric utility is not reduced by the amount of the reduction in cost attributable to the new equipment and that amount is credited to the electric utility, until the cost of the purchase or installation is repaid;

(8) the term “small business concern” has the same meaning as in section 3 of the Small Business Act (15 U.S.C. 632);

(9) the term “small business development center” means a small business development center described in section 21 of the Small Business Act (15 U.S.C. 648);

(10) the term “telecommuting” means the use of telecommunications to perform work functions under circumstances which reduce or eliminate the need to commute;

(11) the term “Telecommuting Pilot Program” means the pilot program established under subsection (d)(1)(A); and

(12) the term “veteran” has the meaning given that term in section 101 of title 38, United States Code.

(b) IMPLEMENTATION OF SMALL BUSINESS ENERGY EFFICIENCY PROGRAM.—

(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Administrator shall promulgate final rules establishing the Government-wide program authorized under subsection (d) of section 337 of the Energy Policy and Conservation Act (42 U.S.C. 6307) that ensure compliance with that subsection by not later than 6 months after such date of enactment.

(2) PROGRAM REQUIRED.—The Administrator shall develop and coordinate a Government-wide program, building on the Energy Star for Small Business program, to assist small business concerns in—

(A) becoming more energy efficient;

(B) understanding the cost savings from improved energy efficiency; and

(C) identifying financing options for energy efficiency upgrades.

(3) CONSULTATION AND COOPERATION.—The program required by paragraph (2) shall be developed and coordinated—

(A) in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency; and

(B) in cooperation with any entities the Administrator considers appropriate, such as industry trade associations, industry members, and energy efficiency organizations.

(4) AVAILABILITY OF INFORMATION.—The Administrator shall make available the information and materials developed under the program required by paragraph (2) to—

(A) small business concerns, including smaller design, engineering, and construction firms; and

(B) other Federal programs for energy efficiency, such as the Energy Star for Small Business program.

(5) STRATEGY AND REPORT.—

(A) STRATEGY REQUIRED.—The Administrator shall develop a strategy to educate, encourage, and assist small business concerns in adopting energy efficient building fixtures and equipment.

(B) REPORT.—Not later than December 31, 2008, the Administrator shall submit to Congress a report containing a plan to implement the strategy developed under subparagraph (A).

(C) SMALL BUSINESS SUSTAINABILITY INITIATIVE.—

(1) AUTHORITY.—The Administrator shall establish a Small Business Energy Efficiency Program to provide energy efficiency assistance to small business concerns through small business development centers.

(2) SMALL BUSINESS DEVELOPMENT CENTERS.—

(A) IN GENERAL.—In carrying out the Efficiency Program, the Administrator shall enter into agreements with small business development centers under which such centers shall—

(i) provide access to information and resources on energy efficiency practices, including on-bill financing options;

(ii) conduct training and educational activities;

(iii) offer confidential, free, one-on-one, in-depth energy audits to the owners and operators of small business concerns regarding energy efficiency practices;

(iv) give referrals to certified professionals and other providers of energy efficiency assistance who meet such standards for educational, technical, and professional competence as the Administrator shall establish;

(v) to the extent not inconsistent with controlling State public utility regulations, act as a facilitator between small business concerns, electric utilities, lenders, and the Administration to facilitate on-bill financing arrangements;

(vi) provide necessary support to small business concerns to—

(I) evaluate energy efficiency opportunities and opportunities to design or construct high performance green buildings;

(II) evaluate renewable energy sources, such as the use of solar and small wind to supplement power consumption;

(III) secure financing to achieve energy efficiency or to design or construct high performance green buildings; and

(IV) implement energy efficiency projects;

(vii) assist owners of small business concerns with the development and commercialization of clean technology products, goods, services, and processes that use renewable energy sources, dramatically reduce the use of natural resources, and cut or eliminate greenhouse gas emissions through—

(I) technology assessment;

(II) intellectual property;

(III) Small Business Innovation Research submissions under section 9 of the Small Business Act (15 U.S.C. 638);

(IV) strategic alliances;

(V) business model development; and

(VI) preparation for investors; and

(viii) help small business concerns improve environmental performance by shifting to less hazardous materials and reducing waste and emissions, including by providing assistance for small business concerns to adapt the materials they use, the processes they operate, and the products and services they produce.

(B) REPORTS.—Each small business development center participating in the Efficiency Program shall submit to the Administrator and the Administrator of the Environmental Protection Agency an annual report that includes—

(i) a summary of the energy efficiency assistance provided by that center under the Efficiency Program;

(ii) the number of small business concerns assisted by that center under the Efficiency Program;

(iii) statistics on the total amount of energy saved as a result of assistance provided by that center under the Efficiency Program; and

(iv) any additional information determined necessary by the Administrator, in consultation with the association.

(C) REPORTS TO CONGRESS.—Not later than 60 days after the date on which all reports under subparagraph (B) relating to a year are submitted, the Administrator shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report summarizing the information regarding the Efficiency Program submitted by small business development centers participating in that program.

(3) ELIGIBILITY.—A small business development center shall be eligible to participate in the Efficiency Program only if that center is certified under section 21(k)(2) of the Small Business Act (15 U.S.C. 648(k)(2)).

(4) SELECTION OF PARTICIPATING STATE PROGRAMS.—From among small business development centers submitting applications to participate in the Efficiency Program, the Administrator—

(A) shall, to the maximum extent practicable, select small business development centers in such a manner so as to promote a nationwide distribution of centers participating in the Efficiency Program; and

(B) may not select more than 1 small business development center in a State to participate in the Efficiency Program.

(5) MATCHING REQUIREMENT.—Subparagraphs (A) and (B) of section 21(a)(4) of the Small Business Act (15 U.S.C. 648(a)(4)) shall apply to assistance made available under the Efficiency Program.

(6) GRANT AMOUNTS.—Each small business development center selected to participate in the Efficiency Program under paragraph (4) shall be eligible to receive a grant in an amount equal to—

(A) not less than \$100,000 in each fiscal year; and

(B) not more than \$300,000 in each fiscal year.

(7) EVALUATION AND REPORT.—The Comptroller General of the United States shall—

(A) not later than 30 months after the date of disbursement of the first grant under the Efficiency Program, initiate an evaluation of that program; and

(B) not later than 6 months after the date of the initiation of the evaluation under subparagraph (A), submit to the Administrator, the Committee on Small Business and Entrepreneurship of the Senate, and the Com-

mittee on Small Business of the House of Representatives, a report containing—

(i) the results of the evaluation; and

(ii) any recommendations regarding whether the Efficiency Program, with or without modification, should be extended to include the participation of all small business development centers.

(8) GUARANTEE.—To the extent not inconsistent with State law, the Administrator may guarantee the timely payment of a loan made to a small business concern through an on-bill financing agreement on such terms and conditions as the Administrator shall establish through a formal rule making, after providing notice and an opportunity for comment.

(9) IMPLEMENTATION.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1) of the Small Business Act (15 U.S.C. 648(a)(1)), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.

(10) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to make grants and enter into cooperative agreements to carry out this subsection.

(11) TERMINATION.—The authority under this subsection shall terminate 4 years after the date of disbursement of the first grant under the Efficiency Program.

(d) SMALL BUSINESS TELECOMMUTING.—

(1) PILOT PROGRAM.—

(A) IN GENERAL.—The Administrator shall conduct, in not more than 5 of the regions of the Administration, a pilot program to provide information regarding telecommuting to employers that are small business concerns and to encourage such employers to offer telecommuting options to employees.

(B) SPECIAL OUTREACH TO INDIVIDUALS WITH DISABILITIES.—In carrying out the Telecommuting Pilot Program, the Administrator shall make a concerted effort to provide information to—

(i) small business concerns owned by or employing individuals with disabilities, particularly veterans who are individuals with disabilities;

(ii) Federal, State, and local agencies having knowledge and expertise in assisting individuals with disabilities, including veterans who are individuals with disabilities; and

(iii) any group or organization, the primary purpose of which is to aid individuals with disabilities or veterans who are individuals with disabilities.

(C) PERMISSIBLE ACTIVITIES.—In carrying out the Telecommuting Pilot Program, the Administrator may—

(i) produce educational materials and conduct presentations designed to raise awareness in the small business community of the benefits and the ease of telecommuting;

(ii) conduct outreach—

(I) to small business concerns that are considering offering telecommuting options; and

(II) as provided in subparagraph (B); and

(iii) acquire telecommuting technologies and equipment to be used for demonstration purposes.

(D) SELECTION OF REGIONS.—In determining which regions will participate in the Telecommuting Pilot Program, the Administrator shall give priority consideration to regions in which Federal agencies and private-sector employers have demonstrated a strong regional commitment to telecommuting.

(2) REPORT TO CONGRESS.—Not later than 2 years after the date on which funds are first appropriated to carry out this subsection, the Administrator shall transmit to the

Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report containing the results of an evaluation of the Telecommuting Pilot Program and any recommendations regarding whether the pilot program, with or without modification, should be extended to include the participation of all regions of the Administration.

(3) **TERMINATION.**—The Telecommuting Pilot Program shall terminate 4 years after the date on which funds are first appropriated to carry out this subsection.

(4) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to the Administration \$5,000,000 to carry out this subsection.

(e) **ENCOURAGING INNOVATION IN ENERGY EFFICIENCY.**—Section 9 of the Small Business Act (15 U.S.C. 638) is amended by adding at the end the following:

“(2) **ENCOURAGING INNOVATION IN ENERGY EFFICIENCY.**—

“(1) **FEDERAL AGENCY ENERGY-RELATED PRIORITY.**—In carrying out its duties under this section relating to SBIR and STTR solicitations by Federal departments and agencies, the Administrator shall—

“(A) ensure that such departments and agencies give high priority to small business concerns that participate in or conduct energy efficiency or renewable energy system research and development projects; and

“(B) include in the annual report to Congress under subsection (b)(7) a determination of whether the priority described in subparagraph (A) is being carried out.

“(2) **CONSULTATION REQUIRED.**—The Administrator shall consult with the heads of other Federal departments and agencies in determining whether priority has been given to small business concerns that participate in or conduct energy efficiency or renewable energy system research and development projects, as required by this subsection.

“(3) **GUIDELINES.**—The Administrator shall, as soon as is practicable after the date of enactment of this subsection, issue guidelines and directives to assist Federal agencies in meeting the requirements of this subsection.

“(4) **DEFINITIONS.**—In this subsection—

“(A) the term ‘biomass’—

“(i) means any organic material that is available on a renewable or recurring basis, including—

“(I) agricultural crops;

“(II) trees grown for energy production;

“(III) wood waste and wood residues;

“(IV) plants (including aquatic plants and grasses);

“(V) residues;

“(VI) fibers;

“(VII) animal wastes and other waste materials; and

“(VIII) fats, oils, and greases (including recycled fats, oils, and greases); and

“(i) does not include—

“(I) paper that is commonly recycled; or

“(II) unsegregated solid waste;

“(B) the term ‘energy efficiency project’ means the installation or upgrading of equipment that results in a significant reduction in energy usage; and

“(C) the term ‘renewable energy system’ means a system of energy derived from—

“(i) a wind, solar, biomass (including biodiesel), or geothermal source; or

“(ii) hydrogen derived from biomass or water using an energy source described in clause (i).”

SEC. 1204. LARGER 504 LOAN LIMITS TO HELP BUSINESS DEVELOP ENERGY EFFICIENT TECHNOLOGIES AND PURCHASES.

(a) **ELIGIBILITY FOR ENERGY EFFICIENCY PROJECTS.**—Section 501(d)(3) of the Small

Business Investment Act of 1958 (15 U.S.C. 695(d)(3)) is amended—

(1) in subparagraph (G) by striking “or” at the end;

(2) in subparagraph (H) by striking the period at the end and inserting a comma;

(3) by inserting after subparagraph (H) the following:

“(I) reduction of energy consumption by at least 10 percent,

“(J) increased use of sustainable design, including designs that reduce the use of greenhouse gas emitting fossil fuels, or low-impact design to produce buildings that reduce the use of non-renewable resources and minimize environmental impact, or

“(K) plant, equipment and process upgrades of renewable energy sources such as the small-scale production of energy for individual buildings or communities consumption, commonly known as micropower, or renewable fuels producers including biodiesel and ethanol producers.”; and

(4) by adding at the end the following: “In subparagraphs (J) and (K), terms have the meanings given those terms under the Leadership in Energy and Environmental Design (LEED) standard for green building certification, as determined by the Administrator.”

(b) **LOANS FOR PLANT PROJECTS USED FOR ENERGY-EFFICIENT PURPOSES.**—Section 502(2)(A) of the Small Business Investment Act of 1958 (15 U.S.C. 696(2)(A)) is amended—

(1) in clause (ii) by striking “and” at the end;

(2) in clause (iii) by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

“(iv) \$4,000,000 for each project that reduces the borrower’s energy consumption by at least 10 percent; and

“(v) \$4,000,000 for each project that generates renewable energy or renewable fuels, such as biodiesel or ethanol production.”

SEC. 1205. ENERGY SAVING DEBENTURES.

(a) **IN GENERAL.**—Section 303 of the Small Business Investment Act of 1958 (15 U.S.C. 683) is amended by adding at the end the following:

“(k) **ENERGY SAVING DEBENTURES.**—In addition to any other authority under this Act, a small business investment company licensed in the first fiscal year after the date of enactment of this subsection or any fiscal year thereafter may issue Energy Saving debentures.”

(b) **DEFINITIONS.**—Section 103 of the Small Business Investment Act of 1958 (15 U.S.C. 662) is amended—

(1) in paragraph (16), by striking “and” at the end;

(2) in paragraph (17), by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

“(18) the term ‘Energy Saving debenture’ means a deferred interest debenture that—

“(A) is issued at a discount;

“(B) has a 5-year maturity or a 10-year maturity;

“(C) requires no interest payment or annual charge for the first 5 years;

“(D) is restricted to Energy Saving qualified investments; and

“(E) is issued at no cost (as defined in section 502 of the Credit Reform Act of 1990) with respect to purchasing and guaranteeing the debenture; and

“(19) the term ‘Energy Saving qualified investment’ means investment in a small business concern that is primarily engaged in researching, manufacturing, developing, or providing products, goods, or services that reduce the use or consumption of non-renewable energy resources.”

SEC. 1206. INVESTMENTS IN ENERGY SAVING SMALL BUSINESSES.

(a) **MAXIMUM LEVERAGE.**—Section 303(b)(2) of the Small Business Investment Act of 1958 (15 U.S.C. 303(b)(2)) is amended by adding at the end the following:

“(D) **INVESTMENTS IN ENERGY SAVING SMALL BUSINESSES.**—

“(i) **IN GENERAL.**—Subject to clause (ii), in calculating the outstanding leverage of a company for purposes of subparagraph (A), the Administrator shall exclude the amount of the cost basis of any Energy Saving qualified investment in a smaller enterprise made in the first fiscal year after the date of enactment of this subparagraph or any fiscal year thereafter by a company licensed in the applicable fiscal year.

“(ii) **LIMITATIONS.**—

“(I) **AMOUNT OF EXCLUSION.**—The amount excluded under clause (i) for a company shall not exceed 33 percent of the private capital of that company.

“(II) **MAXIMUM INVESTMENT.**—A company shall not make an Energy Saving qualified investment in any one entity in an amount equal to more than 20 percent of the private capital of that company.

“(III) **OTHER TERMS.**—The exclusion of amounts under clause (i) shall be subject to such terms as the Administrator may impose to ensure that there is no cost (as that term is defined in section 502 of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a)) with respect to purchasing or guaranteeing any debenture involved.”

(b) **MAXIMUM AGGREGATE AMOUNT OF LEVERAGE.**—Section 303(b)(4) of the Small Business Investment Act of 1958 (15 U.S.C. 303(b)(4)) is amended by adding at the end the following:

“(E) **INVESTMENTS IN ENERGY SAVING SMALL BUSINESSES.**—

“(i) **IN GENERAL.**—Subject to clause (ii), in calculating the aggregate outstanding leverage of a company for purposes of subparagraph (A), the Administrator shall exclude the amount of the cost basis of any Energy Saving qualified investment in a smaller enterprise made in the first fiscal year after the date of enactment of this subparagraph or any fiscal year thereafter by a company licensed in the applicable fiscal year.

“(ii) **LIMITATIONS.**—

“(I) **AMOUNT OF EXCLUSION.**—The amount excluded under clause (i) for a company shall not exceed 33 percent of the private capital of that company.

“(II) **MAXIMUM INVESTMENT.**—A company shall not make an Energy Saving qualified investment in any one entity in an amount equal to more than 20 percent of the private capital of that company.

“(III) **OTHER TERMS.**—The exclusion of amounts under clause (i) shall be subject to such terms as the Administrator may impose to ensure that there is no cost (as that term is defined in section 502 of the Federal Credit Reform Act of 1990 (2 U.S.C. 661a)) with respect to purchasing or guaranteeing any debenture involved.”

SEC. 1207. RENEWABLE FUEL CAPITAL INVESTMENT COMPANY.

Title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.) is amended by adding at the end the following:

“**PART C—RENEWABLE FUEL CAPITAL INVESTMENT PILOT PROGRAM**

“**SEC. 381. DEFINITIONS.**

“In this part:

“(1) **OPERATIONAL ASSISTANCE.**—The term ‘operational assistance’ means management, marketing, and other technical assistance that assists a small business concern with business development.

“(2) PARTICIPATION AGREEMENT.—The term ‘participation agreement’ means an agreement, between the Administrator and a company granted final approval under section 384(e), that—

“(A) details the operating plan and investment criteria of the company; and

“(B) requires the company to make investments in smaller enterprises primarily engaged in researching, manufacturing, developing, producing, or bringing to market goods, products, or services that generate or support the production of renewable energy.

“(3) RENEWABLE ENERGY.—The term ‘renewable energy’ means energy derived from resources that are regenerative or that cannot be depleted, including solar, wind, ethanol, and biodiesel fuels.

“(4) RENEWABLE FUEL CAPITAL INVESTMENT COMPANY.—The term ‘Renewable Fuel Capital Investment company’ means a company—

“(A) that—

“(i) has been granted final approval by the Administrator under section 384(e); and

“(ii) has entered into a participation agreement with the Administrator; or

“(B) that has received conditional approval under section 384(c).

“(5) STATE.—The term ‘State’ means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any other commonwealth, territory, or possession of the United States.

“(6) VENTURE CAPITAL.—The term ‘venture capital’ means capital in the form of equity capital investments, as that term is defined in section 303(g)(4).

“SEC. 382. PURPOSES.

“The purposes of the Renewable Fuel Capital Investment Program established under this part are—

“(1) to promote the research, development, manufacture, production, and bringing to market of goods, products, or services that generate or support the production of renewable energy by encouraging venture capital investments in smaller enterprises primarily engaged such activities; and

“(2) to establish a venture capital program, with the mission of addressing the unmet equity investment needs of smaller enterprises engaged in researching, developing, manufacturing, producing, and bringing to market goods, products, or services that generate or support the production of renewable energy, to be administered by the Administrator—

“(A) to enter into participation agreements with Renewable Fuel Capital Investment companies;

“(B) to guarantee debentures of Renewable Fuel Capital Investment companies to enable each such company to make venture capital investments in smaller enterprises engaged in the research, development, manufacture, production, and bringing to market of goods, products, or services that generate or support the production of renewable energy; and

“(C) to make grants to Renewable Fuel Investment Capital companies, and to other entities, for the purpose of providing operational assistance to smaller enterprises financed, or expected to be financed, by such companies.

“SEC. 383. ESTABLISHMENT.

“The Administrator shall establish a Renewable Fuel Capital Investment Program, under which the Administrator may—

“(1) enter into participation agreements for the purposes described in section 382; and

“(2) guarantee the debentures issued by Renewable Fuel Capital Investment companies as provided in section 385.

“SEC. 384. SELECTION OF RENEWABLE FUEL CAPITAL INVESTMENT COMPANIES.

“(a) ELIGIBILITY.—A company is eligible to apply to be designated as a Renewable Fuel Capital Investment company if the company—

“(1) is a newly formed for-profit entity or a newly formed for-profit subsidiary of an existing entity;

“(2) has a management team with experience in alternative energy financing or relevant venture capital financing; and

“(3) has a primary objective of investment in smaller enterprises that research, manufacture, develop, produce, or bring to market goods, products, or services that generate or support the production of renewable energy.

“(b) APPLICATION.—A company desiring to be designated as a Renewable Fuel Capital Investment company shall submit an application to the Administrator that includes—

“(1) a business plan describing how the company intends to make successful venture capital investments in smaller enterprises primarily engaged in the research, manufacture, development, production, or bringing to market of goods, products, or services that generate or support the production of renewable energy;

“(2) information regarding the relevant venture capital qualifications and general reputation of the management of the company;

“(3) a description of how the company intends to seek to address the unmet capital needs of the smaller enterprises served;

“(4) a proposal describing how the company intends to use the grant funds provided under this part to provide operational assistance to smaller enterprises financed by the company, including information regarding whether the company has employees with appropriate professional licenses or will contract with another entity when the services of such an individual are necessary;

“(5) with respect to binding commitments to be made to the company under this part, an estimate of the ratio of cash to in-kind contributions;

“(6) a description of whether and to what extent the company meets the criteria under subsection (c)(2) and the objectives of the program established under this part;

“(7) information regarding the management and financial strength of any parent firm, affiliated firm, or any other firm essential to the success of the business plan of the company; and

“(8) such other information as the Administrator may require.

“(c) CONDITIONAL APPROVAL.—

“(1) IN GENERAL.—From among companies submitting applications under subsection (b), the Administrator shall conditionally approve companies to operate as Renewable Fuel Capital Investment companies.

“(2) SELECTION CRITERIA.—In conditionally approving companies under paragraph (1), the Administrator shall consider—

“(A) the likelihood that the company will meet the goal of its business plan;

“(B) the experience and background of the management team of the company;

“(C) the need for venture capital investments in the geographic areas in which the company intends to invest;

“(D) the extent to which the company will concentrate its activities on serving the geographic areas in which it intends to invest;

“(E) the likelihood that the company will be able to satisfy the conditions under subsection (d);

“(F) the extent to which the activities proposed by the company will expand economic opportunities in the geographic areas in which the company intends to invest;

“(G) the strength of the proposal by the company to provide operational assistance

under this part as the proposal relates to the ability of the company to meet applicable cash requirements and properly use in-kind contributions, including the use of resources for the services of licensed professionals, when necessary, whether provided by employees or contractors; and

“(H) any other factor determined appropriate by the Administrator.

“(3) NATIONWIDE DISTRIBUTION.—From among companies submitting applications under subsection (b), the Administrator shall consider the selection criteria under paragraph (2) and shall, to the maximum extent practicable, approve at least one company from each geographic region of the Administration.

“(d) REQUIREMENTS TO BE MET FOR FINAL APPROVAL.—

“(1) IN GENERAL.—The Administrator shall grant each conditionally approved company 2 years to satisfy the requirements of this subsection.

“(2) CAPITAL REQUIREMENT.—Each conditionally approved company shall raise not less than \$3,000,000 of private capital or binding capital commitments from 1 or more investors (which shall not be departments or agencies of the Federal Government) who meet criteria established by the Administrator.

“(3) NONADMINISTRATION RESOURCES FOR OPERATIONAL ASSISTANCE.—

“(A) IN GENERAL.—In order to provide operational assistance to smaller enterprises expected to be financed by the company, each conditionally approved company shall have binding commitments (for contribution in cash or in-kind)—

“(i) from sources other than the Administration that meet criteria established by the Administrator; and

“(ii) payable or available over a multiyear period determined appropriate by the Administrator (not to exceed 10 years).

“(B) EXCEPTION.—The Administrator may, in the discretion of the Administrator and based upon a showing of special circumstances and good cause, consider an applicant to have satisfied the requirements of subparagraph (A) if the applicant has—

“(i) a viable plan that reasonably projects the capacity of the applicant to raise the amount (in cash or in-kind) required under subparagraph (A); and

“(ii) binding commitments in an amount equal to not less than 20 percent of the total amount required under paragraph (A).

“(C) LIMITATION.—The total amount of a in-kind contributions by a company shall be not more than 50 percent of the total contributions by a company.

“(e) FINAL APPROVAL; DESIGNATION.—The Administrator shall, with respect to each applicant conditionally approved under subsection (c)—

“(1) grant final approval to the applicant to operate as a Renewable Fuel Capital Investment company under this part and designate the applicant as such a company, if the applicant—

“(A) satisfies the requirements of subsection (d) on or before the expiration of the time period described in that subsection; and

“(B) enters into a participation agreement with the Administrator; or

“(2) if the applicant fails to satisfy the requirements of subsection (d) on or before the expiration of the time period described in paragraph (1) of that subsection, revoke the conditional approval granted under that subsection.

“SEC. 385. DEBENTURES.

“(a) IN GENERAL.—The Administrator may guarantee the timely payment of principal and interest, as scheduled, on debentures issued by any Renewable Fuel Capital Investment company.

“(b) TERMS AND CONDITIONS.—The Administrator may make guarantees under this section on such terms and conditions as it determines appropriate, except that—

“(1) the term of any debenture guaranteed under this section shall not exceed 15 years; and

“(2) a debenture guaranteed under this section—

“(A) shall carry no front-end or annual fees;

“(B) shall be issued at a discount;

“(C) shall require no interest payments during the 5-year period beginning on the date the debenture is issued;

“(D) shall be prepayable without penalty after the end of the 1-year period beginning on the date the debenture is issued; and

“(E) shall require semiannual interest payments after the period described in subparagraph (C).

“(c) FULL FAITH AND CREDIT OF THE UNITED STATES.—The full faith and credit of the United States is pledged to pay all amounts that may be required to be paid under any guarantee under this part.

“(d) MAXIMUM GUARANTEE.—

“(1) IN GENERAL.—Under this section, the Administrator may guarantee the debentures issued by a Renewable Fuel Capital Investment company only to the extent that the total face amount of outstanding guaranteed debentures of such company does not exceed 150 percent of the private capital of the company, as determined by the Administrator.

“(2) TREATMENT OF CERTAIN FEDERAL FUNDS.—For the purposes of paragraph (1), private capital shall include capital that is considered to be Federal funds, if such capital is contributed by an investor other than a department or agency of the Federal Government.

“SEC. 386. ISSUANCE AND GUARANTEE OF TRUST CERTIFICATES.

“(a) ISSUANCE.—The Administrator may issue trust certificates representing ownership of all or a fractional part of debentures issued by a Renewable Fuel Capital Investment company and guaranteed by the Administrator under this part, if such certificates are based on and backed by a trust or pool approved by the Administrator and composed solely of guaranteed debentures.

“(b) GUARANTEE.—

“(1) IN GENERAL.—The Administrator may, under such terms and conditions as it determines appropriate, guarantee the timely payment of the principal of and interest on trust certificates issued by the Administrator or its agents for purposes of this section.

“(2) LIMITATION.—Each guarantee under this subsection shall be limited to the extent of principal and interest on the guaranteed debentures that compose the trust or pool.

“(3) PREPAYMENT OR DEFAULT.—If a debenture in a trust or pool is prepaid, or in the event of default of such a debenture, the guarantee of timely payment of principal and interest on the trust certificates shall be reduced in proportion to the amount of principal and interest such prepaid debenture represents in the trust or pool. Interest on prepaid or defaulted debentures shall accrue and be guaranteed by the Administrator only through the date of payment of the guarantee. At any time during its term, a trust certificate may be called for redemption due to prepayment or default of all debentures.

“(c) FULL FAITH AND CREDIT OF THE UNITED STATES.—The full faith and credit of the United States is pledged to pay all amounts that may be required to be paid under any guarantee of a trust certificate issued by the Administrator or its agents under this section.

“(d) FEES.—The Administrator shall not collect a fee for any guarantee of a trust cer-

tificate under this section, but any agent of the Administrator may collect a fee approved by the Administrator for the functions described in subsection (f)(2).

“(e) SUBROGATION AND OWNERSHIP RIGHTS.—

“(1) SUBROGATION.—If the Administrator pays a claim under a guarantee issued under this section, it shall be subrogated fully to the rights satisfied by such payment.

“(2) OWNERSHIP RIGHTS.—No Federal, State, or local law shall preclude or limit the exercise by the Administrator of its ownership rights in the debentures residing in a trust or pool against which trust certificates are issued under this section.

“(f) MANAGEMENT AND ADMINISTRATION.—

“(1) REGISTRATION.—The Administrator may provide for a central registration of all trust certificates issued under this section.

“(2) CONTRACTING OF FUNCTIONS.—

“(A) IN GENERAL.—The Administrator may contract with an agent or agents to carry out on behalf of the Administrator the pooling and the central registration functions provided for in this section, including, not withstanding any other provision of law—

“(i) maintenance, on behalf of and under the direction of the Administrator, of such commercial bank accounts or investments in obligations of the United States as may be necessary to facilitate the creation of trusts or pools backed by debentures guaranteed under this part; and

“(ii) the issuance of trust certificates to facilitate the creation of such trusts or pools.

“(B) FIDELITY BOND OR INSURANCE REQUIREMENT.—Any agent performing functions on behalf of the Administrator under this paragraph shall provide a fidelity bond or insurance in such amounts as the Administrator determines to be necessary to fully protect the interests of the United States.

“(3) REGULATION OF BROKERS AND DEALERS.—The Administrator may regulate brokers and dealers in trust certificates issued under this section.

“(4) ELECTRONIC REGISTRATION.—Nothing in this subsection may be construed to prohibit the use of a book-entry or other electronic form of registration for trust certificates issued under this section.

“SEC. 387. FEES.

“(a) IN GENERAL.—Except as provided in section 386(d), the Administrator may charge such fees as it determines appropriate with respect to any guarantee or grant issued under this part, in an amount established annually by the Administrator, as necessary to reduce to zero the cost (as defined in section 502 of the Federal Credit Reform Act of 1990) to the Administration of purchasing and guaranteeing debentures under this part, which amounts shall be paid to and retained by the Administration.

“(b) OFFSET.—The Administrator may, as provided by section 388, offset fees charged and collected under subsection (a).

“SEC. 388. FEE CONTRIBUTION.

“(a) IN GENERAL.—To the extent that amounts are made available to the Administrator for the purpose of fee contributions, the Administrator shall contribute to fees paid by the Renewable Fuel Capital Investment companies under section 387.

“(b) ANNUAL ADJUSTMENT.—Each fee contribution under subsection (a) shall be effective for 1 fiscal year and shall be adjusted as necessary for each fiscal year thereafter to ensure that amounts under subsection (a) are fully used. The fee contribution for a fiscal year shall be based on the outstanding commitments made and the guarantees and grants that the Administrator projects will be made during that fiscal year, given the program level authorized by law for that fiscal year and any other factors that the Administrator determines appropriate.

“SEC. 389. OPERATIONAL ASSISTANCE GRANTS.

“(a) IN GENERAL.—

“(1) AUTHORITY.—The Administrator may make grants to Renewable Fuel Capital Investment companies to provide operational assistance to smaller enterprises financed, or expected to be financed, by such companies or other entities.

“(2) TERMS.—A grant under this subsection shall be made over a multiyear period not to exceed 10 years, under such other terms as the Administrator may require.

“(3) GRANT AMOUNT.—The amount of a grant made under this subsection to a Renewable Fuel Capital Investment company shall be equal to the lesser of—

“(A) 10 percent of the resources (in cash or in kind) raised by the company under section 384(d)(2); or

“(B) \$1,000,000.

“(4) PRO RATA REDUCTIONS.—If the amount made available to carry out this section is insufficient for the Administrator to provide grants in the amounts provided for in paragraph (3), the Administrator shall make pro rata reductions in the amounts otherwise payable to each company and entity under such paragraph.

“(5) GRANTS TO CONDITIONALLY APPROVED COMPANIES.—

“(A) IN GENERAL.—Subject to subparagraphs (B) and (C), upon the request of a company conditionally approved under section 384(c), the Administrator shall make a grant to the company under this subsection.

“(B) REPAYMENT BY COMPANIES NOT APPROVED.—If a company receives a grant under this paragraph and does not enter into a participation agreement for final approval, the company shall, subject to controlling Federal law, repay the amount of the grant to the Administrator.

“(C) DEDUCTION OF GRANT TO APPROVED COMPANY.—If a company receives a grant under this paragraph and receives final approval under section 384(e), the Administrator shall deduct the amount of the grant from the total grant amount the company receives for operational assistance.

“(D) AMOUNT OF GRANT.—No company may receive a grant of more than \$100,000 under this paragraph.

“(b) SUPPLEMENTAL GRANTS.—

“(1) IN GENERAL.—The Administrator may make supplemental grants to Renewable Fuel Capital Investment companies and to other entities, as authorized by this part, under such terms as the Administrator may require, to provide additional operational assistance to smaller enterprises financed, or expected to be financed, by the companies.

“(2) MATCHING REQUIREMENT.—The Administrator may require, as a condition of any supplemental grant made under this subsection, that the company or entity receiving the grant provide from resources (in a cash or in kind), other than those provided by the Administrator, a matching contribution equal to the amount of the supplemental grant.

“(c) LIMITATION.—None of the assistance made available under this section may be used for any overhead or general and administrative expense of a Renewable Fuel Capital Investment company.

“SEC. 390. BANK PARTICIPATION.

“(a) IN GENERAL.—Except as provided in subsection (b), any national bank, any member bank of the Federal Reserve System, and (to the extent permitted under applicable State law) any insured bank that is not a member of such system, may invest in any Renewable Fuel Capital Investment company, or in any entity established to invest solely in Renewable Fuel Capital Investment companies.

“(b) LIMITATION.—No bank described in subsection (a) may make investments described in such subsection that are greater than 5 percent of the capital and surplus of the bank.

“SEC. 391. FEDERAL FINANCING BANK.

“Notwithstanding section 318, the Federal Financing Bank may acquire a debenture issued by a Renewable Fuel Capital Investment company under this part.

“SEC. 392. REPORTING REQUIREMENT.

“Each Renewable Fuel Capital Investment company that participates in the program established under this part shall provide to the Administrator such information as the Administrator may require, including—

“(1) information related to the measurement criteria that the company proposed in its program application; and

“(2) in each case in which the company makes, under this part, an investment in, or a loan or a grant to, a business that is not primarily engaged in the research, development, manufacture, or bringing to market or renewable energy sources, a report on the nature, origin, and revenues of the business in which investments are made.

“SEC. 393. EXAMINATIONS.

“(a) IN GENERAL.—Each Renewable Fuel Capital Investment company that participates in the program established under this part shall be subject to examinations made at the direction of the Investment Division of the Administration in accordance with this section.

“(b) ASSISTANCE OF PRIVATE SECTOR ENTITIES.—Examinations under this section may be conducted with the assistance of a private sector entity that has both the qualifications and the expertise necessary to conduct such examinations.

“(c) COSTS.—

“(1) ASSESSMENT.—

“(A) IN GENERAL.—The Administrator may assess the cost of examinations under this section, including compensation of the examiners, against the company examined.

“(B) PAYMENT.—Any company against which the Administrator assesses costs under this paragraph shall pay such costs.

“(2) DEPOSIT OF FUNDS.—Funds collected under this section shall be deposited in the account for salaries and expenses of the Administration.

“SEC. 394. MISCELLANEOUS.

“To the extent such procedures are not inconsistent with the requirements of this part, the Administrator may take such action as set forth in sections 309, 311, 312, and 314 and an officer, director, employee, agent, or other participant in the management or conduct of the affairs of a Renewable Fuel Capital Investment company shall be subject to the requirements of such sections.

“SEC. 395. REMOVAL OR SUSPENSION OF DIRECTORS OR OFFICERS.

“Using the procedures for removing or suspending a director or an officer of a licensee set forth in section 313 (to the extent such procedures are not inconsistent with the requirements of this part), the Administrator may remove or suspend any director or officer of any Renewable Fuel Capital Investment company.

“SEC. 396. REGULATIONS.

“The Administrator may issue such regulations as the Administrator determines necessary to carry out the provisions of this part in accordance with its purposes.

“SEC. 397. AUTHORIZATIONS OF APPROPRIATIONS.

“(a) IN GENERAL.—Subject to the availability of appropriations, the Administrator is authorized to make \$15,000,000 in operational assistance grants under section 389 for each of fiscal years 2008 and 2009.

“(b) FUNDS COLLECTED FOR EXAMINATIONS.—Funds deposited under section 393(c)(2) are authorized to be appropriated only for the costs of examinations under section 393 and for the costs of other oversight activities with respect to the program established under this part.

“SEC. 398. TERMINATION.

“The program under this part shall terminate at the end of the second full fiscal year after the date that the Administrator establishes the program under this part.”.

SEC. 1208. STUDY AND REPORT.

The Administrator of the Small Business Administration shall conduct a study of the Renewable Fuel Capital Investment Program under part C of title III of the Small Business Investment Act of 1958, as added by this Act. Not later than 3 years after the date of enactment of this Act, the Administrator shall complete the study under this section and submit to Congress a report regarding the results of the study.

TITLE XIII—SMART GRID

SEC. 1301. STATEMENT OF POLICY ON MODERNIZATION OF ELECTRICITY GRID.

It is the policy of the United States to support the modernization of the Nation's electricity transmission and distribution system to maintain a reliable and secure electricity infrastructure that can meet future demand growth and to achieve each of the following, which together characterize a Smart Grid:

(1) Increased use of digital information and controls technology to improve reliability, security, and efficiency of the electric grid.

(2) Dynamic optimization of grid operations and resources, with full cyber-security.

(3) Deployment and integration of distributed resources and generation, including renewable resources.

(4) Development and incorporation of demand response, demand-side resources, and energy-efficiency resources.

(5) Deployment of “smart” technologies (real-time, automated, interactive technologies that optimize the physical operation of appliances and consumer devices) for metering, communications concerning grid operations and status, and distribution automation.

(6) Integration of “smart” appliances and consumer devices.

(7) Deployment and integration of advanced electricity storage and peak-shaving technologies, including plug-in electric and hybrid electric vehicles, and thermal-storage air conditioning.

(8) Provision to consumers of timely information and control options.

(9) Development of standards for communication and interoperability of appliances and equipment connected to the electric grid, including the infrastructure serving the grid.

(10) Identification and lowering of unreasonable or unnecessary barriers to adoption of smart grid technologies, practices, and services.

SEC. 1302. SMART GRID SYSTEM REPORT.

The Secretary, acting through the Assistant Secretary of the Office of Electricity Delivery and Energy Reliability (referred to in this section as the “OEDER”) and through the Smart Grid Task Force established in section 1303, shall, after consulting with any interested individual or entity as appropriate, no later than one year after enactment, and every two years thereafter, report to Congress concerning the status of smart grid deployments nationwide and any regulatory or government barriers to continued deployment. The report shall provide the current status and prospects of smart grid development, including information on tech-

nology penetration, communications network capabilities, costs, and obstacles. It may include recommendations for State and Federal policies or actions helpful to facilitate the transition to a smart grid. To the extent appropriate, it should take a regional perspective. In preparing this report, the Secretary shall solicit advice and contributions from the Smart Grid Advisory Committee created in section 1303; from other involved Federal agencies including but not limited to the Federal Energy Regulatory Commission (“Commission”), the National Institute of Standards and Technology (“Institute”), and the Department of Homeland Security; and from other stakeholder groups not already represented on the Smart Grid Advisory Committee.

SEC. 1303. SMART GRID ADVISORY COMMITTEE AND SMART GRID TASK FORCE.

(a) SMART GRID ADVISORY COMMITTEE.—

(1) ESTABLISHMENT.—The Secretary shall establish, within 90 days of enactment of this Part, a Smart Grid Advisory Committee (either as an independent entity or as a designated sub-part of a larger advisory committee on electricity matters). The Smart Grid Advisory Committee shall include eight or more members appointed by the Secretary who have sufficient experience and expertise to represent the full range of smart grid technologies and services, to represent both private and non-Federal public sector stakeholders. One member shall be appointed by the Secretary to Chair the Smart Grid Advisory Committee.

(2) MISSION.—The mission of the Smart Grid Advisory Committee shall be to advise the Secretary, the Assistant Secretary, and other relevant Federal officials concerning the development of smart grid technologies, the progress of a national transition to the use of smart-grid technologies and services, the evolution of widely-accepted technical and practical standards and protocols to allow interoperability and inter-communication among smart-grid capable devices, and the optimum means of using Federal incentive authority to encourage such progress.

(3) APPLICABILITY OF FEDERAL ADVISORY COMMITTEE ACT.—The Federal Advisory Committee Act (5 U.S.C. App.) shall apply to the Smart Grid Advisory Committee.

(b) SMART GRID TASK FORCE.—

(1) ESTABLISHMENT.—The Assistant Secretary of the Office of Electricity Delivery and Energy Reliability shall establish, within 90 days of enactment of this Part, a Smart Grid Task Force composed of designated employees from the various divisions of that office who have responsibilities related to the transition to smart-grid technologies and practices. The Assistant Secretary or his designee shall be identified as the Director of the Smart Grid Task Force. The Chairman of the Federal Energy Regulatory Commission and the Director of the National Institute of Standards and Technology shall each designate at least one employee to participate on the Smart Grid Task Force. Other members may come from other agencies at the invitation of the Assistant Secretary or the nomination of the head of such other agency. The Smart Grid Task Force shall, without disrupting the work of the Divisions or Offices from which its members are drawn, provide an identifiable Federal entity to embody the Federal role in the national transition toward development and use of smart grid technologies.

(2) MISSION.—The mission of the Smart Grid Task Force shall be to insure awareness, coordination and integration of the diverse activities of the Office and elsewhere in the Federal government related to smart-grid technologies and practices, including but not limited to: smart grid research and

development; development of widely accepted smart-grid standards and protocols; the relationship of smart-grid technologies and practices to electric utility regulation; the relationship of smart-grid technologies and practices to infrastructure development, system reliability and security; and the relationship of smart-grid technologies and practices to other facets of electricity supply, demand, transmission, distribution, and policy. The Smart Grid Task Force shall collaborate with the Smart Grid Advisory Committee and other Federal agencies and offices. The Smart Grid Task Force shall meet at the call of its Director as necessary to accomplish its mission.

(c) **AUTHORIZATION.**—There are authorized to be appropriated for the purposes of this section such sums as are necessary to the Secretary to support the operations of the Smart Grid Advisory Committee and Smart Grid Task Force for each of fiscal years 2008 through 2020.

SEC. 1304. SMART GRID TECHNOLOGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION.

(a) **POWER GRID DIGITAL INFORMATION TECHNOLOGY.**—The Secretary, in consultation with the Federal Energy Regulatory Commission and other appropriate agencies, electric utilities, the States, and other stakeholders, shall carry out a program—

(1) to develop advanced techniques for measuring peak load reductions and energy-efficiency savings from smart metering, demand response, distributed generation, and electricity storage systems;

(2) to investigate means for demand response, distributed generation, and storage to provide ancillary services;

(3) to conduct research to advance the use of wide-area measurement and control networks, including data mining, visualization, advanced computing, and secure and dependable communications in a highly-distributed environment;

(4) to test new reliability technologies, including those concerning communications network capabilities, in a grid control room environment against a representative set of local outage and wide area blackout scenarios;

(5) to identify communications network capacity needed to implement advanced technologies.

(6) to investigate the feasibility of a transition to time-of-use and real-time electricity pricing;

(7) to develop algorithms for use in electric transmission system software applications;

(8) to promote the use of underutilized electricity generation capacity in any substitution of electricity for liquid fuels in the transportation system of the United States; and

(9) in consultation with the Federal Energy Regulatory Commission, to propose interconnection protocols to enable electric utilities to access electricity stored in vehicles to help meet peak demand loads.

(b) **SMART GRID REGIONAL DEMONSTRATION INITIATIVE.**—

(1) **IN GENERAL.**—The Secretary shall establish a smart grid regional demonstration initiative (referred to in this subsection as the “Initiative”) composed of demonstration projects specifically focused on advanced technologies for use in power grid sensing, communications, analysis, and power flow control. The Secretary shall seek to leverage existing smart grid deployments.

(2) **GOALS.**—The goals of the Initiative shall be—

(A) to demonstrate the potential benefits of concentrated investments in advanced grid technologies on a regional grid;

(B) to facilitate the commercial transition from the current power transmission and dis-

tribution system technologies to advanced technologies;

(C) to facilitate the integration of advanced technologies in existing electric networks to improve system performance, power flow control, and reliability;

(D) to demonstrate protocols and standards that allow for the measurement and validation of the energy savings and fossil fuel emission reductions associated with the installation and use of energy efficiency and demand response technologies and practices; and

(E) to investigate differences in each region and regulatory environment regarding best practices in implementing smart grid technologies.

(3) **DEMONSTRATION PROJECTS.**—

(A) **IN GENERAL.**—In carrying out the initiative, the Secretary shall carry out smart grid demonstration projects in up to 5 electricity control areas, including rural areas and at least 1 area in which the majority of generation and transmission assets are controlled by a tax-exempt entity.

(B) **COOPERATION.**—A demonstration project under subparagraph (A) shall be carried out in cooperation with the electric utility that owns the grid facilities in the electricity control area in which the demonstration project is carried out.

(C) **FEDERAL SHARE OF COST OF TECHNOLOGY INVESTMENTS.**—The Secretary shall provide to an electric utility described in subparagraph (B) financial assistance for use in paying an amount equal to not more than 50 percent of the cost of qualifying advanced grid technology investments made by the electric utility to carry out a demonstration project.

(D) **INELIGIBILITY FOR GRANTS.**—No person or entity participating in any demonstration project conducted under this subsection shall be eligible for grants under section 1306 for otherwise qualifying investments made as part of that demonstration project.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated—

(1) to carry out subsection (a), such sums as are necessary for each of fiscal years 2008 through 2012; and

(2) to carry out subsection (b), \$100,000,000 for each of fiscal years 2008 through 2012.

SEC. 1305. SMART GRID INTEROPERABILITY FRAMEWORK.

(a) **INTEROPERABILITY FRAMEWORK.**—The Director of the National Institute of Standards and Technology shall have primary responsibility to coordinate the development of a framework that includes protocols and model standards for information management to achieve interoperability of smart grid devices and systems. Such protocols and standards shall further align policy, business, and technology approaches in a manner that would enable all electric resources, including demand-side resources, to contribute to an efficient, reliable electricity network. In developing such protocols and standards—

(1) the Director shall seek input and cooperation from the Commission, OEDER and its Smart Grid Task Force, the Smart Grid Advisory Committee, other relevant Federal and State agencies; and

(2) the Director shall also solicit input and cooperation from private entities interested in such protocols and standards, including but not limited to the Gridwise Architecture Council, the International Electrical and Electronics Engineers, the National Electric Reliability Organization recognized by the Federal Energy Regulatory Commission, and National Electrical Manufacturer’s Association.

(b) **SCOPE OF FRAMEWORK.**—The framework developed under subsection (a) shall be flexible, uniform and technology neutral, including but not limited to technologies for managing smart grid information, and designed—

(1) to accommodate traditional, centralized generation and transmission resources and consumer distributed resources, including distributed generation, renewable generation, energy storage, energy efficiency, and demand response and enabling devices and systems;

(2) to be flexible to incorporate—

(A) regional and organizational differences; and

(B) technological innovations;

(3) to consider the use of voluntary uniform standards for certain classes of mass-produced electric appliances and equipment for homes and businesses that enable customers, at their election and consistent with applicable State and Federal laws, and are manufactured with the ability to respond to electric grid emergencies and demand response signals by curtailing all, or a portion of, the electrical power consumed by the appliances or equipment in response to an emergency or demand response signal, including through—

(A) load reduction to reduce total electrical demand;

(B) adjustment of load to provide grid ancillary services; and

(C) in the event of a reliability crisis that threatens an outage, short-term load shedding to help preserve the stability of the grid; and

(4) such voluntary standards should incorporate appropriate manufacturer lead time.

(c) **TIMING OF FRAMEWORK DEVELOPMENT.**—The Institute shall begin work pursuant to this section within 60 days of enactment. The Institute shall provide and publish an initial report on progress toward recommended or consensus standards and protocols within one year after enactment, further reports at such times as developments warrant in the judgment of the Institute, and a final report when the Institute determines that the work is completed or that a Federal role is no longer necessary.

(d) **STANDARDS FOR INTEROPERABILITY IN FEDERAL JURISDICTION.**—At any time after the Institute’s work has led to sufficient consensus in the Commission’s judgment, the Commission shall institute a rulemaking proceeding to adopt such standards and protocols as may be necessary to insure smart-grid functionality and interoperability in interstate transmission of electric power, and regional and wholesale electricity markets.

(e) **AUTHORIZATION.**—There are authorized to be appropriated for the purposes of this section \$5,000,000 to the Institute to support the activities required by this subsection for each of fiscal years 2008 through 2012.

SEC. 1306. FEDERAL MATCHING FUND FOR SMART GRID INVESTMENT COSTS.

(a) **MATCHING FUND.**—The Secretary shall establish a Smart Grid Investment Matching Grant Program to provide reimbursement of one-fifth (20 percent) of qualifying Smart Grid investments.

(b) **QUALIFYING INVESTMENTS.**—Qualifying Smart Grid investments may include any of the following made on or after the date of enactment of this Act:

(1) In the case of appliances covered for purposes of establishing energy conservation standards under part B of title III of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6291 et seq.), the documented expenditures incurred by a manufacturer of such appliances associated with purchasing or designing, creating the ability to manufacture, and manufacturing and installing for one calendar year, internal devices that allow the appliance to engage in Smart Grid functions.

(2) In the case of specialized electricity-using equipment, including motors and drivers, installed in industrial or commercial applications, the documented expenditures incurred by its owner or its manufacturer of installing devices or modifying that equipment to engage in Smart Grid functions.

(3) In the case of transmission and distribution equipment fitted with monitoring and communications devices to enable smart grid functions, the documented expenditures incurred by the electric utility to purchase and install such monitoring and communications devices.

(4) In the case of metering devices, sensors, control devices, and other devices integrated with and attached to an electric utility system or retail distributor or marketer of electricity that are capable of engaging in Smart Grid functions, the documented expenditures incurred by the electric utility, distributor, or marketer and its customers to purchase and install such devices.

(5) In the case of software that enables devices or computers to engage in Smart Grid functions, the documented purchase costs of the software.

(6) In the case of entities that operate or coordinate operations of regional electric grids, the documented expenditures for purchasing and installing such equipment that allows Smart Grid functions to operate and be combined or coordinated among multiple electric utilities and between that region and other regions.

(7) In the case of persons or entities other than electric utilities owning and operating a distributed electricity generator, the documented expenditures of enabling that generator to be monitored, controlled, or otherwise integrated into grid operations and electricity flows on the grid utilizing Smart Grid functions.

(8) In the case of electric or hybrid-electric vehicles, the documented expenses for devices that allow the vehicle to engage in Smart Grid functions (but not the costs of electricity storage for the vehicle).

(9) The documented expenditures related to purchasing and implementing Smart Grid functions in such other cases as the Secretary shall identify. In making such grants, the Secretary shall seek to reward innovation and early adaptation, even if success is not complete, rather than deployment of proven and commercially viable technologies.

(c) INVESTMENTS NOT INCLUDED.—Qualifying Smart Grid investments do not include any of the following:

(1) Investments or expenditures for Smart Grid technologies, devices, or equipment that are eligible for specific tax credits or deductions under the Internal Revenue Code, as amended.

(2) Expenditures for electricity generation, transmission, or distribution infrastructure or equipment not directly related to enabling Smart Grid functions.

(3) After the final date for State consideration of the Smart Grid Information Standard under section 1307 (paragraph (17) of section 111(d) of the Public Utility Regulatory Policies Act of 1978), an investment that is not in compliance with such standard.

(4) After the development and publication by the Institute of protocols and model standards for interoperability of smart grid devices and technologies, an investment that fails to incorporate any of such protocols or model standards.

(5) Expenditures for physical interconnection of generators or other devices to the grid except those that are directly related to enabling Smart Grid functions.

(6) Expenditures for ongoing salaries, benefits, or personnel costs not incurred in the

initial installation, training, or start up of smart grid functions.

(7) Expenditures for travel, lodging, meals or other personal costs.

(8) Ongoing or routine operation, billing, customer relations, security, and maintenance expenditures.

(9) Such other expenditures that the Secretary determines not to be Qualifying Smart Grid Investments by reason of the lack of the ability to perform Smart Grid functions or lack of direct relationship to Smart Grid functions.

(d) SMART GRID FUNCTIONS.—The term “smart grid functions” means any of the following:

(1) The ability to develop, store, send and receive digital information concerning electricity use, costs, prices, time of use, nature of use, storage, or other information relevant to device, grid, or utility operations, to or from or by means of the electric utility system, through one or a combination of devices and technologies.

(2) The ability to develop, store, send and receive digital information concerning electricity use, costs, prices, time of use, nature of use, storage, or other information relevant to device, grid, or utility operations to or from a computer or other control device.

(3) The ability to measure or monitor electricity use as a function of time of day, power quality characteristics such as voltage level, current, cycles per second, or source or type of generation and to store, synthesize or report that information by digital means.

(4) The ability to sense and localize disruptions or changes in power flows on the grid and communicate such information instantaneously and automatically for purposes of enabling automatic protective responses to sustain reliability and security of grid operations.

(5) The ability to detect, prevent, communicate with regard to, respond to, or recover from system security threats, including cyber-security threats and terrorism, using digital information, media, and devices.

(6) The ability of any appliance or machine to respond to such signals, measurements, or communications automatically or in a manner programmed by its owner or operator without independent human intervention.

(7) The ability to use digital information to operate functionalities on the electric utility grid that were previously electro-mechanical or manual.

(8) The ability to use digital controls to manage and modify electricity demand, enable congestion management, assist in voltage control, provide operating reserves, and provide frequency regulation.

(9) Such other functions as the Secretary may identify as being necessary or useful to the operation of a Smart Grid.

(e) The Secretary shall—

(1) establish and publish in the Federal Register, within one year after the enactment of this Act procedures by which applicants who have made qualifying Smart Grid investments can seek and obtain reimbursement of one-fifth of their documented expenditures;

(2) establish procedures to ensure that there is no duplication or multiple reimbursement for the same investment or costs, that the reimbursement goes to the party making the actual expenditures for Qualifying Smart Grid Investments, and that the grants made have significant effect in encouraging and facilitating the development of a smart grid;

(3) maintain public records of reimbursements made, recipients, and qualifying Smart Grid investments which have received reimbursements;

(4) establish procedures to provide, in cases deemed by the Secretary to be warranted,

advance payment of moneys up to the full amount of the projected eventual reimbursement, to creditworthy applicants whose ability to make Qualifying Smart Grid Investments may be hindered by lack of initial capital, in lieu of any later reimbursement for which that applicant qualifies, and subject to full return of the advance payment in the event that the Qualifying Smart Grid investment is not made; and

(5) have and exercise the discretion to deny grants for investments that do not qualify in the reasonable judgment of the Secretary.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary such sums as are necessary for the administration of this section and the grants to be made pursuant to this section for fiscal years 2008 through 2012.

SEC. 1307. STATE CONSIDERATION OF SMART GRID.

(a) Section 111(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(d)) is amended by adding at the end the following:

“(16) CONSIDERATION OF SMART GRID INVESTMENTS.—

“(A) IN GENERAL.—Each State shall consider requiring that, prior to undertaking investments in nonadvanced grid technologies, an electric utility of the State demonstrate to the State that the electric utility considered an investment in a qualified smart grid system based on appropriate factors, including—

- “(i) total costs;
- “(ii) cost-effectiveness;
- “(iii) improved reliability;
- “(iv) security;
- “(v) system performance; and
- “(vi) societal benefit.

“(B) RATE RECOVERY.—Each State shall consider authorizing each electric utility of the State to recover from ratepayers any capital, operating expenditure, or other costs of the electric utility relating to the deployment of a qualified smart grid system, including a reasonable rate of return on the capital expenditures of the electric utility for the deployment of the qualified smart grid system.

“(C) OBSOLETE EQUIPMENT.—Each State shall consider authorizing any electric utility or other party of the State to deploy a qualified smart grid system to recover in a timely manner the remaining book-value costs of any equipment rendered obsolete by the deployment of the qualified smart grid system, based on the remaining depreciable life of the obsolete equipment.

“(17) SMART GRID INFORMATION.—

“(A) STANDARD.—All electricity purchasers shall be provided direct access, in written or electronic machine-readable form as appropriate, to information from their electricity provider as provided in subparagraph (B).

“(B) INFORMATION.—Information provided under this section, to the extent practicable, shall include:

“(i) PRICES.—Purchasers and other interested persons shall be provided with information on—

“(I) time-based electricity prices in the wholesale electricity market; and

“(II) time-based electricity retail prices or rates that are available to the purchasers.

“(ii) USAGE.—Purchasers shall be provided with the number of electricity units, expressed in kwh, purchased by them.

“(iii) INTERVALS AND PROJECTIONS.—Updates of information on prices and usage shall be offered on not less than a daily basis, shall include hourly price and use information, where available, and shall include a day-ahead projection of such price information to the extent available.

“(iv) SOURCES.—Purchasers and other interested persons shall be provided annually

with written information on the sources of the power provided by the utility, to the extent it can be determined, by type of generation, including greenhouse gas emissions associated with each type of generation, for intervals during which such information is available on a cost-effective basis.

“(C) ACCESS.—Purchasers shall be able to access their own information at any time through the internet and on other means of communication elected by that utility for Smart Grid applications. Other interested persons shall be able to access information not specific to any purchaser through the Internet. Information specific to any purchaser shall be provided solely to that purchaser.”

(b) COMPLIANCE.—

(1) TIME LIMITATIONS.—Section 112(b) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2622(b)) is amended by adding the following at the end thereof:

“(6)(A) Not later than 1 year after the enactment of this paragraph, each State regulatory authority (with respect to each electric utility for which it has ratemaking authority) and each nonregulated utility shall commence the consideration referred to in section 111, or set a hearing date for consideration, with respect to the standards established by paragraphs (17) through (18) of section 111(d).

“(B) Not later than 2 years after the date of the enactment of the this paragraph, each State regulatory authority (with respect to each electric utility for which it has ratemaking authority), and each nonregulated electric utility, shall complete the consideration, and shall make the determination, referred to in section 111 with respect to each standard established by paragraphs (17) through (18) of section 111(d).”

(2) FAILURE TO COMPLY.—Section 112(c) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2622(c)) is amended by adding the following at the end:

“In the case of the standards established by paragraphs (16) through (19) of section 111(d), the reference contained in this subsection to the date of enactment of this Act shall be deemed to be a reference to the date of enactment of such paragraphs.”

(3) PRIOR STATE ACTIONS.—Section 112(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2622(d)) is amended by inserting “and paragraphs (17) through (18)” before “of section 111(d).”

SEC. 1308. STUDY OF THE EFFECT OF PRIVATE WIRE LAWS ON THE DEVELOPMENT OF COMBINED HEAT AND POWER FACILITIES.

(a) STUDY.—

(1) IN GENERAL.—The Secretary, in consultation with the States and other appropriate entities, shall conduct a study of the laws (including regulations) affecting the siting of privately owned electric distribution wires on and across public rights-of-way.

(2) REQUIREMENTS.—The study under paragraph (1) shall include—

(A) an evaluation of—

(i) the purposes of the laws; and

(ii) the effect the laws have on the development of combined heat and power facilities;

(B) a determination of whether a change in the laws would have any operating, reliability, cost, or other impacts on electric utilities and the customers of the electric utilities; and

(C) an assessment of—

(i) whether privately owned electric distribution wires would result in duplicative facilities; and

(ii) whether duplicative facilities are necessary or desirable.

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, the Sec-

retary shall submit to Congress a report that describes the results of the study conducted under subsection (a).

SEC. 1309. DOE STUDY OF SECURITY ATTRIBUTES OF SMART GRID SYSTEMS.

(a) DOE STUDY.—The Secretary shall, within 18 months after the date of enactment of this Act, submit a report to Congress that provides a quantitative assessment and determination of the existing and potential impacts of the deployment of Smart Grid systems on improving the security of the Nation's electricity infrastructure and operating capability. The report shall include but not be limited to specific recommendations on each of the following:

(1) How smart grid systems can help in making the Nation's electricity system less vulnerable to disruptions due to intentional acts against the system.

(2) How smart grid systems can help in restoring the integrity of the Nation's electricity system subsequent to disruptions.

(3) How smart grid systems can facilitate nationwide, interoperable emergency communications and control of the Nation's electricity system during times of localized, regional, or nationwide emergency.

(4) What risks must be taken into account that smart grid systems may, if not carefully created and managed, create vulnerability to security threats of any sort, and how such risks may be mitigated.

(b) CONSULTATION.—The Secretary shall consult with other Federal agencies in the development of the report under this section, including but not limited to the Secretary of Homeland Security, the Federal Energy Regulatory Commission, and the Electric Reliability Organization certified by the Commission under section 215(c) of the Federal Power Act (16 U.S.C. 824o) as added by section 1211 of the Energy Policy Act of 2005 (Public Law 109-58; 119 Stat. 941).

TITLE XIV—RENEWABLE ELECTRICITY STANDARD

SEC. 1401. RENEWABLE ELECTRICITY STANDARD.

(a) IN GENERAL.—Title VI of the Public Utility Regulatory Policies Act of 1978 is amended by adding at the end the following:

“SEC. 610. RENEWABLE ELECTRICITY STANDARD.

“(a) DEFINITIONS.—For purposes of this section:

“(1) BIOMASS.—

“(A) IN GENERAL.—The term ‘biomass’ means each of the following:

“(i) Cellulosic (plant fiber) organic materials from a plant that is planted for the purpose of being used to produce energy.

“(ii) Nonhazardous, plant or algal matter that is derived from any of the following:

“(I) An agricultural crop, crop byproduct or residue resource.

“(II) Waste such as landscape or right-of-way trimmings (but not including municipal solid waste, recyclable postconsumer waste paper, painted, treated, or pressurized wood, wood contaminated with plastic or metals).

“(iii) Animal waste or animal byproducts.

“(iv) Landfill methane.

“(B) NATIONAL FOREST LANDS AND CERTAIN OTHER PUBLIC LANDS.—With respect to organic material removed from National Forest System lands or from public lands administered by the Secretary of the Interior, the term ‘biomass’ covers only organic material from (i) ecological forest restoration; (ii) pre-commercial thinnings; (iii) brush; (iv) mill residues; and (v) slash.

“(C) EXCLUSION OF CERTAIN FEDERAL LANDS.—Notwithstanding subparagraph (B), material or matter that would otherwise qualify as biomass are not included in the term biomass if they are located on the following Federal lands:

“(i) Federal land containing old growth forest or late successional forest unless the

Secretary of the Interior or the Secretary of Agriculture determines that the removal of organic material from such land is appropriate for the applicable forest type and maximizes the retention of late-successional and large and old growth trees, late-successional and old growth forest structure, and late-successional and old growth forest composition.

“(ii) Federal land on which the removal of vegetation is prohibited, including components of the National Wilderness Preservation System.

