This legislation requires electronic exchanges in London or Dubai to comply with key market integrity requirements as a condition of doing business in the U.S. I will be watching closely to see if this approach works or if stronger medicine is needed.

Second, the swaps loophole, allows large investment banks to exceed speculative trading limits on the futures markets. This loophole has been plugged.

Third is the Enron loophole that has enabled massive trading on over-the-counter (OTC) markets which are completely dark to regulators. It also involves another loophole for swaps transactions on the OTC.

These dark markets have grown so rapidly that the Bank of International Settlements estimates they now involve about $9 trillion in commodities. This is estimated to be about nine times what is traded on the regulated markets. This bill shines light on these dark markets for the first time.

It takes a large and important first step towards putting a cop back on the beat. My hope is that this bill will bring prices back in line with underlying supply and demand. Further, I am comforted by Chairman PETERSON's commitment to consider additional measures in the dark markets as more data is available from the CFTC.

I want to commend Representatives STUPAK, VAN HOLLEN, DELAURO, and LARSON, for their excellent work and want to recognize Chairman COLLIN PETERSON, Ranking Member BOB GOODLATTE, and their staffs for their leadership in bringing this bill to the floor. I look forward to working with them in conference.

Mr. MARKEY. Mr. Speaker, I rise in support of this bill, and I commend Chairman PETERSON and Chairman ETHERIDGE for their leadership in bringing this measure to the House floor.

When we have mounting evidence that today's high oil prices are due in part to excessive futures and derivatives market speculation, we must take action to help the American consumer who is struggling to pay $4 for a gallon of gas. We must stand up to speculators who are aiding and abetting big oil companies that continue to rake in record profits and laugh all the way to the bank.

In 2000, a regulatory black hole was created that took the cop off the beat when it comes to energy commodities. This law allowed energy commodities to be exempted from virtually all of the laws that we have had in place for agricultural and financial commodities.

At the time this bill passed the House, I argued that this loophole was not in the public interest and that it needed to be fixed in conference in order to prevent harm to energy markets and consumers. But it was not fixed.

The Enron loophole allowed speculators and financial operators to hide their actions from regulators and the public.

In May, Congress took the first step towards closing the Enron loophole when it passed, over President Bush's veto, the farm bill. That bill contained language that will help bring these commodities trades under greater federal oversight.

In June, this House took the next step, when it approved legislation that directed the Commodity Futures Trading Commission to examine excessive oil speculation and use their emergency powers to take corrective action.

But the Congress needs to take further actions to address excessive speculation in these markets.

The bill before us today does that.

It would close the so-called London Loophole that has allowed traders to evade U.S. regulation by offshoring their trades.

It would require additional information to be made public regarding the trading activities of index funds—and other investors—in energy commodities markets.

It would subject over-the-counter energy derivatives transactions to regulatory reporting and recordkeeping requirements, including position reporting.

It positions limits for certain contracts on energy commodities, and mandates position limits for energy commodity speculators.

It requires the Commission to appoint at least 100 new full time employees.

It requires the Commission to mandate routine reporting of certain OTC energy transactions, determine whether such agreements have the potential to disrupt market liquidity and price discovery, cause severe market disturbance, or prevent prices from reflecting supply and demand. If the Commission finds that they have caused problems in these areas, it is authorized to impose and enforce position limits on the involved agreements.

The energy, economic and the environmental crisis we face are all connected. It is time for Congress to stop playing favorites to Big Oil. Cracking down on speculation will not only help families with skyrocketing gas prices, it will give needed relief to the airline industry, the trucking industry and small businesses across my district in Massachusetts. This is a good bill. It is a necessary bill, and I urge its adoption.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota (Mr. PETERSON) that the House suspend the rules and pass the bill, H.R. 6604, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. GOODLATTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 of rule XX, this 15-minute vote on suspending the rules and passing H.R. 6604, as amended, will be followed by a 5-minute vote on suspending the rules and passing H.R. 6445, as amended (if ordered).

The vote was taken by electronic device, and there were—yeas 276, nays 151, not voting 8, as follows:

Ms. BEAN, Mrs. MCMORRIS RODGERS, Ms. CLARKE, Mrs. SCHMIDT, and Messrs. HOBSON, SIMPSON, PETERSON of Pennsylvania, DAVIS of Alabama, COLE of Oklahoma, SULLIVAN, LUCAS, TURNER, CRENSHAW, PITTS, RENZI, HUNTER, SAXTON, DAVID DAVIS of Tennessee, ROGERS of Michigan, and FOSTER changed their vote from ''yea'' to ''nay.''

Mrs. BONO MACK, Mrs. SCHMIDT, Messrs. KIRK, WITTMAN of Virginia, PITTS, and PETERSON of Pennsylvania changed their vote from ''nay'' to ''yea.''

So (two-thirds not being in the affirmative) the motion was rejected.

The result of the vote was announced as above recorded.

VETERANS HEALTH CARE POLICY ENHANCEMENT ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 6445, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. FILNER) that the House suspend the rules and pass the bill, H.R. 6445, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. DEGETTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 421, nays 0, not voting 13, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Two minutes remain on this vote.

□ 1508

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: ''A bill to amend title 38, United States Code, to prohibit the Secretary of Veterans Affairs from collecting certain copayments from veterans who are catastrophically disabled, and for other purposes.''.

A motion to reconsider was laid on the table.

EXPRESSING SUPPORT FOR THE DESIGNATION OF AUGUST 2008 AS ''NATIONAL HEAT STROKE AWARENESS MONTH''

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 296) expressing support for the designation of August 2008 as ''National Heat Stroke Awareness Month'' to raise awareness and encourage prevention of heat stroke, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 296

Whereas heat stroke is a medical emergency that can be fatal if not properly and promptly treated, and 50 percent of those with heat stroke die from it;

Whereas children absorb more heat from a hot environment because they have greater surface area-to-body mass ratio than adults;

Whereas the smaller the child, the faster he or she can overheat;

Whereas children and adolescents may have a reduced ability to dissipate heat through sweating;

Whereas children and adolescents frequently do not have the physiological drive to drink enough fluids to replenish sweat losses during prolonged exercise;

Whereas youth athletes may be more easily distracted by teammates and spectators when given the opportunity to rest and rehydrate;

Whereas a recent study found that 70 percent of afterschool athletes arrive on the playing field already dehydrated;

Whereas heat-induced illness is one of the most preventable sports ailments and parents, young athletes, and coaches need to understand the physiological factors that increase the risk for heat-related illness and take steps to prevent it;

Whereas 13-year-old Kendrick Fincher from Rogers, Arkansas, collapsed during an August pre-season football practice, was rushed to the hospital, and for the next 18 days his family waited anxiously for him to regain consciousness, tragically never regained consciousness, and died on August 25, 1995, from multi-system organ failure as a result of heat stroke;

Whereas Kendrick's parents, Rhonda and Mike Fincher, founded the Kendrick Fincher Memorial Foundation in honor of their son, with the aim to raise awareness of the potentially deadly consequences of dehydration for student athletes and to provide schools with the information and equipment needed to ensure other students do not suffer from heat stroke;

Whereas the Kendrick Fincher Memorial Foundation has distributed more than 130,000 water bottles and heat illness prevention pamphlets to children and athletes throughout the United States;

Whereas the Kendrick Fincher Memorial Foundation oversees consultation with

school district athletic programs to ensure they have procedures in place to prevent heat illness and dehydration;

Whereas the Kendrick Fincher Memorial Foundation provides heat stroke awareness and steps for prevention at local health fairs, community events, and the Annual Youth Run through ''cool huts'', misting stations, and free ice water;

Whereas Gatorade Company joined forces with the National Football League to lead a nationwide ''Beat the Heat'' campaign aimed at educating parents and football coaches about the importance of hydration in order to keep athletes safe in the hot summer months; and

Whereas Gatorade Company and the National Football League held Gatorade Donation Days at training camps to raise money to raise awareness of the Kendrick Fincher Memorial Foundation: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That—

(1) it is the sense of Congress that—

(A) National Heat Stroke Awareness Month provides an opportunity to educate the people of the United States about heat stroke;

(B) the Kendrick Fincher Memorial Foundation should be applauded for its efforts in promoting awareness about heat stroke; and

(C) policymakers, parents, coaches, student athletes, not-for-profit organizations, and other members of the community should work to increase awareness and prevention of heat stroke; and

(2) Congress urges national and community organizations, businesses in the private sector, and the media, through National Heat Stroke Awareness Month to promote the awareness of heat stroke.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Nebraska (Mr. TERRY) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the concurrent resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H. Con. Res. 296, which designates August 2008 as National Heat Stroke Awareness Month for the purpose of raising awareness and encouraging prevention of heat stroke.

As we approach the hottest days of the year, it is important that we take the time now to recognize the serious dangers of heat stroke. Whether it is a child who will participate in preseason camps to prepare for the fall athletic season, or seniors who take a walk outside, the threat of heat stroke is high. We need to make sure everyone is properly hydrated. This is particularly true for our students, as approximately 70 percent of student athletes arrive on the field already dehydrated.

Heat stroke is extremely preventible, yet about half of those who contact it will die from it. This resolution before us aims to increase awareness of this deadly condition. It urges national and community organizations, the media, coaches, student athletes and others to widely disseminate information on heat stroke.

This resolution also recognizes and applauds the Kendrick Fincher Memorial Foundation for its hard work and commitment to educating the public on the fatal effects of heat stroke. The foundation is named in honor of 13-year-old Kendrick Fincher, a child who died tragically of heat stroke while attending football practice. In an effort to prevent the reoccurrence of such a tragedy, the foundation has dispensed over 130,000 water bottles and informational pamphlets to children and athletes throughout the United States.

I want to thank my colleague, Representative BOOZMAN, for his hard work in bringing this resolution to the floor. I urge my colleagues to join me in support of H. Con. Res. 296.

Mr. Speaker, I reserve the balance of my time.

Mr. TERRY. Mr. Speaker, I yield myself such time has I may consume.

I, too, rise in support of H. Con. Res. 296, recognizing the goals and ideals of National Heat Stroke Awareness Month. I credit and thank my colleague from Arkansas, Mr. BOOZMAN, for drafting and introducing this resolution.

As August hits, more people will be traveling to the beach, going to neighborhood pools, working outside, and football practice starts for many high schools and colleges. As people enjoy the outdoors, it is important for Americans to be cognizant of the dangers of heat stroke.

Friday, August 1, 2008, will mark the beginning of the National Heat Stroke Awareness Month. This month serves to commemorate the importance of educating Americans and their children about the need to stay hydrated during hot summer months, understand how much water and fluids their bodies need to replenish, and the appropriate ways to avoid heat-related illnesses.

National Heat Stroke Awareness Month is an important reminder that Americans and children participating in athletics continue to be impacted by the intense heat and physical activity that can dehydrate the body or even lead to a heat stroke. Local communities should work together to provide avenues to prevent dehydration, as well as ensuring that children, who are more vulnerable to heat illness, have access to fluids to rehydrate and a cool place to rest during hot summer months.

According to the National Centers for Health Statistics, 7,046 deaths were attributed to excessive heat exposure from 1979 to 1997, or an average of 371 deaths per year. Heat stroke and death from excessive heat exposure are more common during summers with prolonged heat waves, such as in 1980. Department statistics show that children and the elderly are among the hardest hit populations in the U.S., and, if not treated properly, it can be fatal.

A recent study found that 70 percent of after-school athletes arrive on the field already dehydrated, and because children have a reduced ability to dissipate heat through sweating, it puts them at an increased risk for a heat-related illness. It is alarming when 50 percent of those diagnosed with heat stroke will die, and it is important that parents, coaches, teachers and other members of the community look for the warning signs of heat illness.

I would like to thank Rhonda and Mike Fincher, who have worked tirelessly to raise awareness of the heat-related illness after they tragically lost their 13-year-old son Kendrick during an August preseason football practice. In honor of their son, they have founded the Kendrick Fincher Memorial Foundation, and have provided student athletes with the information and equipment needed to ensure they will not suffer from heat stroke.

I would also like to thank the Gatorade Company for leading the National Beat the Heat Campaign aimed at educating parents and football coaches about the importance of hydration in order to keep athletes safe in hot summer months.

□ 1515

Mr. Speaker, I would like to thank Congressman BOOZMAN once again for introducing this resolution, my colleagues on Energy and Commerce, Mr. PALLONE and Mr. DINGELL and Mr. BARTON, to make sure that it got to the House floor in a rapid, quick motion. I urge all of my colleagues to support this important resolution commemorating August as National Heat Stroke Awareness Month.

I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. TERRY. Mr. Speaker, at this time I yield such time as he may consume to the author of this resolution, the gentleman from Arkansas.

Mr. BOOZMAN. Mr. Speaker, I rise in support of H. Con. Res. 296, which expresses the sense of Congress that August should be designated as Heat Stroke Awareness Month, which will provide opportunities to educate parents, educators, and athletes about heat stroke, and prevent future deaths.

On August 7, 1995, 13-year-old Kendrick Fincher of Rogers, Arkansas was at football practice for the Elmwood Riders when he experienced heat stroke. After 18 days in intensive care at Children's Hospital in Little Rock, Arkansas, Kendrick died from complications of heat stroke. I was on the school board in Rogers during this time, and this truly was a terrible tragedy for our community.

Since then, Kendrick's parents, Mike and Rhonda Fincher, have committed themselves to ensuring that no other

parent has to experience the heartache of a very preventable death. They established the Kendrick Fincher Memorial Foundation to make certain children have proper hydration during athletic activities and that they have squeeze bottles with them at all events. Because of their dedicated work, procedures have been changed in sports programs at the local schools to help prevent a similar accident.

In addition, Gatorade and the National Football League have worked with the foundation to lead a nationwide Beat the Heat campaign aimed at educating parents and football coaches about the importance of hydration in order to keep athletes safe in the hot summer months.

This resolution also recognizes the Kendrick Fincher Memorial Foundation for all of its efforts in promoting awareness about heat stroke, and it encourages other national and community organizations to get involved in this important fight.

I would also like to thank Chairman DINGELL, Ranking Member BARTON, Mr. PALLONE, and Mr. TERRY for their help in bringing this forward now as we go into August during the season when, as we are experiencing today, these things are very, very possible. I appreciate them bringing it in a timely fashion, and I encourage my colleagues to support H. Con. Res. 296.

Mr. TERRY. Mr. Speaker, I would just conclude by suggesting that if there are any coaches of youth teams that play outside, they should check out the Kendrick Fincher Memorial Foundation's Web site for advice on how to protect the kids on their team.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 296, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

PRIMARY LATERAL SCLEROSIS AWARENESS MONTH

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 896) recognizing the need to pursue research into the causes, a treatment, and an eventual cure for primary lateral sclerosis, supporting the goals and ideals of the Hardy Brown Primary Lateral Sclerosis Awareness Month, and for other purposes, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 896

Whereas primary lateral sclerosis (PLS) is a rare neuromuscular disorder characterized by progressive muscle spasticity and weakness in the voluntary muscles;

Whereas PLS belongs to a group of disorders known as motor neuron diseases. Motor neuron diseases develop when the nerve cells that control voluntary muscle movement degenerate and die, causing spasticity and weakness in the muscles they control;

Whereas Hardy Brown has worked tirelessly to raise funds for research for ALS ''Lou Gehrig's disease'' which is a fatal motor neuron disease, and is now diagnosed with primary lateral sclerosis;

Whereas the onset of PLS usually occurs after age 50. Symptoms may include difficulty with balance, weakness and stiffness in the legs, and clumsiness. Other symptoms may include spasticity (sudden, involuntary muscle spasms) in the hands, feet, or legs; foot dragging, and speech problems due to involvement of the facial muscles;

Whereas primary lateral sclerosis affects individual people in different ways, and as a result, treatment programs will vary;

Whereas there currently is no cure for primary lateral sclerosis, nor a way to slow or reverse the progressive disability of this disorder;

Whereas the Spastic Paraplegia Foundation is a volunteer-managed and operated non-profit organization devoted to finding the causes and cures for two groups of neurodegenerative disorders called Spastic Paraplegia (Hereditary and Apparently Sporadic) and Primary Lateral Sclerosis (PLS);

Whereas the National Institute of Neurological Disorders and Stroke at the National Institutes of Health conducts a broad range of research on neuromuscular disorders such as PLS. This research is aimed at developing techniques to diagnose, treat, prevent, and ultimately cure these devastating diseases; and

Whereas the month of February of 2009 would be an appropriate time to recognize Primary Lateral Sclerosis Awareness Month in order to educate communities across the Nation about primary lateral sclerosis and the need for research funding, accurate diagnosis, and effective treatments: Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes the need to continue research into the causes, treatment, and an eventual cure for primary lateral sclerosis;

(2) commends those hospitals, community clinics, educational institutes, and other organizations that are—

(A) working to increase awareness of primary lateral sclerosis; and

(B) conducting research for methods to help patients suffering from primary lateral sclerosis;

(3) congratulates the work of the Spastic Paraplegia Foundation for its great efforts to educate, support, and provide hope for individuals who suffer from primary lateral sclerosis, while funding research to help find a cure for this disorder;

(4) supports the designation of an appropriate time to recognize ''Primary Lateral Sclerosis Awareness Month''; and

(5) calls upon the people of the United States to observe the month with appropriate programs and activities.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Nebraska (Mr. TERRY) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

I rise in strong support of H. Res. 896, a resolution expressing support for Primary Lateral Sclerosis Awareness Month, and for the need to pursue research on this debilitating disease.

Primary lateral sclerosis, or PLS, is a rare neuromuscular disorder characterized by progressive muscle spasms and weakness. As many as 2,000 Americans suffer from PLS, which usually affects adults during midlife. The causes of PLS are unknown and the disease currently has no cure. However, some individuals with PLS can increase their comfort level and ability to function through therapy and treatment. ALS, also known as Lou Gehrig's disease, is a fatal motor neuron disease within the same family of disorders.

H. Res. 896 encourages Congress to continue support for further work on PLS. It would promote further research into the causes, treatment, and eventual cure for PLS, and seek to increase awareness about the disease.

Earlier in the session of the 110th Congress, the House passed H.R. 2295, the ALS Registry Act, and this bill would help to establish a central registry for ALS and other motor neuron disorders like PLS, so that research efforts are timely and targeted.

Finally, this resolution, Mr. Speaker, recognizes those who have already made efforts to support individuals who suffer from PLS. One such individual is Hardy L. Brown, co-publisher of the Black Voice News, who has personally dedicated himself to raising funds for ALS research and has now been diagnosed with PLS himself.

I would like to thank my colleague, Representative BACA, for his hard work in bringing this resolution before us today, and I urge my colleagues to join me in support of H. Res. 896.

Mr. Speaker, I reserve the balance of my time.

Mr. TERRY. Mr. Speaker, I too rise in support of House Resolution 896, recognizing February of 2009 as Primary Lateral Sclerosis Awareness Month. I also wish to thank Mr. BACA for authoring this resolution.

While primary lateral sclerosis is not fatal, there is no cure, and the progression of symptoms varies. Some Americans affected by this disease may retain the ability to walk without assistance, but others eventually require wheelchairs, canes, or other assistive devices that limit their mobility.

Because primary lateral sclerosis is such a rare neuromuscular disease, its diagnosis is often delayed because of its resemblance to ALS, or better known as Lou Gehrig's disease. In PLS, there is no evidence of the degeneration of spinal motor neurons or muscle

wasting that occurs in ALS, and it is characterized by progressive muscle weakness in the voluntary muscles. PLS belongs to a group of disorders known as motor neuron diseases that develop when the nerve cells that control voluntary muscle movement degenerate and die. This usually occurs after the age of 50, and causes a gradual weakness in the muscles.

Symptoms for the individuals afflicted by the disease may include difficulty with balance, weakness and stiffness in the legs, and clumsiness. Other symptoms may include sudden and involuntary muscle spasms in the hands, feet, or legs, and maybe speech problems due to the involvement of the facial muscles. The disease, which scientists believe is not hereditary, progresses gradually over a number of years or even decades.

The efforts of the Spastic Paraplegia Foundation have been paramount in raising funds dedicated to finding cures and providing information about PLS. Thanks to the dedication and hard work of many individuals at the Spastic Paraplegic Foundation, in just 5 years, more than $1 million has been targeted to research on SPF conditions and thousands of people have been helped.

I would like to thank the National Institute of Neurological Disorders and Stroke at the National Institute of Health for conducting a broad range of research on neuromuscular disorders such as PLS. Their research has been aimed at developing techniques to diagnose, treat, prevent, and ultimately cure these devastating diseases.

In closing, I would like to thank again the author of this resolution, Mr. JOE BACA, my friend from California, for raising public awareness about PLS. I encourage all of my colleagues to vote in favor of this resolution.

I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I am pleased to yield 5 minutes to the gentleman from California (Mr. BACA), who is the author of this resolution.

Mr. BACA. Mr. Speaker, I rise in support of H. Res. 896, the Primary Lateral Sclerosis Awareness Month Act. I would like to thank Chairman DINGELL, Chairman PALLONE, Ranking Member NATHAN DEAL, along with Mr. TERRY, for helping guide this legislation through the committee.

Primary lateral sclerosis, commonly referred to as PLS, is a neurological disorder that affects the cells that control the voluntary muscles. PLS is similar to ALS, often called Lou Gehrig's disease.

Can you imagine someone who is diagnosed with PLS, but yet they are told that it is ALS and in fact it was PLS that they were diagnosed, and thinking that they only had X amount of time to live, its impact it has on the family members and others as they begin to look at that disease because not enough research has been done? That is devastating to the individuals and the family members who are diagnosed. That is why it is important that we do the research.

This illness is, of course, named after the famous Yankee baseball player who suffered and died of ALS before we knew much about it. As with many other neurological disorders, once the nerve cells that control the voluntary muscles are affected, a person's physical ability to function becomes very difficult.

Symptoms of PLS include difficulties with balance, sudden involuntary muscle spasms in the hands, feet, legs, and speech problems when the facial muscles are affected. But these symptoms are not unique to PLS alone. PLS is often very difficult to diagnose because the symptoms vary, and may progress slowly over a period of time of many years. I would rather have someone be diagnosed with the right PLS versus ALS to know that they are going to live a lot longer.

Because of this, many Americans are still unaware of the severe nature of PLS, even though the disorder was first discovered in 1850 in France. That is why we need to continue with greater and more expansive research.

My resolution serves to raise awareness across the Nation by urging all Americans to recognize February of 2009 as PLS Awareness Month. This resolution emphasizes the need of greater funding and more research to combat neuromuscular disease. With this bill, Congress is helping educate our doctors and nurses and the rest of the medical community about PLS.

However, there are many courageous and dedicated individuals who are doing this already.

One is my good friend, Hardy Brown, who is from my district and, of course, owner of the Black Voice Newspaper in California. He has dedicated his life to serve as a voice for underrepresented communities in the Inland Empire. Throughout his life, Hardy Brown has done a tremendous job in the community raising awareness of Lou Gehrig's disease. Now he is diagnosed with PLS. Hardy Brown, once a vibrant, active leader, is now in a wheelchair doing what he can despite difficulties moving, speaking, and typing.

Another individual, Tyonja Bathgate from Maryland, whose husband was diagnosed with PLS, has torn herself from her husband's bedside to advocate on behalf of this issue.

We want to thank these individuals and all others who have worked to raise the awareness of these conditions. But we must do more, and urging the establishment of a PLS Awareness Month is a step in the right direction. There is currently no cure for PLS, and hopefully one day we will find a cure. God willing, we will do that.

Treatment and symptoms vary from person to person, and the age of onset is generally between the ages of 35 to 66, and, as it was stated, over 2,000 have been diagnosed with this.

□ 1530

Because of the similar symptoms, researchers believe that PLS patients are often diagnosed with ALS, and I have already stated the effects it has on families when they are told that.

Most of us have heard of Lou Gehrig's disease, but this legislation today will help raise the awareness and stress the importance of a very familiar disorder. The medical community must be able to properly diagnose those individuals who suffer from PLS and other neuromuscular disease to ensure proper care and treatment.

I urge my colleagues to vote for H. Res. 896, and join me and all individuals and organizations in this effort to fight this devastating illness. And I want to thank again Mr. PALLONE, Mr. TERRY for helping us with this legislation and many of the others that will support this to make sure that not many other individuals suffer from this type of disease that will affect others as well.

Mr. TERRY. We have no further speakers, so I will just once again thank Mr. BACA for writing this resolution and bringing it, Mr. PALLONE, Mr. DINGELL, Mr. BARTON for making sure that it, in such a speedy manner, got to the House floor.

I yield back.

Mr. PALLONE. Mr. Speaker, I have no further requests for time as well, and I yield back the balance of my time and urge support for the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and agree to the resolution, H. Res. 896, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The title was amended so as to read: ''A resolution recognizing the need to pursue research into the causes, a treatment, and an eventual cure for primary lateral sclerosis, supporting the goals and ideals of Primary Lateral Sclerosis Awareness Month, and for other purposes.''.

A motion to reconsider was laid on the table.

ANIMAL DRUG USER FEE AMENDMENTS OF 2008

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6432) to amend the Federal Food, Drug, and Cosmetic Act to revise and extend the animal drug user fee program, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6432

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TABLE OF CONTENTS.

The table of contents of this Act is as follows:

SEC. 2. REFERENCES IN ACT.

Except as otherwise specified, amendments made by this Act to a section or other provision of law are amendments to such section or other provision of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.).

TITLE I—ANIMAL DRUG USER FEE AMENDMENTS

SEC. 101. SHORT TITLE; FINDING.

(a) SHORT TITLE.—This title may be cited as the ''Animal Drug User Fee Amendments of 2008''.

(b) FINDING.—Congress finds that the fees authorized by the amendments made in this title will be dedicated toward expediting the animal drug development process and the review of new and supplemental animal drug applications and investigational animal drug submissions as set forth in the goals identified, for purposes of part 4 of subchapter C of chapter VII of the Federal Food, Drug, and Cosmetic Act, in the letters from the Secretary of Health and Human Services to the Chairman of the Committee on Energy and Commerce of the House of Representatives and the Chairman of the Committee on Health, Education, Labor, and Pensions of the Senate as set forth in the Congressional Record.

SEC. 102. DEFINITIONS.

Section 739 (21 U.S.C. 379j–11) is amended—

(1) in paragraph (6), by striking '', except for an approved application for which all subject products have been removed from listing under section 510'' and inserting ''that has not been withdrawn by the applicant and for which approval has not been withdrawn by the Secretary'';

(2) in paragraph (8)(H), by striking ''but not such activities after an animal drug has been approved'' and inserting ''but not after such application has been approved'';

(3) in paragraph (10), by striking ''year being 2003'' and inserting ''month being October 2002'';

(4) by redesignating paragraph (11) as paragraph (12); and

(5) by inserting after paragraph (10) the following:

''(11) The term 'person' includes an affiliate thereof.''.

SEC. 103. AUTHORITY TO ASSESS AND USE ANIMAL DRUG FEES.

(a) TYPES OF FEES.—Section 740(a) (21 U.S.C. 379j–12(a)) is amended—

(1) in paragraph (1)(A)(i), by inserting after ''for an animal drug application'' the following: '', except an animal drug application subject to the criteria set forth in section 512(d)(4)''; and

(2) by amending paragraph (1)(A)(ii) to read as follows:

''(ii) A fee established in subsection (b), in an amount that is equal to 50 percent of the amount of the fee under clause (i), for—

''(I) a supplemental animal drug application for which safety or effectiveness data are required; and

''(II) an animal drug application subject to the criteria set forth in section 512(d)(4).''.

(b) FEE AMOUNTS.—

(1) TOTAL FEE REVENUES FOR APPLICATION AND SUPPLEMENT FEES.—Section 740(b)(1) (21 U.S.C. 379j–12(b)(1)) is amended—

(A) by striking ''and supplemental animal drug application fees'' and inserting ''and supplemental and other animal drug application fees''; and

(B) by striking ''$1,250,000'' and all that follows through the period at the end and inserting ''$3,815,000 for fiscal year 2009, $4,320,000 for fiscal year 2010, $4,862,000 for fiscal year 2011, $5,442,000 for fiscal year 2012, and $6,061,000 for fiscal year 2013.''.

(2) TOTAL FEE REVENUES FOR PRODUCT FEES.—Section 740(b)(2) (21 U.S.C. 379j–12(b)(2)) is amended by striking ''$1,250,000'' and all that follows through the period at the end and inserting ''$3,815,000 for fiscal year 2009, $4,320,000 for fiscal year 2010, $4,862,000 for fiscal year 2011, $5,442,000 for fiscal year 2012, and $6,061,000 for fiscal year 2013.''.

(3) TOTAL FEE REVENUES FOR ESTABLISHMENT FEES.—Section 740(b)(3) (21 U.S.C. 379j–12(b)(3)) is amended by striking ''$1,250,000'' and all that follows through the period at the end and inserting ''$3,815,000 for fiscal year 2009, $4,320,000 for fiscal year 2010, $4,862,000 for fiscal year 2011, $5,442,000 for fiscal year 2012, and $6,061,000 for fiscal year 2013.''.

(4) TOTAL FEE REVENUES FOR SPONSOR FEES.—Section 740(b)(4) (21 U.S.C. 379j–12(b)(4)) is amended by striking ''$1,250,000'' and all that follows through the period at the end and inserting ''$3,815,000 for fiscal year 2009, $4,320,000 for fiscal year 2010, $4,862,000 for fiscal year 2011, $5,442,000 for fiscal year 2012, and $6,061,000 for fiscal year 2013.''.

(c) ADJUSTMENTS TO FEES.—Section 740(c) (21 U.S.C. 379j–12(c)) is amended—

(1) by striking paragraph (1);

(2) by redesignating paragraphs (2) through (5) as paragraphs (1) through (4), respectively;

(3) in paragraph (1), as so redesignated—

(A) in the matter preceding subparagraph (A), by striking ''After the fee revenues are adjusted for inflation in accordance with paragraph (1), the fee revenues shall be further adjusted each fiscal year after fiscal year 2004'' and inserting ''The fee revenues shall be adjusted each fiscal year after fiscal year 2009''; and

(B) in subparagraph (B), by striking '', as adjusted for inflation under paragraph (1)''; and

(4) in paragraph (2), as so redesignated—

(A) by striking ''2008'' each place it appears and inserting ''2013''; and

(B) by striking ''2009'' and inserting ''2014''.

(d) AUTHORIZATION OF APPROPRIATIONS.—Subparagraphs (A) through (E) of section 740(g)(3) (21 U.S.C. 379j–12(g)(3)) are amended to read as follows:

''(A) $15,260,000 for fiscal year 2009;

''(B) $17,280,000 for fiscal year 2010;

''(C) $19,448,000 for fiscal year 2011;

''(D) $21,768,000 for fiscal year 2012; and

''(E) $24,244,000 for fiscal year 2013;''.

(e) OFFSET.—Section 740(g)(4) (21 U.S.C. 379j–12(g)(4)) is amended to read as follows:

''(4) OFFSET.—If the sum of the cumulative amount of fees collected under this section for fiscal years 2009 through 2011 and the amount of fees estimated to be collected under this section for fiscal year 2012 exceeds the cumulative amount appropriated under paragraph (3) for the fiscal years 2009 through 2012, the excess amount shall be credited to the appropriation account of the Food and Drug Administration as provided in paragraph (1), and shall be subtracted from the amount of fees that would otherwise be authorized to be collected under this section pursuant to appropriation Acts for fiscal year 2013.''.

SEC. 104. REAUTHORIZATION; REPORTING REQUIREMENTS.

Part 4 of subchapter C of chapter VII (21 U.S.C. 379j–11 et seq.) is amended by inserting after section 740 the following:

''SEC. 740A. REAUTHORIZATION; REPORTING REQUIREMENTS.

''(a) PERFORMANCE REPORT.—Beginning with fiscal year 2009, not later than 60 days after the end of each fiscal year during which fees are collected under this part, the Secretary shall prepare and submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Health, Education, Labor, and Pensions of the Senate a report concerning the progress of the Food and Drug Administration in achieving the goals identified in the letters described in section 101(b) of the Animal Drug User Fee Amendments of 2008 toward expediting the animal drug development process and the review of the new and supplemental animal drug applications and investigational animal drug submissions during such fiscal year, the future plans of the Food and Drug Administration for meeting the goals, the review times for abbreviated new animal drug applications, and the administrative procedures adopted by the Food and Drug Administration to ensure that review times for abbreviated new animal drug applications are not increased from their current level due to activities under the user fee program.

''(b) FISCAL REPORT.—Beginning with fiscal year 2009, not later than 120 days after the end of each fiscal year during which fees are collected under this part, the Secretary shall prepare and submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Health, Education, Labor, and Pensions of the Senate a report on the implementation of the authority for such fees during such fiscal year and the use, by the Food and Drug Administration, of the fees collected during such fiscal year for which the report is made.

''(c) PUBLIC AVAILABILITY.—The Secretary shall make the reports required under subsections (a) and (b) available to the public on the Internet Web site of the Food and Drug Administration.

''(d) REAUTHORIZATION.—

''(1) CONSULTATION.—In developing recommendations to present to the Congress with respect to the goals, and plans for meeting the goals, for the process for the review of animal drug applications for the first 5 fiscal years after fiscal year 2013, and for the reauthorization of this part for such fiscal years, the Secretary shall consult with—

''(A) the Committee on Energy and Commerce of the House of Representatives;

''(B) the Committee on Health, Education, Labor, and Pensions of the Senate;

''(C) scientific and academic experts;

''(D) veterinary professionals;

''(E) representatives of patient and consumer advocacy groups; and

''(F) the regulated industry.

''(2) PRIOR PUBLIC INPUT.—Prior to beginning negotiations with the regulated industry on the reauthorization of this part, the Secretary shall—

''(A) publish a notice in the Federal Register requesting public input on the reauthorization;

''(B) hold a public meeting at which the public may present its views on the reauthorization, including specific suggestions for changes to the goals referred to in subsection (a);

''(C) provide a period of 30 days after the public meeting to obtain written comments from the public suggesting changes to this part; and

''(D) publish the comments on the Food and Drug Administration's Internet Web site.

''(3) PERIODIC CONSULTATION.—Not less frequently than once every 4 months during negotiations with the regulated industry, the Secretary shall hold discussions with representatives of veterinary, patient, and consumer advocacy groups to continue discussions of their views on the reauthorization and their suggestions for changes to this part as expressed under paragraph (2).

''(4) PUBLIC REVIEW OF RECOMMENDATIONS.—After negotiations with the regulated industry, the Secretary shall—

''(A) present the recommendations developed under paragraph (1) to the Congressional committees specified in such paragraph;

''(B) publish such recommendations in the Federal Register;

''(C) provide for a period of 30 days for the public to provide written comments on such recommendations;

''(D) hold a meeting at which the public may present its views on such recommendations; and

''(E) after consideration of such public views and comments, revise such recommendations as necessary.

''(5) TRANSMITTAL OF RECOMMENDATIONS.—Not later than January 15, 2013, the Secretary shall transmit to the Congress the revised recommendations under paragraph (4), a summary of the views and comments received under such paragraph, and any changes made to the recommendations in response to such views and comments.

''(6) MINUTES OF NEGOTIATION MEETINGS.—

''(A) PUBLIC AVAILABILITY.—Before presenting the recommendations developed under paragraphs (1) through (5) to the Congress, the Secretary shall make publicly available, on the Internet Web site of the Food and Drug Administration, minutes of all negotiation meetings conducted under this subsection between the Food and Drug Administration and the regulated industry.

''(B) CONTENT.—The minutes described under subparagraph (A) shall summarize any substantive proposal made by any party to the negotiations as well as significant controversies or differences of opinion during the negotiations and their resolution.''.

SEC. 105. ANTIMICROBIAL ANIMAL DRUG DISTRIBUTION REPORTS.

(a) REPORTS.—Section 512(l) (21 U.S.C. 360b(l)) is amended by adding at the end the following:

''(3)(A) In the case of each new animal drug described in paragraph (1) that contains an antimicrobial active ingredient, the sponsor of the drug shall submit an annual report to the Secretary on the amount of each antimicrobial active ingredient in the drug that is sold or distributed for use in food-producing animals, including information on any distributor-labeled product.

''(B) Each report under this paragraph shall specify the amount of each antimicrobial active ingredient—

''(i) by container size, strength, and dosage form;

''(ii) by quantities distributed domestically and quantities exported; and

''(iii) by dosage form, including, for each such dosage form, a listing of the target animals, indications, and production classes that are specified on the approved label of the product.

''(C) Each report under this paragraph shall—

''(i) be submitted not later than March 31 each year;

''(ii) cover the period of the preceding calendar year; and

''(iii) include separate information for each month of such calendar year.

''(D) The Secretary may share information reported under this paragraph with the Antimicrobial Resistance Task Force established under section 319E of the Public Health Service Act.

''(E) The Secretary shall make summaries of the information reported under this paragraph publicly available, except that—

''(i) the summary data shall be reported by antimicrobial class, and no class with fewer than 3 distinct sponsors of approved applications shall be independently reported; and

''(ii) the data shall be reported in a manner consistent with protecting both national security and confidential business information.''.

(b) FIRST REPORT.—For each new animal drug that is subject to the reporting requirement under section 512(l)(3) of the Federal Food, Drug, and Cosmetic Act, as added by subsection (a), and for which an approval of an application filed pursuant to section 512(b) or 571 of such Act is in effect on the date of the enactment of this title, the Secretary of Health and Human Services shall require the sponsor of the drug to submit the first report under such section 512(l)(3) for the drug not later than March 31, 2010.

(c) SEPARATE REPORT.—The reports required under section 512(l)(3) of the Federal Food, Drug, and Cosmetic Act, as added by subsection (a), shall be separate from periodic drug experience reports that are required under section 514.80(b)(4) of title 21, Code of Federal Regulations (as in effect on the date of the enactment of this title).

SEC. 106. SAVINGS CLAUSE.

Notwithstanding section 5 of the Animal Drug User Fee Act of 2003 (21 U.S.C. 379j–11 note), and notwithstanding the amendments made by this title, part 4 of subchapter C of chapter VII of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 379j–11 et seq.), as in effect on the day before the date of the enactment of this title, shall continue to be in effect with respect to animal drug applications and supplemental animal drug applications (as defined in such part as of such day) that on or after September 1, 2003, but before October 1, 2008, were accepted by the Food and Drug Administration for filing with respect to assessing and collecting any fee required by such part for a fiscal year prior to fiscal year 2009.

SEC. 107. EFFECTIVE DATE.

The amendments made by sections 102, 103, and 104 shall take effect on October 1, 2008, and fees under part 4 of subchapter C of chapter VII of the Federal Food, Drug, and Cosmetic Act, as amended by this title, shall be assessed for all animal drug applications and supplemental animal drug applications received on or after such date, regardless of the date of the enactment of this title.

SEC. 108. SUNSET DATES.

(a) AUTHORIZATION.—The amendments made by sections 102 and 103 cease to be effective October 1, 2013.

(b) REPORTING REQUIREMENTS.—The amendment made by section 104 ceases to be effective January 31, 2014.

TITLE II—ANIMAL GENERIC DRUG USER FEE

SEC. 201. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This title may be cited as the ''Animal Generic Drug User Fee Act of 2008''.

(b) FINDINGS.—Congress finds as follows:

(1) Prompt approval of abbreviated applications for safe and effective generic new animal drugs will reduce animal healthcare costs and promote the well-being of animal health and the public health.

(2) Animal health and the public health will be served by making additional funds available for the purpose of augmenting the resources of the Food and Drug Administration that are devoted to the process for the review of abbreviated applications for the approval of generic new animal drugs.

(3) The fees authorized by this title will be dedicated toward expediting the generic new animal drug development process and the review of abbreviated applications for generic new animal drugs, supplemental abbreviated applications for generic new animal drugs, and investigational submissions for generic new animal drugs as set forth in the goals identified in the letters from the Secretary of Health and Human Services to the Chairman of the Committee on Energy and Commerce of the House of Representatives and the Chairman of the Committee on Health, Education, Labor, and Pensions of the Senate as set forth in the Congressional Record.

SEC. 202. FEES RELATING TO ABBREVIATED APPLICATIONS FOR GENERIC NEW ANIMAL DRUGS.

(a) REDESIGNATION.—Chapter VII (21 U.S.C. 371 et seq.) is amended by redesignating sections 741, 742, and 746 as sections 745, 746, and 749, respectively.

(b) AUTHORITY TO ASSESS AND USE GENERIC NEW ANIMAL DRUG FEES.—Subchapter C of chapter VII of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 379f et seq.) is amended by adding at the end the following:

''PART 5—FEES RELATING TO GENERIC NEW ANIMAL DRUGS

''SEC. 741. AUTHORITY TO ASSESS AND USE GENERIC NEW ANIMAL DRUG FEES.

''(a) TYPES OF FEES.—Beginning with respect to fiscal year 2009, the Secretary shall assess and collect fees in accordance with this section as follows:

''(1) ABBREVIATED APPLICATION FEE.—

''(A) IN GENERAL.—Each person that submits, on or after July 1, 2008, an abbreviated application for a generic new animal drug shall be subject to a fee as established in subsection (b) for such an application.

''(B) PAYMENT.—The fee required by subparagraph (A) shall be due upon submission of the abbreviated application.

''(C) EXCEPTION FOR PREVIOUSLY FILED APPLICATION.—If an abbreviated application was submitted by a person that paid the fee for such application, was accepted for filing, and was not approved or was withdrawn (without a waiver or refund), the submission of an abbreviated application for the same product by the same person (or the person's licensee, assignee, or successor) shall not be subject to a fee under subparagraph (A).

''(D) REFUND OF FEE IF APPLICATION REFUSED FOR FILING.—The Secretary shall refund 75 percent of the fee paid under subparagraph (B) for any abbreviated application which is refused for filing.

''(E) REFUND OF FEE IF APPLICATION WITHDRAWN.—If an abbreviated application is withdrawn after the application was filed, the Secretary may refund the fee or portion of the fee paid under subparagraph (B) if no substantial work was performed on the application after the application was filed. The Secretary shall have the sole discretion to refund the fee under this subparagraph. A determination by the Secretary concerning a refund under this subparagraph shall not be reviewable.

''(2) GENERIC NEW ANIMAL DRUG PRODUCT FEE.—Each person—

''(A) who is named as the applicant in an abbreviated application or supplemental abbreviated application for a generic new animal drug product which has been submitted for listing under section 510, and

''(B) who, after September 1, 2008, had pending before the Secretary an abbreviated

application or supplemental abbreviated application,
shall pay for each such generic new animal drug product the annual fee established in subsection (b). Such fee shall be payable for the fiscal year in which the generic new animal drug product is first submitted for listing under section 510, or is submitted for relisting under section 510 if the generic new animal drug product has been withdrawn from listing and relisted. After such fee is paid for that fiscal year, such fee shall be payable on or before January 31 of each year. Such fee shall be paid only once for each generic new animal drug product for a fiscal year in which the fee is payable.

''(3) GENERIC NEW ANIMAL DRUG SPONSOR FEE.—

''(A) IN GENERAL.—Each person—

''(i) who meets the definition of a generic new animal drug sponsor within a fiscal year, and

''(ii) who, after September 1, 2008, had pending before the Secretary an abbreviated application, a supplemental abbreviated application, or an investigational submission,
shall be assessed an annual fee established under subsection (b). The fee shall be paid on or before January 31 of each year.

''(B) AMOUNT OF FEE.—Each generic new animal drug sponsor shall pay only 1 such fee each fiscal year, as follows:

''(i) 100 percent of the amount of the generic new animal drug sponsor fee published for that fiscal year under subsection (c)(3) for an applicant with more than 6 approved abbreviated applications.

''(ii) 75 percent of the amount of the generic new animal drug sponsor fee published for that fiscal year under subsection (c)(3) for an applicant with more than 1 and fewer than 7 approved abbreviated applications.

''(iii) 50 percent of the amount of the generic new animal drug sponsor fee published for that fiscal year under subsection (c)(3) for an applicant with 1 or fewer approved abbreviated applications.

''(b) FEE AMOUNTS.—Except as provided in subsection (a)(1) and subsections (c), (d), (f), and (g), the fees required under subsection (a) shall be established to generate fee revenue amounts as follows:

''(1) TOTAL FEE REVENUES FOR APPLICATION FEES.—The total fee revenues to be collected in abbreviated application fees under subsection (a)(1) shall be $1,449,000 for fiscal year 2009, $1,532,000 for fiscal year 2010, $1,619,000 for fiscal year 2011, $1,712,000 for fiscal year 2012, and $1,809,000 for fiscal year 2013.

''(2) TOTAL FEE REVENUES FOR PRODUCT FEES.—The total fee revenues to be collected in generic new animal drug product fees under subsection (a)(2) shall be $1,691,000 for fiscal year 2009, $1,787,000 for fiscal year 2010, $1,889,000 for fiscal year 2011, $1,997,000 for fiscal year 2012, and $2,111,000 for fiscal year 2013.

''(3) TOTAL FEE REVENUES FOR SPONSOR FEES.—The total fee revenues to be collected in generic new animal drug sponsor fees under subsection (a)(3) shall be $1,691,000 for fiscal year 2009, $1,787,000 for fiscal year 2010, $1,889,000 for fiscal year 2011, $1,997,000 for fiscal year 2012, and $2,111,000 for fiscal year 2013.

''(c) ADJUSTMENTS.—

''(1) WORKLOAD ADJUSTMENT.—The fee revenues shall be adjusted each fiscal year after fiscal year 2009 to reflect changes in review workload. With respect to such adjustment:

''(A) This adjustment shall be determined by the Secretary based on a weighted average of the change in the total number of abbreviated applications for generic new animal drugs, manufacturing supplemental abbreviated applications for generic new animal drugs, investigational generic new animal drug study submissions, and investigational generic new animal drug protocol submissions submitted to the Secretary. The Secretary shall publish in the Federal Register the fees resulting from this adjustment and the supporting methodologies.

''(B) Under no circumstances shall this workload adjustment result in fee revenues for a fiscal year that are less than the fee revenues for that fiscal year established in subsection (b).

''(2) FINAL YEAR ADJUSTMENT.—For fiscal year 2013, the Secretary may further increase the fees to provide for up to 3 months of operating reserves of carryover user fees for the process for the review of abbreviated applications for generic new animal drugs for the first 3 months of fiscal year 2014. If the Food and Drug Administration has carryover balances for the process for the review of abbreviated applications for generic new animal drugs in excess of 3 months of such operating reserves, then this adjustment shall not be made. If this adjustment is necessary, then the rationale for the amount of the increase shall be contained in the annual notice setting fees for fiscal year 2013.

''(3) ANNUAL FEE SETTING.—The Secretary shall establish, 60 days before the start of each fiscal year beginning after September 30, 2008, for that fiscal year, abbreviated application fees, generic new animal drug sponsor fees, and generic new animal drug product fees based on the revenue amounts established under subsection (b) and the adjustments provided under this subsection.

''(4) LIMIT.—The total amount of fees charged, as adjusted under this subsection, for a fiscal year may not exceed the total costs for such fiscal year for the resources allocated for the process for the review of abbreviated applications for generic new animal drugs.

''(d) FEE WAIVER OR REDUCTION.—The Secretary shall grant a waiver from or a reduction of 1 or more fees assessed under subsection (a) where the Secretary finds that the generic new animal drug is intended solely to provide for a minor use or minor species indication.

''(e) EFFECT OF FAILURE TO PAY FEES.—An abbreviated application for a generic new animal drug submitted by a person subject to fees under subsection (a) shall be considered incomplete and shall not be accepted for filing by the Secretary until all fees owed by such person have been paid. An investigational submission for a generic new animal drug that is submitted by a person subject to fees under subsection (a) shall be considered incomplete and shall not be accepted for review by the Secretary until all fees owed by such person have been paid. The Secretary may discontinue review of any abbreviated application for a generic new animal drug, supplemental abbreviated application for a generic new animal drug, or investigational submission for a generic new animal drug from a person if such person has not submitted for payment all fees owed under this section by 30 days after the date upon which they are due.

''(f) ASSESSMENT OF FEES.—

''(1) LIMITATION.—Fees may not be assessed under subsection (a) for a fiscal year beginning after fiscal year 2008 unless appropriations for salaries and expenses of the Food and Drug Administration for such fiscal year (excluding the amount of fees appropriated for such fiscal year) are equal to or greater than the amount of appropriations for the salaries and expenses of the Food and Drug Administration for the fiscal year 2003 (excluding the amount of fees appropriated for such fiscal year) multiplied by the adjustment factor applicable to the fiscal year involved.

''(2) AUTHORITY.—If the Secretary does not assess fees under subsection (a) during any portion of a fiscal year because of paragraph (1) and if at a later date in such fiscal year the Secretary may assess such fees, the Secretary may assess and collect such fees, without any modification in the rate, for abbreviated applications, generic new animal drug sponsors, and generic new animal drug products at any time in such fiscal year notwithstanding the provisions of subsection (a) relating to the date fees are to be paid.

''(g) CREDITING AND AVAILABILITY OF FEES.—

''(1) IN GENERAL.—Fees authorized under subsection (a) shall be collected and available for obligation only to the extent and in the amount provided in advance in appropriations Acts. Such fees are authorized to be appropriated to remain available until expended. Such sums as may be necessary may be transferred from the Food and Drug Administration salaries and expenses appropriation account without fiscal year limitation to such appropriation account for salary and expenses with such fiscal year limitation. The sums transferred shall be available solely for the process for the review of abbreviated applications for generic new animal drugs.

''(2) COLLECTIONS AND APPROPRIATION ACTS.—

''(A) IN GENERAL.—The fees authorized by this section—

''(i) shall be retained in each fiscal year in an amount not to exceed the amount specified in appropriation Acts, or otherwise made available for obligation for such fiscal year; and

''(ii) shall only be collected and available to defray increases in the costs of the resources allocated for the process for the review of abbreviated applications for generic new animal drugs (including increases in such costs for an additional number of full-time equivalent positions in the Department of Health and Human Services to be engaged in such process) over such costs, excluding costs paid from fees collected under this section, for fiscal year 2008 multiplied by the adjustment factor.

''(B) COMPLIANCE.—The Secretary shall be considered to have met the requirements of subparagraph (A)(ii) in any fiscal year if the costs funded by appropriations and allocated for the process for the review of abbreviated applications for generic new animal drugs—

''(i) are not more than 3 percent below the level specified in subparagraph (A)(ii); or

''(ii)(I) are more than 3 percent below the level specified in subparagraph (A)(ii), and fees assessed for the fiscal year following the subsequent fiscal year are decreased by the amount in excess of 3 percent by which such costs fell below the level specified in subparagraph (A)(ii); and

''(II) such costs are not more than 5 percent below the level specified in subparagraph (A)(ii).

''(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for fees under this section—

''(A) $4,831,000 for fiscal year 2009;

''(B) $5,106,000 for fiscal year 2010;

''(C) $5,397,000 for fiscal year 2011;

''(D) $5,706,000 for fiscal year 2012; and

''(E) $6,031,000 for fiscal year 2013;
as adjusted to reflect adjustments in the total fee revenues made under this section and changes in the total amounts collected by abbreviated application fees, generic new animal drug sponsor fees, and generic new animal drug product fees.

''(4) OFFSET.—If the sum of the cumulative amount of fees collected under this section for the fiscal years 2009 through 2011 and the amount of fees estimated to be collected under this section for fiscal year 2012 exceeds the cumulative amount appropriated under paragraph (3) for the fiscal years 2009

through 2012, the excess amount shall be credited to the appropriation account of the Food and Drug Administration as provided in paragraph (1), and shall be subtracted from the amount of fees that would otherwise be authorized to be collected under this section pursuant to appropriation Acts for fiscal year 2013.

''(h) COLLECTION OF UNPAID FEES.—In any case where the Secretary does not receive payment of a fee assessed under subsection (a) within 30 days after it is due, such fee shall be treated as a claim of the United States Government subject to subchapter II of chapter 37 of title 31, United States Code.

''(i) WRITTEN REQUESTS FOR WAIVERS, REDUCTIONS, AND REFUNDS.—To qualify for consideration for a waiver or reduction under subsection (d), or for a refund of any fee collected in accordance with subsection (a), a person shall submit to the Secretary a written request for such waiver, reduction, or refund not later than 180 days after such fee is due.

''(j) CONSTRUCTION.—This section may not be construed to require that the number of full-time equivalent positions in the Department of Health and Human Services, for officers, employees, and advisory committees not engaged in the process of the review of abbreviated applications for generic new animal drugs, be reduced to offset the number of officers, employees, and advisory committees so engaged.

''(k) DEFINITIONS.—In this section and section 742:

''(1) ABBREVIATED APPLICATION FOR A GENERIC NEW ANIMAL DRUG.—The terms 'abbreviated application for a generic new animal drug' and 'abbreviated application' mean an abbreviated application for the approval of any generic new animal drug submitted under section 512(b)(2). Such term does not include a supplemental abbreviated application for a generic new animal drug.

''(2) ADJUSTMENT FACTOR.—The term 'adjustment factor' applicable to a fiscal year is the Consumer Price Index for all urban consumers (all items; United States city average) for October of the preceding fiscal year divided by—

''(A) for purposes of subsection (f)(1), such Index for October 2002; and

''(B) for purposes of subsection (g)(2)(A)(ii), such Index for October 2007.

''(3) COSTS OF RESOURCES ALLOCATED FOR THE PROCESS FOR THE REVIEW OF ABBREVIATED APPLICATIONS FOR GENERIC NEW ANIMAL DRUGS.—The term 'costs of resources allocated for the process for the review of abbreviated applications for generic new animal drugs' means the expenses incurred in connection with the process for the review of abbreviated applications for generic new animal drugs for—

''(A) officers and employees of the Food and Drug Administration, contractors of the Food and Drug Administration, advisory committees consulted with respect to the review of specific abbreviated applications, supplemental abbreviated applications, or investigational submissions, and costs related to such officers, employees, committees, and contractors, including costs for travel, education, and recruitment and other personnel activities;

''(B) management of information, and the acquisition, maintenance, and repair of computer resources;

''(C) leasing, maintenance, renovation, and repair of facilities and acquisition, maintenance, and repair of fixtures, furniture, scientific equipment, and other necessary materials and supplies; and

''(D) collecting fees under this section and accounting for resources allocated for the review of abbreviated applications, supplemental abbreviated applications, and investigational submissions.

''(4) FINAL DOSAGE FORM.—The term 'final dosage form' means, with respect to a generic new animal drug product, a finished dosage form which is approved for administration to an animal without substantial further manufacturing. Such term includes generic new animal drug products intended for mixing in animal feeds.

''(5) GENERIC NEW ANIMAL DRUG.—The term 'generic new animal drug' means a new animal drug that is the subject of an abbreviated application.

''(6) GENERIC NEW ANIMAL DRUG PRODUCT.—The term 'generic new animal drug product' means each specific strength or potency of a particular active ingredient or ingredients in final dosage form marketed by a particular manufacturer or distributor, which is uniquely identified by the labeler code and product code portions of the national drug code, and for which an abbreviated application for a generic new animal drug or a supplemental abbreviated application has been approved.

''(7) GENERIC NEW ANIMAL DRUG SPONSOR.—The term 'generic new animal drug sponsor' means either an applicant named in an abbreviated application for a generic new animal drug that has not been withdrawn by the applicant and for which approval has not been withdrawn by the Secretary, or a person who has submitted an investigational submission for a generic new animal drug that has not been terminated or otherwise rendered inactive by the Secretary.

''(8) INVESTIGATIONAL SUBMISSION FOR A GENERIC NEW ANIMAL DRUG.—The terms 'investigational submission for a generic new animal drug' and 'investigational submission' mean—

''(A) the filing of a claim for an investigational exemption under section 512(j) for a generic new animal drug intended to be the subject of an abbreviated application or a supplemental abbreviated application; or

''(B) the submission of information for the purpose of enabling the Secretary to evaluate the safety or effectiveness of a generic new animal drug in the event of the filing of an abbreviated application or supplemental abbreviated application for such drug.

''(9) PERSON.—The term 'person' includes an affiliate thereof (as such term is defined in section 735(11)).

''(10) PROCESS FOR THE REVIEW OF ABBREVIATED APPLICATIONS FOR GENERIC NEW ANIMAL DRUGS.—The term 'process for the review of abbreviated applications for generic new animal drugs' means the following activities of the Secretary with respect to the review of abbreviated applications, supplemental abbreviated applications, and investigational submissions:

''(A) The activities necessary for the review of abbreviated applications, supplemental abbreviated applications, and investigational submissions.

''(B) The issuance of action letters which approve abbreviated applications or supplemental abbreviated applications or which set forth in detail the specific deficiencies in abbreviated applications, supplemental abbreviated applications, or investigational submissions and, where appropriate, the actions necessary to place such applications, supplemental applications, or submissions in condition for approval.

''(C) The inspection of generic new animal drug establishments and other facilities undertaken as part of the Secretary's review of pending abbreviated applications, supplemental abbreviated applications, and investigational submissions.

''(D) Monitoring of research conducted in connection with the review of abbreviated applications, supplemental abbreviated applications, and investigational submissions.

''(E) The development of regulations and policy related to the review of abbreviated applications, supplemental abbreviated applications, and investigational submissions.

''(F) Development of standards for products subject to review.

''(G) Meetings between the agency and the generic new animal drug sponsor.

''(H) Review of advertising and labeling prior to approval of an abbreviated application or supplemental abbreviated application, but not after such application has been approved.

''(11) SUPPLEMENTAL ABBREVIATED APPLICATION FOR GENERIC NEW ANIMAL DRUG.—The terms 'supplemental abbreviated application for a generic new animal drug' and 'supplemental abbreviated application' mean a request to the Secretary to approve a change in an approved abbreviated application.''.

SEC. 203. ACCOUNTABILITY AND REPORTS.

Part 5 of subchapter C of chapter VII of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 379f et seq.), as added by section 202, is amended by inserting after section 741 the following:

''SEC. 742. REAUTHORIZATION; REPORTING REQUIREMENTS.

''(a) PERFORMANCE REPORTS.—Beginning with fiscal year 2009, not later than 60 days after the end of each fiscal year during which fees are collected under this part, the Secretary shall prepare and submit to the Committee on Health, Education, Labor, and Pensions of the Senate, and the Committee on Energy and Commerce of the House of Representatives a report concerning the progress of the Food and Drug Administration in achieving the goals identified in the letters described in section 201(3) of the Animal Generic Drug User Fee Act of 2008 toward expediting the generic new animal drug development process and the review of abbreviated applications for generic new animal drugs, supplemental abbreviated applications for generic new animal drugs, and investigational submissions for generic new animal drugs during such fiscal year.

''(b) FISCAL REPORT.—Beginning with fiscal year 2009, not later than 120 days after the end of each fiscal year during which fees are collected under this part, the Secretary shall prepare and submit to Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the implementation of the authority for such fees during such fiscal year and the use, by the Food and Drug Administration, of the fees collected during such fiscal year for which the report is made.

''(c) PUBLIC AVAILABILITY.—The Secretary shall make the reports required under subsections (a) and (b) available to the public on the Internet Web site of the Food and Drug Administration.

''(d) REAUTHORIZATION.—

''(1) CONSULTATION.—In developing recommendations to present to Congress with respect to the goals, and plans for meeting the goals, for the process for the review of abbreviated applications for generic new animal drugs for the first 5 fiscal years after fiscal year 2013, and for the reauthorization of this part for such fiscal years, the Secretary shall consult with—

''(A) the Committee on Energy and Commerce of the House of Representatives;

''(B) the Committee on Health, Education, Labor, and Pensions of the Senate;

''(C) scientific and academic experts;

''(D) veterinary professionals;

''(E) representatives of patient and consumer advocacy groups; and

''(F) the regulated industry.

''(2) PRIOR PUBLIC INPUT.—Prior to beginning negotiations with the regulated industry on the reauthorization of this part, the Secretary shall—

''(A) publish a notice in the Federal Register requesting public input on the reauthorization;

''(B) hold a public meeting at which the public may present its views on the reauthorization, including specific suggestions for changes to the goals referred to in subsection (a);

''(C) provide a period of 30 days after the public meeting to obtain written comments from the public suggesting changes to this part; and

''(D) publish the comments on the Food and Drug Administration's Internet Web site.

''(3) PERIODIC CONSULTATION.—Not less frequently than once every 4 months during negotiations with the regulated industry, the Secretary shall hold discussions with representatives of veterinary, patient, and consumer advocacy groups to continue discussions of their views on the reauthorization and their suggestions for changes to this part as expressed under paragraph (2).

''(4) PUBLIC REVIEW OF RECOMMENDATIONS.—After negotiations with the regulated industry, the Secretary shall—

''(A) present the recommendations developed under paragraph (1) to the congressional committees specified in such paragraph;

''(B) publish such recommendations in the Federal Register;

''(C) provide for a period of 30 days for the public to provide written comments on such recommendations;

''(D) hold a meeting at which the public may present its views on such recommendations; and

''(E) after consideration of such public views and comments, revise such recommendations as necessary.

''(5) TRANSMITTAL OF RECOMMENDATIONS.—Not later than January 15, 2013, the Secretary shall transmit to Congress the revised recommendations under paragraph (4), a summary of the views and comments received under such paragraph, and any changes made to the recommendations in response to such views and comments.

''(6) MINUTES OF NEGOTIATION MEETINGS.—

''(A) PUBLIC AVAILABILITY.—Before presenting the recommendations developed under paragraphs (1) through (5) to Congress, the Secretary shall make publicly available, on the Internet Web site of the Food and Drug Administration, minutes of all negotiation meetings conducted under this subsection between the Food and Drug Administration and the regulated industry.

''(B) CONTENT.—The minutes described under subparagraph (A) shall summarize any substantive proposal made by any party to the negotiations as well as significant controversies or differences of opinion during the negotiations and their resolution.''.

SEC. 204. SUNSET DATES.

(a) AUTHORIZATION.—The amendments made by section 202 shall cease to be effective October 1, 2013.

(b) REPORTING REQUIREMENTS.—The amendment made by section 203 shall cease to be effective January 31, 2014.

TITLE III—TECHNICAL CORRECTIONS TO FDAAA

SEC. 301. CONSIDERATION OF CERTAIN PETITIONS.

Subparagraph (A) of section 505(q)(1) (21 U.S.C. 355(q)(1)) is amended by adding at the end the following:

''Consideration of the petition shall be separate and apart from review and approval of any application.''.

SEC. 302. REGISTRY AND RESULTS DATA BANK.

Paragraph (3) of section 402(j) of the Public Health Service Act (42 U.S.C. 282(j)) is amended—

(1) in the matter preceding clause (i) in subparagraph (C), by striking ''the following elements'' and all that follows through ''520(m) of such Act:'' and inserting ''for each applicable clinical trial for a drug that is approved under section 505 of the Federal Food, Drug, and Cosmetic Act or licensed under section 351 of this Act or a device that is cleared under section 510(k) of the Federal Food, Drug, and Cosmetic Act or approved under section 515 or 520(m) of such Act, the following elements:''; and

(2) in clauses (i) and (iii) of subparagraph (I), by striking the term ''drugs described in subparagraph (C)'' each place such term appears and inserting ''applicable clinical trials described in subparagraph (C)''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Georgia (Mr. DEAL) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Prior to 2003, the FDA's review of animal drug submissions was taking over a year and a half to be completed. This obviously led to serious concerns that new and innovative pharmaceutical products were not making their way onto the marketplace in order to treat our Nation's pets, as well as food animals that help sustain the Nation's food supply.

Accordingly, in 2003, Congress enacted the Animal Drug User Fee Act (ADUFA) which was modeled after the successful user fee programs for the review of human drug and medical device submissions. Like the user fee programs that preceded it, ADUFA authorized the FDA to collect fees to help ensure that the agency had the resources it needed to provide a timely review of animal drug applications.

The legislation before us today would reauthorize the ADUFA program for another 5 years. Under this legislation, the amount of fees collected for the review of animal drug submissions would increase from $15 million to $24 million over 5 years, for a total of $98 million. Revenues would be derived from a mix of application, product, establishment and sponsor fees.

The legislation would also improve the uniform collection and reporting of data to FDA on the sales about animal drugs that contain an antibiotic ingredient.

During the debate on reauthorization of ADUFA, we heard many concerns about the use of antibiotics in animal populations for non-therapeutic purposes and the threat that these practices pose to human health. This bill includes language that would enhance FDA's current data collection by creating a new antimicrobial animal drug use data report for all food-producing animals. The report puts critical information in one place for FDA; otherwise, the agency would have to search through warehouses of multiple paper reports.

In addition to the reauthorization of ADUFA, this legislation would establish a new animal generic drug user fee. According to FDA, the average review time of an animal generic drug submission was 570 days in Fiscal Year 2007, in spite of a 180-day statutory requirement. At the end of last year there was a recorded backlog of 446 submissions waiting for review and agency action.

Accordingly, the bill before us would provide for the collection of user fees increasing annually from $4.8 million to $6 million over 5 years, for a total of $27 million. And these additional revenues are designed to help speed up the review process. By Year 5 of the authorization period, most reviews of generic animal drug submissions should occur in 270 days or less, a substantial improvement over the time it is now taking FDA to conduct such reviews.

Mr. Speaker, I am also pleased that the generic drug industry and FDA have been able to work out this agreement. If enacted, AGDUFA will speed lower cost animal drugs to the marketplace and bring significant savings to ranchers, farmers and pet owners. While that is an important and noteworthy goal, I also think it is equally, if not more important, to ensure for the timely review of generic human drug applications.

There is a provision in this bill that would improve the speed in which FDA reviews generic drug applications, and that provision makes a technical correction to the Food and Drug Administration Amendments Act of 2007 as it relates to the application process for obtaining FDA approval of certain new generic drugs.

Citizen petitions can be submitted to FDA to raise issues about drugs that are being considered in the application process. At the time of negotiations on the Food and Drug Administration Amendments Act of 2007, an agreed-upon sentence was inadvertently dropped from our final version of that bill. The sentence makes clear that consideration of a citizen petition regarding a drug is to be separate and apart from review and approval of any application for the drug. The language included in the bill we are considering today restores that sentence.

There is another correction to the FDA Amendments Act that is included in the bill before us. This change concerns the types of information to be included in the clinical trials data bank established under that law. More specifically, the issue is adverse event information on drugs and on medical devices.

Adverse event information was clearly intended to be included in the data

bank for both drugs and devices. Express specific requirements to that effect were included in multiple drafts of the legislation. In negotiations, however, it was agreed that rather than the bill itself including express specific requirements regarding adverse event information, the FDA would issue regulations that would set the specific requirements. In drafting the ''regulations'' approach, the reference to medical devices was inadvertently dropped, and that was a simple mistake. So the bill before us today corrects that mistake.

In closing, I want to thank my Republican colleagues for working for us in a bipartisan fashion to move this bill forward. Mr. DEAL, Mr. BARTON and of course Mr. DINGELL all worked together, so this is, in fact, a bipartisan bill, and a very important bill as well.

Mr. Speaker, I reserve the balance of my time.

Mr. DEAL of Georgia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the House is set to pass legislation reauthorizing the Animal Drug User Fee Act, also known as ADUFA. This legislation represents a compromise between the parties, the administration, and the industry.

Development of animal drugs can take years and cost millions of dollars. A predictable review process is important to make sure that these products are approved in a timely way. Since the passage of ADUFA in 2003, the review times for new animal drugs went from 295 days in Fiscal Year 2004 to 180 days in Fiscal Year 2008.

We need to reauthorize this program before we leave for the August recess. If we fail to do so, the FDA may have to begin issuing reduction in force notices to its employees. The bill before us today will provide financial stability for the program and improve the health information infrastructure for drug review. It will also provide more user revenue for the program.

Along with ADUFA, for the first time, Congress is set to pass legislation which would create the Animal Generic Drug User Fee Act, or AGDUFA. AGDUFA will allow the FDA to collect user fees, thereby improving the times necessary for generic drug approval. This will not only bring generics to the market more quickly, but will also lower costs for consumers. If AGDUFA is authorized, approval times could be reduced from 700 days in Fiscal Year 2009, to around 270 days in Fiscal Year 2013.

Mr. Speaker, I look forward to the passage of both of these pieces of legislation in the bill that is before us today.

I would reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from California (Mr. WAXMAN) who, I must add, has been such an outstanding spokesman on FDA issues over the years, and particularly promoting generic drugs. I yield to the gentleman 3 minutes.

Mr. WAXMAN. Mr. Speaker, I thank the chairman of our subcommittee for yielding to me.

This bill that we are considering now, the Animal Drug User Fee Act, or ADUFA, will enhance and improve FDA's ability to promptly review new medicines for animals, and that is very important that we all support this.

This reauthorization has also given us an opportunity to look at providing FDA with new tools to address a related public health crisis, the problem of antibiotic resistance caused by the industrial farming practice of using human antibiotics for non-therapeutic uses in food producing animals.

We now have an overwhelming body of evidence showing that the overuse of antibiotics in industrial farm production is threatening to destroy the effectiveness of some of our most important antibiotics for human use. Many of the world's most prestigious experts, the Institute of Medicine, the Pew Commission, World Health Organization and Government Accountability Office have warned about the dangers to global public health of such widespread overuse. These drugs are breeding resistant microorganisms that can and do get transferred to humans. They also leach into the environment and show up in our drinking water. The experts have told us that the more antibiotics we consume, the more resistance develops.

The ADUFA bill we are considering includes a provision to increase the availability and accessibility of data on the amount of animal antibiotics being distributed. This data will help us to determine how resistant bugs are developing and inform research on ways to stop those bugs from threatening human health.

This is an important step forward, and I appreciate the cooperation of Chairman DINGELL and Chairman PALLONE in helping us to get this done.

But let me be clear: This is only just the beginning. We, in Congress, need to do much more to address the problem of antibiotic resistance. It is imperative that we look at ways to curtail the practice of using the same antibiotics that are so vitally important for preventing and curing human disease for non-therapeutic uses in food-producing animals.

I look forward to continuing to work with our colleagues on this important issue.

Mr. DEAL of Georgia. Mr. Speaker, I would yield at this time such time as he may consume to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Speaker, I need to discuss an amendment that was adopted at the committee that is not in this bill today. We, as a country, are facing a tremendous challenge, and that is, with the advent of the Internet, it is very easy for people to get on the Internet; they go to a Web site and they believe that they can order drugs and that the drugs that they order on the Web site can be the very same drugs that they get down at the CVS or the Walgreens or the local community pharmacy.

Every time the FDA does an inspection at our international mail facilities, they discover anywhere from 67 to 90 percent of the drugs that are coming in from the orders of these mail sites, are either adulterated, misbranded or counterfeit drugs.

Now, let's just do the math. Every day, 20 to 30,000 packages, pharmaceutical packages enter each of our 12 international mail facilities every day. The FDA only screens less than 1 percent.

Now, let's think about this. Just take 30 days, for a month, times 400,000 packages, you get 12 million, times 12 months, that is 144 million pharmaceutical packages.

Now, do the math with regard to the number that are either misbranded, adulterated or counterfeit. Now, let's just do really simple math, and just say, okay, we will give a little flexibility in there. That is 100 million pharmaceutical packages that are either adulterated, misbranded or counterfeit. We have a very, very serious problem. Now, that is with regard to the human consumption.

Now, you are saying, STEVE, what does that have to do with the Animal Drug Fee User Act here today?

Well, what I had hoped to do is, it is only a matter of time before the bad actors of the world enter this economic space, meaning, if they can scam the American people with regard to human consumption, you know what? It is really going to be easier for them to do this in the animal drug business because you are never going to know why that animal died.

□ 1545

We have a tremendous challenge. The FDA feels that they do not have the authority to destroy these misbranded, adulterated, or counterfeit drugs. So what's happening? You go to an international mail facility. When Customs finds one of those packages, they'll destroy it, but if that package then gets referred to the FDA, FDA feels that they do not have the legal authority to destroy that package.

Now when they feel they don't have the legal ability to destroy, they have adopted a ''return-to-sender'' policy.

Now let's think about this. The bad actors of the world, the counterfeiters and the criminal syndicates, are very sophisticated as to how they move these counterfeit packages from country to country to gain access into our marketplace. Then when we discover that package, the FDA, through their policy now, returns it to the counterfeiter. Think about that. Our own FDA that is there to protect us then becomes the enabler of the counterfeiter. So the counterfeiter takes the person's money and we return the merchandise that's counterfeit to the counterfeiter.

Now that is stupid. That's about as idiotic as I have ever seen.

So what did I attempt to do? Well, we're working on a food and drug safety bill in the committee, and I appreciate the gentlemen's work on both sides of the aisle. It's on human consumption. So what I had hoped to do here was say, Well, let's stop these bad actors and the criminal syndicates and the counterfeiters from entering into animal drugs. Chairman JOHN DINGELL agrees with that provision, and it was going to be in here.

The Democrat leadership said, ''No. We can't have that in this bill.'' Now that's a curious and puzzling thing. But what I will say is, and my agreement with Chairman DINGELL is that this is an issue as a country in matters of food and drug safety that we, as Republicans and Democrats, must come together to protect the American people and to go after these bad actors around the world, the criminal syndicates who are preying upon America's most vulnerable populations. We have to enjoin together to do this. And that's my pledge to work with Chairman DINGELL and JOE BARTON and other members of the committee, and I salute Mr. MATHESON, for us to do this so not only do we bring protections on the animal side to go after the bad actors, we put protections in place on the human side. And we can do that not only in stopping the bad actors but also including electronic pedigree, and I will work with you to do just that.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

I just wanted to say that I understand the gentleman's concerns who just spoke, Mr. BUYER, the gentleman from Indiana, and I, too, am very concerned about counterfeit drugs entering the U.S. marketplace. I think the FDA should have the authority to seize and destroy counterfeit drugs. And as the gentleman knows, we are working with him to address this issue in a larger bill that will empower the FDA to protect the consumers from dangerous products, including counterfeit drugs. So I hope that we can continue to work with the gentleman on this matter.

Mr. BUYER. Will the gentleman yield?

Mr. PALLONE. I yield to the gentleman from Indiana.

Mr. BUYER. In my conversations with the chairman, not only last night but also this morning, I will work with the gentleman to make sure that we can have this in the drug safety bill not only on humans but will also protect animals, so we will give the authority to the FDA to destroy. I will work with the gentleman.

But we also brought up in the conversation—I understand that a little pain could have been created here today. I want to work with the majority. In other words, they weren't forced to go through the Rules Committee and then we have a big fight on the floor. I agreed with the chairman. We withdraw the amendment.

But I want to work also—please work with Mr. MATHESON and I on the electronic pedigree. It builds off of Chairman DINGELL's paper pedigree so we can sophisticate America's systems for American people here as we also then fight the counterfeiters who are trying to gain access into our market. And I'll work with the chairman to do that.

Mr. PALLONE. Mr. Speaker, I certainly heard what my colleague from Indiana said, and I'm certainly willing to work with him on what he's suggesting.

I reserve the balance of my time.

Mr. DEAL of Georgia. Mr. Speaker, I would also compliment Mr. BUYER for his sincere efforts on the issue of counterfeiting and look forward to working with him to address that issue both for humans and for animals in future legislation.

But because of the importance of this particular legislation and the need to reauthorize it in the time frame that is before us, I would urge the adoption of this legislation.

Mr. DINGELL. Mr. Speaker, I rise in support of H.R. 6432. Today we consider important public health legislation that, in the best tradition of the Committee on Energy and Commerce, has strong bipartisan support as well as backing from industry, consumer, and stakeholder groups.

I note that this bill has three titles—each representing different bills considered by the Committee on Energy and Commerce. The first title is the ''Animal Drug User Fee Amendments of 2008''. This title reauthorizes a successful user fee program that has allowed the Food and Drug Administration (FDA) to safely and efficiently review animal drugs. This part of the bill improves the existing program by increasing fee revenues, providing greater transparency, and setting specific timeframes by which data must be submitted to the FDA.

This title of the bill also contains provisions related to the issue of antimicrobial resistance. The Committee worked closely with Members from both sides of the aisle, as well as industry and consumer groups, to ensure that the FDA has the necessary information to examine safety concerns related to the use of antibiotics in food-producing animals. I commend Representatives MATHESON, WAXMAN, PALLONE, DEAL, and BARTON for reaching agreement on this important public health concern.

The next title is the ''Animal Generic Drug User Fee Act of 2008'' (AGDUFA). This program is similar in design to the ADUFA program, but with a specific focus on expediting the review of applications for new generic animal drugs.

A key component of both ADUFA and AGDUFA is additional resources for FDA to protect the public health. The lack of resources for the FDA has been a major focus of the Committee. I intend to address this issue more broadly in legislation being drafted with Representatives BARTON, DEAL, PALLONE, SHIMKUS, STUPAK, and others, that will significantly improve and enhance our food and drug safety system.

The third and final title makes two technical corrections to public law 110–85, the Food and Drug Administration Amendments Act of 2007. The first correction addresses an implementation problem related to the clinical trials results and registry database, which was expanded in that public law. The second correction clarifies that the FDA should review and approve generic drug applications separate and apart from citizen petitions pertaining to that application.

I encourage all of my colleagues to join me in support of this bill, and I thank the Members of the Committee on Energy and Commerce for working together to reach agreement on legislation critical to protecting the public health.

Mr. DEAL of Georgia. I would yield back the balance of my time.

Mr. PALLONE. Mr. Speaker, again, I want to thank my colleagues on both sides of the aisle for their support of this legislation and urge that it be adopted.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and pass the bill, H.R. 6432, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: ''A bill to amend the Federal Food, Drug, and Cosmetic Act to revise and extend the animal drug user fee program, to establish a program of fees relating to generic new animal drugs, to make certain technical corrections to the Food and Drug Administration Amendments Act of 2007, and for other purposes.''.

A motion to reconsider was laid on the table.

MICHELLE'S LAW

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2851) to amend the Employee Retirement Income Security Act of 1974, the Public Health Service Act, and the Internal Revenue Code of 1986 to ensure that dependent students who take a medically necessary leave of absence do not lose health insurance coverage, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2851

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as ''Michelle's Law''.

SEC. 2. COVERAGE OF DEPENDENT STUDENTS ON MEDICALLY NECESSARY LEAVE OF ABSENCE.

(a) AMENDMENTS OF ERISA.—

(1) IN GENERAL.—Subpart B of part 7 of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1185 et seq.) is amended by adding at the end the following:

''SEC. 714. COVERAGE OF DEPENDENT STUDENTS ON MEDICALLY NECESSARY LEAVE OF ABSENCE.

''(a) MEDICALLY NECESSARY LEAVE OF ABSENCE.—In this section, the term 'medically necessary leave of absence' means, with respect to a dependent child described in subsection (b)(2) in connection with a group

health plan or health insurance coverage offered in connection with such plan, a leave of absence of such child from a postsecondary educational institution (including an institution of higher education as defined in section 102 of the Higher Education Act of 1965), or any other change in enrollment of such child at such an institution, that—

''(1) commences while such child is suffering from a serious illness or injury;

''(2) is medically necessary; and

''(3) causes such child to lose student status for purposes of coverage under the terms of the plan or coverage.

''(b) REQUIREMENT TO CONTINUE COVERAGE.—

''(1) IN GENERAL.—In the case of a dependent child described in paragraph (2), a group health plan, or a health insurance issuer that provides health insurance coverage in connection with a group health plan, shall not terminate coverage of such child under such plan or health insurance coverage due to a medically necessary leave of absence before the date that is the earlier of—

''(A) the date that is 1 year after the first day of the medically necessary leave of absence; or

''(B) the date on which such coverage would otherwise terminate under the terms of the plan or health insurance coverage.

''(2) DEPENDENT CHILD DESCRIBED.—A dependent child described in this paragraph is, with respect to a group health plan or health insurance coverage offered in connection with the plan, a beneficiary under the plan who—

''(A) is a dependent child, under the terms of the plan or coverage, of a participant or beneficiary under the plan or coverage; and

''(B) was enrolled in the plan or coverage, on the basis of being a student at a postsecondary educational institution (as described in subsection (a)), immediately before the first day of the medically necessary leave of absence involved.

''(3) CERTIFICATION BY PHYSICIAN.—Paragraph (1) shall apply to a group health plan or health insurance coverage offered by an issuer in connection with such plan only if the plan or issuer of the coverage has received written certification by a treating physician of the dependent child which states that the child is suffering from a serious illness or injury and that the leave of absence (or other change of enrollment) described in subsection (a) is medically necessary.

''(c) NOTICE.—A group health plan, and a health insurance issuer providing health insurance coverage in connection with a group health plan, shall include, with any notice regarding a requirement for certification of student status for coverage under the plan or coverage, a description of the terms of this section for continued coverage during medically necessary leaves of absence. Such description shall be in language which is understandable to the typical plan participant.

''(d) NO CHANGE IN BENEFITS.—A dependent child whose benefits are continued under this section shall be entitled to the same benefits as if (during the medically necessary leave of absence) the child continued to be a covered student at the institution of higher education and was not on a medically necessary leave of absence.

''(e) CONTINUED APPLICATION IN CASE OF CHANGED COVERAGE.—If—

''(1) a dependent child of a participant or beneficiary is in a period of coverage under a group health plan or health insurance coverage offered in connection with such a plan, pursuant to a medically necessary leave of absence of the child described in subsection (b);

''(2) the manner in which the participant or beneficiary is covered under the plan changes, whether through a change in health insurance coverage or health insurance issuer, a change between health insurance coverage and self-insured coverage, or otherwise; and

''(3) the coverage as so changed continues to provide coverage of beneficiaries as dependent children,

this section shall apply to coverage of the child under the changed coverage for the remainder of the period of the medically necessary leave of absence of the dependent child under the plan in the same manner as it would have applied if the changed coverage had been the previous coverage.''.

(2) CONFORMING AMENDMENT.—The table of contents in section 1 of such Act is amended by inserting after the item relating to section 713 the following new item:

''Sec. 714. Coverage of dependent students on medically necessary leave of absence.''.

(b) AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT.—

(1) GROUP MARKETS.—Subpart 2 of part A of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–4 et seq.) is amended by adding at the end the following new section:

''SEC. 2707. COVERAGE OF DEPENDENT STUDENTS ON MEDICALLY NECESSARY LEAVE OF ABSENCE.

''(a) MEDICALLY NECESSARY LEAVE OF ABSENCE.—In this section, the term 'medically necessary leave of absence' means, with respect to a dependent child described in subsection (b)(2) in connection with a group health plan or health insurance coverage offered in connection with such plan, a leave of absence of such child from a postsecondary educational institution (including an institution of higher education as defined in section 102 of the Higher Education Act of 1965), or any other change in enrollment of such child at such an institution, that—

''(1) commences while such child is suffering from a serious illness or injury;

''(2) is medically necessary; and

''(3) causes such child to lose student status for purposes of coverage under the terms of the plan or coverage.

''(b) REQUIREMENT TO CONTINUE COVERAGE.—

''(1) IN GENERAL.—In the case of a dependent child described in paragraph (2), a group health plan, or a health insurance issuer that provides health insurance coverage in connection with a group health plan, shall not terminate coverage of such child under such plan or health insurance coverage due to a medically necessary leave of absence before the date that is the earlier of—

''(A) the date that is 1 year after the first day of the medically necessary leave of absence; or

''(B) the date on which such coverage would otherwise terminate under the terms of the plan or health insurance coverage.

''(2) DEPENDENT CHILD DESCRIBED.—A dependent child described in this paragraph is, with respect to a group health plan or health insurance coverage offered in connection with the plan, a beneficiary under the plan who—

''(A) is a dependent child, under the terms of the plan or coverage, of a participant or beneficiary under the plan or coverage; and

''(B) was enrolled in the plan or coverage, on the basis of being a student at a postsecondary educational institution (as described in subsection (a)), immediately before the first day of the medically necessary leave of absence involved.

''(3) CERTIFICATION BY PHYSICIAN.—Paragraph (1) shall apply to a group health plan or health insurance coverage offered by an issuer in connection with such plan only if the plan or issuer of the coverage has received written certification by a treating physician of the dependent child which states that the child is suffering from a serious illness or injury and that the leave of absence (or other change of enrollment) described in subsection (a) is medically necessary.

''(c) NOTICE.—A group health plan, and a health insurance issuer providing health insurance coverage in connection with a group health plan, shall include, with any notice regarding a requirement for certification of student status for coverage under the plan or coverage, a description of the terms of this section for continued coverage during medically necessary leaves of absence. Such description shall be in language which is understandable to the typical plan participant.

''(d) NO CHANGE IN BENEFITS.—A dependent child whose benefits are continued under this section shall be entitled to the same benefits as if (during the medically necessary leave of absence) the child continued to be a covered student at the institution of higher education and was not on a medically necessary leave of absence.

''(e) CONTINUED APPLICATION IN CASE OF CHANGED COVERAGE.—If—

''(1) a dependent child of a participant or beneficiary is in a period of coverage under a group health plan or health insurance coverage offered in connection with such a plan, pursuant to a medically necessary leave of absence of the child described in subsection (b);

''(2) the manner in which the participant or beneficiary is covered under the plan changes, whether through a change in health insurance coverage or health insurance issuer, a change between health insurance coverage and self-insured coverage, or otherwise; and

''(3) the coverage as so changed continues to provide coverage of beneficiaries as dependent children,

this section shall apply to coverage of the child under the changed coverage for the remainder of the period of the medically necessary leave of absence of the dependent child under the plan in the same manner as it would have applied if the changed coverage had been the previous coverage.''.

(2) INDIVIDUAL MARKET.—Subpart 3 of part B of title XXVII of such Act (42 U.S.C. 300gg–51 et seq.) is amended by adding at the end the following new section:

''SEC. 2753. COVERAGE OF DEPENDENT STUDENTS ON MEDICALLY NECESSARY LEAVE OF ABSENCE.

''The provisions of section 2707 shall apply to health insurance coverage offered by a health insurance issuer in the individual market in the same manner as they apply to health insurance coverage offered by a health insurance issuer in connection with a group health plan in the small or large group market.''.

(c) AMENDMENTS TO THE INTERNAL REVENUE CODE.—

(1) IN GENERAL.—Subchapter B of chapter 100 of the Internal Revenue Code of 1986 (relating to other group health plan requirements) is amended by inserting after section 9812 the following new section:

''SEC. 9813. COVERAGE OF DEPENDENT STUDENTS ON MEDICALLY NECESSARY LEAVE OF ABSENCE.

''(a) MEDICALLY NECESSARY LEAVE OF ABSENCE.—In this section, the term 'medically necessary leave of absence' means, with respect to a dependent child described in subsection (b)(2) in connection with a group health plan, a leave of absence of such child from a postsecondary educational institution (including an institution of higher education as defined in section 102 of the Higher Education Act of 1965), or any other change in

enrollment of such child at such an institution, that—

''(1) commences while such child is suffering from a serious illness or injury;

''(2) is medically necessary; and

''(3) causes such child to lose student status for purposes of coverage under the terms of the plan or coverage.

''(b) REQUIREMENT TO CONTINUE COVERAGE.—

''(1) IN GENERAL.—In the case of a dependent child described in paragraph (2), a group health plan shall not terminate coverage of such child under such plan due to a medically necessary leave of absence before the date that is the earlier of—

''(A) the date that is 1 year after the first day of the medically necessary leave of absence; or

''(B) the date on which such coverage would otherwise terminate under the terms of the plan.

''(2) DEPENDENT CHILD DESCRIBED.—A dependent child described in this paragraph is, with respect to a group health plan, a beneficiary under the plan who—

''(A) is a dependent child, under the terms of the plan, of a participant or beneficiary under the plan; and

''(B) was enrolled in the plan, on the basis of being a student at a postsecondary educational institution (as described in subsection (a)), immediately before the first day of the medically necessary leave of absence involved.

''(3) CERTIFICATION BY PHYSICIAN.—Paragraph (1) shall apply to a group health plan only if the plan, or the issuer of health insurance coverage offered in connection with the plan, has received written certification by a treating physician of the dependent child which states that the child is suffering from a serious illness or injury and that the leave of absence (or other change of enrollment) described in subsection (a) is medically necessary.

''(c) NOTICE.—A group health plan shall include, with any notice regarding a requirement for certification of student status for coverage under the plan, a description of the terms of this section for continued coverage during medically necessary leaves of absence. Such description shall be in language which is understandable to the typical plan participant.

''(d) NO CHANGE IN BENEFITS.—A dependent child whose benefits are continued under this section shall be entitled to the same benefits as if (during the medically necessary leave of absence) the child continued to be a covered student at the institution of higher education and was not on a medically necessary leave of absence.

''(e) CONTINUED APPLICATION IN CASE OF CHANGED COVERAGE.—If—

''(1) a dependent child of a participant or beneficiary is in a period of coverage under a group health plan, pursuant to a medically necessary leave of absence of the child described in subsection (b);

''(2) the manner in which the participant or beneficiary is covered under the plan changes, whether through a change in health insurance coverage or health insurance issuer, a change between health insurance coverage and self-insured coverage, or otherwise; and

''(3) the coverage as so changed continues to provide coverage of beneficiaries as dependent children,

this section shall apply to coverage of the child under the changed coverage for the remainder of the period of the medically necessary leave of absence of the dependent child under the plan in the same manner as it would have applied if the changed coverage had been the previous coverage.''.

(2) CONFORMING AMENDMENT.—The table of sections for subchapter B of chapter 100 of such Code is amended by inserting after the item relating to section 9812 the following new item:

''Sec. 9813. Coverage of dependent students on medically necessary leave of absence.''.

(d) EFFECTIVE DATE.—The amendments made by this Act shall apply with respect to plan years beginning on or after the date that is one year after the date of the enactment of this Act and to medically necessary leaves of absence beginning during such plan years.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Georgia (Mr. DEAL) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Michelle's Law was introduced by my colleague from New Hampshire, Representative PAUL HODES, in honor of Michelle Morse, a 20-year-old student who was attending Plymouth State University when she was diagnosed with colon cancer in December of 2003.

Michelle's doctors recommended that she leave school temporarily so she could undergo surgery and chemotherapy. Unfortunately, if Michelle followed her doctors' advice and dropped out of school to receive treatment, she would no longer be eligible for health coverage under her mother's policy.

The truth of the matter, Mr. Speaker, is that most college-aged students are only able to keep their parents' health insurance if they attend classes full time. Under most health care plans, when a student becomes seriously ill or injured, he or she is unfortunately left with very few options. Students are forced into the difficult decision of continuing with a full-time course load while they try to seek treatment, or withdrawing and losing health care eligibility. No American should be faced with such a choice, in my opinion.

Unfortunately, Michelle had to choose. Michelle and her family decided that she would remain in school full time while she received treatment for her cancer. After enduring a rigorous course load and successfully graduating, Michelle lost her battle with cancer in November of 2005.

After Michelle's passing, her mother decided that no other family should have to make the same tough decision. Thanks to her efforts, New Hampshire passed a law that allows students to take a 1-year medical leave of absence while maintaining their dependency status. The bill before us today would afford the same protections for students nationwide.

I urge my colleagues on both sides of the aisle to vote ''yes'' for this important piece of legislation.

I reserve the balance of my time.

Mr. DEAL of Georgia. Mr. Speaker, I rise in support of H.R. 2851, which is commonly known as Michelle's Law.

I would like to thank Mr. HODES from New Hampshire and Mr. CASTLE from Delaware for introducing this important legislation and also to thank Energy and Commerce Committee Chairman DINGELL, subcommittee Chairman PALLONE and Ranking Member BARTON for their cooperative efforts in working in a bipartisan manner to move this bill through the Energy and Commerce Committee.

The American people know we must focus our health care efforts on providing increased access to quality, personal health insurance plans that give more Americans control and ownership over their own health care.

As my colleagues are well aware, by increasing the number of Federal mandates on health insurance plans, we are inevitably making health insurance plans more expensive for more Americans and decreasing the number of Americans who can afford the quality personal health insurance plan that they want for their families. Without question, it is vital for Congress to avoid one-size-fits-all Federal mandates on health insurance if we're going to be able to increase the number of Americans with access to quality health insurance plans.

However, I think the bill before us today is a very narrowly tailored solution to an extremely rare problem that results from a very small number of bad actors. This legislation takes the needed step of ensuring that more college-aged Americans will be able to stay on their parents' health insurance coverage in the rare event that they become too sick to remain enrolled in school.

We know that by passing this legislation today, we can help assure American college students that their personal health insurance plan will be there for them giving them one less thing to worry about as they focus on their own illness and on earning their degrees.

Again, I thank my colleagues on the Energy and Commerce Committee for their bipartisan support of this legislation.

I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I am pleased to yield 5 minutes to the gentleman from New Hampshire (Mr. HODES), the sponsor of the legislation.

Mr. HODES. I thank the gentleman for yielding.

I rise today in support of this bill, Michelle's Law, which honors the memory and life and struggle of Michelle Morse. Michelle's mother, AnnMarie,

and her brother, Michael, are with us today to remember and honor her.

Michelle Morse was a college student in Plymouth, New Hampshire. She was like other students. She went to class and hung out with her friends. She was a happy and gifted student preparing to be a school teacher like her mom. She picked her major, childhood studies, because she wanted to dedicate her life to help children. But Michelle Morse and her family were forced to make a choice that students should never have to make: a choice between her health and her health insurance.

You see, while in college, Michelle was diagnosed with advanced colon cancer. She had her health insurance through her mother but could only keep her health insurance if she remained a full-time student. Since she was undergoing rigorous chemotherapy treatments, her doctors urged her to take time off from school to focus on her treatment. Michelle was faced with a daunting choice: to keep her health insurance and maintain her full-time student status, or follow her doctors' orders and face colossal health bills for her and her family.

Michelle chose to stay in school and keep her health insurance. She continued her chemotherapy treatments and maintained a grade point average above 3.5 which, by anyone's standards, is inspiring and shows just what a strong person Michelle was. Unfortunately, despite her valiant fight against cancer, she succumbed to the weight of the cancer and the rigors of being a full-time student and passed away after she graduated.

But this story isn't just about Michelle. It's about Michelle's family who fought with Michelle and continue to fight for Michelle to this day.

Michelle's family, led by her mother, AnnMarie, made it their mission to ensure that this choice doesn't have to be made by any other family. AnnMarie Morse began a relentless campaign to change the law in New Hampshire so that students could have a medical leave of absence from college without losing their coverage under their parents' health insurance.

When the law was changed in New Hampshire after her tireless efforts and leadership, AnnMarie Morse wanted to make sure that students across the country would have the same protections.

So she brought her campaign to Capitol Hill and began her efforts to lobby. She lobbied me, she lobbied other Members of Congress, she lobbied everybody. And let me tell you, there is nothing stopping this mother's love. She called everybody she could and anyone she could in her campaign to protect other people's children from being faced with the same terrible choice she and her daughter had to make.

I'm honored to know AnnMarie and the Morse family and to have introduced this legislation aptly named Michelle's Law, a law fueled by a family's love and a special young woman's memory.

Michelle's Law would change current health insurance law to allow college students a year of medical leave of absence. Michelle's Law has worked in New Hampshire and can now work for students and families across this great Nation. This commonsense legislation has been embraced by Democrats and Republicans and by groups across the board from the insurance industry to patient advocacy groups like the American Cancer Society Cancer Action Network, which has been a leader in advocating for this bill.

□ 1600

Madam Speaker, I submit for the RECORD the letters of support we've received.

AMERICAN CANCER SOCIETY,
CANCER ACTION NETWORK,
Washington, DC, June 25, 2007.

Hon. PAUL HODES,
U.S. Senate,
Washington, DC.

DEAR REPRESENTATIVE HODES: On behalf of the volunteers and supporters of the American Cancer Society Cancer Action Network℠ (ACS CAN), the sister advocacy organization of the American Cancer Society, we are writing to express our support for the Michelle's Law legislation, which you recently introduced. H.R. 2851 will expand access to health insurance for college students required to take a medical leave of absence from their studies in the event of a diagnosis such as cancer. We commend you for your leadership in addressing this gap in health insurance coverage for students, and for your commitment to advancing the interests of cancer patients and their families.

As you know, this legislation would allow college students to take medical leave while battling a serious illness and still maintain eligibility for their parents' health insurance. Statistical studies show that the number one factor determining whether a person who has cancer will survive is whether that person has insurance. Only the insured have access to the timely, appropriate, and affordable health care that is crucial in fighting cancer or any other serious illness. No student should be presented with the dilemma that Michelle Morse experienced when she was forced to maintain a full college course load while undergoing debilitating medical treatment.

If we are to ultimately conquer cancer, our system must ensure that all Americans have access to high quality care. This legislation is a meaningful step toward this goal. Again, we applaud your efforts to preserve health insurance for seriously ill college students, and we look forward to working with you on this important legislation. If you have questions or need any assistance, please do not hesitate to contact Jaimie Vickery, ACS CAN Senior Federal Representative at (202) 661–5720.

Thank you again for your leadership on this important issue.

Sincerely,

DANIEL E. SMITH,
President.
WENDY K. D. SELIG,
Vice President Legislative Affairs.

AMERICAN HEART ASSOCIATION,
AMERICAN STROKE ASSOCIATION,
Washington, DC, September 20, 2007.

Hon. PAUL HODES,
House of Representatives,
Washington, DC.
Hon. MIKE CASTLE,
House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE HODES AND REPRESENTATIVE CASTLE: The American Heart Association and its American Stroke Association division applaud you for your introduction of H.R. 2851, ''Michelle's Law.''

The American Heart Association and the American Stroke Association are dedicated to reducing death and disability from heart disease and stroke, the nation's No. 1 and No. 3 killers. As many as 1.3 million children, youth and adults living in the United States today were born with some type of congenital cardiovascular defect, and other children and young people are increasingly developing cardiovascular disease at an earlier age.

These young people, especially those born with heart defects, often face challenges acquiring health insurance once they 'age-out' of eligibility for public programs or parental coverage. We as a nation have made great advances in the treatment of heart defects, and as a result many more children born with these disorders are living longer, healthier lives, instead of facing long-term disability or early death. However, these preexisting heart defects often make it difficult for them to get health insurance coverage and the follow-up care they need as adults.

Your ''Michelle's Law'' legislation would ensure that full-time college students can maintain their health insurance coverage when they are required to take a leave of absence of up to one year from their studies because they are seriously ill. No young person should be faced with the predicament of taking a full course load while fighting a debilitating disease, simply so they don't lose their health insurance coverage.

Numerous studies have documented that those who are uninsured or underinsured are more likely to go without needed medical care. Your legislation would take a step towards ensuring that all Americans have access to affordable, quality health care. Again, the American Heart Association is pleased to support your legislation and we look forward to working with you on this important issue. Thank you for your leadership.

Sincerely,

SUE NELSON,
Vice President of Federal Advocacy.

AMERICA'S HEALTH INSURANCE PLANS,
Washington, DC, October 3, 2007.

Hon. PAUL HODES,
House of Representatives,
Washington, DC.

DEAR CONGRESSMAN HODES: On behalf of America's Health Insurance Plans (AHIP), I am writing to express our support for your legislation, H.R. 2851, which proposes new protections to ensure continuity of health insurance coverage for college students.

AHIP's members appreciate your hard work on this issue. We share your concerns and have taken pro-active steps to demonstrate our strong commitment to addressing the coverage needs of students who are forced to leave school for medical reasons. Earlier this year, AHIP's Board of Directors approved the enclosed policy statement, outlining our members' commitment to following best practices for facilitating continuity of coverage for students who are on medical leave from school. This includes offering coverage for 12 months or until the coverage would have otherwise lapsed,

whichever comes first, with the need for part-time status or medical leave of absence documented by a physician.

Thank you again for your leadership on this issue. We look forward to continuing to work with you on health care issues that come before Congress.

Sincerely,

KAREN IGNAGNI,
President and CEO.

AMERICAN HOSPITAL ASSOCIATION,
Washington, DC, February 11, 2008.

Hon. PAUL HODES,
House of Representatives,
Washington, DC.

DEAR MR. HODES: On behalf of our nearly 5,000 member hospitals, health systems and other health care organizations, and our 37,000 individual members, the American Hospital Association (AHA) commends the leadership that you and your colleagues have provided by introducing H.R. 2851, ''Michelle's Law''.

Many families across America face the tough reality of having to choose between health care and other necessities of life, like food or shelter. Michelle Morse, a young college student from New Hampshire, had to choose between remaining a full-time student in order to maintain her dependent coverage, or taking a leave of absence from college to get the urgent care she needed. H.R. 2851 would ensure that full-time students covered by ERISA are eligible for a 12–month medical leave of absence without losing dependent coverage.

Unfortunately, Michelle passed away and is not here to enjoy the benefits of your good work on this issue. Thanks to your introduction of this bill, other students and their families might not face the same no-win scenario. Hospitals and other health care providers have long understood the value of getting the right care at the right time, and the financial burden that many families experience in trying to do so. We look forward to working with you and your colleagues on passage of this very important legislation.

Sincerely,

RICK POLLACK,
Executive Vice President.

COLORECTAL CANCER COALITION,
RESEARCH POLICY AWARENESS,
Alexandria, VA, February 15, 2008.

Hon. PAUL HODES,
House of Representatives
Washington, DC.

DEAR REPRESENTATIVE HODES: C3: Colorectal Cancer Coalition is a national, nonpartisan organization whose mission is to eliminate suffering and death due to colon and rectal cancer through advocacy. C3 pushes for research to improve screening, diagnosis, and treatment of colorectal cancer; for policy decisions that make the most effective colon and rectal cancer prevention and treatment available to all; and for increased awareness that colorectal cancer is preventable, treatable, and beatable.

C3 strongly supports Michelle's Law (H.R. 2851) introduced by Congressman Paul Hodes. This bill would amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1986 to ensure that dependent students who take a medical necessary leave of absence do not lose their health insurance coverage.

Michelle Morse, the bill's namesake, was diagnosed with colon cancer when she was 20 years old. At this time she was a full time student at the Plymouth State University. Michelle had to remain enrolled as a full time student, against her doctor's recommendation, in order to maintain her eligibility for health coverage.

Treatment for colorectal cancer and many other diseases are quite grueling on a person's body. H.R. 2851 would allow students to focus solely on treating their illness as opposed to being a full time patient AND full time student.

If you have any questions please do not hesitate to contact Joe Arite, C3 Policy and Grassroots Manager or by email at Joe.Arite@FightColorectalCancer.org.

Sincerely,

CARLEA BAUMAN,
Executive Director.

I greatly appreciate the strong support and leadership of my colleague from Delaware (Mr. CASTLE) and Chairman DINGELL, Ranking Member BARTON, Chairman PALLONE and Ranking Member DEAL of the Energy and Commerce Committee for their work and their staff's hard work and support.

I would also like to thank the Ways and Means and Education and Labor Committees and staff for their dedication in bringing this bill to the floor today.

This strong, bipartisan measure shows the American people that Congress understands the importance of doing good by doing the right thing. But what's most important is that with the passage of Michelle's Law, parents across this country are going to thank AnnMarie Morse and her family for helping to make sure that they don't have to make the choice that Michelle had to make.

I urge passage of this bill. I thank the bipartisan support for this measure.

Mr. DEAL of Georgia. Madam Speaker, I'm pleased to yield such time as he may consume to one of the original sponsors of this bill, the gentleman from Delaware (Mr. CASTLE).

Mr. CASTLE. Madam Speaker, I thank the gentleman from Georgia for yielding to me.

I also rise to ask my colleagues to support the legislation before us today, Michelle's Law, which will prohibit insurers and group health plans from terminating coverage of dependent college students who lose their full-time student status due to a serious illness or injury.

As you may know, some insurance plans allow college students to remain covered as dependents only if they attend a post-secondary institution full-time. As a result, this may force college students throughout the country with serious illnesses or serious injuries, who are dependent upon their parents' insurance, to make the difficult choice of pursuing a college education or taking care of their health.

Mr. HODES just spoke about Michelle Morse who died tragically of colon cancer in 2005 after going against her doctor's wishes and maintaining her full-time course schedule to maintain her health insurance.

In my home State of Delaware, Michelle Rigney, a University of Delaware student diagnosed with melanoma when she was 19, and cancer advocate who I had the honor of working with several times over the last few years, also recently lost her battle with the disease.

Throughout her battle with cancer, Michelle Rigney advocated for the passage of this bill to make things easier for others in similar situations. Michelle expressed her concerns over insurance to me as well as the importance of easing the stress students with a serious illness face when deciding between an education and their health.

I believe strongly that Michelle's Law will give seriously ill and injured students and their families the time they need to decide what their next steps should be without the fear of losing their health insurance. CBO estimates that the bipartisan H.R. 2851 would have no significant impact on the budget. Additionally, this commonsense legislation has been endorsed by several key health and insurance groups, including the American Cancer Society Cancer Action Network, the National Education Association, America's Health Insurance Plans, and the American Diabetes Association. A full list of groups that endorse this bill will be submitted for the RECORD, and indeed, Representative HODES sent up letters already doing that.

LIST OF GROUPS THAT SUPPORT THE PASSAGE OF MICHELLE'S LAW

American Cancer Society Cancer Action Network (ACSCAN); American College Health Association; American Diabetes Association; America's Health Insurance Plans (AHIP); American Heart/Stroke Association; American Hospital Association; American Medical Student Association; American Nurses Association; Colorectal Cancer Coalition; Leukemia and Lymphoma Society; Healthcare Leadership Council; National Association of Graduate Professional Students; National Association of Social Workers; National Collegiate Athletic Association (NCAA); National Education Association (NEA); National Health Council; National Kidney Foundation; National Patient Advocate Foundation.

Finally, I want to thank Representative HODES for his leadership on this bill in the House, and I thank all of the various committees, Education and Labor, Ways and Means, Energy and Commerce Committee Members and their staff members for their hard work on getting this bill to the floor.

I urge my colleagues to support H.R. 2851, Michelle's Law.

Mr. PALLONE. Madam Speaker, I have no further requests for time, and I would urge passage of this bill, Michelle's Law, in honor of Michelle Morse on a bipartisan basis.

Mr. STARK. Madam Speaker, I am pleased to rise in support of Michelle's Law. This is a small, but important piece of legislation that will give many college students the sense of security that they deserve regarding continuity of their health insurance.

One of the most frightening moments in a parent's life is sending his or her child off to college. Yet, as parents, we feel comforted by the unspoken assumption that while at college our children will receive continuous access to health insurance based on their dependent status on our family policies. You can imagine the surprise and distress that AnnMarie Morse felt, then, when she learned that her daughter,

Michelle Morse, after falling ill from colon cancer, would only be covered by health insurance if she maintained a full-time class schedule while undergoing exhausting chemotherapy treatment. Michelle shouldn't have been forced to maintain that schedule—and risk her very recovery—because of her need to maintain her health insurance.

Michelle's Law provides needed protections and will help students who are enrolled in college and who only qualify as dependents under their parents' health insurance plans because of their student status. If these students get seriously ill and need to take a physician-certified leave of absence from college for up to a year, they will be able to maintain their coverage under their parent's health insurance. If they graduate before that time is up, their coverage will expire when it normally would have anyway. This is common sense—and will ensure that student-based dependent coverage lives up to its stated goal. No student should be forced to stay in college—and risk ruining their academic standing—because of inability to simultaneously battle their serious illness or injury and maintain their grades.

Although this bill is too late to help Michelle, we can still help other children who might one day have to make the choice between forcing themselves to go to school while severely ill or leaving school and trying to pay insurmountable fees. I'm advised that even the health insurance industry supports this bill. Let's stop debating and quickly pass this important piece of legislation. We owe it to our children to ensure that their health coverage is there when they need it most.

Mr. GEORGE MILLER of California. Madam Speaker, I want to thank Representatives HODES for introducing H.R. 2851, also known as Michelle's Law, and for his hard work in bringing the legislation to the House floor today.

H.R. 2851 is named in honor of Michelle Morse who was diagnosed with cancer while she was attending college at Plymouth State University.

While Michelle was facing one of the most difficult times in her life and desperately needed time off to deal with her diagnosis and receive treatment, her health insurer informed her that it would not cover her for chemotherapy treatments unless she continued in school full-time.

As a result, Michelle had to keep up with her course work at the same time as she was receiving 48 hours of chemotherapy a week. She died in November 2005.

Michelle's law declares that no college student should have as difficult a road as Michelle. Students should have the ability to focus on treatment and recovery before returning to school.

H.R. 2851 amends ERISA, the Public Health Service Act and the Internal Revenue Code to require employers and health insurance companies to continue covering college students for up to 12 months if, as the result of an illness or injury, they need to take time off from school to receive treatment and to recover. The rights provided under the bill are in addition to those already provided under ERISA, COBRA and HIPAA. The bill also preserves stronger state laws.

In fact many States are ahead of Congress on this issue and have already enacted laws that mandate insurers to cover children over 18 under a family plan regardless of the child's school status. Nine States have laws similar to H.R. 2851 and require health plans to continue insuring students who withdraw from school or change their status due to an illness or injury.

However, the state laws do not cover employer sponsored health plans regulated by ERISA which is one of the critical reasons H.R. 2851 is needed.

Receiving a cancer diagnosis or suffering a serious injury can be devastating. We must ensure that students who are seriously ill or injured do not have to choose between their health and their health insurance.

H.R. 2851 is a common sense bill that will benefit many young people facing adversity. I urge all of my colleagues to vote ''yes'' on H.R. 2851.

Mr. DINGELL. Madam Speaker, I rise today in support of H.R. 2851, ''Michelle's Law.'' This legislation protects students that are covered under their parents' health plan from losing their health insurance if they require a medically necessary leave of absence from school.

The impetus for this legislation—and the namesake for this bill—is a young woman named Michelle Morse. She was a full-time college student at Plymouth State University in New Hampshire who was diagnosed with colon cancer in 2003. Her doctors recommended that she cut back her college course load while undergoing chemotherapy treatment. She found, however, that if she cut back her classroom hours, she would lose her health insurance because she would no longer qualify as a dependent on her parents' health insurance plan.

She could not afford other coverage options, and she was forced to remain in school as a full-time student while undergoing fourteen rounds of chemotherapy. In 2005, she succumbed to her illness. Her mother has since lobbied for laws that would extend the definition of dependents to allow college students needing medical leaves of absence from classwork to retain health insurance coverage on their parents' policies.

I am pleased that this bill has bipartisan support. I thank Ranking Members BARTON and DEAL for their work as well as the Chairmen and Ranking Members of the Committees on Ways and Means and Education and Labor. Special acknowledgment should also go to Congressman HODES of New Hampshire, who has been a champion for this bill from the start.

Michelle's Law would make a small improvement in access to health insurance for individuals who find themselves in the precarious position of being at risk of losing their insurance because they are sick. We clearly have a long way to go to eliminate the growing problem of the uninsured and under insured, but this is a small step in that direction.

I am pleased to support this legislation and look forward to working with my colleagues to move it to the President's desk.

Mr. PALLONE. I yield back the balance of my time.

Mr. DEAL of Georgia. I, likewise, urge the adoption of this legislation, and yield back the balance of my time.

The SPEAKER pro tempore (Ms. BALDWIN). The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and pass the bill, H.R. 2851, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

FAMILY SMOKING PREVENTION AND TOBACCO CONTROL ACT

Mr. DINGELL. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 1108) to protect the public health by providing the Food and Drug Administration with certain authority to regulate tobacco products, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1108

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''Family Smoking Prevention and Tobacco Control Act''.

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

SEC. 2. FINDINGS.

The Congress finds the following:

(1) The use of tobacco products by the Nation's children is a pediatric disease of considerable proportions that results in new generations of tobacco-dependent children and adults.

(2) A consensus exists within the scientific and medical communities that tobacco products are inherently dangerous and cause cancer, heart disease, and other serious adverse health effects.

(3) Nicotine is an addictive drug.

(4) Virtually all new users of tobacco products are under the minimum legal age to purchase such products.

(5) Tobacco advertising and marketing contribute significantly to the use of nicotine-containing tobacco products by adolescents.

(6) Because past efforts to restrict advertising and marketing of tobacco products have failed adequately to curb tobacco use by adolescents, comprehensive restrictions on the sale, promotion, and distribution of such products are needed.

(7) Federal and State governments have lacked the legal and regulatory authority and resources they need to address comprehensively the public health and societal problems caused by the use of tobacco products.

(8) Federal and State public health officials, the public health community, and the public at large recognize that the tobacco industry should be subject to ongoing oversight.

(9) Under article I, section 8 of the Constitution, the Congress is vested with the responsibility for regulating interstate commerce and commerce with Indian tribes.

(10) The sale, distribution, marketing, advertising, and use of tobacco products are activities in and substantially affecting interstate commerce because they are sold, marketed, advertised, and distributed in interstate commerce on a nationwide basis, and have a substantial effect on the Nation's economy.

(11) The sale, distribution, marketing, advertising, and use of such products substantially affect interstate commerce through the health care and other costs attributable to the use of tobacco products.

(12) It is in the public interest for Congress to enact legislation that provides the Food and Drug Administration with the authority to regulate tobacco products and the advertising and promotion of such products. The benefits to the American people from enacting such legislation would be significant in human and economic terms.

(13) Tobacco use is the foremost preventable cause of premature death in America. It causes over 400,000 deaths in the United States each year, and approximately 8,600,000 Americans have chronic illnesses related to smoking.

(14) Reducing the use of tobacco by minors by 50 percent would prevent well over 10,000,000 of today's children from becoming regular, daily smokers, saving over 3,000,000 of them from premature death due to tobacco-induced disease. Such a reduction in youth smoking would also result in approximately $75,000,000,000 in savings attributable to reduced health care costs.

(15) Advertising, marketing, and promotion of tobacco products have been especially directed to attract young persons to use tobacco products, and these efforts have resulted in increased use of such products by youth. Past efforts to oversee these activities have not been successful in adequately preventing such increased use.

(16) In 2005, the cigarette manufacturers spent more than $13,000,000,000 to attract new users, retain current users, increase current consumption, and generate favorable long-term attitudes toward smoking and tobacco use.

(17) Tobacco product advertising often misleadingly portrays the use of tobacco as socially acceptable and healthful to minors.

(18) Tobacco product advertising is regularly seen by persons under the age of 18, and persons under the age of 18 are regularly exposed to tobacco product promotional efforts.

(19) Through advertisements during and sponsorship of sporting events, tobacco has become strongly associated with sports and has become portrayed as an integral part of sports and the healthy lifestyle associated with rigorous sporting activity.

(20) Children are exposed to substantial and unavoidable tobacco advertising that leads to favorable beliefs about tobacco use, plays a role in leading young people to overestimate the prevalence of tobacco use, and increases the number of young people who begin to use tobacco.

(21) The use of tobacco products in motion pictures and other mass media glamorizes its use for young people and encourages them to use tobacco products.

(22) Tobacco advertising expands the size of the tobacco market by increasing consumption of tobacco products including tobacco use by young people.

(23) Children are more influenced by tobacco marketing than adults: more than 80 percent of youth smoke three heavily marketed brands, while only 54 percent of adults, 26 and older, smoke these same brands.

(24) Tobacco company documents indicate that young people are an important and often crucial segment of the tobacco market. Children, who tend to be more price sensitive than adults, are influenced by advertising and promotion practices that result in drastically reduced cigarette prices.

(25) Comprehensive advertising restrictions will have a positive effect on the smoking rates of young people.

(26) Restrictions on advertising are necessary to prevent unrestricted tobacco advertising from undermining legislation prohibiting access to young people and providing for education about tobacco use.

(27) International experience shows that advertising regulations that are stringent and comprehensive have a greater impact on overall tobacco use and young people's use than weaker or less comprehensive ones.

(28) Text only requirements, although not as stringent as a ban, will help reduce underage use of tobacco products while preserving the informational function of advertising.

(29) It is in the public interest for Congress to adopt legislation to address the public health crisis created by actions of the tobacco industry.

(30) The final regulations promulgated by the Secretary of Health and Human Services in the August 28, 1996, issue of the Federal Register (61 Fed. Reg. 44615–44618) for inclusion as part 897 of title 21, Code of Federal Regulations, are consistent with the first amendment to the United States Constitution and with the standards set forth in the amendments made by this subtitle for the regulation of tobacco products by the Food and Drug Administration, and the restriction on the sale and distribution of, including access to and the advertising and promotion of, tobacco products contained in such regulations are substantially related to accomplishing the public health goals of this Act.

(31) The regulations described in paragraph (30) will directly and materially advance the Federal Government's substantial interest in reducing the number of children and adolescents who use cigarettes and smokeless tobacco and in preventing the life-threatening health consequences associated with tobacco use. An overwhelming majority of Americans who use tobacco products begin using such products while they are minors and become addicted to the nicotine in those products before reaching the age of 18. Tobacco advertising and promotion play a crucial role in the decision of these minors to begin using tobacco products. Less restrictive and less comprehensive approaches have not and will not be effective in reducing the problems addressed by such regulations. The reasonable restrictions on the advertising and promotion of tobacco products contained in such regulations will lead to a significant decrease in the number of minors using and becoming addicted to those products.

(32) The regulations described in paragraph (30) impose no more extensive restrictions on communication by tobacco manufacturers and sellers than are necessary to reduce the number of children and adolescents who use cigarettes and smokeless tobacco and to prevent the life-threatening health consequences associated with tobacco use. Such regulations are narrowly tailored to restrict those advertising and promotional practices which are most likely to be seen or heard by youth and most likely to entice them into tobacco use, while affording tobacco manufacturers and sellers ample opportunity to convey information about their products to adult consumers.

(33) Tobacco dependence is a chronic disease, one that typically requires repeated interventions to achieve long-term or permanent abstinence.

(34) Because the only known safe alternative to smoking is cessation, interventions should target all smokers to help them quit completely.

(35) Tobacco products have been used to facilitate and finance criminal activities both domestically and internationally. Illicit trade of tobacco products has been linked to organized crime and terrorist groups.

(36) It is essential that the Food and Drug Administration review products sold or distributed for use to reduce risks or exposures associated with tobacco products and that it be empowered to review any advertising and labeling for such products. It is also essential that manufacturers, prior to marketing such products, be required to demonstrate that such products will meet a series of rigorous criteria, and will benefit the health of the population as a whole, taking into account both users of tobacco products and persons who do not currently use tobacco products.

(37) Unless tobacco products that purport to reduce the risks to the public of tobacco use actually reduce such risks, those products can cause substantial harm to the public health to the extent that the individuals, who would otherwise not consume tobacco products or would consume such products less, use tobacco products purporting to reduce risk. Those who use products sold or distributed as modified risk products that do not in fact reduce risk, rather than quitting or reducing their use of tobacco products, have a substantially increased likelihood of suffering disability and premature death. The costs to society of the widespread use of products sold or distributed as modified risk products that do not in fact reduce risk or that increase risk include thousands of unnecessary deaths and injuries and huge costs to our health care system.

(38) As the National Cancer Institute has found, many smokers mistakenly believe that ''low tar'' and ''light'' cigarettes cause fewer health problems than other cigarettes. As the National Cancer Institute has also found, mistaken beliefs about the health consequences of smoking ''low tar'' and ''light'' cigarettes can reduce the motivation

to quit smoking entirely and thereby lead to disease and death.

(39) Recent studies have demonstrated that there has been no reduction in risk on a population-wide basis from ''low tar'' and ''light'' cigarettes, and such products may actually increase the risk of tobacco use.

(40) The dangers of products sold or distributed as modified risk tobacco products that do not in fact reduce risk are so high that there is a compelling governmental interest in ensuring that statements about modified risk tobacco products are complete, accurate, and relate to the overall disease risk of the product.

(41) As the Federal Trade Commission has found, consumers have misinterpreted advertisements in which one product is claimed to be less harmful than a comparable product, even in the presence of disclosures and advisories intended to provide clarification.

(42) Permitting manufacturers to make unsubstantiated statements concerning modified risk tobacco products, whether express or implied, even if accompanied by disclaimers would be detrimental to the public health.

(43) The only way to effectively protect the public health from the dangers of unsubstantiated modified risk tobacco products is to empower the Food and Drug Administration to require that products that tobacco manufacturers sold or distributed for risk reduction be reviewed in advance of marketing, and to require that the evidence relied on to support claims be fully verified.

(44) The Food and Drug Administration is a regulatory agency with the scientific expertise to identify harmful substances in products to which consumers are exposed, to design standards to limit exposure to those substances, to evaluate scientific studies supporting claims about the safety of products, and to evaluate the impact of labels, labeling, and advertising on consumer behavior in order to reduce the risk of harm and promote understanding of the impact of the product on health. In connection with its mandate to promote health and reduce the risk of harm, the Food and Drug Administration routinely makes decisions about whether and how products may be marketed in the United States.

(45) The Federal Trade Commission was created to protect consumers from unfair or deceptive acts or practices, and to regulate unfair methods of competition. Its focus is on those marketplace practices that deceive or mislead consumers, and those that give some competitors an unfair advantage. Its mission is to regulate activities in the marketplace. Neither the Federal Trade Commission nor any other Federal agency except the Food and Drug Administration possesses the scientific expertise needed to implement effectively all provisions of the Family Smoking Prevention and Tobacco Control Act.

(46) If manufacturers state or imply in communications directed to consumers through the media or through a label, labeling, or advertising, that a tobacco product is approved or inspected by the Food and Drug Administration or complies with Food and Drug Administration standards, consumers are likely to be confused and misled. Depending upon the particular language used and its context, such a statement could result in consumers being misled into believing that the product is endorsed by the Food and Drug Administration for use or in consumers being misled about the harmfulness of the product because of such regulation, inspection, approval, or compliance.

(47) If manufacturers are permitted to state or imply in communications directed to consumers that a tobacco product is approved or inspected by the Food and Drug Administration or complies with Food and Drug Administration standards, consumers are likely to be confused and misled. Such a statement could result in consumers being misled into believing that the product is endorsed by the Food and Drug Administration for use or in consumers being misled about the harmfulness of the product because of such regulation, inspection, or compliance.

(48) In August 2006 a United States district court judge found that the major United States cigarette companies continue to target and market to youth. USA v Philip Morris, USA, Inc., et al. (Civil Action No. 99–2496 (GK), August 17, 2006).

(49) In August 2006 a United States district court judge found that the major United States cigarette companies dramatically increased their advertising and promotional spending in ways that encourage youth to start smoking subsequent to the signing of the Master Settlement Agreement in 1998. USA v Philip Morris, USA, Inc., et al. (Civil Action No. 99–2496 (GK), August 17, 2006).

(50) In August 2006 a United States district court judge found that the major United States cigarette companies have designed their cigarettes to precisely control nicotine delivery levels and provide doses of nicotine sufficient to create and sustain addiction while also concealing much of their nicotine-related research. USA v Philip Morris, USA, Inc., et al. (Civil Action No. 99–2496 (GK), August 17, 2006).

SEC. 3. PURPOSE.

The purposes of this Act are—

(1) to provide authority to the Food and Drug Administration to regulate tobacco products under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), by recognizing it as the primary Federal regulatory authority with respect to the manufacture, marketing, and distribution of tobacco products as provided for in this Act;

(2) to ensure that the Food and Drug Administration has the authority to address issues of particular concern to public health officials, especially the use of tobacco by young people and dependence on tobacco;

(3) to authorize the Food and Drug Administration to set national standards controlling the manufacture of tobacco products and the identity, public disclosure, and amount of ingredients used in such products;

(4) to provide new and flexible enforcement authority to ensure that there is effective oversight of the tobacco industry's efforts to develop, introduce, and promote less harmful tobacco products;

(5) to vest the Food and Drug Administration with the authority to regulate the levels of tar, nicotine, and other harmful components of tobacco products;

(6) in order to ensure that consumers are better informed, to require tobacco product manufacturers to disclose research which has not previously been made available, as well as research generated in the future, relating to the health and dependency effects or safety of tobacco products;

(7) to continue to permit the sale of tobacco products to adults in conjunction with measures to ensure that they are not sold or accessible to underage purchasers;

(8) to impose appropriate regulatory controls on the tobacco industry;

(9) to promote cessation to reduce disease risk and the social costs associated with tobacco-related diseases; and

(10) to strengthen legislation against illicit trade in tobacco products.

SEC. 4. SCOPE AND EFFECT.

(a) INTENDED EFFECT.—Nothing in this Act (or an amendment made by this Act) shall be construed to—

(1) establish a precedent with regard to any other industry, situation, circumstance, or legal action; or

(2) affect any action pending in Federal, State, or Tribal court, or any agreement, consent decree, or contract of any kind.

(b) AGRICULTURAL ACTIVITIES.—The provisions of this Act (or an amendment made by this Act) which authorize the Secretary to take certain actions with regard to tobacco and tobacco products shall not be construed to affect any authority of the Secretary of Agriculture under existing law regarding the growing, cultivation, or curing of raw tobacco.

(c) REVENUE ACTIVITIES.—The provisions of this Act (or an amendment made by this Act) which authorize the Secretary to take certain actions with regard to tobacco products shall not be construed to affect any authority of the Secretary of the Treasury under chapter 52 of the Internal Revenue Code of 1986.

SEC. 5. SEVERABILITY.

If any provision of this Act, the amendments made by this Act, or the application of any provision of this Act to any person or circumstance is held to be invalid, the remainder of this Act, the amendments made by this Act, and the application of the provisions of this Act to any other person or circumstance shall not be affected and shall continue to be enforced to the fullest extent possible.

TITLE I—AUTHORITY OF THE FOOD AND DRUG ADMINISTRATION

SEC. 101. AMENDMENT OF FEDERAL FOOD, DRUG, AND COSMETIC ACT.

(a) DEFINITION OF TOBACCO PRODUCTS.—Section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321) is amended by adding at the end the following:

''(rr)(1) The term 'tobacco product' means any product made or derived from tobacco that is intended for human consumption, including any component, part, or accessory of a tobacco product (except for raw materials other than tobacco used in manufacturing a component, part, or accessory of a tobacco product).

''(2) The term 'tobacco product' does not mean an article that is a drug under subsection (g)(1), a device under subsection (h), or a combination product described in section 503(g).

''(3) The products described in paragraph (2) shall be subject to chapter V of this Act.

''(4) A tobacco product may not be marketed in combination with any other article or product regulated under this Act (including a drug, biologic, food, cosmetic, medical device, or a dietary supplement).''.

(b) FDA AUTHORITY OVER TOBACCO PRODUCTS.—The Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) is amended—

(1) by redesignating chapter IX as chapter X;

(2) by redesignating sections 901 through 910 as sections 1001 through 1010; and

(3) by inserting after chapter VIII the following:

''CHAPTER IX—TOBACCO PRODUCTS

''SEC. 900. DEFINITIONS.

''In this chapter:

''(1) ADDITIVE.—The term 'additive' means any substance the intended use of which results or may reasonably be expected to result, directly or indirectly, in its becoming a component or otherwise affecting the characteristic of any tobacco product (including any substances intended for use as a flavoring or coloring or in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding), except that such term does not include tobacco or a pesticide chemical residue in or on raw tobacco or a pesticide chemical.

''(2) BRAND.—The term 'brand' means a variety of tobacco product distinguished by the

tobacco used, tar content, nicotine content, flavoring used, size, filtration, packaging, logo, registered trademark, brand name, identifiable pattern of colors, or any combination of such attributes.

''(3) CIGARETTE.—The term 'cigarette'—

''(A) means a product that—

''(i) is a tobacco product; and

''(ii) meets the definition of the term 'cigarette' in section 3(1) of the Federal Cigarette Labeling and Advertising Act; and

''(B) includes tobacco, in any form, that is functional in the product, which, because of its appearance, the type of tobacco used in the filler, or its packaging and labeling, is likely to be offered to, or purchased by, consumers as a cigarette or as roll-your-own tobacco.

''(4) CIGARETTE TOBACCO.—The term 'cigarette tobacco' means any product that consists of loose tobacco that is intended for use by consumers in a cigarette. Unless otherwise stated, the requirements applicable to cigarettes under this chapter shall also apply to cigarette tobacco.

''(5) COMMERCE.—The term 'commerce' has the meaning given that term by section 3(2) of the Federal Cigarette Labeling and Advertising Act.

''(6) COUNTERFEIT TOBACCO PRODUCT.—The term 'counterfeit tobacco product' means a tobacco product (or the container or labeling of such a product) that, without authorization, bears the trademark, trade name, or other identifying mark, imprint, or device, or any likeness thereof, of a tobacco product listed in a registration under section 905(i)(1).

''(7) DISTRIBUTOR.—The term 'distributor' as regards a tobacco product means any person who furthers the distribution of a tobacco product, whether domestic or imported, at any point from the original place of manufacture to the person who sells or distributes the product to individuals for personal consumption. Common carriers are not considered distributors for purposes of this chapter.

''(8) ILLICIT TRADE.—The term 'illicit trade' means any practice or conduct prohibited by law which relates to production, shipment, receipt, possession, distribution, sale, or purchase of tobacco products including any practice or conduct intended to facilitate such activity.

''(9) INDIAN TRIBE.—The term 'Indian tribe' has the meaning given such term in section 4(e) of the Indian Self-Determination and Education Assistance Act.

''(10) LITTLE CIGAR.—The term 'little cigar' means a product that—

''(A) is a tobacco product; and

''(B) meets the definition of the term 'little cigar' in section 3(7) of the Federal Cigarette Labeling and Advertising Act.

''(11) NICOTINE.—The term 'nicotine' means the chemical substance named 3-(1-Methyl-2-pyrrolidinyl) pyridine or C[10]H[14]N[2], including any salt or complex of nicotine.

''(12) PACKAGE.—The term 'package' means a pack, box, carton, or container of any kind or, if no other container, any wrapping (including cellophane), in which a tobacco product is offered for sale, sold, or otherwise distributed to consumers.

''(13) RETAILER.—The term 'retailer' means any person, government, or entity who sells tobacco products to individuals for personal consumption, or who operates a facility where self-service displays of tobacco products are permitted.

''(14) ROLL-YOUR-OWN TOBACCO.—The term 'roll-your-own tobacco' means any tobacco product which, because of its appearance, type, packaging, or labeling, is suitable for use and likely to be offered to, or purchased by, consumers as tobacco for making cigarettes.

''(15) SMALL TOBACCO PRODUCT MANUFACTURER.—The term 'small tobacco product manufacturer' means a tobacco product manufacturer that employs fewer than 350 employees. For purposes of determining the number of employees of a manufacturer under the preceding sentence, the employees of a manufacturer are deemed to include the employees of each entity that controls, is controlled by, or is under common control with such manufacturer.

''(16) SMOKE CONSTITUENT.—The term 'smoke constituent' means any chemical or chemical compound in mainstream or sidestream tobacco smoke that either transfers from any component of the cigarette to the smoke or that is formed by the combustion or heating of tobacco, additives, or other component of the tobacco product.

''(17) SMOKELESS TOBACCO.—The term 'smokeless tobacco' means any tobacco product that consists of cut, ground, powdered, or leaf tobacco and that is intended to be placed in the oral or nasal cavity.

''(18) STATE; TERRITORY.—The terms 'State' and 'Territory' shall have the meanings given to such terms in section 201.

''(19) TOBACCO PRODUCT MANUFACTURER.—The term 'tobacco product manufacturer' means any person, including any repacker or relabeler, who—

''(A) manufactures, fabricates, assembles, processes, or labels a tobacco product; or

''(B) imports a finished tobacco product for sale or distribution in the United States.

''(20) TOBACCO WAREHOUSE.—

''(A) Subject to subparagraphs (B) and (C), the term 'tobacco warehouse' includes any person—

''(i) who—

''(I) removes foreign material from tobacco leaf through nothing other than a mechanical process;

''(II) humidifies tobacco leaf with nothing other than potable water in the form of steam or mist; or

''(III) de-stems, dries, and packs tobacco leaf for storage and shipment;

''(ii) who performs no other actions with respect to tobacco leaf; and

''(iii) who provides to any manufacturer to whom the person sells tobacco all information related to the person's actions described in clause (i) that is necessary for compliance with this Act.

''(B) The term 'tobacco warehouse' excludes any person who—

''(i) reconstitutes tobacco leaf;

''(ii) is a manufacturer, distributor, or retailer of a tobacco product; or

''(iii) applies any chemical, additive, or substance to the tobacco leaf other than potable water in the form of steam or mist.

''(C) The definition of the term 'tobacco warehouse' in subparagraph (A) shall not apply to the extent to which the Secretary determines, through rulemaking, that regulation under this chapter of the actions described in such subparagraph is appropriate for the protection of the public health.

''(21) UNITED STATES.—The term 'United States' means the 50 States of the United States of America and the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, Wake Island, Midway Islands, Kingman Reef, Johnston Atoll, the Northern Mariana Islands, and any other trust territory or possession of the United States.

''SEC. 901. FDA AUTHORITY OVER TOBACCO PRODUCTS.

''(a) IN GENERAL.—Tobacco products, including modified risk tobacco products for which an order has been issued in accordance with section 911, shall be regulated by the Secretary under this chapter and shall not be subject to the provisions of chapter V.

''(b) APPLICABILITY.—This chapter shall apply to all cigarettes, cigarette tobacco, roll-your-own tobacco, and smokeless tobacco and to any other tobacco products that the Secretary by regulation deems to be subject to this chapter.

''(c) SCOPE.—

''(1) IN GENERAL.—Nothing in this chapter, or any policy issued or regulation promulgated thereunder, or in sections 101(a), 102, or 103 of title I, title II, or title III of the Family Smoking Prevention and Tobacco Control Act, shall be construed to affect, expand, or limit the Secretary's authority over (including the authority to determine whether products may be regulated), or the regulation of, products under this Act that are not tobacco products under chapter V or any other chapter.

''(2) LIMITATION OF AUTHORITY.—

''(A) IN GENERAL.—The provisions of this chapter shall not apply to tobacco leaf that is not in the possession of a manufacturer of tobacco products, or to the producers of tobacco leaf, including tobacco growers, tobacco warehouses, and tobacco grower cooperatives, nor shall any employee of the Food and Drug Administration have any authority to enter onto a farm owned by a producer of tobacco leaf without the written consent of such producer.

''(B) EXCEPTION.—Notwithstanding subparagraph (A), if a producer of tobacco leaf is also a tobacco product manufacturer or controlled by a tobacco product manufacturer, the producer shall be subject to this chapter in the producer's capacity as a manufacturer. The exception in this subparagraph shall not apply to a producer of tobacco leaf who grows tobacco under a contract with a tobacco product manufacturer and who is not otherwise engaged in the manufacturing process.

''(C) RULE OF CONSTRUCTION.—Nothing in this chapter shall be construed to grant the Secretary authority to promulgate regulations on any matter that involves the production of tobacco leaf or a producer thereof, other than activities by a manufacturer affecting production.

''(d) RULEMAKING PROCEDURES.—Each rulemaking under this chapter shall be in accordance with chapter 5 of title 5, United States Code. This subsection shall not be construed to affect the rulemaking provisions of section 102(a) of the Family Smoking Prevention and Tobacco Control Act.

''(e) CENTER FOR TOBACCO PRODUCTS.—Not later than 90 days after the date of enactment of this chapter, the Secretary shall establish within the Food and Drug Administration the Center for Tobacco Products, which shall report to the Commissioner of Food and Drugs in the same manner as the other agency centers within the Food and Drug Administration. The Center shall be responsible for the implementation of this chapter and related matters assigned by the Commissioner.

''(f) OFFICE TO ASSIST SMALL TOBACCO PRODUCT MANUFACTURERS.—The Secretary shall establish within the Food and Drug Administration an identifiable office to provide technical and other nonfinancial assistance to small tobacco product manufacturers to assist them in complying with the requirements of this Act.

''(g) CONSULTATION PRIOR TO RULEMAKING.—Prior to promulgating rules under this chapter, the Secretary shall endeavor to consult with other Federal agencies as appropriate.

''SEC. 902. ADULTERATED TOBACCO PRODUCTS.

''A tobacco product shall be deemed to be adulterated if—

''(1) it consists in whole or in part of any filthy, putrid, or decomposed substance, or is

otherwise contaminated by any added poisonous or added deleterious substance that may render the product injurious to health;

''(2) it has been prepared, packed, or held under insanitary conditions whereby it may have been contaminated with filth, or whereby it may have been rendered injurious to health;

''(3) its package is composed, in whole or in part, of any poisonous or deleterious substance which may render the contents injurious to health;

''(4) the manufacturer or importer of the tobacco product fails to pay a user fee assessed to such manufacturer or importer pursuant to section 919 by the date specified in section 919 or by the 30th day after final agency action on a resolution of any dispute as to the amount of such fee;

''(5) it is, or purports to be or is represented as, a tobacco product which is subject to a tobacco product standard established under section 907 unless such tobacco product is in all respects in conformity with such standard;

''(6)(A) it is required by section 910(a) to have premarket review and does not have an order in effect under section 910(c)(1)(A)(i); or

''(B) it is in violation of an order under section 910(c)(1)(A);

''(7) the methods used in, or the facilities or controls used for, its manufacture, packing, or storage are not in conformity with applicable requirements under section 906(e)(1) or an applicable condition prescribed by an order under section 906(e)(2); or

''(8) it is in violation of section 911.

''SEC. 903. MISBRANDED TOBACCO PRODUCTS.

''(a) IN GENERAL.—A tobacco product shall be deemed to be misbranded—

''(1) if its labeling is false or misleading in any particular;

''(2) if in package form unless it bears a label containing—

''(A) the name and place of business of the tobacco product manufacturer, packer, or distributor;

''(B) an accurate statement of the quantity of the contents in terms of weight, measure, or numerical count;

''(C) an accurate statement of the percentage of the tobacco used in the product that is domestically grown tobacco and the percentage that is foreign grown tobacco; and

''(D) the statement required under section 920(a),

except that under subparagraph (B) reasonable variations shall be permitted, and exemptions as to small packages shall be established, by regulations prescribed by the Secretary;

''(3) if any word, statement, or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed thereon with such conspicuousness (as compared with other words, statements, or designs in the labeling) and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

''(4) if it has an established name, unless its label bears, to the exclusion of any other nonproprietary name, its established name prominently printed in type as required by the Secretary by regulation;

''(5) if the Secretary has issued regulations requiring that its labeling bear adequate directions for use, or adequate warnings against use by children, that are necessary for the protection of users unless its labeling conforms in all respects to such regulations;

''(6) if it was manufactured, prepared, propagated, compounded, or processed in an establishment not duly registered under section 905(b), 905(c), 905(d), or 905(h), if it was not included in a list required by section 905(i), if a notice or other information respecting it was not provided as required by such section or section 905(j), or if it does not bear such symbols from the uniform system for identification of tobacco products prescribed under section 905(e) as the Secretary by regulation requires;

''(7) if, in the case of any tobacco product distributed or offered for sale in any State—

''(A) its advertising is false or misleading in any particular; or

''(B) it is sold or distributed in violation of regulations prescribed under section 906(d);

''(8) unless, in the case of any tobacco product distributed or offered for sale in any State, the manufacturer, packer, or distributor thereof includes in all advertisements and other descriptive printed matter issued or caused to be issued by the manufacturer, packer, or distributor with respect to that tobacco product—

''(A) a true statement of the tobacco product's established name as described in paragraph (4), printed prominently; and

''(B) a brief statement of—

''(i) the uses of the tobacco product and relevant warnings, precautions, side effects, and contraindications; and

''(ii) in the case of specific tobacco products made subject to a finding by the Secretary after notice and opportunity for comment that such action is appropriate to protect the public health, a full description of the components of such tobacco product or the formula showing quantitatively each ingredient of such tobacco product to the extent required in regulations which shall be issued by the Secretary after an opportunity for a hearing;

''(9) if it is a tobacco product subject to a tobacco product standard established under section 907, unless it bears such labeling as may be prescribed in such tobacco product standard; or

''(10) if there was a failure or refusal—

''(A) to comply with any requirement prescribed under section 904 or 908; or

''(B) to furnish any material or information required under section 909.

''(b) PRIOR APPROVAL OF LABEL STATEMENTS.—The Secretary may, by regulation, require prior approval of statements made on the label of a tobacco product. No regulation issued under this subsection may require prior approval by the Secretary of the content of any advertisement, except for modified risk tobacco products as provided in section 911. No advertisement of a tobacco product published after the date of enactment of the Family Smoking Prevention and Tobacco Control Act shall, with respect to the language of label statements as prescribed under section 4 of the Federal Cigarette Labeling and Advertising Act and section 3 of the Comprehensive Smokeless Tobacco Health Education Act of 1986 or the regulations issued under such sections, be subject to the provisions of sections 12 through 15 of the Federal Trade Commission Act.

''SEC. 904. SUBMISSION OF HEALTH INFORMATION TO THE SECRETARY.

''(a) REQUIREMENT.—Each tobacco product manufacturer or importer, or agents thereof, shall submit to the Secretary the following information:

''(1) Not later than 6 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, a listing of all ingredients, including tobacco, substances, compounds, and additives that are, as of such date, added by the manufacturer to the tobacco, paper, filter, or other part of each tobacco product by brand and by quantity in each brand and subbrand.

''(2) A description of the content, delivery, and form of nicotine in each tobacco product measured in milligrams of nicotine in accordance with regulations promulgated by the Secretary in accordance with section 4(e) of the Federal Cigarette Labeling and Advertising Act.

''(3) Beginning 3 years after the date of enactment of this Act, a listing of all constituents, including smoke constituents as applicable, identified by the Secretary as harmful or potentially harmful to health in each tobacco product, and as applicable in the smoke of each tobacco product, by brand and by quantity in each brand and subbrand. Effective beginning 3 years after the date of enactment of this chapter, the manufacturer, importer, or agent shall comply with regulations promulgated under section 915 in reporting information under this paragraph, where applicable.

''(4) Beginning 6 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, all documents developed after the date of enactment of the Family Smoking Prevention and Tobacco Control Act that relate to health, toxicological, behavioral, or physiologic effects of current or future tobacco products, their constituents (including smoke constituents), ingredients, components, and additives.

''(b) DATA SUBMISSION.—At the request of the Secretary, each tobacco product manufacturer or importer of tobacco products, or agents thereof, shall submit the following:

''(1) Any or all documents (including underlying scientific information) relating to research activities, and research findings, conducted, supported, or possessed by the manufacturer (or agents thereof) on the health, toxicological, behavioral, or physiologic effects of tobacco products and their constituents (including smoke constituents), ingredients, components, and additives.

''(2) Any or all documents (including underlying scientific information) relating to research activities, and research findings, conducted, supported, or possessed by the manufacturer (or agents thereof) that relate to the issue of whether a reduction in risk to health from tobacco products can occur upon the employment of technology available or known to the manufacturer.

''(3) Any or all documents (including underlying scientific or financial information) relating to marketing research involving the use of tobacco products or marketing practices and the effectiveness of such practices used by tobacco manufacturers and distributors.

An importer of a tobacco product not manufactured in the United States shall supply the information required of a tobacco product manufacturer under this subsection.

''(c) TIME FOR SUBMISSION.—

''(1) IN GENERAL.—At least 90 days prior to the delivery for introduction into interstate commerce of a tobacco product not on the market on the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the manufacturer of such product shall provide the information required under subsection (a).

''(2) DISCLOSURE OF ADDITIVE.—If at any time a tobacco product manufacturer adds to its tobacco products a new tobacco additive or increases the quantity of an existing tobacco additive, the manufacturer shall, except as provided in paragraph (3), at least 90 days prior to such action so advise the Secretary in writing.

''(3) DISCLOSURE OF OTHER ACTIONS.—If at any time a tobacco product manufacturer eliminates or decreases an existing additive, or adds or increases an additive that has by regulation been designated by the Secretary as an additive that is not a human or animal carcinogen, or otherwise harmful to health under intended conditions of use, the manufacturer shall within 60 days of such action so advise the Secretary in writing.

''(d) DATA LIST.—

''(1) IN GENERAL.—Not later than 3 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, and annually thereafter, the Secretary shall publish in a format that is understandable and not misleading to a lay person, and place on public display (in a manner determined by the Secretary) the list established under subsection (e).

''(2) CONSUMER RESEARCH.—The Secretary shall conduct periodic consumer research to ensure that the list published under paragraph (1) is not misleading to lay persons. Not later than 5 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall submit to the appropriate committees of Congress a report on the results of such research, together with recommendations on whether such publication should be continued or modified.

''(e) DATA COLLECTION.—Not later than 24 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall establish, and periodically revise as appropriate, a list of harmful and potentially harmful constituents, including smoke constituents, to health in each tobacco product by brand and by quantity in each brand and subbrand. The Secretary shall publish a public notice requesting the submission by interested persons of scientific and other information concerning the harmful and potentially harmful constituents in tobacco products and tobacco smoke.

''SEC. 905. ANNUAL REGISTRATION.

''(a) DEFINITIONS.—In this section:

''(1) MANUFACTURE, PREPARATION, COMPOUNDING, OR PROCESSING.—The term 'manufacture, preparation, compounding, or processing' shall include repackaging or otherwise changing the container, wrapper, or labeling of any tobacco product package in furtherance of the distribution of the tobacco product from the original place of manufacture to the person who makes final delivery or sale to the ultimate consumer or user.

''(2) NAME.—The term 'name' shall include in the case of a partnership the name of each partner and, in the case of a corporation, the name of each corporate officer and director, and the State of incorporation.

''(b) REGISTRATION BY OWNERS AND OPERATORS.—On or before December 31 of each year, every person who owns or operates any establishment in any State engaged in the manufacture, preparation, compounding, or processing of a tobacco product or tobacco products shall register with the Secretary the name, places of business, and all such establishments of that person. If the enactment of this Act occurs in the second half of the calendar year, the Secretary shall designate a date no later than 6 months into the subsequent calendar year by which registration pursuant to this subsection shall occur.

''(c) REGISTRATION BY NEW OWNERS AND OPERATORS.—Every person upon first engaging in the manufacture, preparation, compounding, or processing of a tobacco product or tobacco products in any establishment owned or operated in any State by that person shall immediately register with the Secretary that person's name, place of business, and such establishment.

''(d) REGISTRATION OF ADDED ESTABLISHMENTS.—Every person required to register under subsection (b) or (c) shall immediately register with the Secretary any additional establishment which that person owns or operates in any State and in which that person begins the manufacture, preparation, compounding, or processing of a tobacco product or tobacco products.

''(e) UNIFORM PRODUCT IDENTIFICATION SYSTEM.—The Secretary may by regulation prescribe a uniform system for the identification of tobacco products and may require that persons who are required to list such tobacco products under subsection (i) shall list such tobacco products in accordance with such system.

''(f) PUBLIC ACCESS TO REGISTRATION INFORMATION.—The Secretary shall make available for inspection, to any person so requesting, any registration filed under this section.

''(g) BIENNIAL INSPECTION OF REGISTERED ESTABLISHMENTS.—Every establishment registered with the Secretary under this section shall be subject to inspection under section 704 or subsection (h), and every such establishment engaged in the manufacture, compounding, or processing of a tobacco product or tobacco products shall be so inspected by 1 or more officers or employees duly designated by the Secretary at least once in the 2-year period beginning with the date of registration of such establishment under this section and at least once in every successive 2-year period thereafter.

''(h) REGISTRATION BY FOREIGN ESTABLISHMENTS.—Any establishment within any foreign country engaged in the manufacture, preparation, compounding, or processing of a tobacco product or tobacco products, shall register under this section under regulations promulgated by the Secretary. Such regulations shall require such establishment to provide the information required by subsection (i) and shall include provisions for registration of any such establishment upon condition that adequate and effective means are available, by arrangement with the government of such foreign country or otherwise, to enable the Secretary to determine from time to time whether tobacco products manufactured, prepared, compounded, or processed in such establishment, if imported or offered for import into the United States, shall be refused admission on any of the grounds set forth in section 801(a).

''(i) REGISTRATION INFORMATION.—

''(1) PRODUCT LIST.—Every person who registers with the Secretary under subsection (b), (c), (d), or (h) shall, at the time of registration under any such subsection, file with the Secretary a list of all tobacco products which are being manufactured, prepared, compounded, or processed by that person for commercial distribution and which have not been included in any list of tobacco products filed by that person with the Secretary under this paragraph or paragraph (2) before such time of registration. Such list shall be prepared in such form and manner as the Secretary may prescribe and shall be accompanied by—

''(A) in the case of a tobacco product contained in the applicable list with respect to which a tobacco product standard has been established under section 907 or which is subject to section 910, a reference to the authority for the marketing of such tobacco product and a copy of all labeling for such tobacco product;

''(B) in the case of any other tobacco product contained in an applicable list, a copy of all consumer information and other labeling for such tobacco product, a representative sampling of advertisements for such tobacco product, and, upon request made by the Secretary for good cause, a copy of all advertisements for a particular tobacco product; and

''(C) if the registrant filing a list has determined that a tobacco product contained in such list is not subject to a tobacco product standard established under section 907, a brief statement of the basis upon which the registrant made such determination if the Secretary requests such a statement with respect to that particular tobacco product.

''(2) CONSULTATION WITH RESPECT TO FORMS.—The Secretary shall consult with the Secretary of the Treasury in developing the forms to be used for registration under this section to minimize the burden on those persons required to register with both the Secretary and the Tax and Trade Bureau of the Department of the Treasury.

''(3) BIANNUAL REPORT OF ANY CHANGE IN PRODUCT LIST.—Each person who registers with the Secretary under this section shall report to the Secretary once during the month of June of each year and once during the month of December of each year the following:

''(A) A list of each tobacco product introduced by the registrant for commercial distribution which has not been included in any list previously filed by that person with the Secretary under this subparagraph or paragraph (1). A list under this subparagraph shall list a tobacco product by its established name and shall be accompanied by the other information required by paragraph (1).

''(B) If since the date the registrant last made a report under this paragraph that person has discontinued the manufacture, preparation, compounding, or processing for commercial distribution of a tobacco product included in a list filed under subparagraph (A) or paragraph (1), notice of such discontinuance, the date of such discontinuance, and the identity of its established name.

''(C) If since the date the registrant reported under subparagraph (B) a notice of discontinuance that person has resumed the manufacture, preparation, compounding, or processing for commercial distribution of the tobacco product with respect to which such notice of discontinuance was reported, notice of such resumption, the date of such resumption, the identity of such tobacco product by established name, and other information required by paragraph (1), unless the registrant has previously reported such resumption to the Secretary under this subparagraph.

''(D) Any material change in any information previously submitted under this paragraph or paragraph (1).

''(j) REPORT PRECEDING INTRODUCTION OF CERTAIN SUBSTANTIALLY EQUIVALENT PRODUCTS INTO INTERSTATE COMMERCE.—

''(1) IN GENERAL.—Each person who is required to register under this section and who proposes to begin the introduction or delivery for introduction into interstate commerce for commercial distribution of a tobacco product intended for human use that was not commercially marketed (other than for test marketing) in the United States as of February 15, 2007, shall, at least 90 days prior to making such introduction or delivery, report to the Secretary (in such form and manner as the Secretary shall prescribe)—

''(A) the basis for such person's determination that—

''(i) the tobacco product is substantially equivalent, within the meaning of section 910, to a tobacco product commercially marketed (other than for test marketing) in the United States as of February 15, 2007, or to a tobacco product that the Secretary has previously determined, pursuant to subsection (a)(3) of section 910, is substantially equivalent and that is in compliance with the requirements of this Act; or

''(ii) the tobacco product is modified within the meaning of paragraph (3), the modifications are to a product that is commercially marketed and in compliance with the requirements of this Act, and all of the modifications are covered by exemptions granted by the Secretary pursuant to paragraph (3); and

''(B) action taken by such person to comply with the requirements under section 907 that are applicable to the tobacco product.

''(2) APPLICATION TO CERTAIN POST-FEBRUARY 15, 2007, PRODUCTS.—A report under this subsection for a tobacco product that was first introduced or delivered for introduction into interstate commerce for commercial distribution in the United States after February 15, 2007, and prior to the date that is 21 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act shall be submitted to the Secretary not later than 21 months after such date of enactment.

''(3) EXEMPTIONS.—

''(A) IN GENERAL.—The Secretary may exempt from the requirements of this subsection relating to the demonstration that a tobacco product is substantially equivalent within the meaning of section 910, tobacco products that are modified by adding or deleting a tobacco additive, or increasing or decreasing the quantity of an existing tobacco additive, if the Secretary determines that—

''(i) such modification would be a minor modification of a tobacco product that can be sold under this Act;

''(ii) a report under this subsection is not necessary to ensure that permitting the tobacco product to be marketed would be appropriate for protection of the public health; and

''(iii) an exemption is otherwise appropriate.

''(B) REGULATIONS.—Not later than 15 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall issue regulations to implement this paragraph.

''SEC. 906. GENERAL PROVISIONS RESPECTING CONTROL OF TOBACCO PRODUCTS.

''(a) IN GENERAL.—Any requirement established by or under section 902, 903, 905, or 909 applicable to a tobacco product shall apply to such tobacco product until the applicability of the requirement to the tobacco product has been changed by action taken under section 907, section 910, section 911, or subsection (d) of this section, and any requirement established by or under section 902, 903, 905, or 909 which is inconsistent with a requirement imposed on such tobacco product under section 907, section 910, section 911, or subsection (d) of this section shall not apply to such tobacco product.

''(b) INFORMATION ON PUBLIC ACCESS AND COMMENT.—Each notice of proposed rulemaking or other notification under section 907, 908, 909, 910, or 911 or under this section, any other notice which is published in the Federal Register with respect to any other action taken under any such section and which states the reasons for such action, and each publication of findings required to be made in connection with rulemaking under any such section shall set forth—

''(1) the manner in which interested persons may examine data and other information on which the notice or findings is based; and

''(2) the period within which interested persons may present their comments on the notice or findings (including the need therefore) orally or in writing, which period shall be at least 60 days but may not exceed 90 days unless the time is extended by the Secretary by a notice published in the Federal Register stating good cause therefore.

''(c) LIMITED CONFIDENTIALITY OF INFORMATION.—Any information reported to or otherwise obtained by the Secretary or the Secretary's representative under section 903, 904, 907, 908, 909, 910, 911, or 704, or under subsection (e) or (f) of this section, which is exempt from disclosure under subsection (a) of section 552 of title 5, United States Code, by reason of subsection (b)(4) of that section shall be considered confidential and shall not be disclosed, except that the information may be disclosed to other officers or employees concerned with carrying out this chapter, or when relevant in any proceeding under this chapter.

''(d) RESTRICTIONS.—

''(1) IN GENERAL.—The Secretary may by regulation require restrictions on the sale and distribution of a tobacco product, including restrictions on the access to, and the advertising and promotion of, the tobacco product, if the Secretary determines that such regulation would be appropriate for the protection of the public health. The Secretary may by regulation impose restrictions on the advertising and promotion of a tobacco product consistent with and to full extent permitted by the first amendment to the Constitution. The finding as to whether such regulation would be appropriate for the protection of the public health shall be determined with respect to the risks and benefits to the population as a whole, including users and nonusers of the tobacco product, and taking into account—

''(A) the increased or decreased likelihood that existing users of tobacco products will stop using such products; and

''(B) the increased or decreased likelihood that those who do not use tobacco products will start using such products.

No such regulation may require that the sale or distribution of a tobacco product be limited to the written or oral authorization of a practitioner licensed by law to prescribe medical products.

''(2) LABEL STATEMENTS.—The label of a tobacco product shall bear such appropriate statements of the restrictions required by a regulation under subsection (a) as the Secretary may in such regulation prescribe.

''(3) LIMITATIONS.—

''(A) IN GENERAL.—No restrictions under paragraph (1) may—

''(i) prohibit the sale of any tobacco product in face-to-face transactions by a specific category of retail outlets; or

''(ii) establish a minimum age of sale of tobacco products to any person older than 18 years of age.

''(B) MATCHBOOKS.—For purposes of any regulations issued by the Secretary, matchbooks of conventional size containing not more than 20 paper matches, and which are customarily given away for free with the purchase of tobacco products, shall be considered as adult-written publications which shall be permitted to contain advertising. Notwithstanding the preceding sentence, if the Secretary finds that such treatment of matchbooks is not appropriate for the protection of the public health, the Secretary may determine by regulation that matchbooks shall not be considered adult-written publications.

''(4) REMOTE SALES.—

''(A) IN GENERAL.—The Secretary shall—

''(i) within 18 months after the date of enactment of this chapter, promulgate regulations regarding the sale and distribution of tobacco products that occur through means other than a direct, face-to-face exchange between a retailer and a consumer in order to prevent the sale and distribution of tobacco products to individuals who have not attained the minimum age established by applicable law for the purchase of such products, including requirements for age verification; and

''(ii) within 2 years after such date of enactment, issue regulations to address the promotion and marketing of tobacco products that are sold or distributed through means other than a direct, face-to-face exchange between a retailer and a consumer in order to protect individuals who have not attained the minimum age established by applicable law for the purchase of such products.

''(B) RELATION TO OTHER AUTHORITY.—Nothing in this paragraph limits the authority of the Secretary to take additional actions under the other paragraphs of this subsection.

''(e) GOOD MANUFACTURING PRACTICE REQUIREMENTS.—

''(1) METHODS, FACILITIES, AND CONTROLS TO CONFORM.—

''(A) IN GENERAL.—In applying manufacturing restrictions to tobacco, the Secretary shall, in accordance with subparagraph (B), prescribe regulations (which may differ based on the type of tobacco product involved) requiring that the methods used in, and the facilities and controls used for, the manufacture, preproduction design validation (including a process to assess the performance of a tobacco product), packing, and storage of a tobacco product conform to current good manufacturing practice, or hazard analysis and critical control point methodology, as prescribed in such regulations to assure that the public health is protected and that the tobacco product is in compliance with this chapter. Such regulations may provide for the testing of raw tobacco for pesticide chemical residues regardless of whether a tolerance for such chemical residues has been established.

''(B) REQUIREMENTS.—The Secretary shall—

''(i) before promulgating any regulation under subparagraph (A), afford the Tobacco Products Scientific Advisory Committee an opportunity to submit recommendations with respect to the regulation proposed to be promulgated;

''(ii) before promulgating any regulation under subparagraph (A), afford opportunity for an oral hearing;

''(iii) provide the Tobacco Products Scientific Advisory Committee a reasonable time to make its recommendation with respect to proposed regulations under subparagraph (A);

''(iv) in establishing the effective date of a regulation promulgated under this subsection, take into account the differences in the manner in which the different types of tobacco products have historically been produced, the financial resources of the different tobacco product manufacturers, and the state of their existing manufacturing facilities, and shall provide for a reasonable period of time for such manufacturers to conform to good manufacturing practices; and

''(v) not require any small tobacco product manufacturer to comply with a regulation under subparagraph (A) for at least 4 years following the effective date established by the Secretary for such regulation.