“(iii) Wilderness Study Areas.

“(iv) Inventoried roadless areas.

“(v) Components of the National Landscape Conservation System.

“(vi) National Monuments.

“(2) ELIGIBLE FACILITY.—The term ‘eligible facility’ means—

“(A) a facility for the generation of electric energy from a renewable energy resource that is placed in service on or after January 1, 2001; or

“(B) a repowering or cofiring increment.

“(3) EXISTING FACILITY.—The term ‘existing facility’ means a facility for the generation of electric energy from a renewable energy resource that is not an eligible facility.

“(4) INCREMENTAL HYDROPOWER.—The term ‘incremental hydropower’ means additional generation that is achieved from increased efficiency or additions of capacity made on or after January 1, 2001, or the effective date of an existing applicable State renewable portfolio standard program at a hydroelectric facility that was placed in service before that date.

“(5) INDIAN LAND.—The term ‘Indian land’ means—

“(A) any land within the limits of any Indian reservation, pueblo, or rancharia;

“(B) any land not within the limits of any Indian reservation, pueblo, or rancharia title to which was on the date of enactment of this paragraph either held by the United States for the benefit of any Indian tribe or individual or held by any Indian tribe or individual subject to restriction by the United States against alienation;

“(C) any dependent Indian community; or

“(D) any land conveyed to any Alaska Native corporation under the Alaska Native Claims Settlement Act.

“(6) INDIAN TRIBE.—The term ‘Indian tribe’ means any Indian tribe, band, nation, or other organized group or community, including any Alaskan Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

“(7) RENEWABLE ENERGY.—The term ‘renewable energy’ means electric energy generated by a renewable energy resource.

“(8) RENEWABLE ENERGY RESOURCE.—The term ‘renewable energy resource’ means solar, wind, ocean, tidal, geothermal energy, biomass, landfill gas, incremental hydropower, or hydrokinetic energy.

“(9) REPOWERING OR COFIRING INCREMENT.—The term ‘repowering or cofiring increment’ means—

“(A) the additional generation from a modification that is placed in service on or after January 1, 2001, to expand electricity production at a facility used to generate electric energy from a renewable energy resource;

“(B) the additional generation above the average generation in the 3 years preceding the date of enactment of this section at a facility used to generate electric energy from

a renewable energy resource or to cofire biomass that was placed in service before the date of enactment of this section: or

“(C) the portion of the electric generation from a facility placed in service on or after January 1, 2001, or a modification to a facility placed in service before the date of enactment of this section made on or after January 1, 2001, associated with cofiring biomass.

“(10) RETAIL ELECTRIC SUPPLIER.—(A) The term ‘retail electric supplier’ means a person that sells electric energy to electric consumers (other than consumers in Hawaii) that sold not less than 1,000,000 megawatt-hours of electric energy to electric consumers for purposes other than resale during the preceding calendar year. For purposes of this section, a person that sells electric energy to electric consumers that, in combination with the sales of any affiliate organized after the date of enactment of this section, sells not less than 1,000,000 megawatt hours of electric energy to consumers for purposes other than resale shall qualify as a retail electric supplier. For purposes of this paragraph, sales by any person to a parent company or to other affiliates of such person shall not be treated as sales to electric consumers.

“(B) Such term does not include the United States, a State or any political subdivision of a State, or any agency, authority, or instrumentality of any one or more of the foregoing, or a rural electric cooperative, except that a political subdivision of a State, or an agency, authority or instrumentality of the United States, a State or a political subdivision of a State, or a rural electric cooperative that sells electric energy to electric consumers or any other entity that sells electric energy to electric consumers that would not otherwise qualify as a retail electric supplier shall be deemed a retail electric supplier if such entity notifies the Secretary that it voluntarily agrees to participate in the Federal renewable electricity standard program.

“(11) RETAIL ELECTRIC SUPPLIER’S BASE AMOUNT.—The term ‘retail electric supplier’s base amount’ means the total amount of electric energy sold by the retail electric supplier, expressed in terms of kilowatt hours, to electric customers for purposes other than resale during the most recent calendar year for which information is available, excluding—

“(A) electric energy that is not incremental hydropower generated by a hydroelectric facility; and

“(B) electricity generated through the incineration of municipal solid waste.

“(b) COMPLIANCE.—For each calendar year beginning in calendar year 2010, each retail electric supplier shall meet the requirements of subsection (c) by submitting to the Secretary, not later than April 1 of the following calendar year, one or more of the following:

“(1) Federal renewable energy credits issued under subsection (e).

“(2) Federal energy efficiency credits issued under subsection (i), except that Federal energy efficiency credits may not be used to meet more than 27 percent of the requirements of subsection (c) in any calendar year. Energy efficiency credits may only be used for compliance in a State where the Governor has petitioned the Secretary pursuant to subsection (i)(2).

“(3) Certification of the renewable energy generated and electricity savings pursuant to the funds associated with State compliance payments as specified in subsection (e)(3)(G).

“(4) Alternative compliance payments pursuant to subsection (j).

“(c) REQUIRED ANNUAL PERCENTAGE.—For calendar years 2010 through 2039, the re-

quired annual percentage of the retail electric supplier’s base amount that shall be generated from renewable energy resources, or otherwise credited towards such percentage requirement pursuant to subsection (d), shall be the percentage specified in the following table:

Calendar Years	Required annual percentage
2010	2.75
2011	2.75
2012	3.75
2013	4.5
2014	5.5
2015	6.5
2016	7.5
2017	8.25
2018	10.25
2019	12.25
2020 and thereafter through 2039	15

“(d) RENEWABLE ENERGY AND ENERGY EFFICIENCY CREDITS.—(1) A retail electric supplier may satisfy the requirements of subsection (b)(1) through the submission of Federal renewable energy credits—

“(A) issued to the retail electric supplier under subsection (e);

“(B) obtained by purchase or exchange under subsection (f) or (g); or

“(C) borrowed under subsection (h).

“(2) A retail electric supplier may satisfy the requirements of subsection (b)(2) through the submission of Federal energy efficiency credits issued to the retail electric supplier obtained by purchase or exchange pursuant to subsection (i).

“(3) A Federal renewable energy credit may be counted toward compliance with subsection (b)(1) only once. A Federal energy efficiency credit may be counted toward compliance with subsection (b)(2) only once.

“(e) ISSUANCE OF FEDERAL RENEWABLE ENERGY CREDITS.—(1) The Secretary shall establish by rule, not later than 1 year after the date of enactment of this section, a program to verify and issue Federal renewable energy credits to generators of renewable energy, track their sale, exchange and retirement and to enforce the requirements of this section. To the extent possible, in establishing such program, the Secretary shall rely upon existing and emerging State or regional tracking systems that issue and track non-Federal renewable energy credits.

“(2) An entity that generates electric energy through the use of a renewable energy resource may apply to the Secretary for the issuance of renewable energy credits. The applicant must demonstrate that the electric energy will be transmitted onto the grid or, in the case of a generation offset, that the electric energy offset would have otherwise been consumed on site. The application shall indicate—

“(A) the type of renewable energy resource used to produce the electricity;

“(B) the location where the electric energy was produced; and

“(C) any other information the Secretary determines appropriate.

“(3)(A) Except as provided in subparagraphs (B), (C), and (D), the Secretary shall issue to a generator of electric energy one Federal renewable energy credit for each kilowatt hour of electric energy generated by the use of a renewable energy resource at an eligible facility.

“(B) For purpose of compliance with this section, Federal renewable energy credits for incremental hydropower shall be based, on the increase in average annual generation resulting from the efficiency improvements or capacity additions. The incremental generation shall be calculated using the same water flow information used to determine a historic average annual generation baseline for

the hydroelectric facility and certified by the Secretary or the Federal Energy Regulatory Commission. The calculation of the Federal renewable energy credits for incremental hydropower shall not be based on any operational changes at the hydroelectric facility not directly associated with the efficiency improvements or capacity additions.

“(C) The Secretary shall issue 2 renewable energy credits for each kilowatt hour of electric energy generated and supplied to the grid in that calendar year through the use of a renewable energy resource at an eligible facility located on Indian land. For purposes of this paragraph, renewable energy generated by biomass cofired with other fuels is eligible for two credits only if the biomass was grown on such land.

“(D) For electric energy generated by a renewable energy resource at an on-site eligible facility no larger than one megawatt in capacity and used to offset part or all of the customer’s requirements for electric energy, the Secretary shall issue 3 renewable energy credits to such customer for each kilowatt hour generated.

“(E) In the case of an on-site eligible facility on Indian land no more than 3 credits per kilowatt hour may be issued.

“(F) If both a renewable energy resource and a non-renewable energy resource are used to generate the electric energy, the Secretary shall issue the Federal renewable energy credits based on the proportion of the renewable energy resources used.

“(G) When a generator has sold electric energy generated through the use of a renewable energy resource to a retail electric supplier under a contract for power from an existing facility, and the contract has not determined ownership of the Federal renewable energy credits associated with such generation, the Secretary shall issue such Federal renewable energy credits to the retail electric supplier for the duration of the contract.

“(H) Payments made by a retail electricity supplier, directly or indirectly, to a State for compliance with a State renewable portfolio standard program, or for an alternative compliance mechanism, shall be valued at one credit per kilowatt hour for the purpose of subsection (b)(2) based on the amount of electric energy generation from renewable resources and electricity savings up to 27 percent of the utility’s requirement that results from those payments.

“(f) EXISTING FACILITIES.—The Secretary shall ensure that a retail electric supplier that acquires Federal renewable energy credits associated with the generation of renewable energy from an existing facility may use such credits for purpose of its compliance with subsection (b)(1). Such credits may not be sold, exchanged, or transferred for the purpose of compliance by another retail electric supplier.

“(g) RENEWABLE ENERGY CREDIT TRADING.—(1) A Federal renewable energy credit, may be sold, transferred or exchanged by the entity to whom issued or by any other entity who acquires the Federal renewable energy credit, except for those renewable energy credits from existing facilities. A Federal renewable energy credit for any year that is not submitted to satisfy the minimum renewable generation requirement of subsection (c) for that year may be carried forward for use pursuant to subsection (b)(1) within the next 3 years.

“(2) A Federally owned or cooperatively owned utility, or a State or subdivision thereof, that is not a retail electric supplier that generates electric energy by the use of a renewable energy resource at an eligible facility may only sell, transfer or exchange a Federal renewable energy credit to a cooperatively owned utility or an agency, authority or instrumentality of a State or political

subdivision of a State that is a retail electric supplier that has acquired the electric energy associated with the credit.

“(3) The Secretary may delegate to an appropriate market-making entity the administration of a national tradeable renewable energy credit market and a nation energy efficiency credit market for purposes of creating a transparent national market for the sale or trade of renewable energy credits and a transparent national market for the sale or trade of Federal energy efficiency credits.

“(h) RENEWABLE ENERGY CREDIT BORROWING.—At any time before the end of calendar year 2012, a retail electric supplier that has reason to believe it will not be able to fully comply with subsection (b) may—

“(1) submit a plan to the Secretary demonstrating that the retail electric supplier will earn sufficient Federal renewable energy credits and Federal energy efficiency credits within the next 3 calendar years which, when taken into account, will enable the retail electric supplier to meet the requirements of subsection (b) for calendar year 2012 and the subsequent calendar years involved; and

“(2) upon the approval of the plan by the Secretary, apply Federal renewable energy credits and Federal energy efficiency credits that the plan demonstrates will be earned within the next 3 calendar years to meet the requirements of subsection (b) for each calendar year involved.

The retail electric supplier must repay all of the borrowed Federal renewable energy credits and Federal energy efficiency credits by submitting an equivalent number of Federal renewable energy credits and Federal energy efficiency credits, in addition to those otherwise required under subsection (b), by calendar year 2020 or any earlier deadlines specified in the approved plan. Failure to repay the borrowed Federal renewable energy credits and Federal energy efficiency credits shall subject the retail electric supplier to civil penalties under subsection (i) for violation of the requirements of subsection (b) for each calendar year involved.

“(i) ENERGY EFFICIENCY CREDITS.—

“(1) DEFINITIONS.—In this subsection—

“(A) CUSTOMER FACILITY SAVINGS.—The term ‘customer facility savings’ means a reduction in end-use electricity at a facility of an end-use consumer of electricity served by a retail electric supplier, as compared to—

“(i) consumption at the facility during a base year;

“(ii) in the case of new equipment (regardless of whether the new equipment replaces existing equipment at the end of the useful life of the existing equipment), consumption by the new equipment of average efficiency; or

“(iii) in the case of a new facility, consumption at a reference facility.

“(B) ELECTRICITY SAVINGS.—The term ‘electricity savings’ means—

“(i) customer facility savings of electricity consumption adjusted to reflect any associated increase in fuel consumption at the facility;

“(ii) reductions in distribution system losses of electricity achieved by a retail electricity distributor, as compared to losses during the base years;

“(iii) the output of new combined heat and power systems, to the extent provided under paragraph (5); and

“(iv) recycled energy savings.

“(C) QUALIFYING ELECTRICITY SAVINGS.—The term ‘qualifying electricity savings’ means electricity saving that meet the measurement and verification requirements of paragraph (4).

“(D) RECYCLED ENERGY SAVINGS.—The term ‘recycled energy savings’ means a reduction in electricity consumption that is attrib-

utable to electrical or mechanical power, or both, produced by modifying an industrial or commercial system that was in operation before July 1, 2007, in order to recapture energy that would otherwise be wasted.

“(2) PETITION.—The Governor of a State may petition the Secretary to allow up to 27 percent of the requirements of a retail electric supplier under subsection (c) in the State to be met by submitting Federal energy efficiency credits issued pursuant to this subsection.

“(3) ISSUANCE OF CREDITS.—(A) Upon petition by the Governor, the Secretary shall issue energy efficiency credits for electricity savings described in subparagraph (B) achieved in States described in paragraph (2) in accordance with this subsection.

“(B) In accordance with regulations promulgated by the Secretary, the Secretary shall issue credits for—

“(i) qualified electricity savings achieved by a retail electric supplier in a calendar year; and

“(ii) qualified electricity savings achieved by other entities if—

“(I) the measures used to achieve the qualifying electricity savings were installed or place in operation by the entity seeking the credit or the designated agent of the entity; and

“(II) no retail electric supplier paid a substantial portion of the cost of achieving the qualified electricity savings (unless the retail electric supplier has waived any entitlement to the credit).

“(4) MEASUREMENT AND VERIFICATION OF ELECTRICITY SAVINGS.—Not later than June 30, 2009, the Secretary shall promulgate regulations regarding the measurement and verification of electricity savings under this subsection, including regulations covering—

“(A) procedures and standards for defining and measuring electricity savings that will be eligible to receive credits under paragraph (3), which shall—

“(i) specify the types of energy efficiency and energy conservation that will be eligible for the credits;

“(ii) require that energy consumption for customer facilities or portions of facilities in the applicable base and current years be adjusted, as appropriate, to account for changes in weather, level of production, and building area;

“(iii) account for the useful life of electricity savings measures;

“(iv) include specified electricity savings values for specific, commonly-used efficiency measures;

“(v) specify the extent to which electricity savings attributable to measures carried out before the date of enactment of this section are eligible to receive credits under this subsection; and

“(vi) exclude electricity savings that (I) are not properly attributable to measures carried out by the entity seeking the credit; or (II) have already been credited under this section to another entity;

“(B) procedures and standards for third-party verification of reported electricity savings; and

“(C) such requirements for information, reports, and access to facilities as may be necessary to carry out this subsection.

“(5) COMBINED HEAT AND POWER.—Under regulations promulgated by the Secretary, the increment of electricity output of a new combined heat and power system that is attributable to the higher efficiency of the combined system (as compared to the efficiency of separate production of the electric and thermal outputs), shall be considered electricity savings under this subsection.

“(j) ENFORCEMENT.—A retail electric supplier that does not comply with subsection (b) shall be liable for the payment of a civil

penalty. That penalty shall be calculated on the basis of the number of kilowatt-hours represented by the retail electric supplier's failure to comply with subsection (b), multiplied by the lesser of 4.5 cents (adjusted for inflation for such calendar year, based on the Gross Domestic Product Implicit Price Deflator) or 300 percent of the average market value of Federal renewable energy credits and energy efficiency credits for the compliance period. Any such penalty shall be due and payable without demand to the Secretary as provided in the regulations issued under subsection (e).

“(k) ALTERNATIVE COMPLIANCE PAYMENTS.—The Secretary shall accept payment equal to the lesser of:

“(1) 200 percent of the average market value of Federal renewable energy credits and Federal energy efficiency credits for the applicable compliance period; or

“(2) 2.5 cents per kilowatt hour adjusted on January 1 of each year following calendar year 2006 based on the Gross Domestic Product Implicit Price Deflator,

as a means of compliance under subsection (b)(4)

“(1) INFORMATION COLLECTION.—The Secretary may collect the information necessary to verify and audit—

“(1) the annual renewable energy generation of any retail electric supplier, Federal renewable energy credits submitted by a retail electric supplier pursuant to subsection (b)(1) and Federal energy efficiency credits submitted by a retail electric supplier pursuant to subsection (b)(2);

“(2) annual electricity savings achieved pursuant to subsection (i);

“(3) the validity of Federal renewable energy credits submitted for compliance by a retail electric supplier to the Secretary; and

“(4) the quantity of electricity sales of all retail electric suppliers.

“(m) ENVIRONMENTAL SAVINGS CLAUSE.—Incremental hydropower shall be subject to all applicable environmental laws and licensing and regulatory requirements.

“(n) STATE PROGRAMS.—(1) Nothing in this section diminishes any authority of a State or political subdivision of a State to—

“(A) adopt or enforce any law or regulation respecting renewable energy or energy efficiency, including but not limited to programs that exceed the required amount of renewable energy or energy efficiency under this section, or

“(B) regulate the acquisition and disposition of Federal renewable energy credits and Federal energy efficiency credits by retail electric suppliers.

No law or regulation referred to in subparagraph (A) shall relieve any person of any requirement otherwise applicable under this section. The Secretary, in consultation with States having renewable energy programs and energy efficiency programs, shall preserve the integrity of such State programs, including programs that exceed the required amount of renewable energy and energy efficiency under this section, and shall facilitate coordination between the Federal program and State programs.

“(2) In the rule establishing the program under this section, the Secretary shall incorporate common elements of existing renewable energy and energy efficiency programs, including State programs, to ensure administrative ease, market transparency and effective enforcement. The Secretary shall work with the States to minimize administrative burdens and costs to retail electric suppliers.

“(o) RECOVERY OF COSTS.—An electric utility whose sales of electric energy are subject to rate regulation, including any utility whose rates are regulated by the Commission and any State regulated electric utility,

shall not be denied the opportunity to recover the full amount of the prudently incurred incremental cost of renewable energy and energy efficiency obtained to comply with the requirements of subsection (b). For purposes of this subsection, the definitions in section 3 of this Act shall apply to the terms electric utility, State regulated electric utility, State agency, Commission, and State regulatory authority.

“(p) PROGRAM REVIEW.—The Secretary shall enter into a contract with the National Academy of Sciences to conduct a comprehensive evaluation of all aspects of the program established under this section, within 8 years of enactment of this section. The study shall include an evaluation of—

“(1) the effectiveness of the program in increasing the market penetration and lowering the cost of the eligible renewable energy and energy efficiency technologies;

“(2) the opportunities for any additional technologies and sources of renewable energy and energy efficiency emerging since enactment of this section;

“(3) the impact on the regional diversity and reliability of supply sources, including the power quality benefits of distributed generation;

“(4) the regional resource development relative to renewable potential and reasons for any under investment in renewable resources; and

“(5) the net cost/benefit of the renewable electricity standard to the national and State economies, including retail power costs, economic development benefits of investment, avoided costs related to environmental and congestion mitigation investments that would otherwise have been required, impact on natural gas demand and price, effectiveness of green marketing programs at reducing the cost of renewable resources.

The Secretary shall transmit the results of the evaluation and any recommendations for modifications and improvements to the program to Congress not later than January 1, 2016.

“(q) STATE RENEWABLE ENERGY AND ENERGY EFFICIENCY ACCOUNT PROGRAM.—(1) There is established in the Treasury a State renewable energy and energy efficiency account program.

“(2) All money collected by the Secretary from the alternative compliance payments under subsection (k) shall be deposited into the State renewable energy and energy efficiency account established pursuant to this subsection.

“(3) Proceeds deposited in the State renewable energy and energy efficiency account shall be used by the Secretary, subject to annual appropriations, for a program to provide grants to the State agency responsible for administering a fund to promote renewable energy generation and energy efficiency for customers of the State, or an alternative agency designated by the State, or if no such agency exists, to the State agency developing State energy conservation plans under section 363 of the Energy Policy and Conservation Act (42 U.S.C. 6322) for the purposes of promoting renewable energy production and providing energy assistance and weatherization services to low-income consumers.

“(4) The Secretary may issue guidelines and criteria for grants awarded under this subsection. At least 75 percent of the funds provided to each State shall be used for promoting renewable energy production and energy efficiency through grants, production incentives or other state-approved funding mechanisms. The funds shall be allocated to the States on the basis of retail electric sales subject to the Renewable electricity Stand-

ard under this section or through voluntary participation. State agencies receiving grants under this section shall maintain such records and evidence of compliance as the Secretary may require.”

(b) TABLE OF CONTENTS.—The table of contents for such title is amended by adding the following new item at the end:

“Sec. 610. Federal renewable electricity standard”.

(c) SUNSET.—Section 610 of such title and the item relating to such section 610 in the table of contents for such title are each repealed as of December 31, 2039.

TITLE XV—CLEAN RENEWABLE ENERGY AND CONSERVATION TAX ACT OF 2007

SEC. 1500. SHORT TITLE; AMENDMENT OF 1986 CODE.

(a) SHORT TITLE.—This title may be cited as the “Clean Renewable Energy and Conservation Tax Act of 2007”.

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

Subtitle A—Clean Renewable Energy Production Incentives PART I—PROVISIONS RELATING TO RENEWABLE ENERGY

SEC. 1501. EXTENSION AND MODIFICATION OF RENEWABLE ENERGY CREDIT.

(a) EXTENSION OF CREDIT.—Each of the following provisions of section 45(d) (relating to qualified facilities) is amended by striking “January 1, 2009” and inserting “January 1, 2013”:

- (1) Paragraph (1).
- (2) Clauses (i) and (ii) of paragraph (2)(A).
- (3) Clauses (i)(I) and (ii) of paragraph (3)(A).
- (4) Paragraph (4).
- (5) Paragraph (5).
- (6) Paragraph (6).
- (7) Paragraph (7).
- (8) Subparagraphs (A) and (B) of paragraph (9).

(b) MODIFICATION OF CREDIT PHASEOUT.—(1) REPEAL OF PHASEOUT.—Subsection (b) of section 45 is amended—

(A) by striking paragraph (1), and
(B) by striking “the 8 cent amount in paragraph (1),” in paragraph (2) thereof.

(2) LIMITATION BASED ON INVESTMENT IN FACILITY.—Subsection (b) of section 45 is amended by inserting before paragraph (2) the following new paragraph:

“(1) LIMITATION BASED ON INVESTMENT IN FACILITY.—

“(A) IN GENERAL.—In the case of any qualified facility originally placed in service after December 31, 2008, the amount of the credit determined under subsection (a) for any taxable year with respect to electricity produced at such facility shall not exceed the product of—

“(i) the applicable percentage with respect to such facility, multiplied by

“(ii) the eligible basis of such facility.

“(B) CARRYFORWARD OF UNUSED LIMITATION AND EXCESS CREDIT.—

“(i) UNUSED LIMITATION.—If the limitation imposed under subparagraph (A) with respect to any facility for any taxable year exceeds the prelimitation credit for such facility for such taxable year, the limitation imposed under subparagraph (A) with respect to such facility for the succeeding taxable year shall be increased by the amount of such excess.

“(ii) EXCESS CREDIT.—If the prelimitation credit with respect to any facility for any taxable year exceeds the limitation imposed under subparagraph (A) with respect to such

facility for such taxable year, the credit determined under subsection (a) with respect to such facility for the succeeding taxable year (determined before the application of subparagraph (A) for such succeeding taxable year) shall be increased by the amount of such excess. With respect to any facility, no amount may be carried forward under this clause to any taxable year beginning after the 10-year period described in subsection (a)(2)(A)(ii) with respect to such facility.

“(iii) PRELIMINATION CREDIT.—The term ‘prelimitation credit’ with respect to any facility for a taxable year means the credit determined under subsection (a) with respect to such facility for such taxable year, determined without regard to subparagraph (A) and after taking into account any increase for such taxable year under clause (ii).

“(C) APPLICABLE PERCENTAGE.—For purposes of this paragraph—

“(i) IN GENERAL.—The term ‘applicable percentage’ means, with respect to any facility, the appropriate percentage prescribed by the Secretary for the month in which such facility is originally placed in service.

“(ii) METHOD OF PRESCRIBING APPLICABLE PERCENTAGES.—The applicable percentages prescribed by the Secretary for any month under clause (i) shall be percentages which yield over a 10-year period amounts of limitation under subparagraph (A) which have a present value equal to 35 percent of the eligible basis of the facility.

“(iii) METHOD OF DISCOUNTING.—The present value under clause (ii) shall be determined—

“(I) as of the last day of the 1st year of the 10-year period referred to in clause (ii),

“(II) by using a discount rate equal to the greater of 110 percent of the Federal long-term rate as in effect under section 1274(d) for the month preceding the month for which the applicable percentage is being prescribed, or 4.5 percent, and

“(III) by taking into account the limitation under subparagraph (A) for any year on the last day of such year.

“(D) ELIGIBLE BASIS.—For purposes of this paragraph—

“(i) IN GENERAL.—The term ‘eligible basis’ means, with respect to any facility, the sum of—

“(I) the basis of such facility determined as of the time that such facility is originally placed in service, and

“(II) the portion of the basis of any shared qualified property which is properly allocable to such facility under clause (ii).

“(ii) RULES FOR ALLOCATION.—For purposes of subclause (II) of clause (i), the basis of shared qualified property shall be allocated among all qualified facilities which are projected to be placed in service and which require utilization of such property in proportion to projected generation from such facilities.

“(iii) SHARED QUALIFIED PROPERTY.—For purposes of this paragraph, the term ‘shared qualified property’ means, with respect to any facility, any property described in section 168(e)(3)(B)(vi)—

“(I) which a qualified facility will require for utilization of such facility, and

“(II) which is not a qualified facility.

“(iv) SPECIAL RULE RELATING TO GEOTHERMAL FACILITIES.—In the case of any qualified facility using geothermal energy to produce electricity, the basis of such facility for purposes of this paragraph shall be determined as though intangible drilling and development costs described in section 263(c) were capitalized rather than expensed.

“(E) SPECIAL RULE FOR FIRST AND LAST YEAR OF CREDIT PERIOD.—In the case of any taxable year any portion of which is not

within the 10-year period described in subsection (a)(2)(A)(ii) with respect to any facility, the amount of the limitation under subparagraph (A) with respect to such facility shall be reduced by an amount which bears the same ratio to the amount of such limitation (determined without regard to this subparagraph) as such portion of the taxable year which is not within such period bears to the entire taxable year.

“(F) ELECTION TO TREAT ALL FACILITIES PLACED IN SERVICE IN A YEAR AS 1 FACILITY.—At the election of the taxpayer, all qualified facilities which are part of the same project and which are placed in service during the same calendar year shall be treated for purposes of this section as 1 facility which is placed in service at the mid-point of such year or the first day of the following calendar year.”

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to property originally placed in service after December 31, 2008.

(2) REPEAL OF CREDIT PHASEOUT.—The amendments made by subsection (b)(1) shall apply to taxable years ending after December 31, 2008.

SEC. 1502. PRODUCTION CREDIT FOR ELECTRICITY PRODUCED FROM MARINE RENEWABLES.

(a) IN GENERAL.—Paragraph (1) of section 45(c) (relating to resources) is amended by striking “and” at the end of subparagraph (G), by striking the period at the end of subparagraph (H) and inserting “, and”, and by adding at the end the following new subparagraph:

“(I) marine and hydrokinetic renewable energy.”

(b) MARINE RENEWABLES.—Subsection (c) of section 45 is amended by adding at the end the following new paragraph:

“(10) MARINE AND HYDROKINETIC RENEWABLE ENERGY.—

“(A) IN GENERAL.—The term ‘marine and hydrokinetic renewable energy’ means energy derived from—

“(i) waves, tides, and currents in oceans, estuaries, and tidal areas,

“(ii) free flowing water in rivers, lakes, and streams,

“(iii) free flowing water in an irrigation system, canal, or other man-made channel, including projects that utilize nonmechanical structures to accelerate the flow of water for electric power production purposes, or

“(iv) differentials in ocean temperature (ocean thermal energy conversion).

“(B) EXCEPTIONS.—Such term shall not include any energy which is derived from any source which utilizes a dam, diversionary structure (except as provided in subparagraph (A)(iii)), or impoundment for electric power production purposes.”

(c) DEFINITION OF FACILITY.—Subsection (d) of section 45 is amended by adding at the end the following new paragraph:

“(11) MARINE AND HYDROKINETIC RENEWABLE ENERGY FACILITIES.—In the case of a facility producing electricity from marine and hydrokinetic renewable energy, the term ‘qualified facility’ means any facility owned by the taxpayer—

“(A) which has a nameplate capacity rating of at least 150 kilowatts, and

“(B) which is originally placed in service on or after the date of the enactment of this paragraph and before January 1, 2013.”

(d) CREDIT RATE.—Subparagraph (A) of section 45(b)(4) is amended by striking “or (9)” and inserting “(9), or (11)”.

(e) COORDINATION WITH SMALL IRRIGATION POWER.—Paragraph (5) of section 45(d), as amended by this Act, is amended by striking “January 1, 2013” and inserting “the date of the enactment of paragraph (11)”.

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to electricity produced and sold after the date of the enactment of this Act, in taxable years ending after such date.

SEC. 1503. EXTENSION AND MODIFICATION OF ENERGY CREDIT.

(a) EXTENSION OF CREDIT.—

(1) SOLAR ENERGY PROPERTY.—Paragraphs (2)(A)(i)(II) and (3)(A)(ii) of section 48(a) (relating to energy credit) are each amended by striking “January 1, 2009” and inserting “January 1, 2017”.

(2) FUEL CELL PROPERTY.—Subparagraph (E) of section 48(c)(1) (relating to qualified fuel cell property) is amended by striking “December 31, 2008” and inserting “December 31, 2016”.

(3) MICROTURBINE PROPERTY.—Subparagraph (E) of section 48(c)(2) (relating to qualified microturbine property) is amended by striking “December 31, 2008” and inserting “December 31, 2016”.

(b) ALLOWANCE OF ENERGY CREDIT AGAINST ALTERNATIVE MINIMUM TAX.—Subparagraph (B) of section 38(c)(4) (relating to specified credits) is amended by striking “and” at the end of clause (iii), by striking the period at the end of clause (iv) and inserting “, and”, and by adding at the end the following new clause:

“(v) the credit determined under section 46 to the extent that such credit is attributable to the energy credit determined under section 48.”

(c) ENERGY CREDIT FOR COMBINED HEAT AND POWER SYSTEM PROPERTY.—

(1) IN GENERAL.—Section 48(a)(3)(A) (defining energy property) is amended by striking “or” at the end of clause (iii), by inserting “or” at the end of clause (iv), and by adding at the end the following new clause:

“(v) combined heat and power system property.”

(2) COMBINED HEAT AND POWER SYSTEM PROPERTY.—Section 48 (relating to energy credit; reforestation credit) is amended by adding at the end the following new subsection:

“(d) COMBINED HEAT AND POWER SYSTEM PROPERTY.—For purposes of subsection (a)(3)(A)(v)—

“(1) COMBINED HEAT AND POWER SYSTEM PROPERTY.—The term ‘combined heat and power system property’ means property comprising a system—

“(A) which uses the same energy source for the simultaneous or sequential generation of electrical power, mechanical shaft power, or both, in combination with the generation of steam or other forms of useful thermal energy (including heating and cooling applications),

“(B) which produces—

“(i) at least 20 percent of its total useful energy in the form of thermal energy which is not used to produce electrical or mechanical power (or combination thereof), and

“(ii) at least 20 percent of its total useful energy in the form of electrical or mechanical power (or combination thereof),

“(C) the energy efficiency percentage of which exceeds 60 percent, and

“(D) which is placed in service before January 1, 2017.

“(2) LIMITATION.—

“(A) IN GENERAL.—In the case of combined heat and power system property with an electrical capacity in excess of the applicable capacity placed in service during the taxable year, the credit under subsection (a)(1) (determined without regard to this paragraph) for such year shall be equal to the amount which bears the same ratio to such credit as the applicable capacity bears to the capacity of such property.

“(B) APPLICABLE CAPACITY.—For purposes of subparagraph (A), the term ‘applicable ca-

capacity’ means 15 megawatts or a mechanical energy capacity of more than 20,000 horsepower or an equivalent combination of electrical and mechanical energy capacities.

“(C) MAXIMUM CAPACITY.—The term ‘combined heat and power system property’ shall not include any property comprising a system if such system has a capacity in excess of 50 megawatts or a mechanical energy capacity in excess of 67,000 horsepower or an equivalent combination of electrical and mechanical energy capacities.

“(3) SPECIAL RULES.—

“(A) ENERGY EFFICIENCY PERCENTAGE.—For purposes of this subsection, the energy efficiency percentage of a system is the fraction—

“(i) the numerator of which is the total useful electrical, thermal, and mechanical power produced by the system at normal operating rates, and expected to be consumed in its normal application, and

“(ii) the denominator of which is the lower heating value of the fuel sources for the system.

“(B) DETERMINATIONS MADE ON BTU BASIS.—The energy efficiency percentage and the percentages under paragraph (1)(B) shall be determined on a Btu basis.

“(C) INPUT AND OUTPUT PROPERTY NOT INCLUDED.—The term ‘combined heat and power system property’ does not include property used to transport the energy source to the facility or to distribute energy produced by the facility.

“(4) SYSTEMS USING BIOMASS.—If a system is designed to use biomass (within the meaning of paragraphs (2) and (3) of section 45(c) without regard to the last sentence of paragraph (3)(A)) for at least 90 percent of the energy source—

“(A) paragraph (1)(C) shall not apply, but

“(B) the amount of credit determined under subsection (a) with respect to such system shall not exceed the amount which bears the same ratio to such amount of credit (determined without regard to this paragraph) as the energy efficiency percentage of such system bears to 60 percent.”

(d) INCREASE OF CREDIT LIMITATION FOR FUEL CELL PROPERTY.—Subparagraph (B) of section 48(c)(1) is amended by striking “\$500” and inserting “\$1,500”.

(e) PUBLIC ELECTRIC UTILITY PROPERTY TAKEN INTO ACCOUNT.—

(1) IN GENERAL.—Paragraph (3) of section 48(a) is amended by striking the second sentence thereof.

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 48(c) is amended by striking subparagraph (D) and redesignating subparagraph (E) as subparagraph (D).

(B) Paragraph (2) of section 48(c) is amended by striking subparagraph (D) and redesignating subparagraph (E) as subparagraph (D).

(f) CLERICAL AMENDMENTS.—Paragraphs (1)(B) and (2)(B) of section 48(c) are each amended by striking “paragraph (1)” and inserting “subsection (a)”.

(g) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on the date of the enactment of this Act.

(2) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—The amendments made by subsection (b) shall apply to credits determined under section 46 of the Internal Revenue Code of 1986 in taxable years beginning after the date of the enactment of this Act and to carrybacks of such credits.

(3) COMBINED HEAT AND POWER AND FUEL CELL PROPERTY.—The amendments made by subsections (c) and (d) shall apply to periods after the date of the enactment of this Act, in taxable years ending after such date,

under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1986 (as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990).

(4) PUBLIC ELECTRIC UTILITY PROPERTY.—The amendments made by subsection (e) shall apply to periods after June 20, 2007, in taxable years ending after such date, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1986 (as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990).

SEC. 1504. EXTENSION AND MODIFICATION OF CREDIT FOR RESIDENTIAL ENERGY EFFICIENT PROPERTY.

(a) EXTENSION.—Section 25D(g) (relating to termination) is amended by striking “December 31, 2008” and inserting “December 31, 2014”.

(b) MAXIMUM CREDIT FOR SOLAR ELECTRIC PROPERTY.—

(1) IN GENERAL.—Section 25D(b)(1)(A) (relating to maximum credit) is amended by striking “\$2,000” and inserting “\$4,000”.

(2) CONFORMING AMENDMENT.—Section 25D(e)(4)(A)(i) is amended by striking “\$6,667” and inserting “\$13,334”.

(c) CREDIT FOR RESIDENTIAL WIND PROPERTY.—

(1) IN GENERAL.—Section 25D(a) (relating to allowance of credit) is amended by striking “and” at the end of paragraph (2), by striking the period at the end of paragraph (3) and inserting “, and”, and by adding at the end the following new paragraph:

“(4) 30 percent of the qualified small wind energy property expenditures made by the taxpayer during such year.”

(2) LIMITATION.—Section 25D(b)(1) (relating to maximum credit) is amended by striking “and” at the end of subparagraph (B), by striking the period at the end of subparagraph (C) and inserting “, and”, and by adding at the end the following new subparagraph:

“(D) \$500 with respect to each half kilowatt of capacity (not to exceed \$4,000) of wind turbines for which qualified small wind energy property expenditures are made.”

(3) QUALIFIED SMALL WIND ENERGY PROPERTY EXPENDITURES.—

(A) IN GENERAL.—Section 25D(d) (relating to definitions) is amended by adding at the end the following new paragraph:

“(4) QUALIFIED SMALL WIND ENERGY PROPERTY EXPENDITURE.—The term ‘qualified small wind energy property expenditure’ means an expenditure for property which uses a wind turbine to generate electricity for use in connection with a dwelling unit located in the United States and used as a residence by the taxpayer.”

(B) NO DOUBLE BENEFIT.—Section 45(d)(1) (relating to wind facility) is amended by adding at the end the following new sentence: “Such term shall not include any facility with respect to which any qualified small wind energy property expenditure (as defined in subsection (d)(4) of section 25D) is taken into account in determining the credit under such section.”

(4) MAXIMUM EXPENDITURES IN CASE OF JOINT OCCUPANCY.—Section 25D(e)(4)(A) (relating to maximum expenditures) is amended by striking “and” at the end of clause (ii), by striking the period at the end of clause (iii) and inserting “, and”, and by adding at the end the following new clause:

“(iv) \$1,667 in the case of each half kilowatt of capacity of wind turbines for which qualified small wind energy property expenditures are made.”

(d) CREDIT ALLOWED AGAINST ALTERNATIVE MINIMUM TAX.—

(1) IN GENERAL.—Subsection (c) of section 25D is amended to read as follows:

“(c) LIMITATION BASED ON AMOUNT OF TAX; CARRYFORWARD OF UNUSED CREDIT.—

“(1) LIMITATION BASED ON AMOUNT OF TAX.—In the case of a taxable year to which section 26(a)(2) does not apply, the credit allowed under subsection (a) for the taxable year shall not exceed the excess of—

“(A) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

“(B) the sum of the credits allowable under this subpart (other than this section) and section 27 for the taxable year.

“(2) CARRYFORWARD OF UNUSED CREDIT.—

“(A) RULE FOR YEARS IN WHICH ALL PERSONAL CREDITS ALLOWED AGAINST REGULAR AND ALTERNATIVE MINIMUM TAX.—In the case of a taxable year to which section 26(a)(2) applies, if the credit allowable under subsection (a) exceeds the limitation imposed by section 26(a)(2) for such taxable year reduced by the sum of the credits allowable under this subpart (other than this section), such excess shall be carried to the succeeding taxable year and added to the credit allowable under subsection (a) for such succeeding taxable year.

“(B) RULE FOR OTHER YEARS.—In the case of a taxable year to which section 26(a)(2) does not apply, if the credit allowable under subsection (a) exceeds the limitation imposed by paragraph (1) for such taxable year, such excess shall be carried to the succeeding taxable year and added to the credit allowable under subsection (a) for such succeeding taxable year.”

(2) CONFORMING AMENDMENTS.—

(A) Section 23(b)(4)(B) is amended by inserting “and section 25D” after “this section”.

(B) Section 24(b)(3)(B) is amended by striking “and 25B” and inserting “, 25B, and 25D”.

(C) Section 25B(g)(2) is amended by striking “section 23” and inserting “sections 23 and 25D”.

(D) Section 26(a)(1) is amended by striking “and 25B” and inserting “25B, and 25D”.

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to expenditures after December 31, 2007.

(2) ALLOWANCE AGAINST ALTERNATIVE MINIMUM TAX.—

(A) IN GENERAL.—The amendments made by subsection (d) shall apply to taxable years beginning after the date of the enactment of this Act.

(B) APPLICATION OF EGTRRA SUNSET.—The amendments made by subparagraphs (A) and (B) of subsection (d)(2) shall be subject to title IX of the Economic Growth and Tax Relief Reconciliation Act of 2001 in the same manner as the provisions of such Act to which such amendments relate.

SEC. 1505. EXTENSION AND MODIFICATION OF SPECIAL RULE TO IMPLEMENT FERC AND STATE ELECTRIC RESTRUCTURING POLICY.

(a) EXTENSION FOR QUALIFIED ELECTRIC UTILITIES.—

(1) IN GENERAL.—Paragraph (3) of section 451(i) (relating to special rule for sales or dispositions to implement Federal Energy Regulatory Commission or State electric restructuring policy) is amended by inserting “(before January 1, 2010, in the case of a qualified electric utility)” after “January 1, 2008”.

(2) QUALIFIED ELECTRIC UTILITY.—Subsection (i) of section 451 is amended by redesignating paragraphs (6) through (10) as paragraphs (7) through (11), respectively, and by inserting after paragraph (5) the following new paragraph:

“(6) QUALIFIED ELECTRIC UTILITY.—For purposes of this subsection, the term ‘qualified electric utility’ means a person that, as of

the date of the qualifying electric transmission transaction, is vertically integrated, in that it is both—

“(A) a transmitting utility (as defined in section 3(23) of the Federal Power Act (16 U.S.C. 796(23)) with respect to the transmission facilities to which the election under this subsection applies, and

“(B) an electric utility (as defined in section 3(22) of the Federal Power Act (16 U.S.C. 796(22))).”

(b) EXTENSION OF PERIOD FOR TRANSFER OF OPERATIONAL CONTROL AUTHORIZED BY FERC.—Clause (ii) of section 451(i)(4)(B) is amended by striking “December 31, 2007” and inserting “the date which is 4 years after the close of the taxable year in which the transaction occurs”.

(c) PROPERTY LOCATED OUTSIDE THE UNITED STATES NOT TREATED AS EXEMPT UTILITY PROPERTY.—Paragraph (5) of section 451(i) is amended by adding at the end the following new subparagraph:

“(C) EXCEPTION FOR PROPERTY LOCATED OUTSIDE THE UNITED STATES.—The term ‘exempt utility property’ shall not include any property which is located outside the United States.”

(d) EFFECTIVE DATES.—

(1) EXTENSION.—The amendments made by subsection (a) shall apply to transactions after December 31, 2007.

(2) TRANSFERS OF OPERATIONAL CONTROL.—The amendment made by subsection (b) shall take effect as if included in section 909 of the American Jobs Creation Act of 2004.

(3) EXCEPTION FOR PROPERTY LOCATED OUTSIDE THE UNITED STATES.—The amendment made by subsection (c) shall apply to transactions after the date of the enactment of this Act.

SEC. 1506. NEW CLEAN RENEWABLE ENERGY BONDS.

(a) IN GENERAL.—Part IV of subchapter A of chapter 1 (relating to credits against tax) is amended by adding at the end the following new subpart:

“Subpart I—Qualified Tax Credit Bonds

“Sec. 54A. Credit to holders of qualified tax credit bonds.

“Sec. 54B. New clean renewable energy bonds.

“SEC. 54A. CREDIT TO HOLDERS OF QUALIFIED TAX CREDIT BONDS.

“(a) ALLOWANCE OF CREDIT.—If a taxpayer holds a qualified tax credit bond on one or more credit allowance dates of the bond during any taxable year, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of the credits determined under subsection (b) with respect to such dates.

“(b) AMOUNT OF CREDIT.—

“(1) IN GENERAL.—The amount of the credit determined under this subsection with respect to any credit allowance date for a qualified tax credit bond is 25 percent of the annual credit determined with respect to such bond.

“(2) ANNUAL CREDIT.—The annual credit determined with respect to any qualified tax credit bond is the product of—

“(A) the applicable credit rate, multiplied by

“(B) the outstanding face amount of the bond.

“(3) APPLICABLE CREDIT RATE.—For purposes of paragraph (2), the applicable credit rate is 70 percent of the rate which the Secretary estimates will permit the issuance of qualified tax credit bonds with a specified maturity or redemption date without discount and without interest cost to the qualified issuer. The applicable credit rate with respect to any qualified tax credit bond shall be determined as of the first day on which

there is a binding, written contract for the sale or exchange of the bond.

“(4) SPECIAL RULE FOR ISSUANCE AND REDEMPTION.—In the case of a bond which is issued during the 3-month period ending on a credit allowance date, the amount of the credit determined under this subsection with respect to such credit allowance date shall be a ratable portion of the credit otherwise determined based on the portion of the 3-month period during which the bond is outstanding. A similar rule shall apply when the bond is redeemed or matures.

“(c) LIMITATION BASED ON AMOUNT OF TAX.—

“(1) IN GENERAL.—The credit allowed under subsection (a) for any taxable year shall not exceed the excess of—

“(A) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

“(B) the sum of the credits allowable under this part (other than subpart C and this subpart).

“(2) CARRYOVER OF UNUSED CREDIT.—If the credit allowable under subsection (a) exceeds the limitation imposed by paragraph (1) for such taxable year, such excess shall be carried to the succeeding taxable year and added to the credit allowable under subsection (a) for such taxable year (determined before the application of paragraph (1) for such succeeding taxable year).

“(d) QUALIFIED TAX CREDIT BOND.—For purposes of this section—

“(1) QUALIFIED TAX CREDIT BOND.—The term ‘qualified tax credit bond’ means a new clean renewable energy bond which is part of an issue that meets the requirements of paragraphs (2), (3), (4), (5), and (6).

“(2) SPECIAL RULES RELATING TO EXPENDITURES.—

“(A) IN GENERAL.—An issue shall be treated as meeting the requirements of this paragraph if, as of the date of issuance, the issuer reasonably expects—

“(i) 100 percent or more of the available project proceeds to be spent for 1 or more qualified purposes within the 3-year period beginning on such date of issuance, and

“(ii) a binding commitment with a third party to spend at least 10 percent of such available project proceeds will be incurred within the 6-month period beginning on such date of issuance.

“(B) FAILURE TO SPEND REQUIRED AMOUNT OF BOND PROCEEDS WITHIN 3 YEARS.—

“(i) IN GENERAL.—To the extent that less than 100 percent of the available project proceeds of the issue are expended by the close of the expenditure period for 1 or more qualified purposes, the issuer shall redeem all of the nonqualified bonds within 90 days after the end of such period. For purposes of this paragraph, the amount of the nonqualified bonds required to be redeemed shall be determined in the same manner as under section 142.

“(ii) EXPENDITURE PERIOD.—For purposes of this subpart, the term ‘expenditure period’ means, with respect to any issue, the 3-year period beginning on the date of issuance. Such term shall include any extension of such period under clause (iii).

“(iii) EXTENSION OF PERIOD.—Upon submission of a request prior to the expiration of the expenditure period (determined without regard to any extension under this clause), the Secretary may extend such period if the issuer establishes that the failure to expend the proceeds within the original expenditure period is due to reasonable cause and the expenditures for qualified purposes will continue to proceed with due diligence.

“(C) QUALIFIED PURPOSE.—For purposes of this paragraph, the term ‘qualified purpose’ means a purpose specified in section 54B(a)(1).

“(D) REIMBURSEMENT.—For purposes of this subtitle, available project proceeds of an issue shall be treated as spent for a qualified purpose if such proceeds are used to reimburse the issuer for amounts paid for a qualified purpose after the date that the Secretary makes an allocation of bond limitation with respect to such issue, but only if—

“(i) prior to the payment of the original expenditure, the issuer declared its intent to reimburse such expenditure with the proceeds of a qualified tax credit bond,

“(ii) not later than 60 days after payment of the original expenditure, the issuer adopts an official intent to reimburse the original expenditure with such proceeds, and

“(iii) the reimbursement is made not later than 18 months after the date the original expenditure is paid.

“(3) REPORTING.—An issue shall be treated as meeting the requirements of this paragraph if the issuer of qualified tax credit bonds submits reports similar to the reports required under section 149(e).

“(4) SPECIAL RULES RELATING TO ARBITRAGE.—

“(A) IN GENERAL.—An issue shall be treated as meeting the requirements of this paragraph if the issuer satisfies the requirements of section 148 with respect to the proceeds of the issue.

“(B) SPECIAL RULE FOR INVESTMENTS DURING EXPENDITURE PERIOD.—An issue shall not be treated as failing to meet the requirements of subparagraph (A) by reason of any investment of available project proceeds during the expenditure period.

“(C) SPECIAL RULE FOR RESERVE FUNDS.—An issue shall not be treated as failing to meet the requirements of subparagraph (A) by reason of any fund which is expected to be used to repay such issue if—

“(i) such fund is funded at a rate not more rapid than equal annual installments,

“(ii) such fund is funded in a manner reasonably expected to result in an amount not greater than an amount necessary to repay the issue, and

“(iii) the yield on such fund is not greater than the discount rate determined under paragraph (5)(B) with respect to the issue.

“(5) MATURITY LIMITATION.—

“(A) IN GENERAL.—An issue shall be treated as meeting the requirements of this paragraph if the maturity of any bond which is part of such issue does not exceed the maximum term determined by the Secretary under subparagraph (B).

“(B) MAXIMUM TERM.—During each calendar month, the Secretary shall determine the maximum term permitted under this paragraph for bonds issued during the following calendar month. Such maximum term shall be the term which the Secretary estimates will result in the present value of the obligation to repay the principal on the bond being equal to 50 percent of the face amount of such bond. Such present value shall be determined using as a discount rate the average annual interest rate of tax-exempt obligations having a term of 10 years or more which are issued during the month. If the term as so determined is not a multiple of a whole year, such term shall be rounded to the next highest whole year.

“(6) PROHIBITION ON FINANCIAL CONFLICTS OF INTEREST.—An issue shall be treated as meeting the requirements of this paragraph if the issuer certifies that—

“(A) applicable State and local law requirements governing conflicts of interest are satisfied with respect to such issue, and

“(B) if the Secretary prescribes additional conflicts of interest rules governing the appropriate Members of Congress, Federal, State, and local officials, and their spouses, such additional rules are satisfied with respect to such issue.

“(e) OTHER DEFINITIONS.—For purposes of this subchapter—

“(1) CREDIT ALLOWANCE DATE.—The term ‘credit allowance date’ means—

“(A) March 15,

“(B) June 15,

“(C) September 15, and

“(D) December 15.

Such term includes the last day on which the bond is outstanding.

“(2) BOND.—The term ‘bond’ includes any obligation.

“(3) STATE.—The term ‘State’ includes the District of Columbia and any possession of the United States.

“(4) AVAILABLE PROJECT PROCEEDS.—The term ‘available project proceeds’ means—

“(A) the excess of—

“(i) the proceeds from the sale of an issue, over

“(ii) the issuance costs financed by the issue (to the extent that such costs do not exceed 2 percent of such proceeds), and

“(B) the proceeds from any investment of the excess described in subparagraph (A).

“(f) CREDIT TREATED AS INTEREST.—For purposes of this subtitle, the credit determined under subsection (a) shall be treated as interest which is includible in gross income.

“(g) S CORPORATIONS AND PARTNERSHIPS.—In the case of a tax credit bond held by an S corporation or partnership, the allocation of the credit allowed by this section to the shareholders of such corporation or partners of such partnership shall be treated as a distribution.

“(h) BONDS HELD BY REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS.—If any qualified tax credit bond is held by a regulated investment company or a real estate investment trust, the credit determined under subsection (a) shall be allowed to shareholders of such company or beneficiaries of such trust (and any gross income included under subsection (f) with respect to such credit shall be treated as distributed to such shareholders or beneficiaries) under procedures prescribed by the Secretary.

“(i) CREDITS MAY BE STRIPPED.—Under regulations prescribed by the Secretary—

“(1) IN GENERAL.—There may be a separation (including at issuance) of the ownership of a qualified tax credit bond and the entitlement to the credit under this section with respect to such bond. In case of any such separation, the credit under this section shall be allowed to the person who on the credit allowance date holds the instrument evidencing the entitlement to the credit and not to the holder of the bond.

“(2) CERTAIN RULES TO APPLY.—In the case of a separation described in paragraph (1), the rules of section 1286 shall apply to the qualified tax credit bond as if it were a stripped bond and to the credit under this section as if it were a stripped coupon.

“SEC. 54B. NEW CLEAN RENEWABLE ENERGY BONDS.

“(a) NEW CLEAN RENEWABLE ENERGY BOND.—For purposes of this subpart, the term ‘new clean renewable energy bond’ means any bond issued as part of an issue if—

“(1) 100 percent of the available project proceeds of such issue are to be used for capital expenditures incurred by public power providers, governmental bodies, or cooperative electric companies for one or more qualified renewable energy facilities,

“(2) the bond is issued by a qualified issuer, and

“(3) the issuer designates such bond for purposes of this section.

“(b) LIMITATION ON AMOUNT OF BONDS DESIGNATED.—

“(1) IN GENERAL.—The maximum aggregate face amount of bonds which may be designated under subsection (a) by any issuer shall not exceed the limitation amount allocated under this subsection to such issuer.

“(2) NATIONAL LIMITATION ON AMOUNT OF BONDS DESIGNATED.—There is a national new clean renewable energy bond limitation of \$2,000,000,000 which shall be allocated by the Secretary as provided in paragraph (3), except that—

“(A) not more than 33½ percent thereof may be allocated to qualified projects of public power providers,

“(B) not more than 33½ percent thereof may be allocated to qualified projects of governmental bodies, and

“(C) not more than 33½ percent thereof may be allocated to qualified projects of cooperative electric companies.

“(3) METHOD OF ALLOCATION.—

“(A) ALLOCATION AMONG PUBLIC POWER PROVIDERS.—After the Secretary determines the qualified projects of public power providers which are appropriate for receiving an allocation of the national new clean renewable energy bond limitation, the Secretary shall, to the maximum extent practicable, make allocations among such projects in such manner that the amount allocated to each such project bears the same ratio to the cost of such project as the limitation under paragraph (2)(A) bears to the cost of all such projects.

“(B) ALLOCATION AMONG GOVERNMENTAL BODIES AND COOPERATIVE ELECTRIC COMPANIES.—The Secretary shall make allocations of the amount of the national new clean renewable energy bond limitation described in paragraphs (2)(B) and (2)(C) among qualified projects of governmental bodies and cooperative electric companies, respectively, in such manner as the Secretary determines appropriate.

“(c) DEFINITIONS.—For purposes of this section—

“(1) QUALIFIED RENEWABLE ENERGY FACILITY.—The term ‘qualified renewable energy facility’ means a qualified facility (as determined under section 45(d) without regard to paragraphs (8) and (10) thereof and to any placed in service date) owned by a public power provider, a governmental body, or a cooperative electric company.

“(2) PUBLIC POWER PROVIDER.—The term ‘public power provider’ means a State utility with a service obligation, as such terms are defined in section 217 of the Federal Power Act (as in effect on the date of the enactment of this paragraph).

“(3) GOVERNMENTAL BODY.—The term ‘governmental body’ means any State or Indian tribal government, or any political subdivision thereof.

“(4) COOPERATIVE ELECTRIC COMPANY.—The term ‘cooperative electric company’ means a mutual or cooperative electric company described in section 501(c)(12) or section 1381(a)(2)(C).

“(5) CLEAN RENEWABLE ENERGY BOND LENDER.—The term ‘clean renewable energy bond lender’ means a lender which is a cooperative which is owned by, or has outstanding loans to, 100 or more cooperative electric companies and is in existence on February 1, 2002, and shall include any affiliated entity which is controlled by such lender.

“(6) QUALIFIED ISSUER.—The term ‘qualified issuer’ means a public power provider, a governmental body, a cooperative electric company, a clean renewable energy bond lender, or a not-for-profit electric utility which has received a loan or loan guarantee under the Rural Electrification Act.”.

(b) REPORTING.—Subsection (d) of section 6049 (relating to returns regarding payments of interest) is amended by adding at the end the following new paragraph:

“(9) REPORTING OF CREDIT ON QUALIFIED TAX CREDIT BONDS.—

“(A) IN GENERAL.—For purposes of subsection (a), the term ‘interest’ includes amounts includible in gross income under section 54A and such amounts shall be treated as paid on the credit allowance date (as defined in section 54A(e)(1)).

“(B) REPORTING TO CORPORATIONS, ETC.—Except as otherwise provided in regulations, in the case of any interest described in subparagraph (A) of this paragraph, subsection (b)(4) of this section shall be applied without regard to subparagraphs (A), (H), (I), (J), (K), and (L)(i).

“(C) REGULATORY AUTHORITY.—The Secretary may prescribe such regulations as are necessary or appropriate to carry out the purposes of this paragraph, including regulations which require more frequent or more detailed reporting.”.

(c) CONFORMING AMENDMENTS.—

(1) Sections 54(c)(2) and 1400N(1)(3)(B) are each amended by striking “subpart C” and inserting “subparts C and I”.

(2) Section 1397E(c)(2) is amended by striking “subpart H” and inserting “subparts H and I”.

(3) Section 6401(b)(1) is amended by striking “and H” and inserting “H, and I”.

(4) The heading of subpart H of part IV of subchapter A of chapter 1 is amended by striking “Certain Bonds” and inserting “Clean Renewable Energy Bonds”.

(5) The table of subparts for part IV of subchapter A of chapter 1 is amended by striking the item relating to subpart H and inserting the following new items:

“SUBPART H. NONREFUNDABLE CREDIT TO HOLDERS OF CLEAN RENEWABLE ENERGY BONDS.
“SUBPART I. QUALIFIED TAX CREDIT BONDS.”.

(d) APPLICATION OF CERTAIN LABOR STANDARDS ON PROJECTS FINANCED UNDER TAX CREDIT BONDS.—Subchapter IV of chapter 31 of title 40, United States Code, shall apply to projects financed with the proceeds of any tax credit bond (as defined in section 54A of the Internal Revenue Code of 1986).

(e) EFFECTIVE DATES.—The amendments made by this section shall apply to obligations issued after the date of the enactment of this Act.

PART II—PROVISIONS RELATING TO CARBON MITIGATION AND COAL
SEC. 1507. EXPANSION AND MODIFICATION OF ADVANCED COAL PROJECT INVESTMENT CREDIT.

(a) MODIFICATION OF CREDIT AMOUNT.—Section 48A(a) (relating to qualifying advanced coal project credit) is amended by striking “and” at the end of paragraph (1), by striking the period at the end of paragraph (2) and inserting “, and”, and by adding at the end the following paragraph:

“(3) 30 percent of the qualified investment for such taxable year in the case of projects described in clauses (iii) or (iv) of subsection (d)(3)(B).”.

(b) EXPANSION OF AGGREGATE CREDITS.—Section 48A(d)(3)(A) (relating to aggregate credits) is amended by striking “\$1,300,000,000” and inserting “\$2,800,000,000”.

(c) AUTHORIZATION OF ADDITIONAL PROJECTS.—

(1) IN GENERAL.—Subparagraph (B) of section 48A(d)(3) (relating to aggregate credits) is amended to read as follows:

“(B) PARTICULAR PROJECTS.—Of the dollar amount in subparagraph (A), the Secretary is authorized to certify—

“(i) \$800,000,000 for integrated gasification combined cycle projects the application for which is submitted during the period described in paragraph (2)(A)(i),

“(ii) \$500,000,000 for projects which use other advanced coal-based generation tech-

nologies the application for which is submitted during the period described in paragraph (2)(A)(i),

“(iii) \$1,000,000,000 for integrated gasification combined cycle projects the application for which is submitted during the period described in paragraph (2)(A)(ii), and

“(iv) \$500,000,000 for other advanced coal-based generation technology projects the application for which is submitted during the period described in paragraph (2)(A)(ii).”.

(2) APPLICATION PERIOD FOR ADDITIONAL PROJECTS.—Subparagraph (A) of section 48A(d)(2) (relating to certification) is amended to read as follows:

“(A) APPLICATION PERIOD.—Each applicant for certification under this paragraph shall submit an application meeting the requirements of subparagraph (B). An applicant may only submit an application—

“(i) for an allocation from the dollar amount specified in clause (i) or (ii) of paragraph (3)(A) during the 3-year period beginning on the date the Secretary establishes the program under paragraph (1), and

“(ii) for an allocation from the dollar amount specified in clause (iii) or (iv) of paragraph (3)(A) during the 3-year period beginning at the earlier of the termination of the period described in clause (i) or the date prescribed by the Secretary.”.

(3) CAPTURE AND SEQUESTRATION OF CARBON DIOXIDE EMISSIONS REQUIREMENT.—

(A) IN GENERAL.—Section 48A(e)(1) (relating to requirements) is amended by striking “and” at the end of subparagraph (E), by striking the period at the end of subparagraph (F) and inserting “; and”, and by adding at the end the following new subparagraph:

“(G) in the case of any project the application for which is submitted during the period described in subsection (d)(2)(A)(ii), the project includes equipment which separates and sequesters at least 65 percent (70 percent in the case of an application for reallocated credits under subsection (d)(4)) of such project’s total carbon dioxide emissions.”.

(B) HIGHEST PRIORITY FOR PROJECTS WHICH SEQUESTER CARBON DIOXIDE EMISSIONS.—Section 48A(e)(3) is amended by striking “and” at the end of subparagraph (A)(iii), by striking the period at the end of subparagraph (B)(3) and inserting “, and”, and by adding at the end the following new subparagraph:

“(C) give highest priority to projects with the greatest separation and sequestration percentage of total carbon dioxide emissions.”.

(C) RECAPTURE OF CREDIT FOR FAILURE TO SEQUESTER.—Section 48A (relating to qualifying advanced coal project credit) is amended by adding at the end the following new subsection:

“(h) RECAPTURE OF CREDIT FOR FAILURE TO SEQUESTER.—The Secretary shall provide for recapturing the benefit of any credit allowable under subsection (a) with respect to any project which fails to attain or maintain the separation and sequestration requirements of subsection (e)(1)(G).”.

(4) ADDITIONAL PRIORITY FOR RESEARCH PARTNERSHIPS.—Section 48A(e)(3)(B), as amended by paragraph (3)(B), is amended—

(A) by striking “and” at the end of clause (ii),

(B) by redesignating clause (iii) as clause (iv), and

(C) by inserting after clause (ii) the following new clause:

“(iii) applicant participants who have a research partnership with an eligible educational institution (as defined in section 529(e)(5)), and”.

(5) CLERICAL AMENDMENT.—Section 48A(e)(3) is amended by striking “INTEGRATED GASIFICATION COMBINED CYCLE” in the heading and inserting “CERTAIN”.

(d) **COMPETITIVE CERTIFICATION AWARDS MODIFICATION AUTHORITY.**—Section 48A (relating to qualifying advanced coal project credit), as amended by subsection (c)(3), is amended by adding at the end the following new subsection:

“(i) **COMPETITIVE CERTIFICATION AWARDS MODIFICATION AUTHORITY.**—In implementing this section or section 48B, the Secretary is directed to modify the terms of any competitive certification award and any associated closing agreement where such modification—

“(1) is consistent with the objectives of this section,

“(2) is requested by the recipient of the competitive certification award, and

“(3) involves moving the project site to improve the potential to capture and sequester carbon dioxide emissions, reduce costs of transporting feedstock, and serve a broader customer base,

unless the Secretary determines that the dollar amount of tax credits available to the taxpayer under such section would increase as a result of the modification or such modification would result in such project not being originally certified. In considering any such modification, the Secretary shall consult with other relevant Federal agencies, including the Department of Energy.”.

(e) **EFFECTIVE DATES.**—

(1) **IN GENERAL.**—Except as otherwise provided in this subsection, the amendments made by this section shall apply to credits the application for which is submitted during the period described in section 48A(d)(2)(A)(ii) of the Internal Revenue Code of 1986 and which are allocated or reallocated after the date of the enactment of this Act.

(2) **COMPETITIVE CERTIFICATION AWARDS MODIFICATION AUTHORITY.**—The amendment made by subsection (d) shall take effect on the date of the enactment of this Act and is applicable to all competitive certification awards entered into under section 48A or 48B of the Internal Revenue Code of 1986, whether such awards were issued before, on, or after such date of enactment.

(3) **TECHNICAL AMENDMENT.**—The amendment made by subsection (c)(5) shall take effect as if included in the amendment made by section 1307(b) of the Energy Tax Incentives Act of 2005.

SEC. 1508. EXPANSION AND MODIFICATION OF COAL GASIFICATION INVESTMENT CREDIT.

(a) **CREDIT RATE.**—Section 48B(a) (relating to qualifying gasification project credit) is amended by inserting “(30 percent in the case of credits allocated under subsection (d)(1)(B))” after “20 percent”.

(b) **EXPANSION OF AGGREGATE CREDITS.**—Section 48B(d)(1) (relating to qualifying gasification project program) is amended by striking “shall not exceed \$350,000,000” and all that follows and inserting “shall not exceed—

“(A) \$350,000,000, plus

“(B) \$500,000,000 for qualifying gasification projects that include equipment which separates and sequesters at least 75 percent of such a project’s total carbon dioxide emissions,

under rules similar to the rules of section 48A(d)(4).”.

(c) **RECAPTURE OF CREDIT FOR FAILURE TO SEQUESTER.**—Section 48B (relating to qualifying gasification project credit) is amended by adding at the end the following new subsection:

“(f) **RECAPTURE OF CREDIT FOR FAILURE TO SEQUESTER.**—The Secretary shall provide for recapturing the benefit of any credit allowable under subsection (a) with respect to any project which fails to attain or maintain the separation and sequestration requirements for such project under subsection (d)(1).”.

(d) **SELECTION PRIORITIES.**—Section 48B(d) (relating to qualifying gasification project program) is amended by adding at the end the following new paragraph:

“(4) **SELECTION PRIORITIES.**—In determining which qualifying gasification projects to certify under this section, the Secretary shall—

“(A) give highest priority to projects with the greatest separation and sequestration percentage of total carbon dioxide emissions, and

“(B) give high priority to applicant participants who have a research partnership with an eligible educational institution (as defined in section 529(e)(5)).”.

(e) **EFFECTIVE DATE.**—The amendments made by this section shall apply to credits described in section 48B(d)(1)(B) of the Internal Revenue Code of 1986 which are allocated or reallocated after the date of the enactment of this Act.

SEC. 1509. SEVEN-YEAR APPLICABLE RECOVERY PERIOD FOR DEPRECIATION OF QUALIFIED CARBON DIOXIDE PIPELINE PROPERTY.

(a) **IN GENERAL.**—Section 168(e)(3)(C) (defining 7-year property) is amended by striking “and” at the end of clause (iv), by redesignating clause (v) as clause (vi), and by inserting after clause (iv) the following new clause:

“(v) any qualified carbon dioxide pipeline property—

“(I) the original use of which commences with the taxpayer after the date of the enactment of this clause,

“(II) the original purpose of which is to transport carbon dioxide, and

“(III) which is placed in service before January 1, 2011, and”.

(b) **DEFINITION OF QUALIFIED CARBON DIOXIDE PIPELINE PROPERTY.**—Section 168(e) (relating to classification of property) is amended by inserting at the end the following new paragraph:

“(8) **QUALIFIED CARBON DIOXIDE PIPELINE PROPERTY.**—

“(A) **IN GENERAL.**—The term ‘qualified carbon dioxide pipeline property’ means property which is used in the United States solely to transmit qualified carbon dioxide from the point of capture to a secure geological storage or the point at which such qualified carbon dioxide is used as a tertiary injectant.

“(B) **DEFINITIONS AND SPECIAL RULES.**—For purposes of this paragraph—

“(i) **QUALIFIED CARBON DIOXIDE.**—The term ‘qualified carbon dioxide’ means carbon dioxide captured from an industrial source which—

“(I) would otherwise be released into the atmosphere as industrial emission of greenhouse gas, and

“(II) is measured at the source of capture and verified at the point of disposal or injection.

“(ii) **SECURE GEOLOGICAL STORAGE.**—The Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall establish regulations for determining adequate security measures for the geological storage of carbon dioxide under subparagraph (A) such that the carbon dioxide does not escape into the atmosphere. Such term shall include storage at deep saline formations and unminable coal seams under such conditions as the Secretary may determine under such regulations.

“(iii) **TERTIARY INJECTANT.**—The term ‘tertiary injectant’ has the same meaning as when used within section 193(b)(1).”.

(c) **EFFECTIVE DATE.**—The amendments made by this section shall apply to property placed in service after the date of the enactment of this Act.

SEC. 1510. SPECIAL RULES FOR REFUND OF THE COAL EXCISE TAX TO CERTAIN COAL PRODUCERS AND EXPORTERS.

(a) **REFUND.**—

(1) **COAL PRODUCERS.**—

(A) **IN GENERAL.**—Notwithstanding subsections (a)(1) and (c) of section 6416 and section 6511 of the Internal Revenue Code of 1986, if—

(i) a coal producer establishes that such coal producer, or a party related to such coal producer, exported coal produced by such coal producer to a foreign country or shipped coal produced by such coal producer to a possession of the United States, the export or shipment of which was other than through an exporter who has filed a claim for a refund under paragraph (2),

(ii) such coal producer filed a return on or after October 1, 1990, and on or before the date of the enactment of this Act, and

(iii) such coal producer files a claim for refund not later than the close of the 30-day period beginning on the date of the enactment of this Act,

then the Secretary of the Treasury shall pay to such coal producer an amount equal to the tax paid under section 4121 of such Code on such coal exported by the coal producer or a party related to such coal producer.

(B) **SPECIAL RULES FOR CERTAIN TAXPAYERS.**—For purposes of this section—

(i) **ESTABLISHMENT OF EXPORT.**—If a coal producer or a party related to a coal producer has received a judgment described in clause (iii), such coal producer shall be deemed to have established the export of coal to a foreign country or shipment of coal to a possession of the United States under subparagraph (A)(i).

(ii) **AMOUNT OF PAYMENT.**—If a taxpayer described in clause (i) is entitled to a payment under subparagraph (A), the amount of such payment shall be reduced by any amount awarded under the judgment described in clause (iii).

(iii) **JUDGMENT DESCRIBED.**—A judgment is described in this subparagraph if such judgment—

(I) is made by a court of competent jurisdiction within the United States,

(II) relates to the constitutionality of any tax paid on exported coal under section 4121 of the Internal Revenue Code of 1986, and

(III) is in favor of the coal producer or the party related to the coal producer.

(iv) **RECAPTURE.**—In the case any judgment described in clause (iii) is overturned, the coal producer shall pay to the Secretary the amount of any payment received under subparagraph (A) unless the coal producer establishes the export of the coal to a foreign country or shipment of coal to a possession of the United States.

(2) **EXPORTERS.**—Notwithstanding subsections (a)(1) and (c) of section 6416 and section 6511 of the Internal Revenue Code of 1986, and a judgment described in paragraph (1)(B)(iii) of this subsection, if—

(A) an exporter establishes that such exporter exported coal to a foreign country or shipped coal to a possession of the United States, or caused such coal to be so exported or shipped,

(B) such exporter filed a return on or after October 1, 1990, and on or before the date of the enactment of this Act, and

(C) such exporter files a claim for refund not later than the close of the 30-day period beginning on the date of the enactment of this Act,

then the Secretary of the Treasury shall pay to such exporter an amount equal to \$0.825 per ton of such coal exported by the exporter or caused to be exported by the exporter.

(b) **LIMITATIONS.**—Subsection (a) shall not apply with respect to exported coal if a credit or refund of tax imposed by section 4121 of

such Code on such coal has been allowed or made to, or if a settlement with the Federal Government has been made with and accepted by, the coal producer, a party related to such coal producer, or the exporter, of such coal, as of the date that the claim is filed under this section with respect to such exported coal. For purposes of this subsection, the term "settlement with the Federal Government" shall not include any settlement or stipulation entered into as of the date of the enactment of this Act, the terms of which contemplate a judgment concerning which any party has reserved the right to file an appeal, or has filed an appeal.

(c) **SUBSEQUENT REFUND PROHIBITED.**—No refund shall be made under this section to the extent that a credit or refund of such tax on such exported coal has been paid to any person.

(d) **DEFINITIONS.**—For purposes of this section—

(1) **COAL PRODUCER.**—The term "coal producer" means the person in whom is vested ownership of the coal immediately after the coal is severed from the ground, without regard to the existence of any contractual arrangement for the sale or other disposition of the coal or the payment of any royalties between the producer and third parties. The term includes any person who extracts coal from coal waste refuse piles or from the silt waste product which results from the wet washing (or similar processing) of coal.

(2) **EXPORTER.**—The term "exporter" means a person, other than a coal producer, who does not have a contract, fee arrangement, or any other agreement with a producer or seller of such coal to sell or export such coal to a third party on behalf of the producer or seller of such coal and—

(A) is indicated in the shipper's export declaration or other documentation as the exporter of record, or

(B) actually exported such coal to a foreign country or shipped such coal to a possession of the United States, or caused such coal to be so exported or shipped.

(3) **RELATED PARTY.**—The term "a party related to such coal producer" means a person who—

(A) is related to such coal producer through any degree of common management, stock ownership, or voting control,

(B) is related (within the meaning of section 144(a)(3) of such Code) to such coal producer, or

(C) has a contract, fee arrangement, or any other agreement with such coal producer to sell such coal to a third party on behalf of such coal producer.

(e) **TIMING OF REFUND.**—With respect to any claim for refund filed pursuant to this section, the Secretary of the Treasury shall determine whether the requirements of this section are met not later than 180 days after such claim is filed. If the Secretary determines that the requirements of this section are met, the claim for refund shall be paid not later than 180 days after the Secretary makes such determination.

(f) **INTEREST.**—Any refund paid pursuant to this section shall be paid by the Secretary of the Treasury with interest from the date of overpayment determined by using the overpayment rate and method under section 6621 of such Code.

(g) **DENIAL OF DOUBLE BENEFIT.**—The payment under subsection (a) with respect to any coal shall not exceed—

(1) in the case of a payment to a coal producer, the amount of tax paid under section 4121 of the Internal Revenue Code of 1986 with respect to such coal by such coal producer or a party related to such coal producer, and

(2) in the case of a payment to an exporter, an amount equal to \$0.825 per ton with re-

spect to such coal exported by the exporter or caused to be exported by the exporter.

(h) **APPLICATION OF SECTION.**—This section applies only to claims on coal exported on or after October 1, 1990, through the date of the enactment of this Act.

(i) **STANDING NOT CONFERRED.**—

(1) **EXPORTERS.**—With respect to exporters, this section shall not confer standing upon an exporter to commence, or intervene in, any judicial or administrative proceeding concerning a claim for refund by a coal producer of any Federal or State tax, fee, or royalty paid by the coal producer.

(2) **COAL PRODUCERS.**—With respect to coal producers, this section shall not confer standing upon a coal producer to commence, or intervene in, any judicial or administrative proceeding concerning a claim for refund by an exporter of any Federal or State tax, fee, or royalty paid by the producer and alleged to have been passed on to an exporter.

SEC. 1511. EXTENSION OF TEMPORARY INCREASE IN COAL EXCISE TAX.

Paragraph (2) of section 4121(e) (relating to temporary increase termination date) is amended—

(1) by striking "January 1, 2014" in clause (i) and inserting "December 31, 2017", and

(2) by striking "January 1 after 1981" in clause (ii) and inserting "December 31 after 2007".

SEC. 1512. CARBON AUDIT OF THE TAX CODE.

(a) **STUDY.**—The Secretary of the Treasury shall enter into an agreement with the National Academy of Sciences to undertake a comprehensive review of the Internal Revenue Code of 1986 to identify the types of and specific tax provisions that have the largest effects on carbon and other greenhouse gas emissions and to estimate the magnitude of those effects.

(b) **REPORT.**—Not later than 2 years after the date of enactment of this Act, the National Academy of Sciences shall submit to Congress a report containing the results of study authorized under this section.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section \$1,500,000 for the period of fiscal years 2008 and 2009.

Subtitle B—Transportation and Domestic Fuel Security
PART I—BIOFUELS

SEC. 1521. CREDIT FOR PRODUCTION OF CELLULOSIC BIOMASS ALCOHOL.

(a) **IN GENERAL.**—Subsection (a) of section 40 (relating to alcohol used as fuel) is amended by striking "plus" at the end of paragraph (2), by striking the period at the end of paragraph (3) and inserting " , plus", and by adding at the end the following new paragraph:

"(4) the cellulosic alcohol producer credit."

(b) **CELLULOSIC ALCOHOL PRODUCER CREDIT.**—

(1) **IN GENERAL.**—Subsection (b) of section 40 is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

"(5) CELLULOSIC ALCOHOL PRODUCER CREDIT.—

"(A) **IN GENERAL.**—The cellulosic alcohol producer credit for the taxable year is an amount equal to the applicable amount for each gallon of qualified cellulosic alcohol production.

"(B) **APPLICABLE AMOUNT.**—For purposes of subparagraph (A), the applicable amount means the excess of—

"(i) \$1.01, over

"(ii) the amount of the credit in effect for alcohol which is ethanol under subsection (b)(1) (without regard to subsection (b)(3)) at the time of the qualified cellulosic alcohol production.

"(C) **LIMITATION.**—

"(i) **IN GENERAL.**—No credit shall be allowed to any taxpayer under subparagraph (A) with respect to any qualified cellulosic alcohol production during the taxable year in excess of 60,000,000 gallons.

"(ii) **AGGREGATION RULE.**—For purposes of clause (i), all members of the same controlled group of corporations (within the meaning of section 267(f)) and all persons under common control (within the meaning of section 52(b) but determined by treating an interest of more than 50 percent as a controlling interest) shall be treated as 1 person.

"(iii) **PARTNERSHIP, S CORPORATIONS, AND OTHER PASS-THRU ENTITIES.**—In the case of a partnership, trust, S corporation, or other pass-thru entity, the limitation contained in clause (i) shall be applied at the entity level and at the partner or similar level.

"(D) **QUALIFIED CELLULOSIC ALCOHOL PRODUCTION.**—For purposes of this section, the term "qualified cellulosic alcohol production" means any cellulosic biomass alcohol which is produced by the taxpayer and which during the taxable year—

"(i) is sold by the taxpayer to another person—

"(I) for use by such other person in the production of a qualified alcohol mixture in such other person's trade or business (other than casual off-farm production),

"(II) for use by such other person as a fuel in a trade or business, or

"(III) who sells such cellulosic biomass alcohol at retail to another person and places such cellulosic biomass alcohol in the fuel tank of such other person, or

"(ii) is used or sold by the taxpayer for any purpose described in clause (i).

The qualified cellulosic alcohol production of any taxpayer for any taxable year shall not include any alcohol which is purchased by the taxpayer and with respect to which such producer increases the proof of the alcohol by additional distillation.

"(E) **CELLULOSIC BIOMASS ALCOHOL.**—

"(i) **IN GENERAL.**—The term "cellulosic biomass alcohol" has the meaning given such term under section 1681(3), but does not include any alcohol with a proof of less than 150.

"(ii) **DETERMINATION OF PROOF.**—The determination of the proof of any alcohol shall be made without regard to any added denaturants.

"(F) **COORDINATION WITH SMALL ETHANOL PRODUCER CREDIT.**—No small ethanol producer credit shall be allowed with respect to any qualified cellulosic alcohol production if credit is determined with respect to such production under this paragraph.

"(G) **ALLOCATION OF CELLULOSIC PRODUCER CREDIT TO PATRONS OF COOPERATIVE.**—Rules similar to the rules under subsection (g)(6) shall apply for purposes of this paragraph.

"(H) **APPLICATION OF PARAGRAPH.**—This paragraph shall apply with respect to qualified cellulosic alcohol production after December 31, 2007, and before January 1, 2014."

(2) **TERMINATION DATE NOT TO APPLY.**—Subsection (e) of section 40 (relating to termination) is amended—

(A) by inserting "or subsection (b)(5)(H)" after "by reason of paragraph (1)" in paragraph (2), and

(B) by adding at the end the following new paragraph:

"(3) **EXCEPTION FOR CELLULOSIC ALCOHOL PRODUCER CREDIT.**—Paragraph (1) shall not apply to the portion of the credit allowed under this section by reason of subsection (a)(4)."

(c) **ALCOHOL NOT USED AS A FUEL, ETC.**—

(1) IN GENERAL.—Paragraph (3) of section 40(d) is amended by redesignating subparagraph (D) as subparagraph (E) and by inserting after subparagraph (C) the following new subparagraph:

“(D) CELLULOSIC ALCOHOL PRODUCER CREDIT.—If—

“(i) any credit is determined under subsection (a)(4), and

“(ii) any person does not use such fuel for a purpose described in subsection (b)(5)(D), then there is hereby imposed on such person a tax equal to the applicable amount for each gallon of such cellulosic biomass alcohol.”

(2) CONFORMING AMENDMENTS.—

(A) Subparagraph (C) of section 40(d)(3) is amended by striking “PRODUCER” in the heading and inserting “SMALL ETHANOL PRODUCER”.

(B) Subparagraph (E) of section 40(d)(3), as redesignated by paragraph (1), is amended by striking “or (C)” and inserting “(C), or (D)”.

(d) LIMITATION TO CELLULOSIC ALCOHOL WITH CONNECTION TO THE UNITED STATES.—Subsection (d) of section 40, as amended by this Act, is amended by adding at the end the following new paragraph:

“(7) LIMITATION TO CELLULOSIC ALCOHOL WITH CONNECTION TO THE UNITED STATES.—No cellulosic alcohol producer credit shall be determined under subsection (a) with respect to any alcohol unless such alcohol is produced in the United States.”

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to fuel produced after December 31, 2007.

SEC. 1522. EXPANSION OF SPECIAL ALLOWANCE TO CELLULOSIC BIOMASS ALCOHOL FUEL PLANT PROPERTY.

(a) IN GENERAL.—Paragraph (3) of section 168(l) (relating to special allowance for cellulosic biomass ethanol plant property) is amended to read as follows:

“(3) CELLULOSIC BIOMASS ALCOHOL.—For purposes of this subsection, the term ‘cellulosic biomass alcohol’ means any alcohol produced from any lignocellulosic or hemicellulosic matter that is available on a renewable or recurring basis.”

(b) CONFORMING AMENDMENTS.—

(1) Subsection (l) of section 168 is amended by striking “cellulosic biomass ethanol” each place it appears and inserting “cellulosic biomass alcohol”.

(2) The heading of section 168(l) is amended by striking “CELLULOSIC BIOMASS ETHANOL” and inserting “CELLULOSIC BIOMASS ALCOHOL”.

(3) The heading of paragraph (2) of section 168(l) is amended by striking “CELLULOSIC BIOMASS ETHANOL” and inserting “CELLULOSIC BIOMASS ALCOHOL”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to property placed in service after the date of the enactment of this Act, in taxable years ending after such date.

SEC. 1523. MODIFICATION OF ALCOHOL CREDIT.

(a) INCOME TAX CREDIT.—Subsection (h) of section 40 (relating to reduced credit for ethanol blenders) is amended by adding at the end the following new paragraph:

“(3) REDUCED AMOUNT AFTER SALE OF 7,500,000,000 GALLONS.—

“(A) IN GENERAL.—In the case of any calendar year beginning after the calendar year described in subparagraph (B), the last row in the table in paragraph (2) shall be applied by substituting ‘46 cents’ for ‘51 cents’.

“(B) CALENDAR YEAR DESCRIBED.—The calendar year described in this subparagraph is the first calendar year beginning after 2007 during which 7,500,000,000 gallons of ethanol (including cellulosic ethanol) have been produced in or imported into the United States, as certified by the Secretary, in consultation

with the Administrator of the Environmental Protection Agency.”

(b) EXCISE TAX CREDIT.—

(1) IN GENERAL.—Paragraph (2) of section 6426(b) (relating to alcohol fuel mixture credit) is amended by adding at the end the following new subparagraph:

“(C) REDUCED AMOUNT AFTER SALE OF 7,500,000,000 GALLONS.—In the case of any alcohol fuel mixture produced in a calendar year beginning after the calendar year described in section 40(h)(3)(B), subparagraph (A) shall be applied by substituting ‘46 cents’ for ‘51 cents’.”

(2) CONFORMING AMENDMENT.—Subparagraph (A) of section 6426(b)(2) is amended by striking “subparagraph (B)” and inserting “subparagraphs (B) and (C)”.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

SEC. 1524. EXTENSION AND MODIFICATION OF CREDITS FOR BIODIESEL AND RENEWABLE DIESEL.

(a) IN GENERAL.—Sections 40A(g), 6426(c)(6), and 6427(e)(5)(B) are each amended by striking “December 31, 2008” and inserting “December 31, 2010”.

(b) UNIFORM TREATMENT OF DIESEL PRODUCED FROM BIOMASS.—Paragraph (3) of section 40A(f) is amended—

(1) by striking “using a thermal depolymerization process”, and

(2) by striking “or D396” in subparagraph (B) and inserting “or other equivalent standard approved by the Secretary for fuels to be used in diesel-powered highway vehicles”.

(c) ELIGIBILITY OF CERTAIN AVIATION FUEL.—Paragraph (3) of section 40A(f) (defining renewable diesel) is amended by adding at the end the following new flush sentence: “The term ‘renewable diesel’ also means fuel derived from biomass which meets the requirements of a Department of Defense specification for military jet fuel or an American Society of Testing and Materials specification for aviation turbine fuel.”

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to fuel produced, and sold or used, after the date of the enactment of this Act.

(2) UNIFORM TREATMENT OF DIESEL PRODUCED FROM BIOMASS.—The amendments made by subsection (b) shall apply to fuel produced, and sold or used, after the date which is 30 days after the date of the enactment of this Act.

SEC. 1525. CLARIFICATION OF ELIGIBILITY FOR RENEWABLE DIESEL CREDIT.

(a) COPRODUCTION WITH PETROLEUM FEEDSTOCK.—

(1) IN GENERAL.—Paragraph (3) of section 40A(f) (defining renewable diesel), as amended by this Act, is amended by adding at the end the following sentence: “Such term does not include any fuel derived from coprocessing biomass with a feedstock which is not biomass. For purposes of this paragraph, the term ‘biomass’ has the meaning given such term by section 45K(c)(3).”

(2) CONFORMING AMENDMENT.—Paragraph (3) of section 40A(f) is amended by striking “(as defined in section 45K(c)(3))”.

(b) CLARIFICATION OF ELIGIBILITY FOR ALTERNATIVE FUEL CREDIT.—

(1) IN GENERAL.—Subparagraph (F) of section 6426(d)(2) is amended by striking “hydrocarbons” and inserting “fuel”.

(2) CONFORMING AMENDMENT.—Section 6426 is amended by adding at the end the following new subsection:

“(h) DENIAL OF DOUBLE BENEFIT.—No credit shall be determined under subsection (d) or (e) with respect to any fuel with respect to which credit may be determined under subsection (b) or (c) or under section 40 or 40A.”

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to fuel produced, and sold or used, after December 31, 2007.

(2) CLARIFICATION OF ELIGIBILITY FOR ALTERNATIVE FUEL CREDIT.—The amendment made by subsection (b) shall take effect as if included in section 11113 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.

SEC. 1526. PROVISIONS CLARIFYING TREATMENT OF FUELS WITH NO NEXUS TO THE UNITED STATES.

(a) ALCOHOL FUELS CREDIT.—Subsection (d) of section 40 is amended by adding at the end the following new paragraph:

“(6) LIMITATION TO ALCOHOL WITH CONNECTION TO THE UNITED STATES.—No credit shall be determined under this section with respect to any alcohol which is produced outside the United States for use as a fuel outside the United States. For purposes of this paragraph, the term ‘United States’ includes any possession of the United States.”

(b) BIODIESEL FUELS CREDIT.—Subsection (d) of section 40A is amended by adding at the end the following new paragraph:

“(5) LIMITATION TO BIODIESEL WITH CONNECTION TO THE UNITED STATES.—No credit shall be determined under this section with respect to any biodiesel which is produced outside the United States for use as a fuel outside the United States. For purposes of this paragraph, the term ‘United States’ includes any possession of the United States.”

(c) EXCISE TAX CREDIT.—

(1) IN GENERAL.—Section 6426, as amended by this Act, is amended by adding at the end the following new subsection:

“(i) LIMITATION TO FUELS WITH CONNECTION TO THE UNITED STATES.—

“(1) ALCOHOL.—No credit shall be determined under this section with respect to any alcohol which is produced outside the United States for use as a fuel outside the United States.

“(2) BIODIESEL AND ALTERNATIVE FUELS.—No credit shall be determined under this section with respect to any biodiesel or alternative fuel which is produced outside the United States for use as a fuel outside the United States.

For purposes of this subsection, the term ‘United States’ includes any possession of the United States.”

(2) CONFORMING AMENDMENT.—Subsection (e) of section 6427 is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

“(5) LIMITATION TO FUELS WITH CONNECTION TO THE UNITED STATES.—No amount shall be payable under paragraph (1) or (2) with respect to any mixture or alternative fuel if credit is not allowed with respect to such mixture or alternative fuel by reason of section 6426(i).”

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect as if included in section 301 of the American Jobs Creation Act of 2004.

(2) ALTERNATIVE FUEL CREDITS.—So much of the amendments made by this section as relate to the alternative fuel credit or the alternative fuel mixture credit shall take effect as if included in section 11113 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.

(3) RENEWABLE DIESEL.—So much of the amendments made by this section as relate to renewable diesel shall take effect as if included in section 1346 of the Energy Policy Act of 2005.

SEC. 1527. COMPREHENSIVE STUDY OF BIOFUELS.

(a) **STUDY.**—The Secretary of the Treasury, in consultation with the Secretary of Agriculture, the Secretary of Energy, and the Administrator of the Environmental Protection Agency, shall enter into an agreement with the National Academy of Sciences to produce an analysis of current scientific findings to determine—

(1) current biofuels production, as well as projections for future production,

(2) the maximum amount of biofuels production capable on United States farmland,

(3) the domestic effects of a dramatic increase in biofuels production on, for example—

(A) the price of fuel,

(B) the price of land in rural and suburban communities,

(C) crop acreage and other land use,

(D) the environment, due to changes in crop acreage, fertilizer use, runoff, water use, emissions from vehicles utilizing biofuels, and other factors,

(E) the price of feed,

(F) the selling price of grain crops,

(G) exports and imports of grains,

(H) taxpayers, through cost or savings to commodity crop payments, and

(I) the expansion of refinery capacity,

(4) the ability to convert corn ethanol plants for other uses, such as cellulosic ethanol or biodiesel,

(5) a comparative analysis of corn ethanol versus other biofuels and renewable energy sources, considering cost, energy output, and ease of implementation, and

(6) the need for additional scientific inquiry, and specific areas of interest for future research.

(b) **REPORT.**—The National Academy of Sciences shall submit an initial report of the findings of the report required under subsection (a) to the Congress not later than 3 months after the date of the enactment of this Act, and a final report not later than 6 months after such date of enactment.

PART II—ADVANCED TECHNOLOGY MOTOR VEHICLES**SEC. 1528. CREDIT FOR NEW QUALIFIED PLUG-IN ELECTRIC DRIVE MOTOR VEHICLES.**

(a) **IN GENERAL.**—Subpart B of part IV of subchapter A of chapter 1 (relating to other credits) is amended by adding at the end the following new section:

“SEC. 30D. NEW QUALIFIED PLUG-IN ELECTRIC DRIVE MOTOR VEHICLES.

“(a) **ALLOWANCE OF CREDIT.**—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of the credit amounts determined under subsection (b) with respect to each new qualified plug-in electric drive motor vehicle placed in service by the taxpayer during the taxable year.

“(b) **PER VEHICLE DOLLAR LIMITATION.**—

“(1) **IN GENERAL.**—The amount determined under this subsection with respect to any new qualified plug-in electric drive motor vehicle is the sum of the amounts determined under paragraphs (2) and (3) with respect to such vehicle.

“(2) **BASE AMOUNT.**—The amount determined under this paragraph is \$3,000.

“(3) **BATTERY CAPACITY.**—In the case of a vehicle which draws propulsion energy from a battery with not less than 5 kilowatt hours of capacity, the amount determined under this paragraph is \$200, plus \$200 for each kilowatt hour of capacity in excess of 5 kilowatt hours. The amount determined under this paragraph shall not exceed \$2,000.

“(c) **APPLICATION WITH OTHER CREDITS.**—

“(1) **BUSINESS CREDIT TREATED AS PART OF GENERAL BUSINESS CREDIT.**—So much of the credit which would be allowed under sub-

section (a) for any taxable year (determined without regard to this subsection) that is attributable to property of a character subject to an allowance for depreciation shall be treated as a credit listed in section 38(b) for such taxable year (and not allowed under subsection (a)).

“(2) **PERSONAL CREDIT.**—

“(A) **IN GENERAL.**—For purposes of this title, the credit allowed under subsection (a) for any taxable year (determined after application of paragraph (1)) shall be treated as a credit allowable under subpart A for such taxable year.

“(B) **LIMITATION BASED ON AMOUNT OF TAX.**—In the case of a taxable year to which section 26(a)(2) does not apply, the credit allowed under subsection (a) for any taxable year (determined after application of paragraph (1)) shall not exceed the excess of—

“(i) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

“(ii) the sum of the credits allowable under subpart A (other than this section and sections 23 and 25D) and section 27 for the taxable year.

“(d) **NEW QUALIFIED PLUG-IN ELECTRIC DRIVE MOTOR VEHICLE.**—For purposes of this section—

“(1) **IN GENERAL.**—The term ‘new qualified plug-in electric drive motor vehicle’ means a motor vehicle (as defined in section 30(c)(2))—

“(A) the original use of which commences with the taxpayer,

“(B) which is acquired for use or lease by the taxpayer and not for resale,

“(C) which is made by a manufacturer,

“(D) which has a gross vehicle weight rating of less than 14,000 pounds,

“(E) which has received a certificate of conformity under the Clean Air Act and meets or exceeds the Bin 5 Tier II emission standard established in regulations prescribed by the Administrator of the Environmental Protection Agency under section 202(i) of the Clean Air Act for that make and model year vehicle, and

“(F) which is propelled to a significant extent by an electric motor which draws electricity from a battery which—

“(i) has a capacity of not less than 4 kilowatt hours, and

“(ii) is capable of being recharged from an external source of electricity.

“(2) **EXCEPTION.**—The term ‘new qualified plug-in electric drive motor vehicle’ shall not include any vehicle which is not a passenger automobile or light truck if such vehicle has a gross vehicle weight rating of less than 8,500 pounds.

“(3) **OTHER TERMS.**—The terms ‘passenger automobile’, ‘light truck’, and ‘manufacturer’ have the meanings given such terms in regulations prescribed by the Administrator of the Environmental Protection Agency for purposes of the administration of title II of the Clean Air Act (42 U.S.C. 7521 et seq.).

“(4) **BATTERY CAPACITY.**—The term ‘capacity’ means, with respect to any battery, the quantity of electricity which the battery is capable of storing, expressed in kilowatt hours, as measured from a 100 percent state of charge to a 0 percent state of charge.

“(e) **LIMITATION ON NUMBER OF NEW QUALIFIED PLUG-IN ELECTRIC DRIVE MOTOR VEHICLES ELIGIBLE FOR CREDIT.**—

“(1) **IN GENERAL.**—In the case of a new qualified plug-in electric drive motor vehicle sold during the phaseout period, only the applicable percentage of the credit otherwise allowable under subsection (a) shall be allowed.

“(2) **PHASEOUT PERIOD.**—For purposes of this subsection, the phaseout period is the period beginning with the second calendar quarter following the calendar quarter which

includes the first date on which the number of new qualified plug-in electric drive motor vehicles manufactured by the manufacturer of the vehicle referred to in paragraph (1) sold for use in the United States after the date of the enactment of this section, is at least 60,000.

“(3) **APPLICABLE PERCENTAGE.**—For purposes of paragraph (1), the applicable percentage is—

“(A) 50 percent for the first 2 calendar quarters of the phaseout period,

“(B) 25 percent for the 3d and 4th calendar quarters of the phaseout period, and

“(C) 0 percent for each calendar quarter thereafter.

“(4) **CONTROLLED GROUPS.**—Rules similar to the rules of section 30B(f)(4) shall apply for purposes of this subsection.

“(f) **SPECIAL RULES.**—

“(1) **BASIS REDUCTION.**—The basis of any property for which a credit is allowable under subsection (a) shall be reduced by the amount of such credit (determined without regard to subsection (c)).

“(2) **RECAPTURE.**—The Secretary shall, by regulations, provide for recapturing the benefit of any credit allowable under subsection (a) with respect to any property which ceases to be property eligible for such credit.

“(3) **PROPERTY USED OUTSIDE UNITED STATES, ETC., NOT QUALIFIED.**—No credit shall be allowed under subsection (a) with respect to any property referred to in section 50(b)(1) or with respect to the portion of the cost of any property taken into account under section 179.

“(4) **ELECTION NOT TO TAKE CREDIT.**—No credit shall be allowed under subsection (a) for any vehicle if the taxpayer elects to not have this section apply to such vehicle.

“(5) **PROPERTY USED BY TAX-EXEMPT ENTITY; INTERACTION WITH AIR QUALITY AND MOTOR VEHICLE SAFETY STANDARDS.**—Rules similar to the rules of paragraphs (6) and (10) of section 30B(h) shall apply for purposes of this section.”.

(b) **COORDINATION WITH ALTERNATIVE MOTOR VEHICLE CREDIT.**—Section 30B(d)(3) is amended by adding at the end the following new subparagraph:

“(D) **EXCLUSION OF PLUG-IN VEHICLES.**—Any vehicle with respect to which a credit is allowable under section 30D (determined without regard to subsection (c) thereof) shall not be taken into account under this section.”.

(c) **CREDIT MADE PART OF GENERAL BUSINESS CREDIT.**—Section 38(b), as amended by this Act, is amended—

(1) by striking “and” each place it appears at the end of any paragraph,

(2) by striking “plus” each place it appears at the end of any paragraph,

(3) by striking the period at the end of paragraph (31) and inserting “, plus”, and

(4) by adding at the end the following new paragraph:

“(32) the portion of the new qualified plug-in electric drive motor vehicle credit to which section 30D(c)(1) applies.”.

(d) **CONFORMING AMENDMENTS.**—

(1)(A) Section 24(b)(3)(B), as amended by this Act, is amended by striking “and 25D” and inserting “25D, and 30D”.

(B) Section 25(e)(1)(C)(ii) is amended by inserting “30D,” after “25D.”.

(C) Section 25B(g)(2), as amended by this Act, is amended by striking “and 25D” and inserting “, 25D, and 30D”.

(D) Section 26(a)(1), as amended by this Act, is amended by striking “and 25D” and inserting “25D, and 30D”.

(E) Section 1400C(d)(2) is amended by striking “and 25D” and inserting “25D, and 30D”.

(2) Section 1016(a) is amended by striking “and” at the end of paragraph (36), by striking the period at the end of paragraph (37)

and inserting “, and”, and by adding at the end the following new paragraph:

“(38) to the extent provided in section 30D(f)(1).”

(3) Section 6501(m) is amended by inserting “30D(f)(4),” after “30C(e)(5).”

(4) The table of sections for subpart B of part IV of subchapter A of chapter 1 is amended by adding at the end the following new item:

“Sec. 30D. New qualified plug-in electric drive motor vehicles.”

(e) TREATMENT OF ALTERNATIVE MOTOR VEHICLE CREDIT AS A PERSONAL CREDIT.—

(1) IN GENERAL.—Paragraph (2) of section 30B(g) is amended to read as follows:

“(2) PERSONAL CREDIT.—The credit allowed under subsection (a) for any taxable year (after application of paragraph (1)) shall be treated as a credit allowable under subpart A for such taxable year.”

(2) CONFORMING AMENDMENTS.—

(A) Subparagraph (A) of section 30C(d)(2) is amended by striking “sections 27, 30, and 30B” and inserting “sections 27 and 30”.

(B) Paragraph (3) of section 55(c) is amended by striking “30B(g)(2).”

(f) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall apply to taxable years beginning after December 31, 2007.

(2) TREATMENT OF ALTERNATIVE MOTOR VEHICLE CREDIT AS PERSONAL CREDIT.—The amendments made by subsection (e) shall apply to taxable years beginning after December 31, 2006.

(g) APPLICATION OF EGTRRA SUNSET.—The amendment made by subsection (d)(1)(A) shall be subject to title IX of the Economic Growth and Tax Relief Reconciliation Act of 2001 in the same manner as the provision of such Act to which such amendment relates.

SEC. 1529. EXCLUSION FROM HEAVY TRUCK TAX FOR IDLING REDUCTION UNITS AND ADVANCED INSULATION.

(a) IN GENERAL.—Section 4053 (relating to exemptions) is amended by adding at the end the following new paragraphs:

“(9) IDLING REDUCTION DEVICE.—Any device or system of devices which—

“(A) is designed to provide to a vehicle those services (such as heat, air conditioning, or electricity) that would otherwise require the operation of the main drive engine while the vehicle is temporarily parked or remains stationary using either—

“(i) an all electric unit, such as a battery powered unit or from grid-supplied electricity, or

“(ii) a dual fuel unit powered by diesel or other fuels, and capable of providing such services from grid-supplied electricity or on-truck batteries alone, and

“(B) is certified by the Secretary of Energy, in consultation with the Administrator of the Environmental Protection Agency and the Secretary of Transportation, to reduce long-duration idling of such vehicle at a motor vehicle rest stop or other location where such vehicles are temporarily parked or remain stationary.

For purposes of subparagraph (B), the term ‘long-duration idling’ means the operation of a main drive engine, for a period greater than 15 consecutive minutes, where the main drive engine is not engaged in gear. Such term does not apply to routine stoppages associated with traffic movement or congestion.

“(10) ADVANCED INSULATION.—Any insulation that has an R value of not less than R35 per inch.”

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to sales or installations after December 31, 2007.

PART III—OTHER TRANSPORTATION PROVISIONS

SEC. 1530. RESTRUCTURING OF NEW YORK LIBERTY ZONE TAX CREDITS.

(a) IN GENERAL.—Part I of subchapter Y of chapter 1 is amended by redesignating section 1400L as section 1400K and by adding at the end the following new section:

“SEC. 1400L. NEW YORK LIBERTY ZONE TAX CREDITS.

“(a) IN GENERAL.—In the case of a New York Liberty Zone governmental unit, there shall be allowed as a credit against any taxes imposed for any payroll period by section 3402 for which such governmental unit is liable under section 3403 an amount equal to so much of the portion of the qualifying project expenditure amount allocated under subsection (b)(3) to such governmental unit for the calendar year as is allocated by such governmental unit to such period under subsection (b)(4).

“(b) QUALIFYING PROJECT EXPENDITURE AMOUNT.—For purposes of this section—

“(1) IN GENERAL.—The term ‘qualifying project expenditure amount’ means, with respect to any calendar year, the sum of—

“(A) the total expenditures paid or incurred during such calendar year by all New York Liberty Zone governmental units and the Port Authority of New York and New Jersey for any portion of qualifying projects located wholly within the City of New York, New York, and

“(B) any such expenditures—

“(i) paid or incurred in any preceding calendar year which begins after the date of enactment of this section, and

“(ii) not previously allocated under paragraph (3).

“(2) QUALIFYING PROJECT.—The term ‘qualifying project’ means any transportation infrastructure project, including highways, mass transit systems, railroads, airports, ports, and waterways, in or connecting with the New York Liberty Zone (as defined in section 1400K(h)), which is designated as a qualifying project under this section jointly by the Governor of the State of New York and the Mayor of the City of New York, New York.

“(3) GENERAL ALLOCATION.—

“(A) IN GENERAL.—The Governor of the State of New York and the Mayor of the City of New York, New York, shall jointly allocate to each New York Liberty Zone governmental unit the portion of the qualifying project expenditure amount which may be taken into account by such governmental unit under subsection (a) for any calendar year in the credit period.

“(B) AGGREGATE LIMIT.—The aggregate amount which may be allocated under subparagraph (A) for all calendar years in the credit period shall not exceed \$2,000,000,000.

“(C) ANNUAL LIMIT.—The aggregate amount which may be allocated under subparagraph (A) for any calendar year in the credit period shall not exceed the sum of—

“(i) \$115,000,000 (\$425,000,000 in the case of the last 2 years in the credit period), plus

“(ii) the aggregate amount authorized to be allocated under this paragraph for all preceding calendar years in the credit period which was not so allocated.

“(D) UNALLOCATED AMOUNTS AT END OF CREDIT PERIOD.—If, as of the close of the credit period, the amount under subparagraph (B) exceeds the aggregate amount allocated under subparagraph (A) for all calendar years in the credit period, the Governor of the State of New York and the Mayor of the City of New York, New York, may jointly allocate to New York Liberty Zone governmental units for any calendar year in the 5-year period following the credit period an amount equal to—

“(i) the lesser of—

“(I) such excess, or

“(II) the qualifying project expenditure amount for such calendar year, reduced by

“(ii) the aggregate amount allocated under this subparagraph for all preceding calendar years.

“(4) ALLOCATION TO PAYROLL PERIODS.—Each New York Liberty Zone governmental unit which has been allocated a portion of the qualifying project expenditure amount under paragraph (3) for a calendar year may allocate such portion to payroll periods beginning in such calendar year as such governmental unit determines appropriate.

“(c) CARRYOVER OF UNUSED ALLOCATIONS.—

“(1) IN GENERAL.—Except as provided in paragraph (2), if the amount allocated under subsection (b)(3) to a New York Liberty Zone governmental unit for any calendar year exceeds the aggregate taxes imposed by section 3402 for which such governmental unit is liable under section 3403 for periods beginning in such year, such excess shall be carried to the succeeding calendar year and added to the allocation of such governmental unit for such succeeding calendar year.

“(2) REALLOCATION.—If a New York Liberty Zone governmental unit does not use an amount allocated to it under subsection (b)(3) within the time prescribed by the Governor of the State of New York and the Mayor of the City of New York, New York, then such amount shall after such time be treated for purposes of subsection (b)(3) in the same manner as if it had never been allocated.

“(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

“(1) CREDIT PERIOD.—The term ‘credit period’ means the 12-year period beginning on January 1, 2008.

“(2) NEW YORK LIBERTY ZONE GOVERNMENTAL UNIT.—The term ‘New York Liberty Zone governmental unit’ means—

“(A) the State of New York,

“(B) the City of New York, New York, and

“(C) any agency or instrumentality of such State or City.

“(3) TREATMENT OF FUNDS.—Any expenditure for a qualifying project taken into account for purposes of the credit under this section shall be considered State and local funds for the purpose of any Federal program.

“(4) TREATMENT OF CREDIT AMOUNTS FOR PURPOSES OF WITHHOLDING TAXES.—For purposes of this title, a New York Liberty Zone governmental unit shall be treated as having paid to the Secretary, on the day on which wages are paid to employees, an amount equal to the amount of the credit allowed to such entity under subsection (a) with respect to such wages, but only if such governmental unit deducts and withholds wages for such payroll period under section 3401 (relating to wage withholding).

“(e) REPORTING.—The Governor of the State of New York and the Mayor of the City of New York, New York, shall jointly submit to the Secretary an annual report—

“(1) which certifies—

“(A) the qualifying project expenditure amount for the calendar year, and

“(B) the amount allocated to each New York Liberty Zone governmental unit under subsection (b)(3) for the calendar year, and

“(2) includes such other information as the Secretary may require to carry out this section.

“(f) GUIDANCE.—The Secretary may prescribe such guidance as may be necessary or appropriate to ensure compliance with the purposes of this section.”

(b) **TERMINATION OF SPECIAL ALLOWANCE AND EXPENSING.**—Subparagraph (A) of section 1400K(b)(2), as redesignated by subsection (a), is amended by striking the parenthetical therein and inserting “(in the case of nonresidential real property and residential rental property, the date of the enactment of the Clean Renewable Energy and Conservation Tax Act of 2007 or, if acquired pursuant to a binding contract in effect on such enactment date, December 31, 2009)”.

(c) **CONFORMING AMENDMENTS.**—

(1) Section 38(c)(3)(B) is amended by striking “section 1400L(a)” and inserting “section 1400K(a)”.

(2) Section 168(k)(2)(D)(ii) is amended by striking “section 1400L(c)(2)” and inserting “section 1400K(c)(2)”.

(3) The table of sections for part I of subchapter Y of chapter 1 is amended by redesignating the item relating to section 1400L as an item relating to section 1400K and by inserting after such item the following new item:

“Sec. 1400L. New York Liberty Zone tax credits.”.

(d) **EFFECTIVE DATE.**—The amendments made by this section shall take effect on the date of the enactment of this Act.

SEC. 1531. EXTENSION OF TRANSPORTATION FRINGE BENEFIT TO BICYCLE COMMUTERS.

(a) **IN GENERAL.**—Paragraph (1) of section 132(f) of the Internal Revenue Code of 1986 (relating to general rule for qualified transportation fringe) is amended by adding at the end the following:

“(D) Any qualified bicycle commuting reimbursement.”.

(b) **LIMITATION ON EXCLUSION.**—Paragraph (2) of section 132(f) of such Code is amended by striking “and” at the end of subparagraph (A), by striking the period at the end of subparagraph (B) and inserting “, and”, and by adding at the end the following new subparagraph:

“(C) the applicable annual limitation in the case of any qualified bicycle commuting reimbursement.”.

(c) **DEFINITIONS.**—Paragraph (5) of section 132(f) of such Code (relating to definitions) is amended by adding at the end the following:

“(F) **DEFINITIONS RELATED TO BICYCLE COMMUTING REIMBURSEMENT.**—

“(i) **QUALIFIED BICYCLE COMMUTING REIMBURSEMENT.**—The term ‘qualified bicycle commuting reimbursement’ means, with respect to any calendar year, any employer reimbursement during the 15-month period beginning with the first day of such calendar year for reasonable expenses incurred by the employee during such calendar year for the purchase of a bicycle and bicycle improvements, repair, and storage, if such bicycle is regularly used for travel between the employee’s residence and place of employment.

“(ii) **APPLICABLE ANNUAL LIMITATION.**—The term ‘applicable annual limitation’ means, with respect to any employee for any calendar year, the product of \$20 multiplied by the number of qualified bicycle commuting months during such year.

“(iii) **QUALIFIED BICYCLE COMMUTING MONTH.**—The term ‘qualified bicycle commuting month’ means, with respect to any employee, any month during which such employee—

“(I) regularly uses the bicycle for a substantial portion of the travel between the employee’s residence and place of employment, and

“(II) does not receive any benefit described in subparagraph (A), (B), or (C) of paragraph (1).”.

(d) **CONSTRUCTIVE RECEIPT OF BENEFIT.**—Paragraph (4) of section 132(f) is amended by inserting “(other than a qualified bicycle

commuting reimbursement)” after “qualified transportation fringe”.

(e) **EFFECTIVE DATE.**—The amendments made by this section shall apply to taxable years beginning after December 31, 2007.

Subtitle C—Energy Conservation and Efficiency
PART I—CONSERVATION TAX CREDIT BONDS

SEC. 1541. QUALIFIED ENERGY CONSERVATION BONDS.

(a) **IN GENERAL.**—Subpart I of part IV of subchapter A of chapter 1, as added by this title, is amended by adding at the end the following new section:

“SEC. 54C. QUALIFIED ENERGY CONSERVATION BONDS.

“(a) **QUALIFIED ENERGY CONSERVATION BOND.**—For purposes of this subchapter, the term ‘qualified energy conservation bond’ means any bond issued as part of an issue if—

“(1) 100 percent of the available project proceeds of such issue are to be used for one or more qualified conservation purposes,

“(2) the bond is issued by a State or local government, and

“(3) the issuer designates such bond for purposes of this section.

“(b) **LIMITATION ON AMOUNT OF BONDS DESIGNATED.**—The maximum aggregate face amount of bonds which may be designated under subsection (a) by any issuer shall not exceed the limitation amount allocated to such issuer under subsection (d).

“(c) **NATIONAL LIMITATION ON AMOUNT OF BONDS DESIGNATED.**—There is a national qualified energy conservation bond limitation of \$3,000,000,000.

“(d) **ALLOCATIONS.**—

“(1) **IN GENERAL.**—The limitation applicable under subsection (c) shall be allocated by the Secretary among the States in proportion to the population of the States.

“(2) **ALLOCATIONS TO LARGEST LOCAL GOVERNMENTS.**—

“(A) **IN GENERAL.**—In the case of any State in which there is a large local government, each such local government shall be allocated a portion of such State’s allocation which bears the same ratio to the State’s allocation (determined without regard to this subparagraph) as the population of such large local government bears to the population of such State.

“(B) **ALLOCATION OF UNUSED LIMITATION TO STATE.**—The amount allocated under this subsection to a large local government may be reallocated by such local government to the State in which such local government is located.

“(C) **LARGE LOCAL GOVERNMENT.**—For purposes of this section, the term ‘large local government’ means any municipality or county if such municipality or county has a population of 100,000 or more.

“(3) **ALLOCATION TO ISSUERS; RESTRICTION ON PRIVATE ACTIVITY BONDS.**—Any allocation under this subsection to a State or large local government shall be allocated by such State or large local government to issuers within the State in a manner that results in not less than 70 percent of the allocation to such State or large local government being used to designate bonds which are not private activity bonds.

“(e) **QUALIFIED CONSERVATION PURPOSE.**—For purposes of this section—

“(1) **IN GENERAL.**—The term ‘qualified conservation purpose’ means any of the following:

“(A) Capital expenditures incurred for purposes of—

“(i) reducing energy consumption in publicly-owned buildings by at least 20 percent,

“(ii) implementing green community programs, or

“(iii) rural development involving the production of electricity from renewable energy resources.

“(B) Expenditures with respect to research facilities, and research grants, to support research in—

“(i) development of cellulosic ethanol or other nonfossil fuels,

“(ii) technologies for the capture and sequestration of carbon dioxide produced through the use of fossil fuels,

“(iii) increasing the efficiency of existing technologies for producing nonfossil fuels,

“(iv) automobile battery technologies and other technologies to reduce fossil fuel consumption in transportation, or

“(v) technologies to reduce energy use in buildings.

“(C) Mass commuting facilities and related facilities that reduce the consumption of energy, including expenditures to reduce pollution from vehicles used for mass commuting.

“(D) Demonstration projects designed to promote the commercialization of—

“(i) green building technology,

“(ii) conversion of agricultural waste for use in the production of fuel or otherwise,

“(iii) advanced battery manufacturing technologies,

“(iv) technologies to reduce peak use of electricity, or

“(v) technologies for the capture and sequestration of carbon dioxide emitted from combusting fossil fuels in order to produce electricity.

“(E) Public education campaigns to promote energy efficiency.

“(2) **SPECIAL RULES FOR PRIVATE ACTIVITY BONDS.**—For purposes of this section, in the case of any private activity bond, the term ‘qualified conservation purposes’ shall not include any expenditure which is not a capital expenditure.

“(f) **POPULATION.**—

“(1) **IN GENERAL.**—The population of any State or local government shall be determined for purposes of this section as provided in section 146(j) for the calendar year which includes the date of the enactment of this section.

“(2) **SPECIAL RULE FOR COUNTIES.**—In determining the population of any county for purposes of this section, any population of such county which is taken into account in determining the population of any municipality which is a large local government shall not be taken into account in determining the population of such county.

“(g) **APPLICATION TO INDIAN TRIBAL GOVERNMENTS.**—An Indian tribal government shall be treated for purposes of this section in the same manner as a large local government, except that—

“(1) an Indian tribal government shall be treated for purposes of subsection (d) as located within a State to the extent of so much of the population of such government as resides within such State, and

“(2) any bond issued by an Indian tribal government shall be treated as a qualified energy conservation bond only if issued as part of an issue the available project proceeds of which are used for purposes for which such Indian tribal government could issue bonds to which section 103(a) applies.”.

(b) **CONFORMING AMENDMENTS.**—

(1) Paragraph (1) of section 54A(d), as added by this title, is amended to read as follows:

“(1) **QUALIFIED TAX CREDIT BOND.**—The term ‘qualified tax credit bond’ means—

“(A) a new clean renewable energy bond, or

“(B) a qualified energy conservation bond, which is part of an issue that meets requirements of paragraphs (2), (3), (4), and (5).”.

(2) Subparagraph (C) of section 54A(d)(2), as added by this title, is amended to read as follows:

“(C) QUALIFIED PURPOSE.—For purposes of this paragraph, the term ‘qualified purpose’ means—

“(i) in the case of a new clean renewable energy bond, a purpose specified in section 54B(a)(1), and

“(ii) in the case of a qualified energy conservation bond, a purpose specified in section 54C(a)(1).”.

(3) The table of sections for subpart I of part IV of subchapter A of chapter 1, as amended by this title, is amended by adding at the end the following new item:

“Sec. 54C. Qualified energy conservation bonds.”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to obligations issued after the date of the enactment of this Act.

SEC. 1542. QUALIFIED FORESTRY CONSERVATION BONDS.

(a) IN GENERAL.—Subpart I of part IV of subchapter A of chapter 1, as added by this title, is amended by adding at the end the following new section:

“SEC. 54D. QUALIFIED FORESTRY CONSERVATION BONDS.

“(a) QUALIFIED FORESTRY CONSERVATION BOND.—For purposes of this subchapter, the term ‘qualified forestry conservation bond’ means any bond issued as part of an issue if—

“(1) 100 percent of the available proceeds of such issue are to be used for one or more qualified forestry conservation projects,

“(2) the bond is issued by a qualified issuer, and

“(3) the issuer designates such bond for purposes of this section.

“(b) LIMITATION ON AMOUNT OF BONDS DESIGNATED.—The maximum aggregate face amount of bonds which may be designated under subsection (a) by any issuer shall not exceed the limitation amount allocated to such issuer under subsection (d).

“(c) NATIONAL LIMITATION ON AMOUNT OF BONDS DESIGNATED.—There is a national qualified forestry conservation bond limitation of \$500,000,000.

“(d) ALLOCATIONS.—

“(1) IN GENERAL.—The Secretary shall make allocations of the amount of the national qualified forestry conservation bond limitation described in subsection (c) among qualified forestry conservation projects in such manner as the Secretary determines appropriate so as to ensure that all of such limitation is allocated before the date which is 24 months after the date of the enactment of this section.

“(2) SOLICITATION OF APPLICATIONS.—The Secretary shall solicit applications for allocations of the national qualified forestry conservation bond limitation described in subsection (c) not later than 90 days after the date of the enactment of this section.

“(e) QUALIFIED FORESTRY CONSERVATION PROJECT.—For purposes of this section, the term ‘qualified forestry conservation project’ means the acquisition by a State or 501(c)(3) organization (as defined in section 150(a)(4)) from an unrelated person of forest and forest land that meets the following qualifications:

“(1) Some portion of the land acquired must be adjacent to United States Forest Service Land.

“(2) At least half of the land acquired must be transferred to the United States Forest Service at no net cost to the United States and not more than half of the land acquired may either remain with or be donated to a State.

“(3) All of the land must be subject to a native fish habitat conservation plan approved by the United States Fish and Wildlife Service.

“(4) The amount of acreage acquired must be at least 40,000 acres.

“(f) QUALIFIED ISSUER.—For purposes of this section, the term ‘qualified issuer’ means a State or 501(c)(3) organization (as defined in section 150(a)(4)).

“(g) SPECIAL ARBITRAGE RULE.—In the case of any qualified forestry conservation bond issued as part of an issue, section 54A(d)(4)(C) shall be applied to such issue without regard to clause (i).”.

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 54A(d), as added by this title, is amended to read as follows:

“(1) QUALIFIED TAX CREDIT BOND.—The term ‘qualified tax credit bond’ means—

“(A) a new clean renewable energy bond,

“(B) a qualified energy conservation bond,

or

“(C) a qualified forestry conservation bond, which is part of an issue that meets requirements of paragraphs (2), (3), (4), and (5).”.

(2) Subparagraph (C) of section 54A(d)(2), as added by this title, is amended to read as follows:

“(C) QUALIFIED PURPOSE.—For purposes of this paragraph, the term ‘qualified purpose’ means—

“(i) in the case of a new clean renewable energy bond, a purpose specified in section 54B(a)(1),

“(ii) in the case of a qualified energy conservation bond, a purpose specified in section 54C(a)(1), and

“(iii) in the case of a qualified forestry conservation bond, a purpose specified in section 54D(a)(1).”.

(3) The table of sections for subpart I of part IV of subchapter A of chapter 1, as amended by this title, is amended by adding at the end the following new item:

“Sec. 54C. Qualified forestry conservation bonds.”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to obligations issued after the date of the enactment of this Act.

PART II—EFFICIENCY

SEC. 1543. EXTENSION AND MODIFICATION OF ENERGY EFFICIENT EXISTING HOMES CREDIT.

(a) EXTENSION OF CREDIT.—Section 25C(g) (relating to termination) is amended by striking “December 31, 2007” and inserting “December 31, 2008”.

(b) QUALIFIED BIOMASS FUEL PROPERTY.—

(1) IN GENERAL.—Section 25C(d)(3) is amended—

(A) by striking “and” at the end of subparagraph (D),

(B) by striking the period at the end of subparagraph (E) and inserting “, and”, and

(C) by adding at the end the following new subparagraph:

“(F) a stove which uses the burning of biomass fuel to heat a dwelling unit located in the United States and used as a residence by the taxpayer, or to heat water for use in such a dwelling unit, and which has a thermal efficiency rating of at least 75 percent.”.

(2) BIOMASS FUEL.—Section 25C(d) (relating to residential energy property expenditures) is amended by adding at the end the following new paragraph:

“(6) BIOMASS FUEL.—The term ‘biomass fuel’ means any plant-derived fuel available on a renewable or recurring basis, including agricultural crops and trees, wood and wood waste and residues (including wood pellets), plants (including aquatic plants), grasses, residues, and fibers.”.

(c) EFFECTIVE DATE.—The amendments made this section shall apply to expenditures made after December 31, 2007.

SEC. 1544. EXTENSION AND MODIFICATION OF ENERGY EFFICIENT COMMERCIAL BUILDINGS DEDUCTION.

Subsection (h) of section 179D (relating to termination) is amended by striking “December 31, 2008” and inserting “December 31, 2013”.

SEC. 1545. MODIFICATIONS OF ENERGY EFFICIENT APPLIANCE CREDIT FOR APPLIANCES PRODUCED AFTER 2007.

(a) IN GENERAL.—Subsection (b) of section 45M (relating to applicable amount) is amended to read as follows:

“(b) APPLICABLE AMOUNT.—For purposes of subsection (a)—

“(1) DISHWASHERS.—The applicable amount is—

“(A) \$45 in the case of a dishwasher which is manufactured in calendar year 2008 or 2009 and which uses no more than 324 kilowatt hours per year and 5.8 gallons per cycle, and

“(B) \$75 in the case of a dishwasher which is manufactured in calendar year 2008, 2009, or 2010 and which uses no more than 307 kilowatt hours per year and 5.0 gallons per cycle (5.5 gallons per cycle for dishwashers designed for greater than 12 place settings).

“(2) CLOTHES WASHERS.—The applicable amount is—

“(A) \$75 in the case of a residential top-loading clothes washer manufactured in calendar year 2008 which meets or exceeds a 1.72 modified energy factor and does not exceed a 8.0 water consumption factor,

“(B) \$125 in the case of a residential top-loading clothes washer manufactured in calendar year 2008 or 2009 which meets or exceeds a 1.8 modified energy factor and does not exceed a 7.5 water consumption factor,

“(C) \$150 in the case of a residential or commercial clothes washer manufactured in calendar year 2008, 2009 or 2010 which meets or exceeds 2.0 modified energy factor and does not exceed a 6.0 water consumption factor, and

“(D) \$250 in the case of a residential or commercial clothes washer manufactured in calendar year 2008, 2009, or 2010 which meets or exceeds 2.2 modified energy factor and does not exceed a 4.5 water consumption factor.

“(3) REFRIGERATORS.—The applicable amount is—

“(A) \$50 in the case of a refrigerator which is manufactured in calendar year 2008, and consumes at least 20 percent but not more than 22.9 percent less kilowatt hours per year than the 2001 energy conservation standards,

“(B) \$75 in the case of a refrigerator which is manufactured in calendar year 2008 or 2009, and consumes at least 23 percent but no more than 24.9 percent less kilowatt hours per year than the 2001 energy conservation standards,

“(C) \$100 in the case of a refrigerator which is manufactured in calendar year 2008, 2009, or 2010, and consumes at least 25 percent but not more than 29.9 percent less kilowatt hours per year than the 2001 energy conservation standards, and

“(D) \$200 in the case of a refrigerator manufactured in calendar year 2008, 2009, or 2010 and which consumes at least 30 percent less energy than the 2001 energy conservation standards.”.

(b) ELIGIBLE PRODUCTION.—

(1) SIMILAR TREATMENT FOR ALL APPLIANCES.—Subsection (c) of section 45M (relating to eligible production) is amended—

(A) by striking paragraph (2),

(B) by striking “(1) IN GENERAL” and all that follows through “the eligible” and inserting “The eligible”, and

(C) by moving the text of such subsection in line with the subsection heading and redesignating subparagraphs (A) and (B) as paragraphs (1) and (2), respectively.