''(2) EXEMPTIONS; VARIANCES.—

''(A) PETITION.—Any person subject to any requirement prescribed under paragraph (1) may petition the Secretary for a permanent or temporary exemption or variance from such requirement. Such a petition shall be submitted to the Secretary in such form and manner as the Secretary shall prescribe and shall—

''(i) in the case of a petition for an exemption from a requirement, set forth the basis for the petitioner's determination that compliance with the requirement is not required to assure that the tobacco product will be in compliance with this chapter;

''(ii) in the case of a petition for a variance from a requirement, set forth the methods proposed to be used in, and the facilities and controls proposed to be used for, the manufacture, packing, and storage of the tobacco product in lieu of the methods, facilities, and controls prescribed by the requirement; and

''(iii) contain such other information as the Secretary shall prescribe.

''(B) REFERRAL TO THE TOBACCO PRODUCTS SCIENTIFIC ADVISORY COMMITTEE.—The Secretary may refer to the Tobacco Products Scientific Advisory Committee any petition submitted under subparagraph (A). The Tobacco Products Scientific Advisory Committee shall report its recommendations to the Secretary with respect to a petition referred to it within 60 days after the date of the petition's referral. Within 60 days after—

''(i) the date the petition was submitted to the Secretary under subparagraph (A); or

''(ii) the day after the petition was referred to the Tobacco Products Scientific Advisory Committee,

whichever occurs later, the Secretary shall by order either deny the petition or approve it.

''(C) APPROVAL.—The Secretary may approve—

''(i) a petition for an exemption for a tobacco product from a requirement if the Secretary determines that compliance with such requirement is not required to assure that the tobacco product will be in compliance with this chapter; and

''(ii) a petition for a variance for a tobacco product from a requirement if the Secretary determines that the methods to be used in, and the facilities and controls to be used for, the manufacture, packing, and storage of the tobacco product in lieu of the methods, facilities, and controls prescribed by the requirement are sufficient to assure that the tobacco product will be in compliance with this chapter.

''(D) CONDITIONS.—An order of the Secretary approving a petition for a variance shall prescribe such conditions respecting the methods used in, and the facilities and controls used for, the manufacture, packing, and storage of the tobacco product to be granted the variance under the petition as may be necessary to assure that the tobacco product will be in compliance with this chapter.

''(E) HEARING.—After the issuance of an order under subparagraph (B) respecting a petition, the petitioner shall have an opportunity for an informal hearing on such order.

''(3) COMPLIANCE.—Compliance with requirements under this subsection shall not be required before the end of the 3-year period following the date of enactment of the Family Smoking Prevention and Tobacco Control Act.

''(f) RESEARCH AND DEVELOPMENT.—The Secretary may enter into contracts for research, testing, and demonstrations respecting tobacco products and may obtain tobacco products for research, testing, and demonstration purposes.

''SEC. 907. TOBACCO PRODUCT STANDARDS.

''(a) IN GENERAL.—

''(1) SPECIAL RULES.—

''(A) SPECIAL RULE FOR CIGARETTES.—Beginning 3 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, a cigarette or any of its component parts (including the tobacco, filter, or paper) shall not contain, as a constituent (including a smoke constituent) or additive, an artificial or natural flavor (other than tobacco or menthol) or an herb or spice, including strawberry, grape, orange, clove, cinnamon, pineapple, vanilla, coconut, licorice, cocoa, chocolate, cherry, or coffee, that is a characterizing flavor of the tobacco product or tobacco smoke. Nothing in this subparagraph shall be construed to limit the Secretary's authority to take action under this section or other sections of this Act applicable to menthol or any artificial or natural flavor, herb, or spice not specified in this subparagraph.

''(B) ADDITIONAL SPECIAL RULE.—A tobacco product manufactured in or imported into the United States shall not contain foreign-grown tobacco that—

''(i) was grown or processed using a pesticide chemical that is not approved under applicable Federal law for use in domestic tobacco farming and processing; or

''(ii) in the case of a pesticide chemical that is so approved, was grown or processed using the pesticide chemical in a manner inconsistent with the approved labeling for use of the pesticide chemical in domestic tobacco farming and processing.

''(2) REVISION OF TOBACCO PRODUCT STANDARDS.—The Secretary may revise the tobacco product standards in paragraph (1) in accordance with subsection (c).

''(3) TOBACCO PRODUCT STANDARDS.—

''(A) IN GENERAL.—The Secretary may adopt tobacco product standards in addition to those in paragraph (1) if the Secretary finds that a tobacco product standard is appropriate for the protection of the public health.

''(B) DETERMINATIONS.—

''(i) CONSIDERATIONS.—In making a finding described in subparagraph (A), the Secretary shall consider scientific evidence concerning—

''(I) the risks and benefits to the population as a whole, including users and nonusers of tobacco products, of the proposed standard;

''(II) the increased or decreased likelihood that existing users of tobacco products will stop using such products; and

''(III) the increased or decreased likelihood that those who do not use tobacco products will start using such products.

''(ii) ADDITIONAL CONSIDERATIONS.—In the event that the Secretary makes a determination, set forth in a proposed tobacco product standard in a proposed rule, that it is appropriate for the protection of public health to require the reduction or elimination of an additive, constituent (including a smoke constituent), or other component of a tobacco product because the Secretary has found that the additive, constituent, or other component is or may be harmful, any party objecting to the proposed standard on the ground that the proposed standard will not reduce or eliminate the risk of illness or injury may provide for the Secretary's consideration scientific evidence that demonstrates that the proposed standard will not reduce or eliminate the risk of illness or injury.

''(4) CONTENT OF TOBACCO PRODUCT STANDARDS.—A tobacco product standard established under this section for a tobacco product—

''(A) shall include provisions that are appropriate for the protection of the public health, including provisions, where appropriate—

''(i) for nicotine yields of the product;

''(ii) for the reduction or elimination of other constituents, including smoke constituents, or harmful components of the product; or

''(iii) relating to any other requirement under subparagraph (B);

''(B) shall, where appropriate for the protection of the public health, include—

''(i) provisions respecting the construction, components, ingredients, additives, constituents, including smoke constituents, and properties of the tobacco product;

''(ii) provisions for the testing (on a sample basis or, if necessary, on an individual basis) of the tobacco product;

''(iii) provisions for the measurement of the tobacco product characteristics of the tobacco product;

''(iv) provisions requiring that the results of each or of certain of the tests of the tobacco product required to be made under clause (ii) show that the tobacco product is in conformity with the portions of the standard for which the test or tests were required; and

''(v) a provision requiring that the sale and distribution of the tobacco product be restricted but only to the extent that the sale and distribution of a tobacco product may be restricted under a regulation under section 906(d);

''(C) shall, where appropriate, require the use and prescribe the form and content of labeling for the proper use of the tobacco product; and

''(D) shall require tobacco products containing foreign-grown tobacco to meet the same standards applicable to tobacco products containing domestically grown tobacco.

''(5) PERIODIC REEVALUATION OF TOBACCO PRODUCT STANDARDS.—The Secretary shall provide for periodic evaluation of tobacco product standards established under this section to determine whether such standards should be changed to reflect new medical, scientific, or other technological data. The Secretary may provide for testing under paragraph (4)(B) by any person.

''(6) INVOLVEMENT OF OTHER AGENCIES; INFORMED PERSONS.—In carrying out duties under this section, the Secretary shall endeavor to—

''(A) use personnel, facilities, and other technical support available in other Federal agencies;

''(B) consult with other Federal agencies concerned with standard setting and other nationally or internationally recognized standard-setting entities; and

''(C) invite appropriate participation, through joint or other conferences, workshops, or other means, by informed persons representative of scientific, professional, industry, agricultural, or consumer organizations who in the Secretary's judgment can make a significant contribution.

''(b) CONSIDERATIONS BY SECRETARY.—

''(1) TECHNICAL ACHIEVABILITY.—The Secretary shall consider information submitted in connection with a proposed standard regarding the technical achievability of compliance with such standard.

''(2) OTHER CONSIDERATIONS.—The Secretary shall consider all other information submitted in connection with a proposed standard, including information concerning the countervailing effects of the tobacco product standard on the health of adolescent tobacco users, adult tobacco users, or nontobacco users, such as the creation of a significant demand for contraband or other tobacco products that do not meet the requirements of this chapter and the significance of such demand.

''(c) PROPOSED STANDARDS.—

''(1) IN GENERAL.—The Secretary shall publish in the Federal Register a notice of proposed rulemaking for the establishment, amendment, or revocation of any tobacco product standard.

''(2) REQUIREMENTS OF NOTICE.—A notice of proposed rulemaking for the establishment or amendment of a tobacco product standard for a tobacco product shall—

''(A) set forth a finding with supporting justification that the tobacco product standard is appropriate for the protection of the public health;

''(B) invite interested persons to submit a draft or proposed tobacco product standard for consideration by the Secretary;

''(C) invite interested persons to submit comments on structuring the standard so that it does not advantage foreign-grown tobacco over domestically grown tobacco; and

''(D) invite the Secretary of Agriculture to provide any information or analysis which the Secretary of Agriculture believes is relevant to the proposed tobacco product standard.

''(3) FINDING.—A notice of proposed rulemaking for the revocation of a tobacco product standard shall set forth a finding with supporting justification that the tobacco product standard is no longer appropriate for the protection of the public health.

''(4) COMMENT.—The Secretary shall provide for a comment period of not less than 60 days.

''(d) PROMULGATION.—

''(1) IN GENERAL.—After the expiration of the period for comment on a notice of proposed rulemaking published under subsection (c) respecting a tobacco product standard and after consideration of comments submitted under subsections (b) and (c) and any report from the Tobacco Products Scientific Advisory Committee, if the Secretary determines that the standard would be appropriate for the protection of the public health, the Secretary shall—

''(A) promulgate a regulation establishing a tobacco product standard and publish in the Federal Register findings on the matters referred to in subsection (c); or

''(B) publish a notice terminating the proceeding for the development of the standard together with the reasons for such termination.

''(2) EFFECTIVE DATE.—A regulation establishing a tobacco product standard shall set forth the date or dates upon which the standard shall take effect, but no such regulation may take effect before 1 year after the date of its publication unless the Secretary determines that an earlier effective date is necessary for the protection of the public health. Such date or dates shall be established so as to minimize, consistent with the public health, economic loss to, and disruption or dislocation of, domestic and international trade. In establishing such effective date or dates, the Secretary shall consider information submitted in connection with a proposed product standard by interested parties, including manufacturers and tobacco growers, regarding the technical achievability of compliance with the standard, and including information concerning the existence of patents that make it impossible to comply in the timeframe envisioned in the proposed standard. If the Secretary determines, based on the Secretary's evaluation of submitted comments, that a product standard can be met only by manufacturers requiring substantial changes to the methods of farming the domestically grown tobacco used by the manufacturer, the effective date of that product standard shall be not less than 2 years after the date of publication of the final regulation establishing the standard.

''(3) LIMITATION ON POWER GRANTED TO THE FOOD AND DRUG ADMINISTRATION.—Because of the importance of a decision of the Secretary to issue a regulation—

''(A) banning all cigarettes, all smokeless tobacco products, all little cigars, all cigars other than little cigars, all pipe tobacco, or all roll-your-own tobacco products; or

''(B) requiring the reduction of nicotine yields of a tobacco product to zero,

the Secretary is prohibited from taking such actions under this Act.

''(4) AMENDMENT; REVOCATION.—

''(A) AUTHORITY.—The Secretary, upon the Secretary's own initiative or upon petition of an interested person, may by a regulation, promulgated in accordance with the requirements of subsection (c) and paragraph (2), amend or revoke a tobacco product standard.

''(B) EFFECTIVE DATE.—The Secretary may declare a proposed amendment of a tobacco product standard to be effective on and after its publication in the Federal Register and until the effective date of any final action taken on such amendment if the Secretary determines that making it so effective is in the public interest.

''(5) REFERRAL TO ADVISORY COMMITTEE.—

''(A) IN GENERAL.—The Secretary may refer a proposed regulation for the establishment, amendment, or revocation of a tobacco product standard to the Tobacco Products Scientific Advisory Committee for a report and recommendation with respect to any matter involved in the proposed regulation which requires the exercise of scientific judgment.

''(B) INITIATION OF REFERRAL.—The Secretary may make a referral under this paragraph—

''(i) on the Secretary's own initiative; or

''(ii) upon the request of an interested person that—

''(I) demonstrates good cause for the referral; and

''(II) is made before the expiration of the period for submission of comments on the proposed regulation.

''(C) PROVISION OF DATA.—If a proposed regulation is referred under this paragraph to the Tobacco Products Scientific Advisory Committee, the Secretary shall provide the Advisory Committee with the data and information on which such proposed regulation is based.

''(D) REPORT AND RECOMMENDATION.—The Tobacco Products Scientific Advisory Committee shall, within 60 days after the referral of a proposed regulation under this paragraph and after independent study of the data and information furnished to it by the Secretary and other data and information before it, submit to the Secretary a report and recommendation respecting such regulation, together with all underlying data and information and a statement of the reason or basis for the recommendation.

''(E) PUBLIC AVAILABILITY.—The Secretary shall make a copy of each report and recommendation under subparagraph (D) publicly available.

''(e) MENTHOL CIGARETTES.—

''(1) REFERRAL; CONSIDERATIONS.—Immediately upon the establishment of the Tobacco Products Scientific Advisory Committee under section 917(a), the Secretary shall refer to the Committee for report and recommendation, under section 917(c)(4), the issue of the impact of the use of menthol in cigarettes on the public health, including such use among African Americans, Hispanics, and other racial and ethnic minorities. In its review, the Tobacco Products Scientific Advisory Committee shall address the considerations listed in subsections (a)(3)(B)(i) and (b).

''(2) REPORT AND RECOMMENDATION.—Not later than 1 year after its establishment, the Tobacco Product Scientific Advisory Committee shall submit to the Secretary the report and recommendations required pursuant to paragraph (1).

''(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to limit the Secretary's authority to take action under this section or other sections of this Act applicable to menthol.

''SEC. 908. NOTIFICATION AND OTHER REMEDIES.

''(a) NOTIFICATION.—If the Secretary determines that—

''(1) a tobacco product which is introduced or delivered for introduction into interstate commerce for commercial distribution presents an unreasonable risk of substantial harm to the public health; and

''(2) notification under this subsection is necessary to eliminate the unreasonable risk of such harm and no more practicable means is available under the provisions of this chapter (other than this section) to eliminate such risk,

the Secretary may issue such order as may be necessary to assure that adequate notification is provided in an appropriate form, by the persons and means best suited under the circumstances involved, to all persons who should properly receive such notification in order to eliminate such risk. The Secretary may order notification by any appropriate means, including public service announcements. Before issuing an order under this subsection, the Secretary shall consult with the persons who are to give notice under the order.

''(b) NO EXEMPTION FROM OTHER LIABILITY.—Compliance with an order issued under this section shall not relieve any person from liability under Federal or State law. In awarding damages for economic loss in an action brought for the enforcement of any such liability, the value to the plaintiff in such action of any remedy provided under such order shall be taken into account.

''(c) RECALL AUTHORITY.—

''(1) IN GENERAL.—If the Secretary finds that there is a reasonable probability that a tobacco product contains a manufacturing or other defect not ordinarily contained in tobacco products on the market that would cause serious, adverse health consequences or death, the Secretary shall issue an order requiring the appropriate person (including the manufacturers, importers, distributors, or retailers of the tobacco product) to immediately cease distribution of such tobacco product. The order shall provide the person subject to the order with an opportunity for an informal hearing, to be held not later than 10 days after the date of the issuance of the order, on the actions required by the order and on whether the order should be amended to require a recall of such tobacco product. If, after providing an opportunity for such a hearing, the Secretary determines that inadequate grounds exist to support the actions required by the order, the Secretary shall vacate the order.

''(2) AMENDMENT OF ORDER TO REQUIRE RECALL.—

''(A) IN GENERAL.—If, after providing an opportunity for an informal hearing under paragraph (1), the Secretary determines that the order should be amended to include a recall of the tobacco product with respect to which the order was issued, the Secretary shall, except as provided in subparagraph (B), amend the order to require a recall. The Secretary shall specify a timetable in which the tobacco product recall will occur and shall require periodic reports to the Secretary describing the progress of the recall.

''(B) NOTICE.—An amended order under subparagraph (A)—

''(i) shall not include recall of a tobacco product from individuals; and

''(ii) shall provide for notice to persons subject to the risks associated with the use of such tobacco product.

In providing the notice required by clause (ii), the Secretary may use the assistance of retailers and other persons who distributed such tobacco product. If a significant number of such persons cannot be identified, the Secretary shall notify such persons under section 705(b).

''(3) REMEDY NOT EXCLUSIVE.—The remedy provided by this subsection shall be in addition to remedies provided by subsection (a).

''SEC. 909. RECORDS AND REPORTS ON TOBACCO PRODUCTS.

''(a) IN GENERAL.—Every person who is a tobacco product manufacturer or importer of a tobacco product shall establish and maintain such records, make such reports, and provide such information, as the Secretary may by regulation reasonably require to assure that such tobacco product is not adulterated or misbranded and to otherwise protect public health. Regulations prescribed under the preceding sentence—

''(1) may require a tobacco product manufacturer or importer to report to the Secretary whenever the manufacturer or importer receives or otherwise becomes aware of information that reasonably suggests that one of its marketed tobacco products may have caused or contributed to a serious unexpected adverse experience associated with the use of the product or any significant increase in the frequency of a serious, expected adverse product experience;

''(2) shall require reporting of other significant adverse tobacco product experiences as determined by the Secretary to be necessary to be reported;

''(3) shall not impose requirements unduly burdensome to a tobacco product manufacturer or importer, taking into account the cost of complying with such requirements and the need for the protection of the public health and the implementation of this chapter;

''(4) when prescribing the procedure for making requests for reports or information, shall require that each request made under such regulations for submission of a report or information to the Secretary state the reason or purpose for such request and identify to the fullest extent practicable such report or information;

''(5) when requiring submission of a report or information to the Secretary, shall state the reason or purpose for the submission of such report or information and identify to the fullest extent practicable such report or information; and

''(6) may not require that the identity of any patient or user be disclosed in records, reports, or information required under this subsection unless required for the medical welfare of an individual, to determine risks to public health of a tobacco product, or to verify a record, report, or information submitted under this chapter.

In prescribing regulations under this subsection, the Secretary shall have due regard for the professional ethics of the medical profession and the interests of patients. The prohibitions of paragraph (6) continue to apply to records, reports, and information concerning any individual who has been a patient, irrespective of whether or when he ceases to be a patient.

''(b) REPORTS OF REMOVALS AND CORRECTIONS.—

''(1) IN GENERAL.—Except as provided in paragraph (2), the Secretary shall by regulation require a tobacco product manufacturer or importer of a tobacco product to report promptly to the Secretary any corrective action taken or removal from the market of a tobacco product undertaken by such manufacturer or importer if the removal or correction was undertaken—

''(A) to reduce a risk to health posed by the tobacco product; or

''(B) to remedy a violation of this chapter caused by the tobacco product which may present a risk to health.

A tobacco product manufacturer or importer of a tobacco product who undertakes a corrective action or removal from the market of a tobacco product which is not required to be reported under this subsection shall keep a record of such correction or removal.

''(2) EXCEPTION.—No report of the corrective action or removal of a tobacco product may be required under paragraph (1) if a report of the corrective action or removal is required and has been submitted under subsection (a).

''SEC. 910. APPLICATION FOR REVIEW OF CERTAIN TOBACCO PRODUCTS.

''(a) IN GENERAL.—

''(1) NEW TOBACCO PRODUCT DEFINED.—For purposes of this section the term 'new tobacco product' means—

''(A) any tobacco product (including those products in test markets) that was not commercially marketed in the United States as of February 15, 2007; or

''(B) any modification (including a change in design, any component, any part, or any constituent, including a smoke constituent, or in the content, delivery or form of nicotine, or any other additive or ingredient) of a tobacco product where the modified product was commercially marketed in the United States after February 15, 2007.

''(2) PREMARKET REVIEW REQUIRED.—

''(A) NEW PRODUCTS.—An order under subsection (c)(1)(A)(i) for a new tobacco product is required unless—

''(i) the manufacturer has submitted a report under section 905(j); and the Secretary has issued an order that the tobacco product—

''(I) is substantially equivalent to a tobacco product commercially marketed (other than for test marketing) in the United States as of February 15, 2007; and

''(II) is in compliance with the requirements of this Act; or

''(ii) the tobacco product is exempt from the requirements of section 905(j) pursuant to a regulation issued under section 905(j)(3).

''(B) APPLICATION TO CERTAIN POST-FEBRUARY 15, 2007, PRODUCTS.—Subparagraph (A) shall not apply to a tobacco product—

''(i) that was first introduced or delivered for introduction into interstate commerce for commercial distribution in the United States after February 15, 2007, and prior to the date that is 21 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act; and

''(ii) for which a report was submitted under section 905(j) within such 21-month period,

except that subparagraph (A) shall apply to the tobacco product if the Secretary issues an order that the tobacco product is not substantially equivalent.

''(3) SUBSTANTIALLY EQUIVALENT DEFINED.—

''(A) IN GENERAL.—In this section and section 905(j), the term 'substantially equivalent' or 'substantial equivalence' means, with respect to the tobacco product being compared to the predicate tobacco product, that the Secretary by order has found that the tobacco product—

''(i) has the same characteristics as the predicate tobacco product; or

''(ii) has different characteristics and the information submitted contains information, including clinical data if deemed necessary by the Secretary, that demonstrates that it is not appropriate to regulate the product under this section because the product does not raise different questions of public health.

''(B) CHARACTERISTICS.—In subparagraph (A), the term 'characteristics' means the materials, ingredients, design, composition, heating source, or other features of a tobacco product.

''(C) LIMITATION.—A tobacco product may not be found to be substantially equivalent to a predicate tobacco product that has been removed from the market at the initiative of the Secretary or that has been determined by a judicial order to be misbranded or adulterated.

''(4) HEALTH INFORMATION.—

''(A) SUMMARY.—As part of a submission under section 905(j) respecting a tobacco product, the person required to file a premarket notification under such section shall provide an adequate summary of any health information related to the tobacco product or state that such information will be made available upon request by any person.

''(B) REQUIRED INFORMATION.—Any summary under subparagraph (A) respecting a tobacco product shall contain detailed information regarding data concerning adverse health effects and shall be made available to the public by the Secretary within 30 days of the issuance of a determination that such tobacco product is substantially equivalent to another tobacco product.

''(b) APPLICATION.—

''(1) CONTENTS.—An application under this section shall contain—

''(A) full reports of all information, published or known to, or which should reasonably be known to, the applicant, concerning investigations which have been made to show the health risks of such tobacco product and whether such tobacco product presents less risk than other tobacco products;

''(B) a full statement of the components, ingredients, additives, and properties, and of the principle or principles of operation, of such tobacco product;

''(C) a full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and, when relevant, packing and installation of, such tobacco product;

''(D) an identifying reference to any tobacco product standard under section 907 which would be applicable to any aspect of such tobacco product, and either adequate information to show that such aspect of such tobacco product fully meets such tobacco product standard or adequate information to justify any deviation from such standard;

''(E) such samples of such tobacco product and of components thereof as the Secretary may reasonably require;

''(F) specimens of the labeling proposed to be used for such tobacco product; and

''(G) such other information relevant to the subject matter of the application as the Secretary may require.

''(2) REFERRAL TO TOBACCO PRODUCTS SCIENTIFIC ADVISORY COMMITTEE.—Upon receipt of an application meeting the requirements set forth in paragraph (1), the Secretary—

''(A) may, on the Secretary's own initiative; or

''(B) may, upon the request of an applicant,

refer such application to the Tobacco Products Scientific Advisory Committee for reference and for submission (within such period as the Secretary may establish) of a report and recommendation respecting the application, together with all underlying data and the reasons or basis for the recommendation.

''(c) ACTION ON APPLICATION.—

''(1) DEADLINE.—

''(A) IN GENERAL.—As promptly as possible, but in no event later than 180 days after the receipt of an application under subsection (b), the Secretary, after considering the report and recommendation submitted under subsection (b)(2), shall—

''(i) issue an order that the new product may be introduced or delivered for introduction into interstate commerce if the Secretary finds that none of the grounds specified in paragraph (2) of this subsection applies; or

''(ii) issue an order that the new product may not be introduced or delivered for introduction into interstate commerce if the Secretary finds (and sets forth the basis for such finding as part of or accompanying such denial) that 1 or more grounds for denial specified in paragraph (2) of this subsection apply.

''(B) RESTRICTIONS ON SALE AND DISTRIBUTION.—An order under subparagraph (A)(i) may require that the sale and distribution of the tobacco product be restricted but only to the extent that the sale and distribution of a tobacco product may be restricted under a regulation under section 906(d).

''(2) DENIAL OF APPLICATION.—The Secretary shall deny an application submitted under subsection (b) if, upon the basis of the

information submitted to the Secretary as part of the application and any other information before the Secretary with respect to such tobacco product, the Secretary finds that—

''(A) there is a lack of a showing that permitting such tobacco product to be marketed would be appropriate for the protection of the public health;

''(B) the methods used in, or the facilities or controls used for, the manufacture, processing, or packing of such tobacco product do not conform to the requirements of section 906(e);

''(C) based on a fair evaluation of all material facts, the proposed labeling is false or misleading in any particular; or

''(D) such tobacco product is not shown to conform in all respects to a tobacco product standard in effect under section 907, and there is a lack of adequate information to justify the deviation from such standard.

''(3) DENIAL INFORMATION.—Any denial of an application shall, insofar as the Secretary determines to be practicable, be accompanied by a statement informing the applicant of the measures required to remove such application from deniable form (which measures may include further research by the applicant in accordance with 1 or more protocols prescribed by the Secretary).

''(4) BASIS FOR FINDING.—For purposes of this section, the finding as to whether the marketing of a tobacco product for which an application has been submitted is appropriate for the protection of the public health shall be determined with respect to the risks and benefits to the population as a whole, including users and nonusers of the tobacco product, and taking into account—

''(A) the increased or decreased likelihood that existing users of tobacco products will stop using such products; and

''(B) the increased or decreased likelihood that those who do not use tobacco products will start using such products.

''(5) BASIS FOR ACTION.—

''(A) INVESTIGATIONS.—For purposes of paragraph (2)(A), whether permitting a tobacco product to be marketed would be appropriate for the protection of the public health shall, when appropriate, be determined on the basis of well-controlled investigations, which may include 1 or more clinical investigations by experts qualified by training and experience to evaluate the tobacco product.

''(B) OTHER EVIDENCE.—If the Secretary determines that there exists valid scientific evidence (other than evidence derived from investigations described in subparagraph (A)) which is sufficient to evaluate the tobacco product, the Secretary may authorize that the determination for purposes of paragraph (2)(A) be made on the basis of such evidence.

''(d) WITHDRAWAL AND TEMPORARY SUSPENSION.—

''(1) IN GENERAL.—The Secretary shall, upon obtaining, where appropriate, advice on scientific matters from the Tobacco Products Scientific Advisory Committee, and after due notice and opportunity for informal hearing for a tobacco product for which an order was issued under subsection (c)(1)(A)(i), issue an order withdrawing the order if the Secretary finds—

''(A) that the continued marketing of such tobacco product no longer is appropriate for the protection of the public health;

''(B) that the application contained or was accompanied by an untrue statement of a material fact;

''(C) that the applicant—

''(i) has failed to establish a system for maintaining records, or has repeatedly or deliberately failed to maintain records or to make reports, required by an applicable regulation under section 909;

''(ii) has refused to permit access to, or copying or verification of, such records as required by section 704; or

''(iii) has not complied with the requirements of section 905;

''(D) on the basis of new information before the Secretary with respect to such tobacco product, evaluated together with the evidence before the Secretary when the application was reviewed, that the methods used in, or the facilities and controls used for, the manufacture, processing, packing, or installation of such tobacco product do not conform with the requirements of section 906(e) and were not brought into conformity with such requirements within a reasonable time after receipt of written notice from the Secretary of nonconformity;

''(E) on the basis of new information before the Secretary, evaluated together with the evidence before the Secretary when the application was reviewed, that the labeling of such tobacco product, based on a fair evaluation of all material facts, is false or misleading in any particular and was not corrected within a reasonable time after receipt of written notice from the Secretary of such fact; or

''(F) on the basis of new information before the Secretary, evaluated together with the evidence before the Secretary when such order was issued, that such tobacco product is not shown to conform in all respects to a tobacco product standard which is in effect under section 907, compliance with which was a condition to the issuance of an order relating to the application, and that there is a lack of adequate information to justify the deviation from such standard.

''(2) APPEAL.—The holder of an application subject to an order issued under paragraph (1) withdrawing an order issued pursuant to subsection (c)(1)(A)(i) may, by petition filed on or before the 30th day after the date upon which such holder receives notice of such withdrawal, obtain review thereof in accordance with section 912.

''(3) TEMPORARY SUSPENSION.—If, after providing an opportunity for an informal hearing, the Secretary determines there is reasonable probability that the continuation of distribution of a tobacco product under an order would cause serious, adverse health consequences or death, that is greater than ordinarily caused by tobacco products on the market, the Secretary shall by order temporarily suspend the authority of the manufacturer to market the product. If the Secretary issues such an order, the Secretary shall proceed expeditiously under paragraph (1) to withdraw such application.

''(e) SERVICE OF ORDER.—An order issued by the Secretary under this section shall be served—

''(1) in person by any officer or employee of the department designated by the Secretary; or

''(2) by mailing the order by registered mail or certified mail addressed to the applicant at the applicant's last known address in the records of the Secretary.

''(f) RECORDS.—

''(1) ADDITIONAL INFORMATION.—In the case of any tobacco product for which an order issued pursuant to subsection (c)(1)(A)(i) for an application filed under subsection (b) is in effect, the applicant shall establish and maintain such records, and make such reports to the Secretary, as the Secretary may by regulation, or by order with respect to such application, prescribe on the basis of a finding that such records and reports are necessary in order to enable the Secretary to determine, or facilitate a determination of, whether there is or may be grounds for withdrawing or temporarily suspending such order.

''(2) ACCESS TO RECORDS.—Each person required under this section to maintain records, and each person in charge of custody thereof, shall, upon request of an officer or employee designated by the Secretary, permit such officer or employee at all reasonable times to have access to and copy and verify such records.

''(g) INVESTIGATIONAL TOBACCO PRODUCT EXEMPTION FOR INVESTIGATIONAL USE.—The Secretary may exempt tobacco products intended for investigational use from the provisions of this chapter under such conditions as the Secretary may by regulation prescribe.

''SEC. 911. MODIFIED RISK TOBACCO PRODUCTS.

''(a) IN GENERAL.—No person may introduce or deliver for introduction into interstate commerce any modified risk tobacco product unless an order issued pursuant to subsection (g) is effective with respect to such product.

''(b) DEFINITIONS.—In this section:

''(1) MODIFIED RISK TOBACCO PRODUCT.—The term 'modified risk tobacco product' means any tobacco product that is sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products.

''(2) SOLD OR DISTRIBUTED.—

''(A) IN GENERAL.—With respect to a tobacco product, the term 'sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products' means a tobacco product—

''(i) the label, labeling, or advertising of which represents explicitly or implicitly that—

''(I) the tobacco product presents a lower risk of tobacco-related disease or is less harmful than one or more other commercially marketed tobacco products;

''(II) the tobacco product or its smoke contains a reduced level of a substance or presents a reduced exposure to a substance; or

''(III) the tobacco product or its smoke does not contain or is free of a substance;

''(ii) the label, labeling, or advertising of which uses the descriptors 'light', 'mild', or 'low' or similar descriptors; or

''(iii) the tobacco product manufacturer of which has taken any action directed to consumers through the media or otherwise, other than by means of the tobacco product's label, labeling, or advertising, after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, respecting the product that would be reasonably expected to result in consumers believing that the tobacco product or its smoke may present a lower risk of disease or is less harmful than one or more commercially marketed tobacco products, or presents a reduced exposure to, or does not contain or is free of, a substance or substances.

''(B) LIMITATION.—No tobacco product shall be considered to be 'sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products', except as described in subparagraph (A).

''(C) SMOKELESS TOBACCO PRODUCT.—No smokeless tobacco product shall be considered to be 'sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products' solely because its label, labeling, or advertising uses the following phrases to describe such product and its use: 'smokeless tobacco', 'smokeless tobacco product', 'not consumed by smoking', 'does not produce smoke', 'smokefree', 'smoke-free', 'without smoke', 'no smoke', or 'not smoke'.

''(3) EFFECTIVE DATE.—The provisions of paragraph (2)(A)(ii) shall take effect 12 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act for those products whose label, labeling, or advertising contains the terms described in such paragraph on such date of enactment. The effective date shall be with respect to the date of manufacture, provided that, in any case, beginning 30 days after such effective date, a manufacturer shall not introduce into the domestic commerce of the United States any product, irrespective of the date of manufacture, that is not in conformance with paragraph (2)(A)(ii).

''(c) TOBACCO DEPENDENCE PRODUCTS.—A product that is intended to be used for the treatment of tobacco dependence, including smoking cessation, is not a modified risk tobacco product under this section if it has been approved as a drug or device by the Food and Drug Administration and is subject to the requirements of chapter V.

''(d) FILING.—Any person may file with the Secretary an application for a modified risk tobacco product. Such application shall include—

''(1) a description of the proposed product and any proposed advertising and labeling;

''(2) the conditions for using the product;

''(3) the formulation of the product;

''(4) sample product labels and labeling;

''(5) all documents (including underlying scientific information) relating to research findings conducted, supported, or possessed by the tobacco product manufacturer relating to the effect of the product on tobacco-related diseases and health-related conditions, including information both favorable and unfavorable to the ability of the product to reduce risk or exposure and relating to human health;

''(6) data and information on how consumers actually use the tobacco product; and

''(7) such other information as the Secretary may require.

''(e) PUBLIC AVAILABILITY.—The Secretary shall make the application described in subsection (d) publicly available (except matters in the application which are trade secrets or otherwise confidential, commercial information) and shall request comments by interested persons on the information contained in the application and on the label, labeling, and advertising accompanying such application.

''(f) ADVISORY COMMITTEE.—

''(1) IN GENERAL.—The Secretary shall refer to the Tobacco Products Scientific Advisory Committee any application submitted under this section.

''(2) RECOMMENDATIONS.—Not later than 60 days after the date an application is referred to the Tobacco Products Scientific Advisory Committee under paragraph (1), the Advisory Committee shall report its recommendations on the application to the Secretary.

''(g) MARKETING.—

''(1) MODIFIED RISK PRODUCTS.—Except as provided in paragraph (2), the Secretary shall, with respect to an application submitted under this section, issue an order that a modified risk product may be commercially marketed only if the Secretary determines that the applicant has demonstrated that such product, as it is actually used by consumers, will—

''(A) significantly reduce harm and the risk of tobacco-related disease to individual tobacco users; and

''(B) benefit the health of the population as a whole taking into account both users of tobacco products and persons who do not currently use tobacco products.

''(2) SPECIAL RULE FOR CERTAIN PRODUCTS.—

''(A) IN GENERAL.—The Secretary may issue an order that a tobacco product may be introduced or delivered for introduction into interstate commerce, pursuant to an application under this section, with respect to a tobacco product that may not be commercially marketed under paragraph (1) if the Secretary makes the findings required under this paragraph and determines that the applicant has demonstrated that—

''(i) such order would be appropriate to promote the public health;

''(ii) any aspect of the label, labeling, and advertising for such product that would cause the tobacco product to be a modified risk tobacco product under subsection (b) is limited to an explicit or implicit representation that such tobacco product or its smoke does not contain or is free of a substance or contains a reduced level of a substance, or presents a reduced exposure to a substance in tobacco smoke;

''(iii) scientific evidence is not available and, using the best available scientific methods, cannot be made available without conducting long-term epidemiological studies for an application to meet the standards set forth in paragraph (1); and

''(iv) the scientific evidence that is available without conducting long-term epidemiological studies demonstrates that a measurable and substantial reduction in morbidity or mortality among individual tobacco users is reasonably likely in subsequent studies.

''(B) ADDITIONAL FINDINGS REQUIRED.—To issue an order under subparagraph (A) the Secretary must also find that the applicant has demonstrated that—

''(i) the magnitude of the overall reductions in exposure to the substance or substances which are the subject of the application is substantial, such substance or substances are harmful, and the product as actually used exposes consumers to the specified reduced level of the substance or substances;

''(ii) the product as actually used by consumers will not expose them to higher levels of other harmful substances compared to the similar types of tobacco products then on the market unless such increases are minimal and the reasonably likely overall impact of use of the product remains a substantial and measurable reduction in overall morbidity and mortality among individual tobacco users;

''(iii) testing of actual consumer perception shows that, as the applicant proposes to label and market the product, consumers will not be misled into believing that the product—

''(I) is or has been demonstrated to be less harmful; or

''(II) presents or has been demonstrated to present less of a risk of disease than 1 or more other commercially marketed tobacco products; and

''(iv) issuance of an order with respect to the application is expected to benefit the health of the population as a whole taking into account both users of tobacco products and persons who do not currently use tobacco products.

''(C) CONDITIONS OF MARKETING.—

''(i) IN GENERAL.—Applications subject to an order under this paragraph shall be limited to a term of not more than 5 years, but may be renewed upon a finding by the Secretary that the requirements of this paragraph continue to be satisfied based on the filing of a new application.

''(ii) AGREEMENTS BY APPLICANT.—An order under this paragraph shall be conditioned on the applicant's agreement to conduct postmarket surveillance and studies and to submit to the Secretary the results of such surveillance and studies to determine the impact of the order on consumer perception, behavior, and health and to enable the Secretary to review the accuracy of the determinations upon which the order was based in accordance with a protocol approved by the Secretary.

''(iii) ANNUAL SUBMISSION.—The results of such postmarket surveillance and studies described in clause (ii) shall be submitted annually.

''(3) BASIS.—The determinations under paragraphs (1) and (2) shall be based on—

''(A) the scientific evidence submitted by the applicant; and

''(B) scientific evidence and other information that is made available to the Secretary.

''(4) BENEFIT TO HEALTH OF INDIVIDUALS AND OF POPULATION AS A WHOLE.—In making the determinations under paragraphs (1) and (2), the Secretary shall take into account—

''(A) the relative health risks to individuals of the tobacco product that is the subject of the application;

''(B) the increased or decreased likelihood that existing users of tobacco products who would otherwise stop using such products will switch to the tobacco product that is the subject of the application;

''(C) the increased or decreased likelihood that persons who do not use tobacco products will start using the tobacco product that is the subject of the application;

''(D) the risks and benefits to persons from the use of the tobacco product that is the subject of the application as compared to the use of products for smoking cessation approved under chapter V to treat nicotine dependence; and

''(E) comments, data, and information submitted by interested persons.

''(h) ADDITIONAL CONDITIONS FOR MARKETING.—

''(1) MODIFIED RISK PRODUCTS.—The Secretary shall require for the marketing of a product under this section that any advertising or labeling concerning modified risk products enable the public to comprehend the information concerning modified risk and to understand the relative significance of such information in the context of total health and in relation to all of the diseases and health-related conditions associated with the use of tobacco products.

''(2) COMPARATIVE CLAIMS.—

''(A) IN GENERAL.—The Secretary may require for the marketing of a product under this subsection that a claim comparing a tobacco product to 1 or more other commercially marketed tobacco products shall compare the tobacco product to a commercially marketed tobacco product that is representative of that type of tobacco product on the market (for example the average value of the top 3 brands of an established regular tobacco product).

''(B) QUANTITATIVE COMPARISONS.—The Secretary may also require, for purposes of subparagraph (A), that the percent (or fraction) of change and identity of the reference tobacco product and a quantitative comparison of the amount of the substance claimed to be reduced shall be stated in immediate proximity to the most prominent claim.

''(3) LABEL DISCLOSURE.—

''(A) IN GENERAL.—The Secretary may require the disclosure on the label of other substances in the tobacco product, or substances that may be produced by the consumption of that tobacco product, that may affect a disease or health-related condition or may increase the risk of other diseases or health-related conditions associated with the use of tobacco products.

''(B) CONDITIONS OF USE.—If the conditions of use of the tobacco product may affect the risk of the product to human health, the Secretary may require the labeling of conditions of use.

''(4) TIME.—An order issued under subsection (g)(1) shall be effective for a specified period of time.

''(5) ADVERTISING.—The Secretary may require, with respect to a product for which an applicant obtained an order under subsection (g)(1), that the product comply with requirements relating to advertising and promotion of the tobacco product.

''(i) POSTMARKET SURVEILLANCE AND STUDIES.—

''(1) IN GENERAL.—The Secretary shall require, with respect to a product for which an applicant obtained an order under subsection (g)(1), that the applicant conduct postmarket surveillance and studies for such a tobacco product to determine the impact of the order issuance on consumer perception, behavior, and health, to enable the Secretary to review the accuracy of the determinations upon which the order was based, and to provide information that the Secretary determines is otherwise necessary regarding the use or health risks involving the tobacco product. The results of postmarket surveillance and studies shall be submitted to the Secretary on an annual basis.

''(2) SURVEILLANCE PROTOCOL.—Each applicant required to conduct a surveillance of a tobacco product under paragraph (1) shall, within 30 days after receiving notice that the applicant is required to conduct such surveillance, submit, for the approval of the Secretary, a protocol for the required surveillance. The Secretary, within 60 days of the receipt of such protocol, shall determine if the principal investigator proposed to be used in the surveillance has sufficient qualifications and experience to conduct such surveillance and if such protocol will result in collection of the data or other information designated by the Secretary as necessary to protect the public health.

''(j) WITHDRAWAL OF AUTHORIZATION.—The Secretary, after an opportunity for an informal hearing, shall withdraw an order under subsection (g) if the Secretary determines that—

''(1) the applicant, based on new information, can no longer make the demonstrations required under subsection (g), or the Secretary can no longer make the determinations required under subsection (g);

''(2) the application failed to include material information or included any untrue statement of material fact;

''(3) any explicit or implicit representation that the product reduces risk or exposure is no longer valid, including if—

''(A) a tobacco product standard is established pursuant to section 907;

''(B) an action is taken that affects the risks presented by other commercially marketed tobacco products that were compared to the product that is the subject of the application; or

''(C) any postmarket surveillance or studies reveal that the order is no longer consistent with the protection of the public health;

''(4) the applicant failed to conduct or submit the postmarket surveillance and studies required under subsection (g)(2)(C)(ii) or subsection (i); or

''(5) the applicant failed to meet a condition imposed under subsection (h).

''(k) CHAPTER IV OR V.—A product for which the Secretary has issued an order pursuant to subsection (g) shall not be subject to chapter IV or V.

''(l) IMPLEMENTING REGULATIONS OR GUIDANCE.—

''(1) SCIENTIFIC EVIDENCE.—Not later than 2 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall issue regulations or guidance (or any combination thereof) on the scientific evidence required for assessment and ongoing review of modified risk tobacco products. Such regulations or guidance shall—

''(A) to the extent that adequate scientific evidence exists, establish minimum standards for scientific studies needed prior to issuing an order under subsection (g) to show that a substantial reduction in morbidity or mortality among individual tobacco users occurs for products described in subsection (g)(1) or is reasonably likely for products described in subsection (g)(2);

''(B) include validated biomarkers, intermediate clinical endpoints, and other feasible outcome measures, as appropriate;

''(C) establish minimum standards for postmarket studies, that shall include regular and long-term assessments of health outcomes and mortality, intermediate clinical endpoints, consumer perception of harm reduction, and the impact on quitting behavior and new use of tobacco products, as appropriate;

''(D) establish minimum standards for required postmarket surveillance, including ongoing assessments of consumer perception;

''(E) require that data from the required studies and surveillance be made available to the Secretary prior to the decision on renewal of a modified risk tobacco product; and

''(F) establish a reasonable timetable for the Secretary to review an application under this section.

''(2) CONSULTATION.—The regulations or guidance issued under paragraph (1) shall be developed in consultation with the Institute of Medicine, and with the input of other appropriate scientific and medical experts, on the design and conduct of such studies and surveillance.

''(3) REVISION.—The regulations or guidance under paragraph (1) shall be revised on a regular basis as new scientific information becomes available.

''(4) NEW TOBACCO PRODUCTS.—Not later than 2 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall issue a regulation or guidance that permits the filing of a single application for any tobacco product that is a new tobacco product under section 910 and which the applicant seeks to commercially market under this section.

''(m) DISTRIBUTORS.—Except as provided in this section, no distributor may take any action, after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, with respect to a tobacco product that would reasonably be expected to result in consumers believing that the tobacco product or its smoke may present a lower risk of disease or is less harmful than one or more commercially marketed tobacco products, or presents a reduced exposure to, or does not contain or is free of, a substance or substances.

''SEC. 912. JUDICIAL REVIEW.

''(a) RIGHT TO REVIEW.—

''(1) IN GENERAL.—Not later than 30 days after—

''(A) the promulgation of a regulation under section 907 establishing, amending, or revoking a tobacco product standard; or

''(B) a denial of an application under section 910(c),

any person adversely affected by such regulation or denial may file a petition for judicial review of such regulation or denial with the United States Court of Appeals for the District of Columbia or for the circuit in which such person resides or has their principal place of business.

''(2) REQUIREMENTS.—

''(A) COPY OF PETITION.—A copy of the petition filed under paragraph (1) shall be transmitted by the clerk of the court involved to the Secretary.

''(B) RECORD OF PROCEEDINGS.—On receipt of a petition under subparagraph (A), the Secretary shall file in the court in which such petition was filed—

''(i) the record of the proceedings on which the regulation or order was based; and

''(ii) a statement of the reasons for the issuance of such a regulation or order.

''(C) DEFINITION OF RECORD.—In this section, the term 'record' means—

''(i) all notices and other matter published in the Federal Register with respect to the regulation or order reviewed;

''(ii) all information submitted to the Secretary with respect to such regulation or order;

''(iii) proceedings of any panel or advisory committee with respect to such regulation or order;

''(iv) any hearing held with respect to such regulation or order; and

''(v) any other information identified by the Secretary, in the administrative proceeding held with respect to such regulation or order, as being relevant to such regulation or order.

''(b) STANDARD OF REVIEW.—Upon the filing of the petition under subsection (a) for judicial review of a regulation or order, the court shall have jurisdiction to review the regulation or order in accordance with chapter 7 of title 5, United States Code, and to grant appropriate relief, including interim relief, as provided for in such chapter. A regulation or denial described in subsection (a) shall be reviewed in accordance with section 706(2)(A) of title 5, United States Code.

''(c) FINALITY OF JUDGMENT.—The judgment of the court affirming or setting aside, in whole or in part, any regulation or order shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification, as provided in section 1254 of title 28, United States Code.

''(d) OTHER REMEDIES.—The remedies provided for in this section shall be in addition to, and not in lieu of, any other remedies provided by law.

''(e) REGULATIONS AND ORDERS MUST RECITE BASIS IN RECORD.—To facilitate judicial review, a regulation or order issued under section 906, 907, 908, 909, 910, or 916 shall contain a statement of the reasons for the issuance of such regulation or order in the record of the proceedings held in connection with its issuance.

''SEC. 913. EQUAL TREATMENT OF RETAIL OUTLETS.

''The Secretary shall issue regulations to require that retail establishments for which the predominant business is the sale of tobacco products comply with any advertising restrictions applicable to retail establishments accessible to individuals under the age of 18.

''SEC. 914. JURISDICTION OF AND COORDINATION WITH THE FEDERAL TRADE COMMISSION.

''(a) JURISDICTION.—

''(1) IN GENERAL.—Except where expressly provided in this chapter, nothing in this chapter shall be construed as limiting or diminishing the authority of the Federal Trade Commission to enforce the laws under its jurisdiction with respect to the advertising, sale, or distribution of tobacco products.

''(2) ENFORCEMENT.—Any advertising that violates this chapter or a provision of the regulations referred to in section 102 of the Family Smoking Prevention and Tobacco Control Act, is an unfair or deceptive act or practice under section 5(a) of the Federal Trade Commission Act and shall be considered a violation of a rule promulgated under section 18 of that Act.

''(b) COORDINATION.—With respect to the requirements of section 4 of the Federal Cigarette Labeling and Advertising Act and section 3 of the Comprehensive Smokeless Tobacco Health Education Act of 1986—

''(1) the Chairman of the Federal Trade Commission shall coordinate with the Secretary concerning the enforcement of such Act as such enforcement relates to unfair or deceptive acts or practices in the advertising of cigarettes or smokeless tobacco; and

''(2) the Secretary shall consult with the Chairman of such Commission in revising the label statements and requirements under such sections.

''SEC. 915. REGULATION REQUIREMENT.

''(a) TESTING, REPORTING, AND DISCLOSURE.—Not later than 36 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall promulgate regulations under this Act that meet the requirements of subsection (b).

''(b) CONTENTS OF RULES.—The regulations promulgated under subsection (a)—

''(1) shall require testing and reporting of tobacco product constituents, ingredients, and additives, including smoke constituents, by brand and subbrand that the Secretary determines should be tested to protect the public health, provided that, for purposes of the testing requirements of this paragraph, tobacco products manufactured and sold by a single tobacco product manufacturer that are identical in all respects except the labels, packaging design, logo, trade dress, trademark, brand name, or any combination thereof, shall be considered as a single brand; and

''(2) may require that tobacco product manufacturers, packagers, or importers make disclosures relating to the results of the testing of tar and nicotine through labels or advertising or other appropriate means, and make disclosures regarding the results of the testing of other constituents, including smoke constituents, ingredients, or additives, that the Secretary determines should be disclosed to the public to protect the public health and will not mislead consumers about the risk of tobacco-related disease.

''(c) AUTHORITY.—The Secretary shall have the authority under this chapter to conduct or to require the testing, reporting, or disclosure of tobacco product constituents, including smoke constituents.

''(d) SMALL TOBACCO PRODUCT MANUFACTURERS.—

''(1) FIRST COMPLIANCE DATE.—The initial regulations promulgated under subsection (a) shall not impose requirements on small tobacco product manufacturers before the later of—

''(A) the end of the 2-year period following the final promulgation of such regulations; and

''(B) the initial date set by the Secretary for compliance with such regulations by manufacturers that are not small tobacco product manufacturers.

''(2) TESTING AND REPORTING INITIAL COMPLIANCE PERIOD.—

''(A) 4-YEAR PERIOD.—The initial regulations promulgated under subsection (a) shall give each small tobacco product manufacturer a 4-year period over which to conduct testing and reporting for all of its tobacco products. Subject to paragraph (1), the end of the first year of such 4-year period shall coincide with the initial date of compliance under this section set by the Secretary with respect to manufacturers that are not small tobacco product manufacturers or the end of the 2-year period following the final promulgation of such regulations, as described in paragraph (1)(A). A small tobacco product manufacturer shall be required—

''(i) to conduct such testing and reporting for 25 percent of its tobacco products during each year of such 4-year period; and

''(ii) to conduct such testing and reporting for its largest-selling tobacco products (as determined by the Secretary) before its other tobacco products, or in such other order of priority as determined by the Secretary.

''(B) CASE-BY-CASE DELAY.—Notwithstanding subparagraph (A), the Secretary may, on a case-by-case basis, delay the date by which an individual small tobacco product manufacturer must conduct testing and reporting for its tobacco products under this section based upon a showing of undue hardship to such manufacturer. Notwithstanding the preceding sentence, the Secretary shall not extend the deadline for a small tobacco product manufacturer to conduct testing and reporting for all of its tobacco products beyond a total of 5 years after the initial date of compliance under this section set by the Secretary with respect to manufacturers that are not small tobacco product manufacturers.

''(3) SUBSEQUENT AND ADDITIONAL TESTING AND REPORTING.—The regulations promulgated under subsection (a) shall provide that, with respect to any subsequent or additional testing and reporting of tobacco products required under this section, such testing and reporting by a small tobacco product manufacturer shall be conducted in accordance with the timeframes described in paragraph (2)(A), except that, in the case of a new product, or if there has been a modification described in section 910(a)(1)(B) of any product of a small tobacco product manufacturer since the last testing and reporting required under this section, the Secretary shall require that any subsequent or additional testing and reporting be conducted in accordance with the same timeframe applicable to manufacturers that are not small tobacco product manufacturers.

''(4) JOINT LABORATORY TESTING SERVICES.—The Secretary shall allow any 2 or more small tobacco product manufacturers to join together to purchase laboratory testing services required by this section on a group basis in order to ensure that such manufacturers receive access to, and fair pricing of, such testing services.

''(e) EXTENSIONS FOR LIMITED LABORATORY CAPACITY.—

''(1) IN GENERAL.—The regulations promulgated under subsection (a) shall provide that a small tobacco product manufacturer shall not be considered to be in violation of this section before the deadline applicable under paragraphs (3) and (4), if—

''(A) the tobacco products of such manufacturer are in compliance with all other requirements of this chapter; and

''(B) the conditions described in paragraph (2) are met.

''(2) CONDITIONS.—Notwithstanding the requirements of this section, the Secretary may delay the date by which a small tobacco product manufacturer must be in compliance with the testing and reporting required by this section until such time as the testing is reported if, not later than 90 days before the deadline for reporting in accordance with this section, a small tobacco product manufacturer provides evidence to the Secretary demonstrating that—

''(A) the manufacturer has submitted the required products for testing to a laboratory and has done so sufficiently in advance of the deadline to create a reasonable expectation of completion by the deadline;

''(B) the products currently are awaiting testing by the laboratory; and

''(C) neither that laboratory nor any other laboratory is able to complete testing by the deadline at customary, nonexpedited testing fees.

''(3) EXTENSION.—The Secretary, taking into account the laboratory testing capacity that is available to tobacco product manufacturers, shall review and verify the evidence submitted by a small tobacco product manufacturer in accordance with paragraph (2). If the Secretary finds that the conditions described in such paragraph are met, the Secretary shall notify the small tobacco product manufacturer that the manufacturer shall not be considered to be in violation of the testing and reporting requirements of this section until the testing is reported or until 1 year after the reporting deadline has passed, whichever occurs sooner. If, however, the Secretary has not made a finding before the reporting deadline, the manufacturer shall not be considered to be in violation of such requirements until the Secretary finds that the conditions described in paragraph (2) have not been met, or until 1 year after the reporting deadline, whichever occurs sooner.

''(4) ADDITIONAL EXTENSION.—In addition to the time that may be provided under paragraph (3), the Secretary may provide further extensions of time, in increments of no more than 1 year, for required testing and reporting to occur if the Secretary determines, based on evidence properly and timely submitted by a small tobacco product manufacturer in accordance with paragraph (2), that a lack of available laboratory capacity prevents the manufacturer from completing the required testing during the period described in paragraph (3).

''(f) RULE OF CONSTRUCTION.—Nothing in subsection (d) or (e) shall be construed to authorize the extension of any deadline, or to otherwise affect any timeframe, under any provision of this Act or the Family Smoking Prevention and Tobacco Control Act other than this section.

''SEC. 916. PRESERVATION OF STATE AND LOCAL AUTHORITY.

''(a) IN GENERAL.—

''(1) PRESERVATION.—Except as provided in paragraph (2)(A), nothing in this chapter, or rules promulgated under this chapter, shall be construed to limit the authority of a Federal agency (including the Armed Forces), a State or political subdivision of a State, or the government of an Indian tribe to enact, adopt, promulgate, and enforce any law, rule, regulation, or other measure with respect to tobacco products that is in addition to, or more stringent than, requirements established under this chapter, including a law, rule, regulation, or other measure relating to or prohibiting the sale, distribution, possession, exposure to, access to, advertising and promotion of, or use of tobacco products by individuals of any age, information reporting to the State, or measures relating to fire safety standards for tobacco products. No provision of this chapter shall limit or otherwise affect any State, Tribal, or local taxation of tobacco products.

''(2) PREEMPTION OF CERTAIN STATE AND LOCAL REQUIREMENTS.—

''(A) IN GENERAL.—No State or political subdivision of a State may establish or continue in effect with respect to a tobacco product any requirement which is different from, or in addition to, any requirement under the provisions of this chapter relating to tobacco product standards, premarket review, adulteration, misbranding, labeling, registration, good manufacturing standards, or modified risk tobacco products.

''(B) EXCEPTION.—Subparagraph (A) does not apply to requirements relating to the sale, distribution, possession, information reporting to the State, exposure to, access to, the advertising and promotion of, or use of, tobacco products by individuals of any age, or relating to fire safety standards for tobacco products. Information disclosed to a State under subparagraph (A) that is exempt from disclosure under section 552(b)(4) of title 5, United States Code, shall be treated

as a trade secret and confidential information by the State.

''(b) RULE OF CONSTRUCTION REGARDING PRODUCT LIABILITY.—No provision of this chapter relating to a tobacco product shall be construed to modify or otherwise affect any action or the liability of any person under the product liability law of any State.

''SEC. 917. TOBACCO PRODUCTS SCIENTIFIC ADVISORY COMMITTEE.

''(a) ESTABLISHMENT.—Not later than 6 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall establish a 12-member advisory committee, to be known as the Tobacco Products Scientific Advisory Committee (in this section referred to as the 'Advisory Committee').

''(b) MEMBERSHIP.—

''(1) IN GENERAL.—

''(A) MEMBERS.—The Secretary shall appoint as members of the Tobacco Products Scientific Advisory Committee individuals who are technically qualified by training and experience in medicine, medical ethics, science, or technology involving the manufacture, evaluation, or use of tobacco products, who are of appropriately diversified professional backgrounds. The committee shall be composed of—

''(i) 7 individuals who are physicians, dentists, scientists, or health care professionals practicing in the area of oncology, pulmonology, cardiology, toxicology, pharmacology, addiction, or any other relevant specialty;

''(ii) 1 individual who is an officer or employee of a State or local government or of the Federal Government;

''(iii) 1 individual as a representative of the general public;

''(iv) 1 individual as a representative of the interests of the tobacco manufacturing industry;

''(v) 1 individual as a representative of the interests of the small business tobacco manufacturing industry, which position may be filled on a rotating, sequential basis by representatives of different small business tobacco manufacturers based on areas of expertise relevant to the topics being considered by the Advisory Committee; and

''(vi) 1 individual as a representative of the interests of the tobacco growers.

''(B) NONVOTING MEMBERS.—The members of the committee appointed under clauses (iv), (v), and (vi) of subparagraph (A) shall serve as consultants to those described in clauses (i) through (iii) of subparagraph (A) and shall be nonvoting representatives.

''(C) CONFLICTS OF INTEREST.—No members of the committee, other than members appointed pursuant to clauses (iv), (v), and (vi) of subparagraph (A) shall, during the member's tenure on the committee or for the 18-month period prior to becoming such a member, receive any salary, grants, or other payments or support from any business that manufactures, distributes, markets, or sells cigarettes or other tobacco products.

''(2) LIMITATION.—The Secretary may not appoint to the Advisory Committee any individual who is in the regular full-time employ of the Food and Drug Administration or any agency responsible for the enforcement of this Act. The Secretary may appoint Federal officials as ex officio members.

''(3) CHAIRPERSON.—The Secretary shall designate 1 of the members appointed under clauses (i), (ii), and (iii) of paragraph (1)(A) to serve as chairperson.

''(c) DUTIES.—The Tobacco Products Scientific Advisory Committee shall provide advice, information, and recommendations to the Secretary—

''(1) as provided in this chapter;

''(2) on the effects of the alteration of the nicotine yields from tobacco products;

''(3) on whether there is a threshold level below which nicotine yields do not produce dependence on the tobacco product involved; and

''(4) on its review of other safety, dependence, or health issues relating to tobacco products as requested by the Secretary.

''(d) COMPENSATION; SUPPORT; FACA.—

''(1) COMPENSATION AND TRAVEL.—Members of the Advisory Committee who are not officers or employees of the United States, while attending conferences or meetings of the committee or otherwise engaged in its business, shall be entitled to receive compensation at rates to be fixed by the Secretary, which may not exceed the daily equivalent of the rate in effect under the Senior Executive Schedule under section 5382 of title 5, United States Code, for each day (including travel time) they are so engaged; and while so serving away from their homes or regular places of business each member may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

''(2) ADMINISTRATIVE SUPPORT.—The Secretary shall furnish the Advisory Committee clerical and other assistance.

''(3) NONAPPLICATION OF FACA.—Section 14 of the Federal Advisory Committee Act does not apply to the Advisory Committee.

''(e) PROCEEDINGS OF ADVISORY PANELS AND COMMITTEES.—The Advisory Committee shall make and maintain a transcript of any proceeding of the panel or committee. Each such panel and committee shall delete from any transcript made under this subsection information which is exempt from disclosure under section 552(b) of title 5, United States Code.

''SEC. 918. DRUG PRODUCTS USED TO TREAT TOBACCO DEPENDENCE.

''(a) IN GENERAL.—The Secretary shall—

''(1) at the request of the applicant, consider designating products for smoking cessation, including nicotine replacement products as fast track research and approval products within the meaning of section 506;

''(2) consider approving the extended use of nicotine replacement products (such as nicotine patches, nicotine gum, and nicotine lozenges) for the treatment of tobacco dependence; and

''(3) review and consider the evidence for additional indications for nicotine replacement products, such as for craving relief or relapse prevention.

''(b) REPORT ON INNOVATIVE PRODUCTS.—

''(1) IN GENERAL.—Not later than 3 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary, after consultation with recognized scientific, medical, and public health experts (including both Federal agencies and nongovernmental entities, the Institute of Medicine of the National Academy of Sciences, and the Society for Research on Nicotine and Tobacco), shall submit to the Congress a report that examines how best to regulate, promote, and encourage the development of innovative products and treatments (including nicotine-based and non-nicotine-based products and treatments) to better achieve, in a manner that best protects and promotes the public health—

''(A) total abstinence from tobacco use;

''(B) reductions in consumption of tobacco; and

''(C) reductions in the harm associated with continued tobacco use.

''(2) RECOMMENDATIONS.—The report under paragraph (1) shall include the recommendations of the Secretary on how the Food and Drug Administration should coordinate and facilitate the exchange of information on such innovative products and treatments among relevant offices and centers within the Administration and within the National Institutes of Health, the Centers for Disease Control and Prevention, and other relevant agencies.

''SEC. 919. USER FEES.

''(a) ESTABLISHMENT OF QUARTERLY FEE.—Beginning on the date of the enactment of the Family Smoking Prevention and Tobacco Control Act, the Secretary shall in accordance with this section assess user fees on, and collect such fees from, each manufacturer and importer of tobacco products subject to this chapter. The fees shall be assessed and collected with respect to each quarter of each fiscal year, and the total amount assessed and collected for a fiscal year shall be the amount specified in subsection (b)(1) for such year, subject to subsection (c).

''(b) ASSESSMENT OF USER FEE.—

''(1) AMOUNT OF ASSESSMENT.—The total amount of user fees authorized to be assessed and collected under subsection (a) for a fiscal year is the following, as applicable to the fiscal year involved:

''(A) For fiscal year 2009, $85,000,000 (subject to subsection (e)).

''(B) For fiscal year 2010, $235,000,000.

''(C) For fiscal year 2011, $450,000,000.

''(D) For fiscal year 2012, $477,000,000.

''(E) For fiscal year 2013, $505,000,000.

''(F) For fiscal year 2014, $534,000,000.

''(G) For fiscal year 2015, $566,000,000.

''(H) For fiscal year 2016, $599,000,000.

''(I) For fiscal year 2017, $635,000,000.

''(J) For fiscal year 2018, $672,000,000.

''(K) For fiscal year 2019 and each subsequent fiscal year, $712,000,000.

''(2) ALLOCATIONS OF ASSESSMENT BY CLASS OF TOBACCO PRODUCTS.—

''(A) IN GENERAL.—The total user fees assessed and collected under subsection (a) each fiscal year with respect to each class of tobacco products shall be an amount that is equal to the applicable percentage of each class for the fiscal year multiplied by the amount specified in paragraph (1) for the fiscal year.

''(B) APPLICABLE PERCENTAGE.—

''(i) IN GENERAL.—For purposes of subparagraph (A), the applicable percentage for a fiscal year for each of the following classes of tobacco products shall be determined in accordance with clause (ii):

''(I) Cigarettes.

''(II) Cigars, including small cigars and cigars other than small cigars.

''(III) Snuff.

''(IV) Chewing tobacco.

''(V) Pipe tobacco.

''(VI) Roll-your-own tobacco.

''(ii) ALLOCATIONS.—The applicable percentage of each class of tobacco product described in clause (i) for a fiscal year shall be the percentage determined under section 625(c) of Public Law 108-357 for each such class of product for such fiscal year.

''(iii) REQUIREMENT OF REGULATIONS.—Notwithstanding clause (ii), no user fees shall be assessed on a class of tobacco products unless such class of tobacco products is listed in section 901(b) or is deemed by the Secretary in a regulation under section 901(b) to be subject to this chapter.

''(iv) REALLOCATIONS.—In the case of a class of tobacco products that is not listed in section 901(b) or deemed by the Secretary in a regulation under section 901(b) to be subject to this chapter, the amount of user fees that would otherwise be assessed to such class of tobacco products shall be reallocated to the classes of tobacco products that are subject to this chapter in the same manner and based on the same relative percentages otherwise determined under clause (ii).

''(3) DETERMINATION OF USER FEE BY COMPANY.—

''(A) IN GENERAL.—The total user fee to be paid by each manufacturer or importer of a particular class of tobacco products shall be determined for each quarter by multiplying—

''(i) such manufacturer's or importer's percentage share as determined under paragraph (4); by

''(ii) the portion of the user fee amount for the current quarter to be assessed on all manufacturers and importers of such class of tobacco products as determined under paragraph (2).

''(B) NO FEE IN EXCESS OF PERCENTAGE SHARE.—No manufacturer or importer of tobacco products shall be required to pay a user fee in excess of the percentage share of such manufacturer or importer.

''(4) ALLOCATION OF ASSESSMENT WITHIN EACH CLASS OF TOBACCO PRODUCT.—The percentage share of each manufacturer or importer of a particular class of tobacco products of the total user fee to be paid by all manufacturers or importers of that class of tobacco products shall be the percentage determined for purposes of allocations under subsections (e) through (h) of section 625 of Public Law 108–357.

''(5) ALLOCATION FOR CIGARS.—Notwithstanding paragraph (4), if a user fee assessment is imposed on cigars, the percentage share of each manufacturer or importer of cigars shall be based on the excise taxes paid by such manufacturer or importer during the prior fiscal year.

''(6) TIMING OF ASSESSMENT.—The Secretary shall notify each manufacturer and importer of tobacco products subject to this section of the amount of the quarterly assessment imposed on such manufacturer or importer under this subsection for each quarter of each fiscal year. Such notifications shall occur not later than 30 days prior to the end of the quarter for which such assessment is made, and payments of all assessments shall be made by the last day of the quarter involved.

''(7) MEMORANDUM OF UNDERSTANDING.—

''(A) IN GENERAL.—The Secretary shall request the appropriate Federal agency to enter into a memorandum of understanding that provides for the regular and timely transfer from the head of such agency to the Secretary of the information described in paragraphs (2)(B)(ii) and (4) and all necessary information regarding all tobacco product manufacturers and importers required to pay user fees. The Secretary shall maintain all disclosure restrictions established by the head of such agency regarding the information provided under the memorandum of understanding.

''(B) ASSURANCES.—Beginning not later than fiscal year 2015, and for each subsequent fiscal year, the Secretary shall ensure that the Food and Drug Administration is able to determine the applicable percentages described in paragraph (2) and the percentage shares described in paragraph (4). The Secretary may carry out this subparagraph by entering into a contract with the head of the Federal agency referred to in subparagraph (A) to continue to provide the necessary information.

''(c) CREDITING AND AVAILABILITY OF FEES.—

''(1) IN GENERAL.—Fees authorized under subsection (a) shall be collected and available for obligation only to the extent and in the amount provided in advance in appropriations Acts. Such fees are authorized to remain available until expended. Such sums as may be necessary may be transferred from the Food and Drug Administration salaries and expenses appropriation account without fiscal year limitation to such appropriation account for salaries and expenses with such fiscal year limitation.

''(2) AVAILABILITY.—

''(A) IN GENERAL.—Fees appropriated under paragraph (3) are available only for the purpose of paying the costs of the activities of the Food and Drug Administration related to the regulation of tobacco products under this chapter and the Family Smoking Prevention and Tobacco Control Act. No fees collected under subsection (a) may be used for any other costs.

''(B) PROHIBITION AGAINST USE OF OTHER FUNDS.—

''(i) IN GENERAL.—Except as provided in clause (ii), fees collected under subsection (a) are the only funds authorized to be made available for the purpose described in subparagraph (A).

''(ii) STARTUP COSTS.—Clause (i) does not apply until the date on which the Secretary has collected fees under subsection (a) for 2 fiscal year quarters. Until such date, other amounts available to the Food and Drug Administration (excluding fees collected under subsection (a)) are authorized to be made available to pay the costs described in subparagraph (A), provided that such amounts are reimbursed through fees collected under subsection (a).

''(3) AUTHORIZATION OF APPROPRIATIONS.—For fiscal year 2009 and each subsequent fiscal year, there is authorized to be appropriated for fees under this section an amount equal to the amount specified in subsection (b)(1) for the fiscal year.

''(d) COLLECTION OF UNPAID FEES.—In any case where the Secretary does not receive payment of a fee assessed under subsection (a) within 30 days after it is due, such fee shall be treated as a claim of the United States Government subject to subchapter II of chapter 37 of title 31, United States Code.

''(e) APPLICABILITY TO FISCAL YEAR 2009.—If the date of the enactment of the Family Smoking Prevention and Tobacco Control Act occurs during fiscal year 2009, the following applies, subject to subsection (c):

''(1) The Secretary shall determine the fees that would apply for a single quarter of such fiscal year according to the application of subsection (b) to the amount specified in paragraph (1)(A) of such subsection (referred to in this subsection as the 'quarterly fee amounts').

''(2) For the quarter in which such date of enactment occurs, the amount of fees assessed shall be a pro rata amount, determined according to the number of days remaining in the quarter (including such date of enactment) and according to the daily equivalent of the quarterly fee amounts. Fees assessed under the preceding sentence shall not be collected until the next quarter.

''(3) For the quarter following the quarter to which paragraph (2) applies, the full quarterly fee amounts shall be assessed and collected, in addition to collection of the pro rata fees assessed under paragraph (2).

''(f) STUDY BY GAO.—

''(1) IN GENERAL.—The Comptroller General of the United States shall conduct a study on—

''(A) the prevalence of youth tobacco use and the brands and subbrands that individuals under the age of 18 consume;

''(B) the feasibility of structuring the user fees or a portion of the user fees collected under this section on the youth market share of a manufacturer or year to year changes in a manufacturer's share of youth market; and

''(C) the potential effects of tobacco marketing to youth audiences if user fees were calculated in whole or in part on youth market share.

''(2) REPORT.—The Comptroller General shall submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Health, Education, Labor, and Pensions of the Senate a report on the study conducted under paragraph (1) by not later than 3 years after the date of enactment of the Family Smoking Prevention and Tobacco Control Act.''.

SEC. 102. FINAL RULE.

(a) CIGARETTES AND SMOKELESS TOBACCO.—

(1) IN GENERAL.—On the first day of publication of the Federal Register that is 180 days or more after the date of enactment of this Act, the Secretary of Health and Human Services shall publish in the Federal Register a final rule regarding cigarettes and smokeless tobacco, which—

(A) is deemed to be issued under chapter 9 of the Federal Food, Drug, and Cosmetic Act, as added by section 101 of this Act; and

(B) shall be deemed to be in compliance with all applicable provisions of chapter 5 of title 5, United States Code, and all other provisions of law relating to rulemaking procedures.

(2) CONTENTS OF RULE.—Except as provided in this subsection, the final rule published under paragraph (1), shall be identical in its provisions to part 897 of the regulations promulgated by the Secretary of Health and Human Services in the August 28, 1996, issue of the Federal Register (61 Fed. Reg., 44615–44618). Such rule shall—

(A) provide for the designation of jurisdictional authority that is in accordance with this subsection in accordance with this Act and the amendments made by this Act;

(B) strike Subpart C—Labels and section 897.32(c);

(C) strike paragraphs (a), (b), and (i) of section 897.3 and insert definitions of the terms ''cigarette'', ''cigarette tobacco,'', and ''smokeless tobacco'' as defined in section 900 of the Federal Food, Drug, and Cosmetic Act;

(D) insert ''or roll-your-own paper'' in section 897.34(a) after ''other than cigarettes or smokeless tobacco'';

(E) become effective on the date that is 1 year after the date of enactment of this Act; and

(F) amend paragraph (d) of section 897.16 to read as follows:

''(d)(1) Except as provided in subparagraph (2), no manufacturer, distributor, or retailer may distribute or cause to be distributed any free samples of cigarettes, smokeless tobacco, or other tobacco products (as such term is defined in section 201 of the Federal Food, Drug, and Cosmetic Act).

''(2)(A) Subparagraph (1) does not prohibit a manufacturer, distributor, or retailer from distributing or causing to be distributed free samples of smokeless tobacco in a qualified adult-only facility.

''(B) This subparagraph does not affect the authority of a State or local government to prohibit or otherwise restrict the distribution of free samples of smokeless tobacco.

''(C) For purposes of this paragraph, the term 'qualified adult-only facility' means a facility or restricted area that—

''(i) requires each person present to provide to a law enforcement officer (whether on or off duty) or to a security guard licensed by a governmental entity government-issued identification showing a photograph and at least the minimum age established by applicable law for the purchase of smokeless tobacco;

''(ii) does not sell, serve, or distribute alcohol;

''(iii) is not located adjacent to or immediately across from (in any direction) a space that is used primarily for youth-oriented marketing, promotional, or other activities;

''(iv) is a temporary structure constructed, designated, and operated as a distinct enclosed area for the purpose of distributing free samples of smokeless tobacco in accordance with this subparagraph; and

''(v) is enclosed by a barrier that—

''(I) is constructed of, or covered with, an opaque material (except for entrances and exits);

''(II) extends from no more than 12 inches above the ground or floor (which area at the bottom of the barrier must be covered with material that restricts visibility but may allow airflow) to at least 8 feet above the ground or floor (or to the ceiling); and

''(III) prevents persons outside the qualified adult-only facility from seeing into the qualified adult-only facility, unless they make unreasonable efforts to do so; and

''(vi) does not display on its exterior—

''(I) any tobacco product advertising;

''(II) a brand name other than in conjunction with words for an area or enclosure to identify an adult-only facility; or

''(III) any combination of words that would imply to a reasonable observer that the manufacturer, distributor, or retailer has a sponsorship that would violate section 897.34(c).

''(D) Distribution of samples of smokeless tobacco under this subparagraph permitted to be taken out of the qualified adult-only facility shall be limited to 1 package per adult consumer containing no more than 0.53 ounces (15 grams) of smokeless tobacco. If such package of smokeless tobacco contains individual portions of smokeless tobacco, the individual portions of smokeless tobacco shall not exceed 8 individual portions and the collective weight of such individual portions shall not exceed 0.53 ounces (15 grams). Any manufacturer, distributor, or retailer who distributes or causes to be distributed free samples also shall take reasonable steps to ensure that the above amounts are limited to one such package per adult consumer per day.

''(3) Notwithstanding subparagraph (2), no manufacturer, distributor, or retailer may distribute or cause to be distributed any free samples of smokeless tobacco—

''(A) to a sports team or entertainment group; or

''(B) at any football, basketball, baseball, soccer, or hockey event or any other sporting or entertainment event determined by the Secretary to be covered by this subparagraph.

''(4) The Secretary shall implement a program to ensure compliance with this paragraph and submit a report to the Congress on such compliance not later than 18 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act.

''(5) Nothing in this paragraph shall be construed to authorize any person to distribute or cause to be distributed any sample of a tobacco product to any individual who has not attained the minimum age established by applicable law for the purchase of such product.''.

(3) AMENDMENTS TO RULE.—Prior to making amendments to the rule published under paragraph (1), the Secretary shall promulgate a proposed rule in accordance with chapter 5 of title 5, United States Code.

(4) RULE OF CONSTRUCTION.—Except as provided in paragraph (3), nothing in this section shall be construed to limit the authority of the Secretary to amend, in accordance with chapter 5 of title 5, United States Code, the regulation promulgated pursuant to this section, including the provisions of such regulation relating to distribution of free samples.

(5) ENFORCEMENT OF RETAIL SALE PROVISIONS.—The Secretary of Health and Human Services shall ensure that the provisions of this Act, the amendments made by this Act, and the implementing regulations (including such provisions, amendments, and regulations relating to the retail sale of tobacco products) are enforced with respect to the United States and Indian tribes.

(6) QUALIFIED ADULT-ONLY FACILITY.—A qualified adult-only facility (as such term is defined in section 897.16(d) of the final rule published under paragraph (1)) that is also a retailer and that commits a violation as a retailer shall not be subject to the limitations in section 103(q) and shall be subject to penalties applicable to a qualified adult-only facility.

(7) CONGRESSIONAL REVIEW PROVISIONS.—Section 801 of title 5, United States Code, shall not apply to the final rule published under paragraph (1).

(b) LIMITATION ON ADVISORY OPINIONS.—As of the date of enactment of this Act, the following documents issued by the Food and Drug Administration shall not constitute advisory opinions under section 10.85(d)(1) of title 21, Code of Federal Regulations, except as they apply to tobacco products, and shall not be cited by the Secretary of Health and Human Services or the Food and Drug Administration as binding precedent:

(1) The preamble to the proposed rule in the document titled ''Regulations Restricting the Sale and Distribution of Cigarettes and Smokeless Tobacco Products to Protect Children and Adolescents'' (60 Fed. Reg. 41314–41372 (August 11, 1995)).

(2) The document titled ''Nicotine in Cigarettes and Smokeless Tobacco Products is a Drug and These Products Are Nicotine Delivery Devices Under the Federal Food, Drug, and Cosmetic Act'' (60 Fed. Reg. 41453–41787 (August 11, 1995)).

(3) The preamble to the final rule in the document titled ''Regulations Restricting the Sale and Distribution of Cigarettes and Smokeless Tobacco to Protect Children and Adolescents'' (61 Fed. Reg. 44396–44615 (August 28, 1996)).

(4) The document titled ''Nicotine in Cigarettes and Smokeless Tobacco is a Drug and These Products are Nicotine Delivery Devices Under the Federal Food, Drug, and Cosmetic Act; Jurisdictional Determination'' (61 Fed. Reg. 44619–45318 (August 28, 1996)).

SEC. 103. CONFORMING AND OTHER AMENDMENTS TO GENERAL PROVISIONS.

(a) AMENDMENT OF FEDERAL FOOD, DRUG, AND COSMETIC ACT.—Except as otherwise expressly provided, whenever in this section an amendment is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference is to a section or other provision of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.).

(b) SECTION 301.—Section 301 (21 U.S.C. 331) is amended—

(1) in subsection (a), by inserting ''tobacco product,'' after ''device,'';

(2) in subsection (b), by inserting ''tobacco product,'' after ''device,'';

(3) in subsection (c), by inserting ''tobacco product,'' after ''device,'';

(4) in subsection (e)—

(A) by striking the period after ''572(i)''; and

(B) by striking ''or 761 or the refusal to permit access to'' and inserting ''761, 909, or 920 or the refusal to permit access to'';

(5) in subsection (g), by inserting ''tobacco product,'' after ''device,'';

(6) in subsection (h), by inserting ''tobacco product,'' after ''device,'';

(7) in subsection (j)—

(A) by striking the period after ''573''; and

(B) by striking ''708, or 721'' and inserting ''708, 721, 904, 905, 906, 907, 908, 909, or 920(b)'';

(8) in subsection (k), by inserting ''tobacco product,'' after ''device,'';

(9) by striking subsection (p) and inserting the following:

''(p) The failure to register in accordance with section 510 or 905, the failure to provide any information required by section 510(j), 510(k), 905(i), or 905(j), or the failure to provide a notice required by section 510(j)(2) or 905(i)(3).'';

(10) by striking subsection (q)(1) and inserting the following:

''(q)(1) The failure or refusal—

''(A) to comply with any requirement prescribed under section 518, 520(g), 903(b), 907, 908, or 916;

''(B) to furnish any notification or other material or information required by or under section 519, 520(g), 904, 909, or 920; or

''(C) to comply with a requirement under section 522 or 913.'';

(11) in subsection (q)(2), by striking ''device,'' and inserting ''device or tobacco product,'';

(12) in subsection (r), by inserting ''or tobacco product'' after the term ''device'' each time that such term appears; and

(13) by adding at the end the following:

''(oo) The sale of tobacco products in violation of a no-tobacco-sale order issued under section 303(f).

''(pp) The introduction or delivery for introduction into interstate commerce of a tobacco product in violation of section 911.

''(qq)(1) Forging, counterfeiting, simulating, or falsely representing, or without proper authority using any mark, stamp (including tax stamp), tag, label, or other identification device upon any tobacco product or container or labeling thereof so as to render such tobacco product a counterfeit tobacco product.

''(2) Making, selling, disposing of, or keeping in possession, control, or custody, or concealing any punch, die, plate, stone, or other item that is designed to print, imprint, or reproduce the trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of the foregoing upon any tobacco product or container or labeling thereof so as to render such tobacco product a counterfeit tobacco product.

''(3) The doing of any act that causes a tobacco product to be a counterfeit tobacco product, or the sale or dispensing, or the holding for sale or dispensing, of a counterfeit tobacco product.

''(rr) The charitable distribution of tobacco products.

''(ss) The failure of a manufacturer or distributor to notify the Attorney General and the Secretary of the Treasury of their knowledge of tobacco products used in illicit trade.

''(tt) With respect to a tobacco product, any statement directed to consumers through the media or through the label, labeling, or advertising that would reasonably be expected to result in consumers believing that the product is regulated, inspected or approved by the Food and Drug Administration, or that the product complies with the requirements of the Food and Drug Administration, including a statement or implication in the label, labeling, or advertising of such product, and that could result in consumers believing that the product is endorsed for use by the Food and Drug Administration or in consumers being misled about the harmfulness of the product because of such regulation, inspection, or compliance.''.

(c) SECTION 303.—Section 303(f) (21 U.S.C. 333(f)) is amended—

(1) in paragraph (1)(A), by inserting ''or tobacco products'' after the term ''devices'' each place such term appears;

(2) in paragraph (5)—

(A) in subparagraph (A)—

(i) by striking ''assessed'' the first time it appears and inserting ''assessed, or a no-tobacco-sale order may be imposed,''; and

(ii) by striking ''penalty'' the second time it appears and inserting ''penalty, or upon whom a no-tobacco-sale order is to be imposed,'';

(B) in subparagraph (B)—

(i) by inserting after ''penalty,'' the following: ''or the period to be covered by a no-tobacco-sale order,''; and

(ii) by adding at the end the following: ''A no-tobacco-sale order permanently prohibiting an individual retail outlet from selling tobacco products shall include provisions that allow the outlet, after a specified period of time, to request that the Secretary compromise, modify, or terminate the order.''; and

(C) by adding at the end the following:

''(D) The Secretary may compromise, modify, or terminate, with or without conditions, any no-tobacco-sale order.'';

(3) in paragraph (6)—

(A) by inserting ''or the imposition of a no-tobacco-sale order'' after the term ''penalty'' each place such term appears; and

(B) by striking ''issued.'' and inserting ''issued, or on which the no-tobacco-sale order was imposed, as the case may be.''; and

(4) by adding at the end the following:

''(8) If the Secretary finds that a person has committed repeated violations of restrictions promulgated under section 906(d) at a particular retail outlet then the Secretary may impose a no-tobacco-sale order on that person prohibiting the sale of tobacco products in that outlet. A no-tobacco-sale order may be imposed with a civil penalty under paragraph (1). Prior to the entry of a no-sale order under this paragraph, a person shall be entitled to a hearing pursuant to the procedures established through regulations of the Food and Drug Administration for assessing civil money penalties, including at a retailer's request a hearing by telephone, or at the nearest regional or field office of the Food and Drug Administration, or at a Federal, State, or county facility within 100 miles from the location of the retail outlet, if such a facility is available.''.

(d) SECTION 304.—Section 304 (21 U.S.C. 334) is amended—

(1) in subsection (a)(2)—

(A) by striking ''and'' before ''(D)''; and

(B) by striking ''device.'' and inserting the following: ''device, and (E) Any adulterated or misbranded tobacco product.'';

(2) in subsection (d)(1), by inserting ''tobacco product,'' after ''device,'';

(3) in subsection (g)(1), by inserting ''or tobacco product'' after the term ''device'' each place such term appears; and

(4) in subsection (g)(2)(A), by inserting ''or tobacco product'' after ''device''.

(e) SECTION 505.—Section 505(n)(2) (21 U.S.C. 355(n)(2)) is amended by striking ''section 904'' and inserting ''section 1004''.

(f) SECTION 523.—Section 523(b)(2)(D) (21 U.S.C. 360m(b)(2)(D)) is amended by striking ''section 903(g)'' and inserting ''section 1003(g)''.

(g) SECTION 702.—Section 702(a)(1) (U.S.C. 372(a)(1)) is amended—

(1) by striking ''(a)(1)'' and inserting ''(a)(1)(A)''; and

(2) by adding at the end the following:

''(B)(i) For a tobacco product, to the extent feasible, the Secretary shall contract with the States in accordance with this paragraph to carry out inspections of retailers within that State in connection with the enforcement of this Act.

''(ii) The Secretary shall not enter into any contract under clause (i) with the government of any of the several States to exercise enforcement authority under this Act on Indian lands without the express written consent of the Indian tribe involved.''.

(h) SECTION 703.—Section 703 (21 U.S.C. 373) is amended—

(1) by inserting ''tobacco product,'' after the term ''device,'' each place such term appears; and

(2) by inserting ''tobacco products,'' after the term ''devices,'' each place such term appears.

(i) SECTION 704.—Section 704 (21 U.S.C. 374) is amended—

(1) in subsection (a)(1)(A), by inserting ''tobacco products,'' after the term ''devices,'' each place such term appears;

(2) in subsection (a)(1)(B), by inserting ''or tobacco products'' after the term ''restricted devices'' each place such term appears;

(3) in subsection (b), by inserting ''tobacco product,'' after ''device,''; and

(4) in subsection (g)(13), by striking ''section 903(g)'' and inserting ''section 1003(g)''.

(j) SECTION 705.—Section 705(b) (21 U.S.C. 375(b)) is amended by inserting ''tobacco products,'' after ''devices,''.

(k) SECTION 709.—Section 709 (21 U.S.C. 379a) is amended by inserting ''tobacco product,'' after ''device,''.

(l) SECTION 801.—Section 801 (21 U.S.C. 381) is amended—

(1) in subsection (a)—

(A) by inserting ''tobacco products,'' after the term ''devices,'' ;

(B) by inserting ''or section 905(h)'' after ''section 510''; and

(C) by striking the term ''drugs or devices'' each time such term appears and inserting ''drugs, devices, or tobacco products'';

(2) in subsection (e)(1), by inserting ''tobacco product,'' after ''device,''; and

(3) by adding at the end the following:

''(p)(1) Not later than 36 months after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, and annually thereafter, the Secretary shall submit to the Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Energy and Commerce of the House of Representatives, a report regarding—

''(A) the nature, extent, and destination of United States tobacco product exports that do not conform to tobacco product standards established pursuant to this Act;

''(B) the public health implications of such exports, including any evidence of a negative public health impact; and

''(C) recommendations or assessments of policy alternatives available to Congress and the executive branch to reduce any negative public health impact caused by such exports.

''(2) The Secretary is authorized to establish appropriate information disclosure requirements to carry out this subsection.''.

(m) SECTION 1003.—Section 1003(d)(2)(C) (as redesignated by section 101(b)) is amended—

(1) by striking ''and'' after ''cosmetics,''; and

(2) inserting '', and tobacco products'' after ''devices''.

(n) SECTION 1009.—Section 1009(b) (as redesignated by section 101(b)) is amended by striking ''section 908'' and inserting ''section 1008''.

(o) SECTION 409 OF THE FEDERAL MEAT INSPECTION ACT.—Section 409(a) of the Federal Meat Inspection Act (21 U.S.C. 679(a)) is amended by striking ''section 902(b)'' and inserting ''section 1002(b)''.

(p) RULE OF CONSTRUCTION.—Nothing in this section is intended or shall be construed to expand, contract, or otherwise modify or amend the existing limitations on State government authority over tribal restricted fee or trust lands.

(q) GUIDANCE AND EFFECTIVE DATES.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall issue guidance—

(A) defining the term ''repeated violation'', as used in section 303(f)(8) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 333(f)(8)) as amended by subsection (c), as including at least 5 violations of particular requirements over a 36-month period at a particular retail outlet that constitute a repeated violation and providing for civil penalties in accordance with paragraph (2);

(B) providing for timely and effective notice by certified or registered mail or personal delivery to the retailer of each alleged violation at a particular retail outlet prior to conducting a followup compliance check, such notice to be sent to the location specified on the retailer's registration or to the retailer's registered agent if the retailer has provider such agent information to the Food and Drug Administration prior to the violation;

(C) providing for a hearing pursuant to the procedures established through regulations of the Food and Drug Administration for assessing civil money penalties, including at a retailer's request a hearing by telephone or at the nearest regional or field office of the Food and Drug Administration, and providing for an expedited procedure for the administrative appeal of an alleged violation;

(D) providing that a person may not be charged with a violation at a particular retail outlet unless the Secretary has provided notice to the retailer of all previous violations at that outlet;

(E) establishing that civil money penalties for multiple violations shall increase from one violation to the next violation pursuant to paragraph (2) within the time periods provided for in such paragraph;

(F) providing that good faith reliance on the presentation of a false government-issued photographic identification that contains a date of birth does not constitute a violation of any minimum age requirement for the sale of tobacco products if the retailer has taken effective steps to prevent such violations, including—

(i) adopting and enforcing a written policy against sales to minors;

(ii) informing its employees of all applicable laws;

(iii) establishing disciplinary sanctions for employee noncompliance; and

(iv) requiring its employees to verify age by way of photographic identification or electronic scanning device; and

(G) providing for the Secretary, in determining whether to impose a no-tobacco-sale order and in determining whether to compromise, modify, or terminate such an order, to consider whether the retailer has taken effective steps to prevent violations of the minimum age requirements for the sale of tobacco products, including the steps listed in subparagraph (F).

(2) PENALTIES FOR VIOLATIONS.—

(A) IN GENERAL.—The amount of the civil penalty to be applied for violations of restrictions promulgated under section 906(d), as described in paragraph (1), shall be as follows:

(i) With respect to a retailer with an approved training program, the amount of the civil penalty shall not exceed—

(I) in the case of the first violation, $0.00 together with the issuance of a warning letter to the retailer;

(II) in the case of a second violation within a 12-month period, $250;

(III) in the case of a third violation within a 24-month period, $500;

(IV) in the case of a fourth violation within a 24-month period, $2,000;

(V) in the case of a fifth violation within a 36-month period, $5,000; and

(VI) in the case of a sixth or subsequent violation within a 48-month period, $10,000 as determined by the Secretary on a case-by-case basis.

(ii) With respect to a retailer that does not have an approved training program, the amount of the civil penalty shall not exceed—

(I) in the case of the first violation, $250;

(II) in the case of a second violation within a 12-month period, $500;

(III) in the case of a third violation within a 24-month period, $1,000;

(IV) in the case of a fourth violation within a 24-month period, $2,000;

(V) in the case of a fifth violation within a 36-month period, $5,000; and

(VI) in the case of a sixth or subsequent violation within a 48-month period, $10,000 as determined by the Secretary on a case-by-case basis.

(B) TRAINING PROGRAM.—For purposes of subparagraph (A), the term ''approved training program'' means a training program that complies with standards developed by the Food and Drug Administration for such programs.

(C) CONSIDERATION OF STATE PENALTIES.—The Secretary shall coordinate with the States in enforcing the provisions of this Act and, for purposes of mitigating a civil penalty to be applied for a violation by a retailer of any restriction promulgated under section 906(d), shall consider the amount of any penalties paid by the retailer to a State for the same violation.

(3) GENERAL EFFECTIVE DATE.—The amendments made by paragraphs (2), (3), and (4) of subsection (c) shall take effect upon the issuance of guidance described in paragraph (1) of this subsection.

(4) SPECIAL EFFECTIVE DATE.—The amendment made by subsection (c)(1) shall take effect on the date of enactment of this Act.

(5) PACKAGE LABEL REQUIREMENTS.—The package label requirements of paragraphs (2), (3), and (4) of section 903(a) of the Federal Food, Drug, and Cosmetic Act (as amended by this Act) shall take effect on the date that is 12 months after the date of enactment of this Act. The effective date shall be with respect to the date of manufacture, provided that, in any case, beginning 30 days after such effective date, a manufacturer shall not introduce into the domestic commerce of the United States any product, irrespective of the date of manufacture, that is not in conformance with section 903(a)(2), (3), and (4) and section 920(a) of the Federal Food, Drug, and Cosmetic Act.

(6) ADVERTISING REQUIREMENTS.—The advertising requirements of section 903(a)(8) of the Federal Food, Drug, and Cosmetic Act (as amended by this Act) shall take effect on the date that is 12 months after the date of enactment of this Act.

SEC. 104. STUDY ON RAISING THE MINIMUM AGE TO PURCHASE TOBACCO PRODUCTS.

The Secretary of Health and Human Services shall—

(1) convene an expert panel to conduct a study on the public health implications of raising the minimum age to purchase tobacco products; and

(2) not later than 5 years after the date of the enactment of this Act, submit a report to the Congress on the results of such study.

SEC. 105. TOBACCO INDUSTRY CONCENTRATION.

(a) STUDY.—The Federal Trade Commission shall conduct a study on the causes and effects of concentration in the tobacco industry.

(b) PUBLIC REPORT.—The Federal Trade Commission shall transmit to Congress a report not later than 5 years after the date of enactment of this Act, and a subsequent report on the date that is 10 years after the date of enactment of this Act. Such reports shall include—

(1) an analysis of trends in the market share of any dominant tobacco product manufacturer in any class of tobacco products; or

(2) an analysis of trends in competition or the emergence of a monopoly; and

(3) recommendations to Congress on any corrective actions that should be taken to address tobacco industry concentration.

SEC. 106. ENFORCEMENT ACTION PLAN FOR ADVERTISING AND PROMOTION RESTRICTIONS.

(a) ACTION PLAN.—

(1) DEVELOPMENT.—Not later than 6 months after the date of the enactment of this Act, the Secretary of Health and Human Services (in this section referred to as the ''Secretary'') shall develop and publish an action plan to enforce restrictions adopted pursuant to section 906 of the Federal Food, Drug, and Cosmetic Act, as added by section 101(b) of this Act, or pursuant to section 102(a) of this Act, on promotion and advertising of menthol and other cigarettes to youth.

(2) CONSULTATION.—The action plan required by paragraph (1) shall be developed in consultation with public health organizations and other stakeholders with demonstrated expertise and experience in serving minority communities.

(3) PRIORITY.—The action plan required by paragraph (1) shall include provisions designed to ensure enforcement of the restrictions described in paragraph (1) in minority communities.

(b) STATE AND LOCAL ACTIVITIES.—

(1) INFORMATION ON AUTHORITY.—Not later than 3 months after the date of the enactment of this Act, the Secretary shall inform State, local, and tribal governments of the authority provided to such entities under section 5(c) of the Federal Cigarette Labeling and Advertising Act, as added by section 203 of this Act, or preserved by such entities under section 916 of the Federal Food, Drug, and Cosmetic Act, as added by section 101(b) of this Act.

(2) COMMUNITY ASSISTANCE.—At the request of communities seeking assistance to prevent underage tobacco use, the Secretary shall provide such assistance, including assistance with strategies to address the prevention of underage tobacco use in communities with a disproportionate use of menthol cigarettes by minors.

TITLE II—TOBACCO PRODUCT WARNINGS; CONSTITUENT AND SMOKE CONSTITUENT DISCLOSURE

SEC. 201. CIGARETTE LABEL AND ADVERTISING WARNINGS.

(a) AMENDMENT.—Section 4 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333) is amended to read as follows:

''SEC. 4. LABELING.

''(a) LABEL REQUIREMENTS.—

''(1) IN GENERAL.—It shall be unlawful for any person to manufacture, package, sell, offer to sell, distribute, or import for sale or distribution within the United States any cigarettes the package of which fails to bear, in accordance with the requirements of this section, one of the following labels:

''WARNING: Cigarettes are addictive.

''WARNING: Tobacco smoke can harm your children.

''WARNING: Cigarettes cause fatal lung disease.

''WARNING: Cigarettes cause cancer.

''WARNING: Cigarettes cause strokes and heart disease.

''WARNING: Smoking during pregnancy can harm your baby.

''WARNING: Smoking can kill you.

''WARNING: Tobacco smoke causes fatal lung disease in nonsmokers.

''WARNING: Quitting smoking now greatly reduces serious risks to your health.

''(2) PLACEMENT; TYPOGRAPHY; ETC.—Each label statement required by paragraph (1) shall be located in the upper portion of the front and rear panels of the package, directly on the package underneath the cellophane or other clear wrapping. Each label statement shall comprise at least the top 30 percent of the front and rear panels of the package. The word 'WARNING' shall appear in capital letters and all text shall be in conspicuous and legible 17-point type, unless the text of the label statement would occupy more than 70 percent of such area, in which case the text may be in a smaller conspicuous and legible type size, provided that at least 60 percent of such area is occupied by required text. The text shall be black on a white background, or white on a black background, in a manner that contrasts, by typography, layout, or color, with all other printed material on the package, in an alternating fashion under the plan submitted under subsection (c).

''(3) DOES NOT APPLY TO FOREIGN DISTRIBUTION.—The provisions of this subsection do not apply to a tobacco product manufacturer or distributor of cigarettes which does not manufacture, package, or import cigarettes for sale or distribution within the United States.

''(4) APPLICABILITY TO RETAILERS.—A retailer of cigarettes shall not be in violation of this subsection for packaging that—

''(A) contains a warning label;

''(B) is supplied to the retailer by a license- or permit-holding tobacco product manufacturer, importer, or distributor; and

''(C) is not altered by the retailer in a way that is material to the requirements of this subsection.

''(b) ADVERTISING REQUIREMENTS.—

''(1) IN GENERAL.—It shall be unlawful for any tobacco product manufacturer, importer, distributor, or retailer of cigarettes to advertise or cause to be advertised within the United States any cigarette unless its advertising bears, in accordance with the requirements of this section, one of the labels specified in subsection (a).

''(2) TYPOGRAPHY, ETC.—Each label statement required by subsection (a) in cigarette advertising shall comply with the standards set forth in this paragraph. For press and poster advertisements, each such statement and (where applicable) any required statement relating to tar, nicotine, or other constituent (including a smoke constituent) yield shall comprise at least 20 percent of the area of the advertisement and shall appear in a conspicuous and prominent format and location at the top of each advertisement within the trim area. The Secretary may revise the required type sizes in such area in such manner as the Secretary determines appropriate. The word 'WARNING' shall appear in capital letters, and each label statement shall appear in conspicuous and legible type. The text of the label statement shall be black if the background is white and white if the background is black, under the plan submitted under subsection (c). The label statements shall be enclosed by a rectangular border that is the same color as the letters of the statements and that is the width of the first downstroke of the capital 'W' of the word 'WARNING' in the label statements. The text of such label statements shall be in a typeface pro rata to the following requirements: 45-point type for a whole-page broadsheet newspaper advertisement; 39-point type for a half-page broadsheet newspaper advertisement; 39-point type for a whole-page tabloid newspaper advertisement; 27-point type for a half-page tabloid newspaper advertisement; 31.5-point type for a double page spread magazine or whole-page magazine advertisement; 22.5-point type for a 28 centimeter by 3 column advertisement; and 15-point type for a 20 centimeter by 2 column advertisement. The label statements shall be in English, except that—

''(A) in the case of an advertisement that appears in a newspaper, magazine, periodical, or other publication that is not in English, the statements shall appear in the predominant language of the publication; and

''(B) in the case of any other advertisement that is not in English, the statements shall appear in the same language as that principally used in the advertisement.

''(3) MATCHBOOKS.—Notwithstanding paragraph (2), for matchbooks (defined as containing not more than 20 matches) customarily given away with the purchase of tobacco products, each label statement required by subsection (a) may be printed on the inside cover of the matchbook.

''(4) ADJUSTMENT BY SECRETARY.—The Secretary may, through a rulemaking under section 553 of title 5, United States Code, adjust the format and type sizes for the label statements required by this section; the text, format, and type sizes of any required tar, nicotine yield, or other constituent (including smoke constituent) disclosures; or the text, format, and type sizes for any other disclosures required under the Federal Food, Drug, and Cosmetic Act. The text of any such label statements or disclosures shall be required to appear only within the 20 percent area of cigarette advertisements provided by paragraph (2). The Secretary shall promulgate regulations which provide for adjustments in the format and type sizes of any text required to appear in such area to ensure that the total text required to appear by law will fit within such area.

''(c) MARKETING REQUIREMENTS.—

''(1) RANDOM DISPLAY.—The label statements specified in subsection (a)(1) shall be randomly displayed in each 12-month period, in as equal a number of times as is possible on each brand of the product and be randomly distributed in all areas of the United States in which the product is marketed in accordance with a plan submitted by the tobacco product manufacturer, importer, distributor, or retailer and approved by the Secretary.

''(2) ROTATION.—The label statements specified in subsection (a)(1) shall be rotated quarterly in alternating sequence in advertisements for each brand of cigarettes in accordance with a plan submitted by the tobacco product manufacturer, importer, distributor, or retailer to, and approved by, the Secretary.

''(3) REVIEW.—The Secretary shall review each plan submitted under paragraph (2) and approve it if the plan—

''(A) will provide for the equal distribution and display on packaging and the rotation required in advertising under this subsection; and

''(B) assures that all of the labels required under this section will be displayed by the tobacco product manufacturer, importer, distributor, or retailer at the same time.

''(4) APPLICABILITY TO RETAILERS.—This subsection and subsection (b) apply to a retailer only if that retailer is responsible for or directs the label statements required under this section except that this paragraph shall not relieve a retailer of liability if the retailer displays, in a location open to the public, an advertisement that does not contain a warning label or has been altered by the retailer in a way that is material to the requirements of this subsection and subsection (b).''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect 12 months after the date of enactment of this Act. Such effective date shall be with respect to the date of manufacture, provided that, in any case, beginning 30 days after such effective date, a manufacturer shall not introduce into the domestic commerce of the United States any product, irrespective of the date of manufacture, that is not in conformance with section 4 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333), as amended by subsection (a).

SEC. 202. AUTHORITY TO REVISE CIGARETTE WARNING LABEL STATEMENTS.

(a) PREEMPTION.—Section 5(a) of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1334(a)) is amended by striking ''No'' and inserting ''Except to the extent the Secretary requires additional or different statements on any cigarette package by a regulation, by an order, by a standard, by an authorization to market a product, or by a condition of marketing a product, pursuant to the Family Smoking Prevention and Tobacco Control Act (and the amendments made by that Act), or as required under section 903(a)(2) or section 920(a) of the Federal Food, Drug, and Cosmetic Act, no''.

(b) CHANGE IN REQUIRED STATEMENTS.—Section 4 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333), as amended by section 201, is further amended by adding at the end the following:

''(d) CHANGE IN REQUIRED STATEMENTS.—The Secretary may, by a rulemaking conducted under section 553 of title 5, United States Code, adjust the format, type size, and text of any of the label requirements, require color graphics to accompany the text, increase the required label area from 30 percent up to 50 percent of the front and rear panels of the package, or establish the format, type size, and text of any other disclosures required under the Federal Food, Drug, and Cosmetic Act, if the Secretary finds that such a change would promote greater public understanding of the risks associated with the use of tobacco products.''.

SEC. 203. STATE REGULATION OF CIGARETTE ADVERTISING AND PROMOTION.

Section 5 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1334) is amended by adding at the end the following:

''(c) EXCEPTION.—Notwithstanding subsection (b), a State or locality may enact statutes and promulgate regulations, based on smoking and health, that take effect after the effective date of the Family Smoking Prevention and Tobacco Control Act, imposing specific bans or restrictions on the time, place, and manner, but not content, of the advertising or promotion of any cigarettes.''.

SEC. 204. SMOKELESS TOBACCO LABELS AND ADVERTISING WARNINGS.

(a) AMENDMENT.—Section 3 of the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4402) is amended to read as follows:

''SEC. 3. SMOKELESS TOBACCO WARNING.

''(a) GENERAL RULE.—

''(1) It shall be unlawful for any person to manufacture, package, sell, offer to sell, distribute, or import for sale or distribution within the United States any smokeless tobacco product unless the product package bears, in accordance with the requirements of this Act, one of the following labels:

''WARNING: This product can cause mouth cancer.

''WARNING: This product can cause gum disease and tooth loss.

''WARNING: This product is not a safe alternative to cigarettes.

''WARNING: Smokeless tobacco is addictive.

''(2) Each label statement required by paragraph (1) shall be—

''(A) located on the 2 principal display panels of the package, and each label statement shall comprise at least 30 percent of each such display panel; and

''(B) in 17-point conspicuous and legible type and in black text on a white background, or white text on a black background, in a manner that contrasts by typography, layout, or color, with all other printed material on the package, in an alternating fashion under the plan submitted under subsection (b)(3), except that if the text of a label statement would occupy more than 70 percent of the area specified by subparagraph (A), such text may appear in a smaller type size, so long as at least 60 percent of such warning area is occupied by the label statement.

''(3) The label statements required by paragraph (1) shall be introduced by each tobacco product manufacturer, packager, importer, distributor, or retailer of smokeless tobacco products concurrently into the distribution chain of such products.

''(4) The provisions of this subsection do not apply to a tobacco product manufacturer or distributor of any smokeless tobacco product that does not manufacture, package, or import smokeless tobacco products for sale or distribution within the United States.

''(5) A retailer of smokeless tobacco products shall not be in violation of this subsection for packaging that—

''(A) contains a warning label;

''(B) is supplied to the retailer by a license- or permit-holding tobacco product manufacturer, importer, or distributor; and

''(C) is not altered by the retailer in a way that is material to the requirements of this subsection.

''(b) REQUIRED LABELS.—

''(1) It shall be unlawful for any tobacco product manufacturer, packager, importer, distributor, or retailer of smokeless tobacco products to advertise or cause to be advertised within the United States any smokeless tobacco product unless its advertising bears, in accordance with the requirements of this section, one of the labels specified in subsection (a).

''(2)(A) Each label statement required by subsection (a) in smokeless tobacco advertising shall comply with the standards set forth in this paragraph.

''(B) For press and poster advertisements, each such statement and (where applicable) any required statement relating to tar, nicotine, or other constituent yield shall comprise at least 20 percent of the area of the advertisement.

''(C) The word 'WARNING' shall appear in capital letters, and each label statement shall appear in conspicuous and legible type.

''(D) The text of the label statement shall be black on a white background, or white on a black background, in an alternating fashion under the plan submitted under paragraph (3).

''(E) The label statements shall be enclosed by a rectangular border that is the same color as the letters of the statements and that is the width of the first downstroke of the capital 'W' of the word 'WARNING' in the label statements.

''(F) The text of such label statements shall be in a typeface pro rata to the following requirements: 45-point type for a whole-page broadsheet newspaper advertisement; 39-point type for a half-page broadsheet newspaper advertisement; 39-point type for a whole-page tabloid newspaper advertisement; 27-point type for a half-page tabloid newspaper advertisement; 31.5-point type for a double page spread magazine or whole-page magazine advertisement; 22.5-point type for a 28 centimeter by 3 column advertisement; and 15-point type for a 20 centimeter by 2 column advertisement.

''(G) The label statements shall be in English, except that—

''(i) in the case of an advertisement that appears in a newspaper, magazine, periodical, or other publication that is not in English, the statements shall appear in the predominant language of the publication; and

''(ii) in the case of any other advertisement that is not in English, the statements shall appear in the same language as that principally used in the advertisement.

''(3)(A) The label statements specified in subsection (a)(1) shall be randomly displayed in each 12-month period, in as equal a number of times as is possible on each brand of the product and be randomly distributed in

all areas of the United States in which the product is marketed in accordance with a plan submitted by the tobacco product manufacturer, importer, distributor, or retailer and approved by the Secretary.

''(B) The label statements specified in subsection (a)(1) shall be rotated quarterly in alternating sequence in advertisements for each brand of smokeless tobacco product in accordance with a plan submitted by the tobacco product manufacturer, importer, distributor, or retailer to, and approved by, the Secretary.

''(C) The Secretary shall review each plan submitted under subparagraphs (A) and (B) and approve it if the plan—

''(i) will provide for the equal distribution and display on packaging and the rotation required in advertising under this subsection; and

''(ii) assures that all of the labels required under this section will be displayed by the tobacco product manufacturer, importer, distributor, or retailer at the same time.

''(D) This paragraph applies to a retailer only if that retailer is responsible for or directs the label statements under this section, unless the retailer displays, in a location open to the public, an advertisement that does not contain a warning label or has been altered by the retailer in a way that is material to the requirements of this subsection.

''(4) The Secretary may, through a rulemaking under section 553 of title 5, United States Code, adjust the format and type sizes for the label statements required by this section; the text, format, and type sizes of any required tar, nicotine yield, or other constituent disclosures; or the text, format, and type sizes for any other disclosures required under the Federal Food, Drug, and Cosmetic Act. The text of any such label statements or disclosures shall be required to appear only within the 20 percent area of advertisements provided by paragraph (2). The Secretary shall promulgate regulations which provide for adjustments in the format and type sizes of any text required to appear in such area to ensure that the total text required to appear by law will fit within such area.

''(c) TELEVISION AND RADIO ADVERTISING.—It is unlawful to advertise smokeless tobacco on any medium of electronic communications subject to the jurisdiction of the Federal Communications Commission.''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect 12 months after the date of enactment of this Act. Such effective date shall be with respect to the date of manufacture, provided that, in any case, beginning 30 days after such effective date, a manufacturer shall not introduce into the domestic commerce of the United States any product, irrespective of the date of manufacture, that is not in conformance with section 3 of the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4402), as amended by subsection (a)

SEC. 205. AUTHORITY TO REVISE SMOKELESS TOBACCO PRODUCT WARNING LABEL STATEMENTS.

(a) IN GENERAL.—Section 3 of the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4402), as amended by section 204, is further amended by adding at the end the following:

''(d) AUTHORITY TO REVISE WARNING LABEL STATEMENTS.—The Secretary may, by a rulemaking conducted under section 553 of title 5, United States Code, adjust the format, type size, and text of any of the label requirements, require color graphics to accompany the text, increase the required label area from 30 percent up to 50 percent of the front and rear panels of the package, or establish the format, type size, and text of any other disclosures required under the Federal Food, Drug, and Cosmetic Act, if the Secretary finds that such a change would promote greater public understanding of the risks associated with the use of smokeless tobacco products.''.

(b) PREEMPTION.—Section 7(a) of the Comprehensive Smokeless Tobacco Health Education Act of 1986 (15 U.S.C. 4406(a)) is amended by striking ''No'' and inserting ''Except as provided in the Family Smoking Prevention and Tobacco Control Act (and the amendments made by that Act), no''.

SEC. 206. TAR, NICOTINE, AND OTHER SMOKE CONSTITUENT DISCLOSURE TO THE PUBLIC.

Section 4 of the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1333), as amended by sections 201 and 202, is further amended by adding at the end the following:

''(e) TAR, NICOTINE, AND OTHER SMOKE CONSTITUENT DISCLOSURE.—

''(1) IN GENERAL.—The Secretary shall, by a rulemaking conducted under section 553 of title 5, United States Code, determine (in the Secretary's sole discretion) whether cigarette and other tobacco product manufacturers shall be required to include in the area of each cigarette advertisement specified by subsection (b) of this section, or on the package label, or both, the tar and nicotine yields of the advertised or packaged brand. Any such disclosure shall be in accordance with the methodology established under such regulations, shall conform to the type size requirements of subsection (b) of this section, and shall appear within the area specified in subsection (b) of this section.

''(2) RESOLUTION OF DIFFERENCES.—Any differences between the requirements established by the Secretary under paragraph (1) and tar and nicotine yield reporting requirements established by the Federal Trade Commission shall be resolved by a memorandum of understanding between the Secretary and the Federal Trade Commission.

''(3) CIGARETTE AND OTHER TOBACCO PRODUCT CONSTITUENTS.—In addition to the disclosures required by paragraph (1), the Secretary may, under a rulemaking conducted under section 553 of title 5, United States Code, prescribe disclosure requirements regarding the level of any cigarette or other tobacco product constituent including any smoke constituent. Any such disclosure may be required if the Secretary determines that disclosure would be of benefit to the public health, or otherwise would increase consumer awareness of the health consequences of the use of tobacco products, except that no such prescribed disclosure shall be required on the face of any cigarette package or advertisement. Nothing in this section shall prohibit the Secretary from requiring such prescribed disclosure through a cigarette or other tobacco product package or advertisement insert, or by any other means under the Federal Food, Drug, and Cosmetic Act.

''(4) RETAILERS.—This subsection applies to a retailer only if that retailer is responsible for or directs the label statements required under this section.''.

TITLE III—PREVENTION OF ILLICIT TRADE IN TOBACCO PRODUCTS

SEC. 301. LABELING, RECORDKEEPING, RECORDS INSPECTION.

Chapter IX of the Federal Food, Drug, and Cosmetic Act, as added by section 101, is further amended by adding at the end the following:

''SEC. 920. LABELING, RECORDKEEPING, RECORDS INSPECTION.

''(a) ORIGIN LABELING.—

''(1) REQUIREMENT.—Beginning 1 year after the date of enactment of the Family Smoking Prevention and Tobacco Control Act, the label, packaging, and shipping containers of tobacco products for introduction or delivery for introduction into interstate commerce in the United States shall bear the statement 'sale only allowed in the United States'.

''(2) EFFECTIVE DATE.—The effective date specified in paragraph (1) shall be with respect to the date of manufacture, provided that, in any case, beginning 30 days after such effective date, a manufacturer shall not introduce into the domestic commerce of the United States any product, irrespective of the date of manufacture, that is not in conformance with such paragraph.

''(b) REGULATIONS CONCERNING RECORDKEEPING FOR TRACKING AND TRACING.—

''(1) IN GENERAL.—The Secretary shall promulgate regulations regarding the establishment and maintenance of records by any person who manufactures, processes, transports, distributes, receives, packages, holds, exports, or imports tobacco products.

''(2) INSPECTION.—In promulgating the regulations described in paragraph (1), the Secretary shall consider which records are needed for inspection to monitor the movement of tobacco products from the point of manufacture through distribution to retail outlets to assist in investigating potential illicit trade, smuggling, or counterfeiting of tobacco products.

''(3) CODES.—The Secretary may require codes on the labels of tobacco products or other designs or devices for the purpose of tracking or tracing the tobacco product through the distribution system.

''(4) SIZE OF BUSINESS.—The Secretary shall take into account the size of a business in promulgating regulations under this section.

''(5) RECORDKEEPING BY RETAILERS.—The Secretary shall not require any retailer to maintain records relating to individual purchasers of tobacco products for personal consumption.

''(c) RECORDS INSPECTION.—If the Secretary has a reasonable belief that a tobacco product is part of an illicit trade or smuggling or is a counterfeit product, each person who manufactures, processes, transports, distributes, receives, holds, packages, exports, or imports tobacco products shall, at the request of an officer or employee duly designated by the Secretary, permit such officer or employee, at reasonable times and within reasonable limits and in a reasonable manner, upon the presentation of appropriate credentials and a written notice to such person, to have access to and copy all records (including financial records) relating to such article that are needed to assist the Secretary in investigating potential illicit trade, smuggling, or counterfeiting of tobacco products. The Secretary shall not authorize an officer or employee of the government of any of the several States to exercise authority under the preceding sentence on Indian lands without the express written consent of the Indian tribe involved.

''(d) KNOWLEDGE OF ILLEGAL TRANSACTION.—

''(1) NOTIFICATION.—If the manufacturer or distributor of a tobacco product has knowledge which reasonably supports the conclusion that a tobacco product manufactured or distributed by such manufacturer or distributor that has left the control of such person may be or has been—

''(A) imported, exported, distributed, or offered for sale in interstate commerce by a person without paying duties or taxes required by law; or

''(B) imported, exported, distributed, or diverted for possible illicit marketing,

the manufacturer or distributor shall promptly notify the Attorney General and the Secretary of the Treasury of such knowledge.

''(2) KNOWLEDGE DEFINED.—For purposes of this subsection, the term 'knowledge' as applied to a manufacturer or distributor means—

''(A) the actual knowledge that the manufacturer or distributor had; or

''(B) the knowledge which a reasonable person would have had under like circumstances or which would have been obtained upon the exercise of due care.''.

SEC. 302. STUDY AND REPORT.

(a) STUDY.—The Comptroller General of the United States shall conduct a study of cross-border trade in tobacco products to—

(1) collect data on cross-border trade in tobacco products, including illicit trade and trade of counterfeit tobacco products and make recommendations on the monitoring of such trade;

(2) collect data on cross-border advertising (any advertising intended to be broadcast, transmitted, or distributed from the United States to another country) of tobacco products and make recommendations on how to prevent or eliminate, and what technologies could help facilitate the elimination of, cross-border advertising; and

(3) collect data on the health effects (particularly with respect to individuals under 18 years of age) resulting from cross-border trade in tobacco products, including the health effects resulting from—

(A) the illicit trade of tobacco products and the trade of counterfeit tobacco products; and

(B) the differing tax rates applicable to tobacco products.

(b) REPORT.—Not later than 18 months after the date of enactment of this Act, the Comptroller General of the United States shall submit to the Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the study described in subsection (a).

(c) DEFINITION.—In this section:

(1) The term ''cross-border trade'' means trade across a border of the United States, a State or Territory, or Indian country.

(2) The term ''Indian country'' has the meaning given to that term in section 1151 of title 18, United States Code.

(3) The terms ''State'' and ''Territory'' have the meanings given to those terms in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321).

TITLE IV—THRIFT SAVINGS PLAN ENHANCEMENT

SEC. 401. SHORT TITLE.

This title may be cited as the ''Thrift Savings Plan Enhancement Act of 2008''.

SEC. 402. AUTOMATIC ENROLLMENTS.

(a) AUTOMATIC ENROLLMENTS.—

(1) IN GENERAL.—Section 8432(b) of title 5, United States Code, is amended by striking paragraphs (2) through (4) and inserting the following:

''(2)(A) The Board shall by regulation provide for an eligible individual to be automatically enrolled to make contributions under subsection (a) at the default percentage of basic pay.

''(B) For purposes of this paragraph, the default percentage shall be equal to 3 percent or such other percentage, not less than 2 percent nor more than 5 percent, as the Board may by regulation prescribe.

''(C) The regulations shall include provisions under which any individual who would otherwise be automatically enrolled in accordance with subparagraph (A) may—

''(i) modify the percentage or amount to be contributed pursuant to automatic enrollment, effective from the start of such enrollment; or

''(ii) decline automatic enrollment altogether.

''(D) For purposes of this paragraph, the term 'eligible individual' means any individual who, after any regulations under subparagraph (A) first take effect, is appointed, transferred, or reappointed to a position in which that individual is eligible to contribute to the Thrift Savings Fund.

''(E) Sections 8351(a)(1), 8440a(a)(1), 8440b(a)(1), 8440c(a)(1), 8440d(a)(1), and 8440e(a)(1) shall be applied in a manner consistent with the purposes of this paragraph.''.

(2) TECHNICAL AMENDMENT.—Section 8432(b)(1) of title 5, United States Code, is amended by striking the parenthetical matter in subparagraph (B).

(b) DEFAULT INVESTMENTS.—Section 8438(c)(2) of title 5, United States Code, is amended to read as follows:

''(2) If an election has not been made with respect to any sums in the Thrift Savings Fund which are available for investment, the Executive Director shall invest such sums in—

''(A) the Government Securities Investment Fund; or

''(B) such alternative fund or funds (in lieu of the fund under subparagraph (A)) as the Board may designate in regulations.

The designation of an alternative fund by regulations under subparagraph (B) may be made only if, in the judgment of the Board, such designation would be in the best interests of participants. Any decision under the preceding sentence shall be made after consultation with the Employee Thrift Advisory Council (established under section 8473).''.

SEC. 403. QUALIFIED ROTH CONTRIBUTION PROGRAM.

(a) IN GENERAL.—Subchapter III of chapter 84 of title 5, United States Code, is amended by inserting after section 8432c the following:

''§ 8432d. Qualified Roth contribution program

''(a) DEFINITIONS.—For purposes of this section—

''(1) the term 'qualified Roth contribution program' means a program described in paragraph (1) of section 402A(b) of the Internal Revenue Code of 1986 which meets the requirements of paragraph (2) of such section; and

''(2) the terms 'designated Roth contribution' and 'elective deferral' have the meanings given such terms in section 402A of the Internal Revenue Code of 1986.

''(b) AUTHORITY TO ESTABLISH.—The Board shall by regulation provide for the inclusion in the Thrift Savings Plan of a qualified Roth contribution program, under such terms and conditions as the Board may prescribe.

''(c) REQUIRED PROVISIONS.—The regulations under subsection (b) shall include—

''(1) provisions under which an election to make designated Roth contributions may be made—

''(A) by any individual who is eligible to make contributions under section 8351, 8432(a), 8440a, 8440b, 8440c, 8440d, or 8440e; and

''(B) by any individual, not described in subparagraph (A), who is otherwise eligible to make elective deferrals under the Thrift Savings Plan;

''(2) any provisions which may, as a result of the enactment of this section, be necessary in order to clarify the meaning of any reference to an 'account' made in section 8432(f), 8433, 8434(d), 8435, 8437, or any other provision of law; and

''(3) any other provisions which may be necessary to carry out this section.''.

(b) CLERICAL AMENDMENT.—The analysis for chapter 84 of title 5, United States Code, is amended by inserting after the item relating to section 8432c the following:

''8432d. Qualified Roth contribution program.''.

SEC. 404. AUTHORITY TO ESTABLISH SELF-DIRECTED INVESTMENT WINDOW.

(a) IN GENERAL.—Section 8438(b)(1) of title 5, United States Code, is amended—

(1) in subparagraph (D), by striking ''and'' at the end;

(2) in subparagraph (E), by striking the period and inserting ''; and''; and

(3) by adding after subparagraph (E) the following:

''(F) a self-directed investment window, if the Board authorizes such window under paragraph (5).''.

(b) REQUIREMENTS.—Section 8438(b) of title 5, United States Code, is amended by adding at the end the following:

''(5)(A) The Board may authorize the addition of a self-directed investment window under the Thrift Savings Plan if the Board determines that such addition would be in the best interests of participants.

''(B) The self-directed investment window shall be limited to—

''(i) low-cost, passively-managed index funds that offer diversification benefits; and

''(ii) other investment options, if the Board determines the options to be appropriate retirement investment vehicles for participants.

''(C) The Board shall ensure that any administrative expenses related to use of the self-directed investment window are borne solely by the participants who use such window.

''(D) The Board may establish such other terms and conditions for the self-directed investment window as the Board considers appropriate to protect the interests of participants, including requirements relating to risk disclosure.

''(E) The Board shall consult with the Employee Thrift Advisory Council (established under section 8473) before establishing any self-directed investment window.''.

SEC. 405. REPORTING REQUIREMENTS.

(a) ANNUAL REPORT.—The Board shall, not later than June 30 of each year, submit to Congress an annual report on the operations of the Thrift Savings Plan. Such report shall include, for the prior calendar year, information on the number of participants as of the last day of such prior calendar year, the median balance in participants' accounts as of such last day, demographic information on participants, the percentage allocation of amounts among investment funds or options, the status of the development and implementation of the self-directed investment window, the diversity demographics of any company, investment adviser, or other entity retained to invest and manage the assets of the Thrift Savings Fund, and such other information as the Board considers appropriate. A copy of each annual report under this subsection shall be made available to the public through an Internet website.

(b) REPORTING OF FEES AND OTHER INFORMATION.—

(1) IN GENERAL.—The Board shall include in the periodic statements provided to participants under section 8439(c) the amount of the investment management fees, administrative expenses, and any other fees or expenses paid with respect to each investment fund and option under the Thrift Savings Plan. Any such statement shall also provide a statement notifying participants as to how they may access the annual report described in subsection (a), as well as any other information concerning the Thrift Savings Plan that might be useful.

(2) USE OF ESTIMATES.—For purposes of providing the information required under this subsection, the Executive Director may provide a reasonable and representative estimate of any fees or expenses described in paragraph (1) and shall indicate any such estimate as being such an estimate. Any such

estimate shall be based on the previous year's experience.

(c) DEFINITIONS.—For purposes of this section—

(1) the term ''Board'' has the meaning given such term by 8401(5) of title 5, United States Code;

(2) the term ''participant'' has the meaning given such term by section 8471(3) of title 5, United States Code; and

(3) the term ''account'' means an account established under section 8439 of title 5, United States Code.

SEC. 406. ACKNOWLEDGEMENT OF RISK.

(a) IN GENERAL.—Section 8439(d) of title 5, United States Code, is amended—

(1) by striking the matter after ''who elects to invest in'' and before ''shall sign an acknowledgement'' and inserting ''any investment fund or option under this chapter, other than the Government Securities Investment Fund,''; and

(2) by striking ''either such Fund'' and inserting ''any such fund or option''.

(b) COORDINATION WITH PROVISIONS RELATING TO INVESTMENTS IN THE ABSENCE OF AN ELECTION.—Subsection (d) of section 8439 of title 5, United States Code (as amended by subsection (a)) is further amended—

(1) by redesignating subsection (d) as subsection (d)(1); and

(2) by adding at the end the following:

''(2)(A) In the case of an investment made under section 8438(c)(2) in any fund or option to which paragraph (1) would otherwise apply, the participant involved shall, for purposes of this subsection, be deemed—

''(i) to have elected to invest in such fund or option; and

''(ii) to have executed the acknowledgement required under paragraph (1).

''(B)(i) The Executive Director shall prescribe regulations under which written notice shall be provided to a participant whenever an investment is made under section 8438(c)(2)(B) on behalf of such participant in the absence of an affirmative election described in section 8438(c)(1).

''(ii) The regulations shall ensure that any such notice shall be provided to the participant within 7 calendar days after the effective date of the default election.

''(C) For purposes of this paragraph, the term 'participant' has the meaning given such term by section 8471(3).''.

(c) COORDINATION WITH PROVISIONS RELATING TO FIDUCIARY RESPONSIBILITIES, LIABILITIES, AND PENALTIES.—Section 8477(e)(1)(C) of title 5, United States Code, is amended—

(1) by redesignating subparagraph (C) as subparagraph (C)(i); and

(2) by adding at the end the following:

''(ii) A fiduciary shall not be liable under subparagraph (A), and no civil action may be brought against a fiduciary—

''(I) for providing for the automatic enrollment of a participant in accordance with section 8432(b)(2)(A);

''(II) for enrolling a participant in a default investment fund in accordance with section 8438(c)(2)(B); or

''(III) for allowing a participant to invest through the self-directed investment window or for establishing restrictions applicable to participants' ability to invest through the self-directed investment window.''.

SEC. 407. CREDIT FOR UNUSED SICK LEAVE.

(a) IN GENERAL.—Section 8415 of title 5, United States Code, is amended—

(1) by redesignating the second subsection (k) and subsection (l) as subsections (l) and (m), respectively; and

(2) in subsection (l) (as so redesignated by paragraph (1))—

(A) by striking ''(l) In computing'' and inserting ''(l)(1) In computing''; and

(B) by adding at the end the following:

''(2) Except as provided in paragraph (1), in computing an annuity under this subchapter, the total service of an employee who retires on an immediate annuity or who dies leaving a survivor or survivors entitled to annuity includes—

''(A) for an employee who retires within 3 years after the date of enactment of this paragraph, ¾ of the days, and

''(B) for an employee who retires after 3 years after the date of enactment of this paragraph, the days

of unused sick leave to his credit under a formal leave system, except that these days will not be counted in determining average pay or annuity eligibility under this subchapter. For purposes of this subsection, in the case of any such employee who is excepted from subchapter I of chapter 63 under section 6301(2)(x)-(xiii), the days of unused sick leave to his credit include any unused sick leave standing to his credit when he was excepted from such subchapter.''.

(b) EXCEPTION FROM DEPOSIT REQUIREMENT.—Section 8422(d)(2) of title 5, United States Code, is amended by striking ''section 8415(k)'' and inserting ''paragraph (1) or (2) of section 8415(l)''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to annuities computed based on separations occurring on or after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Michigan (Mr. DINGELL) and the gentleman from Texas (Mr. BARTON) each will control 20 minutes.

The Chair recognizes the gentleman from Michigan.

GENERAL LEAVE

Mr. DINGELL. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and to insert extraneous materials on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Madam Speaker, I want to place the legislation we are about to consider in its proper historical context.

Fifty-one years ago, the Surgeon General first stated that tobacco smoking was linked to cancer.

Forty-three years ago, in 1965, tobacco products were for the first time required to carry labels warning of the health hazards to consumers who used them.

Fourteen years ago, the chief executives of the tobacco companies were summoned to appear before the Committee on Energy and Commerce to answer questions about their knowledge of the dangers to human health caused by tobacco and their reluctance or refusal to disclose what they knew.

Ten years ago, the tobacco companies entered into a master settlement with the attorneys general of the States, under which they would pay out billions of dollars to address the costs of smoking, amongst other purposes.

Today, the House will consider H.R. 1108, the Family Smoking Prevention and Tobacco Control Act. This landmark legislation will, for the first time, grant the Food and Drug Administration the authority to regulate tobacco products and to protect consumers on this particular, difficult matter.

It is hard to believe that 51 years after we first became aware of the harmful effects of smoking—and three years after a United Nations tobacco control treaty was enacted—the U.S. government has been unable to take the steps necessary to stem the tide of smoking. With this legislation, we can change that.

Cigarette smoking accounts for about one in five deaths annually, or about 435,000 deaths each year. Each day, more than 4,000 young Americans try a cigarette for the first time, and each day 1,000 of these become addicted to tobacco. One in every three of these smokers will die prematurely.

With this legislation, we will place sharp and sorely needed limits on access to tobacco products and on tobacco advertising and marketing.

Public health organizations have fought for this legislation for 20 years, and I want to commend in particular the Campaign for Tobacco-Free Kids, the American Lung Association, the American Heart Association, the American Cancer Society, and other of our colleagues in particular, Representatives WAXMAN, DAVIS and PALLONE, who deserve great credit for their diligence and persistence in bringing this legislation to the point where it is.

Passage of H.R. 1108 will stand as an historic achievement. I urge my colleagues in the strongest terms to vote for the health of America's children and to vote for the health of the American people.

I reserve the balance of my time.

Mr. BARTON of Texas. Madam Speaker, I yield myself such time as I may consume.

(Mr. BARTON of Texas asked and was given permission to revise and extend his remarks.)

Mr. BARTON of Texas. Madam Speaker, on the next bill, the Consumer Product Safety Commission reauthorization bill, I will be standing in this very spot saying extremely complimentary things about Chairman DINGELL, the process that he has used and that Speaker PELOSI has used to bring the Consumer Product Safety Commission reauthorization bill to the floor of the House of Representatives. But that's the next bill.

On this bill, I must say I still have the greatest personal respect for our distinguished chairman, Mr. DINGELL, and our subcommittee chairman, Mr. PALLONE, but I cannot say anything kind about the product of the legislation that they're bringing to the body today.

At the beginning of this Congress, Madam Speaker, our Speaker for the entire full House of Representatives, Speaker NANCY PELOSI said, ''Bills should generally come to floor under a

procedure that allows open, full and fair debate consisting of a full amendment process that grants the Minority the right to offer its alternatives.''

That's not the case with this bill, Madam Speaker. The final product that's before us was given to the minority at about 1:05 this afternoon, which is approximately 3 hours and 5 minutes ago. We did have a committee markup. We did have some process. We did have some hearings in Mr. PALLONE's subcommittee. We did have a legislative hearing on the bill, but once that was concluded, the bill disappeared into a sinkhole, only to reemerge today as a suspension bill.

As you know, Madam Speaker, suspensions are theoretically about noncontroversial items in which there is little controversy and no disagreement between Members of the body on either side of the aisle. It's not the case on this bill, Madam Speaker.

This bill will cost jobs in the agricultural sector. This bill has been so controversial that we, as I said earlier, didn't even get a work product until early this afternoon.

On the substance of the bill, I disagree with the central premise, that the Food and Drug Administration should have the authority under this bill that actually certifies that tobacco is a responsible product. Isn't that an ironic thing? This bill is, in my opinion, a marketing allocation bill more than it is a regulation bill.

The FDA does not have the resources to do this new responsibility. The FDA is not the tobacco police. The FDA should not be responsible for going into every convenience store and grocery store and tobacco shop in America making sure that the tobacco products are sold exactly as required.

I could go on and on. I could quote Chairman DINGELL and Subcommittee Chairman PALLONE and Chairman WAXMAN of the Government Reform Committee where in a letter they said back in January about how short the FDA was of resources. I'm not going to do that. I might put it in the RECORD, but I won't quote them at this time.

The FDA has only increased its total number of employees in the last decade by 646. Its appropriations in adjusted dollars is about $300 million less than the inflation-adjusted dollars that the FDA says it needs. Yet we're going to give the FDA another huge responsibility and not give them the resources to do the work that the bill says they should do.

If we really need to do more to restrict advertising for tobacco products or to prevent marketing to children, we can do that by going to other agencies that have that responsibility in the marketplace right now. If there should be more enforcement to prevent children from buying cigarettes because they're under age, we should bring a bill to the floor that would strengthen the Synar amendment, a former congressman from Oklahoma and a former member of the Energy and Commerce Committee.

We could certainly encourage States to actually use their master settlement agreement funds to do things like the smoking cessation programs. It's ironic to me that less than 30 percent of the funds that have been given to the States under the master settlement agreement are being used for anti-smoking campaigns. That would be one area where I think both sides of the aisle, Republicans and the Democrats, could have bipartisan agreement.

In short, Madam Speaker, what we don't need is creating at the FDA a new, Draconian bureaucracy since they're already overburdened and have more work than they know what to do with.

I do agree that cigarettes are bad for people's health. I have never smoked a cigarette. I don't allow smoking in my office. I don't take any kind of campaign funds from tobacco companies. So I do practice what I preach, Madam Speaker, but I do not believe that this bill addresses the underlying problem in a satisfactory way.

And for that purpose, I will strongly urge a ''no'' vote—again, since this is a suspension bill which on process alone, it shouldn't be but it is—it only takes one-third vote to defeat the bill.

□ 1615

That would be the perfect solution to this bill, would be to send it to the boneyard of other suspension bills that shouldn't be on the suspension calendar in the first place.

Madam Speaker, it is getting a little tiresome to keep saying here we go again, but here we go again.

Once again we come to the House floor to consider a major piece of legislation under suspension of the rules. Traditionally, we suspend the normal rules for things like naming post offices and other noncontroversial bills. For those watching on C–SPAN, suspension of the rules means limited debate and no amendments. We all remember that Speaker PELOSI told us that—and I'm quoting here—"bills should generally come to the floor under a procedure that allows open, full and fair debate consisting of a full amendment process that grants the minority the right to offer its alternatives." The reality has been different. Promise made, promise unmade.

Madam Speaker, this bill is hardly ordinary. Honestly noncontroversial bills do not require committee mark-ups that stretch over multiple days. Noncontroversial bills do not contain billion-dollar tax hikes. Noncontroversial bills do not cause working people to lose their jobs or their farms. In fact, the provisions of the bill were so controversial that the majority could not even produce a bill to be seen in public until this morning because they couldn't agree among themselves about what should be in it. Madam Speaker, handling legislation of this importance in this way is not the open and transparent process that was promised. It is the opposite.

Now, on the substance of the bill, I disagree with the central premise of the bill that the Food and Drug Administration should be given this responsibility. The FDA is tasked with protecting the safety of the food we eat, and ensuring the drugs we take, and the medical devices we use are safe and effective. It is an agency that we have held numerous hearings on and have come to a bipartisan conclusion that the agency lacks sufficient resources to do its current mission. Congress affirmed that conclusion when we appropriated an additional $150 million in the Emergency Supplemental Appropriations for the FDA. Speaker, the FDA is still the wrong agency, at the wrong time, to become the tobacco police. They need to focus on their current mission.

Here's what Chairman DINGELL, Chairman PALLONE and Chairman WAXMAN said about the current problem in a January 23, 2008 letter to FDA:

> Experts from every affected sector agree that this desperate funding situation has rendered FDA unable to protect the American public from even the most basic threats, including contaminated food, tainted and dangerous drugs, and faulty medical devices. According to FDA's own Science Board . . . American lives are now at risk.

FDA has plenty to do just to save those lives that are at risk. We, the Congress, have passed 125 laws over the last 20 years that directly impact FDA's regulatory responsibilities, yet our appropriated resources to the agency have not kept pace. During the same time period, FDA has only increased its total number of employees by 646 people; and its appropriations are about $300 million less now in inflation-adjusted dollars. We're pretty good at telling FDA what to do and how to do it, but not so good at paying for what we order. And here we go again. Instead of making it possible for FDA to do the jobs we've already given it, we are here today adding new regulatory responsibilities that dwarf any of those given to the FDA in the past two decades.

If we need to do more to restrict advertising or prevent marketing to children, we can find the right agency to do that. If there should be more enforcement to prevent children from buying cigarettes, we can strengthen the Synar amendment. The best way to reduce smoking is for States to use more of their Master Settlement Agreement funds on things like smoking cessation products. So let's talk about encouraging States to use more of their MSA funds for this purpose.

These are problems we can solve without creating a new, draconian bureaucracy at an already over-burdened agency that Members on both sides of the aisle agree needs to do a much better job at conducting its current mission.

Cigarettes are bad for people's health, period. Madam Speaker, if people believe there should be an increased Federal role in tobacco regulation, we can do better than this deceptive process and we can do better than this bill. I urge my colleagues to vote "no" and send a message that promises are meant to be kept.

With that, Madam Speaker, I reserve the balance of my time.

Mr. DINGELL. Madam Speaker, I yield to my dear and valued friend from West Virginia, the chairman of the Natural Resources Committee, 1 minute for the purposes of a colloquy.

Mr. RAHALL. Mr. Chairman, thank you very much for yielding. I want to thank you for the very accommodating and congenial manner in which you have accommodated the interests and the jurisdiction of the House of Natural Resources Committee on this issue.

I would like to ask the distinguished chairman, the gentleman from Michigan, a question about the provision of the bill that requires the FDA, to the extent feasible, to enter into contracts with States for the inspection of tobacco retailers within their borders. It is my understanding that this contracting provision applies to Indian tribes in the same way as the provision applies to States.

I would yield to the distinguished chairman to clarify.

Mr. DINGELL. My good friend from West Virginia is correct. The FDA is required in the legislation, to the extent feasible, to enter into contracts with Indian tribes for the inspection of tobacco retailers located on Indian lands.

Mr. RAHALL. I thank the distinguished chairman.

Mr. DINGELL. I thank my good friend.

Mr. BARTON of Texas. Madam Speaker, I want to yield 1 minute to our distinguished minority leader from the Buckeye State of Ohio (Mr. BOEHNER).

Mr. BOEHNER. Let me thank my colleague for yielding and say to my colleagues that we don't have time to have a vote this week on our All-American Energy Plan that would actually bring down gas prices in America, but we've got time to regulate tobacco.

Now this bill has been hanging around here for 15 years. For 15 years, we've been trying to move this piece of legislation. We're going to charge the tobacco companies about $5 billion over the next few years to pay for a bureaucracy here in Washington so we can regulate tobacco.

Now, listen. Most of my colleagues know that I smoke. I know that smoking is probably not good for my health. Most people who smoke in America know that smoking is probably not good for their health. Do we need the Federal Government to tell us? Do we need to spend $5 billion of smokers' money for the government to tell us that smoking is not good for us? I don't think so. This bill has not been through the legislative process as everything was promised that it should be. Frankly, the whole idea that the Federal Government ought to regulate more and more and more of our lives just gets under my skin.

I have great respect for my colleague from Michigan. He is a great Member of Congress, and we've worked together on a lot of issues, but this is a boneheaded idea. I mean, how much is enough? How much government do we need? More and more and more. There is not a smoker in America who doesn't understand that smoking isn't good for you, but now we're going to have the Federal Government, a big agency, set up under this bill where the FDA is going to be required to have this whole bureaucracy. It will have all of these new buildings. It will hire all of these people to issue all of these regulations that the tobacco companies are going to have to comply with and that smokers will pay for so that we can, out of all of this, understand that smoking is not good for you.

We've already got labels on cigarettes. You've got some companies that might as well put a billboard on a pack of cigarettes so that you know that it's bad for you. I can imagine what will happen after we get more government regulations on this issue. I would just ask my colleagues: How much is enough? How much regulation and how much government and how much bureaucracy do we need before we finally say, Enough is enough? Let's stop. Let's vote against this bill.

Mr. DINGELL. Madam Speaker, I yield myself 15 seconds for the purpose of responding to my beloved friend, the minority leader.

This legislation is on the floor because people are killing themselves by smoking these evil cigarettes. The distinguished gentleman, the minority leader, is going to be amongst the next to die. I am trying to save him, as the rest of us are, because he is committing suicide every time he puffs on one of those things.

Mr. BOEHNER. Would the gentleman be kind enough to yield?

Mr. DINGELL. I didn't yield to the gentleman.

The SPEAKER pro tempore. The time of the gentleman from Michigan has expired.

Mr. DINGELL. At this time, Madam Speaker, I yield 2 minutes to my good friend from New Jersey (Mr. PALLONE).

Mr. PALLONE. Madam Speaker, I couldn't agree more with what Mr. DINGELL said, but I do also want to point out to the minority leader that this is about kids.

In fact, many adults smoke, and I'm sure they're very much aware of what they're doing. I suppose you could argue that, if people want to kill themselves and they're adults, then let them do so, but every day, approximately 4,000 kids, children, try a cigarette for the first time, of which 1,140 become new daily smokers.

According to my calculations, this means that since 1996 almost 5 million children have become tobacco addicts and that one-third of those kids will end up dying prematurely from tobacco-related illnesses.

So I say to the minority leader: Forget about the adults for the time being. We've got to stop the kids who are not aware and who don't understand the dangers of tobacco. They shouldn't start smoking. I think that's really what this is all about. This is a very important day, and I do resent the fact that the minority leader is belittling it by saying this is a boneheaded idea.

I want to thank Mr. WAXMAN. He has been at this for I don't know how many years—12, 15, 20 years.

Twelve years after the FDA first published a comprehensive rule that would protect children from the harmful effects of tobacco, we are finally one step closer to actually implementing its provisions and protecting millions of Americans, and particularly the children, from a lifetime of addiction and of poor health.

Madam Speaker, it's hard to believe that tobacco products are exempt from the basic health and safety regulations that apply to other consumer products, but in fact, they are. Presently, the FDA is prohibited from regulating tobacco products, one of the most dangerous products available to consumers, and that's why we have to act today. Imagine that the FDA regulates toothpaste but not cigarettes. They monitor cereal but not chewing tobacco. Ironically, the FDA regulates both over-the-counter and prescription medications to help people quit smoking; yet it has no authority over the cause of the addiction. By passing this bill today, we're one step closer to changing all of that.

In closing, I just want to say that this is a very important bill, and I urge its passage.

The SPEAKER pro tempore. Without objection, the gentleman from New Jersey (Mr. PALLONE) will control the balance of the majority's time.

There was no objection.

Mr. BARTON of Texas. I would yield to the gentleman from Indiana (Mr. BUYER), a member of the committee, for a unanimous consent request.

(Mr. BUYER asked and was given permission to revise and extend his remarks.)

Mr. BUYER. Madam Speaker, I rise in opposition to this bill.

As we discuss H.R. 1108, the Family Smoking Prevention and Tobacco Control Act, the question before the House is not whether we want to decrease youth smoking as the bill is purported to do. The question is, after years of headlines and alarming stories about the FDA's failure to protect our Nation's food and drug supplies, do we in Congress believe that the FDA is in a place to take on a multi-billion dollar tobacco industry?

I believe that each one of us agrees that the FDA is under-funded and cannot perform its current functions. Over the past 2 years, this Congress has spent enormous amounts of time negotiating legislation to reauthorize programs such as the Prescription Drug User Fee Act and the Medical Device User Fee Act. Not only did we reauthorize the programs as they existed, but we added to these programs and increased the FDA's workload.

In the past several months, there have been numerous hearings in the Energy and Commerce Committee to try to determine what needs to be fixed at the FDA so that we can assure the American people that their food, their drugs, and their medical devices are safe.

Unfortunately, we all understand the realities that exist within the FDA. Foreign drug manufacturing facilities are mostly going uninspected by the FDA, and the inspections that take place are not effective. FDA's surveillance over the drugs on our market today is not where it should be. Bad actors are getting into our drug supply chain and diverting good drugs out of the supply chain and bad drugs into the chain. Hundreds of thousands of unregulated and potentially harmful drugs

are streaming into our country's international mail facilities every day and being sent to American homes with no FDA inspection or testing whatsoever. And, these problems only cover the problems with FDA's oversight over our Nation's prescription drug supply. We could go on about the problems that exist with our Nation's food supply.

It is important that we look back at our discussions over the past year in this Congress and the discussions that we have before us over the FDA's lack of resources and ability to fulfill the duties that we have vested in the Agency.

Every morning when I pick up the paper there is a new article about the dangers facing our country due to an underfunded and ill-equipped FDA. A few recent headlines have read:

''FDA inspections lag in overseas drug factories.''—Washington Times (2/28/08)

''FDA Chief is in a Budget Bind.''—WSJ (2/27/08)

''FDA Needs $375 million more to address shortcomings.''—Congress Daily (2/27/08)

In fact, just this morning in an article in the Wall Street Journal, the Chairman of the Energy and Commerce Committee is quoted as saying, ''There's a total inability of the FDA to carry out its mission.''

Many of my colleagues on the Energy and Commerce Committee have been vocal about the FDA's ineffectiveness in recent congressional testimonies.

The FDA is ''a sorry mess.''—Chairman DINGELL (7/17/07)

''The warning signs are clear: FDA is an agency in crisis.''—HENRY WAXMAN (author of the tobacco bill) (5/5/07)

''Unfortunately, as this Committee under both Republican and Democrat leadership has documented, FDA's resources have become woefully inadequate given the agency's expansive mission. Accordingly, the agency's ability to protect American families from unsafe foods, drugs, medical devices, and other products has radically deteriorated.''—BART STUPAK (1/29/08)

Despite these strong statements, these very members want to put a multi-billion dollar industry under an Agency that is not adequately performing its current functions.

The FDA itself has expressed its concerns about being mandated to regulate tobacco. The current FDA Commissioner, Andrew von Eschenbach, outlined his concerns in a recent letter to Members of Congress. Commissioner von Eschenbach wrote, ''Enactment of H.R. 1108 would redirect Agency priorities and resources to a new regulatory area, which is not only inconsistent with FDA's mission, but also diverts attention from the significant public health matters of the safety of food, drugs, biologics and medical devices.''

And, if I remember correctly, none of the last few FDA Commissioners has supported FDA regulating tobacco.

Madam Speaker, I ask that we all think long and hard about that one big question before us today. Is the FDA ready to take on this multi-billion dollar industry in the midst of the challenges already before the Agency today?

I agree that we need to keep tobacco out of the hands of our youth. I agree with the statistics that show that people become addicted to tobacco while they are in their youth. I am concerned about the growing prevalence of disease and death attributable to tobacco in our country.

However, I believe that we have means to increase enforcement in our States to keep tobacco out of our children's hands. We do not need a new government bureaucracy which will inevitably be underfunded and ill-equipped to effectively regulate the tobacco market.

Mr. BARTON of Texas. I now want to yield to the distinguished tri-captain of the victorious congressional Republican baseball team, the gentleman from Virginia (Mr. DAVIS), 1 minute.

Mr. DAVIS of Virginia. Could I have 1 minute from the other side as well?

Mr. PALLONE. Madam Speaker, I yield 1 minute to the gentleman from Virginia.

The SPEAKER pro tempore. The gentleman from Virginia is recognized for 2 minutes.

(Mr. DAVIS of Virginia asked and was given permission to revise and extend his remarks.)

Mr. DAVIS of Virginia. Four hundred thousand Americans die every year from tobacco-related diseases. That's why we're here today.

For the past 8 years, I've sought to pass legislation like this, giving the FDA authority to regulate tobacco. For the past 6, my good friend and esteemed colleague HENRY WAXMAN and I have partnered on legislation to this end. Today's hopeful passage of H.R. 1108 marks a milestone in our efforts, and I'm honored and proud to be here with him and with the distinguished chairman of the committee to take this vital step in protecting the public health.

In my view, the primary focus of our tobacco control policy should be to stem the flow of new tobacco users. Regrettably, this equates to keeping children away from tobacco since most of the new users are under the age of 18. Among this group, tobacco use has become synonymous with a rugged independence, of a refutation of authority and of an arrogant disregard for one's personal well-being—the traits that many teenagers desire.

How did this most self-destructive behavior, short of actual suicide, take hold in the collective psyche of our young people?

In large part, the marketing tactics by tobacco manufacturers fanned the flames of youthful angst. The entertainment industry added further fuel with innumerable cigarette-smoking heroes on movie screens and on television. If only the Marlboro Man had been holding a slide rule instead of a cigarette.

H.R. 1108 gives the FDA appropriate tools to restrict marketing and access so that children will have less interest in tobacco and less ability to purchase it. Tobacco can be more addictive than heroin, so it is important that the tobacco policy espoused in this legislation also addresses the needs of current users. It calls on the Secretary to closely examine innovative products that would help users end their dependence. I'm hopeful the result will be the expedited approval of cessation products and of a more vibrant market for them. H.R. 1108 also allows for the development of modified risk products.

I urge the adoption of this legislation.

Mr. PALLONE. Madam Speaker, I yield 3 minutes to the sponsor of the legislation, who has worked tirelessly on this for so many years, Mr. WAXMAN.

Mr. WAXMAN. I thank the gentleman for yielding to me.

Madam Speaker, this is truly an historic day in the fight against tobacco, but it took us far too long to get here.

In 1994, the tobacco executives stood before my subcommittee, held their hands up, swore to tell the truth, and then immediately lied under oath and said, ''Nicotine, it's not addictive. Children, we don't try to market to children.'' Of course, the opposite was true.

In 1996, the FDA tried to regulate tobacco products, but the Supreme Court told them they needed specific congressional language to give them that authority. Now, 12 years later, here we are, finally giving the FDA that authority to regulate the leading preventable cause of death in America.

Every one of us knows the tragic consequences of cigarette smoking. We've seen loved ones die, suffer. We've watched others grow sick. Many of us have felt the grip firsthand of addiction, but the worst of all is what happens to children. One thousand children start smoking each and every day. Four hundred thousand Americans die every year.

The minority leader said: When is enough enough?

Well, cigarettes, one of the most dangerous products on sale today, is not regulated at all. This bill would give the FDA, the only agency with the right combination of scientific expertise, with regulatory experience and with a public health mission, the ability to oversee the products effectively.

The FDA can stop that marketing to kids. They can prevent manufacturers from misrepresenting their products as ''light'' or as ''safer.'' They can require changes in cigarettes. They can change the level of nicotine so that people who smoke and who want to give up smoking will have a fighting chance. They can regulate ingredients such as formaldehyde or benzene or radioactive elements or any other deadly chemical.

Now, some have argued that the FDA is overburdened, that they can't do another job. Well, they are overburdened, and they're not well funded, but this bill has a user fee built into it to raise the money from the tobacco companies to give the FDA the ability to go and regulate this product.

The breadth of support for this bill is from the AARP to the American Academy of Pediatrics and from the Southern Baptist Convention to the Islamic Society of North America. It is supported by the American Lung Association, by the American Heart Association and by the American Cancer Society—the groups that are best situated to understand the damage caused by

tobacco. We've tried to accommodate specific concerns we've heard about this bill to provide fairness and flexibility for convenient stores and for others.

Join in support of this legislation. It is a bipartisan bill, and I urge its adoption.

Mr. BARTON of Texas. Madam Speaker, can I inquire as to the time on each side that is remaining, please.

The SPEAKER pro tempore. The gentleman from Texas controls 12 minutes, and the gentleman from New Jersey controls 9½ minutes.

Mr. BARTON of Texas. Madam Speaker, I wish to yield 2 minutes to the distinguished gentleman from North Carolina (Mr. COBLE).

Mr. COBLE. I thank the gentleman from Texas.

Madam Speaker, during my tenure in Congress, I have consistently opposed granting the Food and Drug Administration the authority to regulate tobacco. As I have stated on many occasions, I believe allowing the FDA to regulate tobacco in any capacity would inevitably lead to the FDA's regulating the family farm.

□ 1630

Let's be candid, Madam Speaker; should the FDA spend its time regulating tobacco on the farm and in manufacturing facilities, despite warnings on cigarette labels which alert consumers to their danger, or should it focus on the core mission of ensuring the safety and soundness of our food, drugs and cosmetics?

I also have concerns with the impact this legislation would have upon tobacco manufacturers and their employees. These companies employ many hardworking, diligent working North Carolinians, and I believe the FDA regulation of tobacco would negatively affect these manufacturing jobs.

Finally, Madam Speaker, taxing tobacco companies to fund additional regulation and avoid PAYGO problems is ill-conceived and will create an incentive, in my opinion, for black market activity such as counterfeiting and smuggling.

Madam Speaker, this legislation is misguided and, in my opinion, will not achieve the goals identified by proponents. Indeed, I believe it will further exacerbate an already stretched FDA, negatively impact manufacturers and farmers, and create a strain on Federal revenues to the Treasury. I adamantly oppose the measure and urge my colleagues to do the same.

Madam Speaker, tobacco is a product that is lawfully grown, lawfully marketed, lawfully manufactured and lawfully consumed. We don't need the FDA inserting its oars into these waters.

Mr. PALLONE. Madam Speaker, I would like to recognize the gentlewoman from the Virgin Islands, but I do have to remark that it is wonderful to see our colleague, BOBBY RUSH from Illinois, back here today. Thank you for being with us today.

I yield 1 minute to the gentlewoman from the Virgin Islands.

Mrs. CHRISTENSEN. Madam Speaker, first I want to thank Chairman DINGELL, Chairman PALLONE and Chairman WAXMAN for your leadership and for working with us on the CBC to address some of our concerns about the bill.

Colleagues, we've heard and read of all the methods and additives tobacco companies have allegedly used to target young people and communities, particularly African Americans and Hispanics, as well as to increase the likelihood of addiction. We also know that tobacco is the leading cause of death in this country, with or without menthol.

I rise in strong support of H.R. 1108 because we will finally end these practices and put in place the strongest standard for product regulation ever, as well as a mechanism for funding to support research and enforcement.

Madam Speaker, this bill does not contain everything that all of us wanted, but it is supported by the public health community because it is the important first step we must take in order to get to the point where products like menthol, that we believe may injure the health of minorities and others, will no longer be available.

I urge all of my colleagues to vote ''aye'' and the President to sign this bill so that we can move forward, after long years of trying, to finally protect the health of our constituents. And I will place in the RECORD a statement by the CBC.

We, the undersigned members of the Congressional Black Caucus, issue the following statement:

Recognizing the difficulty in getting a bill which would garner the sufficient votes in the House and Senate for passage, we the members of the Congressional Black Caucus stand firmly with the Public Health Community in support of:

The strongest standard for product regulation ever given to the FDA (stronger than food, drugs or medical devices);

Barriers to and serious consequences for those who try to market and sell to children;

The banning of additives used to manufacture flavored cigarettes, which are marketed to children and which are used to get children of ALL racial and ethnic backgrounds addicted to cigarettes in the first place;

A faster track for the development of smoking cessation and nicotine-replacement therapies; and

The authority for greater regulation—including of menthol—in the future.

And the other provisions of H.R. 1108.

Taking into consideration the disproportionate rates of cancer in the African-American community and the high use of menthol in our community, and given the fact that an attempt to ban menthol has already been offered and failed, we feel that this important first step which gives the authority to the Secretary to ban menthol and speeds up the research recommendations and report of the Scientific Advisory committee, is worthy of our support.

The Congressional Black Caucus has a long history in promoting smoking cessation programs in our community and will continue to make this a priority both as a Caucus and through partnership with the Congressional Black Caucus Foundation.

Our objective has been and will always be the well-being of the African-American community, other communities of color and all Americans. With our support for H.R. 1108 we continue this proud tradition.

Banning menthol and regulating tobacco are priorities for the CBC. We are pleased with the leadership role we assumed to accomplish both because this bill, which regulates tobacco, also represents a giant first step toward the elimination of menthol.

Mr. BARTON of Texas. Madam Speaker, I wish to recognize a distinguished Member from the great State of North Carolina, a great former professional quarterback, member of the Democratic baseball team, Mr. SHULER, for 1 minute.

Mr. SHULER. I thank the gentleman from Texas.

Madam Speaker, I rise in strong opposition of this legislation. I don't smoke, and I never have. I'm a father of two small children. You won't find a bigger opponent of tobacco use in this Congress.

I have a great deal of respect for Chairmen WAXMAN, DINGELL and PALLONE. I respect their hard work, and I share the dedication they have to reducing smoking, especially among teenagers. But giving FDA approval to tobacco is not the answer.

The FDA Commissioner testified that he has ''serious concerns that this bill will undermine the public health role of FDA.'' And the FDA Science Board said that ''FDA's inability to keep up with scientific advancements means that American lives are at risk.''

The FDA is dangerously overworked. Recently, the FDA shut down the entire domestic tomato industry. We've had listeria in frozen strawberries, E. coli in spinach and lettuce.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BARTON of Texas. I give the gentleman an additional 1 minute.

Mr. SHULER. Salmonella in peanut butter, and poison in pet foods.

Now, I have a lot of respect for the men and women who work at the FDA, but I clearly feel that they are overworked and overburdened and have so much on their plate. We should listen to the people that are working at the FDA. We should not pile more work upon them. This bill is hazardous to your health, whether you smoke or not.

Mr. PALLONE. Madam Speaker, I yield 2 minutes to the gentlewoman from California (Mrs. CAPPS).

Mrs. CAPPS. Madam Speaker, I rise in strong support of H.R. 1108. This bill is about bringing smoking prevention and cessation efforts into the 21st century.

We have known for a long time about the health dangers—in fact, the life-threatening dangers—posed by tobacco use. Nobody uses tobacco because they think it's good for their health. What this bill does is to take the necessary steps which will most effectively help people quit, and most importantly, help them never to begin.

One of the ways that goal is accomplished through this legislation is by

giving greater authority to the Food and Drug Administration to regulate the advertising and marketing of tobacco products. By prohibiting the targeted marketing of tobacco products to children, we can help prevent countless young people from falling prey to deceptive advertising, the kind that describes smoking with the same adjectives used to describe candy and perfume, with the many enticing qualities.

Now, some of the bill's opponents may try to say the FDA is ill-equipped to do this. I just want to remind my colleagues that this bill provides the FDA new resources to handle tobacco regulation, and it's based upon a plan the agency itself devised over a decade ago.

I want to thank many colleagues who have worked tirelessly over years to bring us to this moment on this floor. I want to thank Mr. WAXMAN for his tireless leadership. I want to thank the leadership of our committee, Mr. PALLONE, and most particularly our esteemed chairman, for whom this day will mark a very special moment and milestone.

I urge all of my colleagues in this House to vote in favor of H.R. 1108.

Mr. BARTON of Texas. I yield 1 minute to the distinguished deputy whip from the great State of Virginia (Mr. CANTOR).

Mr. CANTOR. I want to thank the gentleman from Texas.

I also want to thank the gentleman from California, the gentleman from Virginia (Mr. DAVIS) and the gentleman from Michigan (Mr. DINGELL) for their cooperation with me and my office on this bill.

As our minority leader said, the scientific community as well as the general public is pretty well steeped in the dangers of smoking. I think all of us can agree it's a legitimate public policy to want to reduce the rate of smoking with our children. This bill, though, in addition to doing some of that, some of the aim behind it is to allow for it to pave the way and in fact to encourage legitimate attempts to make tobacco and tobacco products less harmful. The net result to all of us will be to increase the health outlook for consumers of tobacco and its products.

This bill is particularly meaningful to my district, as there are over 6,000 direct jobs related to the tobacco manufacturing. And there has been significant investment in my district and in the area from where I come made towards the research and development on how we make this product less harmful.

Mr. PALLONE. Madam Speaker, I yield 2 minutes to the gentlewoman from California (Ms. HARMAN).

Ms. HARMAN. Madam Speaker, I applaud my chairman, the bill's sponsors, and the bill's many supporters on a bipartisan basis for bringing such important legislation to the House floor today.

Madam Speaker, this bill is personal for me. Both of my parents are part of the statistics; both of them died from lung cancer from smoking.

As a mother of four and a grandmother of three so far, I am relentless in urging that they and everyone else's kids and grandkids not acquire this horrible addiction.

In California, 138,000 children try a cigarette for the first time each year, and more than one-third of them become regular daily smokers. Some will die as my parents did, slowly and painfully. In my mother's case, though she knew of her dire health prognosis, she never quit smoking.

I think this bill sets the right balance. It's probably as much as we can get through Congress—if we can get it through—at this time, though I would support more and will support more in the future.

The bill reinstates an FDA rule that restricts tobacco marketing and sales to children. In today's consumer culture, children are most vulnerable to attractive marketing campaigns. Tobacco's campaign has been very successful.

The bottom line is we need to put a stop on creating new tobacco users. The bill also requires enhanced labeling of health warnings on product packaging. More effective labeling will better educate the public on the dangerous consequences of tobacco. Given the state of our economy, it is foolhardy to load on health costs that we know—as even the bill's opponents have said—come from those addicted to smoking.

California spends almost $10 billion treating tobacco-related diseases each year. This is critical funding that we need elsewhere.

With the passage of the legislation today, we can prevent this. I urge an ''aye'' vote.

Mr. BARTON of Texas. Madam Speaker, I yield 2 minutes to the gentlelady from the committee, Mrs. BLACKBURN of Tennessee.

Mrs. BLACKBURN. Madam Speaker, I rise today in opposition to the bill. And I will tell you, I have great respect for the chairman and the author of the bill, but I respectfully disagree with them on this issue.

I've also served as an active volunteer with the Lung Association and with the Cancer Society and have worked diligently to stop teen smoking, but I disagree with the approach that is being taken here today.

Rather than forcing the ill-equipped FDA to regulate tobacco products, Congress should strengthen existing programs to prevent illegal tobacco use. And now the gentleman from Texas mentioned the Synar program. And I have had a piece of legislation, H.R. 5513, the Stop Adolescent Smoking Without Excessive Bureaucracy Act, that is a better solution and I think a better approach. It strengthens the existing work that the States and localities are doing to reduce underage tobacco use. It is an effective existing program.

My bill directly impacts youth access to tobacco products, which gets to the very root of the public health crisis that is brought about by the addiction of tobacco.

According to a recent Zogby poll, a majority of Americans, 82 percent, believe FDA control of tobacco would conflict with their core mission to secure the Nation's food and drug supply. And Madam Speaker, at a time when people are concerned about imported and domestic food, imported and domestic drugs, medical devices, and more, it is important that the FDA focus on that mission.

Consumers believe FDA product approval equals safety. And here we are talking about moving FDA control of tobacco and tobacco products and giving that the FDA seal of approval. I think that is a step we do not want to take.

Mr. PALLONE. Madam Speaker, I yield 30 seconds to the gentleman from California.

Mr. WAXMAN. I don't want anybody to be misled. The FDA will not give a seal of approval to any tobacco product they cannot in any way claim is safe or effective. So I think that the last statement that was made by the gentlelady is an incorrect one, and I wanted to correct that point.

Mr. BARTON of Texas. Madam Speaker, I yield for the purpose of unanimous consent to the distinguished gentleman from Connecticut.

(Mr. SHAYS asked and was given permission to revise and extend his remarks.)

Mr. SHAYS. I thank the gentleman for yielding.

Madam Speaker, I rise in support of this legislation.

I rise in support of H.R. 1108, the Family Smoking Prevention and Tobacco Control Act.

I appreciate the willingness of MR. WAXMAN to incorporate changes and address concerns that were raised about the bill as it was initially introduced, and for the work both he and Mr. DAVIS have done to bring this bill to the floor today.

The simple fact is our society as a whole is negatively impacted by smoking, and more needs to be done to curb smoking among our youth.

Bringing tobacco under the authority of the FDA will help ensure the laws on our books are enforced and will help ensure information about the dangers of smoking is adequately disseminated.

In the past, I have opposed FDA regulation of tobacco, believing that oversight should be conducted instead by an agency such as the Substance Abuse and Mental Health Services Administration (SAMSHA).

The FDA already has too many products under its jurisdiction and has trouble responding in a timely and effective manner as a result.

I have always believed, however, that tobacco should be regulated, and with the support of a diverse group of organizations, H.R. 1108 has a real opportunity to become law and the potential to significantly limit the damaging effects smoking has on our society. I urge its adoption.

Mr. BARTON of Texas. Madam Speaker, I yield 1 minute to the distinguished gentleman from Coppell, Texas and Flower Mound, Texas (Mr. MARCHANT).

Mr. MARCHANT. Madam Speaker, I am disappointed—and the people of the 24th District of Texas are disappointed—by the continued misuse and abuse of the suspension calendar. Once again, Democrats bring to the floor a bill that prohibits Members from offering amendments. This comes at a time when we could be working on a comprehensive energy bill that would do far more to benefit the American people.

Energy should have been our highest priority this summer, but instead I'm afraid that Congress will leave for a five-week recess without considering real solutions to the energy crisis.

□ 1645

When is the Democratic leadership going to put the concerns of the American people before their desire to placate the radical environmentalists?

Mr. PALLONE. Madam Speaker, I yield 2 minutes to the gentlewoman from Colorado (Ms. DEGETTE).

Ms. DEGETTE. Madam Speaker, I rise today to thank my intrepid chairman, Mr. DINGELL, and also Mr. WAXMAN, for their unfailing commitment to the public health of Americans. This bill is a good bill. When I first came to Congress, now 12 years ago, it seemed to be a bill far outside our reach.

We had a number of hearings in those days, in which the tobacco manufacturers denied even that tobacco was addictive. To come from there to here is truly an extraordinary achievement, and I think we all agree that tobacco should be regulated by the FDA.

One concern I still have in this bill is tobacco is illegal now for people under the age of 21. We all have seen through testimony throughout the years that the people who get addicted to tobacco tend to do so at an early age, and tobacco manufacturers have targeted young people consistently.

I'm afraid that if the manufacturers say that they are targeting only adults, that what will happen will be they in fact will target young people, who will become addicted. That is why I was very pleased to include a provision in this law that directs the Secretary of Health and Human Services to conduct a study on the public health implications of raising the minimum age to purchase tobacco products. This report will be in to us within 5 years and we can see if there's more that we can do to protect our vulnerable young people from becoming the targets of advertising an improper addiction to tobacco.

Madam Speaker, this truly is a great day for the health of Americans. I want to commend my chairman again.

Mr. BARTON of Texas. Madam Speaker, I have no other speakers other than my close. I am going to reserve the balance of my time at this time.

Mr. PALLONE. Madam Speaker, I yield now 2 minutes to the gentleman from Maryland (Mr. VAN HOLLEN).

Mr. VAN HOLLEN. I thank my colleague, Mr. PALLONE, for his leadership, and Chairman DINGELL and the Energy and Commerce committee, Mr. WAXMAN, and so many others, who have brought this legislation to the floor, finally, after so many years and so many battles. This is a very important day for the American people.

The Food and Drug Administration, as we know, has the power to regulate and oversee all sorts of products that are sold today; many that are not addictive. Yet we have always had this big hole in that regulatory authority when it came to very addictive products of nicotine and the tobacco products.

On those issues, the FDA has been sidelined, and the result is the big tobacco companies have taken advantage of that opportunity and exploited it and they have marketed these tobacco products to generation after generation of young people through flavored cigarettes and tobacco products and on all sort of things. In fact, when you think about it, they have got to do that. In order to continue to make a profit, they have got to continue to hook one generation after another.

It's great that we are finally gathered here today to say to the FDA: You do have authority over this very important area. Let's make sure that future generations of young people do not get addicted. This has a huge cost to our society, obviously in dollars, but even more importantly, the people who die every year as a result of this. We have an opportunity today to begin to put an end to that cycle.

I am very proud that in our State of Maryland we have made progress on this on a State basis. We have tried to increase the tobacco tax to reduce tobacco use among young people and use those proceeds for health purposes. But you can't have every State fighting alone to have a successful national program. You need one entity that has this power to help protect the American people, especially the young people of this country.

I thank the committee for its leadership.

Mr. BARTON of Texas. Madam Speaker, I would assume the majority has got the right to close, so I am just reserving until they are ready to close.

Mr. PALLONE. I have no remaining speakers, Madam Speaker. How much time remains on this side?

The SPEAKER pro tempore. Thirty seconds.

Mr. PALLONE. I will reserve the 30 seconds.

Mr. BARTON of Texas. Don't I have 4 minutes?

The SPEAKER pro tempore. The gentleman from Texas controls 4½ minutes.

Mr. BARTON of Texas. I would be happy to yield a minute and a half of my time to the majority so that they have 2 minutes and I have 2½ minutes, if that would help.

Mr. PALLONE. Let me thank the ranking member of the full committee for the time. I have no remaining speakers, and will reserve the balance of my time to close, Madam Speaker.

Mr. BARTON of Texas. I am going to recognize myself for the balance of my time.

The SPEAKER pro tempore. The gentleman from Texas is recognized for 2½ minutes.

Mr. BARTON of Texas. I want to point out a couple of things. This bill does not ban tobacco. Most of the rhetoric on the other side has, rightfully so, been about the evils of tobacco. But the bill before us doesn't ban tobacco. In truth, what the bill before us does is allocate market share of the existing marketers of tobacco in the United States. It also sets up a huge regulatory machine at FDA, where the Food and Drug Administration literally has to go into every convenience store apparently in America and make sure that certain displays are at a certain eye level and all this kind of thing.

It bans, as I understand it, flavored cigarettes, except for menthol, in which it requires a study of menthol cigarettes to be reported by a date certain, which I think is 1 year. And then, in order to pay for this huge new bureaucracy that has to be created for the tobacco police, it sets up some sort of a gimmick in the Tax Code for people to choose between a thrift savings account and a Roth IRA. If you invest in a Roth IRA, you pay taxes before you put the money in the account. If you decide to invest in a thrift savings account, you don't have to pay taxes until you take the money out of the account.

Somehow, and we don't know much about this because we only got the bill with this section about 3 hours ago, there's something in there that they think scores about $2 billion over 10 years because more people will opt to take the Roth IRA, where they pay taxes up front.

Last, but not least, Madam Speaker, it sets up some sort of a records inspection for the Secretary of HHS to go in and look at the records to make sure that tobacco products are not smuggled or counterfeited unless those tobacco products are sold on Indian lands, in which case the Indian tribe has the right to opt out of that, which I think is going to set up a huge loophole because my guess is that the Indian tribes, not being foolish, are going to obviously opt out of Federal regulation of this inspection program.

In short, this is a bill that, while noble in intent, is very flawed in implementation. It shouldn't be on the suspension calendar. It shouldn't have come up only 3 hours before it's debated.

We should vote this bill down. If you really want to do something about tobacco products, let it go through the

regular process. I would urge a ''no'' vote on the pending legislation.

I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman from New Jersey is recognized for the remaining 2 minutes.

Mr. PALLONE. Thank you, Madam Speaker.

I just want to stress in closing that this really is a bipartisan bill that is supported overwhelmingly by both sides of the aisle. I have had the opportunity under the auspices of Tobacco-Free Kids, which is one of the big supporters of this bill, to go to an elementary school in my district one day recently. And I found out that the kids there were all from fifth grade down. It was incredible to me to realize that some of them had already started to smoke and they were very much unaware of the fact of the dangers of tobacco.

That was really a revelation for me that day, to realize that there are a lot of children at a very young age that start smoking that are unaware of the dangers, even with all the declarations and disclaimers that are out there.

So I really think that this legislation that we are passing today is for the kids. It for those children who will stop or never, hopefully, have the opportunity or think about smoking because they will realize how dangerous it is because it's now regulated by the FDA.

I just want to thank Mr. WAXMAN; I know he has worked for many years on this, and Mr. DINGELL and so many on both sides of the aisle because I think they recognize while it may be true that a lot of adults know what they are doing when they smoke, and they do it regardless of the health impact, that really what we need to address are those kids that start smoking at a young age, that become addicted, that are not aware of the perils, and then later just simply can't stop.

So I would urge all of my colleagues. This is a very historic day. This is a very important piece of legislation. Let's pass it overwhelmingly today on a bipartisan basis.

Mr. LEVIN. Madam Speaker, I rise in strong support of H.R. 1108, the Smoking Prevention and Tobacco Control Act. I urge the House to vote in favor of this legislation, which takes critical steps to protect the public, especially minors, from the dangers of tobacco use.

According to the American Heart Association, cigarette use is the number one preventable cause of poor health and premature death worldwide. It is estimated that smoking causes one in five deaths in the United States, or approximately 400,000 premature deaths per year.

Despite laws in every state prohibiting the sale of cigarettes to minors, the U.S. Surgeon General estimates that young people ages 12 to 17 continue to purchase and smoke millions of packs of cigarettes each year. H.R. 1108 contains a number of strong provisions to protect young people from tobacco advertising and access to tobacco products. The bill requires the Food and Drug Administration to ban outdoor tobacco advertising within 1,000 feet of schools and playgrounds, restrict tobacco vending machines to adult-only facilities, require retailers to verify age for all over-the-counter tobacco sales, and mandate Federal enforcement and penalties for those who sell tobacco products to minors.

The Family Smoking Prevention and Tobacco Control Act also includes provisions to ensure that tobacco advertising is not misleading to consumers. In the past, tobacco companies have been allowed to use such terms as ''light,'' ''mild,'' and ''low'' without proving that products labeled with these words were less dangerous to health than generic equivalents. This bill requires tobacco manufacturers to prove that products actually impart reduced risk or reduced exposure to users before employing terms that imply these safeguards.

In addition, H.R. 1108 contains vital provisions that aim to reduce the harmful health effects of tobacco products for adults who do decide to use them. The bill allows the Food and Drug Administration to regulate the contents of cigarettes and other tobacco products. This authority is of paramount importance. Over 4,000 chemicals, including 60 carcinogens, have been identified in tobacco smoke. It is unlikely that tobacco will ever be an inherently safe product. But allowing the Food and Drug Administration to regulate the chemical additives to cigarettes and smokeless tobacco will help to reduce the health dangers of these products to the extent possible.

Passage of H.R. 1108 is an essential step forward in promoting the health of all Americans. Let's pass this important legislation.

Mr. LANGEVIN. Madam Speaker, I rise in strong support of H.R. 1108, the Family Smoking Prevention and Tobacco Control Act. This bill is a pioneering step forward in a decades-long struggle to safeguard the health of our citizens by ensuring that tobacco products are properly regulated. I am proud that the House of Representatives is taking this historic action on such an important public health issue.

The dangers of tobacco products are no secret. According to the Centers for Disease Control and Prevention (CDC), the adverse health effects from cigarette smoking account for an estimated 438,000 deaths, or nearly 1 out of every 5 deaths, each year in the United States. Additionally, a report released by the National Cancer Institute states that smokeless tobacco contains 28 cancer causing agents. Despite these and a multitude of other troubling revelations, the tobacco industry has remained virtually outside the realm of transparency or oversight. This groundbreaking measure will empower the Food and Drug Administration (FDA) with meaningful authority to regulate tobacco product content and marketing for the first time in our nation's history.

H.R. 1108 authorizes the FDA to restrict the sale and distribution of tobacco products, including its advertising and promotion, particularly as it affects children. It requires tobacco companies to disclose the nicotine levels and chemical contents of their tobacco products, and mandates reporting on changes to the products and any research regarding their health effects. This legislation does not permit the removal of nicotine from tobacco; however, it will grant the FDA authority to eliminate harmful ingredients and additives, and reduce nicotine levels. It will also prohibit terms such as ''light,'' ''mild'' and ''low-tar'' that mislead consumers into believing that certain cigarettes are safer than others.

Tobacco is a drug with well known adverse health effects, and it should be regulated by the Food and Drug Administration like any other. This bill will provide the FDA with the necessary regulatory and oversight authority to address how tobacco products are manufactured, advertised, and marketed. Further, it will fund this authority with user fees to ensure that other efforts at the FDA are not compromised.

The CDC estimates that every day, approximately 4,000 youth try a cigarette for the first time, and another 1,000 will become new, regular daily smokers. One-third of these youth will eventually die prematurely as a result. At a time when our nation's health care system is already straining under the increased weight of chronic disease, this Congress must take action to directly address the dangers of tobacco. To that end, I remain ready to work with my colleagues on this important issue and urge that they support the Family Smoking Prevention and Tobacco Control Act.

Ms. SCHAKOWSKY. Madam Speaker, I am a strong supporter and cosponsor of H.R. 1108, the Family Smoking Prevention and Tobacco Control Act, and I urge my colleagues to join me in voting for it today. I also want to commend and thank Congressman WAXMAN for introducing this important legislation that will significantly improve public health by strengthening the regulation of tobacco products.

There are over 44 million smokers in the United States and over 435,000 tobacco-related deaths each year. In Illinois alone, 24.3 percent of adults and 29.2 percent of youths smoke tobacco. Each year in Illinois, more than 16,000 people die from smoking-related illnesses, including 2,900 adults and children who die of second-hand smoke. In addition, $3.2 billion is spent in direct medical expenditures related to smoking in Illinois.

The tobacco industry spends $17 million a day to promote their products. Their targets are often teens, women and minorities. The average age when an individual becomes a daily smoker is 14.5 years. Every day, more than 4000 kids try their first cigarette and about half become addicted to tobacco. Nicotine and other tobacco products have become a pediatric disease. H.R. 1108 would help prevent these potentially deadly products from getting into the hands of children and youth.

This legislation would give the Food and Drug Administration (FDA) the power to regulate the manufacture, distribution and sale of tobacco products, authorities needed to safeguard the public health and our children. In addition, H.R. 1108 would lessen the cost of smoking-related medical illnesses and prevent adolescents and teens from smoking at a young age. The fact that the tobacco industry is now advertising a new generation of products with unproven claims that they are less harmful makes the need for FDA oversight even more urgent.

I am very proud that the State of Illinois has already taken measures to curb the effects of smoking on the public. I also appreciate the efforts that the Illinois Academy of Family Physicians have taken to educate the public and Congress about the dangers of smoking. Already, the Academy's ''Tar Wars'' campaign has had clear and successful results. I see it in the drawing of Alexandra Slane, an elementary school grader from Peoria, who won the Illinois Tar Wars annual poster contest. Her

drawing of a human-shaped light bulb is captioned with a warning to America, "Be Bright Don't Light!" Let us all be bright—let us pass H.R. 1108 and act to improve the Nation's health.

Mr. DINGELL. Madam Speaker, I submit the following exchange of letters for the RECORD.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE JUDICIARY,
Washington, DC, June 18, 2008.

Hon. JOHN DINGELL,
Chairman, Committee on Energy and Commerce, U.S. House of Representatives, Washington, DC.

DEAR CHAIRMAN DINGELL: This is to advise you that, as a result of your working with us to make appropriate revisions to provisions in H.R. 1108, the ''Family Smoking Prevention and Tobacco Control Act,'' that fall within the rule X jurisdiction of the Committee on the Judiciary, we are able to agree to discharging our committee from further consideration of the bill in order that it may proceed without delay to the House floor for consideration.

The Judiciary Committee takes this action with the understanding that by foregoing further consideration of H.R. 1108 at this time, we do not waive any jurisdiction over subject matter contained in this or similar legislation. We also reserve the right to seek appointment of an appropriate number of conferees to any House-Senate conference involving this important legislation, and request your support if such a request is made.

I would appreciate your including this letter in the Congressional Record during consideration of the bill on the House floor. Thank you for your attention to this request, and for the cooperative relationship between our two committees.

Sincerely,

JOHN CONYERS, Jr.,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, June 19, 2008.

Hon. JOHN CONYERS, Jr.,
Chairman, Committee on the Judiciary, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter regarding H.R. 1108, the ''Family Smoking Prevention and Tobacco Control Act''. The letter noted that certain provisions of the bill are within the jurisdiction of the Committee on the Judiciary under rule X of the Rules of the House.

The Committee on Energy and Commerce recognizes the jurisdictional interest of the Committee on the Judiciary in those provisions, and we appreciate your input on drafting issues related to those provisions. We further appreciate your agreement to forgo action on the bill, and I concur that the agreement does not in any way prejudice the Committee on the Judiciary with respect to the appointment of conferees or its jurisdictional prerogatives on this bill or similar legislation in the future.

I will include our letters in the Congressional Record during consideration of the bill on the House floor. Again, I appreciate your cooperation regarding this important legislation.

Sincerely,

JOHN D. DINGELL,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON WAYS AND MEANS,
Washington, DC, July 24, 2008.

Hon. JOHN DINGELL,
Chairman, Committee on Energy and Commerce, Washington, DC.

DEAR CHAIRMAN DINGELL: I am writing to confirm our understanding on H.R. 1108, the ''Family Smoking Prevention and Tobacco Control Act.'' The report (110–762) on the bill was recently filed by the Committee on Energy and Commerce. As you are aware, the Committee on Ways and Means believes that the amount of money raised by the assessment of the user fee in H.R. 1108 is more than the amount of money being made available to the Secretary of Health and Human Services (HHS) for the regulation of tobacco.

The version of H.R. 1108 recommended by the Committee on Energy and Commerce contains two sets of funding numbers, one set is the number raised by the user fee (the assessment) and the second number is the amount available to the Secretary of Health and Human Services for administering the regulation of tobacco. Clearly, the amount of money raised via the assessment in Section 920, 4(c)(1), is greater than the amount being made available for the regulated activity in Section 920 (b)(2).

The Committee on Ways and Means believes that this violates both the Speaker's guidelines of January 3, 1991 on the treatment of user fees and taxes under clause 5(a) of Rule XXI, which provides that the money raised by a user fee should be used solely for the regulatory activity and raises revenue generally, a matter within the jurisdiction of the Committee on Ways and Means under Rule X.

The extra money being raised is above the funding being made available to the FDA for tobacco regulation and, since the bill forbids the funds from being spent on anything other than tobacco regulation, would in fact revert back to the general fund of the U.S. Treasury. The version of the bill recommended by the Committee on Energy and Commerce would then be financing the costs of government generally, which is clearly the jurisdiction of the Committee on Ways and Means.

My staff on the Committee on Ways and Means has been in contact with your staff, and there is an understanding that you agree that the bill will not come to the Floor in its current form, but rather that there will be an Amendment in the Nature of a Substitute that will be submitted to the Committee on Rules that removes the 6% add-on from the underlying user fee, and replaces it in a way that does not negatively impact the jurisdiction of the Committee on Ways and Means.

In addition to the funding issue, H.R. 1108 includes a prohibition against the use of clove to create a characterizing flavor in cigarettes. The Committee on Ways and Means believes this provision to be within its jurisdiction because all clove-flavored cigarettes currently sold in the United States are imported. I understand that you recognize our jurisdictional interest in this question, given its effects on trade and customs revenues.

As part of our ongoing understanding regarding H.R. 1108, the Committee on Ways and Means has agreed to forgo any action on this bill as long as our jurisdictional prerogatives are being respected. This is being done with the understanding that it does not in any way prejudice the Committee with respect to any further jurisdictional questions on similar legislation in the future.

In addition, if a House-Senate conference is convened on H.R. 1108 or similar legislation, the Committee on Ways and Means understands that you will support my request for an appropriate number of Conferees to enable the Committee on Ways and Means to protect its jurisdictional interests on substantive issues.

I would appreciate your response to this letter, confirming this understanding with respect to H.R. 1108, and would ask that a copy of our exchange of letters on this matter be included in the Congressional Record.

Sincerely,

CHARLES B. RANGEL,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, July 25, 2008.

Hon. CHARLES B. RANGEL,
Chairman, Committee on Ways and Means, Washington, DC.

DEAR CHAIRMAN RANGEL: I write regarding H.R. 1108, the Family Smoking Prevention and Tobacco Control Act. Thank you for your letter to me in which you expressed the jurisdictional interest of the Committee on Ways and Means in certain provisions of the reported bill.

The bill provides for the regulation of tobacco products by the Food and Drug Administration (FDA). The Congressional Budget Office estimates that regulatory activities under the bill would curtail the consumption of tobacco products, thus reducing Federal revenues by a net amount of approximately $364 million over a 10 year period.

The bill reported by the Committee on Energy and Commerce contains a program under which the tobacco industry pays user fees. The bill pays for its $364 million net cost by proportionally increasing the user fee. In other words, the reported bill complies with Pay-As-You-Go requirements by charging the tobacco industry the additional cost of the legislation. This additional charge increases the user fee by approximately 6 percent.

This 6 percent add-on is not available to FDA, but rather is deposited in the general fund of the Treasury. I acknowledge that the Committee on Ways and Means has jurisdiction over the provisions of the bill that concern the 6 percent add-on. I appreciate that the Committee on Ways and Means did not exercise its right to a sequential referral of the bill regarding the add-on, and you have my commitment that the version of the bill the Committee on Energy and Commerce prepares for the House floor will not include any add-on to the user fees for the purpose of meeting Pay-As-You-Go requirements.

You also have expressed concerns about the provision in the bill that prohibits the use of clove to create a characterizing flavor in cigarettes. I acknowledge your concerns and understand that the Committee on Ways and Means has jurisdiction over import bans because of the effects on trade and on customs revenues. The Committee on Ways and Means did not seek a sequential referral of the bill on the basis of the clove provision. Again, I appreciate your cooperation.

I agree that the decision to forgo a sequential referral of the bill does not in any way prejudice the Committee on Ways and Means with respect to any further jurisdictional questions on similar legislation in the future or with respect to the appointment of conferees. If a House-Senate conference is convened on H.R. 1108 or similar legislation, I would support a request by the Committee on Ways and Means for an appropriate number of conferees with respect to provisions within its jurisdiction.

Per your request, I will include copies of our exchange of letters on these matters in the Congressional Record. I appreciate your cooperative attitude regarding the intent of the Committee on Energy and Commerce to consider this landmark public health legislation on the House floor expeditiously.

Sincerely,

JOHN D. DINGELL,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON NATURAL RESOURCES,
Washington, DC, July 30, 2008.

Hon. JOHN DINGELL,
Chairman, Committee on Energy and Commerce, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for the opportunity to work with you on changes to H.R. 1108, the Family Smoking Prevention and Tobacco Control Act, regarding provisions in the bill dealing with Indian tribes which are within the jurisdiction of the Committee on Natural Resources.

Because of the cooperation and consideration that you have afforded me and my staff in developing these changes to the bill, I did not insist on a sequential referral of H.R. 1108 even though the legislation included language within the jurisdiction of the Committee on Natural Resources. Of course, this waiver does not prejudice any existing or future jurisdictional claims over these provisions or similar language. I also reserve the right to seek to have conferees named from the Committee on Natural Resources on these provisions, and request your support if such a request is made.

I would ask that you place this letter into the Congressional Record during consideration of the measure on the House floor.

Thank you for the cooperative spirit in which you have worked regarding this matter and others between our respective committees.

With warm regards, I am

Sincerely,

NICK J. RAHALL, II,
Chairman, Committee on Natural Resources.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, July 30, 2008.

Hon. NICK J. RAHALL II,
Chairman, Committee on Natural Resources, House of Representatives, Washington, DC.

DEAR CHAIRMAN RAHALL: I write regarding H.R. 1108, the Family Smoking Prevention and Tobacco Control Act. The bill provides for the regulation of tobacco products by the Food and Drug Administration (FDA).

The bill reported by the Committee on Energy and Commerce requires the the Secretary of Health and Human Services to ensure that the provisions of the bill, the amendments made by the bill, and the implementing regulations are enforced with respect to the United States and Indian tribes. I acknowledge the jurisdictional interest of the Committee on Natural Resources in this requirement as it relates to Indian tribes, and I appreciate that the Committee did not exercise its right to a sequential referral of the bill.

I agree with you that the decision to forgo a sequential referral of the bill does not in any way prejudice the Committee on Natural Resources with respect to its jurisdictional prerogatives, including the appointment of conferees, on this bill or similar legislation in the future.

I will include this letter in the Congressional Record during consideration of the bill on the House floor. I appreciate your cooperative attitude regarding this landmark public health legislation.

Sincerely,

JOHN D. DINGELL,
Chairman.

Mr. STARK. Madam Speaker, tobacco use is the Nation's leading cause of preventable death, and, without aggressive help from Congress, will continue to be in the foreseeable future. That is why I rise today in strong support of the family Smoking Prevention and Tobacco Control Act, a bill that will give the FDA extensive new authority to regulate tobacco products.

I am alarmed by CDC reports that state that 8.6 million Americans have a serious illness caused by smoking, and that close to 440,000 people in the United States die prematurely from either smoking or contact with secondhand smoke. However, I am particularly shocked by statistics that demonstrate that smoking rates among high school students stayed the same from 2003–2007. With all the awareness campaigns targeted toward youth, this rate should have dropped. These statistics are unacceptable, and it is clear that Congress needs to step in.

The Family Smoking Prevention and Tobacco Control Act allows the FDA, among other things, to restrict tobacco advertising and promotions to children, force manufacturers to obtain approval before making reduced-risk product claims, form standards to reduce or eliminate toxic chemicals within tobacco products, and recall unreasonably harmful tobacco products. This piece of legislation is a long sought after bipartisan compromise.

I trust that my colleagues will join me in supporting this bill. Tobacco does not just affect individuals who smoke; it affects our children's futures and the economic prospects of our Nation. Each year because of tobacco use we lose more than $96 billion in medical costs and $97 billion as a consequence of lost productivity. It's time for us to stamp out this burning cigarette, and voting for the Family Smoking Prevention and Tobacco Control Act will be the first step.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and pass the bill, H.R. 1108, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. BARTON of Texas. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

CONFERENCE REPORT ON H.R. 4040, CONSUMER PRODUCT SAFETY IMPROVEMENT ACT OF 2008

Mr. DINGELL. Madam Speaker, I move to suspend the rules and agree to the conference report on the bill (H.R. 4040) to establish consumer product safety standards and other safety requirements for children's products and to reauthorize and modernize the Consumer Product Safety Commission.

The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of July 29, 2008 at page H7194.)

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Michigan (Mr. DINGELL) and the gentleman from Texas (Mr. BARTON) each will control 20 minutes.

The Chair recognizes the gentleman from Michigan.

Mr. DINGELL. Madam Speaker, I ask unanimous consent that the debate on this motion be extended by 10 minutes on each side.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

GENERAL LEAVE

Mr. DINGELL. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and to insert extraneous materials on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Madam Speaker, I yield myself 3 minutes.

Madam Speaker, it is with a great deal of pride and pleasure that I bring before the House a strong bipartisan bill that will protect the American public from unsafe consumer products. I have some kudos for my colleagues. I want to commend the chairman of the subcommittee, my dear friend, Mr. RUSH, for his outstanding leadership in the handling of this legislation. I also want to praise my dear friend, the ranking member of the full committee, Mr. BARTON, and all of the House conferees who served so well in working out a difficult bill. Working with them has been a privilege and a pleasure.

The House passed H.R. 4040 without a dissenting vote in December of last year, and the House followed with its amendment in March of this year. The resulting conference report represents the most significant overhaul of U.S. consumer product safety laws since the creation of the Consumer Product Safety Commission some 40 years ago under the sponsorship of myself and my dear friend from California, John Moss.

Under H.R. 4040, the CPSC will receive substantial funding and staff increases, greater laboratory and computer resources, and a stronger statutory mandate going forward. Industry-sponsored travel by CPSC commissioners and staff will be banned. The presence of lead and dangerous phthalates in toys and other products of children up to age 12 will be banned.

CPSC will be required to establish a publicly accessible data base to help consumers report and learn about deaths and serious injuries caused by consumer products. Toys and other children's products will be subject to premarket testing by certified laboratories.

□ 1700

The conference agreement also strengthens protections against the import and the export of dangerous products and enhances the tools for removing recalled products from store shelves.

To deter wrongdoing, it takes a number of important steps. It increases the

civil and criminal penalties to be sought by CPSC. It authorizes injunctive enforcement of Federal law by State attorneys general. It preserves State common law remedies and California's Proposition 65. It provides important protections for private sector whistleblowers.

I want to conclude by pointing out that this is a bipartisan bill and that it was not only the work of my Republican colleagues, but also my Democratic colleagues. I also want to point out that there was splendid work done by my good friend, Mr. BARTON, in his leadership in this matter.

The Republican staff and the Democratic staff worked countless hours and did superb work. Brian McCullough, Will Carty and Shannon Weinberg on the Republican side; and the Democratic staff, Valerie Baron, Andrew Woelfling, Christian Fjeld and Judy Bailey did extraordinary work.

In particular, I want to commend my dear personal friend, Consuela Washington, for leading the staff in such a splendid fashion. From the financial markets to the store shelves, she has been working on legislation to protect consumers for nearly 29 years.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. DINGELL. I yield myself an additional 30 seconds.

I am grateful for the extraordinary legislation our combined efforts have produced, of which this body and this Nation can indeed be proud. I urge the adoption of the legislation.

I reserve the balance of my time.

Mr. BARTON of Texas. Madam Speaker, I yield myself such time as I may consume.

(Mr. BARTON of Texas asked and was given permission to revise and extend his remarks.)

Mr. BARTON of Texas. Madam Speaker, first let me say how delighted I am to see my good friend BOBBY RUSH back on the floor. We have missed him, but in his recovery from his situation, he has been a strong conferee. He hasn't known how strong he has been, I am sure, but he has been a stalwart in bringing this conference report to the floor, and we are delighted he is on the floor to taste the fruits of victory, which is well deserved because of his leadership on this issue at the subcommittee and on the conference.

Madam Speaker, we have a rare thing before us. We have a conference report that has actually gone through the regular process. I want to commend my good friend, JOHN DINGELL of Michigan, the chairman of the Energy and Commerce Committee, for his extremely positive leadership on this issue.

I want to compliment all of the House conferees: Mr. WAXMAN, Ms. DEGETTE, Ms. SCHAKOWSKY and Mr. RUSH on the majority side, and Mr. WHITFIELD and Mr. STEARNS on the minority side. The House conferees, under Mr. DINGELL's leadership, have met numerous times at the principal level and uncounted times at the staff level.

The negotiations on this conference have not been easy. They have not been simplistic. They have been tense and hard-fought. On more than one occasion I have felt like getting up and walking away. I hate to admit it, with Mr. RUSH being a minister, but I have thought bad thoughts about some of the conferees. But having said that, the end product is worthy of support by everybody.

This conference report shows how the House of Representatives should work. We took an issue that is not an easy issue. Chairman DINGELL and Subcommittee Chairman RUSH had a legislative hearing. They had a subcommittee markup. We had a full committee markup. We brought a bill to the floor. We had a motion to recommit. Mr. DINGELL then got the House conferees together to make sure that we had a unified House position, and, when we couldn't, he kept bringing us together until we could. As has been pointed out, the leadership of the staffs on both sides have worked together.

Under the conference chairman's leadership, Senator INOUYE of Hawaii, the conference actually met. The Senate made proposals, the House responded, and vice a versa. The end result is a conference report that I believe every House conferee signed, and, as far as I know, every Senate conferee signed.

So that is a rarity, Madam Speaker, but the result is going to be a bill on the suspension calendar which for once deserves to be on the suspension calendar. I fully expect to get the same sort of vote on the conference report that we got on the House bill, and I believe the House bill, that passed something like 407–0 or 407–1, I am hopeful that this bill will pass with that same margin.

Now let me talk about what is actually in the bill. This is a strong bill. It gives the Consumer Product Safety Commission added authority to inspect and test children's toys. It creates for the first time a national laboratory that is headed by the Consumer Product Safety Commission. It gives States the right to set up independent laboratories in the State or to do third-party testing of products. It sets the toughest lead standards in the world for products that are going to be used by our children.

Because of Senator STEVENS' leadership in the other body, it bans three-wheel ATVs from the American market. These insidious products are products that have begun to creep back into the market after the lapse of the consent agreement between the industry and the Justice Department that this body helped negotiate when I was a junior Member 15 or 20 years ago. It requires a rulemaking for four-wheel ATVs.

On a chemical compound called phthalates, it outlaws three specific phthalates that there is adequate evidence that they might be harmful in children's products. It sets up a science-based study on three other phthalates that gives the CPSC the authority to also outlaw them if the science shows that they should be. But it does also require that there be real science, that we don't ban or outlaw products on no science or bad science. There has to be reputable science that is peer-reviewed.

I want to commend Mr. WAXMAN, who was one of the House conferees. He and I disagreed on a number of issues, but we also agreed that we should try to find compromise. And we did; the bill reflects that. One of the main reasons that we have a conference report is because Chairman WAXMAN was willing to compromise, and I want to compliment him for doing that.

I could go on and on, Madam Speaker, and I will during the course of the debate, but let me simply say that this bill represents the Congress at its best. It represents a tough issue where we used the process, where we gave everybody a voice. Chairman DINGELL has been exemplary in allowing the minority to participate and to provide input and ideas.

This is not the perfect bill that I would have had if I had been the only conferee. But it is a very, very good bill. It is a strong bill. It will protect America's children, it is worthy of support, and I hope that every Member this body votes in the affirmative for the bill later this afternoon.

Madam Speaker, with thanks, I want to reserve the balance of my time.

Mr. DINGELL. Madam Speaker, it is with a great deal of pleasure that I welcome back our good friend and colleague the Reverend RUSH from Illinois, and I yield to him, the author of this legislation, the chairman of the subcommittee, 5 minutes in support of the legislation.

Mr. RUSH. Madam Speaker, I certainly want to commend and thank my chairman of the full committee, Chairman JOHN DINGELL, for his extraordinary leadership in this Congress, particularly in the conference on this particular bill. I want to thank him for his long-standing friendship and for his preoccupation with the affairs of the American people. He is a man who deserves a lot of praise and honor.

Madam Speaker, today is a day unlike any other day. It is a joyous occasion, because this Congress has demonstrated to the American people that we are capable of reaching across the aisle in a bipartisan fashion to solve a major consumer crisis.

It is also a special day, because today marks my return to this Congress following an extended medical leave. With God's grace, with the support of skilled medical professionals at the University of Chicago Medical Center, I can stand here and announce to my colleagues, to my constituents and to the Nation that I no longer have cancer in my body.

Madam Speaker, before I directly address H.R. 4040, there are several people I would like to thank. First, I give all thanks to God for all of you, especially

for your prayers, as I bear witness that the prayers of the righteous avail much.

I want to give honor and thanks to my dear wife, Carolyn, and my family, who journeyed with me through the valley of the shadow of death.

I specifically would like to thank Speaker PELOSI, who called me several times to check on my well-being. I also again would like to thank JOHN DINGELL, who called many times. I would like to thank my colleague from Chicago, Congressman DANNY DAVIS, who showed his love and concern for my well-being. I would like to thank the chairman of the CBC, CAROLYN KILPATRICK, who called many times. Chairman CHARLES RANGEL wrote me numerous letters encouraging me. And I would like to thank my good friend from New York, ED TOWNS, for all of his indications of support and well-being. Lastly, I would like to thank Ms. CORRINE BROWN of Florida. All of these individuals were prominent and prolific in their concern and care for me and in their well wishes.

I am also grateful for the prayers and support of my constituents in the First Congressional District of Illinois, and a host of others throughout the U.S. and around the world. My standing here today is a testimony to your prayers and to God's grace.

So, Madam Speaker, I stand here today. After decades of neglect, this 110th Congress will soon pass landmark legislation that comprehensively overhauls and reforms our consumer product safety laws and revitalizes the beleaguered Consumer Product Safety Commission.

This conference report represents over a year's work. It represents careful, often painstaking negotiations between House and Senate Democrats and Republicans. It wasn't easy, but, in the end, conferees were willing to make smart compromises and bridge their many divides. Indeed, this conference report is the very definition of bicameral, bipartisan cooperation.

Madam Speaker, on May 15 of last year, I held my first hearing on toy safety in the subcommittee. Since then, the Energy and Commerce Committee unanimously reported to the House floor H.R. 4040, the Consumer Product Safety Modernization Act, and the House passed the bill 407–0.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. DINGELL. I yield the gentleman an additional 2 minutes.

Mr. RUSH. The gentleman thanks the gentleman for yielding.

Today's conference report draws on the strength of both the House and Senate-passed bills. It fundamentally strengthens the CPSC's regulatory authority and effectively bans lead and certain phthalates in children's products.

□ 1715

It creates a publicly accessible database on consumer products, mandates laboratory testing of all toys, provides whistleblower protection to private sector employees, improves cooperation between the CPSC and the U.S. Customs and Border Control, and empowers State Attorneys General with the injunctive authority to enforce Federal law. In sum, the conference report on H.R. 4040 weaves and deploys a wide safety net that will snare the dangerous consumer products before they enter the stream of commerce and into our homes.

Madam Speaker, I want to again thank my dear friend, Chairman JOHN DINGELL, for his unbelievable leadership during the conference. I also want to express my sincere gratitude to one of the finest members of this body, to the distinguished ranking member and former chairman, Mr. JOE BARTON of Texas, for his unwavering cooperation. Mr. BARTON, along with Mr. WHITFIELD and Mr. STEARNS, have shown a remarkable commitment to bipartisanship, and their willingness to compromise cannot be overstated. And the same can be said for the other House Democratic conferees, Mr. WAXMAN, Ms. DEGETTE, and the vice chair of the subcommittee, Ms. SCHAKOWSKY.

Madam Speaker, I also want to thank the staff of the CPSC for all of their hard work and dedication throughout this process. Lastly, I want to thank both the Democratic and Republican staff of the subcommittee. They put in long hours. I want to lift up Consuela Washington, Judith Bailey, Andrew Woelfling, Valerie Baron, and Christian Fjeld. I brag about the subcommittee staff. Madam Speaker, I have the best subcommittee staff in the House of Representatives.

Mr. BARTON of Texas. Madam Speaker, I yield myself such time as I may consume.

I want to commend my good friend, Mr. RUSH, for his efforts; and I see that we have a distinguished visitor from the other body. We are glad to have Senator DURBIN on the floor.

With that, I want to yield 4 minutes to a distinguished member of the committee and a conferee, Mr. STEARNS of Florida.

(Mr. STEARNS asked and was given permission to revise and extend his remarks.)

Mr. STEARNS. I address my colleague, Mr. RUSH, and say to him I am impressed with the courage and energy that you come down here, and we want to thank you today for taking that extra time. All of us obviously wish you well, and hope and pray and provide great love and friendship that the healing powers of the Lord Almighty will bring great restorative powers on you and you will be successful. We are inspired by you being here today. Obviously it has been fun working with you on this bill and others as the ranking member when you became chairman.

Madam Speaker, I rise in support of this legislation, and obviously I urge its immediate passage. As former chairman and ranking member of the Commerce, Trade, and Consumer Protection Subcommittee, I have been involved in these issues for many, many years. When I was chairman, we held numerous hearings and markups on a variety of issues, not just on toy safety and lead standards but also the Consumer Product Safety Commission itself. In addition, we held consumer protection hearings on privacy, on the Ford-Firestone tire safety, and consumer protection on the Internet, including spyware, data security, and ID theft. We compiled a long record on this subcommittee.

This bill is a culmination of many years of hard work and oversight. However, like many bills, this bill, H.R. 4040, is not entirely perfect, not all of it is exactly what we may have wanted, but it does go a long way to protect our children against harmful products. And that is the most important issue.

Over the last 2 years, my colleagues, we have seen numerous children's product and toy recalls rise dramatically. Many of these recalls were because of excessive amounts of lead in toys being imported from China. As if parents didn't have enough to worry about, they are now faced with another dilemma: Are the toys that they are buying their children safe today? That is a question they are asking. Today, with passage of this conference report, we will make sure that children are kept safe from hazardous products.

While many Members on both sides have focused mainly on the growing compliance shortfalls with toys that are manufactured outside the United States today, particularly in China, toys have not been the only problem over the past several years. As imports of every type of product have risen over the years, so have the number of problems that have been associated with these particular products. But the Consumer Product Safety Commission has done a fairly good job of meeting this daunting challenge.

As you can imagine, there are 15,000 different kinds of products. They have issued more recalls over the last 2 years than any other time in our history. I commend them for their diligent work in protecting the American people and their children. Despite this good work, we recognize the need to provide the Commission with additional resources, which we are doing today. We authorize significant increases in their budget so that the Commission can fulfill their mission to keep defective products that can cause injury, or worse, out of the stream of commerce today.

This bill is good public policy that not only provides the Commission with new resources but also provides for new standards regarding lead paint and implements the most stringent standard ever for lead content in children's products. This bill requires testing and certification of children's products before they are ever shipped to store shelves, and provides increased penalties for companies that violate the law.

New labeling requirements will help facilitate effective recalls, and the bill provides greater authority for the Commission to recall harmful products and notify the public of these dangers.

It is very important that they have this additional recall authority that is in this bill.

The SPEAKER pro tempore. The time of the gentleman from Florida has expired.

Mr. BARTON of Texas. Madam Speaker, I yield the gentleman an additional 1 minute.

Mr. STEARNS. My colleagues, all of us on this conference committee and in the subcommittee have worked with the consumer groups, industry leaders, and the Commission itself to make this a bipartisan, sound bill that works effectively. I would like to commend the hard work of Chairman RUSH, Chairman DINGELL, Ranking Member BARTON, Ranking Member ED WHITFIELD, the Senate conferees, and all the committee staff that worked so tirelessly on this important legislation. It is a fact we have a bipartisan bill. It was bipartisan out of the subcommittee and the full Committee on Energy and Commerce.

There are things you can complain about Congress, but today you can commend Congress for working in such a bipartisan fashion to get a very important bill after these many, many years. It is a commendation both to Mr. DINGELL and Mr. BARTON. Through their differences and through the different members on the Senate conferees, they were able to work patiently, consistently, and persevere until we have this final product today.

I urge all my colleagues to support this critical bipartisan legislation, and I look forward to its implementation soon.

Mr. DINGELL. Madam Speaker, I want to thank my good friend from Florida (Mr. STEARNS). He was one of an outstanding group of conferees, as was Mr. BARTON and Mr. WHITFIELD. They deserve the thanks of this body; as also was Mr. RUSH, Ms. DEGETTE, and Ms. SCHAKOWSKY.

I now yield 3 minutes to the distinguished gentleman from California (Mr. WAXMAN) who was one of the able conferees who has brought us a fine bipartisan bill.

Mr. WAXMAN. Madam Speaker, I am pleased to rise in favor of this bill, which marks a great step forward in protecting our children and all Americans from unsafe products. I want to thank Chairman DINGELL, Chairman RUSH, Ranking Member BARTON, and all the other conferees for their hard work in moving this bill forward.

I believe this is an extremely strong bill. It provides critically needed new authorities, personnel, and resources for an agency that has grown all but defunct in recent years. I look forward to a day when we can all feel safer as a result of this legislation.

There are many important pieces in this bill, as others have noted—new lead limits, mandatory toy standards, third-party testing, a ban on phthalates, whistleblower protections, and much more. In all of these areas we have strengthened Federal law and provided for better national enforcement with respect to consumer products.

At the same time, I am pleased that we have preserved essential State authorities, which are an important tool in protecting consumers. State laws and State action were the catalyst for much of this bill, and it is important that we preserve their ability to take actions in the future whenever it is needed.

I would like to engage Chairman DINGELL in a colloquy to address the issue of preserving State warning requirements.

I am pleased that the bill protects State warning laws related to consumer products or substances, such as California's Proposition 65. The conference report clarifies that any warning laws in effect as of August 31, 2003 are not preempted by this Act or by the Federal Hazardous Substances Act. This important clarification effectively harmonizes the four statutes that are enforced by the Commission. Other laws enforced by the CPSC, including the Consumer Product Safety Act, clearly do not preempt or affect State warning requirements like Prop 65.

I want to make sure that we have corrected any ambiguity with this conference report and harmonized all the Commission's statutes on this point particularly, as well as the Federal Hazardous Substances Act.

I want to yield to Chairman DINGELL and ask, is it also your understanding that nothing in this legislation or any of the laws enforced by the Consumer Product Safety Commission will preempt or affect Prop 65 in any way?

Mr. DINGELL. I thank the gentleman for yielding. Yes, that is my understanding.

Mr. WAXMAN. I thank Chairman DINGELL. Again, I am pleased to support this bill today. I am going to submit a longer statement for the RECORD, but I want to commend all those who have been involved in bringing about legislation that Democrats and Republicans can support and state with good, clear conscience that it is a very important step forward for consumers.

I am pleased to speak in favor of this bill, which marks a great step forward in protecting our children and all Americans from unsafe products. I want to thank Chairman DINGELL, Chairman RUSH, Ranking Member BARTON, and all of the Conferees for their hard work in moving this bill.

I believe that this is an extremely strong bill. It provides critically needed new authorities, personnel, and resources for an Agency that has grown all but defunct in recent years. I look forward to a day when we can all feel safer as a result of this bill.

There are many important pieces of this bill, as others have noted—new lead limits, mandatory toy standards, third-party testing, a ban on phthalates, whistleblower protections, and much more. In all of these areas, we have strengthened Federal law and provided for better national enforcement with respect to consumer products.

At the same time, I am pleased that we have preserved essential state authorities, which are an essential tool in protecting consumers. State laws and state action were the catalyst for much of this bill, and it is important that we preserve their ability to take such action in the future, whenever it is needed.

One critical state law in this process was California's Proposition 65, which requires manufacturers to label any product that contains a known carcinogen or reproductive toxin. That law has played a unique role in protecting all Americans for decades, so it was important to me that we not interfere with it in this legislation.

I am therefore pleased that the conference report makes clear that any state warning laws like Prop 65 that were in effect as of August 31, 2003, are not preempted by this Act or by the Federal Hazardous Substances Act. This important clarification effectively harmonizes the four statutes that are enforced by the Commission. Other laws enforced by CPSC, including the Consumer Product Safety Act, clearly do not preempt or affect state warning requirements like Prop 65. The Federal Hazardous Substances Act, however, is ambiguous as to its effect on state warning requirements. I am pleased that we have corrected this ambiguity with this conference report and harmonized all of the Commission's statutes on this point.

I am also pleased that under another key provision of the legislation—the new prohibition on phthalates—states retain the ability to regulate phthalates in product classes that are not regulated under this legislation. States also retain authority to enforce any toy safety standards that were in effect on the date of enactment of this bill, as long as they notify CPSC of the standard. I am pleased that the bill includes explicit language to preserve states' ability to regulate alternatives to phthalates, such as other chemical plasticizers that might be used as substitutes to the phthalates that will be removed from toys under this law.

The bill itself does not address the use of hazardous alternatives to phthalates when the prohibition goes into effect, so it is critical that states can act in this area. California has a law on phthalate alternatives and it is important that that law will remain in effect as the new Federal ban on phthalates enters into force.

Finally, I am pleased that under the bill, states have the authority to require additional or more effective testing protocols. Because testing protocols can change over time as tests become more sensitive and science evolves, states must be free to move ahead even when Federal requirements lag behind. The states' ability to act quickly and proactively provides an essential backstop of protection for consumers, and this bill makes sure that backstop remains in place.

Again, I thank Chairman DINGELL and Chairman RUSH for putting together such a strong bill for all Americans.

Mr. BARTON of Texas. Madam Speaker, could I inquire as to the time on each side.

The SPEAKER pro tempore. The gentleman from Texas controls 18 remaining minutes; the gentleman from Michigan controls 16 minutes.

Mr. BARTON of Texas. Madam Speaker, I yield myself 3 minutes.

Madam Speaker, as we go through the debate this afternoon, I will mention some of the specifics in the bill. I would like to point out that the bill before us does have Federal preemptions so that there is one Federal standard and there is one agency to enforce that standard with regards to the safety of children's products, and that is the Consumer Product Safety Commission.

This is important to note, because if we didn't have that, you could have each of the 50 States setting different standards; you could have a conglomeration of rules that would make it very difficult for interstate commerce. So one of the compromises in the bill is that there is Federal preemption, that there is one standard for all the States, and I am very pleased that that is in the bill.

I would also like to point out that the pending bill gives the Commission new authority, gives the Commission new resources, increases the number of commissioners from three to five, and, as I have already pointed out, does create a CPSC testing laboratory so that our children's toys will be tested in the laboratory before they are tested by our children on the living room floors of America.

I would also like to compliment the staffs on both sides, as has already been done by full committee Chairman DINGELL and subcommittee Chairman RUSH. But on the Democratic staff, Consuela Washington actually I think served as the key that kept all of the staffs working together, and her patience was just extraordinary. She was even patient with members like me, and I appreciate that tremendously. Judith Bailey, Christian Fjeld, Andrew Woelfling, Valerie Baron all worked very, very hard on the majority side at the staff level. On the minority side, I am very proud of Will Carty, Shannon Weinberg, Brian McCullough, Chad Grant, Jerry Couri, and even our interns, Beth Manzullo, and John Hammond had some input into the work product, and I want to commend them, especially this past weekend where they worked both Saturday and Sunday so this conference report could come to the floor today.

Madam Speaker, I reserve the balance of my time.

□ 1730

Mr. DINGELL. Madam Speaker, at this time I yield to the distinguished Speaker of the House of Representatives, Ms. PELOSI, 1 minute.

Ms. PELOSI. Madam Speaker, I thank the gentleman for yielding time, and for his hard work and great leadership in bringing this important legislation to the floor in a way that is bipartisan and shows the full support of this Congress as a Congress for America's children.

It is a special day for us because this bill is long overdue, and took a ''New Direction Congress'' to work it out and bring it to the floor in the form that it is in, which is to protect America's children.

But it is a special day for another reason, and that is because one of the main authors of the bill, Congressman RUSH of Illinois, is back with us today. We are all family, and to have our family member return in good health is really something very special to us.

He worked so hard to pass this bill the end of last year, so that before Christmas, families across America could know that Congress cared about our children. The bill passed on a suspension calendar with a strong bipartisan vote with the support of community groups that care about children.

So Mr. DINGELL, thank you for making this come to fruition, especially at a time when Mr. RUSH could be back here with us so that we could say to him, in person, thank you for your leadership for America's children. We love you. You make it a very special day for us when we can do something for America's children and to do so in your presence.

Thank you, Mr. RUSH, for your leadership.

This bill is necessary because, does anybody not know that I am a grandmother?

My husband always says, I just wonder how far into your speech it is before you start talking about your grandchildren.

But as a mother of five and a grandmother of seven, and a person who observes a wider range of children in our extended family, I know that we, moms and parents, want to do everything they can to do the best for their children. But we have our limitations. We have to depend on the Federal Government, and government in general, to protect our children from chemicals that may be harmful to their health or even worse than that.

And so, the last several years, even this past year have been called the year of recalls. The Year 2007 was dubbed the ''Year of the Recall'' by Consumer's Union.

More than 45 million toys and children's products were recalled last year, and some were found to contain nearly 200 times the legal amount of lead. Toys, toy trains, costumes, magnets, because and even baby bottles were among the common, everyday items found to be harmful to our children.

What is a parent to do?

This year dangerous toy and product recalls are happening in even swifter rates. The number of recalled toys and children's products is up 22 percent over the first half of last year. What is a parent to do?

Most of the toys that were recalled should never have found their way on to the shelves of local toy stores. Over the last several years, at the same time of these record toy recalls, the Consumer Product Safety Commission, which is charged with testing toys before they end up in the homes of our children, have been starved for resources. The agency lost 15 percent of its work force between 2004 and 2007. And in 2007, even the Commission's Acting Director complained that there was only one lonely toy tester at the Commission.

Today, at this legislation, we strengthen the ability, our ability to prevent those toys from even getting to market, get products off the shelves more quickly, and increase fines and penalties for violating product safety laws.

The legislation eliminates lead beyond a minute amount in toys and other products intended for children under 12 years of age. It also bans toxic phthalates in children's toys and child care articles.

Today the ''New Direction Congress'' is asserting our responsibility to protect children from dangerous toys. Dangerous toys. Think of that. Shouldn't that be an oxymoron? It should be a given that toys are not dangerous. Sometimes they can be used inappropriately. Somebody can fall with a toy, et cetera, but if it has within its very make-up something that is harmful to the health of children, something is wrong with this picture.

The Consumer Products Safety Improvement Act, which is what this bill is, of 2008, is the result of the leadership of many in Congress. I again want to acknowledge the leadership of Chairman DINGELL and BOBBY RUSH. I also want to acknowledge Ranking Member BARTON for his cooperation in bringing this bill to the floor. I would like to acknowledge other leaders on the Energy and Commerce Committee, Congressman WAXMAN, Congresswoman SCHAKOWSKY, Congresswoman DIANA DEGETTE, and also Congresswoman ROSA DELAURO, not on that committee, but a person on the Appropriations Committee who has some jurisdiction over this issue, and who has been relentless, a relentless grandmother on behalf of children.

So I would salute this as a bipartisan effort on behalf of our Nation's most valuable resource, our children, because it is our sacred duty to protect them.

We began this Congress calling it to order in the name of all of America's children. Today we are honoring some of our promise to them by keeping their toys and children's products safe.

Again, Madam Speaker, I urge our colleagues to give an overwhelming unanimous vote on support for this important legislation for the children.

Mr. BARTON of Texas. Madam Speaker, I yield myself 2 minutes.

Madam Speaker, I again want to talk about some of the specifics in the legislation. The bill before us would give the Commission new tools, such as greater authority to expedite recalls; would give the Commission the authority to strengthen reporting requirements to facilitate the identification of the origin of the problems that arise in the supply chain.

We also give the Commission expanded authority to better monitor

and regulate the tremendous increase in the number of products that we import from overseas. The Commission, for the first time, has got explicit authority to consult with United States Customs and Border Protection Service to better identify dangerous products before they enter the country.

The bill, as I have said earlier, also provides national uniform standards for many children's products, rather than relying on a patchwork of disparate State and local rules.

As has been pointed out, the bill before us has the toughest standard on lead, which is basically no lead in children's products as they come into the national market, whether they are manufactured here in the United States or overseas.

There is a concern on some part about the implementation for the schedule for manufacturers to comply with this new lead requirement, but I am confident that they have the resources to do so and will do so.

Madam Speaker, I reserve the balance of my time.

Mr. DINGELL. Madam Speaker, it is a great privilege for me to yield at this time 3 minutes to the distinguished gentlewoman from Colorado, who had so much to do with the success of the conference, my dear friend, Ms. DIANA DEGETTE.

Ms. DEGETTE. Madam Speaker, I want to also thank Chairman DINGELL for his strong leadership on this issue, and also Ranking Member BARTON for his wonderful ability to compromise on the bill.

As the Speaker just told us, last year, it seemed like every day parents were being told that their children's toys were not innocent playthings and, in fact, were very dangerous. This mainly happened during the holiday season, where parents had no idea whether what they were buying to put under the tree would harm or even kill their child.

For a long time now, we have all realized that our consumer product safety system is broken. The CPSC clearly needed more staff, more resources, and more authority. Our consumer protection laws needed to be brought into the 21st century.

This legislation goes a long way to solving those problems. I am so proud to have been one of the House conferees on H.R. 4040. By working diligently with our Senate colleagues and our colleagues on the other side of the aisle, we produced a strong, bipartisan bill.

This conference report has a number of provisions which will protect our kids, and I just want to highlight a few of them. It bans lead in children's products beyond trace amounts, the highest standards in the world. It permanently bans three phthalates and temporarily bans three others in toys for kids 12 and under; and, in fact, it extends all of the consumer protections to kids 12 and under because of the issue of shared toy boxes.

It requires independent third-party testing of children's products to ensure that they are safe before they are sold.

It increases the CPSC's budget dramatically, and it stops the export of certain dangerous products.

I want to thank my conference committee colleagues and all of the staff members involved for pulling together such a good bill.

Chairman, or former chairman, Ranking Member BARTON was right when he said this is the way legislation should be, a strong collaborative effort that produces real results that will help all of the consumers of America.

I hope, throughout the fall, as we move into the next holiday season, parents can take this issue off their plates as one they have to worry about and, instead they can worry about giving their kids a strong, safe holiday season as we approach the end of this year.

Mr. BARTON of Texas. Madam Speaker, I want to yield myself 2 minutes.

Madam Speaker, I hope I can get that quote and frame it, that I was right. It is good to know that I have been right about something in this Congress. I will take that home and show it to my family and my children, and maybe they will appreciate me a little bit more.

I want to keep going through some of the substance on the conference report, Madam Speaker. I want to talk now, in this little segment, about the chemical compound called phthalates. Phthalates are the product, compound that are used in plastics to make them soft. There has been some evidence in the last several years that, in large quantities, in certain products, if a child were to ingest them, that it could cause problems in the development of that child in their teenage years. The science is uncertain, but there is growing concern.

Some States have begun to ban these products. The European Union has banned certain of these phthalates and, as a result, in the other body, the Senate bill had a prohibition based on a California standard on a large number of these particular compounds. I didn't believe then, and I am still uncertain whether it is necessary to specifically ban these compounds because they have been used in products for a large number of years and there is no known instance of any kind of a phthalate poisoning or phthalate deformity in humans.

Having said that, when Congresswoman DIANA DEGETTE came to my office unannounced as I was trying to gather support to sustain a veto of what I thought would be a different bill, I did agree to work with Mr. WAXMAN and Senator BOXER in the other body and come up with a compromise.

I must also say that Chairman DINGELL was instrumental in that, as he counseled me, in only the way that Chairman DINGELL can, about the need for bipartisan compromise. The result is the bill before us where three specific phthalates are banned outright, and another three are temporarily prohibited while we do a comprehensive scientific study. That is the essence of compromise.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BARTON of Texas. Madam Speaker, I yield myself an additional 1 minute.

And I do want to give, as I said, in the conference, Congresswoman DEGETTE should get the Henry Kissinger award for diplomacy because she actually was apparently shuttling between my office, Chairman DINGELL's office, Mr. WAXMAN's office and maybe even Congresswoman SCHAKOWSKY's office. That was a tremendous amount of effort on her part, and it does show that when there is trust and bipartisan willingness to cooperate and, as Lyndon Johnson, the great former President and Member of this body once said, ''There is nothing that is not compromisable.'' And certainly, this conference report shows that that is a true statement.

I reserve the balance of my time.

Mr. DINGELL. Madam Speaker, at this time I am delighted to yield to the distinguished gentlewoman from Illinois (Ms. SCHAKOWSKY) who was so valuable and so helpful in achieving this purpose today, 3 minutes.

Ms. SCHAKOWSKY. Madam Speaker, as a conferee on this bill, I proudly rise to support the conference report to H.R. 4040, the Consumer Product Safety Improvement Act.

When we began this process of reforming the Consumer Product Safety Commission over a year ago, I set out one goal, to ensure that the toys and products I buy for my grandchildren are safe. I am pleased to say that the conference report we are considering today fulfills that goal for all of America's children.

□ 1745

H.R. 4040 is legislation that every Member of Congress can be proud to support. It is a product of bipartisan negotiation and compromise. I, too, want to thank our esteemed chairman, JOHN DINGELL, for shepherding us through this process, as well as ranking member JOE BARTON, my fellow conferees, and all of the staff and consumer advocates that worked so hard on this bill.

I also want to thank our Senate counterparts. Chairing the conference was Senator INOUYE, and the key author of the Senate companion bill was Senator MARK PRYOR of Arkansas. They both deserve the gratitude of the House, especially if they pass this bill this week.

I am especially thrilled, however, to welcome back to Washington my friend and chairman of the Consumer Protection Subcommittee and chief sponsor of this bill, Congressman BOBBY RUSH. You have been deeply missed, and I'm so happy to have you back on this momentous occasion which you have made more momentous.

With this conference report, Congress is breathing new needed life into the

CPSC. For the first time, we are virtually banning lead in children's products as well as the harmful phthalates that can cause hormonal damage. We're improving the CPSC's enforcement authority and maintaining the authority of State attorneys general to ensure that the products sold in their States comply with the law. And we are providing consumers with a publicly searchable incident database that will allow them to report hazards to one another.

There are three provisions I am particularly proud to have authored in this conference report.

The first is language directing the CPSC to devise mandatory safety standards for infant and toddler durable products. Those are the things that are in every nursery: cribs, high chairs, playpens, strollers, bassinets. It also requires pre-market testing of those products to ensure that they meet those standards. Bottom line, we will no longer be using our children as test dummies. The government will be ensuring their safety.

Second, I'm gratified that the conference report includes the Danny Keysar Child Product Safety Notification Act in its entirety. I crafted this legislation in honor of Danny Keysar who was strangled to death when he was 16 months old at his licensed daycare facility when the portable crib he was sleeping in collapsed. The crib that killed Danny had been recalled 5 years earlier, but the daycare center didn't know that.

To improve the product recall system, manufacturers of children's products will be required to attach a postage-paid recall registration card to each product that can be mailed in to notify the purchaser when a product is recalled for safety reasons. This provision is a tribute to the work of Danny's parents, Linda Ginzel and Boaz Keysar, who created the organization Kids in Danger 3 weeks after Danny's death in order to prevent other children and families from suffering the same tragedy.

The SPEAKER pro tempore. The time of the gentlewoman from Illinois has expired.

Mr. DINGELL. I yield the distinguished gentlewoman 30 additional seconds.

Ms. SCHAKOWSKY. Finally, I am delighted the conference report contains a provision to immediately adopt the set of existing voluntary toy standards as a mandatory standard on an interim basis. Then the CPSC, working with consumer groups, will assess those standards, beginning with the toys that present the greatest hazards, and develop not only the best possible mandatory standards, but require pre-testing to those standards. At last, all toys will be tested before they arrive on toy store shelves.

Madam Speaker, the conference report we will adopt today will finally bring the CPSC into the 21st century, and will, I hope, transform it into the world's foremost consumer protection agency.

It was an honor to be working on this bill.

Mr. BARTON of Texas. Madam Speaker, I yield myself 2 minutes.

Madam Speaker, in previous comments I have thanked the committee staffs. On this occasion, I want to thank some of our friends at the Consumer Product Safety Commission.

I want to thank Cheri Falvey, who is general counsel; Gib Mullan, who is the director of compliance; Lowell Martin, the deputy general counsel; Quin Dodd, chief of staff to Acting Chairman Nord; Jack Horner, director of congressional relations. They've all worked very hard on this legislation.

We also want to thank some of our hearing witnesses: Dr. Marilyn Wind, who is a pharmacologist who testified before the other body; Dr. Michael Babich, a chemist, who testified before the Energy and Commerce Committee. Some of our database presenters were Pat Weddle, who is director of IT services, and DeWayne Ray, deputy CIO. Some of the laboratory people who talked to us about how to detect lead: Dr. Joel Recht.

And finally some of the staff, some of the Commission staffers who worked with us on the budget numbers: Mr. Ed Quist, who is the director of financial management of CPSC; and N.J. Scheers, director of planning and budget.

Those are some of the staff people in the CPSC and the witnesses who helped us prepare this legislation. We should commend them for their efforts.

I reserve the balance of my time.

Mr. DINGELL. Madam Speaker, at this time I yield to the distinguished gentleman from Illinois, Mr. RAHM EMANUEL, 2 minutes.

Mr. EMANUEL. I would like to thank the chairman as well as the ranking member for this legislation, but particularly I want to thank my colleague from Illinois, BOBBY RUSH, the subcommittee chairman who worked on this legislation who is back today from his illness. As my colleague JAN SCHAKOWSKY said, it is a special warmness to all of us to have you back.

This legislation puts consumer safety back in the Consumer Product Safety Commission. You have heard from a number of speakers prior to me—and there is no reason to go through it—all the new powers and capabilities of this commission. And while we have talked about last year the 231 recalls of 45 million toys, Fisher-Price alone recalled 1 million toys, 1 million cribs were recalled, we should not lose sight also that we had a commissioner who was not doing her job.

When all of this was breaking out in the news, the commissioner, the head of the Consumer Product Safety Commission, was taking trips paid for by the very industry they were responsible for regulating. When this broke and all of the recalls were occurring, the commissioner who not only was taking these trips said, ''I don't need any more staff for this. I don't need any more money for this,'' and yet the American people knew at that time we had a commissioner who was head of the Consumer Product Safety Commission who was not on the job doing the police work that she was responsible for doing.

So the good news is not only do we have new laws, not only will we empower this commission in a new way, after November, we're going to have a new commissioner with a new agency and a new mission and new resources to do exactly what they're supposed to be doing.

So today, for all of us who wanted to see this legislation, who read with horror the stories that came out about what was happening to toys, to cribs, and how parents and their children were being put at risk and their government wasn't doing their job, I am proud of this bipartisan accomplishment. I'm most proud of the work that our colleagues did together putting aside their differences.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. DINGELL. I yield the gentleman an additional 15 seconds.

Mr. EMANUEL. The best news is after November, we will have a new commissioner who doesn't say ''yes'' to the status quo but says ''yes'' to the new powers to make sure that we are protecting our children and their families.

Mr. BARTON of Texas. Madam Speaker, I have no other speakers, and I am prepared to close. I am also prepared to yield some of my time to Chairman DINGELL if he needs additional time.

At this point in time, though, I would reserve the balance of my time.

Mr. DINGELL. Madam Speaker, I am delighted at this time to yield 2 minutes to the distinguished gentlewoman from Ohio (Ms. SUTTON).

Ms. SUTTON. Thank you, Mr. Chairman, for your leadership on this amazing legislation. Consumer product safety is not an area that we can afford to ignore, and this historic legislation that we're passing today is a tremendous victory for consumers.

This year dangerous toy and product recalls are happening at an unprecedented rate. I remember just a couple of months ago reading a story in my local paper about possible lead contamination and the paint on plastic Easter eggs. That is unacceptable.

For far too long we've been reading story upon story about dangerous toys and contaminated food. Imports from foreign countries continue to grow, and many manufacturers from foreign countries fail to adhere to even basic safety standards.

The American people should not have to worry about the safety of the products they use or the toys that they give their children to play with. Last year, more than 25 million toys were recalled

in the U.S., and 80 percent of all toys sold in the United States are imported from China.

This relationship between the growing import safety crisis and American trade policy is notable and requires us to strengthen our oversight here at home. To do that, the Consumer Product Safety Commission needs to have the resources to help protect our families and then they need to do it.

Our bill strengthens the CPSC and ensures American families are protected from dangerous toys, and this legislation bans lead beyond a minute amount in many products, creating the toughest lead standard in the world.

Madam Speaker, my constituents deserve to know that their government is doing everything it can to keep their families safe. Today with passage of this bill, we are upholding that responsibility.

I thank you again, Chairman DINGELL, and your committee for all of your hard work, and thanks to Speaker PELOSI for making this issue a priority. I also want to express my appreciation to Representative BOBBY RUSH for his commitment and his leadership in bringing this legislation to fruition.

I urge my colleagues to support this important work.

Mr. DINGELL. Madam Speaker, I have no further requests for time. I am ready to close and to say appropriate remarks for my good friend from Texas for his fine work and that of all of the other members who have worked so hard on this. So I will close at the proper time.

Mr. BARTON of Texas. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I think we've seen in the debate today that when the Congress does decide to work in a cooperative spirit, the end product is a product that's worthy of support by all Members on both sides of the aisle, in most cases regardless of their philosophical affiliation.

The Consumer Product Safety Commission is a necessary and vital part of our effort here in the United States to make sure that the products that are sold to the American public are the safest in the world. The emphasis on this bill, in addition to reauthorizing the Consumer Product Safety Commission, has really been to beef up the standards and the enforcement authority and the technical ability of the CPSC for children's toys and children's products.

As Congresswoman SCHAKOWSKY pointed out, there are some very specific things in this bill that should provide over the years, as it is implemented, the prohibition of some of the unwanted tragedies that we unfortunately have seen in the past, and in her case on the crib issue that she's been so diligent in bringing forward.

We increase the number of commissioners; we increase the budget of the commission; we create a new laboratory; we in certain cases ban certain products, specifically three-wheel ATVs that are coming into the country; we require a study on four-wheel ATVs. As we have said on numerous occasions, for the first time we prohibit certain phthalates from being used in children's products, and we require a science-based study on three other phthalates. We have the toughest standard for lead in the world today.

By any definition, this is a strong bill. It is a pro-consumer bill. But yet it is also a bill that will allow the manufacturers of children's products to have the ability to manufacture in a safe way and to market in a safe way these products to the American public.

Finally, Madam Speaker, I want to say something about the distinguished chairman of the committee, Chairman DINGELL. I am not a person who normally initially is willing to compromise. I don't think if you ask a Member of this body who's been in it very long who knows me does JOE BARTON change his mind very often, I think the answer you would get is ''not frequently.'' But it became apparent as we went to conference with the Senate that compromise was going to be a necessity.

On the issue of phthalates, being a registered professional engineer, I was not a believer that we should automatically ban the number of phthalates that the other body's bill did and I was not somebody who was really seriously interested in finding a compromise. My position was the House position, which was we don't do single products. We should leave that up—if the science shows it should be banned later on, so be it.

Chairman DINGELL came to me and said, ''You're going to have to take another look at that.'' And I said, ''Mr. Chairman, I don't want to. I don't think we need to take another look at it.''

And he said, ''JOE, I really hope that you will find it in your heart to really study this phthalate issue.'' And because of my respect for JOHN DINGELL, I promised him that I would do that.

□ 1800

And I spent the next week, both at the staff level and in phone conversations, with the leading scientists in the United States that actually manufacture and distribute the product, studying that issue.

And as a consequence of that, since I am an engineer, if the facts say something, you've got to look at the facts. And I was convinced, based on those conversations from the staff on the minority side and some of the scientists that there was some doubt and there was some reason on certain of the phthalates, that there should be a prohibition.

And we put forward a proposal from the minority side to Chairman DINGELL. He massaged it. He put forward a position as a conference. It was not accepted, but it was a starting point for negotiations, and Congresswoman DEGETTE got into the discussion. She went to Mr. WAXMAN. Mr. WAXMAN went to the other body, to Senator BOXER and Senator FEINSTEIN, and the result is we actually have a conference report that is a good compromise.

So I want to commend all of those, but I especially want to commend JOHN DINGELL because he is the dean of the House. He has served in this body over half a century, and if he had not had the wisdom and the leadership to say that you had to try to find a compromise, we wouldn't be here. We would, on my side, be rallying support to sustain a Presidential veto, and on the majority side, be trying to make sure that this got the two-thirds vote.

So, Madam Speaker and Members of the body, I have the utmost admiration for Chairman DINGELL, and I have the utmost respect for the institution, of the process of the House of Representatives, and that shows in this bill.

Vote for the conference report.

I yield back my time.

Mr. DINGELL. I yield myself the balance of the time for the purposes of closing.

I want to make a little observation about my friend from Texas. He's too kind to me and not kind enough to himself. He and I have the privilege of leading the Commerce Committee. It's a great committee composed of great Members, and we are proud, indeed, of them all, and we have an extraordinary staff, and they deserve the gratitude of this body for the fine work they did.

My good friend from Texas and I have had some fine fights, but we have over the years become great friends, as well we should be. And he has earned not just my respect and affection but that of all of his colleagues on the committee and in this body because he's a fine, decent and wonderful human being.

And I know that there were difficult times for him, as there were for all of our other conferees, Mr. RUSH, Mr. WAXMAN, Ms. DEGETTE, Ms. SCHAKOWSKY, Mr. STEARNS, and Mr. WHITFIELD, and I know on one occasion it looked like this thing was going down the tube. But Ms. DEGETTE and my good friend from Texas (Mr. BARTON) got together, and they pulled it together and made it work. And we owe them thanks for that. It's great public service.

And we also do for Mr. WAXMAN, because at a very difficult time, the question of preemption and the level of phthalates was before us, and in a very quick and gentlemanly way, Mr. BARTON and Mr. WAXMAN worked that issue out. We owe them thanks for that.

We have given the House a good bill. It's a bill that's going to protect people. It's a bill that's going to not just protect people but kids, and I think we have to give a nod here to Mr. SERRANO, the chairman of the Appropriations Committee, because without proper funding this legislation is not going to work, and people are going to keep getting killed by shoddy products,

most of which are imports. And we understand that under Mr. SERRANO's leadership, there will be $100 million in the appropriation next year for dealing with the problems of this agency.

Again, Madam Speaker, this is a good bill. It shows how the House can work together and how the process, when properly used, leads to good legislation.

My good friend, Mr. BARTON, is an institutionalist, and we're very proud of that. And I pride myself that I, in some small way, am one of those, too. But this is the way the place should work. For hundreds of years, wise men and women have left us the way that this place can and should work, and it's my hope that as we go forward in this Congress and in following Congresses that we will again be able to work as we did on this matter, not just on the Commerce Committee but on all others.

Commerce is very proud of its traditions and its history. We're also very proud of our other sister committees and of the good work that they do, and it is a real privilege for me to commend all of my colleagues on both sides of the aisle and say to them well done for the great work that you have done. All of us have reason to be proud, and all of us have reason to be grateful, and all of us have strong reason to be delighted to see back our old friend Reverend RUSH, who started this whole thing out.

And so, Madam Speaker, to my colleagues I say, well done, let's vote this legislation through. It's a great piece of legislation, and it will protect and it will save lives, health, and the security of our people.

Ms. ESHOO. Madam Speaker, I rise today in support of H.R. 4040, the Consumer Product Safety Modernization Act.

In the last year there have been countless reports about dangerous products that have slipped through the cracks and reached store shelves, only to be discovered when someone got hurt. There has been a complete failure by the Consumer Product Safety Commission to keep harmful and sometimes lethal products away from consumers. Red tape, lax enforcement, and a shortage of resources at the CPSC have contributed to the recent recalls: 25.6 million toys were recalled from stores in fiscal year 2007, compared with only 5 million toys in 2006, and it's the American consumer, especially children, who are suffering.

It's become glaringly obvious that we can't rely on manufacturers to police themselves, we need to give the chief consumer regulatory agency the authority and the resources necessary to get unsafe products off the shelves and stop them from coming into the country.

This bill is a significant improvement in product safety from the way we're operating now. It provides additional funding to the CPSC and bolsters the Commission's ability to test and identify dangerous products. It also authorizes State Attorneys General to bring action on behalf of their residents to enforce Federal consumer safety rules.

I'm pleased that my amendment to give the CPSC mandatory recall authority is included in the bill. This an is important tool for the CPSC to wield against the most nefarious companies who resist a recall of their faulty products.

On the other hand, I'm disappointed that my amendment on allowable lead levels in children's toys was not accepted. The amendment I offered in committee would have brought lead levels to 40 parts per million, the standard recommended by the American Academy of Pediatrics. It's my hope that the CPSC will take seriously its authority to adopt a more protective standard if it makes the determination that it is feasible and protective of human health.

I support this bipartisan bill to protect American consumers, especially children, and ask my colleagues to support it as well.

Mr. MARKEY. Madam Speaker, I rise to commend my colleagues on both sides of the aisle for their excellent work on reaching an agreement on this important legislation to upgrade and modernize the regulations and the Agency charged with ensuring the safety of consumer products.

In the past couple of years, Americans have been shocked to learn that the Consumer Product Safety Commission is an agency in crisis, starved of resources and slow to respond to a growing tsunami of toxic toys and other products that continue to put consumers at risk.

We learned of defective cribs that resulted in deaths whose defects were never fully disclosed to the public. We learned of lead-tainted jewelry and other products, toys coated with a notorious date-rape drug, and unacceptable delays in the investigation and recall of dangerous products on the part of the CPSC. We learned of undue influence by manufacturers within the CPSC itself. With all of these problems, CPSC had come to stand for the ''Can't Protect the Safety of Children'' agency.

The Democratic Congress made reform a priority and embarked in a New Direction. The result is a remarkable success.

We have agreed to BAN lead and pthalates in children's products.

We have agreed to greatly increase funding and personnel for the CPSC.

And we have agreed to dramatically upgrade and make mandatory testing requirements and standards for toys.

These new provisions will dramatically improve the protection of consumers across the country.

There are three provisions in this conference report that I would like to call particular attention to.

First, I am delighted that the Conference Committee has included language I first conceived of and proposed during House consideration of the bill to create an online searchable database for consumers to obtain early warning of defective and dangerous products.

In 2000 and again in 2003, the CPSC documented cases of children suffering intestinal injuries after swallowing small but powerful magnets that had fallen out of toys. The public didn't know, and the CPSC did nothing.

By mid–2005, after more reports of safety concerns associated with the magnets and two reports of serious, life-threatening injuries, the public still didn't know and the CPSC still did nothing.

On Thanksgiving Day 2005, 22 month old Kenny Sweet of Redmond, Washington died after swallowing magnets that had fallen out of Magnetix toys. It was only after Kenny's death and an additional 4 hospitalizations that the CPSC finally gave the public an inkling of what was going on.

But it took until April 2007—after seven years of reports of risks, numerous serious injuries and a death—before a full recall of all the products was undertaken.

In the past months, we have learned of additional tragic accidents related to flawed or toxic products on store shelves. The fundamental problem that needed to be solved is that the people buying these products for their children, grandchildren or households should not have to wait months or years to find out that someone has died or been seriously injured.

The database created in this legislation will give empower consumers by requiring the CPSC to create a publicly searchable database that will allow them to access specific reports from consumers, doctors, hospitals or others of serious injury, illness or death, or risk of serious injury illness or death that may be due to a faulty or unsafe product. The database will be similar to those that already exist for cars and other automotive products at the National Highway Traffic Safety Administration and for drugs and medical devices at the Food and Drug Administration.

No longer will parents be learning about ''Thomas the Toxic Train,'' ''Defective Diego'' or ''Poisonous Polly Pocket'' months or years after the CPSC learns of them, and I thank the Conferees for including my proposal in the final bill.

I also want to particularly commend the Conferees for including strong whistleblower protections for private sector employees who are retaliated against for disclosing safety problems with defective products. These provisions are similar to those I authored for rail and mass transit security workers in the 9–11 bill, and represent an excellent step forward in ensuring that these brave individuals are treated like the ''Paul Reveres'' they are instead of being threatened with loss of their jobs and livelihoods.

I wish to point out that Congress did not reiterate long standing case law and established legal principles for interpreting statutory language in the whistleblower provision, and intends that those standards continue to be respected. To illustrate, consistent with long-established Supreme Court case law, see e.g., *English* v. *General Electric*, 496 U.S. 270 (1990), these rights do not cancel or replace preexisting remedies, whether under other overlapping congressional statutes, statute laws, state tort claims or collective bargaining agreements. There also should be no confusion that the rights created by this statute supersede and cannot be canceled and overridden by any conflicting restrictions in company manuals, employment contracts or nondisclosure agreements.

I also wish to note that consistent with the Act's remedial purposes and longstanding case law, employee should be broadly defined to protect all individuals, including current and former employees, as well as job applicants, who have information that may prevent danger to consumers from illegal product hazards.

Finally, section 102 which relates to third party testing, I am pleased that the Conferees included language that requires testing of samples that are identical in all material respects to the product, meaning that submitting product prototypes rather than actual examples of the manufacturing run for testing would not, in my view, satisfy the requirements of this section.

Once again, I wish to commend my colleagues for their excellent work on this landmark legislation. I look forward to a reinvigorated CPSC, equipped with the necessary resources and authority needed to be the consumer's ''cop on the beat'', keeping Americans safe from dangerous products.

Mr. WHITFIELD. Madam Speaker, I rise today in support of this conference report for the Consumer Product Safety Improvement Act.

To begin, I would like to thank Chairman BOBBY RUSH, the original author of this bill, for his tremendous leadership on this issue. He has been in our thoughts and prayers and we are extremely pleased to see he is back and recovering. I look forward to continuing our important work together.

I also would like to thank full Committee Chairman JOHN DINGELL and Ranking Member JOE BARTON for their collaborative work during this conference. Unfortunately, we have seen in recent history that the minority—on both sides of the aisle—have been shut out of conference negotiations. We are here today under the best of circumstances, and I credit this to their character and hard work.

Madam Speaker, we were all horrified at the number of children's products that were recalled last year. I am glad the Commission worked so hard to get those potentially dangerous products off the store shelves and this bill will make that important job easier and more effective.

When parents purchase toys the last thing they should be worried about are toxic levels of lead, potential chemical side effects from accidentally swallowing a toy, or similar health hazards.

Both chambers acted swiftly to approve legislation—and I might add the House voted unanimously—to better fund and equip the Consumer Product Safety Commission (CPSC) so they can help prevent another ''year of the recall.''

Today's conference report represents months of work to get a strong but reasoned bill that protects our children, and to send it to the President for his signature into law. Among other provisions, the conference report sets the toughest lead standard for children's products in the world. We require the CPSC to lower allowable lead to only trace amounts, and task them to revise this standard downward if it is technologically possible. We also require mandatory third party testing for children's products to ensure compliance with CPSC regulations and standards.

As I mentioned, the conferees acknowledged that the CPSC has been underfunded and understaffed for years. To alleviate that, we increase the authorization levels significantly in the first year and then by approximately 7 percent for each of the next 4 years. These new resources will allow the Commission to hire additional staff and update their laboratory to help them do their job more effectively. This conference report also increases the penalties for bad actors and enhances the authority of State Attorneys General to seek appropriate injunctive relief, so that dangerous children's products don't make it into the hands of our kids and grandkids.

Finally, I would like to address one of the more controversial provisions relating to a group of chemical plasticizers known as phthalates. Most of us in Congress are not scientists; however, concerns were raised that some phthalates could potentially be harmful to young children and pregnant mothers.

While I support restricting the use of the certain phthalates that many scientists agree are harmful, I have some concerns about the interim prohibition on other phthalates that are considered to be safe. We obviously do not want to replace one safe plasticizer with a lesser known and potentially more harmful one. However, I am pleased that we asked the CPSC to quickly form an expert panel to review these phthalates and their alternatives to ensure we get it right.

I also would just like to note that the conferees on both sides of this issue worked in good faith to find a true compromise on this section, and I believe they all should be commended for their hard work and open mindedness.

I would also like to briefly mention the issue of Federal preemption. While this is sometimes a contentious issue, I believe that it is important that businesses are given some certainty as to what rules they must follow, and who will be enforcing those rules. A confusing patchwork of State laws ultimately benefits no one.

So, I am glad that this conference report preempts State standards—notably for lead, lead paint and the phthalates I mentioned—and that the authority of the State Attorneys General is appropriately limited to ensure that enforcement is swift, efficient, and consistent across the country. All of the children in America will be protected equally and vigorously.

Madam Speaker, I strongly support this conference report as the compromise product of a good process. In closing, I would again just like to thank all the members of the conference committee on both sides of the Capitol and their staffs, including my own staff, James Robertson, for working tirelessly to produce a law that will maximize our opportunity to protect children from dangerous toys and products.

Mr. VAN HOLLEN. Madam Speaker, I rise in strong support of this conference report and commend the conferees for their decision to prioritize public health in this final legislation.

At the end of last year, as the country was awash in reports of unsafe levels of lead being found in children's toys, I expressed the hope that this Congress' final CPSC Reform bill would embrace the improved recall notice and strengthened enforcement authority in the House-passed bill while going beyond the House-passed legislation to broaden the scope of mandatory product testing, enhance a family's right to know about dangerous and defective products on the market, and provide robust whistleblower protections for those courageous enough to bring serious safety hazards to light.

After months of negotiations, I am gratified that this conference report accomplishes all of these objectives. H.R. 4040 retains the House bill's original focus on ensuring meaningful public notice for product recalls and empowering states' Attorneys General to help enforce Federal law. Additionally, today's conference report requires mandatory pre-market safety testing for lead and other safety standards in toys, cribs and other children's products—without preempting stronger State protocols like those we have in Maryland. It requires the CPSC to create a searchable and user-friendly public database on deaths and serious injuries resulting from consumer products so that parents have access to the information they need to protect themselves and their children. And it provides important whistleblower protections to private sector employees who report violations of CPSC-enforced product safety requirements.

Finally, this legislation takes the long overdue step of banning lead above truly minute amounts from products intended for children under twelve, and it outlaws a number of dangerous chemicals called phthalates from children's toys and child care items.

Madam Speaker, this conference report represents a vitally important bipartisan agreement on behalf of America's families. I urge a ''yes'' vote.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and agree to the conference report to the bill, H.R. 4040.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. BARTON of Texas. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1338, PAYCHECK FAIRNESS ACT

Mr. HASTINGS of Florida, from the Committee on Rules, submitted a privileged report (Rept. No. 110–807) on the resolution (H. Res. 1388) providing for consideration of the bill (H.R. 1338) to amend the Fair Labor Standards Act of 1938 to provide more effective remedies to victims of discrimination in the payment of wages on the basis of sex, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF CONFERENCE REPORT TO ACCOMPANY H.R. 4137, HIGHER EDUCATION OPPORTUNITY ACT

Mr. HASTINGS of Florida, from the Committee on Rules, submitted a privileged report (Rept. No. 110–808) on the resolution (H. Res. 1389) providing for consideration of the conference report to accompany the bill (H.R. 4137) to amend and extend the Higher Education Act of 1965, and for other purposes, which was referred to the House Calendar and ordered to be printed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings

will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 1108, de novo;

Conference report on H.R. 4040, by the yeas and nays.

The first electronic vote will be conducted as a 15-minute vote. The second electronic vote will be conducted as a 5-minute vote.

FAMILY SMOKING PREVENTION AND TOBACCO CONTROL ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 1108, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and pass the bill, H.R. 1108, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. BARTON of Texas. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 326, nays 102, not voting 6, as follows:

Messrs. SULLIVAN, SOUDER, CARTER, WALBERG and ISSA changed their vote from ''yea'' to ''nay.''

Mrs. JONES of Ohio, Mr. TIAHRT and Ms. FALLIN changed their vote from ''nay'' to ''yea.''

□ 1836

So (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4040, CONSUMER PRODUCT SAFETY IMPROVEMENT ACT OF 2008

The SPEAKER pro tempore (Mr. CUELLAR). The unfinished business is the vote on the motion to suspend the rules and agree to the conference report to the bill, H.R. 4040, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and agree to the conference report to the bill, H.R. 4040.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 424, nays 1, not voting 9, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members, there are 2 minutes remaining on this vote.

□ 1845

So (two-thirds being in the affirmative) the rules were suspended and the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2260

Mr. BOREN. Mr. Speaker, I ask unanimous consent to remove my name from H.R. 2260.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

EMPLOYEE VERIFICATION AMENDMENT ACT OF 2008

Ms. ZOE LOFGREN of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6633) to evaluate and extend the basic pilot program for employment eligibility confirmation and to ensure the protection of Social Security beneficiaries.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6633

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Employee Verification Amendment Act of 2008''.

SEC. 2. EXTENSION OF PROGRAMS.

Section 401(b) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note) is amended by striking ''11-year period'' and inserting ''16-year period''.

SEC. 3. PROTECTION OF SOCIAL SECURITY ADMINISTRATION PROGRAMS.

(a) FUNDING UNDER AGREEMENT.—Effective for fiscal years beginning on or after October 1, 2008, the Commissioner of Social Security and the Secretary of Homeland Security shall enter into and maintain an agreement which shall—

(1) provide funds to the Commissioner for the full costs of the responsibilities of the Commissioner under section 404 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note), including (but not limited to)—

(A) acquiring, installing, and maintaining technological equipment and systems necessary for the fulfillment of the responsibilities of the Commissioner under such section 404, but only that portion of such costs that are attributable exclusively to such responsibilities; and

(B) responding to individuals who contest a tentative nonconfirmation provided by the basic pilot confirmation system established under such section;

(2) provide such funds quarterly in advance of the applicable quarter based on estimating methodology agreed to by the Commissioner and the Secretary (except in such instances where the delayed enactment of an annual appropriation may preclude such quarterly payments); and

(3) require an annual accounting and reconciliation of the actual costs incurred and the funds provided under the agreement, which shall be reviewed by the Office of Inspector General of the Social Security Administration and the Department of Homeland Security.

(b) CONTINUATION OF EMPLOYMENT VERIFICATION IN ABSENCE OF TIMELY AGREEMENT.—In any case in which the agreement required under subsection (a) for any fiscal year beginning on or after October 1, 2008, has not been reached as of October 1 of such fiscal year, the latest agreement between the Commissioner and the Secretary of Homeland Security providing for funding to cover the costs of the responsibilities of the Commissioner under section 404 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note) shall be deemed in effect on an interim basis for such fiscal year until such time as an agreement required under subsection (a) is subsequently reached, except that the terms of such interim agreement shall be modified by the Director of the Office of Management and Budget to adjust for inflation and any increase or decrease in the volume of requests under the basic pilot confirmation system. In any case in which an interim agreement applies for any fiscal year under this subsection, the Commissioner and the Secretary shall, not later than October 1 of such fiscal year, notify the Committee on Ways and Means, the Committee on the Judiciary, and the Committee on Appropriations of the House of Representatives and the Committee on Finance, the Committee on the Judiciary, and the Committee on Appropriations of the Senate of the failure to reach the agreement required under subsection (a) for such fiscal year. Until such time as the agreement required under subsection (a) has been reached for such fiscal year, the Commissioner and the Secretary shall, not later than the end of each 90-day period after October 1 of such fiscal year, notify such Committees of the status of negotiations between the Commissioner and the Secretary in order to reach such an agreement.

SEC. 4. GAO STUDY OF BASIC PILOT CONFIRMATION SYSTEM.

(a) IN GENERAL.—As soon as practicable after the date of the enactment of this Act, the Comptroller General of the United States shall conduct a study regarding erroneous tentative nonconfirmations under the basic pilot confirmation system established under section 404(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note).

(b) MATTERS TO BE STUDIED.—In the study required under subsection (a), the Comptroller General shall determine and analyze—

(1) the causes of erroneous tentative nonconfirmations under the basic pilot confirmation system;

(2) the processes by which such erroneous tentative nonconfirmations are remedied; and

(3) the effect of such erroneous tentative nonconfirmations on individuals, employers, and Federal agencies.

(c) REPORT.—Not later than 2 years after the date of the enactment of this Act, the Comptroller General shall submit the results of the study required under subsection (a) to the Committee on Ways and Means and the Committee on the Judiciary of the House of Representatives and the Committee on Finance and the Committee on the Judiciary of the Senate.

SEC. 5. GAO STUDY OF EFFECTS OF BASIC PILOT PROGRAM ON SMALL ENTITIES.

(a) IN GENERAL.—Not later than 2 years after the date of the enactment of this Act, the Comptroller General of the United States shall submit to the Committees on the Judiciary of the United States House of Representatives and the Senate a report containing the Comptroller General's analysis of the effects of the basic pilot program described in section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note) on small entities (as defined in section 601 of title 5, United States Code). The report shall detail—

(1) the costs of compliance with such program on small entities;

(2) a description and an estimate of the number of small entities enrolled and participating in such program or an explanation of why no such estimate is available;

(3) the projected reporting, recordkeeping and other compliance requirements of such program on small entities;

(4) factors that impact small entities' enrollment and participation in such program, including access to appropriate technology, geography, entity size, and class of entity; and

(5) the steps, if any, the Secretary of Homeland Security has taken to minimize the economic impact of participating in such program on small entities.

(b) DIRECT AND INDIRECT EFFECTS.—The report shall cover, and treat separately, direct effects (such as wages, time, and fees spent on compliance) and indirect effects (such as the effect on cash flow, sales, and competitiveness).

(c) SPECIFIC CONTENTS.—The report shall provide specific and separate details with respect to—

(1) small businesses (as defined in section 601 of title 5, United States Code) with fewer than 50 employees; and

(2) small entities operating in States that have mandated use of the basic pilot program.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. ZOE LOFGREN) and the gentleman from Texas (Mr. SMITH) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. ZOE LOFGREN of California. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and to include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. ZOE LOFGREN of California. I yield myself such time as I may consume.

I rise today in support of H.R. 6633. This bill, negotiated by Members of both parties, will extend the basic pilot, otherwise known as the E-Verify program, for 5 years, while also ensuring that the Social Security Administration can continue to participate in the program without endangering its core mission of providing needed benefits to our seniors and the disabled. Without this bill, the authorization for the basic pilot program would expire this November.

H.R. 6633 also commissions two studies, which should help Congress evaluate the basic pilot program as it continues to work through the issues raised by the electronic employment eligibility verification systems. One of the studies seeks the causes, the remedies, and the effects of tentative nonconfirmations of employment eligibility. Implicit in the concept of false negatives is the converse; false positives. We naturally contemplate that the GAO study will address the question of erroneous confirmations as well.

To understand the effectiveness of the basic pilot, we must not only know about U.S. workers falsely denied the authority to work, we must also know when it clears people who are not authorized to work.

This Congress has been very active on the issue of electronic employment verification. Several committees, including the Judiciary and Ways and Means Committees, have held no less than five hearings on the subject. The Judiciary Committee alone held three hearings over the past year on electronic employment verification.

In those hearings, we have learned that because the Department of Homeland Security relies on the Social Security Administration's databases and staff to query work authorization and fix erroneous records, the basic pilot program places significant burdens on the Social Security Administration. We don't want to jeopardize SSA's ability to carry out its core mission, which is to provide benefits to America's senior citizens and disabled Americans.

We confirmed that electronic employment verification systems pose complicated issues; issues with serious consequences for American workers who could lose their jobs and even their right to work if employment verification isn't done right.

We heard testimony in April, 2007, from the Service Employees International Union, in which we learned that, and I quote, ''Unless database errors are cured, 24,000 of the 300,000 estimated workers in each congressional district would be erroneously denied eligibility to work by basic pilot.'' That is 24,000 Americans and legal workers in each of our districts who could be stripped of their right to work because the government can't design a proper verification system.

An independent evaluation of the basic pilot program commissioned by the Department of Homeland Security and conducted by Westat identified numerous issues with how the basic pilot program works. The Westat report documented abuse and misuse of basic pilot by employers. For example, 22 percent of employers who responded to Westat's survey recorded that they restricted work assignments to employees contesting tentative non-confirmations. It also noted significant privacy concerns in the program.

In short, we have learned that there is much work still to be done and there are many questions left to be answered. Based on these findings, I do not believe that we can permanently reauthorize the basic pilot program or make it mandatory at this time. But as we continue to work comprehensively to reform our immigration system, we certainly should allow the basic pilot to continue as a voluntary program.

I would like to especially thank my colleagues, MIKE MCNULTY from New York; LAMAR SMITH from Texas; and SAM JOHNSON from Texas, for their tremendous efforts in working to negotiate this consensus bill to bring it to the floor today, as well as the author, Congresswoman GIFFORDS, and the principal Republican cosponsor, Congressman CALVERT, whose leadership is truly remarkable.

I look forward to working with my colleagues to reform our Nation's immigration laws and to improve the electronic employment verification process. We certainly hope that our efforts will be bipartisan. If all goes well to refine and improve this system going forward, it will not take the 5 years that is provided for in this act. But certainly none of us wants the current system to go away while we continue to work to improve and get an even better system.

I think that this bipartisan bill is necessary to pass. I urge my colleagues to support it.

I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to first thank Congressman CALVERT for introducing the original bill on which this legislation was based, and for sponsoring this legislation as well. Also, thanks go to Chairwoman LOFGREN, who just spoke; Ranking Members MCCRERY and JOHNSON, and Chairman RANGEL for reaching a compromise on such an important issue.

The E-Verify Program protects American workers by ensuring that jobs are reserved for legal workers. The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 created the basic pilot program, which is now known as E-Verify. For the last decade, this program has provided American employers who want to do the right thing with an effective way to ensure that they are hiring a legal workforce. It ensures that new employees are not providing their employers with fake Social Security numbers.

As the E-Verify Program has grown more popular—over 69,000 employers nationwide now participate—it has become the subject of some very unfair criticism. To set the record straight, participating employers are happy with

the basic pilot program. Last year, an outside evaluation determined that ''most employers found the Web basic pilot to be an effective and reliable tool for employment verification'' and that an amazing 96 percent did not believe that it overburdened their staffs.

The accuracy of the databases that lie at the heart of the basic pilot program also has been unfairly maligned. However, the facts about these databases could not be more encouraging.

Last year's outside evaluation found that in less than 1 percent, only .6 percent of cases, do employees who were eventually determined to be work-authorized undergo secondary verification. This means that persons eligible to work receive immediate confirmation 99.4 percent of the time. For the native-born, 99.9 percent receive immediate confirmation. For employees born outside of the U.S., 97 percent receive immediate confirmation. That is a success rate any company in America would be happy to have.

A common misperception is that secondary verification means error by a Federal agency. That is simply not the case. Secondary verification usually means that an illegal immigrant has been caught providing false information or that an employee has failed to update their records with the Social Security Administration. This is seldom acknowledged by those who question the E-Verify Program.

Of the employees who were asked to contact local Social Security Administration offices as part of the verification process, 95 percent said their work authorization problem was resolved in a timely, courteous, and efficient manner.

Finally, it has been alleged that the Social Security Administration's Inspector General has found the agency's database to be inaccurate. However, the Inspector General actually stated, ''We applaud the agency on the accuracy of the data we tested.''

The legislation before us tonight reauthorizes the E-Verify Program for 5 years and puts in place a system to help ensure that the Department of Homeland Security covers the cost of the program.

It is hard to believe that those who attack E-Verify are serious about reducing illegal immigration or saving American jobs.

Mr. Speaker, I am pleased that the bill is on the House floor. I urge my colleagues to support it.

I reserve the balance of my time.

Ms. ZOE LOFGREN of California. Mr. Speaker, MIKE MCNULTY has served our country well for many years. He will be retiring at the end of this Congress. One of the things he has stuck up for most was disabled workers who need their Social Security benefits. As a member of the Ways and Means Committee, he has worked very hard on this issue.

I would yield 4 minutes to the gentleman from New York (Mr. MCNULTY).

Mr. MCNULTY. I thank the gentlewoman from California for her kind comments, and also the gentleman from Texas, both of them, for their very hard work on reaching this bipartisan consensus.

Mr. Speaker, I rise in support of the bill to extend the basic pilot program, also known as E-Verify. I wish to especially thank my friend, the ranking member of the Subcommittee on Social Security, SAM JOHNSON, for his longstanding service to the Nation and for his steadfast support of the effort to protect seniors, people with disabilities, and survivors. Together, we have worked since the start of this Congress to provide needed funding for the Social Security Administration to address unacceptable backlogs in disability hearings and the decline in the service to our constituents. Moreover, we must ensure that SSA is ready for the retirement of the Baby Boom generation.

SSA has struggled to meet an increasing workload despite a decade of underfunding. Congress only recently increased funding to help address the backlog of disability claims, and we are working to continue that trend. It will take sustained adequate funding for SSA to meet the challenges of reducing its backlog while keeping pace with growing workloads.

SSA plays a significant role in the E-Verify pilot program, which is rapidly growing under DHS's direction. There is broad consensus that SSA must be paid for this work. The legislation before us provides essential protections for seniors, people with disabilities, and survivors who need Social Security benefits to meet their daily expenses. It does so by ensuring that DHS and SSA enter into annual agreements that require DHS to pay SSA in full and on a timely basis for its E-Verify related expenses.

□ 1900

I would like to thank our colleagues on the Judiciary Committee who worked with us to include language in this bill to provide for full and timely payment to SSA for its role under the E-Verify program. This is a bipartisan bill, and I urge my colleagues to support it.

Mr. Speaker, I rise in support of this bill to extend the ''basic pilot'' program, also known as ''E-Verify.''

I wish to thank my friend, the Ranking Member of the Subcommittee on Social Security Mr. JOHNSON, for his long-standing service to the Nation and for his steadfast support of the effort to protect seniors, people with disabilities, and survivors.

Together, we have worked since the start of this Congress to provide needed funding for the Social Security Administration to address unacceptable backlogs in disability hearings and the decline in service to our constituents. Moreover, we must ensure SSA is ready for the retirement of the Baby Boom generation.

SSA has struggled to meet an increasing workload despite a decade of underfunding. Congress only recently increased funding to help address the backlog of disability claims, and we are working to continue that trend. It will take sustained adequate funding for SSA to meet the challenge of reducing its backlog while keeping pace with growing workloads.

In light of these difficulties, we have been concerned about whether SSA has been provided the necessary resources by DHS to meet its rapidly growing workload under the E-Verify program.

I thank our colleagues on the Judiciary Committee, who worked tirelessly with us to include language in this bill to provide for full and timely payment to SSA for its role under the E-Verify program.

The Social Security Act prohibits the use of Social Security program funds for non-program related purposes. Therefore, SSA executes reimbursement agreements with other agencies whenever SSA performs work on their behalf.

SSA plays a significant role in the E-Verify pilot program. Every query made by the system is run through SSA data and systems first. Every time there is a mismatch between the information sent via E-Verify and the SSA database, employees are told to contact SSA. Many must visit SSA field offices to show necessary proof of identity or work-authorization.

For this work, DHS is required to reimburse SSA. Yet the reimbursements have not always been made in a timely way. For example, the reimbursement for FY2006 was finally agreed upon within the last few weeks. Consequently, SSA has been forced to pay for the work using scarce Social Security administrative dollars, which are meant to be used to serve Social Security program participants.

At the same time, E-Verify is growing as some States and the Administration require more employers to enroll in the system.

The legislation before us provides essential protections for seniors, people with disabilities and survivors who need Social Security benefits to meet their daily expenses. It does so by ensuring that DHS and SSA enter into annual agreements that require DHS to pay SSA, in full and on a timely basis, for its E-Verify related expenses.

It also includes an important GAO study on erroneous tentative non-confirmations by the E-Verify system that are the primary cause of SSA's expenses. I am confident that the results of this study will help Congress improve the program in the next few years before it is expanded any further.

I support this bipartisan bill and urge my colleagues to support this legislation.

Mr. Speaker, now I would like to yield to my friend the gentleman from Texas, SAM JOHNSON, a great American patriot and hero, for a colloquy.

Mr. SAM JOHNSON of Texas. Thank you, Mr. MCNULTY. I will tell you what, you are a protector of our future with Social Security, and there is nothing in this bill, thanks to the Judiciary people on both sides, that changes the Social Security Act or the laws and rules governing the use of Federal appropriations. Therefore, the current prohibition on Social Security's use of its limitation on administrative expenses, known as LAE, on trust fund monies for non-program purposes, remains in effect.

Is that the understanding of the chairman?

Mr. MCNULTY. The gentleman is correct. Nothing in this bill changes

current law regarding how the LAE or trust funds may be used.

Mr. SAM JOHNSON of Texas. It is my understanding that the Social Security Act is quite specific with respect as to how Social Security's own funds, that is, trust funds and LAE, can be used, is that correct?

Mr. MCNULTY. Mr. Speaker, the ranking member raises an excellent point. Section 201(g) of the Social Security Act does prohibit SSA from spending its own funds on anything other than the programs it is responsible for administering.

Mr. SAM JOHNSON of Texas. So Social Security would not be able to pay for E-Verify expenses if there weren't agreements with DHS that require that Department to pay Social Security expenses; is that correct?

Mr. MCNULTY. Yes, that is right. Section 201 of the Social Security Act allows SSA to spend its trust fund and LAE moneys only to pay and administer Social Security benefits, special veterans benefits, SSI and Medicare. Verifying employment eligibility does not fall into any of those categories.

Mr. SAM JOHNSON of Texas. I thank the chairman for his supportive efforts to protect the Social Security programs and beneficiaries. We all recognize E-Verify is an important tool. We have to balance that recognition with the needs of our seniors, those with disabilities and others who depend on Social Security for their basic needs.

Mr. MCNULTY. I want to close by thanking Representative JOHNSON for his long military service, for enduring torture for all the people of this country, and for his excellent work as an elected public official.

Mr. SMITH of Texas. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. CALVERT), a member of the Appropriations Committee, a sponsor of the bill that we are considering tonight, and the author of the legislation on which the bill tonight is based.

Mr. CALVERT. Mr. Speaker, I rise in support of H.R. 6633. As the original author of E-Verify in 1996, I have monitored the development of the program closely over the last 12 years. It has evolved from a humble five-State pilot program to a program that is available nationwide with over 78,000 employers participating.

All employers in the United States are required by law to hire legal workers. E-Verify is the only tool available to employers to check the work status of newly-hired employees. It is timely, user-friendly, free to employers, and 99.5 percent accurate. In fact, 94.2 percent of checks to the system receive an instant green light to work.

To date, for fiscal year 2008, over 5 million queries to the system have been run successfully. A total of 3.2 million queries were made for fiscal year 2007, and 1.7 million queries were made for fiscal year 2006. Two States, Arizona and Mississippi, have made E-Verify mandatory, and almost all 50 States have legislation pending that would require the use of E-Verify at some level in the State. Individuals who receive a tentative non-confirmation have eight business days to contact the Social Security Administration or the Department of Homeland Security to start the process to clarify that status.

DHS has also implemented the Photo Tool program for noncitizens who are authorized to work in the United States. The Photo Tool allows employers to check the photo presented on the employment authorization document with a photo in the DHS database.

As the State of Arizona has demonstrated, E-Verify prevents individuals here illegally from obtaining work, and it solves the problem of deportation, since most people choose to self-deport when they are unable to find a job. E-Verify has proved it is effective, and it is imperative we do not let the program expire on November 30 of this year.

H.R. 6633 extends E-Verify for an additional 5 years and requires two GAO reports that I believe will reaffirm the effectiveness and accuracy of this program. This legislation codifies the annual payment agreement between the Department of Homeland Security and the Social Security Administration to ensure that SSA is receiving the funds necessary to run E-Verify.

I commend Representative GIFFORDS for her sponsorship of the bill. I thank Subcommittee Chairwoman LOFGREN, Ranking Member KING, Chairman CONYERS and Ranking Member SMITH for their work on this effort as well. The American people have voiced their strong support for E-Verify. I encourage my colleagues to vote for H.R. 6633 and extend E-Verify for an additional 5 years.

Ms. ZOE LOFGREN of California. Mr. Speaker, at this time I would like to recognize a member of the Judiciary Committee, SHEILA JACKSON-LEE, for 2 minutes, a valued member of our committee.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentlewoman, the chairwoman of the subcommittee, and chairman of our full committee as well, and certainly the ranking member and the ranking member of the subcommittee.

Let me also express my appreciation to Ms. GIFFORDS. We have talked about this legislation. I congratulate her for her leadership, along with the cosponsors, including Mr. CALVERT, Mr. MCNULTY and Mr. JOHNSON of my State, and all the others who are supporting this legislation.

If you talk to businesses in your community, they want to do the right thing, and Americans want the right process to be in place. It is important that we hire Americans first, and I think we have been committed to that during the whole period of the discussion of immigration reform.

But I also rise to say that it is important as we pass this legislation, giving it an extension, and I frankly believe it should not expire in November of 2008, we have to also understand that there are States where this is voluntary. I heard Mr. CALVERT say there are a number of States that will now put this in place through law, but there are a number of States that do not have it in place, and therefore it is confusing.

We need to be able to ensure that there is a comprehensive approach to the border security question that all of us agree with, but also to recognize the hard-working tax paying individuals who are here, who really should be put in a process, a line, that eliminates this undercover workforce, that allows a pathway to citizenship with paying of fines, getting in line, not getting ahead of those who have been in line, and having a period of time that they are in this country.

This particular basic pilot program, however, is vital for many of our businesses. For example, the construction industries that I have met with over and over again in Houston, Texas, and I know that have been engaged with Mr. JOHNSON and many in this Congress to try to move forward on this program that deals with the Social Security process.

We have to ensure, however, as we put this in place, that it works, that the technology works, that the oversight works, and we have to make sure that in fact we get the accurate reports to make sure that those who are using it are benefiting from it.

Mr. Speaker, I do ask my colleagues to support this legislation, but I also ask that we get to the point of comprehensive immigration reform. But as I say that, E-Verify is a good step, it is a positive step, and I know my business community will look forward it being in force.

Mr. SMITH of Texas. Mr. Speaker, I yield 3 minutes to my Texas colleague, SAM JOHNSON, who is the ranking member of the Social Security Subcommittee of the Ways and Means Committee.

Mr. SAM JOHNSON of Texas. Mr. Speaker, I want to thank Ms. ZOE LOFGREN and Mr. LAMAR SMITH. Those two worked well with us on Social Security, and I rise today to support the bill and extend the E-Verify program. The extension is, unfortunately, the least we can do to provide a workable tool for employers who want to do the right thing and verify that their new employees are authorized to work in this country. Americans need real immigration reform. We need to protect our borders and make sure Americans are not fighting for jobs with people who are here illegally.

This bill is a step in the right direction. We have got a long way to go. I support a mandatory nationwide electronic verification system so we don't have a patchwork of conflicting State and local laws. Protecting Social Security is always the right thing to do, so as the ranking member on the Ways and Means Social Security Subcommittee, I am pleased the bill includes provisions that ensure Social

Security and DHS agree on funding to support E-Verify.

However, I ask my colleagues, how long do we have to experiment with employment verification before Congress delivers a nationwide, mandatory, long-term solution that this country needs and the American people deserve?

Last February, I, along with several of my Ways and Means colleagues, introduced the New Employment Verification Act, or NEVA. Representative GIFFORDS and I have been working together on this bill that builds on the success of E-Verify while addressing its challenges.

I hope everyone interested in this debate will take the opportunity to look at the information on this bill on my website. When it comes to immigration, the American people want, need and expect real solutions, and American employers need a first class system that helps them comply with the law.

Ms. ZOE LOFGREN of California. Mr. Speaker, at this point I would like to yield 5 minutes to the author of the bill, a freshman leader in this area of the bill with Mr. JOHNSON, Congresswoman GIFFORDS from Arizona.

Ms. GIFFORDS. Thank you, Chairwoman Lofgren, for all of your help in bringing the Employment Verification Amendment Act, H.R. 6633, to the floor today. This legislation is the result of a lot of hard work from Members on both sides of the aisle, and I appreciate the fact that Members have joined together to reauthorize the Department of Homeland Security's Basic Pilot Electronic Employment Eligibility Verification Program, also known as E-Verify. I particularly appreciate that this legislation calls for investigations into various aspects of E-Verify and ensures that we safeguard Social Security.

E-Verify was one of three employee verification pilot programs created in 1997, and it has remained a voluntary program at the Federal level for 11 years with actually very few employers enrolled. However, recent actions at the State and the Federal levels are increasing demand on E-Verify and the Social Security system that it relies on. In the last 2 years, over a dozen States have passed employee verification laws, and some, like my home State of Arizona, have mandated E-Verify for all employers and imposed severe sanctions against those who do not comply.

The administration is also increasingly requiring E-Verify's use. On June 6, 2008, President Bush signed an amendment to an executive order requiring more than 200,000 Federal contractors to use E-Verify.

E-Verify relies on the Social Security Administration's data and systems to verify the citizenship and Social Security numbers of all newly hired individuals for their eligibility to work. According to the GAO, 100 percent of E-Verify queries are first checked against the Social Security database. The need to reauthorize the E-Verify this year presented us with an important opportunity to focus on key components of our Nation's immigration crisis, that is, the need for an effective Federal employee work authorization system.

□ 1915

I have been very clear that the current E-Verify system needs to be replaced or reformed. We need to create a mandatory Federal system that is both reliable and effective.

Americans from across the country all agree that our farms, our factories, and other businesses should not abet the flow of illegal immigrants into the United States by providing them a place to work. Yet the Federal Government has failed on many accounts to enforce existing immigration laws. That forces local and State governments to do the Federal Government's work. Employment verification is vital to solving our immigration crisis, and that is why we are here today. Right now, the only options for States is E-Verify. It is still, though, a voluntary pilot program with some obvious flaws. As I have testified to three House committees, we can do better.

But while this debate continues, E-Verify will expire this November. That is why I have introduced the Employee Verification Amendment Act to extend E-Verify, but only for 5 years. By reauthorizing E-Verify for 5 years instead of the 10, we can move to a Federal mandatory system more quickly. Within 5 years or less, the Federal Government must develop a mandatory system that operates uniformly across all 50 States. This is critical to fixing our broken immigration system.

Developing the best mandatory system possible requires us to understand the pitfalls in the current E-Verify system, and that is why this bill includes some studies into how E-Verify impacts small businesses and accurately confirms workers' eligibility.

Congress has to learn from the experience of employers and employees in States like Arizona. We are on the front lines of this immigration debate. Lessons learned from Arizona will help us develop a mandatory program that can identify undocumented workers in an efficient manner without fostering identity theft or violating workers' rights of United States citizens.

This bill also requires DHS to provide timely and appropriate payments to Social Security. In order for E-Verify or any employee verification system to work, the Social Security database and system has to have the funding that it needs to handle the increased demand created by a verification system.

The Social Security protections in this bill will keep E-Verify operational. They will also prevent interference with Social Security services to seniors, people with disabilities, and also to survivors. The AARP and the National Committee to Preserve Social Security and Medicare sent letters to the Ways and Means Committee reflecting these concerns.

Before I close, again I want to thank Congresswoman ZOE LOFGREN for bringing this bill to the floor. I also want to thank Representatives MICHAEL MCNULTY, SAM JOHNSON, LAMAR SMITH, and KEN CALVERT as well as for their leadership on the bill and all of the staff's hard work.

Illegal immigration continues to be a major problem for the United States of America. The Employee Verification Amendment Act is a step forward towards solving one aspect of the problem. This is the best approach at this critical time, and I urge my colleagues to support this legislation.

AARP,
Washington, DC, July 29, 2008.

Hon. CHARLES B. RANGEL,
Chairman, Committee on Ways and Means, House of Representatives, Longworth House Office Building, Washington, DC.

Hon. JIM MCCRERY,
Ranking Member, Committee on Ways and Means, House of Representatives, Longworth House Office Building, Washington, DC.

DEAR CONGRESSMEN: On behalf of AARP's nearly 40 million members, we write in support of the Social Security Administration (SSA) funding provision contained in the e-verify extension bill. At a time when Social Security recipients and applicants are facing ever-greater delays in the prompt delivery of needed services, and disabled Americans are enduring long waits for their earned benefits, it is critical to secure SSA funding for all the administrative tasks the agency performs. The SSA funding provision of the bill specifically gives the agency greater assurance that it will be timely and appropriately reimbursed by the Department of Homeland Security (DHS) for expenditures the SSA undertakes in administering the employee verification program on behalf of the DHS. Ensuring that SSA receives prompt reimbursement for these expenditures is critical to the successful extension of the employee verification program, as well as to protecting the integrity of core services delivered by the agency.

The SSA funding provision in this legislation does not depart from the original funding framework established when the employee verification program was created. The Department of Homeland Security, and not the Social Security Administration, has always had the responsibility for funding the employee verification program, The SSA funding provision clarifies the funding relationship by establishing a quarterly advance payment as well as an annual accounting and reconciliation of expenditures. Without full and timely payments from the DHS (which in recent fiscal years have not been forthcoming), the SSA is forced to rely on its own administrative funding to operate the employee verification program. Given that the agency already suffers from significant administrative funding shortfalls which affect millions of Social Security recipients and applicants, this is unacceptable.

The establishment of a clear statutory reimbursement process for administrative tasks, such as e-verify, which the SSA performs for other departments and agencies could meaningfully contribute to the health of the agency's administrative budget, and by extension, to the quality and timeliness of the services the SSA delivers to Social Security recipients and applicants. We urge you to adopt legislation that gives the SSA the funding it needs to administer e-verify

without endangering the quality of services the agency provides to workers and beneficiaries.

If you have any further questions, feel free to call me, or please have your staff contact Cristina Martin Firvida of our Government Relations and Advocacy staff.

Sincerely,

DAVID P. SLOANE,
Senior Vice President,
Government Relations and Advocacy.

NATIONAL COMMITTEE TO PRESERVE SOCIAL SECURITY AND MEDICARE,
Washington, DC, July 14, 2008.

Hon. CHARLES B. RANGEL,
Committee on Ways and Means,
Longworth House Office Building, Washington, DC.

DEAR CHAIRMAN RANGEL: The National Committee to Preserve Social Security and Medicare understands that the Judiciary Committee intends, in the near future, to bring to the House floor legislation to extend the current E-Verify program, jointly administered by the Department of Homeland Security (DHS) and the Social Security Administration (SSA). The National Committee strongly urges the inclusion of language in the legislation that would ensure that SSA is being fully and timely reimbursed by DHS for its costs of administering the E-Verify system.

We are very concerned about the negative consequences of unreimbursed immigration workloads on an already overburdened Social Security Administration. For every dollar that goes uncompensated, a dollar is diverted from SSA's central mission of serving its own beneficiaries—the elderly, people with disabilities, and workers of all ages who have contributed and earned the right to collect Social Security benefits in a timely manner. As you know, SSA's resources are already being stretched thin by a disability backlog challenge. As a result, strains are being placed on other agency services, especially those in local offices where customers are experiencing long waits and unanswered phones. As always, SSA employees are making a strong effort to maintain their traditional quality service, but it is becoming increasingly difficult.

Unfortunately, Social Security has not always been fully or timely reimbursed for the costs of the E-Verify program. Agreements are negotiated annually between DHS and SSA. However, SSA is often left bearing the burden of these costs. For example, in FY 2005, SSA received only 80 percent of its actual costs. For FY 2006, DHS failed to reimburse SSA for any of its expenses. For FY 2008, costs remain in negotiation. Clearly, these failures are affecting the resources available to SSA for services to Social Security beneficiaries.

Earlier this year, I testified before the Subcommittee on Social Security opposing the expansion of the E-Verify program to a national employment verification system because I believe it is a significant mistake to require SSA to take on the burden of verifying the work status of every American for immigration-related purposes. At that time, I noted that the National Committee was not taking a position on the underlying goals of any immigration bill before the Congress. Similarly, the National Committee is not taking a position on the extension of the current voluntary E-Verify program. However, we do believe that it would be a serious disservice to America's seniors, people with disabilities, and other core customers of the agency if the current E-Verify program were extended without including language to ensure that SSA is being fully and timely reimbursed by DHS for the significant costs of this unrelated immigration workload.

Cordially,

BARBARA B KENNELLY,
President & CEO.

Mr. SMITH of Texas. Mr. Speaker, first of all I would like to thank the gentlewoman from Arizona for her comments and her endorsement of this bill.

I yield now 3 minutes to the gentleman from Iowa (Mr. KING) who is the ranking member of the Immigration Subcommittee of the Judiciary Committee.

Mr. KING of Iowa. Thank you, Mr. SMITH, for your long work on immigration issues. I often come across legislation that was put in place during the nineties in particular and find out what kind of wisdom was there.

I want to also thank the Chair of the Immigration Subcommittee and the support on both sides of the aisle for bringing this 5-year reauthorization of E-Verify to the floor. But I especially want to thank KEN CALVERT. It is a rare legislator that has the vision to put something in place that has the legacy that has already been created by E-Verify. His face and his name will be forever identified with this policy, which I think is the smartest, most technologically adaptive, and the most useful tool that we have for employers that want to hire legal workers in America.

I look at this and I think, this is a reauthorization. It is a status quo. I would have liked to have had an opportunity to upgrade E-Verify, because we know a lot of things now that we didn't know when it was put in place.

One of the things that we know are 98.6 percent of the names that are submitted in through E-Verify on the computer database; and, by the way, I have it in my office and I have run it and operated it and I am familiar with its inner workings in a way—98.6 percent of the first requests are approved. Remaining in that 1.4 percent are people who are not authorized to work in the United States and that very small piece of the database that does need to be upgraded. 99.9 percent of those that are born in the United States and are American citizens and are legal to work here are approved the first time through.

So that remains in those statistics those who aren't authorized to work, who may be here illegally, or those who are here legally that aren't authorized to work. And the balance of that is mostly people who have gotten married and women who have not changed their name and the database doesn't match. USCIS has brought that up to speed here within the last several months and set it up so that their database search goes out to two different categories. It looks for those name changes that have to be cleaned up. And the other are naturalized citizens. Sometimes the paperwork of naturalized citizens doesn't catch up in time, and there has been a little delay gap that has caused a little bit of error. That gap has been narrowed substantially by I think a good technological move by USCIS.

What I would have liked to have seen is that we reauthorize E-Verify and provide that employers can simply check those prospective employees and make it a condition that E-Verify could be used with a job offer. Not hire the person and wait for the answer in the 8 days to come back but make a job offer conditional to an E-Verify approval. And I believe an employer should be able to use E-Verify for current employees.

Those two changes would have gone a long way towards allowing an employer to verify that their entire employee base is legal. Otherwise, under the circumstances that we have, an employer is compelled to hire someone and then find out if they are legal. I think that is the wrong message to send.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SMITH of Texas. I yield the gentleman an additional 2 minutes.

Mr. KING of Iowa. I thank the gentleman from Texas.

I support this reauthorization, but I submit that we can do better. When you require an employer in the United States to hire someone blindly as to whether they will be a legal or an illegal employee, and then after they hire them and put them on the payroll and set them up for the salary and benefits package, then they get to put the request in to go out through the Internet database, search the Department of Human Services' database, the Social Security Administration's database, and have it come back verified or not verified, that is the wrong side of this equation. I want it on the right side. I want an employer to be able to say, I didn't hire anyone illegally. But we put them in a bad position with this.

We could have done better. We could have upgraded. But this is a very, very good tool. To add to this, I am hopeful that and do expect that we will see USCIS link to E-Verify the digital photographs of those who are here working on a green card and those kind of cases. If we are able to do that, then we can verify that the face of the individual who presents the documents actually matches the documents of the individual. That is another improvement that comes along hopefully administratively.

Additionally, I will add to this that I am extra invested in E-Verify, because I have introduced legislation and will reintroduce it again this week that is called the New IDEA Act. That lets the IRS come into this mix, deny Federal deductibility for wages and benefits paid to illegals, gives safe harbor to employers that use E-Verify, and now it puts together the team and requires the IRS to communicate with the Social Security Administration and communicate with the Department of Homeland Security.

We have the tools to do this. We can work and cooperate and coordinate together with our different departments of government in the same fashion that a company would work and cooperate and coordinate with their different departments of their company. We are not doing that yet. We are taking a step in the right direction, and I am very glad to hear the bipartisan support that we have for E-Verify.

I again congratulate KEN CALVERT for a work in progress, well started, not yet well done. I urge adoption of this, and I appreciate the extension and the reauthorization.

Ms. ZOE LOFGREN of California. Mr. Speaker, at this point I would like to recognize Congressman MOORE from the heartland of the country, Kansas, for 2 minutes.

Mr. MOORE of Kansas. My thanks to Chairwoman LOFGREN for yielding me time. I would like to acknowledge the many hours and hard work my friend from California and her staff have put into the many hearings they have had on our country's history of immigration and the need for reforming our immigration laws.

I would like to thank my fellow Blue Dog, Congresswoman GABRIELLE GIFFORDS, for drafting the bipartisan Employee Verification Amendment Act, and her leadership on addressing illegal immigration. I would also like to thank Social Security Subcommittee Chair MIKE MCNULTY and Ranking Member SAM JOHNSON and their staffs for their work in ensuring we protect Social Security as we extend and improve E-Verify.

Due to their work, Social Security trust funds will not be raided, in contravention of current law, to fund the costs of the E-Verify program. Our seniors and persons with disabilities should not and will not be burdened with these costs under our bill.

This year, House committees have held hearings examining how E-Verify works and how it might be improved. I am pleased we have reached the bipartisan compromise the House is now considering. We must crack down on employers who knowingly hire and take advantage of undocumented workers, and this bill will help do that.

This bill will continue E-Verify without interruption for 5 more years, which is very important, and will protect Social Security. The bill also requires the evaluation of the E-Verify databases and the need to improve them, as well as the impact E-Verify may have on small businesses, nonprofits, and municipalities. We need to address these and other legitimate concerns, like identity theft, so we can implement a far more effective and efficient mandatory employment verification system in the near future with other immigration reforms.

I urge my colleagues to support this bipartisan legislation.

Mr. SMITH of Texas. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. BILBRAY), who is the chairman of the Immigration Reform Caucus.

Mr. BILBRAY. Mr. Speaker, 99 percent plus efficiency. Where else in the Federal Government can we claim that we have a program that is over 99 percent effective, efficient, and gets the job done?

I am here to support this bill; and, sadly, I am here to support it at a 5-year extension rather than the 10-year originally proposed. And my big question is, those that did not want to extend it to 10 years, what don't you understand about 99.6 percent efficiency for the American citizens in the United States? Is it too efficient and that is why we are not today extending it 10 years? That is a question I think that every Member of Congress is going to have to answer to their constituency in the very near future.

Mr. Speaker, the employee verification system is not a pilot program anymore. For over 5 years, it has been a national program not restricted to the five original States but universal throughout the United States. It has been so effective that judiciaries across this country, judges, have required that anyone caught hiring illegal has been required to use this system to make sure it doesn't happen again.

The system is so effective that the executive branch and the legislative branch has made this the gold standard for hiring employees. Congress today does and has been required to make sure that Social Security numbers and names match before we hire them. The executive branch had asked for Congress themselves to do that. You haven't heard the horror stories and the end of the world because 99.6 percent is a number hard to argue with. The executive branch was confronted by this number, and now has mandated that any contractor and every government operation will use this system from now on. The question, Mr. Speaker, is why are we just maintaining the status quo for 5 more years?

Two years ago, the American voters were very upset with the fact that the then Republican majority refused to confront the issue that the number one source of illegal immigration was illegal employment, and that there was a simple, easy way to stop the problem if there was a will in Washington to get it done, and that system was E-Verification.

Today, we are confronted with a 5-year extension of what we have had for over 5 years rather than moving forward with a system that can address the number one source of illegal immigration, a simple system that can not only stop illegal immigration but stop a lot of problems related to that.

The SAVE Act was introduced by a Democrat named HEATH SHULER from the great State of North Carolina. It was supported by over 156 Members of the House of Representatives. It has actually received a discharge petition that is within less than 30 people to sign it to be able to bring it to a vote. That would make it a universal phase-in system to allow every employer and require every employer to not only use E-Verification before hiring somebody, but using E-Verification before—are you ready for this?—claiming a tax deduction for employing somebody who may be illegal.

□ 1930

I wish that Democrats and Republicans could have got together on that bill the way we did with this one. But sadly, the leadership of the Democratic Party in this House and Speaker PELOSI has blocked any legislation of substantive numbers that does not include an amnesty for the 20 million people illegally present.

Mr. Speaker, there are those who talk about compassion about those who are illegally here. Well, let me give you another number. Three hundred-plus illegals are sitting in prison today because an employer in Iowa did not use the E-Verification system before hiring them. And if you don't care about illegal immigration, and you say you care about immigrants coming to this country illegally, and you want to be humanitarian, then require the people that are exploiting them to check through E-Verification as a mandate, not a voluntary, so that future illegals that come into this country are not put in prison because their employer didn't check that the name and the Social Security Number matched.

I wish this town would act on its verbiage and its promises half as much as they expect the American people to respond to the responsibilities of citizenship.

As Members of Congress, we are now placed at having to vote for a 5-year extension rather than a 10, and we are denied the ability by the Speaker of the House to vote on a bill that is bipartisan, and able to address this issue. And I would ask that the SAVE Act be brought forward as soon as possible so we can back up this voluntary program with a mandatory one that will take care of the problem.

Ms. ZOE LOFGREN of California. I reserve my time.

Mr. SMITH of Texas. Mr. Speaker, we have one last speaker on this side and I will recognize him or yield to him right now, and that is, again, the gentleman from Iowa (Mr. KING) my remaining time, which I believe is 2 minutes.

Mr. KING of Iowa. Mr. Speaker, again, I thank the gentleman from Texas (Mr. SMITH).

First I wanted to say that the narrow gap that we have in efficiency that has received some criticism, if you don't use a list, you can't improve the list. Using the list improves the list. And as good as it is, as close as it is, and the improvements that have been brought forth, we can get it to become among the best lists in the country if we just use E-Verify, and I expect that will be the case.

As I look at the overall immigration picture, and we talked about enforcement and how effective is enforcement. There was an announcement that came out today, a press conference this afternoon, I think about 2:30, that rolled out a study done by Citizenship Immigration Services, CIS, Dr. Steve Camarota. And as I read through the report, and I am speaking from memory, not from a document, that report, I believe, references this way. Since last August, by their study, 1.3 million illegal aliens have self-deported, have gone back to their home countries, have left America. 1.3 million. And the analysis that is there predicts that at the present rate of self-deportation, and that is what it is, that we will see the illegal population in the United States be cut in half if that pace continues. That is a huge accomplishment.

And the people that said, well, we can't deport them all, didn't understand that they got here somehow. They got here on their own, and many of them have now decided to go back on their own. And here are the reasons.

The first one is enforcement; that ICE has begun to enforce immigration law, and as they have begun to do so, and it is the same time, in conjunction with an economy that doesn't have as much demand for lower skilled laborers. And then additionally, the publicity that surrounds the more intense enforcement that we have seen has put that all together in a package that is saying to some people that are here illegally that it is better for them to go home.

Now I have argued for a long time the administration should enforce the law. I have never believed that they enforced it consistently enough nor aggressively enough. But this is an exact response to this. The Swift raids in Iowa, the Postville raids in Iowa, ICE doing their job. And if ICE does not do their job, we don't have this 1.3 million.

And additionally, during the Eisenhower administration, they got about a 10–1 self-deportation for every one that was picked up and deported. This is a 7–1 self-deportation. That is a real difference and a real change.

I support this. We can do better. And I urge its adoption.

Ms. ZOE LOFGREN of California. Mr. Speaker, there are lies, darn lies and statistics. Isn't that the joke?

There have been a lot of figures thrown out here today. I think it is important to note that, according to the GAO, of the 7 million employers that are in the United States, less than 1 percent actually use E-Verify.

And the GAO also tells us, based on their analysis, that the SSA records contain errors about 4.1 percent of the time; 4.1 percent over 163 million workers is a lot of folks. So we have our work cut out for us.

I will note that there are 11 different bills that have been introduced by Members of this House with different ways and ideas on how to improve the employment verification system. We need to do an improvement of this system. I hope that that will be a bipartisan effort. But we are not going to get that done between now and November. And so it is important that we extend the existing program so that at least we have this in place.

I would note that Mr. Camarota and the Center for Immigration Studies is not the USCIS. That is sort of a think tank that wants to restrict immigration. It is an advocacy group.

But the real point is that you can track immigration, both legal and unauthorized, into the United States based on the exchange rate between the peso and the dollar. And as our economy weakens, you see less individuals either coming or staying. That doesn't mean that we don't need to get this system improved and that we don't need to have a comprehensive reform of our immigration laws and system, because what we have now is not working as well as it should be in the interests of our wonderful America.

I am happy to support this extension at this time. I have appreciated working with the ranking member of the full committee, Mr. SMITH, in getting this bipartisan consensus. I hope that we can get this through the Senate promptly.

And as I said in my opening statement, I have every expectation that the necessary improvements to the E-Verify system or the employment verification system will not take 5 years. Hopefully, that will be done well before the 5 years has expired, and that we will be pleased with the necessary improvement that we will craft together.

Mr. GALLEGLY. Mr. Speaker, I rise in strong support of H.R. 6633, the E-Verify Amendment Act. E-Verify is an Internet-based system that can be used to verify the employment eligibility of newly hired employees. It does so by checking the worker's Social Security number and citizenship status against the Social Security database. For non-citizens, it also checks work authorization status against a separate Department of Homeland Security database.

E-Verify, formerly known as Basic Pilot, was one of the recommendations to come out of the 1995 Task Force on Immigration Reform, which I chaired.

While I support this legislation, I also firmly believe E-Verify participation should be mandatory for all employers throughout the country. We know that most illegal immigrants come to this country looking for work. If they are unable to find and hold jobs, most will go home on their own. Even more important, when they learn that finding jobs in the United States is more difficult, other illegal workers will be less likely to come to this country in the first place.

E-Verify is currently used by more than 75,000 employers. Almost everyone authorized to work in the United States is immediately verified by the system. Only about one-half of 1 percent of employees queried who are actually eligible to work in the United States receive a ''tentative non-confirmation.'' But this system gives them the opportunity to correct their information and ensure their tax and Social Security records are accurate.

Mr. Speaker, E-Verify works. I urge my colleagues to support this bill.

Ms. JACKSON LEE of Texas. Mr. Speaker, I rise today in support of the employees verification amendment. I urge my colleagues to support this bill.

The Employee Verification Amendment Act reauthorizes the Department of Homeland Security's (DHS) Basic Pilot electronic employment eligibility verification program, also known as ''E-Verify.'' Without congressional action, E-Verify will expire in November 2008. This legislation provides for a 5-year extension of this voluntary program for the electronic employment verification of employees. It also includes provisions that ensure DHS provides timely reimbursements to the Social Security Administration (SSA) for E-Verify's use of SSA resources. Two Government Accountability Office studies are also authorized.

The bill provides for the Department of Homeland Security's basic pilot program. Specifically, DHS's electronic employment eligibility verification program (known as ''Basic Pilot'' or ''E-Verify'') is scheduled to expire in November 2008. This legislation reauthorizes E-Verify as a voluntary pilot program for an additional 5 years—through 2013.

E-Verify is an internet-based system that can be used to verify the employment eligibility of newly-hired employees. It does so by checking an employee's Social Security number and citizenship status against the Social Security database and, for non-citizens, it checks work authorization status against a separate DHS database.

In the last 2 years, over a dozen states have passed employee verification laws. Some, like Arizona have mandated E-Verify for all employers while other states require employers in certain sectors, such as government employers and contractors, to verify their employees' work authorization status.

The Federal government is also increasingly requiring E-Verify's use. On June 6, 2008, President Bush signed an amendment to Executive Order 12989 requiring that more than 200,000 federal contractors to use E-Verify. This action will likely triple the number of requests that must be processed through E-Verify.

Importantly, the bill provides certain protections to Social Security beneficiaries. This is critical because E-Verify relies on the Social Security Administration's data and systems to verify the citizenship and Social Security numbers of all newly-hired individuals for their eligibility to work.

According to the GAO, 100 percent of E-Verify queries are first checked against the SSA database. When there are data mismatches, workers are instructed to contact SSA and must visit an SSA field office in order to resolve the discrepancy. As E-Verify grows, so does SSA's workload.

DHS is responsible for funding SSA's costs related to E-Verify; using the Social Security Trust Fund for E-Verify is against federal law.

In prior years, DHS's reimbursements to SSA have been either delayed or not forthcoming at all.

The bill also provides for two GAO studies to be completed. First, it requires a study of the basic pilot confirmation system. The GAO will report to Congress on the causes of erroneous tentative nonconfirmations, how they

are remedied and the effect they have on individuals, employers and Federal agencies.

Second, the bill authorizes a study of the effect of the basic pilot on small entities. The bill requires that the GAO will examine the experiences of small entities (small businesses, nonprofits and municipalities) with using Basic Pilot by investigating direct and indirect impacts on basic pilot participants. It will also provide specific data on businesses with fewer than 50 employees as well as on small entities operating in states that have mandated use of the basic pilot program.

This legislation ensures that DHS provides timely and appropriate payments to SSA, so that E-verify does not interfere with SSA's ability to serve seniors, people with disabilities, and survivors.

Ms. ZOE LOFGREN of California. Mr. Speaker, I urge approval of this, and I would yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. ZOE LOFGREN) that the House suspend the rules and pass the bill, H.R. 6633.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. SMITH of Texas. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed, as follows:

H.R. 5170, H.R. 5983, H.R. 5531, H.R. 6193, H.R. 4806, H.R. 3815, H.R. 6576, and H.R. 6073.

DEPARTMENT OF HOMELAND SECURITY COMPONENT PRIVACY OFFICER ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 5170, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. THOMPSON) that the House suspend the rules and pass the bill, H.R. 5170, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

HOMELAND SECURITY NETWORK DEFENSE AND ACCOUNTABILITY ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 5983, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. THOMPSON) that the House suspend the rules and pass the bill, H.R. 5983, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

NEXT GENERATION RADIATION SCREENING ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 5531, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. THOMPSON) that the House suspend the rules and pass the bill, H.R. 5531, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: ''A bill to amend the Homeland Security Act of 2002 to clarify criteria for certification relating to Advanced Spectroscopic Portal monitors, and for other purposes.''.

A motion to reconsider was laid on the table.

IMPROVING PUBLIC ACCESS TO DOCUMENTS ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 6193, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. HARMAN) that the House suspend the rules and pass the bill, H.R. 6193, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

REDUCING OVER-CLASSIFICATION ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 4806, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. HARMAN) that the House suspend the rules and pass the bill, H.R. 4806, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

HOMELAND SECURITY OPEN SOURCE INFORMATION ENHANCEMENT ACT OF 2008

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 3815, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. HARMAN) that the House suspend the rules and pass the bill, H.R. 3815, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

REDUCING INFORMATION CONTROL DESIGNATIONS ACT

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 6576, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 6576, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

□ 1945

OPTIONAL ELECTRONIC PAY STUBS FOR FEDERAL EMPLOYEES

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 6073.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 6073.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

COMMENDING THE MEMBERS OF THE NEVADA ARMY NATIONAL GUARD AND AIR NATIONAL GUARD

Mr. ELLSWORTH. Mr. Speaker, I move to suspend the rules and agree to

the concurrent resolution (H. Con. Res. 358) commending the members of the Nevada Army National Guard and Air National Guard for their service to the State of Nevada and the United States, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 358

Whereas since May 2003, more than 1,600 members of the Nevada Army and Air National Guard have been mobilized and deployed to or in support of Operation Iraqi Freedom and Operation Enduring Freedom;

Whereas since May 2003, more than 1,500 residents of Nevada have been mobilized and deployed to or in support of Operation Iraqi Freedom and Operation Enduring Freedom as members of the Army Reserve, Navy Reserve, Air Force Reserve, Marine Corps Reserve, and Coast Guard Reserve;

Whereas those deployments have been marked by the dedicated, unselfish, and professional service and commitment of the members of the reserve components so deployed, as well as by their personal sacrifices;

Whereas members of the 1st Battalion, 221st Cavalry, based in Las Vegas, Nevada, deployed to Fort Irwin, California, from July 2004 to July 2006, and to Iraq from May 2006 to July 2007;

Whereas members of the 321st Signal Company, based in Reno, Nevada, deployed to Kuwait and Iraq from November 2003 to March 2005;

Whereas members of the 777th Engineer Company, based in Henderson, Nevada, deployed to Kuwait from March 2003 to May 2004;

Whereas members of the 1864th Transportation Company, based in Henderson, Nevada, deployed to Kuwait and Iraq from November 2004 to November 2005;

Whereas members of D Company, 113th Aviation, based in Stead, Nevada, deployed to Afghanistan from March 2005 to June 2006;

Whereas members of Detachment 45, Operational Support Airlift, based in Stead, Nevada, deployed to Kuwait from February 2005 to October 2005;

Whereas members of the 593rd Transportation Company, based in Stead, Nevada, deployed to Iraq from July 2006 to October 2007;

Whereas members of the 140th Military Police Detachment, based in Henderson, Nevada, deployed to Iraq from February 2008 to April 2008;

Whereas members of the 152nd Airlift Wing and 152nd Intelligence Squadron based in Reno, Nevada, deployed to Iraq from September 2005 to September 2006, and again from February 2007 to March 2008;

Whereas members of the 192nd Airlift Squadron and 152nd Maintenance Squadron, based in Reno, Nevada, deployed to Puerto Rico from July 2005 to October 2005;

Whereas members of the 232nd Operations Squadron, based in Las Vegas, Nevada, are currently deployed in ongoing operations in Afghanistan and Iraq: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress commends the members of the Army National Guard, Air National Guard, Army Reserve, Navy Reserve, Marine Corps Reserve, Air Force Reserve, and Coast Guard Reserve from the State of Nevada for their dedicated, unselfish, and professional service, commitment, and sacrifices to the State of Nevada and the United States.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. ELLSWORTH) and the gentlewoman from Virginia (Mrs. DRAKE) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. ELLSWORTH. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ELLSWORTH. Mr. Speaker, I yield myself such time as I consume.

I rise in support of House Concurrent Resolution 358 which commends the members of the Nevada Reserve components for their service to the State of Nevada and the United States of America.

More than 1,600 brave members of Nevada's Army and Army Air National Guard have been deployed as part of Operation Iraqi Freedom and Operation Enduring Freedom since May of 2003. In addition, more than 1,500 Nevada residents have been mobilized as members of the Army Reserve, Navy Reserve, Air Force Reserve, Marine Corps Reserve, and Coast Guard Reserve. The courageous servicemen and women of Nevada come closest to embodying the motto of their great State, ''All for our country.''

These heroes risk their lives and make tremendous personal sacrifices to protect our Nation and our freedom. Many have served extended tours of duty in active combat zones or provided invaluable support to our forces abroad. Beyond their military role, these men and women assume a myriad of responsibilities on behalf of our communities. From fighting wildfires to civic support, from drug enforcement, to search and rescue, it is their dedication and professionalism which we honor today.

Take the members of 1st Battalion, 221st Cavalry, operating out of Las Vegas, who added a distinguished new chapter to their unit's rich history—dating back to the early days of the Nevada Territory—with their service in Iraq from May 2006 to July 2007. Or consider the invaluable support of the men and women of the 321st Signal Company, based in Reno, who operated and maintained crucial digital communications equipment during their deployment to Kuwait and Iraq from December of 2003 to March of 2005. We honor them.

Consider the 777th Engineer Company, deployed to Kuwait from May of 2003 to 2004, and the 1864th Transportation Company, deployed to Kuwait from July 2004 to November 2005. We pay tribute to D Company, 113th Aviation, who brought their experience of desert conditions in the Sierra Nevada to their trials in Afghanistan from January of 2005 to June of 2006, and to Detachment 45, Operational Support Airlift, deployed to Kuwait from February to October 2005.

We thank the members of the 593rd Transportation Company out of Stead, Nevada, who braved IEDs and ambushes in Iraq from July 2006 to October 2007. They were joined in Iraq by the men and women of the 140th Military Police Detachment, based in Henderson, Nevada, who deployed from February to April, 2008. Much needed support was provided by the 152nd Airlift Wing and 152nd Intelligence Squadron, deployed to Iraq from September of 2005 to 2006, and again from February 2007 to March 2008. And, finally, the members of the 232nd Operations Squadron, based in Las Vegas, Nevada, who are currently deployed as part of ongoing operations in Afghanistan and Iraq.

These brave men and women have answered the call of their country, their State, and their community with honor, bravery, and great skill. Their sacrifices, through extended and repeated deployments far from families and loved ones, deserve our highest respect and our deepest gratitude.

I therefore trust you shall join me in support of this resolution, a small token of our heartfelt thanks.

I reserve the balance of my time.

Mrs. DRAKE. Mr. Speaker, I yield myself such time as I might consume.

Mr. Speaker, I rise today in strong support of House Concurrent Resolution 358, as amended, which recognizes the National Guard and Reserve members from Nevada for their extraordinary service, not only to their State but also to this country.

I want to thank my fellow Republican, Mr. HELLER of Nevada, for introducing this resolution. All of America should be proud of what the citizen soldiers of Nevada have accomplished while mobilized and deployed for or in support of the war on terror. Since 2003, more than 3,100 people from the Nevada National Guard and Reserves have performed above and beyond the call of duty in both Operation Iraqi Freedom and Operation Enduring Freedom. They have served in combatant support roles putting their lives on hold while serving the country they swore to protect. They temporarily left their families and jobs behind to support the needs of the country, and they should be recognized and thanked for their sacrifice.

I would also like to thank the families of these brave men and women, for they become military families when this country needs them the most. They provide essential support to those National Guard and Reserve men and women. For that, we are forever grateful.

Since the earliest days of this great Nation, we have required a strong military, a military that is ready and willing to protect the Nation's interests. The Nevada Army National Guard and Reserves are essential to that strong military. They have always acted gallantly when called upon in any situation.

Mr. Speaker, I urge my colleagues to support House Concurrent Resolution

358 and pay respects to the brave men and women of the State of Nevada.

Mr. Speaker, I reserve the balance of my time.

Mr. ELLSWORTH. Mr. Speaker, I yield 4 minutes to my good friend and colleague, a member of the Veterans' Affairs Committee, who I know is very proud of Nevada's Reserve components, the gentlelady from Nevada (Ms. BERKLEY).

Ms. BERKLEY. Mr. Speaker, I want to thank my colleague, Congressman ELLSWORTH, for giving me a few moments of his time in order to sing the praises of Nevada's National Guard. I particularly want to thank my colleague from Nevada, DEAN HELLER, for having the good sense and good taste to introduce this resolution honoring our National Guard. I am very grateful to him for that.

Mr. Speaker, I rise today in support of this resolution and in deep gratitude to the members of the Nevada National Guard who have made so many sacrifices to serve our country and my home State of Nevada.

Since 9/11, more than 1,850 of our soldiers have mobilized to support the operations in Iraq and Afghanistan. That's 64 percent of our Nevada Guardsmen deployed in Iraq and Afghanistan. As we speak, 263 Nevada National Guard members are serving on active duty in support of a number of operations around the world, with 136 of them currently serving in Iraq and Afghanistan.

These brave men and women have had to endure years of separation in long and difficult tours of duty overseas. Their service takes an enormous toll on them and their families, and this resolution is just a small token of our appreciation. Some of them have made the ultimate sacrifice, and for that we will forever be in their debt and the debt of their loved ones.

I want to highlight the actions of just one of these brave soldiers. Specialist Douglas Pierce of the 221st Cavalry was recently presented the Army Commendation Medal with Valor for his actions in Iraq on June 3, 2007. Specialist Pierce was providing escort security when his convoy came under attack. After escorting the convoy out of danger, Pierce returned to the area under enemy fire to provide medical aid to wounded soldiers. He didn't have to go back into the area, but because of his brave action, one of the soldiers he assisted is alive today and recovering at Walter Reed Hospital.

I am also proud that this Congress is giving back to those like Specialist Pierce who have served our country so bravely. We recently updated the GI Bill for the 21st century, increasing education benefits for those who have served since 9/11, including reservists and members of our National Guard. We have once again restored our promise to our veterans by guaranteeing a 4-year education for those returning from Iraq and Afghanistan and providing members of the National Guard with the tools they need to succeed in the workplace. And, at long last, we have finally given the same benefits to our National Guardsmen as we have long provided the rest of our Armed Forces.

Mr. Speaker, the debt we owe to our soldiers can never be fully repaid, but I hope this Congress, and I'm confident that this Congress, will continue to support them as much as we possibly can.

I urge support for this resolution. Before I yield back, I want to thank my colleague from Nevada once again, Mr. HELLER, for introducing this resolution. I appreciate it, and I know the Guardsmen and their families do as well.

Mrs. DRAKE. Mr. Speaker, I yield as much time as he may consume to the gentleman from Nevada (Mr. HELLER).

Mr. HELLER of Nevada. I want to express my appreciation to the gentlewoman from Virginia for yielding time and thank her for her kind remarks and also to my colleagues from Indiana and, of course, from southern Nevada (Ms. BERKLEY) for the remarks that she made. Thank you very much.

Mr. Speaker, I rise today in order to honor and thank the members of the Nevada Army National Guard, Air National Guard and the members of the Nevada Reserve for their service to the State of Nevada and the United States. Members of the Nevada National Guard and Reserve serve our State and country with honor and distinction. Whether they are saving lives during natural disasters or protecting our country abroad, Nevadans and our Nation owe our Guardsmen and Reservists a debt of gratitude for their service. America must remain committed to our men and women overseas, and I pray for the safe return of every servicemember of the United States.

Today I consider it a privilege to offer this resolution along with the Nevada House Delegation, Ms. BERKLEY and Mr. PORTER, in order to honor some of Nevada's finest citizens.

As we all know, the people who make the greatest sacrifices for our country are the brave men and women of our Armed Forces. Very often this means servicemembers are deployed for extended periods of time away from family, children, and friends, sometimes in hostile conditions. In addition, when members of the National Guard deploy, their families are not the only ones that are affected. Since our servicemembers live and work in their hometowns throughout Nevada, employers and communities are also affected by these deployments. I would like to recognize and thank those employers who have displayed patriotism by saving positions for returning servicemembers and supporting the servicemembers' families during this time.

The Nevada National Guard is regarded as a technically and tactically proficient fighting force fully capable of seamlessly serving alongside active duty personnel. Nevada's Guardsmen and Reservists have bravely served both domestically and abroad in support of the global war on terrorism.

The Nevada National Guard has experienced both triumphant and disappointing moments during the past few years. Most of the Nevada National Guard's wartime deployments have been in support of Operations Enduring Freedom and Iraqi Freedom. The Nevada National Guard has had the pleasure of welcoming hundreds of our airmen and soldiers home from worldwide deployments but also has had the sorrowful task of mourning the loss of three Army Guard combat casualties, the first casualties for the Nevada National Guard since World War II.

At this time, I want to extend my deepest condolences to family members of Chief Warrant Officer John Flynn, Sergeant Patrick Stewart, and Specialist Anthony Cometa who lost their lives in defense of our country. Generations of Nevadans will enjoy greater peace and security because of the sacrifices of John, Patrick, and Anthony.

Despite trying times, I am proud of the accomplishments of the Nevada Guard during the past 5 years. The Nevada National Guard pledges to fulfill its commitment to the citizens of the Silver State and the Nation in the same conscientious and professional manner they have maintained for nearly 150 years.

I support all our men and women in uniform. From the Middle East to Fallon Naval Air Force Station and Nellis Air Force Base, our troops are doing an excellent job of protecting Americans from new threats. Recognizing the sacrifices our troops have made in the past and continue to make today is critical for every citizen.

□ 2000

Mr. Speaker, I urge my colleagues to support House Resolution 358 and honor the bravery of America's best servicemembers.

Mr. ELLSWORTH. Mr. Speaker, at this time, I have no further requests for time and am prepared to my close after my colleague has yielded back. I reserve the balance of my time.

Mrs. DRAKE. Mr. Speaker, I have no additional speakers, and I yield back the balance of my time.

Mr. ELLSWORTH. Mr. Speaker, I would also yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. ELLSWORTH) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 358, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title was amended so as to read: ''Concurrent resolution Commending the members of the Nevada Army and Air National Guard and the Nevada Reserve members of the Armed Forces for

their dedicated, unselfish, and professional service, commitment, and sacrifices to the State of Nevada and the United States during more than five years of deployments to and in support of Operation Iraqi Freedom and Operation Enduring Freedom.''.

A motion to reconsider was laid on the table.

HONORING EDWARD DAY COHOTA, JOSEPH L. PIERCE, AND OTHER VETERANS OF ASIAN AND PACIFIC ISLANDER DESCENT WHO FOUGHT IN THE UNITED STATES CIVIL WAR

Mr. ELLSWORTH. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 415) honoring Edward Day Cohota, Joseph L. Pierce, and other veterans of Asian and Pacific Islander descent who fought in the United States Civil War, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 415

Whereas soldiers of Asian and Pacific Islander descent fought bravely and honorably during the United States Civil War;

Whereas Edward Day Cohota was among the soldiers of Asian descent who fought in the Civil War;

Whereas as a small child, Mr. Cohota stowed away in the ship Cohota, leaving Shanghai, China, in 1845;

Whereas Mr. Cohota enlisted in the 23rd Regiment, Massachusetts Volunteer Infantry;

Whereas during the Civil War, Mr. Cohota fought valiantly in the fog-bound Battle of Drury's Bluff;

Whereas Mr. Cohota proved his courage at Cold Harbor;

Whereas Mr. Cohota served in the United States Army for 30 years;

Whereas Joseph L. Pierce was also among the soldiers of Asian descent who fought in the Civil War;

Whereas Mr. Pierce enlisted in the 14th Regiment, Connecticut Volunteer Infantry, in 1862;

Whereas Mr. Pierce fought at Antietam and in the Battle of Gettysburg; and

Whereas many of the soldiers of Asian and Pacific Islander descent who fought in the Civil War, including Edward Day Cohota and Joseph L. Pierce, were denied rightful recognition of their service: Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes and expresses its appreciation for the courageous and loyal contributions made by soldiers of Asian and Pacific Islander descent during the United States Civil War; and

(2) recognizes and honors the 2 most documented of those soldiers, Edward Day Cohota and Joseph L. Pierce, for their distinguished and dedicated service to preserving and maintaining the Union.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. ELLSWORTH) and the gentlewoman from Virginia (Mrs. DRAKE) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. ELLSWORTH. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ELLSWORTH. Mr. Speaker, I yield myself such time as I may consume.