(2) MODIFICATION OF BASE PERIOD.—Paragraph (2) of section 45M(c), as amended by paragraph (1) of this section, is amended by striking “3-calendar year” and inserting “2-calendar year”.

(c) TYPES OF ENERGY EFFICIENT APPLIANCES.—Subsection (d) of section 45M (defining types of energy efficient appliances) is amended to read as follows:

“(d) TYPES OF ENERGY EFFICIENT APPLIANCE.—For purposes of this section, the types of energy efficient appliances are—

“(1) dishwashers described in subsection (b)(1),

“(2) clothes washers described in subsection (b)(2), and

“(3) refrigerators described in subsection (b)(3).”

(d) AGGREGATE CREDIT AMOUNT ALLOWED.—

(1) INCREASE IN LIMIT.—Paragraph (1) of section 45M(e) (relating to aggregate credit amount allowed) is amended to read as follows:

“(1) AGGREGATE CREDIT AMOUNT ALLOWED.—The aggregate amount of credit allowed under subsection (a) with respect to a taxpayer for any taxable year shall not exceed \$75,000,000 reduced by the amount of the credit allowed under subsection (a) to the taxpayer (or any predecessor) for all prior taxable years beginning after December 31, 2007.”

(2) EXCEPTION FOR CERTAIN REFRIGERATOR AND CLOTHES WASHERS.—Paragraph (2) of section 45M(e) is amended to read as follows:

“(2) AMOUNT ALLOWED FOR CERTAIN REFRIGERATORS AND CLOTHES WASHERS.—Refrigerators described in subsection (b)(3)(D) and clothes washers described in subsection (b)(2)(D) shall not be taken into account under paragraph (1).”

(e) QUALIFIED ENERGY EFFICIENT APPLIANCES.—

(1) IN GENERAL.—Paragraph (1) of section 45M(f) (defining qualified energy efficient appliance) is amended to read as follows:

“(1) QUALIFIED ENERGY EFFICIENT APPLIANCE.—The term ‘qualified energy efficient appliance’ means—

“(A) any dishwasher described in subsection (b)(1),

“(B) any clothes washer described in subsection (b)(2), and

“(C) any refrigerator described in subsection (b)(3).”

(2) CLOTHES WASHER.—Section 45M(f)(3) (defining clothes washer) is amended by inserting “commercial” before “residential” the second place it appears.

(3) TOP-LOADING CLOTHES WASHER.—Subsection (f) of section 45M (relating to definitions) is amended by redesignating paragraphs (4), (5), (6), and (7) as paragraphs (5), (6), (7), and (8), respectively, and by inserting after paragraph (3) the following new paragraph:

“(4) TOP-LOADING CLOTHES WASHER.—The term ‘top-loading clothes washer’ means a clothes washer which has the clothes container compartment access located on the top of the machine and which operates on a vertical axis.”

(4) REPLACEMENT OF ENERGY FACTOR.—Section 45M(f)(7), as redesignated by paragraph (3), is amended to read as follows:

“(7) MODIFIED ENERGY FACTOR.—The term ‘modified energy factor’ means the modified energy factor established by the Department of Energy for compliance with the Federal energy conservation standard.”

(5) GALLONS PER CYCLE; WATER CONSUMPTION FACTOR.—Section 45M(f) (relating to definitions) is amended by adding at the end the following:

“(9) GALLONS PER CYCLE.—The term ‘gallons per cycle’ means, with respect to a dishwasher, the amount of water, expressed in

gallons, required to complete a normal cycle of a dishwasher.

“(10) WATER CONSUMPTION FACTOR.—The term ‘water consumption factor’ means, with respect to a clothes washer, the quotient of the total weighted per-cycle water consumption divided by the cubic foot (or liter) capacity of the clothes washer.”

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to appliances produced after December 31, 2007.

SEC. 1546. SEVEN-YEAR APPLICABLE RECOVERY PERIOD FOR DEPRECIATION OF QUALIFIED ENERGY MANAGEMENT DEVICES.

(a) IN GENERAL.—Section 168(e)(3)(C) (relating to 7-year property), as amended by this Act, is amended by striking “and” at the end of clause (v), by redesignating clause (vi) as clause (vii), and by inserting after clause (v) the following new clause:

“(vi) any qualified energy management device, and”.

(b) DEFINITION OF QUALIFIED ENERGY MANAGEMENT DEVICE.—Section 168(i) (relating to definitions and special rules) is amended by inserting at the end the following new paragraph:

“(18) QUALIFIED ENERGY MANAGEMENT DEVICE.—

“(A) IN GENERAL.—The term ‘qualified energy management device’ means any energy management device which is installed on real property of a customer of the taxpayer and is placed in service by a taxpayer who—

“(i) is a supplier of electric energy or a provider of electric energy services, and

“(ii) provides all commercial and residential customers of such supplier or provider with net metering upon the request of such customer.

“(B) ENERGY MANAGEMENT DEVICE.—For purposes of subparagraph (A), the term ‘energy management device’ means any time-based meter and related communication equipment which is capable of being used by the taxpayer as part of a system that—

“(i) measures and records electricity usage data on a time-differentiated basis in at least 24 separate time segments per day,

“(ii) provides for the exchange of information between supplier or provider and the customer’s energy management device in support of time-based rates or other forms of demand response, and

“(iii) provides data to such supplier or provider so that the supplier or provider can provide energy usage information to customers electronically.

“(C) NET METERING.—For purposes of subparagraph (A), the term ‘net metering’ means allowing customers a credit for providing electricity to the supplier or provider.”

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to property placed in service after December 31, 2007.

Subtitle D—Other Provisions

PART I—FORESTRY PROVISIONS

SEC. 1551. DEDUCTION FOR QUALIFIED TIMBER GAIN.

(a) IN GENERAL.—Part I of subchapter P of chapter 1 is amended by adding at the end the following new section:

“SEC. 1203. DEDUCTION FOR QUALIFIED TIMBER GAIN.

“(a) IN GENERAL.—In the case of a taxpayer which elects the application of this section for a taxable year, there shall be allowed a deduction against gross income in an amount equal to 60 percent of the lesser of—

“(1) the taxpayer’s qualified timber gain for such year, or

“(2) the taxpayer’s net capital gain for such year.

“(b) QUALIFIED TIMBER GAIN.—For purposes of this section, the term ‘qualified timber

gain’ means, with respect to any taxpayer for any taxable year, the excess (if any) of—

“(1) the sum of the taxpayer’s gains described in subsections (a) and (b) of section 631 for such year, over

“(2) the sum of the taxpayer’s losses described in such subsections for such year.

“(c) SPECIAL RULES FOR PASS-THRU ENTITIES.—

“(1) In the case of any qualified timber gain of a pass-thru entity (as defined in section 1(h)(10)) other than a real estate investment trust, the election under this section shall be made separately by each taxpayer subject to tax on such gain.

“(2) In the case of any qualified timber gain of a real estate investment trust, the election under this section shall be made by the real estate investment trust.

“(d) ELECTION.—An election under this section may be made only with respect to the first taxable year beginning after the date of the enactment of this section.”

(b) COORDINATION WITH MAXIMUM CAPITAL GAINS RATES.—

(1) TAXPAYERS OTHER THAN CORPORATIONS.—Paragraph (2) of section 1(h) is amended to read as follows:

“(2) REDUCTION OF NET CAPITAL GAIN.—For purposes of this subsection, the net capital gain for any taxable year shall be reduced (but not below zero) by the sum of—

“(A) the amount which the taxpayer takes into account as investment income under section 163(d)(4)(B)(iii), and

“(B) in the case of a taxable year with respect to which an election is in effect under section 1203, the taxpayer’s qualified timber gain (as defined in section 1203(b)).”

(2) CORPORATIONS.—Section 1201 is amended by redesignating subsection (b) as subsection (c) and inserting after subsection (a) the following new subsection:

“(b) QUALIFIED TIMBER GAIN NOT TAKEN INTO ACCOUNT.—For purposes of this section, in the case of a corporation with respect to which an election is in effect under section 1203, the net capital gain for any taxable year shall be reduced (but not below zero) by the corporation’s qualified timber gain (as defined in section 1203(b)).”

(c) DEDUCTION ALLOWED WHETHER OR NOT INDIVIDUAL ITEMIZES OTHER DEDUCTIONS.—Subsection (a) of section 62 is amended by inserting before the last sentence the following new paragraph:

“(22) QUALIFIED TIMBER GAINS.—The deduction allowed by section 1203.”

(d) DEDUCTION ALLOWED IN COMPUTING ADJUSTED CURRENT EARNINGS.—Subparagraph (C) of section 56(g)(4) is amended by adding at the end the following new clause:

“(vii) DEDUCTION FOR QUALIFIED TIMBER GAIN.—Clause (i) shall not apply to any deduction allowed under section 1203.”

(e) DEDUCTION ALLOWED IN COMPUTING TAXABLE INCOME OF ELECTING SMALL BUSINESS TRUSTS.—Subparagraph (C) of section 641(c)(2) is amended by inserting after clause (iv) the following new clause:

“(v) The deduction allowed under section 1203.”

(f) TREATMENT OF QUALIFIED TIMBER GAIN OF REAL ESTATE INVESTMENT TRUSTS.—Paragraph (3) of section 857(b) is amended by inserting after subparagraph (F) the following new subparagraph:

“(G) TREATMENT OF QUALIFIED TIMBER GAIN.—For purposes of this part, in the case of a real estate investment trust with respect to which an election is in effect under section 1203—

“(i) REDUCTION OF NET CAPITAL GAIN.—The net capital gain of the real estate investment trust for any taxable year shall be reduced (but not below zero) by the real estate investment trust’s qualified timber gain (as defined in section 1203(b)).

“(ii) ADJUSTMENT TO SHAREHOLDER’S BASIS ATTRIBUTABLE TO DEDUCTION FOR QUALIFIED TIMBER GAINS.—

“(I) IN GENERAL.—The adjusted basis of shares in the hands of the shareholder shall be increased by the amount of the deduction allowable under section 1203(a) as provided in subclauses (II) and (III).

“(II) ALLOCATION OF BASIS INCREASE FOR DISTRIBUTIONS MADE DURING TAXABLE YEAR.—For any taxable year of a real estate investment trust for which an election is in effect under section 1203, in the case of a distribution made with respect to shares during such taxable year of amounts attributable to the deduction allowable under section 1203(a), the adjusted basis of such shares shall be increased by the amount of such distributions.

“(III) ALLOCATION OF EXCESS.—If the deduction allowable under section 1203(a) for a taxable year exceeds the amount of distributions described in subclause (II), the excess shall be allocated to every shareholder of the real estate investment trust at the close of the trust’s taxable year in the same manner as if a distribution of such excess were made with respect to such shares.

“(IV) DESIGNATIONS.—To the extent provided in regulations, a real estate investment trust shall designate the amounts described in subclauses (II) and (III) in a manner similar to the designations provided with respect to capital gains described in subparagraphs (C) and (D).

“(V) DEFINITIONS.—As used in this subparagraph, the terms ‘share’ and ‘shareholder’ shall include beneficial interests and holders of beneficial interests, respectively.

“(iii) EARNINGS AND PROFITS DEDUCTION FOR QUALIFIED TIMBER GAINS.—The deduction allowable under section 1203(a) for a taxable year shall be allowed as a deduction in computing the earnings and profits of the real estate investment trust for such taxable year. The earnings and profits of any such shareholder which is a corporation shall be appropriately adjusted in accordance with regulations prescribed by the Secretary.”

(g) LOSS ATTRIBUTABLE TO BASIS ADJUSTMENT FOR DEDUCTION FOR QUALIFIED TIMBER GAIN OF REAL ESTATE INVESTMENT TRUSTS.—

(1) Section 857(b)(8) is amended by redesignating subparagraphs (B) and (C) as subparagraphs (C) and (D), respectively, and by inserting after subparagraph (A) the following new subparagraph:

“(B) LOSS ATTRIBUTABLE TO BASIS ADJUSTMENT FOR DEDUCTION FOR QUALIFIED TIMBER GAIN.—If—

“(i) a shareholder of a real estate investment trust receives a basis adjustment provided under subsection (b)(3)(G)(ii), and

“(ii) the taxpayer has held such share or interest for 6 months or less,

then any loss on the sale or exchange of such share or interest shall, to the extent of the amount described in clause (i), be disallowed.”

(2) Subparagraph (D) of section 857(b)(8), as redesignated by paragraph (1), is amended by striking “subparagraph (A)” and inserting “subparagraphs (A) and (B)”.

(h) CONFORMING AMENDMENTS.—

(1) Subparagraph (B) of section 172(d)(2) is amended to read as follows:

“(B) the exclusion under section 1202, and the deduction under section 1203, shall not be allowed.”

(2) Paragraph (4) of section 642(c) is amended by striking the first sentence and inserting “To the extent that the amount otherwise allowable as a deduction under this subsection consists of gain described in section 1202(a) or qualified timber gain (as defined in section 1203(b)), proper adjustment shall be made for any exclusion allowable to the estate or trust under section 1202 and for any

deduction allowable to the estate or trust under section 1203.”

(3) Paragraph (3) of section 643(a) is amended by striking the last sentence and inserting “The exclusion under section 1202 and the deduction under section 1203 shall not be taken into account.”

(4) Subparagraph (C) of section 643(a)(6) is amended to read as follows:

“(C) Paragraph (3) shall not apply to a foreign trust. In the case of such a trust—

“(i) there shall be included gains from the sale or exchange of capital assets, reduced by losses from such sales or exchanges to the extent such losses do not exceed gains from such sales or exchanges, and

“(ii) the deduction under section 1203 shall not be taken into account.”

(5) Paragraph (4) of section 691(c) is amended by inserting “1203,” after “1202.”

(6) Paragraph (2) of section 871(a) is amended by inserting “or 1203,” after “1202.”

(7) The table of sections for part I of subchapter P of chapter 1 is amended by adding at the end the following new item:

“Sec. 1203. Deduction for qualified timber gain.”

(i) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 1552. EXCISE TAX NOT APPLICABLE TO SECTION 1203 DEDUCTION OF REAL ESTATE INVESTMENT TRUSTS.

(a) IN GENERAL.—

(1) ORDINARY INCOME.—Subparagraph (B) of section 4981(e)(1) is amended to read as follows:

“(B) by not taking into account—

“(i) any gain or loss from the sale or exchange of capital assets (determined without regard to any reduction that would be applied for purposes of section 857(b)(3)(G)(i)), and

“(ii) any deduction allowable under section 1203, and”.

(2) CAPITAL GAIN NET INCOME.—Section 4981(e)(2) is amended by adding at the end the following new subparagraph:

“(D) QUALIFIED TIMBER GAIN.—The amount determined under subparagraph (A) shall be determined without regard to any reduction that would be applied for purposes of section 857(b)(3)(G)(i) but shall be reduced for any deduction allowable under section 1203 for such calendar year.”

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 1553. TIMBER REIT MODERNIZATION.

(a) IN GENERAL.—Section 856(c)(5) is amended by adding after subparagraph (G) the following new subparagraph:

“(H) TREATMENT OF TIMBER GAINS.—

“(i) IN GENERAL.—Gain from the sale of real property described in paragraph (2)(D) and (3)(C) shall include gain which is—

“(I) recognized by an election under section 631(a) from timber owned by the real estate investment trust, the cutting of which is provided by a taxable REIT subsidiary of the real estate investment trust;

“(II) recognized under section 631(b); or

“(III) income which would constitute gain under subclause (I) or (II) but for the failure to meet the 1-year holding period requirement.

“(ii) SPECIAL RULES.—

“(I) For purposes of this subtitle, cut timber, the gain of which is recognized by a real estate investment trust pursuant to an election under section 631(a) described in clause (i)(I) or so much of clause (i)(III) as relates to clause (i)(I), shall be deemed to be sold to the taxable REIT subsidiary of the real estate investment trust on the first day of the taxable year.

“(II) For purposes of this subtitle, income described in this subparagraph shall not be treated as gain from the sale of property described in section 1221(a)(1).

“(iii) TERMINATION.—This subparagraph shall not apply to dispositions after the termination date.”

(b) TERMINATION DATE.—Subsection (c) of section 856 is amended by adding at the end the following new paragraph:

“(8) TERMINATION DATE.—For purposes of this subsection, the term ‘termination date’ means the last day of the first taxable year beginning after the date of the enactment of this paragraph.”

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to dispositions in taxable years beginning after the date of the enactment of this Act.

SEC. 1554. MINERAL ROYALTY INCOME QUALIFYING INCOME FOR TIMBER REITS.

(a) IN GENERAL.—Section 856(c)(2) is amended by striking “and” at the end of subparagraph (G), by inserting “and” at the end of subparagraph (H), and by adding after subparagraph (H) the following new subparagraph:

“(I) mineral royalty income earned in the first taxable year beginning after the date of the enactment of this subparagraph from real property owned by a timber real estate investment trust held, or once held, in connection with the trade or business of producing timber by such real estate investment trust;”

(b) TIMBER REAL ESTATE INVESTMENT TRUST.—Section 856(c)(5), as amended by this Act, is amended by adding after subparagraph (H) the following new subparagraph:

“(I) TIMBER REAL ESTATE INVESTMENT TRUST.—The term ‘timber real estate investment trust’ means a real estate investment trust in which more than 50 percent in value of its total assets consists of real property held in connection with the trade or business of producing timber.”

(c) EFFECTIVE DATE.—The amendments by this section shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 1555. MODIFICATION OF TAXABLE REIT SUBSIDIARY ASSET TEST FOR TIMBER REITS.

(a) IN GENERAL.—Section 856(c)(4)(B)(ii) is amended by inserting “(in the case of a quarter which closes on or before the termination date, 25 percent in the case of a timber real estate investment trust)” after “not more than 20 percent of the value of its total assets is represented by securities of one or more taxable REIT subsidiaries”.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 1556. SAFE HARBOR FOR TIMBER PROPERTY.

(a) IN GENERAL.—Section 857(b)(6) (relating to income from prohibited transactions) is amended by adding at the end the following new subparagraph:

“(G) SPECIAL RULES FOR SALES TO QUALIFIED ORGANIZATIONS.—

“(i) IN GENERAL.—In the case of sale of a real estate asset (as defined in section 856(c)(5)(B)) to a qualified organization (as defined in section 170(h)(3)) exclusively for conservation purposes (within the meaning of section 170(h)(1)(C)), subparagraph (D) shall be applied—

“(I) by substituting ‘2 years’ for ‘4 years’ in clause (i), and

“(II) by substituting ‘2-year period’ for ‘4-year period’ in clauses (ii) and (iii).

“(ii) TERMINATION.—This subparagraph shall not apply to sales after the termination date.”

(b) PROHIBITED TRANSACTIONS.—Section 857(b)(6)(D)(v) is amended by inserting “or, in the case of a sale on or before the termination date, a taxable REIT subsidiary” after “independent contractor (as defined in section 856(d)(3)) from whom the trust itself does not derive or receive any income”.

(c) SALES THAT ARE NOT PROHIBITED TRANSACTIONS.—Section 857(b)(6), as amended by subsection (a), is amended by adding at the end the following new subparagraph:

“(H) SALES OF PROPERTY THAT ARE NOT A PROHIBITED TRANSACTION.—In the case of a sale on or before the termination date, the sale of property which is not a prohibited transaction through application of subparagraph (D) shall be considered property held for investment or for use in a trade or business and not property described in section 1221(a)(1) for all purposes of this subtitle.”.

(d) TERMINATION DATE.—Section 857(b)(6), as amended by subsections (a) and (c), is amended by adding at the end the following new subparagraph:

“(I) TERMINATION DATE.—For purposes of this paragraph, the term ‘termination date’ means the last day of the first taxable year beginning after the date of the enactment of this subparagraph.”.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to dispositions in taxable years beginning after the date of the enactment of this Act.

PART II—EXXON VALDEZ

SEC. 1557. INCOME AVERAGING FOR AMOUNTS RECEIVED IN CONNECTION WITH THE EXXON VALDEZ LITIGATION.

(a) INCOME AVERAGING OF AMOUNTS RECEIVED FROM THE EXXON VALDEZ LITIGATION.—For purposes of section 1301 of the Internal Revenue Code of 1986—

(1) any qualified taxpayer who receives any qualified settlement income in any taxable year shall be treated as engaged in a fishing business (determined without regard to the commercial nature of the business), and

(2) such qualified settlement income shall be treated as income attributable to such a fishing business for such taxable year.

(b) CONTRIBUTIONS OF AMOUNTS RECEIVED TO RETIREMENT ACCOUNTS.—

(1) IN GENERAL.—Any qualified taxpayer who receives qualified settlement income during the taxable year may, at any time before the end of the taxable year in which such income was received, make one or more contributions to an eligible retirement plan of which such qualified taxpayer is a beneficiary in an aggregate amount not to exceed the lesser of—

(A) \$100,000 (reduced by the amount of qualified settlement income contributed to an eligible retirement plan in prior taxable years pursuant to this subsection), or

(B) the amount of qualified settlement income received by the individual during the taxable year.

(2) TIME WHEN CONTRIBUTIONS DEEMED MADE.—For purposes of paragraph (1), a qualified taxpayer shall be deemed to have made a contribution to an eligible retirement plan on the last day of the taxable year in which such income is received if the contribution is made on account of such taxable year and is made not later than the time prescribed by law for filing the return for such taxable year (not including extensions thereof).

(3) TREATMENT OF CONTRIBUTIONS TO ELIGIBLE RETIREMENT PLANS.—For purposes of the Internal Revenue Code of 1986, if a contribution is made pursuant to paragraph (1) with respect to qualified settlement income, then—

(A) except as provided in paragraph (4)—

(1) to the extent of such contribution, the qualified settlement income shall not be included in taxable income, and

(ii) for purposes of section 72 of such Code, such contribution shall not be considered to be investment in the contract,

(B) the qualified taxpayer shall, to the extent of the amount of the contribution, be treated—

(i) as having received the qualified settlement income—

(I) in the case of a contribution to an individual retirement plan (as defined under section 7701(a)(37) of such Code), in a distribution described in section 408(d)(3) of such Code, and

(II) in the case of any other eligible retirement plan, in an eligible rollover distribution (as defined under section 402(f)(2) of such Code), and

(ii) as having transferred the amount to the eligible retirement plan in a direct trustee to trustee transfer within 60 days of the distribution,

(C) section 408(d)(3)(B) of the Internal Revenue Code of 1986 shall not apply with respect to amounts treated as a rollover under this paragraph, and

(D) section 408A(c)(3)(B) of the Internal Revenue Code of 1986 shall not apply with respect to amounts contributed to a Roth IRA (as defined under section 408A(b) of such Code) or a designated Roth contribution to an applicable retirement plan (within the meaning of section 402A of such Code) under this paragraph.

(4) SPECIAL RULE FOR ROTH IRAS AND ROTH 401(k)s.—For purposes of the Internal Revenue Code of 1986, if a contribution is made pursuant to paragraph (1) with respect to qualified settlement income to a Roth IRA (as defined under section 408A(b) of such Code) or as a designated Roth contribution to an applicable retirement plan (within the meaning of section 402A of such Code), then—

(A) the qualified settlement income shall be includible in taxable income, and

(B) for purposes of section 72 of such Code, such contribution shall be considered to be investment in the contract.

(5) ELIGIBLE RETIREMENT PLAN.—For purpose of this subsection, the term “eligible retirement plan” has the meaning given such term under section 402(c)(8)(B) of the Internal Revenue Code of 1986.

(c) TREATMENT OF QUALIFIED SETTLEMENT INCOME UNDER EMPLOYMENT TAXES.—

(1) SECA.—For purposes of chapter 2 of the Internal Revenue Code of 1986 and section 211 of the Social Security Act, no portion of qualified settlement income received by a qualified taxpayer shall be treated as self-employment income.

(2) FICA.—For purposes of chapter 21 of the Internal Revenue Code of 1986 and section 209 of the Social Security Act, no portion of qualified settlement income received by a qualified taxpayer shall be treated as wages.

(d) QUALIFIED TAXPAYER.—For purposes of this section, the term “qualified taxpayer” means—

(1) any individual who is a plaintiff in the civil action *In re Exxon Valdez*, No. 89-095-CV (HRH) (Consolidated) (D. Alaska); or

(2) any individual who is a beneficiary of the estate of such a plaintiff who—

(A) acquired the right to receive qualified settlement income from that plaintiff; and

(B) was the spouse or an immediate relative of that plaintiff.

(e) QUALIFIED SETTLEMENT INCOME.—For purposes of this section, the term “qualified settlement income” means any interest and punitive damage awards which are—

(1) otherwise includible in taxable income, and

(2) received (whether as lump sums or periodic payments) in connection with the civil action *In re Exxon Valdez*, No. 89-095-CV (HRH) (Consolidated) (D. Alaska) (whether

pre- or post-judgment and whether related to a settlement or judgment).

Subtitle E—Revenue Provisions

SEC. 1561. LIMITATION OF DEDUCTION FOR INCOME ATTRIBUTABLE TO DOMESTIC PRODUCTION OF OIL, GAS, OR A PRIMARY PRODUCTS THEREOF.

(a) DENIAL OF DEDUCTION FOR MAJOR INTEGRATED OIL COMPANIES FOR INCOME ATTRIBUTABLE TO DOMESTIC PRODUCTION OF OIL, GAS, OR PRIMARY PRODUCTS THEREOF.—

(1) IN GENERAL.—Subparagraph (B) of section 199(c)(4) (relating to exceptions) is amended by striking “or” at the end of clause (ii), by striking the period at the end of clause (iii) and inserting “, or”, and by inserting after clause (iii) the following new clause:

“(iv) in the case of any major integrated oil company (as defined in section 167(h)(5)(B)), the production, refining, processing, transportation, or distribution of oil, gas, or any primary product thereof during any taxable year described in section 167(h)(5)(B).”.

(2) PRIMARY PRODUCT.—Section 199(c)(4)(B) is amended by adding at the end the following flush sentence:

“For purposes of clause (iv), the term ‘primary product’ has the same meaning as when used in section 927(a)(2)(C), as in effect before its repeal.”.

(b) LIMITATION ON OIL RELATED QUALIFIED PRODUCTION ACTIVITIES INCOME FOR TAXPAYERS OTHER THAN MAJOR INTEGRATED OIL COMPANIES.—

(1) IN GENERAL.—Section 199(d) is amended by redesignating paragraph (9) as paragraph (10) and by inserting after paragraph (8) the following new paragraph:

“(9) SPECIAL RULE FOR TAXPAYERS WITH OIL RELATED QUALIFIED PRODUCTION ACTIVITIES INCOME.—

“(A) IN GENERAL.—If a taxpayer (other than a major integrated oil company (as defined in section 167(h)(5)(B))) has oil related qualified production activities income for any taxable year beginning after 2009, the amount of the deduction under subsection (a) shall be reduced by 3 percent of the least of—

“(i) the oil related qualified production activities income of the taxpayer for the taxable year,

“(ii) the qualified production activities income of the taxpayer for the taxable year, or

“(iii) taxable income (determined without regard to this section).

“(B) OIL RELATED QUALIFIED PRODUCTION ACTIVITIES INCOME.—The term ‘oil related qualified production activities income’ means for any taxable year the qualified production activities income which is attributable to the production, refining, processing, transportation, or distribution of oil, gas, or any primary product thereof during such taxable year.”.

(2) CONFORMING AMENDMENT.—Section 199(d)(2) (relating to application to individuals) is amended by striking “subsection (a)(1)(B)” and inserting “subsections (a)(1)(B) and (d)(9)(A)(iii)”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2007.

SEC. 1562. ELIMINATION OF THE DIFFERENT TREATMENT OF FOREIGN OIL AND GAS EXTRACTION INCOME AND FOREIGN OIL RELATED INCOME FOR PURPOSES OF THE FOREIGN TAX CREDIT.

(a) IN GENERAL.—Subsections (a) and (b) of section 907 (relating to special rules in case of foreign oil and gas income) are amended to read as follows:

“(a) REDUCTION IN AMOUNT ALLOWED AS FOREIGN TAX UNDER SECTION 901.—In applying section 901, the amount of any foreign oil and gas taxes paid or accrued (or deemed to

have been paid) during the taxable year which would (but for this subsection) be taken into account for purposes of section 901 shall be reduced by the amount (if any) by which the amount of such taxes exceeds the product of—

“(1) the amount of the combined foreign oil and gas income for the taxable year,

“(2) multiplied by—

“(A) in the case of a corporation, the percentage which is equal to the highest rate of tax specified under section 11(b), or

“(B) in the case of an individual, a fraction the numerator of which is the tax against which the credit under section 901(a) is taken and the denominator of which is the taxpayer's entire taxable income.

“(b) COMBINED FOREIGN OIL AND GAS INCOME; FOREIGN OIL AND GAS TAXES.—For purposes of this section—

“(1) COMBINED FOREIGN OIL AND GAS INCOME.—The term ‘combined foreign oil and gas income’ means, with respect to any taxable year, the sum of—

“(A) foreign oil and gas extraction income, and

“(B) foreign oil related income.

“(2) FOREIGN OIL AND GAS TAXES.—The term ‘foreign oil and gas taxes’ means, with respect to any taxable year, the sum of—

“(A) oil and gas extraction taxes, and

“(B) any income, war profits, and excess profits taxes paid or accrued (or deemed to have been paid or accrued under section 902 or 960) during the taxable year with respect to foreign oil related income (determined without regard to subsection (c)(4)) or loss which would be taken into account for purposes of section 901 without regard to this section.”.

(b) RECAPTURE OF FOREIGN OIL AND GAS LOSSES.—Paragraph (4) of section 907(c) (relating to recapture of foreign oil and gas extraction losses by recharacterizing later extraction income) is amended to read as follows:

“(4) RECAPTURE OF FOREIGN OIL AND GAS LOSSES BY RECHARACTERIZING LATER COMBINED FOREIGN OIL AND GAS INCOME.—

“(A) IN GENERAL.—The combined foreign oil and gas income of a taxpayer for a taxable year (determined without regard to this paragraph) shall be reduced—

“(i) first by the amount determined under subparagraph (B), and

“(ii) then by the amount determined under subparagraph (C).

The aggregate amount of such reductions shall be treated as income (from sources without the United States) which is not combined foreign oil and gas income.

“(B) REDUCTION FOR PRE-2008 FOREIGN OIL EXTRACTION LOSSES.—The reduction under this paragraph shall be equal to the lesser of—

“(i) the foreign oil and gas extraction income of the taxpayer for the taxable year (determined without regard to this paragraph), or

“(ii) the excess of—

“(I) the aggregate amount of foreign oil extraction losses for preceding taxable years beginning after December 31, 1982, and before January 1, 2008, over

“(II) so much of such aggregate amount as was recharacterized under this paragraph (as in effect before and after the date of the enactment of the Clean Renewable Energy and Conservation Tax Act of 2007) for preceding taxable years beginning after December 31, 1982.

“(C) REDUCTION FOR POST-2007 FOREIGN OIL AND GAS LOSSES.—The reduction under this paragraph shall be equal to the lesser of—

“(i) the combined foreign oil and gas income of the taxpayer for the taxable year (determined without regard to this para-

graph), reduced by an amount equal to the reduction under subparagraph (A) for the taxable year, or

“(ii) the excess of—

“(I) the aggregate amount of foreign oil and gas losses for preceding taxable years beginning after December 31, 2007, over

“(II) so much of such aggregate amount as was recharacterized under this paragraph for preceding taxable years beginning after December 31, 2007.

“(D) FOREIGN OIL AND GAS LOSS DEFINED.—

“(i) IN GENERAL.—For purposes of this paragraph, the term ‘foreign oil and gas loss’ means the amount by which—

“(I) the gross income for the taxable year from sources without the United States and its possessions (whether or not the taxpayer chooses the benefits of this subpart for such taxable year) taken into account in determining the combined foreign oil and gas income for such year, is exceeded by

“(II) the sum of the deductions properly apportioned or allocated thereto.

“(ii) NET OPERATING LOSS DEDUCTION NOT TAKEN INTO ACCOUNT.—For purposes of clause (i), the net operating loss deduction allowable for the taxable year under section 172(a) shall not be taken into account.

“(iii) EXPROPRIATION AND CASUALTY LOSSES NOT TAKEN INTO ACCOUNT.—For purposes of clause (i), there shall not be taken into account—

“(I) any foreign expropriation loss (as defined in section 172(h) (as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990)) for the taxable year, or

“(II) any loss for the taxable year which arises from fire, storm, shipwreck, or other casualty, or from theft, to the extent such loss is not compensated for by insurance or otherwise.

“(iv) FOREIGN OIL EXTRACTION LOSS.—For purposes of subparagraph (B)(ii)(I), foreign oil extraction losses shall be determined under this paragraph as in effect on the day before the date of the enactment of the Clean Renewable Energy and Conservation Tax Act of 2007.”.

(c) CARRYBACK AND CARRYOVER OF DISALLOWED CREDITS.—Section 907(f) (relating to carryback and carryover of disallowed credits) is amended—

(1) by striking “oil and gas extraction taxes” each place it appears and inserting “foreign oil and gas taxes”, and

(2) by adding at the end the following new paragraph:

“(4) TRANSITION RULES FOR PRE-2008 AND 2008 DISALLOWED CREDITS.—

“(A) PRE-2008 CREDITS.—In the case of any unused credit year beginning before January 1, 2008, this subsection shall be applied to any unused oil and gas extraction taxes carried from such unused credit year to a year beginning after December 31, 2007—

“(i) by substituting ‘oil and gas extraction taxes’ for ‘foreign oil and gas taxes’ each place it appears in paragraphs (1), (2), and (3), and

“(ii) by computing, for purposes of paragraph (2)(A), the limitation under subparagraph (A) for the year to which such taxes are carried by substituting ‘foreign oil and gas extraction income’ for ‘foreign oil and gas income’ in subsection (a).

“(B) 2008 CREDITS.—In the case of any unused credit year beginning in 2008, the amendments made to this subsection by the Clean Renewable Energy and Conservation Tax Act of 2007 shall be treated as being in effect for any preceding year beginning before January 1, 2008, solely for purposes of determining how much of the unused foreign oil and gas taxes for such unused credit year may be deemed paid or accrued in such preceding year.”.

(d) CONFORMING AMENDMENT.—Section 6501(i) is amended by striking “oil and gas extraction taxes” and inserting “foreign oil and gas taxes”.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2007.

SEC. 1563. SEVEN-YEAR AMORTIZATION OF GEOLOGICAL AND GEOPHYSICAL EXPENDITURES FOR CERTAIN MAJOR INTEGRATED OIL COMPANIES.

(a) IN GENERAL.—Subparagraph (A) of section 167(h)(5) (relating to special rule for major integrated oil companies) is amended by striking “5-year” and inserting “7-year”.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to amounts paid or incurred after the date of the enactment of this Act.

SEC. 1564. BROKER REPORTING OF CUSTOMER'S BASIS IN SECURITIES TRANSACTIONS.

(a) IN GENERAL.—

(1) BROKER REPORTING FOR SECURITIES TRANSACTIONS.—Section 6045 (relating to returns of brokers) is amended by adding at the end the following new subsection:

“(g) ADDITIONAL INFORMATION REQUIRED IN THE CASE OF SECURITIES TRANSACTIONS.—

“(1) IN GENERAL.—If a broker is otherwise required to make a return under subsection (a) with respect to the gross proceeds of the sale of a covered security, the broker shall include in such return the information described in paragraph (2).

“(2) ADDITIONAL INFORMATION REQUIRED.—

“(A) IN GENERAL.—The information required under paragraph (1) to be shown on a return with respect to a covered security of a customer shall include the customer's adjusted basis in such security and whether any gain or loss with respect to such security is long-term or short-term (within the meaning of section 1222).

“(B) DETERMINATION OF ADJUSTED BASIS.—For purposes of subparagraph (A)—

“(i) IN GENERAL.—The customer's adjusted basis shall be determined—

“(I) in the case of any stock (other than any stock in an open-end fund), in accordance with the first-in-first-out method unless the customer notifies the broker by means of making an adequate identification of the stock sold or transferred,

“(II) in the case of any stock in an open-end fund acquired before January 1, 2011, in accordance with any acceptable method under section 1012 with respect to the account in which such interest is held,

“(III) in the case of any stock in an open-end fund acquired after December 31, 2010, in accordance with the broker's default method unless the customer notifies the broker that he elects another acceptable method under section 1012 with respect to the account in which such interest is held, and

“(IV) in any other case, under the method for making such determination under section 1012.

“(ii) EXCEPTION FOR WASH SALES.—Except as otherwise provided by the Secretary, the customer's adjusted basis shall be determined without regard to section 1091 (relating to loss from wash sales of stock or securities) unless the transactions occur in the same account with respect to identical securities.

“(3) COVERED SECURITY.—For purposes of this subsection—

“(A) IN GENERAL.—The term ‘covered security’ means any specified security acquired on or after the applicable date if such security—

“(i) was acquired through a transaction in the account in which such security is held, or

“(ii) was transferred to such account from an account in which such security was a covered security, but only if the broker received

a statement under section 6045A with respect to the transfer.

“(B) SPECIFIED SECURITY.—The term ‘specified security’ means—

“(i) any share of stock in a corporation,
“(ii) any note, bond, debenture, or other evidence of indebtedness,
“(iii) any commodity, or contract or derivative with respect to such commodity, if the Secretary determines that adjusted basis reporting is appropriate for purposes of this subsection, and

“(iv) any other financial instrument with respect to which the Secretary determines that adjusted basis reporting is appropriate for purposes of this subsection.
“(C) APPLICABLE DATE.—The term ‘applicable date’ means—

“(i) January 1, 2009, in the case of any specified security which is stock in a corporation, and
“(ii) January 1, 2011, or such later date determined by the Secretary in the case of any other specified security.

“(4) OPEN-END FUND.—For purposes of this subsection, the term ‘open-end fund’ means a regulated investment company (as defined in section 851) which is offering for sale or has outstanding any redeemable security of which it is the issuer and the shares of which are not traded on an established securities exchange.
“(5) TREATMENT OF S CORPORATIONS.—In the case of the sale of a covered security acquired by an S corporation (other than a financial institution) after December 31, 2010, such S corporation shall be treated in the same manner as a partnership for purposes of this section.

“(6) SPECIAL RULES FOR SHORT SALES.—
“(A) IN GENERAL.—Notwithstanding subsection (a), in the case of a short sale under section 1233, reporting under this section shall be made for the year in which such sale is closed.
“(B) EXCEPTION FOR CONSTRUCTIVE SALES.—Subparagraph (A) shall not apply to any short sale which results in a constructive sale under section 1259 with respect to property held in the account in which the short sale is entered into.”.

(2) BROKER INFORMATION REQUIRED WITH RESPECT TO OPTIONS.—Section 6045, as amended by subsection (a), is amended by adding at the end the following new subsection:
“(h) APPLICATION TO OPTIONS ON SECURITIES.—

“(1) EXERCISE OF OPTION.—For purposes of this section, in the case of any exercise of an option on a covered security where the option was granted or acquired in the same account as the covered security, the amount received or paid with respect to such exercise shall be treated as an adjustment to gross proceeds or as an adjustment to basis, as the case may be.
“(2) LAPSE OR CLOSING TRANSACTION.—For purposes of this section, in the case of the lapse (or closing transaction (as defined in section 1234(b)(2)(A))) of an option on a specified security where the taxpayer is the grantor of the option, this section shall apply as if the premium received for such option were gross proceeds received on the date of the lapse or closing transaction, and the cost (if any) of the closing transaction shall be taken into account as adjusted basis. In the case of an option on a specified security where the taxpayer is the grantee of such option, this section shall apply as if the grantee received gross proceeds of zero on the date of the lapse.

“(3) PROSPECTIVE APPLICATION.—Paragraphs (1) and (2) shall not apply to any option which is granted or acquired before January 1, 2011.
“(4) DEFINITIONS.—For purposes of this subsection, the terms ‘covered security’ and

‘specified security’ shall have the meanings given such terms in subsection (g)(3).”.

(3) EXTENSION OF PERIOD FOR STATEMENTS SENT TO CUSTOMERS.—

(A) IN GENERAL.—Subsection (b) of section 6045 is amended by striking “January 31” and inserting “February 15 (January 31 in the case of returns for calendar years before 2010)”.

(B) STATEMENTS RELATED TO SUBSTITUTE PAYMENTS.—Subsection (d) of section 6045 is amended—

(i) by striking “at such time and”, and
(ii) by inserting after “other item.” the following new sentence: “In the case of a payment made during any calendar year after 2009, the written statement required under the preceding sentence shall be furnished on or before February 15 of the year following the calendar year in which the payment was made.”.

(C) OTHER STATEMENTS.—Subsection (b) of section 6045 is amended by adding at the end the following: “In the case of a consolidated reporting statement (as defined in regulations) with respect to any account which includes the statement required by this subsection, any statement which would otherwise be required to be furnished on or before January 31 of a calendar year after 2010 under section 6042(c), 6049(c)(2)(A), or 6050N(b) with respect to any item in such account shall instead be required to be furnished on or before February 15 of such calendar year if furnished as part of such consolidated reporting statement.”.

(b) DETERMINATION OF BASIS OF CERTAIN SECURITIES ON ACCOUNT BY ACCOUNT METHOD.—Section 1012 (relating to basis of property—cost) is amended—

(1) by striking “The basis of property” and inserting the following:

“(a) IN GENERAL.—The basis of property”,
(2) by striking “The cost of real property” and inserting the following:

“(b) SPECIAL RULE FOR APPORTIONED REAL ESTATE TAXES.—The cost of real property”, and

(3) by adding at the end the following new subsection:

“(c) DETERMINATIONS BY ACCOUNT.—

“(1) IN GENERAL.—In the case of the sale, exchange, or other disposition of a specified security on or after the applicable date, the conventions prescribed by regulations under this section shall be applied on an account by account basis.
“(2) APPLICATION TO OPEN-END FUNDS.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), any stock in an open-end fund acquired before January 1, 2009, shall be treated as a separate account from any such stock acquired on or after such date.
“(B) ELECTION BY OPEN-END FUND FOR TREATMENT AS SINGLE ACCOUNT.—If an open-end fund elects (at such time and in such form and manner as the Secretary may prescribe) to have this subparagraph apply with respect to one or more of its stockholders—

“(i) subparagraph (A) shall not apply with respect to any stock in such fund held by such stockholders, and
“(ii) all stock in such fund which is held by such stockholders shall be treated as covered securities described in section 6045(g)(3) without regard to the date of the acquisition of such stock.

A rule similar to the rule of the preceding sentence shall apply with respect to a broker holding stock in an open-end fund as a nominee.
“(3) DEFINITIONS.—For purposes of this section, the terms ‘specified security’, ‘applicable date’, and ‘open-end fund’ shall have the meaning given such terms in section 6045(g).”.

(c) INFORMATION BY TRANSFERORS TO AID BROKERS.—

(1) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 is amended by inserting after section 6045 the following new section:

“SEC. 6045A. INFORMATION REQUIRED IN CONNECTION WITH TRANSFERS OF COVERED SECURITIES TO BROKERS.

“(a) FURNISHING OF INFORMATION.—Every applicable person which transfers to a broker (as defined in section 6045(c)(1)) a security which is a covered security (as defined in section 6045(g)(3)) in the hands of such applicable person shall furnish to such broker a written statement in such manner and setting forth such information as the Secretary may by regulations prescribe for purposes of enabling such broker to meet the requirements of section 6045(g).
“(b) APPLICABLE PERSON.—For purposes of subsection (a), the term ‘applicable person’ means—

“(1) any broker (as defined in section 6045(c)(1)), and
“(2) any other person as provided by the Secretary in regulations.

“(c) TIME FOR FURNISHING STATEMENT.—Any statement required by subsection (a) shall be furnished not later than the earlier of—

“(1) 45 days after the date of the transfer described in subsection (a), or
“(2) January 15 of the year following the calendar year during which such transfer occurred.”.

(2) ASSESSABLE PENALTIES.—Paragraph (2) of section 6724(d) (defining payee statement) is amended by redesignating subparagraphs (I) through (CC) as subparagraphs (J) through (DD), respectively, and by inserting after subparagraph (H) the following new subparagraph:

“(I) section 6045A (relating to information required in connection with transfers of covered securities to brokers).”.

(3) CLERICAL AMENDMENT.—The table of sections for subpart B of part III of subchapter A of chapter 61 is amended by inserting after the item relating to section 6045 the following new item:

“Sec. 6045A. Information required in connection with transfers of covered securities to brokers.”.

(d) ADDITIONAL ISSUER INFORMATION TO AID BROKERS.—

(1) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1986, as amended by subsection (b), is amended by inserting after section 6045A the following new section:

“SEC. 6045B. RETURNS RELATING TO ACTIONS AFFECTING BASIS OF SPECIFIED SECURITIES.

“(a) IN GENERAL.—According to the forms or regulations prescribed by the Secretary, any issuer of a specified security shall make a return setting forth—

“(1) a description of any organizational action which affects the basis of such specified security of such issuer,
“(2) the quantitative effect on the basis of such specified security resulting from such action, and
“(3) such other information as the Secretary may prescribe.

“(b) TIME FOR FILING RETURN.—Any return required by subsection (a) shall be filed not later than the earlier of—

“(1) 45 days after the date of the action described in subsection (a), or
“(2) January 15 of the year following the calendar year during which such action occurred.

“(c) STATEMENTS TO BE FURNISHED TO HOLDERS OF SPECIFIED SECURITIES OR THEIR NOMINEES.—According to the forms or regulations prescribed by the Secretary, every

applicable person which transfers to a broker (as defined in section 6045(c)(1)) a security which is a covered security (as defined in section 6045(g)(3)) in the hands of such applicable person shall furnish to such broker a written statement in such manner and setting forth such information as the Secretary may by regulations prescribe for purposes of enabling such broker to meet the requirements of section 6045(g).
“(b) APPLICABLE PERSON.—For purposes of subsection (a), the term ‘applicable person’ means—

person required to make a return under subsection (a) with respect to a specified security shall furnish to the nominee with respect to the specified security (or certificate holder if there is no nominee) a written statement showing—

“(1) the name, address, and phone number of the information contact of the person required to make such return,

“(2) the information required to be shown on such return with respect to such security, and

“(3) such other information as the Secretary may prescribe.

The written statement required under the preceding sentence shall be furnished to the holder on or before January 15 of the year following the calendar year during which the action described in subsection (a) occurred.

“(d) SPECIFIED SECURITY.—For purposes of this section, the term ‘specified security’ has the meaning given such term by section 6045(g)(3)(B). No return shall be required under this section with respect to actions described in subsection (a) with respect to a specified security which occur before the applicable date (as defined in section 6045(g)(3)(C)) with respect to such security.

“(e) PUBLIC REPORTING IN LIEU OF RETURN.—The Secretary may waive the requirements under subsections (a) and (c) with respect to a specified security, if the person required to make the return under subsection (a) makes publicly available, in such form and manner as the Secretary determines necessary to carry out the purposes of this section—

“(1) the name, address, phone number, and email address of the information contact of such person, and

“(2) the information described in paragraphs (1), (2), and (3) of subsection (a).”.

(2) ASSESSABLE PENALTIES.—

(A) Subparagraph (B) of section 6724(d)(1) of such Code (defining information return) is amended by redesignating clauses (iv) through (xix) as clauses (v) through (xx), respectively, and by inserting after clause (iii) the following new clause:

“(iv) section 6045B(a) (relating to returns relating to actions affecting basis of specified securities).”.

(B) Paragraph (2) of section 6724(d) of such Code (defining payee statement), as amended by subsection (c)(2), is amended by redesignating subparagraphs (J) through (DD) as subparagraphs (K) through (EE), respectively, and by inserting after subparagraph (I) the following new subparagraph:

“(J) subsections (c) and (e) of section 6045B (relating to returns relating to actions affecting basis of specified securities).”.

(3) CLERICAL AMENDMENT.—The table of sections for subpart B of part III of subchapter A of chapter 61 of such Code, as amended by subsection (b)(3), is amended by inserting after the item relating to section 6045A the following new item:

“Sec. 6045B. Returns relating to actions affecting basis of specified securities.”.

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 2009.

(f) STUDY REGARDING INFORMATION RETURNS.—

(1) IN GENERAL.—The Secretary of the Treasury shall study the effect and feasibility of delaying the date for furnishing statements under sections 6042(c), 6045, 6049(c)(2)(A), and 6050N(b) of the Internal Revenue Code of 1986 until February 15 following the year to which such statements relate.

(2) REPORT.—Not later than 6 months after the date of the enactment of this Act, the Secretary of the Treasury shall report to

Congress on the results of the study conducted under paragraph (1). Such report shall include the Secretary’s findings regarding—

(A) the effect on tax administration of such delay, and

(B) other administrative or legislative options to improve compliance and ease burdens on taxpayers and brokers with respect to such statements.

SEC. 1565. EXTENSION OF ADDITIONAL 0.2 PERCENT FUTA SURTAX.

(a) IN GENERAL.—Section 3301 (relating to rate of tax) is amended—

(1) by striking “2007” in paragraph (1) and inserting “2008”, and

(2) by striking “2008” in paragraph (2) and inserting “2009”.

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to wages paid after December 31, 2007.

SEC. 1566. TERMINATION OF TREATMENT OF NATURAL GAS DISTRIBUTION LINES AS 15-YEAR PROPERTY.

(a) IN GENERAL.—Section 168(e)(3)(E)(viii) of the Internal Revenue Code of 1986 is amended by striking “January 1, 2011” and inserting “December 4, 2007”.

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply to property placed in service after December 3, 2007.

(2) EXCEPTION.—The amendments made by this section shall not apply to any property with respect to which the taxpayer or a related party has entered into a binding contract for the construction thereof on or before December 3, 2007, or, in the case of self-constructed property, has started construction on or before such date.

SEC. 1567. TIME FOR PAYMENT OF CORPORATE ESTIMATED TAXES.

The percentage under subparagraph (B) of section 401(1) of the Tax Increase Prevention and Reconciliation Act of 2005 in effect on the date of the enactment of this Act is increased by 6.25 percentage points.

SEC. 1568. MODIFICATION OF PENALTY FOR FAILURE TO FILE PARTNERSHIP RETURNS.

(a) EXTENSION OF TIME LIMITATION.—Section 6698(a) (relating to failure to file partnership returns) is amended by striking “5 months” and inserting “12 months”.

(b) INCREASE IN PENALTY AMOUNT.—Paragraph (1) of section 6698(b) is amended by striking “\$50” and inserting “\$80”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to returns required to be filed after the date of the enactment of this Act.

Subtitle F—Secure Rural Schools

SEC. 1571. SECURE RURAL SCHOOLS AND COMMUNITY SELF-DETERMINATION PROGRAM.

(a) REAUTHORIZATION OF THE SECURE RURAL SCHOOLS AND COMMUNITY SELF-DETERMINATION ACT OF 2000.—The Secure Rural Schools and Community Self-Determination Act of 2000 (16 U.S.C. 500 note; Public Law 106-393) is amended by striking sections 1 through 403 and inserting the following:

“SECTION 1. SHORT TITLE.

“This Act may be cited as the ‘Secure Rural Schools and Community Self-Determination Act of 2000’.

“SEC. 2. PURPOSES.

“The purposes of this Act are—

“(1) to stabilize and transition payments to counties to provide funding for schools and roads that supplements other available funds;

“(2) to make additional investments in, and create additional employment opportunities through, projects that—

“(A)(i) improve the maintenance of existing infrastructure;

“(ii) implement stewardship objectives that enhance forest ecosystems; and

“(iii) restore and improve land health and water quality;

“(B) enjoy broad-based support; and

“(C) have objectives that may include—

“(i) road, trail, and infrastructure maintenance or obliteration;

“(ii) soil productivity improvement;

“(iii) improvements in forest ecosystem health;

“(iv) watershed restoration and maintenance;

“(v) the restoration, maintenance, and improvement of wildlife and fish habitat;

“(vi) the control of noxious and exotic weeds; and

“(vii) the reestablishment of native species; and

“(3) to improve cooperative relationships among—

“(A) the people that use and care for Federal land; and

“(B) the agencies that manage the Federal land.

“SEC. 3. DEFINITIONS.

“In this Act:

“(1) ADJUSTED SHARE.—The term ‘adjusted share’ means the number equal to the quotient obtained by dividing—

“(A) the number equal to the quotient obtained by dividing—

“(i) the base share for the eligible county; by

“(ii) the income adjustment for the eligible county; by

“(B) the number equal to the sum of the quotients obtained under subparagraph (A) and paragraph (8)(A) for all eligible counties.

“(2) BASE SHARE.—The term ‘base share’ means the number equal to the average of—

“(A) the quotient obtained by dividing—

“(i) the number of acres of Federal land described in paragraph (7)(A) in each eligible county; by

“(ii) the total number acres of Federal land in all eligible counties in all eligible States; and

“(B) the quotient obtained by dividing—

“(i) the amount equal to the average of the 3 highest 25-percent payments and safety net payments made to each eligible State for each eligible county during the eligibility period; by

“(ii) the amount equal to the sum of the amounts calculated under clause (i) and paragraph (9)(B)(i) for all eligible counties in all eligible States during the eligibility period.

“(3) COUNTY PAYMENT.—The term ‘county payment’ means the payment for an eligible county calculated under section 101(b).

“(4) ELIGIBLE COUNTY.—The term ‘eligible county’ means any county that—

“(A) contains Federal land (as defined in paragraph (7)); and

“(B) elects to receive a share of the State payment or the county payment under section 102(b).

“(5) ELIGIBILITY PERIOD.—The term ‘eligibility period’ means fiscal year 1986 through fiscal year 1999.

“(6) ELIGIBLE STATE.—The term ‘eligible State’ means a State or territory of the United States that received a 25-percent payment for 1 or more fiscal years of the eligibility period.

“(7) FEDERAL LAND.—The term ‘Federal land’ means—

“(A) land within the National Forest System, as defined in section 11(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1609(a)) exclusive of the National Grasslands and land utilization projects designated as National Grasslands administered pursuant to the Act of July 22, 1937 (7 U.S.C. 1010-1012); and

“(B) such portions of the reconstituted Oregon and California Railroad and reconveyed Coos

Bay Wagon Road grant land as are or may hereafter come under the jurisdiction of the Department of the Interior, which have heretofore or may hereafter be classified as timberlands, and power-site land valuable for timber, that shall be managed, except as provided in the former section 3 of the Act of August 28, 1937 (50 Stat. 875; 43 U.S.C. 1181c), for permanent forest production.

“(8) 50-PERCENT ADJUSTED SHARE.—The term ‘50-percent adjusted share’ means the number equal to the quotient obtained by dividing—

“(A) the number equal to the quotient obtained by dividing—

“(i) the 50-percent base share for the eligible county; by

“(ii) the income adjustment for the eligible county; by

“(B) the number equal to the sum of the quotients obtained under subparagraph (A) and paragraph (1)(A) for all eligible counties.

“(9) 50-PERCENT BASE SHARE.—The term ‘50-percent base share’ means the number equal to the average of—

“(A) the quotient obtained by dividing—

“(i) the number of acres of Federal land described in paragraph (7)(B) in each eligible county; by

“(ii) the total number acres of Federal land in all eligible counties in all eligible States; and

“(B) the quotient obtained by dividing—

“(i) the amount equal to the average of the 3 highest 50-percent payments made to each eligible county during the eligibility period; by

“(ii) the amount equal to the sum of the amounts calculated under clause (i) and paragraph (2)(B)(i) for all eligible counties in all eligible States during the eligibility period.

“(10) 50-PERCENT PAYMENT.—The term ‘50-percent payment’ means the payment that is the sum of the 50-percent share otherwise paid to a county pursuant to title II of the Act of August 28, 1937 (chapter 876; 50 Stat. 875; 43 U.S.C. 1181f), and the payment made to a county pursuant to the Act of May 24, 1939 (chapter 144; 53 Stat. 753; 43 U.S.C. 1181f-1 et seq.).

“(11) FULL FUNDING AMOUNT.—The term ‘full funding amount’ means—

“(A) \$500,000,000 for fiscal year 2008; and

“(B) for fiscal year 2009 and each fiscal year thereafter, the amount that is equal to 85 percent of the full funding amount for the preceding fiscal year.

“(12) INCOME ADJUSTMENT.—The term ‘income adjustment’ means the square of the quotient obtained by dividing—

“(A) the per capita personal income for each eligible county; by

“(B) the median per capita personal income of all eligible counties.

“(13) PER CAPITA PERSONAL INCOME.—The term ‘per capita personal income’ means the most recent per capita personal income data, as determined by the Bureau of Economic Analysis.

“(14) SAFETY NET PAYMENTS.—The term ‘safety net payments’ means the special payment amounts paid to States and counties required by section 13982 or 13983 of the Omnibus Budget Reconciliation Act of 1993 (Public Law 103-66; 16 U.S.C. 500 note; 43 U.S.C. 1181f note).

“(15) SECRETARY CONCERNED.—The term ‘Secretary concerned’ means—

“(A) the Secretary of Agriculture or the designee of the Secretary of Agriculture with respect to the Federal land described in paragraph (7)(A); and

“(B) the Secretary of the Interior or the designee of the Secretary of the Interior with respect to the Federal land described in paragraph (7)(B).

“(16) STATE PAYMENT.—The term ‘State payment’ means the payment for an eligible State calculated under section 101(a).

“(17) 25-PERCENT PAYMENT.—The term ‘25-percent payment’ means the payment to States required by the sixth paragraph under the heading of ‘FOREST SERVICE’ in the Act of May 23, 1908 (35 Stat. 260; 16 U.S.C. 500), and section 13 of the Act of March 1, 1911 (36 Stat. 963; 16 U.S.C. 500).

“TITLE I—SECURE PAYMENTS FOR STATES AND COUNTIES CONTAINING FEDERAL LAND

“SEC. 101. SECURE PAYMENTS FOR STATES CONTAINING FEDERAL LAND.

“(a) STATE PAYMENT.—For each of fiscal years 2008 through 2011, the Secretary of Agriculture shall calculate for each eligible State an amount equal to the sum of the products obtained by multiplying—

“(1) the adjusted share for each eligible county within the eligible State; by

“(2) the full funding amount for the fiscal year.

“(b) COUNTY PAYMENT.—For each of fiscal years 2008 through 2011, the Secretary of the Interior shall calculate for each eligible county that received a 50-percent payment during the eligibility period an amount equal to the product obtained by multiplying—

“(1) the 50-percent adjusted share for the eligible county; by

“(2) the full funding amount for the fiscal year.

“SEC. 102. PAYMENTS TO STATES AND COUNTIES.

“(a) PAYMENT AMOUNTS.—Except as provided in section 103, the Secretary of the Treasury shall pay to—

“(1) a State or territory of the United States an amount equal to the sum of the amounts elected under subsection (b) by each county within the State or territory for—

“(A) if the county is eligible for the 25-percent payment, the share of the 25-percent payment; or

“(B) the share of the State payment of the eligible county; and

“(2) a county an amount equal to the amount elected under subsection (b) by each county for—

“(A) if the county is eligible for the 50-percent payment, the 50-percent payment; or

“(B) the county payment for the eligible county.

“(b) ELECTION TO RECEIVE PAYMENT AMOUNT.—

“(1) ELECTION; SUBMISSION OF RESULTS.—

“(A) IN GENERAL.—The election to receive a share of the State payment, the county payment, a share of the State payment and the county payment, a share of the 25-percent payment, the 50-percent payment, or a share of the 25-percent payment and the 50-percent payment, as applicable, shall be made at the discretion of each affected county by August 1, 2008, and August 1 of each second fiscal year thereafter, in accordance with paragraph (2), and transmitted to the Secretary concerned by the Governor of each eligible State.

“(B) FAILURE TO TRANSMIT.—If an election for an affected county is not transmitted to the Secretary concerned by the date specified under subparagraph (A), the affected county shall be considered to have elected to receive a share of the State payment, the county payment, or a share of the State payment and the county payment, as applicable.

“(2) DURATION OF ELECTION.—

“(A) IN GENERAL.—A county election to receive a share of the 25-percent payment or 50-percent payment, as applicable, shall be effective for 2 fiscal years.

“(B) FULL FUNDING AMOUNT.—If a county elects to receive a share of the State payment or the county payment, the election

shall be effective for all subsequent fiscal years through fiscal year 2011.

“(3) SOURCE OF PAYMENT AMOUNTS.—The payment to an eligible State or eligible county under this section for a fiscal year shall be derived from—

“(A) any revenues, fees, penalties, or miscellaneous receipts, exclusive of deposits to any relevant trust fund, special account, or permanent operating funds, received by the Federal Government from activities by the Bureau of Land Management or the Forest Service on the applicable Federal land; and

“(B) to the extent of any shortfall, out of any amounts in the Treasury of the United States not otherwise appropriated.

“(c) DISTRIBUTION AND EXPENDITURE OF PAYMENTS.—

“(1) DISTRIBUTION METHOD.—A State that receives a payment under subsection (a) for Federal land described in section 3(7)(A) shall distribute the appropriate payment amount among the appropriate counties in the State in accordance with—

“(A) the Act of May 23, 1908 (16 U.S.C. 500); and

“(B) section 13 of the Act of March 1, 1911 (36 Stat. 963; 16 U.S.C. 500).

“(2) EXPENDITURE PURPOSES.—Subject to subsection (d), payments received by a State under subsection (a) and distributed to counties in accordance with paragraph (1) shall be expended as required by the laws referred to in paragraph (1).

“(d) EXPENDITURE RULES FOR ELIGIBLE COUNTIES.—

“(1) ALLOCATIONS.—

“(A) USE OF PORTION IN SAME MANNER AS 25-PERCENT PAYMENT OR 50-PERCENT PAYMENT, AS APPLICABLE.—Except as provided in paragraph (3)(B), if an eligible county elects to receive its share of the State payment or the county payment, not less than 80 percent, but not more than 85 percent, of the funds shall be expended in the same manner in which the 25-percent payments or 50-percent payment, as applicable, are required to be expended.

“(B) ELECTION AS TO USE OF BALANCE.—Except as provided in subparagraph (C), an eligible county shall elect to do 1 or more of the following with the balance of any funds not expended pursuant to subparagraph (A):

“(i) Reserve any portion of the balance for projects in accordance with title II.

“(ii) Reserve not more than 7 percent of the total share for the eligible county of the State payment or the county payment for projects in accordance with title III.

“(iii) Return the portion of the balance not reserved under clauses (i) and (ii) to the Treasury of the United States.

“(C) COUNTIES WITH MODEST DISTRIBUTIONS.—In the case of each eligible county to which more than \$100,000, but less than \$350,000, is distributed for any fiscal year pursuant to either or both of paragraphs (1)(B) and (2)(B) of subsection (a), the eligible county, with respect to the balance of any funds not expended pursuant to subparagraph (A) for that fiscal year, shall—

“(i) reserve any portion of the balance for—

“(I) carrying out projects under title II;

“(II) carrying out projects under title III; or

“(III) a combination of the purposes described in subclauses (I) and (II); or

“(ii) return the portion of the balance not reserved under clause (i) to the Treasury of the United States.