I rise in strong support of House Resolution 415, which honors Edward Day Cohota, Joseph L. Pierce, and other veterans of Asian and Pacific Islander descent who fought in the United States Civil War.

Despite generations of exclusion and discrimination, Asian Pacific Americans have served in our American forces with loyalty and dedication since the time of our Civil War. Unfortunately, many of their stories too often do not receive the attention, recognition, or credit they fittingly deserve. The stories of Mr. Cohota, Mr. Pierce, and other veterans of Asian Pacific Islander descent who fought in our Civil War are a few of such stories.

Edward Day Cohota, the best-documented Asian veteran of the Civil War, was found as a small child stowed away in a merchant ship bound for Massachusetts from the port of Shanghai, China, in 1854. The captain of the ship, Sergeant S. Day, discovered the half-starved child two days from port and adopted him as his own. Named after the merchant ship, Cohota, Edward Day Cohota spent the next several days sailing with Sergeant Day and Mrs. Day until Sergeant Day and his family retired to Gloucester, Massachusetts, in 1857.

When the Civil War broke out, Cohota joined the 23rd Regiment, Massachusetts Volunteer Infantry, and fought bravely in the Battle of Drury's Bluff near Richmond and at the Battle of Cold Harbor. Mr. Cohota went on to proudly serve in the United States Army for 30 years.

In 1935, he died in Hot Springs, South Dakota, still a foreigner in the only homeland he had ever really known, as he had been denied American citizenship after the passing of the Chinese Exclusion Act in 1882.

Joseph Pierce is another Asian Pacific Islander who served in uniform during the American Civil War. At age 21, Pierce enlisted in the 14th Connecticut Infantry in August 1862. Connecticut ship captain Amos Peck found Pierce adrift in the South China Seas and brought him home where he was raised with the rest of the Peck family and the family's children. The 14th Connecticut Infantry unit participated in the Battle of Antietam on September 17, 1862, and he also fought with them at the Battle at Chancellorsville in May 1863. The 14th was also at the Battle of Gettysburg where they helped repel Pickett's Charge that fateful day.

Since the Civil War through today's current conflict in Iraq and Afghanistan, Asian and Pacific Islanders continue to honorably and bravely serve our Nation in uniform.

We in Congress recognize and express our sincerest appreciation for the courageous and loyal contributions made by soldiers of Asian and Pacific Islander descent during the Civil War. We honor their distinguished and dedicated service in preserving and maintaining the Union and are proud of the rich diversity of our heritage.

I thank my colleague from California (Mr. HONDA) for bringing forward this bill, and I urge my colleagues to join me in supporting this important resolution.

I reserve the balance of my time.

Mrs. DRAKE. Madam Speaker, I yield myself as much time as I might consume.

Madam Speaker, I rise today in support of House Resolution 415, which recognizes the service of two remarkable Asian Civil War veterans and also pays respect to all participants of this war with Asian and Pacific Islander heritage.

Arriving in America as a stowaway aboard a ship from China, Edward Day Cohota enlisted in the 23rd Regiment, Massachusetts Volunteer Infantry, in the early years of the Civil War. He fought in the Battle of Drury's Bluff in Virginia on May 16, 1864. His wartime service continued at the Battle of Cold Harbor in Virginia on June 3, 1864. After the war, Mr. Cohota continued to serve for a total of 30 years active duty in the United States Army.

Joseph L. Pierce enlisted in the 14th Regiment, Connecticut Voluntary Infantry, in 1862 and fought on America's bloodiest day, September 17, 1862, in the Battle of Antietam. After managing to avoid being one of the 23,000 casualties of that battle, he continued to distinguish himself on the battlegrounds at Gettysburg where his unit helped to repulse Pickett's charge.

These two soldiers are but two of the Asian and Pacific Islanders who served their adopted Nation so well in the Civil War.

Madam Speaker, I want to thank my colleague, Mr. HONDA of California, for introducing this resolution. I would like to encourage my colleagues to give their appreciation to these volunteers whose service has not been fully recognized. Therefore, I urge a ''yes'' vote on House Resolution 415.

Madam Speaker, I reserve the balance of my time.

Mr. ELLSWORTH. Madam Speaker, I yield such time as he may consume to my friend and colleague, the Chair of the Congressional Asian Pacific American Caucus, the gentleman from California (Mr. HONDA).

Mr. HONDA. Madam Speaker, I want to thank my colleagues from Indiana and from Virginia for their wonderful support and recognition.

Madam Speaker, I rise today in support of House Resolution 415, a resolution I introduced which recognizes and honors Asian Pacific Islander American soldiers who fought during the United States Civil War.

Recent historical research has uncovered evidence of over 250 soldiers of Asian and Pacific Islander descent who served in the Union and Confederate forces during the United States Civil War.

I have introduced H. Res. 415 to recognize and honor Edward Day Cohota and Joseph L. Pierce, as well as the numerous others veterans of API descent who bravely fought in the United States Civil War. These two men, both of Chinese ancestry, are explicitly named in this resolution as the most-documented and researched veterans of Asian and Pacific Islander descent in the U.S. Civil War.

In comparison to the total population in the United States, a disproportionately high percentage of soldiers of API descent are listed on both the Union and Confederate rosters. By volunteering to serve in the Armed Forces of their adopted homeland, they risked their lives and declared their allegiances as vigorously as any other community.

Instead of honoring and recognizing their service, our country denied these veterans the ability to naturalize through the bigoted laws enacted during this period.

I believe that for their contribution to our Nation's history, and the injustices done to them despite their patriotism, veterans of API descent who fought in the U.S. Civil War are worthy of recognition by the United States House of Representatives.

I would like to take this opportunity to express my deep gratitude to the Chinese American Citizens Alliance, without whose efforts this resolution would not be possible. In their own words, the Chinese American Citizens Alliance has been ''committed to achieving passage of this resolution because national historic recognition was the least our country could do posthumously for an important, special group of unsung heroes.'' The Chinese American Citizens Alliance has worked arduously on behalf of these veterans and their families for years, and their work pays off today as the House considers this resolution.

In closing, Madam Speaker, I am pleased that this resolution is on the floor today. The families of these veterans and community supporters have waited a very long time for these brave soldiers to be honored by our government, and I urge my colleagues to support this small effort to recognize the contributions made by Asian Pacific Islander Civil War soldiers.

Mrs. DRAKE. Madam Speaker, I have no additional speakers, and I yield back the balance of my time.

Mr. ELLSWORTH. Madam Speaker, at this time, I have no further speakers and yield back the balance of my time.

The SPEAKER pro tempore (Ms. TSONGAS). The question is on the motion offered by the gentleman from Indiana (Mr. ELLSWORTH) that the House suspend the rules and agree to the resolution, H. Res. 415, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

RECOGNIZING THE SERVICE OF THE USS ''FARENHOLT'' IN THE SOUTH PACIFIC DURING WORLD WAR II

Mr. ELLSWORTH. Madam Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1248) recognizing the service of the USS *Farenholt* and her men who served our Nation with valor and bravery in the South Pacific during World War II, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 1248

Whereas the USS Farenholt (DD 491) was launched on November 19, 1941, by Bethlehem Steel Company in Staten Island, New York, and commissioned on April 2, 1942, at the Brooklyn Navy Yard;

Whereas the Farenholt, a 1620-ton Benson-class destroyer, sailed from San Diego on July 1, 1942, for the Pacific;

Whereas the Farenholt, known as the ''Fightin' F'', participated in the invasion of Guadalcanal on August 7, 1942, which marked the first American land offensive of the war;

Whereas the Farenholt, a flagship for Destroyer Squadron 12, served as an escort for the carrier, the USS Wasp, which on September 15, 1942, was attacked by two enemy submarines;

Whereas, as the Wasp sunk, the Farenholt rescued 143 survivors;

Whereas the Farenholt, during the Battle of Cape Esperance on the night of October 11, 1942, exhibited tactical might by joining an American force that successfully intercepted and defeated enemy destroyers and cruisers;

Whereas, during the Battle of Cape Esperance, the Farenholt helped to sink an enemy destroyer, despite having received three hits and having her torpedo tube rendered inoperative, which left three of the Farenholt's crew dead and 43 wounded;

Whereas, during the Battle of Cape Esperance, the Farenholt remained afloat despite the amount of water that flooded aboard the ship due to the severe damage inflicted by the three hits;

Whereas the crew saved the Farenholt from sinking by shifting oil, water, and topside weight to starboard, thus bringing the holes created by direct shell hits out of the water and saving the Farenholt so she could fight another day;

Whereas on the night of February 17, 1944, the Farenholt steamed up the St. George Channel and bombarded Rabaul, Solomon Islands, a stronghold of the enemy;

Whereas Rabaul was heavily fortified and hosted approximately 100,000 enemy troops;

Whereas during the Rabaul raid, the Farenholt fired 214 salvos and inflicted heavy damage on shore installations at Rabaul and sunk two merchant ships;

Whereas General MacArthur said of the February Rabaul raid, ''Heartiest congratulations to you and all concerned in Rabaul air strikes. The relentlessness of the attacks and their effectiveness have aroused admiration and enthusiasm everywhere. The daring and successful destroyer raids were also splendid in every way and were conceived and accomplished in the best Farragut manner'';

Whereas one week later, on February 25, 1944, the Farenholt participated in a similar raid, this time at Kavieng which drew heavy fire from the shore, and the Farenholt was damaged on the starboard side and, once again, her men saved the ship;

Whereas the men of the Farenholt accounted for two Navy Cross awards, two members of the crew were awarded the Silver Star Medal, five members of the crew were awarded the Bronze Star Medal, eight members of the crew received Letters of Commendation, and approximately 46 Purple Hearts were awarded for the members of the crew who were killed or wounded in action;

Whereas the men of the Farenholt and their loving spouses, widows, and children celebrated their 16th reunion in Fort Collins, Colorado, in 2007, and will celebrate their 17th reunion in Santa Clara, California, on September 17, 2008 through September 21, 2008; and

Whereas the men of the Farenholt represent the bravery and selfless sacrifice of the greatest generation: Now, therefore, be it

Resolved, That the United States House of Representatives—

(1) recognizes and commends the courageous and honorable men who served aboard the USS Farenholt in the South Pacific during World War II for their selfless service to the United States; and

(2) recognizes the contributions of the USS Farenholt and her crew in protecting America and its freedoms during World War II.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. ELLSWORTH) and the gentlewoman from Virginia (Mrs. DRAKE) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. ELLSWORTH. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ELLSWORTH. Madam Speaker, I yield myself such time as I may consume.

I rise today in support of House Resolution 1248, which honors the crew of the USS *Farenholt* for their brave service in the South Pacific during the Second World War. I would like to thank my colleague from Colorado, Congresswoman Marilyn Musgrave, who introduced this resolution with me.

A 1,620-ton Benson-class destroyer, the USS *Farenholt*, affectionately known as ''the Fightin' F,'' was launched from Staten Island, New York, on November 19, 1941. The *Farenholt* sailed for the Pacific in July of 1942, participating in the invasion of Guadalcanal as the flagship for Destroyer Squadron 12 and escort for the carrier USS *Wasp*. On September 15, 1942, when the *Wasp* was surprised and sunk by two Japanese submarines, the *Farenholt* rescued 143 of the survivors.

The Farenholt's greatest test came the following month in the Battle of Cape Esperance, when the ship helped

intercept a Japanese force of cruisers and destroyers attempting to bombard Henderson Field on Guadalcanal. The *Farenholt* performed admirably, sinking an enemy destroyer despite taking heavy casualties from three direct hits from enemy fire. The brave crew managed to keep their ship afloat by shifting topside weight to the starboard, thereby lifting the shell holes out of the water. Thanks to the dedication and ingenuity of her crew, the *Farenholt* lived to fight another day.

In fact, she spent the next 2 years crisscrossing the South Pacific, providing cover for landings, escorting convoys, and rescuing downed pilots.

Her crew once again proved their courage on the night of February 17, 1944, when they launched a daring dash through the St. George Canal in the Solomon Islands to attack the Japanese stronghold at Rabaul. They managed to sink two enemy merchant ships in the process, and General Douglas MacArthur wrote that the raids on Rabaul were ''splendid in every way and were conceived and accomplished in the best Farragut manner.''

The sailors of the USS *Farenholt* were awarded two Navy Crosses, two Silver Stars, five Bronze Stars, eight Letters of Commendation, and 46 Purple Hearts for their service and sacrifice to our country.

Madam Speaker, I would like to acknowledge a constituent of mine, Gene Fithian of Newburgh, Indiana. Last year, I met with Gene in my office in Evansville, and he shared stories about the *Farenholt* and his shipmates. Gene put my staff in touch with other men who served aboard the *Farenholt*, and this resolution would not have been possible without their valuable input. Thank you, Mr. Fithian.

It is with a deep sense of gratitude and appreciation that we honor the men of the *Farenholt* and their loving spouses, widows, and children. They are part of our ''Greatest Generation,'' and I encourage all my colleagues to join me in honoring their sacrifices.

Madam Speaker, I reserve the balance of my time.

□ 2015

Mrs. DRAKE. Madam Speaker, I yield myself as much time as I might consume.

I rise today in support of House Resolution 1248, which recognizes the service of the destroyer USS *Farenholt* and her men who served our great Nation with bravery in the South Pacific during World War II.

The USS *Farenholt* was commissioned on April 2, 1942 at the Brooklyn Navy Yard. The destroyer sailed from San Diego, California on July 1, 1942 for the Pacific.

Also known as the Fightin' F, she participated in the United States' first land offensive of World War II, the August 1942 invasion of Guadalcanal. The next month, *Farenholt* also served as an escort for the aircraft carrier USS *Wasp*, which was attacked by two enemy submarines. When the *Wasp* sank, the *Farenholt* rescued 143 of her survivors.

The Fightin' F fought in the battle of Cape Esperance in October 1942, and joined the American force that intercepted and defeated Japanese destroyers and cruisers. During the fight, the *Farenholt* suffered 46 casualties and severe damage from three direct hits. Despite this, her crew kept her from sinking, and she joined in the February 1944 destroyer raid on the Japanese stronghold at New Guinea where she sank two merchant ships. That raid earned very high praises from General Douglas MacArthur.

I want to thank my colleague, Mr. ELLSWORTH of Indiana, for introducing this legislation.

I urge my colleagues to recognize these brave and dedicated men of the USS *Farenholt* by supporting House Resolution 1248.

Madam Speaker, I reserve the balance of my time.

Mr. ELLSWORTH. Madam Speaker, I also reserve the balance of my time.

Mrs. DRAKE. Madam Speaker, I yield as much time as she may consume to the gentlewoman from Colorado (Mrs. MUSGRAVE).

Mrs. MUSGRAVE. Madam Speaker, I thank my colleagues. It's truly an honor to stand here tonight and pay gratitude to our World War II veterans. I was very proud to cosponsor this resolution honoring the USS *Farenholt* and her crew.

Radarman 1st Class Kenneth S. Buffington served on the *Farenholt* from 1942 to 1945. Kenneth was born and raised in Nebraska, and he lived on his family's farm until he joined the United States Navy. After the war, he became a plumber, and he has called Fort Collins, Colorado his home for the last 55 years. He will celebrate his 89th birthday in September.

Kenneth fought 11 battles aboard the *Farenholt*. The destroyer endured 12 credited engagements from Guadalcanal to Okinawa. When at battle stations, Kenneth helped man the guns to help defend his ship and crew mates and to ensure that the Fightin' F could engage the enemy on another day.

The *Farenholt's* accomplishments are many, as my colleagues have mentioned, including the repelling of Japanese air attacks, the bombardment of enemy positions, the supporting of carrier raids, and the performing of rescue operations as well as that of escort and patrol duty. In battle, the crewmen were often stretched to their limits, remaining at battle stations around the clock, sleeping little but doing their duty. The crew of the *Farenholt* suffered casualties, but they always fought courageously and greatly contributed to the success of the operations in which they took part.

Twice, the *Farenholt* was badly damaged by gunfire and by shell fire, but she survived to celebrate V-J Day, and was decommissioned in April of 1946.

It is my great privilege to represent Kenneth Buffington and his family, and I am proud to honor the USS *Farenholt*, her crew and all of our World War II veterans and their families.

Mr. ELLSWORTH. Madam Speaker, I would also like to thank the gentlelady from Virginia.

At this time, I have no further requests for time, and I'm prepared to close after my colleague has yielded back.

I continue to reserve the balance of my time.

Mrs. DRAKE. Madam Speaker, I have no additional speakers.

I yield back the balance of my time.

Mr. ELLSWORTH. Madam Speaker, I also yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. ELLSWORTH) that the House suspend the rules and agree to the resolution, H. Res. 1248, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The title was amended so as to read: ''Resolution recognizing the service of the USS *Farenholt* and her crew who served the United States with valor and bravery in the South Pacific during World War II.''.

A motion to reconsider was laid on the table.

HONORING THE SERVICE OF LANDING SHIP TANK VETERANS

Mr. ELLSWORTH. Madam Speaker, I move to suspend the rules and agree to the resolution (H. Res. 1316) honoring the service of the Navy and Coast Guard veterans who served on the Landing Ship Tank (LST) amphibious landing craft during World War II, the Korean war, the Vietnam War, Operation Desert Storm, and global operations through 2002 and recognizing the essential role played by LST amphibious craft during these conflicts.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 1316

Whereas the Landing Ship Tank (LST) was the military designation for naval vessels created during World War II to support amphibious operations by carrying significant quantities of vehicles, cargo, and landing troops directly onto an unimproved shore;

Whereas the British evacuation from Dunkirk in 1940 demonstrated to the British Admiralty that the Allied Forces needed relatively large, ocean-going ships, capable of the shore-to-shore delivery of tanks, other vehicles, and troops for amphibious assault upon the continent of Europe;

Whereas at their first meeting at the Atlantic Conference in August 1941, President Franklin D. Roosevelt and British Prime Minister Winston Churchill agreed with the Admiralty about the need for improved ships that could land on and retract off a beach;

Whereas in 3 separate acts, dated February 6, 1942, May 26, 1943, and December 17, 1943, Congress provided the authority for the construction of LSTs;

Whereas 1,051 LST amphibious craft were constructed during World War II;

Whereas 70 percent of LSTs were built at inland shipyards on the Illinois and Ohio Rivers, mainly by female construction, welding, and assembly line workers;

Whereas the first LST, commissioned on October 27, 1942, was a 328-foot ship with unique characteristics of bow doors and a ramp to transport troops, a reduced forward draft of fewer than 4 feet for successful beaching, 9 knot speed, a flat bottom, and equipped with 20-millimeter and 40-millimeter guns on the upper and main decks;

Whereas the LST saw action in every theater of World War II, receiving the second most battle stars after Destroyers, and mission flexibility was its hallmark;

Whereas the multiple missions performed by the LSTs included not only the amphibious landings of troops, vehicles, and other materiel, but also serving as motor torpedo boat tenders, battle damage repair ships, aircraft engine repair ships, mini-aircraft carriers, launch craft for fixed wing reconnaissance aircraft, and medical care;

Whereas LSTs led the D-Day evacuation of 41,035 wounded men back across the English Channel from the Normandy beaches;

Whereas World War II naval historian Samuel Eliot Morison described the LST as the ''most useful all-around craft invented by the Navy'';

Whereas during World War II, Navy and Coast Guard sailors manned the LST from the ships' combat debut in the Solomon Islands in June 1943 until the end of hostilities in August 1945;

Whereas LSTs were involved in the invasions of Sicily, Italy, Normandy, and southern France;

Whereas LSTs served as an essential element in the island-hopping campaigns in the Pacific Theater, including the liberation of the Philippines and the capture of Iwo Jima and Okinawa;

Whereas the brave sailors serving on the LSTs survived typhoons and other harsh weather, attacks by kamikaze planes and enemy submarines, ocean mines, and the dangers and stress of combat;

Whereas the Navy's amphibious forces rolled out tons of equipment and thousands of men onto the beaches at Normandy, France, in June of 1944, leading the way for the massive Allied invasion that wrested Europe from the power of the Nazis;

Whereas the LSTs and the sailors who manned them continued to provide amphibious landing and other services for 57 years following World War II, serving in the Inchon Landing and other operations during the Korean war, the Vietnam war, the 1974 refugee evacuations from Vietnam, Operation Sea Angel to provide humanitarian assistance to Bangladesh, Operation Desert Shield, Operation Desert Storm, and Operation Restore Hope in Somalia;

Whereas several thousand surviving Navy and Coast Guard World War II veterans are members of the United States LST Association, headquartered in Oregon, Ohio;

Whereas members of the United States LST Association and the USS LST Ship Memorial, Inc., successfully secured legislation that allowed for the retransfer of the LST 325 from Greece and volunteered members to go to Greece in 2000 to restore and refurbish the LST 325;

Whereas World War II-era LST veterans sailed the LST 325 from Greece to the United States, arriving in Mobile, Alabama, on January 10, 2001;

Whereas the LST 325 is 1 of only 2 World War II-era LSTs to be preserved in the United States, and volunteers with the USS LST Ship Memorial have converted the LST 325 into an operational museum and memorial ship based in Evansville, Indiana, to preserve the historic legacy of these ships and honor the men who bravely served their country aboard LSTs;

Whereas the LST 325 has sailed over 9,000 miles and visited 13 cities since returning to the United States, and is scheduled to sail up the Mississippi River in August 2008; and

Whereas the Navy decommissioned the last LST, the USS Frederick (LST 1184), at a ceremony at Naval Station Pearl Harbor on October 5, 2002: Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes the essential role played by Landing Ship Tanks (LSTs) during World War II, the Korean war, the Vietnam war, Operation Desert Shield, Operation Desert Storm, and many other military and humanitarian operations;

(2) honors the service of the Navy and Coast Guard sailors who bravely served their country aboard the LSTs;

(3) acknowledges the debt modern amphibious operations owe to the LST sailors and ships in pioneering the multiple missions carried out by amphibious landing craft; and

(4) commends the many volunteers of the USS LST Ship Memorial who have preserved the LST 325 as a living memorial in honor and remembrance of the ships and veterans in their service.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. ELLSWORTH) and the gentlewoman from Virginia (Mrs. DRAKE) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. ELLSWORTH. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ELLSWORTH. Madam Speaker, I yield myself such time as I might consume.

I rise in support of House Resolution 1316, which honors the service of the Navy and Coast Guard veterans who served on the Landing Ship Tank (LST) amphibious landing craft.

I want to thank the gentleman from Massachusetts (Mr. MCGOVERN) for bringing this important resolution before us. As an original cosponsor of the measure, I'm eager for its swift passage.

At this time, I'd like to yield such time as he may consume to the sponsor of House Resolution 1316, the gentleman from Massachusetts (Mr. MCGOVERN).

Mr. MCGOVERN. Madam Speaker, I want to thank the gentleman from Indiana, who represents the home base of the USS LST Memorial Ship, the LST–325, for yielding me the time.

Madam Speaker, I could not be more proud to see this resolution come before the House today for consideration. The Navy and Coast Guard sailors and seamen who served on these LSTs are true American heroes. They fought for this country in some of the most decisive battles in our history, from the 1940s to the early 1990s, and they deserve to be recognized.

I am glad that the United States Congress will be going on record in commending these veterans for their service, and it's especially nice that this resolution comes up today before the LST veterans have their national convention in Washington, D.C. at the end of August.

I want to express special appreciation to Armed Services Committee Chairman IKE SKELTON and to Ranking Member DUNCAN HUNTER for moving this bill forward in order to honor these veterans and their service.

Madam Speaker, this resolution would not have happened without a number of veterans who have remained active in preserving the heritage of the LSTs. Peter Leasca from Worcester, Massachusetts deserves a lot of the credit. He has really educated me and a lot of my colleagues about what these ships meant to the Navy, what they meant to the Allies in World War II and what they meant and still mean to the people who served on them.

I also want to express my gratitude to Mike and Linda Gunjak, at the United States LST Association, and to Captain Bob Jornlin, at the USS LST Memorial Ship, for all of their help, support and guidance on this resolution.

A few years ago, in working with Congressman RALPH HALL, I was able to get language in a defense authorization bill that allowed the Government of Greece to transfer ownership of the USS LST–325 to the USS LST Memorial Ship, Inc., the nonprofit organization set up by LST veterans to bring the LST–325 home and to turn it into an operational memorial and living museum.

LST veterans went to Greece; they refurbished by the sweat of their own brow the LST–325, and sailed her home. Now it's here in the United States so that all Americans can learn about the essential role the LSTs played in our history and about the service and sacrifices made by their crews.

World War II naval historian Samuel Eliot Morison described the LST as the ''most useful all-around craft invented by the Navy,'' but a lot of people don't fully appreciate just how important the LSTs were to achieving victory in World War II, not only during the D-day invasion but also throughout the Pacific theater, including the liberation of the Philippines and the capture of Iwo Jima and Okinawa. They were reliable and flexible just like their crews, and the image of men and of equipment off-loading on the beaches of Normandy is burned into the imagination of the American people and of all World War II-era veterans.

After World War II, the LSTs were put to great use in the Korean War, in the Vietnam War and in other military conflicts, but they were also used to deliver humanitarian assistance, which helped to literally save the lives of thousands of people and win a lot of hearts and minds around the world for the United States. Beginning in World

War II, when the LSTs evacuated over 41,000 wounded men back across the English Channel from Normandy, to Operation Sea Angel in Bangladesh, the LSTs have also been a symbol of hope to those in grave need or peril.

On Easter Sunday morning in 1945, Peter Leasca was aboard LST–824, carrying men and armored vehicles onto the heavily defended beaches of Okinawa, just 340 miles from the Japanese mainland. He was a 20-year-old naval medical corpsman. He witnessed the fierce fighting from the Japanese holding the island. He saw a kamikaze pilot slam his plane into the battleship USS New Mexico, killing 30 sailors and setting the ship ablaze.

Now at the age of 83, this very special World War II veteran and his fellow LST veterans across the country are being recognized by a grateful Congress for their service and for the essential role the LSTs played so long ago.

I thank them for their service. I thank them for their sacrifice. I thank them for keeping this history alive. May God bless them all.

I would again like to thank my colleague from Indiana (Mr. ELLSWORTH) for his generosity in yielding me this time, for his leadership in this Congress and for his friendship.

[From the MetroWest Daily News, July 28, 2008]

NAVY VETERANS TRIBUTE BILL LANDS IN CONGRESS

(By Chris Bergeron)

On Easter Sunday morning, 1945, Peter Leasca rode aboard a Landing Ship, Tank or LST carrying men and armored vehicles onto the heavily defended beaches of Okinawa just 340 miles from the Japanese mainland.

Throughout that day, the then–20–year-old naval medical corpsman witnessed ''fierce fighting'' from Japanese defenders and a Kamikaze slamming into the battleship USS New Mexico, killing 30 sailors and setting it ablaze.

Four-and-a-half months later, Japan surrendered and a year after that Leasca returned home, attended college, married and raised four children while working as a stockbroker.

If all goes as planned, the 83–year-old veteran from Worcester and his shrinking ''Band of Brothers'' who served on amphibious vessels will be thanked by the U.S. government for their service during World War II.

Recognition has been a long time coming.

Local World War II veterans, like Howard Rouse and Rosario George Puliafico, who served aboard LSTs or similar craft, are grateful for the belated recognition but hope the honors extend to those in all branches who lost their lives defending their country.

''LSTs and ships like them were the keys to victory. But a lot of guys lost their lives,'' said Rouse, a Framingham resident who retired after 40 years in broadcasting. ''I think what they did shortened the war. I think they should be recognized.''

With an estimated 1,025 World War II veterans dying every day, according to the Department of Veterans Affairs, Leasca is getting closer to winning his last battle to earn recognition for the men who served aboard amphibious landing craft.

''Guys like us are a vanishing group,'' said Leasca. ''We're in our twilight years.''

On the floor of the U.S. Congress, Rep. James McGovern will call for a vote Wednesday, July 30 on a resolution he authored with input from naval veterans to honor all who served aboard amphibious landing craft in World War II, Korea, Vietnam and Operation Desert Storm through 2002.

McGovern predicts the bill, House Resolution 1316, will pass and be sent to the Senate and the President for confirmation.

McGovern said veterans, like Leasca, Rouse and Puliafico, ''who served on these LSTs are true American heroes.''

''They fought for this country in some of the most decisive battles in our history. And they deserve to be recognized,'' he said.

McGovern added the vote was scheduled for this month so it would precede the LST veterans' annual convention in Washington, D.C., in August.

He credited Leasca for ''really educating me'' and congressional colleagues about the contributions and sacrifices made by those who served aboard amphibious vehicles. U.S. Rep. William Delahunt is also one of the resolution's sponsors.

Decades after the war's end, Leasca fought a successful rearguard action to honor his martial colleagues and return to the U.S. the 64-year-old LST–325 from Greece, where it served the Greek navy for 20 years.

For years he's been one of the most active members and former president of the Amphibious Veterans of Massachusetts.

Leasca said the 328–foot-long LSTs lacked modern amenities but inspired loyalty from the crews of about 120 men who served aboard them.

Waxing nostalgically, he recalled living on his LST as it wove the arduous voyage through the Panama Canal, into submarine-infested waters and on to Hawaii.

''We went up and down, rocked left and right. Sometimes it got pretty rough,'' Leasca remembered. ''It was a long voyage like an ocean cruiser. I saw porpoises and sights I'd never seen before.''

He pointed out the World War II naval historian Samuel Eliot Morrison described LSTs as ''the most useful all-around craft invented by the Navy.''

As time passes and veterans of amphibious craft fade away, Leasca ''wants to do everything I can for the ungainly ships and the men who sailed them into combat.

''I want to do something for all the vets of America,'' he said. ''And I want to give recognition to a glamorous ship. Too often, historians don't mention the LSTs. So we've got to toot our own horn to get recognition.''

For more information about the Amphibious Veterans of Massachusetts, visit www.amphibvetsofma.org.

To read the text of House Resolution 1316 and to check on its status, go to the Library Congress Web site, http://thomas.loc.gov, and type in H. Res. 1316 in the search engine.

USS HENRY COUNTY (LST–824)

The USS *Henry County* (LST–824) was an LST–542–class tank landing ship built for the United States Navy during World War II. Named for counties in Alabama, Georgia, Illinois, Indiana, Iowa, Kentucky, Ohio, Tennessee, and Virginia, she was the only U.S. Naval vessel to bear the name.

Originally laid down as LST–824 by the Missouri Valley Bridge & Iron Company of Evansville, Indiana on 28 September 1944; launched 8 November; sponsored by Mrs. Harry W. Groot; and commissioned 30 November with Lieutenant Jesse D. Jones in command. After shakedown off Florida, LST–824 departed New Orleans 4 January 1945 for San Diego, arriving there on the 24th. She embarked 107 ''bluejackets,'' then sailed for Pearl Harbor 26 January. During February she performed training exercises out of Hawaii, then loaded troops and equipment to depart Pearl Harbor 12 March. For the next month she steamed through the Pacific, stopping at Eniwetok, Guam, and Saipan before proceeding to Okinawa. American forces were already engaged in the fierce struggle to wrestle Okinawa from enemy control when LST–824 departed Saipan 12 April. Five days later she arrived off China Wan and commenced discharging troops and equipment on the embattled island. The landing ship returned to Saipan 27 April for reinforcement troops and cargo, and again steamed for Okinawa. For the remainder of World War II, she shuttled supplies between Okinawa and the Philippines in preparation for a possible invasion of Japan. After the Japanese surrender, LST–824 operated with occupation forces in the Far East until sailing for the United States in November. Arriving Portland, Oregon on 5 December, she decommissioned there 15 May 1946 and joined the Pacific Reserve Fleet. While berthed with the Columbia River Group, LST–824 was named USS *Henry County* (LST–824) on 1 July 1955.

Henry County recommissioned 5 September 1959 with Lieutenant R. L. Dodd in command. After refresher training, L8T–824 departed the West Coast 19 March 1960 for the Far East, arriving Yokosuka 2 weeks later. During the next 4 months she transported supplies, performed training exercises with U.S. Marines, and engaged in joint operations with Korean forces before returning to Long Beach 19 August. Following 20 months of operations along the West Coast, *Henry County* sailed for the mid-Pacific in April, 1962 then performed transport and amphibious duties out of Hawaii. In September she was assigned to Task Force 8 for the nuclear tests in ''Operation Dominic.'' Since the tests were considered vital to the nation's security, the Navy demonstrated her ability once again to keep pace with the advances of technology developed to maintain peace through strength. From December, 1962 through December, 1964 *Henry County* performed amphibious training operations off the California coast. Decommissioned (date unknown), the ship was struck from the Naval Vessel Register 11 April 1975. Subsequently transferred to Malaysia and renamed *Sri Banggi* (A 1501), her final fate is unknown.

LST–824 received one battle star for World War II service and four battle stars for Vietnam service.

USS LST–325

CRETE TO USA (2000–2001)—ORIGINAL SAILING CREW

James Bartlett, Marble Falls, TX; John Calvin, Dunnellon, FL; Jackson R. Carter, Palos Verdes, CA; Donald Chapman, E. Moline, IL; James Edwards, Canton, TX; Corbin Fowkes, New Bethlehem, PA; William ''Rocky'' Hill, Surprise, AZ; Norval Jones, Auburn Hill, MI; Capt. Robert Jornlin, Earlville, IL; Donald K. Lockas, Marseilles, IL; Gary Lyon, Roseville, MN; Joseph Milakovich, Wauwatosa, WI; Ronald. Maranto, Metairie, LA; and James F. McCandrew, Sebastian, FL.

Richard Meyer, Lincoln, NE; Don Molzahn, Sr., La Crosse, WI; Hichael Nedeff, Huber Heights, OH; Bill Nickerson, Margate, FL; Dominick Perruso, Easton, PA; Joe Sadler, Ketchikan, AK; Harold Slemmons, Lone Oak, TX; Paul L. Stimpson, Lock Haven, PA; Edward Strobel, Decatur, IL; Dewey L. Taylor, W. Palm Beach, FL; Bruce Voges, Oakwood, IL; Albert J. White, Roswell, NM; Lauren Whiting, Barker, NY; and Bailey M. Wrinkle, McKenzie, TN.

OVERSEAS SUPPORT CREW

The following crewmembers went overseas at their own expense to participate in preparing LST 325 for its voyage home. They actively participated in Crete and/or in Gibraltar; some sailed on the ship from Crete to Gibraltar.

Ernest Andrus, Art Cook, Glenn Gregg, Lee R. Hunter, Raymond Mai, William Reinard, Edward J. Whitman, Thomas Cadigan, Edward Dyar, Les K. Harrison, Lee James, Jack W. Melcher, Gerald Robertson, David Williams, John Chooljian, William Gollan, William Hart, Richard James, John H. Michaud, L. Scheiderman, Richard Young, Frank Conway, Richard Gouker, Fred Holp, Jim Liverca, Ernest Pliscott, George H. White, and Roald Zvonik.

USS LST 325 ORIGINAL WORLD WAR II CREW

The following are surviving crewmembers from USS LST 325's original World War II crew who have been located:

Harold Allgaier, Casper, WY; Clester Brown, Norfolk, VA; Ted Duning, Lewisburg, TN; Frances Fischer, Delpos, OH; Bill Hanley, Lavallette, NJ; Howard Kramer, Jackson, MI; Richard Martin, York, PA; Ed Nekiunas, South Windsor, CT; Don Roy, Chanhassen, MN; Harold Westerfield, Sun City, AZ; Stan Barish, Pittsburgh, PA; Lander Bumgarner, Maiden, NC; Ellsworth Easterly, Litchfield, IL; Ralph Gard, Munster, IN; Leo Horton, Seneca, SC; Bob Lemieux, Leominster, MA; C.J. Mitchell,Centralia, IL; Walt Niewinski, Lake Grove, NY; and Howard Russell, Baltimore, MD.

Gerard Belanger, Nashua, NH; Larry Cauthen, Rome, GA; Ira Ehrensall, Boca Raton, FL; Paul Genander, Beachwood, NJ; Lloyd Jacobs, Brock, MA; Dale MacKay, Center Barnstead, NH; Gerry Murphy, Clay, NY; Ernie Ninness, Holmes Beach, FL; Dick Scacchetti, Sarasota, FL; Al Binkowski, Plainville, CT; Chester Conway, Hammond, IN; Norm Ferguson, Norfolk, VA; Jack Green, Avalon, CA; Emil Kolar, Springfield, IL; Don Martin, Fargo, ND; Steve Nedoroscki, Milbury, MA; John Roberts, Faribault, MN; and Al Smith, Burleigh, NJ.

Mrs. DRAKE. Madam Speaker, I yield myself as much time as I might consume.

I rise today in support of House Resolution 1316, which not only honors the service of the Navy and Coast Guard veterans who for 60 years served on the LST amphibious landing craft from World War II onward, but it also recognizes the key role played by LST amphibious craft.

During World War II, the LST met the urgent requirement of the Allied Forces for a new vessel, a vessel that was capable of the shore-to-shore delivery of vehicles and troops while conducting an amphibious assault upon the enemy. Between 1942 and 1943, three separate acts of Congress authorized the construction of these LSTs, and over 1,000 LSTs were built during World War II.

These landing craft saw action in every theater of World War II. LSTs played an essential role during the D-day campaign of June 1944. Not only were they the first line of troop transports onto the beaches, but they completed an evacuation of 41,035 wounded men back across the English Channel. LSTs landed on the beaches of places like Sicily, the Philippines, Iwo Jima, Okinawa, and countless others. They survived kamikaze attacks, ocean mines and enemy submarine attacks. These remarkable vessels and their sailors earned the second most battle stars after destroyers.

During the Korean war, LSTs landed at Inchon. In the Vietnam war, they participated in the 1974 refugee evacuations. Also, LSTs provided humanitarian assistance during Operation Desert Shield, Operation Desert Storm and Operation Restore Hope in Somalia.

□ 2030

To honor such valued service, LST veterans, members of the LST Association, gained approval, through legislation, to sail the refurbished LST 325 back from Greece to the United States to transform the ship into a museum. They completed their sail on January 10, 2001, in Mobile, Alabama. Now the ship is based in Evansville, Indiana, as the USS LST Ship Memorial. The Navy decommissioned the last active LST, the USS *Frederick*, at Naval Station Pearl Harbor on October 5, 2002.

Madam Speaker, I urge my colleagues to support this most worthy resolution. It is impossible to express how essential these LSTs were during World War II and continuing until the early 21st century. These remarkable sailors of these ships should be recognized for their dedication, bravery, and loyalty to their Navy and their Nation. We should applaud them today, and every day.

I want to thank my colleague from Massachusetts (Mr. MCGOVERN) for introducing this legislation.

Madam Speaker, I reserve the balance of my time.

Mr. ELLSWORTH. Madam Speaker, I yield myself such time as I may consume.

First I'd like to thank the gentlelady from Virginia for her leadership on this special legislation. I would also like to thank the gentleman from Massachusetts for introducing this House Resolution honoring the Landing Ship Tank, LST, not only for this resolution and his dedication to our veterans, but also for his dedicated service in bringing LST 325 back to the United States from Greece, which ended up landing in my hometown.

The LST, Madam Speaker, has a rich and shared history with my hometown of Evansville, Indiana. During World War II, a 45-acre shipyard along the Evansville riverfront produced LSTs. The peak years of production saw a workforce of over 19,000 workers, and they completed two LSTs per week. The Evansville Shipyard was the largest inland producer of the LST in the United States. And when all was said and done, 167 LSTs and 35 other vessels were built and then sent down the Ohio River and then out to sea.

Madam Speaker, I would like to briefly recount the heroic and inspiring story of the LST 325. The utility and reliability of LSTs and the strong bond developed by their crews has fostered a vibrant and active veterans' association. These brave men, proud of the service and the craft they served on, secured legislation for the refurbishment of LST 325 and for the ship's retransfer to the United States from Greece, where it had been since the early 1960s.

Having set sail from Greece on November 14, 2000, the LST 325 arrived in Mobile, Alabama, on January 10, 2001—to a great American fanfare I might add. In 2003, during a 10-day stop in Evansville, 35,000 people toured the LST 325. It was with great civic pride that Evansville became the official home port of the LST 325 on October 3, 2005. The LST 325 is now an operational museum and a memorial ship on the beautiful Evansville riverfront.

This effort would not have been possible if not for the efforts of Evansville's Mayor, Jonathan Weinzapfel, and city officials who worked closely with Captain Bob Jornlin and Mike Whicker with the USS LST 325 Memorial. The city and the LST 325 Memorial have formed a great partnership, and I'm proud of their efforts. Evansville will proudly host the LST Week 2008 on September 24 through September 27 of this year, 2008.

Madam Speaker, the Navy decommissioned the last LST, the USS *Frederick* (LST 1184) in October of 2002, but the heroic service of the LST crews and the brilliant record of their craft will not soon be forgotten.

I urge my colleagues to support House Resolution 1316.

Madam Speaker, I reserve the balance of my time.

Mrs. DRAKE. Madam Speaker, I yield back the balance of my time.

Mr. ELLSWORTH. Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. ELLSWORTH) that the House suspend the rules and agree to the resolution, H. Res. 1316.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. ELLSWORTH. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

WATER USE EFFICIENCY AND CONSERVATION RESEARCH ACT

Mr. MATHESON. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 3957) to increase research, development, education, and technology transfer activities related to water use efficiency and conservation technologies and practices at the Environmental Protection Agency, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 3957

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Water Use Efficiency and Conservation Research Act''.

SEC. 2. FINDINGS.

Congress finds the following:

(1) Between 1950 and 2000, the United States population increased nearly 90 percent. In that same period, public demand for water increased 209 percent. Americans now use an average of 100 gallons of water per person each day. This increased demand has put additional stress on water supplies and distribution systems, threatening both human health and the environment.

(2) Thirty-six States are anticipating local, regional, or statewide water shortages by 2013. In addition, climate change related effects are expected to exacerbate already scarce water resources in many areas of the country.

(3) The Intergovernmental Panel on Climate Change's 2007 assessment states that water stored in glaciers and snow cover is projected to decline, reducing water availability to one-sixth of the world's population that relies upon meltwater from major mountain ranges. The Intergovernmental Panel on Climate Change also predicts droughts will become more severe and longer lasting in a number of regions.

(4) Water conservation should be a national goal and the Environmental Protection Agency should work with nongovernmental partners to achieve that goal. The Environmental Protection Agency should support the research, development, and dissemination of technologies and processes that will achieve greater water use efficiency.

(5) WaterSense is a voluntary public-private partnership program established by the Environmental Protection Agency to promote water efficiency by helping consumers identify water-efficient products and practices. The Environmental Protection Agency estimates that if all United States households installed water-efficient appliances, the country would save more than 3,000,000,000,000 gallons of water and more than $17,000,000,000 per year.

(6) The WaterSense program has developed a network of partners, and therefore can disseminate the results of research on technologies and processes that achieve greater water use efficiency.

SEC. 3. RESEARCH PROGRAM.

(a) IN GENERAL.—The Assistant Administrator for Research and Development of the Environmental Protection Agency (in this Act referred to as the ''Assistant Administrator'') shall establish a research and development program consistent with the plan developed under section 4 that promotes water use efficiency and conservation, including—

(1) technologies and processes that enable the collection, storage, treatment, and reuse of rainwater, stormwater, and greywater;

(2) water storage and distribution systems;

(3) behavioral, social, and economic barriers to achieving greater water use efficiency; and

(4) use of watershed planning directed toward water quality, conservation, and supply.

(b) CONSIDERATIONS.—In planning and implementing the program, the Assistant Administrator shall consider—

(1) research needs identified by water resource managers, State and local governments, and other interested parties; and

(2) technologies and processes likely to achieve the greatest increases in water use efficiency and conservation.

(c) MINORITY SERVING INSTITUTIONS.—In the execution of this program, the Assistant Administrator may award extramural grants to institutions of higher education and shall encourage participation by Minority Serving Institutions.

SEC. 4. STRATEGIC RESEARCH PLAN.

(a) IN GENERAL.—The Assistant Administrator shall coordinate the development of a strategic research plan (in this Act referred to as the ''plan'') for the water use efficiency and conservation research and development program established in section 3 with all other Environmental Protection Agency research and development strategic plans.

(b) PLAN CONTENTS.—The plan shall—

(1) outline research goals and priorities for a water use efficiency and conservation research agenda, including—

(A) developing innovative water supply-enhancing processes and technologies; and

(B) improving existing processes and technologies, including wastewater treatment, desalinization, and groundwater recharge and recovery schemes;

(2) identify current Federal research efforts on water that are directed toward meeting the goals of improving water use efficiency, water conservation, or expanding water supply and describe how such efforts are coordinated with the program established in section 3 in order to leverage resources and avoid duplication; and

(3) consider and utilize, as appropriate, recommendations in reports and studies conducted by Federal agencies, the National Research Council, the National Science and Technology Council, or other entities in the development of the plan.

(c) SCIENCE ADVISORY BOARD REVIEW.—The Assistant Administrator shall submit the plan to the Science Advisory Board of the Environmental Protection Agency for review.

(d) REVISION.—The plan shall be revised and amended as needed to reflect current scientific findings and national research priorities.

SEC. 5. TECHNOLOGY TRANSFER.

The Assistant Administrator, building on the results of the activities of the program established under section 3, shall—

(1) facilitate the adoption of technology and processes to promote water use efficiency and conservation; and

(2) collect and disseminate information, including the establishment of a publicly-accessible clearinghouse, on technologies and processes to promote water use efficiency and conservation, including information on—

(A) incentives and impediments to development and commercialization;

(B) best practices; and

(C) anticipated increases in water use efficiency and conservation resulting from the implementation of specific technologies and processes.

SEC. 6. ADVANCED WATER EFFICIENCY DEVELOPMENT PROJECTS.

(a) IN GENERAL.—As part of the program under section 3, the Assistant Administrator shall carry out at least 4 projects under which the funding is provided for the incorporation into a building of the latest water use efficiency and conservation technologies and designs. Funding for each project shall be provided only to cover incremental costs of water-use efficiency and conservation technologies.

(b) CRITERIA.—Of the 4 projects described in subsection (a), at least 1 shall be for a residential building and at least 1 shall be for a commercial building.

(c) PUBLIC AVAILABILITY.—The designs of buildings with respect to which funding is provided under subsection (a) shall be made available to the public, and such buildings shall be accessible to the public for tours and educational purposes.

SEC. 7. REPORT.

Not later than 18 months after the date of enactment of this Act, and once every 2 years thereafter, the Assistant Administrator shall transmit to Congress a report which details the progress being made by the Environmental Protection Agency with regard to—

(1) water use efficiency and conservation research projects initiated by the Agency;

(2) development projects initiated by the Agency;

(3) outreach and communication activities conducted by the Agency concerning water use efficiency and conservation; and

(4) development and implementation of the plan.

SEC. 8. WATER MANAGEMENT STUDY AND REPORT.

(a) STUDY.—

(1) REQUIREMENT.—The Administrator of the Environmental Protection Agency shall enter into an arrangement with the National Academy of Sciences to complete a study of low impact and soft path strategies for management of water supply, wastewater, and stormwater.

(2) CONTENTS.—The study shall—

(A) examine and compare the state of research, technology development, and emerging practices in other developed and developing countries with those in the United States;

(B) identify and evaluate relevant system approaches for comprehensive water management, including the interrelationship of water systems with other major systems such as energy and transportation;

(C) identify priority research and development needs; and

(D) assess implementation needs and barriers.

(b) REPORT.—Not later than 2 years after the date of enactment of this Act, the Administrator of the Environmental Protection Agency shall transmit to the Committee on Science and Technology of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the key findings of the study conducted under subsection (a). The report shall evaluate challenges and opportunities and serve as a practical reference for water managers, planners, developers, scientists, engineers, non-governmental organizations, federal agencies, and regulators by recommending innovative and integrated solutions.

(c) DEFINITIONS.—For purposes of this section—

(1) the term ''low impact'' means a strategy that manages rainfall at the source using uniformly distributed decentralized micro-scale controls to mimic a site's predevelopment hydrology by using design techniques that infiltrate, filter, store, evaporate, and detain runoff close to its source; and

(2) the term ''soft path'' means a general framework that encompasses—

(A) increased efficiency of water use;

(B) integration of water supply, wastewater treatment, and stormwater management systems; and

(C) protection, restoration, and effective use of the natural capacities of ecosystems to provide clean water.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Administrator of the Environmental Protection Agency for carrying out this section $1,000,000 for fiscal year 2009.

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Assistant Administrator for carrying out this Act $20,000,000 for each of the fiscal years 2009 through 2013.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Utah (Mr. MATHESON) and the gentleman from Texas (Mr. HALL) each will control 20 minutes.

The Chair recognizes the gentleman from Utah.

GENERAL LEAVE

Mr. MATHESON. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H.R. 3957, the bill now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. MATHESON. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, dwindling water supplies are creating concern across this country. Thirty-six States are currently or expect to experience significant water shortages within the next 5 years. That's why I introduced H.R. 3957, the Water Use Efficiency and Conservation Act. This bill would establish a research and development program within the Environmental Protection Agency's Office of Research and Development to promote water efficiency and conservation.

Madam Speaker, tough decisions lie ahead for water managers who must balance the needs of agriculture, consumption by cities, industrial and energy production, transportation, tourism, wastewater treatment, energy response, and ecosystems. We are not going to solve this problem overnight, but H.R. 3957 will provide us with several important tools to address the coming issues we face with technology and innovative thinking. By encouraging research and development into water-use efficiency, we can create a path to increase our Nation's water supply.

H.R. 3957 would expand EPA's scope and involvement solving the Nation's water crisis through the development of technologies and processes to expand water supplies through storage, treatment, and reuse of rainwater, storm water and grey water.

The program will also conduct research on water storage and distribution systems, research on behavioral, social, and economic barriers to achieving greater water efficiency, and research on the use of watershed planning.

As part of the program, EPA will develop a strategic plan to outline the best path forward to avoid duplication and work towards the most relevant problems facing our water supply.

My bill directs the EPA to facilitate the adoption of technology and processes to increase water efficiency and conservation. The new program will collect information on new technologies that achieve more efficient use of water and provide this information through a public clearinghouse.

I want to thank Chairman GORDON for his interest in this legislation and for his leadership in ensuring adequate water supply for the 21st century in this country. I also want to thank all of the members of the House Science and Technology Committee for their bipartisan support and for their collaboration—their thoughtful collaboration I would say—on this bill. In the full committee, amendments were adopted that were authored by Congresswoman EDDIE BERNICE JOHNSON, Congressman PHIL GINGREY, and Congresswoman GABRIELLE GIFFORDS. Their amendments made this a better bill, and I certainly appreciate their input.

Madam Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Madam Speaker, I yield myself such time as I may consume.

The Environmental Protection Agency, better known as the EPA, is the Nation's lead agency charged with protecting the environment and supporting the goals of the Clean Water Act and Safe Drinking Water Act by providing methods, approaches and tools needed to protect water sources. As such, relevant and high-quality research and development is very vital to EPA's ability to carry out its many missions.

However, EPA's research and development program is far from comprehensive or rationally organized. As of today, EPA only conducts coordinated research and development activities in three areas; water quality protection, watershed management, and source control management. And while these are essential research areas, I believe EPA is missing a critical component to their research agenda, and that is the research and development of technologies that increase efficiency and conservation.

According to the American Water Works Association, an international nonprofit scientific and educational organization, daily indoor per capita water consumption in a typical single family home is about 70 gallons. By installing more efficient water fixtures and checking for leaks, single family homes may reduce their daily per capita water consumption by about 35 percent.

While some of these technologies are on the market and utilized, many water-saving ideas linger in the research phase for lack of a coordinated Federal research program.

H.R. 3957 establishes a research and development program for water efficiency technologies and conservation at the EPA. It instructs the Assistant Administrator of the Office of Research and Development to develop a strategic research plan, coordinated with other relevant EPA strategic plans, to compel synchronization of different research agendas.

EPA is to use recommendations in existing reports from the National Academies and the National Science and Technology Council in the development of the plan. However, their effort should not be just a regurgitation of previous work.

Other countries, such as Israel, have invested significant resources in water efficiency and conservation research areas. We, too, have to invest resources if we are to weather water shortages in the future.

Madam Speaker, at a time when our Nation is really facing greater numbers of water events, we just can't afford to fall behind on technology research and development.

I urge all of my colleagues to support H.R. 3957.

Madam Speaker, I yield back the balance of my time.

Mr. MATHESON. Madam Speaker, I just would encourage everyone to support this. The Science Committee reported this bill in a unanimous bipartisan vote. That's the tradition of the Science Committee to work in a bipartisan way.

I encourage all my colleagues to support this bill.

Mr. GINGREY. Madam Speaker, I rise in strong support of H.R. 3957—the Water Use Efficiency and Conservation Research Act. I commend my colleague from the Science Committee—Mr. MATHESON of Utah—for crafting this thoughtful legislation that was reported to the House on a broad bipartisan basis.

Over the past year, my home State of Georgia—and specifically my district—has experienced significant and historic drought conditions that have brought to the forefront what the future may hold for our local water supply.

In addition to the drought conditions in my district, a number of other States are facing similar challenges. Over the next 5 years, more than half of the States in our country anticipate some sort of water shortage that will wreak havoc on our environment, as well as our economy.

Madam Speaker, H.R. 3957 addresses ways in which the Environmental Protection Agency can use its Office of Research and Development to promote technologies that increase water efficiency and conservation via collection, treatment and reuse of rainwater and greywater, and research on water storage.

I am encouraged that this legislation will promote the adoption of emerging technologies to help us make better use of one of our most precious resources—water. I am also very pleased that the Science Committee adopted an amendment that I offered directing the EPA to ensure that the research and development efforts resulting from this legislation complement all other EPA research and development endeavors. Proper implementation of a strategic research plan will ultimately make this program successful.

Madam Speaker, at a time when water shortages are becoming more commonplace in our Nation, I applaud the bipartisan work of the Science Committee under the leadership of Chairman GORDON and Ranking Member HALL on this important legislation. I urge all of my colleagues to support H.R. 3957.

Mr. MATHESON. Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Utah (Mr. MATHESON) that the House suspend the rules and pass the bill, H.R. 3957, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PRODUCED WATER UTILIZATION ACT OF 2008

Mr. MATHESON. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 2339) to encourage research, development, and demonstration of

technologies to facilitate the utilization of water produced in connection with the development of domestic energy resources, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2339

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Produced Water Utilization Act of 2008''.

SEC. 2. DEFINITIONS.

In this Act:

(1) PRODUCED WATER.—The term ''produced water'' means water from an underground source that is brought to the surface as part of the process of exploration for or development of coalbed methane, oil, natural gas, or any other substance to be used as an energy source.

(2) SECRETARY.—The term ''Secretary'' means the Secretary of Energy.

SEC. 3 PURPOSES.

(a) IN GENERAL.—The Secretary shall carry out under this Act a program of research, development, and demonstration of technologies for environmentally sustainable utilization of produced water for agricultural, irrigational, municipal, and industrial uses, or other environmentally sustainable purposes. The program shall be designed to maximize the utilization of produced water in the United States by increasing the quality of produced water and reducing the environmental impacts of produced water.

(b) PROGRAM ELEMENTS.—The program under this Act shall address the following areas, including improving safety and minimizing environmental impacts of activities within each area:

(1) Produced water recovery, including research for desalination and demineralization to reduce total dissolved solids in the produced water.

(2) Produced water utilization for agricultural, irrigational, municipal, and industrial uses, or other environmentally sustainable purposes.

(3) Re-injection of produced water into subsurface geological formations to increase energy production.

(c) PROGRAM ADMINISTRATION.—To carry out the purposes under this Act, the Secretary may enter into an agreement with a consortium whose members have collectively demonstrated capabilities and experience in planning and managing research, development, demonstration, and commercial application programs for unconventional natural gas and other petroleum production and produced water utilization.

(d) ACTIVITIES AT THE NATIONAL LABORATORIES.—The Secretary, through the appropriate National Laboratory, shall carry out a program of research, development, and demonstration activities complementary to and supportive of the research, development, and demonstration programs under subsection (b).

SEC. 4. CONSULTATION AND COORDINATION.

(a) CONSULTATION.—In carrying out this Act, the Secretary shall consult with the Secretary of the Interior and the Administrator of the Environmental Protection Agency.

(b) COORDINATION.—To the maximum extent practicable, the Secretary shall ensure that the activities under this Act are coordinated with, and do not duplicate the efforts of, programs at the Department of Energy and other government agencies.

SEC. 5. FUNDING.

(a) ALLOCATION.—Amounts appropriated for this Act for each fiscal year shall be allocated as follows:

(1) 75 percent shall be for activities under section 3(a), (b), and (c).

(2) 25 percent shall be for activities under section 3(d) and other activities under section 3, including administrative functions such as program direction, overall program oversight, and contract management.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this Act $20,000,000 for each of fiscal years 2009 through 2013.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Utah (Mr. MATHESON) and the gentleman from Texas (Mr. HALL) each will control 20 minutes.

The Chair recognizes the gentleman from Utah.

GENERAL LEAVE

Mr. MATHESON. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H.R. 2339, the bill now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. MATHESON. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I am pleased that the House will consider the bill, H.R. 2339, the Produced Water Utilization Act.

I particularly want to acknowledge and thank the ranking member, Mr. HALL from Texas, for introducing this bill. And I look forward to working with him on other water-related issues in the future.

□ 2045

Domestic production of oil, natural gas, and coal bed methane are essential to our Nation's economy. The term ''produced water'' refers to the water brought to the surface during the extraction of these fossil fuels. For every barrel of oil generated in the U.S., 10 barrels of produced water are created.

Since produced water comprises 98 percent of all waste generated by petroleum production activity, handling and disposal of this water can be a major impediment to efficiently increasing domestic oil production.

This bill before us, H.R. 2339, the Produced Water Utilization Act, creates a research, development, and demonstration program for beneficial water produced in connection with oil and gas extraction. The program will focus on improving safety and minimizing environmental impacts during produced water recovery.

The utilization of treated produced water will increase water supply, reduce injections into underground formations, and increase domestic energy production through cost reductions. At a time when water supplies are dwindling and oil prices are high, a research program to turn waste water into a clean reusable resource is just good common sense. I urge all Members to support H.R. 2339.

I reserve the balance of my time.

Mr. HALL of Texas. I yield myself such time as I may consume.

I thank Mr. MATHESON and his fine staff, the staffs on both sides of the aisle, for doing a very good job on this bill.

Madam Speaker, I rise today, of course, in support of H.R. 2339, the Produced Water Utilization Act of 2008. I introduced H.R. 2339 in May of last year, and it was recently reported out of the Committee of Science and Technology by a voice vote. It comes to the floor today with unanimous, bipartisan support.

For those who are not familiar with the term, the Department of the Interior defines produced water as mainly salty water trapped in reservoir rock and brought up along with oil or gas during production. Produced water cannot, in its current form, be used for any purposes, and it is most commonly reinjected into the ground at great expense to small producers across the country. Each barrel of oil produced generates approximately 10 barrels of produced water, and we currently produce over 5 billion gallons of produced water a day in the United States. That is enough water to accommodate 14.3 million homes a day.

As we are facing shortages in energy and water, my bill could not be more timely, in my opinion. H.R. 2339 is legislation that has two main purposes: one, increasing domestic energy production by lowering production costs for small producers; two, increasing the amount of water available for agricultural, irrigational, municipal, and industrial uses by making produced water usable. The Produced Water Utilization Act will provide important funding for research, development, demonstration, and commercial application of technologies to purify and use produced water.

There is a critical interdependency between energy and water. Water is needed to produce energy, and the treatment and distribution of water requires energy, and as our population grows, so will the demands grow on both. According to a report by the Department of Energy on the Interdependency of Energy and Water, ''The lack of integrated energy and water planning and management has already impacted energy production in many basins and regions across the country. For example, in three of the fastest growing regions in the country, the Southeast, Southwest, and the Northwest, new power plants have been opposed because of potential negative impacts on water supplies. Also, recent droughts and emerging limitations of water resources have many States, including Texas, South Dakota, Wisconsin, and Tennessee, scrambling to develop water use priorities for different water use sectors.'' We obviously need to take a serious look at how we can avoid a water/energy crisis, and my bill certainly helps.

Madam Speaker, produced water is currently considered an expensive nuisance by oil and gas producers, but it could be—no, it needs to be—considered

a valuable, usable commodity. With the research and development set forth in the Produced Water Utilization Act, we can make it happen. I urge my colleagues to vote for this bill.

Mr. GINGREY, Madam Speaker, I rise in strong support of H.R. 2339—the Produced Water Utilization Act of 2008—introduced by the Ranking Member of the Science Committee, Mr. HALL of Texas. I want to thank Mr. HALL for constructing this important legislation and for the leadership he has provided to the Committee throughout the 110th Congress.

Produced water is comprised of mainly salty water that is trapped in reservoir rock below ground. It comes to the surface when drilling for oil or natural gas and usually contains oil and metals from production. Approximately 10 barrels of produced water are captured for every barrel of oil derived, and that results in a total of 15–20 billion barrels of produced water generated here in the United States on an annual basis.

H.R. 2339 directs the Secretary of Energy to establish a program for research and development to harvest produced water in an environmentally safe way for irrigation, municipal, and industrial purposes. Once this program is established, we can help address the droughts that are occurring across the country—including in my Northwest Georgia district—simply by providing the public with additional water resources.

Madam Speaker, the United States could be generating even more produced water if the Democratic Majority would allow for the environmentally safe drilling of oil in the Arctic National Wildlife Refuge. Polls show that a majority of Americans would support energy exploration in a small portion of ANWR, which could yield an additional 1.5 million barrels of oil a day. These efforts have unfortunately been foiled by radical environmentalists, content with skyrocketing gas prices.

So, Madam Speaker, to be clear: if we open up ANWR for drilling *and* enact this legislation, not only will we help reduce the price that the American people are paying at the pump, but we will also be better prepared to stave off anticipated drought conditions across the country.

H.R. 2339 only reinforces the need for us to drill here and drill now: to save money at the pump and increase the amount of water we have available in the United States. I urge all of my colleagues to support this important legislation.

Mr. HALL of Texas. I yield back the balance of my time.

Mr. MATHESON. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Utah (Mr. MATHESON) that the House suspend the rules and pass the bill, H.R. 2339, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CONTINUATION OF NATIONAL EMERGENCY WITH RESPECT TO LEBANON—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 110–140)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice to the *Federal Register* for publication stating that the national emergency and related measures blocking the property of persons undermining the sovereignty of Lebanon or its democratic processes and institutions and certain other persons are to continue in effect beyond August 1, 2008.

The actions of certain persons to undermine Lebanon's legitimate and democratically elected government or democratic institutions, to contribute to the deliberate breakdown in the rule of law in Lebanon, including through politically motivated violence and intimidation, to reassert Syrian control or contribute to Syrian interference in Lebanon, or to infringe upon or undermine Lebanese sovereignty contribute to political and economic instability in that country and the region and constitute a continuing unusual and extraordinary threat to the national security and foreign policy of the United States. For these reasons, I have determined that it is necessary to continue the national emergency and related measures blocking the property of persons undermining the sovereignty of Lebanon or its democratic processes and institutions and certain other persons.

GEORGE W. BUSH.
THE WHITE HOUSE, *July 30, 2008*.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

(Mr. POE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. SKELTON) is recognized for 5 minutes.

(Mr. SKELTON addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

DISASTER RELIEF FOR IOWA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LOEBSACK) is recognized for 5 minutes.

Mr. LOEBSACK. Madam Speaker, I rise this evening to speak about the natural disaster that has hit Iowa, first tornados and then floods, in the most recent weeks. This is a natural disaster obviously that also hit other parts of the Midwest. Some 10 States in the Midwest have been struck by massive flooding since June.

First of all, I want to commend my colleagues from Iowa in the House and in the Senate. We have worked together, I think, in stellar bipartisan fashion since the floods struck Iowa, and I commend my colleagues. I am very proud of the fact that we have come together to do what we can for our great State. I have every confidence that we are going to continue to work together in the coming months and indeed in the years ahead.

The people of Iowa are self-sufficient and self-reliant. We are strong. We are the salt of the earth. We do not believe in asking for much. We would rather earn things on our own. When faced with a disaster, Iowans stand together to move forward and rebuild.

Our commitment to community and resilience may lead some to believe that the tornadoes, severe storms, and flooding which hit the State of Iowa was only a minor event. However, having spent the majority of my time back home, I can assure you that this is anything but a minor event.

Indeed, in my district alone, the Second District of Iowa, we have several rivers, and in virtually every case they flowed out of their banks in early to mid June. Whether it's Cedar Rapids that saw the Cedar River rise 50 percent above its previous record and overflow its banks and displace 20,000 to 25,000 individuals; or the Iowa River in Iowa City, where it again spilled over the Coralville Reservoir and exceeded its previous record level by 3 feet and caused some $232 million damage to the University of Iowa; or whether it was the Iowa River coming together with the Cedar River in Columbus Junction and engulfing much of that city, and particularly its commercial areas; or whether it was the Iowa River that split off just before it hit Oakville, the tiny town of Oakville, and formed two channels but included the town of Oakville really in one large channel, a town of just over 400 people; or the Mississippi from Muscatine on down to Keokuk; or the Des Moines River from Ottumwa on to Keokuk. All of these rivers flowed out of their

banks and caused massive damage in Iowa during this period.

I have gone to every one of the counties. I have seen the damage, from urban areas to rural areas. We have probably close to $10 billion worth of damage, if not more, in the State of Iowa.

We did get an initial $2.65 billion package that included Iowa and other States affected by the flooding. But, Madam Speaker, it's time to do more.

It has been 2 months and 5 days since this disaster struck our State. Next month, I have flood assistance meetings set up in all of my flood-related counties, and I am going to do everything I can obviously to help my constituents. I am committed to working every hour of every day to get the necessary assistance to my constituents.

I am, of course, disappointed that this Congress has yet to move forward on a second disaster package, and indeed it looks as though we are not going to move forward before this weekend. That has caused me great disappointment and displeasure. But I am also committed to working with the leadership on both sides of the aisle, and the President, to provide them with any information they need for us to move forward.

As I said before, I am committed to working with my colleagues in the House and in the Senate from Iowa, and others in the Disaster Working Group, which my office helped to create, a bipartisan working group that includes 19 Members of the House of Representatives. I know that, working together, we can provide the relief that Iowa and these other States deserve.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

(Mr. JONES of North Carolina addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

LOWER THE PRICE OF GASOLINE AND OIL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

Mr. BURTON of Indiana. Well, it's 9 o'clock, it's a Wednesday night, and 2 days from now we will all be home for 5 weeks and Congress will not have acted on many pieces of legislation that deal with the energy crisis. While we are home talking to our constituents and doing things that we have to do back in our districts, the people of the United States of America will continue to pay $4, $5 a gallon for gasoline. They will have to take money away from other important areas of their homes; food, clothing, whatever it might be, so they can put enough gasoline in the car to get to and from work or to take the kids to school. I think that is tragic, Madam Speaker.

This Congress should be doing something immediately to lower the price of gasoline and oil. A few days ago, I think last week, the President of the United States removed the executive moratorium on drilling offshore. As soon as he did that, the price of oil per barrel dropped. Likewise, just in the last couple of days, the price of gasoline dropped. If the Congress of the United States were to act likewise to remove the moratorium on drilling offshore on the Continental Shelf, the price of gasoline would drop I believe dramatically in a very short period of time.

But we are not going to do that. We are going to leave here in the next 2 days without doing a darn thing. The American people sit at home, 70, 75 percent of them saying, Why in the world don't you drill? Why don't you drill here in America. Why are you sending all that money overseas, $700 billion a year to the Saudis and to others who aren't really our best friends? Why not keep that money at home; why not drill here; why not become energy independent so we don't have to worry about the rest of the world and what they are doing. But we are not going to do that.

□ 2100

We are going to leave here without doing a darn thing. Now, there are a number of bills pending before the Congress that have been introduced that would solve the problem, but none of them have seen the light of day and none are going to see the light of day between now and when we leave.

Today, a bipartisan group headed by NEIL ABERCROMBIE of Hawaii and JOHN PETERSON of Pennsylvania, about 15 or 20 Members, bipartisan, introduced a bill that had a lot of compromises in it that would have dealt with this problem of energy independence and would have helped lower the price of energy and gasoline.

It was a multifaceted bill. It dealt with solar energy. It dealt with wind energy. It dealt with cars that use all kinds of fuel, the hybrid cars, the hydrogen powered cars. It gave tax credits to encourage the people around this country and the industries around this country to move on wind-driven energy and solar energy and other forms of energy that we are not dealing with right now.

In particular, it dealt with the drilling off the continental shelf. It did not talk about ANWR, because that was one of the areas where there was some disagreement. So in order to go ahead and move forward with an energy bill, this bipartisan group decided they wouldn't put the ANWR issue in there, but they would go ahead with the continental shelf exploration. They said that 25 miles off the continental shelf from the shore would not be explored, and 25 to 50 miles offshore the States would have the right to decline to drill should they want to do that.

But it was a giant step forward, and they moved this bill today to the committees of jurisdiction and we should be acting on that. If we don't act on it between now and when we leave on Friday, we should certainly be acting on it in September.

Now, today we had a vote up or down on whether or not we should adjourn for 5 weeks starting this Friday until September. The vote passed by one vote. Democrats, many Democrats, and almost all the Republicans voted not to leave this body until we dealt with the energy crisis, and it failed by one vote. So the people of this country saw today that a large number of the people in this body that represent them in the Congress want to deal with the energy crisis, but the majority, the Speaker of the House, once again blocked this effort, and I think that is very unfortunate.

It is extremely important that we move on this before we leave in September. The people in this country are going to suffer for another 2 months, and we really need to do something about that before we adjourn for the rest of the year at the end of September, as has been told to us is going to be the case.

We have enough energy in this country to be energy independent. We have enough oil to be energy independent. We have enough gas to be energy independent. We have enough coal shale to be energy independent. We are not doing anything to deal with the problem, and the American people know it.

So I would just like to say tonight, Madam Speaker, before we leave, that this is intolerable, what we are doing. The American people want action. They want the gas prices down, they want the energy prices down, and it is within our power to get the job done, but we are not doing it.

So I would like to urge the leadership in this House, the majority in this House, as well as the minority in this House, to move rapidly; to move rapidly on an energy bill between now and when we leave on September 30th. This is one of the most important issues, it is the most important issue that we are dealing with this session. Madam Speaker, I think it is unconscionable that we have not yet dealt with it.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

(Ms. WOOLSEY addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

IMMEDIATE RELIEF FROM RISING FUEL PRICES NEEDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. ALLEN) is recognized for 5 minutes.

Mr. ALLEN. Madam Speaker, my constituents in Maine and millions of Americans nationwide face an unprecedented crisis as they agonize over how

they will pay skyrocketing oil bills to keep their homes and their families warm in the winter ahead. Hundreds have written to me with their concerns. I want to share a few e-mails and letters to illustrate the magnitude of this problem.

Amelia from Harrison, Maine, writes: ''I am a 16-year-old girl. This summer, instead of being a teenager and having fun, I am staying home to take care of the house because my parents don't have time. My dad works three jobs and my mom works one to pay for the constantly rising prices of gas, food and oil. With my parents working four jobs, you would think we would have enough money to get by. We don't.''

Marie from Gorham writes: ''I am a single foster parent. I have two daughters with special needs. I am worried sick on how I am going to be able to pay $500 or more every 3 to 4 weeks to heat my home. I can't look my foster daughters in their eyes and tell them I can't afford to keep them. We are their family.''

Michael from Topsham wrote on behalf of his 87-year old father-in-law, who lives alone Auburn, Maine: ''Last year his oil fuel cost was approximately $6,400. He is a retired Army Reserve Master Sergeant with 20 years of service. His annual expenditure for fuel oil this year would likely be $10,200. This would consume 85 percent of his annual income of $12,000. Our elderly American citizens will be unable to financially manage these costs. Our government needs to intervene and help our elderly citizens during this unprecedented fuel crisis.''

Marie, Amelia and Michael's stories are just a few examples of the human toll from soaring heating oil prices. More than 8 in 10 Mainers rely on oil to heat their homes. The average Maine household uses between 800 and 1,000 gallons of heating oil a winter. The median home income in Maine is $43,000. At current prices, the average home will pay between $3,700 and $4,700 just to heat their homes. Many will spend more than $5,000. This is more than 10 percent of the gross income for the median income household in 5 months. Coupled with soaring costs for gasoline, food and other essentials, people worry they may have to choose between heating their homes and feeding their families.

Madam Speaker, this Congress must act now before the winter freeze sets in. We need a new comprehensive energy policy to free ourselves from foreign oil. The people in Maine and America are suffering right now, and we need to provide them with immediate relief in the short term to help them get through the winter.

I have a plan to do just that. First, we must fully fund the Low Income Home Energy Assistance Program, LIHEAP, and weatherization programs to help the poor, the disabled and the elderly on fixed income.

Second, we must provide relief for middle-class families fighting to make ends meet.

Last week, Carolyn McCarthy of New York and I introduced H.R. 6605, the Home Heating Fuels Cost Relief Act. Our legislation would provide a $1,000 refundable tax credit for individuals, $2,000 for families, toward the price of home heating oil, as well as a program to provide up to $10,000 in low interest loans for families to weatherize their homes

Third, soaring gas prices and heating oil prices are crippling small business like independent truckers and lobstermen. These businesses are the backbone of the Maine economy. I have introduced H.R. 2133, the Small Business Fuel Cost Relief Act, to create a tax credit for eligible businesses for any amount they spend on fuel, including gasoline, diesel, natural gas and heating oil, over the price on Labor Day 2004, adjusted for inflation.

Madam Speaker, families and small businesses in Maine and across America work hard for the money they spend on fuel. They deserve leadership in Washington that will act now to bring immediate relief from rising gasoline and heating fuel prices.

They also demand leadership to change direction and implement an energy policy that harnesses American ingenuity and entrepreneurship to reduce dependence on foreign oil, maximize conservation and efficiency, perfect alternative fuels and technologies, create jobs, and put America on the path to sustainable, affordable energy future. That is the task this Congress faces.

The SPEAKER pro tempore (Ms. RICHARDSON). Under a previous order of the House, the gentleman from California (Mr. CALVERT) is recognized for 5 minutes.

(Mr. CALVERT addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

TRIBUTE TO SISTER LULA WALKER, FOUNDER OF TABITHA HOUSE SHELTER FOR BATTERED WOMEN AND CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Madam Speaker, I rise to pay tribute to one of the most caring, most willing to share, most sensitive and most delightful ladies that I have ever known. Sister Lula Walker was a rock in her family, in her church, in her community, in her city, and in her country. She was a deeply religious lady, highly motivated, willing to sacrifice, and fiercely determined. She did not know how to retreat, and she did not know how to take ''no'' for an answer.

Raised in a Christian home, she met and married her husband, Reverend Willie Walker, a Christian man who is an ordained elder in the Church of God in Christ Church. Together Sister Walker, her husband Reverend Willie and their children have built a legacy of living and giving which will rarely be surpassed.

With little money and no public support, Sister Lula organized a ministry of providing for battered women and children. She named it Tabitha House, after the disciple Tabitha in Hebrew, or Dorcas in Greek. Tabitha was known for her good works, especially for helping widows and the poor.

Through her good works at Tabitha and in other ways, Sister Lula became the Mother Teresa of our community. Her work became so famous and well-known that she was invited to come to Washington D.C. and testify before Congress on the plight of women and children who are homeless and in need of shelter.

Sister Walker had several bouts of serious illness, but like Tabitha, or Dorcas, she was able to rise up and continue with her work. Finally, on Saturday, July 19th, 2008, Sister Lula could not rise anymore and graciously passed out of this life into another.

So, Madam Speaker, I take this opportunity to extend to Reverend Willie Walker and the Walker family, the Tabitha House family and the Church of God in Christ church family our heartfelt condolences and the great joy that I have experienced as a result of knowing and working with the Mother Teresa of our community, the neighborhood where I live, Sister Lula Walker.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. MCDERMOTT) is recognized for 5 minutes.

(Mr. MCDERMOTT addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. CULBERSON) is recognized for 5 minutes.

(Mr. CULBERSON addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. DAVIS) is recognized for 5 minutes.

(Mr. DAVIS of Kentucky addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. WELLER) is recognized for 5 minutes.

(Mr. WELLER of Illinois addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

SUNSET MEMORIAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. FRANKS) is recognized for 5 minutes.

Mr. FRANKS of Arizona. Madam Speaker, I stand once again before this House with yet another Sunset Memorial.

It is July 30, 2008 in the land of the free and the home of the brave, and before the sun set today in America, almost 4,000 more defenseless unborn children were killed by abortion on demand. That's just today, Madam Speaker. That's more than the number of innocent lives lost on September 11 in this country, only it happens every day.

It has now been exactly 12,973 days since the tragedy called Roe v. Wade was first handed down. Since then, the very foundation of this Nation has been stained by the blood of almost 50 million of its own children. Some of them, Mr. Speaker, cried and screamed as they died, but because it was amniotic fluid passing over the vocal cords instead of air, we couldn't hear them.

All of them had at least 4 things in common. First, they were each just little babies who had done nothing wrong to anyone, and each one of them died a nameless and lonely death. And each one of their mothers, whether she realizes it or not, will never be quite the same. And all the gifts that these children might have brought to humanity are now lost forever. Yet even in the glare of such tragedy, this generation still clings to a blind, invincible ignorance while history repeats itself and our own silent genocide mercilessly annihilates the most helpless of all victims, those yet unborn.

Madam Speaker, perhaps it's time for those of us in this Chamber to remind ourselves of why we are really all here. Thomas Jefferson said, "The care of human life and its happiness and not its destruction is the chief and only object of good government." The phrase in the 14th Amendment capsulizes our entire Constitution. It says, "No State shall deprive any person of life, liberty or property without due process of law." Madam Speaker, protecting the lives of our innocent citizens and their constitutional rights is why we are all here.

The bedrock foundation of this Republic is the clarion declaration of the self-evident truth that all human beings are created equal and endowed by their Creator with the unalienable rights of life, liberty and the pursuit of happiness. Every conflict and battle our Nation has ever faced can be traced to our commitment to this core, self-evident truth.

It has made us the beacon of hope for the entire world. Madam Speaker, it is who we are.

And yet today another day has passed, and we in this body have failed again to honor that foundational commitment. We have failed our sworn oath and our God-given responsibility as we broke faith with nearly 4,000 more innocent American babies who died today without the protection we should have given them.

So Madam Speaker, let me conclude this Sunset Memorial in the hope that perhaps someone new who heard it tonight will finally embrace the truth that abortion really does kill little babies; that it hurts mothers in ways that we can never express; and that 12,973 days spent killing nearly 50 million unborn children in America is enough; and that it is time that we stood up together again, and remembered that we are the same America that rejected human slavery and marched into Europe to arrest the Nazi Holocaust; and we are still courageous and compassionate enough to find a better way for mothers and their unborn babies than abortion on demand.

Madam Speaker, as we consider the plight of unborn America tonight, may we each remind ourselves that our own days in this sunshine of life are also numbered and that all too soon each one of us will walk from these Chambers for the very last time.

And if it should be that this Congress is allowed to convene on yet another day to come, may that be the day when we finally hear the cries of innocent unborn children. May that be the day when we find the humanity, the courage, and the will to embrace together our human and our constitutional duty to protect these, the least of our tiny, little American brothers and sisters from this murderous scourge upon our Nation called abortion on demand.

It is July 30, 2008, 12,973 days since Roe versus Wade first stained the foundation of this Nation with the blood of its own children; this in the land of the free and the home of the brave.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. MORAN) is recognized for 5 minutes.

(Mr. MORAN of Kansas addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H. CON. RES. 362

Mr. DAVIS of Illinois. Madam Speaker, I ask unanimous consent to have my name removed as a cosponsor of H. Con. Res. 362.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERSONAL EXPLANATION

Mr. DAVIS of Illinois. Madam Speaker, I was unable to cast a vote on the following legislative measure on July 15, 2008. If I were present for the roll call vote, I would have voted ''yes'' on the following: Rollcall vote 491, July 15, 2008.

REPUBLICAN FRESHMAN QUARTERLY REPORT

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from California (Mr. MCCARTHY) is recognized for 60 minutes as the designee of the minority leader.

Mr. MCCARTHY of California. Madam Speaker, tonight we come with a quarterly report from the freshmen Republicans. This is something that we promised to do when we were first elected, and we continue to do it each and every quarter because we want to come back to the American people and tell them what their House is doing.

Tonight, for many of you and many of your houses it might be summer school, and last week I just got my daughter and my sons' report cards. They did very well, if you were concerned about that, Mr. HELLER. But what the report will be from this Congress on this night is not good.

In less than 2 days, this House is scheduled to adjourn; adjourn without solving the energy crisis, or even allowing a vote on this floor. So tonight as the freshmen Republicans come to you to talk about this quarterly report, something has happened in the last 2 weeks.

You know, in the minority party here, Madam Speaker, one thing that these freshmen Republicans will do is they don't sit back.

□ 2115

Even if the majority party, the Democratic controlled House here, will not allow a vote on the floor, we believe the American people are hurting; we understand the American people are hurting when it comes to the energy crisis with the price of gas over $4 a gallon, the heating fuel costs which continues to not only hurt the individuals, but it hurts the nonprofits, it hurts the school districts. As we continue to move forward, some districts in my area are talking about even maybe going to 4 days a week, some are talking about charging if the kids want to even ride the bus to school. So we talked about, how can we go about helping America? How can we help solve this problem?

So collectively as freshmen and as Republicans, we got together along with our leader, Mr. John Boehner from Ohio, and we decided, let's go on the all-American energy tour and let's actually sit down and talk to some experts.

So not last weekend, but the weekend before, we went together to Golden, Colorado. In Golden, Colorado they have the National Renewable Energy Laboratory from the Department of Energy. Here, they study from wind, from solar, to hybrids, to hydrogen cars. We drove them. We looked at them. We went through with the biomass, different ways about where the future will go in energy and how we can actually become independent and have an American energy program that creates American jobs. Because, as many of you know, in America today we use 20 million barrels of oil a day but we only produce 7. So to solve this problem, we really need all of the above. We need more wind, we need more solar, we need to actually be able to conserve more, but we also have to be able to explore more.

So just as we went out and looked at the renewable energy and we looked to where you build the windmills; you build them where the wind blows. Where do you put out the solar panels? You put them out where the sun shines. Where do you explore for oil? Where it is, underground.

From there we traveled up to Alaska. We landed in Fairbanks and we went up to ANWR. We went out and looked exactly where we are already drilling today. We went out to the first place where the Alaskan pipeline starts. The Alaskan pipeline, when it starts right there, it sends 700,000 barrels of oil a day. It takes 9 days to get from the beginning to the end. But in 1989, that used to produce 2.2 million barrels a day. Every year that we do nothing, it loses 15 percent. That is 15 percent less barrels of oil coming down. America is still using 20 million barrels, but only producing 7.

And as we looked around, we looked for environmentally friendly ways to do it. We found that in the past you would take 64 acres, today you would only take maybe 16, maybe 6. You could actually drill down and drill out 8 miles because of technology advancements, and that we could do it in an environmentally sound way. And as we went to ANWR, just a few miles over, we found that there is another 10 billion barrels.

We found out that if ANWR was allowed to be drilled, where this body will not even let it come up for a vote, it would add 1 million barrels a day. And 1 million barrels a day added inside that pipeline, what would it mean to you back home? What would it mean to the average citizen? It would mean 50 cents less in the gasoline per gallon that you buy.

Our Federal Reserve Chairman was before our committee just 2 weeks ago, and he said 1 percent added in production would decrease the cost by 10 percent. That is just a 1 percent addition. One million barrels of oil would lower the barrel $20 a barrel from what you see out on the market.

We have a plan. We have an idea. But tonight, and unfortunately when we come to you, the power of the idea will not win on this floor. Not because the desire is not there, but because the majority party will not allow it.

Today we had a very big vote, like many of our votes here. But do you know what the vote was today? By one simple vote. If you wonder if that one votes ever makes a difference, that one vote made a difference today, because on this floor by one vote the Democrat-controlled Congress voted to adjourn, voted to adjourn while the gas prices were over $4 a gallon; saying to the American people that, as I listened to the Speaker the other day, she is trying to save the planet. She is looking at the longevity of the world. I am looking back for the constituents back home that can't afford to continue to live the way this economy is going.

Tonight, we are going to listen to a lot of the different freshmen that actually went on the tour, been a part of it, seeing what is going on in America today. And first we are going to start off with my good friend from the State of Michigan, District 7, back in Battle Creek, TIM WALBERG.

Mr. WALBERG. I thank the gentleman from California, and I thank him for his good words and bringing us really to perspective what is going on here.

I wish I could have joined you on the trip to ANWR as well as to Golden, Colorado and seen what you saw up close and personal. But, frankly, I felt it was more important at that time to look for the pictures you would bring back and hear the testimony that you and other good colleagues and friends of mine would bring back, but for me personally to stay back in Michigan, a State that at present is a one-State recession, that has the highest unemployment rate in the Nation, sadly, that was at one time the greatest manufacturing State, and, more importantly, was the motor capital not only of the United States but of the world, a place called Detroit, Motown, Motor City, all of the above, that established the pattern for what transportation was all about and, I contend, still is; and yet is frustrated by a government system, both in the State and here, with the leadership in Congress, Madam Speaker, that will not do what is necessary to allow us to continue to not only keep our faith to our people, not only keep our position as the greatest Nation on this earth in every area, including transportation, but rather at this point in time is willing to say that the process of saving this planet as our Speaker intends to do involves a Democrat energy plan which was stated very clearly.

And I bring this with some comedy as we look at the picture, and yet it is a stark, painful reality that this plan will not work. And that plan is what? Drive small cars and wait for the wind. If we do that, as the title of an old movie said, it will be Gone With the Wind.

We need to do something, Madam Speaker, now for the people of this great country, for my great State of Michigan, and all of those concerned to produce energy that deals with the reality of what this country needs.

I am tired of living in a State right now where our Governor says with great pride that she rides her bicycle to work to the State capitol from her Governor's residence every day with her escort of security people following her on their bicycles as well. The motor capital of the world with a Governor riding a bicycle. Now if that was for conservation purposes, fine, I support that. For purposes of austerity, I support that. But promoting this because of necessity? I can't accept that.

This morning I sat on the floor of the House and I looked up. And I looked up to the highest point of this Chamber directly above the Speaker's rostrum, Madam Speaker, and I see engraved there in a stone-carved monument to us this statement. It is a statement by Daniel Webster, and I read from the paper because I can see it better in front of me right now. But Daniel Webster said this many, many years ago: Let us develop the resources of our land.

How up-to-date is that? Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day, in our generation, fellow colleagues, freshmen, Republicans, standing here for the defense of our great country, Daniel Webster said, and see whether we also in our day and our generation may not perform something worthy to be remembered.

I submit to you that that is what we are doing, standing here tonight.

Under an adjournment resolution that will take place sometime in the next 24, 48 hours, sending us home, most likely as it appears without doing anything to give an opportunity for my Governor to get in her flex fuel hybrid Tahoe again, if she determines so, to go to her residence.

Well, we can jest about that. I could talk about a lot of statistics. But tonight, while you were in ANWR, I had the privilege of, on five occasions in my district, South Central Michigan, going to various gas stations and pumping gas into constituents' vehicles as they would allow me. I would simply say, ''Hi, I'm Congressman TIM WALBERG. If you will share with me your ideas and concerns on energy and the price at the pump, I would be glad to pump your gas while you tell me your stories.'' I came away with plenty of stories. I came away with plenty of pictures.

Just Monday afternoon in Battle Creek, Michigan, a mother, single parent, one child, came to the pump with a small mini van. She left it running. And when I questioned her about that, she says, ''I'm afraid it won't start if I turn it off.'' She said, ''I'd be glad to talk to you.'' And I said, ''How much do you want me to fill it?'' And she said, ''$11.'' That's just a little over 2 gallons.

She began to tell me her story of how she is working two jobs, and the gas that she was putting into her vehicle that day would get her through 2 days of work and her transportation to each of those jobs and back. Those are stories that talk of reality.

Another story that I wrote down came from a lady who said, ''Because I'm a truck driver and the high price of fuel has damaged the economy so badly, my employer started limiting the miles given to older, higher paid drivers such as myself. My income last year dropped a full 30 percent. Then I was injured on the job and denied workers' comp. I finally began receiving my disability payments after 4 months. During those 4 months, however, I was scraping up every cent available to pay for LP gas to heat my trailer home. Because I spent every available cent on heating fuel, food, and electricity, I could not pay the taxes on my paid-for home. I am now in default, and my home will be forfeited in October for back taxes.''

This is reality that we are talking about here. It is not simply price at the

pump; it is lifestyle, it is living conditions. It is keeping a home that is paid for.

''I can't afford a cheaper vehicle,'' she said. ''I can't afford to repair the one vehicle here that would get a few more miles per gallon than the old F–150. I'm a careful shopper, but the rising price of groceries is also directly related to the energy crisis.''

Let me read one last story that was told to me. This was by a wife from Jackson, Michigan whose husband was in sales, which ultimately diminished and ultimately was lost because of the fuel prices.

She makes a number of points, but in the last point she says, ''At approximately $175 per week in gas costs, we can no longer afford to send our children to Catholic school. That was a choice, yes, but a choice made specifically for our children's interests. They cannot go to camp, they cannot have the braces which they need. The money I would have put aside for college is now being spent on gas. We cannot tithe to our church, nor can we donate to the myriad of other charities we routinely helped. Every decision is weighed based upon''—and get this again. ''Every decision is weighed based upon the extreme cost of leaving the driveway.''

Now those are life stories. Those are stories that make an impact upon me as a congressman representing South Central Michigan, the Seventh District of Michigan.

These are stories that go way beyond the political partisan haggling that goes on here, that goes beyond even making jokes about a plan that will not work, cannot work, and isn't going to be allowed to work to drive small cars and wait for the wind.

Daniel Webster said this, again: ''Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.''

□ 2130

I submit to you, my colleagues tonight and, Madam Speaker, that that is what we are attempting to do here and now; not to produce something that we will be remembered about, but something worthy to be remembered, that we fought for, this great country, the resources that allowed us to be blessed, that allowed us to expand our capabilities and allowed us to bless other nations all over this globe because we used our resources, we built up our land and powers, and we have done something worthy to be remembered.

I thank you for the opportunity. I look forward to sharing in the banter back and forth about reality tonight. But I think that would be beyond the facts and figures that I could put forth, probably the most important thing I can start with tonight, and I yield back my time.

Mr. MCCARTHY of California. Well, I thank the gentleman from Michigan as he tells of the personal stories within his district of the suffering, of the pain.

But as I said earlier, what did this Democrat-controlled Congress do? Today it voted to adjourn, adjourn for an entire month, as many across America dreamt about maybe going on a summer vacation, but told their kids, no Disneyland this year; we can't afford even to drive there.

But, as the Republicans, we don't sit back and just complain. We believe that we can lead. When you look at Congress, you look at the opinion polls, it is down at 9 percent. Many across America are now beginning to call this Democrat-controlled Congress the ''No Drill Congress.''

And we won't even bring up appropriation bills. One of the major jobs of this Congress is to fund government. 13 appropriation bills they are supposed to bring up each and every year, but the majority won't even bring them up because they are afraid of an amendment coming on the bills. The amendment would say, let's create an energy plan. And what would that energy plan be? It would be all of the above. It would expand solar, it would expand wind, it would explore, it would go beyond for the new technologies at the same time, and it would lower the price of gas and create an American energy independent program that creates American jobs.

We have other members from the Freshman Class here with us tonight. Our next speaker, you may have heard him just a little bit ago talking about the National Guard in Nevada, and he continues that leadership now as he begins to talk to us about the energy. Representing Reno, Sparks, Carson City, the majority of Nevada, coming from the Second District, I yield to my good friend, Representative DEAN HELLER.

Mr. HELLER of Nevada. Thank you very much. I appreciate the comments, and I appreciate you putting this together. I am proud to be part of the quarterly report that we have going on here today, spend some time with the folks back home and let them know what is going on here in Washington, D.C. and what we are trying to do to help them. And I want to thank you again for putting us together.

And you know what is great is to be able to listen to the gentleman from Michigan talk about the experiences that he has within his district. And I think we can do that with Louisiana, with Ohio, Tennessee, California, but I want to give a couple of examples of what I am seeing in Nevada.

I have got a pretty large district. I joke with my colleagues sometimes about the distance that I have to drive, 15 hours to get from one end of my district to the other. I go home most weekends and probably drive 500 miles. In fact, this weekend I am driving out to Elko, which is going to be another 500-mile drive. But that is okay. That is okay.

You know, the difficult part about this is that I try to meet my constituents in my district. Every year I try to travel as far as I can, and the exorbitant cost now that it is, just to visit with my constituents, is becoming incredible. I drove about 50,000 miles this year. And had I done that 2 years ago, in trying to visit with my constituents it would have cost me actually $90,000 less, $90,000 extra dollars to drive because of the non-actions of this particular Congress.

But I want to put a face, just like the gentleman from Michigan did, on what is going on here in the State of Nevada. As I drive across the State, I can give examples.

I have a daughter, and many of you have children that are in sports. And it is a shame that playing in some of these competitive teams, once you get to a competitive level you find yourself traveling great distances. She happens to be playing out of Reno, and she has to go down to Las Vegas or maybe to Sacramento, maybe up to Oregon, across the State to Elko or somewhere of that nature. So it is getting pretty expensive for parents, and I am having parents starting to complain that they can't go to the away games. It is difficult for them to get to the away games because of the cost of travel because of the high fuel costs.

Another example of that, I was in a small town called Lovelock, and they have a restaurant over there called Sturgeons, and I was talking to the general manager. And they were talking about the price of eggs. The price of an egg, since the beginning of the year has gone from 7 cents to 13 cents.

Now, Lovelock is not that far out of the way. From Reno it is probably an hour and a half or so. So you wouldn't think that travel costs would be that expensive. But it is the cost of everything, because of the inaction of this particular Congress, that is causing these problems. It isn't just the price of fuel. Of course it is the price of poultry.

When we start taking all of this corn and the grains and the byproducts and start turning them into ethanol and using what could be used for feed for cattle, for poultry, for hogs and everything else, everything is going up and getting very expensive very, very quickly.

I think ethanol is a mistake right now. I think we need to take a look at other ways, other ways of providing energy, and that is why we went on this trip to ANWR.

But I want to give one more example, and that is a particular family that came to visit me last week. The Anderson family came in, one of my constituents, family from Nevada, and they came out here. They have a couple of children and they want to show their children Washington, D.C. And I was fortunate enough to have them come by my office. And I believe he is a dental technician and she is a nurse, and they have a young daughter that

plays volleyball, very good at volleyball. Their son is a very good baseball player. And they are talking about how difficult it is for them to provide, and the problems that they are facing now with these high fuel prices.

They are very good athletes, and so they want to make all of their events, and it gets more and more difficult.

To tell you how difficult it is getting, in my home State of Nevada, according to the USA Today, because of fuel prices for airlines, they are cutting 10 percent of their flights. Well, we are one of five States they are going to cut more than 10 percent of their flights into Nevada.

Now, for a State like ours that relies heavily on tourism and traffic, you can imagine the impact that that is having. But it is not just coming into the State, the lack of 10 percent flights. It is the lack of 10 percent flights now that are going out. And they talked about how difficult it is to get a flight now and the exorbitant cost it is.

I think an airline industry today just announced that the extra bag is not going to be $25, it is going to be an additional $25 on top of that, for a total of $50 so that they can compensate for these huge costs.

I want to banter back and forth more. I want to talk about our trip to ANWR. I want to talk about our experiences in Golden, Colorado. I think they were great. I want to give others a chance to introduce themselves. And thank you again for the opportunity to be here. And I will yield back to you.

Mr. MCCARTHY of California. Well, I thank the gentleman from Nevada for the leadership he continues to show in this work that we are trying to do within the energy.

Tonight, when we went up to ANWR, one thing that I found most interesting when we talked about is how you can do it environmentally friendly. One thing that they showed when we were up in Alaska, that in the 1970s, it took them 20 acres and they would go down 1 mile. 1980s it took them 16 acres.

But you think about technology, and the greatest way for America to understand technology, think of that very first cell phone. It came in a bag. It was about the size of a brick. Today it is a very little phone, and you know within that phone that it has more technology in the cell phone today than we had on the Apollo when it landed on the moon.

But you expand with that technology. Today, present, it takes only 6 acres, so your footprint is much smaller. But what they are able to do when they drill down, to go out 8 miles across, what does that mean to the American people?

One, that we are able to explore much further, to do it in an environmentally sound way, have a much smaller footprint, and actually have fewer wells to drill.

There is a plan to be able to go forward that allows exploration, wind and solar, but the Democratic-controlled Congress will not even allow it to come up on to the floor.

This is becoming, Madam Speaker, a ''No Drill Congress.'' But the American people continue to suffer.

And tonight we wanted to hear from our good friend from Ohio, JIM JORDAN. I yield to my friend from Ohio.

Mr. JORDAN of Ohio. I thank the gentleman for putting this hour together. I thank the folks who are participating and those who were able to go on our trip when we went to, we were up in ANWR, up in Alaska to see.

You know, the thing I just feel so strongly about is, Americans realize we live in the greatest country ever. But they are frustrated. They are frustrated by the fact that this Congress, if you saw the news yesterday, this Congress has run the largest deficit in history. $482 billion is the projected deficit this year.

They are frustrated that this Congress won't act on increasing the supply of energy, won't act on drilling more offshore, drilling more in Alaska, won't act on bringing down the price at the pump, bringing down the price of energy, won't act on those things that are necessary to help every single family across this country.

A few months ago, in our district, I had the opportunity to be in one of our Federal judge's courtroom for the ceremony where new Americans take the oath of citizenship. And I don't know if you have ever had a chance to participate in those ceremonies, Madam Speaker, but when you get an opportunity, it is an emotional experience to watch these, in my case, it was 36 new Americans, raise their hand, take the oath and become an American citizen. And when they completed that oath, the smile on their face, when they now realized that they were a citizen of the greatest country in the world, it is special to see. And frankly, those Americans, those new Americans, as all Americans, deserve better from their Congress.

The idea that we are going to leave here without taking an up or down vote on increasing supply on drilling offshore, on drilling in ANWR, is just wrong, and they deserve better.

One of the things that we learned that the gentleman from California has pointed out in some of his comments and remarks, when we were in Alaska, I will just be frank with you. If ever there was a place that we should be producing oil, it is in ANWR. Alaska is a beautiful State, except in ANWR where we were. When you went and looked across that area, this was a desolate, barren place that has over 10 billion barrels of oil waiting to be brought to production, waiting to be helping with our supply needs, waiting to be helping with the price at the pump that families are paying, and it is just something that we need to go do.

And as the gentleman points out, technology is our friend in this area. The footprint needed now on the surface to go down and get a much larger area subsurface is so small, and we can do it in an environmentally safe way.

I thought it was interesting, and my colleagues will recall this as well who were on the trip, that we flew over ANWR in propeller planes, prop planes, so we were flying pretty low to the ground. When we flew over ANWR I didn't see any wildlife. I am sure it was there, but I just thought it was sort of ironic and somewhat of a coincidence. We didn't see it. As I told the press, we didn't see caribou, we didn't see, you know, polar bears. We didn't see Bambi. We didn't see it. What we saw was a barren, desolate place which, as I said, has over 10 billion barrels of oil that needed to be brought to market.

But when we were on the ground, as the gentleman from California pointed out, in the Prudhoe Bay area, in that production are, where we have been taking oil out of the ground, bringing it to market for 30 years, when we were on the ground there in that area, at the pipeline itself, mile marker 0, pump station Number 1, we saw the caribou. They were right there. In fact, we saw one caribou trotting across the airport runway where we landed the plane as we flew into the Prudhoe Bay area.

So the idea that we can produce this in a way that is going to be friendly to wildlife, it is already there. We saw proof of that firsthand. This is something we need to do.

As I said, the American people get it, and the fact that their Congress doesn't is frustrating. It is frustrating them. It is frustrating for those of us who want to drill more, who want this legislation to pass so we can get started on bringing down the price right away.

They get it. And I am confident what is going to happen over the August recess, you know, is there is an old line in politics that most politicians don't see the light; they feel the heat. And I think when some of these Members go back home, they are not just going to feel the heat from the August summer weather, they are going to feel the heat from families and constituents back home who tell them, we need to drill; we need to go get more supply.

The American people get it. It is time that this Democrat-led Congress get it. I am still confident we can get a vote on this before the election, hopefully, when we come back in September, and we are going to continue to push on that.

And with that I would yield back to my good friend, the gentleman from California.

Mr. MCCARTHY of California. Well, I thank the gentleman from Ohio. And the one thing that he was talking about was we flew over ANWR. We took a few photos. And what you will see here, here is a photo of ANWR. You wonder, where are the animals? Where are they at?

And people wonder about, well, how far away is this from where we are currently drilling? It is within 70 miles. 10 billion barrels of oil sitting right there. It would not take you 10 years to begin.

Mr. JORDAN of Ohio. Will the gentleman yield?

Mr. MCCARTHY of California. Gladly.

Mr. JORDAN of Ohio. One of the arguments we hear is just what the gentleman brought up, it is going to take 8 to 10 years to bring this production. We forget about the fact that, as you indicated, ANWR is only 70, 75 miles away from the existing pipeline. We have already got that infrastructure in place.

And as the gentleman indicated earlier, it used to be 2 million barrels a day moving through that pipeline. Today it is 700,000. If it gets to a certain level, it drops to a certain low level, it becomes physically, the feasibility physically is just not there to continue to maintain it. And frankly, from an economic standpoint, there needs to be a certain volume of oil moving through that every day.

This place is right next door, 75 miles away. And the infrastructure is in place. It will take a lot less time to get that oil to market and help every single family.

□ 2145

Mr. MCCARTHY of California. The gentleman makes a very good point because in 1970 when this was created, back then when Jimmy Carter became President of the United States, he had full intention of drilling in ANWR because that's where the oil is. That's why you put the windmills where the wind blows and the solar panels where the sun shines. You discover where it's at.

And what the Member did talk about was if you look here, this is where we currently are, and ANWR is just to the side. And you're wondering just how large is it. It's 19 million acres. We're looking at only talking about 2,000 acres.

To put it in perspective, as you go out when school starts back up, you go to your high school football games, I want you to look across that football field when no one's there. I want you to just look out at it, and I want you to take one little postage stamp and set it on the field. That's the equivalency. That's how much we want to be able to talk about being able to get 1 million barrels of oil a day out of ANWR, a postage stamp on a football field.

The gentleman from Ohio brought up a very good point that we have this infrastructure, this pipeline. It produces 700,000 barrels a day. Once it goes to 300,000, it will no longer produce then. You have to have more than that.

Now I would like to yield to my good friend, a new member from the freshman class from the First District of Louisiana, STEVE SCALISE.

Mr. SCALISE. Thank you. And I want to thank my colleague from California for putting this together. I think it's very important that while our country is facing a national energy crisis, the only debate that's going on on the House floor is right here tonight with Members of the freshmen class that are sick and tired of the delays and the inaction of the leadership of this Democratically controlled Congress.

Madam Speaker, I think today might have been one of the lows of that 110th Congress, the fact that the only real vote that was taken today on this floor was a vote to adjourn Congress for 5 weeks. The fact that Congress passed a resolution to adjourn for 5 weeks and take a vacation at a time when our country is facing a national energy crisis—we should be here debating solutions to this problem. We should be here talking about the proposals that are on the table. And there are a number of proposals that are on the table to debate.

If the leadership doesn't want to have a straight up-or-down vote, there's going to have to be some reckoning because the American people are sick and tired of it. I think if you look right now—and it's ironic, and it is very unfortunate, that many of the families in my district, in my colleagues' districts, throughout this country, families are canceling their summer vacations because they can't afford the price of energy to go to the places that they wanted to go this summer.

So what is Congress doing to address that big problem that's facing our country? Today Congress voted by one vote, voted to take a 5-week vacation at a time when American families are canceling their vacations. I think that's a low point for this Democratically controlled Congress, and I think they're going to have a hard time answering to the people why they won't bring up a vote.

What are they afraid of? Are they afraid of debating these ideas that we put on the table?

I filed a bill called the GAS Act, Grow American Supply. Removes the barrier that exists. There's a congressional ban on drilling in the Outer Continental Shelf. I come from Louisiana. We know how to drill in an environmentally safe way. People know that you can drill and not do harm to the environment. In fact, now the environment thrives in the areas where drilling occurs. The best place to go fishing in south Louisiana is next to an oil rig because the fish congregate around that area. It's an estuary for them.

By the same token, when we went on that American energy tour when we were in Alaska, we went to Mile Marker Zero, the beginning of the Alaskan pipeline, and we saw three caribou approach about 40 yards away. They were just walking to us. They weren't afraid of us. They were walking towards the pipeline, and we found out back when they built the pipeline 30 years ago, some of these same radical groups that don't want to explore natural resources in America today, some of those same radical groups were saying, ''Don't build the Alaskan pipeline. You'll destroy the caribou population.'' They were there.

You can't find them now because guess what happened? After they built the pipeline, the caribou population increased by about five times, a five-fold increase in the caribou population because they like the warmth of the pipeline and they mate around the pipeline. So it's actually helped the environment. You can peacefully coexist with the natural habitat by safely and environmentally friendly drilling in exploration for our natural resources.

So we put all of those different solutions, the all-of-the-above plan that my friend from California talked about in a bill called the American Energy Act, and everybody in this room cosponsored it. I would encourage all of my Democratic friends to cosponsor the bill as well because it is a comprehensive approach to a major national crisis that's facing our country.

It doesn't just talk about exploration and drilling for oil. It talks about renewable sources of energy, the things that we found at the National Renewable Energy Lab when we went and looked at the wind and solar and the hydrogen technologies that are being advanced.

But even the people that are advancing those technologies will readily admit that those technologies alone will not meet the energy needs of our country 10 years from now, 20 years from now. You're still going to have to have a reliance on multiple sources, multiple approaches to this, including fossil fuels.

So we look at things like oil shale and tar sands where we know we can get billions of barrels of oil. Yet what's standing in the way? The Democratically controlled Congress will not let us have a vote on lifting a Federal moratorium that even exists on exploring those alternative sources of energy.

So I think the more that the American people see this, and the fact that they see every 2 weeks or so the Democratically-controlled Congress brings out another scapegoat, another person to blame. They blamed OPEC and said, ''Let's sue OPEC.'' And then the price rose. And then they said, ''What about use-it-or-lose-it, and oil companies are sitting on millions of acres of leases.'' And then people looked at that and researched it and realized that's not true.

In fact, it's some of these radical environmental groups that filed lawsuits to stop people from exploring for our own natural resources, and that's the biggest delay in bringing oil to the markets so that our people can see a lower price of gasoline.

Mr. JORDAN of Ohio. Will the gentleman yield?

Mr. SCALISE. I will happily yield.

Mr. JORDAN of Ohio. I just want to ask the gentleman a question. He comes from Louisiana.

Isn't it true that the oil production facilities offshore in your State in the gulf that during Katrina, that terrible disaster that hit our country, hit your State so hard, but isn't it true those production facilities withstood that hurricane and there was no spill, no environmental hazard whatsoever during that entire storm?

Mr. SCALISE. My colleague makes a great point because that, in fact, is what happens.

Katrina was a horrible, horrible tragedy. Hurricane Rita came right behind it. So you had two of the worst hurricanes in our Nation's history, came through the Gulf of Mexico within a few week period of time of each other, and many rigs were knocked down. We saw the price of oil go up because our State supply is about 30 percent of the Nation's domestically produced oil. We would sure like to increase that percentage.

But when those rigs got knocked down, one thing that didn't happen is you did not see environmental spills because they do, they do drill today in an environmentally safe way, and you had no disasters because they know how to do it in a very technologically safe way, as my friend from California showed.

The platform, the footprint of an oil rig today is about one-fourth of the size of an oil rig just a few decades ago, and yet they can also drill in a wider area, directionally drill up to 8 miles. So the technology is there.

We have a plan that we've laid out, and if the Democratically controlled Congress has a better idea, put it on the table. Let's stay. Let's roll up or sleeves during this next 5 weeks and solve this crisis rather than taking a 5-week vacation, which is the plan, I guess, the only energy plan that the Democratically controlled Congress had.

That's why I'm proud to say no Republicans voted to adjourn because we want to stay here and work on the solution because, we know, we've got the ingenuity here in our country. We've got the technology to lower gas prices.

Mr. MCCARTHY of California. I thank the gentleman from Louisiana. He made some very good points. And one thing you think of this House and you think of America. I still believe this is the most beautiful building we have in all of this country. You would think the power of the idea would win at the end of the day. And you would think of the debates you have here. But when did you ever think that the Democratic controlled Congress would be so afraid of having a debate, to actually allow a vote to take place? They have the majority. They can vote the way they want.

Today they had the majority to vote to adjourn. Now they're going to have to go home and answer to the American people why they are not back working and finding an American independent energy policy to move forward.

Now I would like to yield to my good friend from eastern Tennessee, DAVID DAVIS.

Mr. DAVID DAVIS of Tennessee. Thank you for your leadership on this subject and so many others. It's good to be with you tonight and many of my colleagues from around the country.

The American people are hurting. Young families are hurting, senior adults are hurting, small businesses are hurting. Energy prices are hurting us all. A family that rents cabins for a living in my district back in northeast Tennessee recently told me they have seen a 50 to 60 percent decrease in rentals during the past spring and summer. They told me that this decrease in rentals may force the family business to go into bankruptcy because they rely on tourists who travel to the beautiful mountains of northeast Tennessee.

Oil prices also affect the cost of many of our daily essentials. Here is just a small list of everyday items that rely on oil for their production. See if you use any of these products. We need oil. We need American oil.

Hearing aids, tennis rackets, eyeglasses, soft contact lenses, trash bags, glue, ballpoint pens, carpets, tires, artificial limbs, bandages, and dentures, to name just a few.

Mr. BROUN of Georgia. Would the gentleman yield?

Mr. DAVID DAVIS of Tennessee. Yes.

Mr. BROUN of Georgia. I appreciate the gentleman going through that list of things.

I used to farm. I'm a medical doctor, as you know, and a lot of things that we deal with in health care are petroleum-based also. But as a farmer, I used not only diesel fuel in my tractor, but I also used oil-based or petroleum-based products to keep weeds out of my crops, to keep bugs out of my crops, and those sorts of things.

Having a shortage of oil is going to drastically affect agriculture, which means it's going to drastically affect food prices to every single consumer in America today. That's another reason why I think it's absolutely critical that we get American oil and stop being dependent upon this Middle East oil and foreign oil.

So I appreciate the gentleman yielding. But I wanted to add that as just another issue that's extremely critical for us to think about as we look because it's going to hurt the American consumer when they go to the grocery store that they can't buy their groceries at a reasonable price. So it not only hurts people at the pump but it hurts people in the grocery store. It hurts people at their job and in every single other way.

Mr. JORDAN of Ohio. Today in the Budget Committee we had a hearing today where we were talking about the increased price in food. We had two economists that were a part of the panel, and I asked them how much—you think about the fact that every commodity price is up. I asked them, I said, How much of all of these other commodity prices, the price being driven up, is attributable to the price of fuel? And they couldn't give a percentage, but they said it's a lot.

And it's not just a lot. When you think about the farmer and the fact that his input costs and just putting diesel in the tractor to plant the crops and harvest and cultivate the crops, but it's all our distribution. You have got to move all of these products that my friend from Tennessee listed, that my friend from Georgia talked about in agriculture. You have got to move them across this country.

Fuel drives up every single other commodity price, and that's why, again, it highlights and underscores the fact that we have got to pass legislation that allows us to get more supply.

Mr. DAVID DAVIS of Tennessee. Very good points. And I represent a rural east Tennessee district that has a lot of farming as well. You make some good points.

You actually start, when you start to till the ground, you have to have diesel. The cost has gone up to the point where it's almost put some farmers out of business. Then you have to put fertilizer on the ground, if you can afford it. If you don't have the fertilizer, you don't make the product. So it really is hurting people from all backgrounds.

Families are canceling vacations. Police departments are cutting patrols. Small businesses are closing across America. Moms and dads are sitting around their kitchen tables trying to put a budget together to decide if they're going to be able to send their kids to school and buy the products that they need, all while the leadership here in Washington refuses an up-or-down vote on increasing American energy.

Mr. MCCARTHY of California. Would the gentleman yield for one moment?

Mr. DAVID DAVIS of Tennessee. Yes.

Mr. MCCARTHY of California. So what the gentleman is saying is the Democratic controlled Congress, the majority who controls what comes to the floor, will not even allow a vote? Not even allow a vote on a plan that says all-of-the-above, that says ''yes'' to solar, ''yes'' to wind, ''yes'' to more drilling, ''yes'' to the new technologies for geothermal and others, but you can't even have a vote on this floor?

Mr. DAVID DAVIS of Tennessee. If they will allow us to vote, I will vote ''yes.'' They may decide to vote ''no.'' But we need to be able to vote and vote the will of the American people.

We have 435 distinct, separate districts across America. Out of those 435, I'm sure some will vote ''no,'' some will vote ''yes,'' but it's really up to Speaker PELOSI to allow it to come to the floor for a vote. The American people sent us here to do a job.

Mr. HELLER of Nevada. If the gentleman will yield.

Mr. DAVID DAVIS of Tennessee. Yes.

Mr. HELLER of Nevada. Thank you. You make a very good point on this. You have heard me say this before, but this energy policy is a three-legged stool. We have to conserve; we have to look at renewable sources; we also need to drill for more oil. You can't do one without the other. You'll have an energy policy that fails. You can't do two without the third or that energy policy will fail.

I'll tell you what I got out of this trip to ANWR, which I thought overall really put this in perspective for me. And that is, as was mentioned, we use 20 million barrels of oil a day here in this country. If we do everything we can to conserve—and the American people are moving in that direction, and I applaud that—if we do everything we possibly can for renewable energy, and that is meet our goals—we have a goal here in these Chambers of 15 percent by the year 2020. If we meet those goals, if we conserve, we're still going to need an additional 10 million barrels of oil a day by 2030.

□ 2200

So where are we going to get the additional 10 million barrels of oil that the American people are going to need if we continue to stop this possibility of going to ANWR, going offshore, looking at shale, looking at all these other prospects, and building additional refineries: Where are we going to get that additional 3 million barrels that we are going to need, even though we're on top of the renewable process and we have conserved, as the American people are doing today? That's the question that needs to be answered.

Mr. BROUN of Georgia. You make a great point, Congressman HELLER.

I keep hearing from the other side, from the radical environmentalists, as well as the Democratic leadership that won't let us vote on this bill, that it will take 10 years if we pass a bill—if we're to pass this bill, it will take 10 years to start producing oil. That's hogwash.

We don't have enough refinery capacity in America. We need to build new refineries, and they say it will take 10 years to get them permitted. And that's hogwash. If Habitat for Humanity can build a house in one week that will withstand a hurricane, as we've seen it happen, if America just has the gumption to do so, we could build a refinery in a year. We could start pumping oil very quickly.

But NANCY PELOSI's leadership won't allow us to vote, and it's just absolutely unconscionable to me that we can't vote to supply more oil and stop this dependence upon foreign oil. It is absolutely critical for our national security.

Mr. HELLER of Nevada. In my local newspaper just today, there was an article written by some of the people that you're talking about, some of the more extreme environmentalists saying that this country would be better off today if we had the same gas prices as they have in Holland, $10 a gallon: $10 a gallon, if we had that, America would be better off. I have a hard time believing that we are better off if we to try to Europeanize ourselves and increase the price per gallon.

I've had town hall meetings. I've had over a hundred thousand people polled of what they thought of a 50 cent per gallon increase. Eighty-two percent are against it. We have people now calling for doubling the gasoline prices we have today.

Mr. MCCARTHY of California. You're all raising very good points, but you're showing what is happening on this floor by not allowing the vote. But there is another way. There is all-of-the-above. If we were able to drill in ANWR, the Federal Reserve Chair said, if you increase production by 1 percent, it goes down 10 percent. ANWR will produce 1 million barrels a day. That automatically would lower the price per gallon by 50 cents.

But think about what's happening today. It's the largest transfer of wealth from our country, America, to countries that disagree with us. If we had an American energy plan that made us independent, what else does it do? It creates American jobs. The $700 billion stays in America.

Mr. WALBERG. If the gentleman would yield, I'd love to hop on that point there.

We talk about those that we pay, and in some cases, even prop up their economy such as Venezuela with Hugo Chavez, who is a dictator who has said that he wants America to be defeated and off the face of the Earth as it were. But we send a check to him of $170 million per day that props up his failing regime, that allows him to continue, and we pay this to an enemy.

I would also submit to you, as I mentioned earlier, as I come from the former motor capital of the world, we have a Volt vehicle that GM is producing that has the ability to run 40 miles, whether standing in traffic, in a traffic jam, or going 40 miles straight on electric power. Most people in their commute would allow them to purchase that Volt vehicle and never have to use the gas portion of the propulsion.

Now, keeping that in mind, we're talking about drilling and we need to drill, but we're also talking about our plan, all-of-the-above, which includes nuclear power, wind power, solar power. I submit to you that, if we have an electric vehicle like that, it won't be any good if we don't do some of the infrastructure.

We need nuclear power to produce that electricity. We need an infrastructure to get it to the box where they have to plug in to recharge. Now, that would allow us the opportunity to expand.

And the gentleman from Nevada, you bring up a good point about those that offer alternatives. We have, at present, the founder of Greenpeace on our side about alternative fuels and the specific nature of nuclear power who says nuclear power is the greenest energy that we can have and we ought to be producing more nuclear power, we ought to be putting nuclear plants up.

So with drilling, with nuclear power, with wind, with solar, with all of the above, natural gas and others, we can make this country independent from any other country on this Earth and put ourselves back in a competitive position that not only allows us to continue our lifestyle and expand it the world around, but also make ourselves secure.

Mr. BROUN of Georgia. These are all great things and they're included in the American energy plan, and that's the reason we need to vote on these. And I think it's absolutely critical—all of us voted to stay here to vote on this bill, and I think it's critical for us to do so.

But a lot of naysayers say, well, even if we voted on this bill, it would take a long time to lower the cost of gas. But I just submit what happened when the President rescinded the Presidential moratorium on offshore drilling. Oil prices immediately fell. Gas prices are coming down. If we would vote on this bill and pass it, I guarantee you almost overnight we'd see much, much lower prices of gas at the pump, and oil prices would come down.

We had this bill about speculation. Well, this is the way to deal with speculation. Let's pass this bill. It will stop the whole problem that we hear from the Democratic side about speculators running up the cost of oil. That's hogwash, too. We need to pass this bill, and I call on the Democratic leadership to bring it to the floor.

Mr. SCALISE. Again, a lot of interesting points are being brought up, great points that you just brought up, and ultimately, this comes down to a supply-and-demand problem. And when you're talking about the price, you are exactly right, because when you talk to economic experts, what they will tell you—and anybody that understands basic market economics, and I think most people in the American country do—unfortunately, I think the Democratically-controlled leadership of this Congress doesn't understand that you've got an increase in global demand for oil all across this world, not just in the United States, and yet the supply is flat. OPEC's not going to increase their supply because they want a high price.

But we here in our country have the ability to increase some of those moratoriums that were arbitrarily placed by Congress. And you talked about the President lifting the ban on Outer Continental Shelf drilling. You saw a $10 drop in the price of a barrel of oil in just 1 day because of an executive ban, even though still now and I think most in people in the country now see that the only thing standing in the way of opening up that Outer Continental Shelf to drilling is the congressional ban that's in place, and that's the ban that's part of the all-of-the-above strategy, and we're asking Speaker PELOSI to just give us a vote on that.

If she wants to disagree with it, if these radical environmental groups don't want to do that, that's their prerogative, but let's have a straight up-or-down vote. I think that a lot of Democrats would vote for that, too, as well as Republicans because ultimately you would see a real solution being placed on the table.

But in fact, what we're left with is this do-nothing approach and the leadership in Congress saying let's adjourn for 5 weeks rather than address this problem because they're afraid of the realization, and I think they realize that if we had a vote on this, we opened it up to all amendments so that we could actually talk about a full, comprehensive energy plan which our country doesn't have—the fact that if we did that, you would see an immediate drop, even bigger than that $10 a barrel drop you saw that one day. You would see a dramatic drop, as my friend from California talked about, at least a 20 percent drop, which our people, our constituents all across this country would realize very quickly in a lower price of gas at the pump, and that's ultimately what we should be trying to achieve.

Mr. DAVID DAVIS of Tennessee. We're here tonight to ask the Democrat majority to let us take a vote on all-the-above, no more excuses.

You know, the interesting thing is we actually took a vote on the floor today. You know, we're here taking votes, 435 Members. We took a vote today to go home. So leadership's letting us take votes but just not on energy bills. I think that's a point that ought to be taken to the American people. They need to understand that we're taking votes. We're just not taking votes to increase the supply of energy. All of the above, wind, solar, coal, oil, drilling, natural gas, we're taking votes but not to increase energy. We're taking votes to go home for 5 weeks. That means for 5 weeks gasoline prices are going to be high back in northeast Tennessee. That's not what the American people look for.

Mr. BROUN of Georgia. I ask any Member here, what's the Democratic leadership afraid of? Do y'all know? I think they're afraid it will pass. I think that's the problem. I think they're afraid that this will pass and they won't have the environmental wackos and radical environmentalists that they can pander to anymore.

Mr. DAVID DAVIS of Tennessee. I think I have an answer to that because I do believe there are some commonsense Democrats on this floor. This is not a Republican issue. This is not a Democrat issue. This is an American issue. The only thing standing between us and the vote is NANCY PELOSI's Democrat leadership. I would call on the Democrat leadership to let us vote. Let Republicans vote. Let Democrats vote. Let them vote their conscience. Let them vote their district.

And I would, without a doubt, believe that we could go home on August 1, 48 hours from now, with an energy plan that would bring down prices at the pump because there's going to be some commonsense Democrats that will vote to make sure that moms and dads have some relief at the pump; young families have some relief at the pump; senior adults have some relief at the pump; small businesses have some relief at the pump. We need some relief at the pump.

Mr. MCCARTHY of California. Reclaiming my time, because as we begin to end here, one, I want to thank all my colleagues for coming down, for talking to the American people about the quarterly report, telling them what actually goes on in this building.

When we think for one moment that, as this House adjourns—not because anybody on this floor right now voted to adjourn. We said let's stay here and let's create a plan that creates an energy program that has all the above, from wind, to solar, to hydrogen, to nuclear, to exploration, takes us into the new frontier.

Because when you think of the floor that we're on, they built this Dome in the Civil War. You think of the challenges that this country has faced. And time and time again, we have met that challenge. But how did we meet that challenge? By not being afraid of debate, by not being afraid of the idea coming forward, not being afraid of one side of the aisle or the other, not saying the country's red or blue. This country is red, white and blue.

And that's the American energy plan we have. It makes us American independent of foreign countries. It stops sending the greatest amount of wealth out of this country to somebody else by creating American jobs right here.

But the only way we're ever going to be able to do it is that this Democratic-controlled Congress has got to change. It's got to allow the idea to come forth and not be afraid of the vote.

So, today, when you go home and when you see your Member out maybe in a parade, maybe on a street corner, maybe they're having a town hall meeting, ask that Member if they voted to adjourn. Did they vote to stay? Did they vote to make America energy independent? Or did they vote no, let's go home, let's let that price go up higher?

Well, I want to thank the Members for being a part of this tonight, and thank you for coming down and telling the American people where the report stands, where we're going forward and being willing to lead, going to Golden, Colorado, to see the renewable energy, and going to ANWR.

□ 2215

D&D DISPLAYS INNOVATES IN NORTH WILKESBORO

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. Madam Speaker, I rise today to salute the innovative and hardworking folks at D&D Displays in North Wilkesboro, North Carolina.

Earlier this week, I visited D&D's manufacturing facilities in North Wilkesboro, North Carolina to learn more about this fine company's contributions to the local economy in Wilkes County. I toured D&D Displays' facility and spoke with company employees about policies that promote economic growth and well-paying jobs in North Carolina. I was honored to be joined by D&D Displays' CEO, James D. Brown, as well as by representatives from the Chamber of Commerce.

Our great Nation has a long tradition of economic growth that provides one of the foundations of our freedoms, so it is exciting to see the progress that D&D Displays has made in Wilkes County to create good jobs and to boost the local economy.

During my visit, I also learned that this local employer recently landed a new project that could provide up to $22 million in new revenue for the North Wilkesboro-based company and that could double or triple the company's employment rolls.

Success stories like D&D Displays are based on the innovative, creative and hardworking people of this country who ask nothing from government except to get out of their way so they can thrive. Congratulations to D&D Displays on their upcoming expansion. My hope is to see them continue to expand their business and to contribute to North Carolina's economy.

IMPROVING ENERGY, NATURAL DISASTER AND HEALTH CARE POLICIES IN AMERICA

The SPEAKER pro tempore (Ms. TSONGAS). Under the Speaker's announced policy of January 18, 2007, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes.

Mr. KING of Iowa. Madam Speaker, I appreciate the honor to be recognized to address you here on the floor of Congress, and to kick off this Special Order moment, I would be pleased to yield 5 minutes to the gentleman from Georgia, Dr. BROUN.

Mr. BROUN of Georgia. I thank my colleague for yielding.

America right now is drilling for ice on Mars. Yet we cannot drill for oil in America. This is insane. If we have the technology to explore beneath the surface of Mars, then we must have the technology to explore for oil here at home in an efficient, environmentally friendly fashion.

Our home-grown energy businesses employ that technology off the coast of Louisiana today. Hurricanes Katrina and Rita toppled many of the oil rigs offshore, but there was no environmental catastrophe. Not one drop of oil was spilled. Not one drop washed up on the shorelines.

I respect Louisiana Democrats CHARLIE MELANCON and MARY LANDRIEU, who support their State's exploration and development in the face of stiff opposition within the Democratic Party's ranks.

Why can't we learn from Louisiana's success?

There are some who like to say we're facing an energy crisis, and then they'll use those two words to manipulate votes this December. For there

truly to be an energy crisis, there would have to be a shortage of fuel. Fortunately, there isn't one today, but there is a shortage of courage in this body, a shortage of creativity and a shortage of will to do what needs to be done to ensure that there will never be another 1970-style fuel shortage.

The best way to cope with a crisis, real or not, is to avoid it in the first place. The Georgia Bulldogs are in my district, so you know I love a good football analogy. We all grew up with Charles Schultz and his Peanuts comic strip, so we are familiar with the image of Lucy's yanking the football away from Charlie Brown just as he's running to kick a field goal.

What image better represents the Democratic leadership's approach to energy policy—this so-called new direction for our Nation? this new direction energy policy? the Democratic leadership's energy policy? A sound, obvious proposal comes to the table, such as expanding domestic resource exploration. The Democrats quickly yank it away from under the American consumer.

Why? Because it's tradition for most of them to appease radical environmental groups and to oppose domestic exploration and production even in the face of rising costs and of increasing dependence upon Middle Eastern oil.

Some of the ideas springing forth from the New Direction Congress are policies from an old era best left forgotten. I'm speaking about this absurd notion of nationalizing, read ''socializing'' our Nation's oil and gas businesses. The most recent mention of it has been quickly forgotten by the press, but I want to point out how this allegedly fresh idea has evolved without even going into the original idea's ultimate failure in the former Soviet Bloc.

Nearly 80 percent of world oil reserves are controlled by nationally owned oil companies, not by American or by other private companies. Today, as a nation, we scoff at nationalized oil and gas production in Iran, Cuba, Venezuela, and Bolivia, but somehow socialization is acceptable to some Members of the ''New Direction'' House and Senate. To me, it's a new direction headed down an old path to a dead end.

I reject socializing oil companies because it is un-American and because I trust our market economy. As we learned when Hurricane Katrina and Hurricane Rita caused no oil spills, offshore oil rigs are safe, and offshore oil rigs attract new marine life as we're still learning from the new artificial reefs there.

One Democratic aide summarized the liberal energy plan as ''drive small cars and wait for the wind.'' We developed this picture of the Democratic Party's policy for energy in America. It's absurd. Well, Madam Speaker, not everybody owns a small car, and it's not windy every day. America wants energy solutions now, and we should vote to serve their interests, not the interests of the radical environmentalists.

We've introduced a bill called the American Energy Plan. It encompasses all of the above, every single possible energy source that we can figure today, and we'll even stimulate the production of new sources that we may not even know about. We need to have a vote on that bill.

The Georgia Bulldogs' head football coach, Mark Richt, has a saying he uses to energize the Georgia Bulldogs football team: Finish the drill. As a Congressman, I've got three words to energize America: Start the drill.

We do that by voting for the American Energy Plan. We do that by voting to expand offshore drilling, ANWR drilling. We do that by voting to produce new nuclear energy and to permit new refineries. If Habitat for Humanity can build a house in 1 week that will withstand a hurricane, we can build a refinery to produce more gasoline for America in 1 year. We have to have a vote. The American public is absolutely dependent upon it. I want people to understand the reason that the gas prices are high at the pumps when you go pump your oil today. It is because we're not able to vote on the American Energy Plan or on some comprehensive means of establishing new oil supplies in America.

I thank the gentleman for yielding. I yield back.

Mr. KING of Iowa. I appreciate the gentleman from Georgia's coming to the floor here tonight, Madam Speaker, and for addressing these issues that matter to America, also from a Georgia perspective.

There are a lot of things I do want to say about energy tonight, Madam Speaker. Yet I think it's important for me to address first the situation that's going on in Iowa with the disasters that we've had.

To lay some of this backdrop out for you, I have significant background when it comes to the experience of having been flooded myself. I go back to '93 when we had the 500-year flood event in Iowa. I can remember earlier than that, in about 1991, sitting down and actually playing gate tag in the airport with Ellen Gordon, who was the director of Iowa Emergency Management at the time.

We worked out a system by which we could respond to disasters in Iowa. She was very, very good, and was in the business of making sure that we were prepared for disasters. Yet our discussion didn't really cover the breadth of the floods. It was more the idea of the more localized tornadoes that do come and that have visited our State and many others throughout the centuries.

Our focus was on: What if there is a large fire? What if there is a series of tornadoes or of bad tornadoes? How could we put the equipment in and the people in to respond to that kind of disaster and clean it up?

Yet, just a couple of years later, we had the 500-year flood event, and so it wasn't something that we had had previous significant experience with in our memories. Although, anyone can look back at the times before we did some of the Corps of Engineers' work that stabilized the Mississippi River on our east side and the Missouri River on the west border and some of the other major rivers, including the reservoirs that we built throughout the State on up through the Des Moines River that are designed to protect Des Moines. For example, there is the Saylorville Reservoir and the Red Rock down below Des Moines and the Coralville Reservoir that protects Iowa City. At least it did a respectable job of doing so. Those would be the major reservoirs in the State. Then additionally, there's Rathbun down in the south.

It turns out that we have actually done work on all of those reservoirs, Madam Speaker. Having been under water myself and having delt with four of our major projects in 1993 and having volunteered to go over to Keokuk to spend some days on a rock pile, which at that time was out in the middle of the Mississippi River which today is on the shoreline of the Mississippi River at Keokuk, I'm not without experience when it comes to floods and disasters.

Having been one of the first Members of Congress to go down into New Orleans in the immediate aftermath of Katrina and having flown, really, all of that—most of it in helicopters, some of that in a plane—and having gone down on the ground and having traveled on the ground around New Orleans and into Louisiana—Slidell, Louisiana comes to mind immediately—and having slept in a Red Cross cot and having felt bad about it because I found out that a Red Cross personnel had given up his cot for me to sleep on, I've been in the middle of this. I've watched people when they've been hit by floods. I know, I think, what goes on in their heads and how it is when the flood waters come up. The faster they come up, the more adrenalin you get to try to stave off that flood and the more sandbags you can throw and the more you can mobilize, let's say, manpower and machinery to protect us from those floods and to try to keep the floodwater out of our critical infrastructure.

When it crests and if it runs over the top of your levees and over the top of your sandbags and when you watch that fill up, it's a feeling of despair. It's a feeling of we tried as hard as we could. We did everything we could do to be ready for this, and then when it was time for all hands on deck, all hands were on deck. All men and women came to the levees, and they pitched the sandbags, and they did everything they could do to get ready. When the flood crests and you lose and when the water fills up in places where it has never been before, like in Cedar Rapids, Iowa and in places like Iowa City and Coralville, when that happens, you have a crushing feeling of despair.

Sometimes there is that long wait, the wait for the water to go down because, especially on the eastern side of

the State, along the Mississippi drainage area and in the Mississippi Valley, the water comes up slow, and it goes down slowly. So there's a longer period that it takes to be in a position to recover.

On the west side of the district that I represent, the water goes up fast and comes down fast, and there's a shorter period of time that it takes for it to dry up and a shorter period of time for us to recover, but all the while that's going on, your adrenaline peaks at about the crest of the flood, and then it diminishes in the aftermath of the flood.

As to where we are now, I was actually, I will say, surprised, sadly surprised, internally taken aback to see what I saw last Saturday in Cedar Rapids and in Iowa City. I know those towns. I know those cities. I know those river valleys. I've seen them flooded before, especially the Iowa River Valley, not so much the Cedar River Valley. I've not seen the cities of Iowa City and Cedar Rapids under water like I did when I flew over that just after the high watermark. First, I'll tell you what happened.

It rained perhaps more than ever before in a section of Iowa that would be the northern half of the State, almost exactly the northern half of the State. It would be 100 miles from north to south, from the Minnesota border down to the south—that line and 300 miles roughly east and west. That area also expanded into southern Minnesota and into other places of the east and west of Iowa, but in that area in Iowa, 100 miles by 300 miles—and there were intermittent rains and additional rains, but in one rain on one night and on one morning, Iowa took in that area of 100 by 300 miles no less than 4 inches of rain, something meeting and exceeding 10 inches of rain in other areas within that 100- by 300-mile area, three-30,000ths square miles with more than 4 inches of rain and up to 10 inches of rain.

When you see something like that, you see that it's probably more water than has ever come in a single rain before. When it came on saturated soils and as the water ran off of those hillsides and down the rivers and it crested at Cedar Rapids, the Cedar River cresting at Cedar Rapids—it did its share of flooding in Cedar Falls and in Waterloo, but when it crested at Cedar Rapids, that city had already been seeing the worst in '93. When the high watermarks in '93 were noted, the businesses looked at that and said this is as high as it's ever going to get. This is a 500-year event.

□ 2230

And so if I make sure that my business is above that elevation of the water crest in 1993, put it up, say, a foot above, who above that line would need to buy flood insurance? The rational thing is, when you get a 500-year flood event, you're probably not going to live to see another event where the water gets higher than it did.

And it might be something that one could understand if it came back and it approached that level or exceeded the 500-year flood event level by a foot or so, but what really happened in Cedar Rapids was the high water mark there was in 1851, and the new high water mark set in the floods less than a couple of months ago crested 11.12 feet above the previous high water mark, which was set in 1851. That's not a level that anyone could have anticipated. It's not something anybody can build for. Its not something the Corps of Engineers can tell us that we can adjust for. It was a weather anomaly where huge rains came in—and just in the watershed areas, and broader, but it focused on those watershed areas. It sent the water down through the funnels that are the river valleys, the Cedar River Valley and the Iowa River Valley.

And Cedar Rapids, the second largest city in Iowa, had its downtown flooded with something like 600 to 800 businesses flooded, and now, 1,300 square blocks of residences that were flooded—probably more than that, but that would be one of the measures. And I'll submit this, Madam Speaker, that I've been to those places where we've had natural disasters and had floods and hurricanes.

And I did a number of trips into New Orleans and I walked the streets of New Orleans and I went back to see their downtown dark when the power was off and the utilities weren't functioning and the businesses were gone. And some of them had the windows out and the doors open and they were being aired out, trying to dry them out. To go in and strip out the drywall off the walls—the wet drywall, I would add, if that's not an oxymoron—to have to go in and replace all the furniture and the carpet and the walls and the appliances and re-wire and come back in with new walls and new flooring and new carpeting, for example, and new furniture, to get all of that done takes time. It takes time to find people, it takes time to find the resources. And the sad thing is it takes a lot more time to find the money and know what you can plan on. All of that I've worked with in New Orleans. And all of that that I've described exists in downtown Cedar Rapids today and in the residential areas.

To go into downtown Cedar Rapids on a Saturday afternoon and look around there and see there isn't any business functioning down there, that there are generators set up to run light plants to carry just some streetlights at night because the utilities aren't back up. There is a steam power system that has been providing that utility for the downtown Cedar Rapids; about 25 percent of the businesses have access to that and all the rest do not.

There were businesses that were established businesses that have been there for—the building was functioning in that fashion for perhaps a century or more; never been flooded—or not flooded in our memory, anyway—but under water six, eight, 10, 12, 14 feet of water that went in and destroyed these businesses, depending on the elevation of the business and where the water decided it would want to go.

This Congress, however much empathy they've provided—and I appreciate it all. And I appreciate, of course, the how responsive they had for Katrina—but this Congress has not reacted fast enough to the situations in Iowa and in Illinois and in the Midwest from these past floods.

What we have done in this Congress to date is, in a supplemental bill, we brought $2.65 billion in funding to backfill FEMA, an existing account for FEMA. And that's all that's been done from an appropriations standpoint or from a policy standpoint.

We do have a whole series of tax packages put together by Senator GRASSLEY. And this tax package that he has put together is a good one, it does what can be done for tax relief. And it is the tax relief that was offered to the people and the businesses in New Orleans during Hurricane Katrina and Rita. It was that with some loopholes closed that were found by some folks down there—we were happy to close the loopholes. That tax package hasn't been moved. We don't have a response from Ways and Means here. I don't know that we have a response from the Finance Committee in the Senate and how that might be. Those things need to happen.

The business people in these communities, in Iowa City and in Cedar Rapids, and the smaller communities up and down the river, including Columbus Junction and including Oakville, they need to have some definitive action on the part of this Congress. This Congress can act definitively when they see a disaster that grips their heart. Here's how they acted in Katrina back in 2005:

September 2, 2005, we appropriated, in a special supplemental spending bill, $10.5 billion for the initial down payment on Katrina relief; $10.5 billion, September 2. Six days later—not a week later, six days later—Congress appropriated $51.8 billion for Katrina relief. That was September 8. Then December 30, Congress appropriated $29.1 billion, Katrina relief. Then June 15, 2006, $19.3 billion, Katrina relief. Then on May 25, 2007, $7.7 billion, Katrina relief. And on November 13, 2007, late last year, $6.4 billion, Katrina relief. That adds up—and don't hold me to this math, this is a memo note—$123.5 billion in Katrina relief that began when—the disaster declaration was made August 29, 2005. And on the second day of September, the first $10.5 billion came through. And then 6 days later, and then late December, then June of the following year, then May of the following year, then November also of last year; $123.5 billion, Madam Speaker.

And this Congress—and the only measure is not how much money did we appropriate to backfill FEMA, that was

$2.65 billion, in that same bill, Katrina relief, more than twice as much went to Katrina, $5.8 billion, Madam Speaker.

So I wouldn't make a big issue of this if I didn't think that there was a desperate need. And even though I had flown over the entire flood area—that we could identify at least in eastern Iowa—and western Iowa for that matter, and we had some of our own flood that wasn't as broad and probably not as severe, even though I've flown all over that and looked at that—and I know what floods look like from the air and the ground and I've lived them and I've been flooded myself—I was sadly surprised and gripped when I saw especially downtown Cedar Rapids with the businesses dark on a Saturday afternoon.

And also, to talk to the businessmen and the businesswomen there that are trying to figure out what they can do without definitive answers and response, I know it's difficult. And I said with Katrina that even if Mayor Nagin and the Governor of Louisiana—let me just put it this way: Even if the city of New Orleans, the State of Louisiana and the Federal Government, all of our agencies, if they had all performed at their maximum statutory authority, we still didn't have the resources and we didn't have the mechanism in place to save everybody, and as many resources as possible in that disaster down in New Orleans.

We've learned a lot from that. I'm not here to criticize FEMA or Small Business—they're certainly not the Corps of Engineers—and the balance of the Federal agencies, and certainly not to criticize the Red Cross. Everybody mobilized, they went to the rampart, so to speak. The volunteers came out in numbers to the point where sometimes they were actually turned away because there were more volunteers than there were sandbags, so to speak, in some areas. I'm proud of that. I'm proud of that response, and I'm proud of the work that got done and I'm proud of the example that got set.

And I'm proud of the spirit of our Iowa people. And as I met with the business leaders and the businessmen and women in both of those cities, Cedar Rapids and Iowa city, as I went back to FEMA headquarters and stayed and spent some time—about 2.5 hours on a Sunday morning—with the State Disaster Coordination headquarters of FEMA, I met with many of their people, and even right down to a second generation FEMA employee. There is a lot of accumulated knowledge, a lot of disaster expertise within FEMA. I'm not here to criticize that.

Madam Speaker, the issue that I raise is, downtown Cedar Rapids is dark. Their power is off. They've been flooded out. Six hundred to eight hundred businesses are out; some will not come back. Every day that goes by, the odds of losing another business and another business and another business get greater and greater.

These businesses that have been flooded have lost a lot of their capital base, a lot of their assets. Some of these people have worked for a lifetime and put all of their resources back in their business. And their business was above the 100-year flood event. They didn't have flood insurance because that was a rational decision, not an irresponsible decision. And the water got 11.12 feet higher than ever before and they are caught by an act of God calamity of rarest proportions, and yet they don't have anything that they can really hang their hat on as to what will be the sequence of events? What resources will be deployed in the area?

Yes, we know that Small Business Administration is in there offering loans. And I think they've done an acceptable job of processing the paperwork and giving people something that they can count on. They showed me the numbers of the loans that have been written and approved. And yet I know that, even though the loan is approved for people in residences, for example, as well as businesses, that isn't the only thing required to get people up and going. For example, if your business has been flooded and wiped out, and let's say you qualify for a small business loan, you still have to come up with locating the materials and you have to locate a contractor, and you have to put together a real business plan that's going to carry you on.

I had to make some of those decisions when I was under water in 1993. And at that time I was in my early forties. So to look at something that was capitalized over 20 or 30 years was a different equation for me than it is today in a place like Cedar Rapids or Iowa City, where some of the business owners are retirement age, 63, 64, 65 years old. And when they're looking at a disaster that's cost them hundreds of thousands of dollars, and the equity that they've used to leverage their business through these years is gone and they're looking at a 4 or an 8 percent loan—and by the way, the higher the risk, the higher the interest—a 4 to an 8 percent loan, they have to make a decision, when they're borrowing money, when the last payment on that 30-year loan is beyond their life expectancy and they've already reached about the end of their working life expectancy, how, then, do you pay the bills? What do you do with your life's work?

When you think of the Enron people who had all their pensions wrapped up in Enron stock and found out that the Enron loophole allowed for the fraud and their pension funds collapsed, many of those people that were retired had to go back to work. And some of them that stayed retired had to dramatically shorten their budget and squeeze everything down. The happy golden years of retirement didn't materialize because of something that was beyond their control. And yet we have a situation here that was beyond the control especially of the business people and the residences, and all of the region. And I'm using Cedar Rapids as an example because that's where this chart is.

Madam Speaker, I have here a picture of a residential area in Cedar Rapids, Iowa. And this is very, very typical. Although the report from FEMA is that essentially the debris removal and clean-up is caught up—and I don't disagree with that—when they pile this out in the middle of the street, they come along and pick it up and load it way. We don't have what I saw in Katrina, which was huge wind rows of debris that were piled out there. And sometimes you had people objecting to having the debris hauled out. That's not happening in Iowa. When people haul debris out, they put it by the edge of the street, sometimes right in the edge of the street so it's easy to pick up. It's being picked up and removed.

I saw the city of Palo was entirely under water. Every house in that city had suffered major damage. And they carried their furniture and their appliances and the ruined material on out into the street and began to strip out the wet drywall—which is now a common phrase. And most of that debris is all picked up.

This is an example of a pile waiting to be picked up. You can see it has furniture in here, it has appliances in here, it has some clothing and waste. There are pieces of lumber and boards and furniture all piled out here to be hauled out. And all of this, Madam Speaker, has got to be replaced, and it's all got to be put back again.

And the homeowner back here doesn't know whether there is going to be an initiative to buy this all out, whether there will be an initiative to come in and rebuild, whether there is going to be a flood insurance premium that will be too costly and it might be wiser to move on out. They don't know if they can get a building permit to go in and rebuild their house and put it back into pre-flood conditions with or without a loan, with or without a buyout, with or without a city plan, they don't know.

And the hardest part of being in a flood—and it isn't easy to answer all these questions—the hardest part is you can't make decisions because there are so many variables that are beyond the scope of being answered or can be answered by the local officials. But that's an example of the debris that's there last Saturday.

This is a relatively fresh picture. This is an example of the spirit of America and the spirit of Iowans. This is in Cedar Rapids. These buildings are all empty, they're all flooded. The high water line I'm going to guess is someplace about right here.

□ 2245

The defiance of America shows up this way, Madam Speaker. That is, you go find the largest, boldest American flag that you can find and you hang it up there for all to see, and that says,

We're going to beat this. We are coming back. We're not going to let this get us down. That is what that flag said.

If you look up this street off in this direction, there was flag after flag coming out from the buildings that were set up. That is the message that I am proud of. But these buildings are stripped empty now. They have been flooded out. They have all got to come back again. These are businesses that probably don't get a grant of any kind. They will have to settle for a loan, if they can qualify. And then for 30 years they can pay it back.

This also, Madam Speaker, is another example of along the street in Cedar Rapids. Again, Cedar Rapids is just the epicenter. This goes up and down the river valley, town after town.

You can see the appliances that are laid out here and the debris that has been stripped out of the homes right along the street so it's easy to pick up. Nobody is resisting here like they did in New Orleans and taking the position that the workers, the volunteers, and the cleanup crews shouldn't set foot on this ground. They are saying, I put it out here for you to pick it up. Please do so. Thanks for helping me. Let's all get to work.

We have some people that don't know whether they are going to have enough money to fix their house or not, but they want to do something. So they go in there and they strip it out, they clean everything out, they throw everything away that they can throw away, that they need to throw away, and fix that house so that they can start rebuilding if they come up with the money, if they get a grant, if they get a loan, and if they can come up with the materials and the contractor.

But that looks to me like New Orleans looked. I spent a lot of time walking the streets in New Orleans. If I would take this picture and ask the question of our friends from Louisiana, I think a lot of them would say, Oh, yeah, I saw that down south. I saw that along the gulf coast in 2005. Well, it's 2008. It's Iowa. They are still looking for some answers and looking for some relief.

This also is an example of what we saw for the disaster. This is a bridge that was taken down. They knew that the bridge was going to take a lot of water so they ran train cars out here, filled these train cars with stone and ballast, and I believe they said water, to put some weight on the bridge so the bridge wouldn't go out. The bridge went out anyway.

Here's the train cars still sitting on the bridge. This is a little bit older picture. Some of these are actually floating homes that were pushed down up against this bridge. I saw this all from the air when I flew over Cedar Rapids.

So that is an idea of how devastating this was when you see this kind of carnage with a railroad bridge taken out and the homes that are floated down against it.

This, City Central, this is an island in the middle of the Cedar River, where city hall and some administrative buildings are. This is at not quite the peak high water mark, but that shows you what happened.

We have, Madam Speaker, a grant system that comes primarily from FEMA that does this. It allows for residences to qualify. So a residence like this potentially could qualify for up to a $28,800 grant. That grant then can be used to refurbish and rebuild the interior of the home and put it back in its pre-flood condition. That is there for the residential homeowner.

We also have qualified grants to help the city out. Political subdivisions, say the city, the county, perhaps the State, and I believe the State, so that if they have damage to their buildings, they will be rebuilt. We have a Federal building that was flooded, the Federal courthouse in Cedar Rapids. It's slated for reconstruction, to be built new, but I do believe that it's going to be refurbished before we can get a new building built. That's a pretty big check to replace the building. It's also a big check to refurbish the building.

But my point is that political subdivisions, the institutions of government, will receive Federal dollars to be reconstructed, Madam Speaker, and the residences will receive Federal dollars to be reconstructed. Even some of our critical infrastructure can qualify. Our railroads will likely qualify in some areas, as we have in past disasters seen that our utilities qualified for grants to put power poles back. Say in the case of an ice storm that might take the power out in a large area, we provided Federal dollars to go to those utilities, put the poles back up, the lines, and at least take some of the sting out for the utility companies.

So it's not unprecedented for us to cross a line, a line from a residence here, a line that includes municipal government and county and State government here, a line that includes a railroad bridge here, a line that includes utilities occasionally. All of those things qualify for Federal grant.

The only people that we're asking to go without any kind of a grant in this are the people that are paying the taxes on everything else, and that's the businesses in the communities. So if you run a business in Cedar Rapids, Iowa City, in the valleys of the Cedar or Iowa River or the Mississippi River Valley, likely below the confluence of the two rivers in Oakville, if you run a business in those areas and your business is flooded, chances are you're going to be applying for an SBA loan, if you qualify. If you're a large business, you may not.

But there is no provision in law that allows the Federal Government to step in and provide a grant for the small businesses that are as devastated, in fact, in many cases more devastated, than the residences are themselves.

I don't know that we have got this entirely backwards, Madam Speaker, but I will submit that if you have the healthy, economic, social, and cultural ecology of a community, it was the evolution of that community that was formed around the commerce in the first place. It's likely somebody set up a trading post. Maybe that trading post was on the Cedar River or the Iowa River and then they traded furs through there and the trading post began to sell goods and then, after a while, services, and they built a residential house. They probably slept in the store when they first moved there. Then they built a home to live in and then they needed more services. As the businesses expanded, they justified the people that would be building more businesses around them. They needed a place to live. So they built homes. It wasn't that somebody moved to Cedar Rapids 150 or 180 years ago and decided that they just wanted to live there like a vacation home, Madam Speaker. It was the first people that built the towns and the cities in the Midwest at least and in the United States, for that matter, they set up the businesses first and the residences came next. Then they had to have government to provide order and the government buildings were built.

Sometimes it was the transportation links like the railroads that caused the towns to be built along them, especially at the intersections of the railroads, and where we had the intersections of the rivers, which were the flow of commerce back in the day. All of this was surrounded and came together because somebody went out there and established a business because there was an opportunity to make some profit. The residences were built around the businesses.

And so we have our priorities in a condition where they need to be rearranged. Our priorities, I believe, should be this. Recognize that the source of the taxes are the businesses that earn the wealth and pay the taxes and hire the workers to pay the wages so that people can afford to live in the houses that they live in.

So we here in our government response to disasters of, let me say, epic proportions, help out the residences and the railroad and the political subdivisions but not the businesses.

I have legislation I have introduced in the Congress this week, Madam Speaker, and the number of the legislation escapes my memory for the moment, but what it does, it goes in and amends the Stafford Act. The Stafford Act is the language that allows FEMA to provide grants to residences and this allows businesses with 25 or fewer employees to qualify for disaster relief grants in the same fashion, on up to the $28,800 limit that is there today in statute for residences.

This, I think, is a change that is a long time coming. It's been endorsed by all of the Iowa House delegation. We are asking to go out then to the Representatives from the other States that are affected by this flood, asking them

to sign on as well. The idea being this: Small businesses can perhaps be put back on their feet very quickly if their damage is such that a limited grant, and I know for some of these businesses, it won't amount to a lot, and some will turn up their nose and say, You're not really helping me enough. But it's something and it's what we can do. It may in fact be all we can do. I don't think that it's more than we can do. But, for me, if we are going to justify grants to residences and grants to railroads and municipalities, then I don't know how we say no to the businesses that are funding it all and the reason for it all in the first place.

So what is the point in fixing up homes and providing residences for people that won't have jobs in the businesses that are closed? Why is Cedar Rapids dark? Why is there not a plan, a plan that they can at least count on, and if the answer is no, then it's no, and they can make their plans accordingly.

But right now, under the current statute that we have, the answer is, well, maybe. And there will be some decisions made later. The city will work in cooperation with the county, with the State, who will work in cooperation with the Federal Government. I endorse all of that. The working groups that have been put together look to me like they are good people, working in a good cause, but we still don't have the definitive response.

So I am encouraging this, the adoption of the language to amend the Stafford Act so that small businesses with 25 or fewer employees qualify for grant relief in the same fashion that residences do, up to $28,800, and that can be enough to keep a business open, it can be enough to refurbish the inside of the businesses.

I walked into a number of them on Saturday. Some are under reconstruction and some are just sitting there. Some have been stripped out but they don't have a plan to put it back together. That is what we are working with, Madam Speaker.

We have got to move on this. If Speaker PELOSI is not willing to move the tax relief package that is drafted and introduced by Senator GRASSLEY and endorsed by Senator HARKIN, the package that was good enough for Katrina and Rita, it should be good enough for Iowa floods, Madam Speaker.

This $123.5 billion that flowed through to Katrina relief, we are looking right now at $2.65 billion for the Midwest flood relief, which includes a number of States, including parts Minnesota, Wisconsin, Illinois, Missouri, Arkansas. Those States come to mind right away.

We have got to move some relief, and this Congress is ready to adjourn for August, the August break, by late Thursday night or sometime on Friday. We will go home for 6 weeks and during that entire 6 weeks that this Congress doesn't at least send a signal that we are willing to step up and help the people that are in distress, then if we do not do that, we have failed them. They need a definitive response from this Congress. You have to be able to plan on something.

I believe that the people have performed well in Iowa. One of the things that they said was that they just went out and worked. They didn't ask for anything. I have talked to the FEMA people that have been around the country in these disasters for a career—and they were constantly complimentary of the way Iowans have responded to this. I hear anecdotes about Iowans that will say, Yes, I could use some relief, but don't stop and help me because my neighbor needs it worse than I do. Go help my neighbor.

It's been neighbor helping neighbor. What has been missing here is not volunteers, not good cheer, because there is a smile on their face in a lot of the cases no matter how the dire circumstances are, no matter how much adrenaline has drained off, and no matter how much they look through that tunnel looking for the light at the other end. No matter how much that is, their spirit has been strong.

But the joke came up, Well, we didn't have any protesters, we didn't have any looters, and we didn't have much media. So if we'd had protester, looters, and media, maybe we would have had some of this legislation moved by now. Maybe Speaker PELOSI would have had a little more sensitivity. But these polite and quiet people, these respectful people, these salt-of-the-earth people, as Congressman LOEBSACK referenced earlier tonight, haven't been beating the drum, they haven't been demanding relief. They have just been doing their work and pulling their end together.

□ 2300

It reminds me, Madam Speaker, of our debate on the Medicare reimbursement language that we fought through here in this Congress back in I believe it was 2003, perhaps 2004. When one calculates the relief, or the funding for Medicare patients, the per-patient funding for Iowa was last in the Nation. Medicare reimbursements, last in the Nation. Of the 50 States, Iowa ranks 50th. Before we passed that legislation, Iowa ranked 50th, and it was a long ways up to 49th. It is more than a coincidence that Louisiana ranks first. They ranked first then. We passed the reform relief, and they ranked first afterwards.

So the analysis goes this way. Back in the seventies, when Richard Nixon imposed a wage and price freeze, Iowa health care providers honored that wage and price freeze, so they didn't give increases in wages. They lost some people to other States that didn't respect that and gave wages anyway, but Iowa respected that.

There is another situation. That is Iowans don't use health care services with the frequency and regularity that they do in Louisiana, for example. So, historically, at least, Louisiana didn't honor the wage and price freeze imposed by President Nixon, and they utilized the medical services more regularly than those in Iowa.

So the formulas that were put in place that were based upon frequency of usage and cost reflected the two things: More wages were being paid in Louisiana than Iowa because they didn't freeze their wages, and they used the health care services more. Those two indicators, multiplied over the years from back in the early seventies to today, where the reimbursement rates in Louisiana were far higher, highest in the Nation, and Iowa, lowest in the Nation. We were 50th, and a long ways up to 49th. We have made some marginal improvements in that. We are still 50th, it is just not so far up to 49th.

But what happened is Iowans not using health care services is similar to Iowans not demanding services from this Federal Government. It was said by the former chairman of the Ways and Means Committee, here is how it works: Iowans will not go to the doctor or the hospital sometimes when they need to. Sometimes they will stay home and die in bed instead. So they aren't running up health care costs, because they are independent and want to be self-reliant and take care of themselves. But that former chairman of the Ways and Means Committee said, but Louisianans are a little different. They will wake up in the morning and feel good and go to the doctor and ask them why.

Well, if those two things are right, and they are just used to describe the stark differences and not meant to be a particular representation of the people in either State, because we know there are outstanding people in all States, that is the kind of people though that we have here in Iowa right now that have been underwater and seen floods of epic proportions; the kind of people that will stay home and die in bed; the kind of people that won't go to the streets and demonstrate; the kind of people that aren't criticizing the Federal, State, county or city government for not doing enough. They are not criticizing their Governor or Members of Congress or their Senators. They are not criticizing FEMA in an intense, significant way. They are saying, just give me some answers so I can plan, and I will do what I have to do. And if I have lost my entire life's work and all I have left is a chance to go on Social Security, I am going to figure out how to adjust to that. But give me some real answers.

I think this Congress needs to give some real answers, and I think we need to expand the Stafford Act to include small businesses so they qualify for grants in the same fashion that residences do. And if we can't do that, I don't know how I can justify the grants that go to the residences.

The businesses are essential in the entire economic ecosystem of the communities, because if it weren't for the businesses, the residences wouldn't be there. If it weren't for the businesses, the railroad wouldn't need to be there. If it weren't for the businesses, there won't be anything there.

Nobody is going to go out and move out in the countryside and just live there and live on the land, because, sooner or later, somebody has to start a business. They are the key, and they are the source of at least 80 percent of the new employment in America. We need to get them on their feet quickly.

One of the smart people in the meeting on Saturday is a city council member who is also a CPA who said, these businesses that have taken the flood losses have been kicked into a business startup mode. The risk of failure in a new business startup is significantly greater than it is in a business that is established. Even though these businesses were established, for the most part they have lost so much capital and they have got such a deep hole to come back out of, they are essentially startup businesses.

So they don't need to have a 30 year liability. That doesn't help their cash flow. And, by the way, these losses that they have are losses that aren't going to be funded. It isn't like a new investment that you put in when you go in and replace the floor and the furnishing and appliances and the walls and the wiring in your business, and the inventory. It isn't like you have added on to a production line and you kick up your gross receipts and help your bottom line. This is a great big hole that has to be filled in the equity that has been created often through a lifetime of work. That is what is up.

I am asking the leadership in this Congress to quickly go to work with us, and let's get the tax package passed that all of the Members of the Iowa delegation in the House and Senate support. Let's get some relief there. Let's provide some grant money for the businesses that all the members of the Iowa delegation in the House of Representatives support, the amendment of the Stafford Act. Let's send a message from this Congress that there is hope to the people that live in the city that has seen more water than ever before, a city that is indistinguishable from New Orleans at the peak of the recovery of its disaster, a city that is the second largest city in the State of Iowa, as an example, which represents the cities up and down those valleys of the Cedar, the Iowa, the Turkey River and others, and along the Mississippi River Valley.

All this needs to be done by this Congress. When one goes and looks at the example of the appropriations that have taken place to try to lift the people in Louisiana, Mississippi, Alabama, along the Gulf Coast and parts of Texas out of their Katrina and Rita disasters, we can do the same for people in the Midwest. Not just Iowa, Madam Speaker, but also across the river, up the river and down the river. We need to do the right thing.

Once we cross the line and make the commitment, we need to do a balanced commitment and help these businesses out, as well as the residences. And it needs to be a definitive response, a response that they can count on, and one that build their future on.

That is what I am asking of this Congress. That is what I am asking of our leadership. And I am asking for the cooperation across the aisle between the Democrats and the Republicans. I am going to ask my colleagues in this Congress to come down to this floor and raise this issue and join me in the next opportunity we have to do a special order together.

That, Madam Speaker, concludes this subject matter. I believe that being this close to our adjournment time, I am going to just fit in one more subject quickly for the matter of information purposes for the CONGRESSIONAL RECORD.

It is something that is continually distorted on the floor as we have these energy debates. The statement is consistently made, why would you drill in ANWR? It will take 10 years to get any oil out of ANWR. Then that moves up to 15 years, and then 20 years I heard last week; 20 years to get oil out of ANWR.

Well, we passed ANWR legislation out this House not that long ago, I am going to say not 20 years ago, but about 4 or 5 years ago. Had that made it to the President's desk, instead of having been filibustered in the Senate by the same party that opposes energy expansion in this Congress, we would have oil coming out of ANWR today.

I was signed up to go up to Alaska to open up the oil fields in the North Slope of Alaska. I was signed up to do that in 1970, and as I prepared to go up there, there was a court injunction that was filed. That court injunction in 1970 froze the development of the Alaska North Slope oil fields, and as it froze that development, there was no development that took place. It took until 1973 to open up those oil fields. I actually reported that to be 1972. I was operating from memory. It was actually 1973. I went back to get some of those records, and here is what I find.

The court injunction stopped the development of the Alaska pipelines in 1970, and it froze that development with an injunction that prohibited their development until 1973.

In 1973, the Congressman for Alaska, who is here in this Congress still, Congressman DON YOUNG, introduced legislation, because the environmentalists had successfully blocked access to a massive supply of crude oil that this country needed. Mdand this legislation was introduced and became law, and I see the date here, and I believe this is the date that it was enacted, but I am not certain, and it is November 16, 1973, when legislation was passed to open up Alaska for oil, and it reads like this. There had to be legislation that blocked all of the litigation, all the environmentalist, extremist lawsuits, and allowed for the development of the oil fields.

It says in this piece of legislation, Public Law 95–153, November 16, 1973, Section 203(a): ''The purpose of this title is to ensure that, because of the extensive governmental studies already made of this project and the national interest in early delivery of North Slope oil to domestic markets, the trans-Alaska oil pipeline be constructed promptly without further administrative or judicial delay or impediment. To accomplish this purpose, it is the intent of the Congress to exercise its constitutional powers to the fullest extent in the authorizations and directions herein made and in limiting judicial review of the actions taken pursuant thereto.''

In other words, Article III, Section 2, court stripping said you don't have any jurisdiction to hear any cases that are going to block the development of the North Slope of Alaska, the right-of-way roadway to go from Fairbanks north up to there, nor the about 850 miles of pipeline that was built from milepost zero up on the North Slope at what is known as Dead Horse access on down to Port Valdez.

Reading again from Public Law 93–153, ''The actions taken pursuant to this title which relate to the construction and completion of the pipeline system and to the applications filed in connection therewith necessary to the pipelines' operation at full capacity as described in the final environmental impact statement of the Department of Interior shall be taken without further action under the National Environmental Policy Act of 1969.''

Congress said enough with the litigation. We want the energy out of the North Slope. Environmentalists said, you will destroy the ecosystem. What happened? Article III, Section 2, stripping, said courts, you don't get to hear any more cases. This is going to go forward, because Congress says so.

This Congress can say so to open up ANWR the same way, the same ecosystem. That is right, neighbors. It takes 74 miles of pipeline to be added to connect it to the 850 miles or so of Alaska pipeline that is there.

This legislation, November 16, 1973, opened it up. We had to build the road. We had to build the pipeline. We had to drill the wells. We had to put the feeder tubes together. We had to get it to the terminal, get all of that done. And 3 years later, by our calculation, actually 35 months later, crude oil came out of the pipeline in Valdez.

Now, if that can happen back in 1973, with the technology we have today, who would believe that we can't drill ANWR, build a 74 mile pipeline and get that oil coming out of that pipeline at Port Valdez in a lot less than 10 years, and a far lot less than 20 years. I would submit it is easily less than 3 years.

This Congress has vacillated on this subject matter. We can't get a vote out

of this Speaker because they don't believe that we ought to have more energy in the marketplace. I believe we should. I believe that it is the law of supply and demand.

We need more energy into the marketplace of all kinds. We need to drill ANWR; we need to drill the Outer Continental Shelf; we need to drill the nonnational park public lands; we need to open up the natural gas, the vast supplies we have, about 420 trillion cubic feet on the Outer Continental Shelf; we need clean burning coal, and lots of it; and we need to take the oil out of the coal shale in the heart of the west, in the Rockies.

We need more nuclear, and this Congress blocked access to another location for uranium, the last place that I know we can go to. We need to expand our nuclear. And, yes, we need wind and we need solar and geothermal. Those are the only three sources that were not met with vigorous opposition. But those three sources altogether, wind, solar and geothermal, only comprise 0.74 of 1 percent of the overall energy consumption in the United States. My friends on this side of the aisle, that really don't have a plan except to shut down access to energy, would want to take those three little pieces and expand them into 100 percent of the new energy supply for the United States and then say, well, we want to be energy independent.

Now, how are you going to do that? It is not possible to do so, unless we expand and grow the size of the energy pie, produce more of every kind of energy that we use, in an environmentally safe fashion, add another piece to the pie called energy conservation, and take that 72 percent of the energy that we are consuming, 72 percent of the energy we are consuming is the energy that we are producing, we need to expand the 72 percent to 100 percent to be energy independent.

We can do it. We must believe. We must do it in all ways, and we need to act now before it is too late and our wealth is transferred overseas to the Middle East, to people that don't like us all that much.

Madam Speaker, I thank you for your indulgence and the privilege, and I yield back the balance of my time.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MATHESON) to revise and extend their remarks and include extraneous material:)

Mr. SKELTON, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Mr. DAVIS of Illinois, for 5 minutes, today.

Mr. MCDERMOTT, for 5 minutes, today.

Mr. LOEBSACK, for 5 minutes, today.

Mr. ALLEN, for 5 minutes, today.

SENATE ENROLLED BILL SIGNED

The Speaker announced her signature to an enrolled bill of the Senate of the following title:

S. 3352. An act to temporarily extend the programs under the Higher Education Act of 1965.

ADJOURNMENT

Mr. KING of Iowa. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 15 minutes p.m.), the House adjourned until tomorrow, Thursday, July 31, 2008, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

7850. A letter from the Administrator, Risk Management Agency, Department of Agriculture, transmitting the Department's final rule — Catastrophic Risk Protection Endorsement and the Group Risk Plan of Insurance Regulations (RIN: 0563-AC17) received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

7851. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Fludioxonil; Pesticide Tolerance for Emergency Exemption [EPA-HQ-OPP-2008-0302; FRL-8369-5] received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

7852. A letter from the Director, Defense Procurement, Acquisition Policy, and Strategic Sourcing, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulation Supplement; Conforming Changes — Standards of Conduct and Extraordinary Contractual Actions [DFARS Case 2008-D004] (RIN: 0750-AG01) received July 28, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

7853. A letter from the Director, Defense Procurement, Acquisition Policy, and Strategic Sourcing, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulation Supplement; Small Business Program Name Change [DFARS Case 2008-D001] (RIN: 0750-AG00) received July 29, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

7854. A letter from the Director, Defense Procurement, Acquisition Policy, and Strategic Sourcing, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulation Supplement; Definition of Congressional Defense Committees [DFARS Case 2007-D026] (RIN: 0750-AF99) received July 28, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

7855. A letter from the Chief Counsel, FEMA, Department of Homeland Security, transmitting the Department's final rule — Withdrawal of Final Flood Elevation Determination for the District of Columbia, Washington, DC [Docket No. FEMA-B-7791] received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

7856. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Virginia: Final Authorization of State Hazardous Waste Management Program Revision; Withdrawal of Immediate Final Rule [EPA-R03-RCRA-2008-0256; FRL-8574-7] received June 3, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7857. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Delaware; Reasonably Available Control Technology Under the 8-Hour Ozone National Ambient Air Quality Standard [EPA-R03-OAR-2007-0449; FRL-8696-6] received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7858. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of State Implementation Plans: Idaho [EPA-R10-OAR-2008-0336; FRL-8697-1] received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7859. A letter from the Director, Regulatory Management Division, Environmental Protection Agency, transmitting the Agency's final rule — National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing [EPA-HQ-OAR-2002-0086, FRL-8695-9] (RIN: 2060-AN80) received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7860. A letter from the Deputy Bureau Chief, Wireline Comp. Bur., Federal Communications Commission, transmitting the Commission's final rule — In the Matter of Development of Nationwide Broadband Data to Evaluate Reasonable and Timely Deployment of Advanced Services to All Americans, Improvement of Wireless Broadband Subscribership Data, and Development of Data on Interconnected Voice over Internet Protocol (VoIP) Subscribership [WC Docket No. 07-38] received July 28, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7861. A letter from the Deputy Division Chief, Federal Communications Commission, transmitting the Commission's final rule — In the Matter of The Commercial Mobile Alert System [PS Docket No. 07-287] received July 28, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7862. A letter from the Deputy Bureau Chief, Wireline Comp. Bur., Federal Communications Commission, transmitting the Commission's final rule — In the Matter of Development of Nationwide Broadband Data to Evaluate Reasonable and Timely Deployment of Advanced Services to All Americans, Improvement of Wireless Broadband Subscribership Data, and Development of Data on Interconnected Voice over Internet Protocol (VoIP) Subscribership [WC Docket No. 07-38] received July 28, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

7863. A letter from the Director, Defense Security Cooperation Agency, transmitting pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, Transmittal No. 08-73 concerning the Department of the Air Force's proposed Letter(s)of Offer and Acceptance to Iraq for defense articles and services; to the Committee on Foreign Affairs.

7864. A letter from the Director, Defense Security Cooperation Agency, transmitting pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, Transmittal No. 08-86 concerning the Department of the Army's proposed Letter(s)of Offer and Acceptance to

Iraq for defense articles and services; to the Committee on Foreign Affairs.

7865. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting pursuant to Section 62(a) of the Arms Export Control Act (AECA), notification concerning the Department of the Army's proposed lease of defense articles to the Government of the Kuwait (Transmittal No. 01-08); to the Committee on Foreign Affairs.

7866. A letter from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(d) of the Arms Export Control Act, certification of a proposed manufacturing agreement for the manufacture of significant military equipment to the Government of Japan (Transmittal No. DDTC 079-08); to the Committee on Foreign Affairs.

7867. A letter from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification regarding the proposed technical assistance agreement for technical data, defense services, and defense articles to the Government of Turkey (Transmittal No. DDTC 043-08); to the Committee on Foreign Affairs.

7868. A letter from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification regarding the proposed technical assistance agreement for defense services and defense articles to the Commonwealth of Australia, the Government of Bermuda, the Government of Indonesia, the Government of the Philippines, and the Government of Singapore (TransmittalNo. DDTC 066-08); to the Committee on Foreign Affairs.

7869. A letter from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification of a proposed license for the export of defense articles and services to the Government of Russia and the Government of Kazakhstan (Transmittal No. DDTC 027-08); to the Committee on Foreign Affairs.

7870. A letter from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification of an application for a license for the export of defense articles and services to the Republic of Korea (Transmittal No. DDTC 057-08); to the Committee on Foreign Affairs.

7871. A letter from the Secretary, Department of the Treasury, transmitting as required by section 401(c) of the National Emergency Act, 50 U.S.C. 1641(c), and section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), and pursuant to Executive Order 13313 of July 31, 2003, a six-month periodic report on the national emergency with respect to terrorists who threaten to disrupt the Middle East peace process that was declared in Executive Order 12947 of January 23, 1995; to the Committee on Foreign Affairs.

7872. A communication from the President of the United States, transmitting the report entitled, ''Comprehensive Nuclear Threat Reduction and Security Plan,'' consistent with Section 699M of the Consolidated Appropriations Act of 2208, Pub. L. 110-161; to the Committee on Foreign Affairs.

7873. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-441, ''Priority Employment for Economically Disadvantaged Youth in the Youth Employment Program Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7874. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-442, ''Marriage Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7875. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-443, ''Access to Youth Employment Programs Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7876. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-445, ''Closing of a Public Alley in Square 127, S.O. 07-1209, Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7877. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-446, ''Closing of Public Alleys in Squares 564, 566, and 568, S.O. 07-122, Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7878. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-447, ''Downtown BID Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7879. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-448, ''New Convention Center Hotel Technical Amendments Temporary Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7880. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-449, ''Adams Morgan Taxicab Zone Enforcement Temporary Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7881. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-450, ''Spam Deterrence Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7882. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 17-444, ''Metropolitan Police Department Retirement Options Amendment Act of 2008,'' pursuant to D.C. Code section 1-233(c)(1); to the Committee on Oversight and Government Reform.

7883. A letter from the Acting Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Ocean Perch in the Western Regulatory Area of the Gulf of Alaska [Docket No. 071106671-8010-02] (RIN: 0648-XI90) received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7884. A letter from the Deputy Assistant Administrator for Operations, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Amendment 9 [Docket No. 071219865-8771-02] (RIN: 0648-AP60) received July 29, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7885. A letter from the Acting Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by American Fisheries Act Catcher Processors Using Trawl Gear in the Bering Sea and Aleutian Islands Management Area [Docket No. 071106673-8011-02] (RIN: 0648-XI64) received July 29, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7886. A letter from the Deputy Assistant Administrator for Operations, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Amendment 30A [Docket No. 070718369-8731-02] (RIN: 0648-AV34) received July 22, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7887. A letter from the Acting Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Expansion of Emergency Fishery Closure Due to the Presence of the Toxin that Causes Paralytic Shellfish Poisoning [Docket No 080630803-8805-01] (RIN: 0648-AW99) received July 29, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7888. A letter from the Acting Director Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Ocean Perch for Catcher Processors Participating in the Rockfish Limited Access Fishery in the Central Regulatory Area of the Gulf of Alaska [Docket No. 071106671-8010-02] (RIN: 0648-XI92) received July 29, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

7889. A letter from the Program Manager, Department of Health and Human Services, transmitting the Department's final rule — Medicare Program; Prohibition of Midyear Benefit Enhancements for Medicare Advantage Organizations [CMS-4121-F] (RIN: 0938-AO54) received July 25, 2008, pursuant to 5 U.S.C. 801(a)(1)(A); jointly to the Committees on Energy and Commerce and Ways and Means.

7890. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting pursuant to Section 634A of the Foreign Assistance Act of 1961, notification of a significant cost increase in the program, as describes in the Section 36(b)(1) AECA certification 04-05 of 7 August 2004; jointly to the Committees on Foreign Affairs and Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. GORDON: Committee on Science and Technology. H.R. 2339. A bill to encourage research, development, and demonstration of technologies to facilitate the utilization of water produced in connection with the development of domestic energy resources, and for other purposes; with an amendment (Rept. 110–801). Referred to the Committee of the Whole House on the State of the Union.

Mr. GORDON: Committee on Science and Technology. H.R. 3957. A bill to increase research, development, education, and technology transfer activities related to water

use efficiency and conservation technologies and practices at the Environmental Protection Agency; with an amendment (Rept. 110–802). Referred to the Committee of the Whole House on the State of the Union.

Mr. GEORGE MILLER of California: Committee of Conference. Conference report on H.R. 4137. A bill to amend and extend the Higher Education Act of 1965, and for other purposes (Rept. 110–803). Ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 6432. A bill to amend the Federal Food, Drug, and Cosmetic Act to revise and extend the animal drug user fee program, and for other purposes; with an amendment (Rept. 110–804). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 6433. A bill to amend the Federal Food, Drug, and Cosmetic Act to establish a program of fees relating to generic new animal drugs; with an amendment (Rept. 110–805). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2851. A bill to amend the Employee Retirement Income Security Act of 1974, the Public Health Service Act, and the Internal Revenue Code of 1986 to ensure that dependent students who take a medically necessary leave of absence do not lose health insurance coverage, and for other purposes; with an amendment (Rept. 110–806 Pt. 1). Ordered to be printed.

Ms. SLAUGHTER: Committee on Rules. House Resolution 1388. Resolution providing for consideration of the bill (H.R. 1338) to amend the Fair Labor Standards Act of 1938 to provide more effective remedies to victims of discrimination in the payment of wages on the basis of sex, and for other purposes (Rept. 110–807). Referred to the House Calendar.

Ms. MATSUI: Committee on Rules. House Resolution 1389. Resolution providing for consideration of the conference report to accompany the bill (H.R. 4137) to amend and extend the Higher Education Act of 1965, and for other purposes (Rept. 110–808). Referred to the House Calendar.

Mr. WAXMAN: Committee on Oversight and Government Reform. H.R. 6575. A bill to require the Archivist of the United States to promulgate regulations to prevent the overclassification of information, and for other purposes (Rept. 110–809). Referred to the Committee of the Whole House on the State of the Union.

Mr. WAXMAN: Committee on Oversight and Government Reform. H.R. 6576. A bill to require the Archivist of the United States to promulgate regulations regarding the use of information control designations, and for other purposes (Rept. 110–810). Referred to the Committee of the Whole House on the State of the Union.

DISCHARGE OF COMMITTEES

Pursuant to clause 2 of rule XII the Committees on Education and Labor, and Ways and Means discharged from further consideration. H.R. 2851 referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Ms. VELÁZQUEZ:

H.R. 6651. A bill to amend the Food and Nutrition Act of 2008 to decrease the period of benefit ineligibility of certain adults during their unemployment; to the Committee on Agriculture.

By Mr. LATHAM (for himself, Ms. BALDWIN, Mrs. CAPPS, Mr. MCNULTY, Ms. CORRINE BROWN of Florida, Mr. GRIJALVA, Mr. KIND, Mr. BUTTERFIELD, Mr. SMITH of New Jersey, Mr. SARBANES, Ms. BORDALLO, Mr. GUTIERREZ, and Mr. ENGLISH of Pennsylvania):

H.R. 6652. A bill to amend the Public Health Service Act to establish a graduate degree loan repayment program for nurses who become nursing school faculty members; to the Committee on Energy and Commerce.

By Ms. SCHAKOWSKY:

H.R. 6653. A bill to provide energy price relief and hold oil companies and other entities accountable for their actions with regard to high energy prices, and for other purposes; referred to the Committee on Ways and Means, and in addition to the Committees on Energy and Commerce, Agriculture, and the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. TOWNS (for himself, Ms. LINDA T. SÁNCHEZ of California, Mr. GEORGE MILLER of California, Mr. BACA, Mr. BISHOP of Georgia, Mr. BISHOP of New York, Ms. BORDALLO, Mr. BRADY of Pennsylvania, Ms. CORRINE BROWN of Florida, Ms. CLARKE, Mr. COHEN, Mr. CONYERS, Mr. COURTNEY, Mr. DAVIS of Illinois, Mr. ELLISON, Mr. ETHERIDGE, Mr. FILNER, Mr. GRIJALVA, Mr. HARE, Mr. HASTINGS of Florida, Ms. HIRONO, Mr. HOLT, Mr. HONDA, Mr. INSLEE, Ms. JACKSON-LEE of Texas, Mr. JEFFERSON, Mr. KUCINICH, Ms. LEE, Mr. LEWIS of Georgia, Ms. MCCOLLUM of Minnesota, Mr. MCDERMOTT, Mr. MCGOVERN, Mr. MCINTYRE, Mr. MEEKS of New York, Mr. MILLER of North Carolina, Mrs. NAPOLITANO, Ms. ROYBAL-ALLARD, Ms. SCHAKOWSKY, Mr. SESTAK, Mr. STARK, and Ms. SUTTON):

H.R. 6654. A bill to increase the recruitment and retention of school counselors, school social workers, and school psychologists by low-income local educational agencies; to the Committee on Education and Labor.

ADDITIONAL SPONSORS TO PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 139: Mrs. BIGGERT.
H.R. 211: Ms. WOOLSEY.
H.R. 245: Mr. ALLEN.
H.R. 423: Ms. WATERS.
H.R. 847: Mr. SALI.
H.R. 996: Mrs. TAUSCHER, Ms. BALDWIN, Mrs. MCMORRIS RODGERS, Ms. MCCOLLUM of Minnesota, Ms. GIFFORDS, Mr. MEEKS of New York, Mr. NADLER, Mr. HINCHEY, and Mr. ROTHMAN.
H.R. 1038: Mr. BISHOP of New York.
H.R. 1073: Mr. CHANDLER.
H.R. 1256: Ms. SCHAKOWSKY.
H.R. 1390: Mr. BARTON of Texas.
H.R. 1392: Mrs. BIGGERT.
H. R. 1527: Mr. SIMPSON.
H. R. 1537: Mr. LAMBORN.
H.R. 1542: Ms. WATERS and Mr. COSTELLO.
H.R. 1606: Mr. LARSEN of Washington, Ms. HIRONO, Mrs. MALONEY of New York, and Mr. WEXLER.
H.R. 1738: Mr. SCHIFF.
H.R. 1748: Mr. ALLEN and Mrs. BIGGERT.
H.R. 1783: Mrs. JONES of Ohio.
H.R. 1801: Mr. CONYERS, Mr. OBERSTAR, Mrs. TAUSCHER, Mr. BISHOP of New York, Mr. JEFFERSON, Mr. ROSS, Mr. RAHALL, Mr. BAIRD, Ms. ZOE LOFGREN of California, Mr. CUMMINGS, Mr. TIERNEY, Ms. ESHOO, Mr. ABERCROMBIE, Ms. LEE, Mr. FARR, Ms. KAPTUR, Mr. WEXLER, Ms. DEGETTE, Mr. WATT, Mr. ETHERIDGE, Mr. SCOTT of Virginia, Mr. VISCLOSKY, Ms. WATSON, Mr. MICHAUD, Mr. FOSTER, Mr. MCNERNEY, Ms. SOLIS, Ms. ROYBAL-ALLARD, Ms. SLAUGHTER, Mr. CARNAHAN, and Mr. BRADY of Pennsylvania.
H.R. 1866: Mr. MARSHALL.
H.R. 1947: Mr. MCGOVERN.
H.R. 2058: Ms. BERKLEY.
H.R. 2221: Ms. ROYBAL-ALLARD.
H.R. 2407: Mr. CAZAYOUX.
H.R. 2604: Mr. MURPHY of Connecticut.
H.R. 2677: Mr. SCHIFF.
H.R. 2726: Mr. CHANDLER.
H.R. 2842: Mr. GENE GREEN of Texas.
H.R. 2882: Mr. SHAYS and Mr. TERRY.
H.R. 2993: Mr. BRADY of Pennsylvania and Mr. DEFAZIO.
H.R. 3282: Mr. SCHIFF.
H.R. 3298: Mr. COSTELLO.
H.R. 3322: Mr. MCINTYRE.
H.R. 3359: Mr. CHABOT.
H.R. 3543: Ms. SOLIS.
H.R. 3587: Ms. NORTON.
H.R. 3622: Mr. JORDAN and Mr. NUNES.
H.R. 3654: Mr. HENSARLING, Mr. SHIMKUS, Mr. MCCAUL of Texas, Mr. PICKERING, Mr. MARCHANT, Mrs. DRAKE, Mr. JORDAN, Mr. BACHUS, Mr. BOOZMAN, Mr. HAYES, Mr. PETERSON of Pennsylvania, Mr. MCCOTTER, Mr. CALVERT, and Ms. GINNY BROWN-WAITE of Florida.
H.R. 3689: Mr. MICHAUD and Mrs. BACHMANN.
H.R. 3861: Mr. MORAN of Virginia.
H.R. 3990: Ms. HARMAN.
H.R. 4048: Ms. MATSUI.
H.R. 4100: Ms. HIRONO.
H.R. 4105: Mr. MORAN of Kansas.
H.R. 4206: Mr. BISHOP of New York, Mr. GRIJALVA, and Ms. SUTTON.
H.R. 4236: Mr. SALAZAR.
H.R. 4450: Ms. WOOLSEY.
H.R. 4544: Mr. CARNAHAN, Mr. BONNER, Mr. COSTA, Mr. BARTON of Texas, Mr. TAYLOR, Mr. FEENEY, Ms. ZOE LOFGREN of California, and Mr. MCGOVERN.
H.R. 4845: Mr. CANTOR.
H.R. 5167: Mr. ISSA.
H.R. 5513: Mr. DOOLITTLE and Mr. BISHOP of Utah.
H.R. 5534: Mr. MCGOVERN.
H.R. 5535: Mr. SNYDER, Mr. MCNULTY, Mr. GONZALEZ, Ms. JACKSON-LEE of Texas, Mrs. NAPOLITANO, Mr. SARBANES, Mr. PLATTS, Ms. WATERS, and Ms. DEGETTE.
H.R. 5546: Mr. KLEIN of Florida.
H.R. 5552: Mr. SHULER.
H.R. 5595: Mr. BISHOP of New York.
H.R. 5630: Mr. ACKERMAN.
H.R. 5635: Mr. FORTUÑO.
H.R. 5660: Mr. BLUMENAUER.
H.R. 5700: Mrs. CAPITO.
H.R. 5752: Mr. MARSHALL.
H.R. 5782: Ms. FALLIN.
H.R. 5793: Mr. MCCARTHY of California and Mr. PITTS.
H.R. 5823: Mr. BOSWELL, Ms. EDDIE BERNICE JOHNSON of Texas, Mr. ROTHMAN, Mr. WEINER, Mr. MCGOVERN, Mr. HALL of New York, Mr. GENE GREEN of Texas, Mr. HARE, Mr. TIM MURPHY of Pennsylvania, Mr. CARNEY, and Mrs. LOWEY.
H.R. 5864: Mrs. CHRISTENSEN.
H.R. 5865: Mr. MILLER of Florida, Mr. PAUL, Mr. BURTON of Indiana, and Mr. BROUN of Georgia.
H.R. 5873: Mr. AL GREEN of Texas and Ms. SOLIS.
H.R. 5901: Mr. GENE GREEN of Texas and Ms. EDDIE BERNICE JOHNSON of Texas.
H.R. 5936: Mr. KILDEE.
H.R. 5971: Mr. BROWN of South Carolina.
H.R. 6011: Mr. KLINE of Minnesota.
H.R. 6025: Mr. LATTA.
H.R. 6064: Mr. SMITH of New Jersey, Ms. FALLIN, and Mr. MARKEY.
H.R. 6066: Mr. TIERNEY.
H.R. 6108: Mr. KING of New York and Mr. HASTINGS of Washington.
H.R. 6126: Mr. SHERMAN.
H.R. 6146: Mr. FRANKS of Arizona.
H.R. 6151: Ms. LEE.
H.R. 6179: Mr. GOODLATTE.
H.R. 6185: Mr. CARNAHAN.
H.R. 6202: Mr. KUCINICH.
H.R. 6217: Mr. CARNAHAN and Mr. BLUMENAUER.
H.R. 6258: Mr. BURTON of Indiana, Mr. BUTTERFIELD, Mr. BARTLETT of Maryland, Mr. ENGLISH of Pennsylvania, and Mr. PICKERING.
H.R. 6259: Mr. GRIJALVA, and Mr. MURPHY of Connecticut.
H.R. 6260: Mr. GOODLATTE.
H.R. 6268: Mr. BISHOP of New York, Mr. GRIJALVA, and Ms. EDDIE BERNICE JOHNSON of Texas.
H.R. 6280: Ms. GINNY BROWN-WAITE of Florida.
H.R. 6282: Ms. ROS-LEHTINEN and Mr. CASTLE.
H.R. 6293: Mr. BISHOP of Georgia.
H.R. 6367: Mr. GOHMERT, Ms. FALLIN, Mrs. BACHMANN, Mr. BARTLETT of Maryland, Mr. PLATTS, Mrs. SCHMIDT, Mr. MANZULLO, Mr. BURTON of Indiana, Mr. KLINE of Minnesota, Mr. BARRETT of South Carolina, Mrs. BLACKBURN, Mr. WALBERG, Mr. LAMBORN, Mr. CANTOR, Mr. FEENEY, Mr. BROUN of Georgia, Mr. DOOLITTLE, Mr. BISHOP of Utah, and Mr. ROYCE.

SÁNCHEZ of California, Mr. LAHOOD, Mr. GOODLATTE, Mr. SKELTON, Mr. ORTIZ, Mr. PRICE of Georgia, Mr. BOUSTANY, Mr. KIRK, Mr. DREIER, Mr. HOEKSTRA, Mr. ISSA, Mr. MORAN of Kansas, Ms. WATSON, Mr. DELAHUNT, Mr. PRICE of North Carolina, Mr. HOLT, Mr. BACHUS, Mr. COSTA, and Mr. ABERCROMBIE.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2260: Mr. BOREN.

H. Con. Res. 362: Mr. DAVIS of Illinois.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 6599

OFFERED BY: MR. BUYER

AMENDMENT NO. 28: Page 41, line 14, before the period insert ": *Provided further:* That $7,000,000 of the amount appropriated in this paragraph shall be for the installation of alternative fueling stations at 35 medical facility campuses".

H.R. 6599

OFFERED BY: MR. BUYER

AMENDMENT NO. 29: Page 41, line 14, before the period insert ": *Provided further*: That $150,000,000 of the amount appropriated in this paragraph shall be for the installation of appropriate solar electric energy roof applications".

H.R. 6599

OFFERED BY: MR. TAYLOR

AMENDMENT NO. 30: At the end of title IV of the bill, before the short title, insert the following:

SEC. 408. None of the funds made available in this Act may be used to implement section 2703 of Public Law 109–234.

H.R. 6599

OFFERED BY: MR. JEFFERSON

AMENDMENT NO. 31: At the end of title II (page 51, after line 11), insert the following:

SEC. 226. In making amounts available under "General operating expenses" and "Medical support and compliance" to carry out the guaranteed transitional housing loan program authorized by subchapter VI of chapter 20 of title 38, United States Code, priority shall be given for funding to any area in the Gulf Opportunity Zone.

H.R. 6599

OFFERED BY: MR. TERRY

AMENDMENT NO. 32: At the end of title II (page 51, after line 11), insert the following:

ESTABLISHMENT OF NATIONAL CEMETERY

SEC. 226. (a) IN GENERAL.—The Secretary of Veterans Affairs shall establish, in accordance with chapter 24 of title 38, United States Code, a national cemetery in the Sarpy County region to serve the needs of veterans and their families.

(b) CONSULTATION IN SELECTION OF SITE.—Before selecting the site for the national cemetery established under subsection (a), the Secretary shall consult with—

(1) appropriate officials of the State of Nebraska and local officials in the Sarpy County region; and

(2) appropriate officials of the United States, including the Administrator of General Services, with respect to land belonging to the United States in that area that would be suitable to establish the national cemetery under subsection (a).

(c) AUTHORITY TO ACCEPT DONATION OF PARCEL OF LAND.—

(1) IN GENERAL.—The Secretary of Veterans Affairs may accept on behalf of the United States the gift of an appropriate parcel of real property. The Secretary shall have administrative jurisdiction over such parcel of real property, and shall use such parcel to establish the national cemetery under subsection (a).

(2) INCOME TAX TREATMENT OF GIFT.—For purposes of Federal income, estate, and gift taxes, the real property accepted under paragraph (1) shall be considered as a gift to the United States.

(d) REPORT.—As soon as practicable after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the establishment of the national cemetery under subsection (a). The report shall set forth a schedule for such establishment and an estimate of the costs associated with such establishment.

(e) SARPY COUNTY REGION DEFINED.—In this section, the term "Sarpy County region" means the geographic area consisting of—

(1) the following counties in Nebraska: Knox, Antelope, Boone, Nance, Merrick, Hamilton, Clay, Nuckolls, Thayer, Fillmore, York, Polk, Platte, Madison, Pierce, Cedar, Wayne, Stanton, Colfax, Butler, Seward, Saline, Jefferson, Gage, Lancaster, Saunders, Dodge, Cuming, Thurston, Dixon, Dakota, Burt, Washington, Douglas, Sarpy, Cass, Otoe, Johnson, Nemaha, Pawnee, Richardson, and the following counties in Iowa; Lyon, Sioux, Plymouth, Woodbury, Monona, Harrison, Pottawatomie, Mills, Fremont, Osceola, Dickinson, O'Brien, Clay, Cherokee, Buena Vista, Ida, Sac, Crawford, Carroll, Shelby, Audubon, Guthrie, Cass, Adair, Montgomery, Adams, Union, Page, Taylor, and Ringgold; and

(2) the following counties in Missouri: Atchison, Holt, Buchanan, Platte, Clay, Clinton, Dekalb, Andrew, Nodaway, Worth, and Gentry.

H.R. 6599

OFFERED BY: MR. TERRY

AMENDMENT NO. 33: At the end of the bill (before the short title), insert the following:

SEC. _____. None of the funds made available in this Act may be used to carry out the construction of any new national veterans' cemetery, unless the Secretary of Veterans Affairs provides to Congress, within 180 days after the date of the enactment of this Act, a list of the six new locations for establishment of national cemeteries that includes Omaha, Nebraska, notwithstanding the current veteran population threshold for the appropriate service area standard of the Department of Veterans Affairs

H.R. 6599

OFFERED BY: MR. PATRICK J. MURPHY OF PENNSYLVANIA

AMENDMENT NO. 34: At the end of the bill (before the short title), insert the following:

SEC. ____. None of the funds made available in this Act may be expended by the Veterans Administration to prevent nonpartisan voter organizations, including veterans service organizations, from conducting voluntary and nonintrusive voter registration drives at facilities of the Department of Veterans Affairs.

H.R. 6599

OFFERED BY: MR. BURGESS

AMENDMENT NO. 35: Page 2, line 14, insert after the dollar amount "(increased by $100,000,000)".

Page 3, line 8, insert before the period the following: ''*Provided further*, That of the amount appropriated in this paragraph, $100,000,000 shall be available for the design and construction of one petroleum refinery for the Army''.

Page 3, line 16, insert after the dollar amount ''(increased by $200,000,000)''.

Page 4, line 4, insert before the period the following: ''*Provided further*, That of the amount appropriated in this paragraph, $200,000,000 shall be available for the design and construction of one petroleum refinery each for the Navy and Marine Corps''.

Page 4, line 10, insert after the dollar amount ''(increased by $100,000,000)''.

Page 5, line 7, insert before the period the following: ''*Provided further*, That of the amount appropriated in this paragraph, $100,000,000 shall be available for the design and construction of one petroleum refinery for the Air Force''.

Page 15, line 17, insert after the dollar amount ''(reduced by $400,000,000)''.

H.R. 6599

OFFERED BY: MR. WAMP

AMENDMENT NO. 36: At the end of the bill (before the short title), insert the following:

SEC. ____. None of the funds made available in this Act may be used to modify the standards applicable to the determination of the entitlement of veterans to special monthly pensions under sections 1513(a) and 1521(e) of title 38, United States Code, as in effect pursuant to the opinion of the United States Court of Appeals for Veterans Claims in the case of *Hartness v. Nicholson* (No. 04-0888, July 21, 2006).

H.R. 6599

OFFERED BY: MR. MURPHY OF CONNECTICUT

AMENDMENT NO. 37: Add at the end of the bill (before the short title) the following:

SEC. ____. None of the funds made available in this Act may be used to enforce section 3, Policy of VHA Directive 2008–25.

United States
of America

Congressional Record

PROCEEDINGS AND DEBATES OF THE *110th* CONGRESS, SECOND SESSION

Vol. 154 WASHINGTON, WEDNESDAY, JULY 30, 2008 *No. 128*

Senate

The Senate met at 10 a.m. and was called to order by the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal Father, our help and our hope, we honor Your Name. Lord, often when we need You most, we find it difficult to come to You. Sometimes we do not come because we are impressed with our own strength and don't feel any need. Sometimes our failure and sin blocks the path to You. Either way, Lord, it is pride that deprives us of Your blessings and favor. Forgive us, Lord, for finding it difficult to understand and accept the unmerited favor of Your grace.

Today, as our lawmakers reach out their hands to accept Your grace, free them to do Your will. Help them to see You are a Friend who can keep them strong and turn their sorrow into singing. Lead and guide them so that Your Name will be honored. Amen.

PLEDGE OF ALLEGIANCE

The Honorable E. BENJAMIN NELSON, led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, July 30, 2008.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. NELSON of Nebraska thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, there will be an hour for debate, with the time equally divided and controlled by the two leaders or their designees. I will control the final 10 minutes and the Republican leader will control the 10 minutes prior to my statement. Senator LEAHY will control 10 minutes of the majority time. At 11 a.m. the Senate will proceed to vote on cloture on the motion to proceed to the media shield bill, S. 2035. If cloture is not invoked, the Senate will proceed to vote on the motion to invoke cloture on the Senate tax extenders bill, S. 3335.

There are other matters we could turn to: the consumer product safety conference report, the higher education reauthorization conference report. They may be made available later in the week.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

HONORING OUR ARMED FORCES

PRIVATE FIRST CLASS TIMOTHY R. VIMOTO

Mr. MCCONNELL. Mr. President, I rise because a soldier from my home State of Kentucky has fallen. On June 5, 2007, PFC Timothy R. Vimoto was tragically killed while on patrol in the Korengal Valley in Afghanistan. Private First Class Vimoto, who called the town of Fort Campbell, KY, his home, was 19 years old.

For bravery in service to his country, Private First Class Vimoto received several awards, medals, and decorations, including the Bronze Star Medal.

Private First Class Vimoto's Kentucky story may be more circuitous than most; yet I am proud to stand here and say we both hail from the Bluegrass State. Born in Hawaii, Tim's father is CSM Isaia T. Vimoto. Being from a military family, Tim followed his father to Army postings as a child.

This led Tim to Fort Campbell, KY, home to thousands of our brave soldiers and the 101st Airborne Division. Command Sergeant Major Vimoto was a senior advisor to the commander of the 101st. Tim attended Fort Campbell High School, where he made many friends and was part of the school's football team.

''Tim was known throughout the school as the kid with the biggest and best smile,'' says Shawn Berner, Tim's high school football coach. ''He was always smiling and willing to help anyone in the school. . . . He was a very caring and generous person that touched a lot of people's lives in a positive manner.''

''He's one of our babies,'' says Kesha Ladd, one of Tim's old teachers at Fort Campbell High. ''When you teach on post, it's like you help raise these children when their parents are deployed.''

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

''Tim was liked by everyone,'' Shawn Berner adds.

After graduating high school in 2006, Tim chose to follow in his father's footsteps and enlist in the Army.

He was assigned to the 2nd Battalion, 503rd Infantry Regiment, 173rd Airborne Brigade Combat Team, based in Camp Ederle, Italy. In fact, he was at the same posting as his father at that time, and as Isaia Vimoto was the brigade's most senior enlisted soldier, Tim actually fell under his command.

Fellow soldiers remembered the influence Tim's father had on him and how it shaped him into the model soldier he became.

''He saw the transformation from being a son to being a soldier,'' says SGT Andy Short. And ''no matter what Vimoto was doing, he had a smile on his face.''

''Throughout his childhood, [Tim] watched his father train, deploy, re-deploy and develop into one of the strongest leaders in the Army,'' says another fellow soldier, CPT Matthew Heimerle.

Command Sergeant Major Vimoto himself, currently stationed in Italy, says his son was ''a very talented young man with lots of potential.''

Tim's family and fellow soldiers held a memorial service for him in Italy, and hundreds of friends who wanted to say goodbye packed the chapel. We are thinking today of all those who mourn his loss.

Our thoughts are with his parents, Isaia and Misimua Vimoto; his brothers, Isaia Jr. and Nephi; his sisters, Sabrina and Ariel; and many other loved ones.

Mr. President, the Vimoto family's loss of their beloved son and brother—while serving alongside the father who raised and inspired him, no less—cannot be measured. But neither can this U.S. Senate's immense pride and reverence for his service and his sacrifice.

Our Nation honors him as a soldier and a patriot. And we thank the Vimoto family for giving their country such a hero.

Mr. President, I yield the floor.

RESERVATION OF LEADER TIME

The PRESIDING OFFICER (Mr. DURBIN). Under the previous order, the leadership time is reserved.

FREE FLOW OF INFORMATION ACT OF 2007—MOTION TO PROCEED

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of the motion to proceed to S. 2035, which the clerk will report by title.

The assistant legislative clerk read as follows:

Motion to proceed to the bill (S. 2035) to maintain the free flow of information to the public by providing conditions for the federally compelled disclosure of information by certain persons connected with the news media.

The PRESIDING OFFICER. Under the previous order, the hour prior to the cloture vote will be equally divided and controlled by the two leaders or their designees, with Senators permitted to speak for up to 10 minutes each, with the final 20 minutes under the control of the two leaders, with the majority leader controlling the final 10 minutes prior to the vote, and with 10 minutes of the majority time under the control of Senator LEAHY of Vermont.

The Senator from New York.

Mr. SCHUMER. Mr. President, I rise to speak in support of S. 2035, the Free Flow of Information Act.

This legislation is truly a product of bipartisan effort during this Congress. Senator SPECTER and I have worked closely together to craft a careful bill that protects both the freedom of the press and the safety of our citizens.

In a free and democratic country, we should be able to do both, and this bill does.

Other Senators—including Senators LUGAR, DODD, and GRAHAM—have been instrumental in moving the bill to this point, and I wanted to thank our chair, Senator LEAHY, for being not only a sponsor of the bill but somebody who helped bring it to the floor.

S. 2035—a product of lengthy compromise and negotiation—is ripe for passage. In fact, it is long overdue.

There is now overwhelming support for a Federal law that gives a qualified—I repeat, qualified—privilege to allow journalists to honor promises of confidentiality to their sources unless a judge finds that compelling disclosure better serves the public interest.

How widespread is support for this legislation?

The presumptive Democratic Presidential nominee, BARACK OBAMA, supports this bill. The presumptive Republican nominee, JOHN MCCAIN, supports this bill. Forty-two State attorneys general—both Democratic and Republican—support this bill. The Senate Judiciary Committee, as evidenced by a vote of 15 to 4, supports this bill. The House of Representatives, as evidenced by a vote of 398 to 21, supports a similar bill. And, of course, over 100 newspaper editorials support this bill.

Conservative voices, such as former Solicitor General Ted Olson and the editorial page of the Washington Times, support this bill, as well as the Washington Post. So it does have broad support.

Given some of the ill-founded handwringing by the current administration over this bill, it is worth listening to what former Justice officials such as Mr. Olson say. Here is what Ted Olson recently wrote:

A free society depends on access to information and on a free and robust press willing to dig out the truth. This requires some ability to deal from time to time with sources who require the capacity to speak freely but anonymously. . . . [The Free Flow of Information Act] is well balanced and long overdue, and it should be enacted.

That is Ted Olson, so it is surprising the administration is opposed to the bill. There is similar support from both liberal and conservative sides.

Here is how the conservative Washington Times put it:

A sound shield law guards not ''the media'' but something much more vital—the public's right to know . . . A measured law would not shield sources who perpetrate demonstrable and articulable harm to the country's national security interests. But it would rightly shield most others. Such a bill awaits Senate action now. It should be passed.

That is from an editorial of July 25, 2008.

Unfortunately, given the broad and bipartisan support of this legislation, a minority of critics have taken to attacks that are overwrought and overstated.

Every criticism is either wrong or is effectively addressed in the substitute bill, which I spoke about last night on the floor and is in the RECORD as of last night, so my colleagues can see it. Senator SPECTER and Senator LUGAR and I have worked to meet every one of these objections.

Fundamentally, critics have suggested the bill would represent a radical change in the law. Nothing is further from the truth. It even tracks this Justice Department's own guidelines. All we are saying is that given recent events and Government actions, a judge should be the final arbiter when it comes to subpoenas to journalists for sensitive information. It is not an absolute law. It doesn't say ''never.'' It doesn't say ''always.'' Some on the press side wanted ''always.'' Some on the administration side wanted ''never.'' It is a careful, balancing test. Moreover, a majority of Federal circuits now recognize some privileges for journalists in, of course, 49 States, plus the District of Columbia recognizes those protections.

However, because of some of the recent comments about the bill, Senator SPECTER and I have undertaken to address a series of other concerns, and should we move to proceed, the substitute measure will be on the floor. I outlined last night on the floor the changes that I think meet the concerns of the critics in two places in particular: one, making sure classified information does not get out and is protected, and, two, the definition of who is a journalist so we make sure that those who just casually criticize or whatever do not get the protection, as would professional journalists.

So the text of the substitute is here, and I hope my colleagues—I hope we will move to this. I know we have disputes on other issues, but this is the Senate working: broad, bipartisan, carefully thought out legislation that can move forward with an overwhelming vote. I hope we will move forward today.

On the other bill coming before us, the extenders bill, just one point before I yield the floor.

If you care about reducing gasoline prices, the bill on the floor today, with tax incentives for alternative energy,

will do far more than any amount of drilling to free our dependence on foreign oil and to reduce prices. I hope my colleagues will support that bill as well.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. CORNYN. Mr. President, I appreciate the comments of the Senator from New York on the so-called media shield bill. Let me address those briefly before I talk for a moment about the extenders, and then what I wish to spend most of my time on is the subject we have been talking about but, frankly, not doing enough about during the last 2 weeks; that is, bringing down the price of gasoline at the pump for the American people.

The problem that I continue to have, as the distinguished Presiding Officer knows as a member of the Judiciary Committee, we discussed in the Judiciary Committee whether it is appropriate for the Congress to designate members of the media who would be the beneficiaries of a media shield while saying that there are other people who are engaged in the free flow of public information, such as bloggers, who would not.

I remember when William Safire, the distinguished journalist, testified before the Judiciary Committee and someone asked him about bloggers. He said he considers them the new pamphleteers, modern-day pamphleteers. In other words, they could be writing things just as importantly as Thomas Payne might have written at the time of the country's founding, and yet the legislation the Senator from New York talked about would do nothing to provide them the benefits of a media shield, and there would be—in effect, Congress would be deciding who is a legitimate journalist and who is not. I, for one, am not comfortable with the Federal Government in essence licensing journalists and ignoring the new media, which is the source of a lot of information, and treating them in a discriminatory manner.

TAX EXTENDERS

With regard to the extenders package, there are many, if not most, of us here in this Senate who would love to see the extenders package, or some form of it, passed. Renewable sources of energy such as solar and wind are very important in my State. We are No. 1 in the production of wind energy in Texas. Of course, T. Boone Pickens, one of my constituents, has been up here talking rather visibly about his advocacy of generating more electricity from wind and using natural gas to power vehicles and thus reducing our dependency on imported oil from the Middle East.

However, the fact is that I believe we will probably vote against moving off of the energy issue generally because, frankly, we shouldn't be changing the subject at a time when we are very close to being able to have a vote on producing more American energy and relying less on imported energy and oil from the Middle East and abroad. Why it is that our colleagues in the majority are trying so hard—putting up cloture vote after cloture vote—to try to change the subject rather than allowing us to stay focused on and actually do something on bringing down the price of gasoline is, frankly, beyond me.

Mr. KYL. Mr. President, would my colleague from Texas be willing to answer a couple of questions I would like to pose to him?

Mr. CORNYN. I would, Mr. President.

Mr. KYL. Mr. President, the first question I have for my colleague is this: The Senator from Texas and I both serve on the Judiciary Committee, which considered this so-called media shield legislation some months back.

Does my colleague recall that when the bill was brought to the committee, it was brought with the suggestion that it was pretty perfect as written and that we shouldn't change a comma of it or we would be roundly criticized by editorial boards around the country? In point of fact, I was.

Does my colleague recall—and maybe you can refresh my recollection. My recollection is that we adopted 10 or 12 pretty serious amendments to that legislation in an effort to try to improve it and that most of the amendments that were adopted were overwhelmingly in their support. Is my recollection correct on that?

Mr. CORNYN. Mr. President, I believe the Senator from Arizona is correct. There was a lot of activity at the Judiciary Committee level to try to improve this bill on a bipartisan basis. I believe his recollection is correct.

Mr. KYL. Mr. President, the second question: When we passed that bill out of the committee, there were explicit assurances that we would continue to work on it because of the recognition that it was not, in my words, ready for prime time, but it was clearly in need of additional work. It is complicated. We would continue to work on it, A; and B, is it also correct that the Senator from Texas, as well as others, including my staff and myself, have been engaged in a lot of discussions since then, including, as the Senator from Texas noted, trying to figure out how to define who is a journalist and who would be protected?

Mr. CORNYN. Mr. President, the Senator is correct again. This has been a challenging issue because, frankly, the very nature of communications has changed dramatically. I mentioned the bloggers, which are sort of a new innovation. There is nothing in this bill that would prevent someone—let's say a jihadist or someone let's say from al-Jazeera or those who pretend to promote some of the activities that are directed against our own citizens or against our allies—from posing as a journalist and thus gaining the protection against testifying or cooperating with a grand jury that any average citizen in the country would have to do. So there remain problems we have not been able to work through.

Mr. KYL. Mr. President, if I could just pose two other quick questions.

So would my colleague from Texas agree that at such point in time as this legislation is brought to the Senate floor, we are going to need to continue to make improvements on it that will, first, necessitate debate and amendments? Also, would my colleague agree that it would be a huge mistake to try to bring this bill to the floor under a scenario in which we are pushed up against the recess, we are trying to do an energy bill, we are trying to do a tax extender bill, and that it would take far too much time in terms of amendments; that presumably, if cloture were invoked and this bill were to be brought up, the parliamentary procedure would be such that we wouldn't be able to offer any amendments, and that would be a mistake in the way this bill would be considered? Would my colleague agree with that?

Mr. CORNYN. Mr. President, I agree with the Senator from Arizona. My understanding is that because of the delays, because the majority leader has basically refused to allow us to go to the energy package we proposed which we believe will actually bring down the price of gasoline at the pump, we find ourselves up against an adjournment on Friday, which I believe the majority leader has addressed, with two very important issues we need to address: lowering gas prices at the pump and then the tax extenders bill. The tax extenders would provide tax credits and support for things such as renewable energy and the like, which I support and which I hope we will pass as well. So I don't know how we can do justice to the media shield bill and give it the kind of debate and the amendment process it deserves in this compressed timetable.

Mr. KYL. Mr. President, just one final quick question. Is my colleague from Texas also aware of an editorial in the USA Today magazine on Monday, July 28, by the DNI—the Director of National Intelligence, Mike McConnell—who joined with the Secretary of Defense, the Secretary of Energy, the Secretary of Homeland Security, the Secretary of the Treasury, and, as he put it, every senior intelligence community leader in expressing his strong belief that this bill will greatly damage our ability to protect national security information?

Mr. CORNYN. Mr. President, I did read that op-ed piece with great interest myself when it was published in USA Today, and I hope we can make that part of the RECORD following my remarks.

Mr. KYL. Mr. President, if my colleague will indulge me for another 10 seconds, I hope that on the basis of this information, our colleagues would agree that whatever the view on the energy legislation, we should not be turning to the media shield legislation,

and, in point of fact, if we are going to do something about gas prices, we need to keep our eye on that ball and get that work done before we leave here on Friday.

Mr. President, I ask unanimous consent to have the op-ed piece I referred to printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From USA Today, July 28, 2008]

BILL WRONGLY SHIELDS PRESS; THOSE WHO LEAK CLASSIFIED DATA SHOULD BE PUNISHED

(By Mike McConnell)

The Senate is considering a proposal that would bestow a ''privilege'' on reporters, shielding them from revealing confidential sources of important national security information, even when their sources have broken the law by disclosing classified information. The intelligence community recognizes the critical role that the news media plays in our democratic society. However, this bill would upset the balance established by current law, crippling the government's ability to investigate and prosecute those who harm national security.

I have joined the attorney general, the secretaries of Defense, Energy, Homeland Security and Treasury, and every senior intelligence community leader in expressing the belief, based on decades of experience, that this bill will gravely damage our ability to protect national security information. Unauthorized disclosure of classified information disrupts our efforts to track terrorists, jeopardizes the lives of intelligence and military personnel and inhibits international cooperation critical to detecting and preventing threats. Those who illegally disclose information recklessly risk our national security and breach a sacred public trust.

It is a delicate balance to protect national security information from improper disclosure, while respecting the rights of the press to publish information it deems of public interest. This legislation upsets that balance by shielding those who illegally leak national security information and increasing the likelihood of destructive revelations in the future. The bill forces the government to meet ill-defined standards that require the disclosure of additional sensitive information. It also cedes critical judgments about harm to national security from national security professionals, charged with protecting the country, to the subjective determination of individual judges.

We do not see the problem that this bill is meant to address. All evidence indicates that the free flow of information has continued unabated in the absence of a federal reporter's privilege. Indeed, prosecutions in this area are exceedingly rare, and the longstanding policy of the Department of Justice strictly limits circumstances in which prosecutors may seek information from journalists. We must retain the ability to bring to justice those who break the law and cause irreparable harm to the United States and its citizens.

Mr. CORNYN. Mr. President, may I inquire how much more time I have remaining?

The ACTING PRESIDENT pro tempore. There is 11 minutes 11 seconds remaining.

Mr. CORNYN. I thank the Chair.

Mr. BAUCUS. Mr. President, parliamentary inquiry.

The ACTING PRESIDENT pro tempore. Does the Senator yield for a parliamentary inquiry?

Mr. BAUCUS. Mr. President, parliamentary inquiry: I wish to clarify the remaining time.

The ACTING PRESIDENT pro tempore. The final 20 minutes of the debate has been reserved for the two leaders. The time preceding that, the minority now has 10 minutes 50 seconds. Of the majority time, 10 minutes is reserved for the Senator from Vermont. The remaining 4 minutes 44 seconds is available.

Mr. BAUCUS. I ask unanimous consent that during the remaining time, the Senator from Montana be allocated the remainder of that 5 minutes on the majority side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAUCUS. I thank the Senator from Texas, and I thank the Chair.

Mr. CORNYN. Mr. President, there is a lot about the tax extenders package that I support. The State and local sales tax deduction—Texas doesn't have an income tax, thank goodness. I don't believe we ever will. We do have a sales tax, and we would hope to be treated in a nondiscriminatory way by the Federal Government in providing a deduction for sales tax. We have had the ability to do that, which has expired, but it saves over $1 billion for Texans in tax relief each year. Of course, I support the research and development tax incentives, the temporary AMT, or alternative minimum tax, relief, as well as the other renewable energy tax incentives, including those for solar and wind.

However, I do not understand the insistence of the majority leader of filing repetitive motions to proceed to something other than an energy bill that would actually generate more American production of oil and gas here at home and cause us to rely less on imported sources. Why there is this repeated insistence time and time again with these repetitive votes to take us off of the only bill that has been offered—the only legislation that has been offered that would actually increase American energy resources and require us to rely less on imported oil is beyond me.

As I said, I support the renewable energy provisions that would continue to encourage the production of solar and wind power. I believe that conservation is a very important part of what we need to do as well.

My colleagues have seen this chart before. We have said that what we need to do is find more and use less. Yet the majority leader has consistently, so far, refused to allow us the opportunity to introduce amendments and to have debate and votes on something that would actually have an impact on the price of gasoline at the pump.

We think we need a balanced and comprehensive approach to deal with this problem. Since the majority leader became the majority leader—on January 4, 2007, the price of gas was $2.33 a gallon. It has been as high as $4.11 a gallon. Now, thank goodness, the average price is $3.93 a gallon.

The fact is, we have a supply problem and we have a demand problem. The supply problem is that for some reason, for the last 30 years or so, Congress has placed 85 percent of our domestic oil and gas reserves out of bounds. We passed annual bans in the form of a moratorium on appropriations riders that prevent the production of oil and gas that we know is there in the Outer Continental Shelf or the submerged lands along the coastlines of the United States, as well as up in Alaska where we know there are huge volumes of gas and oil. And there is a pipeline conveniently close by that could actually deliver that for use in the lower 48 States.

We know there are as much as 2 million additional barrels of oil a day out in Idaho, Wyoming, and Colorado in the form of oil shale, which now the technology exists to be able to produce that. Can you imagine how much different things would be if, instead of importing those 3 million barrels of oil a day from countries such as Saudi Arabia and organizations like OPEC, the Organization of Petroleum Exporting Countries, and people such as Hugo Chavez in Venezuela—can you imagine what it would be like if we actually produced 3 million more barrels of oil in the United States so we didn't have to import that from abroad?

I don't know anybody who has done a better job of capturing the public's imagination on that than my constituent, T. Boone Pickens. He has been an oilman all his life, but now he is perhaps the most visible and forceful advocate for wind energy and for natural gas to use to power cars. His main focus is because he wants to reduce the $700 billion of American money we send each year abroad to pay for oil and import that into this country. He has a plan that he thinks can bring that down by about 38 percent.

We all know that, at best, additional supply is a partial answer. That is why we say we need to find more and use less. Conservation is an important part of this, as are things such as biofuels. We know we have challenges dealing with corn ethanol because, frankly, using food for fuel has backfired on us somewhat, causing food prices to go up, and feed for livestock, which has caused grave hardship in my State, which is a huge cattle producer, as well as a poultry producer. It has caused the price of food to go up, so we need to continue to research the use of cellulosic ethanol, which doesn't compete with the food supply for our energy sources.

So far, we have been met with a brick wall from the majority leader when it comes to our attempt to try to find more American oil, as we transition to a clean energy future. What I mean by that is one where we are going to be less and less reliant on oil for our transportation needs, our aviation needs.

Let me mention a couple of examples on the horizon that are very exciting. In 2010, most of the major car manufacturers are going to be producing plug-in hybrid cars, which actually will be running on batteries. You can plug it into the wall socket at night and charge the battery, and it will go 40 or more miles a day before plugging it back in at night. Obviously, that will displace the internal combustion engine and avoid the need to provide oil and gasoline for transportation needs. It is going to take some time to transition as we research things such as hydrogen fuel cells and other alternatives for our basic transportation needs.

I think that holds great promise in the future, as does additional research in things such as coal-to-liquids technology. We have in this country about a 300-year supply of coal. We know that coal has a problem because of pollution. But we have the ingenuity and expertise to be able to use coal—to find a way to use it in a way that will not only provide things such as aviation fuel and transportation fuel, but I believe we can come up with a way to sequester the carbon dioxide byproduct of coal-to-liquids technology in a way that will allow us to displace oil, gas, diesel, and regular aviation fuel from our demand side.

As a matter of fact, the coal-to-liquids technology has existed a long time. Adolf Hitler, back in World War II, when he was worried about getting cut off his supply of oil and gas that was necessary to fuel the Third Reich, developed a coal-to-liquids technology. Today, the Air Force is using coal to liquids to power B–1 bombers and B–52 bombers for aviation fuel. So we know we can rely on good, old-fashioned American research and technology and ingenuity to come up with a way to deal with this problem.

We are not going to get it done until the majority leader allows us the opportunity to debate and vote on this important imperative to develop more American energy here at home. It is not enough to rely on solar and wind. Those are important, but it is not a complete answer. We need—I believe we should insist, and we are—a right to vote on some production in the Outer Continental Shelf, in the oil shale out West, and up in the Arctic.

Frankly, I don't understand the reluctance on the part of the majority leader to allow that vote to go forward. I am encouraged by some indications that there are some negotiations. I hope they are successful. I don't think we should leave here this week for a month-long recess until we have dealt with the single most important problem facing the American people today and our economy, which is high gasoline and high diesel prices. We can have an immediate impact on the futures markets where those contracts for the future delivery of oil and gas are sold if we will act and say that Congress will be part of the solution and not continue to be part of the problem.

Mr. President, may I inquire how much time remains on this side?

The ACTING PRESIDENT pro tempore. There is 1 minute 15 seconds.

Mr. CORNYN. Mr. President, I thank the Chair and yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I remind my good friend from Texas that there are a lot of things he favors and I think we all favor. He mentioned plug-in hybrid automobiles and clean coal technologies, and they are in this bill. Frankly, I believe most Senators want to pass this bill. I urge Senators on both sides to vote for it. We can, frankly, pass it and send it back over to the House and be done with it. The American people want us to pass this legislation.

Mr. President, the great writer William Faulkner said of the artist:

> Only what he creates is important, since there is nothing new to be said.

Writers could say much the same about us. What is important is not what we say, but what we create. What is important here is not the speeches, but the laws that we pass.

Today, we have a chance to do something important. Today, we can choose to legislate.

We can proceed to a bill that addresses what's important. It is a bill about jobs. It is a bill about energy. It is a bill about families.

I am speaking of S. 3335, the Jobs, Energy, Families, and Disaster Relief Act of 2008—what some call the tax extenders bill. Today, we can choose to do something important. We can move to this bill.

This bill would do something to create jobs.

This bill would extend the research and development credit. This credit encourages businesses to invest in research. It helps to keep America competitive in the global economy.

America accounts for one-third of the world's spending on scientific research and development, ranking first among all countries. Relative to the size of our economy, however, America stands in sixth place.

Our R&D tax credit expired on December 31 of last year. American corporations are at a competitive disadvantage. They are unsure if they will be able to obtain the benefit of the credit this year. They need to plan for the future.

About 70 percent of R&D spending goes to salaries. That helps to create jobs. These are jobs that help America stay in the forefront of several global industries.

We can do something today to create high-paying R&D jobs, with this bill.

This bill would also create jobs in infrastructure, by repairing a shortfall in the highway trust fund. The highway trust fund relies on fuel taxes for 90 percent of its revenues. And as fuel prices have risen to record highs, Americans are driving less and buying fewer gallons of gas.

As a result, fuel tax receipts are down sharply. The Department of Transportation reported that Americans drove 9½ billion fewer miles in May than they did a year before. And OMB projects a highway trust fund deficit for 2009 of more than $3 billion.

We have a problem with highway trust fund finances. And that financing problem is a jobs problem.

Failing to fix the highway trust fund's shortfall will cause Federal transportation funding cuts of more than a third. Industry experts have calculated that funding cuts of this magnitude would result in the loss of about 380,000 jobs.

We can do something today to create well-paid infrastructure jobs, with this bill.

This bill would do something about energy.

This bill would take real action to break America's dependence on oil. Gasoline is more than $4 a gallon across the country. Americans want Congress to steer away from foreign oil. They want us to turn toward alternative and renewable energies.

This bill has the right energy incentives to help America to turn the corner. It would support renewable electricity from wind, water, biomass, and other sources. It would boost biodiesel and solar energy. It would reward energy-efficiency, and push for cleaner coal plants.

It would even provide a brand new tax credit for plug-in electric cars, so that Americans could choose vehicles that use less fossil fuel or none at all.

Mr. President, do you know what. If every time a car went up to the gas pump and filled up and the vehicle also had electric power, with a battery in the car, and it would go 50 miles on that electric power, guess what. Crude oil imports in this country would fall by 50 percent—It would be cut in half if every time a car would drive up to the pump and, when it fills up, 50 miles that that car drives is on electric energy—a battery. It would cut oil imports by 50 percent—something as simple as that.

I ask that I be notified 30 seconds before my time expires.

The ACTING PRESIDENT pro tempore. The Senator has 30 seconds remaining now.

Mr. BAUCUS. With gas at $4 a gallon, why would we wait another minute to get these energy technologies moving?

We can do something today to create alternative sources of energy, with this bill.

This bill would do something for American families.

This bill would keep the alternative minimum tax from ensnaring new taxpayers. Without this legislation, 21 million additional taxpayers would have to pay the AMT.

We can do something today to protect families from the AMT, with this bill.

This bill would help teachers who have taken it upon themselves to spend

money from their own pockets on classroom supplies. The average teacher's salary is about $38,000 a year. But in 2005 alone, 3½ million families took the teacher expense deduction.

We can do something today to help teachers' families, with this bill.

This bill would help families with tuition expenses. The average tuition and fees at a 4-year private college in New England is now more than $30,000 a year. Four and a half million families took the qualified tuition deduction in 2005. But the provision expired at the end of 2007.

We can do something today to help families paying for college, with this bill.

This bill would help families with the State and local sales tax deduction. This deduction gives a tax benefit to taxpayers who live in States without an income tax, including Florida, New Hampshire, Nevada, South Dakota, Tennessee, Texas, and Wyoming. In 2005, this deduction benefitted more than 11 million families.

This bill would expand the child tax credit. Current law bars about 6 million working families from receiving any relief under the child tax credit. Families with 10 million children receive a partial credit. With this bill, the families of nearly 3 million more children would be eligible for this tax relief.

We can do something today to help working families with kids, with this bill.

This bill would also help improve health care for countless families dealing with mental illness. It includes the mental-health-parity legislation advanced by Senators TED KENNEDY, PETE DOMENICI, and the late Paul Wellstone.

This bill would require private insurance plans that offer mental health benefits as part of their coverage to offer the same level of benefits as they offer for medical-surgical benefits.

Mental illness is a disease like any other. We should treat it that way. We can do something about it, today.

This bill would provide much-needed relief to families who have suffered from natural disasters. This bill contains a package of disaster relief provisions developed to address all Federally-declared disaster areas with immediate, reliable, and robust tax relief.

We can do something today to help families struck by disasters, with this bill.

I say to my Colleagues: If you want to do something about creating jobs before you go back home, then vote for this bill.

If you want to do something about energy before you go back home, then vote for this bill.

If you want to do something to provide tax relief for American families before you go back home, then vote for this bill.

What's important is not what we say. What is important is the laws that we pass.

Let us pass a law that creates jobs. Let us pass a law that fosters new forms of energy. Let us pass a law that helps the American family.

Today, let us do something important. Today, let us choose to legislate. And today, let us move to this bill.

Mr. President, I ask unanimous consent that a list of supporters of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

The following organizations and companies have expressed their support for passage of Baucus-authored tax extenders legislation for jobs, energy, and families.

Agilent Technologies, Inc.; Air Products and Chemicals, Inc.; Alliance for Children & Families WI; American Association of Homes & Services for the Aging DC; American Association of Museums DC; American Bible Society MO; American Farm Bureau Federation; American Foundation for the Blind NY; American Friends Service Committee PA; American Heart Association TX; American Kidney Foundation MD; Americans for the Arts DC; America's Second Harvest IL; American Trucking Associations; Appalachian College; Applied Materials, Inc.; Association for the Blind and Visually Impaired NY; and Avance, Inc TX.

BAE Systems, Inc.; BASF Corporation; Benchmark Asset Managers, LLC; Benedictine Mission House NE; Big Brothers and Big Sisters of America HI; Big Brothers and Big Sisters of America PA; Blue Summit Financial Group; Boston Common Asset Management, LLC; Boy Scouts of America VA; California Public Employees' Retirement System; California State Teachers' Retirement System; California State Controller; California State Treasurer; Camp Fire USA Wathana Council MI; Capricorn Investment Group; Caterpillar Inc; Carbon County Museum Foundation WY; Carroll College MT; Rosalynn Carter; Catholic Youth Organization MI; Cedarhurst Center CA; and Center for Effective Philanthropy MA.

Central Louisiana Community Foundation LA; Christopher Reynolds Foundation; Cisco Systems, Inc.; Cleveland Foundation OH; Colorado Nonprofit Association CO; Community Foundation of St Joseph County IN; Compass Point Nonprofit Services CA; Compton Foundation; Corning-Elmira Musical Arts, Inc NY; Council for Advancement and Support of Education DC; Cumberland Trails United Way KY; Cystic Fibrosis Foundation MD; Deere & Company; Discovery Communications, LLC; DuPont Company; Easter Seals of Arkansas AR; EMC Corporation; F&C Management Ltd.; Falk Foundation PA; Family Means MN; Family Service Inc. Foundation MT; First Baptist Church of Indiana Rocks FL; and First United Methodist Church NM.

Food Bank of Central Louisiana LA; Betty Ford; Fred Hutchinson Cancer Research Center WA; Fulbright Association DC; Generation Investment Management; Grace University NE; Green Century Funds; Habitat for Humanity International GA; Harry Singer Foundation CA; Health Focus of SW Virginia VA; Hewlett-Packard Company; Honeywell International, Inc.; Honored to Serve Inc. AR; Independent Sector DC; Information Technology Industry Council; International Business Machines Corporation; Investment Network on Climate Risk; Johnson & Johnson; KaBOOM! DC; KLD Research and Analytics Inc.; Land Trust Alliance DC; Large Public Power Council; and League of American Orchestras NY.

Mr. DURBIN. Mr. President, the Free Flow of Information Act is a bipartisan bill that goes a long way towards protecting the freedom of the press and the public's right to information without compromising national security or the work of law enforcement. It strikes the right balance between these competing priorities, and it deserves this body's support. I want to commend Senator SPECTER and Senator SCHUMER, the authors of this legislation, which I am proud to cosponsor.

During the last 30 years, many of our most important news stories were revealed to us by reporters who obtained their information from confidential sources. Often, these stories exposed government and corporate waste, fraud and abuse. Let me give you a few examples of what these confidential sources enabled journalists to report to the public: the President's warrantless surveillance program; the unsafe and deteriorating conditions at Walter Reed Army Medical Center; the treatment of Iraqi prisoners at Abu Ghraib; the Enron accounting fraud scandal; the rampant abuse of steroids in major league baseball; and the government's misleading statements to the American people about the Vietnam war, as documented in the Pentagon Papers.

These and other major stories led to important reforms in the government and in industry. If confidential sources had not trusted reporters and come forward with this information, these stories would not have come to light when they did. We are a better and stronger country because of these stories.

Unfortunately, the relationship of trust between reporters and confidential sources has come under attack since September 11.

Increasingly, Federal prosecutors, special prosecutors and civil litigants are issuing subpoenas to reporters for their confidential sources.

In the last 4 years alone, journalists have received at least 35 Federal subpoenas for confidential information. During this period, Federal courts have held 13 journalists in contempt for refusing to disclose their confidential sources.

Since 2000, four journalists—Judith Miller, Jim Taricani, Josh Wolf and Vanessa Leggett—have been imprisoned for 19 months in total for refusing to disclose their confidential sources.

Earlier this year, a Federal judge ordered a reporter to disclose a confidential source and threatened her with fines of $5,000 per day if she did not.

This has created a chilling effect on the flow of information between confidential sources and reporters.

The media shield bill would address this problem by creating a Federal qualified privilege for communications between confidential sources and reporters.

It allows the government and private litigants to compel the disclosure of confidential information only if they persuade a Federal judge that: they have exhausted the alternative sources of that information; the information is essential to their case; and nondisclosure would on balance be contrary to the public interest.

The bill makes it easier for the government to overcome the privilege in criminal cases.

It also creates sensible exceptions that ensure that this qualified privilege does not compromise national security or the work of law enforcement agencies. In particular, the privilege does not apply to: confidential information that relates to criminal conduct by a journalist; confidential information that is necessary to stop or prevent an act of terrorism, death or substantial bodily harm, a kidnapping, or an act that involves child pornography or the sexual exploitation of a child; or confidential information that would harm national security.

The qualified privilege and the exceptions for national security and law enforcement concerns reflect the serious and careful effort by Senators SPECTER and SCHUMER to take into account the perspectives of journalists on the one hand and law enforcement on the other. The product is a bill that strikes the right balance.

I am pleased that the managers' amendment includes language that I authored on who should be protected by the privilege. In the fast-changing media world, the notion of who qualifies as a journalist is evolving quickly. Journalists are no longer just the reporters who work for newspapers, magazines or television or radio stations. It is increasingly common for Internet bloggers and citizen-journalists to report breaking news stories that shape our Nation's most important debates. However, not everyone with a laptop and an internet connection should be protected by the important privilege created by this bill.

The privilege will now apply to reporters who are regularly engaged in investigative journalism. It will protect reporters who are in a position to develop and rely on confidential sources for their stories, whether they report in the television, radio, print or online world.

Specifically, it will cover journalists who regularly: report on local, national or international events of public importance; do the things that constitute good investigative journalism, meaning conducting interviews, collecting information and making observations on the scene of an event, or collecting original documents and statements; and collect this information for the purpose of bringing it to the public's attention.

This definition, like the rest of the bill, protects the relationship between reporters and confidential sources, but ensures that Federal agencies are able to get the information they need to prevent harm to national security and advance urgent law enforcement investigations. In short, it strikes the right balance between journalistic integrity and the public's right to seek justice.

Forty-nine States and the District of Columbia give journalists at least a partial shield against compulsory disclosures. This bill fills the gap at the federal level and gives investigative journalists a qualified shield in federal court. I am proud to be a cosponsor of this legislation and urge my colleagues to support it.

Mr. DODD. Mr. President, I rise in support of the Free Flow of Information Act. This bill would protect journalists from being forced to reveal their confidential sources not as an end in itself but as a means to a well-informed public.

I applaud the tireless efforts of those who have made this possible, including our colleagues in the other body who have shown their strong commitment to this issue. As far back as 2004, I introduced similar legislation which was called the Free Speech Protection Act. Since that time, I have worked closely with the senior Senator from Indiana, Mr. LUGAR, and earlier this Congress we introduced legislation that would have provided more protection to journalists. Companion legislation passed the House 398 to 21.

I was also pleased to cosponsor Senators SPECTER and SCHUMER's legislation, which passed the Judiciary Committee earlier this Congress. Over the last several months, we have worked to

bring this important issue to the attention of Congress and the Nation.

And while this bill does not include everything I had hoped for, I recognize that in this body, we do not get to write or pass these bills by ourselves. We have to reach out and work together that is how we advance or in this case protect our more cherished principles. I thank both of my colleagues for their diligence and commitment to the first amendment.

Indeed, though I recognize this fight will not likely be over today, in the 4 years we have been working together on this legislation, we are closer than ever to acting on this bill.

I hardly have to recite the litany of abuses that have been exposed because journalists called the powerful to account nor must I remind my colleagues how many of those exposures relied on confidential sources.

Without confidential sources, would we still know about the abuse of power in the Watergate era?

Without confidential sources, would Enron still be profiting from defrauding its investors?

How long would torture at Abu Ghraib have persisted, if proof of these abhorrent crimes had not been provided to the press?

The most meaningful check on abuses such as these is the free flow of information. Thomas Jefferson said it best: If I had to make a choice, to choose the government without the press or to have the press but without the government, I will select the latter without hesitation. Jefferson clearly understood that a free government cannot possibly last in the absence of a free press.

But today, we find this cornerstone of self-governance facing a new threat—one that comes not from the dictates of a dangerous government, but for the best of intentions.

As we have heard time and again in recent years, in a spate of cases, prosecutors have used subpoenas, fines, and jail time to compel journalists to reveal their anonymous sources.

Judith Miller of the New York Times was famously jailed for 85 days for refusing to reveal a source.

Two San Francisco Chronicle reporters were found in contempt of court for refusing to identify sources and hand over material related to the BALCO steroids investigation.

A Rhode Island journalist was sentenced to home arrest on similar charges.

In 2005, some two dozen reporters were subpoenaed or questioned about confidential sources.

Their offense, Mr. President? Journalism.

As one prominent magazine editor told Congress because of what has happened: ''Valuable sources have insisted that they no longer trusted the magazine and that they would no longer cooperate on stories. The chilling effect is obvious.''

Experience has shown us that the most effective constraint on free speech need not be blatant censorship. It only takes a few cases like Ms. Miller's and the San Francisco Chronicle's before the news begins censoring itself. We can only speculate as to how many editors and publishers put the brakes on a story out of fear that one of their reporters could be caught in a spider web of subpoenas, charges of contempt, and prison.

When we minimize the impact of confidential sources, serious journalism is crippled. We will find our papers full of stories more and more palatable to the powerful and secretive. No one argues that that is the intention of those prosecuting these cases I think prosecutors simply want to do their jobs. But few deny that it could, in time, be the effect.

When journalists are hauled into court and threatened with imprisonment if they don't divulge their sources, we enter dangerous territory for a democracy. The information we need to remain sovereign will be tarnished and the public's right to know will be threatened. And I would submit to you that the liberties we hold dear will be threatened as well.

That is exactly why we need a Federal reporter shield. Forty-nine States as well as the District of Columbia have already adopted shield laws or other legal protections for reporters trying to safeguard their sources. The Free Flow of Information Act simply extends that widely recognized protection to the federal courts.

This bill will allow journalists the opportunity to argue before a court that they should not have to reveal sources and this can include bloggers. This is an important step the Federal Government can take to ensure that the free flow of information is protected.

That is why I have such a difficult time understanding our Director of National Intelligence's recent comments regarding this bill. In an opinion piece in USA Today earlier this week, Admiral McConnell writes:

> The intelligence community recognizes the critical role that the news media plays in our democratic society. However, this bill would upset the balance established by current law, crippling the government's ability to investigate and prosecute those who harm national security.

I find that very hard to believe. Every time the Congress seeks to balance the need for security with our rights as Americans, this administration says ''we can't have both—it's one or the other. You either can be safe or give up rights.''

As I have said before—it is a false choice.

And it is a mischaracterization of what this bill does. The reporter shield is not absolute—nor should it be. The public's need to know must and will be weighed against other goods, which is precisely why the bill establishes a balancing test that will weigh the Government's interest in disclosure and the public interest in gathering news and maintaining the free flow of information.

In other words, we are balancing our right to know with our need for security, whether physical or economic.

This bill makes clear that secrecy is as necessary in extreme circumstances as it is dangerous on the whole.

Ultimately, it comes down to what makes us most secure in the long run. As men and women on both sides of the aisle understand, a prosecution, whatever its individual merits, sacrifices something higher when it turns on reporters—and so those merits must be balanced against the broader harms such a prosecution can work.

If a free press inexorably creates a free government, as Jefferson suggested, then the agents of that free government—prosecutors included—owe a high debt to journalism. When prosecutors threaten journalism, they have begun to renege on that debt.

So, Mr. President, I am proud to support this valuable legislation—it is a critical first step toward rebalancing the pursuit of justice and the diffusion of truth. I thank my colleagues again for their leadership.

The ACTING PRESIDENT pro tempore. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, how much time remains on this side?

The ACTING PRESIDENT pro tempore. There is 1 minute 10 seconds.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to have 2 minutes 10 seconds.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GRASSLEY. The American people rightly wonder why these popular expiring tax relief provisions can't be passed by the Senate on their merits alone. Why can't we get there and ''get 'er done''? Part of the problem is that the committee and floor process have been disregarded by the Senate Democratic leadership. The debate and exchange of ideas, which is the essence of the Senate, has been bottled up. The Senate process is being truncated.

For the first time in this decade, since 2001, the Finance Committee members have not been allowed to exercise their right in committee markup with respect to these issues. With one exception—the 2002 stimulus bill—for the first time in this decade, Senate Members have not had the opportunity to debate and amend the extenders in a real Senate floor process. For the first time in this decade, Senators in the minority are being presented with a top-down deal, crafted in the dark corners of Democratic leaders' offices of the House and Senate.

The irony of all of this is compelling. Almost 2 years ago today, we faced an attempt to end run the natural order of the committee and floor process by the bicameral Republican leadership of the House and Senate. I referred to it at that time as a wrongheaded effort that was doomed to fail—even when it came

from my own party. It envisioned a unicameral tax writing committee that ignored the rights and privileges of Members of both parties. I used sharp words and directed them at my side's leadership in the House and Senate. I am sure some on my side thought I had gone a bit overboard in criticizing the Republican leadership at that time.

Then the Health, Education, Labor and Pensions chairman, Senator ENZI, stood with me. Some of my friends on the Democratic side spoke up about the harm the leadership was doing to the rights of the Members of the Senate.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. GRASSLEY. May I have 1 more minute?

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GRASSLEY. Ironically, today we find the Democratic leadership attempting to do much the same thing. Like the failed trifecta jam to which I referred, today's jam will not work.

It is part of a larger problem with the Senate because we are not going through the regular order at the committee and the floor level. Issues are building up, tempers are flaring, and, most importantly, nothing is getting done. The Senate is constipated. This legislative body needs a function, a laxative. Legislation needs to circulate through this body in the usual form like food through your body. We need real debate, real amendments, and we need an informal bipartisan process that leads to an agreement that can pass the House and the Senate.

I have my pencil sharpened, my notepad out. I am ready to engage in our usual bipartisan process with my Democratic friend, Chairman BAUCUS. I am hopeful that the Democratic leadership will relieve the constipation on the tax extenders legislation. The Finance Committee and the Senate need to function just like our intestinal system functions.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Republican leader.

Mr. MCCONNELL. Mr. President, voting for cloture on this bill will take us off the single most important issue in America. The American people are clamoring for legislation that will bring down the price of gas at the pump. They expect their representatives in Washington to do something about this crisis and to do something about this crisis right now.

Unfortunately, the Democratic leadership has already tried to take us off the subject, to take us away from this issue a full four times in the last 5 days. About 8 in 10 Americans disagree with them. Eight out of ten Americans disagree with the decision to try to move us off legislation dealing with the No. 1 issue in America. The American people think $4-a-gallon gasoline is a crisis that ought to be dealt with now; not in September, now. Dealing with this issue should not have to wait until even next year, as some have suggested. The high price of gas at the pump is the most important domestic issue in America. I am not even sure at this point what is in second place, but we all know what is in first place.

I will vote that we stay on the Energy bill, and we ought to stay on it until we get a solution for the American people. I urge my colleagues to vote against moving off the subject of lowering the price of gas at the pump. Let's finish the job. This is only July. We have plenty of time left this year to do other things that are confronting our country. But let's focus on the No. 1 issue confronting the American people: the price of gas at the pump. The way to do that is to stay on the subject and vote to stay on the subject, vote to avoid going to some other issue. While it may be important, it is not as important as this one.

Mr. President, I reserve the remainder of our time, and I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Vermont.

Mr. LEAHY. Parliamentary inquiry, Mr. President: How much time is reserved for the Senator from Vermont?

The ACTING PRESIDENT pro tempore. Ten minutes has been reserved.

Mr. LEAHY. I thank the distinguished Presiding Officer.

Mr. President, I said on the Senate floor yesterday that I support the Free Flow of Information Act, S. 2035. Senator SPECTER, the distinguished ranking member of the Judiciary Committee, was exactly right when he said in his remarks last night that ''this bill is long past due.'' After months and months of needless delay by the Senate minority, I hope we will finally be permitted to consider this important legislative effort this morning. This is legislation that passed overwhelmingly in the other body. If the Republicans would allow it, it would pass overwhelmingly in this body.

The Senate minority's delay tactics are nothing new. Since the beginning of this Congress, we have witnessed all manner of obstructionism by a minority of Republican Senators using filibuster after filibuster, the most ever in the history of this country for that period of time. They use these filibusters to thwart the will of the majority of the Senate to conduct the business of the American people.

Republican filibusters prevented Senate majorities from passing the climate change bill. Republicans blocked us from passing the Employee Free Choice Act. Republicans blocked the Lilly Ledbetter Fair Pay Act. Republicans blocked the DC Voting Rights Act. Republicans blocked the Renewable Fuels, Consumer Protection, and Energy Efficiency Act of 2007. Republicans blocked the Renewable Energy and Job Creation Act of 2008. Republicans blocked the Medicare Improvements for Patients and Providers Act of 2008. Republicans blocked the Consumer-First Energy Act. Most recently, Republicans blocked the Warm in Winter and Cool in Summer Act. That was designed to bring much needed relief to poor families who struggle to heat and cool their homes in times of soaring gas prices, matters that have become literally life or death for some of these people.

Republican filibusters blocked the Advancing American's Priorities Act which includes 35 stalled legislative matters including—and these were blocked by the Republicans—the Emmett Till Unsolved Civil Rights Crime Act, the Runaway and Homeless Youth Act, and Republicans blocked several bills to help law enforcement cope with mentally ill offenders and to protect our children from the scourge of drugs, child pornography, and child exploitation. Republicans blocked all those bills. It would be a lot more if we also list all those bills President Bush has vetoed since the beginning of this Congress.

Here are the measures blocked by the Republicans and the President: legislation to fund stem cell research and fight deadly and debilitating diseases. Republicans blocked to extend and expand the successful State Children's Health Insurance Program. Republicans blocked a program that would have provided health insurance to more of the millions of American children without it. They blocked setting a timetable for bringing American troops home from Iraq. They blocked an attempt to ban waterboarding and help restore America as a beacon for the rule of law.

The Free Flow of Information Act should not be added to the long list of legislative victims of Republican obstructionism. It is time for Senate Republicans to climb down from the barricades and work with us to improve the lives of the American people.

Time is running short in this Congress. It is past time to end the partisan gamesmanship and to make progress. That is what I have been trying to do throughout this Congress. I hope, after 18 months of unnecessary obstruction, all Senators are finally ready to join us in getting our work done. We have a historic window of opportunity to enact a Federal statutory shield law to protect Americans' right to know.

I thank Majority Leader REID for his willingness to bring the matter before the Senate. I worked with him to find an opportunity for Senate action since the Judiciary Committee reported this bill last October, and I appreciate his support.

Senator SPECTER and I wrote to him and the Republican leader in March urging consideration of this bipartisan measure. Before that, I had written and spoken with the majority leader about this legislation.

Our bill has 20 Senate cosponsors. The claim made yesterday by a Republican Senator that this bill is not ready for the Senate's consideration is simply unfounded. The Judiciary Committee has been working on a bipartisan basis for the past year to reach

consensus on Federal shield legislation. In addition, the Judiciary Committee held three separate hearings on this bill during the 109th Congress. I hope that the Republican cosponsors of this bill will join us in moving to the bill and that they will bring along the seven or eight Republicans needed to defeat another Republican filibuster and allow us to make progress.

A free and vibrant press is essential to a free society in our country or any country. That has been demonstrated over and over again during the past 8 years. That is why I cosponsored the Senate version of this bill and worked hard for a meaningful reporters' shield law this year. That is why I made sure that for the first time ever, for the first time in history, the Senate Judiciary Committee reported a media shield law to protect the public's right to know. I was glad to see that this bill was favorably reported by a strong bipartisan 15-to-4 vote.

I thank the leaders in the Senate who worked hard on the Federal reporters' shield law—Senators SCHUMER, SPECTER, DODD, and LUGAR as well as the dozens of media groups that support this measure.

All of us, whether Republican, Democratic, or Independent, have an interest in enacting a balanced and meaningful shield bill to ensure the free flow of information to the American people. Forty-nine States and the District of Columbia currently have codified or common law procedures to protect confidential information sources. But even with these State law protections, the press remains the first stop, rather than the stop of last resort, for our government and private litigants when it comes to seeking information.

Our time to act is now. Our opportunity to act is now. The Washington Times editorialized on July 25, ''[a] sound shield law guards not 'the media' but something much more vital—the public's right to know.''

I urge that all Senators do the right thing and end this unnecessary and counterproductive filibuster.

I ask unanimous consent to have printed in the RECORD the Washington Times editorial in support of this bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Times, July 25, 2008]

THE RIGHT TO KNOW

The great swinging pendulum of press liberty and government secrecy has lurched too far in one direction. It is time for a correction. Congress should pass and President Bush should sign a reasonable, measured shield law to push the pendulum back in the direction of the First Amendment and the legitimate powers of the Fourth Estate.

A sound shield law guards not ''the media'' but something much more vital—the public's right to know. Guarding that right often requires confidential sources deep inside government. A measured law would not shield sources who perpetrate demonstrable and articulable harm to the country's national-security interests. But it would rightly shield most others. Such a bill awaits Senate action now. It should be passed.

We endorse the Free Flow of Information Act in full knowledge of the genuine conflicts between national security and press freedoms in the toughest cases. We are also among the first to note it when media outlets abuse their privileges. We regarded the New York Times revelation of federal terrorist surveillance, for instance, as a wanton act of damage to a vital and completely legal national security program. But no realist and no proponent of limited government can watch the epidemic of American journalists subpoenaed, questioned, held in contempt or jailed—more than 40 in recent years—without wondering when the slow march of the Fourth Estate into an investigative arm of government reaches its ugly apotheosis. It is possible to have both liberty and security—indeed, that is the American way. Part of the answer lies in assuring sources who risk all to convey information vital to the public interest that the newsman who offers confidentiality will not be forced to divulge—unless a high crime with real national-security import has been committed.

The simple, constitutionalist reading of the First Amendment—''Congress shall make no law . . . abridging the freedom of speech, or of the press''—does not countenance the stripping of the core functions of the free press. It must end.

Yesterday, reporter Bill Gertz of The Washington Times appeared before a federal judge in California expecting to face questions he should not have to answer. U.S. District Judge Cormac Carney, a Bush appointee, declined to force Mr. Gertz to divulge his sources in a 2–year-old Chinese espionage story. ''Today's ruling is an important victory for our entire industry, the first in a long time to recognize a reporter's rights to keep confidential sources,'' said Executive Editor John Solomon. Press reports had indicated an intent to probe Mr. Gertz on the notoriously amorphous subject of newsworthiness. The subtext: What details of the story did Mr. Gertz consider newsworthy, and when did he consider them? On sources' identities: What promises of confidentiality did he make, and why did he make them? This would have been extremely chilling.

The truth is that not all classified information is created equally. We live in an era of gross overclassification of government data—much of which belongs rightfully to the public but is kept secret for reasons of bureaucracy, territoriality, undue risk aversion or sheer inertia. Responsible media outlets can—and do—exercise discretion. More than three-quarters of the nation's attorneys general have called for the passage of a federal shield law. Attorney General Michael Mukasey opposes it on national security grounds. Mr. Bush has previously threatened a veto. It is time to let this pendulum swing back.

Mr. LEAHY. Mr. President, we have found, especially in this administration, time and again that when crimes have been committed, when scandals have erupted, it is not because the Congress found them out, it is because the press found them out.

Abu Ghraib, one of the worst scandals in the history of this country, something that hurt us throughout the world—we didn't find out about it because questions were asked in this body or the other body; we found out because the press found it out. We found out through the press and subsequently through our own investigations the scandals of politicizing law enforcement by this administration through the prosecutors' offices.

If we do not have the ability for our press to seek out these things, then we are all hurt. Any administration, Republican or Democratic, is going to be perfectly willing to give us all the press releases in the world saying all the wonderful things they have done. What I have found—and I have been through six administrations—is that they rarely want to talk about when they make a mistake. That is what we need a free press for.

My parents had a small newspaper in Waterbury, VT. I grew up in a family who revered the first amendment, revered it for the right to know, for the public's right to know. What has set this Nation apart from virtually any other nation on Earth is that our press is free, our press is open, our press can ask questions, and our press can point out mistakes—whether it is mistakes of Members of Congress or mistakes of the administration.

We need this shield law. Let's not use any more excuses for one more filibuster. If you really believe in having the shield law, vote for it. If you are against it, vote against it. But don't hide behind some parliamentary maneuver of a filibuster.

Mr. President, I reserve the remainder of my time.

Mr. SPECTER. Mr. President, how much time remains?

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. SPECTER. How much time remains on this side of the aisle?

The ACTING PRESIDENT pro tempore. There is 7 minutes 47 seconds remaining.

Mr. SPECTER. Mr. President, I ask for 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, I am using this time even though my position differs from what I believe will be the Republican caucus position, and I have asked for only 3 minutes. I will support cloture on this issue because I am a prime sponsor of the bill. I do not like displacing the pending legislation on the oil speculators bill, but I believe if we are to move forward on that measure, we will do so in any event regardless of what happens here.

I have supported the Republican caucus position in opposing advancing legislation where we have been denied the opportunity to offer amendments, but that is not an issue on a motion to proceed.

I believe this bill is of enormous importance, and if we do not act on it now, it will not be acted on for the balance of the Congress, and who knows what will happen next year.

I spoke at length on the merits of this subject yesterday, and the essence of my position is that reporters have been intimidated—a chilling effect—by the subpoenas which have been issued. The record shows a tremendous number of subpoenas have been issued, and

there have been incarcerations of reporters. I will put in the record the details of one of those involved, Judith Miller of the New York Times, who spent 85 days in jail and whom I personally visited.

There is no doubt about the extremely high value in our society of a free press and an investigative press for the disclosure of corruption, malfeasance, and wrongdoing at all levels in public life and in private life. I think Jefferson expressed it best when he said if he had to choose between government without newspapers or newspapers without government, he would choose newspapers without government. So I believe this is a very important matter to go forward.

I didn't want to use time on Senator MCCONNELL's watch, if anybody objected to it, but there is no other Republican on the floor, and I have used only 3 minutes, leaving the remaining 4 minutes and some seconds to anybody else who chooses to speak.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Idaho.

Mr. CRAIG. Mr. President, I understand there are no further Republican speakers, so I yield back the remainder of our time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The majority leader.

Mr. REID. Mr. President, have the Republicans yielded back their time?

The ACTING PRESIDENT pro tempore. That is correct.

Mr. REID. Mr. President, not long ago I had a meeting with representatives from the San Francisco Chronicle. Among those at the meeting was a sportswriter named Lance Williams. Lance Williams covered football games and baseball games and basketball games. Some of them were high school level. He was not an investigative reporter. But one day this young reporter was contacted by a man who said: I can give you one of the biggest stories this country has seen in a long time, but you have to give me your word that you are not going to give them my name. I can give you a lot of places to go, I can even give you some grand jury testimony, but you have to protect me because I could be in danger, my physical well-being.

So Lance Williams talked to his people at the paper, his bosses, because that was his obligation, and overnight Lance Williams became an investigative reporter, not a sports reporter. In his investigation he found that these leads took him down a very disturbing road, a road that ended with evidence and a book that was published, ''The Game of Shadows,'' which exposed the rampant use of steroids in sports that we now know so much about, including such sports names as Barry Bonds.

After he released this information, he was subpoenaed by the Government to release the identity of his informant who had leaked to him a lot of things, including, as I mentioned, grand jury testimony. Well, this was an interesting day for him because Lance had never been in a predicament like this before. Again, as I said, he had covered ball games. Nothing like this before. He suddenly was faced with the knowledge that he may have to go to jail for stories he had written and information he had released. But he decided not to release the name. He thought it was the right thing to do. He had given his word. He said he would sooner go to prison than release the name of that confidential informant.

On the same day I met him, I met with his lawyer, the lawyer for the San Francisco Chronicle. The lawyer told me that although the Lance Williams controversy had been the most famous in recent cases she had dealt with, in the last 3 years that newspaper had been served with 207 subpoenas by Federal, State, and local prosecutors requiring confidential information about sources. That uncertainty—207 subpoenas to the Hearst Communications Company—puts the media in a very difficult position and places a burden on them and reduces the likelihood that whistleblowers will come forward with information.

Forty-nine States and the District of Columbia already have laws to protect the relationship between journalists and their sources, so it is long past the age when the Federal Government should follow suit.

The first amendment we have in our constitution, the right to a free press, a press able to pursue charges of wrongdoing in our government and society and basically to write whatever they want to write, is a critical pillar of our democracy. The first amendment separates us from other nations and governments. The State attorneys general of 41 States called upon Congress to pass a national media shield law, and today we have the opportunity to proceed to act in that regard by voting to proceed to the Free Flow of Information Act.

Mr. President, the National Association of Attorneys General sent a letter, which says, among other things, in the last paragraph:

By exposing confidences protected under State law to discovery in Federal courts, the lack of a corresponding Federal reporter's privilege law frustrates the purposes of the State recognized privileges and undercuts the benefit to the public that the States have sought to bestow through their shield laws. As the States' chief legal officers, attorneys general have had significant experience with the operation of these State law privileges; that experience demonstrates that recognition of such a privilege does not unduly impair the task of law enforcement or unnecessarily interfere with the truth-seeking function of the courts. The sponsors of S. 2035 have sensibly sought to strike a reasonable balance between these important interests, as the States have done, and we are confident that the legitimate concerns for national security and law enforcement can be addressed in the court procedures for evaluating a claim of privilege. We urge you to support the Flee Flow of Information Act.

Mr. President, I ask unanimous consent to have printed in the RECORD the full content of the letter from which I have just quoted.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF ATTORNEYS GENERAL,
Washington, DC, June 23, 2008.

Hon. HARRY REID,
Majority Leader, U.S. Senate,
Washington, DC.
Hon. MITCH MCCONNELL,
Minority Leader, U.S. Senate,
Washington, DC.

DEAR SENATORS REID AND MCCONNELL: We, the undersigned Attorneys General, write to express our support for the Free Flow of Information Act (S. 2035). The proposed legislation would recognize a qualified reporter's privilege, bringing federal law in line with the laws of 49 states and the District of Columbia, which already recognize such a privilege. The Senate Judiciary Committee reported S. 2035 favorably on October 4, 2007, by a vote of 15–4. The House passed a similar reporter's privilege bill, H.R. 2102, by a vote of 398–21.

Justice Brandeis famously referred to the important function the states perform in our federal system as laboratories for democracy, testing policy innovations. See *New State Ice Co.* v. *Liebmann*, 285 U.S. 262, 311 (1932) (Brandeis, J., dissenting). Reporter shield laws, which have been adopted—through either legislation or judicial decision—by every state but one, must now be viewed as a policy experiment that has been thoroughly validated through successful implementation at the state level.

The reporter's privilege that is recognized by the laws of 50 United States jurisdictions rests on a determination that an informed citizenry and the preservation of news information sources are vitally important to a free society. By affording some degree of protection against the compelled disclosure of a reporter's confidential sources, these state laws advance a public policy favoring the free flow of information to the public. An overwhelming consensus has developed among the states in support of this public policy, and United States Justice Department guidelines, on which the current legislation is largely modeled, likewise recognize the interest in protecting the news media from civil or criminal compulsory process that might impair the news gathering function. Nevertheless, the federal courts are divided on the existence and scope of a reporter's privilege, producing inconsistency and uncertainty for reporters and the confidential sources upon whom they rely.

By exposing confidences protected under state law to discovery in federal courts, the lack of a corresponding federal reporter's privilege law frustrates the purposes of the state-recognized privileges and undercuts the benefit to the public that the states have sought to bestow through their shield laws. As the states' chief legal officers, Attorneys General have had significant experience with the operation of these state-law privileges; that experience demonstrates that recognition of such a privilege does not unduly impair the task of law enforcement or unnecessarily interfere with the truth-seeking function of the courts. The sponsors of S. 2035 have sensibly sought to strike a reasonable balance between these important interests, as the states have done, and we are confident that the legitimate concerns for national security and law enforcement can be addressed in the court procedures for evaluating a claim of privilege.

We urge you to support the Free Flow of Information Act and to enact legislation

harmonizing federal law with state law on this important subject.

Thank you for your consideration of our views.

Sincerely,

Douglas Gansler, Attorney General of Maryland; Rob McKenna, Attorney General of Washington; Terry Goddard, Attorney General of Arizona; Dustin McDaniel, Attorney General of Arkansas; Edmund G. Brown Jr., Attorney General of California; John Suthers, Attorney General of Colorado; Richard Blumenthal, Attorney General of Connecticut; Joseph R. Biden III, Attorney General of Delaware; Bill McCollum, Attorney General of Florida; Thurbert E. Baker, Attorney General of Georgia.

Alicia G. Limtiaco, Attorney General of Guam; Mark J. Bennett, Attorney General of Hawaii; Lawrence Wasden, Attorney General of Idaho; Lisa Madigan, Attorney General of Illinois; Tom Miller, Attorney General of Iowa; Stephen N. Six, Attorney General of Kansas; Jack Conway, Attorney General of Kentucky; James D. ''Buddy'' Caldwell, Attorney General of Louisiana; G. Steven Rowe, Attorney General of Maine; Michael Cox, Attorney General of Michigan.

Lori Swanson, Attorney General of Minnesota; Jim Hood, Attorney General of Mississippi; Jeremiah Nixon, Attorney General of Missouri; Mike McGrath, Attorney General of Montana; Jon Bruning, Attorney General of Nebraska; Catherine Cortez Masto, Attorney General of Nevada; Kelly A. Ayotte, Attorney General of New Hampshire; Gary King, Attorney General of New Mexico; Andrew Cuomo, Attorney General of New York; Roy Cooper, Attorney General of North Carolina.

Wayne Stenehjem, Attorney General of North Dakota; Nancy Hardin Rogers, Attorney General of Ohio; W. A. Drew Edmondson, Attorney General of Oklahoma; Hardy Myers, Attorney General of Oregon; Tom Corbett, Attorney General of Pennsylvania; Henry McMaster, Attorney General of South Carolina; Lawrence E. Long, Attorney General of South Dakota; Robert E. Cooper, Jr., Attorney General of Tennessee; Mark Shurtleff, Attorney General of Utah; William H. Sorrell, Attorney General of Vermont; Darrell V. McGraw Jr., Attorney General of West Virginia.

Mr. REID. Mr. President, for all of those who are, as I am, concerned with providing law enforcement with the tools they need to keep us safe, it is important to note that this legislation strikes the appropriate balance between the public's right to know and law enforcement's need for information. It is based largely upon existing internal Department of Justice guidelines and provides for a qualified privilege for journalists who are subpoenaed to testify about their confidential sources, unless the government can show there is no reasonable alternative source of the information and the information is critical to the case.

This legislation includes exceptions for harm to national security, acts of terrorism, death, kidnapping, or other bodily harm. This is a balanced piece of legislation, and it carefully considers the needs of the media and law enforcement. It is bipartisan and provides what both sides want most of all: clear guidelines and certainty.

In doing so, it offers us the opportunity to strengthen our public safety and national security while firmly defending the right to a free and open press.

TAX EXTENDERS

Mr. President, we have heard Republicans expend a tremendous amount of words and energy talking about energy. Today, Democrats offer them yet another chance to stop the talking and actually do something to solve the problem. We have already offered Senate Republicans three opportunities to pass the so-called tax extenders. Today, they have a fourth opportunity.

This tax extender legislation provides tax incentives to private sector innovators who are discovering new ways to harness the power of the wind, the Sun, geothermal, and other sources of clean renewable energy all over America—from the State of Nebraska, the State of Nevada, and other places around the country.

I see the Senator from the State of Texas, where T. Boone Pickens is a resident. He is moving forward big time on alternative energy. But the people who are doing the big projects in Nebraska and in Nevada need tax credits. It is important. It is part of the process.

Mr. President, this is something we need to do. This tax extender legislation provides tax incentives that are so very important. If they succeed, these innovators—and with our help they will—immediately we will find the creation of hundreds of thousands of jobs—not tens of thousands but hundreds of thousands of jobs, real jobs, high-paying jobs, construction jobs. It will be good for the economy and it will be good for the environment. These are American jobs. These are jobs you can't take overseas.

Chairman BAUCUS has done a tremendous job with this legislation. If anyone in this Senate knows how to bring all sides to the table and bring common ground, MAX BAUCUS does, and this bill is no exception. Having heard Republican criticism of the previous version of the tax extender legislation, Chairman BAUCUS set out to make this bill be one that would satisfy a significant number of Senators. Not only did Chairman BAUCUS address previous Republican concerns about the tax extender package, this new legislation also does other things that are very important.

For example, there are provisions which will provide for much needed assistance not only to flood victims in the Midwest but also victims of natural disasters in Nevada, Kentucky, Georgia, Tennessee, Colorado, Mississippi, and a significant number of other States.

This bill also transfers funds to the highway trust fund, which, in street parlance, is upside down. It is out of money. There is a projected shortfall of $3 billion next year. This proposal is overwhelmingly supported on a bipartisan basis and passed the House by a vote of 387 to 37.

Also in this legislation is something that is long overdue. Paul Wellstone was a great Senator, and his No. 1 issue was mental health parity. He believed people who are sick emotionally or mentally deserve the same attention as people who are sick physically. He worked with Senators DOMENICI, KENNEDY, and others to get this passed.

Unfortunately, Paul was killed in a plane crash, but now is the time to move forward on this legislation. This simply says that mental health is considered just as serious and legitimate a medical concern as physical health, and those who suffer should receive equal access to the health care they need to get well.

We have made some compromises in the current version of the legislation that we would rather not have made, but we made them in an effort to pick up help from the other side of the aisle. We did so because we understand that compromise is essential to legislate, and we acted in good faith in responding to Republican concerns. I hope our Republican colleagues will see this—as we do—as an opportunity for a bipartisan solution to the energy crisis.

This is just one piece of the puzzle, but it is an important piece, the most important piece, and one that can make a difference in energy prices now—immediately. So we hope Republicans will decide to take yes for an answer.

Legislating requires the participation and cooperation of both sides of the aisle. We can't do this by ourselves. Surely the American people are tired of Republicans delaying and rejecting every effort Democrats make to solve our Nation's problems. We don't need every Republican to agree. Perhaps today is the day that we will get enough Republicans to reject the politics of delay and inaction and embrace the path of progress.

Mr. President, if Republicans don't vote to move forward on this legislation, we will continue to be on the motion to proceed to this legislation—the tax extenders. We are not going to be in a position to legislate anymore, it appears, on the speculation bill. That is too bad. I spoke with the president, as I have said on the Senate floor on a number of occasions, of United Airlines, and he is convinced the price of oil has gone down because we are talking about speculation.

So it appears that the Republicans have rejected our offers to do something on the tax extenders package that we have just talked about. The Republican leader said: Have Senator BAUCUS deal with Senator GRASSLEY and compromise. Well, that was a total waste of time because, again, all the Republicans want to do is not pay for anything, and we know the House will not accept that—and rightfully so. This is really unfortunate. So we are going to be on this matter to proceed to the tax extenders.

We are willing to complete the most important legislation. The Consumer Product Safety conference report has been completed. The higher education conference report has been completed. We will be happy to work with that. It should take a short period of time. We hope we would not have to have cloture on those but around here it appears, with 90 filibusters, they may even filibuster something that has overwhelming bipartisan support again.

We are also, before we leave here, going to have a vote on a motion to proceed to the Defense Authorization bill that Senators WARNER and LEVIN have worked so hard on.

If the Republicans decide they want to negotiate in good faith on this matter that is before the Senate and this does not pass, that is the extenders, Senator BAUCUS is standing by ready to do that—but it has to be in good faith. It has to be in an effort to get something accomplished, not to say we want to pay for nothing, more red ink, more red ink. We know the deficit now is approaching half a trillion dollars this year because of the programs we have seen President Bush initiate and not initiate.

We are willing to move forward on these tax extenders. We think the matter should be paid for, as does the House. We have a letter signed by 220-odd House Members saying don't bother to send anything back that is not paid for. We will not pass it.

We have tried to be as reasonable as we can be. We hope the Republicans will join with us and move forward on energy legislation, that is the tax extenders, that will actually help the country.

UNANIMOUS-CONSENT REQUEST—S. 3268

Mr. REID. Mr. President, I ask unanimous consent that S. 3268, energy speculation, not be displaced and that it remain the pending business notwithstanding the Senate adopting the motion to proceed to a calendar item.

The PRESIDING OFFICER (Mr. CASEY). Is there objection?

Mr. CORNYN. Mr. President, reserving right to object, this side of the aisle believes we need to dispose of the pending Energy bill to help bring down the price of gas at the pump first, before turning to other matters, so for that reason I object.

The PRESIDING OFFICER. Objection is heard.

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to Calendar No. 434, S. 2035, the Free Flow of Information Act.

Harry Reid, Charles E. Schumer, Debbie Stabenow, Christopher J. Dodd, Maria Cantwell, Richard Durbin, Barbara A. Mikulski, Frank R. Lautenberg, Bernard Sanders, Robert Menendez, Patty Murray, Barbara Boxer, Ron Wyden, Ken Salazar, Bill Nelson, Daniel K. Inouye, Amy Klobuchar.

The PRESIDING OFFICER. By unanimous consent the mandatory quorum call is waived.

The question is, Is it the sense of the Senate that debate on the motion to proceed to S. 2035, a bill to maintain the free flow of information to the public by providing conditions for the federally compelled disclosure of information by certain persons connected with the news media shall be brought to a close?

The yeas and nays are mandatory under the rule. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KENNEDY), the Senator from Missouri (Mrs. MCCASKILL), the Senator from Illinois (Mr. OBAMA), and the Senator from West Virginia (Mr. ROCKEFELLER) are necessarily absent.

Mr. KYL. The following Senators are necessarily absent: the Senator from Arizona (Mr. MCCAIN) and the Senator from Mississippi (Mr. WICKER).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 51, nays 43, as follows:

[Rollcall Vote No. 191 Leg.]

YEAS—51

Akaka	Durbin	Menendez
Baucus	Feingold	Mikulski
Bayh	Feinstein	Murray
Biden	Hagel	Nelson (FL)
Bingaman	Harkin	Nelson (NE)
Boxer	Inouye	Pryor
Brown	Johnson	Reed
Byrd	Kerry	Salazar
Cantwell	Klobuchar	Sanders
Cardin	Kohl	Schumer
Carper	Landrieu	Smith
Casey	Lautenberg	Specter
Clinton	Leahy	Stabenow
Collins	Levin	Tester
Conrad	Lieberman	Webb
Dodd	Lincoln	Whitehouse
Dorgan	Lugar	Wyden

NAYS—43

Alexander	Crapo	McConnell
Allard	DeMint	Murkowski
Barrasso	Dole	Reid
Bennett	Domenici	Roberts
Bond	Ensign	Sessions
Brownback	Enzi	Shelby
Bunning	Graham	Snowe
Burr	Grassley	Stevens
Chambliss	Gregg	Sununu
Coburn	Hatch	Thune
Cochran	Hutchison	Vitter
Coleman	Inhofe	Voinovich
Corker	Isakson	Warner
Cornyn	Kyl	
Craig	Martinez	

NOT VOTING—6

Kennedy	McCaskill	Rockefeller
McCain	Obama	Wicker

The PRESIDING OFFICER. On this vote the yeas are 51, the nays are 43. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

Mr. REID. Mr. President, I enter a motion to reconsider the vote by which cloture was not invoked on the media shield bill.

The PRESIDING OFFICER. The motion is entered.

Mr. REID. For the knowledge of all Members here now, we are now still on the motion to proceed to the media shield bill; the one that cloture was not invoked on. So that is what we are going to be on for the foreseeable future.

We have a couple matters that are possible that we can move forward on. That will be up to the minority as to when and where we will do that. We have the consumer product safety bill, we have also the work that has been done on the higher education bill.

I am going to file cloture before we leave on the motion to proceed to the Defense authorization bill. As I told the distinguished Republican leader today, if there is some serious negotiations on the extenders, Senator BAUCUS is ready to do this.

But as a notice to everyone, as I said in my statement before the vote, there is a new sheriff in town by the name of PELOSI. The House will not allow matters to be passed without being paid for. I agree with her. We have far too long not paid for things.

We have a situation now where we have had 8 years of buying red ink by the trainload. We have now a situation where the deficit this year will be about half a trillion dollars. The only thing we have heard, and Senator BAUCUS heard yesterday on the tax extenders, is what the Republicans want to do: We want to have some more things, but we do not want to pay for any of it.

The Speaker has sent a letter to me signed by 220 Members of the House of Representatives, saying these matters have to be paid for. What we did in this work done by Senator BAUCUS, there were matters that rightfully should not be paid for, such as disaster assistance.

As we have indicated in the past, even though the House does not like it, and we do not particularly like it, the AMT in this bill is not paid for. So other than that, things are paid for and paid for in a very responsible way.

The tax extender package includes some things that would change energy in this country as we have known it for 100 years.

It would change from a situation now where everything is done with fossil fuel to a situation that T. Boone Pickens and others envision, where we would be depending on the Sun, the wind, geothermal, biomass. This is real. There are people during the last 4 months who have been laid off, working on these alternative energy projects, renewable energy projects. There are people who could go to work tomorrow on these projects. Remember, these are all American jobs, jobs that can't be exported anyplace else.

As I said to the Republican leader today, the August schedule is in his hands. I have told those assembled here

today what we have to do. I told Senators what we have to do. I am tremendously disappointed that the tax extenders were not passed. I was just given a note by the chairman of the Environment and Public Works Committee about something that also is in this bill that would create lots of jobs, at least 150,000 high-paying jobs, and that is to replenish the money from the highway trust funds. Those moneys are not going to be there, which will cause people not only to not have jobs, but it will stop projects from going forward that are already in progress.

The schedule in August is up to the Republican leader. As I have said before on a number of occasions, we basically have finished what we have to do this work period. We have tried mightily during the last 18, 19 months to get things done. We have had to deal with about 90 filibusters. Whatever the number is, we increased it by one today. We will see what happens on the legislation dealing with higher education and see what is going to happen with the Republicans as it relates to the consumer product safety legislation. That may add two more filibusters. Of course, we have the Defense authorization bill to which we wish to proceed. We will have a vote on that on Friday. It is up to the minority to determine what we will do on that.

As I have indicated on a number of occasions, we have the conventions coming up in August, which is important to every Senator. We have other important items we have been working on that need to be done at home. We can't do them in Washington. But we await word from Republicans, if they are going to negotiate seriously on the tax extenders. Other than that, I have stated, I believe pretty clearly, where we are.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. I wish to note that the energy tax extenders would have been law as of 7 a.m. this morning if they had not been taken out of the housing bill by the Democratic majority. We should be aware of the fact that one of the reasons why this issue remains is the strategy from the majority on the housing bill.

Mr. REID. Understand, though, that is the whole problem. They don't want to pay for anything. The bill that is before the Senate is paid for. What he is talking about is the flimflam where you pass all these things and don't pay for them. That is why we have a staggering deficit that during this administration has gone up more than $3 trillion. When George Bush took office, over 10 years there was a surplus of about $10 trillion. That is long since gone. I appreciate very much the statement of my friend from Arizona, but the fact is, that is what we are talking about here. They don't want to pay for anything. The tax extenders in our package are paid for, as they should be. The American people should not be burdened and leave a legacy looking forward of their children, grandchildren, and great-grandchildren buried by Bush deficits.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. I note that 88 Senators voted in favor of that approach dealing with this subject.

Mr. REID. I appreciate the statement of my friend from Arizona. I believe in these extenders so strongly that even though I would much rather have them paid for, we all know the debt has to stop someplace. As I indicated, the House of Representatives, to their credit, will not accept these not being paid for. That is the way it should be. We should not be running up massive deficits that the Bush administration—first year, second year, third year, fourth year, fifth year, seventh year, and now in the eighth year—is willing to accept. The war in Iraq, $5,000 a second; it doesn't matter.

We are where we are, but I am very disappointed that we are where we are. As I said, my Senators are waiting to hear from the Republican leader what he wants to do the rest of this week and into the future.

JOBS, ENERGY, FAMILIES, AND DISASTER RELIEF ACT OF 2008—MOTION TO PROCEED

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, the clerk will report the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to Calendar No. 898, S. 3335, the Jobs, Energy, Families, and Disaster Relief Act of 2008.

Harry Reid, Max Baucus, Bernard Sanders, Christopher J. Dodd, Maria Cantwell, Benjamin L. Cardin, Daniel K. Inouye, Hillary Rodham Clinton, Patty Murray, Ron Wyden, Debbie Stabenow, Patrick J. Leahy, Dianne Feinstein, Richard Durbin, Robert Menendez, Sherrod Brown, Carl Levin.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on the motion to proceed to S. 3335, a bill to amend the Internal Revenue Code of 1986 to extend certain expiring provisions, and for other purposes, shall be brought to a close.

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The bill clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KENNEDY), the Senator from Missouri (Mrs. MCCASKILL), the Senator from Illinois (Mr. OBAMA), and the Senator from West Virginia (Mr. ROCKEFELLER) are necessarily absent.

Mr. KYL. The following Senators are necessarily absent: the Senator from Arizona (Mr. MCCAIN) and the Senator from Mississippi (Mr. WICKER).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 51, nays 43, as follows:

[Rollcall Vote No. 192 Leg.]

NOT VOTING—6

Kennedy	McCaskill	Rockefeller
McCain	Obama	Wicker

The PRESIDING OFFICER. On this vote, the yeas are 51, the nays are 43. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

Mr. REID. Mr. President, I enter a motion to reconsider the vote by which cloture was not invoked on the motion to proceed to the energy renewables package.

The PRESIDING OFFICER. The motion is entered.

FREE FLOW OF INFORMATION ACT OF 2007—MOTION TO PROCEED—Continued

The PRESIDING OFFICER. The assistant majority leader is recognized.

Mr. DURBIN. Mr. President, it is my understanding until 12:30 the Democrats control the time; is that correct?

The PRESIDING OFFICER. There is no agreement in order.

Mr. DURBIN. Mr. President, I ask unanimous consent that I be recognized for 5 minutes and Senator STABENOW be recognized for 20 minutes following me.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY

Mr. DURBIN. Mr. President, this vote that was cast is something America should not miss. This was about an energy program for America, and it was defeated. It was defeated because only four Republicans—maybe five—managed to cross the aisle and help us.

This is 2 days running that the Republicans—who have given us speech after speech about why we need an energy policy—have voted no. That is all they do: vote no.

What did this proposal include? It included energy tax credits desperately needed by America. This morning, Senator STABENOW gathered together Governors, leaders in business and leaders in labor and they all told us the same thing: Pass the energy tax credits, and pass it now. Jobs are at stake across America.

I had a major company in Chicago that came in—the CEO came in to see Senator REID and myself last week—facing bankruptcy because we cannot pass this bill. Why? Because the Tax Code was written year to year, creating incentives for investment in wind power. That is the power that does not pollute but creates electricity. Wind turbines all over my State and all over the country are doing the right thing for our future. They will not continue without these tax credits, and the Republicans consistently vote no. And then—hang on—after lunch they will be on the floor saying we desperately need an energy policy.

Where were they when we needed them? That was not the only thing in this bill. This bill also put $8 billion in the highway trust fund that has gone broke. Across America, we are losing jobs, at a time when we need good-paying jobs right here at home, because Republicans refuse to do this. They will not vote for it.

There was another provision or two in there equally important, but I wish to focus on those two. Let me explain to you why they would not vote for it. They would not vote for it because on the Democratic side we insisted that if you are going to have tax credits given, we pay for them so that, ultimately, it does not add to our national deficit.

This President inherited a surplus from President Clinton and has now taken the gold, the silver, and the bronze medals for the biggest deficits—top three deficits—in the history of the United States in his 8 years. We are saying this has to end. We cannot broker America's future for our children. So we want to pay for these tax credits. We do it in a way that even the business community says: That is reasonable. We can live with it. But not the Republicans. Only four or five will cross the aisle to help us.

A minute ago, I met in my office with the CEO of American Airlines, Gerard Arpey. This poor man is struggling to keep one of the major airlines in America out of bankruptcy. He is cutting back on schedule, reducing the number of employees because, unfortunately, when oil is $125, $135 a barrel, the cost of jet fuel is bankrupting his airline. He is begging me—begging me—the United States and the Congress to show some leadership.

Now, what can we do? First, we can get some Republicans to join us for this energy policy. If they want to produce more energy in America, have them vote for it, not give more speeches with their ''produce more, use less'' slogans on the floor. Produce some votes for us. A few less speeches and a few more votes and we would have an energy policy. That is the reality.

There is something that can be done immediately, though, and it is something this President can do and does not need to wait on Congress, and he ought to do it today. President Bush should announce he is going to start selling off oil from the Strategic Petroleum Reserve to bring the price of a barrel of oil down to $100 a barrel. That is our target price for America. That will turn this economy on. That will give the airlines a chance. That will put the truckers back to work. That will give the farmers a break.

The President can do it without any congressional approval. His father did it. It is not a radical idea. Seven hundred million barrels of oil—if the President released and sold 10 percent of that, saying: My goal is to get to $100 a barrel, that oil on the market would start the price coming down.

All this discussion on the Republican side and from the President about drilling—if we decided today to start drilling certain acreage, you would not see the first drop of oil for 8 to 14 years. You would have to wait 8 to 14 hours for the President's announcement about releasing oil from SPR to see an impact on the market.

It is time for Presidential leadership. The fact that the President comes out of the oil industry and the Vice President does as well, they understand it. And the oil industry has never done better.

Now it is time for the President to show leadership. He can do it. We should call on him in Congress, on a bipartisan basis: Release this oil from the SPR, bring down the price of a barrel of oil, give American families a fighting chance when they go to the gas station, and give these companies a chance to create more good-paying jobs in America. That is what is at stake.

Mrs. BOXER. Mr. President, will the Senator yield for a couple questions?

Mr. DURBIN. Mr. President, I am happy to yield.

Mrs. BOXER. First of all, Mr. President, I have known my friend from Illinois, the senior Senator from Illinois, for many years. We served in the House together. He is one of the most collegial Members of the Senate. I say to the Senator, I do not think I have ever seen you quite as upset and angry as you are.

I wish to ask my friend—because he touched on this—as to the real impact on America's families that he started to discuss. As chair of the Environment and Public Works Committee, I know, as he does, we have to fund our highway program. I know my colleague from Michigan and my colleague from Minnesota both are going to talk about the need for safe and sound infrastructure and the fact that with it comes good jobs.

But here is where we are at this point. Because of the no, no, no votes by that side—what they said no to today was making sure we can pay for the highway projects we have already authorized, we have already told the States to go ahead and start constructing.

I say to the Senator, $8 billion was in this bill that they just said no to, again—$8 billion to replenish the highway trust fund. That translates to—and hold on to your hats, folks—400,000 good-paying jobs that will be lost if we do not replenish this fund, not to mention the jobs that are already being lost because they refuse to renew these tax credits for solar, wind, and geothermal.

Mrs. BOXER. In my State, we have a horrible housing crisis. It is terrible. Construction is down. What has been keeping us afloat, I say to my colleagues, is the renewable energy industry. Four hundred solar companies have moved in. They are taking these workers. So how could we have—Mr. President, I ask unanimous consent that the Senator have 1 more minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. BOXER. So I say to my friend, this Republican Party here, they are the recession party. They stand for recession and moving into depression with their votes, does my friend not agree, with their votes today?

Mr. DURBIN. This is the second time in 24 hours we have given the Republicans a chance to show whether they are for an energy policy which will produce more clean energy and more jobs for America, and four of them came forward to support us—only four. There are 49 of those Senators, and 4 voted with us.

Mrs. BOXER. And the trust fund.

Mr. DURBIN. And the trust fund, of course—a critical point—which can create 400,000 jobs across America.

Middle-income families are struggling to survive. We need more good-paying jobs right here in this country. How can they come down here and consistently vote no and say they want an energy policy?

The President should release oil from SPR this week. Our goal should be $100-a-barrel oil. The President doesn't need Congress. Let him show some leadership in this energy crisis.

Mr. President, I yield the floor to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Ms. STABENOW. Mr. President, I ask unanimous consent that the majority control the time until 12:30, the Republicans control the next 30 minutes, the majority control the next 30 minutes, and the time until 6 p.m. be controlled in 30 minute blocks in an alternating fashion.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICA'S PRIORITIES

Ms. STABENOW. Mr. President, I wish to thank my colleagues, our assistant majority leader from Illinois

and the Senator from California, for speaking today, because we are quite astounded, I have to tell my colleagues. Coming from the great State of Michigan where we care about jobs—and I know the Presiding Officer does, coming from the great State of Pennsylvania—our folks are desperate for good-paying jobs, middle-class jobs that allow them to pay that mortgage and pay those outrageous gas prices and to be able to keep their families afloat and put food on the table.

What we had happen in front of us today was an effort to once again block the future of alternative energy jobs and block today, by stopping it, an investment in the highway trust fund that would keep 400,000 jobs going in our country. That is a lot of jobs—400,000 jobs.

Now, why would they do that? When you look around, since this President and Vice President have taken office, gas prices have tripled. Oil prices are four times higher. Families and businesses are being squeezed on every side. Why can't we get action? Who benefits? I wonder who would like this picture.

Well, let's look at who would like this picture. I only pick on one company because they happen to be the ones showing the highest profits. During this time that families and truckers on the road are trying to make a living, and businesses, small and large, are trying to hold it together, during this time of crisis, $185 billion profit since our President and the Vice President—two oilmen from Texas—took office. Mr. President, $185 billion in profits. What we have here is an oil agenda. We have had an oil company agenda since they took office on every step of the way.

The bill that was turned down today—it wasn't just turned down today; it was, in fact, turned down on June 10 of this year, June 17 of this year, July 29, and today. This isn't the only time. We have gone back as far as last year, a year ago. Tax incentives in the Energy bill were blocked twice by Republican colleagues on behalf of big oil on June 21, 2007, and December 13, 2007. We can go on. February 7 of this year, Republicans blocked adding critical energy production tax incentives to the stimulus that was passed. They are willing to give everybody a little bit of a check, a little bit of a rebate check, but when we are talking about creating jobs and investing in competition with the oil companies, oh, no. Oh, no.

Who wouldn't want that competition? Let me see. Maybe these folks wouldn't want that competition. Maybe they were the ones who said: No, no, we don't want to be focusing on electric vehicles and investing in battery technology or consumer credits for new vehicles. No, no, we don't want to be investing in solar and wind and geothermal. No, no. Getting off of oil? No, no, no, no. This is the oil administration. We don't want to get off of oil; we want to embrace it. We want to continue it.

Unfortunately, that is exactly what has happened.

Record profits. The total combined net profits of the big five oil companies since our President took office are upwards of $556 billion. If I sound a little upset, I am because I have folks in my State who are just struggling to try to make it. Are they investing here at home with that $556 billion? The oil companies spent $188 billion buying back their own stock in the last 5 years. Exporting. A record 1.6 million barrels a day were exported, 33 percent higher than before.

We are in a global economy. Unfortunately, even though I think it is important to have a domestic oil supply, it is in a global economy. It is not necessarily going to stay here. The drill-only, the drill-forever crowd, that is the oil agenda. It is the oil profits agenda in a global economy.

Let me share for a moment some folks who are suffering under the oil agenda of this President and Vice President and the Republicans who have been in charge.

In South Haven, MI, a beautiful little town along Lake Michigan, this was in the paper. Early last month, Jeanne Fair, who is 62 years old, got her first hot meals delivered to her home in this little lake community in the rural southwestern part of the State. After two deliveries of meals, they stopped because the volunteers couldn't afford the gas to get her the food. ''They called and said I was outside of the delivery area,'' said Mrs. Fair, who is homebound and hasn't been able to use her left arm since a stroke in 1997.

Faced with soaring gasoline prices, agencies around the country that provide services to the elderly say they are having to cut back on programs such as Meals on Wheels, transportation assistance, and home care, especially in rural areas that depend on volunteers to provide their own gas. In a recent survey by the National Association of Area Agencies on Aging, more than half said they already cut back on programs because of gas prices. Ninety percent say they are expected to cut them back in 2009.

This is the United States of America, and we have volunteers who have to stop giving meals to people in rural Michigan so these folks can keep up this agenda here: $185 billion profit since George Bush took office. And our folks can't afford gas.

Let me share something else, a letter from a gentleman:

> As my family's only breadwinner, I drive over an hour each day to my job at LifeWays in Jackson . . . The reason I drive over an hour each way is because jobs for professionals are extremely rare in Hillsdale County where I live. Over 16 car industry-related plants have closed in Hillsdale County in the past 10 years, leaving the unemployment rate sky high and wages extremely low. The newest hit is the high prices for energy which are hurting me and my family. Not even looking at the 55-cent increase per gallon of propane we were just notified of, my commute costs me $28 a day and I drive a midsized car. I urge Congress to act immediately.

Mr. President, we had a chance to act immediately today to do something that would make a difference, a real difference, and Congress didn't do it.

I also have one other letter from a 17-year-old high school student who has a job. She says: I make $7.15 an hour and put in about 20 hours a week. My job sometimes interferes with my education because I am trying to make money that I need. My job affects school because I need to work. It makes it difficult for me. I am paid every 2 weeks and spend about $100 a week on gas to get back and forth to school and work. She says: Even during school time, I ride the bus to try to save money, but now I probably won't be riding the bus because school districts are cutting back on transportation to school. They are doing this because they don't have enough money to fill up the buses' gas tanks.

What is going on? What is going on here? We are fighting for the people of this country who expect to be able to put gas in the schoolbus, who expect to be able to have seniors get Meals on Wheels, who expect to be able to drive to work. That is what this is about. It is about time we change the agenda of this country and who decisions are being made for. The reality is—I think it is, unfortunately, way too simple, but it is true—we have had 8 years of two oilmen in the White House and it has gotten us paying $4-a-gallon gasoline, maybe a little less, maybe a little more. That is the reality. We have seen over and over not only efforts on this floor to block what we are doing but on top of that, to add insult to injury, a free ride for the oil companies.

In January of 2006, the New York Times reported that the Bush administration was allowing oil and gas companies to forgo royalty payments—forgo royalty payments—on leases in Federal waters, public waters in the Gulf of Mexico. It would cost American taxpayers more than $60 billion. Sixty billion dollars would equal 38 days of free gas for every American. How about that. So not only are they blocking us from creating alternatives, not only are they blocking us from taking taxpayer money—the same people I just read about are subsidizing the oil companies because we can't stop these subsidies going to the most profitable companies in the world—the world. We can't get that stopped when we are trying to say: Take those dollars and move them over to the future, which is alternative energy that will allow gas prices to go down, that will free us from foreign oil, get us off of a policy that depends on those around the world who aren't exactly our friends, and make us stronger in terms of national security. We can't get that done. Then, to add insult to injury, they waive oil and gas leases—$60 billion. I would love to have been able to waive some house payments. I would love to have been able to say to folks who were trying to

make it and not lose their house in foreclosure: We will give you 90 days, don't worry about it, because we care about families and we want to make sure you keep your house.

We finally have a housing bill. It is too late for many people, but we finally have one, thank goodness, that the President would sign.

Where are the priorities of this country? Who are we making decisions for? That is the question. Who are we making decisions for?

So I have extreme concern about the direction in which we are going. I have to tell my colleagues, as somebody who comes from a State where there is such a little bit of support right now, it would give us a whole lot more impact in the short run if we were to invest—and I know that. I am so grateful to our Senate leadership for supporting our efforts to retool our auto plants, to keep jobs in America for new vehicles. We are now focusing our talk so many times on this floor on what we are doing to support the advanced battery research and development so we are making those new batteries in America, not only for automobiles but for energy storage, and making sure we are the energy producers and creating the jobs of the future. A few investments we can do immediately within the next couple of years would tremendously impact us.

I know my time is up. Let me just indicate that it is time to change the agenda. The American people have had enough. This big-oil agenda which has been driving the train here on the Senate floor and which has been driving the train in the White House has to stop.

We have to take away their track and turn this thing around, so that we are focusing on what the American people want us to focus on to help them and their families in this country.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. ENZI. Mr. President, I rise today to continue the discussion we are having on our Nation's energy situation and to point out that it is a discussion, it is not action.

I point out that the other side of the aisle could be called the ''great pretenders.'' They are pretending to be interested in energy, but they are not doing anything about energy. The only thing we have been allowed to debate on this has been the bill on speculators. I have talked about speculators and the role they have and what the possibilities are for them to skew the market. It is the blame game. For every person who gains a dollar, a person loses a dollar.

Our airlines rely on the speculation, rely on those markets to hedge their prices, and we call it speculation. It has allowed them to lock in a reasonable price some of the time.

So it is the great pretender package, because it doesn't solve energy. If we don't find some ways to use less and find more, we are not going to be able to make the transition to renewable energies. We are being blocked from doing that.

What we are doing is ''gotcha'' politics. We have been doing it for several months now, and it is wrong. How can you tell when it is ''gotcha'' politics? When a bill doesn't go through the regular process, when it doesn't go to committee so that there can be extensive debate among the people who are expert in that area, so that the people in that specific committee have a chance to make amendments. That is where a lot of the legislating happens. By the time it gets to the floor, it is kind of take it or leave it—maybe a few amendments but not many are ever allowed. On this one, the most we have been allowed is four amendments, which have been written by the other side of the aisle.

That is unconscionable. It has never been done in the history of the United States. And then they demand a 60-vote margin on those. It will not happen, and neither is anything else, until we do something about energy because it is the No. 1 concern of people in America now. There is good reason for that. I know trucking firms that are going out of business. People want to take vacations, and they are either having to reduce the distance they are going or eliminate the vacation altogether. I know people who are having trouble getting to work.

We can put quick solutions, medium, and long-range solutions, in there that would resolve the energy problem for America. The world is becoming more energy oriented. The world understands energy. China understands energy. China is buying up every source of energy it can find around the world, because it grows their economy. They are using some of the worst stuff they can possibly use. That is why housing at the Olympic village isn't going to be able to used for the athletes, because they won't be able to breathe properly—even though they have bought clean Wyoming coal, and they tried to buy an oil company in the United States so they could take that oil to China. India is also competing for energy. That competition is driving up the prices.

Unless we find more and use less and transition into renewables, we are going to have a long problem in the economy of this country. As long as we keep bringing bills to the floor that have not been through committee, where people with disagreements can move off to the side and work that out and bring it in, it is not going to work. We are going to have a higher education bill this week, and that will make a difference to students throughout the United States—in high school, going to college, and those in college continuing with college. That went through the whole process. That has been through the committees in both the House and the Senate. A lot of changes were made. That has been passed in the Senate and passed in the House on the floor, and changes were made. Now it has been conferenced. Last night, it took us all of an hour and a half to work out the differences and finish the bill. That will be a privileged motion that will come here. So we will finish up a major bill in about an hour and a half because it went through the process.

You cannot take something such as energy, put out a phony bill, expect it to pass, and check off the box on energy. It is not going to work. We are not going to do that. That has never been the way we have done work in the Senate. We take a bill to committee, get it worked out, bring it to the floor, and let people make amendments. That is the way we do things here. It takes time, but it doesn't take nearly as much time as forcing all of these filibusters by putting up bills that the tree will be filled on, which means nobody can do any amendments—a take-it-or-leave-it bill.

As long as we are doing take-it-or-leave-it bills, nothing is going to happen. It makes good publicity because they will run ads in Wyoming that will say Senator ENZI voted against this and that. And you know, I think the people in Wyoming kind of have it figured out. They know we are actually trying to get something done. They know what a crisis it is on energy. We have to make a difference there.

So, remember, if a bill hasn't been to committee, it is a ''gotcha'' bill, designed by one party. Several times there have been negotiations started between the two parties, such as on the tax extenders bill. But thinking that would be a good ''gotcha'' vote, we had the package that you saw earlier that didn't make it through cloture. That could be negotiated out. That could make it through the process. It needs to make it through the process. But it is not going to make it through the process if one side says let's put this out there, and the other side will have a lot of trouble voting for this, and we can claim they don't like tax extenders. I don't think that has been the history of the country. I know it hasn't been the history of the Senate.

Energy is so important. Energy impacts every part of our lives. When gasoline and diesel fuel are more expensive, you pay more to fill up your vehicle at the pump. So do truckers who transport the items we need, such as food. In turn, you pay more at the grocery store. You pay more for gifts you buy for loved ones. The high cost of fuel makes it harder for families to fill up their gas tanks. They are canceling vacations or they are picking ones closer to home. Because they are forced to cancel vacations, main street shops are closing down because they don't have consumers to buy their products.

Low energy costs make it possible for our economy to flourish, and at a time of economic concern, we should be doing everything we can to improve

our Nation's energy situation as opposed to hindering it. The ''energy bill'' we are debating ignores this fact because it only deals with a small part of our energy situation—energy speculation.

I have noticed that whenever a situation gets bad, Congress plays the blame game. In this instance, the price of gas is making you angry. It makes me angry, too. I am sick of paying $4 a gallon to fill my gas tank. I want action. Instead of action, the majority has given us the legislation to punish speculators. Never mind that speculators are pension funds, airlines, and other consumers who are looking for certainty in an uncertain market. They have given us a bill that clamps down on speculators even though the Chairman of the Federal Reserve has said there is no evidence that speculation is impacting the market.

As I mentioned in my statements last week, this speculation bill might even have negative consequences on the market. I spoke at length regarding the possible unintended consequences of the majority leader's bill on institutional investors, including pension funds, and their ability to access and participate in our markets. Since I made those statements, I received two letters from The Committee on Investment of Employee Benefit Assets, and from a group of 10 associations that represents pension funds, companies, and their investment managers and fiduciaries, expressing their concern about the majority leader's bill. I ask unanimous consent that both of these letters be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE COMMITTEE ON INVESTMENT
OF EMPLOYEE BENEFIT ASSETS,
Bethesda, MD, July 25, 2008.

Re energy speculation legislation (S. 3268) erodes core ERISA principle of investment flexibility.

Hon. EDWARD M. KENNEDY,
Chairman, Committee on Health, Education, Labor and Pensions, U.S. Senate, Dirksen Senate Office Building, Washington, DC.
Hon. MICHAEL B. ENZI,
Ranking Minority Member, Committee on Health, Education, Labor and Pension, U.S. Senate, Hart Senate Office Building, Washington, DC.
Hon. MAX BAUCUS,
Chairman, Committee on Finance, U.S. Senate, Dirksen Senate Office Building, Washington, DC.
Hon. CHARLES E. GRASSLEY,
Ranking Minority Member, Committee on Finance, U.S. Senate, Dirksen Senate Office Building, Washington, DC.

DEAR CHAIRMEN KENNEDY AND BAUCUS AND RANKING MEMBERS ENZI AND GRASSLEY: I am writing today on behalf of the Committee on Investment of Employee Benefit Assets (''CIEBA'') to express our concerns regarding S. 3268, the Stop Excessive Energy Speculation Act. This legislation would erode a central principle of the legal regime governing our voluntary pension system. We share the sentiments expressed in the letter of concern regarding S. 3268 sent to the Senate earlier today by ten trade associations active in the pension arena but wished to write separately to highlight our particular concerns about potential erosion of one of the core principles of the Employee Retirement Income Security Act (ERISA).

CIEBA is a group of over 115 private pension funds that manage more than $1.5 trillion in defined benefit and defined contribution plan assets on behalf of more than 17 million plan participants and beneficiaries. As you know, our nation's voluntary employer-sponsored pension system has served Americans well for over half a century and tens of millions of workers and retirees rely on defined benefit and defined contribution retirement plans as a critical element of their retirement security.

CIEBA is concerned about the possible unintended consequences of S. 3268. While we understand and share the concerns regarding the rising costs of energy, severely restricting investment in energy commodities markets, as S. 3268 would do, endangers the financial well-being of the pension system and the American families who rely on this system.

CIEBA has been working actively to highlight the pension implications of restrictions on commodities investing and warn against the adverse effects of such restrictions on pension participants and beneficiaries. I testified on June 24, 2008, before the Senate Homeland Security and Governmental Affairs Committee on these issues, and the chairman of CIEBA's defined benefit subcommittee, Robin Diamonte, testified before the House Agriculture Committee on July 10, 2008. In our testimony, we made clear that while commodities are only a modest component of a pension fund's total investment portfolio, they are nonetheless quite important because commodity returns are uncorrelated with stock and bond returns and commodities provide a critical hedge against inflation. We further testified that efforts to restrict the ability of pension plans to invest in commodities markets, whether through outright prohibitions or severe limitations, is short-sighted and counterproductive. Such restrictions would make it difficult for pension plans to adequately diversify investments to hedge against market volatility and inflation. Consequently, they would put at risk the retirement funds and benefits of the very workers the legislative proposals are intended to help.

As leaders of the Senate committees with pension jurisdiction, we hope you share our concern about adopting energy legislation with such major implications for the pension system, particularly when your committees of jurisdiction have not had an opportunity to consider these issues. Congress has long recognized that direct government regulation regarding specific pension plan investments is ill-conceived, and ERISA very consciously avoids such an approach. As you know, ERISA imposes rigorous fiduciary responsibilities on those who manage pension plan assets. These rules require plan fiduciaries to act prudently, and to diversify plan investments so as to minimize the risk of large losses. Moreover, ERISA requires fiduciaries to act solely in the interest of plan participants and beneficiaries and for the exclusive purpose of providing participant benefits. Accomplishment of these participant-focused objectives can best be achieved by broad fiduciary discretion to select appropriate investments and asset classes and this is precisely the regime adopted in ERISA. Fiduciaries cannot faithfully execute their obligations and respond to market conditions if restrictions are imposed on important investment approaches and asset classes. Unfortunately, this is precisely what S. 3268 would do. Its restrictions would erode fiduciaries' critical investment discretion and thereby undermine one of ERISA's core principles.

The experience of other nations has shown that efforts to impose investment restrictions and/or investment requirements on pension plans impairs performance and thereby harms the interests of pension plan participants and beneficiaries. This has been the European experience, and we fear current efforts to restrict investments in commodities could be the beginning of a counter-productive movement in this direction in the U.S. We hope to work with you and your Senate colleagues to ensure that this will not be the case. Instead, we must ensure that our existing ERISA structure—imposition of demanding fiduciary obligations paired with broad investment flexibility—is preserved.

Thank you for your consideration of our views on this important issue. We would be happy to provide further input on this legislation to ensure the health of a secure retirement system that will continue to serve the interests of the tens of millions of pension plan participants and beneficiaries.

Sincerely,

WILLIAM F. QUINN,
CIEBA Chairman.

JULY 25, 2008.

Re adverse retirement plan implications of energy speculation legislation (S. 3268).

Hon. HARRY REID,
Majority Leader, U.S. Senate, Washington, DC.
Hon. MITCH MCCONNELL,
Republican Leader, U.S. Senate, Washington, DC.

DEAR MAJORITY LEADER REID AND REPUBLICAN LEADER MCCONNELL: We are writing today to express concerns about the implications of S. 3268, the ''Stop Excessive Energy Speculation Act of 2008'', on employer-sponsored retirement plans and the tens of millions of American workers and retirees who rely on these plans for their retirement security. We represent organizations that assist employers of all sizes, and their service providers, in providing retirement benefits to employees.

We are very concerned that the serious implications of S. 3268 on retirement plans and retirement plan participants have not been sufficiently evaluated. We are also concerned that this legislation relating to energy policy could unintentionally harm the long-term financial security of American workers and their families.

Employer-sponsored defined benefit plans invest for the long-term and do so in a wide range of asset classes in order to diversify plan investments and reduce to the greatest extent possible the risk of large losses. These strategies are central to employers' fiduciary obligations to act prudently and solely in the interest of the plan's participants and beneficiaries. Plan fiduciaries are subject to extremely demanding legal obligations under the Employee Retirement Income Security Act (ERISA). ERISA was drafted to preserve the fiduciary's flexibility to select the investments that will allow them to carry out their mission of providing retirement benefits to employees. Commodities are one of a broad range of asset classes upon which fiduciaries rely. Commodities serve as a modest but important element of the investments held by employer-sponsored defined benefit pensions because commodity returns are uncorrelated with stocks and bonds and because they provide an important protection against inflation.

For the same reasons, commodities are used in many of the diversified ''single fund'' solutions (lifecycle funds, target retirement date funds) that have been developed to simplify investing for the tens of millions of

Americans participating in defined contribution plans such as 401(k), 403(b) and governmental 457 plans. These single fund solutions, which policymakers have encouraged through legislation and regulation, make investing easier while giving workers access to professionally managed, diversified portfolios.

The restrictions imposed on commodities investing under S. 3268 would greatly limit the ability of employer-sponsored defined benefit and defined contribution plans to use this important asset class. The result will be less ability to diversify investments, manage investment volatility and provide a buffer against inflation. Unfortunately, it is the employees and retirees who depend on employer retirement plans for their income in retirement who will ultimately suffer. We hope, with this in mind, that the implications for retirement plans and plan participants will be examined more fully before S. 3268 is considered further.

We sincerely appreciate your consideration of our views on this important matter. Please let us know if we can provide additional information or address any questions you may have.

Sincerely,

American Bankers Association.
American Benefits Council.
American Council of Life Insurers.
The ERISA Industry Committee.
The Financial Services Roundtable.
Investment Company Institute.
Managed Funds Association.
Profit Sharing/401(k) Council of America.
Securities Industry and Financial Markets Association.
U.S. Chamber of Commerce.

Mr. ENZI. While the majority has given us someone to blame, they have not given us a comprehensive bill that will get us out of this energy mess. They have not given us a proposal that addresses the heart of the problem—the problem of supply and demand. We need to find more American oil from American soil at the same time that we use less. We need to quit shipping those dollars overseas to countries that would like to do us harm. We need to do something with renewables. But there are also things we can do with the coal resources we have. My State has more coal than the Btus of oil in the Middle East. I have a lot of faith in our young people. When I was going to junior high, Russia put up Sputnik, and we panicked. We discovered—even in junior high we realized this—we were now behind Russia, and it was a crisis. We didn't want to be there. Education changed, parents changed, and teachers changed. We began inventing. We not only solved the problem of space, we sent a man to the Moon. We have sent vehicles to Mars and other planets. That was the rocket generation.

Then we went to the computer generation. We have people with extraordinary minds, because of the freedom we have in the United States, who came up with great inventions for computers. I remember when they said that 640K would be the maximum memory you could ever use in a computer. Nobody even knows what that is anymore, it is so small.

Then we went to communications, and we said there ought to be better ways to communicate. Then we began the cell phone generation.

Now we are in the energy generation. There are young people out there who can invent clean ways to do what we need to do, who can change things that we never considered to be energy. I have a lot of faith in them. I have challenged them. I do the inventors conference every winter in Wyoming, and I have asked the young people to come up with inventions—and they don't have to be difficult, but they should pertain to a pertinent problem so they can be marketed. We got more than 250 inventions as a result of it.

Now I am pressing for energy inventions. We have not built a new refinery in the United States for 40 years. Part of it is the permitting process and part is a fear of lawsuits. We permitted a new refinery in Douglas, WY. It will turn out diesel fuel. That is one of the biggest needs we have in our country, because of how much we rely on trucking in the United States, including trucking to be able to mine the coal.

By producing American energy, we reduce our Nation's dependence upon foreign oil sources and, at the same time, we work to develop new technologies that will make it so we don't need oil in the future. We can safely produce more American energy off of the coasts of States that want exploration to take place. We can produce nearly a million barrels of American energy each day from the Arctic National Wildlife Refuge, in an environmentally sensitive manner, from an area smaller than Dulles Airport. In fact, it is smaller than the Casper, WY airport. A million barrels a day will bring down the price at least $20 a barrel. We can improve the permitting process to allow some of the leases that the other side claims are not in production to be drilled by restricting the amount of times we let radical environmental groups file frivolous lawsuits. They have to file all of their objections at the same time, so they can be done consecutively instead of sequentially. Most of the original leases are by small investors. It costs about $1,500 an acre. It is 5 or 6 years before they can even use the lease. We hear all of these acres of leases that are not being drilled, and it is because they are tied up in the courts. As soon as they can be drilled, they are. There is a tremendous investment. They don't know if they are going to hit oil, but the cost of a well now is about $8 million.

Instead of relying on oil from Hugo Chavez, in Venezuela, or other nations that wish us harm, instead of playing the blame game, we can do something to bring down the price of gas. That is what my constituents are begging us to do.

Unfortunately, we are not having a real debate on the bill. The Senate is oftentimes called the most deliberative body in the world. Yet we are not allowed to debate the issue that is most important to the American people. Why, you might ask? The majority leader has used a procedural tactic to prohibit us from offering amendments. He has used a procedural tactic to prevent votes on amendments. No votes, just a speculation bill, bills that haven't gone through committee. He has prevented a vote on amendments I have cosponsored to produce more American energy. He prevented a vote on my amendments to make the speculation bill more reasonable. He is preventing a vote on an amendment of which I am a cosponsor that would encourage production of diesel and jet fuel from America's most abundant energy source—coal.

It is the wrong way to legislate and will not help you when you go to fill your gas tank. It will not help you when you get your electricity bill, your heating bill this winter.

What we need is legislation that encourages us to find more American energy as we use less. I am the cosponsor of legislation to do that. The Gas Price Reduction Act, which is cosponsored by 43 of my Republican colleagues, includes a provision to open coastal waters in States where they want energy production. It ends the ban on the development of promising oil shale in Wyoming, Colorado, and Utah, oil shale that can provide as much as 2 trillion barrels of oil. At the same time, the Gas Price Reduction Act encourages increases in the supply of American energy, it promotes the development of better technology so we use less energy.

Thus far, we haven't had a vote on those issues. We have been told by the majority leader we can have limited amendments with limits as to how those amendments can be debated. That is not right, and it needs to stop. If it doesn't, we will not address this issue and the American people will continue to suffer.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

TAX EXTENDERS

Mr. GRASSLEY. Mr. President, we finished a fourth vote on the tax extenders bill. As the great baseball philosopher, Yogi Berra, said: ''It's deja vu all over again.''

Here we are getting ready to vote and just finishing a vote for the fourth time on the motion to proceed to the House tax extenders bill. As I said, it is deja vu all over again and yet again.

The vote, I believe, was 51 to 43, so very short of what it takes to get business done in the Senate, which is to work a bipartisan agreement so we have more than 60 votes to get business done. This is a no-brainer, in this particular instance, to get an extenders bill and the AMT.

The futility of this exercise, which is motivated purely by partisan politics, makes this vote as silly as a ''Three Stooges'' episode. Instead of wasting time on such a silly exercise, the Senate Democratic leadership should be working on negotiating a bipartisan deal with Senate Republicans that can be signed into law by the President. The American people do not want another futile vote on tax extenders.

They want a bill that will be signed into law. That would provide the American people with the tax relief that is needed.

The extenders vote we had has already failed before. Albert Einstein famously stated the definition of ''insanity'' is doing the same thing over and over and expecting different results. The Senate Democratic leadership has already done the same thing too many times and, of course, today sought to do it again. This is a waste of everyone's time. Everyone can see through the Democratic leadership's strategy for what it is: a partisan political exercise, designed solely to get 30-second sound bites for political ads.

Let's stop this nonsense. Let's work out a bipartisan compromise on the tax extenders bill. Let's reach agreement in a form that can be signed into law by the President. The President made it very clear today that he is not willing to sign what we had before us a few minutes ago into law. Of course, what I am asking is that the Senate Republican leadership has been trying to urge the Senate majority to move in this direction.

The Senate Republican leadership has made numerous offers to the Senate Democratic leadership to try to find a way to break the logjam on tax extenders. So far, our colleagues on the other side of the aisle have been unwilling to enter into a bipartisan agreement on a tax extenders bill that even attempts to address legitimate concerns of the minority party in this body.

As the Senate Democratic leadership engages in pure partisan politics by bringing up the tax extenders bill for yet another vote, the chairman of the Democratic Senatorial Campaign Committee is probably grinning like a Cheshire cat, thinking of all the 30-second campaign ads they will be able to make. However, the people of New York are not grinning because they are not getting the benefit of any of these tax relief provisions. All the tax relief provisions that are very important to the American people, including even to the people of New York, are being held hostage as part of the political game of the Democratic Senate leadership having vote after vote on cloture to stop debate for whatever reason.

Some of these important tax relief provisions are the alternative minimum tax patch, the deduction for the State and local sales tax, the deduction of tuition expenses, and the deduction for expenses of school teachers. How is anybody going to find fault with the fact that these provisions should have been done a long time ago? In fact, the AMT patch should have been done because, since the first of the year, taxpayers who have had to file quarterly tax payments have been violating the law if they haven't taken into consideration that there are 24 million American families right now hit by the alternative minimum tax. That figure would include 3.1 million New York families. The provision for the State and local sales tax would help almost 11 million families. Also, the deduction for expenses for tuition and fees would help over 4.6 million families. In addition, the deduction for expenses of school teachers would help 3.4 million Americans. These hard-working taxpayers are more important than a 30-second sound bite to be used in the next campaign because of political games that are being played.

The bottom line is, when we have 24 million people being hit by AMT, 4.6 million people on the deduction of college expenses, and 3.4 million people hit by increased taxes because school teachers will not be able to deduct supplies from their income taxes, real Americans are being hurt while political games are being played, when everybody in this body knows the only way we get things done is in a bipartisan way.

The biggest divide between Republicans and Democrats regarding tax extenders relates to the issue of offsets, also known as revenue raisers, or I think we ought to be more intellectually honest and call these tax increases. In other words, tax increases on Americans generally to provide the extension of some policy that has been on the books for decades.

My party's position has been clear on this issue. We are perfectly willing to use offsets that make sense from a tax policy perspective to pay for new tax policy. However, tax relief provided by extending existing tax policy or expiring provisions, or somebody may call these sunset provisions, we do not feel they should have to be offset. We should not be raising taxes in order to pay for the extension of existing tax policy.

One reason I care about this issue is that there is currently a bias in favor of using this as an excuse to bring in more money to increase the size of Government. The pay-as-you-go rules apply to expiring tax provisions which are not built into the revenue base. On the other hand, if you have sunset of appropriations, these are built into the spending baseline. Therefore, in order to extend expiring tax provisions, the pay-go rules require an offset, and that happens to be a big tax increase. Whereas, if you have extensions of expiring appropriations provisions—in other words, spending provisions—they do not need to be paid for by decreased spending in other areas because they are assumed in the spending baseline. Therefore, pay-as-you-go rules apply to the extension of expiring tax provisions, but in an intellectually, inconsistent way do not apply to the extension of expiring spending provisions.

This inconsistent treatment makes no sense—intellectually inconsistent; I say to the taxpayers of America, intellectually dishonest. It is biased to create ever larger Government. The money the American people earn, after all, is their money. We should only take the money from them that it truly takes to run the Government. We should not be using sunset tax provisions as an excuse to increase taxes, and that is all it is.

In addition, the Democrats' desire to use permanent offsets to pay for an extension of temporary tax provisions is extremely problematic. It creates a situation where the permanent offsets that can be agreed to on a bipartisan basis—in other words, the low-hanging fruit all gets used to pay for the extension of temporary tax provisions.

Under the Democrats' tax side only, pay-go obsession, once all the low-hanging fruit is used—and we are rapidly approaching that point—then the choice becomes much uglier for them and much uglier for the American taxpayers. The choice becomes whether to extend existing tax policy that has broad support by increasing taxes in areas that will hurt Americans.

Nobody advocates the inconsistency of the pay-as-you-go rules more than the famed House of Representatives Blue Dogs, and they are all Democrats. The Blue Dogs portray themselves as fiscal conservatives. We agree with the Blue Dogs' goals of fiscal responsibility. They will have allies all over my side of the aisle if they want to control spending. The problem is the Blue Dogs are pursuing the same old tax-and-spend game under the cloak of fiscal responsibility. The Blue Dogs will fight tooth and paw over any tax relief that is not offset with a corresponding tax increase.

However, the same self-described fiscally conservative Blue Dogs are not willing to fight tooth and paw to seek the same equality for the taxpayers on the spending side of the ledger. They have a big appetite for spending. The Blue Dogs generally do not seek to offset spending increases with spending cuts in other areas. But in taxes, it is a whole different story. In fact, the Blue Dogs do not even seek to curb the amount of spending increases for which they hunger.

By portraying themselves as fiscal conservatives, while in reality playing the same old tax-and-spend game, the Blue Dogs remind me of the land shark character played by Chevy Chase on ''Saturday Night Live.'' This was many years ago, so maybe some of you will not remember. But we have a picture of the land shark skit with the theme from ''Jaws'' playing in the background.

The land shark knocks on a person's door. With the door still closed, the person would ask: Who is at the door?

The land shark would reply: Flower delivery.

The person answering the door then said: You are that clever shark, aren't you?

And in response, the land shark said: Candygram.

If you don't know how the skit ended, the person eventually let the land shark in the door because that person believed the land shark when the land shark said he was a dolphin. And, yes, the land shark ate that person.

The moral of the land shark story is, don't let yourself be fooled that the Blue Dogs are fiscal conservatives because they are pursuing the same old tax-and-spend Washington game. Don't let the House of Representatives Blue Dogs' insatiable appetite for spending swallow the much-needed tax relief contained in the tax extenders.

I recommend that folks take a look at the cover story of the June 14, 2008, edition of the National Journal magazine about the Blue Dogs. It is very enlightening.

In trying to reach a bipartisan agreement on tax extenders, my party's leadership has made several offers to the other side's leadership. One of these offers is to pay for some new tax policy using offsets that make good tax policy sense. This is not simply a vague promise to look for such offsets. For instance, I have suggested we use the offset that closes the loophole that allows hedge fund managers to defer compensation for tax haven jurisdictions.

My time is up.

Mr. President, I ask unanimous consent for 4 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. I thank the Chair.

So we have offered something like closing a loophole that allows hedge fund managers to defer compensation in tax haven jurisdictions. However, we need to remove the huge charitable loophole that is contained in both the Democratic House and Senate extenders bill.

Let me try to explain something that is not explainable. I would be embarrassed if I had this in one of my bills. This charitable loophole allows hedge fund managers to deduct 100 percent of their deferred compensation that is donated to charity. In contrast, the ordinary American is only permitted to deduct charitable contributions of up to 50 percent of his or her income for that year. Everyone is obviously in favor of charity, but treating wealthy hedge fund managers better than the average American taxpayer makes no sense from a tax policy standpoint.

Also, the Senate Republican leadership suggested that some of the other new tax policy could be paid for by decreasing the scheduled increase in new spending, but that was not taken into consideration, even considering the fact that the present budget authorizes an increase greater than $350 billion over the next 10 years, and none of that is offset.

This extra $350 billion is like an extra checkbook that Congress is carrying around in addition to its already fat checkbook. This checkbook covers nondiscretionary spending and current levels of discretionary spending. We simply asked that they take a few checks out of this extra checkbook—not all of it, just a small part of it—to pay for some of these needed tax relief provisions. However, this suggestion was summarily dismissed.

My colleagues on the other side of the aisle are unwilling to even consider decreasing their increased nondefense discretionary spending that is above the President's budget. If the Blue Dogs of the other body are fiscal conservatives, they should come out and say they are willing to decrease this increase in the new extra nondefense discretionary spending. Instead, the Blue Dogs' position has been that all of the tax relief provided in the tax extenders package, even the extension of the existing tax policy, must be offset by an equal amount of tax increases on every other American. Why not look at curbing this new excess spending to pay for part of the much needed tax relief? So let us get back to square one. I invite my Blue Dog friends who claim to be fiscal conservatives to answer that question.