“(2) DISTRIBUTION OF FUNDS.—

“(A) IN GENERAL.—Funds reserved by an eligible county under subparagraph (B)(i) or (C)(i) of paragraph (1) for carrying out projects under title II shall be deposited in a special account in the Treasury of the United States.

“(B) AVAILABILITY.—Amounts deposited under subparagraph (A) shall—

“(i) be available for expenditure by the Secretary concerned, without further appropriation; and

“(ii) remain available until expended in accordance with title II.

“(3) ELECTION.—

“(A) NOTIFICATION.—

“(i) IN GENERAL.—An eligible county shall notify the Secretary concerned of an election by the eligible county under this subsection not later than September 30 of each fiscal year.

“(ii) FAILURE TO ELECT.—Except as provided in subparagraph (B), if the eligible county fails to make an election by the date specified in clause (i), the eligible county shall—

“(I) be considered to have elected to expend 85 percent of the funds in accordance with paragraph (1)(A); and

“(II) return the balance to the Treasury of the United States.

“(B) COUNTIES WITH MINOR DISTRIBUTIONS.—In the case of each eligible county to which less than \$100,000 is distributed for any fiscal year pursuant to either or both of paragraphs (1)(B) and (2)(B) of subsection (a), the eligible county may elect to expend all the funds in the same manner in which the 25-percent payments or 50-percent payments, as applicable, are required to be expended.

“(e) TIME FOR PAYMENT.—The payments required under this section for a fiscal year shall be made as soon as practicable after the end of that fiscal year.

“SEC. 103. TRANSITION PAYMENTS TO THE STATES OF CALIFORNIA, OREGON, AND WASHINGTON.

“(a) DEFINITIONS.—In this section:

“(1) ADJUSTED AMOUNT.—The term ‘adjusted amount’ means, with respect to a covered State—

“(A) for fiscal year 2008, 90 percent of—

“(i) the sum of the amounts paid for fiscal year 2006 under section 102(a)(2) (as in effect on September 29, 2006) for the eligible counties in the covered State that have elected under section 102(b) to receive a share of the State payment for fiscal year 2008; and

“(ii) the sum of the amounts paid for fiscal year 2006 under section 103(a)(2) (as in effect on September 29, 2006) for the eligible counties in the State of Oregon that have elected under section 102(b) to receive the county payment for fiscal year 2008;

“(B) for fiscal year 2009, 76 percent of—

“(i) the sum of the amounts paid for fiscal year 2006 under section 102(a)(2) (as in effect on September 29, 2006) for the eligible counties in the covered State that have elected under section 102(b) to receive a share of the State payment for fiscal year 2009; and

“(ii) the sum of the amounts paid for fiscal year 2006 under section 103(a)(2) (as in effect on September 29, 2006) for the eligible counties in the State of Oregon that have elected under section 102(b) to receive the county payment for fiscal year 2009; and

“(C) for fiscal year 2010, 65 percent of—

“(i) the sum of the amounts paid for fiscal year 2006 under section 102(a)(2) (as in effect on September 29, 2006) for the eligible counties in the covered State that have elected under section 102(b) to receive a share of the State payment for fiscal year 2010; and

“(ii) the sum of the amounts paid for fiscal year 2006 under section 103(a)(2) (as in effect on September 29, 2006) for the eligible counties in the State of Oregon that have elected under section 102(b) to receive the county payment for fiscal year 2010.

“(2) COVERED STATE.—The term ‘covered State’ means each of the States of California, Oregon, and Washington.

“(b) TRANSITION PAYMENTS.—For each of fiscal years 2008 through 2010, in lieu of the

payment amounts that otherwise would have been made under paragraphs (1)(B) and (2)(B) of section 102(a), the Secretary of the Treasury shall pay the adjusted amount to each covered State and the eligible counties within the covered State, as applicable.

“(c) DISTRIBUTION OF ADJUSTED AMOUNT IN OREGON AND WASHINGTON.—It is the intent of Congress that the method of distributing the payments under subsection (b) among the counties in the States of Oregon and Washington for each of fiscal years 2008 through 2010 be in the same proportion that the payments were distributed to the eligible counties in fiscal year 2006.

“(d) DISTRIBUTION OF PAYMENTS IN CALIFORNIA.—The following payments shall be distributed among the eligible counties in the State of California in the same proportion that payments under section 102(a)(2) (as in effect on September 29, 2006) were distributed to the eligible counties for fiscal year 2006:

“(1) Payments to the State of California under subsection (b).

“(2) The shares of the eligible counties of the State payment for California under section 102 for fiscal year 2011.

“(e) TREATMENT OF PAYMENTS.—For purposes of this Act, any payment made under subsection (b) shall be considered to be a payment made under section 102(a).

“TITLE II—SPECIAL PROJECTS ON FEDERAL LAND

“SEC. 201. DEFINITIONS.

“In this title:

“(1) PARTICIPATING COUNTY.—The term ‘participating county’ means an eligible county that elects under section 102(d) to expend a portion of the Federal funds received under section 102 in accordance with this title.

“(2) PROJECT FUNDS.—The term ‘project funds’ means all funds an eligible county elects under section 102(d) to reserve for expenditure in accordance with this title.

“(3) RESOURCE ADVISORY COMMITTEE.—The term ‘resource advisory committee’ means—

“(A) an advisory committee established by the Secretary concerned under section 205; or

“(B) an advisory committee determined by the Secretary concerned to meet the requirements of section 205.

“(4) RESOURCE MANAGEMENT PLAN.—The term ‘resource management plan’ means—

“(A) a land use plan prepared by the Bureau of Land Management for units of the Federal land described in section 3(7)(B) pursuant to section 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712); or

“(B) a land and resource management plan prepared by the Forest Service for units of the National Forest System pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604).

“SEC. 202. GENERAL LIMITATION ON USE OF PROJECT FUNDS.

“(a) LIMITATION.—Project funds shall be expended solely on projects that meet the requirements of this title.

“(b) AUTHORIZED USES.—Project funds may be used by the Secretary concerned for the purpose of entering into and implementing cooperative agreements with willing Federal agencies, State and local governments, private and nonprofit entities, and landowners for protection, restoration, and enhancement of fish and wildlife habitat, and other resource objectives consistent with the purposes of this Act on Federal land and on non-Federal land where projects would benefit the resources on Federal land.

“SEC. 203. SUBMISSION OF PROJECT PROPOSALS.

“(a) SUBMISSION OF PROJECT PROPOSALS TO SECRETARY CONCERNED.—

“(1) PROJECTS FUNDED USING PROJECT FUNDS.—Not later than September 30 for fiscal year 2008, and each September 30 thereafter for each succeeding fiscal year through fiscal year 2011, each resource advisory committee shall submit to the Secretary concerned a description of any projects that the resource advisory committee proposes the Secretary undertake using any project funds reserved by eligible counties in the area in which the resource advisory committee has geographic jurisdiction.

“(2) PROJECTS FUNDED USING OTHER FUNDS.—A resource advisory committee may submit to the Secretary concerned a description of any projects that the committee proposes the Secretary undertake using funds from State or local governments, or from the private sector, other than project funds and funds appropriated and otherwise available to do similar work.

“(3) JOINT PROJECTS.—Participating counties or other persons may propose to pool project funds or other funds, described in paragraph (2), and jointly propose a project or group of projects to a resource advisory committee established under section 205.

“(b) REQUIRED DESCRIPTION OF PROJECTS.—In submitting proposed projects to the Secretary concerned under subsection (a), a resource advisory committee shall include in the description of each proposed project the following information:

“(1) The purpose of the project and a description of how the project will meet the purposes of this title.

“(2) The anticipated duration of the project.

“(3) The anticipated cost of the project.

“(4) The proposed source of funding for the project, whether project funds or other funds.

“(5)(A) Expected outcomes, including how the project will meet or exceed desired ecological conditions, maintenance objectives, or stewardship objectives.

“(B) An estimate of the amount of any timber, forage, and other commodities and other economic activity, including jobs generated, if any, anticipated as part of the project.

“(6) A detailed monitoring plan, including funding needs and sources, that—

“(A) tracks and identifies the positive or negative impacts of the project, implementation, and provides for validation monitoring; and

“(B) includes an assessment of the following:

“(i) Whether or not the project met or exceeded desired ecological conditions; created local employment or training opportunities, including summer youth jobs programs such as the Youth Conservation Corps where appropriate.

“(ii) Whether the project improved the use of, or added value to, any products removed from land consistent with the purposes of this title.

“(7) An assessment that the project is to be in the public interest.

“(c) AUTHORIZED PROJECTS.—Projects proposed under subsection (a) shall be consistent with section 2.

“SEC. 204. EVALUATION AND APPROVAL OF PROJECTS BY SECRETARY CONCERNED.

“(a) CONDITIONS FOR APPROVAL OF PROPOSED PROJECT.—The Secretary concerned may make a decision to approve a project submitted by a resource advisory committee under section 203 only if the proposed project satisfies each of the following conditions:

“(1) The project complies with all applicable Federal laws (including regulations).

“(2) The project is consistent with the applicable resource management plan and with any watershed or subsequent plan developed

pursuant to the resource management plan and approved by the Secretary concerned.

“(3) The project has been approved by the resource advisory committee in accordance with section 205, including the procedures issued under subsection (e) of that section.

“(4) A project description has been submitted by the resource advisory committee to the Secretary concerned in accordance with section 203.

“(5) The project will improve the maintenance of existing infrastructure, implement stewardship objectives that enhance forest ecosystems, and restore and improve land health and water quality.

“(b) ENVIRONMENTAL REVIEWS.—

“(1) REQUEST FOR PAYMENT BY COUNTY.—The Secretary concerned may request the resource advisory committee submitting a proposed project to agree to the use of project funds to pay for any environmental review, consultation, or compliance with applicable environmental laws required in connection with the project.

“(2) CONDUCT OF ENVIRONMENTAL REVIEW.—If a payment is requested under paragraph (1) and the resource advisory committee agrees to the expenditure of funds for this purpose, the Secretary concerned shall conduct environmental review, consultation, or other compliance responsibilities in accordance with Federal laws (including regulations).

“(3) EFFECT OF REFUSAL TO PAY.—

“(A) IN GENERAL.—If a resource advisory committee does not agree to the expenditure of funds under paragraph (1), the project shall be deemed withdrawn from further consideration by the Secretary concerned pursuant to this title.

“(B) EFFECT OF WITHDRAWAL.—A withdrawal under subparagraph (A) shall be deemed to be a rejection of the project for purposes of section 207(c).

“(c) DECISIONS OF SECRETARY CONCERNED.—

“(1) REJECTION OF PROJECTS.—

“(A) IN GENERAL.—A decision by the Secretary concerned to reject a proposed project shall be at the sole discretion of the Secretary concerned.

“(B) NO ADMINISTRATIVE APPEAL OR JUDICIAL REVIEW.—Notwithstanding any other provision of law, a decision by the Secretary concerned to reject a proposed project shall not be subject to administrative appeal or judicial review.

“(C) NOTICE OF REJECTION.—Not later than 30 days after the date on which the Secretary concerned makes the rejection decision, the Secretary concerned shall notify in writing the resource advisory committee that submitted the proposed project of the rejection and the reasons for rejection.

“(2) NOTICE OF PROJECT APPROVAL.—The Secretary concerned shall publish in the Federal Register notice of each project approved under subsection (a) if the notice would be required had the project originated with the Secretary.

“(d) SOURCE AND CONDUCT OF PROJECT.—Once the Secretary concerned accepts a project for review under section 203, the acceptance shall be deemed a Federal action for all purposes.

“(e) IMPLEMENTATION OF APPROVED PROJECTS.—

“(1) COOPERATION.—Notwithstanding chapter 63 of title 31, United States Code, using project funds the Secretary concerned may enter into contracts, grants, and cooperative agreements with States and local governments, private and nonprofit entities, and landowners and other persons to assist the Secretary in carrying out an approved project.

“(2) BEST VALUE CONTRACTING.—

“(A) IN GENERAL.—For any project involving a contract authorized by paragraph (1)

the Secretary concerned may elect a source for performance of the contract on a best value basis.

“(B) FACTORS.—The Secretary concerned shall determine best value based on such factors as—

“(i) the technical demands and complexity of the work to be done;

“(ii)(I) the ecological objectives of the project; and

“(II) the sensitivity of the resources being treated;

“(iii) the past experience by the contractor with the type of work being done, using the type of equipment proposed for the project, and meeting or exceeding desired ecological conditions; and

“(iv) the commitment of the contractor to hiring highly qualified workers and local residents.

“(3) MERCHANTABLE TIMBER CONTRACTING PILOT PROGRAM.—

“(A) ESTABLISHMENT.—The Secretary concerned shall establish a pilot program to implement a certain percentage of approved projects involving the sale of merchantable timber using separate contracts for—

“(i) the harvesting or collection of merchantable timber; and

“(ii) the sale of the timber.

“(B) ANNUAL PERCENTAGES.—Under the pilot program, the Secretary concerned shall ensure that, on a nationwide basis, not less than the following percentage of all approved projects involving the sale of merchantable timber are implemented using separate contracts:

“(i) For fiscal year 2008, 35 percent.

“(ii) For fiscal year 2009, 45 percent.

“(iii) For each of fiscal years 2010 and 2011, 50 percent.

“(C) INCLUSION IN PILOT PROGRAM.—The decision whether to use separate contracts to implement a project involving the sale of merchantable timber shall be made by the Secretary concerned after the approval of the project under this title.

“(D) ASSISTANCE.—

“(i) IN GENERAL.—The Secretary concerned may use funds from any appropriated account available to the Secretary for the Federal land to assist in the administration of projects conducted under the pilot program.

“(ii) MAXIMUM AMOUNT OF ASSISTANCE.—The total amount obligated under this subparagraph may not exceed \$1,000,000 for any fiscal year during which the pilot program is in effect.

“(E) REVIEW AND REPORT.—

“(i) INITIAL REPORT.—Not later than September 30, 2010, the Comptroller General shall submit to the Committees on Agriculture, Nutrition, and Forestry and Energy and Natural Resources of the Senate and the Committees on Agriculture and Natural Resources of the House of Representatives a report assessing the pilot program.

“(ii) ANNUAL REPORT.—The Secretary concerned shall submit to the Committees on Agriculture, Nutrition, and Forestry and Energy and Natural Resources of the Senate and the Committees on Agriculture and Natural Resources of the House of Representatives an annual report describing the results of the pilot program.

“(f) REQUIREMENTS FOR PROJECT FUNDS.—The Secretary shall ensure that at least 50 percent of all project funds be used for projects that are primarily dedicated—

“(1) to road maintenance, decommissioning, or obliteration; or

“(2) to restoration of streams and watersheds.

“SEC. 205. RESOURCE ADVISORY COMMITTEES.

“(a) ESTABLISHMENT AND PURPOSE OF RESOURCE ADVISORY COMMITTEES.—

“(1) ESTABLISHMENT.—The Secretary concerned shall establish and maintain resource

advisory committees to perform the duties in subsection (b), except as provided in paragraph (4).

“(2) PURPOSE.—The purpose of a resource advisory committee shall be—

“(A) to improve collaborative relationships; and

“(B) to provide advice and recommendations to the land management agencies consistent with the purposes of this title.

“(3) ACCESS TO RESOURCE ADVISORY COMMITTEES.—To ensure that each unit of Federal land has access to a resource advisory committee, and that there is sufficient interest in participation on a committee to ensure that membership can be balanced in terms of the points of view represented and the functions to be performed, the Secretary concerned may, establish resource advisory committees for part of, or 1 or more, units of Federal land.

“(4) EXISTING ADVISORY COMMITTEES.—

“(A) IN GENERAL.—An advisory committee that meets the requirements of this section, a resource advisory committee established before September 29, 2006, or an advisory committee determined by the Secretary concerned before September 29, 2006, to meet the requirements of this section may be deemed by the Secretary concerned to be a resource advisory committee for the purposes of this title.

“(B) CHARTER.—A charter for a committee described in subparagraph (A) that was filed on or before September 29, 2006, shall be considered to be filed for purposes of this Act.

“(C) BUREAU OF LAND MANAGEMENT ADVISORY COMMITTEES.—The Secretary of the Interior may deem a resource advisory committee meeting the requirements of subpart 1784 of part 1780 of title 43, Code of Federal Regulations, as a resource advisory committee for the purposes of this title.

“(b) DUTIES.—A resource advisory committee shall—

“(1) review projects proposed under this title by participating counties and other persons;

“(2) propose projects and funding to the Secretary concerned under section 203;

“(3) provide early and continuous coordination with appropriate land management agency officials in recommending projects consistent with purposes of this Act under this title;

“(4) provide frequent opportunities for citizens, organizations, tribes, land management agencies, and other interested parties to participate openly and meaningfully, beginning at the early stages of the project development process under this title;

“(5)(A) monitor projects that have been approved under section 204; and

“(B) advise the designated Federal official on the progress of the monitoring efforts under subparagraph (A); and

“(6) make recommendations to the Secretary concerned for any appropriate changes or adjustments to the projects being monitored by the resource advisory committee.

“(c) APPOINTMENT BY THE SECRETARY.—

“(1) APPOINTMENT AND TERM.—

“(A) IN GENERAL.—The Secretary concerned, shall appoint the members of resource advisory committees for a term of 4 years beginning on the date of appointment.

“(B) REAPPOINTMENT.—The Secretary concerned may reappoint members to subsequent 4-year terms.

“(2) BASIC REQUIREMENTS.—The Secretary concerned shall ensure that each resource advisory committee established meets the requirements of subsection (d).

“(3) INITIAL APPOINTMENT.—Not later than 180 days after the date of the enactment of this Act, the Secretary concerned shall make

initial appointments to the resource advisory committees.

“(4) VACANCIES.—The Secretary concerned shall make appointments to fill vacancies on any resource advisory committee as soon as practicable after the vacancy has occurred.

“(5) COMPENSATION.—Members of the resource advisory committees shall not receive any compensation.

“(d) COMPOSITION OF ADVISORY COMMITTEE.—

“(1) NUMBER.—Each resource advisory committee shall be comprised of 15 members.

“(2) COMMUNITY INTERESTS REPRESENTED.—Committee members shall be representative of the interests of the following 3 categories:

“(A) 5 persons that—

“(i) represent organized labor or non-timber forest product harvester groups;

“(ii) represent developed outdoor recreation, off highway vehicle users, or commercial recreation activities;

“(iii) represent—

“(I) energy and mineral development interests; or

“(II) commercial or recreational fishing interests;

“(iv) represent the commercial timber industry; or

“(v) hold Federal grazing or other land use permits, or represent nonindustrial private forest land owners, within the area for which the committee is organized.

“(B) 5 persons that represent—

“(i) nationally recognized environmental organizations;

“(ii) regionally or locally recognized environmental organizations;

“(iii) dispersed recreational activities;

“(iv) archaeological and historical interests; or

“(v) nationally or regionally recognized wild horse and burro interest groups, wildlife or hunting organizations, or watershed associations.

“(C) 5 persons that—

“(i) hold State elected office (or a designee);

“(ii) hold county or local elected office;

“(iii) represent American Indian tribes within or adjacent to the area for which the committee is organized;

“(iv) are school officials or teachers; or

“(v) represent the affected public at large.

“(3) BALANCED REPRESENTATION.—In appointing committee members from the 3 categories in paragraph (2), the Secretary concerned shall provide for balanced and broad representation from within each category.

“(4) GEOGRAPHIC DISTRIBUTION.—The members of a resource advisory committee shall reside within the State in which the committee has jurisdiction and, to extent practicable, the Secretary concerned shall ensure local representation in each category in paragraph (2).

“(5) CHAIRPERSON.—A majority on each resource advisory committee shall select the chairperson of the committee.

“(e) APPROVAL PROCEDURES.—

“(1) IN GENERAL.—Subject to paragraph (3), each resource advisory committee shall establish procedures for proposing projects to the Secretary concerned under this title.

“(2) QUORUM.—A quorum must be present to constitute an official meeting of the committee.

“(3) APPROVAL BY MAJORITY OF MEMBERS.—A project may be proposed by a resource advisory committee to the Secretary concerned under section 203(a), if the project has been approved by a majority of members of the committee from each of the 3 categories in subsection (d)(2).

“(f) OTHER COMMITTEE AUTHORITIES AND REQUIREMENTS.—

“(1) STAFF ASSISTANCE.—A resource advisory committee may submit to the Secretary

concerned a request for periodic staff assistance from Federal employees under the jurisdiction of the Secretary.

“(2) MEETINGS.—All meetings of a resource advisory committee shall be announced at least 1 week in advance in a local newspaper of record and shall be open to the public.

“(3) RECORDS.—A resource advisory committee shall maintain records of the meetings of the committee and make the records available for public inspection.

“SEC. 206. USE OF PROJECT FUNDS.

“(a) AGREEMENT REGARDING SCHEDULE AND COST OF PROJECT.—

“(1) AGREEMENT BETWEEN PARTIES.—The Secretary concerned may carry out a project submitted by a resource advisory committee under section 203(a) using project funds or other funds described in section 203(a)(2), if, as soon as practicable after the issuance of a decision document for the project and the exhaustion of all administrative appeals and judicial review of the project decision, the Secretary concerned and the resource advisory committee enter into an agreement addressing, at a minimum, the following:

“(A) The schedule for completing the project.

“(B) The total cost of the project, including the level of agency overhead to be assessed against the project.

“(C) For a multiyear project, the estimated cost of the project for each of the fiscal years in which it will be carried out.

“(D) The remedies for failure of the Secretary concerned to comply with the terms of the agreement consistent with current Federal law.

“(2) LIMITED USE OF FEDERAL FUNDS.—The Secretary concerned may decide, at the sole discretion of the Secretary concerned, to cover the costs of a portion of an approved project using Federal funds appropriated or otherwise available to the Secretary for the same purposes as the project.

“(b) TRANSFER OF PROJECT FUNDS.—

“(1) INITIAL TRANSFER REQUIRED.—As soon as practicable after the agreement is reached under subsection (a) with regard to a project to be funded in whole or in part using project funds, or other funds described in section 203(a)(2), the Secretary concerned shall transfer to the applicable unit of National Forest System land or Bureau of Land Management District an amount of project funds equal to—

“(A) in the case of a project to be completed in a single fiscal year, the total amount specified in the agreement to be paid using project funds, or other funds described in section 203(a)(2); or

“(B) in the case of a multiyear project, the amount specified in the agreement to be paid using project funds, or other funds described in section 203(a)(2) for the first fiscal year.

“(2) CONDITION ON PROJECT COMMENCEMENT.—The unit of National Forest System land or Bureau of Land Management District concerned, shall not commence a project until the project funds, or other funds described in section 203(a)(2) required to be transferred under paragraph (1) for the project, have been made available by the Secretary concerned.

“(3) SUBSEQUENT TRANSFERS FOR MULTIYEAR PROJECTS.—

“(A) IN GENERAL.—For the second and subsequent fiscal years of a multiyear project to be funded in whole or in part using project funds, the unit of National Forest System land or Bureau of Land Management District concerned shall use the amount of project funds required to continue the project in that fiscal year according to the agreement entered into under subsection (a).

“(B) SUSPENSION OF WORK.—The Secretary concerned shall suspend work on the project

if the project funds required by the agreement in the second and subsequent fiscal years are not available.

“SEC. 207. AVAILABILITY OF PROJECT FUNDS.

“(a) SUBMISSION OF PROPOSED PROJECTS TO OBLIGATE FUNDS.—By September 30 of each fiscal year through fiscal year 2011, a resource advisory committee shall submit to the Secretary concerned pursuant to section 203(a)(1) a sufficient number of project proposals that, if approved, would result in the obligation of at least the full amount of the project funds reserved by the participating county in the preceding fiscal year.

“(b) USE OR TRANSFER OF UNOBLIGATED FUNDS.—Subject to section 208, if a resource advisory committee fails to comply with subsection (a) for a fiscal year, any project funds reserved by the participating county in the preceding fiscal year and remaining unobligated shall be available for use as part of the project submissions in the next fiscal year.

“(c) EFFECT OF REJECTION OF PROJECTS.—Subject to section 208, any project funds reserved by a participating county in the preceding fiscal year that are unobligated at the end of a fiscal year because the Secretary concerned has rejected one or more proposed projects shall be available for use as part of the project submissions in the next fiscal year.

“(d) EFFECT OF COURT ORDERS.—

“(1) IN GENERAL.—If an approved project under this Act is enjoined or prohibited by a Federal court, the Secretary concerned shall return the unobligated project funds related to the project to the participating county or counties that reserved the funds.

“(2) EXPENDITURE OF FUNDS.—The returned funds shall be available for the county to expend in the same manner as the funds reserved by the county under subparagraph (B) or (C)(i) of section 102(d)(1).

“SEC. 208. TERMINATION OF AUTHORITY.

“(a) IN GENERAL.—The authority to initiate projects under this title shall terminate on September 30, 2011.

“(b) DEPOSITS IN TREASURY.—Any project funds not obligated by September 30, 2012, shall be deposited in the Treasury of the United States.

“TITLE III—COUNTY FUNDS

“SEC. 301. DEFINITIONS.

“In this title:

“(1) COUNTY FUNDS.—The term ‘county funds’ means all funds an eligible county elects under section 102(d) to reserve for expenditure in accordance with this title.

“(2) PARTICIPATING COUNTY.—The term ‘participating county’ means an eligible county that elects under section 102(d) to expend a portion of the Federal funds received under section 102 in accordance with this title.

“SEC. 302. USE.

“(a) AUTHORIZED USES.—A participating county, including any applicable agencies of the participating county, shall use county funds, in accordance with this title, only—

“(1) to carry out activities under the Firewise Communities program to provide to homeowners in fire-sensitive ecosystems education on, and assistance with implementing, techniques in home siting, home construction, and home landscaping that can increase the protection of people and property from wildfires;

“(2) to reimburse the participating county for search and rescue and other emergency services, including firefighting, that are—

“(A) performed on Federal land after the date on which the use was approved under subsection (b);

“(B) paid for by the participating county; and

“(3) to develop community wildfire protection plans in coordination with the appropriate Secretary concerned.

“(b) PROPOSALS.—A participating county shall use county funds for a use described in subsection (a) only after a 45-day public comment period, at the beginning of which the participating county shall—

“(1) publish in any publications of local record a proposal that describes the proposed use of the county funds; and

“(2) submit the proposal to any resource advisory committee established under section 205 for the participating county.

“SEC. 303. CERTIFICATION.

“(a) IN GENERAL.—Not later than February 1 of the year after the year in which any county funds were expended by a participating county, the appropriate official of the participating county shall submit to the Secretary concerned a certification that the county funds expended in the applicable year have been used for the uses authorized under section 302(a), including a description of the amounts expended and the uses for which the amounts were expended.

“(b) REVIEW.—The Secretary concerned shall review the certifications submitted under subsection (a) as the Secretary concerned determines to be appropriate.

“SEC. 304. TERMINATION OF AUTHORITY.

“(a) IN GENERAL.—The authority to initiate projects under this title terminates on September 30, 2011.

“(b) AVAILABILITY.—Any county funds not obligated by September 30, 2012, shall be returned to the Treasury of the United States.

“TITLE IV—MISCELLANEOUS PROVISIONS

“SEC. 401. REGULATIONS.

“The Secretary of Agriculture and the Secretary of the Interior shall issue regulations to carry out the purposes of this Act.

“SEC. 402. AUTHORIZATION OF APPROPRIATIONS.

“There are authorized to be appropriated such sums as are necessary to carry out this Act for each of fiscal years 2008 through 2011.

“SEC. 403. TREATMENT OF FUNDS AND REVENUES.

“(a) RELATION TO OTHER APPROPRIATIONS.—Funds made available under section 402 and funds made available to a Secretary concerned under section 206 shall be in addition to any other annual appropriations for the Forest Service and the Bureau of Land Management.

“(b) DEPOSIT OF REVENUES AND OTHER FUNDS.—All revenues generated from projects pursuant to title II, including any interest accrued from the revenues, shall be deposited in the Treasury of the United States.”

(b) FOREST RECEIPT PAYMENTS TO ELIGIBLE STATES AND COUNTIES.—

(1) ACT OF MAY 23, 1908.—The sixth paragraph under the heading “FOREST SERVICE” in the Act of May 23, 1908 (16 U.S.C. 500) is amended in the first sentence by striking “twenty-five percentum” and all that follows through “shall be paid” and inserting the following: “an amount equal to the annual average of 25 percent of all amounts received for the applicable fiscal year and each of the preceding 6 fiscal years from each national forest shall be paid”.

(2) WEEKS LAW.—Section 13 of the Act of March 1, 1911 (commonly known as the “Weeks Law”) (16 U.S.C. 500) is amended in the first sentence by striking “twenty-five percentum” and all that follows through “shall be paid” and inserting the following: “an amount equal to the annual average of 25 percent of all amounts received for the applicable fiscal year and each of the preceding 6 fiscal years from each national forest shall be paid”.

(c) PAYMENTS IN LIEU OF TAXES.—

(1) IN GENERAL.—Section 6906 of title 31, United States Code, is amended to read as follows:

“§ 6906. Funding

“For fiscal year 2009—

“(1) each county or other eligible unit of local government shall be entitled to payment under this chapter; and

“(2) sums shall be made available to the Secretary of the Interior for obligation or expenditure in accordance with this chapter.”

(2) CONFORMING AMENDMENT.—The table of sections for chapter 69 of title 31, United States Code, is amended by striking the item relating to section 6906 and inserting the following:

“6906. Funding.”

(3) BUDGET SCOREKEEPING.—

(A) IN GENERAL.—Notwithstanding the Budget Scorekeeping Guidelines and the accompanying list of programs and accounts set forth in the joint explanatory statement of the committee of conference accompanying Conference Report 105-217, the amendment made by paragraph (1) shall be treated in the baseline for purposes of section 257 of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 907) (as in effect before September 30, 2002), by the Chairpersons of the Committee on the Budget of the House of Representatives and the Committee on the Budget of the Senate, as appropriate, for purposes of budget enforcement in the House of Representatives and the Senate, and under the Congressional Budget Act of 1974 (2 U.S.C. 601 et seq.) as if Payment in Lieu of Taxes (14-1114-0-1-806) were an account designated as Appropriated Entitlements and Mandatories for Fiscal Year 1997 in the joint explanatory statement of the committee of conference accompanying Conference Report 105-217.

(B) EFFECTIVE DATE.—This paragraph shall—

(i) be effective beginning on the date of enactment of this Act; and

(ii) remain in effect for any fiscal year for which the entitlement in section 6906 of title 31, United States Code (as amended by paragraph (1)), applies.

In lieu of the matter proposed to be inserted for the title of the bill, H.R. 6, insert the following: “An Act to move the United States toward greater energy independence and security, to increase the production of clean renewable fuels, to protect consumers, to increase the efficiency of products, buildings, and vehicles, to promote research on and deploy greenhouse gas capture and storage options, and to improve the energy performance of the Federal Government, and for other purposes.”

The SPEAKER pro tempore. Pursuant to House Resolution 846, the gentleman from Michigan (Mr. DINGELL) and the gentleman from Texas (Mr. BARTON) each will control 30 minutes.

The Chair recognizes the gentleman from Michigan.

GENERAL LEAVE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to insert extraneous materials on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Speaker, at this time I yield 1 minute to my distin-

guished friend and colleague, the majority leader of the House, the Honorable Mr. HOYER, a great Member of Congress and a great friend of mine.

Mr. HOYER. Mr. Speaker, I thank my distinguished friend, the dean of the House, JOHN DINGELL of the State of Michigan, for yielding. I also thank him for his extraordinary leadership for over half a century, his father in an extended period before that, a distinguished career of service to this country and focus on the strength and growth of this country, on the health of our people, and of the opportunities for our workers. JOHN DINGELL is a giant with whom we serve. JOHN DINGELL is a giant of a leader in the Congress of the United States.

Mr. Speaker, tomorrow we will remember one of the most solemn occasions in our Nation's history, the 66th anniversary of a “date which will live in infamy,” the day in which our Nation was attacked by an enemy that we now count as an ally. Let us hope, and I believe that many years from now, this day, December 6, 2007, will be remembered by future generations as the date upon which the New Direction 110th Congress took a historic step in moving our Nation toward real energy independence and casting off the bonds of dependence that threaten America's national, economic, and environmental security.

The bipartisan compromise legislation before us, the Energy Independence and Security Act, is nothing less, Mr. Speaker, than our generation's declaration of independence from foreign sources of petroleum. In particular, I want to thank Speaker PELOSI, Chairman DINGELL, Chairman RANGEL, Chairman GORDON, and so many other Chairs of committees for the extraordinary work and effort that has made this day possible, which they put forward.

I am pleased that this legislation incorporates some of the ideas in the Progress Act, legislation that I have worked on with Chairman DINGELL and many of our other committee Chairs. This legislation of course, like all legislation, is not perfect. However, when we pass this bill, we will be voting to strengthen our national security, lower energy costs, grow our economy, and create new jobs and, as well, begin to reduce global warming.

Among other things, this legislation takes groundbreaking steps, Mr. Speaker, to increase the efficiency of our vehicles, raising fuel economy standards to 35 miles per gallon by 2020 for new cars and trucks, the first increase in fuel economy standards since 1975. This important step would not have been possible without the leadership of Speaker PELOSI and the leadership of JOHN DINGELL. I thank them both for their efforts.

This provision alone will save American families an estimated \$700 to \$1,000 per year at the pump and reduce oil consumption by 1.1 million gallons per day in 2020. This single step will reduce

by one-half what we currently import from the Persian Gulf. This legislation also makes a historic commitment to American-grown biofuels, including incentives to boost the production of biofuels and the number of flex fuel and other alternative vehicles, and establishing a tax credit for plug-in hybrid vehicles.

In addition, Mr. Speaker, it requires that 15 percent of our electricity come from renewable sources; strengthens energy efficiency for a wide range of products, appliances, lighting and buildings, to reduce energy costs to consumers; and repeals tax breaks for oil companies and invests that money in clean renewable energy and American technologies.

The oil companies of course are making extraordinary profits to give them incentive to continue to provide us with the incentive that we need. But they do not need additional subsidies from this Congress. It is telling that this legislation is supported by a broad coalition of environmental, business, labor, and farm groups, as well as State and local officials.

For example, my friend and our former colleague, Dave McCurdy, president and CEO of the Alliance of Automobile Manufacturers, stated: "We believe this tough, national fuel economy bill will be good for both consumers and energy security." I want to thank Congressman McCurdy for his work on this bill, and I want to thank JOHN DINGELL, again, without whom this compromise could not have been reached. Paul Bledsoe of the National Commission on Energy Policy said: "If it becomes law, this deal will mark the most important step toward improving U.S. oil security in a generation."

Mr. Speaker, our national character was challenged by an unprovoked attack at Pearl Harbor 66 years ago. We rose to the occasion then; and through our citizens' will, intelligence and ingenuity, we prevailed, and we were strengthened.

Today, Mr. Speaker, we face a daunting but far different challenge, a challenge that compels us to confront and conquer our Nation's addiction to petroleum. This legislation will help to do so. I urge my colleagues on both sides of the aisle, not for partisan objectives or partisan reasons, but for the independence of our Nation, for the national security of our people, for the economy of our workers, and for the environment of our children, I urge my colleagues to vote for this very historic and important bill. Vote to cast off the chains of dependency that hold us back today which threaten our economic and environmental security. Vote, my colleagues, to put America on a path to achieve energy independence.

Before I close, Mr. Speaker, let me once again say that no one in this body with whom I have ever served has focused on an issue so tenaciously, so effectively, so energetically as the Speaker of this House. When we pass this bill, it will be a testimony to her leadership and to her commitment.

I urge my colleagues, step with history for tomorrow and our children. Vote for this bill.

Mr. BARTON of Texas. Mr. Speaker, I yield myself 1 minute.

I respectfully disagree with our distinguished majority leader. The bill before us is a change. It may be historic, but it is not positive. We are moving from a market-based energy policy, which has served this country well for over 150 years, to a government-mandated energy policy.

□ 1315

We are mandating 36 billion gallons of biofuels which don't exist and probably won't exist. We are mandating that 15 percent of all investor-owned utilities be generated by renewable means, where in some States that is physically impossible. We are mandating that we improve automobile fuel economy to 35 miles per gallon by a date certain, which, if that is technically feasible, it is going to be very expensive and probably raise the average price of an automobile several thousands of dollars.

We are mandating all of these things in the interests of energy security, which is a noble goal. I think we would be better off developing the domestic resources of our great land, just like it says up there in the quote from Daniel Webster, instead of engaging in government mandates which will raise costs and probably not increase supplies.

Mr. DINGELL. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, it is not unknown that I have had some reservations about the bill and about the procedure that has brought us to the floor. I note to you, Mr. Speaker, that this is, however, a good bill and one which I support. Indeed, this is legislation which the Nation has to have, and, for that reason, I urge my colleagues to vote for it.

I begin with proper commendations to our Speaker, to Mr. HOYER, to Mr. RANGEL, Mr. GORDON, Mr. PETERSON of Minnesota, Mr. OBERSTAR, Mr. RAHALL, and Mr. GEORGE MILLER of California, the Chairs of our colleagues' committees, for their good work and leadership on this matter, and I do salute you, Madam Speaker, for your leadership here.

I would note that the perfection of this matter or how it was handled is not a question before us, but, rather, it is what we should do about a major problem which this Nation confronts. In my extension of remarks, I will talk about the costs of failure to act at this time.

This is not a bill that the Committee on Energy and Commerce and my colleagues and I would have written if it had followed the regular order, nor, indeed, is it achieved under the order which we would have followed. Indeed, it is a process which is brought about in good part because of the lack of interest by the White House and, very frankly, the incompetence and the indifference and the arrogance of the other body.

I will be voting for this legislation because it contains a number of significant landmark achievements. It will raise fuel economy standards by 40 percent, to 35 miles per gallon, and it will do it in a way which achieves and protects American jobs and it gives manufacturers proper flexibility in achieving our goals.

It also closes what has been misleadingly, and I think dishonestly, called the SUV loophole. It expands incentives for the production of cars and trucks that run on renewable fuels, and it will help American factories to retool to build the cars and trucks of tomorrow.

I want to, at this time, pay particular compliment and congratulations to two of our very able colleagues and those who have joined them in their efforts to protect this legislation; Mr. HILL of Indiana, an extremely valuable Member of this body, and Mr. TERRY, another very valuable Member of this body. These two Members from Indiana and Nebraska have provided extraordinary leadership in this matter in the Hill-Terry bill, and they deserve the thanks and the congratulations of this Congress.

This legislation includes efficiency standards for buildings and appliances that will remove more than 10 billion tons of carbon dioxide from the atmosphere, an amount equal to five times the annual emissions of all cars on the road today in the United States.

For those who are concerned about portions of the bill dealing with renewable fuels and renewable electricity generation, I would simply say that this is far from the final work, and the committee will carry forward its oversight on these matters vigorously.

I reserve the balance of my time and at this time, Mr. Speaker, I ask unanimous consent to yield the remainder of my time to the distinguished gentleman from Virginia (Mr. BOUCHER), the chairman of the Subcommittee on Energy and Air Quality, and I ask that he be permitted to control the time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BARTON of Texas. Mr. Speaker, I yield 1½ minutes to the distinguished ranking member of the Education and Workforce Committee, the gentleman from California (Mr. McKEON).

Mr. McKEON. Mr. Speaker, I thank the gentleman for yielding.

I rise in opposition to H.R. 6, the Democrat no energy plan. As senior Republican on the Education and Labor Committee, I oppose not only the bill's remarkable lack of any new energy, but also its inclusion of bureaucratic mandates that will kill American jobs and complicate job-training.

Just yesterday, a letter was sent to the National Economic Council Director Allan Hubbard claiming that the bill, and I quote, "Will not significantly expand the application of Davis-

Bacon prevailing wage requirements.” Now, I don’t know how the majority defines the words “significantly expand,” but by my count, this bill contains at least seven separate instances in which the Davis-Bacon wage mandates are imposed.

Simply put, this bill furthers the majority’s aggressive application of Davis-Bacon wage mandates. Davis-Bacon wages can inflate project costs by as much as 15 percent, costs that get passed on to taxpayers. They also force private companies to do hundreds of millions of dollars of excessive administrative work each year, squandering resources that would be better spent creating jobs and spurring innovation.

As if the job killing Davis-Bacon requirements weren’t bad enough, this bill also complicates our job training system by creating a redundant and unnecessary program to expand the energy efficient and renewable energy workforce. If this no energy package becomes law, it will mean more red tape, more bureaucracy and more hurdles for job seekers. We are talking about energy efficiency. Why not talk about job training efficiency as well?

For these and other reasons, Mr. Speaker, I cannot support the Democrat no energy bill, and I urge my colleagues to join me in voting “no.”

Mr. BOUCHER. Mr. Speaker, I yield myself 1 minute

(Mr. BOUCHER asked and was given permission to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, while I do not favor the renewable electricity mandate, because some areas of the country simply do not have the resources available to meet its requirements, the bill before us makes a substantial and important contribution to national energy policy and I rise in support of the measure.

Its 40 separate energy efficiency provisions will reduce future greenhouse gas emissions by 10 billion tons by the year 2030. In the year 2030 alone, the reduction will equal the annual CO₂ emissions of all of the vehicles on America’s highways at the present time. The agreement on vehicle fuel efficiency is truly a landmark achievement.

The renewable fuels mandate will substantially lessen our reliance upon imported oil, and the bill advances the introduction of electrically powered vehicles and much needed CO₂ separation and storage technologies.

I urge the passage of this measure.

Mr. Speaker, I reserve the balance of my time.

Mr. BARTON of Texas. Mr. Speaker, I yield 2 minutes to the distinguished Member from New Mexico (Mr. PEARCE).

Mr. PEARCE. Mr. Speaker, we heard a comparison today between December 7 and what we are passing today. December 7 began World War II in the Pacific, and if we read the history books, actually the war was lost by Japan and Germany because they ran out of oil. Japan was trying to keep us from in-

terrupting their oil supplies and they ran out of oil. And we are absolutely disarming ourselves, taking away our own oil for the future here with this bill. I fail to see the connection that was being made earlier.

We have been told right now in this debate that we should consider what we are going to do about the problem before us. Now, the problem before us that I saw yesterday was that Dow Chemical began to ship its jobs overseas. Previously this summer they had announced \$22 billion worth of investment in Saudi Arabia because the price of natural gas here is above \$7, and it is below \$1 there. They are simply choosing the economic choices that lie before them.

Mr. Speaker, when this bill first passed the House of Representatives, The Washington Post referred to it saying it would be legislation that is welcomed in Russia and Bolivia and other countries. The version before us today would still prompt the same comment, I am sure.

We should be working to expand our manufacturing. We should be working to encourage American energy companies to expand their operations by building U.S. jobs. But this bill, today’s bill, hurts our domestic manufacturers by adding \$21 billion in new taxes on Americans, but no new taxes on those other foreign oil companies. We are choosing foreign over domestic producers.

We should be working to help America’s forest communities biomass plants. Instead, the majority’s bill prohibits this. We are stopped dead in our tracks from taking biomass out of Federal lands, out of our national forests. The mandate is let them burn; we don’t want to take biomass out of them.

We should be working to expand our domestic energy supply, but instead we are restricting future supplies of energy.

China has made its choices. They are building one new coal plant each week for the next 10 years. We are choosing to not have new energy. It is the wrong bill. I would recommend a “no” vote.

Mr. BOUCHER. Mr. Speaker, at this time I recognize the gentlelady from Nevada (Ms. BERKLEY) for a unanimous consent request.

(Ms. BERKLEY asked and was given permission to revise and extend her remarks.)

Ms. BERKLEY. I thank the gentleman for yielding.

Mr. Speaker, I rise today in support of this important legislation. For too long, our Nation has depended on the old way of doing things, on corrupt dictators, on non-renewable and polluting sources of energy.

With this bill today, We stand at a crossroads: we can either continue down the old, failed road, or we can move ahead with new ideas that wean us off foreign oil, clean our skies, and ensure that our children inherit a cleaner, safer world.

In my home State of Nevada, our legislature has required that by 2015, 20 percent of power sold to Nevadans is derived from re-

newables. Already, energy providers have built or planned half a dozen major solar power projects in order to meet the requirements. Nevadans are looking to the future and so are our fellow Americans.

This bill is a great first step toward securing our energy independence. It provides the right incentives to energy providers to move to cleaner, renewable sources of energy. It sets realistic standards for utilities to provide renewable energy sources. It sets higher fuel efficiency standards so we can stop relying on corrupt dictators for our energy needs.

We are far from being energy independent, but today’s bill is a good place to start, and I urge my colleagues to look to the future rather than the past. Let’s break from our old ways and support this bill.

Mr. BOUCHER. Mr. Speaker, at this time I recognize, for 3½ minutes, the chairman of the House Ways and Means Committee, the gentleman from New York (Mr. RANGEL).

Mr. RANGEL. Mr. Speaker, let me thank my friend and colleague for yielding and giving me the opportunity to rise in support of this bill.

I am confident that this Congress will be noted for the initiative that we are voting on today and that the American people will not be as concerned with the process and the procedure as they would be as to what did the Congress do in terms of dealing with the issue of global warming as well as relieving us of the dependency on foreign oil.

These are the crucial issues that Americans have looked to us to deal with. And I don’t think it can be challenged that although there are those who have objections that it is not all that they would want it to be, it is a step that all of us in Congress should be proud that we moved forward.

The Clean Renewable Energy and Conservation Tax Act of 2007, as included in H.R. 6, presents a step in the right direction to present solutions to the problems that our great Nation and, indeed, the world are facing.

What did we do? To accelerate the use of clean, domestic, renewable energy sources and alternative fuels; to promote the use of energy-efficient products and practices and conservation; and to increase research and development in the deployment of clean, renewable energy and efficiency technologies.

The tax title of H.R. 6 makes good on this promise. The compromise package includes robust incentives for renewable energy production, increased efficiency, plug-in electric drive vehicles, and incentives for carbon capture, as well as the sequestration of coal demonstration projects.

The package facilitates and advances the development of advanced electricity infrastructure, it contains incentives to mitigate carbon remissions, it promotes the production of renewable energy and security of our domestic fuel supply, and it encourages energy savings and efficiency.

This package cost is fully offset by including certain provisions that were

loopholes that were undeserved of being given to oil and gas giveaways, not to the smaller suppliers of oil, but to the very largest that have had obscene profits without the benefits of the technology necessary to remove the dependency.

Specifically, the package will repeal the domestic manufacturing incentive for the top five integrated producers while freezing reductions at 6 percent for all others in the oil and gas sector. The package tightens foreign tax credit rules for foreign oil and gas extraction income and foreign oil-related income.

□ 1330

I want to take this particular time to thank STENY HOYER, NANCY PELOSI, and, more particularly, JOHN DINGELL for bringing together the interests and concerns of the standing committees and having us come forward as a body to fulfill the commitment that we made earlier on that we were going to respond to the needs of the people of our great Nation and certainly to the people of the world.

I do hope that while there has been a lot of partisanship in terms of lack of cooperation on the other side, that at the end of the day when people at town hall meetings or our children and grandchildren would ask the questions, what did we do, we can say we supported this great historic piece of legislation.

Mr. BARTON of Texas. I yield 1½ minutes to a member of the Energy and Commerce Committee, Mr. UPTON, from the great State of Michigan.

Mr. UPTON. Mr. Speaker, I was driving in this morning listening to the radio and I heard an ad. The ad said, vote for the bipartisan energy bill when it comes up today, and it told you to call your local Congressperson. Who are you going to call? Not even Ghost Busters can find a Republican to make this a bipartisan bill.

Our energy needs in this country are going to grow by about 50 percent by the year 2030, and there is no question that we need to do a better job on conservation, looking for alternative fuels; but this bill doesn't do that. This bill is not the bipartisan piece of legislation that we want. There is no bipartisan bill on the House floor. There is no Republican substitute. There were no Republican amendments. There was not even a conference named to try and iron out differences between the House and the Senate. Virtually, there was no Republican involvement or input on this legislation at all. And so, therefore, as a consequence, there are no Republicans at least on this side of the aisle that can make the bill bipartisan.

In 2005, we passed an important energy bill, and it was bipartisan. Chairman BARTON did a terrific job in the hearings and the conference that we had, and it enjoyed the support then of Ranking Member DINGELL to make sure that in fact it was bipartisan. But raising taxes, which this bill does, on energy producers is the last thing that

our Nation needs as our consumers try and grapple with higher energy costs, whether that be heating or gasoline.

Yesterday, in an important hearing, my good friend from Michigan (Mr. DINGELL) offered advice to the panel that was there when he took over the chairmanship of our important committee, Energy and Commerce. And he said this. He said: "The Parliamentarian told me that the process needed to be fair and there needed to be a perception of fairness." Mr. Speaker, I lament that this bill is neither. It is not fair nor is the perception there.

I urge my colleagues on both sides to vote "no."

Mr. BOUCHER. Mr. Speaker, at this time I am pleased to yield 2 minutes to the gentleman from Tennessee (Mr. GORDON), chairman of the House Committee on Science and Technology.

Mr. GORDON of Tennessee. Mr. Speaker, for too long we have depended on a handful of finite energy resources to power our economy. So as energy prices inevitably rise, we can continue to hand our money over to foreign interests, or we can invest that in our own country's energy independence.

This week, the U.S. and world leaders are meeting to define the steps needed to address the challenge of climate change. This energy package will help give our country the technological bump needed to address CO₂ emissions and our dependency on foreign energy. This bill will invest in a wide range of energy technologies that use clean natural resources from the sun, the oceans, and our Earth. It will boost the energy efficiency of our vehicles, buildings, and heavy industries. And this bill provides significant increased investment in technologies to capture and store carbon dioxide from coal-fired plants.

I am pleased that, over the last year, the Science and Technology Committee has worked hard to clear 14 bipartisan consensus-driven energy and environment research bills, nine of which are included in the House package. So I want to take this opportunity to thank those Democrat and Republican members of our committee, and the minority and majority staff, for their hard and good work.

And finally, Mr. Speaker, let me just respond to my friend who says if you vote for this bill, the price of energy is going to go up. The fact of the matter is we all know, whether you vote for or against this bill, the price of energy is going to go up. The question is, are we going to write the check to foreign energy cartels, or are we going to invest that money here in America in clean alternative energy?

Mr. Speaker, I am voting for America. I am voting for this bill.

Mr. BARTON of Texas. Mr. Speaker, I yield 5 minutes to the distinguished ranking member of the Science Committee, Mr. HALL of Rockwall, Texas.

Mr. HALL of Texas. Mr. Speaker, I have just heard Mr. DINGELL mention World War II and Pearl Harbor and I

heard Mr. PEARCE answer him; and they are both correct in what they said, that that was an energy war.

I remember like yesterday, I was 17 years old standing on the banks of the Tombigbee River in Alabama, and a guy ran down and said the Japanese are bombing Pearl Harbor. I didn't know where Pearl Harbor was. I said, we had better hitchhike back to Dallas; those Japanese will go straight to Washington. I thought Pearl Harbor was down around Mobile somewhere. That is how ignorant I was about the Nation at that time, but I am a little smarter now. And I remember well that Cordell Hull and Henry Stimson cut the energy off from Japan. They had 13 months' national existence. They had to break out and go somewhere, and we had to know they were going to. That was an energy war. So I am a little disappointed in the majority.

During the campaign, they blamed the Republicans for high energy prices. Here, before us today, is a bill that the Democrats are touting as the end to high energy prices. There is one big obvious problem with the bill: there is nothing in this bill that will bring any relief to the citizens of our great country or that will lower the cost of a tank of gasoline or the monthly electricity bills. It will likely in fact have the opposite effect.

The bill authorizes billions and billions of dollars in new government spending programs, and mandates electric companies to use more expensive ways for electricity generation, whether they are able to or whether they are not able to. If you don't think that is going to make your electricity bill go up even more, then you are not really being realistic. Electric companies are a business just like any other business; and if their costs go up, they are going to pass them along.

We don't need to mandate Federal renewable electricity standards. Twenty-eight States and the District of Columbia already have a renewable portfolio standard in place. These standards were made on the State level based on what renewable sources are available in each State, and it is wrong for the Federal Government to enforce a one-size-fits-all standard. My home State of Texas has a very successful RPS. Since its inception in 1999, Texas has become the Nation's leader in wind energy. In June of this year, a Texan put forward plans to build the Nation's largest wind farm in the panhandle of the State. This would be four times larger than the current wind farm.

Anyone, anyone who is serious about lowering the cost of gasoline, then, along with research and development and renewable sources of energy, they would be providing incentives to the oil and gas industry to explore more areas of our country for oil and gas. They would be providing incentives to develop our domestic sources of oil and gas. They would be providing incentives to build more refineries. These

things are not only important to address today's high cost, but also for our national security.

We cannot forget that we import a huge amount of oil from OPEC countries that are willing to take our American dollars, but many are not really our friends. We are shamefully dependent on foreign sources of oil. We can't continue to compromise our national security.

Another opportunity the Democrats completely ignore in this bill is a chance to promote the use of clean coal for much-needed new power plants and as a source of transportation fuel. It has been said before that the United States is the Saudi Arabia of coal. So why are we not encouraging the environmentally friendly use of this abundant and inexpensive domestic resource? These facilities would have the best technologies to capture emissions in order to produce clean electricity and the clean fuel that can be used immediately in our Nation's pipelines, filling stations, and in our automobiles.

My constituents are doing their part to help the environment, but they need to be able to afford to put gas in their cars so they can get to work to provide food for their families and clothes for their children. A lot of my constituents don't have transportation options. There is no bus system or rail system. They live 45 miles from work, so they certainly can't take a bike. They need their cars. They need the fuel that they put into them to be affordable. I don't see a glimmer of hope for them in this bill.

Mr. Speaker, I do feel very strongly that we should be looking to efficiency, conservation, and renewable alternatives of energy to become part of our portfolio. And I support the provisions in this bill that do that; however, there are so many harmful things in this bill that I think the bad, ugly highly outweighs the good.

I supported and voted for the bipartisan R&D provisions as they existed coming out of the Science and Technology Committee and generally remain supportive. However, I am concerned with some changes and additions made in this amendment, changes that came about without the opportunity for vetting or Member involvement. Participation by all Members leads to a better product, and we know that.

For example, the Energy Policy Act of 2005 garnered the support of 38 Democrats who are still in the House when initially passed by the House. When brought to the floor later that year for final passage, it garnered the support of almost 70 Democrats who are still in this House.

Mr. Speaker, I can't stress how important energy is to our country. We have urged drilling in the Outer Shelf. Yes, China drills just off the coast of Key West today. And we have urged drilling in ANWR. I urge our colleagues not to play politics with our energy future.

Mr. BARTON of Texas. Mr. Speaker, I ask unanimous consent that Mr. MCCRERY be allowed to control the time on the minority side.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BOUCHER. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from California (Mr. GEORGE MILLER), the chairman of the Committee on Education and Labor.

Mr. GEORGE MILLER of California. I thank the gentleman for yielding, and I thank him for his leadership on this legislation. I want to thank the leadership of Speaker PELOSI and Majority Leader STENY HOYER, and the skill and experience and the knowledge of Congressman JOHN DINGELL for all of this help on this legislation.

This is a remarkable day for the United States House of Representatives and, hopefully, for the people of this country as we break the chokehold of those Middle Eastern countries that have us tied to them because of oil.

The energy independence that we talk about in this legislation is the ability, through the savings, through fuel-efficient automobiles, through fuel-efficient appliances, through fuel-efficient houses and businesses and buildings that the savings that we will be able to have with respect to the use of energy and oil in this country will allow America to make decisions based upon the American interests and not the interests of other countries because we are tied to them because we do not have energy efficiency in this country.

This is a remarkable piece of legislation for the benefits that it will provide for American consumers at the gas pump, at the department store when they buy new appliances, when they buy new homes, when they go to work in new buildings, when they start businesses in more energy-efficient buildings.

These are the kinds of benefits that we can have because we have renewable energy, we have fuel standards, and we have a new CAFE standard that is a 40 percent increase in the efficiency of automobiles that Americans will buy into the future that will break that tether to that high price, \$3.50 gasoline as it is in California. They will be able to go further on each one of those gallons of gasoline. That is what we need.

This bill also creates over 3 million jobs in the green industry that are supported by this legislation that encourages that investment in wind and biofuels and solar energy. Those 3 million jobs, we are 8 years late coming to those jobs, but they are in this legislation; and those jobs will be created in almost every sector of the economy no matter what geographical area people live in. But we need to develop those skills. And I want to thank JOHN TIERNEY and HILDA SOLIS for their efforts on that.

This is what the people who are betting their money on the future of the

high-tech companies, people who are betting their money in terms of venture capitalists, that this is where they told us to go to generate the next generation of innovation, of technology, was in energy. And that is what we are going to do, and America is going to have a much better energy future as a result of this legislation.

Mr. MCCRERY. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas, a member of the Energy and Commerce Committee, Mr. GENE GREEN.

(Mr. GENE GREEN of Texas asked and was given permission to revise and extend his remarks.)

Mr. GENE GREEN of Texas. Mr. Speaker, I would like to thank my friend from Louisiana for allowing me to speak.

Mr. Speaker, there is no question this is a historic day. This bill will substantially increase fuel economy standards for the first time in over 20 years, increase energy efficiency requirements, and promote research and development of alternative sources. These are all worthy accomplishments, and the efforts of Chairman DINGELL should be commended.

□ 1345

The only opportunity this Congress missed was to create a balanced energy policy that invests in our energy future without ignoring America's energy needs today. I believe as Democrats, we could have crafted a sensible energy policy that actually enhances our energy security, but that would require bringing all Democrats to the table, including those of us who represent districts that produce energy needed to heat our homes, fuel our vehicles, and generate our economic prosperity.

While some improvements from the previous bill, H.R. 3221, have been made, new additions that have not been thoroughly debated have been included and could have a negative impact on the cost of energy in our area.

For that reason, I must vote against the legislation and hope that we can instead vote on an energy bill that is focused on provisions we can agree on, such as a bill to increase CAFE standards, energy efficiency standards, and that would actually increase energy security in the United States.

I am particularly disappointed in the lack of discussion on the renewable fuel standard, RFS, which was not included in our House bill and was not moved through any regular process in the House of Representatives. It is premature to consider expanding the RFS until our current one is fully implemented, and we run the risk of negative environmental impacts, questionable greenhouse gas emissions, and increased food and energy prices with a focus on corn-based ethanol.

A sensible approach would have been to require RFS to include, prior to taking effect, a clear mechanism to reduce the mandate in case the environmental challenges, technological, or feasibility

of supply issues, or projected food price increases were impacted.

This bill includes tax provisions outside of those carefully negotiated earlier in H.R. 6 that actually tilt the competitive playing field for global energy resources against U.S.-based oil and gas companies and discourage the expansion of natural gas distribution systems.

There has been an effort to moderate some of the tax provisions passed early in August, particularly by retaining current deduction levels under section 199 for our Nation's independent producers. I am glad that happened, but I am concerned with the impact on my constituents and their electricity bills with a Federal renewable electricity standard, the RES. Under a one-size-fits-all mandate, Texas utilities may be forced to make payments to the Federal Government to meet a 20 percent target or a 15 percent target, or 11 percent, now we hear it is 11 percent, ultimately driving up costs for the utility, the electricity users.

I wish Congress would capitalize on this historic moment and actually make it to where we could pass an energy bill that would be bipartisan. We could instead have a more sensible bill that focused on the provisions we all agree on, increase CAFE standards and energy standards, and that would meet with Senate and Presidential approval.

Mr. Speaker, there is no question this is a truly historic day for Congress. This bill will substantially increase fuel economy standards for the first time in over 20 years, increase energy efficiency requirements, and promote research and development of alternative sources of energy. These are all worthy accomplishments and the efforts of the Chairman should be commended.

The only opportunity this Congress missed, Mr. Speaker, was to create a balanced energy policy that invests in our energy future without ignoring America's energy needs today. I believe as Democrats we can craft sensible-energy policy that actually enhances our energy security, but that would require bringing all Democrats to the table, including those of us who represent Districts that produce the energy needed to heat our homes, fuel our vehicles, and generate our economic prosperity.

I believe that day will come, but after reviewing some of the proposals contained in this legislation, it is clear we have a long way to go. While some improvements from H.R. 3221 have been made, new additions that have not been thoroughly debated by this House and that could have a negative impact on the cost of energy have been included.

For that reason, I must regrettably vote against this legislation and hope that we instead vote on an energy bill that is focused on the provisions we can all agree on—such as a bill to increase CAFE and energy efficiency standards—and that will actually increase the energy security of the United States.

RENEWABLE FUEL STANDARD

I am particularly disappointed in the lack of discussion and debate with various stakeholders when crafting the expanded Renewable-Fuel Standard, RFS, which was not included in the House-passed bill, was not considered by the Energy and Commerce Com-

mittee, and was not moved through the regular process of the House of Representatives.

It's premature to consider expanding the RFS before our current one is even fully-implemented, and we run the risk of ultimately shifting the nation's dependency on petroleum to another fuel that's costly, less efficient, and many unintended consequences.

There is no shortage of literature detailing the negative environmental impacts of corn-based ethanol, including soil erosion, herbicide and insecticide pollution, aquifer depletion, and loss and degradation of wildlife habitat.

Its effect on greenhouse gas emissions are questionable, and many studies find that the amount of energy needed to produce ethanol is roughly equal to the amount of energy obtained from its combustion.

The biggest loser in the blind push for ethanol is the American consumer. I come from a low-income area in Texas where families struggle to make ends meet. When you account for the increased cost of transporting ethanol, its reduced fuel efficiency, and higher food prices due to increased corn demand, all our constituents will take a substantial hit to their pocketbooks.

Even with this, I had hoped to sit down with different RFS stakeholders to find a reasonable solution to address these concerns. A sensible approach would have been to require the RFS to include—prior to taking effect—a clear mechanism to reduce the mandate in the case of environmental challenges, infrastructure bottlenecks, technological, feasibility or supply issues, projected food price increases, adverse weather conditions, harm to livestock producers, or other adverse consequences. Such evaluations could be repeated on a periodic basis to ensure these conditions do not materialize. Unfortunately, this idea did not have the opportunity for an open discussion and debate.

If this Congress supports this expansion, I hope we at least understand the energy requirements we'll need to meet the mandate. Most of the energy used to produce ethanol comes from natural gas or electricity. A Congressional Research Service report concluded that an increase in corn ethanol to 15 billion gallons would require an increase in natural gas consumption, ultimately substituting energy demand from one fossil fuel to another.

I have always believed clean-burning natural gas will play a critical role in addressing our nation's energy needs; I just hope we remember the important role natural gas will play in this RFS mandate as we debate future proposals affecting domestic natural gas supply.

TAX REPEALS

Next, I believe we cannot keep taxing American's energy industry and expect to have adequate supplies of energy. This bill includes tax provisions outside of those carefully negotiated in H.R. 6 that could actually tilt the competitive playing field for global energy resources against U.S. based oil and gas companies and discourage the expansion of natural gas distribution systems.