Back to where we started today—back to Yogi Berra. He also said: ''It ain't over 'til it's over.'' This extenders vote failed because our colleagues on the other side of the aisle have refused to negotiate toward a bipartisan bill that can be signed into law. Because of the Senate Democratic leadership's doomed plan, this extenders discussion ''ain't over 'til it's over.'' Let's get this over with. Let's negotiate toward a bipartisan agreement that can become law so the American people will benefit. So far, the Senate Democratic leadership has not done that. For that reason alone, people did vote ''no'' on cloture, as they previously had.

Mr. President, I yield the floor, and I thank the Senator from Ohio for allowing me the additional 4 minutes.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Mr. President, I ask unanimous consent that our half-hour be divided equally, with the first 15 minutes for myself, and Senator NELSON of Florida the other 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Ohio is recognized.

DOHA ROUND OF WTO TALKS

Mr. BROWN. Mr. President, the Doha Round of World Trade Organization—the WTO—talks broke down yesterday. Given the tremendous problem with this Nation's trade policy, I don't know of many Ohioans who are going to be very upset, and I don't know of many of my colleagues who will be too troubled about World Trade Organization trade talks breaking down either.

The impasse at the WTO is no different from the pause we are in right now when it comes to trade. Americans are rightly skeptical about the course we are on when it comes to trade policy, and Congress reflects that skepticism. In the 2006 elections, voters all across the country told those of us in Congress, Republicans and Democrats alike, that they wanted a timeout on trade; that they wanted to see us go back and look at the success and failures of the North American Free Trade Agreement, the Central American Free Trade Agreement—so-called CAFTA and NAFTA—and they want us to look at what PNTR—Permanent Normal Trade Relations—with China has meant. They want us to look at Colombia, and Peru, and Panama, and South Korea, and what those agreements might mean to our country.

It is pretty clear that Americans are not satisfied with the status quo of NAFTA, CAFTA, and WTO-modeled policies. One reason is our severely unbalanced trade relationship with the People's Republic of China. When it comes to competing with China, Ohio workers and manufacturers are playing with one hand tied behind their back. We shouldn't be playing under these rules.

Athletes at next week's Olympics will not be playing by these rules. Maybe there is a lesson there for the Chinese Government, for the United States Government, and for our trade policy. Workers, like athletes, can compete with anyone—good athletes and certainly American workers can compete with anyone where there is a level playing field and the rules are not rigged. But manufacturers and workers in Ohio are struggling to compete while our Government too often stands idly by while China games the system over and over and over.

This problem is urgent, as a new report from the Economic Policy Institute shows. This report finds that the United States is hemorrhaging manufacturing jobs at an alarming pace. Nothing new there. More than 366,000 jobs were lost last year alone because of our trade deficit with China—366,000 jobs in 1 year because of our trade relationship with one country. In all, EPI counts 2.3 million jobs lost to the China trade deficit since China joined the World Trade Organization less than a decade ago.

Unless China raises the real value of its currency—the yuan—by at least an additional 30 percent, and lets it float on the international currency exchanges, as most countries do, the United States trade deficit and job losses will continue to grow.

Labor rights are also a factor. The AFL–CIO estimates that repression of labor rights by the Chinese Government has lowered manufacturing rates by as much as 80 percent. To put it in perspective, my office receives at least two or three TAA certifications a week—trade adjustments from the Trade Adjustment Act on workers losing their jobs because of international trade. We receive from the Labor Department at least two or three TAA certifications a week for Ohio manufacturers. Each of these certifications represents, in most cases, hundreds of workers and their families.

What happens to a community when there is job loss? Think about a community. I was speaking to a gentleman from Tiffin in the last hour. Think about the town of Tiffin, or Chillicothe or Wilmington or Finley or Mansfield—towns of 15,000, 20,000, 30,000, or 50,000 people. When they lose a plant, a manufacturing installation—or what is

happening with DHL in Wilmington, which is way beyond that—even if they lose a plant with 300 or 400 workers, think about what it does, not just to a worker and his or her family, but what it does to the community at large, with the layoffs of police officers and teachers and firefighters, because there are significantly fewer jobs in a community of that size.

Last week, it was Ceva Logistics in Miamisburg that we got a TAA certification about—near Dayton; Acuity Lighting in Newark, and more Delphi workers. The same old story with Delphi and what has happened in the last year in Moraine, OH—again, near Dayton.

Yesterday, we got a TAA notice about Acklin Stamping Company in Toledo. The Labor Department certified that an increase in imports caused Acklin to lay off workers.

That was last week and yesterday. But how about today and how about tomorrow? Probably more TAA notices, because we get two or three almost every week. Probably more today, tomorrow, and next week, again because of a failed trade policy.

On my desk, I have a stack of auction notices from small tool and die manufacturers going out of business in my State and across the country. These notices are going-out-of-business sales. They are notices offering the sale of equipment from machine shops not just in my State but all over the country.

This week, I spoke with the CEO and the family owners of Norwalk Furniture in Norwalk, OH, a community between Cleveland and Toledo. We are trying to keep this 105-year-old company in business. Norwalk workers are represented by the Teamsters and United Steelworkers. It is a company playing by the rules, paying good wages in a small town in Ohio, with good benefits, trying to stay competitive despite having the deck stacked against it because of our trade policy with China.

Again, American companies are playing with one hand tied behind their back. China's undervalued currency and weak safety and environmental standards put American furniture manufacturers such as Norwalk at a huge disadvantage. Like many Ohio businesses, Norwalk Furniture can compete with China. It can and has competed with foreign competition. That is not the complaint. The reason manufacturers such as Norwalk Furniture are struggling and pleading for a change in trade policy is that they can't compete while the U.S. Government—the Bush Commerce Department, the Bush U.S. Trade Representative—stands by and allows China to game the system.

We see what these plant closings do to communities, which is why not only Norwalk Furniture is fighting back, but Mayor Lesch and others in Norwalk are joining them in this struggle. The trade deficit with China costs manufacturing jobs, and not just low-skilled jobs, as is commonly thought.

One very salient point from the EPI report is that it is not only apparel jobs we are talking about, and not only relatively low-wage jobs. We are getting into high-tech products, many integral to our defense industrial base. The report finds that more than a quarter of last year's record trade deficit with China was due to advanced technology products.

Last year, a $68 billion deficit in advanced technology products was responsible for more than 25 percent of the total United States-China trade deficit. Since 2001, the flood of advanced technology imports from China eliminated 561,000 United States jobs in computer and electronic products. So we are not just talking about textile and apparel jobs.

EPI also counts more than $8,000 in lost income for displaced workers. People who support U.S. trade policy—President Bush, Vice President CHENEY, the Republican leadership in this body—say: Well, yes, prices are low as a result of U.S. trade policy, but when companies such as shoe manufacturers move out of the United States or a steel manufacturer moves out of the United States, I don't see steel or shoe prices dropping necessarily. So I don't know if that argument holds water.

Even if you concede it might affect prices some, EPI counts more than $8,000 in lost income per displaced worker. So what does that mean? It means someone working at American Standard in Tiffin, OH, or someone at the old Westinghouse plant in Mansfield, where I grew up, or a GM worker in Dayton or a DHL worker or ABX or ASTAR in Wilmington, when they lose a good-paying job making $30,000, $40,000, $50,000, or $60,000 a year, the next job they have on the average makes $8,000—if they can find a job—makes $8,000 less than they were used to making. And lower prices don't give you much of a break when you have a new job at $8,000 less than your old job.

Proponents of China PNTR or NAFTA like to say that the jobs displaced from China are replaced with export-oriented jobs that pay better, or jobs in the service sector that pay better. Again, not true. The truth is that wages earned in United States export heavy industry paid 4 percent less than the jobs displaced by Chinese imports. So when we lose these jobs to Chinese imports, it is costing our workers that $8,000 we were talking about. Even if we are exporting some to China, the amount we are exporting to China versus the amount we are bringing in obviously is a huge chasm. It is the better paying jobs that are moving offshore or closing because of a flood of Chinese imports.

The failure of the WTO talks could, in fact, be a blessing. The DOHA talks long ago became more of a threat than an opportunity to American farmers and to American workers and long ago represented more of a threat than an opportunity for sustainable development abroad for our trading partners.

We have an opportunity now, because of the failure of DOHA, to step away, to evaluate what is working and what is not working and start again with a new trade model—for New Jersey, the State of the Presiding Officer, and for my State. I have introduced legislation, S. 3083, the TRADE Act, which evaluates our Trade Agreements Program, which allows for renegotiation and which sets forth principles for future trade deals.

In my State, in the last year and a half, I have held about 110 roundtables in 75 of Ohio's 88 counties where I gather a group of 20 or 25 people, a cross-section of the community, and listen to them talk about their hopes and dreams and what they wish and hope for in their community and what they are fighting for, for their families and their communities. Few issues in these roundtables get workers and businesses, Democrats and Republicans—and I don't know people's party affiliations at these roundtables—few issues get them as worked up as our unfair trading relationship with China in deals such as NAFTA and CAFTA that protect Wall Street investors but don't protect labor, don't protect safety, don't protect the environment.

We have an opportunity, in the coming months and especially next year with the new President, to renew a consensus on trade. I look forward to working in my caucus and across the aisle on a better approach to trade policy for our workers, for their families, for our communities, and for our country.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NASA

Mr. NELSON of Florida. Mr. President, yesterday was the 50th anniversary of the National Aeronautics and Space Administration. I want to recall that after the space shuttle *Challenger* went down 22 years ago, in a Nation that was shocked because the very symbol of technological prowess had exploded in front of our own eyes on our television screens, the President addressed a mourning Nation and noted that even out of that tragedy, we have grown accustomed to wonders in this country. He observed that we had been so accustomed to all of that technological achievement, it was almost as if it was a Sunday afternoon drive in the car. As President Reagan said, it is hard to dazzle us. But America's space program has been doing exactly that. Now for 50 years it has been dazzling us, even in times of loss and even in times of tragedy.

Fifty years ago, it was President Eisenhower who signed the National Aeronautics and Space Act and created

NASA. Fifty years ago, in 1958—remember the context of history. The Soviets suddenly took the high ground. The Soviets shocked us because they put the first satellite, sputnik, in orbit. Here, time after time, with the old Navy Vanguard rocket, it would explode on the pad. It was not until the President went to a group of Germans—who were here because we, the United States, had gotten to Peenemunde, Germany, before the Soviets did and got about two-thirds of those German rocket scientists, headed by Wernher von Braun. So years later, the President goes to Wernher von Braun, as America's prestige was on the line because we couldn't get a rocket off the pad, and Wernher von Braun said: Give me 6 months. With the Army Redstone rocket, he put up America's first satellite—Explorer. It was in that historical context that the Congress wrote this new act that set up NASA.

Then, after we had been beaten in space by the Soviets with the first satellite, we were beaten in space by the first human in orbit. As a matter of fact, we didn't even have a rocket that had enough lift capability to get the Mercury capsule into orbit because it was that same Redstone rocket that we put the *Mercury* capsule on for Alan Shepard to go into suborbit. It was in that context that President Kennedy, after we had been shocked again with the Soviets putting up Gagarin for one orbit and then a few weeks later we put up Alan Shepard only into suborbit, it was at that point that the President, who is the only one who can lead America's space program—that President, in 1961, President John F. Kennedy, set the goal. He gave the vision. He said we are going to the Moon and back in 9 years, before the end of the decade. It was a bold challenge. He did that in front of a joint session of Congress: Send a human to another celestial body. Here we had not even gotten into orbit with John Glenn.

It was 10 months later, on an Atlas rocket—which was an ICBM. It was not rated for humans. We knew it had a 20-percent chance of failure when John Glenn climbed into that *Mercury* capsule, and then we were off on that space race. The skeptics did not think it could be done. They certainly didn't think we could go to the Moon. But NASA's *Mercury*, *Gemini*, and *Apollo* missions were all designed because of that bold stroke of leadership and that vision of a young President.

Nine years later, on July 20, 1969, the President's dream became a reality when *Apollo 11* landed on the Moon. Who can ever forget those immortal words: Houston, the Eagle has landed. And who can ever forget those words as the commander of that mission, Neil Armstrong, climbed down the ladder of those spindly spider legs of the *Apollo* Lander, when he said: That is a small step for man, but that is a giant leap for mankind.

Since then, we have flown the shuttles, we have built the space station, we have explored Jupiter and Mars, and we have had Rovers all over Mars. Indeed, it looks as if there was water on Mars. As we continue to explore the heavens, if there was water—and when we eventually get there with humans—with water, was there life? If there was life, how developed was it? If it was developed, was it civilized? And if that life was civilized, what happened? What can we learn as we explore the heavens in order to be better stewards of our planet, protecting our planet and this civilization that is on this home called planet Earth?

I am quite excited, as America celebrates NASA's 50 years of history, that we are now preparing to chart a new course into the cosmos. I am excited about the wonders that await us. There is hope for space settlements and perhaps that discovery of life elsewhere in the universe. It is going to be a page-1 story when suddenly there is some kind of transmission that we intercept that indicates there is intelligent life elsewhere in the universe.

Mr. President, you and I—our human minds cannot conceive the enormousness of the universe. When we look at the size of our solar system around the Sun and we understand that there are billions of other solar systems just in our galaxy and then try to comprehend that there are billions of other galaxies—can you imagine that in a far-distant galaxy, there is another star, similar to our Sun, with planets rotating around it, that has created the climatological conditions that have brought forth the life here on this planet? Given the infinite expanse of the universe—it is going to be quite interesting when we have some discovery of an intelligent message from somewhere else in the universe. This is the excitement of the future.

As we look back on the accomplishments of 50 years of NASA, we can look with great pride, but excitement, to the future. This is the promise of a new President of the United States making a bold declaration of our understanding and exploration of the heavens.

As President Kennedy promised all those years ago, science and education have been greatly enriched by the new knowledge of our universe and of our environment. Life here on Earth has improved by leaps and bounds from the spinoffs of the space technology—the space tools, the computers, the miniaturization—all of this which has been adapted to our daily lifestyles and to industry and to medicine and to our individual homes. America's space effort has created scores of new high-tech companies and hundreds of thousands of jobs. Simply put, we all reap the harvest of gains from our exploration of space. That is why now, at this watershed point of where NASA is going in the future, that is why we cannot cede our leadership in space or waiver in our support for our space program.

There is another reason we undertake the risk and invest in space exploration.

It is not the pure science, it is not the technology spinoffs, it is not the high-tech workforce, or it is not that we want to extend human civilization beyond our planet. We do it because it is in our character and our nature as a people. We are, as Americans, explorers by nature.

In the past, we always have had a frontier. As this Nation developed, it was a westward-expanding frontier. Now that expansion is upward. It has been said that there are two fundamental differences between humans and other species. As humans, we have souls. As humans, we are curious. It has also been said that the exploration of space is a testament to these differences. Curiosity, which is unique to humans, drives us to explore, and our soul gives us meaning to this endeavor.

As we celebrate 50 years of NASA's history, let us continue to be a bit overwhelmed. Let us be dazzled again. That concludes my comments on NASA. I have some other comments on a different subject unless we are in some restriction here on the time.

The PRESIDING OFFICER. The Senator has 2 minutes 40 seconds remaining.

Mr. NELSON of Florida. When one of our colleagues comes to the floor, I am told that I can continue until that time.

SAMUEL SNOW

I want to share with the Senate the tragedy of a fellow named Samuel Snow, Samuel Snow, 84 years old, African American. The time is 1944 and he is part of the U.S. forces in a military installation in Seattle, WA. It is an installation where there were Italian prisoners of war. Somehow a riot breaks out, and in the course of this riot in the prisoner of war camp, one of these Italian prisoners of war is lynched, and the African-American U.S. soldiers are charged. They are summarily dismissed. They are put in jail. For a year, Samuel Snow was put in jail. He was then dishonorably discharged, all the time maintaining his innocence.

As he was discharged dishonorably, he went back to his hometown of Leesburg, FL. The only work he could get was that of janitor. Yet he was so respected in his neighborhood he became the neighborhood handyman. He married his high school sweetheart. They had children. He raised that family.

In 2005, a journalist in Seattle, WA, an investigative journalist, dug into this situation and found that Sam Snow had been railroaded and showed he was innocent. Now, you can imagine all of those years after that.

Then the Army, the U.S. Army, to its embarrassment, decides it is going to reverse the dishonorable discharge and give him an honorable discharge. And oh, by the way, out of their generosity of heart, they decide they are going to pay him his annual wage for the year he spent in the military prison, so they are going to cut him a check of $725.

Well, when this Senator found out about that happening to a Floridian,

this Senator about went into orbit again, and, of course, not only writing to the Pentagon but having direct talks with the Secretary of the Army in front of our committee, the Joint Chiefs of Staff. All of them came back and said: Well, the law is that we cannot pay any more. We cannot pay even what we were asking for.

At least give him the cost-of-living adjustment for those 60 years of his military pay that he was denied. They say: No, we cannot do it. The law does not allow it.

Well, we put it in the Defense authorization bill. It is before the Senate. And as soon as the Senate will finally take up the Defense authorization bill, we will pass it out of here. It is already in the version of the House that has passed the House. It will become law.

But let me tell you the sad ending to this story. Last Saturday, Sam Snow and his son Ray traveled to Seattle for the ceremony conducted by the U.S. Army to give him his papers for his honorable discharge. He became ill in Seattle before the ceremony. His son went in his place. His son received the honorable discharge, brought it back to his dad, and with a big smile on his dad's face, his son read him the honorable discharge from an incident, a terrible mark upon the U.S. Army that had occurred 60 years before.

I am sad to tell you that 3 hours later, Sam Snow passed away to go on to be with his Maker. He is still owed that back pay, and he is owed more than some $725. This Senator, when we pass that Defense authorization bill, is looking forward to the day that that sum, adjusted, will go to his grieving family.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLEAN BOATING ACT OF 2008

Mr. NELSON of Florida. Mr. President, until another Senator has come to the floor to seek recognition, I have another subject I have been waiting patiently to speak on, and we have been so busy on the floor that I have not had a chance to speak on it.

This is another good news story. We have finally passed, by the Senate working together across the aisle, bipartisan, we have passed a bill, we have passed legislation, and it is anticipated that it will be signed shortly by the President into law, averting a total disaster where the Environmental Protection Agency, pursuant to a judge's decision in Federal court on the west coast of the United States, the EPA was going to require a permit of every little recreational boat owner for any kind of runoff from that boat, whether it be in washing down the deck, whether it be the bilge water, whether it be water coming out of an outboard motor, whether it be trying to scoop out the water filling up in a little motorboat. Whatever it is, they were going to require, for the 23 million recreational boat owners, 2 million of which are in my State of Florida, they were going to require going to the EPA in order to get a permit.

By working it out on both sides of the aisle in a bipartisan fashion, we were able also to get a delay of an additional 24 months for commercial vessels under 79 feet and all commercial fishing vessels regardless of size.

All of this came from the decision of a judge who was trying to protect the interests of the United States. Because what happened is these foreign vessels that come in with ballast water in order to weigh down a vessel before it then comes to the United States and takes on cargo that weighs down the vessel would then dump this water that was there for ballast in the waters of the United States. The problem was they would take on water elsewhere in the world that was contaminated, and a certain kind of snail was one of these contaminants that would then go into any kind of drain under the water and start to clog up the drain. So there was clearly an environmental interest to be protected against all of these big commercial vessels bringing in this foreign ballast water that was contaminating our waters.

But the fact is, the court's ruling became so expansive that it said in incidental runoff from little recreational boats, you are going to have to get an EPA permit as well.

Fortunately, common sense prevailed and we have been able to overcome that. We passed it in the House and the Senate. It is on its way to the White House. Presumably the President will sign this momentarily and it will be law, averting this disaster that was about to occur in September where all of these recreational boat owners and the commercial small fishing vessels were going to have to get this EPA permit.

That is a commonsense story. It is also a good news story. I wanted to share that with the Senate. I thank the folks who have worked with me on this legislation, particularly the chairman of the Environment Committee, Senator BOXER, and Senator MURKOWSKI of Alaska, who helped work with us with regard to the commercial fishing vessels that were 79 feet and less. I am glad to bring this good news to the Senate.

I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NELSON of Florida. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

9–1–1 SERVICE

Mr. NELSON of Florida. Mr. President, I have the opportunity to clear the decks today with another speech I have been waiting to give. Since one of our colleagues is not coming, I am going to take advantage of this lull of the Senate and, since a Senator is walking in, I will make it short.

A tragedy occurred in Florida about 4 years ago, when a child in Deltona, FL, which is north of Orlando, started choking. The mom raced to the phone and dialed 9–1–1 and then she ran back to the child when she could not get anyone to answer on 9–1–1 to help the child. But it was to no avail. And what we found out was, in fact, this was a voice over the Internet telephone conversation and that, in fact, there was no emergency 9–1–1. So for the last 3 or 4 years, some of us have been trying to make sure there is a mandate for 9–1–1 service on a telephone that happened to be transmitted over the Internet instead of over the normal telephonic wires. Happily, I can say to the Senate we worked that legislation out. It was comprehensive. We worked out the differences between the House and Senate. On another happy occasion, the President invited a bunch of us to come down for a signing ceremony. I'm happy to say that in the future, when anybody runs to a telephone to dial 9–1–1, it is not going to be the technical difference of that phone. They are going to know it is hooked up to emergency services. That is my good news story.

I yield the floor.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. BOND. Mr. President, I ask unanimous consent to speak for 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RURAL GAS CRISIS

Mr. BOND. Mr. President, I thank my colleague from Florida for filling in for me while I was caught up in a radio interview.

We are here today to talk about a real crisis, a rural America crisis. Rural America is suffering a gas price crisis. Rural America deserves action now to get gas prices down. Rural America knows this fundamentally is a problem of not enough supply to meet demand. We need to find more oil and use less to bring the real gas price relief rural America needs. Families, farmers, truckers across rural Missouri, my home State, are suffering record pain at the pump. At kitchen tables in the farmhouses of rural Missouri, farmers, dairy producers, and cattlemen are facing a gas price crisis. Farm costs are higher than ever. Farm fuel to run tractors and farm equipment is at record levels. Transportation costs to get goods to the market are at a record level. The ability of consumers to buy products is under record pressure. People are seeing higher food prices because food has to travel. The average item on the grocery shelf travels 1,300 miles. Record-high

diesel prices are adding to the price of food goods in the store.

All this means real suffering for rural Missouri and its farmers. Down country roads of rural Missouri, rural families are facing a gas price crisis. They have to cut budgets hit hard by high gas prices. Many of these families live in rural areas because they are of modest means. Maybe they are looking for cheaper housing than offered in big cities. Maybe they are fixed-income retirees staying in their own hometowns. Either way, when it comes time to cut the family budget, the cuts will go extra deep.

What will these rural families cut because of higher gas prices? With the school year coming, they have to get the kids to school. Will a rural family give up buying new clothes for their kids? Will struggling fixed-income seniors cancel doctors appointments or cut back on medication?

Truckers across Missouri are facing a gas price crisis. Many trucking firms are based in rural areas, where land and fuel were cheaper, but record diesel prices are hammering truckers and trucking companies. Mom-and-pop trucking firms are laying off drivers. Some are even going into bankruptcy. Many rural families and workers also depend on airlines for service and jobs. Airlines are facing record-high jet fuel prices. That is forcing airlines to lay off workers and cut back service. Many of the blue-collar workers who moved back to maintain planes and service airports are being affected.

American Airlines, for example, is set to eliminate some 6,500 jobs because of record-high oil prices. Airlines also cut low-volume routes to rural areas first. Airlines are trying to manage rising fuel costs by using the financial markets to hedge against risk. But their experts tell me the main problem is a fear that there will not be a supply there in the future. They say if the U.S. Government would take steps to increase supply, it would bring about a huge change in the market and bring prices down immediately. Why? Because the current price being paid on the hedging market for oil to be delivered in 3 years depends upon their expectation of what the demand and supply will be in the years ahead. Right now there is every reason to think that if we do nothing, if we are prevented from getting a gas price reduction bill that provides more and allows us to use less through this Senate, the price will not be just $140 a barrel. The price will not just be $185. It will be $200 or $250. So people's retirement plans, such as CalPERS, California Public Employees Retirement System, are bidding up the price in the future because they don't expect supply to go up. Bringing that price down will make a difference. It will make a difference in the price of oil today, just as President Bush's ending of the Executive moratorium on offshore drilling brought the price down from $145 to $120.

Bringing the price down could make a real difference between keeping jobs and service in rural America and letting go thousands of workers. The suffering of rural Missouri families, farmers, and truckers is why we are fighting so hard to lower gas prices. We are fighting to open new supplies of oil needed to get prices down. Real action to lower gas prices is the most important thing we can do to help rural America and rural Missouri. Fighting for real action to lower gas prices is the most important thing I could do to help rural Missouri. I have amendments to force gas prices down by opening new offshore oil reserves waiting for us. I filed an amendment to lower gas prices by opening access to the 18 billion barrels of oil waiting for us off America's Atlantic and Pacific coasts. These reserves could supply America with 10 years of additional oil supplies, if we would only allow ourselves to use them to change a 30-year policy the Democrats have imposed, that Senator OBAMA continues to champion, of no drilling, no refineries, no nuclear power. The decision to open our offshore oil reserves would immediately cause the price of oil to fall.

We know that because this happened earlier this month, when President Bush reversed the Executive ban and brought the price of oil immediately down $10 and, now, $20 a barrel. Nothing hurts speculators bidding up the price of oil more than news of additional oil supplies coming in the future. Congress must do our part to lower gas prices even further by opening new offshore reserves. However, the Democratic Party is blocking the Senate from considering my amendment to tap offshore oil reserves, even as I speak. I also cosponsored an amendment with several Senate colleagues to tap offshore oil reserves in the eastern Gulf of Mexico. There are almost 3 billion barrels of oil in the eastern gulf waiting to help bring gas prices down for rural Missouri. Unfortunately, the Democratic leadership is also blocking consideration of this amendment.

I also agree we must help America use less oil. I have an amendment that would relieve the pressure on gas prices by increasing conservation. My amendment would aggressively promote advanced vehicle batteries and their production in the United States for hybrid, plug-in hybrid, and electric vehicles. My amendment would provide new funds for hybrid battery research and development, battery manufacturing equipment and capabilities, and re-equipping, expanding or establishing U.S. domestic manufacturing facilities for hybrid vehicle batteries. U.S. domestic mass production of hybrid batteries would get battery prices down, getting the hybrid vehicle prices down. But most importantly, it would give our auto companies access to the batteries we need. Right now many of the batteries have to be brought in from Asia. As the demand for more batteries goes up in Asia, I can assure my colleagues that American auto companies will not necessarily be first in line to get that production. We need to put American workers to work building the batteries, the advanced batteries that will go into the electric cars, the plug-ins, and the hybrid plug-ins. This would not only conserve oil. It would give jobs to blue-collar manufacturing workers and help the environment. It is going to be good for Missouri when we do it. The question is when.

Missouri is a national leader in hybrid car production, in batteries, and advanced vehicle batteries. We make traditional batteries across the State because we are the leader in lead. We mine a lot of lead in Missouri. When you are talking about environmental dangers, yes, lead has some dangers to it. There is only one simple reason we mine lead in Missouri, and that is because we have 90 percent of it in the United States. When people tell me they don't want to drill for natural gas because they don't like the sight of natural gas wells, but they have the natural gas, I say: If you will trade us your natural gas for our lead, I would be happy to let them drill in my backyard.

But Missouri, with all the battery specialists, the technical workers we have, the scientists, is on the cutting edge of battery technology, with firms developing safer, stronger lithium ion batteries. We are also home to a hybrid SUV assembly plant in Kansas City. This success does not have to be limited to Missouri. Communities across America can share in the drive to establish a domestic manufacturing supply base for mass hybrid car construction.

Rural communities, especially, can benefit from the good-paying manufacturing jobs that U.S. mass battery production would provide. Rural school districts would benefit from new tax revenues. Rural police and firefighters would benefit. Unfortunately, as I said, Democrats are blocking Senate consideration.

Now, what answers do my colleagues on the other side of the aisle have for rural America? Well they propose making things worse by suing oil-producing countries.

Folks back home in my part of rural Missouri may not know much about antitrust laws—most folks don't—but anyone with common sense would know, if you sue someone, they would likely take what they have and sell it to somebody else.

I guess this was an idea cooked up by trial lawyers who are eager to sue anybody they can. As you might imagine, there are not too many trial lawyers in rural Missouri.

Democrats also proposed raiding our emergency oil supplies in the Strategic Petroleum Reserve. Putting aside the fact that these emergency reserves are only meant to be used in times supply is cut off, such as during a war, this plan would only produce 3½ days of additional oil.

So while Republicans are offering rural America 10 years of additional oil

supplies, Democrats think rural America should get by on only 3½ days of extra supplies. This lack of sympathy for taking real action may be based on the fact that a lot of Democrats are fine with higher oil prices.

After all, the Democratic nominee for President, Senator OBAMA, said the problem was not that gas prices were so high, the problem was merely that gas prices had risen so quickly. That is akin to telling people it is OK to drown as long as the water rises slowly.

Today, in Springfield, MO, the Democratic nominee suggested we all make sure we properly inflate our tires. Big deal. I believe in all tires being fully inflated. But, frankly, that is the kind of hot air—this hot air being into tires—that we have been hearing too much of on this floor.

Rural Missouri is suffering record pain at the pump, and the best thing he can come up with is more hot air—this time for our tires. Rural Missouri deserves more than the hot air from the Illinois Senator.

Senator MCCAIN has come out very clearly and strongly in support of drilling, of exploring, of developing nuclear power.

We tried last year. Congress passed the largest increase in auto fuel efficiency requirements in a generation to bring down gas usage. Well, that did nothing to prevent record-high prices. That is because it will take years before more fuel-efficient cars are required. The Democratic candidate for President must want us to suffer through record-high gas prices until those conservation measures kick in.

I support increasing conservation, but we must not force a prescription of pain on America while we wait years for these conservation measures to kick in.

The Democratic candidate for President has suggested another stimulus package to help drivers through this price crisis. I am sure Missouri rural families would be happy to receive a few hundred dollars more in stimulus relief. But what they want is not to get a check from the Government—after the handful of tanks of gasoline that money could buy is spent—they want to bring down the price. They will be right back where they are, paying the full price of record-high gas prices, and we will do nothing but increase our deficit.

Rural Missouri and America deserve more than a prescription of pain to address the gas price crisis. We deserve more than half measures that will only produce a few days or months more of additional supplies. Rural Missouri deserves more than a Senate attempting to abandon them and this gas price crisis by moving on to other issues.

Rural Missouri and the people of America deserve real action now to lower gas prices. That means new offshore oil supplies to get prices down, new offshore oil supplies for Missouri families, new offshore oil supplies for Missouri farmers, and new offshore oil supplies for Missouri truckers. That is our only real hope for real gas price relief.

I urge my Senate colleagues to let us act on it and act now.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from Montana is recognized.

MONTANA NATIONAL GUARD

Mr. TESTER. Mr. President, I wish to begin by noting that, again, it is fire season in Montana.

Right now, major wildfires are threatening homes in a small town called Red Lodge. The Cascade fire has been burning and has burned about 6,000 acres. It is burning uncomfortably close to the Red Lodge Mountain ski area.

The hot, dry weather forecast over the next week means there are likely to be more fires and more acres of rangeland and forest lost.

Fire season in Montana officially runs from August until the first snow in fall. So, once again, we are off to an early start.

Wildfires are becoming a fact of the West. We accept it. We deal with it.

The good news is Montana is blessed with outstanding firefighters from the U.S. Forest Service, Tribal Nations, and the State Department of Natural Resources, as well as first responders from local volunteer and paid fire departments.

When they need reinforcements, they turn to the Montana National Guard. Last year, more than 200 guardsmen were mobilized to help fight wildfires in Montana. While no guardsmen have been mobilized yet this year, it will happen at some point—just as they are mobilized every year to protect people and homes, dig out fire lines, smother embers, and provide all manner of hands-on support to this team effort.

There are not too many jobs in this country where the work is as varied as service in our National Guard. This summer we can expect that hundreds of National Guardsmen in Montana and throughout the West will be mobilized to help fight wildfires. It has already happened in California, where the Governor called up 200 Guardsmen.

This is a vital role in our Nation's homeland security.

And just as the Guard answers the call for homeland security missions, they answer the bell when it comes to national security.

In 2004 and 2005, more than 1,500 of my State's National Guard deployed to Iraq. They did yeoman's work over there, and we can all be very proud of their service and grateful for it as well. Today, there are nearly 23,000 National Guardsmen serving in Iraq and Afghanistan.

Another 3,000 Guardsmen from all over the country work hard to protect our southern border, helping the Border Patrol get a better handle on securing that border. Four hundred Montana Guardsmen were a proud part of that important effort earlier this year.

So as the National Guard in Montana prepares for the inevitable mobilization fight against wildfires here at home, I think it is appropriate we stop to thank the 3,500-strong members of our Montana National Guard for what they do both abroad and here at home.

As wildfires continue to threaten Montana's countryside and our communities, I wish to pay tribute to all the brave men and women who put it on the line to fight our fires.

ENERGY

Mr. President, I wish to comment on the energy debate we have been having in the Senate. Every Tuesday morning, for 2½ hours, I get to preside over this great body, and I get to hear folks from both sides of the aisle talk about issues of importance.

The energy debate has been particularly intriguing because I have seen folks on the other side of the aisle hold up signs that talk about drilling more and using less.

They are quick to support oil production. But on the other hand, they will not support alternative energies or conservation methods. They talk about drilling more as if it is going to change the price of gasoline tomorrow.

The fact is, the United States has less than 3 percent of the world's reserves of oil. We use 25 percent of the supply. As far as drilling goes, we are drilling now like there is no tomorrow. In fact, in Montana, you would be hard-pressed to find a drilling rig if you wanted to punch a hole.

In Montana, we have offered over 3 million acres of leasing since 2000. We have increased our oil production two and a half-fold. We have drilled 4,870 wells in the last 5 years. Yet we continually see the price of oil go up and up and up. Why? Well, a lot of it has to do with the fact that the major oil companies last year made hundreds of billions of dollars off the consumers' back.

What can we do? What can we do to help bring the price of oil down? Sure, we are going to continue to drill, and I support that effort. But we need additions to our energy portfolio. If we continue to rely on oil as our chief supplier of energy, we are going to be continuing to be beholden to Saudi Arabia and OPEC forever. That ought not be the direction we go.

My good friend, my comrade, Senator BAUCUS, put forth a tax extenders bill earlier today. Yesterday, we had a chance to vote on one from the House. They were both defeated. They were not allowed to move forward. There was a majority, but there was not 60 votes.

What was in that tax extenders bill? One of the things that was in it was a renewable energy tax credit extension, a continuation that would put more energy in the marketplace.

As shown on this chart, we can see what happens when we have the wind energy tax credit. The yellow bars indicate that. The orange bars indicate when it does not happen. If we have the wind energy tax credit, wind energy production goes up, and there is more

energy in the marketplace. When we don't, it does not.

Because of the vote that was taken earlier today, you will see a decrease in wind energy production—a big mistake for this country, not very visionary.

Because of the vote that took place earlier today, we not only will see wind energy grind to a halt, we will see geothermal—which we have a tremendous opportunity for throughout the country, particularly in Montana—we will see biomass, landfill gas—we have an electrical cooperative in northwestern Montana, Flathead Electric Cooperative, that is talking about capturing methane gas off the landfill to produce energy, getting something from nothing—we will not see any of that stuff go on because of the defeat of the tax extenders bill.

In that tax extenders bill, there were also long-term extensions of tax credits for solar energy and fuel cells. Solar energy: getting our energy from the Sun to help replace some of that oil from the Middle East—not going to happen. Folks talk about corn ethanol and how they don't like it. I am not one of them. But I do think we need to get the second generation of ethanol production, cellulosic ethanol. There was a credit for property in that tax extenders bill that was not agreed to earlier today. That will not happen; a biodiesel tax credit. I have talked about a camelina provision in the farm bill for biodiesel, and there are other opportunities in all sorts of oilseeds out there. The biodiesel tax credit does not happen because we did not pass that bill Senator BAUCUS offered earlier today.

Carbon capture and storage technology to make our coal burn cleaner. In Montana, we are the ''Saudi Arabia'' of coal. We have an incredible opportunity. But without good technology to capture carbon and store it, we will never be all we can be. It would make us more energy independent.

Talk about producing more here at home: Drilling is part of the equation. But an even bigger part of the equation could have been to pass that tax extenders bill earlier today.

Let's talk about using less.

In that tax extenders bill, there were energy efficiency tax credits to help make our homes more energy efficient. It is not going to happen. There was a credit to reduce idling for truckers—that we all see happen—to save transportation fuel. It is not going to happen.

You want to talk about using less? There was a bicycling tax credit for those folks who want to ride their bicycle to work rather than to drive. It will not happen.

There were incentives for geothermal heat pumps in our homes that use less energy with more consistency. It is not going to happen.

There were energy conservation bonds for States and local school districts. The list goes on and on and on.

I ask myself: Why? Why does it have to be this way? Why aren't we looking to the future? Why are we not talking about more than drilling? The fact is, we are drilling. We are drilling an incredible amount of land in this country. It needs to be a bridge. But it needs to be a bridge to somewhere this time. If we put forth the renewable energy components that are in the tax extenders bill, we will have a future. We will have a future of affordable energy.

I ask my comrades to pass that tax extenders bill. It is incredibly important. It is not just because of energy that it is important.

SECURE RURAL SCHOOLS

Finally, I wish to talk about the security of rural schools. These are payments to Montana's rural communities and forested counties that have an incredible amount of public lands.

The Secure Rural Schools dollars are important not only for the school but also for our roads and our rural counties. Montana is rich in public lands. Consequently, it puts more pressure on property taxes of private property in those counties. With the Secure Rural Schools money, it gives those rural and forested counties the opportunity to meet the needs of the kids in these rural districts and to meet the needs of the transportation industry in those rural districts. We all know that less money for rural schools means lower teacher pay, bigger classroom size, fewer activities, and students start to fall behind.

County road workers right now are being laid off. I spoke with the head of the Montana Association of Counties. He said to the counties: Take your budgets and utilize them as if this money is not going to happen because it is not until we pass the tax extenders programs.

We had the opportunity in this body today and yesterday to pass a good bill that meets the needs of America's families, small businesses, and the economy. It was not passed. There are all sorts of excuses for it, but they are simply that: excuses. We need to move forward with some proactive thinking in this body. I hope the next time this bill hits this floor, it is passed and passed by a large margin.

I thank the Chair.

I yield the floor.

The PRESIDING OFFICER (Mr. CARDIN). The Senator from North Dakota.

Mr. DORGAN. Mr. President, I ask unanimous consent to be recognized following the presentation by the Senator from Minnesota.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. KLOBUCHAR. Mr. President, I come to the floor today with much dismay over the fact that we were not able to pass the energy extenders, the tax extenders, the package of important provisions for our country's economy because of this obstructionism on the other side.

Let me tell my colleagues why this was so important to me. We only got four Republican votes for this package. I think it is outrageous when you look at what we are dealing with. This week we are going to be memorializing the tragic, tragic, tragic fall of the bridge in the middle of Minnesota. I am going to speak to that tomorrow and do a fitting tribute, along with Senator COLEMAN, to the victims of that bridge collapse and to the first responders who saved so many lives, and to the reconstruction work that has gone on thanks to the help of this Senate. I live six blocks from that bridge, so it means a lot to me.

I said the week the bridge fell down that in America, a bridge shouldn't fall down in the middle of the Mississippi River, especially not on an eight-lane highway, especially not on one of the most heavily traveled bridges in the State, especially not at rush hour in the heart of a major metropolitan area. Unfortunately, however, it took that disaster to put the issue of infrastructure funding squarely on the national agenda, and it is long overdue. That is why I was so disappointed that in this important bill was $8 billion to replenish the highway trust fund of this country, to replenish that fund. Mr. President, 400,000 jobs in this country are at stake in that bill that was voted down by the other side.

Look what is happening in this country with our infrastructure. Let's take the issue of bridges. Nationwide, bridges are deteriorating far faster than we can repair or replace them. About 78,000 bridges across the Nation are structurally deficient. What does structurally deficient mean? When inspectors evaluate a bridge, they examine the bridge's deck, superstructure, and substructure. Each of these components is ranked on a scale of 0 to 9, with 0 being failed and 9 being excellent. If the deck, superstructure, or substructure is given a 4 or less, the bridge is classified as structurally deficient.

In June of 2006, the I–35W bridge's superstructure—meaning the physical conditions of all structural members—was rated at a 4. The bridge's deck was rated at a 5, and the substructure, comprised of the piers, the footings, and other components, was rated as a 6. A bridge is shut down if any of its parts are rated at a 2.

Then we have another 80,000 bridges across the Nation which are functionally obsolete. What does functionally obsolete mean? That means they don't meet today's design standards, they don't conform to today's safety standards, and they are handling traffic far beyond their design. Fully one-quarter of America's 600,000 bridges have aged so much that their physical condition or their ability to withstand current traffic levels is simply inadequate. These bridges require immediate attention.

I can tell you since our bridge fell on that summer day on August 1, we have had a number of bridges shut down, close down in our State, including one

that handled a lot of traffic in St. Cloud, MN. There was one in Winona, MN, that was actually on the Federal stamp from our State that was temporarily closed down and is going to have to be rebuilt.

We are seeing this across the country. We are seeing a need for infrastructure funding. At a time when our economy is facing such difficult times, I see this as an investment, not only in the long-term viability for our country's transportation system but also in jobs. That is why I am so disappointed that the other side was willing to turn their backs on 400,000 existing jobs, much less add new ones, by turning down that $8 billion replenishment of the highway trust fund.

It was President Kennedy who once said that building a road or highway isn't pretty, but it is something our economy needs to have. I can tell you beyond the bridges in metropolitan areas, nowhere is that truer than in rural America. We are seeing a rejuvenation because of the energy economy right now in rural Minnesota as we are in so much of rural America. Senator TESTER from Montana talked about this. We are seeing biofuels, whether it is biodiesel, ethanol, moving to cellulosic ethanol; whether it is wind or solar. We are third in the country in Minnesota with wind energy—third in the country.

I have seen jobs such as in Starbuck, MN, where a group of 10 people decided to quit their jobs and go work for a solar panel factory. They were so proud of their work they had me jump up and down on those solar panels to show that they can withstand hail damage, and they did.

I can tell you this: We are seeing these jobs and we need courage in Washington that matches the courage of these employees in Starbuck, MN, or in Pipestone—the courage of these employees who are willing to see a better energy future, while this body on the other side is willing to shoot it down by shooting down those tax extenders for energy. This is the wave of the future. This is the way we are going to be investing in homegrown energy and in the farmers and the workers of the Midwest instead of the oil cartels in the Mideast.

So it is about the energy extenders for me in my State and across the country, but it is also about the transportation funding that came in replenishing that highway trust fund. When you start building this energy economy, with the wind turbines and with the biofuels in the trucks going across these roads, you are going to put more stress on the roads and the rail in rural America. If we are going to move to the next century's economic system, we can't be stuck in the last century's transportation system.

I will give some examples. The ethanol plant in Bentsen, MN, now has over 525 fully loaded semis hauling the ethanol from their plant every week. This is a 45-million gallon facility. Their production falls about in the middle of our biodiesel facilities in Minnesota.

SMI Hydraulics is a company in rural southwestern Minnesota that manufactures the bases for the wind towers you see all across our country. This is a company that started as a barn. The wind towers they manufacture actually come out of the side of the barn as they are employing dozens of people right in this little town. The heavy trucks that bring the steel to the company put a heavy burden on the road as they travel and are putting durability to a test. This truck travel and the need for more rail travel is part of our transportation future, but when the other side shoots down our ability to even replenish the highway trust fund, we are not going to be moving in the right direction for our economy. We are not going to help these rural people to develop the true energy economy they need to develop.

In his 1963 ''Memoir for Change,'' President Eisenhower famously said:

> More than any single action by the government since the end of the war, this one would change the face of America.

He was talking about the interstate highway system. Its impact on the American economy, the jobs it would produce in manufacturing and construction, the rural areas it would open up were beyond calculation. Well, he was right. Just as he was right back in 1963, we know he is still right in 2008. So the gall to turn down the replenishment of that highway trust fund and to stop America as we try to head to the new energy future—other countries are leapfrogging us because they have government policies in place that mandate these green jobs and move in the right direction—is plain wrong.

The one last thing I wish to say is there is one way—as we look to jumpstarting the economy right now, as we look at solving our oil crisis and our dependency on foreign oil and our spending of $600,000 a minute on foreign oil—and that is the President. He doesn't need the Congress. He can complain about Congress all he wants, but the President of the United States can actually release barrels of oil from the Strategic Petroleum Reserve. He can do it right now. He could do it in the next hour. We can look at what has happened in the past: 1990 to 1991, 11 million barrels were released; 1996 to 1997, 28 million barrels were released to reduce the Federal debt. In 2005, 21 million barrels were released after Katrina. We can look at how full the petroleum reserve has been. In 1993, 79 percent full; in 2001, it was 74 percent full. Well, right now, in 2008, it is 97 percent full. So this President, on his own, could simply release the barrels of oil from that Strategic Petroleum Reserve.

We are the home of Northwest Airlines in Minnesota. The CEO there, Doug Steenland, has spoken with me many times. Tens of thousands of customers have sent e-mails saying we want to stop this speculation and we want to do something about helping Americans and helping these companies with oil prices. One way to do this immediately is to release some of the barrels of oil, 97 percent full, from that Strategic Petroleum Reserve. If you even go down to 90 percent, you could inject $6 billion into the American economy and help to bring those oil prices down. This is up to the President. He could do it with one signature on one document. He doesn't need us passing a bill to have to deal with these guys and their filibuster. He could do it himself.

So in addition to passing these tax extenders, to getting our green energy economy going and doing something about that highway trust fund so another bridge doesn't fall down in the middle of America, this President, himself, without even one vote from Congress, could release barrels of oil into the American economy and help not only customers but also help the businesses in this country who are finding it harder and harder to compete as we see the price of oil escalate.

Thank you very much, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WEBB. I ask unanimous consent to speak for 5 minutes as in morning business.

The PRESIDING OFFICER. The Senator has that right.

REMEMBERING FREDDIE HUTCHINS

Mr. WEBB. Mr. President, I rise today to extend my condolences to the family and friends of Mr. Freddie Hutchins who passed away suddenly yesterday, on July 29. Freddie served on my staff since my election. He managed my Roanoke Senate office. He was a tremendous individual with a great deal of promise. I had selected him from a number of very talented people down in southwest Virginia to run this office. He passed away, as I said, suddenly only at the age of 26.

Freddie was a product of southwest Virginia. He grew up in Botetourt County. He was very heavily influenced by his grandfather, who was a very active Democrat and railroad man, a union man down in southwest Virginia. He was known for having made himself a business card at the age of 13 saying Freddie Hutchins, Democrat. He loved the rich culture of southwest Virginia.

He represented the values that characterize that region. He loved his country. He had a great sense of service and a determination to work hard. He developed a very early interest in politics. He was a C–SPAN enthusiast at a young age. Before joining my office, he had worked for State Delegate Onzlee Ware as a legislative aide and had been active in a number of political campaigns.

He was a tireless and vocal advocate for working people in this country. He was committed to social justice and was someone who was always eager and enthusiastic to help people.

He was one of the most honorable and friendly individuals I have ever had the pleasure of knowing. He was a mainstay in that community and had a very bright future. I had always assumed that Freddie Hutchins would be running for elective office in the near future. He was a friend to all who knew him.

Again, I express my condolences to his mother Karen and the rest of his family and all of those whom he had reached out and done so much with and for over the years. He will be greatly missed.

With that, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. What is the status of the floor?

The PRESIDING OFFICER. There is 4 minutes 40 seconds remaining for the majority in this block of time.

Mr. REID. For how long?

The PRESIDING OFFICER. The time is alternating 30 minutes between the majority and the Republicans.

Mr. REID. I am going to use leader time now, and I ask unanimous consent that the Democrats' 4 minutes be preserved.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader is recognized.

Mr. REID. Mr. President, we over here, the mighty band of Democrats, with the majority of 1—there are 51 of us and 49 of them—trying so hard to do something on energy. We have been trying for months now. I think we have done some things that would be good for the American people but for the fact that the Republicans have basically objected to everything we have tried to do.

What have we tried to do? We introduced S. 3044, called the Consumer-First Energy Act. It has some tremendously powerful things in it that relate to what the American people's problem is today: high gas prices.

In that legislation, we talk about price gouging. Do we have any reason to have in a provision of law an element that we can go after companies that price gouge? Of course. The oil companies, during the Bush years, have had net profits of $609 billion. So our price-gouging provision was, we thought, very key in doing something about energy.

In S. 3044, we had something dealing with the oil subsidies the oil companies have received, that perhaps they should be cut back. They are making these huge profits. In this bill, we had a provision that was bipartisan and has been pushed by Senator KOHL of Wisconsin and Senator SPECTER of Pennsylvania—NOPEC is what it was called. It was a proposal to have the OPEC cartel be subject to the Sherman Antitrust Act. That seems reasonable, since these countries have the absolute ability to so easily lock in prices and determine what prices are going to be charged around the world. Senators KOHL and SPECTER thought this was good legislation, and so did we. That is why we put it in our legislation.

We also had a provision in our legislation dealing with speculation. I will talk about that later. We not only had it in S. 3044, we had freestanding legislation dealing with speculation.

We also had in S. 3044 something dealing with a windfall profits tax, which should be part of the law of our country today. The American consumer agrees with that.

Mr. President, Senator BINGAMAN also prepared legislation, which has now been filed at the desk. It is very good legislation. We were asking for help from the Republicans and got none. Senator BINGAMAN is one of the most astute, hard-working, creative, and smartest Senators we have ever had in this body. In that legislation, S. 5135, we had some really good things. It wasn't ''take it or leave it'' legislation. With the 68 million acres the oil companies have, it called for due diligence. It said: With the 68 million acres you have, let's find out what you are doing with it, why you are not drilling in some parts of it, and report to the Interior Department and find out what is going on with that land. It is typical of Senator BINGAMAN because it was well thought out. Rather than the provision that some were talking about—use it or lose it—Senator BINGAMAN believed that was appropriate, and that is why he went through the trouble of coming up with this legislation.

He also had something in the bill that would be important which deals with building codes, making it so that in the future, when things are built, when construction takes place, it deals with the environment. There is so much that can be done to save huge amounts of electricity if we had buildings built properly.

We also had a provision on which the Senator from Minnesota spoke so eloquently which said that we want you to take the great resource we have—the more than 700 million barrels of oil we have in our Strategic Petroleum Reserve—and we want you to announce to the world that we are going to start using some of that. We are going to start using that to bring down the price of oil. We know it works. We know it works because the President's father did it, and it brought down the price of oil. We have asked that this be done on other occasions, but we put it in this legislation Senator BINGAMAN came up with.

The airlines tell us it is important to bring down the prices. The airline companies need to have oil, for these companies to be able to succeed, at about $100 a barrel. That is high, but they could succeed with that. Anything over that is a tremendous losing proposition for them. This would bring the price of oil down to at or near that price. But we got no suggestions from the Republicans that they cared about this.

Also, I thought what Senator BINGAMAN did was very important. He said there is about 25 million acres of land that is available now to be leased for oil exploration. All the administration has to do is tell the Interior Department to issue leases on it. It has already been determined that it has tremendous oil potential. Much of it is on-and offshore in Alaska. It would add another 25 million acres to the 68 million acres the oil companies already have.

There were other provisions in the Bingaman bill—good pieces of legislation. Again, we had no takers on that from the Republicans.

Today, we voted on H.R. 6049, and, of course, that was defeated because of another cloture motion that was necessary to be filed because of a Republican filibuster. The same with the Warm in Winter and Cool in Summer Act, S. 3186, LIHEAP. It was filibustered, and we weren't able to proceed to that. That is really unusually harsh. I have heard the Senator from Vermont talk about that on numerous occasions. I told him that more people die from exposure in the summer than in the winter because they become dehydrated. We need to have the ability for the old, disabled, and poor to have air-conditioning. In the winter, of course, they need heat. But this was rejected by the Republicans.

We asked—because it was certainly bipartisan every step of the way, the NOPEC bill, the Specter-Kohl bill—that we move to that alone. That was S. 879. It was rejected. Again, the Republicans refused to let us do that.

We had the Stop Excessive Energy Speculation Act, which we have dealt with for several weeks now. I spoke the night before last to the President of United Airlines. He said he has no question in his mind that one reason the oil prices have gone down by the barrel in recent days is because we are debating and talking about speculation. This would work. The Republicans have been listening to the monied interests of this country and have refused to allow us to do this.

Then, of course, today, we had the issue of the so-called extenders bill on which Senator BAUCUS worked so hard. It was rejected. It had many good provisions in it. He worked hard to try to get bipartisan support. There was disaster relief in it. There was finally something in there that we could pass to do the mental health parity, which is so long overdue. We had a provision to reestablish money that has been taken out of the highway trust fund, which is so important—to reestablish that. People are losing their jobs.

The most significant thing, from my perspective, in that legislation—even though there was much more—was that it would do something now, today, about taking care of the energy crisis in this country. It is not Al Gore, former Vice President of the United States, talking; it is T. Boone Pickens—from a different political party and persuasion than Al Gore—saying we have to move to renewables. That is what this legislation is all about, creating hundreds of thousands of jobs,

construction jobs and other jobs, that lessen our dependence on foreign oil. As T. Boone Pickens said, ''You can't drill your way out of this crisis.'' We were blocked on that.

Mr. President, in the newspapers all over America and in other parts of the world, Thomas Friedman's column is running today. He is a person who has won all kinds of prizes around the world for his writing. He has had three bestselling books. For weeks, his books have been No. 1 on the New York Times bestseller list. He writes with great preciseness, and he is right to the point. Here is what he said today:

Republicans have become so obsessed with the notion that we can drill our way out of our current energy crisis that reopening our coastal waters to offshore drilling has become their answer for every energy question.

Anyone who looks at the growth of middle classes around the world and their rising demands for natural resources, plus the dangers of climate change driven by our addiction to fossil fuels, can see the clean renewable energy—wind, solar, nuclear and stuff we haven't yet invented—is going to be the next great global industry. It has to be if we are going to grow in a stable way.

Therefore, the country that most owns the clean power industry is going to most own the next great technology breakthrough—the E.T. revolution, the energy technology revolution—and create millions of jobs and thousands of new businesses, just like the I.T. revolution did.

Republicans, by mindlessly repeating their offshore-drilling mantra, focusing on a 19th-century fuel, remind me of someone back in 1980 arguing we should be putting all our money into making more and cheaper IBM Selectric typewriters—and forget about these things called the ''PC'' and ''the Internet.'' It is a strategy for making America a second-rate power and economy.

Mr. President, earlier this week, on Monday, I offered the Republicans, on the speculation bill, four amendments, and we would have a like number. That was rejected out of hand—offer made and they rejected it.

Yesterday, right after the Senate opened, Senator MCCONNELL said to me: How about six amendments?

I said: I am happy to discuss amendments, but I am through discussing amendments unless we pass the extenders bill.

That was clear language. I said it directly, and I meant it. I am speaking for 50 other Democratic Senators. I am speaking for my caucus.

So Senator MCCONNELL said: Well, fine, we will have Senator BAUCUS, chairman of the Finance Committee, and Senator GRASSLEY, the ranking member, work on this.

I said that Senator BAUCUS said Senator GRASSLEY has no authority to do anything.

He said: Yes, he does. I will instruct him that he has all the authority in the world.

They met for 2 hours last night. The only thing Senator GRASSLEY wanted to discuss was having all of these extenders not paid for. So we are right back where we started. So that is gone. That was turned down overwhelmingly. The Republicans didn't support the extenders. So that is where we are.

My caucus demands that we focus on something to really make a difference: renewables, creating hundreds of thousands of jobs—Friedman said millions; I am saying hundreds of thousands within the next few months. It will make a cleaner environment, and it will be good for the economy.

Mr. President, that is where it is. That is where it is.

Again, as Thomas Friedman wrote:

Republicans, by mindlessly repeating their offshore-drilling mantra, focusing on a 19th century fuel, remind me of someone back in 1980 arguing that we should be putting all our money into making more and cheaper IBM Selectric typewriters—and forget about these things called the ''PC'' and ''the Internet.'' It is a strategy for making America a second-rate power and economy.

Mr. DURBIN. Mr. President, will the Senator yield for a question?

Mr. REID. Yes.

Mr. DURBIN. I wish to address a question to the majority leader through the Chair. I ask the Senator whether yesterday we brought to the floor an opportunity for the Republicans to join us in a bipartisan way to come up with a clear package of incentives for renewable energy, energy that we need now and for future generations, and yesterday when that measure came to the floor as it originally passed the House of Representatives, I ask the majority leader what the support level was on the Democratic side and whether there were more than four Republican Senators who joined us in that effort.

Mr. REID. All Democrats supported it, a handful of Republicans, mostly those who are in very difficult Senate races, I might add, for reelection.

Mr. DURBIN. That is one of the reoccurring themes. When four or five Republicans join us, it is because many of them are facing a tough reelection.

I ask the Senator from Nevada, today when we brought this measure before the Senate again, incentives for renewable energy, we included in it $8 billion for the highway trust fund, which can be attributed to 400,000 good-paying American jobs. We also included the mental health parity bill, which has been a bipartisan bill that has been sought by this Senate for maybe a decade. It has certainly been a long time. We included as well an extension of the exemption for the alternative minimum tax so middle-income families would not face higher taxes.

I ask the Senator from Nevada what kind of support we had from the Republican side of the aisle. If I am not mistaken, only five Republicans, four of whom are up for reelection in November, joined us in that vote.

Mr. REID. The Senator is absolutely right, absolutely right. I can't express how the Republican Party, as I have always known it—when I went into politics, I had the idea that the Republicans were the party of fiscal responsibility. That has long since gone. We are going to have a deficit this year of about a half trillion dollars, and that isn't a fair view of it because they are using the Social Security trust fund to offset and make the deficit look even smaller.

But I also will say this: Big oil during the Bush years has made a $609 billion profit—$609 billion. The Republicans side with big oil every step of the way. They have done it in all this energy legislation. They are beholden to big oil. Everyone knows that. I think it is time we start talking about something that will help; that is, we need to move to have energy created by the Sun, wind, geothermal, and we need to do it as quickly as possible.

That is where we are. I have said on a number of occasions—I said it earlier today—there was a lot of activity on the Senate floor—understand, Mr. President, where we are. Because the Republicans have blocked everything—they have blocked energy for old people, sick people, disabled people; they have blocked everything we have tried to do here—we have a decision. They can make the decision. We have been fortunate enough to finish the Higher Education Act. We have been fortunate to finish consumer product safety. Both conference reports are finished. We can do those in the next couple of days. We can move to the Defense authorization bill. It is up to the Republicans what they want to do. But if they want to be here during August, more power to them because we will be here with them. We all have things to do, longstanding obligations during August, but those can be changed. If people want to debate during August the Defense Authorization Act, that is fine. They can go out and hold their press conferences that they would rather be doing something on drilling, drilling, drilling. They can continue to do that, or we can come back in September—there is going to be a bipartisan summit on energy prices, and maybe by the August recess, maybe some of my friends will be more willing to do some actual compromise.

Legislation is the art of compromise. If the art of compromise is not present, we cannot get the business done. There simply has been no compromise from my friends. That is why we have faced almost 90 filibusters.

The PRESIDING OFFICER (Mr. WEBB). The Senator from Colorado is recognized.

Mr. ALLARD. Mr. President, I am joined on the Senate floor by my colleague from Wyoming. I ask unanimous consent that we may engage in a colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COST OF ENERGY

Mr. ALLARD. Mr. President, I had an opportunity to speak on the floor this past week a number of times and speak in committee about the cost of energy, about pain at the pump. I am of the view that we need to act now.

My position on energy has always been that we should not take anything off the table; that is, we need renewable energy, we need to have energy

from whatever source we can derive—oil and gas, nuclear energy. We need to concentrate on our efforts to try to produce more energy. We need more. That is not the entire solution. We also need to consume less. We need to encourage conservation everywhere we can.

That is why I have signed onto bills such as the Gas Price Reduction Act of 2008. This bill says we begin to open deep sea exploration, where we go out more than 50 miles from the coast, and that we begin to drill in those areas and share the revenues with the States that are involved. Under our proposal the Governor petitions to allow exploration, and he does that with the concurrence of the State legislature. A portion of funds generated would even go to the Land and Water Conservation Fund in addition to States, with other funds going to the general fund.

Also, in the particular legislation I mentioned, we talk about Western State oil shale exploration. This resource would provide more than three times the oil reserves of Saudi Arabia, this oil shale is found in Wyoming, Utah, and Colorado.

The legislation I have signed onto says we also look at ways of trying to create conservation, such as electric cars and trucks, and focus our attention on better batteries so we can create an electrical supplement to the use of liquid fuel, whether it is a truck or car, and create some efficiencies on the highway. In the case of cars, as much as 60, 70 miles to the gallon with an augmentation from an electrical source. For these efficiencies to happen batteries are a key technological advancement that has to occur, and it has to occur at a price that consumers can afford. In this bill, we put our efforts into coming up with that type of a battery.

In addition, we try to do what we can to strengthen U.S. futures markets. That means increased funding for staff to the Commodity Futures Trading Commission, and it directs the present working group to study the international regulation of commodity markets. Remember, on commodity markets, it is not just an American market, it is international. We have to be careful how we disrupt the markets as we do that. If we are not careful we can create a real disadvantage to Americans and not really help in the supply of energy.

These are the types of actions that will make a difference in the price of oil and gas because we increase the supply. That is our problem; we don't have enough to meet worldwide demand. Because of high global demand we need to work not only in this country but also in other countries to spread the idea of conservation.

I have to tell you, Mr. President, the suggestion from the majority leader that somehow if we just stand on the floor of the Senate and talk about more rules and regulations on the commodity markets, somehow that is going to bring down the price of gas, I happen to think that just talking doesn't bring about action. But I do happen to believe that action does create a reduction in the price of oil at the gas pump.

I credit most of the recent price reduction to the President because he actually took action, which was to take the moratorium off the Outer Continental Shelf. This took us closer to allowing for exploration for more energy sources out in the deep ocean. Because of that, the markets did respond. I don't believe it was the debate on the Senate floor where we just talked, because the markets looked and said the President took real action to repeal a regulation, making it easier for us to extract energy out of the ground.

That is the kind of action in which this Congress needs to participate. It is action that needs to happen now, not 30 days from now, not a week, not a day. The sooner we act, the better it is because people every day are feeling the impact on their daily lives of high energy costs.

I recently participated in a press conference where we had people who are involved with supportive programs for the poor. They said because of the high cost of food, it is making it difficult for them to meet their goals and objectives and to keep their budgets within what they allocated at the first of the year. They are having all sorts of supply issues when it comes to feeding the poor and the disadvantaged in this country. We heard from all aspects of the various agencies and religious groups that make it part of their mission to provide for the hungry in this country.

We heard from truckdrivers today. I was at a press conference where we heard from truckers. When you think about it, renewable energy obviously works pretty good if you are talking about power lines. What kind of renewable source do they use in trucks? Ethanol, perhaps, might have some uses for trucks, but basically they are locked in with one source of energy right and that is diesel.

The only way we are going to bring down the price of fuels to the truckers who provide medical supplies, who provide food to Americans—they transport all sorts of produce around the country. They haul around all sorts of manufacturing. They deliver our mail. I am trying to think of one commodity that at some point in time does not spend some time on a truck. It is very important that we keep the total prospect. There is not a simple solution. It is not a one-issue solution where we can say: We are just going to focus on renewable energy and the heck with everything else. We need to look at all alternatives. We are having supply problems. We can't take anything off the table. That is what I want to comment on.

I have on the floor with me a Senator from Wyoming, a good friend of mine who is new to the Senate, one of our newest Members, doing a tremendous job for the State of Wyoming. I know that in Wyoming, for example, they have lots of energy. One of the sources of energy they have is coal. The western part of the United States has hard coal, which is very unique. Frequently, it is mixed with soft coal so communities and towns on the east coast can meet their pollution requirements.

In our discussions, there was some talk about the various alternative sources we could look at for clean coal, for example. I was hoping that perhaps maybe my colleague who is on the Senate floor with me can talk a little bit about energy in Wyoming and how their economy is being impacted with the high cost of gas and diesel and what energy potential is in their State.

I yield the floor to my colleague from Wyoming to talk a little bit about Wyoming. We are neighbors. We have very similar environments and very similar natural resources. Senator BARRASSO.

Mr. BARRASSO. Mr. President, I thank my colleague from Colorado. He is absolutely right, Wyoming is a State which has been very blessed—blessed with abundant sources of energy, and certainly coal, natural gas, oil, uranium for our nuclear power, and also wind, a renewable source of energy. So we have lots of different resources with which we have been blessed.

But in terms of coal—and we know half the electricity in the United States comes from coal—what we know is that there is enough coal in Wyoming to power this country for centuries—not decades but centuries. There is that much coal in Wyoming. Coal is available, affordable, reliable, and a secure source of energy for our Nation.

To me, this is about being self-sufficient in terms of our own energy. We are sending so much of the wealth of this great country overseas. Every time we buy another barrel of oil overseas. Whether it is $120, $130, $140 per barrel, that is a transfer of the wealth of our Nation to people who are not necessarily our friends.

Mr. ALLARD. The figure I have seen is more than $700 billion in 1 year's time. That is a whale of a lot of money to be sending overseas, to our enemies potentially.

Mr. BARRASSO. And we have the source of energy here, with the coal, and the technology is incredible. There are ways to use the coal to convert it to electricity and there are other ways to use the coal to convert it to liquids. Aviation fuel. The military uses an incredible amount of fuel. I have amendments I have introduced and am trying to have debated on this floor that deal specifically with converting coal to liquids, to allow us to use that liquid for our aviation.

There is another technology, coal to gas. There is a true visionary in Wyoming. His name is John Wold, 91 years old, and he is here today to visit. His granddaughter works in my office. I

have talked to him for years about the technology of coal to gas, and it is ready to go and available in Wyoming. It is being done in other places around the world, but not yet here. So it is incredible in terms of the available resources we have. But it is not only one source of energy. We need it all. We need the coal, we need the natural gas, we need the uranium, we need the oil, and certainly we need to be more efficient, as my colleague from Colorado has talked about. We need to be energy efficient, but we need the renewables. So we need the transmission lines, but we have plenty of wind in Wyoming.

Look at oil shale. The Senator from Colorado is familiar with that, because Colorado, as well as Wyoming, as well as Utah, is blessed with oil shale. Perhaps I could ask my colleague from Colorado to discuss some of the issues related to that.

Mr. ALLARD. I would be delighted to talk about oil shale. First, I want to address the issue where the majority leader tried to imply that Republicans are interested in only one issue, and that is extraction of oil and gas from the ground. Republicans I talk to on this Senate floor, in my party, understand we need to have a balanced approach. We need to go after all sources of energy. The problem is that on the Democratic side, they only want to go after renewable sources.

I helped to found the Renewable Energy Caucus, and so I understand how important renewable energy is to our future. But we need something to bridge us over, and that is where I think the comments of my colleague from Wyoming are so important, when we are talking about converting oil to liquids or to natural gas. It helps create that bridge. We need to create that bridge by having an opportunity to go and explore for oil and gas in the ground.

One source of fuel in the ground is oil shale, and I think it is important that my colleagues here on the floor understand that oil shale is a huge resource in this country. We have oil shale in the State of Wyoming to a lesser amount than we have in Utah and Colorado, but we have lots of oil shale in Colorado. In fact, most of it is in Colorado. There is a fair amount in Utah, and then a smaller amount in Wyoming. We have different types of oil shale in Utah and Wyoming, and the extraction proposal out of those two States is a little different.

We need to move forward with oil shale, and that is why I am working so hard to get the moratorium off of oil shale because Shell Oil Company and other companies have developed a technique where extraction is environmentally friendly. Utah's oil shale is closer to the surface. It is a higher quality shale which contains lots of oil in one small chunk of rock. What they do is they go ahead and grind it up, heat it, and they extract a heavy type of oil out of that product.

In Colorado, what we are talking about in Mesa and Garfield Counties, for example, is a deeper oil shale. It is a good quality oil shale—not quite as good quality as we see in Utah—and we have a new technology that is being developed there that takes the ground and freezes a perimeter around the section of ground and then heat the middle of it. Basically what you have is a refinery in the ground. So what you extract out is basically a jet fuel that contains sulfur and nitrogen. Obviously, the sulfur and nitrogen has to be refined out, but it is a very good, high-quality product. It is a jet fuel. Then the heavy tarry stuff is left in the ground.

There is no disruption of the surface of the ground other than the fact that you run some pipes in the ground, and you need some water. They have taken out water rights in that part of Colorado to make sure they have water. It is the type of water that can be recycled and reused. So there are lots of conservation aspects to this new technology that is being developed for oil shale. That is why I had the support for the provision that was provided for in the Gas Price Reduction Act of 2008, removing the moratorium we have on oil shale.

The current law says you can't move forward with the regulatory process on oil shale, so it has stopped it dead in its tracks. In the meantime, up to 2 trillion barrels of oil in the form of oil shale is in the ground, and we think, with today's technology, that between 800 billion and 1 trillion barrels is what can be economically extracted out of the ground and made available to us. That is three times all of the oil reserves of Saudi Arabia.

Oil shale is a huge resource, but we need to remove the moratorium that says we can't even go ahead and layout the rules and regulations. Now, why is that important? Because they tell the oil companies what the rules of the game are going to be, what they can expect the royalties to be, what they can expect the price of leasing the public lands to be, and also what remediation requirements are there for cleaning up the environment. When the President removed the moratorium on going after our natural resources through the floor of the ocean, he sent a significant message that he is willing to provide more supply for oil and gas, and that had a positive impact on the market. We need to continue that sincerity the President showed to the American people by taking some real action here on the floor of the Senate, and we need to do that by removing an additional moratorium on drilling off the coast and we need to relieve or take off the moratorium on oil shale so that resource can be developed.

The technology is not going to be developed until about 3 years from now, so it would be around 2011 or later before it is ready to go. But you need to put in place the rules and regulations first. We need that now. Some of the reasons for objecting that I have heard is people will say: Well, it is going to take 10 years to develop. Maybe so. But 10 years from now, are you going to say now is the time? It will still take 10 years.

My point is that the sooner you put this in place, you can begin to prepare this bridge we need to have for today's energy sources to get us to future energy sources, which are the renewables—the Sun, or photovoltaic cells, wind, geothermal, and hydrogen. That is what we are talking about, and that is what this particular piece of legislation provides for.

Citizens in Colorado are being dramatically impacted by high fuel prices. We talked before about the agricultural sector and the trucking sector. Trucking is more heavily impacted than any other area, because in the West, we are big States and we have lots of land to cover to provide our goods and services. I don't know whether the Senator from Wyoming has anything to say about how his citizens in his State are feeling the impact of high fuel prices, but certainly they are being felt in the State of Colorado, and it wouldn't surprise me if they aren't very similar in the State of Wyoming.

Mr. BARRASSO. The people in Wyoming clearly are affected the same way folks in Colorado are in terms of the large distances they have to drive, whether going to see the doctor, or taking the kids to school, or going to shop for groceries. I think statistically, when they look at how many miles on average people drive a year, Wyoming is No. 1 in terms of the longest distances. So when the price of fuel goes up, the price of gas at the pump, the people of Wyoming feel it the greatest because they are driving that many more miles. Many of them have pickup trucks or utility vehicles, because when you are that far away from home during the winter, you need to have those higher profile, larger vehicles. It is a matter of personal safety. It is what we want our kids to be in as well.

So the inflation is there at the pump, but it is not only that. There was an article in the Wall Street Journal this past week about a woman in Casper, WY, who runs a bakery. It is a great bakery, down on First Street, and sheoes a nice job. But the supplies, the cooking things she buys to put in the bagels—whether it is the canned apples or the sugar—everything is up pricewise because it has to be shipped in to be used. So it is the fuel we use in our own vehicles but it is also the fuel that is being used to ship products.

The people of Wyoming are smart. At all these town meetings I have, they get it. They understand there is going to be a change in the energy we use in this Nation, a change in the different sources of energy. The people in Wyoming know we would be wise to be conserving, and we are, and they know we would be wise to be using the renewables that we have a lot of, but they are also wise in knowing we do need to find more and use less; that it is a matter of supply and demand. And until

you can deal with both sides of that equation—not just one side but deal with both sides—people are going to continue to feel the pain not only at the pump but also at the grocery store. So the people of Wyoming get it. They know the importance of the work we are doing here in trying to find solutions that will help America become energy self-sufficient by developing American coal, American oil, American natural gas, American uranium, and American renewable energy sources.

Mr. ALLARD. That is very key. We need to be less dependent on foreign sources of oil, not only for our own economic well-being but also for the security of this country. If we have to rely on our enemies, or possible enemies, to provide us with fuel, that creates all sorts of security problems for this country. So we have to make sure we have plenty of sources for us to meet our military needs throughout the world if we are going to be the Nation's and this world's peacekeepers.

I note that the Senator has a very busy corridor that goes through the southern part of Wyoming, and it is a big trucking corridor. I think nearly every truck going east to west has to go through Wyoming. They like to avoid the high mountains passes in Colorado, so they find it easier driving through Wyoming, and I expect you see quite an impact there in your State.

Mr. BARRASSO. Interstate 80, which runs west to east across the lower part of the State of Wyoming, is a national transportation route where people are taking products from the coastal areas, the ports in California or Oregon, and they come to a pinch point in Utah and then they all get onto I–80, west of the Wyoming border at Evanston, and they come all the way across the State. Fuel prices are high, and the miles are long. People who talk about a 55-mile-an-hour speed limit in this body clearly have not driven across I–80, where a speed limit like that didn't work before when they tried it, and it won't work now.

I served in the State Senate in Wyoming, a great place. On the third floor of the capital building, there is a large mural on the wall which sort of depicts the State of Wyoming. There is a part of the bottom where I–80 is running across it. Even back when this was painted, years ago, if you count the vehicles on the mural, half of them are trucks. Half of them. And I think the proportion now is even greater than half of them being trucks.

Think about all the product that is being moved east and west on I–80, and I am sure you are seeing it in Colorado as well, with people awaiting the delivery of those products across this Nation and paying higher prices for those products because of the fuel it takes to fill the trucks in order for them to deliver the product. So we are seeing that not just at the pump but also in the pockets of consumers.

Mr. ALLARD. I don't see any solution on the Democratic side. They are talking about more taxes on oil and gas production; they are talking about more rules and regulations. I don't see any proposal that says we need to increase the supply, as we do on the Republican proposal, where we want to turn to oil shale, and to the Outer Continental Shelf, and we turn to the futures market to try to put more enforcement there, and we also work on the conservation side with the electric car.

Truckers are small business people, I attended a press conference today with truckers, I was struck by how conscious they were in trying to conserve. They were maintaining their trucks. They had great safety records. They were making sure the air in their tires was optimal so they could improve the mileage on it. The trucker I heard this morning, he was saying that about a year ago he was spending somewhere around $1,200 to $1,300 to make a trip from Virginia to Texas. There are no high mountain ranges such as we are used to in the West but a relatively flat trip. This year it is up around $2,500, $2,600 to make that same trip. It is getting close to double what he was paying last year. That has to have an impact on the goods and services that are provided in this country.

We need to be looking at real solutions. That is the point of this colloquy. That is the point the Republicans are trying to make. Just standing here debating on the floor of the Senate doesn't make a difference. We need to have an opportunity where Republican Senators can put their ideas forward. These need to be in the form of amendments.

We need to pick our own amendments. The majority leader should not be picking our amendments. It happens he wants to dictate that process. This is the Senate. This is where we should have open and free debate. I think if we had an opportunity to debate these amendments on the floor we could change the direction of this country. I think we could change the type of legislation that is being proposed as a solution.

Deep down I believe most Members of this Senate understand this is a supply-and-demand problem and we need to produce more supply and we also need to encourage more conservation. My hope is we will have an opportunity to make amendments to achieve this. I have made some of those amendments in committee and found I had bipartisan support and had commitments from both Democrats and Republicans that would help support my position on taking the moratorium off oil shale and similar moratoria.

We are simply cutting off supplies to this country and we are becoming more and more dependent on foreign oil. We are sending more than $700 billion overseas to potentially our enemies—countries such as Iran and Venezuela, for example, and many of the Arab countries which are marginal friends. We have to admit, they are there one day and gone the next.

We will need to make sure we have the security we need in this country, both economically and from a military standpoint. That means we need more oil and gas and not less. We need to have more energy from all over the energy spectrum and encourage the American people to conserve.

I thank my friend from Wyoming for his contribution to this colloquy. I think he is doing a great job and Wyoming should be proud of him.

Mr. BARRASSO. Mr. President, we started talking a little bit about coal. I wish to say it is not just Wyoming and Montana, coal is abundant throughout the United States. Whether it is Pennsylvania—I see our colleague from Pennsylvania is here. Actually, the whole region of Pennsylvania is called the coal region. He made mention of that. But in West Virginia and Illinois, coal is abundant, it is affordable, it is reliable and secure.

I appreciate the efforts my colleague from Colorado is engaged in, in terms of oil shale—another abundant source of energy that is not being utilized. It is American energy that can be used for the betterment and future of our great Nation.

Mr. ALLARD. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. CASEY. I thank the Chair.

40TH ANNIVERSARY OF THE SENATE SELECT COMMITTEE ON NUTRITION AND HUMAN NEEDS

Mr. CASEY. Mr. President, I rise to recognize the 40th anniversary of the Senate Select Committee on Nutrition and Human Needs. Today we recognize the contributions of two members of that original committee, the Senate Select Committee on Nutrition and Human Needs, Democratic Senator George McGovern of South Dakota and Republican Senator Bob Dole of Kansas. Both made and continue to make contributions in the war on hunger.

It was 40 years ago that CBS television aired a landmark documentary entitled, ''Hunger in America.'' This documentary exposed the magnitude of hunger that existed all across the Nation. For the first time, Americans got a closeup look at the true faces of hunger—pregnant women and children who were malnourished, infants dying of starvation, starving tenant farmers living just miles from this Nation's Capitol. Their stories and their faces moved the Congress to try to end hunger.

It was just last month that I was privileged to have the opportunity to sit down with Senator McGovern to talk about the challenge of combating hunger still today. As we were sitting talking, he related to me a story, 40 years later, that still has had a profound effect on him all these years later. The evening of that CBS television documentary broadcast I spoke of, the evening that was on, Senator

McGovern and his family were gathered around the television set watching the documentary. Senator McGovern still vividly remembers the effect one particular image from this documentary had on him at that time.

The image was that of a school-age boy leaning against a wall while most of his classmates ate lunch. The interviewer in the documentary asked the boy how he felt standing there, day after day, watching the other children eat.

His answer was not that he was angry or bitter but, rather, that he was ashamed.

At that moment, Senator McGovern recalls telling his family that he, George McGovern, as a Senator, and not that boy was the one who should have been ashamed. I think what that shows is the humility and decency of George McGovern, first of all. But I think what he tried to convey to me in our conversation was that young person's response in that documentary—a person who was a victim of not having enough to eat—that response had such a profound effect on Senator George McGovern that he returned to the Senate the very next day and began working on a resolution to establish a committee to address hunger in this country. Forty years ago today, that resolution was, indeed, enacted, establishing the Select Committee on Nutrition and Human Needs.

Senator McGovern chaired the committee from the time of its inception in 1968 until 1977, when the committee was absorbed into the Agriculture Committee, the committee we know today as the Committee on Agriculture, Nutrition and Forestry, chaired by Senator TOM HARKIN.

Senator McGovern was committed to exposing the failure of Federal food assistance programs at that time and making reforms to ensure that these programs were reaching those most in need. But knowing this was a goal he could not achieve on his own, he reached across the aisle to form a key partnership with Senator Bob Dole, a partnership and an abiding friendship, I might add, that continues to this very day. Despite their differences, both these men share the conviction that ending hunger is a moral imperative. Working together, Senators McGovern and Dole set out to end hunger in America. Their work helped educate the Congress, the Federal Government, and the Nation at large about the sheer magnitude of hunger in the United States. Over the next decade, they and other members of this unique Senate committee developed a bipartisan response to hunger and laid the foundation of our current food assistance programs.

Among their chief successes was reforming the Food Stamp Program, culminating in the passage of the Food Stamp Reform Act of 1977. This act made the program more efficient and more accessible to those most in need by finally eliminating the requirement that Americans pay for a portion of their own food stamps.

They expanded the National School Lunch Program and made the School Breakfast Program, the Childcare Food Program, and the Summer Food Service Program permanent programs in our Government; and they established the Special Supplemental Food Program for Women, Infants and Children, better known today by the acronym WIC.

Forty years later, the programs that Senators McGovern and Dole championed and shepherded through the Senate have succeeded in eliminating the most serious chronic malnutrition in the United States. Today, nearly 28 million Americans receive food stamps, more than 17.5 million low-income children receive free or reduced school meals, and more than 8 million women and children receive WIC benefits.

The legacy of Senators McGovern and Dole is truly a testament to what can be achieved when we work in a bipartisan fashion on shared priorities that address the basic needs of the American people.

These two men came from vastly different ends of the political spectrum and vehemently disagreed on many other issues, but they came together and both agreed that hunger was and is an issue that transcends partisan politics. The bipartisan spirit with which these two men collaborated to fight hunger has certainly served as a model and a inspiration to me and I know to many others in Congress.

Following their example of bipartisanship, this year on the farm bill we were able to provide a record level of nutrition funding to reform and strengthen Federal nutrition programs. We were able to make key improvements to the Food Stamp Program itself, and we were able to strengthen the domestic food assistance safety net by providing significant increased funding to increase commodity purchases for local area food banks.

But we all know the war on hunger requires constant vigilance and we must recognize that unmet needs still exist in America. Despite the existence of Federal food programs, hunger continues to be a serious problem plaguing more than 35.5 million Americans, including 12.6 million children.

Children are particularly vulnerable to the effects of hunger. Even mild malnutrition can have adverse impacts on health, development, behavior, school attendance and performance and self-esteem as well. In the coming year, we will have an opportunity to have a direct impact on combating child hunger with reauthorization of the National School Lunch Act. This legislation, which is set to expire September 30, 2009, authorizes all Federal child nutrition programs.

One of the most important reforms that can be enacted is to expand the school breakfast program. With 30 million children a day participating in the school lunch program, only one-third or 10 million children receive a school breakfast. We must find innovative ways to reach more of these children to get them breakfast.

There is a direct link between school breakfast and academic achievement, and if the United States is going to compete effectively in a new world economy, we must educate our children and to do that we must provide the best possible nutrition at school.

We must also recognize that many low-income working parents with children are struggling to afford even the low fees charged for reduced-price school meals. According to the School Nutrition Association, approximately 1 million children in this country are eligible for reduced-price meals and yet are not participating in the program due to the cost barrier. We must devise ways to ensure these children, too, are receiving proper nutritional assistance at school and do not fall through the cracks.

But providing adequate nutrition to the children during the school year is only part of the answer. Congress also needs to implement changes to ensure that the millions of children who rely upon school meals are not left behind during the summer. Currently, only 2 in 10 children who benefit from school meals also receive meals during the summer months. We must find ways to make programs such as the Summer Food Service Program more accessible to children, not only in metro areas but in rural areas as well.

Data from the USDA's Economic Research Service shows that as far back as at least 1970, the percentage of children living in poverty in rural areas consistently exceeds that of children in metro or urban areas.

A bill I have introduced with Senator SPECTER, my colleague from Pennsylvania, S. 1755, the Summer Food Service Rural Explanation Act, would lower the threshold for feeding sites in rural areas to qualify for this program.

We hope to help to ensure the availability of summer meals for more of these children living in poverty who happen to live in rural areas. We know that hunger itself does not take a vacation, and we owe it to these children to ensure that the Food Assistance Program does not take a vacation either.

Finally, Congress must continue to improve the quality of all nutrition assistance programs. One of the great ironies of the current challenge is to recognize that hunger and obesity can exist at the same time.

While we recognize we are facing huge Federal deficits, we must refuse to let funding challenges serve as an impediment to these critical changes. There is not a more important domestic social objective facing us in the coming years than to provide adequate nutrition to children across America.

Finally, Senators Dole and McGovern blazed a path 40 years ago when they joined to help fight the war on hunger. They put aside partisanship to bring light to the darkness of hunger. Now is

time for a new generation of leaders to pick up that mantra on behalf of the more than 35.5 million faces of American hunger.

I therefore call upon my friends in Congress, both Chambers, both sides of the aisle, to join me and millions of advocates across this country in a mission to end hunger.

I yield the floor.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. CHAMBLISS. Mr. President, I ask unanimous consent that following my comments Senator BENNETT be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAMBLISS. Mr. President, I rise to join my colleague from Pennsylvania, Senator CASEY, to support July 30, 2008, as the 40th anniversary of the establishment of the Senate Select Committee on Nutrition and Human Needs.

Forty years ago there was a significant awakening in this country about the issue of hunger and its impact on Americans. As the resolution states, the CBS award-winning documentary ''Hunger in America'' was an important impetus to putting a human face on this situation.

Like many Americans, Senators George McGovern of South Dakota and Robert Dole of Kansas were moved by this documentary, and thus into action. The first step was the creation of the Senate Select Committee on Nutrition and Human Needs. The committee focused on the magnitude of hunger within our borders as well as shortcomings of existing domestic nutrition assistance programs.

For example, the Food Stamp Program required participants to purchase a portion of their food stamp allotment which left many Americans unable to receive any benefit because they could not afford to buy stamps.

The work of the Select Committee on Nutrition and Human Needs and the McGovern-Dole partnership led to many improvements in our country's nutrition assistance safety net. Today, domestic food assistance programs touch one in five Americans each year. The Food Stamp Program, which was recently renamed in the farm bill the Supplemental Nutrition Assistance Program, is the cornerstone of this safety net by assisting over 27 million Americans each month.

The Special Supplemental Nutrition Program for Women, Infants and Children, or WIC, serves 8.5 million Americans and provides expecting mothers and their young children with the nutrition needed for a healthy start in life.

The National School Lunch Program provides over 31 million lunches each day and nourishes schoolchildren with balanced and healthy meals. As a husband and father of public schoolteachers, I particularly know the direct correlation between healthy, nutritious meals and the ability of a child to learn.

The Emergency Food Assistance Program assists food banks all across the country in meeting families' food needs in times of sudden hardship. I am very proud to serve as ranking member on the Senate Committee on Agriculture, Nutrition, and Forestry. This committee ties the important role of production agriculture to the necessity of ensuring that all Americans have a safe, nutritious, and affordable food supply.

The select committee we are honoring today is the predecessor of the committee's Subcommittee on Nutrition and Food Assistance, and the issues before it receive significant attention.

My colleagues on the committee and I share the determination to provide an effective nutrition safety net, and we continue the bipartisan approach established by Senators McGovern and Dole. This is proven in the recently enacted 2008 farm bill, in which funding for domestic nutrition assistance was substantially increased. Now, 73 percent of the total spending in the 2008 farm bill is allocated to domestic nutrition assistance programs. Given rising food prices, we worked to lend a hand to those citizens in both rural and urban America who are struggling to feed their families.

I am pleased to be an original cosponsor of this resolution. I look forward to continuing to work with my colleagues in the fight against hunger.

The PRESIDING OFFICER. The Senator from Utah.

Mr. BENNETT. I appreciate the yielding of the floor to me, but I understand Senator LINCOLN was going to speak on this same subject. If she is available, I would be happy to yield to her. I understand she will be coming later so I will proceed.

ENERGY

Mr. President, we have had a lot of debate, a lot of discussion that does not qualify as debate, over the last week or two with respect to energy. I simply want to make a few comments of my own with regard to that issue. The energy crisis we face is a worldwide crisis. It cannot be solved with a national solution. But it is a national crisis as well, and we need to do what we can as Americans toward finding the solution. We need to help build a bridge, a bridge that can be a worldwide bridge to the long-term vision we have.

As we talk about that bridge, let's ask ourselves what is at the other end of the bridge? The vision people have at the other end of the bridge is a world that does not depend as heavily on fossil fuels as we do today. It is a world that has nuclear power, it is a world that has wind power, and solar power, geothermal power, biomass, hydropower, and one that I am particularly enthusiastic about is tidal power—the rising and falling of the tides being harnessed in generating electricity.

All of those possibilities are there, and all of those possibilities should be embraced, because all of them can contribute to the world we want to be in 10, 15, 20 years from now.

We need to build a bridge to that world because that world is not available now. There are wind farms, but they are producing a tiny fraction of the amount of electricity we use. There are solar panels that are basically demonstrating the technology, but not producing anything like the kind of volume we would need. There are studies about tidal power. There are experiments going on with biomass. There are explorations with geothermal. But all of those are in the future, 10 years away, 15, 20, 30 years away. That is where we want to be, but we need to build a bridge to get there.

Now, who is going to build it? I want Americans to be in the driver's seat of building the bridge and solving the problem. I want Americans to take the lead in figuring out what we need to do as a world to get to the other side of the bridge I have described.

I want Americans to once again achieve their ability to influence world energy prices. There was a time when the Americans could determine the world price of oil simply by determining whether they would drill another well in East Texas.

When the price of oil seemed to be too high, we could open up additional areas of East Texas to exploration. East Texas was full of oil and at the time, we led the world in oil production. Now that leadership is gone. It left the shores in the 1970s. It lies now with the Saudi royal family.

If we are talking about building the bridge, I want the Americans to be the ones to build the bridge. I want Americans to bring back to this continent our ability to affect the world's price of fossil fuels.

And how do we do that? Well, we do it simply by increasing the number of American sources of fossil fuels. That is how we were in charge of the price of oil at one time, and that is how we can be in charge again. A lot of people do not realize that America, though, is the third largest oil-producing country in the world. Saudi Arabia is No. 1, Russia is No. 2, America is No. 3. We used to be No. 1; we are now No. 3.

If we can increase our ability to produce energy, we can control the building of the bridge to the long-term future when we are no longer as dependent on fossil fuels as we are now. If we want to get to renewables, we have to build a bridge to get there.

The material we will use to build that bridge will be American energy. We have almost limitless sources to which we can turn to find that American energy.

The Gas Price Reduction Act, which I have cosponsored along with a number of my colleagues, outlines two of the areas where we can increase American sources of energy and thus help build that bridge and control, influence, and impact world energy prices.

The first one has to do with taking oil out of the Outer Continental Shelf.

Since the early 1980s, we have prohibited drilling in 85 percent of our Outer Continental Shelf waters. It is interesting that this prohibition came about the time that pricing power left the United States and went into the hands of the Saudi royal family. It will not bring it back automatically, but it will certainly make a major impact if we can now make that 85 percent of our Outer Continental Shelf available for exploration and the delivery of oil.

We now know in a way we did not in the 1980s that it is safe because Hurricane Katrina brutally told us that oil rigs can withstand virtually any kind of pressure from the weather. It is not a lesson we wanted to learn in that way, but it is a lesson that we now know.

The other area in the Gas Price Reduction Act where we can find more oil hits closer to my home in Utah. It would allow us to extract oil from oil shale. In eastern Utah, western Colorado and southern Wyoming, there is more oil than there is in all of Saudi Arabia by a factor of three. People say: ''But we do not have it yet. It is unproven technology,'' although oil shale is being turned into oil in other countries of the world, just not this one. ''But new technology is being tried out. Well, it is 10 or 15 years away. It will be expensive.''

I take you back to the proposition of the bridge. The world where we drastically decrease our dependence on fossil fuels is far more than 10 years away or even 15 years away. We cannot wish it into existence immediately. It is hypocritical to say we are strongly for wind power and solar power and geothermal and biomass as the solution to our problems, but we are opposed to oil shale and Outer Continental Shelf drilling because they take years to develop.

If one is 20 years or 30 years away, and the other is only 10 years away, we should be working on the one that is only 10 years away at the same time we are working on the one that is 30 or 40 years away.

America has fossil fuels that are abundant, available, and affordable, and that can be used as the source of building the bridge to the world of less dependence on fossil fuels. Our economy runs on energy. The world economy runs on energy.

We cannot, while hoping that the land we dream of is available at some point, refuse to build the bridge with America's available building materials.

I hope as we wind down this debate and finally decide to do something about it, we will be focused on taking the assets we already have and using them as the material to build the bridge to get to the place where we want to go. If we do that, then our constituents will see the price of gas come down at the pump. They will see movement in the right direction as to where we want to be. They will say to us: You have finally started to do your job in the way we sent you to Washington to do it.

I yield the floor.

The PRESIDING OFFICER (Mr. TESTER). The Senator from Arkansas.

TAX EXTENDERS

Mrs. LINCOLN. Mr. President, I rise to talk about my support and encourage my colleagues to join me in revisiting and passing what we tried to do earlier today, and that was supporting the Jobs, Energy, Families, and Disaster Relief Act of 2008 on which we had a procedural motion. I find this bill, in these last couple of days of our working period before we leave to return to our States, one of the most important things we can do. Is it everything we can do? No, it is not. We can't do everything in one fell swoop. But there are a lot of things we can do to get started.

I applaud the hard work that was put into this package by the Finance Committee chairman, Senator BAUCUS. I also congratulate our counterparts in the House Ways and Means Committee for their tremendous efforts in putting together this very important piece of legislation that puts us off on a very sound footing and a good beginning, heading in the right direction of where we need to go.

The vote we took earlier today was the third time we have attempted to proceed to this very important package of tax incentives, the so-called tax extenders package, this year. Unfortunately, we do it every year. Unfortunately, we patch over every year the opportunity we try to have put forward by the Government, the incentives we need to create an environment. That is what government does. Government creates an environment where businesses, families, industries, and States can be successful. That is exactly what this bill does. It is what we tried to do earlier today. I hope we will continue to push forward in creating an environment where people and businesses can do for themselves in an environment that government has created, to take care of their issues, whether they be disasters or a competitive nature across this globe, but to use that environment to strengthen themselves, to build their businesses, their families, their communities in a way that has been consistent with the American spirit through generations of great Americans.

We tried three times, and I had so hoped that the third time would be the charm. Maybe it is the fourth time. Maybe it is the fifth. I very much believe this is something we have to do, and we should do it before we leave to head home to our States for the break. During the past few months I have talked extensively about this extenders package and some of the things I think are so important. There are many benefits here that working families will see, benefits for working families, communities, businesses, so many of which are so needed at this time. Under this legislation, some 1 million additional children will be covered by the child tax credit and more than 27,000 American businesses will be able to remain globally competitive through the use of research and development tax credits. We are talking about a time when gas prices are high. Food prices are high. People are finding that the dollars they are earning are not going as far. Yet they are still trying hard to keep their body and soul and their families together. They are still trying to do for their children and aging parents the things that need to be done. One million additional children would have been covered in this bill with the child tax credit. These are extremely important policy initiatives we need to be providing, now more than ever, for our American taxpayers.

In addition, there is almost $20 billion in incentives included in this package to move us toward energy independence. We have heard all of our colleagues coming down here talking about energy independence, talking about the dire straits working families are in. My State ranks 48 in the low-income category of hard-working Americans. I know because in recent studies we have seen back in May, on average Arkansans were paying 8 percent of their income toward gasoline and in some other, more desperate counties, they were paying up to 11 percent of their income for fuel, particularly for gasoline. They are being hit hard.

There are some things we can do. This package will provide long-term extension of our renewable energy and energy efficiency tax credits so we can provide some certainty in these very important new industries that are job creators but also the hope for the future of where we go in terms of energy needs. It creates a tax credit for consumers who purchase new technology, highly fuel-efficient vehicles. It also continues our commitment of moving toward alternative fuels through the extension of the renewable diesel and biodiesel tax credit.

We know there are a lot of opportunities we have. Yes, trying to deal with the manipulation of markets by speculation is one route we need to take. Yes, we know that making sure we are taking advantage of new resources and old resources that exist in our oil and gas industry is important. We know there are multiple things we can do in renewable fuels and a host of other areas where we can turn to that we never believed we could get fuel from, everything from biomass to algae, a whole host of new technologies coming out, research that is proving to us that there is a whole new world out there of energy and energy sources. These are all initiatives in a bill that should have broad bipartisan support. We should enact them as soon as possible.

To be sure, there is certainly a lot more, whether it is speculation or drilling or other things, that we could be doing. There is more that can be done to deal with our energy crisis. But the almost $20 billion in incentives included in this package is quite a down-payment in moving us in the right direction. To my friends on the other

side of the aisle who have been here on the floor this week arguing for action on energy legislation before we leave for August, I agree with you. I think it is so important that we do something. We need to do something. We have to do something. This package we have seen come before us earlier today would have been a great first step. It still can be. We need to make sure we are passing an extenders bill, coupled with a host of other things that are essential for us to go home in August with to tell our constituents that we do hear the message they are sending. We could pass it with bipartisan support and get even more done when we come back in September.

People know we are not going to do everything at once. They don't expect that of us. But they do expect us to take, step by step, the opportunities we have to do something about the energy crisis.

We also have in this bill the highway trust fund. The needs in the highway trust fund are tremendous. Come next month, we are going to see a deficit there. We are going to see a crisis in our highway trust fund. We are going to have to deal with that. Why shouldn't we be dealing with it today or tomorrow but certainly before we leave?

Finally and most importantly, the chairman of the Finance Committee has included a package of tax relief for areas all across the country hit with horrific weather and declared Federal disaster areas. This will provide vital resources to help in recovery efforts all across the Nation; in 26 States, to be exact. I am extremely thankful for the inclusion of this piece in the bill because Arkansas has suffered from a string of tornadoes and record-setting floods. The series of natural disasters in my home State this year has been unlike any I have seen in my lifetime. It has left 62 of our 75 counties in Arkansas in need of Federal disaster assistance. Wave after wave of storms have rocked the residents of Arkansas and have left many shell shocked.

It started on February 5 when a band of tornadoes created a path of destruction, which we can see here, that stretched across 12 counties in Arkansas, killing 13 people, injuring 133, and destroying more than 880 homes. It was the deadliest storm in nearly 10 years. On that day, one tornado gouged a 123-mile path, hitting the ground, staying on the ground for that long a period. Along the way, around 5:30 that afternoon, it hit a family-owned boat factory in Clinton, AR, where 16 employees were in the factory at the time working late to load a shipment of boats on a truck. The F–4 tornado struck. Unfortunately, the life of Thomas Armstrong was lost. The building was totaled. The 20-year-old business that had produced 550 to 600 boats a year and provided $15,000 a week in salaries to its 45 employees was a complete loss. As we can see here, it was completely destroyed.

I traveled with Senator PRYOR and Arkansas Governor Mike Beebe to assess the damage across the State. In Van Buren County in central Arkansas, 45 homes and countless businesses were destroyed. Conway County had 140 homes destroyed or that suffered major damage.

The hospital in Mountain View got hit as well. Within hours, hospital administrators and personnel, helped by volunteers, reacted swiftly to stabilize the area. They were able to use the emergency room for persons with serious injuries and evacuated patients with nonlife-threatening conditions to nursing homes and other facilities around the county. In the town of Highland in north central Arkansas, a facility that housed the equipment for the volunteer fire department was completely destroyed.

A little more than a month later, heavy storms hit Arkansas again. This time they brought rain and more rain and more rain. The result was flooding not seen in some areas for over 90 years. Thirty-five Arkansas counties were declared disaster areas from the storm. In the town of Pocahontas, the Black River crested at 26.5 feet, its highest level since August of 1915, and three breaks in its levees flooded homes and apartments. This is a scene from the Black River in Pocahontas in Randolph County.

In Des Arc, where I traveled with Governor Beebe, the White River crested at a little more than 33 feet, almost 9 feet above flood stage. Further up the White River, the community of Oil Trough got hit twice. The first time it was only a few homes. Ten days later, rains came a second time and flooded the entire city, forcing residents and businesses to completely evacuate.

On April 3, another set of tornadoes hit central Arkansas. Although not as deadly as the ones that hit us in February, four twisters touched down in a five-county area, including some of the counties suffering from those floods. In addition, two more rounds of tornadoes hit the State in May, bringing the total to 62 counties affected by these storms that hit this year.

All but 13 counties in my State have been declared Federal disaster areas, causing millions of dollars in property damage and at least 26 known deaths. While it has been a traumatic few months for thousands of Arkansans, I have been struck, of course, by the resiliency of my State's residents. I have always said the people of Arkansas are our greatest resource, whether it is to the rest of this country and what we have to offer or whether it is to one another. Their ability to pitch in and help their neighbors has been nothing short of extraordinary. But they need help to finish the job.

This bill we tried to pass earlier today and in weeks past provides needed assistance. That is why I am so grateful Chairman BAUCUS has included this tax incentive package for individuals who have experienced loss from these horrific disasters.

This tax relief will help my Arkansas families deal with expenses related to debris removal, cleanup, and repair. It will allow them to adjust their taxable income, taking into account property losses they have suffered. It will allow them to access their own savings they have tucked away in IRAs and other retirement plans penalty free. It will provide a credit for small businesses that continue paying their employees while their business is inoperable and being rebuilt. These important provisions, among others, will do wonders for my Arkansas families and businesses impacted by these unbelievable storms and flooding.

And I am not alone. Many of my neighboring States—Missouri, Mississippi, Oklahoma, Tennessee, Georgia, Kentucky—experienced the same storms Arkansas did, and they are suffering in the same ways—not to mention the floods that impacted individuals in Iowa, Indiana, Nebraska, and Kansas in recent months, who all would benefit from this.

I recognize this package of disaster relief may not be as generous as some may have preferred. But it is a good package. It is a consensus package. If passed, it will provide immediate relief for all of our storm victims.

I urge my colleagues to recognize the value in this package. I urge them to take a close look and recognize the benefits it will bring to their communities that are suffering so desperately.

We should stand together. We should all look around this room and understand we are here together as a body to represent this great land, each of our States, of course, but to recognize as neighbors we all have shared in much disaster. We should stand together to do the right thing and enact this package—if we get another opportunity—of broad-based tax relief that will help our working families, our businesses, and our damaged communities.

There is certainly a great opportunity here if all of us band together and realize that in the next 2 days before we leave we have this wonderful opportunity to come together to do something for our Nation. I hope we will. I encourage my colleagues to ask to be able to come back to that relief package as well as that tax incentive package that will do so much.

Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from Idaho.

PREDATOR WOLVES

Mr. CRAIG. Mr. President, for the next few moments, I wish to change the pace of our debate on the floor of the Senate. I am pleased the Senator from Montana is now the Presiding Officer in the Senate because I want to tell that Senator I am a cosponsor of a piece of legislation he and the Senator from Wyoming have introduced that would provide grants to Montana, Wyoming, and Idaho, and to tribes and other States, at the discretion of the

Secretary of the Interior, to support landowner actions to prevent livestock predation, and to compensate landowners for a loss of livestock by gray wolves and other predator species.

Why would I come to the floor of the Senate and want to talk about wolves? Well, let me tell you what happened in the States of Idaho, Montana, and Wyoming in 1995.

In my opinion, the Secretary of the Interior at that time, Secretary Bruce Babbitt, Secretary to the administration of Bill Clinton, did something that I said at the time I believed to be a direct violation of Federal law and congressional intent. He allowed the U.S. Fish and Wildlife Service to go into Canada, collect Canadian gray wolves, bring them into the lower 48, and in the late fall or early winter of 1995, he dropped 15 of those wolves into a wilderness area in Idaho—certainly satisfying the wishes of a lot of environmental interests, but, in my opinion, directly violating the language of an Interior appropriations bill, language that I and the then Senator from Montana, Mr. Conrad Burns, had put in the bill saying: None of these moneys shall be used for the purposes of introducing gray wolves into Idaho, Montana, and Wyoming.

Well, Bruce Babbitt did it, with great fanfare, with great public attention, and with a very large smile on his face.

Then, in 1996, he introduced another 20 wolves into central Idaho. What is the end result of what happened? This was the effort to do what we called the introduction of an experimental number of wolves back into a habitat that wolves once roamed wild in. It was supposed to be a limited experiment of what we called an experimental herd or pack, or packs, of wolves, an experimental species, and it was to be limited. We said at that time that when the number reached a certain number—at least 100 breeding pairs in Idaho, Montana, and Wyoming—it would no longer be experimental, and it would no longer be endangered, and the extraordinary protection of the Endangered Species Act would come off.

That simply did not happen. Today, we literally have thousands of wolves roaming the States of Idaho, Montana, and Wyoming. Some would say: Oh, isn't that wonderful, and isn't that exciting, and isn't that natural? Well, it may be natural in relation to 1880 or 1890, and it may be wonderful for some who behold the dream of an unoccupied great West. But to those of us who live in the West today, who live in an occupied area, where domestic livestock graze, and where the human species loves to camp, we have a problem. Our problem is quite simple. Wolves protected have no predator. The human species is the only predator. And in the absence of our ability to control them, they multiply very rapidly in an unlimited area with an unlimited feed source. Their feed or food source—their prey base—happens to be what was once the great elk herds of Idaho along with our deer population. And now, as they have begun to decimate those populations, they are beginning to pick off domestic livestock, both cattle and sheep, that graze on these public lands.

This map I have in the Chamber demonstrates, from the 35 wolves that were dumped into Idaho in 1995 and 1996—in approximately this area—the phenomenal spread that has occurred across the entire State of Idaho, into Montana, and down into Wyoming, in areas where we believe there could well be more than 3,000 wild roaming wolves.

So the Department of Interior then said: It is now time we delist these wolves. We thought that was going to work until again a judge, who probably knows nothing about wolves, listened to a couple environmental groups, and said: I don't think we ought to allow that to happen. As a result, all of that effort was stopped. But still the taking of domestic livestock—both cattle and sheep—continues to this day.

I have served on the Appropriations Committee. In the absence of us doing the right and responsible thing, I kept adding money every year not only for the management and the shaping of these wolf populations, but also to offer some compensation to ranchers—both cattle and sheep—who were losing their livestock.

The Senator from Montana, who is presiding at this moment, the Senator from Wyoming and I have joined—they have introduced the legislation; I am a cosponsor—to hopefully bring about a stabilized fund to offset the literally hundreds of thousands of dollars our ranchers are now losing, all in the good name of Secretary Bruce Babbitt of the Clinton administration, who had the wonderful dream that he could take a West once unoccupied by the human species and repopulate it with a wolf.

Need I say more? A wolf is not a kind, sweet, and cuddly little animal. They are large. They are aggressive. They drag down elk, moose, deer. And they are now beginning, as I have said, to take domestic livestock.

A week ago, a young man, who was out training his hounds by chasing bear, ran into a pack of wolves. The wolves chased the guy off and killed all the hounds. Some of these well-trained hounds are worth $4,000 and $5,000 apiece. There was absolutely nothing that gentleman could do. Could he shoot the wolves? No. No, it is against the law, the Federal law, that he dare touch them. So he had to watch his beloved dogs eaten.

That is happening more and more every day in Idaho, as this map grows more and more covered with incidents of packs and individual and collective numbers of wolves. It is true in my State of Idaho. It is true in the State of the Senator from Montana. It is certainly true in Wyoming.

As we try to bring these wolf populations under control, we have interest groups and a Federal judge who raps his gavel and says: No.

The State of Idaho is attempting, under this Secretary of the Interior, and others, to take reasonable and responsible control of them, and to once again shape these populations of wolves so wolves can once again be in Idaho and, at the same time, to recognize the need to maintain populations of elk and deer is what we want to do. And it is what the Idaho Fish and Wildlife Commission and Fish and Wildlife agencies were doing in a responsible way—until, once again, a Federal judge intervenes, who knows little to nothing about the species itself, or probably the law, and says: I guess maybe that environmental group is right. Maybe we need more wolves so we get a genetically clear balance. We are more interested in the genetics of the wolf than we are the decimation of the elk herds, the deer populations, and the domestic livestock.

I have said with great trepidation, but I say in all sincerity: Do we have to wait until a wolf drags down a human species before there is a sense of alarm? Because they have now penetrated all of Idaho. They are literally in our backyards. Yet the romance goes on about this great dream of a wild West where you can hear the lonesome wolf howl at night. And they are howling. They are howling loudly right in our backyards. And a blind Federal agency and a blind Federal judge and a romantic environmental theory says that is OK.

It is tragic for the wolf because, ultimately, these populations will have to be brought under control. It is tragic for Idahoans and folks in Montana and Wyoming to see their pets and their domestic livestock dragged down and killed, with little if anything they can do about it.

I hope my colleagues would support S. 2875, as a minimal stopgap to provide these domestic livestock operators with some compensation for the losses they are now taking because Bruce Babbitt, Secretary of the Interior under the Clinton administration, had a wonderful and wild western dream.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SESSIONS. Mr. President, how much time is left?

The PRESIDING OFFICER. Nine and a half minutes.

Mr. SESSIONS. Nine and a half minutes. I thank the Chair.

ENERGY

Mr. President, it is no doubt that the American people are engaged on the question of energy, and gasoline prices primarily. But they are worried about their country. They are worried about their own budgets. They are worried about the direction the Nation is heading and the fact that we are becoming more and more dependent on foreign sources of energy. It impacts our national security as well as our economy.

We know that now $600 billion, perhaps $700 billion a year of American wealth is transferred abroad on an annual basis to purchase the 60 percent of

imported oil we utilize in America, in our transportation system primarily. That is a wealth transfer the likes of which the world has never seen. It is not good for our economy.

The average family—and I have calculated it based on a two-car family driving 24,000 miles a year—is paying $105 more per month for gasoline than they were 1 year ago using the same number of gallons of gasoline. This is a big deal. There is no doubt about it. After our families pay their taxes, after they pay their Social Security, after they pay their house payment, their insurance, their retirement, and their other bills, now $105 more every month is hitting them because of increased gas prices, and 60 percent of that money is going abroad to purchase the gasoline in a wealth transfer that is adversely affecting our economy. This is a national crisis. There is no doubt about it.

This Nation needs to do something real. We need to take action that will work. I am, frankly, very open to a lot of different ideas that we might be able to adopt. I think both parties have ideas that would work. We need conservation. We need biofuels. We need more production of energy at home. All of those things, it seems to me, are quite possible. This Government should accelerate it and make it a reality. Yet we remain here, unable to act in any way it seems.

For example, agriculture. Yes, crop prices, commodity prices are up, but the fuel that is utilized on the farm has doubled. Fertilizer prices, which come so often from natural gas, have also doubled. Our chemical industry, most of it is a worldwide industry. They have plants, these big chemical companies do, all over the world. When they decide where they are going to make a new chemical, they ask who has the lowest price for energy. Natural gas is often a component of new chemicals and because of prices—we have seen a flat or declining chemical industry and an expansion of it in other places where the price of energy is lower.

I believe the future of the American economy is at stake. We must carry out conservation efforts. I see my esteemed colleague, Senator BINGAMAN, here. He had a hearing a week or so ago and he has had some of the best hearings on energy. I am honored to serve on his committee. We had some fabulous hearings with some wonderful witnesses. The hearing I refer to included Dr. David Green at the Oak Ridge Center in Tennessee, a National lab, a Federal lab, as a witness, and he made a series of suggestions for immediate actions on energy. This is just to increase the miles per gallon that we get. His first thing is driver behavior. He contends that the average driver, if they drove better, could save 10 percent. Curb aggressive driving, observe the speed limits, don't carry extra weight in your car, have vehicle maintenance, have realistic speed limits. For every 5 miles per hour over 55, the fuel economy, Dr. Green says, declines 7 percent.

He talks about heavy trucks. Improved aerodynamics on the truck could save up to 600 gallons per year—just doing that—and other suggestions he made—low-rolling resistance tires. Better tires get better gas mileage. Driver training can be a big asset, updating fuel economy standards, the labeling of used cars. When people go out and buy a used car, it wouldn't be hard to have posted the mileage of all used cars so that the person could see what that mileage would be if they bought that particular used vehicle. He goes on with a number of other things.

I say that just to point out that he was just one witness in one area: automobiles and vehicles. There are many more things we can do to conserve fuel and I support this.

I believe we ought to reduce our dependence on fossil fuels as soon as possible. I believe we should get away from them as much as we possibly can and reduce our imports. This would include, for me, supporting investment in and promoting hydrogen vehicles and fuel cell vehicles. I think natural gas vehicles do have a role to play. Produce more diesel vehicles that get 35 to 40 percent better gas mileage. Half the cars in Europe are diesel; we only have 3 percent. Why is Europe doing that? They get better gas mileage. They tax diesel less in Europe; we tax diesel more. We have a new sulfur diesel fuel that is extremely clean.

All right. I think we are in a position—and I think the Presiding Officer understands this—the American people want us to do something. We need to reach across the aisle and accomplish something.

How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator has 2 minutes 45 seconds.

Mr. SESSIONS. I have to conclude that this is the problem. I don't believe it is the Democrats I know in Alabama, or I don't believe it is all the Democratic Senators and Congressmen I know in Washington, but let me tell my colleagues what is happening and where we are and how we have reached an impasse that has to be broken.

Former Vice President Gore, a former Democratic nominee for President of the United States, made a speech recently and said that within 10 years, we should generate all of our electricity without any fossil fuels. Half of our electricity today is coal. Twenty percent is natural gas. He would eliminate all of that and replace it with biofuels, with solar, wind, and the like. That is a radical proposal—a proposal that is not within the realm of possibility. It is a stunning idea that simply cannot be achieved that fast. I would favor it as soon as we could, but we have no way of doing that.

Senator OBAMA, the Presidential nominee now, praised that speech. He didn't adopt everything in it, thank goodness, but he did praise Gore and his speech. He has indicated he opposes further drilling, and he is at best lukewarm, if not unfavorable, to nuclear power.

The Speaker of the House of Representatives, NANCY PELOSI, said she wanted to save the planet. She has been opposing any production through drilling or shale oil or clean coal or offshore production. Our own leader, Senator HARRY REID, has said sometimes he favors production, but his only proposal he has brought forth on the floor of the Senate is to sue OPEC for not producing enough oil. I would suggest we could sue the Congress for not producing enough oil in America. He wanted to tax oil companies, which means you certainly would not get any more oil doing that. Now, we have a speculation bill. Not one of those three pieces of legislation actually would produce any energy.

So let's get out of this. This is not a position the Democratic Party can take. It is not a position a majority of Democrats in America believe in. I am prepared to meet halfway. Let's move to hybrids any way we can. Let's do more biofuels. I think that can work. Let's go to wind, producing as much and as fast as we can. I am for whatever works if it is reasonable and not placing an unfair burden on the American people.

All I can say is, we are seeing a position here that is not acceptable. It is radical. It is damaging our economy. It is saying we will not do the things necessary to create a bridge to get us to nuclear power, clean fuels in the future that can get us off fossil fuels.

I thank the Chair and I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. MENENDEZ. Mr. President, I heard President Bush's statement at the White House today, and I have to be very blunt. I think the President must think the American people are stupid. For 7½ years we have had two oilmen in the White House, with Republican majorities in Congress for 6 years, and we have seen gas prices go from $1.46 when President Bush took office to over $4—to about $4 now; it went over $4 at one point—per gallon. Now he would have us believe, after that 7½ years—Republican majorities for 6 of those 7½ years and having the oil industry write the energy policy with Vice President CHENEY in the White House—now he would have us believe, in fact, that we are responsible for this.

It is a good lawyer's game. When you don't have the facts on your side, when you don't have the law on your side, you pound on the table and create a diversion. That is what they have done—tried to create a diversion. The American people are a lot smarter than that.

The fact is, Democrats cannot act as we want to on the energy crisis because the Republican Party simply won't allow us. We have a slim majority in the Senate, and by Senate rules, the

Republicans can filibuster to require us to get 60 votes for anything. That really means, in essence, for those watching, they have the ability to block any legislation they want, and they have used that power to the hilt. Over 90 times they have used this procedural tactic to block much needed legislation. Even though we are in the midst of an energy crisis, they are still blocking everything.

At first they said they were blocking us from our work because they wanted a vote on opening our shores to oil drilling—something I don't support—but the majority leader said OK. We will give you a vote on opening our shores to oil drilling.

Then the Republicans said: Oh, that is not good enough either. Instead, they claimed to want to vote on opening the shores to oil drilling, a vote on nuclear power, a vote on oil shale development, a vote on their larger package of proposals, and guess what. The majority leader said earlier this week: OK, you can have a vote on all of that. Yet, somehow, every time the majority leader offers the other side votes on exactly what they want, they keep saying that is not good enough. They simply won't take yes for an answer.

I hear their speeches. They all mention speculation. Well, we have had testimony that, in fact, speculation in the marketplace could raise oil by $50 per barrel. We even saw a company that was just taken by the Commodity Futures Trading Commission being charged with having manipulated the marketplace—made $1 million in 11 days and increased gas and oil prices. Yet they won't let us go to speculation. They say one thing, they do another.

The big issue they keep talking about is production, but the Republicans don't want production. They simply don't want us to have progress. That is their game plan. They have a political equation, and it is: Don't let anything be achieved.

On five separate occasions, they have had the opportunity to vote for energy production. They have had the opportunity to keep the rapidly developing wind and solar industries growing at an accelerated pace, but instead they decide to play politics. The Republican Party doesn't seem to take renewable energy seriously. It is true that renewables are essential for our environment, essential for our economy. What these industries really represent are an opportunity to produce massive amounts of domestic energy cheaply and at least 100,000 new high-paying jobs in America.

Now, if you don't think renewables are serious business, just ask landowners in Texas, Minnesota, Iowa, or Wyoming who are, in fact, receiving $3,000 to $5,000 per month for allowing a windmill to be sited on their property or ask oilman T. Boone Pickens, who is plowing billions of dollars of his own money into wind energy and a plan to use renewables to end our addiction to oil.

Now, somebody who has made a lot of money in oil doesn't all of a sudden plow billions of dollars of his own money into renewable energy unless he thinks there is going to be a payoff at the end. He understands.

In my home State of New Jersey we have windmills in Atlantic City, where the casinos are, generating a lot of electricity. Last year we installed enough turbines to power over 1.5 million homes. The solar power industry is growing at over 40 percent a year.

These technologies work. They are working now. They are in high demand. They produce an enormous amount of energy. We need to accelerate and expand that. If we extend the wind and solar tax credits so these industries can continue their rapid growth, we could add 150 gigawatts of installed capacity within 10 years. Now, what does that mean? That means that we would have enough electricity to power over 37 million homes. At that rate, by 2030, we could get over 25 percent of our Nation's electricity from wind and solar power.

The package of tax credits that the Republicans continue to block—blocked again today—represents a solution also for the high price of oil. There is a large tax credit for the purchase of plug-in hybrid vehicles—cars, for example, such as the Chevy Volt, which will be able to run on electricity for the first 40 miles after being plugged in. That means a full three-quarters of all trips—all trips—driven by Americans would not use a drop of gas. If projections by some of the experts hold true, and half the cars on the road in 2030 are plug-in hybrids, we could easily cut our use of oil by 10 percent, and some would suggest that we could even displace much more. And by this time, we would be producing enough renewable energy to power all these cars and still have electricity to spare. If we want cheap gasoline and we want to be free from imported oil, we need to pass the tax credit extensions, and we need to build plug-in hybrids, solar panels, and winds turbines, to name a few. It is that simple.

It is time for our colleagues on the other side of the aisle to stop exploiting our energy crisis for big oil's gain and let us vote on the things that will actually produce energy.

Instead, they insist on holding up everything for an absurd plan that, according to the Energy Information Agency, will not produce energy at all for 10 years and, in 2030, will only produce enough additional gasoline for the equivalent of a few tablespoons per American car.

Let me try to put their plan into perspective. Since April of this year, Americans seeing the high cost of gas have actually reduced their consumption by 800,000 barrels of oil a day more than we did year ago. This is the most significant and sudden drop in oil since the 1970s. But what happened, even though we have reduced 800,000 barrels of oil every day? Prices went up.

In recent weeks, in response to record oil prices, Saudi Arabia produced an additional half-million barrels of oil more each day. What happened? Prices went up.

So how does the Bush-McCain drilling plan compare to these recent events? Well, based upon the Bush administration Energy Information Agency's own analysis, if we open all our shores to oil production, the first drop of oil would not be seen for almost a decade, and offshore oil production would peak in the year 2030. Then it would peak at only 200,000 barrels a day.

So, in fact, if 800,000 barrels a day in reduced consumption combined with an increase of 500,000 barrels a day in extra production hasn't lowered gas prices one bit, it is clear that the production of 200,000 versus a combination of 1.3 million barrels in reduced demand or increased production—200,000 barrels in the year 2030—is going to do absolutely nothing about gas prices.

In fact, the Energy Information Agency says that adding those 200,000 barrels per day in production in 2030 will lower the price of gasoline by less than a penny per gallon.

Let me repeat that. The Republican production plan to open all our shores to drilling and risk the environmental consequences we saw, for example, in the Gulf of Mexico during Katrina and Rita, with 700,000 gallons of oil spilled and 7 million spilled on land by the facilities that bring that oil to the marketplace, would not lower gas prices but about a penny in 2030.

Let's compare these numbers with what renewables have to offer. Remember, if we pass the renewable energy tax extender credits, we could produce massive amounts of electricity from renewable technologies. We hear this constantly being discussed by the Republicans, but they don't let us vote on it. Remember that the tax extenders will help us rapidly deploy plug-in hybrid technology so we can use this electricity for transportation.

By some projections, this means that by 2030, the same time period they are drilling off the shore with the risk that comes to a $200 billion coastal economy, we could replace 2 million to 3 million barrels of oil per day with electricity. Compare 2 million to 3 million barrels to a measly 200,000 barrels per day by the drilling.

Some, such as the DOE's Pacific Northwest National Laboratory, projected we could actually displace 3 times as much, or 6.5 million barrels per day by 2030 versus 200,000 barrels in this big drill, drill, drill.

I don't quite get it. You can save the equivalent of 6.5 million barrels every day in energy by pursuing the renewables that they say they support but don't vote for or you can have 200,000 versus 6.5 million by virtue of drilling 30 years from now. So this, of course, means that for us to achieve this, we need to get beyond the Republican efforts to stop us from maintaining the

tax incentives we have. It means we actually have to get serious about our energy policies and start a serious effort to run our transportation fleet on electricity.

That is what voters have to decide on this fall. Do they want to vote for the party of big oil, the party that saw the dramatic increase in gas over the administration's lifetime, where they wrote the rules and the law at the White House, sitting with the Vice President of the United States—do they want to vote for big oil that has record profits, starting with ConocoPhillips? I can't wait for tomorrow, or the day after, when ExxonMobil puts out their record profits. We are talking about billions in record profits. Do they want to vote for big oil, which concocted a plan that does nothing but enrich the oil companies?

This is about one last grab before the administration goes out of office. They already have 68 million acres in this country that they have access to. Now they say we cannot do this or that. They have 68 million acres. They have millions of acres in the Outer Continental Shelf that are not subject to the moratorium. They have areas in the gulf they have not pursued.

The bottom line is that plenty of drilling can take place, and they have not done it. Even the President of the American Petroleum Institute says we don't have the infrastructure or the resources to do it. All this talk about drill, drill, drill, which would only produce 200,000 barrels in 2030 versus 6.5 million barrels of reduced demand in oil—that would do something about the gas prices—and not letting us take out the speculation in the marketplace, which would reduce oil $50 per barrel, some experts say, but they would not let us vote on that. They would not let us vote on the tax extenders.

So this is not about creating production, this is about stopping progress. This is about a Republican game plan that says we will send the Congress home without having done anything about dealing with gas prices, and the minority will face the consequences. They are so sadly mistaken that the American people will not see through 6.5 years of record gas prices, record oil profits, unwilling to allow us to deal with speculation or deal with production and what the energy tax extenders provide, unwilling to allow us to pursue conservation, unwilling to let the American people get the relief they want.

That is why I truly believe that if they continue on this course, the Nation will suffer and consumers will suffer. But they will suffer at the polls come November.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

TAX EXTENDERS LEGISLATION

Mr. BINGAMAN. Mr. President, I wish to take a few minutes here on a Wednesday afternoon. We are not toward the end of the week yet, but as most people know who observe the Congress and Senate in session, once you get to Wednesday afternoon, you sort of have a feel for how much you are going to be able to accomplish during the week.

I think it is fair to say we have not been able to accomplish much so far this week. This is sort of a last-ditch effort to encourage us to try to do something constructive before we leave town, before the August recess.

Let me try to put this debate in the general terms that I understand it. There are two packages of legislation that relate to our energy challenges which we have been talking about—two notional packages of legislation. One—and this is the one most of the speeches are probably about—relates to the general problem of high gas prices, which is a serious problem for all Americans. This set of speeches is not about a particular bill because we don't have a bill that has come out of any committee in the Senate dealing with this problem of high gas prices. There are bills the Republican leader has introduced on the subject, and there is the bill to deal with the part of the problem relating to speculation, which the Democratic leader has introduced, the majority leader. We have not been able to move ahead on that. There have been repeated efforts, and we have been blocked at every turn.

The other package is the one I wish to talk about. I spoke about it briefly yesterday. I wish to talk about it again because I think it is extremely important. It is, in my opinion, the most important legislation we could pass and take action on this week. This relates to the extension of various tax provisions that are currently in the law or that have been in the law but expired this last year. I will briefly talk about that.

Some of those tax provisions relate to energy. Many of them do not. Many relate to other items, other matters that are extremely important as well. Let me talk about how important this legislation is to our economy, to American jobs, and to our energy challenge as well. First, I will talk about the provisions in the tax law that expired at the end of last year. These are provisions we need to extend in order that Americans will not face substantially higher taxes when they go to pay their taxes next spring. I am talking about things such as the alternative minimum tax.

Most Americans don't have to worry about the alternative minimum tax. Unfortunately, the way it is written today, unless we pass legislation such as what I will argue for here, we are going to have millions of Americans have to calculate their taxes pursuant to the AMT and actually pay increased taxes because of the alternative minimum tax this next year if we don't pass that legislation.

We have a provision for a child tax credit. You would think there would be strong support for maintaining the child tax credit that Americans believe is part of the Tax Code. Unfortunately, it expired at the end of last year. If we don't pass legislation such as what I am talking about, such as what we tried to pass earlier today, the child tax credit is not part of the law.

The qualified tuition deduction for higher education expenses, again, this is something that is very important to many families in this country who have children or where one spouse or the other is going to school and they need that tuition deduction for higher education expenses.

Also, there are the provisions for retirees to be able to make tax-free IRA rollovers to qualified charitable organizations. These are examples of provisions that Americans think are in the Tax Code—and they are, except they expired at the end of last year. We need to go ahead and legislate to reestablish those so people can take advantage of them when they file their tax returns next year.

All of that is contained in this legislation that failed earlier today on the Senate floor—failed in our efforts even to proceed to consider the legislation, in order to be specific about it.

Let me talk about the energy provision. There are also, in the tax law today, several important provisions to encourage production of energy from alternative sources—production of energy from wind farms, wind turbines, from solar concentrating facilities, and production of energy from photovoltaic cells that people put on their homes. This is legislation that was enacted—most of it—in 2005. I was honored to be present in 2005 in my home State of New Mexico, in Albuquerque, when President Bush traveled there and stood with Senator DOMENICI and myself and others at the time to announce that he was signing the 2005 Energy bill.

There are some who criticize that bill, but I think there were many good provisions in it, and some of those provisions are these I am talking about right now—the production tax credit for wind energy, the investment tax credit for solar energy. Those provisions, unfortunately, were only enacted through the end of 2008, and that is about, as we can all tell by looking at the calendar, 5 months down the road. So companies that are thinking of investing in projects—under the law, the way we wrote those provisions, the project has to be actually completed and in operation prior to the expiring of the tax credit in order for them to get the tax benefit.

Obviously, companies are now looking at this expiration date of December 31 coming up and they are saying: Wait a minute, hold off, we are not going to build that wind farm, we are not going to construct that concentrating solar power facility, we are not going to put those photovoltaic solar cells in place because we don't know if Congress is going to extend this provision or not extend this provision.

The vote we had earlier today is not encouraging at all in that regard because it is a signal to the business community that, in fact, Congress is not going to be able to generate the votes necessary to extend that provision.

As I understand it, all Democrats who were present voted for proceeding to the bill so we could bring it up, debate it, pass it—at least I hope pass it. I believe five of our Republican colleagues joined us in that effort. But we need more. We cannot get to the 60-vote threshold that is needed without more support from our Republican colleagues.

The arguments used against going ahead are numerous, and they are changing all the time. Let me briefly go through these arguments.

A main argument is they like the provisions, they support the provisions, they just don't like the so-called offsets. They don't like the idea that we are generating revenue somewhere else to offset the lost revenue from extending these provisions. That is the argument.

There are variations on that. One variation is, these are temporary tax provisions, and we are making changes in the Tax Code of a permanent nature in order to offset the loss of revenue. At any rate, we tried to fix that, and I think we have fixed that in the bill Senator BAUCUS offered earlier today.

Another argument is these are in current law. We don't want to offset anything in current law. We want to extend current law from now on even though we were not able to do it under the original budget we are operating under. So that argument is being made.

The other argument that is being made, unfortunately, at this point is that somehow or other there is a procedural advantage to refusing to allow us to deal with this legislation. There is some advantage that is being argued accrues to the Republican side in their larger debate about drilling offshore; somehow it helps their position that we ought to drill offshore if they deny us the right to extend these alternative energy tax provisions, the research and development tax provision, the child tax credit, and a variety of other provisions. I have trouble understanding that argument, but it is being made, and somehow it seems to be persuasive to an awful lot of our colleagues.

Let me briefly review the bidding here. As far as I understand, the procedure we have gone through this week is on Monday, the majority leader offered debate and votes on domestic production and other matters. I believe the Republican leader at that time indicated he would respond later.

On Tuesday, I believe Senator VITTER from Louisiana announced that he had seven amendments on energy that he would like to have considered. Tuesday afternoon, the Republican leader rejected Senator REID's offer of four amendments on each side. Tuesday afternoon, Senator REID stated that we would not go forward with amendments on the general subject of energy if we could not go ahead and deal with this extender package. That had to be done first, I think because of his great concern and my great concern that this is an urgent matter. This has languished too long. We need to act on it.

In the last 24 hours, we have had filibusters on this effort to move ahead with the tax extender package a couple of times. We also, of course, had a filibuster on the effort to move ahead with the Warm in Winter and Cool in Summer Act, which is the Low-Income Home Energy Assistance Program, trying to increase the level of direct assistance to low-income families in anticipation of the very high costs they are going to face this winter.

I don't know if there is a way to get the Senate to move ahead. I compliment the majority leader for the heroic effort he has been making in trying to do that. Obviously, he has not prevailed as yet.

The timeline for trying to get action on this tax extender package, or some version of it, is as follows:

In June of 2007, we had a bipartisan energy tax package that we brought to the Senate floor, and it got 57 votes. That was not enough to allow us to go ahead.

On December 13, 2007, we had a bipartisan package that got actually 59 votes. But, again, 59 votes is not enough to let us proceed in the Senate.

On April 18, we did pass a package of provisions of this type with no offset contained. That was a useful thing to do. We have been told in clear and unequivocal terms that we cannot get support to pass such a bill through the House. So we are back trying to get some agreement on how we can pass this package of tax extenders, how we can pass this package of tax provisions related to alternative energy production and related to energy conservation before we leave for the August recess.

This is a high priority. Projects are being canceled and delayed as we speak because of our inaction on this matter. I felt it important to come to the Senate floor and try to urge action once again before the week ends.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Mississippi.

ENERGY

Mr. COCHRAN. Mr. President, we will soon be adjourning the current session of the Senate, and we have yet to consider any meaningful proposals to help relieve the pressure all of our constituents are feeling because of the high cost of energy. Before we return home, we should pass a bill that encourages increased production of energy here at home to reduce our dependence on foreign oil.

Americans have responded to the jump in the price of gasoline by driving less and using less, and the price of oil has decreased significantly in the last 2 weeks because of this effort.

There is a direct link between supply and demand and the price of oil. In order to pay less for oil, we must have more supply and we must have our own domestic supplies.

We have been debating a bill that will not increase supply or decrease demand. The Democrats continue to thwart our efforts on this subject, and we find ourselves in a logjam.

Even though oil prices have dropped some, gas prices remain at an alltime high. Americans are spending an inordinate amount of their hard-earned income on gasoline. My constituents in Mississippi spend the highest amount of their income on gasoline of any State—nearly 8 percent—according to the National Resources Defense Council.

The status quo is not good enough. We must act. If the price of oil can drop more than $20 a barrel in 2 weeks because of decreased demand, imagine what could happen if we could couple that with increased supply.

We are very lucky that we have energy resources in America to explore. Many areas offshore are currently off limits, but they hold great potential, as do the large deposits of oil shale in the Rocky Mountains. With our abundance of coal, we have the opportunity to utilize coal-to-liquids technology as another fuel source. We are not lacking in resources. Yet we continue to be beholden to foreign oil cartels that are not producing at the rate of current worldwide demand.

We should also be making sure nuclear power is available in the quantities we need. Companies such as Entergy in Mississippi have made application to build new nuclear plants. We need to ensure that the permitting process is rigorous but more expeditious.

We have the opportunity today to begin weaning ourselves from our dependence on foreign oil, but in spite of the suffering that high gas prices are creating across the country, we are not moving fast enough. Let's get together and get this job done.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Parliamentary inquiry: Am I correct in assuming that I have 20 minutes?

The PRESIDING OFFICER. The Republican side has 25 minutes 20 seconds.

Mr. DOMENICI. Mr. President, I understand that time is allotted to the two Senators, the senior Senator from Tennessee and Senator PETE DOMENICI, the old man who is leaving the Senate soon.

I wish to tell the Senator from Tennessee, our new chairman of our Republican conference, what a great job

he has done as we have considered whether we should produce more oil for Americans from American-owned resources. That has been an exciting 8½ days. What disturbs the Senator from New Mexico is, even with the explanations the Senator from Tennessee and others have made, people the Senator has read about, the things he told us about in terms of what we ought to be finding and saving, we ought to be producing and conserving, and we ought to use our own resources, we have not been able to get meaningful amendments offered in the Senate to have a vote.

I have come to the conclusion that there are some—perhaps more than I ever imagined—Democrats on the other side of the aisle who don't want to produce more American oil. I really didn't think that was possible, but I have come to that conclusion. I am not saying everybody. There are some who are working very hard on new ideas on how we can produce. But I believe the majority leader has been bugged, bothered, and pursued by those who don't want to let a vote because they don't want to produce any oil on the offshores of America even though there is a lot of it there and it belongs to us.

Having said that, I wonder if the Senator will have a comment about statements that have been made by a couple of Democrats on the other side of the aisle who have said that there are Republicans who just want to drill, that is all they want to do, is drill for more oil. Do you know of any Republicans—you know the Republicans pretty well; that is why you have your job as chairman—do you know of any Republicans whose concern is nothing other than we drill for more oil?

Mr. ALEXANDER. I would say that the Senator from New Mexico knows the answer to that.

And, Mr. President, I ask unanimous consent that the Senator from New Mexico be allowed to proceed through our remaining time in a colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I thank the Chair.

Mr. ALEXANDER. So the answer is no, to the Senator from New Mexico, and I think it is important to go back to when we first started talking about this matter.

I think it might be useful to the people who are watching the Senate and wondering how we do things—maybe they have been watching C–SPAN and thinking: Well, these Senators sure know how to make a lot of fine speeches. And that is what we have been doing for the last 10 days, making speeches. But we haven't been doing anything more. But that isn't what we have wanted to do or what we do want to do now. What we want is a serious debate on legislation to lower gas prices that looks at ways to find more and use less.

The Senator from New Mexico is exactly right. We understand high gasoline prices are the product of a law we learned in economics 101. I don't know how the Senator from New Mexico did in economics 101. I imagine pretty well because he is one of our most intelligent Senators. But economics 101 says the price of a commodity, such as oil—or it might be hay or wheat or anything else—is determined by the supply as well as the demand. So what we said in our Republican caucus was that we wanted a balanced approach; that we wanted to increase the supply—''find more''—and we wanted to reduce the demand—''use less.''

So if I may say just for a moment, we do talk a lot about finding more.

Mr. DOMENICI. Yes.

Mr. ALEXANDER. Because that has become the issue between the two sides, really. We want to do both, and many of them don't. They want to use less, and we want to use less. But it is hard getting many of our Democratic friends to agree that even in the next 30 or 40 years we will need to use significant amounts of new American energy if we want to keep our lights on and drive our cars and heat our houses and have good jobs. It is hard for them to agree with that.

But let me be very precise about our using less. Our ''finding more'' idea was really offshore drilling and oil shale, and our ''using less'' was plug-in electric vehicles. T. Boone Pickens thinks he has a pretty good plan, and he has bought a lot of television time to advertise it, and it is pretty simple: natural gas and windmills. Ours is about as simple: offshore drilling, oil shale, and plug-in cars and trucks.

But let's talk about the ''use less'' part. That will do more for us than the ''find more'' part will. That is the Republican proposal.

Mr. DOMENICI. Yes.

Mr. ALEXANDER. We import, I believe, Senator DOMENICI, about 12 or 13 million barrels of oil a day. We use about 20 million barrels a day, or a quarter of all the oil in the world. So if we could find a way to use less, as well as find more, we could affect the price.

I had a visit just this afternoon from the utility manager in Austin, TX, and we talked about plug-in electric vehicles—our way of using less. What I am trying to do is make the point that there is not anybody over here on this side of the aisle who just wants to drill alone. We know we have to use less.

Now, why do we say plug-in cars and trucks? When I first started talking about that, people thought I had been out in the sun too long. I was far from the first to talk about it. Senator HATCH has introduced legislation on this issue, and it has been supported by a number of Democratic Senators as well. The director of the Austin, TX, utility started talking about it with me earlier today, and here is what he says can happen.

In Austin, TX, they have about 1 million cars and light trucks in his utility district. His judgment is that they can get up to about 10 percent of those cars—100,000—on electricity, where you just plug them in at night at home, within about 5 to 8 years without much trouble. He believes it is a reasonable goal in Austin, TX, to get half of those million cars and trucks on electricity in 10 to 15 years.

Now, Senator DOMENICI, if we could help the United States take half of our 240 million cars and plug them in instead of filling them up with gas, we could cut our import of foreign oil by 4 million barrels a day and stop sending money overseas. And that is our way of using less. So we want to use less.

We have other ways to do that as well. The problem is, we can't persuade our friends on the other side of the aisle to find more because when we say offshore drilling, they say: No, we can't. If we say oil shale, they say: No, we can't. Even if we say nuclear power for plugging in our cars and trucks with clean energy, they say: Sorry, not a proponent of that.

So the answer to your question is, no, we are not just for more drilling—we are all for the demand side and using less. We know that makes a difference. We would just like to have a debate and a bill about both, and we are for both. Unfortunately, our friends on the other side are not. It seems to me they are kind of repealing the supply half of the law of supply and demand.

Mr. DOMENICI. I thank the Senator for the answer, and I want to repeat that supply and demand clearly is what affects the price. The truth is, anyone who thinks we don't have to use oil for a significant amount of time—I mean import it—is just not taking into consideration the reality that what we use most of this oil for is cars and trucks and airplanes and the like, and we just can't make a change overnight.

The Senator just mentioned one great way to lessen that, and Austin has a well-planned idea that would take 15 to 20 years to do half, to get rid of half of the automobiles and substitute electric cars. But what are you going to do during the 15 years or 20? You are going to use cars, today at least, using crude oil. You are going to use gasoline.

Mr. ALEXANDER. Then there is the other half of the cars and trucks that are presumably still running on gas.

Mr. DOMENICI. You bet. Just so we make it clear, if there are Members of the Senate who don't want to let a vote occur on producing more oil because they don't think we need to produce more oil—and I can't imagine why, but some people just say no more carbon; some people say no more oil—they have to understand that we are going to be buying more oil whether we like it or not, unless we just stop driving or shut down America. It is going to continue to bleed us dry.

So we didn't come down here after our majority leader offered an amendment, an amendment that he has been saying had an impact on the price of oil, if you can imagine that. It was an oil speculation bill. As we continue

this debate, the majority leader's solution to an enormous energy crisis facing our Nation—and earlier today the majority leader gave a speech. I don't know if the Senator heard it. In that speech he said many things, but one of the things he said is that oil prices are going down because the Senate is debating—debating—oil speculation.

Now, the Senator from Tennessee and I really work hard at legislating because we think legislation can have an impact. But on such a big world problem, to think that on oil supply and demand that you could come to the floor of the Senate and say in a credible manner that the price of oil has come down because a bill was introduced—and the bill was the speculation bill—you know, people haven't gone to sleep. The speculation bill has been written about, and the best thinkers have said: First, you don't need one; and, second, this one would not do anything.

Mr. ALEXANDER. The Senator from New Mexico is right, and you are not the only one who thinks that. I picked up the New York Times a couple of days ago, and in their editorial—and they do not always agree with the Republican side of the aisle, I will have to concede—but they basically said the speculation bill is not a solution to high gas prices. Warren Buffett, who is a pretty good observer of the American economy, has said it is not speculation, it is supply and demand.

I know for people who may be watching the Senate, they may ask: What are you hung about up about in the Senate? Why don't you work across party lines and come up with some good ideas about supply and some good ideas about demand and put them in a piece of legislation and vote on it and go home and you will have taken a big step in the right direction?

We have said that is what we want to do: oil shale, offshore drilling, and plug-in cars.

The problem is, we haven't been able to do that because the Democratic leader, for some reason, is reluctant to do the supply part of supply and demand.

Mr. DOMENICI. I want to also say, Mr. President, I think some of us who work hard in the energy field know why the price of oil has dropped a little.

First, those of us who have worked at it are concerned about the supply and demand problem because we entered an era for a short time when, obviously, there was no more new supply on hand and the demand was growing. And guess what happened. The United States, the American people, not because we passed a lot of laws but because they felt the price of oil in their pocketbooks, changed the way they behaved, and as a result they saved enormous amounts of crude oil. We estimate right now that U.S. demand has been decreased by 4.3 percent, and that is about 1 million barrels a day.

When the Senator just spoke a minute ago, he was right. He gave the numbers, and 5 percent of that number would have been 1, and that is what we are at—1 million barrels. That came down. That lessened the demand, the world economy had some problems, less money was spent, and the demand came down. That was supply and demand working at its best.

Mr. ALEXANDER. I would say to the Senator from New Mexico, that is 1 million barrels a day using less. What we are saying, with plug-in cars and trucks, we can cut out another 4 million barrels a day over a few years. But if we use offshore drilling and oil shale, we can add 3 million. So we can reduce by one-third our imported oil and change the price of gasoline. And I would say to the Senator from New Mexico that some people say: Well, changing the price is way off in the future. I thought that today's price is based upon the expected supply.

Mr. DOMENICI. You bet.

Mr. ALEXANDER. And the expected demand. From the day the world thought that we might increase that by a few million barrels a day, or reduce that by a few million barrels a day, the prices started going down. Am I wrong about that?

Mr. DOMENICI. Well, if you say just coming up with the idea would do it, then I would say no, the Senator is not right. But if we were to have done that, and it was a matter of law in America that we were going to find more because it was there—you know, Americans are pretty good at drilling. Americans don't mind using the word ''drill.'' They have told us now in the polls, in answer to the question, that they are, by 75 percent, for more drilling if it is on property we own. In fact, offshore has been the answer. So they want us to find more, and they also want to use less.

It is obvious that if we would have passed that—and anybody who says we could not have because we didn't have time is just trying to pull the wool over the eyes of Americans. How many days would it take to do that if we had the will and we were given 7 days and we made a deal? We can't make a deal on anything else, but if we made one and we were going to have 7 days to debate this bill, amendments come as they may—take down the thing that the majority leader put up there because he didn't want us to vote—7 full days of debate—we could have produced a bill that would have opened the offshore permanently, except for the 15 percent that is already open, and we would have adopted the use less, find more provisions you have so eloquently brought to us from some of your experts, the experts you talked to, some of them at your National Laboratories.

Just think, after we passed that and had a signing ceremony at the White House to say: Here is what we have done, Americans. You are saving on your own, so you are using less, and we really think that is great, but we think there is still danger the price will go up, so we want to find more to keep it down—we are having the ceremony where we are celebrating both.

Mr. ALEXANDER. The Senator says we could have done that in maybe a week.

Mr. DOMENICI. You bet.

Mr. ALEXANDER. We could have agreed to a large number of amendments and said: Let's have an hour on each amendment and let's have a vote, and we might win some or lose some. But may I remind the Senator that Senator REID brought this to the floor nearly 2 weeks ago. Could we not have started on that day to have amendments from the Republicans and amendments from the Democrats, limiting debate to 1-hour per amendment with all amendments germane to energy? Wouldn't that be a normal way for the Senate to work?

Mr. DOMENICI. You were here, and we got three energy bills through. People think we did nothing, but we did. We had a 6-year span here where we did a lot for energy. We changed the CAFE standards for cars. What is that going to do? Use less.

Mr. ALEXANDER. That is the single most important step Congress could take to reduce our dependence on foreign oil, according to experts at the Oak Ridge National Laboratory, and Congress did that last year.

Mr. DOMENICI. And we did it with just one other item. It certainly didn't take as long as we have been down here talking instead of offering amendments—because we could not. We passed it, and there it is. Everyone knows it is great.

People are telling us: Don't worry about the offshore, it takes 10 or 15 years. Do you know what they told us about the ''use less'' provision that is so important, called new CAFE standards for American automobile fleets, all our cars? They told us that will not be totally effective for 20 years. The curve goes like this: you start—you don't save any, you don't save any, and then in the 15th and 20th years, you start to finally save.

Should we not have done it because it takes a long time to take effect? Of course not. We were told to get started on it because, as you said, it is the single biggest way to save gasoline and diesel fuel that anybody knows of.

Mr. ALEXANDER. It seems as if our job, Senator, the way I always remembered it, was to look ahead 5 or 10 years.

Mr. DOMENICI. Sure.

Mr. ALEXANDER. What if President Kennedy said we can't go to the Moon because it might take 10 years or Benjamin Franklin said we can't have a republic because it might take 50 years? And we also said—you just said it: From the day we pass legislation that includes oil shale, offshore drilling, plug-in cars and trucks—from the day we do that, then the buyers and sellers of oil say: It looks as if there is going to be a larger supply and less demand, and maybe we will pay a little less for oil.

Mr. DOMENICI. I want to talk to the Senator for a minute about whether we are capable of doing big things that affect the energy field. We had a chance here in the last 7 to 10 days to do something rather big. But do you know what we did 4 years ago? I was fortunate. I left the Budget Committee, where I was chairing—it seemed as though I was, at the pleasure of the Republicans, running that thing for so long, they never wanted me to step down. I finally got tired of it, and I took the Energy Committee. The first bill we passed addressed an issue that is part of this ''find more.'' It addressed the issue of why we did not build a nuclear powerplant for 27 years. We answered it in that legislation, didn't we?

Mr. ALEXANDER. And there has been a remarkable change today just because of that legislation 4 years ago.

Mr. DOMENICI. Do you know how many applications there were when we passed that legislation, for all America? Zero. That meant something was awry.

Mr. ALEXANDER. For nuclear powerplants.

Mr. DOMENICI. We had not built any. You have to apply, and so you go there and look and you see whether there are any applications. As of today—I just got a briefing—do you know how many full-blown applications there are to build, locate, and design? You can put all that in one now. It takes a long time—4 years after you have done it. Sixteen American companies or consortia of companies, even though it takes a long time and they are going to have to have their money at risk for a long time, put their applications in and said: I want to get in line because I want to build, I want to find more energy.

We are really grateful; for once, we have one where we don't have to argue about pollution, right?

Mr. ALEXANDER. It is the only source of large, dependable amounts of energy with no carbon, no sulphur, no mercury, no nitrogen. It is our cleanest. And as the price of coal goes up and natural gas goes up, it is the least expensive of our reliable forms of energy.

Mr. DOMENICI. So, you see, when there is a will, there is a way. The problem is, there was no will on the part of the Democratic leader—and perhaps some behind him. I am not going to say all of them, but surely they didn't express any dissatisfaction with what was going on until, at the end, we started feeling there was some rumbling going on. Maybe they had some friction. But nobody over on that side seemed to be saying to their leader: We want to get busy here and have some votes. There was not a will, so you can't do it. You couldn't change nuclear power without a will.

In that same bill we were referring to, we changed a lot of things. I wanted to tell you, one thing you have been interested in is the electric grid because you are concerned about how we are going to get the electrical power when we cannot build powerplants. Certainly, it takes a long time to use this nuclear one as the way. It takes a long time. You can build coal fastest, but there are a lot of problems with EPA and others on that, right? Then you can build natural gas. That is pretty much—you and I look upon that as Senators and say: Yes, you can do it, but it sure is risky because we need that natural gas so badly. But that is the only way they built them in the last few years. That bothers you, right? Doesn't it? Aren't you worried about that?

Mr. ALEXANDER. Madam President, how much time do we have remaining?

The PRESIDING OFFICER (Ms. KLOBUCHAR). The Senator has 1 minute 7 seconds remaining.

Mr. ALEXANDER. Let me ask the Senator from New Mexico on our last minute and 7 seconds, one of the descriptions I like is his description of how we need to produce more American energy as our bridge to the future when we will have a different kind of energy.

Mr. DOMENICI. I would think, if we could start using these words—we need a bridge to the future—and then we got together and thought about that and then said, What is that? Remember a while ago I told you how long it would take in the city of Austin before you would get all those cars that are using oil off the streets?

Mr. ALEXANDER. Ten to fifteen years, half of them.

Mr. DOMENICI. Half of them. And then all the other things we talked about, CAFE, how long it would take going up and then start down—that applies to so many things in America that the truth is we are not going to be in a position to look to new, brand new generation of energy to move cars and trucks. We can't do that for a decade. So there is a bridge taking place, a bridge from now until we do not need oil any longer. But what does the bridge consist of? It is oil. Oil is the bridge between now and the time we do not use oil.

I regret to tell you, for anyone who thinks there is no bridge—it just comes to me now—then they can walk into a canyon and drown in the water underground that is running there because they didn't walk on a bridge and they drowned themselves. I do not want to drown our country. I want to find new oil so the bridge will be less somebody else's and more ours.

I understand the Chair tells us we are out of time. We will behave very well. Thank you very much.

I yield the floor.

The PRESIDING OFFICER. The Senator from Washington is recognized.

REFUELING TANKER PROGRAM

Ms. CANTWELL. Madam President, I come to the floor this afternoon to join my colleague from Washington State to talk about—I actually say it is an energy issue. Yes, it is also about the Air Force and Department of Defense air refueling tanker program, but I believe it fits well into this debate today because we are talking about energy and the high cost of energy.

This week, I am sending a letter to Secretary Gates, along with my colleague, Senator MURRAY, to make sure the Pentagon is doing its job and eliminating the evaluation errors identified by the GAO to make sure we have a fair competition and an even playing field when it comes to the air refueling tanker program.

The fact is, our military's air refueling requirements are already well known. The original requirements were developed with input from the warfighting combatant commanders and approved by the Air Force Requirements Oversight Council and the Joint Oversight Requirements Council. According to the Federal rules, major changes to these requirements cannot be made without going through this process again.

I think failing to account for what are full life-cycle costs and estimates or changing the requirements in the RFP would be another colossal failure in this long process. This was an evaluation problem, not an RFP problem. I am here to say that if the Pentagon fails to learn the lessons from the GAO decision and changes the requirements that have already been set, then I am sure they will hear from many of my colleagues and myself here in Congress. There may even be another GAO protest.

The American people do not want to have an amended RFP that will result in a protracted protest rather than the tanker procurement we are all seeking. Therefore, the new competition should be based on the requirements that were reflected in the original Request for Proposal dated January 29, 2007. The world our warfighters are operating in has not changed since those requirements were set. I see no need for them to be changed.

We are here on the floor now talking about the high cost of energy. The Boeing Company worked hard to meet the Air Force requirements for the tanker bid process. It picked the 767, the platform that best matched those Air Force requirements. If the Air Force had called for a larger tanker, Boeing could have offered a bigger plane, the 777, with far more fuel capacity. But the plane that Boeing picked, the 767, is a much better match for us, the American taxpayer, and for our environment.

The Air Force currently uses more fuel than any other branch of the military, and the Boeing 767 plane burns 24 percent less fuel than its competitor and would have saved the taxpayers approximately $30 billion over the life of these tanker planes.

As my colleagues are talking about what to do about the high cost of fuel, I ask them to consider one of the Government's largest users of fuel—the Air Force—and whether we should make sure fuel efficiency is integrated into the Air Force's procurement decisions.

The Air Force uses more than half of all the fuel the U.S. Government consumes each year, and aviation fuel accounts for more than 80 percent of the Air Force's total energy budget. In 2006, the service spent more than $5.8 billion for almost 2.6 billion gallons of jet fuel—more than twice what it did in 2007.

The American taxpayers obviously cannot afford their own higher fuel costs. I do not see how the American taxpayers can afford the U.S. Air Force running up a higher cost energy bill as well.

An Air Force Assistant Secretary told the House Armed Services Committee that it wants to leave a greener footprint, with more environmentally sound energy resources. He testified that the rising gas and oil prices had forced the Air Force to take a harder look at the budget to find ways to save money while maintaining a high operations tempo in the war on terrorism.

Assistant Secretary Bill Anderson said this:

> The increasing cost of energy and the Nation's commitment to reducing its dependence on foreign oil have led to the development of the Air Force energy strategy, to reduce demand, increase the supply and change the culture within the Air Force so that energy is considered in everything that we do.

I believe the Boeing 767 would have been a much better choice for the Air Force in energy savings and fuel efficiency. As I said, it burns 24 percent less fuel than the alternative that was put on the table. The Air Force did not give full consideration to the national security impact of these fuel efficiency issues when it made its decision on the tanker.

Given that the Air Force, as I said, uses more than half of all of the fuel the U.S. Government consumes, I hope they are thinking about the big picture issue when it comes to making sure our Nation reduces its dependence on foreign oil.

This 767 has greater operational flexibility. It can land on shorter runways and it can be based at more locations worldwide with existing infrastructure instead of making us, the taxpayer, pay for more and more infrastructure costs.

Boeing's medium-sized 767 tanker makes a lot more sense than the oversized option that was originally outlined by Northrop Grumman/EADS, and its greater operational flexibility.

The tanker size was determined in the original requirements. And so the fact this plane, the 767, is more fuel efficient, can land on shorter runways, can have more base operations, in fact, over 1,000 more base operations worldwide, and the fact that the other costs to the taxpayers in the long run are lower compared to the other offer the Air Force is considering, we must make sure we are doing our job here on the floor of the Senate to make sure these issues of cost savings to the taxpayer are considered.

I want to make sure the Department of Defense takes a hard look at these issues and weighs the loss of critical skills in the U.S. manufacturing base. In this time of challenge, America wants to know it can rely on a workforce and manufacturing base here in the United States for our preparedness for whatever conflict comes in the future.

I want to make sure that the problems identified by the Government Accountability Office are corrected and that we move forward. But failing to account for lifecycle costs on fuel, on infrastructure, on maintenance would also be another failure in this process.

I hope my colleagues will remember this was an evaluation problem, not the RFP. And we hope we will straighten this out as we move forward.

I see I am joined on the floor by my colleague, the senior Senator from Washington. I hope she too can add to the focus of how those high costs are something we should be considering in making sure the Air Force moves forward on the appropriations choice to give the men and women of our country a long overdue air refueling tanker that we deserve.

I yield the floor.

The PRESIDING OFFICER. The Senator from Washington State.

Mrs. MURRAY. I come to the floor this afternoon to join my colleague from Washington State and thank her for her comments and attention on this enormously important issue to our State and to our entire country.

As she outlined earlier this month, the Department of Defense took a rare step involving a major procurement contract. Defense Secretary Gates decided the competition to replace the next generation of aerial refueling tanker was so flawed that it should be rebid. He elevated that competition from the Air Force to his office, and he promised to address all of the findings raised last month in a Government Accountability Office ruling which determined that the contest was skewed in favor of the European company Airbus and against Boeing.

I was glad to hear the Defense Secretary had decided to take new bids and start over. But I come to the floor today to join with my colleague from Washington State because I too have very serious concerns about the Pentagon's plans for that new competition. Some Pentagon officials are already indicating to us they are considering using this opportunity to amend the request for proposals to give greater weight to a bigger plane.

As a result of those comments, defense experts and analysts are now beginning to predict that as a result of that, the contract will simply go back to Airbus. I brought this up in a meeting this week with Acting Air Force Secretary Donley, in which we discussed the history of this tanker contract, and we talked about the needs of the Air Force, the criticisms that have been lodged against the latest competition, and our concerns about the amendment to that RFP that would tip the scales to favor one bidder.

I am not saying the Pentagon cannot change the requests for proposals. However, I strongly believe that all those changes have to be rooted in the original requirements that were set out by the Air Force when it began the process of replacing the military's midsized tanker, the KC–135.

I recognize the Pentagon's procurement team is very serious about getting this competition right. They want to get the right tanker for our warfighters. They want to do it quickly. But I also want to make it clear that if the Pentagon moves forward with this effort, officials must take the GAO's findings seriously and ensure that this competition is as fair and transparent as it can be.

Last month the GAO upheld eight points of protest that were raised by Boeing, including that the Air Force changed directions midstream in the process about which criteria were more important. It did not give Boeing credit for providing a more capable plane, according to the Air Force's description of what it wanted. Yet it gave Airbus extra credit for offering amenities the Air Force did not even ask for. The GAO report said the Air Force deliberately and unreasonably increased Boeing's engineering costs. When that mistake was corrected, it was discovered that the Airbus tanker actually cost tens of millions of dollars more than Boeing.

The GAO found that the Air Force accepted Airbus's proposal even though Airbus could not meet two of their key contract requirements. They could not meet the contract requirement, Airbus could not, and refused to commit to providing long-term maintenance as was specified directly in the RFP, even after the Air Force repeatedly asked them for it.

Secondly, the Air Force could not prove that Airbus could refuel all of the military's aircraft according to procedure. This goes to show how there were major flaws that occurred throughout that process.

So as it continues with this competition now, the Department of Defense must make sure there is no reason to question its motives. If they truly plan to make this a fair contest, Secretary Gates has to ensure that before the selection team reopens this competition, it goes back and addresses each one of those GAO findings. It has to ensure that both companies are on the same footing and it has to prove the competition is as transparent as possible. Our refueling tankers are the backbone of our global military strength. They are stationed around the world today and they service planes from every branch of our Armed Forces. This is a contract that is ultimately worth more than $100 billion. We are going to have these planes for decades. We cannot afford to make mistakes.

As I said at the beginning of my remarks, I recognize that Secretary Gates is very serious about getting this competition right. At the end of the

day, this is about getting the right equipment for our airmen and airwomen who are put in harm's way for our security every day. Our servicemembers deserve a plane that will enable them to do their job and return home safely.

Our taxpayers deserve to have confidence that the errors are going to be fixed in this contract as the GAO outlined. So I come to the floor today to say, as the Pentagon moves forward with this effort over the next several weeks, I strongly urge our officials to take those GAO findings seriously and ensure this competition is as fair and transparent as it can be.

SAMUEL SNOW

While I am on the floor this afternoon, I want to take a moment to say a few words about a different topic; that is, about a gentleman who sacrificed very dearly for our country.

My colleague from Florida, Senator NELSON, was on the floor earlier today talking about a veteran named Samuel Snow who traveled from Florida all the way to my home State of Washington, all the way across the country this past week, to finally receive the honorable discharge from the Army that he deserved to get more than 60 years ago.

This man traveled from Florida to Washington to finally get an honorable discharge 60 years later. Samuel Snow was one of 28 African-American soldiers who were wrongly prosecuted in a court martial for a crime that occurred in Seattle at Fort Lawton in 1944.

Last weekend, 64 years later, the Army finally publicly acknowledged that Mr. Snow and 27 others were unjustly convicted and issued a formal apology. As my colleague from Florida talked about this morning, Mr. Snow came all the way from Florida to Seattle and participated in the dinner there with sons and daughters of some of the men he served with in prison. But later that evening in Seattle, Mr. Snow checked himself into a hospital, and he missed the next day's ceremony. His son Ray Snow went to the ceremony and accepted the honorable discharge on his father's behalf, that honorable discharged he had waited decades to receive, and took it from that ceremony, went to his father's hospital bed and was able to hand it to him personally and see the smile in his dad's eyes for the first time.

Sadly, very sadly, his father, Mr. Snow, passed away shortly after he was handed that honorable discharge. Samuel Snow was a hero for our country who suffered unjustly. He deserves the thanks of our entire country for his service and his sacrifice. My thoughts now are with the Snow family during this difficult time. I am so glad he was able to finally receive that honorable discharge he waited for so many years and to receive it before he died.

I yield the floor.

The PRESIDING OFFICER. The Senator from Utah is recognized.

RESEARCH TAX CREDIT

Mr. HATCH. Madam President, I rise today to express my growing alarm over the current state of the expired and expiring tax provisions, and to express what I see as real problems in getting these important provisions taken care of before Congress adjourns this year.

My office is increasingly being contacted by businesses and individual taxpayers, not only from my home State but around the Nation, who are asking what the delay is in taking care of the so-called extenders. I am sure this is true of all offices of all of my colleagues on both sides of the aisle.

It is already way past the time when Americans should have been able to expect a reasonable Congress to take care of what in prior years has been a fairly routine issue. While the almost annual rite of passing a tax extenders bill has never represented an ideal way of governing, the Congress has generally exercised a modicum of responsibility in getting this chore taken care of within a reasonable time. That is, until recently.

Over the past several years, Congress's ability to take care of what is the least common denominator in our duty to ensure a stable tax system has eroded. We are now bordering, in my opinion, on gross negligence. No wonder the Congress's approval ratings are so incredibly low.

Mr. DURBIN. Would the Senator from Utah yield for a question?

Mr. HATCH. I would be happy to.

Mr. DURBIN. We were doing half-hour segments. We had 11 minutes remaining on ours. How long is the Senator planning on speaking?

Mr. HATCH. Not more than 10 minutes.

Mr. DURBIN. I ask unanimous consent that we have some reallocation of the time.

The PRESIDING OFFICER. Without objection, it is so ordered. The time will be reallocated.

Mr. HATCH. I was told to be here at 5:40. I thank my dear colleague for his kindness and understanding of the situation.

Senate leaders on both sides have tried to make progress on the extenders bill but have repeatedly failed. The distinguished majority leader has chalked up this failure to Republican obstructionism, as he has with almost every other failure of his party to pass legislation this year, or legislation they desire.

Contrary to the accusations of our leader on the other side, the reasons for Republican opposition to the Democratic extender bill are grounded in principles of solid tax policy and fiscal responsibility. Unfortunately, our position has been grossly distorted by many on the other side and many Democrats on the outside. The Democratic extenders legislation has failed because it contains fundamental flaws. The other side is insisting on raising taxes to pay for the loss in revenue from extending the expired tax provisions. Their so-called pay-as-you-go or pay-go rules call for all revenue losses to be matched with revenue increases or certain spending decreases. While I continue to be a strong believer in fiscal responsibility, there are three basic reasons why Republicans have rejected the false fiscal responsibility of the Democratic extenders bills.

First, it is wrong to raise taxes on one group of taxpayers in order to prevent another group of taxpayers from suffering an increase in taxes. Second, it is wrong to offset temporary extensions of current law with permanent tax increases. Finally, it is wrong to increase taxes at a time when the Federal Government is already collecting more revenue as a percentage of gross domestic product than the 40-year historic average. This is particularly true at a time of slow or no economic growth. Our friends on the other side are ignoring a solution the Republicans have offered that would finance the tax extenders bill in a fiscally responsible way. We believe we should reduce the explosive growth in Federal spending instead of raising taxes in order to offset the revenue losses. Just during this Congress, Democrats have passed billions of dollars of new spending without bothering at all to offset the effect of these increases on the deficit. Billions more of new spending has been approved through the Democratic budget resolution.

Among the tax provisions that have already expired is one the business community relies on to keep products and processes flowing, innovations that are the lifeblood of our economy. Businesses across the country are, once again, anxiously waiting to see if we will reinstate this important incentive for innovation, the research tax credit, which I have championed for decades. The purpose of the research tax credit is to encourage investment in technological innovation. Companies generally cannot fully recover R&D expenditures, thus discouraging companies from investing in innovation. The Federal Government provides tax incentives in order to support business R&D, and the business community is depending on us to continue to support R&D. We cannot wait until the end of this year to commit to this vital investment, this vital tax policy. The time is now.

At a time when we are looking for ways to spur economic growth, I know of no thoughtful person who does not believe research and development is vital to our economy and to our future prosperity. My colleagues on the other side of the aisle are trying to create ridiculous permanent offsets in order to pay for temporarily extending the research tax credit which I argue we cannot afford to lose.

Many U.S. companies are looking elsewhere to establish their R&D activities. Testifying before the House committee on Science and Technology, Dr. Robert Atkinson, president of the Information Technology and Innovation Foundation, testified that ''eight of the top ten [research and development]-spending companies in the world

have established R&D facilities in China.''

They could just as easily have been established here. If we are not careful, we will soon not only be dependent on foreign oil but also dependent on foreign research and development. The result would be a tragic loss of American jobs, economic growth, world leadership, and prestige. We simply cannot allow this to happen. Here we have a tax incentive that has been around for almost 30 years, which enjoys wide acceptance by the business sector, the academic community, economists, and which has very broad support from practically every corner of the political spectrum. Yet this tax credit provision has been allowed to expire 13 times. Each time we play the extension game, Congress seems to get a little more cavalier about the expiring or expired provisions in general and the research credit in particular. While we play this extension game, our business community loses out on chances of innovation that could spur economic growth at a time when we need it to be spurred.

Now is not the time to create tax uncertainty for employers. A retroactive or, even worse, lapsed research credit will cost American jobs. There is no way you can avoid it, if we don't get this done. Seventy percent of research tax credit dollars are used for wages of R&D employees. It is estimated by the Information Technology Association of America that the lapse of the research tax credit will cost the economy $51 million per day. Are my friends on the other side of the aisle willing to risk losing American R&D jobs and severely impact the already difficult U.S. economy in the name of a perverse and wrong-headed sense of fiscal responsibility?

We cannot drive our economy into the ground in the name of false fiscal notions such as a pay-go rule that is used only to grow Government and to add more taxes to people. Tax increases are not the prescription to what ails our economy. But extending these expiring tax cuts and making the research tax credit permanent will help our economy grow. I urge my colleagues on the other side of the aisle to reconsider their opposition to spending cuts as a way to responsibly pay for the cost of extending the expired and expiring tax provisions. I wish we could make the research tax credit permanent. If we would, it would help our economy. It would help companies to have some sense of what is going to happen in the future. It would help them in their planning. It would help create jobs. It would help to create more and more innovation. My gosh, it makes sense. I hope my colleagues will reconsider and that we can get this tax extenders bill passed as soon as possible.

Having said all that, I thank my friend, the majority whip, for his graciousness in allowing me to make this statement, especially since I have been picking on him to a degree, only in good nature but also in seriousness. We have to work together. We have to start solving some of these problems. We can't do it by always increasing taxes.

I yield the floor.

The PRESIDING OFFICER (Ms. CANTWELL). The majority whip.

Mr. DURBIN. Madam President, the Senator from Utah is my friend. We disagree on so many things politically. But on a personal basis, we have a very good friendship and relationship. I am hoping the day will come when we find that issue on which he and I can march together arm in arm to achieve greatness for the country. I know that day is coming. I am an optimist.

Mr. HATCH. If the Senator will kindly yield, this is the issue. This is one we could both march arm in arm on. We both agree. The question is, How do you pay for it? Frankly, we are not going to go with the pay-go rule. We have to find some other way. I would like to make it permanent. I would like to get rid of the AMT that is hurting so many, 24, 25 million people. I believe my colleague wants to do these things as well. But we have to find a way of getting together and doing it. I think my good colleague knows where I stand on these issues.

Mr. DURBIN. I thank the Senator from Utah.

Madam President, we have a deficit. It is terrible. It is a debt which is growing. It is a mortgage on America. Our children are going to be saddled with it. The mortgagor, the bank for America's debt? China, Korea, Japan, the OPEC nations; they are holding our mortgage. Many of us believe this isn't fair to our children and grandchildren to continue to pile on the debt. We came up with a very simple approach. If you want to spend money, you have to pay for it. You either have to raise taxes or cut other spending. If you want to cut taxes, you have to have some balance; in other words, cut spending or raise another tax. When it is all over, we want a zero sum so it doesn't add to the national debt.

I don't think that is unreasonable because it means we have to make choices. Here is the choice we faced in the last 2 days. We have a thriving industry in America for renewable energy. I can't believe what is going on in my State of Illinois. I go into parts of downstate Illinois and see farm after farm covered with wind turbines. Outside of Bloomington, IL, is the Twin Groves project, 240 wind turbines generating enough electricity for cities in Bloomington normal—no pollution, farmers love it because they get paid for the wind turbines on their land, and they can plant the corn and soybeans right up next to it. So it is a win-win situation, and it is there because we had a provision in the Tax Code which created an incentive to invest in wind power, solar power, geothermal, the clean energy solutions that will generate electricity without causing more global warming.

We brought it to the floor. We said to our colleagues: We need to renew this. It is about to expire. If we don't renew it, these businesses may not reinvest. But giving a tax break takes money out of the Treasury, so we want to balance the books. To balance the books, we suggested raising a business tax to offset the cut in taxes for renewable energy, balance the books. The Republican side, the party of so-called fiscal conservatism, rejected this. As my friend from Utah said, they don't believe we should have to pay for tax cuts.

Well, tax cuts, unfortunately, take money out of the Treasury and add to the deficit. We think balancing the books is the only way to get this deficit under control. So when the vote came—there are nominally 51 Democrats, 49 Republicans—there were a few absences on both sides, but we were able to attract 5 Republicans who would join us for the renewable energy tax credits.

The others said: There is no way. Forty-one of the forty-nine Republican Senators have signed a letter which I call ''death before taxes.'' It is a letter which says they will never—ever, ever, ever—vote to increase a tax, never. That kind of paints you into a corner. Because if you are not willing to increase a tax on someone to cut a tax on someone else, you are stuck with a Tax Code that never changes, or you are stuck with a deficit which continues to get worse and worse as you try to make the Tax Code a generator of economic growth.

The Republicans, for the last several weeks, have been on the floor talking about America's energy picture. They should. We have talked about it a lot on our side of the aisle. Their solution is a solution which is old-time religion: Drill, drill offshore, drill onshore, drill everywhere. If we drill and find more oil, we will be fine.

They ignore the reality. The reality is, if you look at the entire potential supply of oil in the world, the United States has access and control of 3 percent of the world's oil. Each year our economy consumes 25 percent. So let's do the math. If you drilled all the oil available in the U.S. offshore/onshore, how long could we sustain our economy just by drilling? The answer is, we couldn't. It can't be done.

What is the alternative? You can import oil, which we are doing now, 70 to 80 percent of the oil we use is brought in from overseas, from other countries, or you can find another approach—responsible exploration and production in America that doesn't violate basic environmental regulations, doesn't run the risk of contaminating or polluting offshore, and then a forward-looking approach to energy, an approach which looks for renewable, sustainable sources of energy for the future, that deals with the possibility that we will replace current electric power generation with pollution-free generation from wind turbines and solar power,

moving toward a new generation of cars and trucks.

A few years ago, about 4 or 5 years now, I offered an amendment on the floor to improve CAFE standards. We had not increased fuel efficiency in cars for over 20 years. We were stuck with an old number. We were falling backward. People bought heavier trucks and SUVs, and they were not as fuel efficient. So I said: Let's have a new goal, moving toward more fuel-efficient cars. Let's have a challenge to our industry and to our science to find these new cars for the future, safe cars, cars that use less fuel and meet our needs. I got beaten badly on the floor when I offered that, but gasoline wasn't $4.50 a gallon then. I lost that attempt twice in a row. The votes weren't that good. I am not sure I even had 30 votes out of 100 for the idea of fuel efficiency. But someone once said: There is nothing more pregnant than an idea whose time has come, and with gasoline at $4 a gallon, the idea's time has come. We passed a law to require more fuel efficiency in years to come. So we are moving in the right direction there. That is the future for us. The future for us is to find ways to conserve, find ways to be more fuel efficient, find ways to generate more renewable energy that doesn't pollute the environment.

Today's vote was a disappointing vote. We tried to create incentives for renewable energy, and only 5 Republicans out of 49 would come and vote with us. Four of the five are up for reelection, some of them facing tough contests in November. They know it is hard to explain voting against this bill. They voted against our bill, which would have created incentives for biomass and hydropower, incentives for solar energy and microturbines, biodiesel production, renewable projects, coal electricity, advanced coal electricity demonstration projects, plug-in electric cars, new batteries that we will need for plug-in hybrids, ways to reduce pollution from trucks with idling reduction units, installing more E–85 fuel pumps around America so consumers have a choice to use a cheaper and more environmentally friendly fuel, home credits, building credits. All of these were incentives to move America in the right direction, not the wrong direction, and only 5 of the 49 Republicans would vote for that.

Their goal is more drilling. Their agenda is written by the oil companies. The oil companies have consistently asked for more and more and more that they can put in their portfolio of possible areas to drill. However, currently there are 68 million acres of federally owned land under lease to the oil companies that they are not using, they are not exploring. They are not bringing oil and gas out. They have ample opportunity in that area and others to meet the needs of future exploration. They are not doing it. Yet from the Republican side of the aisle, we hear they need more.

This sign shows that the Republicans have engaged in 91 filibusters in this session. For most people who are following this debate that number may not mean much. In the history of the Senate, the largest number of filibusters in any 2-year period of time was 57 before this session. What is a filibuster? It is an attempt to slow down or stop the Senate from acting. Ninety-one times the Republicans have tried to slow down or stop the Senate from acting. Today they did it again. They stopped us when we tried to pass this energy policy for America that creates incentives for renewable energy.

That isn't all that was in this bill. It wasn't just about energy alone. In this bill was protection for working families from the alternative minimum tax, creating more tax liability for them in next year's return. That is a good bill as far as I am concerned. We should be protecting working families who are struggling to get by.

In this bill as well was $8 million for the highway trust fund. We are afraid this highway trust fund will run out of money before the end of the year and 400,000 good-paid workers would lose their jobs in America. I don't want to see that happen in my State; I don't think any Senator does. We tried to protect our economy from that happening in this bill.

There was a provision, totally unrelated—and critics of Congress say: Why do you do things like this? Why would you put that provision in a bill about energy and jobs? But I will tell you, I would put that provision I am about to describe in any bill. It is called mental health parity. This bill would require private insurance companies to provide opportunities for people to buy health insurance to cover mental illness. We have been fighting for this for as long as I have been in the Senate. The fight was started by Paul Wellstone of Minnesota. What a great man he was. We lost him when he died in a plane crash 6 years ago, and we have tried to pass this bill ever since. I think we should put that amendment on every bill. There are so many American families who are affected by mental illness. We put that before the Senate today and only five Republicans would vote for that. I don't understand their thinking. Many have said they really believe in it, but they wouldn't vote for it. That is where we are.

So their filibuster ended up stopping a bill from moving forward, as it did earlier this week. Earlier this week, another Republican filibuster stopped a bill which had 34 or 35 provisions in it to deal with a number of different issues. Some of them were health related: a registry for those suffering from Lou Gehrig's disease so we can do better research in finding a cure; efforts for additional research in rehabilitation activities at the National Institutes of Health for those suffering from paralysis; a stroke treatment bill, a bipartisan bill—all of these bills, incidentally, have passed the House of Representatives overwhelmingly. The Melanie Blocker Stokes MOTHERS Act—one I am familiar with—dealing with postpartum depression to try to make sure new mothers who are suffering from that depression get the treatment they need. Vision care for kids so that we help the States pay for more visual screening so kids don't fall behind in the classroom simply because they need eyeglasses.

Then we had a number of bills out of our Senate Judiciary Committee: a bill to reauthorize a program to find runaway and homeless kids. The Emmitt Till unsolved Civil Rights Crime Act, Senator DODD and I and others have cosponsored this one. Those responsible for killing civil rights workers, no matter how long ago, should be held accountable, and this bill would have moved us in that direction—a bill to deal with mental illness and crime, unfortunately, closely linked, and we should be doing something about it; bills dealing with reducing Internet child pornography.

All of the things I have just mentioned—health care and crime related—were in a package of bills which the Republicans refused to support. I don't get it. I don't understand it. I don't know how you could go home and explain to the people you represent that you voted against these bills. Obviously, they think it is easy to do, and maybe it is for them. It wouldn't be for me. In the State of Illinois, there are too many people affected by these bills.

The Republicans consistently—with their filibusters and holding back their votes—have stopped us from doing the people's work. I understand when people think of Congress across America, it is not in positive terms. They want us to do more. They want us to respond to the issues of the day, the things that make a difference. Whether we are dealing with medical issues, of research; whether we are dealing with law enforcement; whether we are dealing with the energy picture—these are things on which we should be voting to move forward. However, time and time and time again, the Republicans, through their filibusters, have stopped us in the Senate. That is what happens in a 51-to-49 Senate where it takes 60 votes to do anything significant. They have control of the agenda—at least control enough to say no—and they have said no repeatedly on 91 different occasions with their filibusters, breaking all the records in the Senate.

I wish to get back to this energy policy. I don't want us to go home without addressing it, but I am afraid the Republicans have closed the door not just yesterday but again today. Earlier, the leader on the Democratic side, Senator HARRY REID, read from this morning's New York Times, July 30, an article by Tom Friedman entitled ''Drilling in Afghanistan.'' What Tom Friedman said about the Republican strategy on energy, I think, really hits the nail on the head. I quote from this article:

Republicans become so obsessed with the notion that we can drill our way out of the

current energy crisis that reopening our coastal waters to offshore drilling has become their answer for every energy question. Anyone who looks at the growth of middle classes around the world and the rising demand for natural resources, plus the dangers of climate change driven by our addiction to fossil fuel, can see that clean, renewable energy—wind, solar, nuclear, and stuff we haven't yet invented—is going to be the next great global industry. It has to be if we are going to grow in a stable way—

Thomas Friedman writes.

Therefore, the country that most owns the clean power industry is going to most own the next great technology breakthrough: The ET revolution—the energy technology revolution—and create millions of jobs and thousands of new businesses just like the IT revolution did. Republicans, by mindlessly repeating their offshore drilling mantra, focusing on a 19th century fuel, remind me of someone back in 1980 arguing that we should be putting all our money into making more and cheaper IBM Selectric typewriters and forget about those things called the PC and the Internet. It is a strategy for making America a second great power and economy.

So when it comes to paying for what we do on the floor of the Senate, the Republicans vote no. When it comes to an American energy policy that is forward looking, sadly, the Republicans vote no. When it comes to medical research in critical areas, this week the Republicans voted no. When it comes to crime provisions to deal with runaway kids and to deal with Internet pornography and children, this week the Republicans voted no.

There comes a point where you have to stand for something. We have tried our best to bring these issues before the Senate. We will continue to.

The last point I will make is this: There is one thing—one thing—the President can do tomorrow morning that can change the debate on energy in America instantly, and that is an announcement. There is an announcement he could make that the United States—which has a Strategic Petroleum Reserve of 700 million barrels of oil that has been gathered and protected for our national security—is now going to be part of our energy solution. If President Bush announced that he would start releasing oil from that reserve, selling it on the market, with the goal of bringing the price of a barrel of oil down to $100 from its current level of about $122, it would do more to breathe life into the American economy than any other thing. It would say: The United States can stop being a victim when it comes to energy and can become a player on the global market. It would send the signal that we are not going to tolerate $145-a-barrel oil and the prices it generates at the gasoline pump and when it comes to jet fuel for our airlines. If the President showed leadership in releasing oil from the Strategic Petroleum Reserve—if he called in the oil companies and put them on the carpet for the outrageous profits that they continue to report—we could turn this around.

Simply suggesting that we have to drill more offshore in the hopes that 8 to 14 years from now there will be additional oil is not going to solve our energy problem. It is yesterday's answer. As Senator DORGAN from North Dakota has said so frequently: When the Republicans think of energy, it is yesterday for everything.

Let's think about tomorrow. Let's have an energy policy that looks forward.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Minnesota.

MENTAL HEALTH PARITY

Ms. KLOBUCHAR. Madam President, this afternoon I spoke about how important it was to pass that extender bill, how important it was for my State and for the rest of the country to promote green jobs, to look at this new energy future, to stop spending $600,000 a minute on foreign oil. I said this afternoon we only got four Republicans to vote with us on a bill that was paid for, a bill that was the right way to go—only four Republicans.

There was something else in that bill that is just as important to me and to my State of Minnesota and to the millions of people living in the shadow of mental illness, and that is the Paul Wellstone mental health parity bill that is included in that package. We have tried to pass this through the Senate over and over again. Senator DOMENICI on the other side of the aisle has been one of the biggest supporters and sponsors of this bill. Senator KENNEDY has worked on it. Senator DURBIN has worked on it. There are many people in the House, including PATRICK KENNEDY, and one of my favorite Republican Congressman, JIM RAMSTAD, who is retiring this year, and he doesn't want to leave the House until that bill gets done.

For me, the Paul Wellstone mental health parity bill is about Paul Wellstone. It is about everything he stood for. It is about fighting for the people who don't have a voice. It is about all the people who have come up to me in the Capitol, not the Senators but the secretaries and the tram drivers who remember Paul and remember how kind he was to them. This bill is about his brother Stephen who struggled with mental illness his whole life. Paul would always talk about how the house they grew up in was always dark because of Stephen's mental illness and how, after Stephen got better and went on to teach, what a difference it made in the family, but it was a lifelong struggle for him.

So this bill is for Paul. When Paul was alive, our friends on the other side of the aisle said they wanted to pass this bill. And when Paul died, they said they wanted to pass this bill. This is the time, and it was a part of that package. Senator KENNEDY is at home watching everything that goes on in this Chamber, and he wants to get that done. Paul's son, David, has been here, day after day, walking the halls of the Capitol, knocking on doors to get this done in his father's memory. I implore my friends on the other side to get this done.

Mr. DURBIN. Will the Senator will yield for a question?

Ms. KLOBUCHAR. Yes.

Mr. DURBIN. I served with Senator Paul Wellstone from Minnesota, who passed away 6 years ago, just weeks before the election. He and his wife Sheila, his daughter, several staff members, and the pilot and copilot were lost in that plane crash. I attended that memorial service for him at the University of Minnesota.

Paul had such a passion for so many issues. But the one thing that meant more than anything to him was this mental health parity bill. I am saddened that, 6 years later, we still haven't passed it. We only had 5 Republicans join us today and vote for it. I hope the Senator from Minnesota feels as I do, that we need to pass the Wellstone mental health parity bill—make no excuses, find no alternatives, other than to make sure it is named in his memory, the man who started us down this road and whose journey needs to be finished by us today.

I am glad the Senator from Minnesota is here to participate in that. It should be the highest priority before we adjourn this year. Since I need to ask the question, I ask her if she agrees.

Ms. KLOBUCHAR. I thank the Senator so much for that question. I know from his family, those he left behind, who miss him so much, this is what he wanted to get done. I actually remember, I say to the Senator from Illinois, the last time I saw Paul Wellstone before he went down in that tragic plane crash. It was at an event for new citizens. Sheila, his wife, was supposed to be there, and the two of us were talking about our immigrant families, where they came from and how they pulled themselves up and funny stories about our families in Appalachia. There were about 30 new citizens there and no press, no cameras. All of a sudden, by surprise, in walked Paul. You know, it was 3 or 4 weeks before one of the biggest elections in the country, and he was in that room with the new citizens.

I knew there were two reasons: One, he loved Sheila and he wanted to surprise her. Second was he embraced this idea that no matter where you came from, no matter what you have gone through in your life, you could pull yourself up in this country. That is part of why this mental health parity bill was so important to him. He had seen in his family how his brother struggled and was able to pull himself up. There was a horrible financial situation for their family. He didn't want that to happen to someone else. He felt that if you can cover physical illnesses, you should also cover mental illnesses. This bill is what Paul wanted to get done.

I know the majority leader and others have said the other side said they would pass it when he was alive and

then when he died. This is their chance.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. The majority whip is recognized.

DETENTION OF GAMBIAN JOURNALIST EBRIMA MANNEH

Mr. DURBIN. Madam President, America has long been a champion and source of hope around the world for those suffering human rights violations—those holed up in dictators' prisons, those fighting for press and political freedoms, those bravely standing up to tyranny or injustice.

Many of those who have suffered, such as Vaclav Havel and Nelson Mandela, or continue to suffer this fate, such as Aung San Suu Kyi, are well-known to us. Sadly, for each one of them, there are many other, lesser known heroes being detained or harassed all over the world simply for wanting basic human freedoms.

Through our annual human rights reporting at the State Department, our diplomacy, and steady public pressure on basic human rights, the U.S. has traditionally been a source of hope for those being illegally detained or persecuted.

We should never forget what this kind of attention and pressure can accomplish and what kind of strength it provides for those being detained.

Take for example, Ngawang Sangdrol, a Tibetan nun who was detained and tortured for peacefully expressing her belief in Tibetan independence. She was freed after 12 years of imprisonment following immense public pressure. After her release she said,

I have been overwhelmed by the outpouring of love and support . . . I am deeply touched to learn that many individuals, organizations, and governments . . . have worked towards my release. It is very clear to me that I have been released and allowed to come out to the free world for medical treatment and to enjoy my freedom because of international concern.

Or Gurbandurdy Durdykuliev, a political activist from Turkmenistan who in 2004 was seized and forced into a psychiatric hospital by the country's ruling dictator. His crime—requesting permission for a peaceful political rally.

He was released a few years later, just 10 days after 54 members of Congress sent a letter to the Turkmen Government about his case.

We should listen and act upon the appeal made by Aung San Suu Kyi, who has remained under house arrest in Burma for most of the last 19 years:

Those fortunate enough to live in societies where they are entitled to full political rights can reach out to help the less fortunate in other parts of our troubled planet. . . . Please use your liberty to promote ours.

I realize we must also work to address our own recent shortcomings by unequivocally renouncing torture and by closing the detention facility in Guantanamo—and we will continue to work toward ending these shameful legacies.

At the same time, we must continue to speak out in support of those imprisoned for advocating basic freedoms around the world.

Many of us on both sides of the aisle have been arguing that America's strength resonates not only from its military power but from the power of its ideas and inspiration, the power of its values and hope, the power of its generosity and diplomacy—its smart power.

Sadly, I worry that a measure of this leadership, of this inspiration, and of this uniquely American hope has been lost in recent years.

Accordingly, today I want focus the Senate's attention on a tragic story from the small west African Nation of The Gambia.

Chief Ebrima Manneh was a reporter for the Gambian newspaper, the Daily Observer. He was allegedly detained in July 2006 by plainclothes police officers thought to have been from the Gambian National Intelligence Agency after he tried to republish a BBC report critical of President Yahya Jammeh.

He has been held incommunicado, without charge or trial, for two long years. Amnesty International considers him a prisoner of conscience and has called for his immediate release.

I agree.

Recent reports suggest he is being held at the Fatoto Police Station in eastern Gambia. In July 2007, he was also reportedly escorted by the members of the Gambian Police Intervention Unit to the Royal Victoria hospital in the capital for high blood pressure treatment.

Despite repeated attempts by Manneh's father and fellow journalists, including the Committee to Protect Journalists, to seek information on Mr. Manneh, the Gambian Government continues to deny any involvement in his arrest or knowledge of his whereabouts.

My direct request to the Gambian Embassy here in Washington has also been met with shameful silence.

Last month in Nigeria, the Community Court of Justice of the Economic Community of West African States declared the arrest and detention of Mr. Manneh illegal and ordered Gambian officials to release him immediately.

And yet the Gambian Government ignored this court's ruling as well—even though this court has jurisdiction for human rights cases in the Gambia.

Is the Gambian Government so afraid of one of its own reporters that it cannot even acknowledge his detention?

I say to President Jammeh: Release this reporter. Let him return to his family.

Sadly, Mr. Manneh's case is not alone in The Gambia. In December 2004, a critic of President Jammeh, and press freedom advocate, Deyda Hydara, was shot and killed. His murder has yet to be solved or investigated.

The government has also enacted laws muzzling the press and imposing mandatory prison sentences for media owners if convicted of publishing defamatory or seditious material—all part of a larger deterioration of basic freedoms in The Gambia.

Madam President, the United States needs to be a forceful advocate for these kinds of blatant human rights abuses. Doing so is not only the right thing to do, but it is the smart thing to do in terms of our engagement abroad and in demonstrating our American values.

I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Madam President, I withdraw the motion to proceed to S. 2035.

The PRESIDING OFFICER. The motion is withdrawn.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2009—MOTION TO PROCEED

Mr. REID. Madam President, I made this unanimous consent before and it was objected to.

I move to proceed to Calendar No. 732. S. 3001, the DOD authorization bill—that is the Defense Department authorization bill—and I send a cloture motion to the desk.

CLOTURE MOTION

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the cloture motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to S. 3001, the National Defense Authorization Act for Fiscal Year 2009.

Carl Levin, Christopher J. Dodd, E. Benjamin Nelson, John F. Kerry, Claire McCaskill, Joseph R. Biden, Jr., Bill Nelson, Blanche L. Lincoln, Richard Durbin, Daniel K. Akaka, Robert Menendez, Kent Conrad, Sherrod Brown, Jack Reed, Jim Webb, Charles E. Schumer, Harry Reid.

Mr. REID. Madam President, I ask that the mandatory quorum be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I appreciate my friend from Iowa allowing me to do this. He has been waiting for some time.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

TAX EXTENDERS

Mr. GRASSLEY. Madam President, at 2:42 today on the Senate floor, the Senate majority leader made an incorrect statement. In discussing the negotiations last night between the chairman of the Senate Finance Committee and this Senator, the Senate majority leader, who was not present at the meeting, stated: ''The only thing that Senator GRASSLEY wanted to discuss is having all these extenders not paid for.''

I will make a statement of why this statement is wrong. Specifically, I made three proposals to Chairman BAUCUS. In all three of the proposals, we agreed to use three tax offsets suggested by Chairman BAUCUS and his staff.

The first offset I agreed to accept is the offset that closes the loophole that allows hedge fund managers to defer compensation in tax haven jurisdictions. However, I mentioned we needed to remove the huge charitable loophole that is contained in both the Democratic House and Senate extenders bill. Closing this charitable loophole will raise about $1 billion in extra revenue from hedge fund managers, according to the nonpartisan Joint Committee on Taxation.

Let me make clear why that is a very important adjustment. If you, the average taxpayer, want to give the maximum the law allows for a charitable deduction, you can only allow 50 percent of your income to be used for that purpose. But if you are under this provision, if you are a hedge fund manager making contributions to a charity, you can have 100 percent deduction. We think that is unfair to the middle-income taxpayer.

The second offset I reluctantly agreed to accept was a version of the worldwide interest allocation offset. We are still waiting on the revenue estimate for this proposal. This was a compromise on my part. That is what it will take from the other side, as well, to get an extenders bill done—some sort of compromise.

The third offset I agreed to accept is a permanent offset regarding basis reporting of securities brokers.

These three offsets that I agreed to accept could—depending on the revised worldwide interest allocation proposal—raise over $50 billion in revenues as offsets.

As I mentioned above, I made three proposals to chairman BAUCUS. I also offered to use all three offsets mentioned above for each of the three separate proposals that I made; therefore, paying for much of the revenue loss generated by the tax extender provisions.

In two out of my last three proposals, I proposed using those three offsets to offset much of the revenue loss that results from extending these tax extender provisions.

So for the majority leader to say that ''the only thing that Senator GRASSLEY wanted to discuss is having all these extenders not paid for'' is simply not accurate. And it is plain wrong. The majority leader was not in the room, and he must have received a false report from someone who actually was in the room. Chairman BAUCUS was in the room. So he knows the majority leader's statement that the only thing Senator GRASSLEY wanted to discuss was having all of these extenders not paid for is untrue. I ask everybody to ask Chairman BAUCUS.

To demonstrate in detail that the majority leader's statement is incorrect, Chairman BAUCUS and I discussed a number of issues other than offsets in the media. One of these issues was my disaster tax relief package that is needed for the people of Iowa and the Midwest because of the gigantic 500-year floods.

Three other issues we discussed were the three tax offsets I described above. Some other issues that were discussed were provisions in the Democratic leadership's extenders bill that we objected to, such as the provision regarding the train from Manhattan to JFK Airport that accounts for more than 20 percent of the revenue loss in the Democratic leader's disaster tax package.

In addition, I offered to make all three of my proposals revenue neutral by suggesting that we use the three offsets mentioned above and also decrease the amount of new increases in spending that were approved in the budget only 2 months ago.

Let me be clear, we did not suggest any spending cuts. We suggested our colleagues on the other side of the aisle consider decreasing the amount of new unspecified nondefense discretionary spending. The nondefense discretionary spending that has been authorized in the budget is $350 billion greater than the President's fiscal year 2009 budget. This extra $350 billion is like an extra checkbook that Congress is carrying around in addition to the already fat checkbook. This checkbook covers nondiscretionary spending and current levels of discretionary spending. We simply ask they take a few checks out of the extra checkbook over the next 10 years to help pay for part of the needed tax relief provisions in the tax extenders package.

However, this suggestion was summarily dismissed by Chairman BAUCUS. My colleagues on the other side of the aisle are unwilling to even consider decreasing their increased—and I emphasize ''their increased''—nondefense discretionary spending that is above the President's budget.

In summary, the majority leader's statement at 2:42 this afternoon about my position on our negotiations is flat out wrong, and I cannot be any clearer than that.

Folks across the country must wonder why the Senate cannot pass the popular expiring tax relief provisions. There is no disagreement between the parties on the merits alone. Nearly all Members of this body and the other body support the alternative minimum tax fix and also the other parts we refer to as extenders; in other words, tax provisions that have sunsetted. And, of course, because of the good of these provisions, anybody who opposes it would be crazy.

The problem is the committee and floor process have been disregarded by the Senate Democratic leadership. Debate, exchanges of ideas, up-or-down votes are the essence of how the Senate works. All of that Senate process is now bottled up. The Senate process is quite truncated.

For the first time in this decade—that is, since 2001—the Finance Committee members have not been allowed to exercise their rights in the committee markup with respect to these issues, with one exception—the 2002 stimulus bill.

For the first time in this decade, Senate Members have not had the opportunity to debate and amend extenders in a real Senate floor process. For the first time in this decade, Senators in the minority are being presented with a top-down deal crafted between the Democratic leadership of the House and Senate.

For me, the irony of all of this is very compelling because I found myself within the last 2 years, when Republicans were in the majority, condemning Republicans for trying to get around letting the Senate work its will. Almost 2 years ago today, we faced an attempt to end run the natural order of the committee and floor process by the bicameral Republican leadership of the House and Senate; meaning when we were in the majority. I referred to it at that time as wrongheaded. If it was wrongheaded when we had a Republican majority and the Democratic majority is doing it, it is just as wrongheaded, as far as I am concerned, because 2 years ago it was doomed to fail.

I don't know how many times I told the Republican leadership: It ain't going to work. And right now we are faced with it when we have a new majority and that new majority is Democratic. Two years ago, it was envisioned as some sort of unicameral, not a bipartisan, bicameral tax-writing committee process. The unicameral tax-writing committee process 2 years ago ignored the rights and the privileges of both political parties. I used sharp words and directed them at my side's leadership of the House and Senate.

I am sure some on my side thought my comments were over the top. I don't care. I didn't care then, at least. Then-Health, Education, Labor and Pensions Chairman ENZI stood shoulder to shoulder with me in this process. My friends on the Democratic side criticized my leadership for the harm it was doing to the rights of the Members of this body that is supposed to be the greatest deliberative body in the entire world of any parliamentary bodies.

That is why I find today's actions bitterly ironic. I am sorry to say today we find the Democratic leadership attempting to do much the same thing. Like the failed trifecta jam then, today's jam will not work.

Let me make clear, when I refer to the ''trifecta jam then,'' I mean 2 years ago when Republican leaders thought they could stuff something down the throats of Democrats in this body. It failed then, and that sort of jam is not working when Democrats are in the leadership position.

It is part of a larger problem with the Senate because we are not going

through the regular order at the committee and floor levels. Issues are building up, tempers are flaring, and most importantly, nothing is getting done and the people are mad about it. The people back home are mad about it.

I reiterate what I said this morning. The fourth vote failed. That failed cloture vote had the effect of Kaopectate. It further constipated the Senate. This legislative body needs to function. Legislation needs to circulate through this body in the usual form. We need real debate and real amendments. We need a legislative laxative.

Another alternative to resolution is an informal bipartisan process. Either way, repeated cloture partisan jams do not lead to an agreement that can pass the House, the Senate, and be signed by the President. And don't forget about that because that is an important part of the process. I think the White House spoke out on some of the AMT and extender legislation we have been considering.

I have my pencil sharpened, a note pad out. I am ready to engage in our bipartisan process with my friend Chairman BAUCUS. I am hopeful the Democratic leadership will relieve the constipation on the tax extenders legislation. The Finance Committee and Senate need to function.

On behalf of Leader MCCONNELL, I am going to propound a unanimous consent request about which I already informed the other side. The agreement, if accepted by the majority, would set in motion a process that would lead to resolution of these expired provisions. If accepted by the majority, we would have real debate, real votes, and a resolution that matters.

Madam President, I ask unanimous consent that upon the conclusion of the energy speculation bill, the Senate proceed en bloc to the consideration of the Baucus extender bill, S. 3335, and a bill introduced by Senator GRASSLEY on the same subject of extenders; provided further, that there be 2 hours of debate equally divided in the usual form to run concurrently on both measures; and that following that time, the bills be read a third time, en bloc, and the Senate proceed to vote on passage of S. 3335, followed by a vote on passage of the Grassley bill. I further ask unanimous consent that if either bill does not receive 60 votes in the affirmative, the bill be returned to the calendar.

Mr. DURBIN. Madam President, reserving the right to object, what the Senator from Iowa proposes is that we pay for these tax extenders for energy by reducing domestic discretionary spending. To put that in layman's terms, for the last 4 years, we have frozen the increases of spending at the National Institutes of Health for medical research. Senator GRASSLEY would say, let's continue freezing those increases in spending for medical research so we don't have to impose taxes on American businesses doing business overseas. I disagree with that. It is far better that those businesses pay those taxes than we cut back on medical research. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Iowa.

Mr. GRASSLEY. Madam President, I wish to correct the Senator on a couple of respects, and he has exercised the right I expected. First, we accept the provisions that were in the Baucus bill for offsets. We did suggest a modification on the provision that the Senator said we don't want. He is wrong on that point. We will accept it. There is a slight modification in it that would give an election. We go along with that provision, and I think I made that clear in the remarks I proposed.

The second place the Senator from Illinois is wrong is we are not proposing the cutting of spending. We are proposing the $350 billion increase that their budget has suggested for additional spending be reduced by a very small percentage.

Mr. DURBIN. Madam President, if the Senator from Iowa will yield.

Mr. GRASSLEY. Yes.

Mr. DURBIN. Madam President, so any proposal to increase spending at the National Institutes of Health for medical research will be reduced by the proposal of the Senator from Iowa?

Mr. GRASSLEY. If my colleague wants to figure that all the $350 billion is going to go to the National Institutes of Health, he is right. But all $350 billion, obviously, is not going to go to the National Institutes of Health.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

COST OF ENERGY

Mr. SANDERS. Madam President, I suspect if people are watching what is going on here, they do not have any clue or understanding of what is taking place because, in fact, it is fairly incomprehensible. It is pretty hard to understand why bill after bill dealing with issues of enormous consequence for millions of Americans is being filibustered by the Republicans, which means we have to get 60 votes to end the debate, votes which we obviously don't have. From the beginning of the session, there have been 91 filibusters, which is more than anyone has ever seen in the Senate.

The reason the Republicans are filibustering today is because they want to pass the so-called Gas Price Reduction Act. That is the title of their bill. But I would argue that the title of this bill is a complete misnomer. The so-called Gas Price Reduction Act will not lower gas prices today, which stand at about $4 a gallon.

All over this country, people are deeply upset about having to pay these outrageously high gas prices. They are worried about what oil prices will be in the winter. They understand the impact of these oil prices on food and other aspects of our economy. And the Republican legislation is entitled ''The Gas Price Reduction Act,'' but it is not going to reduce these gas prices which are so high today. That is not my view, that is President Bush's view. That is the view of everybody in the world. That is our Republican friends' view. They are saying, quite appropriately and correctly, that if you drill now, maybe in 10, 15, or 20 years, there will be some impact on prices. Well, maybe there will be and maybe there won't be, but there is no argument that in the midst of a crisis today, what they are proposing will have zero impact on our economy right now.

So whatever the merits or lack of merits—and I am not sympathetic to drilling in environmentally sensitive areas in the Outer Continental Shelf—what we should be clear about is that the Republican proposal will do zero to address the crisis of high energy prices today. And again, that is not just my view. President Bush's own Energy Department has said that increased drilling offshore would have ''no significant impact'' on gas prices until the year 2030, and even then its impact would be negligible. That is what President Bush's own Energy Department is saying.

So perhaps our Republican friends might want to change the title of their bill from ''The Gas Price Reduction Act'' to the ''No Significant Impact on Gas Prices; Maybe By 2030 Act.'' That would at least be a more accurate description of what they are trying to do. Maybe there will be some impact by the year 2030, but let's not fool the American people. The American people are angry, they are frustrated about what is going on today. And we could argue whether the Republican policy is good or not good, but let's not kid anybody, it is not going to have any impact on gas and oil prices now.

For those who think it is okay not to do anything or see any impact until 2030, I guess they could support what the Republicans are doing. But I know what is going on in Vermont; that is, workers can't afford $4 a gallon for gas when they are driving 50 miles to work and 50 miles back, and they surely can't afford the price of oil that is coming down the pike next winter. They do not want action in 20 years, they want action now. And in my view, Madam President, that is what we should be doing.

With the exception of my Republican friends here in Congress, there are very few people in this country who believe the oil companies give one hoot about the well-being of the American people. Our Republican friends are saying that if we just give these huge oil companies more acres offshore to drill for oil, they will certainly do the right thing, as they always have, for the American people. Let's just trust those big oil companies because they are really staying up day after day, night after night, worrying about the well-being of the American people. That is what their full-page ads in the New York Times and all their ads are telling us.

Well, it is good to see there are at least some people in America who believe that. I don't, but apparently my Republican colleagues do.

Let me just mention to you, Madam President, just how much concern the oil companies have for the American consumer. While the American people have been paying $4 and more for a gallon of gas, ExxonMobil has made more profits than any operation in the history of the world over the past 2 consecutive years, making $40 billion last year alone. Oil prices are soaring, and ExxonMobil is making recordbreaking profits. But ExxonMobil, of course, is not alone. Chevron, ConocoPhillips, Shell and B.P. have also been making out like bandits. In fact, the five largest oil companies in this country have made over $600 billion in profits since George W. Bush has been President. Yes, they are deeply concerned about the high price of gas and oil. Yes, they really are. It is really upsetting to them. Last year, the major oil companies in the United States made over $155 billion in profits—in just 1 year.

Let me tell you, Madam President, big oil companies are so concerned about Americans paying high prices for gas and oil that this is what they are doing with their profits. You see, our Republican friends would suggest that what the oil companies are trying to do is explore new areas, do new drilling, produce more oil, and lower prices. Well, I don't think so, frankly. I will tell you what they are doing with their huge profits.

In 2005, ExxonMobil gave its CEO, Lee Raymond, a $398 million retirement package—among the richest compensation packages in corporate history. They weren't going out looking for new land to drill on, they weren't building more refineries, and they weren't working on energy efficiency. They gave their CEO a $398 million retirement package.

In 2006, another one of those oil companies that is staying up nights worrying about the American people, Occidental Petroleum, gave its CEO, Ray Irani, over $400 million in total compensation—again, beyond comprehension to ordinary people.

In fact, there were articles recently in the press suggesting that one of the major problems ExxonMobil had is that they had so much cash in hand, they literally did not know how to invest it or how to get rid of it. That was their major problem.

The situation is so absurd and the greed of the oil companies is so outrageous that these companies are not only giving their executives huge compensation packages in their lifetimes, but they have also created a situation, if you can believe it, where these oil companies have carved out huge corporate payments to the heirs of senior executives if they die in office. I guess this is what happens when you have more money than you know what to do with.

In other words, if, according to the Wall Street Journal, the CEO of Occidental Petroleum dies in office, his family will get $115 million. The family of the CEO of Nabors Industries, another oil company, would receive $288 million. So it is not only giving out huge compensation packages; if the CEO dies in office, the family gets a huge package. Madam President, this would be funny if it were not so pathetic in the sense of the impact this type of spending has on the American people.

Not only are huge oil companies using their recordbreaking profits on big compensation benefits for their CEOs, but they are also spending large sums of money buying back their own stock. In other words, when they are making these very large profits, they are not going out drilling for more oil, as our Republican friends are suggesting. Overall, since 2005—3 years ago—the five largest oil companies have made $345 billion in profit and spent over $250 billion of that $345 billion buying back stock and paying larger dividends to their stockholders. That is what they are doing with their money. They are not going out and saying: Gee, how can we do more drilling? Gee, how can we lower the price of oil? They are buying up stock and increasing the benefits to their shareholders.

Last year, ExxonMobil, the largest oil company in our country, spent 850 percent more buying back its own stock than it did on capital expenditures in the United States. And that is a fact.

Let's not kid ourselves. The big oil companies—and I know we are not supposed to talk about this too much in the Senate, but anyone who doesn't believe these oil companies have huge political influence over what goes on here in Washington is surely kidding themselves. Since 1998, the oil and gas industry has spent over $616 million on lobbying. In a 10-year period, they have spent over $616 million in lobbying. Now, what does that mean? It means they hire the best law firms in town, they hire former leading Republicans and Democrats—anybody can come in and work with Members of Congress—to get their way. That is one of the reasons why, among many other reasons, this Congress, in recent years, has decided to give some $18 billion in tax breaks to oil companies despite their recordbreaking profits. Over $616 million in the last 10 years on lobbying, and since 1990 they have made over $213 million in campaign contributions. And that is a simple fact.

Lo and behold, what we are hearing today—just coincidentally, no doubt—is that the most important thing we can do in terms of the energy crisis is to provide more land offshore for the oil companies to drill at a time when they already have some 68 million acres of leased land, which they are not drilling on today.

The American people want action, and there are some things we can do—not in 15 or 20 years but that we can do right now. Not only do we need to impose, in my view, a windfall profits tax on these extremely powerful oil corporations, but we have to address what I perceive is a growing understanding that Wall Street investment banks, such as Goldman Sachs, Morgan Stanley, JPMorgan Chase, and hedge fund managers are driving up the price of oil in the unregulated energy futures market. In other words, they are speculating on energy futures and driving up prices.

There are estimates that 25 to 50 percent of the cost of a barrel of oil is attributable to unregulated speculation on oil futures. I know the Presiding Officer's committee has had hearings on this issue and other committees have had hearings on this issue. We have heard from some leading energy economists, and we have heard from people in the oil industry themselves who tell us that 25 to 50 percent of the cost of a barrel of oil today is not due to supply and demand or the cost of production but is due to manipulation of markets and excessive speculation. In essence, Wall Street firms are making billions as they artificially drive up oil prices by buying, holding, and selling huge amounts of oil on dark unregulated markets.

Some of my Republican friends claim that the increase in the price of oil has nothing to do with speculation, but it is interesting to me that we have had executives of major oil companies—major oil companies—who have come before Congress and who are saying, ''Why is oil $125, $130, and $140 a barrel?'' Do you know what they say? The CEO of Royal Dutch Shell testified before Congress and said:

> The oil fundamentals are no problem. They are the same as they were when oil was selling for $60 a barrel.

This is not some radical economist. It is not some leftwinger. This is a guy who is the head of Royal Dutch Shell.

The CEO of Marathon Oil recently said:

> $100 oil isn't justified by the physical demand in the market.

I know my Republican friends have a lot of respect for the oil industry, a great competence in them. They love them and give them huge tax breaks. So maybe they should listen to what some of these guys are saying in terms of oil speculation.

Some people have suggested or implied that those of us—including people in the oil industry—who believe speculation is driving up prices are into some kind of conspiracy theory, that we just want to demonize Wall Street or big investment banks such as Goldman Sachs and Morgan Stanley. Well, I would like to briefly read an excerpt from a research paper done by Goldman Sachs US Economic Research dated June 2, 2008. This is what they say, and I find this interesting:

> Lawmakers and regulators have begun to respond to these concerns—

Concerns about high oil prices—

but we still think it is unlikely that there will be any significant legislative changes enacted this year. In fact, it is entirely possible that Congress will adjourn for the year without enacting any further legislation focused on commodity speculation.

And then this is the interesting thing they say:

However, the debate itself could break the rise in energy prices for a brief period until there is greater certainty regarding the legislative and regulatory outcome.

In other words, what Goldman Sachs is saying is that even the debate on speculation in the oil industry could have an impact on slowing down oil prices, and it may well be that is the case. We have seen that in the last 2 weeks or so.

Let's talk a little bit about recent history and speculation and market manipulation in terms of the energy market.

In 2000 and 2001, our friends at Enron successfully manipulated the electricity market, and the results, of course, were that in California and on the west coast electric rates went up by 300 percent. It is interesting to remember—and I remember this—what Enron was saying at that time. They were saying don't blame us, it is a supply and demand issue.

I gather those Enron officials, who may be in jail today, are perhaps still saying that, but we know a little bit differently.

We also know that BP artificially increased prices on the propane gas market. They were fined for that over $300 million. We also know Amaranth, a hedge fund, manipulated prices on the natural gas market. In fact, in 2006, Amaranth cornered the natural gas market by controlling 75 percent of all the natural gas futures contracts in a single month.

In other words, the idea of manipulation and speculation and control of a market is not a new idea. We have seen three instances in the last 8 years, with Enron, BP, and Amaranth doing just that.

Given that reality, why would we think it is so shocking that is taking place right now in terms of oil?

Let me conclude by saying it is imperative that we move now in terms of addressing the energy crisis. People all over this country are hurting. They want us to act, and we must act. To my mind, one of the things we have to do is to move this country aggressively forward in terms of energy efficiency and in terms of sustainable energy.

Our Republican friends talk about wanting to grow more energy, increase energy supplies. Let me inform them the Sun does that, the wind does that, geothermal does that, biomass does that. It is incomprehensible to me that time after time legislation has come before this body—including today—which will simply extend the tax credits that have been given for sustainable energy, and we cannot even do that.

There are huge economic gains, not to mention moving forward in terms of global warming and reducing greenhouse gas emissions if we do that. Yet we cannot even get the votes to do that.

We can move forward in terms of a windfall profits tax. We can move forward in speculation. We can move forward in terms of energy efficiency. We can move forward in terms of encouraging the growth of sustainable energy. Those are the things that we can do now. I believe those are the things the American people want us to do.

I yield the floor.

The PRESIDING OFFICER (Mr. CASEY). The Senator from Idaho is recognized.

Mr. CRAPO. Mr. President, I would like to speak tonight on the issue of energy as well. We are very fortunate that the Senate is debating the issue of energy. It is the No. 1 issue to the people of this country. Frankly, I find myself very concerned about where this debate is going.

In early July, I asked my fellow Idahoans to contact me and tell me what the high prices of fuel mean in their lives. In fact, I asked them not only to tell me what it meant in their lives but what they thought we ought to do in this country—Congress as well as the rest of the country—what we ought to do about these high prices of fuel.

The stories that came in were remarkable. Overnight I had 400 to 600 emails, and we now have over 1,200 emails in our office from citizens of the State of Idaho who are feeling the impact of these high prices. It is not just a minor inconvenience in their lives. The stories they tell are poignant. They are disturbing.

One lady wrote in that at the end of the month she and her husband just had enough money left in their budget to either fill their gas tank or to buy their food. They made a choice to fill their gas tank because they had to have the fuel to get to work and keep their jobs. In her response she said she didn't know exactly how they were going to deal with the issue of food.

Others talked about the fact that they were not able to pay for needed medicines. The pressure of fuel versus food versus medicine gets down to the basics in our society. This is not a question of whether to call off a long-planned vacation. It is not a question of whether we have to adjust to some minor inconveniences. We have already done that in our society. This is an issue of changing the quality of life in America that will probably not be able to be fixed or reclaimed if we do not respond to it properly now.

As I said, I also asked my constituents to tell me what they thought we ought to do. The responses were remarkable. I think the people of Idaho have a tremendous amount of common sense. I brag on them all the time. They have come through with all kinds of suggestions about how we ought to deal with this problem, everything from the need to conserve more, to the need to use wind and solar and other renewable and alternative fuels, to the need to get more production of oil. They get it. They understand the solution to this problem is not just one thing.

Another remarkable thing came across in their responses to me. They are angry. They are angry that Congress is not dealing with the issue because they blame Congress that we are in this problem. I said before, sometimes it is kind of a national pastime to blame Congress for whatever the problem of the day is, but in this case my constituents in Idaho and the rest of the public in this country are right. It is the responsibility of Congress to have established a rational, comprehensive, national energy policy for this country that can help us to be independent and strong in terms of our energy. Congress has failed to do so.

America now needs to move forward. America is too dependent on petroleum as our major source of energy. For that petroleum, we are too dependent on foreign sources. America needs to treat our energy policy like we would treat an investment portfolio. We need to diversify. We need to be as conservative and as careful in the utilization of our energy as possible. We need to be as efficient as we possibly can in terms of the utilization of that energy. And we need to have broad and diverse resources of energy.

At the same time that we are doing that and diversifying—and I hope we could diversify, we here in this Congress, help to establish a broad diversified energy policy—while we are doing that we can't simply say that petroleum is evil and we will no longer ever try to utilize production of oil in this country. It will take us a significant amount of time to transition to an economy that is less dependent and less held hostage to petroleum. While we are doing that, frankly, we need to recognize that we need more production of oil in the United States.

So where are we today in the Senate? We have before us a bill that does one thing: it addresses the futures market, the speculation that the Senator from Vermont, who spoke before me, just talked about. It does nothing else. It seeks to find a solution to our national energy problems in one way; that is, to establish a very aggressive new regulatory regime for the futures market in our country. It does not do so in a very good way. I will talk about that in a few minutes. In fact, it does so in a way that will actually harm our economy and harm our energy security.

The point is, it does only one thing. As it seeks to solve the problem, it tells the American people that we have a rifleshot solution, that we can simply pass this law and we will then fix the problems with energy prices because we will force those markets to have better prices. The solution? A new Government system of regulation that will, hopefully, control prices. Like I say, it is not going to do that, and I will talk about that in a minute.

We are trying to debate this issue and bring other issues forward, and we have been stopped so far. The process in the Senate is not working. Historically, the Senate has been a place of great debate where those with ideas about how to solve pressing problems in our country can bring them forward and those who have different and competing ideas can bring their ideas forward as amendments. And, as we move forward, we would have votes on the floor of the Senate where the majority could prevail and we could craft legislation and craft policy for this Nation in the way that those who established this great country—and those who live in this great country—thought it should be done.

But that is not how it is being done on this bill. We are being presented with a bill that we have now been on for, I think, 8 days. Yet we have had zero votes on any alternative ideas because the majority will not allow amendments to be brought forward in a fair and reasonable way.

This chart shows what was done in previous debates in the Senate on the energy issue. When the Energy Policy Act of 2005 was considered, we spent 10 days on the Senate floor. We had 19 rollcall votes on amendments, 23 total rollcall votes on the bill, there were 235 amendments that were proposed to that bill, and 57 of those amendments were agreed to either by vote or by unanimous consent. At that time the average price of gas was just $2.26.

In 2007 when we debated the Energy Independence and Security Act, we spent 15 days on the Senate floor, 16 rollcall votes on amendments, and 22 rollcall votes on the bill. There were 331 total amendments proposed during debate on that bill, 49 total amendments agreed to in that debate, and the Senate acted its will.

Again, what are we doing today? For 8 days we have been trying to bring amendments forward to present some alternative ideas, additional ideas about how we should deal with energy policy in our country, and we are told no. We are told: We may allow you to have a few votes on a few selected amendments that we pick, but we will not allow a full, robust debate on amendments.

We must get beyond the parameters of this bill. It has been argued that the speculation in the futures market is controlling or is driving up the price of fuel. The fact is, that is simply not the case. The problem is one of supply and demand.

This chart shows what has happened to the supply of energy, of global crude from 2000 to 2008. You can see, starting in about 2004, primarily through decisions in the OPEC nations, the supply of crude oil has leveled out. Because of a decision to curtail supply, those nations that are engaging in producing the global crude are able to impact the supply and demand curves. Yet demand at that same time has not leveled out. China and India in particular are increasing their demand for fuel dramatically.

The problem we face is, as the supply curve levels out and as the demand continues to grow, we see unbelievable pressures on the price of fuel. There are those who will say that is not really the way it is and really speculators in the market are driving up the price. It is possible to impact a market in a way that is abusive, and we have organizations that help us on that. But let's look what has happened so far in the speculation, the futures market, trading in NYMEX in the United States.

In the speculation in the derivative markets, in the futures market, every buy must be mirrored by a sell. The theory there has been this immense new pressure for speculation in the futures market creates the impression that there have been all of these purchases that have driven up the price. But as you see from this chart, every time there was someone who thought the price was going to go up, there was someone who had to believe the price was not, who had to be the buyer or seller in that transaction.

When you have the long sells and the short sells virtually mirroring each other, it indicates there is a reasonably effective functioning market.

It has been said on the floor of the Senate that the experts say that speculation is driving up the price of fuel by 20 to 50 percent.

The reality is the vast majority of experts are saying that simply is not the case; that we can evaluate what is happening in the futures markets and determine whether there is being manipulation.

And what is the determination that is being made? A recent report by our Government agencies, including the Commodity Futures Trading Commission, the Federal Reserve, the Treasury Department, and Energy Department, found that speculative trades in oil contracts had little to no effect on the rising prices over the last 5 years.

The Interagency Task Force on Commodity Markets' preliminary assessment is that current oil prices and the increase in oil prices between January 2003 and June 2008 are largely due to fundamental supply and demand factors.

During the same time period, activity on the crude oils futures market, as measured by the number of contracts outstanding, the trading activity and the number of traders, has increased significantly. The amount of trading in these markets has increased significantly. But while these increases broadly coincided with the runup in crude prices, the task force's analysis is that to this date there is no support for the proposition that speculative activity has systematically driven changes in those oil prices.

In fact, according to the report, if a group of market participants had systematically driven up prices, detailed daily position data should show the group's position changes preceded the price changes. But the task force data indicates the changes in futures markets participation by speculators have not preceded the price changes. In fact, on the contrary, most speculation traders typically alter their position following a price change, suggesting that they are responding to the supply and demand dynamics, just as one would see in an efficiently operating market.

Furthermore, the President's Working Group on Financial Markets has also weighed in on this debate. They state:

> To date, the PWG has not found valid evidence to suggest that high crude oil prices over the long term are a direct result of speculation or systematic market manipulation by traders. Rather, the prices appear to be reflecting tight global supplies and the growing world demand for oil, particularly in emerging economies. As a result, Congress should proceed cautiously before drastically changing the regulation of energy markets.

Other experts are saying the same thing. In fact, the amount of experts who are weighing in on this today from all perspectives is overwhelming, to the point that there are very few now who are continuing this mantra that somehow we can solve all of our problems by controlling the futures markets better.

The International Energy Agency states:

> There is little evidence that large investment flows into the futures markets are causing an imbalance between supply and demand.

They go on to state, and this is something I think Americans need to hear:

> Blaming speculation is an easy solution which avoids taking the necessary steps to improve supply-side access and investment or to implement measures to improve energy efficiency.

Others are respected in market analysis. Warren Buffett recently said:

> It is not speculation, it is supply and demand. We do not have an excess capacity of oil in the world any more, and that is what you are seeing in oil prices.

Frankly, one of the more critical aspects of this is that investors in these markets actually provide liquidity to our oil industry. Investors play a very valuable role in the futures market by transferring risks from commercial participants such as farmers and airlines, and providing liquidity, reducing volatility, and contributing to the price discovery process.

One example is Southwest Airlines. Southwest Airlines provides a powerful example of how investors can help companies mitigate their risk. It is called hedging, which is made possible by the participation of investors in trading oil futures. That has saved Southwest Airlines $3.5 billion since 1999.

How does this work? Let's take an example of an oil producer, somebody who wants to go out and invest some money in a new oil rig or a new refinery, to engage in some production of some further resources, energy resources for the United States, and they want to get a loan for $5 billion. There is probably no source in the world that would loan them $5 billion to go out and engage in this new investment unless they were able to hedge that loan, meaning they need to go into the futures market and sell the first 3 to 5 years of production of this facility so they can show the bank or the financing institution that is going to loan them the money that they have a source of capital or cash to repay the loan.

If they are not able to go into a market and make that hedge, they will not be able to get that loan. They will then not make the investment and we will not then see the production. And if there are not those who are willing to invest in that futures market, on the other side of the transaction, those who are called speculators, then we do not have the liquidity in the market for that loan to be adequately hedged.

It is very important for the risk management in our economy that we do not impact our futures markets in ways that will disturb the proper functioning of a true market.

Congress has enacted various tax incentives for renewable energy which also can be impacted negatively by harmful regulation of the futures market. In the same way as the example I gave with regard to those who might want to invest in an oil facility, if there cannot be adequate hedging of investments in wind and solar and other facilities such as that for which we have enacted tax incentives to try to move into renewable energy, then those investments as well without a futures market will not be able to flourish as they should.

These kind of impacts, these kind of dynamics that could occur in our economy from improper regulation of the market are real. Again, some say: Well, you know, the oil companies or someone has been out there, speculators have been manipulating the futures market.

Commodity prices have shot up not just in oil but across the board. This chart shows a number of commodities, from wheat to corn, to steel, to iron ore, nickel, zinc, copper, platinum, all the way along, including oil. This is the line for the WTI oil, that is the futures market in oil right here.

As you will see, there are many commodities that have risen in price over the past few years, from 2006 to 2008, even more so than oil. The point there is, some of these commodities are regulated or traded on futures markets and some are not. The same dynamics of supply and demand are hitting us in other commodities as they are in oil.

According to Robert Samuelson, an economist and Washington Post columnist, the price of corn has increased 70 percent from 2002 to 2007; copper has increased 300 percent during the same time; steel, 117 percent. And interestingly, steel is one of those that is not traded in the commodities market. Neither is iron ore, the cost of which has recently increased by 85 percent in Chinese markets.

The point here is that supply and demand, not investors, is what is driving up the prices in commodities. How else can you explain the fact that raw materials that are not traded on commodity exchanges are increasing at the same rapid pace?

Let's look specifically at the crude oil issue in the next chart. Those who say it is the futures market which is driving up the price of oil would tell you this market right here, the one in red, for West Texas Intermediate, where the futures in oil are traded, is where some not normal increases are being forced, where market speculation is manipulating the price.

Yet if we look at other physical crude oil grades, the West Texas Sour, Light Louisiana Sweet, the Mars, the Dated Brent, and the Dubai, they have all gone up actually higher than the West Texas Intermediate.

Now, I know this is getting down into the weeds a little bit, but the point here is, every one of those other types of oil is a physical crude oil that is not traded in futures markets. There are no speculators driving up these prices or causing these prices to occur. These prices are occurring at the spot where those who produce the oil are selling it to those who use the oil.

One more indication that in market after market after market, not just the futures market, but in every market, the price of oil is going up. And again the reason is because supply and demand is out of balance.

Let me give you another example. Onions. In 1958 Congress had a similar issue to the one we have today. They responded to a sharp increase in onion prices by passing legislation to ban all futures trading in onions. And that law, by the way, is still law today.

But there has been no stabilizing effect on the price of onions. In fact, the price of onions soared 400 percent in late 2006 and 2007, only to drop by 96 percent thereafter, and then increase another 300 percent a month later.

The point is that wide volatile swings in price occur in an unregulated market or in a market where there is not a futures system where speculators can invest and provide more stability. The onion market is a perfect example. Many of the experts who are now weighing in on the oil issue are stating that if we take the opportunity for speculation in the futures markets out of the equation, then we can expect to see wider fluctuations in the price of oil.

Now, is that to say there is nothing we should do in the Senate with regard to futures markets or that there can never be any manipulation or there is no reason to pay attention to this issue? No. It is possible. It is not easy, but it is possible for very concerted efforts to be undertaken to manipulate markets.

That is why we have groups such as the Commodity Futures Trading Commission that are basically our cops on the beat to make sure they pay attention to what is happening in these markets and stop efforts to manipulate before they occur.

So what should we do? What should we be doing in the context of this piece of the equation with regard to our securities, our futures markets? We need to be strengthening the CFTC. The CFTC has not had a significant staffing increase level since—well, let's put it this way. Their staffing levels at the CFTC are at a 33-year low.

In one of the amendments we wish to bring forward, we would provide the resources for the CFTC to hire 100 new employees, enough staff so they can even more aggressively and effectively monitor what is happening in these markets, and make sure there is no effort to cause a manipulation in any significant way.

In addition, before this Senate, as we speak, we have nominations for three members of the Commodities Futures Trading Commission who still languish on our docket: Walt Lukken, Bart Chilton, and Scott O'Malia. They should have been confirmed by this Senate to the CFTC months and months ago, but they languish because of partisan politics. They need to be moved forward promptly. If we are serious about wanting to oversee these futures markets effectively, then we need to put those in place who are tasked to do so, and to make sure they have the staff to be able to do so effectively.

The CFTC has undertaken a number of steps recently to improve the oversight and transparency of energy futures markets, and we need to give them the resources to get the job done well.

The underlying legislation is based on the premise that we can simply reach our hand in, as the heavy hand of Government and change the price of oil. The reality is the opposite.

I said earlier we need a broad-based approach. Yes, let us strengthen the CFTC, but let's open the floor of this Senate, and let's allow the Senate to debate other ideas. What are some of the other ideas we need to be pursuing?

For one, we need an aggressive perspective on energy efficiency and conservation. With energy and gas prices spiraling upward, America can no longer consume energy as we have in the past. In fact, energy efficiency is often called the fifth fuel because every gallon of gas not consumed and every kilowatt hour not utilized is the equivalent of one produced. The numbers are stark. If you look at the amount we have saved since 1973 through efficiency and energy conservation efforts, it is the greatest source of energy we have. It outstrips petroleum, coal, natural gas, nuclear power, and all others.

We still have tremendous potential for strides forward. The estimates we have before us are that the United States can cost-effectively reduce energy consumption by an additional 25 to 30 percent or more over the course of the next 20 to 25 years. That is a significant fact. That should be a significant part of our national energy policy. The kinds of things we need to do there are the kinds of things we need to be debating and voting on and incentivizing in the Senate.

The Alliance to Save Energy estimates that if the proper energy efficiency measures across the industrial, residential generation and transportation sectors were put into place, we could save $312 billion a year. The savings in the residential sector alone total $145 billion a year or $500 for every citizen over a 10-year period. An example: The new fluorescent light bulbs use one-fifth the electricity of a conventional light bulb and can save $50 apiece over the lifespan of just one light bulb. Other ways include greater appliance efficiency standards, smart grid technologies, as well as weatherization. Research and technology are key to this. In fact, one of the things we can do in our transportation sector to reduce our reliance on petroleum is to move to low-energy vehicles. Battery research is well underway, and we could move to plug-in hybrids or hydrogen fuel cell vehicles relatively soon, if this Congress would get engaged and incentivize and strengthen our commitment to that technology effort.

We already have implemented new CAFE standards, which was a proper and positive step forward. My point is this: One of the first things we need to do in our rational comprehensive energy policy is to engage in conservation and efficiencies. It is our fifth source of fuel and one of our most significant potential sources.

We also need to move into renewable and alternative energy sources. We have listed a sampling of them here: Hydropower, nuclear, biomass, solar, wind, geothermal, and tidal. Some of them are not at the stage where they can economically survive without support or incentives. Frankly, as a government, we need to be working in every one of those areas to do the research, the technology, and to provide incentive support for us to move aggressively into those areas.

Let me give a couple examples of what we could do. Nuclear power is the only reliable base load generation that emits no carbon or other air pollutants. To supply our growing electrical generation needs, the EIA estimates at least 60 new nuclear plants are needed in the next 25 years to supplant new fossil-fuel generation. But no new plant has been built in the last 30 years. The main reason for this is the facilities are expensive to site and to build. They require enormous amounts of capital for design and construction before any profits can be realized, and our current regulatory process challenges this whole system and extends just the permitting process so long that it makes it hard financially to make it pan out. Congress could fix that. We need to be as aggressive as we possibly can to incentivize, strengthen, and expand our nuclear energy industry.

Geothermal: An MIT study concluded it would be affordable to generate over 100 gigawatts of geothermal electricity by 2050 in the United States alone for an investment of $1 billion in research and development over 15 years. To give perspective, that would replace 100 coal plants.

Wind: Idaho is ranked 13th in the Nation for wind energy, and global wind power currently stands at 94 gigawatts per year. China has a plan to equal that itself by the year 2020.

Biofuels and ethanol: I support this diverse energy portfolio, and biomass and biofuels, conventional and cellulosic ethanol, as well as biodiesel, are one part of the solution. As concerns about the rising price of corn mount, the need for commercial cellulosic ethanol production becomes more apparent. It is estimated that 1.3 billion dry tons of biomass can be harvested annually from U.S. forests and agricultural land without negatively impacting food, feed or export demands. What that translates into is enough ethanol to replace 30 percent of the current U.S. petroleum consumption.

Hydropower produces 7 percent of the U.S. electricity supply and almost 70 percent in my part of the world. It also accounts for 80 percent of the Nation's total renewable electricity generation, making it the Nation's leading renewable energy source. Hydropower turbines are capable of converting 90 percent of the available energy into electricity, which makes them more efficient than any other form of generation.

The point is the United States can make great gains to, No. 1, become less dependent on petroleum and, No. 2, to generate much more energy supply, if we will get aggressive about focusing on renewable and alternative energy sources. I have gone through a few in this sampling.

Having said all that, that we can do what we need to, to effectively monitor and control and manage our futures markets, that we need to focus on renewable and alternative energy sources, that we need to have an aggressive efficiency and conservation effort, does that mean we can simply ignore the price of oil? The answer is no. Let's go to the next chart. Even if we were to agree today and the President were to sign into law all these new incentives and the many things we could be doing in terms of conservation, renewable and alternative fuels and the like, it still would take several decades to transition away from being a purely almost totally petroleum-based economy. During that transition time, we still need oil. Oil is going to be key to our energy future now and for years in the future. While we transition away, we have to recognize that. But today, based on Energy Information Administration estimates, the United States is expected to spend $570 billion on imported foreign oil in 2008.

If you have been watching the T. Boone Pickens ads and the information that comes on those, the estimates are even higher, as high as $700 billion. That is $500 to $700 billion that flows right out of the U.S. economy to other nations. What does a transfer of that kind of wealth mean? Every year that we send $500 to $700 billion outside the United States for other countries to produce oil and sell it to us, we erode our national security through loss of physical control over our own resources. We certainly lose jobs. Imagine the number of jobs we could have in the United States if we were engaged in production of our own oil. We increase foreign holdings of U.S. dollars that are out of our control. We have increased foreign holdings of American debt. We have a loss of domestic investment in huge amounts. Overall, we have a weakened U.S. dollar. We are sending our wealth overseas because we are too dependent on foreign sources of petroleum.

Do we have the opportunity to change that? Can we do any different? Or are we in a situation where the United States does not have access to oil resources? The world is using more oil, but U.S. production has fallen to its lowest levels in 60 years. The IEA projects that global oil consumption is going to grow by 37 percent in 2030; whereas, annual oil production will need to be 13.5 billion barrels higher today to meet that increase in demand. What kind of potential do we have in the United States? Let's go to the next chart.

There are a number of things we can do. The United States must be recognized as one of the strongest and most energy-rich nations, when you think about oil in the world. There has been a lot of debate about the Outer Continental Shelf. The projected OCS resources would equal almost 50 years of imports from OPEC. Think about that. Let's go to the next chart. Our OCS is estimated to have over 100 billion barrels of oil. We yearly import a little over 2 billion from OPEC nations. Simply turning to the Outer Continental Shelf instead of sending all the money we now send to OPEC nations, we could generate that oil ourselves simply on the OCS in the United States.

We have Western shale oil resources. These are phenomenal. Proven American oil shale resources could provide our country with 800 billion barrels of oil, which is more than three times the reserves of Saudi Arabia. This chart shows some very interesting information. Over here is the world's proven oil reserves. I think that is 1.7 trillion barrels of oil. This is the Saudi Arabia proven portion of that. This is the U.S. proven oil shale reserve. Remember oil shale is not considered to be the same

as oil. So if we were to take the oil shale and then produce it into oil, what could we start doing in comparison to the oil available in the world? This is what we know we have: U.S. proven oil shale reserves, 800 billion barrels. But there are estimates that the 800 billion barrels is low and that we actually have up to 2 trillion barrels of oil available in our oil shale reserves. Yet we send dollars overseas to get our oil.

So we have the OCS and the oil shale reserves. We have the Arctic National Wildlife Refuge, and we have debated this in the Senate and House for years. But projected resources in ANWR would equal over 17 years of our imports from OPEC. Again, another major source of oil that the United States can access.

The reason I am going through this is to show that the United States does not have to be dependent on foreign nations for our oil. We have other resources. The U.S. onshore resources—and that is not the Outer Continental Shelf but what we have right here onshore—are shown here at basically 35.5 billion barrels of oil. The yellow part NWR; the red is all the rest. Again, the comparison there is to OPEC. Yet the United States has allowed itself to become so dependent on OPEC that we transport $570 billion a year to other nations. They are not all OPEC nations, but the vast majority of it goes to OPEC nations.

Another source is coal to liquids. The United States has 496 billion tons of demonstrated coal reserves, which is equivalent to almost 1 trillion barrels of oil, over 30 percent larger than the known Middle East reserves of crude oil. In fact, the United States is often called the Saudi Arabia of coal. But that may actually be an understatement, according to the American Coal Foundation, because domestic coal reserves contain more energy than that of all the world's oil reserves combined. Again, the United States has a phenomenal resource here that we are not taking advantage of.

These are groups that are starting to now come forward—and this is, again, a sampling of the list—coming forward and saying the United States must get engaged in its own oil production.

I know my time is running out, but the response that has been made to this is that: Well, we can't get this oil for another 10 years. In fact, some say we can't get it for another 20 years. Well, depending on the source or the specific location, whether it is the Outer Continental Shelf or the onshore sources or the oil shale, it will take 5, 10, to 15 years to bring this resource into production. My first answer to those who say: Well, this will take 10 years to get on line is that is what you said 10 years ago. In fact, it was what was said 15 years ago; it was what was said 20 years ago. We need to make the step now to begin making the United States less dependent on foreign sources of oil.

It is also said we have 68 million acres of lease land that is not being produced right now. Well, let's take another look at what that means. That assumes somebody is basically hoarding acreage on leased land. The success rates for new onshore and offshore oil leases are not 100 percent; in other words, not every lease the United States issues results in oil being produced commercially. The reason is there is not oil underneath all the land. The companies that have to make the investment to go out and explore for it and then ultimately produce it don't know for sure whether there is oil under there when they purchase the lease. So it takes about 10 years of time from the purchase of the lease to go through the exploration process, and then if there is oil found, the permitting process, and then they move forward.

Most of the obvious places have already been leased out. The new leases are generating onshore about 10 percent success; offshore, 20 percent; and then in the shallow offshore, 33 percent success. The point being it is far too easy to simply say: Well, we have 68 million acres of leases out there; let's rely on those. Those leases are all in the process of either being explored or being returned because they are not being produced.

Let's look at the next chart. This chart shows what the status of these nonproducing leases is. For those who say let's go out and get the 68 million acres of leases and use them, right now, 50 percent of them are in the data-gathering process and they will either be produced or returned, depending on whether there is oil there that can be commercially found, but they are in the process of being pursued. Twenty-five percent they have found oil on and they are drilling or they are preparing for drilling. In another 10 percent, they have confirmed discovery and they are under construction. In 15 percent, the initial analysis is complete, and there is low commercial potential and they are likely to be returned to the Federal Government. That is the status of the ones that are currently not producing.

The point, though, is those who argue we should rely totally on the current status of our lease effort are saying let's have no new production. Everything they are talking about is either in production or in exploration or in preparation for production, but what they don't tell you is that 85 percent of the Outer Continental Shelf off the lower 48 States is off limits to development. There are no leases there. Eighty-three percent of the onshore Federal lands are currently off limits or facing restrictions to development. There are no leases there.

If you go back and think about the potential we have in the offshore oil, in the oil shale, in ANWR, in our onshore oil, and in the tremendous coal-to-liquids potential we have, there is no reason the United States should not aggressively seek to become energy independent in the arena of oil.

There are those who say: Well, that is because the big oil companies have the Republicans in their pockets and as we heard today, there is plenty of oil being produced. We just have to look at these acres, these leases that are not being used. Again, the reality is the United States of America, since the 1970s, has said no, basically no to further production, and that is why we see us increasingly and more increasingly dependent on foreign sources of oil.

In conclusion, the United States faces very serious threats to our future way of life. Our national security and our economic security are at risk. It is appropriate that we be here debating in the Senate on this issue. What is not appropriate is that ideas about all of these different kinds of production and renewable and alternative energy sources and conservation and efficiency measures are not allowed to be debated on this floor. Instead, we are told we are simply going to have a new government regulation system and the government is going to have a little more control of our markets and that is going to fix the problem of oil, and that is going to make it so the price of gas goes down. Well, it is not. I call on our leadership in this Senate to simply allow us to have a traditional, fair system of debate on the floor on the energy issue so we can debate all of these ideas. If some of them are bad, let them be voted down, but let's debate these ideas and the many ideas that others of my colleagues have about how we should solve our energy crisis in this country. I am confident if we will allow such a full and robust debate to occur, a tremendous amount of good ideas will come forward, and out of that debate will come a comprehensive, rational national energy policy that will focus on a diversification on our approach to energy and will put the United States on a sound, strong pathway toward energy independence.

If we don't do that and we refuse and shut down debate and allow only some kind of a market regulatory solution to be put into place, we will find we will have fouled up our markets, caused volatility in the price of oil. We will not have done anything to generate one more drop of oil or one more kilowatt of electricity or one more energy conservation effort that would reduce the consumption of oil or electricity, and we will see gas prices continue to rise.

It is incumbent upon us as Senators to call for a full debate. If we do so, the United States has the capacity, the resources, the ingenuity, and the ability to become energy independent and to become strong in the context of our energy policy.

Thank you, Mr. President.

Mr. President, I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. PRYOR. Mr. President, I ask unanimous consent the Senate proceed to a period of morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON APPROPRIATIONS SUBCOMMITTEE ASSIGNMENTS

Mr. BYRD. Mr. President, I ask unanimous consent that the attached list of subcommittee assignments for the Committee on Appropriations be printed in the RECORD, to supplant the list printed in the RECORD on November 2, 2007.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUBCOMMITTEES

Senator Byrd as chairman of the Committee, and Senator COCHRAN, as ranking minority member of the Committee, are ex officio members of all subcommittees of which they are not regular members.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES

Senators Kohl,[1] Harkin, Dorgan, Feinstein, Durbin, Johnson, Nelson, Reed, Bennett,[2] Cochran, Specter, Bond, McConnell, Craig, Brownback. (8–7)

COMMERCE, JUSTICE, SCIENCE, AND RELATED AGENCIES

Senators Mikulski,[1] Inouye, Leahy, Kohl, Harkin, Dorgan, Feinstein, Reed, Lautenberg, Shelby,[2] Gregg, Stevens, Domenici, McConnell, Hutchison, Brownback, Alexander. (9–8)

DEPARTMENT OF DEFENSE

Senators Inouye,[1] Byrd, Leahy, Harkin, Dorgan, Durbin, Feinstein, Mikulski, Kohl, Murray, Cochran,[2] Stevens, Specter, Domenici, Bond, McConnell, Shelby, Gregg, Hutchison. (10–9)

ENERGY AND WATER DEVELOPMENT

Senators Dorgan,[1] Byrd, Murray, Feinstein, Johnson, Landrieu, Inouye, Reed, Lautenberg, Domenici,[2] Cochran, McConnell, Bennett, Craig, Bond, Hutchison, Allard. (9–8)

FINANCIAL SERVICES AND GENERAL GOVERNMENT

Senators Durbin,[1] Murray, Landrieu, Lautenberg, Nelson, Brownback,[2] Bond, Shelby, Allard. (5–4)

DEPARTMENT OF HOMELAND SECURITY

Senators Byrd,[1] Inouye, Leahy, Mikulski, Kohl, Murray, Landrieu, Lautenberg, Nelson, Cochran,[2] Gregg, Stevens, Specter, Domenici, Shelby, Craig, Alexander. (9–8)

DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES

Senators Feinstein,[1] Byrd, Leahy, Dorgan, Mikulski, Kohl, Johnson, Reed, Nelson, Allard,[2] Craig, Stevens, Cochran, Domenici, Bennett, Gregg, Alexander. (9–8)

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES

Senators Harkin,[1] Inouye, Kohl, Murray, Landrieu, Durbin, Reed, Lautenberg, Specter,[2] Cochran, Gregg, Craig, Hutchison, Stevens, Shelby. (8–7)

LEGISLATIVE BRANCH

Senators Landrieu,[1] Durbin, Nelson, Alexander,[2] Allard. (3–2)

MILITARY CONSTRUCTION AND VETERANS AFFAIRS, AND RELATED AGENCIES

Senators Johnson,[1] Inouye, Landrieu, Byrd, Murray, Reed, Nelson, Hutchison,[2] Craig, Brownback, Allard, McConnell, Bennett. (7–6)

STATE, FOREIGN OPERATIONS, AND RELATED PROGRAMS

Senators Leahy,[1] Inouye, Harkin, Mikulski, Durbin, Johnson, Landrieu, Reed, Gregg,[2] McConnell, Specter, Bennett, Bond, Brownback, Alexander. (8–7)

TRANSPORTATION AND HOUSING AND URBAN DEVELOPMENT, AND RELATED AGENCIES

Senators Murray,[1] Byrd, Mikulski, Kohl, Durbin, Dorgan, Leahy, Harkin, Feinstein, Johnson, Lautenberg, Bond,[2] Shelby, Specter, Bennett, Hutchison, Brownback, Stevens, Domenici, Alexander, Allard. (11–10)

[1] Subcommittee chairman.
[2] Ranking minority member.

TRIBUTE TO KENTUCKY'S KOREAN WAR VETERANS

Mr. MCCONNELL. Mr. President, I rise today to honor the service and sacrifice of the hundreds of Korean war veterans living in the Commonwealth of Kentucky. This July 27 marked the 55th anniversary of the cease-fire that ended that conflict.

After 3 years of battle which nearly forced American and South Korean troops from the peninsula, the determination and bravery of our servicemen prevailed. Our heroes in uniform ensured that the people of South Korea would remain free.

Recently, nearly 300 Kentuckian Korean war veterans were recognized for their service by retired Korean Major General Seung-Woo Choi. Major General Choi was a child during the Korean war, but he wanted to say thank you to the brave Americans who fought to protect his and his family's freedom. So he traveled from South Korea to my hometown of Louisville, KY, to honor them.

I ask unanimous consent that the full newspaper article describing this ceremony be printed in the RECORD. I know the entire U.S. Senate stands with me to recognize the tremendous valor of our veterans, and to honor the sacrifice of those who did not return.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Louisville Courier-Journal, July 25, 2008]

KOREAN WAR VETS HONORED: S. KOREAN GENERAL PRESENTS MEDALLIONS

(By J.D. Williams)

Looking back, Joseph Scott said he is thankful to be a veteran of the Korean War.

In 1950, Scott joined his two brothers, James and Talmadge, and enlisted in the Army.

Yesterday, the 77-year-old and nearly 300 other Korean War veterans from Kentucky were honored at the Kentucky Exposition Center for their service.

''I'm thankful I was there,'' Scott said of the war. ''It was quite an experience.''

The veterans were given a medallion designed by retired Korean Maj. Gen. Seung-Woo Choi, who came to Louisville from South Korea to honor them. Choi was a child during the Korean War, but has made it a priority to offer his thanks to veterans of the war that ensured South Korea's freedom.

Since 2002, Choi has presented over 5,000 medallions to veterans across the nation.

People from various veterans' organizations spoke at the event, and the Kentucky Korean Women's Choir performed.

''The sacrifice you made for the Korean people has not been forgotten . . . you saved our freedom,'' said Charles Park, a native of Korea who is with the Korea Foundation of Kentucky.

Marilyn Mullins, 67, the widow of Edward Mullins, said her husband would have loved to be there. He died in April 2007 of complications from diabetes.

''I wish he could have been here to accept it himself,'' Mullins said of receiving the medallion. ''He would have been glad to meet the general.''

She said the medallion is the only award her late husband has been presented. She said he was supposed to receive the National Defense Service Medal, the Korean Service Medal and the United Nations Service Medal, but they never reached him.

James Hall, 76, of Bowling Green, said he was glad to be with fellow Korean War vets.

Hall, who was 18 when he was deployed to Korea, was in the battle at Chosin Reservoir, which he called a ''horrible place at a horrible time.''

He said the severe cold with snow and without heat and warm food was nearly unbearable, but soldiers endured to ensure South Korea's freedom.

''I had tried to put a lot of things about Korea out of my mind, but it was wonderful to be with the veterans I served with,'' Hall said. ''It reminded me of how important it was for us to be there so South Korea could be free.''

AMERICANS WITH DISABILITIES ACT RESTORATION ACT

Mr. LEAHY. Mr. President, this past weekend marked the 19th anniversary of the passage of the Americans with Disabilities Act, ADA, one of the Nation's most critical and effective civil rights laws. It is fitting that as we celebrate its passage, we reflect on the progress we have made in expanding possibilities for Americans with disabilities and the challenges that still remain.

We passed the ADA in recognition that the bedrock principles of human dignity and equal opportunity require all Americans to be judged on their individual merits and not on the prejudices of others. This law promised generations of Americans the opportunity to leave their mark on a country that had only years before denied them full participation. I, like many of my colleagues, supported this historic act. I hoped it would serve as a vital tool against the barriers that had long excluded persons with disabilities from fully participating in society.

By any reasonable measure, the ADA has been a success. Today, persons with disabilities enjoy rights many of us have long taken for granted. Now they

have access to public transportation built to accommodate people in wheelchairs. They have the ability to stay in hotels, travel, and enter schools and places of entertainment equipped for their needs. Indeed, almost every office building in America is fully accessible to them. Thus, the enactment of the ADA transformed our country and we are a better Nation because of it.

Despite these significant advances, recent decisions from the Supreme Court and lower courts attempt to erode the ADA's protections and threaten to turn back the clock on our progress. I am particularly disturbed by rulings that have narrowed the ADA in ways we never intended. Rather than broadly interpreting the ADA's mandate, as we intended, courts have repeatedly interpreted that law to embody a ''strict and demanding'' standard for determining who qualifies as an individual with a disability. These narrow rulings ensure that the persons we intended to shield, including those with severe illnesses, like epilepsy and multiple sclerosis, are no longer protected. As a consequence, millions of Americans who suffer discrimination are now excluded from ADA protection.

A few years ago, a Federal judge in Vermont's neighboring State of New Hampshire ruled that a woman with breast cancer was not sufficiently disabled to be protected by the ADA. Court rulings contrary to Congress's intent for the ADA are not limited to the New England States. Last year, a panel of judges on the U.S. Court of Appeals for the Eleventh Circuit unanimously ruled that even mental retardation did not constitute a sufficient disability under the ADA.

The message sent by these rulings is as unfortunate as it is undeniable: the courts no longer consider certain persons ''disabled enough'' to be protected. That means an employer could fire or refuse to hire a qualified worker on the basis of his or her disability, and defend that action in court on the grounds that the worker was not ''disabled enough'' to be protected under law.

In addition, the legislative history is crystal clear. Congress intended the ADA to protect all persons without regard to mitigating circumstances. Indeed, the Senate committee report on the ADA expressly stated ''[w]hether a person has a disability should be assessed without regard to the availability of mitigating measures, such as reasonable accommodations or auxiliary aids.'' Despite this clear intent, courts have ruled that people with disabilities who take medication or use assistive devices should not be considered disabled.

I am particularly concerned that these rulings will undermine the rights of thousands of veterans with disabilities who, upon returning from the war, will enter the civilian workforce to support their families. Many of these veterans have disabilities, including post-traumatic stress syndrome, that may be controlled with medication. If any of them suffer job discrimination, we must make sure they will have a remedy.

Equally disturbing is that many of these cases can lead all Americans into what Senator HARKIN has aptly described as a legal catch-22:

> People with serious health conditions [] who are fortunate to find treatments that make them more capable and independent and, thus, more able to work may find that they are no longer protected by the ADA . . . . On the other hand, if they stop their medication or stop using an assistive device, they will be considered a person with a disability under the ADA but they won't be qualified for the job.

We must act to remedy these erroneous court decisions. Last month, the House overwhelmingly passed the Americans with Disabilities Act Restoration Act. Now it is the Senate's turn to respond. This legislation would reverse these flawed decisions and restore the original congressional intent of the ADA. First, the bill would clarify Congress's purpose to reinstate a broad scope of protection for a range of persons with disabilities under the ADA. Second, the legislation would modify findings in the ADA that have been used by courts to narrowly interpret what constitutes a ''disability.'' Third, the bill would lower the burden of proving that one is ''disabled enough'' to qualify for coverage.

This long overdue legislation has ample support from both disability groups and business interests. I hope this bipartisan bill does not fall victim to the petty partisan obstruction that has prevented passage of other civil rights measures in this Congress that had broad bipartisan support, like the Lilly Ledbetter Fair Pay Act. While unprecedented obstruction tactics have led Senate Republicans to stall one bill after another on the Senate floor, it is well past time for us to turn the page on partisan tactics designed to thwart critical civil rights bills.

Indeed, our heritage of freedom and our continued march towards perfecting our Union, should remind us all that civil rights legislation holds a unique place in this institution. These bills bring us closer to fulfilling the promises engrained in our founding charters of establishing freedom and equality for all Americans. Thus, they should be held to a higher standard than other bills.

Time has shown the ADA to have been one of our Nation's most effective tools in combating discrimination. Its continued effectiveness is important to ensure that the great progress we have made in widening the doors of opportunity for all Americans continues in the future.

We have before us a historic opportunity to restore the ADA's original intent and reclaim the basic rights it extended to persons with disabilities. I was proud to support the ADA in the 101st Congress, and I am pleased to support this year's bill as it moves forward. I hope this bill will be promptly passed by the Senate and signed into law by the President.

THE WAR POWERS CONSULTATION ACT OF 2009

Mr. WARNER. Mr. President, today I recognize the members of the National War Powers Commission, particularly the cochairs and my dear friends—former Secretaries of State James A. Baker and Warren Christopher—for their distinguished and valuable work in bringing forward this critical legislation to address this important issue to our Nation.

Few would dispute that the most important, and perhaps the most fateful, decisions our leaders make involve the decision of whether to go to war. Yet after more than 200 years of constitutional history, the extent of the powers the respective branches of government possess in making such decisions is still heavily debated.

Let me first outline some points regarding the legislative history of the War Powers Resolution. On November 7, 1973, Congress passed the War Powers Resolution over President Nixon's veto, by a vote of 284 to 135 in the House, and a vote of 75 to 18 in the Senate. The legislation was passed purportedly to restore a congressional role in authorizing the use of force that was thought by many to have been lost in the Cold War and Vietnam war. The War Powers Resolution was intended to provide a mechanism for Congress and the President to participate in decisions to send members of the U.S. Armed Forces into hostilities.

Less than 2 years after its passage by Congress in 1973, legislative proposals were introduced to amend the War Powers Resolution. The War Powers Resolution continued to raise concerns among the executive and legislative branches of government throughout the next decade as the Nation faced such situations as in El Salvador, Lebanon, and Libya.

Several legislative proposals were introduced in Congress to modify or repeal the War Powers Resolution. These legislative proposals were referred to the appropriate committee on the House or Senate side, but none were ever passed by Congress.

The War Powers Resolution again became an issue regarding activities in the Persian Gulf after an Iraqi aircraft fired a missile on the USS Stark on May 17, 1987, killing 37 sailors. Shortly afterwards, the United States began to reflag Kuwaiti oil tankers and provide a U.S. naval escort for Kuwaiti oil tankers through the Persian Gulf. As military escalation also continued to increase in the Persian Gulf region as a result of the Iran-Iraq War, the Congress became concerned that U.S. forces could be committed to the region without consultation between the executive and legislative branch.

Consequently, 20 years ago, on May 19, 1988, I, along with two of our former colleagues—Senators Mitchell and

Nunn—joined Senator BYRD and introduced the War Powers Resolution Amendments of 1988, known as S.J. Res. 323. Senator Boren later joined as well as a cosponsor of this legislation in June 1988. I humbly state today that I was the only Republican cosponsor of the legislation. This piece of legislation, however, was referred to the Senate Foreign Relations Committee, where it remained.

Subsequently, on January 25, 1989, I again joined Senator BYRD, but this time along with five of our former colleagues—Senators Boren, Cohen, Danforth, Mitchell, and Nunn—and introduced the War Powers Resolution Amendments of 1989, known as S. 2. Our former colleagues and I proposed legislation to modify the War Powers Resolution of 1973.

These amendments were intended to: require the President to consult with six designated Members of Congress ''in every instance in which consultation is'' required under the War Powers Resolution of 1973; require the President and the six designated Members of Congress to ''establish a schedule of regular meetings'' to ''ensure adequate consultation on vital national security issues;'' establish a ''permanent consultative group'' within Congress, which would be comprised of 18 Members of Congress; and require the President to consult with the permanent consultative group at the request of a majority of the 6 designated Members of Congress, unless the President determines that consultation needs to be limited for national security purposes.

Unfortunately, neither of these proposed pieces of legislation were voted on by the Senate. However, I subsequently cosponsored another similar piece of legislation, the Peace Powers Act of 1995, sponsored by our former distinguished majority leader, Senator Bob Dole. Hearings were held on this piece of legislation by the Senate Foreign Relations Committee, where it remained.

For over 35 years, despite these and similar legislative efforts, no modifications were made to the War Powers Resolution Act of 1973. Today, there still remains no clear mechanism or requirement for the President and Congress to consult before committing the Nation to war.

It is this Senator's opinion that the Nation benefits when the President and Congress consult frequently, deliberately, and meaningfully regarding matters of national security-and-that is exactly why I felt compelled to bring to my colleagues attention the important work recently completed by the National War Powers Commission.

The National War Powers Commission was formed in February 2007—by the University of Virginia's Miller Center of Public Affairs, which is directed by Virginia's former Governor Gerald L. Baliles—to examine the respective war powers of the President and Congress. The University of Virginia, the College of William and Mary, Rice University, and Stanford University served as partnering institutions.

On July 8, 2008, after more than 13 months of study, the Commission released their report and recommendations. I wanted to bring to the attention of my colleagues the important work done by this distinguished Commission to the War Powers Consultation Act of 2009. I strongly recommend that those interested in this important subject contact the University of Virginia's Miller Center of Public Affairs and also review a copy of the Commission's comprehensive report, titled ''National War Powers Commission Report,'' which can be accessed at the Miller Center's Web site, www.millercenter.org.

The exemplary work by the National War Powers Commission, concluded with the following recommendations: the law purporting to govern the Nation's decision to engage in war—the War Powers Resolution—has failed to promote cooperation between the two branches of government; the War Powers Resolution of 1973 is ineffective at best and unconstitutional at worst; and the War Powers Resolution of 1973 should be replaced by a new law that would, except for emergencies, require the President and Congress to consult before going to war.

I would specifically like to draw my colleagues attention to the Commission's legislative proposal, the War Powers Consultation Act of 2009. This proposed legislation contains four key components. These key components are: First, this legislation would replace the War Powers Resolution of 1973. It would ensure that Congress has an opportunity to consult meaningfully and deliberately with the President regarding significant armed conflicts, and would ensure that Congress has the opportunity to express its views as part of a consultative process.

Second, this statute would create a process that will encourage the two coequal branches of government to cooperate and consult in a way that is deliberate, practical, and true to the spirit of the Constitution.

Third, the act would establish a ''Joint Congressional Consultation Committee'' with a ''permanent, bipartisan joint professional staff'' with access to all relevant intelligence and national security information.

Fourth, and finally, the act would require the President to consult with the Joint Congressional Consultation Committee ''[b]efore ordering the deployment of United States armed forces into significant armed conflict''—lasting longer than one week—and would mandate regular consultation thereafter.

I have always believed that Congress has an important and central role in the decision of the deployment of our men and women of the armed forces into harm's way. Undoubtedly, the War Powers Consultation Act of 2009 would provide Congress and the President a well-defined mechanism for consultation on matters of the use of force in armed conflict.

The decision to commit our country to war is by far one of the most critical decisions that faces our Nation's leaders. This proposal seeks a concrete and pragmatic solution to a longstanding problem that is only getting more difficult in a time where our Nation will continue to face unconventional threats and warfare.

I urge my colleagues to review this important material and work together, with the next administration, to find a solution to this ever-present debate between a President and the Congress over their respective constitutional powers.

IDAHOANS SPEAK OUT ON HIGH ENERGY PRICES

Mr. CRAPO. Mr. President, in mid-June, I asked Idahoans to share with me how high energy prices are affecting their lives, and they responded by the hundreds. The stories, numbering over 1,000, are heartbreaking and touching. To respect their efforts, I am submitting every e-mail sent to me through energy_prices@crapo.senate.gov to the CONGRESSIONAL RECORD. This is not an issue that will be easily resolved, but it is one that deserves immediate and serious attention, and Idahoans deserve to be heard. Their stories not only detail their struggles to meet everyday expenses, but also have suggestions and recommendations as to what Congress can do now to tackle this problem and find solutions that last beyond today. I ask unanimous consent to have today's letters printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

It is a most interesting subject [to] bring up, the escalating prices of oil and the reason they are so high. I am tickled to hear that you believe in exercising our own resources here in our own country.

I have done a lot of research on this very subject and just happen to know a lot of people that are directly associated with or are involved in the Alaska oil situation and the reason for the billions that we spent on the pipeline to begin with. I also know that there is enough oil in Alaska to last us for two hundred years . . . but Washington does not seem to want to take that option. They are more interested in foreign oil and the foreign oil policy, even at the expense of our own country and fellow Americans.

Are you aware of how much natural gas they pump right back down into the ground using 747 Jet engines to do it with? If you are not aware, you need to be aware of it and if it does not madden you, then I can only question your way of thinking. Don't take my word for it, do the research.

If you are truly aware of what is really going on and you are truly in favor of exercising our own resources, then I am behind you one hundred percent. I am just not real sure how we are going to get the ugly politics out of Washington D.C., and I am an optimist, but on this one, it forces me to be a pessimist. I believe it has gone too far and is way out of control at this point.

I also know that we could be buying gasoline for our vehicles for less than a $1.50 a

gallon if we were using our own resources, but again, Washington does not seem to care and it sickens me. It is clearly about greed and money and greed breeds greed—just look how well it is working for the greedy. It makes me wonder why I ever served in Vietnam and why I lost 60,000 of my comrades, but [I feel resigned to accept what is happening].

I have always been behind you and supported you and will continue to do so and only can hope that at least you will stay honest or at least believe that honesty is the best policy.

BOB, *Boise*.

I received an e-mail several days ago that has ''shaken me up'' and started my mind working. [We have enough gas] to keep all of America going for at lease 150, and probably 200 years, even accounting for increased population growth and demand for energy. The reason—the ''bottom line''—that keeps President Bush and Congress from allowing drilling oil within our borders is NOT environmental issues, but paying off the national debt. [Allow me to summarize:] In the early 1970's then Secretary of State Henry Kissinger traveled to most of the oil producing countries in the world, agreeing to buy oil from them IF they would sign to use part of the money they made on the sale to buy off our national debt.

If we started producing our own oil reserves, the fear is that the U.S. economy would collapse because the oil-producing countries from which we buy oil would stop paying down our national debt when we stopped buying oil from them. Well, here is my solution:

Start using our own oil reserves which would reduce the cost of gasoline to about $1.50/gallon. Charge us $2.50/gallon, sending $1.00 per gallon to pay off the national debt.

Who would not be delighted to pay just $2.50/gallon again? Who would object to paying a ''tax'' of $1.00/gallon to pay off the national debt when we would realize a savings over today's oil prices?

Please do not just trash this. Please give it some careful attention, and share the concept with others. It is time for a change. It is time to start thinking about saving our country for our country, and stop being held hostage by the International Monetary Fund and the World Bank. Thank you for ''listening'' and implementing some changes.

LOIS, *Caldwell*.

This is in response to your email asking for my story about the impact that high gas and energy prices are having on my life. You said I could write a paragraph or two about how I am affected by high energy prices, and that it would be worthwhile for me to share the priorities that I think Congress should set in resolving this crisis.

CRISIS

(1) I no longer go backpacking, hiking, camping, or canoeing. Instead, I float the Boise River on a tube, because it is close to home. I used to buy equipment and services that supported those hobbies, but now I do not. So, those businesses that I used to patronize are impacted negatively, because I stay in town. Who also suffers? The businesses near the towns where I traveled, and the businesses on the highway that lead to those areas.

If more people are doing this, what is the impact to our environment? More people will not recognize the beauty of God's creation, which means they will be less likely to support bills that protect the environment.

(2) I no longer explore small Idaho towns and ghost towns. Who suffers? The business in those towns, and the businesses on the highways that lead to those towns.

(3) Long before the ''energy crisis'', I had already switched to fluorescent light bulbs. Fortunately, I had my home built with 2 attic fans, so that I do not have to use the air conditioning during summer. Also, almost every room in my home has ceiling fans; so, I turn on the ceiling fan in the room I am occupying instead of turning on the air conditioning for my entire home.

During the cold months, I set my thermostat to 40 or 50 degrees, 40 during the day if the outside temperature is above 30, and 50 when I am at home or if the outside temperature is below 30. This keeps my pipes from freezing, and it keeps my bills low. I wear warm fleece underwear, and warm fleece outer garments to stay warm. In contrast, my neighbor pays 5 or 6 times as much as I do for their natural gas bills during the cold months (but they are wealthy).

I have drained my hot tub, and I no longer use it. Now I wish I had never bought one. This hurts the hot tub industry, and any businesses that support that industry.

I canceled my satellite TV; that saves me $50 per month, and that is good for about two-thirds of a tank of gas.

I do not have a cell phone, and I do not plan on getting one, since it would cost $50 or more a month (which I can apply toward higher food costs).

(4) I combine trips and do not drive unless I have to. No Sunday drives. No ''unnecessary'' trips to the grocery store. I used to travel about 10,000 miles per year; but for the last 2 years, I have limited my driving to about 6,000 miles per year.

(5) I exclusively shop at Wal-Mart. If Wal-Mart does not carry it, then I don't buy it. Why would I drive around town to shop other stores when I can buy most everything at one place? That is great for Wal-Mart, but it hurts other businesses.

(6) I used to take one decent overseas vacation each year (or go to Hawaii or Florida). However, I stopped doing that after 2005. And since the cost of airline tickets are increasing, I won't even consider traveling. I need to save my money to buy gas and food. And when I see the price of oil rise $10 or more in one day, then I do not think about doing anything but save money for ''the worst case scenario.''

(7) I have changed my diet. I purchase less or no meats and more pasta and rice. I buy graham crackers instead of Oreos, or I make my own cookies. I buy less snack foods. The energy costs have driven up food costs. I have found ways to keep my food prices low by adjusting my diet, but this hurts other businesses. Oh, and I am not one of those obese Americans; I'm 5′9″ and 160 pounds . . . right where I need to be. I do not understand how obese Americans and their children can afford to feed their addiction to foods.

(8) I had hoped to quit my full-time job and work part-time instead (in lieu of traditional ''retirement''). However, because of the drastic increase in prices of energy and food, and because of the uncertainty and volatility in the global markets, I have postponed quitting my full-time job. That means that a college graduate cannot have my good paying full-time job. And it means that I can not enjoy the extra free time that a part-time job would give me.

(9) I drive a 1994 pick-up truck. I would like to buy a new vehicle, but I can not. Why? Because I need something that gets very good gas mileage and has a reasonable price tag, and there are no cars on the road that meet these criteria, even the so-called hybrids (which can not pay for themselves even at $5 or $6 a gallon because of the increased cost of hybrid technology). Back in 1994, it was a mistake to trade-in my 1987 Honda Civic that got 40 mpg in the city and 50 mpg on the highway (and it wasn't even a hybrid . . . and most hybrids can't even come close to that kind of gas mileage these days . . . but they cost 3 or 4 times as much as my Honda did in 1987 . . . and the ''technology'' is so much greater today!!!!). So, I will continue driving my 1994 truck that gets 19 mpg city, because it is way too expensive to buy a new vehicle (i.e., the cost to get a 30 mpg or 35 mpg vehicle will not pay for itself for 7 or 10 years). And you don't need to know my truck's mpg for highway driving, since I do not enjoy outdoor activities anymore, so it doesn't matter.

(10) I have noticed more crime in Boise within the last year. Why do you think that is? Because energy costs (and food costs) have risen too quickly . . . people can't cope with the sudden increases. However, we are not adding more police or more jails to support the increase in crime. I am glad that I do not live in a major metropolitan area, because I think that if energy costs continue to climb, the country is at risk of rioting in its metro areas.

CRISIS RESOLUTION

(1) Politicians need to stop pandering to oil companies and oil executives by developing very stringent fuel economy requirements. Politicians need to stop pandering to oil companies and oil executives by honestly and diligently pursuing alternative forms of energy. But can the politicians do this? After all, there is a lot of money involved with oil in so many places, industries, pocketbooks, and campaign contributions (legitimate and otherwise).

(2) Drill for oil on USA soil and in USA waters. Why? Because we can not wean ourselves from oil instantly; and there are no viable automotive solutions today that do not use oil. It is going to take several years to wean ourselves from oil. In the meantime, we need to rely on our own oil sources to balance our foreign oil dependency. This means drilling in ''pristine'' Alaska, along both of our coasts, and in other areas of our country where ''environmentalists'' say we should not drill.

(3) Pursue fuel cell technology for vehicles (Honda is doing it, finally). Forget ethanol. Forget hybrids. Fuel cell vehicles require hydrogen and oxygen and emit water! No gasoline involved at all. And no cash crops like corn are required, which should help ease the price of this and other commodities.

(4) Use more nuclear energy. This technology currently exists, and it is viable. We do not have to start from scratch.

(5) Take lessons from New Zealand with regards to hydro-electricity and other forms of energy. That country is extremely self-sufficient when it comes to energy.

(6) Use more wind power. This technology currently exists, and it is viable. Are some (rich) people worried about the view of the landscape changing? Then stop painting the wind turbines all white! Paint them to blend into the background, or camouflage style!

(7) Pursue solar power. It is amazing that this technology is so far behind. The sun is so powerful, and so available. Regular homeowners can not afford solar panels on their homes. Look at all the wasted roof space on buildings and homes!

(8) Give incentives for conservation. Why is this last on my list? Because I think most people do conserve energy already . . . except maybe the ''celebrities'' like Al Gore and many other rich folks who tout the environment and conservation, but live in the lap of luxury and waste.

KRISTIAN, *Boise*.

I really do not think the gasoline price is really a result of supply and demand. I am all for conservation and alternative energy

plans and research with diverse sources. I am not opposed to nuclear. I just do not like the feeling of being manipulated. Just yesterday the spokesperson for Saudi Arabia expressed concern about the price of oil. They can see the writing on the wall if it stays like this. They increased supply while insisting that it is not a supply issue.

Other sources that are much more progressive have pointed out that legislation passed late in 2000 deregulated the energy futures. It was suggested on NPR today that Congress could reverse that decision and change the price of energy in one month. You can tell I would sit on the other side of the aisle if I was in Congress but with [the President] making such a fuss about supply and demand I doubt we are going to see any bold action from Congress.

I have pulled the points for the following paragraph from ''Mother Jones'' July–August 2008. You may not like the source but let us discuss the facts. I am referring to an omnibus spending bill passed on or about December 15, 2000. Yes, President Clinton was still in office then. Senator Phil Gramm slipped in a 262-page measure called the Commodity Futures Modernization Act. It contained a provision lobbied for by Enron that exempted energy trading from regulatory oversight. This is primarily about California electricity and the mortgage securities fiasco but I am sure that this regulation or other similar has allowed the current run up in energy futures. This could be regulated. The regulations put in place after the Great Depression were sound and it has been a disaster to undo many of them.

Personally, the high energy prices have had little impact on me. I am, at least for now, still an overpaid engineer at Micron. I have purchased another old Saturn and my wife is driving that more and driving the Bonneville less. GM is saying how much it would take to raise the CAFE standards, but many of us have increased the mileage of our cars by 20 percent for about $200 and we have not disabled emission systems or lied to the engine computer. My car has averaged 55 mpg for the last year and will do about 50 mpg at 65 mph.

The changes are primarily aerodynamics and a little hotter air fed into the engine. Some have bypassed emission systems but many have not.

That is not much of a story but I hope it gets you to thinking about some of these in a new light.

Thanks.

ERNIE, *Meridian*.

Because of the gas prices we hardly go anywhere other than work and the store. Most of this energy crisis has been brought about by the speculators—these are the same people who brought on the sub-prime mess. They have to be stopped because they are ruining our economy. The cost of oil has nothing to do with its availability; it is pure speculation on the part of commodity traders. If these scavengers are not reigned in, the world economy is in for a depression. As soon as the energy bubble bursts, they will move to a new bubble which is food and, because of them, millions will starve. One of the other driving forces behind oil prices is the Federal Reserve (which is neither federal or reserve) lowering interest rates and devaluing the dollar. The banks are out for only themselves and they do not care what happens to the rest of us. The Federal Reserve needs to be done away with—because of the Fed's printing and Congress's spending habits, we are in big trouble.

We can barely afford the price of gas to go to and from work so vacations are out this year and so are a lot of other things. [How] are people, especially senior citizens on a fixed income, going to heat their homes this winter? This is going to hurt Idaho businesses because any extra money is either spent on food or utilities.

Nobody believes the government figures on inflation (which are out-and-out lies) or the figures on unemployment. We are getting tired of the government lying to us and thinking we are too stupid to figure it out. There is nobody to for vote for or against in either the Democrat or Republican Presidential race. I am . . . tired of wasting my vote on the lesser of 2 evils . . .

MR. AND MRS. GEORGE.

ADDITIONAL STATEMENTS

TRIBUTE TO THE SILVER STAR FAMILIES OF AMERICA

● Mr. ISAKSON. Mr. President, today I honor in the RECORD of the Senate the Silver Star Families of America, upon the completion of $1 million in donated volunteer hours and materials to remember and honor the wounded and ill of our armed forces.

The Silver Star Families of America was founded on April 11, 2005, and received 501(c)3 status on December 5, 2005. The Silver Star Flag and Banner are symbols of remembrance and honor for the wounded soldiers and their families as well as anyone wishing to honor those wounded during combat while honorably serving in the U.S. Armed Forces. The goal of the Silver Star Families of America is to recognize the blood sacrifice of our wounded and remember their efforts by honoring them with the Silver Star Banner. The Silver Star Families of America also advocates for the wounded and assists in educating their families and the public concerning their plight.

I have had the pleasure of meeting and working with the Georgia representative of Silver Star Families of America, Trish Benefield of Rome, GA, on a number of occasions while she organized State and local events and hospital visits to honor the men and women of our Armed Forces and their families who have sacrificed so much on behalf of our Nation's freedom.

Ms. Benefield, chief Steven J. Newton, founder of Silver Star Families, national president Janie Orman, and volunteers across the country have donated 47,912 hours valued by the Veterans Administration at $934,763. They have also donated over $40,000 in Silver Star Banner distribution and $30,000 in direct aid for items such as services to homeless and near-homeless veterans, care packages, and support of hospitalized veterans and other programs. This achievement is a noteworthy one, and I am proud to recognize this accomplishment today.●

RECOGNIZING THE RED CLOUD INDIAN SCHOOL

● Mr. JOHNSON. Mr. President, the Red Cloud Indian School is worthy of much acclaim. Founded by Franciscan Sisters and Jesuits in 1888 as the Holy Rosary Mission, they strove to teach and maintain Oglala and western knowledge for the youth of Pine Ridge Indian Reservation and its surrounding areas. In 1969 the school changed its name to Red Cloud Indian School out of respect and appreciation for the great Chief Red Cloud who petitioned the government to allow the establishment of the school. Today nearly 600 students are enrolled in classes spanning every grade from kindergarten through twelfth. The school is private and 97 percent of its funds come from private donors, as students are required to pay only a minimal fee to attend. Classes include a wide range of subjects, such as math, science, history, ethics, and Lakota culture. Combining this wide range of education helps retain the Lakota heritage while preparing students to enter the larger society.

Red Cloud Indian School has made postsecondary education a priority and has done an exceptional job educating and preparing its students for the world. Seeking 100 percent college matriculation, the high school proudly touts that, in 2004, 94 percent of its graduating class pursued post-secondary education, the highest rate of any Indian school in the country.

Since 1999, 32 Red Cloud students have received the Gates Millennium Scholarship. The Gates Millennium Scholarship Program was originally funded through a $1 billion grant from the Bill & Melinda Gates Foundation in 1999. The program has two main goals: to encourage academic success and to provide absolute financial support to excellent minority students who have financial constraints that could otherwise inhibit their ability to attend college. To date, over 12,000 people have been awarded the Gates Millennium Scholarship.

The recent Gates Scholarship recipients of Red Cloud Indian School are as follows:

1999—Candace Brings Plenty;

2001—Sarah Yellow Boy and Lawrence Vigil;

2003—Donnel Ecoffey;

2004—Carmen Fourd, John Cross Dog, and Marie Zephier;

2005—Jason Clifford, Blue Dawn Little, Shayna Richards, and Sarah White;

2006—Rianna Albers, Jordan Herman, Larissa Little Moon, Dallas Nelson, Marissa O'Bryan, and Brandi Shortman;

2007—Monique Claymore, Sammi Herman, Samantha Janis, Tanner O'Daniel, Matthew Shoulders, Kaylynn Two Bulls, and Allison Weston; and

2008—David Anaya, Dylan Fills Pipe, Season Frank, Danielle Hudspeth, Chante Knight, Stevie Tobacco, Vern White Butterfly Jr., and Audrey White.

Congratulations to the Red Cloud Indian School staff, students, and families. Their sustained success is very admirable and is worthy of the highest praise! ●

CHEYENNE RIVER YOUTH PROJECT

● Mr. JOHNSON. Mr. President, I wish to speak today to recognize the Cheyenne River Youth Project in Eagle Butte, SD. This year, the Cheyenne River Youth Project is celebrating its 20th anniversary. From its beginnings in 1988, it has sought to assist the Lakota youth and families on the Cheyenne River Indian Reservation by providing them with a nurturing environment and a sense of hope about their future. I am so proud of this project and the positive impact that it has had on those youth.

Over the years, hundreds of volunteers from around the world have crossed the threshold at the Cheyenne River Youth Project and offered their time and their hearts to influence the lives of the Lakota youth. The project serves youth from as young as 4 years old to young adults of 18 years old. As we all know, these are critical years in development of young men and women. Combined with traditional customs and contemporary programs, the CRYP is a success story for other fledgling grassroots youth programs.

I am so proud to have helped guide Federal resources to help with the construction and programming for the project. Julie Garreau, who has served as the executive director of the projects, has been a tireless advocate and deserves high praise for the love, hard work, and dedication she has shown for her community. I would also like to thank Olympic Gold Medal winner Billy Mills and his organization, Running Strong for American Indian Youth, for his work in his home State and across the Nation to help Native youth. His dedication to the Cheyenne River Youth is particularly evident in his efforts to assist the Cheyenne River Youth Project.

On more than one occasion, I have had the opportunity to visit the Cheyenne River Youth Project, at its facilities in Eagle Butte, at ''The Main'' and the new Cokata Wiconi Teen Center. I couldn't be prouder of the accomplishments of its staff and its many volunteers of the past two decades! Congratulations and best wishes for many more years of service in the future!●

TRIBUTE TO GENERAL RICHARD A. CODY

● Mr. LEVIN. Mr. President, I commend GEN Richard A. Cody, Vice Chief of Staff of the U.S. Army, for his outstanding service and commitment to excellence throughout his 36 years of distinguished military service to our Nation. General Cody will retire in August 2008 with the gratitude and well wishes of the Nation and particularly of the soldiers and families to whom he has devoted his life.

General Cody is originally from Montpelier, VT, and began his service as a cadet at the U.S. Military Academy. He graduated from West Point in 1972 and became an Army aviator. General Cody has long been widely regarded as the Army's premier attack helicopter warrior and pilot with over 5,000 flying hours.

For more than 20 of his 36 years as a soldier General Cody has been entrusted with the command of troops in well known combat units including the 160th Special Operations Aviation Regiment and several assignments with the 101st Airborne Division . Most notably, in 1991 then-Lieutenant Colonel Cody personally led the Apache attack helicopters of Task Force Normandy, the joint aviation task force that fired the opening salvoes of the gulf war, that destroyed Iraqi air defense sites and, as GEN H. Norman Schwarzkopf recounted, ''plucked out the eyes'' of Sadaam Hussein's air defenses.

Over the last 6 years, as one of the most senior leaders of the Army, General Cody has dedicated himself to ensuring that American soldiers are the best-trained, best-equipped and best-led force ready for the complex challenges of the global war on terror. As a result, in part of his determined leadership and uncompromising support, soldiers deployed in Afghanistan, Iraq and around the world have met those challenges.

General Cody's insight and leadership has also been a force behind the Army's transformation, which has set the Army on a path to provide the Nation with an Army that is more lethal, agile, deployable, and flexible; capable of fighting and winning this Nation's wars in the 21st century.

General Cody has been an example to soldiers throughout his great career; an example shared by his proud Army family as well. His wife Vicki will forever be a strong voice and tireless worker for soldiers and their families. Their brave sons Tyler and Clint, also Army officers and attack helicopter aviators with six combat tours between them, have answered the same call to duty and continue to serve the Nation.

General Cody is an American hero, unflinching in war and tireless in peace. President John F. Kennedy once said, ''When at some future date the high court of history sits in judgment of each one of us-recording whether in our brief span of service we fulfilled our responsibilities, we will be measured by our answers to 4 questions-were we truly men of courage were we truly men of judgment were we truly men of integrity were we truly men of dedication?'' I believe that when history judges the service of General Cody, the Army's 31st Vice Chief of Staff, it will be clear that this was truly a man of courage, judgment, integrity, and dedication.

The Nation is honored and grateful to have had the service of GEN Richard Cody and his family. As he and his wife start this next chapter of their lives, we wish them all the best for a day of rest well deserved and earned.●

TRIBUTE TO P.E. MACALLISTER

● Mr. LUGAR. Mr. President, I am pleased to have the opportunity today to recognize the important leadership of a remarkable Hoosier businessman, community leader, and treasured friend of 41 years, Mr. P.E. MacAllister. On August 30, 2008, P.E. will celebrate the signal occasion of his 90th birthday. This birthday is a special event for his many friends throughout the Midwest and especially for Hoosiers in central Indiana where P.E. has enriched countless lives through his important service to the Indianapolis community.

P.E. was raised in Wisconsin and graduated from Carroll College in 1940. He then spent 5 years in the Air Force as a captain and 27 months overseas in the 1st Fighter Group.

Joining the family business of MacAllister Machinery Company in Indianapolis after his service abroad, P.E. has been chairman of the board since 1952. His awards in the business industry are many and well-deserved. In addition to these accomplishments, P.E. has served on boards in the arts, health, recreation, philanthropic, and municipality arenas. His love of opera, to cite one example of his activism, engendered the largest nonrestricted vocal competition for opera singers in the Nation. This competition—The MacAllister Awards—ran for 22 years.

When I was elected mayor of Indianapolis in 1967, P.E. was among my earliest and strongest supporters whose generous and wise counsel was most appreciated. My election occurred just months before the death of Martin Luther King, Jr. and the extraordinary convulsions which troubled most American cities at that time. P.E. provided exemplary leadership during this challenging time by recruiting business leaders to aid in the creation of outreach programs for our city's youth.

I recall one particular initiative in which the city was availing itself of Federal resources through the Special Employment Program and the Special Program for Disadvantaged Youth in order to employ idle youth in a public works project that turned unused land into gardens. P.E., in recognizing the value in such a project, generously provided the heavy equipment that allowed for the planting of trees, the moving of soil, and the beautification of Indianapolis.

Further, in 1971, P.E. successfully served as the executive director of the Conference on Cities held in Indianapolis. This was an international symposium on urban problems in collaboration with the North Atlantic Treaty Organization. Since our early work, I have found his insights on world events to be profound, continually aided by his travels and comprehensive reading.

I celebrate P.E.'s achievements, friendship, and tireless dedication to engaging in constructive acts that always lead to great discussion and debate on complex issues. I wish P.E. MacAllister a very Happy 90th birthday.●

VERMONT'S CHAMPLAIN HOUSING TRUST

• Mr. SANDERS. Mr. President, It is with great pleasure that I inform you, my colleagues, and the Nation that Vermont's Champlain Housing Trust was selected as one of two recipients of the 2008 World Habitat Award, an honor presented annually by the United Nations.

Each year on World Habitat Day, the United Nations Agency for Human Settlements, which promotes socially and environmentally sustainable towns and cities with the goal of providing adequate shelter for all, presents these awards. Established in 1985, the World Habitat Awards are bestowed on projects that provide practical and innovative solutions to current housing needs and problems. One award is for a project in the global north and the other for a project in the global south.

I have a particularly deep and lengthy interest in the Champlain Housing Trust. It was established as the Nation's first municipally funded community land trust in 1984, when I was mayor of Burlington, VT. It has grown substantially, and today it is not only the first but the largest, community land trust in the country. It has provided a model for securing perpetually affordable housing that has been adopted by many other cities and municipalities across the Nation.

The program came into being because, in the 1980s, Burlington faced a number of housing challenges—and we were looking for innovative solutions. Among other issues that we faced was the reality that low and moderate income households, in the face of rapidly rising and fluctuating house prices, were threatened with displacement. We also believed that decent and affordable housing was a right of all people and not just a commodity for financial gain by a select few. As mayor of Burlington, I was very fortunate to have an outstanding staff as well as strong community input in helping to formulate this concept. Among many others who played an active role in developing what was initially called the Burlington Community Land Trust were Terry Bouricius, John Davis, Peter Clavelle, Michael Monte, Brenda Torpy, and Amy Wright.

When I entered the House of Representatives, my interest in land trusts did not abate. Encouraged by the growing land trust community across the Nation, I successfully introduced legislation that encouraged the use of the land trust model the Burlington community land trust had helped establish so that this model could be expanded to communities across the country.

Meanwhile, ably directed by Brenda Torpy and a legion of committed staff and volunteers over the past two and a half decades, the Champlain Housing Trust has continued to grow and expand its geographic reach, and has been met with unparalleled success. Thousands of low and moderate income families have been able to experience homeownership, while the trust has made great strides both toward revitalizing Burlington's historical Old North End neighborhood and expanding to three different counties in northwestern Vermont.

The Champlain Housing Trust is a model of democracy at the grassroots, involving homeowners, as well as government officials and members of the larger community, in its governance.

It has been a successful experiment that has revealed to the nation and, as this U.N. award demonstrates, to the world as well, how through the land trust concept, home ownership can be combined with making housing perpetually affordable.

The 2008 World Habitat Award is in recognition of all who have worked on establishing and expanding land trusts, all who have bought land trust homes, and all who have helped disseminate the land trust concept. And, in particular, it is a celebration of the wonderful work done by the Champlain Housing Trust.•

HONORING SIMONES' HOT DOG STAND

• Ms. SNOWE. Mr. President, I wish to celebrate the centennial of a treasured institution within Maine's Lewiston-Auburn community. Simones' Hot Dog Stand has been located on Chestnut Street in Lewiston since 1908, and by the looks of things, it will be there for at least another hundred years.

A third- and fourth-generation family-owned small business, Simones' Hot Dog Stand has been immensely popular since its founding. Back then, Simones' was truly a ''small'' business, constructed of wooden soda crates with just four stools for customers. Luckily, Simones' had a walk up take out window as well. Hot dogs at the time cost a nickel, with the bargain price of a quarter for six hotdogs. Over the years, various members of the Simones family have operated and worked at the stand, and its present proprietor, Jimmy Simones, has been a steadfast employee since 1973.

With time, the hotdog stand has faced challenges and undergone changes. During the Great Depression, with the price of meat skyrocketing, Simones' turned to chopped bologna as a substitute for hotdogs. During World War II, when meat became scarce on the homefront, SPAM was used in its place until the daily ration was employed. In 1966, realizing the need for additional space, Simones' moved across the street, from 98 Chestnut Street to No. 99, where it has been since. Over the years, Simones' menu has expanded to include other lunch items, such as subs, salads, and even homemade soups from scratch during the cold winter months. It is also open for breakfast.

But what will catch the visitor's eye most, aside from the fast and friendly service, is its signature bright neon red hotdog. Simones' famed hotdogs are truly unique, with a complement of red food coloring in their casings. Many customers prefer the traditional presentation of a steamed hotdog in a steamed bun topped with mustard, ketchup, or relish. For those of different culinary persuasion, Simones' offers chili, cheese, and sauerkraut to top their hotdogs.

Simones family members are also charitable neighbors, helping to make Lewiston a better place to live. Simones' donates their hotdogs to the scholarship foundation of the MAINEiacs, Lewiston's junior ice hockey team, as well as Leavitt Area High School's Project Graduation and other local nonprofit groups. Current owner Jimmy Simones serves on the Central Maine Community College Foundation board of directors and has volunteered at Lewiston's Sexual Assault Crisis Center. Additionally, Jimmy's wife Linda is a member of the St. Mary's Hospital Federally Qualified Health Care Board in Lewiston and a graduate of the hospital's nursing school. The Simones family is also active in the Holy Trinity Greek Orthodox Church parish. Jimmy is a past president of the church, and son George, who works at the stand, serves as a chanter for services. And all three Simones are familiar faces during the church's annual Greek Festival, volunteering their time to enhance the experience of the hundreds who attend.

From the regulars who come in daily for a hotdog, to Maine's political figures who make it a must-stop on the campaign trail, Simones' is truly the place to take the local pulse of the Lewiston-Auburn community. It is no wonder that Simones' has established itself as a pillar in central Maine. I wish Jimmy, Linda, George, and everyone at Simones' a wonderful celebration of 100 successful years and look forward to many more years—and hotdogs.•

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT RELATIVE TO THE CONTINUATION OF THE NATIONAL EMERGENCY WITH RESPECT TO THE ACTIONS OF CERTAIN PERSONS TO UNDERMINE THE SOVEREIGNTY OF LEBANON OR ITS DEMOCRATIC PROCESSES AND INSTITUTIONS—PM 61

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice to the *Federal Register* for publication stating that the national emergency and related measures blocking the property of persons undermining the sovereignty of Lebanon or its democratic processes and institutions and certain other persons are to continue in effect beyond August 1, 2008.

The actions of certain persons to undermine Lebanon's legitimate and democratically elected government or democratic institutions, to contribute to the deliberate breakdown in the rule of law in Lebanon, including through politically motivated violence and intimidation, to reassert Syrian control or contribute to Syrian interference in Lebanon, or to infringe upon or undermine Lebanese sovereignty contribute to political and economic instability in that country and the region and constitute a continuing unusual and extraordinary threat to the national security and foreign policy of the United States. For these reasons, I have determined that it is necessary to continue the national emergency and related measures blocking the property of persons undermining the sovereignty of Lebanon or its democratic processes and institutions and certain other persons.

GEORGE W. BUSH.
THE WHITE HOUSE, *July 30, 2008.*

NOTICE: CONTINUATION OF THE NATIONAL EMERGENCY WITH RESPECT TO THE ACTIONS OF CERTAIN PERSONS TO UNDERMINE THE SOVEREIGNTY OF LEBANON OR ITS DEMOCRATIC PROCESSES AND INSTITUTIONS

On August 1, 2007, by Executive Order 13441, I declared a national emergency and ordered related measures blocking the property of certain persons undermining the sovereignty of Lebanon or its democratic processes or institutions and certain other persons, pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706). I took this action to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the actions of certain persons to undermine Lebanon's legitimate and democratically elected government or democratic institutions, to contribute to the deliberate breakdown in the rule of law in Lebanon, including through politically motivated violence and intimidation, to reassert Syrian control or contribute to Syrian interference in Lebanon, or to infringe upon or undermine Lebanese sovereignty which contributes to political and economic instability in that country and the region.

Because these actions continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States, the national emergency declared on August 1, 2007, and the measures adopted on that date to deal with that emergency, must continue in effect beyond August 1, 2008. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 13441.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

GEORGE W. BUSH.
THE WHITE HOUSE, JULY 30, 2008.

MESSAGES FROM THE HOUSE

At 11:19 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 4137) to amend and extend the Higher Education Act of 1965, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

From the Committee on Education and Labor, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Messrs. GEORGE MILLER of California, HINOJOSA, TIERNEY, WU, BISHOP of New York, ALTMIRE, YARMUTH, COURTNEY, ANDREWS, SCOTT of Virginia, Mrs. DAVIS of California, Mr. DAVIS of Illinois, Ms. HIRONO, Messrs. KELLER of Florida, PETRI, Mrs. MCMORRIS RODGERS, Ms. FOXX, Messrs. KUHL of New York, WALBERG, CASTLE, SOUDER, EHLERS, Mrs. BIGGERT, and Mr. MCKEON.

From the Committee on the Judiciary, for consideration of sections 951 and 952 of the House bill, and sections 951 and 952 of the Senate amendment, and modifications committed to conference: Mr. CONYERS, Ms. WATERS, and Mr. GOHMERT.

From the Committee on Science and Technology, for consideration of sections 961 and 962 of the House bill, and section 804 of the Senate amendment, and modifications committed to conference: Messrs. GORDON of Tennessee, BAIRD, and NEUGEBAUER.

At 12:18 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2192. An act to amend title 38, United States Code, to establish an Ombudsman within the Department of Veterans Affairs.

H.R. 2490. An act to require the Secretary of Homeland Security to conduct a program in the maritime environment for the mobile biometric identification of suspected individuals, including terrorists, to enhance border security.

H.R. 6098. An act to amend the Homeland Security Act of 2002 to improve the financial assistance provided to State, local, and tribal governments for information sharing activities, and for other purposes.

H.R. 6113. An act to amend title 44, United States Code, to require each agency to include contact information for the agency in its collection of information.

H.R. 6295. An act to enhance drug trafficking interdiction by creating a Federal felony relating to operating or embarking in a submersible or semi-submersible vessel without nationality and on an international voyage.

H.R. 6388. An act to provide additional authorities to the Comptroller General of the United States, and for other purposes.

H.R. 6560. An act to establish an earned import allowance program under Public Law 109–53, and for other purposes.

H.R. 6580. An act to ensure the fair treatment of a member of the Armed Forces who is discharged from the Armed Forces, at the request of the member, pursuant to the Department of Defense policy permitting the early discharge of a member who is the only surviving child in a family in which the father or mother, or one or more siblings, served in the Armed Forces and, because of hazards incident to such service, was killed, died as a result of wounds, accident, or disease, is in a captured or missing in action status, or is permanently disabled, to amend the Internal Revenue Code of 1986 to repeal the dollar limitation on contributions to funeral trusts, and for other purposes.

At 1:15 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 3352. An act to temporarily extend the programs under the Higher Education Act of 1965.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 398. Concurrent resolution providing for a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

ENROLLED BILL SIGNED

At 6:11 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 3352. An act to temporarily extend the programs under the Higher Education Act of 1965.

At 6:54 p.m., a message from the House of Representatives, delivered by

Ms. Niland, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4040) to establish consumer product safety standards and other safety requirements for children's products and to reauthorize and modernize the Consumer Product Safety Commission.

The enrolled bill was subsequently signed by the President pro tempore (Mr. BYRD).

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2192. An act to amend title 38, United States Code, to establish an Ombudsman within the Department of Veterans Affairs; to the Committee on Veterans' Affairs.

H.R. 2490. An act to require the Secretary of Homeland Security to conduct a pilot program for the mobile biometric identification in the maritime environment of aliens unlawfully attempting to enter the United States; to the Committee on Commerce, Science, and Transportation.

H.R. 6098. An act to amend the Homeland Security Act of 2002 to improve the financial assistance provided to State, local, and tribal governments for information sharing activities, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

H.R. 6113. An act to amend title 44, United States Code, to require each agency to include a contact telephone number in its collection of information; to the Committee on Homeland Security and Governmental Affairs.

H.R. 6388. An act to provide additional authorities to the Comptroller General of the United States, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

H.R. 6560. An act to establish an earned import allowance program under Public Law 109–53, and for other purposes; to the Committee on Finance.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

S. 3348. A bill to provide for the investigation of certain unsolved civil rights crimes, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on July 30, 2008, she had presented to the President of the United States the following enrolled bill:

S. 3352. An act to temporarily extend the programs under the Higher Education Act of 1965.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–422. A resolution adopted by the House of Representatives of the State of Louisiana urging Congress to enact legislation to establish a minimum sound level standard for all new automobiles sold in the United States to ensure the safety of the blind and other pedestrians, and for other purposes; to the Committee on Commerce, Science, and Transportation.

HOUSE CONCURRENT RESOLUTION NO. 52

Whereas, electric vehicles operate on batteries and are marketed as having the advantage of operating without the sound and smell of standard internal combustion engines, and hybrid vehicles combine conventional gas-powered engines with battery-powered electric motors and, when in the electric mode, also operate without making sound; and

Whereas, all pedestrians use the sound of traffic in combination with other techniques to travel safely, as evidenced by the fact that commercial trucks emit a sound when backing up to alert pedestrians to their presence; and

Whereas, blind people depend solely on the sound of traffic to determine the location of a traffic light and indication of whether a traffic light is red or green and whether an individual automobile is idling, accelerating, decelerating, or turning left or right, all of which allows a blind person to gauge the time to navigate a crosswalk and to travel independently and safely; and

Whereas, action must be taken to ensure that all vehicles emit a sound while turned on, and such a sound from all vehicles must be loud enough to be heard over the din of other ambient noise and be heard from a distance which would allow pedestrians to travel safely, and such a sound must be emitted both while the vehicle is in motion and while motionless, the sound must also change with speed, must not easily be disabled, must not be annoying but still emit a unique sound distinguishable from other noises, and must be uniform from model to model. Therefore, be it

Resolved, That the Legislature of Louisiana does hereby memorialize the United States Congress to take such actions as are necessary to ensure the safety of the blind and other pedestrians by passing legislation requiring the United States Department of Transportation, National Highway Traffic Safety Administration, to adopt regulations establishing a minimum sound level standard for all new automobiles sold in the United States. Be it further

Resolved, That the regulations adopted by the United States Department of Transportation, National Highway Traffic Safety Administration, need not prescribe the method automobile manufacturers must use to achieve the minimum sound standard, but the standard should have the following characteristics:

(1) In all phases of operation, including times when the vehicle is at a full stop, vehicles should be required to emit an omnidirectional sound with similar spectral characteristic of those of a modem internal combustion engine.

(2) The sound should vary in a way that is consistent with the sound of vehicles with combustion engines to indicate whether the vehicle is idling, maintaining a constant speed, accelerating, or decelerating. Be it further

Resolved, That a copy of this Resolution be transmitted to the presiding officers of the Senate and the House of Representatives of the Congress of the United States of America and to each member of the Louisiana congressional delegation.

POM–423. A resolution adopted by the House of Representatives of the State of Louisiana urging Congress to enact legislation to take such actions as are necessary to improve, modernize, and enhance drainage along the Jefferson Parish and Orleans Parish line, and for other purposes; to the Committee on Environment and Public Works.

HOUSE RESOLUTION NO. 178

Whereas, since Hurricane Katrina local officials and drainage personnel have worked diligently with neighborhood civic associations, congress, and the Corp of Engineers to improve the safety of lives and property against hurricane overflow and rainfall flooding; and

Whereas, there is now a plan which is supported by local officials that can achieve these goals and benefit the residents and businesses that are dependent upon the Seventeenth Street Canal, Pump Station Number Six, and the Monticello Canal; and

Whereas, the locally preferred plan is comprised of four essential components as follows: improve the depth and efficiency of the Seventeenth Street Canal between existing Pump Station Number Six and Lake Pontchartrain to move rainwater more quickly to Lake Pontchartrain, build a new pumping station at the lake end of the Seventeenth Street Canal to replace the existing Pump Station Number Six and to prevent water from Lake Pontchartrain from entering the canal, supplement a new pump station at Lake Pontchartrain with a pipeline system and a separate pumping station that will discharge directly into the Mississippi River, rather than into the Seventeenth Street Canal and Lake Pontchartrain, and remove existing Pump Station Number Six from the system. Therefore, be it

Resolved, That the House of Representatives of the Legislature of Louisiana does hereby memorialize the United States Congress to take such actions as are necessary to implement the four essential components outlined in this Resolution in order to improve, modernize, and enhance drainage in Jefferson and Orleans parishes. Be it further

Resolved, That a copy of this Resolution be transmitted to the presiding officers of the Senate and the House of Representatives of the Congress of the United States of America and to each member of the Louisiana congressional delegation.

POM–424. A resolution adopted by the House of Representatives of the State of Michigan urging Congress to enact the hearing aid assistance tax credit act; to the Committee on Finance.

HOUSE RESOLUTION NO. 155

Whereas, hearing is clearly one of our most essential senses. It is often taken for granted, unfortunately, until the time one begins to experience hearing loss. At this point it is too late to reverse the damage. Hearing aids are the ready solution to the problems associated with hearing loss, but the costs associated with good quality equipment is expensive, is not always covered by one's insurance or Medicaid, and is too often foregone for more immediate needs. A federal tax credit would provide immediate and necessary relief for tens of thousands; and

Whereas, indeed, it has been estimated that hearing aids would help ninety-five percent of those suffering from hearing loss. Only twenty-two percent of the population, however, currently uses a hearing device, because the average out-of-pocket costs associated with hearing aids is over $2,800. Thousands upon thousands of individuals and family members are impacted by these soaring costs. It is estimated that close to 2 million people are affected by untreated hearing loss; and

Whereas, in Michigan, legislation was enacted in 1978 to exempt hearing aids from the state sales tax. This initiative was a clear

recognition of the important of cost savings to those in need of hearing aids. The Congress should follow this stellar example and enact similar tax incentives in the U.S. Tax Code; now, therefore, be it

Resolved, By the House of Representatives, That we hereby memorialize the Congress of the United States to enact the Hearing Aid Assistance Tax Credit Act; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the Michigan congressional delegation.

POM–425. A resolution adopted by the Legislature of the State of Florida, urging Congress to increase federal funding for Alzheimer's disease research; to the Committee on Health, Education, Labor, and Pensions.

SENATE MEMORIAL NO. 2662

Whereas, Alzheimer's disease is a progressive degenerative disorder that destroys cells in the brain and is the leading cause of dementia, a condition that involves memory loss, decline in the ability to perform routine tasks, disorientation, difficulty in learning, loss of language skills, impairment of judgment, and personality changes, and

Whereas, as Alzheimer's disease progresses, individuals with the disease become unable to care for themselves, and

Whereas, as many as 5 million Americans have Alzheimer's disease, including approximately 500,000 Floridians, and, by 2050, the number of individuals in the United States with the disease could range from 13 million to 16 million unless a way to prevent or cure the disease is discovered, and

Whereas, Alzheimer's disease strikes approximately 1 in 10 people over the age of 65 and nearly half of those who are age 85 or older, and

Whereas, the average lifetime cost of care for an individual with Alzheimer's disease is $170,000, and

Whereas, half of all nursing home residents have Alzheimer's disease or a related disorder, with the average annual cost of nursing home care for individuals with the disease exceeding $70,000 per resident, and

Whereas, Medicaid pays half of the total nursing home bills for individuals with Alzheimer's disease and helps 2 out of 3 residents pay for their care, and

Whereas, Medicaid expenditures for nursing home care for individuals with Alzheimer's disease are estimated to increase from $21 billion in 2005 to $24 billion in 2010, and

Whereas, 1 in 8 caregivers for individuals with Alzheimer's disease becomes ill or injured as a direct result of caregiving, and 1 in 3 uses medication for problems related to caregiving, with older caregivers being 3 times more likely to become clinically depressed than others in their age group, and

Whereas, a 4-year study conducted by researchers from the University of Pittsburgh showed that elderly spouses strained by caregiving were 63 percent more likely to die during that 4-year period than their noncaregiving counterparts, and

Whereas, if our nation achieves its research goals of preventing the onset of Alzheimer's disease in those at risk and treating and delaying progression of the disease in those already ill, annual Medicare savings would be $51 billion by 2015 and $88 billion by 2020, annual Medicaid savings would be $10 billion in 2015 and $17 billion by 2020, and the projected number of cases of the disease would be reduced by 40 percent by the middle of the century, and

Whereas, a cure for Alzheimer's disease may be achieved sooner by increasing funding of Alzheimer's disease research at established and reputable research institutes, and

Whereas, the Congress of the United States appropriated $642 million for Alzheimer's disease research during fiscal year 2007–2008. Now, therefore, be it

Resolved by the Legislature of the State of Florida: That the Congress of the United States is urged to increase federal funding for Alzheimer's disease research by $360 million during fiscal year 2008–2009. Be it further

Resolved, That copies of this memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

POM–426. A resolution adopted by the Legislature of the State of Florida, urging Congress to support national standards for educator ethics and a national clearinghouse to strengthen state efforts in the reporting, screening, and sharing of critical information relative to educator misconduct; to the Committee on Health, Education, Labor, and Pensions.

SENATE MEMORIAL 1742

Whereas, teachers are entrusted with the care and supervision of minor children away from the direct observation of parents, and

Whereas, the student-teacher relationship is necessarily built on a child's trust and respect for an adult in authority, and

Whereas, parents and the community rely upon school district officials and individual educators to protect the integrity of that relationship, and

Whereas, educators rely upon the state and school districts to promote respect for the teaching profession through the timely investigation and disposition of allegations of misconduct, assurance of due process, and elimination from the teaching ranks of those who bring discredit to the profession. Now, Therefore, be it

Resolved by the Legislature of the State of Florida: That the Congress of the United States is urged to support the passage of laws establishing ethical standards for professional educators and to support a national clearinghouse to provide for the reporting of data concerning educator misconduct. A national database is necessary to promote the timely sharing of critical information among states and to provide for the safety and welfare of students. Be it further

Resolved, That copies of this memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

POM–427. A resolution adopted by the Legislature of the State of Florida, urging Congress to make forms for the United States Decennial Census of 2010 available in the Creole language for the Haitian population of Florida; to the Committee on Homeland Security and Governmental Affairs.

SENATE MEMORIAL 1454

Whereas, results from the United States Decennial Census of 2000 show that there were 419,317 foreign-born persons from Haiti in the United States when the census was taken, and

Whereas, the state with the largest population of foreign-born persons from Haiti in 2000 was Florida with 182,224, which represented 6.8 percent of Florida's total foreign-born population of 2.7 million, and

Whereas, in conducting the federal decennial statewide census in 2000, the United States Census Bureau used a variety of methods to communicate with people who could not speak English, and

Whereas, households that received the census form in the mail had the option of requesting the form in Spanish, Chinese, Tagalog, Vietnamese, or Korean, and

Whereas, individuals who believed that they were not included on a form or did not receive a form could use the ''Be Counted'' questionnaires that were available in public areas and printed in English, Spanish, Tagalog, Vietnamese, and Korean, and

Whereas, the Census Bureau also published a short-form and a long-form language assistance guide in 49 different languages, one of which was Creole, to assist respondents, and

Whereas, however, given the considerable size of Florida's Haitian population, in the interest of equity and obtaining the most accurate information possible from the next federal decennial statewide census, the United States Census Bureau should make forms for the United States Decennial Census of 2010 more accessible to the Haitian population of Florida by making the census forms available in the Creole language, and

Whereas, in addition, the census forms for the United States Decennial Census of 2010 should be prepared in a manner that will allow a respondent to indicate whether he or she is a Haitian national or of Haitian descent. Now, therefore, be it

Resolved by the Legislature of the State of Florida: That the Congress of the United States is urged to require the United States Census Bureau to make census forms for the United States Decennial Census of 2010 available in the Creole language to provide for optimal accessibility by the Haitian population of Florida and to prepare the census forms in a manner that will allow a respondent to indicate whether he or she is a Haitian national or of Haitian descent. Be it further

Resolved, That copies of this memorial be dispatched to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to each member of the Florida delegation to the United States Congress.

POM–428. A resolution adopted by the House of Representatives of the State of Louisiana urging Congress to take such actions as are necessary to direct the Federal Emergency Management Agency to review its recovery policies and programs, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

HOUSE CONCURRENT RESOLUTION NO. 178

Whereas, during the seventeenth century, about one hundred French families settled in a portion of Nova Scotia controlled by the British, then known as Acadia, where they developed friendly relations with the Indians and learned their hunting and fishing techniques; and

Whereas, when the French and Indian War began in 1754, the British government, doubting the neutrality of the Acadians, demanded that they take an oath of allegiance to the British monarch, and since the oath required renouncing a key article of their Roman Catholic faith, most refused and as a result many were imprisoned; and

Whereas, in what is own as the Great Expulsion (Grand Dérangement), about thirteen thousand Acadians, three-fourths of the Acadian population in Nova Scotia, were expelled from the colony between 1755 and 1764, their homes were destroyed, and they were exiled among the American colonies and other remote lands; and

Whereas, in the chaos of this expulsion, families and friends were separated and placed on different ships, as a result of a deliberate effort on the part of the British to ''exterminate'' the Acadian culture through forced assimilation; and

Whereas, many Acadians found themselves unwelcome among the thirteen colonies,

some were deported to France and the French islands of St. Pierre and Miquelon near Newfoundland, and other Acadians became slaves in the British colonies, the Carribean, and in Europe; and

Whereas, large numbers of these Acadians eventually made their way to Louisiana just after France ceded its colony of Louisiana to Spain in 1762 and were referred to as Cajuns by the English-speaking colonists; and

Whereas, the Spanish allowed the Acadians to continue to speak their language, practice Roman Catholicism, which was also the official religion of Spain, and otherwise pursue their livelihoods with minimal interference; and

Whereas, the majority of the Acadians settled in southern Louisiana in the area west of what is now New Orleans, mainly along the Mississippi River, and they were later moved by the colonial government to the swamps, cheniers, and prairies further west and southwest of New Orleans, to lands deemed uninhabitable due to the harsh living conditions, where they lived among the Attakapa and Chitimacha Native American tribes; and

Whereas, Henry Wadsworth Longfellow was so moved by the plight of the Acadians that he wrote a poem titled ''Evangeline'' and described in moving detail the story of two young lovers separated by the Grand Dérangement and their travels to the land of Louisiana; and

Whereas, for more than two hundred years, the Acadians have lived in the coastal regions of Louisiana, a land Longfellow described as the region ''where reigns perpetual summer, where through the Golden Coast, and groves of orange and citron, sweeps with majestic curve the river away to the eastward ... a maze of sluggish and devious waters ... like a network of steel, extend(ing) in every direction; A land where over their heads the towering and tenebrous boughs of the cypress met in a dusky arch, and trailing mosses in mid-air waved like banners that hang on the walls of ancient cathedrals ... A land where Deathlike the silence seemed, and unbroken, save by the herons home to their roosts in the cedar-trees returning at sunset, Or by the owl, as he greeted the moon with demoniac laughter''; and

Whereas, the children and grandchildren of these Acadians remained somewhat secluded in this region until the early 1900s in the areas of coastal Louisiana and regrettably during the first half of the twentieth century, contempt for the Acadians reemerged within their dear state of Louisiana, and attempts were made to forcibly suppress Cajun culture by measures such as forbidding the use of French in schools; and

Whereas, the indomitable spirit of their French ancestry could not be suppressed, and they prevailed once again and worked hard to overcome the stigma associated with their ethnic heritage and instill pride in their Acadian roots, forming the Council for the Development of French in Louisiana; and

Whereas, it is in the coastal wetlands and prairies of South Louisiana that the Cajuns have not merely endured, not merely survived, but have lived and laughed and cried and built a culture uniquely American with a spiritual richness and time-honored traditions complete with Mardi Gras and king cakes, family togetherness, hard work, plenty of fun, music played with lively fiddles, accordions, spoons, and washboards, and a unique local cuisine of the indigenous species of seafood and animal life with dishes such as etouffee, gumbo, and jambalaya; and

Whereas, these Cajuns have distinguished themselves as hunters, trappers, fishermen, shrimpers, doctors, lawyers, engineers, roustabouts, farmers, priests and preachers, nuns, and missionaries, and in numerous other honorable professions and maintained their religious faith traditions as Protestants and Catholics; and

Whereas, it is here in their homeland of coastal Louisiana that they have endured disasters both natural and man-made; and

Whereas, the eastern and western Cajun regions of Louisiana were among the hardest hit by Hurricane Katrina on August 29, 2005, and Hurricane Rita on September 26, 2005; and

Whereas, in the aftermath of these two natural disasters, again the trumpets sound, and the ill winds blow, for many of the sons and daughters of the Acadians are about to be exiled again, not at the hands of a government demanding allegiance but by the same government to which they have already pledged allegiance and the same government that many of their sons and daughters have fought and even died for; and

Whereas, this exile will be produced as the result of what some who live outside the coastal region of Louisiana suggest is a well-intentioned, reasonable application of the rules and regulations of the National Flood Insurance Program, which if not challenged and changed, will force those who live in many of the areas hardest hit by Hurricanes Katrina and Rita, especially in the southern portion of the parishes of Cameron, Vermilion, St. Mary, Terrebonne, Lafourche, Plaquemines, and St. Bernard, to leave the land of their ancestry, the land of memories, to where they know not, to be finally and forever assimilated into a culture familiar yet strangely foreign to their traditions and way of life; and

Whereas, the effect of these rules and regulations will be to force them to build homes they cannot afford to build, and as a result the land that no one wanted and which was settled by the people no one wanted will now be available only to the wealthiest, if available at all; and

Whereas, a policy with an impact of this magnitude has never been implemented on such a large scale before in the modem history of this nation; and

Whereas, people in California, Washington, Nevada, and Utah who live in earthquake-prone areas were allowed to develop privately funded programs to secure earthquake insurance which is privately provided; and

Whereas, although flood insurance is provided through an agency of the federal government and there is a cost and risk associated with living in coastal regions of Louisiana, these risks in terms of damages due to storm surges caused by hurricanes is not unlike those risks faced by any other community along the Gulf Coast from the Florida Keys to Brownsfield, Texas; and

Whereas, since these rules and regulations make no distinction between risk of damages in flood plains due to storm surges and that caused by flooding resulting from rising waters due to rain and are based primarily on elevation, other communities along the Gulf Coast who are just as vulnerable to damage caused by storm surge are allowed to rebuild in areas next to the beach because the initial elevation of the area is higher than that found in the coastal area of Louisiana. Therefore, be it

Resolved, That the Legislature of Louisiana does hereby memorialize the United States Congress to take such actions as are necessary to direct the Federal Emergency Management Agency to review its recovery policies and programs and to prepare an outline of the social and economic issues involved in the implementation of the rules and regulations of the National Flood Insurance Program as that implementation affects the rebuilding efforts in all coastal Louisiana communities impacted by Hurricanes Katrina and Rita. Be it further

Resolved, That this report include any and all suggestions or recommendations as to practical alternatives to such policies to allow for the preservation of the unique culture of coastal Louisiana. Be it further

Resolved, That a copy of this Resolution be transmitted to the presiding officers of the Senate and the House of Representatives of the Congress of the United States of America and to each member of the Louisiana congressional delegation.

POM–429. A resolution adopted by the Legislature of the State of Arizona urging Congress to enact legislation to support the designation of a ''National Day of the Cowboy''; to the Committee on the Judiciary.

SENATE CONCURRENT RESOLUTION 1046

Whereas, pioneering men and women in Arizona, known as cowboys, helped establish the American West; and

Whereas, the cowboy embodies honesty, integrity, courage, compassion, respect, a strong work ethic and patriotism; and

Whereas, the cowboy spirit exemplifies strength of character, sound family values and good common sense; and

Whereas, the cowboy archetype transcends ethnicity, gender, geographic boundaries and political affiliation; and

Whereas, the cowboy is an excellent steward of the land and its creatures; and

Whereas, the cowboy lives off the land and works to protect and enhance the environment; and

Whereas, cowboy traditions have been part of the American culture for generations; and

Whereas, the cowboy continues to be an important part of the economy, through the work of approximately seven hundred twenty-seven thousand ranchers in all fifty states, and contributes to the well-being of nearly every county in the nation; and

Whereas, annual attendance at professional and working ranch rodeo events exceeds twenty-seven million fans, and the rodeo is the seventh most watched sport in the nation; and

Whereas, membership and participation in rodeo and other organizations that promote and encompass the livelihood of the cowboy spans race, gender and generations; and

Whereas, the cowboy is a central figure in literature, film and music and occupies a central place in the public imagination; and

Whereas, the cowboy is an American icon; and

Whereas, the ongoing contributions made by cowboys and cowgirls to their communities should be recognized and encouraged. Therefore be it Resolved, by the Senate of the State of Arizona, the House of Representatives concurring:

1. That the members of the Legislature express support for the designation of a ''National Day of the Cowboy'' and encourage the people of the United States to observe the day with appropriate ceremonies and activities.

2. That the Secretary of State of the State of Arizona transmit copies of this resolution to the President of the United States Senate, the Speaker of the United States House of Representatives and each member of the Arizona Congressional Delegation.

POM–430. A resolution adopted by the House of Representatives of the State of Louisiana urging Congress to increase penalties for any person who knowingly hires, or recruits or refers for a fee, for employment within this state, an individual who is not authorized to work in the United States, or knowingly continues to employ an unauthorized alien; to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION NO. 63

Whereas, increasing public and congressional attention has been focused on the unauthorized alien population in the United States; and

Whereas, the federal Immigration Reform and Control Act makes all United States employers responsible for verifying the identity and work authorization of all individuals; and

Whereas, the federal government imposes civil penalties for those employers who continue to hire or retain unauthorized aliens; and

Whereas, the Department of Homeland Security reports an estimated eleven million unauthorized aliens living in the United States and an estimated six million of that number are from Mexico; and

Whereas, a large percentage of that number of unauthorized aliens represent the United States civilian labor force; and

Whereas, unauthorized aliens account for thirteen percent of the agriculture industry and twelve percent of the construction industry; and

Whereas, the state of Louisiana is experiencing a drastic increase in the number of unauthorized aliens seeking employment in our state due to the demand of the construction and agriculture industries; and

Whereas, the sovereignty of our state must be protected. THEREFORE, be it

Resolved, That the Legislature of Louisiana does hereby urge and request the United States Congress to increase penalties for any person who knowingly hires, or recruits or refers for a fee, for employment within that state, an individual who is not authorized to work in the United States, or who knowingly continues to employ an unauthorized alien. be it further

Resolved, that a copy of this Resolution be transmitted to the presiding officers of the Senate and the House of Representatives of the Congress of the United States of America and to each member of the Louisiana congressional delegation.

POM–431. A resolution adopted by the House of Representatives of the State of Louisiana urging Congress to take such actions as are necessary to recognize the need for support of the spouses of deceased veterans and the need for housing for homeless veterans; to the Committee on Veterans' Affairs.