This increase in new taxes targeted at the U.S. energy industry could reduce our Nation's energy security by discouraging new domestic oil and gas production and new investments in refinery capacity.

I am pleased, however, by the effort made to moderate some of the tax provisions from H.R. 3221, particularly by retaining the current deduction levels under Section 199 for our Na-

tion's independent producers. While it is fundamentally unfair to treat energy companies differently than other companies under the manufacturers tax credit, at least this provision does not also punish independent producers which develop 90 percent of domestic oil and natural gas wells.

RENEWABLE ELECTRICITY STANDARD

Finally, I am concerned with the impact on my constituents' electricity bills with a federal Renewable Electricity Standard, or RES.

I am proud to come from a State that has an impressive RES that meets the needs of our region. Unlike most state RES plans, which are based on a specific percentage of sales, the Texas RES plan has a fixed statewide renewable capacity requirement of 5,880 megawatts, MW, by 2015, which would represent about 5 percent of the State's energy capacity.

This isn't a question of whether or not we should encourage states to produce more electricity from renewable sources—we should. The question is whether a one-size-fits-all Federal mandate, as contained in this legislation, is the best way to accomplish this goal.

In order to meet a 15 percent Federal RES by 2020, Texas utilities may be forced to make payments to the Federal Government to meet this mandate, ultimately driving up energy costs for all electricity users.

CLOSING

In closing, I wish that Congress would capitalize on this historic moment and move forward with an energy bill that unites all sides of the Caucus. We could have instead moved a more sensible bill that focused on the provisions we all agree on—like increased CAFE and energy efficiency standards—which would meet Senate approval and be signed by the President. I hope this opportunity to move consensus-based legislation is not squandered for the sake of a simple sound bite or press release.

As we move forward in this Congress, I hope the House of Representatives will actually address America's need to produce additional domestic energy, both conventional and renewable, to ensure the reliability and affordability of our nation's critical energy supplies.

Mr. BOUCHER. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from California (Mr. WAXMAN), the chairman of the Committee on Oversight of the House.

Mr. WAXMAN. Mr. Speaker, I thank the gentleman for yielding time to me to support the Energy Independence and Security Act. With this bill, we will turn from the past to the future. We have begun the process of adopting energy policies that recognize the science of global warming and the threat to our Nation's energy security.

This legislation will finally give Americans the fuel-efficient automobiles they want, saving families \$700 to \$1,000 a year. That is money we won't be sending to dangerous regimes in the Middle East.

This legislation will finally give Americans more power from clean, affordable, renewable energy sources, using wind, solar and biomass. We can produce energy here and at home and fight global warming.

The legislation will give Americans more efficient appliances and consumer

goods, saving us hundreds of billions of dollars on electricity bills over the next few decades.

And there are some things this legislation will not do. It won't diminish the EPA's authority to address global warming, which the Supreme Court has recognized. It won't seize authority from the States to act on global warming.

President Bush has threatened to veto this bill because it takes away taxpayer subsidies to oil companies and supports new renewable energy technologies. It is time for the President to do what the American people want, not what the oil companies want.

Many of us have been fighting this fight since 2001. With the leadership of Speaker NANCY PELOSI and other key Members, including Chairman DINGELL, we are now finally in a position to enact essential energy reforms. I urge my colleagues to support this legislation.

Mr. MCCRERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the third time this year that I have stood before this body to debate a tax bill dealing with energy. Like the debates before, the bill before us today has more to do with politics than policy. It is indeed Orwellian logic to say that gas prices are too high; therefore, we ought to raise taxes on the oil and gas industry. Hmm.

The majority claims that American manufacturing jobs are important, but it is pursuing tax policies that will drive good-paying jobs in the oil and gas industry overseas.

The majority claims to be adhering to PAYGO; yet by clever sleight of hand, they have included an additional \$900 million in tax relief for New York that falls just outside the budget window, thereby evading PAYGO.

And the majority, despite its stated concerns about tax earmarks, seems to have a massive one in here of a \$500 million tax credit bond program that appears to benefit one single landowner. A rifle shot.

The bill, as has been discussed in the past, creates tax credit bonds that State and local governments can use with little accountability and without any assurances that funded projects will reduce fossil fuel consumption or greenhouse gas emissions.

On top of that, those tax credit bonds would be tradable, setting up a market for tax credits very similar to something that Congress tried back in 1981 and repealed the very next year because of the outcry of the public.

Mr. Speaker, I don't expect this bill to make it through the process. I don't think it will get through the Senate. If it were to, the President would most certainly veto this bill, but maybe then we can go back to the drawing board on a bipartisan basis to craft an energy bill that actually produces energy and reduces costs and protects American jobs. Until then, I urge my colleagues to defeat what is an ill-conceived bill.

We have wasted more energy today debating it than its passage would possibly create.

Mr. Speaker, I ask unanimous consent that Mr. BARTON be allowed to resume allocation of time for the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BOUCHER. Mr. Speaker, I yield 2½ minutes to the gentleman from Minnesota (Mr. OBERSTAR), the chairman of the Transportation Committee.

Mr. OBERSTAR. I am here to address the contribution of the Transportation and Infrastructure Committee to H.R. 6, the Energy Independence and Security Act.

We begin with the Department of Energy, itself, by providing funding to build a photovoltaic solar wall on the south wall of the Department of Energy. It was built without windows or doors to accommodate a solar application, but the funding was never provided over the last 12 years. The project will pay for itself in less than 18 years and then begin sending excess energy into the local power grid.

We continue with the U.S. Capitol. We require the Architect of the Capitol to undertake feasibility studies on installing photovoltaic roofs on two buildings, Rayburn and Hart, and also a feasibility study to capture, store and use carbon dioxide from the Capitol power plant.

We spread these efforts further across the Nation by requiring the General Services Administration to install energy-efficient and renewable energy systems, including compact fluorescent bulbs and photovoltaic systems on Federal office buildings and U.S. courthouses across the country. We also prohibit the Coast Guard from using incandescent light bulbs unless they determine they are necessary for their mission.

The bill also establishes critical targets for GSA and other Federal civilian agencies to cut energy use by 30 percent and fossil fuel use 65 percent within a decade. Within 25 years under provisions in this bill, all fossil fuel use in Federal buildings will be eliminated.

Transportation. We authorize in law a Center for Climate Change and Environment under the Department of Transportation, which has existed by administrative action but has not been effective. It will be under this legislation.

We increase the Federal share for congestion mitigation and air quality improvement highway funds to 100 percent for incentives for States to use funds to finance alternatives for people driving alone.

We authorize \$40 million for short line and regional railroads to buy green locomotives, \$200 million for track improvements to encourage movement of goods by rail, and a new short sea shipping program to move goods by more efficient means. Short sea shipping is

short-haul movement of goods by water to avoid congestion areas. Widely used in Europe, they have a vast network of short sea transportation routes. The bill will promote use of such shipping opportunities on the Great Lakes and on the saltwater coast of the United States, using the Capital Construction Fund, building ships in the United States, including in the State of Wisconsin, to build short sea shipping vessels to avoid congestion in places like Chicago. We make a real, solid contribution.

Mr. BARTON of Texas. I yield 1 minute to a distinguished member of the Energy and Commerce Committee, Mr. MURPHY of Pennsylvania.

Mr. TIM MURPHY of Pennsylvania. Mr. Speaker, over the next 40 years, electricity demand in the United States will double. We have to conserve. We have to make strides in efficiency and renewable energy, but we can't depend on renewable power alone. It would take 3,000 huge windmills or 11 square miles of solar collectors to equal the power output of one modern coal plant.

Even if we quadrupled the share of renewable power by 2050, we will still need coal for half of our electricity. To meet America's future energy needs, we will probably need to build 800 new coal plants over the next 40 years: 400 to replace the old, inefficient plants and 400 to meet the growth and demand. This translates to one coal plant every 2 to 3 weeks, even if we start in 2010.

Solving the problem will require clean coal technologies with zero emissions, including greenhouse gases. Let's solve America's energy problems by cleaning up America's abundant energy resources. This bill, however, will tax America's abundant supplies of coal, and that just doesn't make sense.

Mr. BOUCHER. Mr. Speaker, I recognize myself for 2 minutes.

Mr. Speaker, I just want to comment further on some of the very positive things this legislation does in order to move forward national energy policy.

This is truly a landmark achievement. The legislation that we have before the House opens the door to an entirely new era in which we will tap new forms of domestic energy resources and lessen this country's reliance on energy imports.

The measure broadly incents the creation of new alternatives to today's traditional energy resources: from consumer appliance standards, which will be improved across a range of home appliances through this measure, to energy-sensitive building codes; to the capture of waste heat from industry that could produce the energy necessary to generate fully 60 gigawatts of electricity with no additional emissions of greenhouse gases; to the creation of a smart electricity grid that will lead to the day when consumers of electricity in their home can save money by consuming more electricity

during times of low demand when prices are lower; to a major increase in automobile fuel efficiency, for which I want to commend the gentleman from Michigan (Mr. DINGELL) for the hard work that he and his staff have put forth in coordination with the Speaker of the House in order to achieve that landmark advance; to the evolution from gasoline-powered to biofuel-powered cars, and to the day when our electrically powered cars will predominate in the transportation fleet of this country.

□ 1400

In all of these ways, this bill makes a major advance in national energy policy. It will make America more energy efficient and energy independent.

With this bill, we also make an important down payment in addressing the challenge of greenhouse gas emissions. And next year, beginning with work in our House Energy and Commerce Committee, we will take another landmark step in that direction as, in consultation with external stakeholders, and on a bipartisan basis with our Republican colleagues on the committee and in the House, we will structure a mandatory approach to controlling greenhouse gas emissions in the United States, an economy-wide program that will enjoy bipartisan support and spread the burden of greenhouse gas emissions equally across this economy. That approach begins in the year to come and will make a further enormous contribution to controlling emissions.

Mr. Speaker, I reserve the balance of our time.

Mr. BARTON of Texas. Mr. Speaker, I want to yield 2 minutes to a member of the Ways and Means Committee, Mr. RYAN of Wisconsin.

Mr. RYAN of Wisconsin. Mr. Speaker, I want to talk about one particular provision in this bill which really puzzles me, and that is the tax earmark that's in this bill. This bill creates forestry conservation tax credit bonds. Sounds pretty innocent on its face. But reading through the language, the provision has little to do with forestry, and didn't appear to require the protection of a single tree. Rather, it's nominally about protecting fish.

Specifically, to qualify for the tax credit bond program, the parcel of land to be purchased must be adjacent to the Forest Service land; have a portion of that land turned over to the U.S. Forest Service; include at least 40,000 total acres, and must be subject to a "native fish habitat conservation plan approved by the United States Fish and Wildlife Service."

Well, according to the Fish and Wildlife Service, there is only one piece of land in America that meets this description. It's a piece of land in Montana owned by a timber giant, Plum Creek. And according to press reports, they intend to sell it to the Nature Conservancy, which can get the \$500 million in bonds, who could give that

\$500 million, buy it from Plum Creek, turn around and sell it to landowners, for all we know. If this isn't a tax earmark, I don't know what is.

But the point is, this is a tax earmark. And why is it possible to add this provision which is a tax earmark?

Well, the anti-earmark rules that we have here in the House only apply to conference reports and bills.

What are we considering today? Technically, it's an amendment to the Senate bill which was an amendment to the original House-passed bill. So the earmark rules we have are thrown out the window. No earmark rules apply here. That's how you can sneak this provision in, a \$500 million tax earmark provision to go to one private landowner.

Again, we can't be exactly sure what the deal here is because the bill just got released. We don't know who asked for this provision or exactly how it will be used, but at the very least, serious questions ought to be raised about such an expensive provision dropped into this bill to benefit one particular landowner.

In addition to that, this bill may not technically violate PAYGO, but it sure does violate the spirit of PAYGO. It uses timing shifts and other budget gimmicks to violate PAYGO. For this and many other reasons, I urge a "no" vote on this bill.

Mr. BOUCHER. Mr. Speaker, at this time I'm pleased to recognize for 2 minutes the distinguished chairwoman of the House Committee on Small Business, the gentlelady from New York (Ms. VELÁZQUEZ).

Ms. VELÁZQUEZ. Mr. Speaker, I rise today to support this historical energy legislation now before us. This legislation moves us toward energy independence and meets the needs of this Nation's entrepreneurs.

Small businesses are not just the most impacted by high energy costs, but small businesses are also leaders in domestic protection of energy. They make up 80 percent of all renewable fuels producers in this country. This legislation makes them part of the solution. It does this by developing innovative new technologies, reduces carbon emission, increases clean renewable energy production, and modernizes our energy infrastructure. Much of this was accomplished under the leadership of Congressman HEATH SHULER, whose legislation, the Small Business Energy Efficiency Act, is contained in this bill. It's initiatives provide entrepreneurs with increased access to financing and technical assistance to improve their energy efficiency. It also establishes the Renewable Fuels Capital Investment Company Program that will provide capital for small businesses involved in the production of renewable energy.

Mr. Speaker, as Chair of the Small Business Committee, we held over 50 hearings. We have been in every part of this country. And when small businesses talk to us, before they even talk

to health care, and not even taxes, they tell us that we've got to do something about energy costs.

This bill is good for consumers, good for the environment; it's good for the small businesses; and, most of all, it's good for our economy. Vote "yes" on this bill.

Mr. BARTON of Texas. Mr. Speaker, I want to yield 1½ minutes to the distinguished member of the committee from the great State of Illinois (Mr. SHIMKUS).

(Mr. SHIMKUS asked and was given permission to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, I'm sorry that we're on the floor here today. This year I've yelled on this floor. I've cried on this floor. I've stormed off this floor. So today I decided to be the still, small voice in support of coal, in support of the internal combustion engine, and in support of national security.

Illinois alone is the Saudi Arabia of coal. If you want to decrease our reliance on imported crude oil, coal has to be in an energy bill. It just has to. And to deny that is a failure on public policy ramifications.

I here hold in my hand an internal combustion engine, much maligned on the floor and in the world today. It's 1.5 horsepower. It's lighter and it's easier to carry than 1½ horses. And we have to imagine the benefits to this world that the internal combustion engine has caused, how it's uplifted the poor and the downtrodden. But this bill attacks the internal combustion engine.

And on national security, coal-to-liquid fuel and natural gas, the evidence is clear: the Department of Defense wants to relieve itself of reliance on imported crude oil. They are seeking support of coal-to-liquid applications for jet fuel. The United States Air Force is the number one consumer of aviation fuel. Our coal fields to our refineries, to our pipelines, to our jet planes is the way in which we can decrease our reliance on imported crude oil and protect our national security interests. This bill does nothing in that respect. Vote "no."

Mr. BOUCHER. Mr. Speaker, I recognize myself for 1 minute.

I can't let pass the suggestion that there is nothing in this legislation that advances the interests of the domestic coal industry in the United States. In fact, there are two very important provisions that address the future needs for coal. The first of these will stimulate the development of carbon dioxide pipelines that will enable carbon dioxide to be transported across long distances from the place where carbon dioxide is separated out of the coal combustion process to the place where it's injected for permanent storage.

And, secondly, there is an investment tax credit totaling \$1.5 billion that is available for companies that will take the step to develop those carbon separation and sequestration technologies. And carbon separation and sequestration truly is the future of coal. In a

carbon constrained environment, it's critically important that coal-fired utilities be able to continue to use that fuel and to do so consistently with whatever the limits on carbon dioxide emissions are. The ability to separate carbon dioxide out of the combustion process and transport it to permanent storage in the ground is the answer that we'll be relying on in future years. This bill helps to make that possible.

Mr. BARTON of Texas. Mr. Speaker, I would like to recognize for 1 minute the gentlelady from the Mountain State of West Virginia (Mrs. CAPITO).

Mrs. CAPITO. Mr. Speaker, I rise today in strong opposition to this no-energy energy bill. We're all for innovation and research for future energy resources, including renewables; but the standard in this bill is a one-size-fits-all mandate that ignores available energy resources and economic needs of individual States.

A mandatory renewable energy standard, such as in this bill, picks winners and losers. It excludes nuclear, hydroelectric and clean coal. Technology is giving us ways to use coal more cleanly and efficiently. We just heard coal sequestration mentioned, but where is coal liquification? It is a proven viable fuel for the decades to come.

Despite tremendous promise of this and other technologies, this no-energy bill excludes our most abundant domestic resource, coal, from our future energy strategy.

A federally mandated renewable electric standard will raise electric prices for all consumers. Think of that senior citizen on a fixed income trying to bear the burden of the new rising energy costs contained in this bill.

The cost of energy impacts every job, every family in West Virginia. The rising cost of gasoline is consuming a greater portion of our family budget. This bill is not the answer.

Mr. BOUCHER. Mr. Speaker, at this time I am pleased to yield 2 minutes to the distinguished gentleman from Illinois (Mr. EMANUEL).

Mr. EMANUEL. Mr. Speaker, in less than 12 months this Congress will do what previous Congresses have failed to do for 32 years. Today, after 32 years of failure, we can take America's energy policy in a new direction. And that failure was through Democratic Congresses and Republican Congresses alike.

Today this House has the opportunity to pass modern energy legislation that will accomplish a hat trick. It will make our vehicles more fuel efficient, help limit our dependence on foreign oil, and protect our environment, all in one act.

The new fuel efficiency standards will save the American family up to \$1,000 a year for gas at the pump.

More importantly, this bill offers us an opportunity to look to the future and prepare for it. Make change an ally, rather than an adversary.

Each and every one of us knows, Democrat and Republican alike, that

our Nation consumes too much energy. We know that we are dangerously dependent on an unstable region of the world and we know that this isn't news to anybody here, and we have recognized these facts for years. But when faced with this problem, we, as a country, have turned our back on that problem, hoping it will go away. This legislation allows us to face those challenges head on and prepare for America's future.

Mr. Speaker, the problem will not go a way, and today we have a chance to confront it when faced with the facts and vote to make our Nation more secure, reduce oil consumption, and finally plan for a more energy-independent future.

We can bury our heads in the sand and hope the problem disappears, or we can take action today and prepare for the future and make the challenges of America's future an opportunity for industry, for new jobs, for new businesses and, most importantly, for foreign policy and national security policy that is less dependent on an unstable part of the world.

I am proud that today we are taking action that for 32 years past Congresses failed to meet and challenge. By finally having the fuel efficiency standards that are modern and look to the future, America is taking a step that's important for its security. We will do in 12 months what has failed to have been done for 32 years.

Mr. BARTON of Texas. Mr. Speaker, I would like to yield 1 minute to a member of the Energy and Commerce Committee, Mr. RADANOVICH of California.

Mr. RADANOVICH. Mr. Speaker, we could spend all day talking about the shortcomings and faults of this legislation, not to mention the process under which it came to the floor. However, the most glaring and ironic dominance from this energy bill is the lack of production of energy.

What we need to be discussing is a sound and realistic energy policy that is going to help America become energy independent. This means increasing domestic energy production by expanding oil and gas exploration on the Outer Continental Shelf at Alaska, not taxing oil companies \$20 billion simply because they're in business. We need to increase research and provide incentives for oil, shale, and coal-to-liquid technologies. Coal is one of the country's most abundant natural resources, and recent estimates of oil shale in Colorado, Wyoming, and Utah could provide us with over 800 billion barrels of recoverable oil.

What about refining capacities? We have not built a refinery in this country in over 30 years, and our current refineries are operating near maximum capacity.

The bottom line is this legislation falls short of what the American people expect of our leaders in Washington. This Congress has a responsibility to do better. I urge a "no" vote.

Mr. BOUCHER. Mr. Speaker, at this time, I am pleased to yield 2 minutes to the distinguished gentleman from Maryland (Mr. VAN HOLLEN).

□ 1415

Mr. VAN HOLLEN. Mr. Speaker, this bill charts an ambitious, necessary and long-overdue new direction for energy policy in the United States.

After more than three decades, we increase fuel economy standards for cars and trucks, a commonsense step that will save \$1,000 for American families at the pump, that will reduce greenhouse gas emissions by the equivalent of taking 28 million cars off the road, and by reducing our oil consumption by half, half, of what we import from the Persian Gulf.

We have made in this bill an historical commitment to homegrown biofuels by boosting the renewable energy standards. We are enlisting America's families and farmers to build a sustainable clean energy future and have done so in a way that also protects our environment, like the Chesapeake Bay watershed.

To unleash the economic environmental benefits of our rapidly growing renewable energy industries, we include a strong renewable electricity portfolio standard that will reduce greenhouse gases and save consumers money.

We also include a fully paid-for \$21 billion incentive package that redirects \$13 billion in antiquated subsidies to our already profitable oil industry toward clean, green technologies.

To those who are thinking about voting against this bill, I would ask what kind of signal does that send to America? That the Congress thinks it's more important to continue yesterday's billion dollars of subsidies and giveaways to the oil and gas industry rather than invest in clean technologies? That we should wait another 30 years before making commonsense improvements in our fuel economy standards? That we should sit idly by while our national security is increasingly undermined by our addiction to foreign oil? Is that the message you want to send to America?

Refusing to act now would be irresponsible. Moreover, failing to see the opportunities that this bill brings and the challenges we face is contrary to the can-do American spirit that has propelled our Nation from the beginning.

Let's build a better tomorrow. Let's start with this bill and a new energy policy.

Mr. BARTON of Texas. Mr. Speaker, I yield myself 2½ minutes.

Mr. Speaker, we have before us a bill that has not gone through the regular process in the House of Representatives. That almost goes without saying. This is not a conference report. It is the result of some negotiations primarily between select Members of the majority here in the House and the majority in the Senate. It does put this Nation on a different path. It puts us

on a path of moving away from market-based, free capital energy production to government mandates. Now, that may be what the majority of the House of Representatives wants to do, but I don't think it is what the American people want to do.

We have a 36 billion biofuels mandate with submandates for separate categories of biofuels that under current technology simply doesn't exist, can't be met. We already have an ethanol mandate from the Energy Policy Act of 2005 that has exceeded its wildest expectation in terms of spurring incentives for ethanol. In fact, it's been so successful, the price of corn has doubled and cattle producers and chicken producers, hog farmers are having trouble buying feed for their animals because of the increase in the price of corn.

We have a mandate in this bill for Federal energy efficiency building code standards with the goal by a date certain of having most buildings in the United States on a net basis not using any energy at all. There doesn't appear to be a cost-effective benefit analysis requirement in that particular mandate.

As I have already said, we have the mandate to increase fuel efficiency for our cars and trucks to 35 miles a gallon by the year 2020. It does maintain a separate standard for trucks and cars. We need to thank Chairman DINGELL for making that happen in negotiations with the Senate. But this mandate is technically possible to meet. Keep in mind that under current regulations there are only eight cars and trucks in the United States that meet 35 miles to the gallon. We are certainly going to raise the price of cars and trucks and probably reduce the amount of jobs in this country that are effective in the automobile assembly and manufacture and their vendor components industry. We have appliance standards.

I could go on and on, Mr. Speaker. Suffice it to say I don't think the country wants the government controlling energy, and that's what this bill leads us to. I hope we would vote against it.

Mr. BOUCHER. Mr. Speaker, at this time I am pleased to yield 2 minutes to the gentleman from New York (Mr. HINCHEY).

Mr. HINCHEY. Mr. Speaker, first of all, I would like to express my deep appreciation and gratitude to the Speaker of the House of Representatives, NANCY PELOSI; and to Chairman JOHN DINGELL for bringing to the floor of this House of Representatives the most productive and forward-looking piece of energy legislation that we have seen in this Congress now in 30 years.

We are increasingly dependent upon energy from outside of America. In our country, we possess less than 3 percent of the known oil reserves around the world; yet on a daily basis, day after day, year after year, we are using 25 percent of that which is used, and that number is increasing. As a consequence of all of that, the price of energy has

gone up to heat American homes, making it more and more difficult for the economic circumstances of families all across America and for transportation.

Over the course of the last 7 years, the price of gasoline has increased by more than four times. It has more than quadrupled over the course of the last 4 years. And a lot of that has to do with the energy legislation that has been produced by the minority party over the course of that time in connection with the White House.

This legislation begins to alter all of that. It begins to move us to a point where we can begin to be more energy independent by focusing our attention and our resources on renewable, alternative forms of energy, particularly solar energy.

It's interesting that Thomas Edison, one of the first energy producers in our country, made the observation that solar energy is the most productive, the most sustainable, and the one that we are going to have to depend on. And he said that an awfully long time ago. It ought to be clear to us now—he was right then, he is more right now.

And that's what this legislation does. It moves us toward energy independence. It allows people and corporations to produce energy through alternative means, particularly solar. That, in and of itself, is going to mean a huge economic improvement for our country and the production of hundreds of thousands of jobs.

Let's all pass this legislation. It is very much needed.

Mr. BARTON of Texas. Mr. Speaker, I believe I have 4 minutes remaining, 1 of which will be used by the minority leader to close. My other speaker, Mr. BLUNT, is not on the floor, so I would reserve the balance of my time.

Mr. BOUCHER. Mr. Speaker, I would say to the gentleman from Texas that on our side, we only have one speaker remaining and then a speaker who will close. And so hopefully your speaker before your closer will appear.

Mr. BARTON of Texas. Mr. Speaker, in the interest of comity, the Republican whip is not on the floor, so I yield myself 3 minutes.

Mr. Speaker, I want to talk about the renewable portfolio standard that is in the bill. This would require investor-owned utilities in the country to generate 15 percent of their electricity by renewable means by a date certain. And there was a phase-in so that beginning, I believe, in 2010 or 2011 there is a cascade stair step that each year they have to meet a higher percentage. Information that we have received from the Department of Energy indicates that of the 50 States, there are only seven that currently meet that requirement. Those are Alaska, Maine, Montana, Nebraska, Oregon, Tennessee, Washington, Vermont, and California. There is another handful of States that come close: North Dakota, New Hampshire, Wyoming, New Mexico, Idaho, South Dakota, Alabama, and Iowa all meet within 10 percent to 8 percent.

The rest of the States, which is approximately 40 States, don't even come close, and some of them, like Delaware and Missouri, are at 0 percent.

So you would think that a 15 percent requirement might be doable. The problem is definitional, what is defined as "renewable." New hydro is not defined as renewable. New nuclear is not defined as renewable. New clean coal technology is not defined as a renewable. So it has to be from geothermal, wind power, solar power, or biomass or hydro refitting. Now, when you look at it in that regard, this 15 percent requirement in certain parts of the country is almost impossible to meet.

To compound the problem, the legislation before us says that States that don't meet the requirement can't go out; they can only buy credits to offset that requirement. I believe it says up to 27 percent of their amount that they have to meet. So you are going to put a State like Florida, a State like Georgia, some of the States that are at the lower end of the curve, Arizona, Indiana, Ohio, West Virginia, Illinois, Utah, Maryland, New Jersey, Kentucky, Pennsylvania, Rhode Island, these States are all somewhere between 0 to 2 percent. They're simply not going to be able to do it. They are not going to be able to do it.

So while a renewable portfolio standard for electricity generation might seem like it's a wise idea in principle, when you put it into actuality, it is going to be almost an impossible idea to meet. And this bill says "tough." So I would hope that we vote "no" on the bill.

Since January the process for energy legislation has been a disgrace. H.R. 6 was never considered by any Committees, no hearings no mark-ups. H.R. 3221, a second try at an energy bill, was also bad. Only hours notice of the bill before mark-up; limited floor amendments; many bad provisions never considered in hearings; final passage on a Saturday with many members absent.

The process since then has been far worse. I am aware of no Member discussions since August 4. If they have taken place no Member on my side of the aisle was invited or informed. The result: the terrible legislation before us today.

The Pelosi "energy bill" consciously raises consumer costs for fuel, vehicles, and electricity while reducing consumer choices. It favors a few special interest investors at the expense of ordinary Americans and the U.S. economy.

On CAFE: The bill raises fuel efficiency standards so high that consumers will face only three possible consequences: far smaller cars and trucks, far more expensive cars and trucks, or—more likely—both.

I'm told that all but 8 out of some 350 models currently available in American showrooms would be banned from the market as the new fuel standards fully phase in. Moderate income consumers will be hardest hit. They don't buy hybrids today because the multi-thousand dollar premium for electric hybrid technology cannot pay for itself in fuel savings, even at today's sky-high fuel costs.

Because consumers will prefer their older vehicles that match their needs better than the

new car inventory, they will postpone trading in as long as possible. New car sales will plummet; manufacturing companies and their employees will suffer. The ones who won't agree are simply in denial.

On renewable fuel mandates: The levels of corn-based and other biofuels required to be part of the U.S. fuel mix will drive up all fuel costs dramatically, even over today's high prices. Diverting corn from food and feed use to fuel has already cost consumers plenty in rising chicken, turkey, beef, and soft drink prices. This bill will only make that problem worse.

It also mandates advanced biofuels that exist today only in laboratories and which may never be commercially available. It's like passing a law mandating that a horse not even born yet grow up to win the Kentucky Derby. The only way to do that is to bar other horses from the competition, as this bill does.

On the Renewable Electricity Mandate: The bill would require electric companies across the United States (except in Hawaii and Alaska—they have special carve-outs) to generate 15 percent of their power from "renewable energy."

States that have the natural renewable resource base needed to meet such mandates already have them under state law. Remaining States that cannot meet the standard will have to buy their way out at consumer expense, as the bill provides.

While the bill has some non-controversial energy efficiency provisions some sections are particularly harmful to consumers and small businesses.

A section on regional standards for HVAC equipment would authorize DOE to create a program that could lead to penalties and lawsuits aimed at the small businesses in every Congressional district that install and repair our air conditioners and heat pumps.

The punishment would likely kick in if the repairman installs, the wrong air conditioner, e.g., a Georgia-rated air conditioner on the wrong side of the Florida state line. It would dictate efficiency levels by state or region without regard to price, size, or even energy savings payback.

Another provision gives DOE authority to dictate energy efficiency standards for manufactured housing. HUD already has a successful program that is improving efficiency while keeping manufactured housing affordable.

DOE's "price-is-no-object" track record on energy efficiency could mean that manufactured housing will no longer be affordable for the moderate income Americans who rely on it today. And jobs will be lost.

Bad as the bill was that passed the House on August 4, this one is far worse. Vote "no", do not be tempted.

Mr. BOUCHER. Mr. Speaker, I yield myself 1 minute.

On the subject of the renewable portfolio standard, the gentleman from Texas and I are actually in bipartisan agreement. And while I strongly support the legislation before us and have urged and will urge the House to pass this bill because of the many improvements that it makes in national energy policy, I share the gentleman from Texas's concern about the renewable portfolio requirement.

The fact is that there are places in the United States where the renewable

resources are simply not found in sufficient quantity to meet that requirement. In the southeastern U.S., for example, there is a deficiency of both wind and solar potential, and these are the two renewable resources that are most prominently used across the United States.

The requirement that is before the House in this bill, frankly, is not broad enough in terms of the list of fuels that it makes eligible to meet the mandate. And there are States such as Pennsylvania that have made eligible a far broader range of fuels.

So this provision really does need more work, and it would be my preference that it's not here. But notwithstanding its presence, this is good legislation and the House should approve it.

Mr. Speaker, I reserve the balance of my time.

CALL OF THE HOUSE

Mr. BOUCHER. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. The previous question being ordered, the Chair notes the absence of a quorum in accord with clause 7(c) of rule XX and chooses to entertain the motion for a call of the House pursuant to clause 7(b) of rule XX.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

□ 1451

The SPEAKER pro tempore. On this rollcall, 380 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

ENERGY INDEPENDENCE AND SECURITY ACT OF 2007

Mr. BARTON of Texas. Mr. Speaker, to close debate on the minority side, I

yield 1 minute to the distinguished minority leader from the Buckeye State of Ohio, the Honorable JOHN BOEHNER.

Mr. BOEHNER. I appreciate my colleague for yielding, and Ohio State will be in the national championship on January 7. And we look forward to dealing with our colleagues from Louisiana.

Mr. Speaker, my colleagues, there has been a lot said on the floor today about the national energy crisis that we face. We know that it jeopardizes our national security, we know that it jeopardizes our own economy and American jobs here at home, and this is an issue that the American people are very concerned about. We have got rising gasoline prices. We have got home heating oil prices and gas prices for this winter that are really going to hurt the American families' budget. So we have a crisis that deserves our response and our collective efforts. But what we have here today is a bill that was written in secret, written by a handful of people on the majority side in each Chamber that we didn't see until last night. Nobody knows what is in this bill because nobody has had time to read it.

One thing that is in here that I think is something that certainly will be useful is the CAFE agreement that Mr. DINGELL and others reached that will give us more efficient cars in the future and done in a practical way to help domestic manufacturers and the consumers in America who are going to have to pay for this.

But we know what is not in it. There is nothing in here that is going to lower gasoline prices in America. There is nothing in here that is going to help American families deal with the heating costs they are going to have this winter. There is nothing here in this bill that is going to increase domestic production of energy. And at the end of the day, if we are very serious about solving the energy crisis in America, we have got to deal with conservation. We have got to deal with alternative sources of fuel. We have to deal with increased production here in the United States, and my goodness, why won't we talk about nuclear energy on the floor of the House of Representatives of the United States when we know that it is the cleanest source of fuel for our future? But it is not in here.

Now, I did find some other things that were in this bill. Earmarks. Oh, yeah, we have to have earmarks. If we are going to move a piece of legislation, we have to take care of a few people. So I found \$161 million in here for the Plum Creek Timber Company's Montana land holdings for native fish habitat conservation. I didn't know that fish lived in trees. We have \$2 billion earmark in here from our good friend from New York City to help New York develop a rail line from the JFK Airport to Lower Manhattan. That's something I am sure my constituents want to pay for.

One of the better issues in here, though, is the \$3 billion slush fund, \$3 billion of our money that we are going to give to cities and counties around America for green projects, except the definition is so wide that they can do almost anything, like some city can decide they are going to finance Al Gore's speaking tour to promote his book, "An Inconvenient Truth," or maybe Beverly Hills will replace their police cars with Lexus hybrids. Certainly it would count if you look at the bill. We could be buying some energy-efficient hybrid snowmobiles for Aspen or Snowmass or any of those places. All that would be allowed under this provision. Or we can even use some of this money to finish the rain forest that we are building in Iowa. This is not where the American people want their money to go to.

Although this is not an earmark, what I really liked in the bill was the \$240 tax credit that we are going to provide every 15 months for people who regularly ride their bike to work for the purchase, repair or storage of their bicycle. Now, amongst us, I know there is one of my colleagues that would probably benefit from this. I hope he is going to recuse himself when we vote. This is not going to solve America's energy problem. I think that we ought to get serious as a country about energy independence and saving our future and the future for our kids.

But while we are here dealing with this bill that doesn't frankly do much and will not solve our problem, think about what we haven't done. You know Christmas is right around the corner for some of you that haven't realized it. The majority leader said yesterday that we would be out by next Friday. The gentleman from Maryland yesterday, the majority leader, said we would be out by December 14. Now, first, I wanted to say "Ha-Ha-Ha," but then I began to realize we are close to Christmas so I thought, well, "Ho-Ho-Ho" might be more appropriate. Now there is not a chance that that is going to happen.

We haven't dealt with the AMT problem. We are about to put 23 million Americans under the alternative minimum tax that have never been there before. We have not done anything to fund our troops or our veterans that are about to run out of money. Men and women in the military, in Afghanistan and in Iraq, are out there fighting to protect the American people. We have not dealt with that funding. We have not dealt with 11 of the 12 appropriation bills that should have been done by October but, you know, we were going to get them done by Thanksgiving, and here it is, December 6, my wife's birthday, RAY LAHOOD's birthday, December 6, and we still haven't done 11 of the 12 appropriations bills. Yet none of this is finished at a time when we ought to be getting serious about getting our work done.

So I would ask my colleagues, let's get serious about energy independence.

Let's get serious about what we need to do as a nation to solve the future for our kids and theirs. And until we get serious, I think we should vote "no" on this bill.

But I would implore my colleagues to also realize that our constituents are looking for us, our families are going to be looking for us soon, and it is time for us to wrap up our work but get our work finished, because the American people expect it.

□ 1500

Mr. BOUCHER. Mr. Speaker, to close debate on our side, I am pleased now to recognize for 1 minute the very distinguished Speaker of the House of Representatives, the gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Speaker, this is a very important day for our country, a day in which this Congress can declare itself a Congress for the future, a Congress for America's children.

Earlier today, some of you saw me reference this baseball signed by Bobby Thomson: "The shot heard round the world," October 3, 1951, a historic day in baseball. When he signed this baseball, he referenced a phrase used by Ralph Waldo Emerson referencing the shot fired at Concord, which began the Revolutionary War, the fight for American independence. If Bobby Thomson could reference a shot heard round the world, we should indeed be able to do it today. This vote on this legislation will be a shot heard round the world for energy independence for America.

I want to thank some of the people who made this possible. As many of you know, at the beginning of this Congress, our Chairs of the appropriate committees were tasked to prepare legislation to be ready to be introduced by the Fourth of July, our Independence Day. They did so, and on June 30, in preparation for the Fourth of July weekend, we introduced our legislation.

I want to begin by thanking Mr. DINGELL for his exceptional leadership as Chair of the Energy and Commerce Committee. This bill is about America's national security. Mr. DINGELL has always been about that. He has dedicated his life, starting in World War II, in his public service for our country. Thank you, Mr. DINGELL.

Another great veteran in this arena, Mr. RANGEL, a veteran of the Korean War, was an important part of this legislation with the pay-fors from the Ways and Means Committee. Thank you, Mr. RANGEL.

Earlier you heard from Mr. OBERSTAR and the important work he is doing with the greening of America's Federal buildings and many other resources. Thank you, Mr. OBERSTAR. Mr. WAXMAN of Oversight and Government reform; Mr. MILLER of Education and Labor, where we are having our green jobs initiative; Mr. RAHALL from Natural Resources, making an important contribution to this legislation; Mr. LANTOS from Foreign Affairs; Mr. GORDON from Science, the Science and

Technology Committee has been central to this legislation; Mr. PETERSON from the Agriculture Committee. America's farmers will fuel America's independence. We will send our energy dollars to the Midwest, not the Middle East. Congresswoman VELÁZQUEZ from Small Business, where small businesses will be the incubator of this new economy. Thank you, Chairwoman VELÁZQUEZ. And Congressman MARKEY of the Select Committee, thank you also for your tremendous leadership for over 30 years on this issue.

I mention all of my colleagues, these chairmen, not only to salute them, but to say they started a process over a series of months where practically every member of these 11 committees of Congress had an opportunity, Democrats and Republicans alike, to weigh in on the initial legislation, which was introduced in time for the Fourth of July, as promised, and which was passed by this Congress in the first week of August; and it is the follow-up on that legislation that we are voting on today.

It is a part of our first 100 hours. As we near the end of this session of Congress, we can harken back to that first 100 hours, our Six for '06. Our first piece of legislation was about how we protect America, passing the 9/11 Commission recommendations. I am so pleased that that was passed with strong bipartisan support in this House and was signed by the President.

The minimum wage was passed with strong bipartisan support in this House of Representatives and was signed by the President.

Making college affordable, the biggest package for college affordability since the GI Bill of Rights in 1944, passed by the Congress, signed into law by the President.

The biggest legislation for ethics reform in the history of the Congress, bipartisan majority, strong overwhelming support, and signed into law.

In the course of time, passing Mr. GORDON's bill, our commitment to competitiveness to keep America number one, the Innovation Agenda, the COMPETES Act, overwhelming majority, bipartisan majority, signed into law by the President.

I mention all of these because they have bearing on what we are doing today. It is about our national security, it is about jobs and the economic security of our country. It is about the environment, and therefore it is a health issue. It is a moral issue. With all that I have said, that is why we have scientists and evangelicals, we have business and labor, we have the environmental community, all strongly supporting this legislation.

And here are some of the reasons why. I will give you their words. Over 20 generals have signed a letter saying that we have to move in this direction in terms of reversing global warming. But, very specifically, the other day we heard from Admiral Denny McGinn, and he said this: "Our dependence on

foreign oil is a clear and present danger to Americans. Your vote for tough fuel economy standards is a vote for increasing our safety and our well-being." This is a national security issue.

It is an issue that relates to our environment and therefore the health of our children. That is why the Pew Charitable Trusts for Fuel Efficiency wrote: "If the House and Senate finally approve this and the President signs it, they will have done more for consumers at the pump than any Congress or administration since the 1970s." They were referencing also the fact that the consumers will save \$700 to \$1,000 as a result of this bill, per year. And over a period of time until 2020, they will save \$22 billion. That is why the Consumer Federation of America is supporting this bill. It is about American jobs.

The president of the Alliance of American Automobile Manufacturers wrote: "We believe this tough, national fuel economy bill will be good for both consumers and energy security. We support its passage."

I could submit for the record a long list of representatives of the business and labor community who are supporting this legislation.

And labor, the legislative director of the UAW, Alan Reuther, says: "We believe that this historic measure will provide substantial energy security and environmental benefits for our Nation while protecting and expanding jobs for our workers."

The list goes on. National security, jobs, the environment, the health of our children, and the future of this planet, as well as the consumer benefits. It is, again, a historic day because it has been so long since we have come to the place where we are, as has been said, over 30 years since we have addressed this issue in this substantial way in the Congress of the United States.

The point of this is, are we about the past or are we about the future? I hope that we can have strong bipartisan support for this legislation. We were able to accomplish in this 12-month period, as Mr. EMANUEL said, in this 12-month period, what was not done in 32 years in the Congress of the United States.

So, my friends, I ask you to think about this vote and take great pride when you cast a "yes" vote. Many of you are far away from your legacy, but when that day comes, I hope you will consider this day a part of that legacy when you made history in this Congress of the United States. And not only did you make history; you made progress for the American people. They are watching to see what we do. This legislation is as immediate to them as the price at the pump that they face when they fill up their tanks. It is as immediate to them as heating their homes. It is as global as preserving this planet.

If you believe, as do I, and I think all of us do, that this is God's creation and

we have a moral responsibility to preserve it, that is why we have strong support from the religious community, including the evangelical community, then I hope you will take this act of faith today to make history and to make progress for the American people, especially to declare this the Children's Congress.

Thank you, my colleagues. I urge a "yes" vote.

Mr. SHAYS. Mr. Speaker, I support H.R. 6 and am excited Congress is considering legislation that finally recognizes the energy demand course we are on is simply unsustainable if we do not take control of our over-consumption.

The fact is, with only 3 percent of the world's oil but 25 percent of its use, the U.S. can never drill our way to energy security. I am glad to be supporting policy that reduces the demand for oil by emphasizing conservation. Only by creating a forward-looking energy policy that reduces demand for energy, and in particular oil, will we be able to lower gas prices.

I am pleased this bill requires a fleetwide corporate average fuel economy standards for cars, sport utility vehicles, work trucks, and medium and heavy duty trucks of 35 miles per gallon for cars and SUVs by 2020. In my view, this is the least we can do. While I would prefer to attain a higher standard sooner, I am pleased we are taking the first congressionally mandated increase since 1975.

I believe raising CAFE standards is one of the most significant steps we can take as a nation to reduce our dependence on foreign oil, improve our national security, and protect our environment and economy. Even a modest increase in CAFE standards would save more oil than would be produced by drilling in the Arctic National Refuge.

I am also very grateful that the legislation will build a market for renewable energy and alternative fuels. Requiring at least 15 percent of electricity be produced from clean, renewable sources of energy like wind and solar by 2020 seems common-sense to me, and the 36 billion gallons of biofuels, such as ethanol and biodiesel, to be blended with gasoline by 2022 should make us less dependent on the Middle East for oil.

I also believe the extension of important tax credits for renewable energy production including wind, solar, geothermal, and biomass technologies will continue advances being made in these fields.

Ms. SCHAKOWSKY. Mr. Speaker, last November, the American people voted for change. They were frustrated with the direction our nation was taking and felt that we needed to set a new course. I am so proud to stand before you to say to my colleagues and most importantly the American people, that today we begin to chart that new course on energy policy.

For the first time in over 30 years, the House of Representatives will pass a significant energy bill—one that reduces our dependence on foreign oil. Our addiction to oil has compromised our national security and causes tremendous damage to our environment.

While there are many things to be proud about in this bill, there are two that I would like to highlight. The first is the new fuel economy standard. Today, the average price of gasoline

in the United States is well above three dollars. This puts a tremendous strain on the American people, who in many instances have no option aside from driving to get to work or bring their children to school. Today we pass a bill that raises fuel economy standards to 35 miles per gallon by 2020 for new cars. This provision alone will save American families between \$700 and \$1000 per year, by making their cars run more efficiently. It will also reduce oil consumption by 1.1 million gallons per day in 2020, approximately half of what we import from the Persian Gulf. This will reduce our dependence on oil which comes from the Middle East and politically unstable nations.

In addition to raising CAFE standards, the Energy Independence and Security Act also makes a commitment to integrate renewable energy sources into our supply. This commitment comes at precisely the right moment for America. We are at the precipice of developing new technology that will allow our nation to produce alternative energy more efficiently. In order for this development to be realized, however, we must guarantee a demand for the product. That is why the inclusion of a renewable portfolio standard is so important. It creates the demand necessary to spur development. The bill requires utility companies to generate 15 percent of electricity from renewable sources by 2020. This will mean major investment in products made throughout the country, like ethanol in my home state, wind farms in California, and solar harnessing technology in Florida that will create new jobs and facilitate economic growth.

As important as the Energy Independence and Security Act is, it is just the first step and the road in front of us is long. We need an energy program that matches the scale of the threat we face. We will continue to build on the momentum we are creating and I look forward to the day when I can stand before you and say that the United States is completely energy independent.

In conclusion I would like to thank the Speaker and Chairman DINGELL for their leadership on this bill throughout the process. We would not be here today without them.

Mr. CONYERS. Mr. Speaker, I rise today in strong support of The Energy Independence and Security Act of 2007. This agreement with the Senate builds on the New Direction for Energy Independence, National Security, and Consumer Protection Act passed this summer. The ambitious legislation before us today, which includes wide-ranging solutions from 10 House committees, invests in the future of America and puts our nation on a path towards energy independence. It will strengthen national security, lower energy costs, grow our economy, create new jobs, and begin to reduce the threat of global warming.

With this legislation, Congress is taking groundbreaking steps to address the crisis of climate change. The bill will increase the efficiency of our vehicles. It makes an historic commitment to American-grown biofuels and requires that 15 percent of our electricity come from renewable sources. The legislation strengthens energy efficiency for a wide range of products, appliances, lighting and buildings. It also repeals tax breaks for big oil companies, and invests that money in clean renewable energy and new American technologies. Not only will these measures reduce our dependence on foreign oil and grow our econ-

omy, they will also save consumers billions of dollars.

The Energy Independence and Security Act includes several provisions that will strengthen our national security by decreasing our dependence on foreign oil. I am particularly pleased about the compromise that was reached on fuel economy standards, raising standards for new cars and trucks to 35 miles per gallon by 2020. The bill ensures that this fuel economy standard will be reached, while offering flexibility to automakers and ensuring that we keep American manufacturing jobs and continue domestic production of smaller vehicles. I want to applaud Speaker PELOSI and Chairman DINGELL for reaching an agreement that is supported by both environmentalists and the automobile industry.

The legislation before us today also reduces our dependence on foreign oil. The initiative includes a historic commitment to American biofuels that will fuel our cars and trucks. It includes critical environmental safeguards to ensure that the growth of homegrown fuels helps to reduce carbon emissions and does not degrade water or air quality or harm our lands and public health. The plan establishes a plug-in hybrid/electric vehicle tax credit for individuals and encourages the domestic development and production of advanced technology vehicles and plug-in hybrid vehicles. It also includes tax provisions totaling approximately \$21 billion—which includes the repeal of about \$13 billion in tax subsidies for Big Oil.

The Energy Independence and Security Act will help lower energy costs by promoting cleaner energy, greater efficiency, and smarter technology. It requires utility companies to generate 15 percent of electricity from renewable sources—such as wind power, biomass, wave, tidal, geothermal and solar—by 2020. The bill includes landmark energy efficiency provisions that will save consumers and businesses hundreds of billions of dollars on energy costs by requiring more energy efficient appliances, such as dishwashers, clothes washers, refrigerators and freezers. It requires improved commercial and federal building energy efficiency and assists consumers in improving the efficiency of their homes. The bill also strengthens and extends existing renewable energy tax credits, including solar, wind, biomass, geothermal, hydro, landfill gas and trash combustion, while creating new incentives for the use and production of renewable energy, as well as supporting research on solar, geothermal, and marine renewable energy.

The energy bill will help create new American jobs and reduce the threat of global warming. The landmark fuel efficiency standard, renewable electricity standard and energy efficiency provisions will not only save consumers and businesses money, but will also significantly reduce carbon dioxide emissions. In addition, this package creates an Energy Efficiency and Renewable Energy Worker Training Program to train a quality workforce for “green” collar jobs. These investments in renewable energy could create 3 million green jobs over 10 years. The bill helps small businesses lead the way in renewable energy by increasing loan limits for purchasing energy efficient technologies. It rewards entrepreneurship in the energy sector by increasing investment in small firms developing renewable energy solutions. This initiative also takes aggressive steps on carbon capture and seques-

tration to come up with a cleaner way to use coal.

For too long, our country has lagged behind the rest of the industrialized world in recognizing and taking action to address the climate change crisis. Global warming endangers all of us, but threatens to have the most devastating impact on the poorest and the most vulnerable. Our nation is the richest in the world and one of the largest contributors to global warming, yet, until today, it has not made any substantial efforts towards addressing the problem. I am proud to join with my colleagues as we at long last put America on the path to becoming part of the solution.

Mr. CASTLE. Mr. Speaker, with ongoing high oil and gasoline prices and the conference on global climate change taking place in Bali, the time for making investments to secure our energy future is now.

H.R. 6 is a strong first step toward reducing our dependence on fossil fuels, which is a real security concern, addressing climate change, and protecting public health, while saving consumers money on energy bills and providing business opportunities in the energy market, which will stimulate economic growth and create new jobs. But we must not stop short of addressing climate change. Scientists say that if we are to have a good chance of avoiding potentially catastrophic repercussions of climate change, we must reduce emissions 60% to 80% by 2050. Through cap-and-trade, based on a sound energy policy foundation, Congress can deliver the kind of reform business and industry need to grow the economy, stabilize the climate, and create more diverse and secure sources of energy. I sincerely hope the Speaker keeps her commitment to address this critical issue.

The Energy Independence and Security Act, includes many provisions that I have previously supported in earlier iterations of the legislation in January and August. It increases the fuel economy for automobiles to 35 miles per gallon by 2020, requires that 15% of our electricity come from renewable energy sources by 2020, includes important energy efficiency provisions for buildings and appliances, a renewable fuels standard with safeguards under the Clean Air Act with specific incentives for cellulosic biofuels, and continues and makes new investments in renewable energy production through the repeal of subsidies for the oil and gas industry.

For the first time in 30 years, the bill ensures that our automobiles go farther on a tank of gas by raising fuel efficiency, or CAFE, to 35 miles per gallon by 2020, which is both aggressive and something manufacturers feel they can achieve. This is an historic achievement. With close to \$100/barrel oil, \$3.00 a gallon gasoline, and a nearly one billion dollar deficit in our balance of trade from oil imports makes increasing our fuel economy so critical. I have long believed that reasonable CAFE standards are both achievable and practical and would have a positive impact on fuel consumption in this country. While the issue of raising CAFE standards is not new and the proposals for how it should be achieved have differed greatly, I am pleased to support the agreement Congress has reached.

Another key measure is the requirement of a 15 percent national renewable electricity standard, which will help lower energy costs, create new jobs and help diversifying our energy portfolio with clean, renewable sources,

like wind and solar energy. This standard will hopefully begin to ease pressure on natural gas prices and help reduce carbon emissions quickly. While I am a cosponsor of legislation to create a 20 percent national renewable electricity standard, complimenting Delaware's recently adopted standard and effort to harness offshore wind energy, this compromise will go a long way in helping to keep our air and water clean and in our effort to address climate change.

Finally, I strongly support the key tax provisions, such as the 4-year extension of production tax credit for qualified renewable energy, like wind, and credits for residential efficiency measures, that will help us make strong investments in clean, renewable energy sources, and help address affordability and availability.

Mr. WYNN. Mr. Speaker, today, we are doing something great for America.

This bill makes major strides towards addressing our country's growing energy demands. And it makes great progress towards a brighter and more renewable future for America's children.

Energy is what drives the American economy. It is what keeps the lights on. But our use of fossil fuels is warming the planet, and may have catastrophic effects on our children and grandchildren.

First, we must conserve energy. For the first time since 1975, Congress is acting to require higher fuel economy for new vehicles. This will save American consumers money, and make American car manufacturers more competitive in the global marketplace.

The bill also requires that we begin to generate a significant amount of our electricity—15 percent by 2020—from renewable sources like the sun, wind, and water. The significance of this mandate is that it will encourage the development of a greener economy by creating incentives for the advancement of alternative energy sources.

ENERGY EFFICIENCY AND CONSERVATION BLOCK GRANTS

Energy conservation must be a natural partnership involving Federal, State and local government.

This bill contains a provision based on legislation that I introduced to this House back in May as H.R. 2447, the Energy and Environment Block Grant Act. This provision creates an Energy Efficiency and Conservation Block Grant program that will help take on the problem of global warming at the local and community level.

The bill authorizes \$10 billion in local assistance to cities, counties, and States to continue working to reduce energy usage, increase our efficiencies, and conserve valuable energy resources.

EECB Grants will give local governments funding and assistance to: implement energy conservation programs for homeowners and businesses; reduce vehicle usage through smart planning, traffic flow improvements, and telecommuting; increase material conservation; and locally generate energy with renewable energy technology like solar, wind, and fuel cells.

The program will: help create and grow new energy-efficient communities; foster a nationwide market for renewable and efficient technologies; and achieve significant energy savings across this country.

HEALTHY HIGH-PERFORMANCE SCHOOLS

I am also proud to support the bill's provisions on Healthy High-Performance Schools.

On any weekday, 20 percent of America is in a school building. Yet, schools are often sited next to abandoned landfills or industrial facilities.

According to a 2002 five-state survey, more than 1,100 public schools were built within a half-mile of a toxic waste site. Lead in paint and drinking water, toxic chemical and pesticide use, polluted indoor air, radon, asbestos, and mold are also factors that impact the health of our children, teachers and staff in schools environments.

According to the EPA, studies show that one-half of our nation's schools have problems linked to indoor air quality. Asthma is the leading cause of school absenteeism due to chronic illness and it is also the leading occupational disease of teachers.

The Energy Security and Savings Act's provisions on Healthy High-Performance Schools amend the Toxics Substances Control Act to promote the development of healthy school environments that are free of environmental hazards and establish a grant program for states to design healthier, more energy efficient and environmentally safe facilities.

I know this bill has opposition on many fronts. But I believe it is an important step for our country to take towards a better and more sustainable future.

I urge my colleagues to support this important bill.

Ms. ESHOO. Mr. Speaker, this is the first forward-looking energy bill to come before Congress in a generation and it is sorely needed because our nation and our planet are at risk because of our dependence on fossil fuel. We are doing nothing less than asserting America's leadership in solving our own and the world's most significant energy and environmental problems.

Today, our national security is at risk because the U.S. is increasingly beholden to foreign governments for the energy that fuels our economy, and greenhouse gas emissions are contributing to greater global insecurity due to changes in the climate and their repercussions. Consumers see the effects of dependence in their pocketbooks each time they fill up. Our interests in the Middle East are dictated by our need for oil. Throughout the world we see the environmental impact of the dependence on fossil fuel on our environment ... whether it's an oil spill or more intense hurricanes or droughts.

Today we're taking a historic step in changing this dynamic.

The auto fuel efficiency provisions in this bill reduce our oil consumption by more than 4 million barrels per day by 2030—more than twice the amount of oil we currently import from the Persian Gulf.

The bill will also reduce global warming pollution by the equivalent of 300 coal-fired power plants. By 2030 we will cut emissions by up to 35 percent of what scientific experts say we must achieve to prevent climate catastrophe.

Many said it would be impossible to reach agreement on raising fuel economy standards and requirements for renewable energy, but this bill delivers.

It raises fuel economy standards for cars and trucks to an average of 35 miles per gallon by 2020, reducing greenhouse gas emissions by the equivalent of 28 million cars, and saving consumers up to \$1,000 once it is fully implemented.

The bill also requires 15% of the electricity produced in the U.S. to be generated from renewable resources, and it sets goals for the use of renewable fuels—36 million gallons by 2022.

These are enormous steps, and combined with provisions on energy efficiency, including a provision I authored on computer data center efficiency, this bill will reshape energy production and consumption. It will foster the development of new energy development that could make the U.S. an exporter of energy technology instead of an importer of oil and gas.

This is the bill I've been waiting 15 years to vote for and I'm thrilled the moment has arrived.

Mr. HERGER. Mr. Speaker, when our constituents tell us to "do something" about gas prices, they don't mean "Make them higher." This bill has some attractive elements, but they're overwhelmingly weighed down by bad policy, creative accounting and tax increases, none of which gets close to fixing the energy problem we face.

Record high gas prices are due to growing demand, constricted supply, and over-reliance on oil from unstable regions of the world. Yet this bill penalizes U.S. producers.

Mr. Speaker, families in Northern California won't see reduced prices at the pump if Congress raises billions in new taxes on those who discover, refine and deliver our gas.

I urge a "no" vote.

Mr. WOLF. Mr. Speaker, America must develop a 21st century energy security policy that will reduce energy costs, increase energy independence, encourage energy conservation, strengthen the economy and protect the environment, including steps to cut carbon emissions and address the impacts of climate change. I believe that policy must also include a commitment to invest in clean, renewable energy technology, the responsible exploration of domestic energy sources, an increase in fuel efficiency standards, and the research necessary to develop the fuels of the future.

Today the House considers a bill that is over 1,000 pages, with only 12 hours of notice and only 1 hour of debate. I found it interesting that while the bill was not introduced and made available to members until 8:30 last night, K Street lobbyists provided copies to congressional staff 3 hours earlier.

In the limited time we have had to read the bill, I have found some provisions that I could support. The bill has provisions to invest in research and development of a whole host of renewable resources, promote energy efficiency by the Federal Government, promote energy conservation programs and investment by the private sector in renewable energy generation. If we are ever to become energy independent, those are the kinds of investment we must make.

The bill also has provisions to establish grants to promote public transportation and expand use of alternative fuels, and extend tax credits for energy efficient projects in commercial buildings, production of renewable electricity and investments in solar energy and fuel cells. Earlier this year I voted for the Udall/Platts amendment to require electricity companies to ensure that 15 percent of their electricity is generated by renewable and alternative sources by the year 2020. Renewable energy development is vital to our national security, our economic prosperity and the health of our environment.

Another provision I support and have co-sponsored separate legislation will increase automobile fuel economy standards, also called CAFE, Corporate Average Fuel Economy.

But with all these positive steps promoting energy investment, why add provisions that will penalize domestic oil and gas production? America is at the mercy of countries like Saudi Arabia and Venezuela and even China whose governments control oil resources around the world. If we are ever to wean our Nation from foreign sources of energy, we must tap our own energy sources. Congress had an opportunity through this bill to find ways to partner with America's oil and gas producers to provide incentives to encourage alternative energy use and development and to stop the rising costs of gas and oil. Instead, the legislation adds billions in increased taxes which will hurt energy consumers and threaten U.S. jobs. I don't believe any fair-minded person would say that the way to lower prices at the pump is by raising taxes on the companies that find, refine and transport gasoline.

That is no way to promote energy independence. The tax provisions not only increase taxes for domestic drilling, but also include a massive tax increase on U.S. companies producing energy abroad. This will have the effect of placing U.S.-based companies at a disadvantage by reducing their ability to compete for investments in foreign energy projects. This is unacceptable when China, India and Russia are working night and day to corner the market on many of the world's energy resources. In fact, Cuba has sold leases for offshore drilling in the Gulf of Mexico to China, India, Canada and Spain.

Additionally, I was shocked to see that provisions to promote telework in the Federal Government were removed from the final bill. According to Environmental Defense, 6 billion gallons of oil can be saved if commuters telework just 1 day each week. Most importantly, these telework provisions did not cost a penny.

Just a few weeks ago the Texas Transportation Institute at Texas A&M University released its annual traffic congestion study which found that congestion creates a \$78 billion annual drain on the U.S. economy due to 4.2 million lost hours of productivity and 2.9 billion gallons of wasted gas. That's not even considering the air pollutants caused by idling vehicles around the nation. Why did we not consider savings from the telecommuting provisions included in the energy bill passed earlier this year as an offset instead of new taxes on the backs of the American people?

I also have learned that this massive bill includes a \$2 billion earmark for the City of New York. I am sure there are other special interest projects that have been creatively air dropped into the 1,061 pages of this bill. With so little time to cull through those pages, though, no one but the sponsors will know before we vote. No wonder the American people have such low regard for Congress.

To truly create an effective energy policy, we must have an open and transparent process for all members and in fact all Americans working together. We cannot achieve energy security by increasing taxes on oil and gas producers, which will cripple our economy and impact the pocketbook of every single American. We cannot create energy policy through wheeling and dealing or thousand page bills released just hours before a vote.

Finding bipartisan consensus in developing energy policy is critical for our Nation's future economy, prosperity and security. Republicans and Democrats in the House and Senate must work together so that America can truly start on the path to energy independence that delivers energy security and lower costs for American consumers in a way that also promotes environmental stewardship.

We can do better. We must do better.

Mr. ENGEL. Mr. Speaker, I rise as a 10-term member of the United States House of Representatives, co-author of the DRIVE Act, Dependence Reduction through Innovation in Vehicles and Energy Act, H.R. 670, and co-chair of the Oil and National Security Caucus.

For too long, the United States has been too dependent on foreign oil. We consume nearly 21 million barrels per day, and our appetite is growing. This reliance on a single resource is particularly troubling because much of that oil comes from nations that are unstable, unfriendly, or downright hostile.

Despite our economic dominance, we continue to give our money to foreign nations because we are addicted to foreign oil. Despite our military might, we remain vulnerable because we are addicted to foreign oil.

Mr. Speaker, it is time for that to change. It is time for bold leadership to move us toward energy independence.

Energy independence is a goal that other countries are already achieving. Brazil, a nation that once relied on foreign countries to import 80 percent of its crude oil, will be entirely self-sufficient in a few years thanks to its investment in biofuels.

I believe we can become self-sufficient by replacing our consumption of foreign oil with domestic production of biofuels; first from corn, then from cellulosic feedstock and other biomass—including agricultural and municipal waste.

I am proud of the legislation that this legislative body has produced today. This bill will strengthen national security, lower energy costs, grow our economy and create new jobs, and begin to reduce global warming.

This legislation takes groundbreaking steps to increase the efficiency of our vehicles, making an historic commitment to American grown biofuels, requiring that 15 percent of our electricity come from renewable sources, and strengthening energy efficiency for a wide range of products, appliances, lighting and buildings to reduce energy costs to consumers.

It mandates increased automotive fuel efficiency standards to 35 miles per gallon by the year 2020, the first such change since 1975.

It repeals tax breaks for profit-rich oil companies, and invests that money in clean renewable energy and new American technologies. Not only would this reduce our dependence on foreign oil, the measure would also save consumers billions of dollars.

Mr. Speaker, among the specific legislative initiatives in this bill near-and-dear to my heart, that I have long advocated with some of my friends and distinguished colleagues here in the House, are:

Plug-in Hybrid Electric Vehicle, PHEV, and other Advanced Drive Transportation Technologies, which will save fuels costs for consumers and businesses, reduce air pollution, and decrease dependence on imported oil;

National Tire Efficiency Consumer Information Program, which will create a national pro-

gram to educate consumers about the crucial role played by passenger tires, and the proper maintenance of passenger tires, on vehicle fuel economy;

Renewable Fuels Standard, which will ensure that a percentage of our nation's fuel supply will be provided by the domestic production of biofuels. It will provide a pathway for reduced consumer fuel prices, increased energy security, and growth in our nation's factories and farms.

United States-Israel Energy Cooperation Provisions, which establish a grant program to fund joint ventures between American and Israeli businesses, academic institutions, and non-profit agencies, with the goal of promoting the development of clean alternative fuels and more energy efficient technologies.

Mr. Speaker, this legislation will help pave a path to a new era in American energy. I urge my colleagues to vote yes on this pragmatic and forward-looking bill.

Thank you.

Mr. STARK. Mr. Speaker, I rise today in support of clean energy and a clean environment.

The Renewable Fuels, Consumer Protection, and Energy Efficiency Act, H.R. 6, provides long overdue increases in our fuel efficiency standards for vehicles, CAFE, significant investments in energy efficiency, ending needless tax breaks for giant oil companies, and mandating production of electricity from clean and renewable sources. Although this bill represents real progress, much more must be done in order to avoid the catastrophic consequences of global warming. I urge all of my colleagues to take up this cause and support aggressive efforts to end our dangerous addiction to fossil fuels through a carbon tax.

We have not increased CAFE standards since 1975. During the intervening years the price of oil has reached nearly \$100 a barrel, our reliance on foreign oil has led to deadly wars and propped up corrupt regimes, and the threat of global warming has become real. The bill before us would increase CAFE standards to 35 mpg by 2020. Although I believe we can and should get there faster, this provision alone will save 1.1 million barrels of oil per day by 2020. That is real progress.

With this legislation we also have the opportunity to greatly reduce our use of polluting fuels like coal by mandating that 15 percent of our Nation's electricity be generated from renewable and clean sources such as wind, biomass, and geothermal. Such a change will have the equivalent of removing 20 million cars from our roadways. In addition, this bill will reduce our energy use and save families money by setting strong, new efficiency standards for appliances and promoting carbon-neutral green buildings. These two steps will prevent as much as 10 billion tons of carbon dioxide from entering the atmosphere.

I am troubled that we are continuing to subsidize and ratchet up corn-based ethanol production. A simple shift from gasoline to ethanol will do nothing to reduce greenhouse gas emissions, but it will eat up open space and continue to drive up food prices. Fortunately, this bill includes some environmental safeguards and directs future production toward advanced biofuels. I urge my colleagues to pay close attention to the effect of ethanol on food prices here and abroad and move quickly to protect families who are squeezed by rapidly rising prices.

This bill begins to address the energy and environmental crises caused by the unbridled use of fossil fuels. I urge all of my colleagues to support final passage. We must realize, however, that more fundamental changes, ideally a carbon tax, are needed if we are serious about stopping global warming and becoming truly energy independent.

Ms. MATSUI. Mr. Speaker, I am proud to support this historic and long-overdue legislation. Today's bill offers geopolitical and economic security, environmental sustainability, and significant cost savings for American consumers.

It is a strategy to fight global warming. It is a compromise that raises fuel efficiency standards. It is an investment in a new generation of manufacturing jobs.

This bill creates a world where American resources and ingenuity are used to make American energy, not to import it from other countries.

The bill raises CAFE standards for the first time since 1975. As a result, each American family could save up to \$1,000 a year at the pump. That alone should be reason enough for every Member of Congress to support this compromise.

But today's bill does even more. It frees us from a dangerous dependence on foreign oil. By 2030, it will save Americans more than double the level of oil we currently import from the Persian Gulf. That amounts to more than 4 million barrels saved every single day.

This energy package also invests in the American people by creating three million green jobs over 10 years.

With this bill, Mr. Speaker, we are forging an entirely new kind of economy—a clean energy economy. My hometown of Sacramento is the perfect example of a community that will contribute to this new energy economy.

We have a growing clean-energy industry that is poised to take off. Our local utility already produces power from solar, wind, and methane gas. More and more of our region's homes, businesses, and vehicles are powered by renewable energy.

However, my constituents need help from the Federal Government to bring this new energy economy into the mainstream.

That is why I am proud to stand before the House today in support of this revolutionary energy package. It makes landmark investments in the energy economy that is developing in Sacramento and in likeminded cities across our great Nation.

The biofuels this bill develops will power my constituents' cars. New fuel efficiency standards will help them save money on gas. They will work some of the millions of green-collar jobs it creates. This energy bill helps Sacramento continue to lead our country's energy revolution.

One of the cornerstones of this revolution is a renewable portfolio standard. My home State of California already has such a standard. So do more than 20 other States. I have seen this progressive policy in action, Mr. Speaker, and it has contributed greatly to my home State's groundbreaking efforts to increase the use of clean power and forestall global warming.

I am pleased that a renewable portfolio standard has been included in this comprehensive energy package. What works for our states can—and will—work for the entire country.

Mr. Speaker, in Congress we often talk about creating a better future for our children and grandchildren. Today's energy bill will create this better future. It is a future of energy independence, clean power, fuel-efficient vehicles, and economic growth.

I urge my colleagues to support the legislation.

Mr. YARMUTH. Mr. Speaker, I rise in strong support of the most profound step forward in energy policy that this country has taken in 30 years.

In those 30 years, we in America have seen our dependence on foreign nations increase exponentially. The same issue which has caused this great nation to be beholden to others is draining the wallets of our fellow citizens while warming the earth at an alarming and unnatural rate.

And so, I am incredibly proud to be a part of the Congress that isolated the source of those problems and responded resolutely, in a bicameral, bipartisan way. When the energy bill is fully implemented, a gallon of gasoline will take the average American nearly 30 percent farther, our need for foreign oil will plummet by a colossal 4 million barrels a day, energy bills will drop as appliances grow more efficient, and thanks to an unprecedented investment in homegrown, renewable, clean fuel, the prospect for real, safe energy independence is closer than it has ever been.

Mr. Speaker, this is more than simply an energy bill, this is America's declaration of energy independence, and I urge my colleagues support it.

Mr. UDALL of Colorado. Mr. Speaker, I rise in strong support of this urgently needed legislation.

Three months ago, the House passed an excellent energy bill that combined provisions developed by several different Committees designed to start putting our country on a path toward energy independence, increased national security and economic growth, and addressing global warming.

The Senate has also passed its version of energy legislation, and the measure now before the House would make revisions to that version, returning the bill to the Senate for further action.

By passing it, we can move toward greater energy independence—which means greater national security—in ways that will lower energy costs, help our economy, and reduce the carbon emissions that contribute to climate change.

The measure includes a few things not part of the bill the House passed earlier, including the first revision in decades of the fuel-consumption standards for automobiles and trucks and provisions dealing with the Secure Rural Schools and Payments-in-Lieu-of-Taxes, PILT program.

I support those additions. Both are good for the nation, and the Secure Rural Schools and PILT provisions are of particular importance for Colorado because so many of our counties include large Federal land areas and therefore will benefit directly from that part of the bill. In 2006, Colorado counties received more than \$6 million in Secure Rural Schools payments, while PILT payments to our counties totaled an additional \$17.3 million.

However, the authorization for Secure Rural Schools has expired and Congress has rarely appropriated all funds authorized for PILT—which is why I have introduced legislation,

H.R. 790 to make full funding for PILT automatic without a need for annual appropriations. So, this part of the legislation is good news for Colorado because it will mean our counties will know what they will receive to help pay for law enforcement and other vital services.

I am particularly pleased that the measure before us retains the provision of the House bill—added by adoption of an amendment I offered along with Representatives TOM UDALL and TODD PLATT—to establish a Renewable Electricity Standard, RES. This provision will require utilities acquire 15 percent of electricity production from renewable resources by 2020. The House's adoption of that amendment represented a great success by those of use working for positive change that will benefit rural communities, save consumers money, reduce air pollution, and increase reliability and energy security.

I am also pleased that the legislation includes a provision on carbon capture and storage based upon a bill that I authored. Coal and other fossil fuels have been and will continue to be an important energy source for our country, but coal-burning power plants are also a major source of greenhouse gas emissions and other pollutants. The carbon capture and storage research, development, and demonstration program authorized in this bill will help us tackle this challenge while keeping our economy healthy and strong. It will authorize the Department of Energy to conduct demonstration projects for both carbon dioxide capture and carbon dioxide injection and storage. Not only will this research program help us develop this technology and make it more economical, it will also help us understand the implications of storing large amounts of carbon dioxide underground.

But some of the provisions we passed earlier are not part of this measure. I regret their omission, and if it had been up to me, they would not have been dropped.

Those omissions include the majority of provisions in the earlier bill that originated in the Natural Resources Committee, including ones that I proposed regarding oil shale development, the protection of surface owners in "split estate" situations, and the safeguarding of our water supplies from potential adverse effects of energy development. And the measure now before us also omits the important provision to require that drilling on the top of the Roan Plateau be done in a way that will reduce adverse effects on other resources and values of that area, which is so important to Western Slope communities and Colorado's hunters and anglers.

I am also disappointed that the measure does not include my provision to reorient and expand the U.S. Global Change Research Program, USGCRP, so that it will provide more user-driven research and information. The USGCRP coordinates all Federal climate change research and has contributed much to our understanding of climate change since its creation in 1990—but we now need to expand our knowledge and tailor the information to the needs of national, regional and local decision makers confronted with management and mitigation challenges. This bipartisan provision would have done that.

I strongly supported all those provisions, and I intend to continue working to win their enactment either on their own or as part of some other measure.

But while dropping those provisions means the measure now is weaker in some respects than the one the House passed earlier, it has been strengthened in an important respect by the addition of the fuel-economy provisions, which will result in increasing the efficiency of all vehicles to 35 miles per gallon by 2020. And other parts of the legislation will provide long-term incentives to boost production of electricity from renewable sources, including wind, solar, biomass, geothermal, river currents, ocean tides, landfill gas, and trash combustion resources, as well as to expand production of homegrown fuels such as cellulosic ethanol and biodiesel.

The bill will encourage manufacturers to build more efficient appliances, help working families afford fuel-efficient plug-in hybrid vehicles, and help businesses create energy-efficient workplaces. It will encourage deployment of renewable energy by enabling electric cooperatives and public power providers to use new clean renewable energy bonds to help finance facilities to generate electricity from renewable resources. And it will help states leverage tax credit bonds to implement low-interest loan programs and grant programs to help working families purchase energy-efficient appliances, make energy-efficient home improvements, or install solar panels, small wind turbines, and geothermal heat pumps.

Further, the bill will create an Energy Efficiency and Renewable Energy Worker Training Program to train Americans for good "green" jobs—such as in solar panel manufacturing and green building construction—that will be created by new renewable-energy and energy-efficiency initiatives. This will provide training opportunities to our veterans, to those displaced by national energy and environmental policy and economic globalization, to individuals seeking pathways out of poverty, to young people at risk and to workers already in the energy field who need to update their skills.

Mr. Speaker, as I said, this legislation is much needed and long overdue. While I regret the omission of several very important parts of the version the House passed earlier this year, what remains and what has been added combine to make a measure that deserves to pass here and in the Senate and that President Bush should sign into law. I urge its approval.

Mr. DAVIS of Virginia. Mr. Speaker, this is our third attempt at passing a comprehensive energy bill. Each manifestation inches closer to the compromise needed to pass a bill into law and fundamentally shift our Nation's energy policy. Unfortunately, we are not there yet.

Our excessive dependence on foreign oil and heavy use of dirty fossil fuels are serious threats to our national security, economic security and our environment. We must lay the groundwork through a comprehensive energy policy that seeks to decrease our dependence on foreign oil by increasing domestic production in the short term. At the same time, however, we must devote substantial resources into research and development of new technologies and facilitate a gradual shift to green, renewable and domestic sources of energy.

We cannot pretend to address our dependence on foreign oil or consumption of fossil fuels without increasing Corporate Average Fuel Economy, CAFE, standards. I was baffled when the House was not allowed to debate such a crucial issue during our two prior

deliberations on energy bills. I have long been a proponent of increasing efficiency standards, sponsoring and cosponsoring bills to accomplish that goal in this and previous legislative sessions. I am pleased this provision was finally included by the House democratic leadership.

Yet, this positive development is outweighed by a radical tax increase on our domestic oil and gas industry. I could not vote for the \$16.1 billion tax package that was attempted in August, and I cannot vote for a \$21.5 billion tax increase today. By taking such an action, this bill will hinder domestic production of oil and gas and further increase our reliance on foreign sources of energy. U.S. dependence on imported petroleum is already at an all time high. The imposition of retroactive and punitive taxes and fees will only exacerbate this problem.

The needed direction of our energy policy is clear: increase domestic production to utilize our secure, abundant sources of energy while we develop the technologies that will feed our hunger for energy in the years to come. I urge my colleagues to join me in voting against this legislation and work towards a viable, practical energy strategy.

Mr. CAMPBELL of California. Madam Speaker, I rise today to ask that while the House consider this energy legislation, that they take into account that the CAFE provision in this bill does nothing to clarify the critical issue of which federal government agency has the lead on regulating fuel economy.

To effectively improve fuel economy there cannot be two separate sets of fuel economy standards—one from the National Highway Traffic Safety Administration (NHTSA) and another from the Environmental Protection Agency (EPA). Having two agencies with inconsistent standards creates substantial regulatory uncertainty, confusion, and duplication of effort.

Most importantly, the legislation gives EPA free rein on the fuel economy issue which would allow them the ability to supersede Congressional authority over CAFE. This could mean that EPA could establish a CAFE standard that far exceeds the standard passed by Congress.

The White House agrees that one agency needs to be the lead entity responsible for a single national regulatory standard. The legislation should have harmonized EPA and NHTSA's distinct roles to regulate fuel economy and emissions.

A single, nationwide fuel economy standard would create certainty and achieve the mutual goal of reducing gasoline consumption in an effective manner.

It is my hope that this problem be remedied.

Mr. GOODLATTE. Mr. Speaker, I rise today in opposition to this reckless energy policy, which will do absolutely nothing to make us energy independent, or lower energy costs. This bill sets us on a dangerous path and ties our hands in a regulatory mess to ensure that we cannot produce domestic energy.

Like my colleagues, I believe we should find solutions to address the growing demand for energy. The biggest concern facing the farmers and ranchers of this country are increased input costs from higher fuel prices and fertilizer. The U.S. fertilizer industry relies upon natural gas as the fundamental feedstock for the production of nitrogen fertilizer. The rest of the U.S. farm sector also depends on signifi-

cant amounts of natural gas for food processing, irrigation, crop drying, heating farm buildings and homes, the production of crop protection chemicals, and, let's not forget, ethanol biofuel production. In addition to the farm sector, the forest products industry relies more on natural gas than any other fossil fuel and energy amounts to the third largest manufacturing cost for the industry.

Unbelievably, this legislation contains no new energy supplies in it and does nothing to relieve the burdens of increased costs on producers who provide the food and fiber for American consumers. It seems that the Majority's plan to move toward energy independence includes limiting domestic energy production and imposing new government mandates that will prove to be costly and burdensome to the American people.

This legislation would dramatically expand the Renewable Fuels Standard (RFS) by increasing it to 36 billion gallons by 2022. This initiative is extremely ambitious and could be achieved by tapping all sectors of agriculture including plant and wood waste, vegetable oil, and animal fat and waste which would result in the production of 21 billion gallons of cellulosic ethanol. Strangely, the bill discourages the production of cellulosic fuels from forests, even though forests are the largest potential source of cellulosic feedstock. While I am in favor of finding new markets for agriculture products, what good is finding new markets for agriculture commodities when the cost of production is too much for our farmers and ranchers?

We should develop a policy that is technology neutral and allows the market to develop new sources of renewable energy. The RFS provisions create an unrealistic mandate for advanced biofuels technology that doesn't yet exist and creates hurdles for the development of second generation biofuels by placing restrictions on alternative fuels, renewable fuel plant production, and, most important, limits the harvesting of our homegrown feedstocks. These restrictions will undoubtedly lead to a consumer tax to help bridge the gap in production that will occur if this policy is put into place. Even with the advancement of cellulosic ethanol, the expansion of the RFS would still require 15 billion gallons of renewable fuel to come from the only current commercially available option: grain ethanol

Last year, 20 percent of the U.S. corn crop was used for ethanol production and that amount is expected to rise significantly over the next few years. With feed stocks meeting most of our renewable fuel initiatives, the livestock sector is facing significantly higher feed costs. Corn and soybeans' most valuable market has always been, and will continue to be, the livestock producers. We must ensure that there are not unintended economic distortions to either grain or livestock producers as a result of these sectors prospering from other markets.

The benefits of reduced reliance on foreign energy sources, stable energy prices, and new markets for agricultural products should not be replaced with a risk of adding even more increased input costs for livestock producers and creating even higher food prices for consumers.

This energy policy, set in place by the Democrat Majority, exemplifies the Democrat motto through and through: tax and spend. This bill imposes \$21 billion in tax increases. The other

side will tell you that these tax increases will not affect the average hardworking American, only the “big, evil oil companies.” Nothing could be farther from the truth. The taxes contained in this bill will impede new domestic oil and gas production, will discourage investment in new refinery capacity, and will make it more expensive for domestic energy companies to operate in the U.S. than their foreign competitors, making the price at the pump rise even higher.

Let’s make no mistake: an increased tax doesn’t just hurt energy companies, it hurts every American—individual, farm, or company—that consumes energy. Increased taxes on energy companies are passed to consumers. Every American will see these increased costs on their energy bill. This body shouldn’t pass legislation that further raises energy prices for consumers.

What is even more disturbing is that these increased costs will be felt by some of our Nation’s most poor. On average, the Nation’s working poor spends approximately 13 to 30 percent of their yearly income on energy costs. This average is already too high, and sadly this legislation will only dramatically increase the amount of money these workers will have to spend on energy costs. I have heard those on the other side of the aisle say that we must all shoulder the cost to produce clean energy. Well, the costs of the clean energy in the Renewable Portfolio Standard (RPS) alone, as estimated by just one of Virginia’s many electric utilities, will increase \$200 million for its retail customers. By shifting to renewable energy sources, that are not as available or as cost effective as traditional sources, we will see a rise in energy prices across the board and this will be hardest felt by working people who cannot afford to shoulder any more costs.

While this bill is said to be focused on new energy technologies, it fails to address some of our most promising domestic alternative and renewable energy supplies that could be cost effective for American consumers. Coal is one of our Nation’s most abundant resources, yet the development of Coal-to-Liquid technologies is ignored in this bill. Furthermore, this legislation does nothing to encourage the construction of new nuclear facilities.

Proponents of this legislation will tout how green this bill is; however, if my colleagues really want to promote green energy they should encourage the production of more nuclear sites which provide CO₂ emission-free energy. The rest of the world is far outpacing the U.S. in its commitment to clean nuclear energy. We generate only 20 percent of our energy from this clean energy, when other countries can generate about 80 percent of their electricity needs through nuclear. It is a travesty that in over 1,000 pages this legislation does not once mention or encourage the construction of clean and reliable nuclear plants. Nuclear energy is the most reliable and advanced of any renewable energy technology, and if we are serious about encouraging CO₂-free energy use, we must support nuclear energy.

This legislation does nothing to address the energy concerns of our country; and it does nothing to relieve agricultural producers of their increasing input costs. This legislation only makes the situation worse and it is the product of a flawed process that does not have bipartisan support!

This bill is a dangerous policy for our country. If we really want to make our country energy independent, this Congress must pass an energy bill that contains energy. This bill does not. I urge my colleagues to reject this awful bill, let’s start over, and work to find real solutions to the energy needs of our Nation.

Mr. MORAN of Virginia. Mr. Speaker, I support the conference agreement on the Energy Independence and Security Act and I thank Speaker PELOSI for her personal involvement and leadership on this issue.

This legislation: (1) reduces our dependency on unstable foreign sources of oil; and, (2) moves us away from our unsustainable reliance on fossil fuels.

To do so is absolutely necessary for our economy, our future prosperity and our environment.

Americans are reminded how important this is every time they fill up their gas tanks at the pump.

While we should not try to manipulate the price at the pump, we can take concrete steps to reduce the amount of oil we consume, by making our vehicles travel further on each gallon they burn, and in doing so, reducing our dependency on too many unstable and unfriendly foreign sources of oil.

It’s been more than 30 years since Congress last raised automobile fuel efficiency standards, and during the interim, the average fuel efficiency of our vehicles has actually declined. We’ve regressed in meeting our goals.

This legislation corrects this inexcusable abdication of responsibility and mandates tough, but achievable, fuel efficiency standards that will reduce our daily consumption of oil by 4 million barrels per day by 2030—more than twice the amount we import from the Persian Gulf today.

Consumers can look forward to savings hundreds or even thousands of dollars every year on their gas bills.

This legislation also looks toward the future and crafts responsible policies that, if implemented today, will reduce the threat of global warming and the impact of future oil price shocks by moving us toward cleaner, more environmentally responsible alternative sources of energy.

The mandate on commercial power companies to produce 15 percent of their electricity from renewable sources will be the equivalent of retiring 300 coal-fired power plants, the single largest source of carbon dioxide emissions.

With this legislation, we have the beginnings of a substantial commitment toward lower greenhouse gas emissions and greater energy independence.

By 2030, the policies implemented under this legislation will have achieved about 40 percent of the greenhouse gas emissions reductions most scientists have concluded are needed to avoid catastrophic global climate change.

Despite the claims of rising prices, economic disruption and disaster, this legislation will achieve its objectives in a way that will spur innovation, create thousands of new manufacturing and service jobs, increase savings for consumers, put fewer of our earnings into the pockets of unfriendly foreign interests and set up a safer, more secure future for our children.

I urge my colleagues to support this conference agreement.

Mr. LEVIN. Mr. Speaker, I support the rule and urge the House to adopt the Energy Independence and Security Act.

The basic issue before us is whether we are going to take action to address energy security in this country, or are we going to sit on the sidelines and let American consumers and businesses fend for themselves. All of us know that we can’t continue business as usual. The price of oil stands near \$90 a barrel. In my home State of Michigan, gas costs over \$3 a gallon. Families are struggling with persistently high home heating costs. At the same time, the effects of climate change are becoming more and more pronounced, yet the United States remains the only industrialized nation in the world that has no plan to address global warming.

The package before the House strengthens our energy security, lowers energy costs, grows our economy, creates jobs, and begins to address global warming. It also bolsters our national security. Today we import more than 60 percent of the oil we use. It is simply not in our long-term security interests to continue to rely on oil imports from the Middle East and other volatile regions of the world. We can’t drill our way out way out of this situation, so we need to try another approach.

Many of the provisions of this legislation are common sense and will achieve significant energy savings with little or no cost. For example, the bill sets new energy efficiency standards for appliances, lighting, and buildings. Doing so will save consumers and businesses hundreds of billions of dollars over time. This legislation also includes incentives for manufacturers to produce washing machines, refrigerators and dishwashers that push the boundaries of energy and water efficiency, and to build them in the United States. Reducing the energy or water usage of a washing machine may seem like a small thing, but over time and across millions of households, these incentives will produce remarkable reductions in energy and water usage, and consumers will save money on their utility bills.

Other sections of this bill will challenge key sectors of our economy. In particular, the legislation calls for a 40 percent increase in vehicle fuel economy by 2020. The compromise that has been reached is ambitious, but it has the support of auto manufacturers, the United Auto Workers, consumers groups, and the environmental community. We also reform the existing CAFE mechanism, which for years has discriminated against manufactures, including Ford, GM and Chrysler, that produce a full line of vehicle sizes. The agreement contains anti-backsliding language to help keep small car production here in the United States and protect the jobs of American workers. I am pleased that this bill also begins the work of helping industry reach the higher mileage standards through retooling assistance and incentives such as a new plug-in hybrid tax credit.

I also strongly support the renewable electricity portfolio provisions of this bill that require utilities to generate 15 percent of their electricity from renewable sources by 2020. Obviously, this provision will pay environmental dividends. Moving towards renewable energy will help keep mercury out of the Great Lakes and greenhouse gases out of the atmosphere, but it also will help create new industries and jobs here in the United States. There is no reason in the world why the U.S.

should not lead the world in the production of wind turbines and solar panels. This bill will help ensure that these jobs are created here in the United States.

Our work in this House is about priorities, and the difference in priorities on this bill could not be more clear. I urge all of my colleagues to support this responsible legislation.

Mr. SKELTON. Mr. Speaker, the people of rural Missouri and those who live throughout the United States are eager for Congress to enact energy policies that help alleviate record high oil prices, reduce America's dependency on foreign oil, promote homegrown energy sources, and preserve the environment for future generations. The comprehensive energy bill we are considering today, the Energy Independence and Security Act, would address the peoples' concerns in these areas. After careful consideration, I have concluded the measure is good for rural Missouri and for the security of our Nation. I will lend my support to it.

Our Nation cannot afford to ignore the impact high energy prices are having on individuals, on families, and on the economy at large. Oil and fuel prices have been at record levels for weeks. Rural Missouri families and farmers, who rely heavily on transportation to go about their daily lives, are particularly hard hit by high fuel costs. They have been allocating larger portions of their income to fill their gas tanks and to heat their homes. Meanwhile, America's top five oil companies have been collecting record profits and refusing to invest those profits in new oil refining capabilities.

Enactment of the Energy Independence and Security Act would be welcome news to Missouri motorists. For the first time since 1975, this legislation would raise fuel efficiency standards for the cars and trucks sold in our country. Further, it would ensure that automakers continue producing trucks driven by many rural Americans by adjusting the fuel efficiency requirements for these particular vehicles.

Improved fuel efficiency is long overdue. Over time, this added efficiency would reduce by half the amount of oil America imports from foreign sources, reduce hazardous vehicle emissions, preserve our environment, and eventually yield fewer trips to the gas station for hard working Americans. I am pleased that the automobile industry and conservationists support this fuel efficiency standard.

Important to Missouri farmers is the robust renewable fuels standard included in the Energy Independence and Security Act. In the Show-Me State and throughout America's heartland, ethanol and biodiesel production facilities dot the countryside. They have fostered economic development in areas of the country that have struggled to produce jobs. Many of these facilities are owned by farmers who have committed their financial resources and ingenuity toward advancing America's energy independence, improving farm incomes, and boosting the economic well-being of small towns.

The 2005 Energy Bill included a strong renewable fuels standard for ethanol made from corn. Since passage of that legislation, ethanol production has dramatically increased, corn yields have set records, and ethanol's farmer-investors have reaped economic gains. Because of the overwhelming success of ethanol and the demand for corn, the price per bushel of corn has risen. Combined with widespread

drought that has impacted much of the Midwest and Great Plains States over the past several years, killing or damaging grazing pastureland, high corn prices have raised concerns about ethanol with some livestock producers.

This year's energy bill would build upon the successful renewable fuels standard established in 2005 by allowing for a strong corn ethanol mandate, while also phasing in ethanol made from sources other than corn to help assuage the concerns of some U.S. livestock producers. The bill also would create a minimum use requirement for biodiesel made from soybeans and other sources.

While I will support the Energy Independence and Security Act, the bill is not perfect. I am concerned that investor-owned utility firms in Missouri and elsewhere may not be able to sufficiently produce electricity from renewable sources within the time mandated by the legislation. I am hopeful that the Energy and Commerce Committee will sit down with investor-owned utility firms to iron out any glitches that may arise in this particular area.

Taken as a whole, the Energy Independence and Security Act would be good for rural Missouri and for our country. I will vote for it and urge my colleagues to do the same.

Mr. HONDA. Mr. Speaker, the signs of an energy crisis are clear—we are facing the consequences of significant climatic change, our national security continues to be at risk, and our energy economy must change in the face of \$100 per barrel oil.

Investors are ready to invest billions of dollars into American made next generation clean technologies, but for too long the Federal Government has been subsidizing the old technologies. Inventors and entrepreneurs, the true engines of American economic growth, are already focused on energy, but they are still waiting for Congress to send them the right signals before bringing their full efforts to bear on the problem.

That is why I am pleased to rise in support of an energy bill that sends the right signal and will help to revolutionize our Nation's energy economy as we know it, help free us of our dependence on foreign oil, create millions of new jobs, and address global warming.

The Energy Independence and Security Act will increase corporate average fuel economy standards to 35 miles per gallon by 2020; greatly expand the national biofuels mandate; require utilities nationwide to provide 15 percent of their power from renewable sources by 2020; strengthen energy efficiency for a wide range of products, appliances, lighting, and buildings; create education and job training programs to train the next generation of Americans to ensure we remain competitive in the new energy economy; and repeal tax breaks for profit-rich oil companies and invest that money in clean renewable energy technologies and in much needed research and development.

The evidence that we need to change our reliance on fossil fuels has never been clearer. The United Nations Intergovernmental Panel on Climate Change has issued its latest, and most dire, report on what we can expect if we do not immediately reduce greenhouse-gas emissions. The IPCC has said that worldwide carbon emissions must fall by at least 50 percent by 2050 to limit a temperature rise of about three degrees Fahrenheit and prevent the worst climate impacts from occurring.

By passing the Energy Independence and Security Act, we are taking the first step in developing a policy for reducing carbon emissions. I pledge to work diligently with my colleagues to take additional steps in 2008, and urge adoption of this important legislation.

Mr. YOUNG of Alaska. Mr. Speaker, I'm amazed that the Democrats took so long to write such a bad bill. I would laugh if this was any laughing matter, but designing the Nation's energy policy is among the most serious responsibilities of the Congress. H.R. 6 has recklessly been designed by radical environmentalists to achieve many of their long-term goals, including significantly raising the price of energy used by Americans, vastly reducing American manufacturing and mining jobs, increasing federal control over rural Western communities, and reducing and further locking-up the use of our vast God-given coal, oil and gas, oil shale, and timber resources.

This bill reaches into every American's bank account and steals vast amounts of hard earned dollars. As a result of this bill, gasoline will be much more expensive, electricity in all areas of the country will go up with many areas with huge increases, home heating oil will continue to surge to record levels, and natural gas prices will literally go through the roof. This bill, a work of exceeding incompetence, is the greatest holiday gift to the OPEC oil cartel ever given by a sovereign nation.

Although there are a few provisions in this bill that are appropriate, the vast expanse of this bill is an abomination. If it becomes law, the Democrats who supported it will have to answer to the American people.

Mr. MARKEY. Mr. Speaker, I also wish to also briefly discuss various provisions in order to more fully explain the statutory language and to provide context for what we are accomplishing with this historic energy bill.

Section 3 of the bill states: "Except to the extent expressly provided in this Act, or in an amendment made by this Act, nothing in this Act or an amendment made by this act supercedes, limits the authority or responsibility conferred by, or authorizes any violation of any provision of law (including a regulation), including any energy or environmental law or regulation."

The laws and regulations referred to in section 3 include, but are not limited to, the Clean Air Act and any regulations promulgated under Clean Air Act authority. It is the intent of Congress to fully preserve existing federal and state authority under the Clean Air Act.

In addition, Congress does not intend, by including provisions in Title I of the bill that reform and alter the authority of the Secretary of Transportation to increase fuel economy standards for passenger automobiles, non-passenger automobiles, work trucks, and medium and heavy duty trucks, to in any way supersede or limit the authority and/or responsibility conferred by sections 177, 202, and 209 of the Clean Air Act. (For section 202 of the Clean Air Act, this includes but is not limited to the authority and responsibility affirmed by the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA* (No. 05-1120), and, for sections 177 and 209 of the Clean Air Act, this includes but is not limited to the authority affirmed by the September 12, 2007 decision of the U.S. District Court for the District of Vermont in *Green Mountain Chrysler Dodge Jeep et al. v. Crombie et al.* (No. 2:05-cv-302).

Title 1 of the bill addresses CAFE Standards. Section 102(a) would require that the fleet of new passenger and non-passenger vehicles made for sale in model year 2020 reach a fleet-wide fuel economy average of at least 35 miles per gallon, regardless of shifts in the market or any other consideration. While fuel economy standards for each of model years 2011–2019 are expected to be the maximum feasible standard, this section does not allow the Department of Transportation (DOT) to set a fleet-wide average of lower than 35 miles per gallon for model year 2020 under any circumstances. In addition, if the maximum feasible level for model year 2020 is higher than 35 miles per gallon due to technological progress and/or other factors, Congress intends to require DOT to set standards at the maximum feasible level.

It is also the intent of this section to require DOT to set interim standards between 2011 and 2019 to make rapid and consistent annual progress towards achieving the 35 mpg minimum by 2020. In asking for “ratable” progress, the intent of Congress is to seek relatively consistent proportional increases in fuel economy standards each year, such that no single year through 2020 should experience a significantly higher increase than the previous year.

Section 104 addresses credit trading among and within automakers’ vehicle fleets, and is intended to increase flexibility for automakers, but it is the intent of Congress that any trading not in any way reduce the oil savings achieved by the standards set for any year under this title.

Section 105 is intended to provide added information for consumers, but is not intended to in any way interfere with or diminish EPA labeling authority. Congress intends that DOT work closely with EPA in fulfilling the requirements of this section.

Section 106 is intended to clarify that Title I does not impact fuel economy standards or the standard-setting process for vehicles manufactured before model year 2011. This section is not intended to codify, or otherwise support or reject, any standards applying before model year 2011, and is not intended to reverse, supersede, overrule, or in any way limit the November 15, 2007 decision of the U.S. Court of Appeals for the Ninth Circuit in *Center for Biological Diversity v. National Highway Traffic Safety Administration* (No. 06–71891).

Section 109 makes modifications to the cap on the credits allowed to manufacturers making dual-fuel vehicles to ensure that the dual-fuel vehicle credit program is phased out and is fully and permanently eliminated by 2020 and thereafter.

I urge the Secretary to pay careful heed to the intent and spirit of these provisions in carrying out the provisions of this Title, so that we achieve the Bill’s goals of increasing the fuel efficiency of our cars, SUVs, and other vehicles.

The SPEAKER pro tempore. All time for debate has expired.

Pursuant to House Resolution 846, the previous question is ordered.

The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BOUCHER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, this 15-minute vote on the motion to concur will be followed by a 5-minute vote on the motion to suspend the rules on H.R. 2085.

The vote was taken by electronic device, and there were—yeas 235, nays 181, not voting 16, as follows:

□ 1531

So the motion was agreed to. The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MC GEE CREEK PROJECT PIPELINE AND ASSOCIATED FACILITIES CONVEYANCE ACT

The SPEAKER. The unfinished business is the vote on the motion to suspend the rules and pass the bill, H.R. 2085, on which the yeas and nays were ordered.

The Clerk read the title of the bill. The SPEAKER. The question is on the motion offered by the gentlewoman from California (Mrs. NAPOLITANO) that the House suspend the rules and pass the bill, H.R. 2085.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 373, nays 0, not voting 58, as follows:

[Roll No. 1141]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised there are 2 minutes left on this vote.

□ 1540

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. ISSA. Mr. Speaker, I was unable to make the vote for H.R. 2085. Had I been present, I would have voted for H.R. 2085.

PERSONAL EXPLANATION

Mr. GUTIERREZ. Mr. Speaker, I was unavoidably absent from this chamber today. I would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall votes 1140 and 1141.

PERSONAL EXPLANATION

Mr. ORTIZ. Mr. Speaker, due to important business in my district, I was unable to vote during the following rollcall votes. Had I been present, I would have voted as indicated below.

Rollcall No. 1131: "yea"; rollcall No. 1132: "yea"; rollcall No. 1133: "yea"; rollcall No. 1134: "yea"; rollcall No. 1135: "yea"; rollcall No. 1136: "nay"; rollcall No. 1137: "nay"; rollcall No. 1138: "yea"; rollcall No. 1139: "present"; rollcall No. 1140: "nay"; and rollcall No. 1141: "yea".

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 2761, TERRORISM RISK INSURANCE REVISION AND EXTENSION ACT OF 2007

Ms. CASTOR, from the Committee on Rules, submitted a privileged report (Rept. No. 110-475) on the resolution (H. Res. 849) providing for the consideration of the Senate amendment to the bill (H.R. 2761) to extend the Terrorism Insurance Program of the Department of the Treasury, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING REQUIREMENT OF CLAUSE 6(a) OF RULE XIII WITH RESPECT TO CONSIDERATION OF CERTAIN RESOLUTIONS

Ms. CASTOR, from the Committee on Rules, submitted a privileged report (Rept. No. 110-476) on the resolution (H. Res. 850) waiving a requirement of clause 6(a) of rule XIII with respect to consideration of certain resolutions reported from the Committee on Rules, which was referred to the House Calendar and ordered to be printed.

LEGISLATIVE PROGRAM

(Mr. BLUNT asked and was given permission to address the House for 1 minute.)

Mr. BLUNT. Mr. Speaker, I yield to my friend from Maryland, the majority leader, for information about next week's schedule.

Mr. HOYER. I thank my friend for yielding.

Mr. Speaker, on Monday the House will meet at 3 p.m. in a pro forma session. On Tuesday, the House will meet at 10:30 a.m. for morning-hour debate and noon for legislative business, with votes rolled until 6:30 p.m. On Wednesday and Thursday, the House will meet at 10 a.m. for legislative business and at 9 a.m. on Friday.

We will consider several bills under suspension of the rules. A list of those bills will be announced before the close of business tomorrow.

Under a rule, we expect to consider a conference report on the Intelligence authorization bill and on the Department of Defense authorization bill and further action on appropriations and terrorism risk insurance. There may well be other legislation, if it comes from the Senate.

Mr. BLUNT. I thank the gentleman.

I am wondering, on the appropriations process, the remaining 11 bills, if

the gentleman has a sense of when those might come before the House. I know there was at least a discussion of a same-day rule for Tuesday for that purpose. So whatever information my friend has, I yield to get his ideas on when we might see the first effort on the appropriations bill on the floor or maybe the final effort on that bill.

Mr. HOYER. I will tell my friend, the first action we had on appropriation bills was of course when we passed all of our appropriation bills before we left for the August break. We now hope to have action on the remaining appropriation bills. We expect those to be included in an omnibus appropriation bill. Obviously, we have considered all of them. They essentially have been conferred, notwithstanding the fact that the other body did not pass through the Senate five of their bills, as you know, but they did in fact pass them out of subcommittee. So we had products to conference with.

Both the House and the Senate have been working together to get them in a place where they could be considered, and it would be my expectation that we would consider an omnibus appropriation bill Tuesday night after we come back. I would hope to be able to pass such a bill on Tuesday. Again, that is being worked on between the House and the Senate. There have been discussions, as you know, with the administration as well trying to reach agreement so that we can ensure that the Government certainly doesn't shut down.

□ 1545

The CR expires on the 14th of next week. We would hope that we can pass an omnibus appropriation before that.

Mr. BLUNT. On the remaining 11 of the 12 appropriations bills, some of which the Senate did not pass, was the minority involved in these nonconference conferences that you described?

Mr. HOYER. Mr. OBEY is not here, and I think the answer to that question is "yes," but you would know better than I. I am sure you would hear complaints if that were not the case, and perhaps you have heard complaints.

Frankly, as you know, and you and I have discussed this experience by the House before under both parties, because of the lateness of the Senate's actions, we are not in a position where we had all of the bills passed. Furthermore, there was not an inclination on some of the bills to go to the conference. Thirdly, we have been facing, as you know, a veto threat from the President on all of the bills except the Veterans MILCON bill and perhaps Homeland Security. Defense was signed, as you know. Notwithstanding the fact that the MILCON bill is very substantially above the President's request, he said he would sign that one, but bills like the Labor-Health bill were vetoed, so we have to consider that one again.

Mr. OBEY has had a meeting with Mr. Nussle, as you know. It has been re-

ported in the paper. That meeting was to try to figure out whether they could come to agreement. That meeting was not dispositive over that issue. Others have had meetings, including myself. We are hopeful to get to a place where everyone will not get everything that they want, but hopefully we will have agreement. I can't guarantee that.

The answer to your question, as I told you at the outset, I don't have specific answers to. My presumption is, however, the staffs have been talking to one another.

Mr. BLUNT. That's what I thought, the possibility of Tuesday.

I would point out to my friend that the bill that the President did sign, the Defense bill, was very close to the amount of money, a reduction in the amount of money that was equal to the increase on the Military Construction and Veterans bill the President said he would sign, which is actually in the context of both what most of the Members on this side of the aisle had hoped for and what the President said he would insist on, which is the obvious ability of the majority, within the 6.5 percent increase that he proposed, to stay below that number. Actually, Military Construction and Defense, while they are not a perfectly balanced outcome, come close to the way that system can work and still be within the President's number and an example of two bills that he said he would be willing to sign, neither of which are the bills he proposed, but the combination of which certainly are within an amount of money that could be adjusted in the other bills.

On the military question, those two bills we are talking about, does the gentleman anticipate any opportunity to have funding, either full or partial, for Iraq and Afghanistan without withdrawal language in the bill we would send over to the Senate or at some later time next week?

Mr. HOYER. I anticipate at some point in time that will be the case.

Mr. BLUNT. I would hope that can be the case, and we'd hope for our troops in the field and to prevent any layoffs that might occur between now and the time we return in January.

Mr. HOYER. Would the gentleman yield on that issue?

Mr. BLUNT. I would.

Mr. HOYER. I appreciate the gentleman yielding.

As you know, I had a discussion with my good friend, and I know you know him well, the Deputy Secretary of Defense, Gordon England. Obviously he is required, the Department of Defense is required under contract agreements that if there is not funding at a certain point in time, for them to send notice, not because they necessarily anticipate that there will be a necessity to have RIFs, but because under the agreement, when they contemplate running out of money, which would be sometime in February, 60 days before that, they have to send out a notice.

My expectation is that the Secretary will be sending us a letter. But I think

the Secretary's expectation, and I think the letter may say this, his expectation is, pursuant to our conversations, that will not be necessary nor does anybody contemplate that being done. And I certainly want to say to any and all employees who are listening, that is not going to happen.

Mr. BLUNT. I am glad with that assurance that won't happen, and I am sure they will be, too. While we won't know on the 15th whether they can run out of money by the date you mentioned, the middle of February, it is very possible that we will know by the day we leave here, and a January letter then would be required before we got back that indicated that a furlough would happen.

Mr. HOYER. If the gentleman would yield again?

Mr. BLUNT. I would.

Mr. HOYER. I thank the gentleman.

I am very hopeful and we are working very hard, as I know Mr. OBEY is and others, and I know Senator REID is as well, trying to reach agreement with the President.

Let me say respectfully that the discretionary spending that we have provided for is less a percentage of the GDP in terms of the spending of our national income than any of the bills that were passed from 2002 to 2006. We believe the differences are relatively small between the executive and the legislative branches.

We are prepared, as you have undoubtedly read and, as a matter of fact, you and I have discussed, to make some accommodations with the President, as is appropriate, to try to negotiate those.

What we are not prepared to do is simply have the President say, "Look, this is what I have determined you can do." He can veto, we understand that, but we don't think that the proper place for the Congress of the United States under article I of the Constitution, which gives us the authority and puts in the Congress of the United States, the Senate and the House, the responsibility to make policy and appropriate funds for the priorities that we deem to be appropriate for our national security and general welfare, we don't think that it is appropriate to simply be given a number that we must meet. That is not what the Founding Fathers contemplated. As you well know, the budget is a relatively recent advent in terms of the President's authority over the budget.

Having said that, we want to work with the President. We think that the differences are very small. We think that they can be bridged hopefully relatively easily, which is why we hope by next week we can accomplish both of the issues you raise.

Mr. BLUNT. I thank the gentleman. I hope you are right. I don't know what the Founding Fathers contemplated for sure, the Founders when they wrote the Constitution. I do know they gave the House the ability to initiate spending bills and the President the ability to veto.

In the context of how much money we are really talking about, the President added a 6.5 percent increase, and then the House-passed bill added \$23 billion to that, which is more than the individual budgets of more than 35 of the States. So people, as they look at this discussion that this isn't much money, it is more than all of the money spent by 35 or 36 of the States in the country. You know, I think in that context, \$23 billion is a significant amount of money.

Mr. HOYER. And the \$196.4 billion that the President wants to spend in Baghdad and Kabul is probably more than the budgets of those States as well.

Mr. BLUNT. Well, that is absolutely true. And the money that we spend to defend the country every day is important and it is the primary responsibility of the Federal Government, and I agree with that.

Mr. HOYER. We agree.

Mr. BLUNT. On AMT, I am not sure the Senate has dealt with AMT yet, but my understanding is that they may very well send that back without the money to offset that tax relief in a tax increase. I am wondering under what circumstances we might or might not see the alternative minimum tax relief in the next 2 weeks.

Mr. HOYER. I thank the gentleman for that question. We believe very, very strongly, as you know, that the alternative minimum tax was never, ever meant to apply to some of the people it may well be applied to this tax year. We have passed legislation to prevent that. In that legislation, as the gentleman knows, was also tax cuts for millions of people on property taxes, on other taxes, tax relief for teachers who buy things for their classroom, in effect, business expenses for making sure that our kids are learning.

The Senate, as you know, tried to bring that bill, not that bill but the chairman of the Finance Committee today made a unanimous consent to place the alternative minimum tax relief bill on the floor of the United States Senate without paying for it and it was objected to, as you know, as you probably know, by a Republican Member of the Senate because there was a refusal, apparently not an allowed amendment on the flat tax. We think that is unfortunate.

In answer to your question, we hope the AMT, in fact, is passed by the Senate. We hope that it is paid for. We have committed ourselves to paying for things that we spend money on so our children don't have to pay for them.

But we are going to be working very hard next week, I want to assure the gentleman, to make sure that the AMT is, in fact, addressed so that the 23 million people who are at risk of a tax increase and were never intended to be, as both sides agree, do not have that reality come April 15.

Mr. BLUNT. I appreciate that. My view of that and most of our Members' view of that is that those 23 million

people are not paying that tax this year, and so the idea that you have to replace that money to keep them from paying it next year is the fallacy of the PAYGO argument generally, as are many of the other extenders that you mentioned, the supplies for teachers and other things that are tax benefits they currently have, but that is obviously a fundamentally different view of how we view noncollected taxes this year that would be collected unless somehow what I consider to be very good tax policies for teachers and others are extended.

On those tax extenders, the doctor payment issue is another issue that I am wondering if the gentleman has any information on, and I would yield on that as well. This is the doctor payment issue under Medicare and the fact that they would take an automatic cut.

Mr. HOYER. As you know, we passed a bill earlier this year, some months ago, which not only dealt with children's health insurance but it also dealt with reimbursement to doctors, medical providers who will be confronting on January 1 of this year a 10 percent decrease in reimbursement. Many of them will not continue to serve Medicare patients. We think that is a great problem.

Unfortunately, the Senate refused to go to conference on that bill. We did have meetings on our SCHIP bill. Our SCHIP bill, our children's health bill, was a part of the larger bill dealing with Medicare during rural health, dealing with ensuring that nobody was disadvantaged by any of the pay-fors in our bill, but the Senate would not go to conference on that. The meetings that resulted essentially resulted in taking the Senate bill on children's health insurance.

As you know, the Senate had indicated they were going to address the Medicare reimbursement issue which we had already addressed. Unfortunately, it is my understanding that yesterday they decided they either could not or were not going to do that. I talked to Mr. RANGEL just a few minutes ago about that issue. We are going to be talking about that a little later today as to how we might address that. We think, again, that is a critical need for us to address. But I can't tell the gentleman exactly how that is going to be addressed because I don't know what ability we have to work with the Senate on this particular issue, but it needs to be addressed.

Mr. BLUNT. It does. As the gentleman knows, a month from today, actually starting January 1, those new payment schedules would go into effect which would go back to a cut in what those providers are being paid for those same services almost 10 years ago. That is a significant problem, and I am glad that the gentleman appreciates it and I am sad that we have gotten right down to this last moment in the year and not gotten to it yet.

You mentioned SCHIP. I know my good friend has worked hard to try to

get the votes to override a veto and now perhaps to pass another bill since the President has the bill we had earlier passed. If that does not happen, would you anticipate an extension of SCHIP? My view is that the State programs and the Governors in those States should have some assurance that they can move forward as we continue to work for a better solution than I believe we have found so far. But assuming that has not happened in weeks and doesn't happen in the next 2, would you expect to see an extender, a bill, of the current program while we continue to look for changes in that legislation? Or would that program end on December 14 or 15 when this current CR ends?

□ 1600

Mr. HOYER. Of course my friend could help me solve that problem very easily. I just need 10 or 12 votes; and you are such an excellent whip, I'm sure you could get those votes for me and we could cover those 4 million children. But if you don't give me those 10 votes, or 15, that we need, we have no intention of leaving here without presenting for the floor, which we hope will pass the Senate as well, an extension of the existing law.

In addition to the extension of the existing law, I'm sure you've talked to Republican Governors and Democratic Governors. I've talked to Democratic Governors just yesterday. All of them are very concerned. Missouri, as you well know, has a shortfall. A number of other States have a shortfall, including my own, so there will be need to, if we're going to simply extend, to also fund the shortfall, or children will be off the program that are currently on the program.

In addition to that, as you well know, a very controversial regulation was issued by the administration capping or requiring a 90 percent coverage of those under 200 percent or you can't participate further in the program, can't expand the program. No State, as I understand it, meets that obligation, so that we're also working on that.

But the answer to your question is, we are certainly planning for, if we cannot get, we hope to be able to get, frankly, in the near future, in the next few days, hopefully, we've worked very, very hard in trying to meet some of the concerns that some of your Members have had.

As you know, you and I and your leader had an opportunity to meet. Mr. BOEHNER indicated he thought there was a significant number of Republicans that would like to vote for the bill. But we got, as you know, 45 Republicans who did vote for the bill.

We have had extraordinary meetings, and I think it's worth telling the body. Mr. DINGELL and myself, as well as Mr. BAUCUS and Mr. GRASSLEY and Mr. HATCH and Mr. ROCKEFELLER, and from time to time, Mr. BARTON and Mr. DEAL and others, Mr. Whip, literally spent about 50 hours over the last

month in meetings trying to come to a place where we could reach agreement. Obviously, we're not there in terms of sufficient numbers to think that we can, or are ready to, introduce a new bill. That would be our preference, to introduce a bill that, after these long discussions, that would enjoy hopefully 60, 70, 80 Members, which is the number your leader used as possible to vote for such legislation and move that through the Senate and send it to the President. That would be our hope.

Mr. BLUNT. I appreciate the gentleman's work on this. I do know that in terms of a bill that would continue this program, that a significant majority of our Members would vote for that; and the bill that would even expand the program, a number of our Members might vote for that. But it has to be the right bill, structured in the right way.

I know you've spent a lot of time on that. I hope you can negotiate even further from where you've been. But I also know that my staff and your staff hopefully are even working together on this to determine that exact right number that would continue the existing program to be sure that shortfalls are met, and that the existing program and the impact of that potential guideline on the existing program, and I think I can assure my friend that there will be enough votes in the House, including votes on our side, to easily extend the existing program and cover those shortfalls while we work for a better program.

The last question I have is the gentleman's certainty about Friday. I know a few weeks ago we had scheduled that these 2 weeks would be 3-day weeks and the Members would be able to schedule things in their districts on Mondays and Fridays. I think your sense is today that we might very well be here on Friday, and I would appreciate some clarification on that.

Mr. HOYER. I thank the gentleman for that question. As the gentleman knows, and I've been involved in this business for a long time, four decades about, and whether it was in the State Senate, which had a constitutional ending date, or in the House of Representatives, it's very difficult to predict the last days of a session.

Now, I will tell you that the Speaker and I are working around the clock, almost literally, to ensure that we can adjourn this first session of the Congress of the United States on the 14th. We had hoped the 13th, but we're letting Members know that the 14th, that's only 4 days from now. We've just gone through some pretty heavy lifting in terms of the appropriation bills, in terms of the AMT, in terms of SCHIP, in terms of Iraq and in terms of other matters that we need to address before we leave here. But we think we can do it, and it is our intention to do it.

But, obviously, there are things that are pending that we cannot leave without doing, so that if we cannot get that done in that time frame, we will have to see where we go from there.

But I want to make it very, very clear to everybody that the Speaker, Senator REID, and I have talked; and we are all very focused on the 14th being the day that we adjourn. The following week is the week before Christmas. We believe that individuals need to be home. I need to do shopping and decorating because all my family's coming to my house from some parts of the country, so I need to be home. And I'm sure every other Member shares that view.

So all I can tell my friend, and he knows this as well as I do, that the unpredictability of the next 4 legislative days is such that I can't make any guarantees, other than we are doing everything we can to get the business that we've just discussed done. We may have some very late nights on Tuesday, Wednesday, and Thursday; but we are hopeful that we will get this done and not have to ask Members to come back the week before Christmas.

Mr. BLUNT. Well, I'm hopeful that my friend has mentioned that date again. Even after the experience of this week, we're still looking at that date. It may be the triumph of hope over experience, but we may all be motivated enough to get that done.

Mr. HOYER. Well, we've had some success this week. As you know, we think we've passed a historic energy bill. Not only that, as my friend knows, because he's from the State of our distinguished chairman of the Armed Services Committee, we were able to go to conference today, which has been somewhat contentious for a few days. We expect that conference to be on the floor early next week. So we are moving ahead.

But as we've discussed, there are some issues of difficulty that we haven't resolved that we need to resolve, and so we'll have to see whether or not we will be successful.

Mr. BLUNT. Hopefully next Friday we won't even have to have a discussion about the week's work coming up because we will be done. And I appreciate the information of the gentleman.

I yield back.

PERSONAL EXPLANATION

Ms. JACKSON-LEE of Texas. Mr. Speaker, I have been unavoidably detained and away on official business on a number of rollcalls which I would like to place in the RECORD at this time.

In particular, I'd like to take note of December 5, 2007. Due to the tragic death of Reserve Deputy Constable Odum in my district, I was attending his funeral. On rollcall vote No. 1127, if I was present, I would have voted "no."

Rollcall vote No. 1128, I would have voted "no."

Rollcall vote No. 1129, I would have voted "aye."

Rollcall vote No. 1130, I would have voted "aye."

Rollcall vote No. 1131, I would have voted "aye."

Rollcall vote No. 1132, I would have voted "aye."

And Rollcall No. 1133, I would have voted "aye." That is on December 5, 2007.

For September 20, 2007, on rollcall vote 890, I would have voted "aye"; No. 889, I would have voted "no."

On rollcall vote No. 888, I would have voted "aye."

Rollcall vote No. 887, I would have voted "aye."

And on rollcall No. 886, a motion to adjourn. I would have voted "no."

On July 16, 2007, rollcall vote No. 632, I would have voted "aye."

Rollcall vote No. 631, I would have voted "aye."

Rollcall vote No. 630, I would have voted "aye."

ADJOURNMENT TO MONDAY, DECEMBER 10, 2007

Ms. LEE. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet to 3 p.m. on Monday next, and further, when the House adjourns on that day, it adjourn to meet at 10:30 a.m. on Tuesday, December 11, for morning-hour debate.

The SPEAKER pro tempore (Mr. CLAY). Is there objection to the request of the gentlewoman from California?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Ms. LEE. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

COMMUNICATION FROM HON. JOHN A. BOEHNER, REPUBLICAN LEADER

The SPEAKER pro tempore laid before the House the following communication from the Honorable JOHN A. BOEHNER, Republican Leader:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,

November 29, 2007.

The Hon. NANCY PELOSI,
Speaker, U.S. Capitol,
Washington, DC.

DEAR SPEAKER PELOSI: Pursuant to section 1238(6)(3) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001. (22 U.S.C. 7002) amended by Division P of the Consolidated Appropriations Resolution, 2003 (22 U.S.C. 6901). I am pleased to appoint the following individuals to the United States-China Economic and Security Review Commission.

Mr. Peter T.R. Brookes of Virginia (re-appointment).

Mr. Daniel M. Slane of Ohio.

These individuals have expressed interest in serving in this capacity and I am pleased to fulfill their requests.

Sincerely,

JOHN A. BOEHNER,
Republican Leader.

MAKING AMERICA ENERGY
INDEPENDENT

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, all of us are interested in moving this country forward on a defined energy policy. And we had, just an hour ago, an open debate on how we could move America forward. I'm delighted that part of the effort in the legislation just passed by this House emphasized new CAFE standards so that there can be greater mileage on vehicles that Americans may purchase, and, yes, a lowering of the cost of gasoline, but also a lowering of the utilization of gas by getting greater mileage; compromise between the energy industry and, of course, those who make automobiles in Detroit.

In addition are the emphasis on alternative fuels, the research to help us expand greening of America and the emphasis on creating new jobs and looking at alternative fuels. But I also believe that we must focus on the existence of fossil fuels, oil and gas, and be able to develop oil and gas domestically, particularly, in the gulf region. And so I hope that we will expand that debate as we go forward in making America independent as relates to energy.

AMT DISASTER

(Mr. PRICE of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE of Georgia. Mr. Speaker, have you seen the news? Democrat inaction on the alternative minimum tax is leading to a delay of tax refunds for millions of hardworking Americans. The carelessness of this new majority is poised again to strike the American people, this time in their wallet.

This AMT problem's been known for months. Yet we still have no action in this Congress.

The average tax refund last year was more than \$2,000, \$2,000, Mr. Speaker. That's a mortgage payment. That's college tuition. That's a holiday credit card bill.

While the new majority has made clear that, in good faith, they support policies to raise taxes, this expensive predicament with the AMT is simply the result of congressional negligence. Now, the American people expect more than this from Congress. They want less partisanship and more leadership.

Mr. Speaker, let's act now to ensure the American people are not forced to pick up the tab for the carelessness of this majority. Let's put politics aside and put hardworking taxpayers first.

THE ENERGY BILL

(Mr. MICA asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. MICA. Mr. Speaker, my colleagues, not only will the Americans receive a great surprise with a tax increase with the so-called energy bill that was just passed by the House of Representatives, and higher fuel costs; I want to announce, as the Republican leader on the Transportation Committee, you've also depleted the highway trust fund by some \$2.1 billion in this measure.

The Congressional Budget Office is already predicting a \$5 billion deficit in the highway trust fund by 2009.

Now, my friends in Congress, we can't keep this game up. Unfortunately, in the full year 2007 appropriations resolution that passed the House, we knocked another \$3.47 billion and rescinded that from the highway trust fund, and another \$3 billion recession from the highway program in the 2008 bill that passed the House recently.

Unfortunately, the game being played with our Nation's highway trust fund has consequences, and we will pay.

□ 1615

THE "ANTI-ENERGY" BILL

(Mr. GOHMERT asked and was given permission to address the House for 1 minute.)

Mr. GOHMERT. Mr. Speaker, back on January 22, I got up here at this very spot because we had passed a bill that week that was going to force the price of gasoline to skyrocket upward. A year later it's up a dollar. Today we passed another anti-energy bill.

You know, there are a number of States in this country who just say we want to use all the energy but we don't want to produce any. So there are States like Texas, Louisiana, a number of States, we're cranking out all the energy we can to help the Nation. This bill we passed today not only says we have got lots of energy we're not going to let anybody produce, but we are going to penalize the States that have been more than team players and we are going to force the price of gasoline higher and higher.

So I hope my colleagues across the aisle, as gas goes up towards \$5, will also come to the floor and say, "That's right, it's \$5 a gallon, and we are proud of it. We did that for you; so you can thank us."

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. CLAY). Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

CELEBRATING PASTOR ALFRED
VAUGHN'S 50 YEARS IN THE MIN-
ISTRY

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Maryland (Mr. CUMMINGS) is recognized for 5 minutes.

Mr. CUMMINGS. Mr. Speaker, I rise today with great admiration and respect to recognize a dear friend and one of the Nation's most distinguished citizens, Dr. Alfred C.D. Vaughn, for his 50 years of service to God as a preacher, teacher, leader, and friend.

For the last 21 years, Dr. Vaughn has been the cherished pastor of the Sharon Baptist Church, located in my hometown of Baltimore, Maryland. As grace would have it, this is the same church that his grandmother joined in 1894 and of which his mother became a member in 1911.

Dr. Vaughn, known as the dean of ministers in Baltimore, is one of thirteen children of Mildred and Robert Vaughn. He received Christ at the tender age of 11. Just 8 years later, he was licensed to preach and began a glorious journey of teaching and preaching God's Holy Word.

He first served as pastor of Promise Land Baptist Church in Moneta, Virginia. For 18 years he then led the congregation of Grace Memorial Baptist Church in Baltimore before accepting the calling in 1986 to return home as the visionary pastor of the Sharon Baptist Church.

Throughout his career as a minister, the pursuit of a quality education has always been his priority. Dr. Vaughn earned an AB-BD degree from Virginia Seminary and College, a master of divinity degree and a doctor of ministry degree from Southern University, and he has been awarded four honorary degrees.

It has been said that "you show people who you are by what you do." Throughout his entire life, Dr. Vaughn has demonstrated to the world, with sincere humility and steadfast determination, his commitment to helping others to be the very best that they can be.

Recognizing the need for accessible child care in his community, Dr. Vaughn converted a building near Sharon Baptist Church into a family support center that houses a child care facility and operates other community service programs. He also spearheaded efforts to raise thousands of dollars to send students to college, adopt a local elementary school, and provide after-school programs, local food pantry programs and foreign missions.

However, Dr. Vaughn's accomplishments and achievements reach far beyond the walls of his church. He served as commissioner for the Housing Authority of Baltimore City for 10 years. He was appointed as trustee and as treasurer of Provident Hospital and as trustee of the Community College of Baltimore. He served on the board of directors of the Afro-American Newspapers, and he currently serves as chairman of the board of trustees of Eastern Theological Seminary.

As a testament to his leadership, Dr. Vaughn was recently elected, for an unprecedented eighth time, to serve as

president of the Baptist Ministers Conference of Baltimore and Vicinity, an organization which represents some 250,000 congregants.

Outside of serving the Lord and leading souls to His kingdom, Pastor Vaughn's greatest joy comes from his family. He has been blessed with 44 years of blissful marriage to his wife, Lillian. They have three children, Corrogan Vaughn, Lynnette Vaughn, and Cassandra Vaughn-Fox; a son-in-law, Larry Fox, Jr.; and three wonderful grandchildren.

Whenever I see Pastor Vaughn in the community, his grandchildren are not far behind. No matter what his daily commitments may be, he picks them up from school every day and spends quality time with them, sharing his wisdom and his love.

Baltimore is truly blessed to be able to call a stalwart such as Dr. Alfred C.D. Vaughn one of our very own. As a son of two preachers, I can say with certainty that it is fitting to give God praise for this dynamic leader. For 50 years he has preached the Gospel with truth and honor, not to glorify himself but to save souls and make others' lives better. He is the kind of man who, just by his presence, makes us want to stand taller and reach for the very best that is within us. As my father once said, he is a man whose presence is presence enough.

I am honored that God allowed our lives to eclipse. And today I thank Pastor Vaughn on behalf of Baltimore and our entire Nation for his dedication, commitment to God and his church and his community.

THE FIRST AMENDMENT— RELIGION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Mr. Speaker, the first amendment is first in our Bill of Rights because the provisions in it are the most important. Without those provisions the rest of the Bill of Rights are meaningless.

The first amendment states in part that "Congress," that's us, "shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."

This amendment, like many others, was a reaction to colonial life under King George III. The Church of England was the official Church of England and some of the colonies. The Framers hoped to protect the exercise of any religion by prohibiting the establishment of a national religion. A national religion like the Church of England was supported by taxation. Attendance at services was even mandatory. No marriage or baptism outside of the Church was sanctioned. There were civil and even criminal penalties for members of religious minorities.

So the U.S. Constitution's framework made it possible for all religious groups

to gain legal protection. The freedom to practice one's own religion is the reason why the colonists settled and founded this great country. That is the primary reason why people left England, to seek religious freedom.

The Founding Fathers did not believe that government and religion had to be entirely separate, however. The first President, George Washington, said in his first inaugural address, declared as his "first official act" his "fervent supplications to that Almighty Being who rules over the universe" and that this Almighty Being "might bless this new government."

President Washington also echoed this religious attitude in his farewell address in 1796 when he said, "Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports."

When our Constitution was drafted, the elderly statesman Benjamin Franklin said that if the Good Lord is concerned about a sparrow that falls from the trees, He certainly would be concerned about a new Nation at its birth, and he encouraged Congress to go in prayer. And Congress did so that morning and prayed, and ever since then our Congress starts each morning with a prayer.

The first Congress recognized the importance of religion in government when it enacted the Northwest Ordinance in 1787, and it begins: "Religion, morality, and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged."

The first amendment includes the free exercise clause. Like the establishment clause, the framers included the free exercise clause to protect religious minorities from persecution. The establishment clause prohibits government creation of, support, or endorsement of a national religion. And the free exercise clause protects individual religious beliefs and practices from government interference.

The significance of the free exercise of religion clause is that it affirms the value of religion in American culture and even promotes public display of religion.

Many Americans believe that the first amendment created a separation between church and state, but those words do not exist anywhere in the Constitution, the Bill of Rights, nor the Declaration of Independence.

These words came from a letter written by Thomas Jefferson in 1801 to the Danbury Baptist Association, who was concerned about the Congregationalist Church becoming the national religion, and that is why Jefferson made the comment to the Danbury Baptist Association that there is a separation between church and state. These words do not promote a prohibition by government against religion in the public sector.

Billy Graham once said that "The Framers of our Constitution meant we

were to have freedom of religion, not freedom from religion." But antireligious radicals are on the offensive, trying to make the United States free from religion. These radicals want the United States to be a secular government like France. But that's not what our Founding Fathers intended when they created our country.

When Thomas Jefferson wrote the Declaration of Independence, he proclaimed that God gives us all of our rights. He wrote that "all men are created equal, that they are endowed by their Creator with certain unalienable rights."

Jefferson's reference to God is echoed throughout this Nation. Our currency mentions God. Our government buildings have religious scenes and words etched into them. We pledge allegiance to the Nation under God. We even have the great lawgiver Moses on the far wall looking directly down on the Speaker's chair.

So, Mr. Speaker, the mention of God in our culture is not an establishment of religion. It's a fact that this Nation was founded on religious beliefs and religious values. That is an historical fact.

And that's just the way it is.

□ 1630

The SPEAKER pro tempore (Mr. CLAY). Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

(Ms. WOOLSEY addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

PAULETTE MARIE McFARLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WATSON) is recognized for 5 minutes.

Ms. WATSON. Mr. Speaker, we have lost Paulette Marie McFarland, 58, who was a trailblazer, an innovator in early childhood development, dying of pancreatic cancer on Tuesday, October 23, 2007, at her home in Chatsworth, California.

She was born Paulette Marie Mahan in Bluefield, West Virginia, on August 12, 1949. She received her bachelor's in early childhood education from Hampton University in Newport News, Virginia, and her master's in education from Mount St. Mary's College in Los Angeles, California.

Paulette taught in the Los Angeles Unified School System for 30 years and spent the majority of her tenure at Van Nuys Elementary. She received many accolades during her career, which included Teacher of the Year for her school region. Paulette served as a Master Teacher for student teachers for Cal State University, Northridge and University of California, Los Angeles. She participated in the Bilingual Teacher Classroom Program and reviewed the latest research in education

and applied that knowledge to her teaching strategies.

She always admired educators and their ability to create challenging and novel ways to encourage students in learning. As a bilingual teacher, she strove to make education an exciting, joyful, and motivational tool. She was one who is able to motivate and challenge students in a positive and stimulating manner where students are encouraged to reach their potential and value their own self-worth. She was that person. Most importantly, she was an outstanding teacher, and she was one who loved and enjoyed teaching.

Paulette believed some of the major challenges today are low achievers, child and drug abuse, gangs, and development learning disabilities. And she promoted the importance of the individual increase in parental involvement providing parent education, smaller classes, and tutoring programs as possible solutions.

Paulette was not only committed to her students and her family, but the community at large. For many years, she served on the planning committee for the NAACP Image Awards. She was an active fund-raiser for the Chrysalis Homeless Center, the United Negro College Fund, and other charitable organizations. She participated in the Literacy Campaign for the American Broadcasting Company, and volunteered in food and clothing drives.

For the last 2 years, Paulette served as scholarship chairperson for the San Diego African American Alumni Association, and with her husband, Roland, served as president for 4 years. She secured funding for more than 100 students, making it possible for them to pursue a college education.

On December 4, 1982, Paulette married Roland McFarland, vice president for broadcast standards and practices at Fox Broadcasting Company, at Hollywood Presbyterian Church in Los Angeles, California.

Her memory lives on through her beloved husband, his children, Curtis McFarland and Roslyn Daniels; mother, Odessa Mahan; father, David Mahan; sisters Beverly Cummings and Margo Mahan; brother, Garner Mahan, and many cherished grandchildren, family, and a host of friends. May she, indeed, rest in peace.

BORDER PATROL AGENTS RAMOS AND COMPEAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, today is 324 days of incarceration for two former U.S. Border Patrol agents. Agents Ramos and Compean were convicted in March of 2006 for shooting a Mexican drug smuggler who brought 743 pounds of marijuana across our border into Texas. These two decorated Border Patrol agents, who were doing their duty to

protect the American people from an illegal alien drug smuggler, are serving 11- and 12-year prison sentences.

This week, the Fifth U.S. Circuit Court of Appeals in New Orleans began hearing oral arguments for the agents' appeal. During the hearing, one of the three judges on the case, Judge E. Grady Jolly, said, "It does seem to me that the government overreacted here. For some reason, this one got out of hand."

The judges in this appeal will need to examine why the judge allowed the smuggler to plead the fifth amendment despite his immunity agreement, and why the jury was not allowed to hear crucial evidence that the smuggler was a repeat offender. The judges will also need to look at why the prosecutor charged the agents under a statute that was intended for violent criminals carrying guns, not for law enforcement officers acting in the line of duty.

Nothing can erase the suffering these agents have undergone and the months they have spent in prison in solitary confinement away from their families. However, a judgment in favor of Ramos and Compean in this appeal would be an important victory and the first act of justice these agents have seen since their arrest.

Mr. Speaker, the injustice of this case should not go unexamined. Last night, I hand-delivered a letter to JOHN CONYERS, chairman of the House Judiciary Committee, to request a hearing on this case. Chairman CONYERS responded that he would carefully review my letter and my request.

In the eyes of the American people, the prosecution of these border agents was not justified. The comments by the appeals judge are justification enough for the House Judiciary Committee to review this case to determine exactly why this case got out of hand.

An unbiased review of this case by Attorney General Mukasey, a hearing by the House Judiciary Committee, and a Presidential pardon for these agents are all steps that can and should be taken to rectify this gross miscarriage of justice.

Mr. Speaker, I want to say to the family of these two border agents, Compean and Ramos, that we in Congress will not give up the fight for justice until their loved ones are at home.

ENERGY INDEPENDENCE AND SECURITY ACT OF 2007

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. LEE) is recognized for 5 minutes.

Ms. LEE. As a strong supporter of H.R. 6, the Energy Independence and Security Act of 2007, I wanted to take a few moments to speak about this important bill, which we passed earlier today in the House, and how delighted I am and my constituents are for its passage. It is a historic step forward in our goal toward reaching energy independence.

H.R. 6 raised CAFE standards to 35 miles per gallon by 2020, cutting oil consumption by 1.1 million gallons per day, also, eliminating greenhouse gases equivalent to 28 million cars from our roads. That's 28 million cars.

Among many important additional initiatives, it includes new energy efficiency standards to reduce demand. It extends renewable energy tax credits for solar and other renewable sources. It includes a renewable fuels standard that contains safeguards to reduce carbon emissions and protect our environment. It also contains a renewable electricity standard, requiring utilities to get 15 percent of their power from renewable sources by 2020. It also assists and empowers small businesses to cut costs and scale up innovative energy solutions.

It will create thousands of new good-paying green jobs and build on the work that has begun in places like the Ella Baker Center in my district in Oakland, California, which is helping to lead the green jobs revolution.

Mr. Speaker, this bill takes the right steps forward to reduce our dependence on foreign oil, to save our constituents money, and to fight global warming. Most importantly, it echoes the innovative steps that have already been taken by individual cities, States and districts like my district in the East Bay of California, Alameda County, to be specific.

In many ways, the California Bay Area, and my district in particular, are in the forefront of the innovation and research on alternative energy climate change and the environment. Ongoing research into alternative and renewable energy at the University of California at Berkley, one of the premier public universities in the country, of course I am an alma mater of the University of California at Berkley and very proud of that, we hold the promise of a cleaner and brighter future for our children, our country and the world.

Businesses in my district have also taken the lead in greening their activities to reduce waste, improve energy efficiency, and save water, minimizing the impact on our environment.

Innovative programs like the Ella Baker Center, which I already mentioned, and funded in part through the City of Oakland, are also training youth in my district about the importance of environmental stewardship and providing them with new job opportunities and new career paths. Community-based organizations in my district have also taken the lead in advocating for environmental justice and equity for all of our constituents. Together, my community is at the forefront of a robust environmental movement that is quite literally changing the world for the better.

The passage of the Energy Independence and Security Act will help these grass-roots efforts expand and grow through Federal initiatives designed to put the United States on a path to energy sustainability.

Again, I am very pleased that the House passed H.R. 6, and I look forward to its final passage by the Senate.

In my district, we have the City of Albany, Berkley, Piedmont, Oakland, California, Ashland, Cherryland, Fairview, Castro Valley, unbelievable innovations which this bill will certainly support and enhance. So I urge the President not to reject this proposal and hope that he signs the bill when it reaches his desk.

OHIO'S OUTSTANDING HIGH SCHOOLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. CHABOT) is recognized for 5 minutes.

Mr. CHABOT. Mr. Speaker, I am proud to represent the congressional district that has so many outstanding high schools. Not only do these schools excel in academics, but they are home to some of the most gifted scholar-athletes in the Nation.

Just this fall, Cincinnati witnessed two of our young women's high school volleyball teams, Mother of Mercy and Mount Notre Dame, meet for the second State championship in the last 2 years.

After spending much of the season at the top of the rankings, Mercy senior leadership kept them strong at the end. Seniors Missy Harpenau, Stephanie Vorherr, Michelle James, and Kelly O'Connor lead the charge during the final games. Though Mount Notre Dame's standout players, Rachel Adams and Abbie Rees, rallied teammates for wins in the first and third sets, the Cougars couldn't hold on for a repeat of their 2006 success in winning the State championship.

Mercy avenged last year's championship loss with a 15-11 victory in the last minutes to finish a great season for Mercy and Coach Denise Harvey, as well as Mercy's fourth volleyball State title in program history.

In the interest of full disclosure, Mother of Mercy is near and dear to my heart because my wife, Donna, and my daughter, Erica, and my sister, Carol, are all Mother of Mercy graduates.

A third Cincinnati area high school, the St. Ursula Academy Bulldogs, have become a mainstay in the State soccer tournament, advancing to their third finals in 7 years. Down 1-0 at the half, St. Ursula rallied with goals by Tori Huster and Alexandra Berry to beat Strongsville 2-1. St. Ursula finished with a remarkable 20-1-2 record and a third State championship, the other two coming back in 1991 and 1993.

And, finally, I have the honor of congratulating St. Xavier High School for its second Ohio High School Division I State Football Championship in the last 3 years. On its way to a perfect 15-0 record, St. Xavier had probably the toughest schedule in the entire Nation, beating State champions from Ohio, Indiana, Kentucky, and national power-

house DeMatha from locally here in Maryland. St. X also had the distinction of being the number one ranked team in the State the entire year and number one in the Nation in some polls.

St. Xavier's victory gave the district that I have the honor to represent its fifth division I State football title in the last 6 years, five out of the last 6 years, including Elder High School, who won it twice. I have two nephews, Joe Del Prince, who graduated last year, scored a number of touchdowns on the team last year, and his brother, my nephew, Mike Del Prince, who scored a touchdown against St. X. Unfortunately, when he scored that touchdown, he was hit pretty hard; and I ended up seeing him in the hospital a couple days later. But he's doing well, and he'll be great as a senior next year. And my brother, Ron, also is an Elder grad, played first singles tennis there some years ago, was on student council, and that kind of gave me my interest in politics, seeing my brother Ron succeed in that respect.

But this also, this victory by St. X was their 38th State title in all sports, the most of any high school in the State. St. X was led by a senior class that compiled a record of 40 wins and two losses in their 4 years at the school, including Fred Craig, the Ohio defensive player of the Year, and Danny Milligan, the Ohio co-offensive player of the year, and running back Darius Ashley, who set a division I record by rushing for 271 yards and two touchdowns in the championship game. Just incredible.

Kudos to head coach Steve Specht and the entire coaching staff for their tremendous accomplishments. Congratulations, St. X. And, again, in the interest of full disclosure, our son, Randy, is a senior at St. X and one of their great band field commanders under the leadership of Anthony Palm.

All of these student athletes have learned invaluable lessons about commitment, teamwork and perseverance that will serve each of them well as they prepare for the future. Both on and off the field they have helped further the tradition of excellence at their schools for which all of Cincinnati can be proud. It is an honor for me to congratulate these young men and women on the floor of the United States House of Representatives.

□ 1645

OMAHA MALL SHOOTING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mrs. MCCARTHY) is recognized for 5 minutes.

Mrs. MCCARTHY of New York. Mr. Speaker, today I rise with a very heavy heart. Yesterday, our Nation witnessed yet another act of gun violence, this time at a mall in Omaha, Nebraska. I know my colleagues from Nebraska are going to be talking about this later.

My hearts go out to them for the people that they represented. Eight people were murdered in the rampage. Five others were wounded, two critical. These victims did nothing wrong to deserve their fate. They were mothers, fathers, sons and daughters. They were just trying to do their shopping, and many of them were working at the mall. But the actions of a crazed gunman changed that in a matter of seconds.

Yesterday's shootings was a terrible tragedy. But unfortunately events like this happen almost every day. Every year we lose over 30,000 people to gun violence. Take a second to think about that. Every year, 30,000 victims. I have been here for 11 years. That is 330,000 people that have been killed because of gun violence while I was in Congress. When you want to put that in perspective, that is the City of Pittsburgh, Pennsylvania. Three hundred and thirty thousand victims.

When you think about it, what these families are going to be going through in the months ahead with the holidays coming, the pain they are going to be facing, the community, the pain they are going to be facing, I know a lot about that. Tomorrow is December 7. December 7. It was 14 years ago that we had the Long Island Railroad massacre. On that particular day, six people died, one of them my husband. On that day, 19 people were injured, my son critically. Fourteen years later, he is still suffering from that.

We, as a Nation, have to start looking how are we going to have this dialogue? I have never tried to do anything to take away the right of someone legally to be able to own a gun, and yet because of the way the laws are in this country and the way we do things backhandedly in this country, it is so easy to get guns. If you want to talk about what the health care costs are, it is over \$100 billion a year the health care costs for those that survive these kind of incidents.

Think what we could do with that money. Maybe we could educate our young people and reach out to them a little bit better so they don't go into the world of violence. Maybe they won't join gangs. Maybe a good mental health program for this Nation so those like the gunman wouldn't have fallen through the cracks and gotten the help that he needed.

We, as a Nation, on a daily basis, face inconveniences. Tonight when I fly to go home, I will be getting on a plane. I am going to be going through security, all in the name of security and safety. When you go to get your driver's license, long lines. We do this for security and safety. It is an inconvenience. Getting a passport today is an inconvenience. Can't we serve a little bit of inconvenience and come together to make sure that those that are getting guns have the right to have a gun by passing background checks? Can't we make sure with a little inconvenience that we don't make it so easy for these

guns to float throughout our cities and come into some of our cities illegally? We cannot save everybody. I understand that. But think about if we could cut it down to maybe just 15,000 people a year dying. As far as I am concerned, one person dying is one too many.

I promised my son as he was recovering many years ago that I would do whatever I could to prevent another family from not going through what our families did. And here it is 11 years later. Here we had a terrible tragedy yesterday in Nebraska. Not long ago, we had a terrible tragedy at Virginia Tech. Before that, we had another terrible tragedy at another mall in the Midwest. We can think about all these terrible tragedies that are happening more and more not just in our inner cities now but in places in our country that we never thought we would ever see gun violence.

This Nation needs to decide what it is going to do to stop this rampage of unnecessary killings of innocent people. Three hundred thirty thousand people killed in the 11 years I have been here, I hope we can do better. I pray for the families. I pray for the communities.

IN HONOR OF THE HONORABLE HENRY HYDE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. MICA) is recognized for 5 minutes.

Mr. MICA. Mr. Speaker and my colleagues, one of the greatest voices to ever be heard in these Chambers has been lost to the ages. I rise today to pay tribute to my good friend, a great American and my former colleague, Henry Hyde. Tomorrow in Illinois, one of the State's most capable and eloquent Members of Congress will be laid to rest.

It was my distinct honor to meet Henry Hyde, to serve with Henry Hyde and to call Henry Hyde my friend. In this House Chamber over the past 150 years, there have been many who have spoken. I submit that if you had the privilege to hear Henry Hyde speak here, you were indeed most fortunate.

In this House of Representatives over the past several centuries, there have been many distinguished individuals. I submit that not only was Henry Hyde one of the most distinguished, but also one of the most appreciated individuals, one of the finest gentlemen, one of the greatest Americans to serve in this, the people's House.

Whether he was defending the unborn or relating his position to us on any matter before this House, Henry Hyde always spoke with dignity, conviction, principle and eloquence. When Henry Hyde addressed this House, its Members and all Americans listened. While everyone who knew Henry Hyde can tell us a very special story and personal experience about knowing Henry Hyde, there are several memories that I will always fondly cherish and remember.

I recall when Henry came to my district, came to my home in Florida. I will never forget when Henry Hyde stopped me, actually in this aisleway, here on the floor of the House, and in that aisleway he complimented me on my remarks that day. Imagine, Henry Hyde, the master orator, praising such common words. How honored I was by his compliment to so junior a Member on that day. There are many other stories I can tell about Henry Hyde and I know we can all share the other stories, but let me tell you in closing to relate one of my last memories of this great man.

I had the privilege of traveling with Henry to the United States European interparliamentary meetings overseas, and on my last trip with Henry to one of these meetings, one of the last times that Henry Hyde as I recall him serving as chairman of the International Relations Committee, we were flying together with others across the Atlantic to make our next day's meeting. I woke up in the middle of the night and everyone in the cabin on the plane was sleeping, with one exception, and that was Henry Hyde. Some of you may recall Henry had been quite ill towards the end of his service. He required assistance to walk, and I knew how uncomfortable and how difficult it was for him to travel. But here was Henry Hyde so committed to his responsibility, while in such great personal pain and discomfort that he could not rest, he had to sit up in his chair all night, but he was fulfilling his duties and his responsibilities. I knew that night and I knew when I first met him, I knew also when I first heard him, and I have known, and I have been honored to call him my friend, I have had the opportunity to know a great man, a great American, the gentleman from Illinois (Mr. Hyde).

To Henry's wife and family, and on behalf of all the people of the Seventh Congressional District of Florida, and personally, I extend my deepest sympathies.

CLIMATE CHANGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HOLT) is recognized for 5 minutes.

Mr. HOLT. Mr. Speaker, for the past 20 years, my colleagues in the scientific community have been issuing warnings that the release of greenhouse gases is altering the Earth's climate in ways that are expensive and deadly. It is well established in the scientific community that the climate change of recent decades can be attributed to the way we produce and use energy. In fact, the greatest insult to our planet is the way we produce and use energy.

As an energy scientist, I know how much can be done technically to reduce our dependence on fossil fuels and to slow the rate of global climate change. In fact, many countries around the

world are taking those steps. Today, here in the House of Representatives, we have passed historic legislation which will finally take the long overdue first steps toward addressing global climate change and addressing our long-term energy needs. I am proud to have worked with my colleagues on this comprehensive bill which will move us toward reducing our dependence on fossil fuels and will spur the economic growth and will create new jobs and stave off further damage to our environment and our climate. This is one of the principle subjects that I have spoken about and worked on since I first ran for Congress, and it is one of the reasons, I believe, that my constituents sent me to Congress.

There are some excellent provisions in this bill that will drastically reduce our greenhouse gas emissions. This includes increasing the average automobile fuel economy to 35 miles per gallon by 2020. It will require the nationwide implementation of renewable portfolio standards requiring 15 percent of the Nation's energy in power generation to come from renewable sources. And these two provisions alone will save consumers as much as \$40 billion in a dozen years and will decrease our annual greenhouse gas emissions by up to 324 million tons.

H.R. 6 will reverse many of the environmental detrimental policies that this administration and this country have implemented over the past 6 years. It will repeal the \$23 billion in tax subsidies and royalty relief provisions for fabulously wealthy oil companies.

It will use this money to invest in renewable energy research and extend existing tax credits for the production of renewable energy. My home State of New Jersey has led the way on these issues. New Jersey has already implemented a renewable portfolio standard that requires 20 percent of the State's energy to come from renewable sources by 2020. New Jersey is the second leading State in solar energy production, with over 2,400 solar installations in place, and I am told it is the fastest growing market for solar energy in the United States.

The legislation passed here today will require our appliances and buildings to be more energy efficient, it will provide job training to help workers become part of the green economy, it will require the United States to re-enter into the debate on global climate change, it will provide historic investment in renewable energy and biofuels research.

Of course, this bill is not enough. If it becomes law, it will be a start, a very good start. Having passed this bill, we will be able to consider other alternative energy and climate change legislation, and I am confident that we will.

□ 1700

ENERGY POLICY FOR A NEW
DIRECTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GEORGE MILLER) is recognized for 5 minutes.

Mr. GEORGE MILLER of California. Mr. Speaker, Members of the House, for too long this Nation has been held hostage and has been dependent upon Middle East oil. For too long this Nation has been held hostage and been dependent on the automakers of this country in terms of determining whether kind of transportation we will have in the United States.

Today, just an hour or an hour and a half ago, this House voted overwhelmingly and on a bipartisan basis to break that dependency and to become free again, to become free of Middle East oil, to become free of the automakers who have prevented us from having more efficient automobiles, getting better miles per gallon, and greener, to save our environment.

By that vote, this House spoke for the independence of this country. By that vote, this House spoke for the American people who have been demanding for us now for many years to have automobiles that were more efficient, less polluting, that serve their needs. For many years, they have told us that they have been worried about our national security, about our foreign policy, when we are driven to decisions based upon the dependency of Middle East oil, based upon the dependency of foreign oil, based on the dependency of not having our own energy house in order so we can make those decisions.

When they have seen time and again American lives and treasure lost to secure sources of oil, they have asked for a new direction. They have asked for a new day in American energy policy. Just a couple of hours ago, the House of Representatives delivered to the American people that new energy policy and that new direction. It's a policy that is based in the future, it's a policy that is based in American ingenuity, talent and skills. It's a policy that is based in innovation and discovery, the things that America has been great at since this country was founded, that real talent and the strengths of this Nation being pulled together for the new technologies of wind energy, of biotech energy, of ethanol, and the other alternative fuels that are available, to the alternative sources of electricity, whether it's wave energy, solar energy. That is what America does best. We have wasted 8 years while we have refused to embrace the future.

This bill over the next few years will generate 3 million jobs in every geographic sector of this Nation as utilities seek out alternative energy sources for the generation of electricity. That means the people will be going to work in solar facilities, people will be going to work in wind facilities,

people will be going to work in biofuel facilities, in ethanol facilities, in all kind of new technologies, new production, new manufacturing, the next generation of manufacturing, the next generation of innovation.

When we were working on our Innovation Agenda, which this Congress passed a couple of months ago and was sent to the President, passed overwhelmingly on a bipartisan vote, signed by the President of the United States, when we were working on that Innovation Agenda with the leaders in biotech, in high-tech, in the venture capital community, people who are betting real money on the future of this country, they told us to give them a new energy policy that would drive a next generation of technology in the computer industry, in the telecommunications industry, in the biotech industry; that would drive the next generation of investment in energy and in the future of this country; that would drive the next generation of discovery and innovation.

Today, the House of Representatives delivered that energy policy to the American companies so they can go to work in discovery and innovation and creating jobs here in America in the new industries surrounding the new energy future and the new energy policy.

I am very, very proud this day to be a Member of the House of Representatives, casting this vote for a new energy future for America.

TRAGEDY AT THE WESTROADS
MALL IN OMAHA, NEBRASKA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. TERRY) is recognized for 5 minutes.

(Mr. TERRY asked and was given permission to revise and extend his remarks.)

Mr. TERRY. Mr. Speaker, I rise today with great sadness, for yesterday, at about 2 p.m., a tragedy occurred in my hometown, where eight people were killed, gunned down, some of them employees at Von Maur, others just shopping for the Christmas holidays. To those families, those eight families who lost a loved one so senselessly, my thoughts and my prayers go out to you. I can't imagine what you're going through today.

Our whole community across Nebraska, eastern Nebraska, western Iowa, not just Omaha, is scarred by this tragedy. A very disturbed 19-year-old man walks into this mall and this store and begins randomly shooting at people.

The victims of this terrible tragedy, this massacre: Gary Scharf, who was shopping, a resident of Lincoln, Nebraska; John McDonald, a customer, resident of Council Bluffs, Iowa. By the way, his daughter was an associate attorney for me. I have been communicating with her. To her, Suzanne Sheehan, and your family, my deepest condolences.

Also killed were six Von Maur employees: Angie Schuster, Maggie Webb, Janet Jorgenson, Diane Trent, Gary Joy, and Beverly Flynn, all of Omaha. Some of these were only 10 minutes from their shift being over and would be out of this store. Some of them are young mothers, leaving small children. There were others who were seriously injured, like Fred Wilson and Michelle Oldham. Others were also injured, like Jeff Schaffer and Brad Stafford.

Now just to put this in context, the first 911 call went out, and within 6 minutes our emergency response, our EMS, and our Omaha Police were in that store. But it was all done and over with by the time they could get there. The damage was already done. But they immediately began working on those that were injured and securing the mall for the other thousands of shoppers that were there.

I want to thank publicly our first responders from not only the city, but Douglas County, Sarpy County, the State Patrol, for their heroic efforts given in this tragedy. Now a tragedy of this scope and scale is just unthinkable. It's hard to get my mind around this. There's no way for us to understand this senseless act of violence, and I ask the entire country to pray for peace and healing during this difficult time for these families in our community.

God bless.

TRAGEDY IN OMAHA, NEBRASKA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. FORTENBERRY) is recognized for 5 minutes.

Mr. FORTENBERRY. Mr. Speaker, I thank my colleague, LEE TERRY, from the Second Congressional District, my neighbor. I, too, Mr. Speaker, want to extend my heartfelt sympathies to the families and friends of this senseless act of violence. Sometimes we are shocked by just how brutal the world can be and that came home to rest yesterday in Nebraska, where people, joyfully going about their holiday season, shopping, having time with loved ones, people wrapping gifts, all of a sudden being punctuated with this horrific act of violence that left eight people dead and in turn the perpetrator of the crime killed himself.

Mr. Speaker, Nebraska prides itself on being a wonderful place to live and to work and raise a family, and Omaha is truly a good community. I think if we have won consolation here, it will be that the community will pull together and will heal together.

On a personal note, as well, as Congressman TERRY mentioned, one of the victims of the tragedy was from my district and in fact had been a personal acquaintance and friend of mine, Gary Scharf. He was active in civic affairs. I knew he took great pride in the son that he had. I too wish to extend my deepest heartfelt sympathies to his family as well.

CONDOLENCES TO OMAHA VICTIMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Nebraska. Mr. Speaker, I rise also with a heavy heart to express my condolences to the families of the victims that were tragically gunned down yesterday in Omaha. It is amazing, as Mr. FORTENBERRY pointed out, how cruel the world can be, and I only hope that we will come together and look at the root causes of these sources of violence, as we look at the violence that affects basically a rural area of our country, the Heartland, as many would call it, that none of us can escape some of this violence.

As we pull together, I know that perhaps we can learn from what happened yesterday. But, again, I want to especially express the condolences that I feel for these many victims who actually have roots across Nebraska.

With that, I yield my time to Mr. KING of Iowa.

Mr. KING of Iowa. Mr. Speaker, I thank the gentleman from Nebraska for yielding. I stand here also with a heavy heart in joining with my colleagues from the west side of the Missouri River, and as we often stand together on policy and on issues that matter to the country and matter to our region, today we stand together in expressing our sympathies to the families of all of those involved in this tragic shooting.

As we move towards the Christmas season and the anticipation that brought people together in the Von Maur store, it's tragic that that was what was interrupted in such a brutal way, by such an act of insanity. Our thoughts and prayers go out to all the families of all involved; the families of

the victims of those who were killed, the families of those who were wounded, those who were wounded, obviously, and also to the family of the shooter who committed that act of insanity, who must be going through an even more heightened sense of agony today and yesterday, and throughout, and perhaps the rest of their lives, an added measure of agony to those who have already suffered the incomprehensible loss of such a tragic incident.

I lost a constituent and had one wounded, and it has reached into the lives of the families on the Iowa side of the river. It is also true for each of the three Members of the Nebraska delegation, having lost at least one person that they represented here in Congress. We know that all families are affected.

And so we ask to stand here together and we will remember you all in our prayers throughout our holiday time, throughout this Christmas season. We will stand together for the rule of law, we will stand together for sanity. We are going to look to try to find a way to reach out, and perhaps, just perhaps there will be some key, some knowledge gained from this tragedy that we can better use to protect and maybe prevent future tragedies.

□ 1715

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. WYNN) is recognized for 5 minutes.

(Mr. WYNN addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. DEFAZIO) is recognized for 5 minutes.

(Mr. DEFAZIO addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Ms. FOXX) is recognized for 5 minutes.

(Ms. FOXX addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

REVISIONS TO ALLOCATION FOR HOUSE COMMITTEE ON APPROPRIATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. SPRATT) is recognized for 5 minutes.

Mr. SPRATT. Madam Speaker, under sections 308 (b) (1) and 309 of S. Con. Res. 21, the Concurrent Resolution on the Budget for fiscal year 2008, I hereby submit for printing in the CONGRESSIONAL RECORD a revision to the budget allocations and aggregates for fiscal year 2008, and the period of 2008 through 2012 for several House Committees. These revisions represent an adjustment to blouse committee budget allocations and aggregates for the purposes of section 302 and 311 of the Congressional Budget Act of 1974, as amended, and in response to a further House amendment to the Senate Amendment to the bill H.R. 6, The CLEAN Energy Act of 2007. Corresponding tables are attached.

Under section 211 of S. Con. Res. 21, this adjustment to the budget allocations and aggregates applies while the measure is under consideration. The adjustments will take effect upon enactment of the measure. For purposes of the Congressional Budget Act of 1974, as amended, a revised allocation made under section 211 of S. Con. Res. 21 is to be considered as an allocation included in the resolution.

BUDGET AGGREGATES

[On-budget amounts, in millions of dollars]

	Fiscal Year 2007	Fiscal Year 2008 ¹	Fiscal Years 2008–2012
Current Aggregates: ²			
Budget Authority	2,250,680	2,350,996	n.a.
Outlays	2,263,759	2,353,954	n.a.
Revenues	1,900,340	2,015,841	11,137,671
Change in the Energy Independence and Security Act (H.R. 6):			
Budget Authority	0	181	n.a.
Outlays	0	179	n.a.
Revenues	0	137	3,243
Revised Aggregates:			
Budget Authority	2,250,680	2,351,177	n.a.
Outlays	2,263,759	2,354,133	n.a.
Revenues	1,900,340	2,015,978	11,140,914

n.a. = Not applicable because annual appropriations Acts for fiscal years 2009 through 2012 will not be considered until future sessions of Congress.

¹ Pending action by the House Appropriations Committee on spending covered by section 207(d)(1)(E) (overseas deployments and related activities), resolution assumptions are not included in the current aggregates.

² Excludes emergency amounts exempt from enforcement in the budget resolution.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the text of the bill (H.R. 710) "An Act to amend the National Organ Transplant Act to provide that criminal penalties do not apply to paired donations of human kidneys, and for other purposes.", and

That the Senate agrees in the House amendment to the title of the above-entitled bill.

The message also announced that the Senate agrees to the amendment of the House to the bill (S. 2371) "An Act to amend the Higher Education Act of 1965 to make technical corrections.".

PROMOTING THE ENGLISH LANGUAGE UNITY ACT

The SPEAKER pro tempore (Mr. CLAY). Under the Speaker's announced policy of January 18, 2007, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes as the designee of the minority leader.

Mr. KING of Iowa. Mr. Speaker, it is an honor and privilege to be recognized to address you here on the floor of the United States Congress again. As many of the Members move forward to go home for the weekend and spend time with their families and their constituents and get in touch with the issues of the day, I delayed my transportation, so I have an opportunity to address you and, in the process, address the American people.

It occurs to me that there is subject after subject that doesn't quite emerge here on the floor of this Congress for an open topic of debate, and there are central issues around which we should be shaping policy, that policy that affects and directs the destiny of our country.

Some would say that the bill that passed here off the floor, the energy bill, will solve our energy problems and move our destiny in the right direction. I am a skeptic of that, Mr. Speaker. I don't come to address that so much.

But I believe this, that as a people we must be bound together. There is something unique about being an American. It is something unique, that it is different than coming from another nation in the world. We brought together all people from all cultures and all civilizations and assimilated them into this society to produce a common culture, a form of cultural continuity that binds us together as Americans.

As I listen and engage in debate, and as I read and study history and watch the reactions of people around me and think what it must have been like 50 years ago, when I wasn't quite paying attention in this country, or 100 years ago, when I wasn't around, or 200 years ago obviously, as America was shaped, what is it that is unique about us? What has given us our vitality? What has bound us together so that we can work together as one people?

There are a number of common denominators. We live in the same geographical area, we share a common history and we adhere to the rule of law. English common law flowed across the Atlantic Ocean and was established here in this continent, actually not too far down the coastline down at Jamestown in 1607 in Virginia. Four hundred years ago English common law arrived here in the United States.

But another thing that has taken place that is a common denominator, that has bound us together, that has been a powerful force for our society, for the American interests, and a powerful force throughout all humanity, is to have a common language.

Now, one can just take the globe at about any time, and let's just say going backwards across history, generation by generation, recognizing that national boundaries have shifted over time. They shift because of political transformations within the countries and they shift because of wars.

You can take this back to the city-state era before we actually had nation-states, and identify that the boundaries around the city-states and the boundaries around the nation-states from 300 years ago and earlier were often boundaries that were drawn by lines of language.

Languages grew up in colloquial regions, and because people communicated with each other verbally, languages evolved. And because people didn't travel in those days the way they travel today, then the languages that evolved in certain locales got more and more distinct and more difficult for the neighbors to understand.

Of course, we track language through, and because of commonalities in language, we also track the migrations and histories of people. But a common language has defined the boundaries of nation-states throughout history.

In France, they speak French; in England, they speak English; in Spain, they speak Spanish; in Portugal, they speak Portuguese; in China they speak Chinese; in Russia, they speak Russian.

Why is that? I never hear anybody talk about that. But the reason for that is because common languages, the languages have defined the boundaries of nations, of nation-states.

Why does a nation-state have a boundary that is defined by its languages? It is because they are a common people. Whether they are Italians or Spaniards or French, they are a common people that are bound together by a common language. They have a common cause. They have a common sense of history. They work together. They communicate with each other. They do business together with far less suspicion because they can communicate quickly and effectively and efficiently with a common language.

There are things that come through languages that cannot be written into print, into the CONGRESSIONAL RECORD, for example. There is voice inflections. There are pauses that are parts of communication. There are certain kinds of pronunciations that change the meaning of a sentence. You can write a sentence out in English, and if you change the meaning of the word "read" and "read," it spells the same but it means something different. There are all kinds of pronunciations and voice inflections throughout all languages that change the meaning of the communications of that language.

Because of all the nuances that come from the languages and because of the difficulty in understanding very many different languages, we tend to bind ourselves together, pulled around a common sense of purpose, which is a common language.

The strength of America is also common with the strength of many of the other nations, the nations that I mentioned. We have had a common language, too. The common language here in the United States has been English. It has been English since the beginning of the settlement in this continent. Yes, there have been challenges to it. We know there was a challenge from the German language. If I remember correctly, it was Benjamin Franklin who said that if we weren't careful, that the Germans would assimilate the English speakers before they were assimilated into the English-speaking culture.

But we know that didn't happen. We know that the English language prevailed. And we know that there have been significantly sized enclaves in America that persisted in hanging on to a language other than English, but

eventually, historically, they have assimilated into all speaking this common language called English.

Well, if one were going to shape and develop and devise a nation-state that had the very best prospect of succeeding and prospering, one of those essential components, and perhaps the most essential component, would be that the people of a nation-state speak a common language.

We have understood that in this country since the beginning of the establishment of the United States of America. In fact, Noah Webster I think understood it I think as well as anyone in the history of our country.

When we think about the history of Noah Webster, the author of the original American English dictionary, as he traveled around through the 13 original colonies of his time and he entered into region after region, he noticed that sometimes he couldn't understand what they were saying. They were all speaking English, most of them were speaking English, but they had chosen to use certain terms in a different way. They had adopted definitions on to other words. They had changed their pronunciations of words. And as he watched this and as he traveled and listened, he began to realize that the colloquial regions in the United States were forming and shaping their own unique languages. Even though they were rooted in English for the most part, he didn't believe it would be very long, another generation or two, and the American people would be no longer speaking the same language; that other languages were evolving from the English language that arrived here, and that eventually some regions in the United States wouldn't be able to communicate with their neighbors.

And Noah Webster believed, and I think correctly, that that would have brought about divisions within the United States, and we would eventually not be a unified country because of our inability to communicate with each other. And even though there is always a way to facilitate communication, even though we can do sign language and we can write notes and we can get an interpreter and exchange communications, and we do that, of course, in this country every day in our international trade constantly, that is not the same as having an instantaneous form of communication where everyone understands everybody and we have that ability to exchange ideas and measure the voice inflection and the pronunciation so that the communication of the message is clear.

Noah Webster understood that. So he set about writing the American English dictionary for that purpose, to be able to provide a common use of language, to provide a common language for the United States, an official language for the United States.

It was Noah Webster's dream that in the Constitution of the United States there would be a constitutional amendment that would establish English as

the official language of the United States of America. He didn't see his dream realized, partly because he helped solve the problem by drafting and writing his American English dictionary. He did so for the express purpose of providing a common language, a utilization of the English language that would be universal from Maine to Florida, all the way up and down the coast of the 13 original colonies, because he understood that if people persisted in different pronunciations for the same word and different definitional use of the same word, that eventually the communications would break down among us as a people and we would be pitted eventually against each other. We would begin to see our neighbors as someone other than our friend and our neighbor and our countryman because we couldn't easily communicate with him.

So he wrote the American English dictionary, established a common language in the United States, and to some extent solved the problem, and it was not necessary in those years to pass a constitutional amendment to establish English as the official language of the United States.

That is the history of Noah Webster and that is the contribution that he gave to this country. And I think that he established that principle of a common language of English and protected it and preserved it. And if we never had Webster, if we had not had someone who had the vision to establish a common language for our country, we may not have held together throughout those years. We may not have actually gotten through the Civil War and bonded ourselves back together again. We might not have fought side by side in the Spanish-American War or World War I or World War II. We might not be the world's only unchallenged superpower today, if we hadn't had the wisdom of the early settlers in the United States, if we hadn't had the wisdom of the Founders, if we hadn't had the wisdom of a Noah Webster to establish English as a common language here in the United States of America.

Now, I want to make the point that in those years there were other languages that could have been just as successful. English was the language that was the language of our original settlers here in the largest number. It could have been German, it could have been French, it could have been Spanish. You can make a case for that throughout history.

But whatever that case is, it is English today. And English happens to be also the global language of commerce. It is the language we do business in in the world. It is the language that we negotiate politically in. At the roundtable in Brussels, at the European Union, when we sit around that roundtable and negotiate with all of those member nations, now I can't actually keep track, it was 15 when I was there last, I think it has gone to 25. But the language of negotiations in Eu-

rope around the roundtable at Brussels in the European Union is English. The representatives there, the French speak English, the Spanish speak English, the Portuguese speak English, because there needs to be a common language of communication. What will it be?

What will the documents be printed in? Do they get printed in 300-some languages that we commonly talk of as being the utilized number of languages in the globe? Or can it be printed in one? Well, if you have a common language, one is it. There is only one definition, there is only one understanding, and there is no misunderstanding, at least substantially less misunderstanding, excuse me.

So if a common language, an official language, a language of communications at the European Union in Brussels is English, and if the international language of business and commerce is English, and it is, and the international language of air traffic controllers that commands all airplanes that are flying and being controlled by air traffic controllers in America is English, and it is, and if the language of the maritime industry, the language that tells ships how to avoid running into each other in the fog is English, and English is the common language of the United States of America, and it gives us a competitive advantage with the rest of the world that does not speak English as fluently when it comes to business, and if it is the language we use when we negotiate in our trade relationships with other countries and the language we use when we negotiate our political disagreements and arrive at our agreements in English, then there is no case that I can think of to be made for the official language of the United States being anything else other than English.

□ 1730

And, Mr. Speaker, I come to the floor tonight to promote a piece of legislation, H.R. 997, the English Language Unity Act, and it establishes English as the official language of the United States of America.

I have just made the case that we didn't need to do that in the early 1800s or the early 1900s, because the people of this country understood the utility of having a common language, English, and because many of the people who came here as legal immigrants adopted themselves to and adapted themselves to and assimilated themselves into an English-speaking culture.

One of the examples would be my grandmother, who arrived here from Germany on March 26, 1894, and she walked through the Great Hall at Ellis Island. She came on the ship New York. Her name is on the manifest. And as she traveled across the United States, having made a commitment to this country, she got married to my grandfather. But my father was raised in a German-speaking home. And when he went to kindergarten on his first

day, which is interesting, a German term “kindergarten,” and it is kindergarten all over America even though it is a German term, but he came back from his first day. He went to kindergarten speaking German, he came back from his first day and said hello to his mother in German. And as my grandmother was working in the kitchen and welcomed him home from his first day of school, she turned to him when he had greeted him in German and said to my father, Speaking German in this household is for you from now on verboten. I came here to become an American and I need to learn English. And you shall go to school and learn English and bring it home and teach it to me. And from that moment forward, my father was forbidden from speaking German in his household because his job was to learn English, to embrace America, to embrace this host Nation, and to teach English to his mother, which he did pretty well.

He never taught her I don't think to get rid of her accent, but she certainly spoke English well enough that I never saw within her an inability to communicate. I always understood her when she told me what to do. But that tone, that acceptance of the host country, America, and the need to honor that by learning the language of the country that received the immigrants, English. And in turn, this country has rewarded people who have learned the English language and assimilated themselves into this culture, because they are rewarded through the chain of commerce, the job opportunities that are there.

And, yes, I know, I run into people that are entrepreneurs that didn't learn English and they did well marketing their goods and doing business. And they said, why did I learn English? I will say they could have done better than they did. A good person with English language skills in this country has an advantage over a good person without English language skills in this country. It is true in every culture and every civilization, if you speak the common language of the country that you are in, then you have an advantage when it comes to business, you have an advantage when it comes to education. In fact it is very, very difficult if not impossible to understand the history and the culture of America without understanding the language of this country. I don't know how that could be done without understanding the language of this country to understand it thoroughly. So I believe we need to establish English as the official language of the United States.

This is not a unique concept to the rest of the world, Mr. Speaker. In fact, it is unique that we do not have an official language here in the United States.

I sat down a few years ago and got down a world almanac. And if you turn to the page where the flags are, there is a flag for each of the countries in the world. And I sat next to me the “World Book Encyclopedia,” this is pre-digital

era; now I would look it up on the Internet. But as I turned the pages through the “World Book Encyclopedia,” I looked up every country in the world, every country that had a flag registered in the “World Almanac.” And there in the “World Book Encyclopedia,” in the first paragraph of the description of the countries it will show “official language.” I looked up the official language of every country in the world, and there was an official language, at least one, some have several, but at least one official language on record in the “World Book Encyclopedia” for every nation on this planet except the United States of America.

So when we talk about establishing an official language here, English, the official language of the United States, and I hear people cry out that somehow that is a major inconvenience to people who come here speaking other languages and that we don't need an official language, that kind of argument defies the logic of the rest of the world. The logic of the rest of the world understands that there has to be official documents, there have to be official proceedings. There has to be an agreement on what language means. And if we will accept any language into our official activities here in the Federal Government, then we are forever litigating the differences between the interpretations of those languages.

For example, let's just say that we had two people that came together and signed a contract, and one of them wanted that contract in Vietnamese and the other wanted the contract in Korean. And so they agreed verbally, even though they didn't communicate with each other because of a lack of the common language skill, that they would have a contract each in Korean and Vietnamese. And they each then signed the contract. The one provider who signed the contract was, let's say, the owner who was going to pay to have their house remodeled, they have a misunderstanding. And the contractor who adheres to the Korean language says: I have a disagreement; you've not upheld your end of this contract. And the owner, who might have this contract that he understands in Vietnamese, says: You have not held up your end of the contract.

How do we litigate something like that within the courts of the United States of America when there is a disagreement on the interpretation between two languages that are not common languages in the United States but official languages of the countries where they came from? Can we be litigating those kind of disagreements? Or can we simply say, a contract with the Federal Government is an official document; it shall be in English. If you choose to interpret that into another language for the purposes of the utility of your needs, that is fine with us, but we aren't going to litigate the difference in the courts of America because of people who refuse to use the

official language of the United States, which needs to be established as English. That is one explanation.

Another explanation of this, of that need, would be, as I sat down with one of the ambassadors to the United States from Israel just a few years ago, he explained to the group, and if I remember correctly, it was the Policy Committee that was hosting the ambassador, that Israel had established Hebrew as the official language of Israel in 1954. Mr. Speaker, I would remind you that Israel was established as a nation in 1948, and just 6 years after they became a nation, certainly they had war, they had turmoil, they were at great risk, but they were shaping and laying the foundations for a nation that was going to have enemies surrounding them in all directions.

A very precarious spot for a nation to be in, the most important things needed to be focused upon, and the very best and most effective foundations for a nation needed to be laid, and yet just 6 years after they were established as a country they established Hebrew as the official language of Israel.

And I asked the ambassador, Why did you do this? Why did you establish an official language, and why did you choose Hebrew? And he said, We saw the success in the United States of assimilation from people all over the world coming into the United States and being accepted as Americans. We recognized that we were bringing refugees from all over the world, mostly Jews, to come live in Israel, reaching out to them; and they spoke languages from dozens of different countries and we didn't have a common language in Israel. We needed a language that bound us all together and identified us as Israelis and so we chose Hebrew.

And I asked again, but why Hebrew? Hebrew had been the language that was used primarily and almost exclusively in prayer for the last 2,000 years. The Israelis resurrected basically a dead language as far as street communication, business communication, commerce was concerned, and they brought Hebrew back up again and established it as the official language of their country and taught the Hebrew language to all Israelis. And today, as someone immigrates into Israel, they go to an assimilation center, I will call it; they have a different name which I don't recall, where they are taught in 6 months to learn the Hebrew language and to go out and function and perform within the broader society of Israel. So Israelis that learned Hebrew have that unique identifying quality. They can walk up to any other Israeli, speak to each other in Hebrew, and they will be bound together in the nation of Israel by that common language.

And just as an aside, Mr. Speaker, those who come to Israel who come from countries where they may be illiterate in their native language, the Israelis then teach them to be literate in the written and spoken word of their native language, and then transition

them into Hebrew, teaching them the written and the spoken language of Hebrew. That is about an 18-month process rather than the 6-month process of those who are literate in their own language who come into Israel and are taught Hebrew.

They make this work. This is not a language that is known very much throughout the world. They resurrected a language that wasn't utilized, but they identified that a common language would bind people together in the nation state and that would help them work together and help them struggle together and help them fight together to defend themselves from their enemies from without. And one of the powerful, unifying forces they recognized was a common language.

And, here in this country, we remain the only country in the world that doesn't have an official language. We say English is our common language, but we have forces out here seeking to subdivide us, and we have billions of dollars that flow out of this Congress that go into the hands of people who are promoting division in America and not unity in America. The message that many immigrants get when they arrive here in this country is, if you learn English, and this message is clearly given as part of the debate here on the floor, if you learn English, you give up your own culture. That is the message that we hear.

Not true. In my neighborhood, I look around my neighborhood and certain communities that were ethnic enclaves when they were settled, German, Danish, Irish, Swedish, to name a few in my neighborhood, but the people that came here speaking a foreign language have adapted into English, and hardly any of them speak another language other than English that live there. But you could not convince them that they have given up their culture. You can't convince a German that their culture has changed dramatically because they have adhered to a common language here.

Now, I think utilization of other languages and language skills are a good thing, and I encourage young people to study foreign languages. I use that in the analysis of culture and use that in trade and use that in foreign travel and use that to help open up our negotiations and discussions and reduce the friction and the conflict from nation to nation. Those are all good things. But a common language within a country binds it together, and accepting English as our official language means that the people who do so are tied more to a common sense of history, more to a common cause.

As I listened to testimony that came before the small business community sometime back, we had a witness that came in who was second in command to Elaine Chao, the Department of Labor, and she testified that they had difficulty in finding enough workers who could go into a factory and be taught how to run the punch press or the lathe

or common manufacturing equipment, not because they lacked the education and not because they lacked the intellectual ability, the brain power, so to speak, Mr. Speaker. No, because they lacked the language skills. They didn't understand enough English, so they couldn't be taught how to run a punch press or a lathe. They couldn't work in that environment because of the lack of language skills.

And so I listened to that testimony and I said to the witness, I can understand why you would have that difficulty with first-generation immigrants. But can you tell me, do you encounter second-generation immigrants, people who were born in the United States of America, born into an English-speaking country, that haven't learned to speak English? Are they part of this problem? Do you run across those incidents? And into the CONGRESSIONAL RECORD she answered me, Yes, we do. We run into second-generation immigrants, native-born Americans that don't learn enough English to work in that factory. In fact, we have third-generation Americans that haven't learned enough English to go to work in these factories. And they are not included in the opportunities that are provided by the jobs in these regions because, if they haven't learned the language enough to work in the factory by three generations, now how do we convince the rest of the public and how am I to be convinced that they have assimilated into society, that they adhere to the American Dream, that they salute the flag and know the Pledge and say the Pledge?

□ 1745

How do we know that they would put on the uniform of this country and defend America? What would indicate to us that they have embraced this host Nation? If the grandchildren of the immigrants who move here don't learn English, what does that tell us about our society? Have we failed them? Have they failed us? I would submit, Mr. Speaker, it is some of each. They have failed to embrace this country and we have failed to set up a system that brings them in and welcomes them into our society and gives them the skills that allow them to be successful and feel they are part of this great Nation and part of this citizenship of being an American that is such a blessing.

Another argument that argues compellingly for an official language here in the United States goes back to 245 B.C. That is before Christ, for those of you who are getting the modern-day education. So 245 B.C., the first emperor of China, and they have tried to teach me how to say that in Chinese. I have never learned, but it is Qin Shi Huangdi. So Qin Shi Huangdi, the first emperor of China, pronounced correctly by the Chinese, not by me, had a vision. He recognized that there were 300-some provinces in China, separate regional areas. Certainly there were that many different colloquial languages that were in China.

As he traveled around that part of the world that we see today as China, he recognized that they had a common culture. The Chinese people, as we know them today, wear similar clothing and have similar work habits. They had had similar religions across the spectrum to some degree, and yet they didn't speak a common language and so they couldn't communicate with each other, which means that they didn't trade and travel. And when enemies came from without, they were not able to organize themselves to defend themselves from within because they didn't have the communication skills and ability to speak a common language.

So the first emperor of China looked about and decided I am going to establish a common language for China. He hired a group of scribes, scholars of the day, and said go to work and write a common language. I want all of the Chinese people to be able to communicate in the same language.

The scribes sat down and drafted this language, and the language that was created by the scribes under the first emperor of China is a language that has about 5,000 commonly used characters, about 50,000 out at the limits of the expanse of the varieties of the characters, picture words is how they have put that together, and I can't begin to understand it, but I can tell you that the common language that was created, especially the written language of the Chinese, has bound them together. They recognize the writing and they can read script that comes from any corner of the country.

So 245 B.C. is about the era that this began, and the first emperor of China's vision was to unite the Chinese people for the next 10,000 years. For the next 10,000 years. What a dream. We are about a fourth of the way through that and there is no sign that the Chinese people are going to be ununited or disunited. And yes, they have different versions of the Chinese language that they do speak on the continent. Cantonese and Mandarin come to mind, but the written language is the same. And the literate Chinese can read and write it. And it has to be hard to put those pictures together on a Chinese keyboard today, but they do it. And they are bound together as one people.

And the vision of the first emperor of China was that he saw some other commonalities that he wanted to establish. Also, there were sections of the Great Wall of China that were not connected, and so the invaders from without could go around the wall and come in. The first emperor of China connected the sections of the walls of China so it became one Great Wall instead of disconnected sections of the wall.

And he established the terra-cotta guards. He also recognized the widths of the ox carts weren't the same and so the ruts would put stress on the wheels and you might break a wheel. He standardized the axle spacing of the ox carts so they could travel and do commerce. He had a vision, a standardization.

Imagine a train, an engine and a set of cars of a train that has a different width of track. When you reach another set of track, you have to off-load your cargo and put it on a car that will travel on that different width.

What would it be like if every State in the Union had a different width for the railcars? It would debilitate rail travel, so we standardize it. We have one gauge of track that takes you anywhere in the United States of America.

We have had one language that takes you anywhere in the United States of America, until such time as the multiculturalists cut loose here in the last 20 to 30 years and began to try to convince people, don't assimilate into this culture, just simply hang onto the culture you brought with you and dig yourself in in an ethnic enclave and raise two and three and maybe even a fourth generation of people whose hope lies within the enclave and not with the Nation outside the enclave.

It doesn't make sense, Mr. Speaker, for us not to have an official language here in the United States because an official language provides a motivation and an incentive for all regions of the country to adapt themselves to an official language.

If they do that, then they will be teaching English within the enclaves in America, the places where I can't go to communicate with anybody anymore. And why do I, in the heartland of America, need to walk into a bank or convenience store and get out my card at an ATM, and I stick my card in there and the first question it asks me is: What language do you want to communicate in? I have to read all of that. If I read it from the bottom to the top, it will burn up to 7 or 8 seconds until I get to the top. Then I push the English button and wait for the transaction to light up the screen. If you push the button wrong, you have to start guessing again to back out of it.

Because we provide multiple languages on street signs or multiple languages on ATMs and multiple languages on directions, it doesn't help people have an incentive to learn English.

Mr. Speaker, it works like this. If I pull up to a stop sign in Kuwait and in Arabic it says "stop" and in English it says "stop," my eyes go to the language that I understand. No matter how hard I try to memorize what "stop" looks like in Arabic, I am never going to learn Arabic because it is always there enabling me to take the English way out, the easy way out, the part that I know.

And if we provide ATMs in foreign languages, I don't have a law that bans that. That is a free commerce idea. Please do what you want to do, bankers. If I have a choice, I will go to the ATM that gives it to me only in English because I don't want the confusion. But that is a free market plan. I don't disagree with that, but I am making the point that multiple language availability does nothing but en-

able people to continue living in the enclave and not assimilate and learn the language.

So official documents and proceedings here in the United States need to be in English. I ask the States to establish and pass the same kind of policy. And there are nearly 30 States that do have English as the official language. Iowa is one of them. I did spend 6 years establishing English as the official language of the State of Iowa. That requires that all official documents and official proceedings be in English. And it has commonsense exceptions like justice. You wouldn't lock up a criminal if they didn't understand the charges against them. We would provide health care to people regardless of whether they understood the language or not.

We do provide driver's license tests in at least six different languages. I disagree with that. I do believe that should not be an exception. But regardless, that is the policy that is out there. A number approaching and maybe actually meeting 30 States have English as the official language in one form or another to pull people together, to bind us together, not to divide us apart.

And the effort to divide constantly comes from this side of the aisle and it pits Americans against Americans. But we understand that the official language is inclusive not exclusive. Every nation in the world has an official language except the United States because it understands the unifying power of a common language.

The polls support this. You can look at polls that show from 82 percent of Americans support English as the official language on up to 88 percent of Americans support English as the official language.

English is a common form of communications currency in this country and in business and in air traffic control and in politics and in maritime industry throughout the world. We need to establish it here because holding that principle together sends the message to people who come here that this Congress, this Nation, the majority of the States from within, expect you to learn English.

They come here expecting to learn English. None of us go to a foreign country and seek to impose our language on the government of a foreign country. If I walk into a service in France, I will have to be doing business with them in French. They don't feel compelled to pay for my interpreter or to print road signs in languages in France other than French.

But one might take a look up to Quebec, a province in Canada, to give some instruction on what happens when a society is split apart by competing languages. Cultures follow down the line of language. When you speak a common language, it pulls your culture together. When you can't communicate with each other, it divides the culture.

So the French speakers in Quebec have been insistent that they continue

speaking French. When you go into Quebec in those regions, the street signs are in French. There have been two votes in my memory, and one of them I believe was about a decade ago, where Quebec voted on whether to secede from the rest of Canada. And thinking about that, it was the Quebecois who had the decision to make. It wasn't put out for the rest of Canada, just the Quebecois. They came within less than 1 percentage point of separating Quebec from the rest of Canada. Had they done that, they would have effectively separated Canada into three separate geographical regions. Everything west of Quebec to the Pacific Ocean would have been a region, Quebec itself a separate region, and the maritime provinces on the east side a separate region. The English-speaking components of Canada would have been the east and west, and in the heart would have been Quebec, the French-speaking province. They came within less than 1 percentage point of seceding Quebec from the rest of Canada. And why? Because they insisted upon not speaking a common language of the nation that they were part of, Canada.

If you ask anybody in Canada that lived through that era and asked them if English had been the official language of Canada from its beginning, had been the language of educational instruction and science and technology and business in all of Canada, the remnants of the French language would have persisted and it would have existed within the culture and been part of the conversational language going on in Quebec, but it wouldn't have been a political divider. The wedge that came down between the Canadians was a wedge driven exactly along the lines of language because the lines of language define the lines of culture, and it separated people politically and pitted them against each other.

If they only communicated in a common language, all French or all English, there never would have been a vote that came up before the Canadian people, and the risk of that nation being fractured apart would never have been faced by the voters. There is always a movement by Quebec separatists, but it seems to have been tamped down recently. But language is the fault line. If you want to erase fault lines in nations, you need a common language for the nation.

So I will make the point, there has never been a successful multilingual nation in the history of the world. The Soviet Union would be a very good example of this. The Soviet Union was put together and cobbled together by force, by military force, by economic leverage. We looked at all of the different regions of the Soviet bloc, and I grew up living with that and doing the air raid drills at the same time, watching the Soviet Union and the distinctions between Russia and the balance of the Soviet satellite states.

If you look at those satellite states today after the wall came down on November 9, 1989, we saw freedom echoed across Eastern Europe all of the way to the Pacific Ocean, losing some of that today, it appears, in Russia. But the Nations that spun themselves off were nations that were distinct by language. The languages in the Baltic states re-established some of their languages as their official language. They were trying to impose Russian on them, and the Baltic states rejected that to some degree.

□ 1800

They've gone back and re-established their native languages as their official language. It binds them together as a people. Polish binds the Poles together. Bulgarian, well, that's another subject. But if we go down into a place like Kurdistan, they speak a distinct language. The languages again are the defined borders of the nation states that emerged when they broke away from the Soviet bloc after the wall came down in 1989. This is a simple concept to understand in history. If you watch the map change, of the world, watch it change historically, and as that map changes, ask yourselves, what are these lines? Are they lines of language? Generally, they are. The lines of language generally match the lines of culture. And if we can speak a common language, it binds us together as a common people.

And so H.R. 997, English is the official language, is a piece of legislation that establishes English as the official language of the United States of America. It requires that all official activities and documents of the government be in English, and provides common-sense exceptions so that we can continue to do business in this country without confusion, without lack of communication, and still, at the same time, we make those exceptions so that no one is disenfranchised that is in this country, at least legally, and has a legal access to some of those benefits.

I think about another form of history, or another experience in history that has to do with the Spaniards as they arrived in the New World and down into the Central American region. And if you remember, as the conquistadores moved their way northward, they went on into the areas of southern Arizona, as we know it today, the Pueblo Indian area. And there you had the Zunis, the Hopis and the Anasazi Native Americans that were in that region. They come to mind as I look back upon the history because, as the Spaniards invaded into that territory and as they came into the communities, the settlements, the Indian villages, it was easy for them to take on one village and raid that village and destroy the opposition within the village and enslave the balance of the Native Americans that were not killed in the invasion and the occupation of the villages.

And the Spanish conquistadores could go, in the 1500s, they could go

from village to village. And even though those neighborhoods were common in culture, the Native Americans in that region wore similar clothing, ate similar foods, had similar habits and practices and similar work habits, they didn't speak a common language because they lived in enclaves. They hadn't traveled and traded. Because they didn't interchange their cultures, because they didn't have a common language, the Spanish were able to divide and conquer the Native Americans in that region in southern Arizona in the 1500s, the Zunis, the Hopis, and the Anasazis, and perhaps others.

But as the Native Americans were enslaved by the Spaniards, they were taken into the missions and there they were converted to Christianity and they were taught Spanish. They imposed the Spanish language on the Native Americans in the southern parts of Arizona.