HOUSE RESOLUTION NO. 148

Whereas, since the establishment of these United States, the policy of this nation is and always will be the support of the men and women who serve in the defense of their country in peace time as well as in times of military conflict; and

Whereas, the Veterans Administration was established by the Congress of these United States to recognize the contributions and service of the men and women of these United States and to provide for their well-being after their service to their country in the military; and

Whereas, the states of these United States in furtherance of this policy established state agencies to further administer to the welfare of our veterans specifically in Louisiana through the Louisiana Department of Veterans Affairs; and

Whereas, to promote and encourage the citizens of our state to participate in providing housing for our military veterans and their dependents, the Legislature of the State of Louisiana recognizes the need to support projects designed to further both the federal and state efforts to provide housing for veterans and their other needs; and

Whereas, the Veterans Village, a nonprofit organization located in Winnsboro, Louisiana, will provide over five hundred housing units for the spouses of our deceased veterans, as well as the veterans who are homeless in the state of Louisiana; and

Whereas, one out of every four homeless people is a citizen who served our nation in the defense of this country and needs assistance in finding adequate housing; and

Whereas, Veterans Village seeks financial support from the Congress of these United States to assist in the development of the Veterans Village in its effort to provide housing for deceased veterans' spouses and those who are homeless; and

Whereas, the House of Representatives of the Legislature of Louisiana desires to acknowledge its support of nonprofit projects like the Veterans Village in Winnsboro, Louisiana, which promotes housing for spouses of our deceased veterans and veterans who are without adequate shelter in our state. Therefore, be it

Resolved, That the House of Representatives of the Legislature of Louisiana does hereby request the United States Congress to take such actions as are necessary to appropriate funds to assist the development of the Veterans Village project designed to improve the standard of living of the spouses of our deceased veterans, as well as the homeless veterans living in the state of Louisiana. Be it further

Resolved, That the House of Representatives of the Legislature of Louisiana does hereby urge and request the Louisiana congressional delegation to file the appropriate legislation necessary to accomplish this appropriation. Be it further

Resolved, That a copy of this Resolution be transmitted to the presiding officers of the Senate and the House of Representatives of the Congress of the United States of America and to each member of the Louisiana congressional delegation.

POM–432. A resolution adopted by the Senate of the State of Louisiana to take such actions as are necessary to recognize the need for support of the spouses of deceased veterans and the need for housing for homeless veterans; to the Committee on Veterans' Affairs.

SENATE RESOLUTION NO. 181

Whereas, since the establishment of these United States, the policy of this nation is and always will be the support of the men and women who serve in the defense of their country in peace time as well as in times of military conflict; and

Whereas, the Veterans Administration was established by the Congress of these United States to recognize the contributions and service of the men and women of these United States and to provide for their well-being after their service to their country in the military; and

Whereas, the states of these United States in furtherance of this policy have established state agencies to further administer to the welfare of our veterans, which in Louisiana is the Louisiana Department of Veterans Affairs; and

Whereas, to promote and encourage the citizens of our state to participate in providing housing for our military veterans and their dependents, the Senate of the Legislature of Louisiana hereby recognizes the need to support projects designed to further both the federal and state efforts to provide housing for veterans and their other needs; and

Whereas, the Veterans Village, a nonprofit organization located in Winnsboro, Louisiana, will provide over five hundred housing units for the spouses of our deceased veterans, as well as the veterans who are homeless in the state of Louisiana; and

Whereas, one out of every four homeless people is a citizen who have served our nation in the defense of this country and need assistance in finding adequate housing; and

Whereas, Veterans Village seeks financial support from the Congress of these United States to assist in the development of the Veterans Village in its effort to provide housing for deceased veterans' spouses and those who are homeless; and

Whereas, the Senate of the Legislature of Louisiana desires to acknowledge its support of nonprofit projects like the Veterans Village in Winnsboro, Louisiana, which promotes housing for spouses of our deceased veterans and veterans who are without adequate shelter in our state. Therefore, be it

Resolved, That the Senate of the Legislature of Louisiana hereby memorializes the Congress of the United States to take such actions as are necessary to appropriate funds to assist the development of the Veterans Village project designed to improve the standard of living of the spouses of our deceased veterans, as well as the homeless veterans living in the state of Louisiana. Be it further

Resolved, That the Senate of the Legislature of Louisiana does hereby urge and request the members of the United States Congress from Louisiana to take the proper steps to obtain such appropriation. Be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

POM–433. A message from the Canadian Parliament extending best wishes to the United States Congress and the people of the United States of America on the anniversary of the independence of the United States of America on July 4, 2008; to the Committee on Foreign Relations.

POM–434. A resolution adopted by the City of Miami Beach City Commission Meeting of June 25, 2008, urging Congress to grant temporary protective status to Haitians in the United States; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, without amendment:

H.R. 4210. A bill to designate the facility of the United States Postal Service located at 401 Washington Avenue in Weldon, North Carolina, as the ''Dock M. Brown Post Office Building''.

H.R. 5477. A bill to designate the facility of the United States Postal Service located at 120 South Del Mar Avenue in San Gabriel, California, as the ''Chi Mui Post Office Building''.

H.R. 5483. A bill to designate the facility of the United States Postal Service located at 10449 White Granite Drive in Oakton, Virginia, as the ''Private First Class David H. Sharrett II Post Office Building''.

H.R. 5631. A bill to designate the facility of the United States Postal Service located at 1155 Seminole Trail in Charlottesville, Virginia, as the ''Corporal Bradley T. Arms Post Office Building''.

H.R. 6061. A bill to designate the facility of the United States Postal Service located at 219 East Main Street in West Frankfort, Illinois, as the ''Kenneth James Gray Post Office Building''.

H.R. 6085. A bill to designate the facility of the United States Postal Service located at 42222 Rancho Las Palmas Drive in Rancho

Mirage, California, as the ''Gerald R. Ford Post Office Building''.

H.R. 6150. A bill to designate the facility of the United States Postal Service located at 14500 Lorain Avenue in Cleveland, Ohio, as the ''John P. Gallagher Post Office Building''.

S. 3241. A bill to designate the facility of the United States Postal Service located at 1717 Orange Avenue in Fort Pierce, Florida, as the ''CeeCee Ross Lyles Post Office Building''.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of nominations were submitted:

By Mr. LIEBERMAN for the Committee on Homeland Security and Governmental Affairs.

*Carol A. Dalton, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

*Anthony C. Epstein, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

*James A. Williams, of Virginia, to be Administrator of General Services.

*Gus P. Coldebella, of Massachusetts, to be General Counsel, Department of Homeland Security.

*Heidi M. Pasichow, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. TESTER:

S. 3363. A bill to expedite the transfer of ownership of rural multifamily housing projects with loans made or insured under section 515 of the Housing Act of 1949 so that such projects are rehabilitated and preserved for use for affordable housing; to the Committee on Banking, Housing, and Urban Affairs.

By Mrs. LINCOLN (for herself, Mrs. CLINTON, Mr. MENENDEZ, and Mr. COCHRAN):

S. 3364. A bill to increase the recruitment and retention of school counselors, school social workers, and school psychologists by low-income local educational agencies; to the Committee on Health, Education, Labor, and Pensions.

By Mr. VITTER:

S. 3365. A bill to amend the Internal Revenue Code of 1986 to provide for a nonrefundable tax credit for long-term care insurance premiums; to the Committee on Finance.

By Mr. NELSON of Florida (for himself, Ms. STABENOW, Ms. COLLINS, Mr. CARDIN, and Mr. MARTINEZ):

S. 3366. A bill to protect, conserve, and restore native fish, wildlife, and their natural habitats at national wildlife refuges through cooperative, incentive-based grants to control, mitigate, and eradicate harmful nonnative plant species, and for other purposes; to the Committee on Environment and Public Works.

By Mr. SMITH (for himself, Mr. WYDEN, Mr. INOUYE, Mr. TESTER, Mr. SANDERS, Mr. BARRASSO, and Mr. COCHRAN):

S. 3367. A bill to amend title XVIII of the Social Security Act to revise the timeframe for recognition of certain designations in certifying rural health clinics under the Medicare program; to the Committee on Finance.

By Mr. BROWN (for himself and Ms. SNOWE):

S. 3368. A bill to promote industry growth and competitiveness and to improve worker training, retention, and advancement, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. NELSON of Florida (for himself, Mr. KENNEDY, Mr. DURBIN, Mr. MENENDEZ, and Mr. KERRY):

S. 3369. A bill to amend the Immigration and Nationality Act to provide for relief to surviving spouses and children, and for other purposes; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. FEINGOLD (for himself, Mr. COLEMAN, Mr. WHITEHOUSE, Mr. MENENDEZ, Mr. LIEBERMAN, Ms. KLOBUCHAR, Mr. CARDIN, Ms. LANDRIEU, Ms. SNOWE, Mr. KERRY, Mr. BROWNBACK, and Mr. JOHNSON):

S. Res. 632. A resolution calling on the Governments of the People's Republic of China and the international community to use the upcoming Olympic Games as an opportunity to push for the parties to the conflicts in Sudan, Chad, and the Central African Republic to cease hostilities and revive efforts toward a peaceful resolution of their national and regional conflicts; to the Committee on Foreign Relations.

By Mr. BROWNBACK (for himself and Mr. BUNNING):

S. Res. 633. A resolution expressing the sense of the Senate on the deterioration of respect for privacy and human rights in the People's Republic of China before the 2008 Olympic Games in Beijing; to the Committee on Foreign Relations.

By Mr. CASEY (for himself, Mr. CHAMBLISS, Mr. HARKIN, Mr. KERRY, Mr. SANDERS, Mrs. LINCOLN, Ms. STABENOW, Mr. ROBERTS, Mrs. DOLE, Mr. PRYOR, Mr. SMITH, Mr. JOHNSON, Mrs. CLINTON, and Mr. FEINGOLD):

S. Res. 634. A resolution recognizing July 30, 2008, as the 40th anniversary of the enactment of the resolution establishing the Senate Select Committee on Nutrition and Human Needs; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. MCCONNELL:

S. Res. 635. A resolution making minority party appointments for the 110th Congress; considered and agreed to.

ADDITIONAL COSPONSORS

S. 400

At the request of Mr. SUNUNU, the name of the Senator from Maryland (Ms. MIKULSKI) was added as a cosponsor of S. 400, a bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1986 to ensure that dependent students who take a medically necessary leave of absence do not lose health insurance coverage, and for other purposes.

S. 1075

At the request of Mrs. CLINTON, the name of the Senator from Illinois (Mr. OBAMA) was added as a cosponsor of S. 1075, a bill to amend title XIX of the Social Security Act to expand access to contraceptive services for women and men under the Medicaid program, help low income women and couples prevent unintended pregnancies and reduce abortion, and for other purposes.

S. 1376

At the request of Mr. BINGAMAN, the name of the Senator from Missouri (Mrs. MCCASKILL) was added as a cosponsor of S. 1376, a bill to amend the Public Health Service Act to revise and expand the drug discount program under section 340B of such Act to improve the provision of discounts on drug purchases for certain safety net providers.

S. 1588

At the request of Ms. LANDRIEU, the name of the Senator from Washington (Mrs. MURRAY) was added as a cosponsor of S. 1588, a bill to amend the Public Health Service Act, the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1986 to require that group and individual health insurance coverage and group health plans provide coverage for treatment of a minor child's congenital or developmental deformity or disorder due to trauma, infection, tumor, or disease.

S. 1603

At the request of Mr. MENENDEZ, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 1603, a bill to authorize Congress to award a gold medal to Jerry Lewis, in recognition of his outstanding service to the Nation.

S. 1870

At the request of Mr. FEINGOLD, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 1870, a bill to amend the Federal Water Pollution Control Act to clarify the jurisdiction of the United States over waters of the United States.

S. 2367

At the request of Mr. JOHNSON, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 2367, a bill to provide for the issuance of bonds to provide funding for the construction of schools of the Bureau of Indian Affairs, and for other purposes.

S. 2369

At the request of Mr. BAUCUS, the names of the Senator from Louisiana (Mr. VITTER) and the Senator from Colorado (Mr. ALLARD) were added as cosponsors of S. 2369, a bill to amend title 35, United States Code, to provide that certain tax planning inventions are not patentable, and for other purposes.

S. 2681

At the request of Mr. INHOFE, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 2681, a bill to require the issuance of medals to recognize the dedication and valor of Native American code talkers.

S. 2719

At the request of Mrs. DOLE, the name of the Senator from Georgia (Mr. CHAMBLISS) was added as a cosponsor of S. 2719, a bill to provide that Executive Order 13166 shall have no force or effect, and to prohibit the use of funds for certain purposes.

S. 2776

At the request of Ms. CANTWELL, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 2776, a bill to provide duty-free treatment for certain goods from designated Reconstruction Opportunity Zones in Afghanistan and Pakistan, and for other purposes.

S. 2836

At the request of Mr. CHAMBLISS, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. 2836, a bill to amend title 10, United States Code, to include service after September 11, 2001, as service qualifying for the determination of a reduced eligibility age for receipt of non-regular service retired pay.

S. 2932

At the request of Mrs. MURRAY, the name of the Senator from Maryland (Ms. MIKULSKI) was added as a cosponsor of S. 2932, a bill to amend the Public Health Service Act to reauthorize the poison center national toll-free number, national media campaign, and grant program to provide assistance for poison prevention, sustain the funding of poison centers, and enhance the public health of people of the United States.

S. 3038

At the request of Mr. GRASSLEY, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 3038, a bill to amend part E of title IV of the Social Security Act to extend the adoption incentives program, to authorize States to establish a relative guardianship program, to promote the adoption of children with special needs, and for other purposes.

S. 3080

At the request of Mrs. FEINSTEIN, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 3080, a bill to ensure parity between the temporary duty imposed on ethanol and tax credits provided on ethanol.

S. 3127

At the request of Mr. BURR, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 3127, a bill to reauthorize the Select Agent Program by amending the Public Health Service Act and the Agricultural Bioterrorism Protection Act of 2002 and to improve oversight of high containment laboratories.

S. 3164

At the request of Mr. MARTINEZ, the name of the Senator from Tennessee (Mr. CORKER) was added as a cosponsor of S. 3164, a bill to amend tile XVIII of the Social Security Act to reduce fraud under the Medicare program.

S. 3198

At the request of Mr. LAUTENBERG, the name of the Senator from Florida (Mr. NELSON) was added as a cosponsor of S. 3198, a bill to amend title 46, United States Code, with respect to the navigation of submersible or semi-submersible vessels without nationality.

S. 3199

At the request of Mr. LAUTENBERG, the name of the Senator from Maryland (Ms. MIKULSKI) was added as a cosponsor of S. 3199, a bill to amend the Internal Revenue Code of 1986 to exempt certain shipping from the harbor maintenance tax.

S. 3217

At the request of Mr. SPECTER, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 3217, a bill to provide appropriate protection to attorney-client privileged communications and attorney work product.

S. 3242

At the request of Mrs. LINCOLN, the name of the Senator from Nebraska (Mr. HAGEL) was added as a cosponsor of S. 3242, a bill to suspend temporarily the duty on digital-to-analog converter boxes, and for other purposes.

S. 3251

At the request of Mr. THUNE, the name of the Senator from Colorado (Mr. ALLARD) was added as a cosponsor of S. 3251, a bill to amend the Federal Crop Insurance Act and the Trade Act of 1974 to authorize advance payments under the supplemental revenue assistance program.

S. 3263

At the request of Mr. BIDEN, the names of the Senator from New York (Mrs. CLINTON) and the Senator from Connecticut (Mr. DODD) were added as cosponsors of S. 3263, a bill to authorize appropriations for fiscal years 2009 through 2013 to promote an enhanced strategic partnership with Pakistan and its people, and for other purposes.

S. 3299

At the request of Mr. ENSIGN, the name of the Senator from Minnesota (Mr. COLEMAN) was added as a cosponsor of S. 3299, a bill to amend title 38, United States Code, to extend the demonstration project on adjustable rate mortgages and the demonstration project on hybrid adjustable rate mortgages.

S. 3323

At the request of Mr. GREGG, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 3323, a bill to provide weatherization and home heating assistance to low income households, and to provide a heating oil tax credit for middle income households.

S. 3329

At the request of Mr. SALAZAR, the name of the Senator from New York (Mr. SCHUMER) was added as a cosponsor of S. 3329, a bill to amend the Energy Employees Occupational Illness Compensation Program Act of 2000 to expand the category of individuals eligible for compensation, to improve the procedures for providing compensation, and to improve transparency, and for other purposes.

S. 3331

At the request of Mr. BAUCUS, the names of the Senator from Arkansas (Mrs. LINCOLN) and the Senator from Michigan (Ms. STABENOW) were added as cosponsors of S. 3331, a bill to amend the Internal Revenue Code of 1986 to require that the payment of the manufacturers' excise tax on recreational equipment be paid quarterly.

S. 3337

At the request of Mr. ROBERTS, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 3337, a bill to require the Secretary of Agriculture to carry out conservation reserve program notice CRP-598, entitled the ''Voluntary Modification of Conservation Reserve Program (CRP) Contract for Critical Feed Use''.

S. RES. 551

At the request of Mr. BAUCUS, the names of the Senator from Maine (Ms. SNOWE) and the Senator from Oklahoma (Mr. COBURN) were added as cosponsors of S. Res. 551, a resolution celebrating 75 years of successful State-based alcohol regulation.

S. RES. 580

At the request of Mr. BAYH, the names of the Senator from South Carolina (Mr. GRAHAM), the Senator from New Hampshire (Mr. GREGG), the Senator from Mississippi (Mr. COCHRAN), the Senator from Ohio (Mr. VOINOVICH), the Senator from Kansas (Mr. BROWNBACK), the Senator from Utah (Mr. HATCH), the Senator from Utah (Mr. BENNETT) and the Senator from Oklahoma (Mr. COBURN) were added as cosponsors of S. Res. 580, a resolution expressing the sense of the Senate on preventing Iran from acquiring a nuclear weapons capability.

S. RES. 618

At the request of Mr. LUGAR, the names of the Senator from Florida (Mr. NELSON) and the Senator from Illinois (Mr. DURBIN) were added as cosponsors of S. Res. 618, a resolution recognizing the tenth anniversary of the bombings of the United States embassies in Nairobi, Kenya and Dar es Salaam, Tanzania, and memorializing the citizens of the United States, Kenya, and Tanzania whose lives were claimed as a result of the al Qaeda led terrorist attacks.

S. RES. 624

At the request of Mr. WHITEHOUSE, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. Res. 624, a resolution designating August 2008 as ''National Truancy Prevention Month''.

At the request of Mr. LEAHY, his name was added as a cosponsor of S. Res. 624, supra.

S. RES. 625

At the request of Mr. HAGEL, the names of the Senator from Illinois (Mr. DURBIN), the Senator from Georgia (Mr. ISAKSON) and the Senator from Ohio (Mr. VOINOVICH) were added as cosponsors of S. Res. 625, a resolution designating August 16, 2008, as National Airborne Day.

S. RES. 627

At the request of Mr. ISAKSON, the name of the Senator from Wisconsin (Mr. FEINGOLD) was added as a cosponsor of S. Res. 627, a resolution welcoming home Keith Stansell, Thomas Howes, and Marc Gonsalves, three citizens of the United States who were held hostage for over five years by the Revolutionary Armed Forces of Colombia (FARC) after their plane crashed on February 13, 2003.

S. RES. 630

At the request of Mrs. CLINTON, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. Res. 630, a resolution recognizing the importance of connecting foster youth to the workforce through internship programs, and encouraging employers to increase employment of former foster youth.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NELSON of Florida (for himself, Ms. STABENOW, Ms. COLLINS, Mr. CARDIN, and Mr. MARTINEZ):

S. 3366. A bill to protect, conserve, and restore native fish, wildlife, and their natural habitats at national wildlife refuges through cooperative, incentive-based grants to control, mitigate, and eradicate harmful nonnative plant species, and for other purposes; to the Committee on Environment and Public Works.

Mr. NELSON of Florida. Mr. President, I rise today to introduce legislation that will address the growing harm that nonnative or ''invasive'' species are inflicting on the wildlife and environment of our National Wildlife Refuge System.

In 1903, President Theodore Roosevelt issued an executive order that designated Pelican Island, located in my home State of Florida, as a Federal bird reservation. This designation was intended to protect the numerous species of waterfowl that called Indian River Lagoon and Pelican Island home, including the last known brown pelican rookery on the East Coast of Florida. President Roosevelt's action marked the first time that our Federal Government set aside land for the sake of wildlife.

In the century that followed, the Pelican Island reservation, 27 additional sites in Florida, and other areas nationwide were set aside by the Federal Government and grew into a vast network that is now the National Wildlife Refuge System. Today, this system is comprised of 540 wildlife refuges and 3,000 waterfowl production areas, spanning 95 million miles across all 50 States and several U.S. territories. These refuges are home to 700 bird species, more than 200 mammal species, 250 reptile and amphibian species, and more than 200 types of fish—including one-fourth of all federally recognized threatened and endangered species. The habitat afforded by our refuges will become even more critical to the survival of wildlife, which is already being forced to adapt to a rapidly changing climate.

As if encroaching human development, water and air pollution, and climate change weren't great enough challenges, our wildlife refuges and other protected areas are also threatened by a more insidious and persistent problem: invasive species. These nonnative plant and animal species compete for habitat, food, and other resources that are essential to native wildlife, including endangered and threatened species.

According to the Florida Fish and Wildlife Conservation Commission, over 400 nonnative animals and nearly 1,200 exotic plant species have been documented in the State, with more arriving each day. The old world climbing fern, Lygodium, poses a greater threat than any other nonnative plant to south Florida's natural areas, including one of our national treasures, the Everglades. This plant currently infests over 70 percent of the Arthur R. Marshall Loxahatchee National Wildlife Refuge near Boyton Beach, Florida. The Everglades' tree islands, which are a unique and extremely rare habitat for nesting wading birds and terrestrial wildlife, are particularly vulnerable to Lygodium. This invader first surrounds the islands' hardwood trees and dry ground, then grows over the tree canopy, and eventually smothers the native plants. This process essentially eliminates all of the ecological services that the tree islands once provided to native wildlife.

The threats posed by nonnative species are not confined to my home State of Florida—this is truly a national problem. According to the U.S. Fish and Wildlife Service, invasive species are one of the most significant problems facing the National Wildlife Refuge System. Resource managers cite nonnative species as the single greatest threat to the refuges' biological and ecological functions, and as one of their most pressing management challenges. Currently, experts estimate that nonnative plant species infest more than 2 million acres in the Refuge System, and that nearly 4,500 invasive animal populations are established.

Efforts are underway to control or eradicate harmful, nonnative species in our wildlife refuges and other conservation areas. For example, the Fish and Wildlife Service treated 2,500 acres of Lygodium on tree islands in the Loxahatchee National Wildlife Refuge in fiscal year 2006. The South Florida Water Management District has partnered with the U.S. Department of Agriculture's Agricultural Research Service to develop a sustained population of natural enemies, known as biological controls, to reduce the spread of invasive plants. The district has funded a biological control program for Lygodium since 1997, and has been working to find a natural enemy for the Brazilian pepper, one of the most noxious, widespread weeds in Florida. Projects like these are having a positive impact on the Everglades restoration, and show why it is important that all levels of government work together to combat harmful, nonnative species.

While these and other invasive species control efforts have yielded promising results, the job is far from complete. In the current fiscal year, approximately $8.7 million was budgeted for treatment and control of nonnative plants in the Refuge System. That may sound like a lot of money, but it represents a mere drop in the bucket: the Fish and Wildlife Service estimates that the total cost of managing invasive species on refuges nationwide is in excess of $300 million. Clearly, we need to dramatically increase the resources we devote to combating harmful, nonnative species if we expect our refuges to fulfill the wildlife conservation purposes for which they were set aside.

That is why I have worked with Senators STABENOW, COLLINS, CARDIN, and MARTINEZ to develop and introduce the Refuge Ecology Protection, Assistance, and Immediate Response Act, or REPAIR Act. The primary purpose of this act is to protect, enhance, and restore habitats for native fish and wildlife within the National Wildlife Refuge System. The REPAIR Act would establish within the Fish and Wildlife Service a grant program to support projects to assess, monitor, and manage harmful, nonnative species.

Specifically, REPAIR grants would be available to States, tribes, and territories to assess invasive plant and animal species that may threaten refuge resources, and to prioritize restorations needs and activities. Grants would also be available to State and local governments, universities, conservation organizations, and others to implement control projects to eradicate harmful, nonnative plants on refuges and adjoining, nonfederal lands and waters. Volunteer and public-interest groups would also be eligible for grants to conduct habitat surveys and monitor invasive plant and animal species. The REPAIR Act would also give the Secretary of the Interior the authority to provide financial assistance to States to respond quickly to outbreaks of invasive plants at a stage when complete eradication is possible and more affordable.

The Fish and Wildlife Service would be responsible for awarding REPAIR grants on a peer-reviewed, competitive

basis. For control projects, we establish numerous criteria that give priority to efforts that aid threatened and endangered species, encourage increased coordination among Federal, State, and local agencies, nongovernmental groups, and private entities, and that contain a comprehensive plan to prevent reintroduction of target species. All projects include monitoring and reporting elements, with oversight provided by the Fish and Wildlife Service. These provisions will help ensure that we achieve the greatest return on our investments to restore and maintain native habitat in the National Wildlife Refuge System.

The assessments and control projects authorized by the REPAIR Act will most certainly be of benefit to native wildlife living in and around our refuges, including the numerous threatened and endangered species that we have worked hard to protect. The restoration and preservation of native habitats and wildlife provided by the REPAIR Act will also benefit the 37 million people who visit our refuges each year and take advantage of fishing, hunting, and other recreational and educational opportunities that these special places provide.

In closing, I would like to recognize the efforts of Congressman RON KIND of Wisconsin, who introduced and championed the REPAIR Act in the U.S. House of Representatives. The House passed this important legislation in October of last year. I hope that we can find a way for the companion measure that I introduced today to pass the Senate and become the law of the land. I look forward to working with Chairman BOXER and the other members of the Senate Committee on Environment and Public Works to debate this important legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 3366

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Refuge Ecology Protection, Assistance, and Immediate Response Act''.

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds the following:

(1) The National Wildlife Refuge System is the premier land conservation system in the world.

(2) Harmful nonnative species are the leading cause of habitat destruction in national wildlife refuges.

(3) More than 675 known harmful nonnative species are found in the National Wildlife Refuge System.

(4) Nearly 8,000,000 acres of the National Wildlife Refuge System contain harmful nonnative species.

(5) The cost of early identification and removal of harmful nonnative species is dramatically lower than removing an established invasive population.

(6) The cost of the backlog of harmful nonnative species control projects that need to be carried out in the National Wildlife Refuge System is over $361,000,000, and the failure to carry out such projects threatens the ability of the System to fulfill its basic mission.

(b) PURPOSE.—The purpose of this Act is to encourage partnerships among the United States Fish and Wildlife Service, other Federal agencies, States, Indian tribes, and other interests for the following objectives:

(1) To protect, enhance, restore, and manage a diversity of habitats for native fish and wildlife resources within the National Wildlife Refuge System through monitoring and management of harmful nonnative species, including control of harmful nonnative plant species.

(2) To promote the development of voluntary State assessments to establish priorities for controlling harmful nonnative plant and animal species that threaten or negatively impact refuge resources.

(3) To promote greater cooperation among Federal, State, and local land and water managers, and owners of private land, water rights, or other interests, to implement ecologically based strategies to eradicate, mitigate, and control harmful nonnative plant species that threaten or negatively impact refuge resources through a voluntary and incentive-based financial assistance grant program.

(4) To establish an immediate response capability to combat incipient harmful nonnative plant species invasions.

SEC. 3. DEFINITIONS.

For the purposes of this Act:

(1) APPROPRIATE COMMITTEES.—The term ''appropriate Committees'' means the Committee on Natural Resources of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(2) CONTROL.—The term ''control'' means, as appropriate, eradicating, suppressing, reducing, or managing harmful nonnative species from areas where they are present; taking steps to detect early infestations on at-risk native habitats; and restoring native species and habitats to reduce the effects of harmful nonnative species.

(3) ENVIRONMENTAL SOUNDNESS.—The term ''environmental soundness'' means the extent of inclusion of methods, efforts, actions, or programs to prevent or control infestations of harmful nonnative species, that—

(A) minimize adverse impacts to the structure and function of an ecosystem and adverse effects on nontarget species and ecosystems; and

(B) emphasize integrated management techniques.

(4) HARMFUL NONNATIVE SPECIES.—The term ''harmful nonnative species'' means, with respect to a particular ecosystem in a particular region, any species, including its seeds, eggs, spores, or other biological material capable of propagating that species, that is not native to that ecosystem and has a demonstrable or potentially demonstrable negative environmental or economic impact in that region.

(5) INDIAN TRIBE.—The term ''Indian tribe'' has the meaning given that term in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

(6) NATIONAL MANAGEMENT PLAN.—The term ''National Management Plan'' means the management plan referred to in section 5 of Executive Order No. 13112 of February 3, 1999, and entitled ''Meeting the Invasive Species Challenge''.

(7) REFUGE RESOURCES.—The term ''refuge resources'' means all land and water, including the fish and wildlife species and the ecosystems and habitats therein, that are owned, leased, managed through easement or cooperative agreement, or otherwise managed by the by the Federal Government through the United States Fish and Wildlife Service and located within the National Wildlife Refuge System administered under the National Wildlife Refuge Administration Act of 1966 (16 U.S.C. 668dd et seq.), including any waterfowl production area.

(8) SECRETARY.—The term ''Secretary'' means the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service.

(9) STATE.—The term ''State'' means each of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, any other territory or possession of the United States, and any Indian tribe.

SEC. 4. REFUGE ECOLOGY PROTECTION, ASSISTANCE, AND IMMEDIATE RESPONSE (REPAIR) GRANT PROGRAM.

(a) IN GENERAL.—The Secretary may provide—

(1) a grant to any eligible applicant to carry out a qualified plant control project in accordance with this section; and

(2) a grant to any State to carry out an assessment project consistent with relevant State plans that have been developed in whole or in part for the conservation of native fish, wildlife, and their habitats, and in accordance with this section, to—

(A) identify harmful nonnative plant and animal species that occur in the State that threaten or negatively impact refuge resources;

(B) assess the needs to restore, manage, or enhance native fish and wildlife and their natural habitats and processes in the State to compliment activities to control, mitigate, or eradicate harmful nonnative plant and animal species negatively impacting refuge resources;

(C) identify priorities for actions to address such needs;

(D) identify mechanisms to increase capacity building in a State or across State lines to conserve and protect native fish and wildlife and their habitats and to detect and control harmful nonnative plant and animal species that might threaten or negatively impact refuge resources within the State; and

(E) incorporate, where applicable and to the extent consistent with this Act, the guidelines of the National Management Plan.

The grant program under this section shall be known as the ''Refuge Ecology Protection, Assistance, and Immediate Response Grant Program'' or the ''REPAIR Program''.

(b) FUNCTIONS OF THE SECRETARY.—

(1) IN GENERAL.—The Secretary shall—

(A) publish guidelines for and solicit applications for grants under this section not later than 6 months after the date of enactment of this Act; and

(B) receive, review, evaluate, and approve applications for grants under this section.

(2) DELEGATION OF AUTHORITY.—The Secretary may delegate to another Federal instrumentality the authority of the Secretary under this section, other than the authority to approve applications for grants and make grants.

(c) ELIGIBLE APPLICANT.—To be an eligible applicant for purposes of subsection (a)(1), an applicant shall—

(1) be a State, local government, interstate or regional agency, university, conservation organization, or private person;

(2) have adequate personnel, funding, and authority to carry out and monitor or maintain a control project; and

(3) have entered into an agreement with the Secretary or a designee of the Secretary,

for a national wildlife refuge or refuge complex.

(d) QUALIFIED CONTROL PROJECT.—

(1) IN GENERAL.—To be a qualified control project under this section, a project shall—

(A) control harmful nonnative plant species on the lands or waters on which it is conducted;

(B) include a plan for monitoring the project area and maintaining effective control of harmful nonnative plant species after the completion of the project, that is consistent with standards for monitoring developed under subsection (i);

(C) be conducted in partnership with a national wildlife refuge or refuge complex;

(D) be conducted on land or water, other than national wildlife refuge land or water, that, for purposes of carrying out the project, are under the control of the eligible applicant applying for the grant under this section, on land or water on which the eligible applicant has permission to conduct the project, or on adjacent national wildlife refuge land or water administered by the United States Fish and Wildlife Service referred to in subparagraph (C); and

(E) encourage public notice and outreach on control project activities in the affected community.

(2) OTHER FACTORS FOR SELECTION OF PROJECTS.—In ranking qualified control projects, the Director may consider the following:

(A) The extent to which a project would address the operational and maintenance backlog attributed to harmful nonnative plant species on refuge resources.

(B) Whether a project will encourage increased coordination and cooperation among one or more Federal agencies and State or local government agencies or nongovernmental or other private entities to control harmful nonnative plant species threatening or negatively impacting refuge resources.

(C) Whether a project fosters public-private partnerships and uses Federal resources to encourage increased private sector involvement, including consideration of the amount of private funds or in-kind contributions to control harmful nonnative species or national wildlife refuge lands or non-Federal lands in proximity to refuge resources.

(D) The extent to which a project would aid the conservation of species that are listed under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(E) The extent to which a project would aid the conservation of—

(i) species listed by the United States Fish and Wildlife Service as birds of management concern; and

(ii) species identified by the Director of the United States Fish and Wildlife Service as imperiled or at-risk species.

(F) The extent to which a project would aid the conservation of species identified as a ''Species of Greatest Conservation Need'' in a comprehensive wildlife conservation plan developed under the State wildlife grants program.

(G) The extent to which a project would contribute to the restoration and protection of terrestrial, freshwater aquatic, estuarine, coastal, and marine ecosystems, such as the Everglades, the Great Lakes, and the Mississippi River, that are determined to be priorities by the Director of the United States Fish and Wildlife Service.

(H) Whether a project includes pilot testing or a demonstration of an innovative technology having the potential for improved cost-effectiveness and reduced environmental risks when controlling harmful nonnative plant species.

(I) The extent to which a project minimizes adverse impacts of control methods on ecosystems affected by the project.

(J) Whether a project includes a comprehensive plan to prevent reintroduction of harmful nonnative plant species controlled by the project.

(e) DISTRIBUTION OF CONTROL GRANT AWARDS.—In making grants for control projects under this section the Secretary shall, to the greatest extent practicable, ensure—

(1) a balance of smaller and larger projects conducted with grants under this section; and

(2) an equitable geographic distribution of projects carried out with grants under this section, among all regions and States within which such projects are proposed to be conducted.

(f) GRANT DURATION.—

(1) IN GENERAL.—Each grant under this section shall be to provide funding for the Federal share of the cost of a project carried out with the grant for up to 2 fiscal years.

(2) RENEWAL.—

(A) IN GENERAL.—If the Secretary, after reviewing the reports under subsection (g) regarding a control project, finds that the project is making satisfactory progress, the Secretary may renew a grant under this section for the project for an additional 3 fiscal years.

(B) MONITORING AND MAINTENANCE PLAN.—The Secretary may renew a grant under this section to implement the monitoring and maintenance plan required for a control project under subsection (d)(1)(B) for up to 5 fiscal years after the project is otherwise completed.

(g) REPORTING BY GRANTEE.—

(1) CONTROL PROJECTS; ASSESSMENT PROJECTS.—

(A) CONTROL PROJECTS.—A grantee carrying out a control project with a grant under this section shall report to the Secretary every 24 months or at the expiration of the grant, whichever is of shorter duration.

(B) ASSESSMENT PROJECTS.—A State carrying out an assessment project with a grant under this section shall submit the assessment pursuant to subsection (a)(2) to the Secretary no later than 24 months after the date on which the grant is awarded.

(2) REPORT CONTENTS.—Each report under this subsection shall include the following information with respect to each project covered by the report:

(A) In the case of a control project—

(i) the information described in subparagraphs (B), (D), and (F) of subsection (j)(2);

(ii) specific information on the methods and techniques used to control harmful nonnative plant species in the project area; and

(iii) specific information on the methods and techniques used to restore native fish, wildlife, or their habitats in the project area.

(B) A detailed report of the funding for the grant and the expenditures made.

(3) INTERIM UPDATE.—Each grantee under paragraph (1)(A) shall also submit annually to the Secretary a brief synopsis and chronological list of projects showing progress as a percentage of completion and use of awarded funds.

(h) COST SHARING FOR PROJECTS.—

(1) FEDERAL SHARE.—Except as provided in paragraphs (2) and (3), the Federal share of the cost of a project carried out with a grant under this section shall not exceed 75 percent of such cost.

(2) INNOVATIVE TECHNOLOGY COSTS.—The Federal share of the incremental additional cost of including in a control project any pilot testing or a demonstration of an innovative technology described in subsection (d)(2)(H) shall be 85 percent.

(3) PROJECTS ON REFUGE LANDS OR WATERS.—The Federal share of the cost of the portion of a control project funded with a grant under this section that is carried out on national wildlife refuge lands or waters, including the cost of acquisition by the Federal Government of lands or waters for use for such a project, shall be 100 percent.

(4) APPLICATION OF IN-KIND CONTRIBUTIONS.—The Secretary may apply to the non-Federal share of costs of a control project carried out with a grant under this section the fair market value of services or any other form of in-kind contribution to the project made by non-Federal interests that the Secretary determines to be an appropriate contribution equivalent to the monetary amount required for the non-Federal share of the activity.

(5) DERIVATION OF NON-FEDERAL SHARE.—The non-Federal share of the cost of a control project carried out with a grant under this section may not be derived from a Federal grant program or other Federal funds.

(i) MONITORING AND MAINTENANCE OF CONTROL GRANT PROJECTS.—

(1) REQUIREMENTS.—The Secretary shall develop requirements for the monitoring and maintenance of a control project to ensure that the requirements under subparagraphs (A) and (B) of subsection (d)(1) are achieved.

(2) DATABASE OF GRANT PROJECT INFORMATION.—The Secretary shall develop and maintain an appropriate database of information concerning control projects carried out with grants under this subsection, including information on project techniques, project completion, monitoring data, and other relevant information.

(3) USE OF EXISTING PROGRAMS.—The Secretary shall use existing programs within the Department of the Interior to create and maintain the database required under this subsection.

(4) PUBLIC AVAILABILITY.—The Secretary shall make the information collected and maintained under this subsection available to the public.

(j) REPORTING BY THE SECRETARY.—

(1) IN GENERAL.—The Secretary shall, by not later than 3 years after the date of the enactment of this Act and biennially thereafter in the report under section 8, report to the appropriate Committees on the implementation of this section.

(2) REPORT CONTENTS.—A report under paragraph (1) shall include an assessment of—

(A) trends in the population size and distribution of harmful nonnative plant species in the project area for each control project carried out with a grant under this section, and in the adjacent areas as defined by the Secretary;

(B) data on the number of acres of refuge resources and native fish and wildlife habitat restored, protected, or enhanced under this section, including descriptions of, and partners involved with, control projects selected, in progress, and completed under this section;

(C) trends in the population size and distribution in the project areas of native species targeted for restoration, and in areas in proximity to refuge resources as defined by the Secretary;

(D) an estimate of the long-term success of varying conservation techniques used in carrying out control projects with grants under this section;

(E) an assessment of the status of control projects carried out with grants under this section, including an accounting of expenditures by the United States Fish and Wildlife Service, State, regional, and local government agencies, and other entities to carry out such projects;

(F) a review of the environmental soundness of the control projects carried out with grants under this section;

(G) a review of efforts made to maintain an appropriate database of grants under this section; and

(H) a review of the geographical distribution of Federal money, matching funds, and in-kind contributions for control projects carried out with grants under this section.

(k) COOPERATION OF NON-FEDERAL INTERESTS.—The Secretary may not make a grant under this section for a control project on national wildlife refuge lands or lands in proximity to refuge resources before a non-Federal interest has entered into a written agreement with a national wildlife refuge or refuge complex under which the non-Federal interest agrees to—

(1) monitor and maintain the control project in accordance with the plan required under subsection (d)(1)(B); and

(2) provide any other items of cooperation the Secretary considers necessary to carry out the project.

SEC. 5. CREATION OF AN IMMEDIATE RESPONSE CAPABILITY TO HARMFUL NONNATIVE SPECIES.

(a) ESTABLISHMENT.—The Secretary may provide financial assistance for a period of not more than 3 fiscal years to enable an immediate response to outbreaks of harmful nonnative plant species that threaten or may negatively impact refuge resources that are at a stage at which rapid eradication or control is possible, and ensure eradication or immediate control of the harmful nonnative plant species.

(b) REQUIREMENTS FOR ASSISTANCE.—The Secretary, after consulting with the Governor of the State, shall provide assistance under this section to local and State agencies, universities, or nongovernmental entities for the eradication of an immediate harmful nonnative plant species threat only if—

(1) there is a demonstrated need for the assistance;

(2) the harmful nonnative plant species is considered to be an immediate threat to refuge resources, as determined by the Secretary; and

(3) the proposed response to such threat—

(A) is technically feasible; and

(B) minimizes adverse impacts to the structure and function of national wildlife refuge ecosystems and adverse effects on nontarget species.

(c) AMOUNT OF FINANCIAL ASSISTANCE.—The Secretary shall determine the amount of financial assistance to be provided under this section with respect to an outbreak of a harmful nonnative species, subject to the availability of appropriations.

(d) COST SHARE.—The Federal share of the cost of any activity carried out with assistance under this section may be up to 100 percent.

(e) MONITORING AND REPORTING.—The Secretary shall require that persons receiving assistance under this section monitor and report on activities carried out with assistance under this section in accordance with the requirements that apply with respect to control projects carried out with assistance under section 4.

SEC. 6. COOPERATIVE VOLUNTEER HARMFUL NONNATIVE SPECIES MONITORING AND CONTROL PROGRAM.

(a) IN GENERAL.—Consistent with the National Wildlife Refuge System Volunteer and Community Partnership Enhancement Act of 1998 (Public Law 105–242), the Secretary shall establish a cooperative volunteer monitoring and control program to administer and coordinate projects implemented by partner organizations concerned with national wildlife refuges to address harmful nonnative species that threaten national wildlife refuges or adjacent lands.

(b) ELIGIBLE ACTIVITIES.—Each project administered and coordinated under this section shall include 1 of the following activities:

(1) Habitat surveys.

(2) Detection and identification of new introductions or infestations of harmful nonnative plant and animal species.

(3) Harmful nonnative plant species control projects.

(4) Public education and outreach to increase awareness concerning harmful nonnative species and their threat to the refuge system.

SEC. 7. RELATIONSHIP TO OTHER AUTHORITIES.

(a) AUTHORITIES, ETC. OF SECRETARY.—Nothing in this Act affects authorities, responsibilities, obligations, or powers of the Secretary under any other statute.

(b) STATE AUTHORITY.—Nothing in this Act preempts any provision or enforcement of State statute or regulation relating to the management of fish and wildlife resources within such State.

SEC. 8. BIENNIAL REPORT.

Not later than 2 years after the date of enactment of this Act and biennially thereafter, the Secretary shall prepare and submit to Congress and the National Invasive Species Council—

(1) a comprehensive report summarizing all grant activities relating to invasive species initiated under this Act including—

(A) State assessment projects;

(B) qualified control projects;

(C) immediate response activities; and

(D) projects identified in the Refuge Operations Needs database or the Service Asset and Maintenance Management System database of the United States Fish and Wildlife Service;

(2) a list of grant priorities, ranked in high, medium, and low categories, for future grant activities in the areas of—

(A) early detection and rapid response;

(B) control, management, and restoration;

(C) research and monitoring;

(D) information management; and

(E) public outreach and partnership efforts; and

(3) information required to be included under section 4(k).

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to carry out this Act such sums as may be necessary.

(b) ALLOWANCE FOR IMMEDIATE RESPONSE.—Of the amounts appropriated to carry out this Act no more than 25 percent shall be available in any fiscal year for financial assistance under section 5.

(c) CONTINUING AVAILABILITY.—Amounts appropriated under this Act may remain available until expended.

(d) ADMINISTRATIVE EXPENSES.—Of amounts available each fiscal year to carry out this Act, the Secretary may expend not more than 3 percent or up to $100,000, whichever is greater, to pay the administrative expenses necessary to carry out this Act.

By Mr. SMITH (for himself, Mr. WYDEN, Mr. INOUYE, Mr. TESTER, Mr. SANDERS, Mr. BARRASSO, and Mr. COCHRAN):

S. 3367. A bill to amend title XVIII of the Social Security Act to revise the timeframe for recognition of certain designations in certifying rural health clinics under the Medicare program; to the Committee on Finance.

Mr. SMITH. Mr. President, I rise today to recognize an outstanding health care hero from Oregon, Maria Loredo. Through her hard work and tireless dedication to her community, Maria has played a critical role in creating access to health care for those in need in Washington County, OR.

Maria Loredo is the chief operating officer for the Virginia Garcia Memorial Health Center, named for a 6-year-old migrant farmworker girl who moved from Mission, TX, to work with her family in Washington County's strawberry harvest. Tragically, Virginia Garcia died from a simple foot wound, but her death inspired a committed group of individuals to improve health care access in the community.

Like 6-year-old Virginia Garcia, Maria Loredo also hails from Mission, TX, and as a young person worked with her family throughout Texas following crops. Eventually the family migrated to Oregon and settled there in 1966. Maria began her work with the fledgling Virginia Garcia Clinic in 1978 when it was only 3 years old. Her own experience as a migrant worker has helped her develop the programs and services of the clinic so that they are most effective in reaching the farmworker community.

Maria has been instrumental in growing the health center from a clinic operating out of a three-car garage to an organization with four primary care clinics serving over 30,000 people in Washington and Yamhill Counties, OR. Her commitment to the community has enabled the organization to develop a farmworker outreach program that operates from a mobile clinic and provides medical and dental services in over 20 migrant camps throughout the region.

In her role as chief operating officer, Maria has helped establish clinics in McMinnville, Hillsboro, and Beaverton serving a diverse community that includes patients who not only speak English and Spanish, but Vietnamese, Russian, Swahili, Chinese, and Farsi.

She has helped Virginia Garcia develop critically needed dental, pharmacy, and behavioral health care with an integrated approach to health care delivery that always remains sensitive to the language and cultural background of the patients. Most recently, Maria has helped pave the way to a new access point at the Tigard School Based Clinic and also to the implementation of electronic health records.

While working full-time developing Virginia Garcia's programs, Maria found time to pursue her education and graduated with her B.A. from Portland State University in 2003. Once a migrant worker, she has gone on to not only serve her community, but inspire others to achieve a better, healthier life for themselves and their children.

Because she has dedicated the last 30 years of her life to the mission of the Virginia Garcia Memorial Health Center and made a significant difference in the lives of so many, I recognize her as an Oregon health care hero and thank her for her ongoing work.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD as follows:

S. 3367

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REVISION OF THE TIMEFRAME FOR THE RECOGNITION OF CERTAIN DESIGNATIONS IN CERTIFYING RURAL HEALTH CLINICS UNDER THE MEDICARE PROGRAM.

(a) IN GENERAL.—The second sentence of section 1861(aa)(2) of the Social Security Act (42 U.S.C. 1395x(aa)(2)) is amended by striking ''3-year period'' and inserting ''4-year period'' in the matter in clause (i) preceding subclause (I).

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date of the enactment of this Act.

By Mr. BROWN (for himself and Ms. SNOWE):

S. 3368. A bill to promote industry growth and competitiveness and to improve worker training, retention, and advancement, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. BROWN. Mr. President, today, Senator SNOWE of Maine and I are introducing a workforce development bill—the Strengthening Employment Clusters to Organize Regional Success, or SECTORS Act.

Over the last 16 months, I have held 110 roundtable discussions in communities all over Ohio.

One of the themes that have recurred in the roundtables—from workers and employers, business and labor, teachers and professors—is that we need to do a better job connecting workers with the middle and high skills needed for careers that are growing in Ohio.

Today, Ohio has an unemployment rate above the national average. It was 6.3 percent in June.

Between 2000 and 2007, Ohio experienced a 24.3 percent drop in manufacturing employment, shedding nearly 230,000 jobs. Overall employment dropped by nearly 3.6 percent in the same time period.

That said, employers throughout the state talk about jobs gone begging, and not being able to fill middle and high skilled positions. There are open jobs in high-tech, healthcare, and even manufacturing that are going unfilled.

A recent report by labor economists Harry Holzer and Robert Lerman found that substantial demand remains in today's labor market for skilled workers. This is particularly true for ''middle-skill'' jobs that require more than a high school degree but less than a 4-year college degree. These jobs make up nearly half of America's labor market and provide good compensation for workers.

The approach Senator SNOWE and I take in this bill is to organize training around industry clusters.

Silicon Valley, the Research Triangle in North Carolina, Route 128 around Boston—these are examples of clusters.

But it is not just high tech jobs either.

Think of tourism in Florida, or insurance in Connecticut, or food packaging in Pennsylvania. These are successful clusters that build around a skilled labor force.

The Ohio Workforce Board has compiled great information about emerging industries and skills programs needed to see people fill these jobs.

Ohio Governor Ted Strickland and Chancellor Eric Fingerhut are giving workforce training a high priority.

This bill complements those efforts, and builds on great examples of cluster partnerships around the country.

The National Governors Association has been promoting this model, and it really will be the way we successfully train our workers and promote regional economic development.

Nobody wants lack of training to be the constraint on Ohio's economic growth.

So the SECTORS Act focuses on targeted training, with multiple stakeholders in the same industry. The bill right now requires four principal stakeholders to be part of a training program: industry, labor unions, workforce investment boards, and community colleges.

We want to build in a process that makes a training program sustainable and not just a one-time infusion of money. With that in mind, Senator SNOWE and I have written in our bill a matching funds requirement.

The legislation builds in rigorous evaluation so lawmakers and policymakers know how tax dollars are being spent, something that has not been the cause under President Bush's Department of Labor's training initiatives.

The Government Accountability Office found in May 2008 that the Labor Department's demand-driven workforce training programs have often been awarded through a non-competitive process, and have lacked accountability and evaluation so that Americans know how their tax dollars are being spent.

We need to break clean from this approach. I plan to work with Senator SNOWE and colleagues in both chambers to authorize an industry clusters skills training program that builds in accountability and sustainability, and helps workers and businesses thrive in Ohio, Maine, and throughout the country.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 3368

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Strengthening Employment Clusters to Organize Regional Success Act of 2008'' or the ''SECTORS Act of 2008''.

SEC. 2. INDUSTRY OR SECTOR PARTNERSHIP GRANT.

Subtitle D of title I of the Workforce Investment Act of 1998 (29 U.S.C. 2911 et seq.) is amended by inserting after section 174 the following:

''SEC. 174A. INDUSTRY OR SECTOR PARTNERSHIP GRANT PROGRAM.

''(a) PURPOSE.—It is the purpose of this section to create designated capacity to promote industry or sector partnerships that lead collaborative planning, resource alignment, and training efforts across multiple firms for a range of workers employed or potentially employed by a targeted industry cluster, in order to encourage industry growth and competitiveness and to improve worker training, retention, and advancement in targeted industry clusters, including by developing—

''(1) immediate strategies for regions and communities to fulfill pressing skilled workforce needs;

''(2) long-term plans to grow targeted industry clusters with better training and a more productive workforce;

''(3) core competencies and competitive advantages for regions and communities undergoing structural economic redevelopment; and

''(4) cross-firm skill standards, career ladders, job redefinitions, employer practices, and shared training and support capacities that facilitate the advancement of workers at all skill levels.

''(b) DEFINITIONS.—In this section:

''(1) CAREER LADDER.—The term 'career ladder' means an identified series of positions, work experiences, and educational benchmarks or credentials that offer occupational and financial advancement within a specified career field or related fields over time.

''(2) ECONOMIC SELF-SUFFICIENCY.—The term 'economic self-sufficiency' means, with respect to a worker, earning a wage sufficient to support a family adequately, based on factors such as—

''(A) family size;

''(B) the number and ages of children in the family;

''(C) the cost of living in the worker's community; and

''(D) other factors that may vary by region.

''(3) ELIGIBLE ENTITY.—The term 'eligible entity' means—

''(A) an industry or sector partnership; or

''(B) an eligible State agency.

''(4) ELIGIBLE STATE AGENCY.—The term 'eligible State agency' means a State agency designated by the Governor of the State for the purposes of the grant program under this section.

''(5) HIGH-PRIORITY OCCUPATION.—The term 'high-priority occupation' means an occupation that—

''(A) has a significant presence in an industry cluster;

''(B) is in demand by employers;

''(C) pays family-sustaining wages that enable workers to achieve economic self-sufficiency, or can reasonably be expected to lead to such wages;

''(D) has a documented career ladder; and

''(E) has a significant impact on a region's economic development strategy.

''(6) HIGH ROAD EMPLOYER.—The term 'high road employer' means an employer interested in advancing workers through processes and investments in education, training, and research and development.

''(7) INDUSTRY CLUSTER.—The term 'industry cluster' means a concentration of interconnected businesses, suppliers, service providers, and associated institutions in a particular field that are linked by common workforce needs.

''(8) INDUSTRY OR SECTOR PARTNERSHIP.—The term 'industry or sector partnership' means a workforce collaborative that—

''(A) organizes key stakeholders in a targeted industry cluster into a working group that focuses on the human capital needs of a targeted industry cluster and that includes, at the appropriate stage of development of the partnership—

''(i) representatives of multiple firms or employers, including workers, in a targeted industry cluster, including small- and medium-sized employers when practicable;

''(ii) 1 or more representatives of State labor organizations or central labor coalitions;

''(iii) 1 or more representatives of local boards;

''(iv) 1 or more representatives of postsecondary educational institutions or other training providers; and

''(v) 1 or more representatives of State workforce agencies or other entities providing employment services; and

''(B) may include representatives of—

''(i) State or local government;

''(ii) State or local economic development agencies;

''(iii) other State or local agencies;

''(iv) chambers of commerce;

''(v) nonprofit organizations;

''(vi) industry associations; and

''(vii) other organizations, as determined necessary by the members comprising the industry or sector partnership.

''(9) TARGETED INDUSTRY CLUSTER.—The term 'targeted industry cluster' means an industry cluster that has—

''(A) economic impact in a local or regional area;

''(B) immediate workforce development needs; and

''(C) documented career opportunities.

''(c) GRANTS AUTHORIZED.—

''(1) IN GENERAL.—From amounts appropriated under subsection (i), the Secretary shall award, on a competitive basis, planning grants described in paragraph (3) and implementation grants described in paragraph (4) to eligible entities, to enable the eligible entities to plan and implement, respectively, the eligible entities' strategic objectives in accordance with subsection (f).

''(2) MAXIMUM AMOUNT.—

''(A) PLANNING GRANTS.—A planning grant awarded under paragraph (3) shall not exceed $250,000.

''(B) IMPLEMENTATION GRANTS.—An implementation grant awarded under paragraph (4)(A) shall not exceed a total of $2,500,000 for a 3-year period.

''(C) RENEWAL GRANTS.—A renewal grant awarded under paragraph (4)(C) shall not exceed a total of $1,500,000 for a 3-year period.

''(3) PLANNING GRANTS.—

''(A) IN GENERAL.—The Secretary may award a planning grant under this section to an eligible entity that—

''(i) is a newly formed industry or sector partnership; and

''(ii) has not received a grant under this section.

''(B) DURATION.—A planning grant shall be for a duration of 1 year.

''(4) IMPLEMENTATION GRANTS.—

''(A) IN GENERAL.—The Secretary may award an implementation grant under this section to—

''(i) an eligible entity that has already received a planning grant under this section; or

''(ii) an eligible entity that is an established industry or sector partnership.

''(B) DURATION.—An implementation grant shall be for a duration of not more than 3 years, and may be renewed in accordance with subparagraph (C).

''(C) RENEWAL.—The Secretary may renew an implementation grant for not more than 3 years. A renewal of such grant shall be subject to the requirements of this section, except that the Secretary shall—

''(i) prioritize renewals to eligible entities that can demonstrate the long-term sustainability of an industry or sector partnership funded under this section;

''(ii) as a condition of renewing the grant, and notwithstanding subsection (d), decrease the amount of the Federal share and increase the amount of the non-Federal share required for the grant, which must include at least a 25 percent cash match from the State, the industry cluster, or some combination thereof; and

''(iii) require assurances that the eligible entity will leverage, each year, additional funding sources in accordance with subparagraph (D)(ii) than the eligible entity provided for the preceding year of the grant.

''(D) FEDERAL AND NON-FEDERAL SHARE.—

''(i) FEDERAL SHARE.—Except as provided in subparagraph (C)(ii), the Federal share of an implementation grant under this section shall be—

''(I) 90 percent of the costs of the activities described in subsection (g), in the first year of the grant;

''(II) 80 percent of such costs in the second year of the grant; and

''(III) 70 percent of such costs in the third year of the grant.

''(ii) NON-FEDERAL.—The non-Federal share of an implementation grant under this section may be in cash or in-kind, and may come from State, local, philanthropic, private, or other sources.

''(5) FISCAL AGENT.—Each eligible entity receiving a grant under this section that is an industry or sector partnership shall designate an entity in the partnership as the fiscal agent for purposes of this grant.

''(6) USE OF GRANT FUNDS DURING GRANT PERIODS.—An eligible entity receiving grant funds under a planning grant, implementation grant, or a renewal grant under this section shall expend grant funds or obligate grant funds to be expended by the last day of the grant period.

''(d) APPLICATION PROCESS.—

''(1) IDENTIFICATION OF A TARGETED INDUSTRY CLUSTER.—In order to qualify for a grant under this section, an eligible entity shall identify a targeted industry cluster that could benefit from such grant by—

''(A) working with businesses, industry associations and organizations, labor organizations, State boards, local boards, economic development agencies, and other organizations that the eligible entity determines necessary, to identify an appropriate targeted industry cluster based on criteria that include, at a minimum—

''(i) data showing the competitiveness of the industry cluster;

''(ii) the importance of the industry cluster to the economic development of the area served by the eligible entity;

''(iii) the identification of supply and distribution chains within the industry cluster; and

''(iv) research studies on industry clusters; and

''(B) working with appropriate employment agencies, workforce investment boards, economic development agencies, community organizations, and other organizations that the eligible entity determines necessary to ensure that the targeted industry cluster identified under subparagraph (A) should be targeted for investment, based primarily on the following criteria:

''(i) Demonstrated demand for job growth potential.

''(ii) Competitiveness.

''(iii) Employment base.

''(iv) Wages and benefits.

''(v) Demonstrated importance of the targeted industry cluster to the area's economy.

''(vi) Workforce development needs.

''(2) APPLICATION.—An eligible entity desiring to receive a grant under this section shall submit an application to the Secretary at such time, in such manner, and containing such information as the Secretary may require. An application submitted under this paragraph shall contain, at a minimum, the following:

''(A) A description of the eligible entity, evidence of the eligible entity's capacity to carry out activities in support of the strategic objectives identified in the application under subparagraph (D), and, if the eligible entity is an industry or sector partnership, a description of the expected participation and responsibilities of each of the mandatory partners described in subsection (b)(8)(A).

''(B) A description of the targeted industry cluster for which the eligible entity intends to carry out activities through a grant under this section, and a description of how such targeted industry cluster was identified in accordance with paragraph (1).

''(C) A description of the workers that will be targeted or recruited by the partnership, including an analysis of the existing labor market, a description of potential barriers to employment for targeted workers, and a description of strategies that will be employed to help workers overcome such barriers.

''(D) A description of the strategic objectives that the eligible entity intends to carry out for the targeted industry cluster, which objectives shall include—

''(i) recruiting key stakeholders in the targeted industry cluster, such as businesses and employers, labor organizations, industry associations, local boards, State boards, and education and training providers, and regularly convening the stakeholders in a collaborative structure that supports the sharing of information, ideas, and challenges common to the targeted industry cluster;

''(ii) identifying the training needs of multiple businesses, especially skill gaps critical to competitiveness and innovation to the targeted industry cluster;

''(iii) facilitating economies of scale by aggregating training and education needs of multiple employers;

''(iv) helping postsecondary educational institutions and training institutions align curricula and programs to industry demand, particularly for higher skill, high-priority occupations validated by the industry;

''(v) ensuring that the State agency that administers the Wagner-Peyser Act program shall inform recipients of unemployment insurance and trade adjustment assistance under chapter 2 or 6 of title II of the Trade Act of 1974 (19 U.S.C. 2271 et seq., 2401 et seq.) of the job and training opportunities that may result from the implementation of this grant;

''(vi) informing and collaborating with organizations such as youth councils, business-education partnerships, apprenticeship programs, secondary schools, and postsecondary educational institutions, and with parents and career counselors, for the purpose of addressing the challenges of connecting disadvantaged adults as defined in section 132(b)(1)(B)(v) and disadvantaged youth as defined in section 127(b) to careers;

''(vii) helping companies identify, and work together to address, common organizational and human resource challenges, such as—

''(I) recruiting new workers;

''(II) implementing effective workplace practices;

''(III) retaining dislocated and incumbent workers;

''(IV) implementing a high-performance work organization;

''(V) recruiting and retaining women in nontraditional occupations;

''(VI) adopting new technologies; and

''(VII) fostering experiential and contextualized on-the-job learning;

''(viii) developing and strengthening career ladders within and across companies (in cooperation with labor organizations if the labor organizations represent employees engaged in similar work in the industry cluster), in order to enable dislocated, incumbent and entry-level workers to improve skills and advance to higher-wage jobs;

''(ix) improving job quality through improving wages, benefits, and working conditions;

''(x) helping partner companies in industry or sector partnerships to attract potential employees from a diverse job seeker base, including individuals with barriers to employment (such as job seekers who are economically disadvantaged, youth, older workers, and individuals who have completed a term of imprisonment), by identifying such barriers through analysis of the existing labor market and implementing strategies to help such workers overcome such barriers; and

''(xi) strengthening connections among businesses in the targeted industry cluster, leading to cooperation beyond workforce issues that will improve competitiveness and job quality, such as joint purchasing, market research, or centers for technology and innovation.

''(E) A description of the manner in which the eligible entity intends to make sustainable progress toward the strategic objectives described in subparagraph (D).

''(F) Performance measures, with quantifiable benchmarks, for measuring progress toward the strategic objectives. Such measures shall consider, at a minimum, the benefits provided by the grant activities funded under this section for—

''(i) workers employed in the targeted industry cluster, disaggregated by gender and race, including—

''(I) the number of workers receiving portable industry-recognized credentials;

''(II) the number of workers with increased wages, the percentage of workers with increased wages, and the average wage increase; and

''(III) for dislocated or nonincumbent workers, the number of workers placed in sector-related jobs; and

''(ii) firms and industries in the targeted industry cluster, including—

''(I) the creation or updating of an industry plan to meet current and future workforce demand;

''(II) the creation or updating of published industry-wide skill standards or career pathways;

''(III) the creation or updating of portable, industry-recognized credentials, or where there is not such a credential, the creation or updating of a training curriculum that can lead to the development of such a credential;

''(IV) in the case of an eligible entity that is an industry or sector partnership, the number of firms, and the percentage of the local industry, participating in the industry or sector partnership; and

''(V) the number of firms, and the percentage of the local industry, receiving workers or services through the grant funded under this section.

''(G) A timeline for achieving progress toward the strategic objectives.

''(H) In the case of an eligible entity desiring an implementation grant under this section, an assurance that the eligible entity will leverage other funding sources, in addition to the amount required for the non-Federal share under subsection (d), to provide training or supportive services to workers under the grant program. Such additional funding sources may include—

''(i) funding under this title used for such training and supportive services;

''(ii) funding under the Adult Education and Family Literacy Act of 1998 (20 U.S.C. 9201 et seq.);

''(iii) funding under chapter 2 or 6 of title II of the Trade Act of 1974 (19 U.S.C. 2271 et seq.);

''(iv) economic development funding;

''(v) employer contributions to training initiatives; or

''(vi) providing employees with employee release time for such training or supportive services.

''(e) AWARD BASIS.—

''(1) GEOGRAPHIC DISTRIBUTION.—The Secretary shall award grants under this section in a manner to ensure geographic diversity.

''(2) PRIORITIES.—In awarding grants under this section, the Secretary shall give priority to eligible entities that—

''(A) work with high road employers within a targeted industry cluster to retain and expand employment in high wage, high growth areas;

''(B) focus on helping workers move toward economic self-sufficiency and ensuring the workers have access to adequate supportive services;

''(C) address the needs of firms with limited human resources or in-house training capacity, including small- and medium-sized firms; and

''(D) coordinate with entities carrying out State and local workforce investment, economic development, and education activities.

''(f) ACTIVITIES.—

''(1) IN GENERAL.—An eligible entity receiving a grant under this section shall carry out the activities necessary to meet the strategic objectives described in the entity's application in a manner that—

''(A) integrates services and funding sources in a way that enhances the effectiveness of the activities; and

''(B) uses grant funds awarded under this section efficiently.

''(2) ADMINISTRATIVE COSTS.—An eligible entity may retain a portion of a grant awarded under this section for a fiscal year to carry out the administration of this section in an amount not to exceed 10 percent of the grant amount.

''(g) EVALUATION AND PROGRESS REPORTS.—

''(1) ANNUAL ACTIVITY REPORT AND EVALUATION.—Not later than 1 year after receiving a grant under this section, and annually thereafter, an eligible entity shall—

''(A) report to the Secretary, and to the Governor of the State that the eligible entity serves, on the activities funded pursuant to a grant under this section; and

''(B) evaluate the progress the eligible entity has made toward the strategic objectives identified in the application under subsection (d)(2)(D), and measure the progress using the performance measures identified in the application under subsection (d)(2)(F).

''(2) REPORT TO THE SECRETARY.—An eligible entity receiving a grant under this section shall submit to the Secretary a report containing the results of the evaluation described in subparagraph (B) at such time and in such manner as the Secretary may require.

''(h) ADMINISTRATION BY THE SECRETARY.—

''(1) ADMINISTRATIVE COSTS.—The Secretary may retain not more than 10 percent of the funds appropriated pursuant to the authorization of appropriations under subsection (j) for each fiscal year to administer this section.

''(2) TECHNICAL ASSISTANCE AND OVERSIGHT.—The Secretary shall provide technical assistance and oversight to assist the eligible State and local agencies or eligible entities in applying for and administering grants awarded under this section. The Secretary shall also provide technical assistance to eligible entities in the form of conferences and through the collection and dissemination of information on best practices developed by eligible partnerships. The Secretary may award a grant or contract to 1 or more national or State organizations to provide technical assistance to foster the planning, formation, and implementation of industry cluster partnerships.

''(3) PERFORMANCE MEASURES.—The Secretary shall issue a range of performance measures, with quantifiable benchmarks, and methodologies that eligible entities may use to evaluate the effectiveness of each type of activity in making progress toward the strategic objectives described in subsection (d)(2)(D). Such measures shall consider the benefits of the industry or sector partnership and its activities for workers, firms, industries, and communities.

''(4) DISSEMINATION OF INFORMATION.—The Secretary shall—

''(A) coordinate the annual review of each eligible entity receiving a grant under this section and produce an overview report that, at a minimum, includes—

''(i) the critical learning of each industry or sector partnership, such as—

''(I) the training that was most effective;

''(II) the human resource challenges that were most common;

''(III) how technology is changing the targeted industry cluster; and

''(IV) the changes that may impact the targeted industry cluster over the next 5 years; and

''(ii) a description of what eligible entities serving similar targeted industry clusters consider exemplary practices, such as—

''(I) how to work effectively with postsecondary educational institutions;

''(II) the use of internships;

''(III) coordinating with apprenticeships and cooperative education programs;

''(IV) how to work effectively with schools providing vocational education;

''(V) how to work effectively with adult populations, including—

''(aa) dislocated workers;

''(bb) women in nontraditional occupations; and

''(cc) individuals with barriers to employment, such as job seekers who—

''(AA) are economically disadvantaged;

''(BB) have limited English proficiency;

''(CC) require remedial education;

''(DD) are older workers;

''(EE) are individuals who have completed a sentence for a criminal offense; and

''(FF) have other barriers to employment;

''(VI) employer practices that are most effective;

''(VII) the types of training that are most effective; and

''(VIII) other areas where industry or sector partnerships can assist each other;

''(B) make resource materials, including all reports published and all data collected under this section, available on the Internet; and

''(C) conduct conferences and seminars to—

''(i) disseminate information on best practices developed by eligible entities receiving a grant under this section; and

''(ii) provide information to the communities of eligible entities.

''(5) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary shall transmit a report to Congress on the industry or sector partnership

grant program established by this section. The report shall include a description of—

''(A) the eligible entities receiving funding;

''(B) the activities carried out by the eligible entities;

''(C) how the eligible entities were selected to receive funding under this section; and

''(D) an assessment of the results achieved by the grant program including findings from the annual reviews described in paragraph (4)(A).

''(i) AUTHORIZATION OF APPROPRIATIONS.—

''(1) IN GENERAL.—There are authorized to be appropriated to carry out this section such sums as may be necessary for fiscal year 2009 and for each succeeding fiscal year.

''(2) AVAILABILITY.—Amounts appropriated pursuant to the authorization of appropriations under paragraph (1) for the fiscal year shall remain available until the end of the second fiscal year following the fiscal year in which such amounts were first appropriated.''.

SEC. 3. FEDERAL AGENCY COORDINATION.

(a) INTERAGENCY COOPERATION.—The head of each Federal department or agency whose funding, regulations, or other policies impact workers shall cooperate with the Secretary of Labor to—

(1) maintain up-to-date information on jobs, wages, benefits, skills, and careers of workers impacted by the actions of such agency or department;

(2) develop and implement policies that would improve the jobs and careers of workers impacted by the actions of such agency or department; and

(3) report the department or agency's job creation and economic development strategies to the Secretary.

(b) ALIGNMENT.—Notwithstanding any other provision of law, the Secretary and the heads of other Federal departments or agencies shall work together to align existing education and training programs with the demonstrated needs of industry or sector partnerships, as defined in section 174A(b) of the Workforce Investment Act. These collaborative efforts shall include the following:

(1) DEPARTMENT OF COMMERCE.—The Secretary of Commerce shall advise the Secretary of Labor of the Department of Commerce's workforce and economic development strategies, programs, and initiatives.

(2) JUSTICE DEPARTMENT.—The Attorney General shall—

(A) align federally funded programs offering training for inmates with industry clusters (as defined in section 174A(b) of the Workforce Investment Act) and high-priority occupations, and annually review these training programs to assure that the training programs prepare individuals for high-priority occupations; and

(B) align federally funded reentry programs to take advantage of information and career opportunities provided by industry and sector partnerships.

(3) DEPARTMENT OF EDUCATION.—The Secretary of Education shall—

(A) develop and support career ladders for high-priority occupations critical to targeted industry clusters served by a grant under section 174A of the Workforce Investment Act;

(B) develop and support innovative programs to address literacy (including English as a second language) and numeracy shortcomings, especially in those occupations critical to such targeted industry clusters;

(C) develop and support programs and strategies to reduce barriers to adult education;

(D) develop and support career education initiatives in middle and high schools; and

(E) support initiatives to develop industry-recognized credentials and new credit-bearing programs in public and private postsecondary educational institutions, especially in occupations critical to such targeted industry clusters.

(4) DEPARTMENT OF HEALTH AND HUMAN SERVICES.—The Secretary of Health and Human Services shall—

(A) develop and support innovative programs that connect qualified individuals receiving assistance under the State temporary assistance for needy families program funded under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) with employment opportunities in the targeted industry clusters served by a grant under section 174A of the Workforce Investment Act;

(B) develop and support strategies to prepare individuals receiving assistance under the State temporary assistance for needy families programs funded under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) for success in postsecondary education and training programs; and

(C) develop and support career education initiatives that provide such individuals with information to guide the clients' education and training plans.

Ms. SNOWE. Mr. President, I rise today, with Senator SHERROD BROWN, to introduce the Selecting Employment Clusters to Organize Regional Success, SECTORS, Act. This legislation would amend the Workforce Investment Act of 1998 and establish a new industry or sector partnership grant program administered by the Department of Labor.

As Co-Chair of the bipartisan Senate Task Force on Manufacturing, one of my key goals is to ensure that manufacturers are able to find a capable workforce. Unfortunately, many manufacturers across the country have raised significant concerns about whether the next generation of workers is being trained to meet the needs of an increasingly high-tech workplace. It is critical that we ensure that our Nation has a sufficient workforce to meet the needs of the U.S. manufacturing sector.

This legislation provides grants to help industry clusters—which are interrelated group of businesses, service providers, and associated institutions—establish and expand industry partnerships. Existing partnerships, which are similar to those created by this bill, have long been recognized as key strategic elements within some of the most successful economic development initiatives throughout the country. Unfortunately, current Federal policy does not provide sufficient support for these critical ventures.

In my home State of Maine, the number of manufacturing jobs has dropped dramatically over the past decade. Between 1998 and 2008, manufacturing employment in Maine went from 81,000 to 59,000, a 27 percent decrease! A key reason manufacturing job losses have dramatically affected Maine is that the average manufacturing salary is $10,000 more than the average annual State wage. The statistics for the whole of New England are no better. From January 1998 through December 2006, the region witnessed a decline of roughly 25 percent of its manufacturing workforce.

For those who have lost manufacturing jobs, it is vital to help improve their skills, preparing them for available U.S. jobs. This legislation provides a crucial link between establishing worker training programs and fostering new employment opportunities for those who have been affected by the manufacturing industry's decline. By promoting this innovative partnership we will take a crucial step toward rejuvenating our economy.

Groups, such as the National Governors Association, the Aspen Institute, and the National Network of Sector Partners have promoted and documented the success of sector partnerships. Throughout the country, sector partnerships are being used to promote the long-term competitiveness of industries and advancing employment opportunities. For example, the State of Maine has recently created the North Star Alliance Initiative. The alliance has brought together Maine's boat builders, the University of Maine's Advanced Engineered Wood Composites Centers, Maine's marine and composite trade association, economic development groups, and investment organizations for the purpose of advancing workforce training.

Out Nation's capacity to innovate is a key reason why our economy continues to grow and remains the envy of the world. Ideas by innovative Americans in the private and public sector have paid enormous dividends, improving the lives of millions throughout the world. We must continue to encourage all avenues for advancing this vital sector if America is to compete at the forefront of innovation.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 632—CALLING ON THE GOVERNMENTS OF THE PEOPLE'S REPUBLIC OF CHINA AND THE INTERNATIONAL COMMUNITY TO USE THE UPCOMING OLYMPIC GAMES AS AN OPPORTUNITY TO PUSH FOR THE PARTIES TO THE CONFLICTS IN SUDAN, CHAD, AND THE CENTRAL AFRICAN REPUBLIC TO CEASE HOSTILITIES AND REVIVE EFFORTS TOWARD A PEACEFUL RESOLUTION OF THEIR NATIONAL AND REGIONAL CONFLICTS

Mr. FEINGOLD (for himself, Mr. COLEMAN, Mr. WHITEHOUSE, Mr. MENENDEZ, Mr. LIEBERMAN, Ms. KLOBUCHAR, Mr. CARDIN, Ms. LANDRIEU, Ms. SNOWE, Mr. KERRY, Mr. BROWNBACK, and Mr. JOHNSON) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 632

Whereas, since the conflict in Darfur, Sudan, began in 2003, hundreds of thousands of people across the region have been murdered, tortured, and raped, with more than 2,500,000 people driven from their homes as a result of ongoing violence, and all parties to the conflict continue to attack civilians throughout the region, while impeding access of humanitarian workers;

Whereas armed groups move freely among Sudan, Chad, and the Central African Republic, committing murder, banditry, forced recruitment, mass displacement, gender-based violence, and other crimes undermining regional security and exacerbating a cross-border humanitarian crisis;

Whereas, on July 31, 2007, the United Nations Security Council passed Security Council resolution 1769 (2007), authorizing a joint United Nations-African Union Mission in Darfur (UNAMID) to implement the Darfur Peace Agreement and protect civilians;

Whereas only one-third of UNAMID peacekeepers have been deployed to the region and those deployed remain under-equipped to protect civilians and are the target of deliberate attacks by armed militias;

Whereas a new joint African Union-United Nations chief mediator, Burkina Faso's foreign minister, Djibril Bassole, has been appointed to reignite stalled peace talks between the parties in Darfur and help establish a cessation of hostilities;

Whereas fighting erupted in Sudan's oil-rich Abyei region on May 13 and 21, 2008, leaving 18 civilians dead and giving rise to concerns about a breakdown of the Comprehensive Peace Agreement (CPA), which could ruin progress made over the last three years toward lasting peace in southern Sudan and ensnare the wider region into overlapping conflicts;

Whereas the Chief Prosecutor of the International Criminal Court charged the President of Sudan on July 14, 2008, with orchestrating genocide and crimes against humanity in Darfur, elevating hopes for accountability but also fears of retaliation against peacekeepers, humanitarian workers, and civilians;

Whereas the Government of the People's Republic of China has long-standing economic and military ties with Sudan, giving it significant influence on the Government of Sudan;

Whereas, from August 8 to August 24, 2008, China will host the Olympic Summer Games, the most venerated and prestigious international sporting event;

Whereas there is a tradition of an Olympic Truce, originating in ancient Greece, to ensure the safety of athletes traveling to the ancient Olympic Games, the importance of which was reaffirmed in 2003 by the United Nations;

Whereas the Olympic Truce traditionally begins one week before the Olympic Games and extends one week after the end of the Paralympic Games;

Whereas, on October 16, 2007, the United Nations General Assembly passed resolution G/A 62/L.2, ''Building a better and more peaceful world through sport,'' which urges Member States to observe, within the framework of the Charter of the United Nations, the Olympic Truce, individually and collectively, during the Games of the XXIX Olympiad in Beijing, and to cooperate with the International Olympic Committee in its efforts to use sport as an instrument to promote peace, dialogue, and reconciliation in areas of conflict during and beyond the Olympic Games period; and

Whereas the situation in Sudan and the neighboring region remains highly volatile as the Olympics approach: Now, therefore, be it

Resolved, That the Senate—

(1) expresses its continued support and sympathy for the hundreds of thousands of civilians of Sudan, Chad, and the Central African Republic who have been affected by the ongoing violence and regional instability;

(2) recognizes the unique opportunity presented by the Olympics and calls on the United Nations, the African Union, and other international leaders to use it to promote peace, dialogue, and reconciliation in areas of conflict and commends those Olympic and Paralympic athletes seeking to advance that cause;

(3) recognizes the close relationship between the Governments of People's Republic of China and Sudan, and strongly urges the Government of the People's Republic of China to use its full influence to press the Government of Sudan to commit to a cessation of hostilities, allow the full deployment of UNAMID peacekeeping forces, and engage in good faith in efforts to rejuvenate peace talks;

(4) calls upon the Government of Sudan and other armed actors in the region to immediately adopt a cessation of hostilities, during which they allow unfettered humanitarian access and the full deployment of UNAMID peacekeeping forces as well as engage in good faith efforts to rejuvenate peace talks;

(5) welcomes the efforts of the new joint African Union-United Nations mediator, Mr. Djibril Bassole, to revive a comprehensive peace process with all stakeholders to end the violence, demobilize militias, and promote voluntary return of internally displaced persons and refugees;

(6) urges the President and the international community to ensure that mediation efforts are supported and backed by credible leverage through targeted pressure and an enforced arms embargo;

(7) calls upon the United Nations and African Union to use the opportunity presented by a cessation of hostilities to fully deploy and equip UNAMID as well as strengthen the United Nations Mission in Sudan (UNMIS) to better monitor the Abyei region; and

(8) encourages the United Nations Secretary-General and other international leaders to publicly promote the principles reflected in the Olympic Truce among all the warring parties in Sudan, Chad, the Central African Republic, and other areas of conflict around the world.

SENATE RESOLUTION 633—EXPRESSING THE SENSE OF THE SENATE ON THE DETERIORATION OF RESPECT FOR PRIVACY AND HUMAN RIGHTS IN THE PEOPLE'S REPUBLIC OF CHINA BEFORE THE 2008 OLYMPIC GAMES IN BEIJING

Mr. BROWNBACK (for himself and Mr. BUNNING) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 633

Whereas, on July 13, 2001, the International Olympic Committee announced the awarding of the 2008 Olympic Games to Beijing, People's Republic of China;

Whereas, prior to that announcement, the bidding documents submitted by the Government of the People's Republic of China to the International Olympic Committee stated, ''We are confident that the Games coming to China not only promotes our economy, but also enhances . . . human rights.'';

Whereas those documents also stated, ''There will be no restrictions on journalists in reporting on the Olympic Games. . . . There will be no restriction concerning the use of media material produced in China and intended principally for broadcast outside.'';

Whereas Beijing's Action Plan for the Olympics states, ''In the preparation for the Games, we will be open in every aspect to the rest of the country and the whole world.'';

Whereas, on April 23, 2002, after the Olympic Games had been awarded to Beijing, the President of the International Olympic Committee, Jacques Rogge, said, ''We are convinced that the Olympic Games will improve the human rights record [in China].'';

Whereas, on March 13, 2008, the United States Department of State released the annual Country Reports on Human Rights Practices;

Whereas the report on the People's Republic of China states that in 2007 the Government of the People's Republic of China ''tightened restrictions on freedom of speech and the press, particularly in anticipation of and during sensitive events, including increased efforts to control and censor the Internet'';

Whereas that report also states that in 2007 authorities of the People's Republic of China ''monitored telephone conversations, facsimile transmissions, e-mail, text messaging, and Internet communications'';

Whereas, on July 29, 2008, Amnesty International released a report entitled ''People's Republic of China: The Olympics Countdown—Broken Promises'', which finds, regarding the promises of the Government of the People's Republic of China to the International Olympic Committee in 2001, ''[T]here has been no progress towards fulfilling these promises, only continued deterioration. . . . In fact, the crackdown on human rights defenders, journalists and lawyers has intensified because Beijing is hosting the Olympics.'';

Whereas, that report also states, ''Chinese journalists continue to operate in a climate of official censorship and control, with many still languishing in jail for reporting on issues deemed politically sensitive. Internet controls have been increasingly tightened as the Olympics approach with control, regulation and censorship extending to various categories of internet users, including Internet Service Providers, bloggers and website owners. Numerous websites have been closed down for providing information deemed sensitive by the authorities. Internet users who post such information risk detention, prosecution and imprisonment.'';

Whereas, in April 2008, the Government of the People's Republic of China issued an order requiring hotels to allow the Public Security Bureau to install hardware devices and new software programs on the hotel networks that are designed to send sensitive information about users, including foreign visitors and journalists, to the Public Security Bureau;

Whereas, on July 29, 2008, Agence France-Presse reported that ''China will censor the Internet used by foreign media during the Olympics . . . reversing a pledge to offer complete media freedom at the games'', citing confirmation by Sun Weide, spokesman for the Beijing Olympic Organizing Committee;

Whereas the Olympic Charter states that the mission of the International Olympic Committee is ''to promote a positive legacy from the Olympic Games to the host cities and host countries'';

Whereas, on December 25, 2007, the Vice-President of the International Olympic Committee, Thomas Bach, stated, ''The Games can act as a catalyst and contribute to the opening of a society.''; and

Whereas, on March 23, 2008, the President of the International Olympic Committee, Jacques Rogge, stated that the Olympic Games are a ''force for good'': Now, therefore, be it

Resolved, That the Senate—

(1) calls upon the Government of the People's Republic of China—

(A) to rescind the order requiring hotels to allow the Public Security Bureau to install hardware and software on the hotel networks; and

(B) to refrain from targeting, on the basis of information collected from Internet monitoring, any individual who visits websites related to politics or human rights or who expresses opinions related to politics or human rights in electronic communication;

(2) expresses grave concern regarding the deterioration of respect for human rights in the People's Republic of China leading up to the Beijing Olympics;

(3) notes that the behavior of the Government of the People's Republic of China violates several international conventions to which the country is a signatory, violates the Government's commitments to the International Olympic Committee, and is contrary to longstanding Olympic tradition and spirit; and

(4) remains concerned for the safety and privacy of international visitors and journalists traveling to the People's Republic of China for the Beijing Olympics, in particular visitors and journalists involved in documenting human rights abuses and promoting human rights improvements.

SENATE RESOLUTION 634—RECOGNIZING JULY 30, 2008, AS THE 40TH ANNIVERSARY OF THE ENACTMENT OF THE RESOLUTION ESTABLISHING THE SENATE SELECT COMMITTEE ON NUTRITON AND HUMAN NEEDS

Mr. CASEY (for himself, Mr. CHAMBLISS, Mr. HARKIN, Mr. KERRY, Mr. SANDERS, Mrs. LINCOLN, Ms. STABENOW, Mr. ROBERTS, Mrs. DOLE, Mr. PRYOR, Mr. SMITH, Mr. JOHNSON, Mrs. CLINTON, and Mr. FEINGOLD) submitted the following resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

S. RES. 634

Whereas on April 26, 1968, after viewing the CBS Emmy-award winning documentary ''Hunger in America,'' Senator George McGovern introduced a resolution to establish a Senate Select Committee on Nutrition and Human Needs;

Whereas the resolution establishing the Select Committee on Nutrition and Human Needs was enacted on July 30, 1968;

Whereas Senator George McGovern served as the Chairman of the Select Committee on Nutrition and Human Needs from 1968 to 1977;

Whereas July 30, 2008, marks the 40th anniversary of the enactment of the resolution establishing the Select Committee on Nutrition and Human Needs, which later became the foundation of the current Subcommittee on Nutrition and Food Assistance, Sustainable and Organic Agriculture, and General Legislation Jurisdiction of the Senate Committee on Agriculture, Nutrition, and Forestry;

Whereas Senator George McGovern was committed to exposing the failure of Federal food assistance programs to reach citizens lacking in adequate quantities and quality of food;

Whereas Senators George McGovern and Robert Dole worked tirelessly in their respective roles on the Select Committee on Nutrition and Human Needs to develop a bipartisan Federal response to hunger;

Whereas the Select Committee on Nutrition and Human Needs played a key role in educating Congress, the Federal government, and the Nation at large about the magnitude of hunger in the United States;

Whereas the work of the Select Committee on Nutrition and Human Needs was vital to reforming the Federal food stamp program, culminating in the passage of the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.), which made the program more efficient and more accessible to those most in need by finally eliminating the requirement that Americans pay for a portion of their food stamps;

Whereas the work of the Select Committee on Nutrition and Human Needs was essential to expanding the school lunch program established under the National School Lunch Act (42 U.S.C. 1751 et seq.) and permanently establishing the school breakfast program under section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773), the child and adult care food program under section 17 of the National School Lunch Act (42 U.S.C. 1766), and the summer food service program for children under section 13 of that Act (42 U.S.C. 1761);

Whereas the work of the Select Committee on Nutrition and Human Needs was instrumental in the establishment of the special supplemental nutrition program for women, infants, and children established by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) (WIC);

Whereas the Senate Committee on Agriculture, Nutrition, and Forestry remains committed to continuing the important work begun by Senators George McGovern and Robert Dole of providing a Federal response to hunger;

Whereas the Senate Committee on Agriculture, Nutrition, and Forestry provided a record-level amount of nutrition funding in the Food, Conservation, and Energy Act of 2008 (Public Law 110–246; 122 Stat. 1651) to reform and strengthen Federal nutrition assistance programs;

Whereas, through the Food, Conservation, and Energy Act of 2008 (Public Law 110–246; 122 Stat. 1651), the Senate Committee on Agriculture, Nutrition, and Forestry made key improvements to the food stamp program, including—

(1) increasing the food purchasing ability of low-income households by accounting for food cost inflation;

(2) increasing the minimum benefit;

(3) encouraging retirement and education savings; and

(4) allowing families to account for child care costs in calculating food assistance;

Whereas, through the Food, Conservation, and Energy Act of 2008 (Public Law 110–246; 122 Stat. 1651), the Senate Committee on Agriculture, Nutrition, and Forestry helped to strengthen the domestic food assistance safety net by providing significant funding to increase commodity purchases for local area food banks;

Whereas, in 2008, more than 28,000,000 people in the United States participate in the food stamp program;

Whereas, in 2008, more than 17,500,000 low-income children receive free or reduced-price meals through the national school lunch program;

Whereas despite Federal food assistance programs, 35,500,000 people in the United States, including 12,600,000 children, continue to live in households considered to be food insecure;

Whereas children who live in households lacking access to sufficient food are more likely to be in poorer physical health than children from food secure households; and

Whereas children are particularly vulnerable to the effects of food insecurity because undernutrition can have adverse impacts on emotional health, behavior, school performance, and cognitive development: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes July 30, 2008, as the 40th anniversary of the enactment of the resolution establishing the Senate Select Committee on Nutrition and Human Needs;

(2) recognizes the substantial contributions the Select Committee on Nutrition and Human Needs made in ensuring that effective and efficient Federal food assistance programs were accessible to those most in need;

(3) recognizes that hunger continues to be an issue plaguing the United States; and

(4) supports the continued efforts of Federal, State, and local governments and private non-profit organizations to eradicate hunger in the United States.

SENATE RESOLUTION 635—MAKING MINORITY PARTY APPOINTMENTS FOR THE 110TH CONGRESS

Mr. MCCONNELL submitted the following resolution; which was considered and agreed to:

S. RES. 635

Resolved, That the following be the minority membership on the following committee for the remainder of the 110th Congress, or until their successors are appointed:

Committee on Commerce, Science and Transportation: Mrs. Hutchison, Mr. Stevens, Mr. McCain, Ms. Snowe, Mr. Smith, Mr. Ensign, Mr. Sununu, Mr. DeMint, Mr. Vitter, Mr. Thune, Mr. Wicker.

AMENDMENTS SUBMITTED AND PROPOSED

SA 5254. Mr. GRASSLEY submitted an amendment intended to be proposed by him to the bill S. 3322, to provide tax relief for the victims of severe storms, tornados, and flooding in the Midwest, and for other purposes; which was referred to the Committee on Finance.

SA 5255. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 3335, to amend the Internal Revenue Code of 1986 to extend certain expiring provisions, and for other purposes; which was ordered to lie on the table.

SA 5256. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 3186, to provide funding for the Low-Income Home Energy Assistance Program; which was ordered to lie on the table.

SA 5257. Mr. PRYOR (for Mr. LEAHY) proposed an amendment to the bill H.R. 5938, to amend title 18, United States Code, to provide secret service protection to former Vice Presidents, and for other purposes.

TEXT OF AMENDMENTS

SA 5254. Mr. GRASSLEY submitted an amendment intended to be proposed by him to the bill S. 3322, to provide tax relief for the victims of severe storms, tornados, and flooding in the Midwest, and for other purposes; which was referred to the Committee on Finance; as follows:

On page 15, line 11, insert ''or by any instrumentality of the State'' after ''located''.

SA 5255. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 3335, to amend the Internal Revenue Code of 1986 to extend certain expiring provisions, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ___. OPEN FUEL STANDARDS.

(a) SHORT TITLE.—This section may be cited as the ''Open Fuel Standard Act of 2008'' or the ''OFS Act''.

(b) FINDINGS.—Congress makes the following findings:

(1) The status of oil as a strategic commodity, which derives from its domination of the transportation sector, presents a clear and present danger to the United States.

(2) In a prior era, when salt was a strategic commodity, salt mines conferred national power and wars were fought over the control of such mines.

(3) Technology, in the form of electricity and refrigeration, decisively ended salt's monopoly of meat preservation and greatly reduced its strategic importance.

(4) Fuel competition and consumer choice would similarly serve to end oil's monopoly in the transportation sector and strip oil of its strategic status.

(5) The current closed fuel market has allowed a cartel of petroleum exporting countries to inflate fuel prices, effectively imposing a harmful tax on the economy of the United States of nearly $500,000,000,000 per year.

(6) Much of the inflated petroleum revenues the oil cartel earns at the expense of the people of the United States are used for purposes antithetical to the interests of the United States and its allies.

(7) Alcohol fuels, including ethanol and methanol, could potentially provide significant supplies of additional fuels that could be produced in the United States and in many other countries in the Western Hemisphere that are friendly to the United States.

(8) Alcohol fuels can only play a major role in securing the energy independence of the United States if a substantial portion of vehicles in the United States are capable of operating on such fuels.

(9) It is not in the best interest of United States consumers or the United States Government to be constrained to depend solely upon petroleum resources for vehicle fuels if alcohol fuels are potentially available.

(10) Existing technology, in the form of flexible fuel vehicles, allows internal combustion engine cars and trucks to be produced at little or no additional cost, which are capable of operating on conventional gasoline, alcohol fuels, or any combination of such fuels, as availability or cost advantage dictates, providing a platform on which fuels can compete.

(11) The necessary distribution system for such alcohol fuels will not be developed in the United States until a substantial fraction of the vehicles in the United States are capable of operating on such fuels.

(12) The establishment of such a vehicle fleet and distribution system would provide a large market that would mobilize private resources to substantially advance the technology and expand the production of alcohol fuels in the United States and abroad.

(13) The United States has an urgent national security interest to develop alcohol fuels technology, production, and distribution systems as rapidly as possible.

(14) New cars sold in the United States that are equipped with an internal combustion engine should allow for fuel competition by being flexible fuel vehicles, and new diesel cars should be capable of operating on biodiesel.

(15) Such an open fuel standard would help to protect the United States economy from high and volatile oil prices and from the threats caused by global instability, terrorism, and natural disaster.

(c) OPEN FUEL STANDARD FOR TRANSPORTATION.—

(1) IN GENERAL.—Chapter 329 of title 49, United States Code, is amended by adding at the end the following:

''§ 32920. Open fuel standard for transportation

''(a) DEFINITIONS.—In this section:

''(1) E85.—The term 'E85' means a fuel mixture containing 85 percent ethanol and 15 percent gasoline by volume.

''(2) FLEXIBLE FUEL AUTOMOBILE.—The term 'flexible fuel automobile' means an automobile that has been warranted by its manufacturer to operate on gasoline, E85, and M85.

''(3) FUEL CHOICE-ENABLING AUTOMOBILE.—The term 'fuel choice-enabling automobile' means—

''(A) a flexible fuel automobile; or

''(B) an automobile that has been warranted by its manufacturer to operate on biodiesel.

''(4) LIGHT-DUTY AUTOMOBILE.—The term 'light-duty automobile' means—

''(A) a passenger automobile; or

''(B) a non-passenger automobile.

''(5) LIGHT-DUTY AUTOMOBILE MANUFACTURER'S ANNUAL INVENTORY.—The term 'light-duty automobile manufacturer's annual inventory' means the number of light-duty automobiles that a manufacturer, during a given calendar year, manufactures in the United States or imports from outside of the United States for sale in the United States.

''(6) M85.—The term 'M85' means a fuel mixture containing 85 percent methanol and 15 percent gasoline by volume.

''(7) SECRETARY.—The term 'Secretary' means the Secretary of Transportation.

''(b) OPEN FUEL STANDARD FOR TRANSPORTATION.—

''(1) IN GENERAL.—Except as provided in paragraph (2), each light-duty automobile manufacturer's annual inventory shall be comprised of not less than 50 percent fuel choice-enabling automobiles in 2012.

''(2) TEMPORARY EXEMPTION FROM REQUIREMENTS.—

''(A) APPLICATION.—A manufacturer may request an exemption from the requirement described in paragraph (1) by submitting an application to the Secretary, at such time, in such manner, and containing such information as the Secretary may require by regulation. Each such application shall specify the models, lines, and types of automobiles affected.

''(B) EVALUATION.—After evaluating an application received from a manufacturer, the Secretary may at any time, under such terms and conditions, and to such extent as the Secretary considers appropriate, temporarily exempt, or renew the exemption of, a light-duty automobile from the requirement described in paragraph (1) if the Secretary determines that unavoidable events not under the control of the manufacturer prevent the manufacturer of such automobile from meeting its required production volume of fuel choice-enabling automobiles due to a disruption in—

''(i) the supply of any component required for compliance with the regulations; or

''(ii) the use and installation by the manufacturer of such component.

''(C) CONSOLIDATION.—The Secretary may consolidate applications received from multiple manufactures under subparagraph (A) if they are of a similar nature.

''(D) CONDITIONS.—Any exemption granted under subparagraph (B) shall be conditioned upon the manufacturer's commitment to recall the exempted automobiles for installation of the omitted components within a reasonable time proposed by the manufacturer and approved by the Secretary after such components become available in sufficient quantities to satisfy both anticipated production and recall volume requirements.

''(E) NOTICE.—The Secretary shall publish in the Federal Register—

''(i) notice of each application received from a manufacturer;

''(ii) notice of each decision to grant or deny a temporary exemption; and

''(iii) the reasons for granting or denying such exemptions.

''(F) LABELING.—Each manufacturer that receives an exemption under this paragraph shall place a label on each exempted automobile. Such label—

''(i) shall comply with the regulations prescribed by the Secretary under paragraph (3); and

''(ii) may only be removed after recall and installation of the required components.

''(G) NOTICE OF EXEMPTION.—Each light-duty automobile delivered to dealers and first purchasers that is not a fuel choice-enabling automobile and for which the manufacturer received an exemption under this paragraph, shall be accompanied with a written notification of such exemption, which complies with the regulations prescribed by the Secretary under paragraph (3).

''(3) RULEMAKING.—Not later than 1 year after the date of enactment of this section, the Secretary shall promulgate regulations to carry out this section.''.

(2) CLERICAL AMENDMENT.—The table of sections for chapter 329 of title 49, United States Code, is amended by adding at the end the following:

''32920. Open fuel standard for transportation.''.

SA 5256. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 3186, to provide funding for the Low-Income Home Energy Assistance Program; which was ordered to lie on the table; as follows:

At the end of the bill, add the following:

SEC. 3. OPEN FUEL STANDARDS.

(a) SHORT TITLE.—This section may be cited as the ''Open Fuel Standard Act of 2008'' or the ''OFS Act''.

(b) FINDINGS.—Congress makes the following findings:

(1) The status of oil as a strategic commodity, which derives from its domination of the transportation sector, presents a clear and present danger to the United States.

(2) In a prior era, when salt was a strategic commodity, salt mines conferred national power and wars were fought over the control of such mines.

(3) Technology, in the form of electricity and refrigeration, decisively ended salt's monopoly of meat preservation and greatly reduced its strategic importance.

(4) Fuel competition and consumer choice would similarly serve to end oil's monopoly in the transportation sector and strip oil of its strategic status.

(5) The current closed fuel market has allowed a cartel of petroleum exporting countries to inflate fuel prices, effectively imposing a harmful tax on the economy of the United States of nearly $500,000,000,000 per year.

(6) Much of the inflated petroleum revenues the oil cartel earns at the expense of the people of the United States are used for purposes antithetical to the interests of the United States and its allies.

(7) Alcohol fuels, including ethanol and methanol, could potentially provide significant supplies of additional fuels that could be produced in the United States and in

many other countries in the Western Hemisphere that are friendly to the United States.

(8) Alcohol fuels can only play a major role in securing the energy independence of the United States if a substantial portion of vehicles in the United States are capable of operating on such fuels.

(9) It is not in the best interest of United States consumers or the United States Government to be constrained to depend solely upon petroleum resources for vehicle fuels if alcohol fuels are potentially available.

(10) Existing technology, in the form of flexible fuel vehicles, allows internal combustion engine cars and trucks to be produced at little or no additional cost, which are capable of operating on conventional gasoline, alcohol fuels, or any combination of such fuels, as availability or cost advantage dictates, providing a platform on which fuels can compete.

(11) The necessary distribution system for such alcohol fuels will not be developed in the United States until a substantial fraction of the vehicles in the United States are capable of operating on such fuels.

(12) The establishment of such a vehicle fleet and distribution system would provide a large market that would mobilize private resources to substantially advance the technology and expand the production of alcohol fuels in the United States and abroad.

(13) The United States has an urgent national security interest to develop alcohol fuels technology, production, and distribution systems as rapidly as possible.

(14) New cars sold in the United States that are equipped with an internal combustion engine should allow for fuel competition by being flexible fuel vehicles, and new diesel cars should be capable of operating on biodiesel.

(15) Such an open fuel standard would help to protect the United States economy from high and volatile oil prices and from the threats caused by global instability, terrorism, and natural disaster.

(c) OPEN FUEL STANDARD FOR TRANSPORTATION.—

(1) IN GENERAL.—Chapter 329 of title 49, United States Code, is amended by adding at the end the following:

"§ 32920. Open fuel standard for transportation

''(a) DEFINITIONS.—In this section:

''(1) E85.—The term 'E85' means a fuel mixture containing 85 percent ethanol and 15 percent gasoline by volume.

''(2) FLEXIBLE FUEL AUTOMOBILE.—The term 'flexible fuel automobile' means an automobile that has been warranted by its manufacturer to operate on gasoline, E85, and M85.

''(3) FUEL CHOICE-ENABLING AUTOMOBILE.—The term 'fuel choice-enabling automobile' means—

''(A) a flexible fuel automobile; or

''(B) an automobile that has been warranted by its manufacturer to operate on biodiesel.

''(4) LIGHT-DUTY AUTOMOBILE.—The term 'light-duty automobile' means—

''(A) a passenger automobile; or

''(B) a non-passenger automobile.

''(5) LIGHT-DUTY AUTOMOBILE MANUFACTURER'S ANNUAL INVENTORY.—The term 'light-duty automobile manufacturer's annual inventory' means the number of light-duty automobiles that a manufacturer, during a given calendar year, manufactures in the United States or imports from outside of the United States for sale in the United States.

''(6) M85.—The term 'M85' means a fuel mixture containing 85 percent methanol and 15 percent gasoline by volume.

''(7) SECRETARY.—The term 'Secretary' means the Secretary of Transportation.

''(b) OPEN FUEL STANDARD FOR TRANSPORTATION.—

''(1) IN GENERAL.—Except as provided in paragraph (2), each light-duty automobile manufacturer's annual inventory shall be comprised of not less than 50 percent fuel choice-enabling automobiles in 2012.

''(2) TEMPORARY EXEMPTION FROM REQUIREMENTS.—

''(A) APPLICATION.—A manufacturer may request an exemption from the requirement described in paragraph (1) by submitting an application to the Secretary, at such time, in such manner, and containing such information as the Secretary may require by regulation. Each such application shall specify the models, lines, and types of automobiles affected.

''(B) EVALUATION.—After evaluating an application received from a manufacturer, the Secretary may at any time, under such terms and conditions, and to such extent as the Secretary considers appropriate, temporarily exempt, or renew the exemption of, a light-duty automobile from the requirement described in paragraph (1) if the Secretary determines that unavoidable events not under the control of the manufacturer prevent the manufacturer of such automobile from meeting its required production volume of fuel choice-enabling automobiles due to a disruption in—

''(i) the supply of any component required for compliance with the regulations; or

''(ii) the use and installation by the manufacturer of such component.

''(C) CONSOLIDATION.—The Secretary may consolidate applications received from multiple manufactures under subparagraph (A) if they are of a similar nature.

''(D) CONDITIONS.—Any exemption granted under subparagraph (B) shall be conditioned upon the manufacturer's commitment to recall the exempted automobiles for installation of the omitted components within a reasonable time proposed by the manufacturer and approved by the Secretary after such components become available in sufficient quantities to satisfy both anticipated production and recall volume requirements.

''(E) NOTICE.—The Secretary shall publish in the Federal Register—

''(i) notice of each application received from a manufacturer;

''(ii) notice of each decision to grant or deny a temporary exemption; and

''(iii) the reasons for granting or denying such exemptions.

''(F) LABELING.—Each manufacturer that receives an exemption under this paragraph shall place a label on each exempted automobile. Such label—

''(i) shall comply with the regulations prescribed by the Secretary under paragraph (3); and

''(ii) may only be removed after recall and installation of the required components.

''(G) NOTICE OF EXEMPTION.—Each light-duty automobile delivered to dealers and first purchasers that is not a fuel choice-enabling automobile and for which the manufacturer received an exemption under this paragraph, shall be accompanied with a written notification of such exemption, which complies with the regulations prescribed by the Secretary under paragraph (3).

''(3) RULEMAKING.—Not later than 1 year after the date of enactment of this section, the Secretary shall promulgate regulations to carry out this section.''.

(2) CLERICAL AMENDMENT.—The table of sections for chapter 329 of title 49, United States Code, is amended by adding at the end the following:

''32920. Open fuel standard for transportation.''.

SA 5257. Mr. PRYOR (for Mr. LEAHY) proposed an amendment to the bill H.R. 5938, to amend title 18, United States Code, to provide secret service protection to former Vice Presidents, and for other purposes; as follows:

On page 2, strike lines 1 through 5, and insert the following:

TITLE I—FORMER VICE PRESIDENT PROTECTION ACT

SEC. 101. SHORT TITLE.

This title may be cited as the ''Former Vice President Protection Act of 2008''.

SEC. 102. SECRET SERVICE PROTECTION FOR FORMER VICE PRESIDENTS AND THEIR FAMILIES.

On page 3, strike line 1 and insert the following:

SEC. 103. EFFECTIVE DATE.

On page 3, after line 4, insert the following:

TITLE II—IDENTITY THEFT ENFORCEMENT AND RESTITUTION ACT

SEC. 201. SHORT TITLE.

This title may be cited as the ''Identity Theft Enforcement and Restitution Act of 2008''.

SEC. 202. CRIMINAL RESTITUTION.

Section 3663(b) of title 18, United States Code, is amended—

(1) in paragraph (4), by striking ''; and'' and inserting a semicolon;

(2) in paragraph (5), by striking the period at the end and inserting ''; and''; and

(3) by adding at the end the following:

''(6) in the case of an offense under sections 1028(a)(7) or 1028A(a) of this title, pay an amount equal to the value of the time reasonably spent by the victim in an attempt to remediate the intended or actual harm incurred by the victim from the offense.''.

SEC. 203. ENSURING JURISDICTION OVER THE THEFT OF SENSITIVE IDENTITY INFORMATION.

Section 1030(a)(2)(C) of title 18, United States Code, is amended by striking ''if the conduct involved an interstate or foreign communication''.

SEC. 204. MALICIOUS SPYWARE, HACKING AND KEYLOGGERS.

(a) IN GENERAL.—Section 1030 of title 18, United States Code, is amended—

(1) in subsection (a)(5)—

(A) by striking subparagraph (B); and

(B) in subparagraph (A)—

(i) by striking ''(A)(i) knowingly'' and inserting ''(A) knowingly'';

(ii) by redesignating clauses (ii) and (iii) as subparagraphs (B) and (C), respectively; and

(iii) in subparagraph (C), as so redesignated—

(I) by inserting ''and loss'' after ''damage''; and

(II) by striking ''; and'' and inserting a period;

(2) in subsection (c)—

(A) in paragraph (2)(A), by striking ''(a)(5)(A)(iii),'';

(B) in paragraph (3)(B), by striking ''(a)(5)(A)(iii),'';

(C) by amending paragraph (4) to read as follows:

''(4)(A) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 5 years, or both, in the case of—

''(i) an offense under subsection (a)(5)(B), which does not occur after a conviction for another offense under this section, if the offense caused (or, in the case of an attempted offense, would, if completed, have caused)—

''(I) loss to 1 or more persons during any 1-year period (and, for purposes of an investigation, prosecution, or other proceeding brought by the United States only, loss resulting from a related course of conduct affecting 1 or more other protected computers) aggregating at least $5,000 in value;

''(II) the modification or impairment, or potential modification or impairment, of the medical examination, diagnosis, treatment, or care of 1 or more individuals;

''(III) physical injury to any person;

''(IV) a threat to public health or safety;

''(V) damage affecting a computer used by or for an entity of the United States Government in furtherance of the administration of justice, national defense, or national security; or

''(VI) damage affecting 10 or more protected computers during any 1-year period; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(B) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 10 years, or both, in the case of—

''(i) an offense under subsection (a)(5)(A), which does not occur after a conviction for another offense under this section, if the offense caused (or, in the case of an attempted offense, would, if completed, have caused) a harm provided in subclauses (I) through (VI) of subparagraph (A)(i); or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(C) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 20 years, or both, in the case of—

''(i) an offense or an attempt to commit an offense under subparagraphs (A) or (B) of subsection (a)(5) that occurs after a conviction for another offense under this section; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(D) a fine under this title, imprisonment for not more than 10 years, or both, in the case of—

''(i) an offense or an attempt to commit an offense under subsection (a)(5)(C) that occurs after a conviction for another offense under this section; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(E) if the offender attempts to cause or knowingly or recklessly causes serious bodily injury from conduct in violation of subsection (a)(5)(A), a fine under this title, imprisonment for not more than 20 years, or both;

''(F) if the offender attempts to cause or knowingly or recklessly causes death from conduct in violation of subsection (a)(5)(A), a fine under this title, imprisonment for any term of years or for life, or both; or

''(G) a fine under this title, imprisonment for not more than 1 year, or both, for—

''(i) any other offense under subsection (a)(5); or

''(ii) an attempt to commit an offense punishable under this subparagraph.''; and

(D) by striking paragraph (5); and

(3) in subsection (g)—

(A) in the second sentence, by striking ''in clauses (i), (ii), (iii), (iv), or (v) of subsection (a)(5)(B)'' and inserting ''in subclauses (I), (II), (III), (IV), or (V) of subsection (c)(4)(A)(i)''; and

(B) in the third sentence, by striking ''subsection (a)(5)(B)(i)'' and inserting ''subsection (c)(4)(A)(i)(I)''.

(b) CONFORMING CHANGES.—Section 2332b(g)(5)(B)(i) of title 18, United States Code, is amended by striking ''1030(a)(5)(A)(i) resulting in damage as defined in 1030(a)(5)(B)(ii) through (v)'' and inserting ''1030(a)(5)(A) resulting in damage as defined in 1030(c)(4)(A)(i)(II) through (VI)''.

SEC. 205. CYBER-EXTORTION.

Section 1030(a)(7) of title 18, United States Code, is amended to read as follows:

''(7) with intent to extort from any person any money or other thing of value, transmits in interstate or foreign commerce any communication containing any—

''(A) threat to cause damage to a protected computer;

''(B) threat to obtain information from a protected computer without authorization or in excess of authorization or to impair the confidentiality of information obtained from a protected computer without authorization or by exceeding authorized access; or

''(C) demand or request for money or other thing of value in relation to damage to a protected computer, where such damage was caused to facilitate the extortion;''.

SEC. 206. CONSPIRACY TO COMMIT CYBERCRIMES.

Section 1030(b) of title 18, United States Code, is amended by inserting ''conspires to commit or'' after ''Whoever''.

SEC. 207. USE OF FULL INTERSTATE AND FOREIGN COMMERCE POWER FOR CRIMINAL PENALTIES.

Section 1030(e)(2)(B) of title 18, United States Code, is amended by inserting ''or affecting'' after ''which is used in''.

SEC. 208. FORFEITURE FOR SECTION 1030 VIOLATIONS.

Section 1030 of title 18, United States Code, is amended by adding at the end the following:

''(i)(1) The court, in imposing sentence on any person convicted of a violation of this section, or convicted of conspiracy to violate this section, shall order, in addition to any other sentence imposed and irrespective of any provision of State law, that such person forfeit to the United States—

''(A) such person's interest in any personal property that was used or intended to be used to commit or to facilitate the commission of such violation; and

''(B) any property, real or personal, constituting or derived from, any proceeds that such person obtained, directly or indirectly, as a result of such violation.

''(2) The criminal forfeiture of property under this subsection, any seizure and disposition thereof, and any judicial proceeding in relation thereto, shall be governed by the provisions of section 413 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 853), except subsection (d) of that section.

''(j) For purposes of subsection (i), the following shall be subject to forfeiture to the United States and no property right shall exist in them:

''(1) Any personal property used or intended to be used to commit or to facilitate the commission of any violation of this section, or a conspiracy to violate this section.

''(2) Any property, real or personal, which constitutes or is derived from proceeds traceable to any violation of this section, or a conspiracy to violate this section''.

SEC. 209. DIRECTIVE TO UNITED STATES SENTENCING COMMISSION.

(a) DIRECTIVE.—Pursuant to its authority under section 994(p) of title 28, United States Code, and in accordance with this section, the United States Sentencing Commission shall review its guidelines and policy statements applicable to persons convicted of offenses under sections 1028, 1028A, 1030, 2511, and 2701 of title 18, United States Code, and any other relevant provisions of law, in order to reflect the intent of Congress that such penalties be increased in comparison to those currently provided by such guidelines and policy statements.

(b) REQUIREMENTS.—In determining its guidelines and policy statements on the appropriate sentence for the crimes enumerated in subsection (a), the United States Sentencing Commission shall consider the extent to which the guidelines and policy statements may or may not account for the following factors in order to create an effective deterrent to computer crime and the theft or misuse of personally identifiable data:

(1) The level of sophistication and planning involved in such offense.

(2) Whether such offense was committed for purpose of commercial advantage or private financial benefit.

(3) The potential and actual loss resulting from the offense including—

(A) the value of information obtained from a protected computer, regardless of whether the owner was deprived of use of the information; and

(B) where the information obtained constitutes a trade secret or other proprietary information, the cost the victim incurred developing or compiling the information.

(4) Whether the defendant acted with intent to cause either physical or property harm in committing the offense.

(5) The extent to which the offense violated the privacy rights of individuals.

(6) The effect of the offense upon the operations of an agency of the United States Government, or of a State or local government.

(7) Whether the offense involved a computer used by the United States Government, a State, or a local government in furtherance of national defense, national security, or the administration of justice.

(8) Whether the offense was intended to, or had the effect of, significantly interfering with or disrupting a critical infrastructure.

(9) Whether the offense was intended to, or had the effect of, creating a threat to public health or safety, causing injury to any person, or causing death.

(10) Whether the defendant purposefully involved a juvenile in the commission of the offense.

(11) Whether the defendant's intent to cause damage or intent to obtain personal information should be disaggregated and considered separately from the other factors set forth in USSG 2B1.1(b)(14).

(12) Whether the term ''victim'' as used in USSG 2B1.1, should include individuals whose privacy was violated as a result of the offense in addition to individuals who suffered monetary harm as a result of the offense.

(13) Whether the defendant disclosed personal information obtained during the commission of the offense.

(c) ADDITIONAL REQUIREMENTS.—In carrying out this section, the United States Sentencing Commission shall—

(1) assure reasonable consistency with other relevant directives and with other sentencing guidelines;

(2) account for any additional aggravating or mitigating circumstances that might justify exceptions to the generally applicable sentencing ranges;

(3) make any conforming changes to the sentencing guidelines; and

(4) assure that the guidelines adequately meet the purposes of sentencing as set forth in section 3553(a)(2) of title 18, United States Code.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

AD HOC SUBCOMMITTEE ON DISASTER RECOVERY

Mr. REID. Mr. President, I ask unanimous consent that the Ad Hoc Subcommittee on Disaster Recovery of the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 12 p.m. to conduct a hearing entitled ''Planning for Post-Catastrophe Housing Needs: Has FEMA Developed an Effective Strategy for Housing Large Numbers of Citizens Displaced by Disaster?''

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 10 a.m., in room 253 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 3:15 p.m., in room 406 of the Dirksen Senate Office Building to hold a hearing entitled ''Hearing on the Nomination of Thomas J. Madison, Jr. to be Administrator of the Federal Highway Administration for the Department of Transportation.''

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 10:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HOMELAND SECURITY AND GOVERNMENTAL AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Senate Committee on the Judiciary be authorized to meet during the session of the Senate, conduct a hearing entitled ''Politicizing Hiring at the Department of Justice'' on Wednesday, July 30, 2008, at 10, in room SD–226 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Senate Committee on the Judiciary be authorized to meet during the session of the Senate, to conduct a hearing entitled ''S.1. Res. 45, A Resolution Consenting To and Approving the Great Lakes-St. Lawrence River Basin Water Resources Compact'' on Wednesday, July 30, 2008, at 1 p.m. in room SD–226 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS AND ENTREPRENEURSHIP

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Small Business and Entrepreneurship be authorized to meet during the session of the Senate on Wednesday, July 30, 2008, beginning at 10 a.m. in room 428A of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. REID. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on July 30, 2008, at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON NATIONAL PARKS

Mr. REID. Mr. President, I ask unanimous consent that the Subcommittee on National Parks be authorized to meet during the session of the Senate in order to conduct a hearing on Wednesday, July 30, 2008, at 2:30 p.m., in room SD–366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. REID. Mr. President, I ask unanimous consent that Byron Hurlbut, Matt Padilla, and Michele Mazzocco of Senator BINGAMAN's office be granted privileges of the floor for today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CASEY. Mr. President, I ask unanimous consent a member of my staff, Caryn Long, be granted the privilege of the floor for purposes of this speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MENENDEZ. Mr. Presdient, I ask unanimous consent that Jillian Curtis from my office be granted floor privileges for the duration of today's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETERANS' COMPENSATION COST-OF-LIVING ADJUSTMENT ACT OF 2008

Mr. PRYOR. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 897, S. 2617.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 2617) to increase, effective December 1, 2008, the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Veterans' Affairs, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Veterans' Compensation Cost-of-Living Adjustment Act of 2008''.

SEC. 2. INCREASE IN RATES OF DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION.

(a) RATE ADJUSTMENT.—Effective on December 1, 2008, the Secretary of Veterans Affairs shall increase, in accordance with subsection (c), the dollar amounts in effect on November 30, 2008, for the payment of disability compensation and dependency and indemnity compensation under the provisions specified in subsection (b).

(b) AMOUNTS TO BE INCREASED.—The dollar amounts to be increased pursuant to subsection (a) are the following:

(1) WARTIME DISABILITY COMPENSATION.—Each of the dollar amounts under section 1114 of title 38, United States Code.

(2) ADDITIONAL COMPENSATION FOR DEPENDENTS.—Each of the dollar amounts under section 1115(1) of such title.

(3) CLOTHING ALLOWANCE.—The dollar amount under section 1162 of such title.

(4) DEPENDENCY AND INDEMNITY COMPENSATION TO SURVIVING SPOUSE.—Each of the dollar amounts under subsections (a) through (d) of section 1311 of such title.

(5) DEPENDENCY AND INDEMNITY COMPENSATION TO CHILDREN.—Each of the dollar amounts under sections 1313(a) and 1314 of such title.

(c) DETERMINATION OF INCREASE.—

(1) PERCENTAGE.—Except as provided in paragraph (2), each dollar amount described in subsection (b) shall be increased by the same percentage as the percentage by which benefit amounts payable under title II of the Social Security Act (42 U.S.C. 401 et seq.) are increased effective December 1, 2008, as a result of a determination under section 215(i) of such Act (42 U.S.C. 415(i)).

(2) ROUNDING.—Each dollar amount increased under paragraph (1), if not a whole dollar amount, shall be rounded to the next lower whole dollar amount.

(d) SPECIAL RULE.—The Secretary of Veterans Affairs may adjust administratively, consistent with the increases made under subsection (a), the rates of disability compensation payable to persons under section 10 of Public Law 85–857 (72 Stat. 1263) who have not received compensation under chapter 11 of title 38, United States Code.

(e) PUBLICATION OF ADJUSTED RATES.—The Secretary of Veterans Affairs shall publish in the Federal Register the amounts specified in subsection (b), as increased under that subsection, not later than the date on which the matters specified in section 215(i)(2)(D) of the

Social Security Act (42 U.S.C. 415(i)(2)(D)) are required to be published by reason of a determination made under section 215(i) of such Act during fiscal year 2009.

SEC. 3. CODIFICATION OF 2007 COST-OF-LIVING ADJUSTMENT IN RATES OF DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION.

(a) VETERANS' DISABILITY COMPENSATION.—Section 1114 of title 38, United States Code, is amended—

(1) in subsection (a), by striking ''$115'' and inserting ''$117'';

(2) in subsection (b), by striking ''$225'' and inserting ''$230'';

(3) in subsection (c), by striking ''$348'' and inserting ''$356'';

(4) in subsection (d), by striking ''$501'' and inserting ''$512'';

(5) in subsection (e), by striking ''$712'' and inserting ''$728'';

(6) in subsection (f), by striking ''$901'' and inserting ''$921'';

(7) in subsection (g), by striking ''$1,135'' and inserting ''$1,161'';

(8) in subsection (h), by striking ''$1,319'' and inserting ''$1,349'';

(9) in subsection (i), by striking ''$1,483'' and inserting ''$1,517'';

(10) in subsection (j), by striking ''$2,471'' and inserting ''$2,527'';

(11) in subsection (k)—

(A) by striking ''$89'' both places it appears and inserting ''$91''; and

(B) by striking ''$3,075'' and ''$4,313'' and inserting ''$3,145'' and ''$4,412'', respectively;

(12) in subsection (l), by striking ''$3,075'' and inserting ''$3,145'';

(13) in subsection (m), by striking ''$3,392'' and inserting ''$3,470'';

(14) in subsection (n), by striking ''$3,860'' and inserting ''$3,948'';

(15) in subsections (o) and (p), by striking ''$4,313'' each place it appears and inserting ''$4,412'';

(16) in subsection (r), by striking ''$1,851'' and ''$2,757'' and inserting ''$1,893'' and ''$2,820'', respectively; and

(17) in subsection (s), by striking ''$2,766'' and inserting ''$2,829''.

(b) ADDITIONAL COMPENSATION FOR DEPENDENTS.—Section 1115(1) of such title is amended—

(1) in subparagraph (A), by striking ''$139'' and inserting ''$142'';

(2) in subparagraph (B), by striking ''$240'' and ''$70'' and inserting ''$245'' and ''$71'', respectively;

(3) in subparagraph (C), by striking ''$94'' and ''$70'' and inserting ''$96'' and ''$71'', respectively;

(4) in subparagraph (D), by striking ''$112'' and inserting ''$114'';

(5) in subparagraph (E), by striking ''$265'' and inserting ''$271''; and

(6) in subparagraph (F), by striking ''$222'' and inserting ''$227''.

(c) CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS.—Section 1162 of such title is amended by striking ''$662'' and inserting ''$677''.

(d) DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES.—

(1) NEW LAW DIC.—Section 1311(a) of such title is amended—

(A) in paragraph (1), by striking ''$1,067'' and inserting ''$1,091''; and

(B) in paragraph (2), by striking ''$228'' and inserting ''$233''.

(2) OLD LAW DIC.—The table in paragraph (3) of such section is amended to read as follows:

''Pay grade	*Monthly rate*	*Pay grade*	*Monthly rate*
E–1	*$1,091*	*W–4*	*$1,305*
E–2	*$1,091*	*O–1*	*$1,153*
E–3	*$1,091*	*O–2*	*$1,191*
E–4	*$1,091*	*O–3*	*$1,274*
E–5	*$1,091*	*O–4*	*$1,349*
E–6	*$1,091*	*O–5*	*$1,485*
E–7	*$1,129*	*O–6*	*$1,674*
E–8	*$1,191*	*O–7*	*$1,808*
E–9	*[1] $1,242*	*O–8*	*$1,985*
W–1	*$1,153*	*O–9*	*$2,123*
W–2	*$1,198*	*O–10*	*[2] $2,328*
W–3	*$1,234*		

[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 1302 of this title, the surviving spouse's rate shall be $1,342.

[2] If the veteran served as Chairman or Vice-Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 1302 of this title, the surviving spouse's rate shall be $2,499.''

(3) ADDITIONAL DIC FOR CHILDREN OR DISABILITY.—Section 1311 of such title is amended—

(A) in subsection (b), by striking ''$265'' and inserting ''$271'';

(B) in subsection (c), by striking ''$265'' and inserting ''$271''; and

(C) in subsection (d), by striking ''$126'' and inserting ''$128''.

(e) DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.—

(1) DIC WHEN NO SURVIVING SPOUSE.—Section 1313(a) of such title is amended—

(A) in paragraph (1), by striking ''$452'' and inserting ''$462'';

(B) in paragraph (2), by striking ''$649'' and inserting ''$663'';

(C) in paragraph (3), by striking ''$846'' and inserting ''$865''; and

(D) in paragraph (4), by striking ''$846'' and ''$162'' and inserting ''$865'' and ''$165'', respectively.

(2) SUPPLEMENTAL DIC FOR CERTAIN CHILDREN.—Section 1314 of such title is amended—

(A) in subsection (a), by striking ''$265'' and inserting ''$271'';

(B) in subsection (b), by striking ''$452'' and inserting ''$462''; and

(C) in subsection (c), by striking ''$225'' and inserting ''$230''.

(f) EFFECTIVE DATE.—The amendments made by this section shall take effect on December 1, 2007.

Amend the title so as to read: ''A Bill to amend title 38, United States Code, to codify increases in the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans that were effective as of December 1, 2007, to provide for an increase in the rates of such compensation effective December 1, 2008, and for other purposes.''.

Mr. AKAKA. As chairman of the Senate Committee on Veterans' Affairs, I note my strong support for Senate passage of S. 2617, the proposed Veterans' Compensation Cost-of-Living Adjustment Act of 2008. This measure, which I introduced earlier this year and which the Committee on Veterans' Affairs reported on July 24, would direct the Secretary of Veterans' Affairs to increase, effective December 1, 2008, the rates of veterans' disability compensation to keep pace with the rising cost of living. The rate adjustment would be equal to that provided to Social Security recipients, based on the Bureau of Labor Statistics' Consumer Price Index.

Congress regularly enacts an annual cost-of-living adjustment, COLA, for veterans' compensation in order to ensure that inflation does not erode the purchasing power of the veterans and their families who depend upon this income to meet their needs. This past year Congress passed, and the President signed into law, Public Law 110–111, which resulted in a COLA increase of 2.3 percent for 2008. At this time, the Congressional Budget Office estimates that the cost-of-living adjustment for 2009 will be 2.8 percent.

The COLA affects, among other benefits, veterans' disability compensation and dependency and indemnity compensation for surviving spouses and children. According to the latest figures from VA, there are 2.8 million veterans currently receiving compensation for disabilities incurred in the line of duty, as well as over 316,000 surviving spouses of veterans receiving dependency and indemnity compensation. Current U.S. military deployments in Iraq and Afghanistan will ensure that there will be new recipients of these benefits in the coming years. The brave men and women who voluntarily put themselves in harm's way to keep our country safe need to be certain that we will fulfill our responsibility to ensure that those who are injured during service are provided with the help they need to provide for their families' economic security.

Many of the more than 3 million recipients of these VA benefits depend upon these tax-free payments not only to provide for their own basic needs but those of their spouses, children and parents as well. Without an annual COLA increase, these veterans and their families would see the value of

their hard-earned benefits slowly dwindle, and we, as a Congress, would have neglected our duty to ensure that those who sacrificed so much for this country receive the benefits and services to which they are entitled.

I urge all of our colleagues to support passage of this COLA increase and for their continued support for our Nation's veterans.

Mr. PRYOR. Mr. President, I ask unanimous consent that the committee substitute amendment be agreed to, the bill, as amended, be read the third time and passed, the committee-reported title amendment be agreed to, the motions to reconsider be laid upon the table with no intervening action or debate, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 2617), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed.

The title amendment was agreed to.

FORMER VICE PRESIDENT PROTECTION ACT

Mr. PRYOR. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 5938, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5938) to amend Title 18 United States Code to provide Secret Service protection to former Vice Presidents, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. PRYOR. Mr. President, I ask unanimous consent that a Leahy-Specter amendment, which is at the desk, be agreed to, the bill, as amended, be read the third time and passed, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 5257) was agreed to, as follows:

(Purpose: To amend title 18, United States Code, to enable increased federal prosecution of identity theft crimes and to allow for restitution to victims of identity theft)

On page 2, strike lines 1 through 5, and insert the following:

TITLE I—FORMER VICE PRESIDENT PROTECTION ACT

SEC. 101. SHORT TITLE.

This title may be cited as the ''Former Vice President Protection Act of 2008''.

SEC. 102. SECRET SERVICE PROTECTION FOR FORMER VICE PRESIDENTS AND THEIR FAMILIES.

On page 3, strike line 1 and insert the following:

SEC. 103. EFFECTIVE DATE.

On page 3, after line 4, insert the following:

TITLE II—IDENTITY THEFT ENFORCEMENT AND RESTITUTION ACT

SEC. 201. SHORT TITLE.

This title may be cited as the ''Identity Theft Enforcement and Restitution Act of 2008''.

SEC. 202. CRIMINAL RESTITUTION.

Section 3663(b) of title 18, United States Code, is amended—

(1) in paragraph (4), by striking ''; and'' and inserting a semicolon;

(2) in paragraph (5), by striking the period at the end and inserting ''; and''; and

(3) by adding at the end the following:

''(6) in the case of an offense under sections 1028(a)(7) or 1028A(a) of this title, pay an amount equal to the value of the time reasonably spent by the victim in an attempt to remediate the intended or actual harm incurred by the victim from the offense.''.

SEC. 203. ENSURING JURISDICTION OVER THE THEFT OF SENSITIVE IDENTITY INFORMATION.

Section 1030(a)(2)(C) of title 18, United States Code, is amended by striking ''if the conduct involved an interstate or foreign communication''.

SEC. 204. MALICIOUS SPYWARE, HACKING AND KEYLOGGERS.

(a) IN GENERAL.—Section 1030 of title 18, United States Code, is amended—

(1) in subsection (a)(5)—

(A) by striking subparagraph (B); and

(B) in subparagraph (A)—

(i) by striking ''(A)(i) knowingly'' and inserting ''(A) knowingly'';

(ii) by redesignating clauses (ii) and (iii) as subparagraphs (B) and (C), respectively; and

(iii) in subparagraph (C), as so redesignated—

(I) by inserting ''and loss'' after ''damage''; and

(II) by striking ''; and'' and inserting a period;

(2) in subsection (c)—

(A) in paragraph (2)(A), by striking ''(a)(5)(A)(iii),'';

(B) in paragraph (3)(B), by striking ''(a)(5)(A)(iii),'';

(C) by amending paragraph (4) to read as follows:

''(4)(A) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 5 years, or both, in the case of—

''(i) an offense under subsection (a)(5)(B), which does not occur after a conviction for another offense under this section, if the offense caused (or, in the case of an attempted offense, would, if completed, have caused)—

''(I) loss to 1 or more persons during any 1-year period (and, for purposes of an investigation, prosecution, or other proceeding brought by the United States only, loss resulting from a related course of conduct affecting 1 or more other protected computers) aggregating at least $5,000 in value;

''(II) the modification or impairment, or potential modification or impairment, of the medical examination, diagnosis, treatment, or care of 1 or more individuals;

''(III) physical injury to any person;

''(IV) a threat to public health or safety;

''(V) damage affecting a computer used by or for an entity of the United States Government in furtherance of the administration of justice, national defense, or national security; or

''(VI) damage affecting 10 or more protected computers during any 1-year period; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(B) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 10 years, or both, in the case of—

''(i) an offense under subsection (a)(5)(A), which does not occur after a conviction for another offense under this section, if the offense caused (or, in the case of an attempted offense, would, if completed, have caused) a harm provided in subclauses (I) through (VI) of subparagraph (A)(i); or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(C) except as provided in subparagraphs (E) and (F), a fine under this title, imprisonment for not more than 20 years, or both, in the case of—

''(i) an offense or an attempt to commit an offense under subparagraphs (A) or (B) of subsection (a)(5) that occurs after a conviction for another offense under this section; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(D) a fine under this title, imprisonment for not more than 10 years, or both, in the case of—

''(i) an offense or an attempt to commit an offense under subsection (a)(5)(C) that occurs after a conviction for another offense under this section; or

''(ii) an attempt to commit an offense punishable under this subparagraph;

''(E) if the offender attempts to cause or knowingly or recklessly causes serious bodily injury from conduct in violation of subsection (a)(5)(A), a fine under this title, imprisonment for not more than 20 years, or both;

''(F) if the offender attempts to cause or knowingly or recklessly causes death from conduct in violation of subsection (a)(5)(A), a fine under this title, imprisonment for any term of years or for life, or both; or

''(G) a fine under this title, imprisonment for not more than 1 year, or both, for—

''(i) any other offense under subsection (a)(5); or

''(ii) an attempt to commit an offense punishable under this subparagraph.''; and

(D) by striking paragraph (5); and

(3) in subsection (g)—

(A) in the second sentence, by striking ''in clauses (i), (ii), (iii), (iv), or (v) of subsection (a)(5)(B)'' and inserting ''in subclauses (I), (II), (III), (IV), or (V) of subsection (c)(4)(A)(i)''; and

(B) in the third sentence, by striking ''subsection (a)(5)(B)(i)'' and inserting ''subsection (c)(4)(A)(i)(I)''.

(b) CONFORMING CHANGES.—Section 2332b(g)(5)(B)(i) of title 18, United States Code, is amended by striking ''1030(a)(5)(A)(i) resulting in damage as defined in 1030(a)(5)(B)(ii) through (v)'' and inserting ''1030(a)(5)(A) resulting in damage as defined in 1030(c)(4)(A)(i)(II) through (VI)''.

SEC. 205. CYBER-EXTORTION.

Section 1030(a)(7) of title 18, United States Code, is amended to read as follows:

''(7) with intent to extort from any person any money or other thing of value, transmits in interstate or foreign commerce any communication containing any—

''(A) threat to cause damage to a protected computer;

''(B) threat to obtain information from a protected computer without authorization or in excess of authorization or to impair the confidentiality of information obtained from a protected computer without authorization or by exceeding authorized access; or

''(C) demand or request for money or other thing of value in relation to damage to a protected computer, where such damage was caused to facilitate the extortion;''.

SEC. 206. CONSPIRACY TO COMMIT CYBER-CRIMES.

Section 1030(b) of title 18, United States Code, is amended by inserting ''conspires to commit or'' after ''Whoever''.

SEC. 207. USE OF FULL INTERSTATE AND FOREIGN COMMERCE POWER FOR CRIMINAL PENALTIES.

Section 1030(e)(2)(B) of title 18, United States Code, is amended by inserting ''or affecting'' after ''which is used in''.

SEC. 208. FORFEITURE FOR SECTION 1030 VIOLATIONS.

Section 1030 of title 18, United States Code, is amended by adding at the end the following:

''(i)(1) The court, in imposing sentence on any person convicted of a violation of this section, or convicted of conspiracy to violate this section, shall order, in addition to any other sentence imposed and irrespective of any provision of State law, that such person forfeit to the United States—

''(A) such person's interest in any personal property that was used or intended to be used to commit or to facilitate the commission of such violation; and

''(B) any property, real or personal, constituting or derived from, any proceeds that such person obtained, directly or indirectly, as a result of such violation.

''(2) The criminal forfeiture of property under this subsection, any seizure and disposition thereof, and any judicial proceeding in relation thereto, shall be governed by the provisions of section 413 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 853), except subsection (d) of that section.

''(j) For purposes of subsection (i), the following shall be subject to forfeiture to the United States and no property right shall exist in them:

''(1) Any personal property used or intended to be used to commit or to facilitate the commission of any violation of this section, or a conspiracy to violate this section.

''(2) Any property, real or personal, which constitutes or is derived from proceeds traceable to any violation of this section, or a conspiracy to violate this section''.

SEC. 209. DIRECTIVE TO UNITED STATES SENTENCING COMMISSION.

(a) DIRECTIVE.—Pursuant to its authority under section 994(p) of title 28, United States Code, and in accordance with this section, the United States Sentencing Commission shall review its guidelines and policy statements applicable to persons convicted of offenses under sections 1028, 1028A, 1030, 2511, and 2701 of title 18, United States Code, and any other relevant provisions of law, in order to reflect the intent of Congress that such penalties be increased in comparison to those currently provided by such guidelines and policy statements.

(b) REQUIREMENTS.—In determining its guidelines and policy statements on the appropriate sentence for the crimes enumerated in subsection (a), the United States Sentencing Commission shall consider the extent to which the guidelines and policy statements may or may not account for the following factors in order to create an effective deterrent to computer crime and the theft or misuse of personally identifiable data:

(1) The level of sophistication and planning involved in such offense.

(2) Whether such offense was committed for purpose of commercial advantage or private financial benefit.

(3) The potential and actual loss resulting from the offense including—

(A) the value of information obtained from a protected computer, regardless of whether the owner was deprived of use of the information; and

(B) where the information obtained constitutes a trade secret or other proprietary information, the cost the victim incurred developing or compiling the information.

(4) Whether the defendant acted with intent to cause either physical or property harm in committing the offense.

(5) The extent to which the offense violated the privacy rights of individuals.

(6) The effect of the offense upon the operations of an agency of the United States Government, or of a State or local government.

(7) Whether the offense involved a computer used by the United States Government, a State, or a local government in furtherance of national defense, national security, or the administration of justice.

(8) Whether the offense was intended to, or had the effect of, significantly interfering with or disrupting a critical infrastructure.

(9) Whether the offense was intended to, or had the effect of, creating a threat to public health or safety, causing injury to any person, or causing death.

(10) Whether the defendant purposefully involved a juvenile in the commission of the offense.

(11) Whether the defendant's intent to cause damage or intent to obtain personal information should be disaggregated and considered separately from the other factors set forth in USSG 2B1.1(b)(14).

(12) Whether the term ''victim'' as used in USSG 2B1.1, should include individuals whose privacy was violated as a result of the offense in addition to individuals who suffered monetary harm as a result of the offense.

(13) Whether the defendant disclosed personal information obtained during the commission of the offense.

(c) ADDITIONAL REQUIREMENTS.—In carrying out this section, the United States Sentencing Commission shall—

(1) assure reasonable consistency with other relevant directives and with other sentencing guidelines;

(2) account for any additional aggravating or mitigating circumstances that might justify exceptions to the generally applicable sentencing ranges;

(3) make any conforming changes to the sentencing guidelines; and

(4) assure that the guidelines adequately meet the purposes of sentencing as set forth in section 3553(a)(2) of title 18, United States Code.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 5938), as amended, was read the third time, and passed.

MAKING MINORITY PARTY APPOINTMENTS FOR THE 110TH CONGRESS

Mr. PRYOR. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 635, which was submitted earlier today.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 635) making minority party appointments for the 110th Congress.

There being no objection, the Senate proceeded to consider the resolution.

Mr. PRYOR. Mr. President, I ask unanimous consent that the resolution be agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 635) was agreed to, as follows:

S. RES. 635

Resolved. That the following be the minority membership on the following committee for the remainder of the 110th Congress, or until their successors are appointed:

Committee on Commerce, Science and Transportation: Mrs. Hutchison. Mr. Stevens, Mr. McCain, Ms. Snowe, Mr. Smith, Mr. Ensign, Mr. Sununu, Mr. DeMint, Mr. Vitter, Mr. Thune, Mr. Wicker.

MEASURE PLACED ON THE CALENDAR—S. 3348

Mr. PRYOR. Mr. President, I understand that S. 3348 is at the desk and due for a second reading.

The PRESIDING OFFICER. The clerk will report the bill by title for the second time.

The assistant legislative clerk read as follows:

A bill (S. 3348) to provide for the investigation of certain unsolved civil rights crimes, and for other purposes.

Mr. PRYOR. I object to any further proceedings with respect to the bill.

The PRESIDING OFFICER. Objection is heard. The bill will be placed on the calendar.

ORDERS FOR THURSDAY, JULY 31, 2008

Mr. PRYOR. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand adjourned until 9:30 a.m. tomorrow, July 31; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate then proceed to a period for the transaction of morning business until 10:30 a.m., with Senators permitted to speak for up to 10 minutes each, with the time equally divided and controlled by the two leaders or their designees, with the majority controlling the first half and the Republicans controlling the second half. I further ask unanimous consent that following morning business, the Senate resume consideration of the motion to proceed to S. 3001, the Department of Defense authorization bill. Finally, I ask unanimous consent that the time from 10:30 a.m. to 12:30 p.m. be controlled in alternating 30-minute blocks of time between the majority and Republican sides, with the Republicans controlling the first 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. PRYOR. Mr. President, tomorrow we expect to turn to the consideration of the Consumer Product Safety Commission conference report and the higher education conference report. Therefore, Senators should expect votes throughout the day.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. PRYOR. Mr. President, if there is no further business to come before the

Senate, I ask unanimous consent that it stand adjourned under the previous order.

There being no objection, the Senate, at 7:58 p.m., adjourned until Thursday, July 31, 2008, at 9:30 a.m.

WITHDRAWAL

Executive message transmitted by the President to the Senate on July 30, 2008 withdrawing from further Senate consideration the following nomination:

NAVY NOMINATION OF REAR ADM. ELIZABETH A. HIGHT, TO BE VICE ADMIRAL, WHICH WAS SENT TO THE SENATE ON FEBRUARY 5, 2008.

EXTENSIONS OF REMARKS

EARMARK DECLARATION

HON. ROBERT J. WITTMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. WITTMAN of Virginia. Madam Speaker, I submit the following:

Vehicle Paint Facility, Fort Eustis.

Requesting Member: Congressman ROBERT J. WITTMAN.

Bill Number: H.R. 6599.

Account: U.S. Department of the Army, Military Construction.

Legal Name of Requesting Entity: City of Newport News.

Address of Requesting Entity: 2400 Washington Avenue, Newport News, VA 23607.

Description of Request: $3.90 million to construct a Vehicle Paint Facility at Fort Eustis with paint booths to accommodate the preparation and painting of vehicles, equipment, components, helicopters, and modular causeway sections. This project is required to support the preparation for and painting of approximately 1600 pieces of vehicular equipment. Most of this equipment belongs to the 7th Sustainment Brigade, which is one of the Army's most frequently deployed units. If this project is not provided, Fort Eustis will incur negative mission impacts and will not meet Virginia Environmental Quality requirements. Current painting operations will have an elevated cost because existing facilities cannot accommodate oversized equipment. The facility is critical to rapidly prepare equipment for deploying units in conjunction with time phased deployment schedules. In addition, the Deputy Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential.

The estimated contract cost is approximately $3.0 million with an estimated contingency percent of 5 percent, supervision, inspection and overhead costs at an estimated 5.7 percent, design/build design costs at an estimated 4 percent and additional expenses for installed equipment.

This request is consistent with the intended and authorized purpose of the U.S. Department of the Army, Military Construction account and the Department of the Army is the recipient of these funds. There is no matching requirement.

Marine Corps Base Quantico OCS Headquarters Facility.

Requesting Member: Congressman ROBERT J. WITTMAN.

Bill Number: H.R. 6599.

Account: U.S. Department of the Navy, Military Construction.

Legal Name of Requesting Entity: Member initiated request.

Description of Request: $5.98 million for construction of the Marine Corps Base Quantico OCS Headquarters Facility located at Quantico, Virginia. The funding would be used to construct a single-story administrative headquarters building to consolidate Headquarters functions at Officer Candidate School (OCS). The facility will provide workspaces for 75 Marines responsible for coordinating the administrative, educational, operational and logistics support required to conduct Officer Candidate training at OCS. The existing facility was built in 1945 and will be demolished once new construction is complete. Preventive and corrective maintenance, both routine and emergency, take place on a daily basis at the existing facility, consuming material, money and manpower.

This project is listed on the USMC FY09 Unfunded Programs List. The entity to receive funding for this project is the United States Navy.

The estimated contract cost for the 13,250 square foot facility is approximately $4 million with an estimated contingency percent of 5 percent, supervision, inspection and overhead costs at an estimated 5.7 percent, design/build design costs at an estimated 4 percent and additional expenses for installed equipment. The funds will be used for the OCS headquarters construction, technical operating manuals, information systems, anti-terrorism force protection, and supporting facilities (construction features, electrical, mechanical, paving and site improvements, demolition and environmental mitigation.)

There is no matching requirement. This request is consistent with the intended and authorized purpose of the U.S. Department of the Navy Military Construction account.

TRIBUTE TO REVEREND HAROLD GILLENEY

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. LATHAM. Madam Speaker, I rise today to congratulate Reverend Harold S. Gilleney on the celebration of his 100th birthday on August 4, 2008.

Reverend Gilleney was born on August 4, 1908 to William and Ella Gilleney. He had one sister, Vera. In 1942, Reverend Gilleney married Ida Casey, and together they had one child, later welcoming into the family two grandchildren and three great grandchildren. During his lifetime, Reverend Gilleney has lived in many places and served in the Air Force as a Designated Spotter in World War II. He has served in Presbyterian churches in Mountain View, WY, Hanson, NE, Zwingle, IA, Mount Vernon, IA, Ft. Des Moines, IA, Grimes, IA, Westminster Presbyterian in Ottumwa, IA, and Plymouth Congregational Church in Ottumwa. He is still Pastor Emeritus at Westminster Presbyterian in Ottumwa. Reverend Gilleney currently lives at the Eastern Star Masonic Home in Boone, Iowa where he is on the Resident Council.

There have been many changes that have occurred during the past one hundred years. Since Reverend Gilleney's birth we have revolutionized air travel and walked on the moon. We have invented the television and the Internet. We have fought in wars overseas, seen the rise and fall of Soviet communism and the birth of new democracies. Reverend Gilleney has lived through eighteen United States Presidents and twenty-four Governors of Iowa. In his lifetime, the population of the United States has more than tripled.

I congratulate Reverend Harold S. Gilleney for reaching this milestone of a birthday. I am extremely honored to represent Reverend Gilleney in the United States Congress, and I wish him happiness and health in his future years.

EARMARK DECLARATION

HON. TIM MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. TIM MURPHY of Pennsylvania. Madam Speaker, I submit the following:

Requesting Member: Congressman TIM MURPHY.

Bill Number: H.R. 6599, The Military Construction and Veterans Affairs Fiscal Year 2009 Appropriations bill.

Account: Military Construction, Army National Guard.

Legal Name of Requesting Entity: Pennsylvania National Guard.

Address of Requesting Entity: Coraopolis, Pennsylvania, USA.

Description of Request: Appropriation of $3,250,000 for planning and design of the Combined Support Maintenance Shop in Coraopolis, Pennsylvania, is included in the bill. This new complex will consist of approximately 130,000 square feet of administrative and supply areas, and nine general purpose and 12 specialty maintenance work bays to regionally maintain Army National Guard ground vehicles located in Western Pennsylvania. The project will allow consolidation and closing of four inadequate maintenance facilities in the Pittsburgh area. The Army National Guard and the Commonwealth will benefit by reduced operating and maintenance costs associated with the closure of four inefficient facilities as well as utilizing an Energy Management control system. Soldiers will benefit by being provided a state-of-the-art, efficiently functioning work space to maintain combat vehicles.

EARMARK DISCLOSURE

HON. STEVE KING

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. KING of Iowa. Madam Speaker, I wish to make the following disclosure in accordance with the new Republican Earmark Transparency Standards requiring Members to

place a statement in the CONGRESSIONAL RECORD prior to a floor vote on a bill that includes earmarks they have requested, describing how the funds will be spent and justifying the use of Federal taxpayer funds.

Requesting Member: Congressman STEVE KING.

Bill Number: H.R. 6599, the Military Construction, Veterans Affairs and Related Agencies Appropriations Act for Fiscal Year 2009.

Account: MilCon, Air National Guard.

Legal Name of Requesting Entity: Iowa Air National Guard.

Address of Requesting Entity: 7700 NW Beaver Drive, Johnston, Iowa, 50131.

Description of Request: Appropriation of $5.6 million for the construction of a new Vehicle Maintenance Facility and remodeling of the existing Communications Facility located at the 133rd Test Squadron in Fort Dodge, Iowa. Updating facilities at the 133rd Test Squadron is of the utmost importance and highest priority for the Iowa National Guard. This project is approved on the U.S. Air Force Future Year Defense Plan (FYDP), and has been assigned the number HEMT039066. The facility is significantly short of space due to the expansion of the unit's mission, manning and resources. Since it is the only unit designated to test future Command and Control (C2) projects for the U.S. Air Force, the performance of the 133rd Test Squadron is vital to Air Force missions. A detailed financial plan based on form DD 1391 required by the Department of Defense for military construction projects follows.

COST ESTIMATE

ITEM	U/M	Quantity	Unit cost	Cost ($000)
Vehicle maintenance/comm training facility.	SF	32,369	.....	4,171
Vehicle maintenance area	SF	7,000	210	(1,470)
Age addition to comm area ..	SF	2,600	186	(484)
Upgrade communications area.	SF	22,769	91	(2,072)
Anti-terrorism/force protection measures.	SF	32,369	2	(65)
LEED Certification	LS	.....	.....	(80)
Supporting facilities	.....	.....	.....	864
Pavements	LS	.....	.....	(115)
Utilities	LS	.....	.....	(150)
Site improvements/parking ...	LS	.....	.....	(100)
Communications support	LS	.....	.....	(100)
Pre-wired work stations	LS	.....	.....	(130)
Temporary trailers	LS	.....	.....	(220)
Demolition/asbestos removal	SF	3,270	15	(49)
Subtotal	.....	.....	.....	5,035
Contingency (5%)	.....	.....	.....	252
Total contract cost	.....	.....	.....	5,287
Supervision, inspection and overhead (6%).	.....	.....	.....	317
Total request	.....	.....	.....	5,604
Total request (rounded)	.....	.....	.....	5,600

10. Description of Proposed Construction: New Construction: Reinforced concrete foundation and floor slab with steel-framed masonry walls and sloped roof structure. Includes overhead crane/hoist, all utilities, pavements, fire protection, site improvements, and support. All interior wall, ceilings, interior finishes and pre-wired work stations. Alteration: Rearrange and extend interior walls and utilities. Provide anti-terrorism force protection measures. Demolish three buildings (304 SM) and landscape the site. Air conditioning: 60 Tons.

11. Requirement: 32,369 SF Adequate: 0 SF Substandard: 22,769 SF

Project: Vehicle Maintenance and Communications Training Facility (Current Mission).

Requirement: The base requires an adequately sized, properly configured, and environmentally safe vehicle maintenance facility for operations and training. Vehicles to be repaired and maintained include cars, trucks, sweepers, and snowplows. Functional areas consist of maintenance bays, paint bay, office area, parts/tool storage, battery shop, vehicle dispatch, fuel dispensing facility and wash rack. An adequately sized and properly configured facility is required for the operations, maintenance, and training in support of a 132–personnel combat communications squadron responsible for tactical communications—electronics systems. Functional areas include the command section, communication systems (i.e. satellite, base, and network), communications center, combat support, secure storage, deployment control center, classrooms, physical fitness center, dining area, and medical training.

Current Situation: The vehicle maintenance functions are accomplished in a facility that has reached the end of its useful life. Facility maintenance and repair of the mechanical and electrical systems are no longer cost effective due to the lack of replacement parts. The facility is significantly short of maintenance, office, and training space due to the expansion of the unit's manning and resources over the years. Maintenance and repair operations on larger vehicles must be done outside because they do not fit in the small bays. The facility has numerous safety, health, and environmental hazards. The communications and electronics facility portion of this project will reconfigure and renovate existing spaces while adding to the complex to alleviate facility shortfalls. Mission accomplishment and Status of Readiness and Training System (SORTS) levels are degraded as there is no adequate space to properly store civil engineering equipment, generators, and equipment assets to be deployable within response time criteria given winter conditions. The 133rd is accomplishing part of the test mission requirements in a facility on the other side of the airport driveway. This requires them to take valuable time and manpower to get to the support functions such as medical and supply items. The area is 12 percent short of the required space needed to support the mission. Several Control and Reporting Center (CRC) testing events have been located in building 102, which has been identified to be demolished. This facility requires roof repairs and electrical and mechanical upgrades to meet code requirements. The space is not functionally setup to house a test squadron, which causes interruptions in training/testing requirements. They do not have the space to test, maintain, train and repair equipment that they are required to support. The office space is not properly configured. The Aerospace Ground Equipment (AGE) facility (building 101) is not functionally efficient as an AGE shop with its current layout. Equipment is stored outside due to lack of covered storage space. The administrative area is congested and not properly configured. The existing forced air heat system is inefficient and requires repair. The existing floor drains are not connected to an oil water separator. The majority of the base infrastructure system is over 40 years old and has been upgraded only as part of new construction. Parts of the system that have not been upgraded are deteriorated due to age.

Impact If Not Provided: Operations and training suffer from lack of up-to-date and adequate facilities. The overcrowded and antiquated facility seriously degrades the unit's capability to maintain a safe, operationally ready fleet, and severely limits the unit's ability to train. Continued safety and environmental problems with possible violations of Federal and State environmental statutes. Quality of life is negatively impacted affecting morale, recruiting, and retention.

Additional: This project meets the criteria/scope specified in Air National Guard Handbook 321084, ''Facility Requirements,'' and is in compliance with the base master plan. These facilities are ''inhabited'' buildings and meet the standoff distance requirements. There is minimal threat and the level of protection is low so minimum construction standards have been applied. All known alternatives options were considered during the development of this project. No other option could meet the mission requirements; therefore, no economic analysis was needed or performed. The following buildings will be demolished as a result of this project: 101 (214 SM), 104 (45 SM), and 105 (45 SM) for a total of 304 SM.

Vehicle maintenance area: 7,000 SF = 650 SM.

Age addition to comm area: 2,600 SF = 242 SM.

Upgrade communications area: 22,769 SF = 2,115 SM.

Demolition/asbestos removal: 3,270 SF = 304 SM.

EARMARK DECLARATION

HON. JAMES T. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. WALSH of New York. Madam Speaker, consistent with Republican transparency standards, the following is a disclosure for each of my requested projects in H.R. 6599, the FY 2009 Military Construction—VA Appropriations Bill:

Requesting Member: Rep: JAMES T. WALSH

Bill Number: H.R. 6599.

Account: Military Construction—Air National Guard.

Legal Name of Representing Entity: Hancock Field, Air National Guard, Syracuse, NY.

Address of Requesting Entity: 6001 East Malloy Road, Syracuse, NY 13211.

Description of Request: (1) Include $5 million for Hancock Field—TFI—Predator IOC/FOC Beddown. This is included in the President's FY 2009 Budget Request. Funding will be used for conversion and upgrade of the Squadron Operations Facility to bed down Predator Operations Center (POC), Ground Control Station (GOC) and squadron operation functions. Rearrange and extend interior walls and utilities. Provide secure areas and Sensitive Compartmentalized Information Facility (SCIF) and alarm systems. Provide sustainable design elements and high efficiency energy-saving features/materials. Provide standby power with uninterruptible power capability. Exterior work includes: Utility support, pavements, site improvements, fire protection, and antiterrorism force protection measures. See DD Form 1391 for project details. (2) Include $5.4 million for Hancock Field—Upgrade ASOS Facilities (included in FYDP); funding will be used for an addition: Metal framed, masonry slab-on-grade facility with standing seam metal roof, architecturally compatible to

existing facility. Rearrange and extend interior walls and utilities. Provide interior walls, ceilings, and floor coverings and finishes as well as plumbing, electrical, heating, ventilation, air conditioning, alarms, and fire detection and suppression functions. Provide exterior support such as pavements, utilities, site improvements, fire protection and all other necessary work as required. Install utility metering and connect to Direct Digital Control System. See DD Form 1391 for project details.

EARMARK DECLARATION

HON. LAMAR SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. SMITH of Texas. Madam Speaker, I submit the following:

Requesting Member: Congressman LAMAR SMITH.

Bill Number: H.R. 6599.

Account: Department of the Army, Military Construction.

Legal Name of Requesting Entity: Fort Sam Houston.

Address of Requesting Entity: 1206 Stanley Road, Suite A, Fort Sam Houston, TX 78234–5001.

Description of Request: The funding would be used to construct a Trainee Barracks Complex. This project will provide a 1200 PN barracks, a Battalion Headquarters, Two Company Operation Buildings and a Central Energy Plant.

IN RECOGNITION OF PAUL T. MOBLEY, SR., UPON HIS COMPLETION OF HIS THIRD TOUR OF DUTY IN AFGHANISTAN

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MILLER of Florida. Madam Speaker, on behalf of the U.S. Congress, it is an honor for me to rise today in recognition of Paul T. Mobley, Sr., Special Agent with the Naval Criminal Investigative Service.

Paul Mobley, Sr. has spent the last 24 years serving his country as both a Special Agent for the Naval Criminal Investigative Service and a Sergeant for the United States Marine Corps. After graduating from Troy University in 1984, Mr. Mobley began his career as a Patrol Officer with the Dougherty County Police Department. After being promoted to Lieutenant, Mr. Mobley was soon selected to join the prestigious criminal investigative service of the U.S. Navy.

In 1996, Mr. Mobley was assigned to the Computer Crimes Investigation and Operations Unit of the NCIS Gulf Coast Field Office and was instrumental in establishing the unit's first computer forensics lab. Since 2002, he has specialized in cyber-related operations for the counter-terrorism and counter-intelligence communities. For 4 years, Mr. Mobley worked within the U.S. borders making our Nation more secure during the war on terror. While dutifully serving our country as an NCIS Special Agent, he has also faithfully served as President of the West Florida Home Education Support League and Assistant Scoutmaster of Troop 10 in Pensacola, Florida.

In June of 2006, after completing the High Risk Operations Training Program at the Federal Law Enforcement Training Center in Glynco, GA, Mr. Mobley was called to serve his country yet again as an NCIS Special Agent in Kabul, Afghanistan. Mr. Mobley is now serving his third tour of duty in Afghanistan. The Department of the Army recently presented him with the Commander's Award for Civilian Service for ''exceptionally meritorious achievement and outstanding civilian service . . . in support of Operation Enduring Freedom.'' Upon completion of his second deployment, the Department of the Navy presented Mr. Mobley with the Expeditionary Medal from the U.S. Naval Criminal Investigative Service. Mr. Mobley continues to be a courageous soldier and vital part of the war against terrorism.

Madam Speaker, on behalf of the U.S. Congress, I am proud to honor Mr. Paul T. Mobley, Sr. for his dedicated service to the community of northwest Florida and to the United States of America.

CARIBBEAN CONTEMPLATES SINGLE MARKET ECONOMY

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. RANGEL. Madam Speaker, I rise today to enter into the RECORD a July 15, 2008 New York Carib News Op-Ed entitled: ''CARICOM Summit on Economic Integration.''

One issue that was made very clear as a result of the CARICOM Conference in New York is that there is a call for economic and political unity among the CARICOM states. With dozens of small economies that are similar in makeup and have many of the same goals, it is clear that the need for the Caribbean to form a Single Market Economy would eliminate many barriers to growth in the region.

The Op-Ed speaks to the benefits that this Single Market Economy would have for the growth of the Caribbean and that ''the sooner the roadblocks are removed the better it would be for the region as a whole.'' The Caribbean can possibly experience the growth that Europe continues to experience since their unification. But unity will not be easy as we are dealing with issues of sovereignty and especially fear of an influx of unemployed migrants and the free movement of criminal networks.

CARICOM SUMMIT ON ECONOMIC INTEGRATION

When Caribbean leaders met recently in New York and Antigua, the effects which democracy and the free and fair expression of the will of the electorate in various Caricom countries in recent months were quite evident.

Several new faces were around the tables since the advent of the year 2007, with new leaders making their presence felt in one way or another in the council of the Caribbean Community. St. Lucia, the Bahamas, Jamaica and Belize have all changed governments while Trinidad and Tobago and its ruling People's National Movement bucked what appeared to be a trend in the wind of change that swept out governments, some with good records in office.

That change was bound to affect the pace of movement towards the establishment of the Single Economy, a vital step in the process towards regional economic integration. After all, new leaders could be expected to get up to speed on such a vital step.

By any measure, the road to the Caribbean Single Market and Economy is being traveled with less enthusiasm and fanfare than two to three years ago. Part of that hard and regrettable fact of life can be attributed to the departure of two enthusiastic advocates of regional togetherness, P.J. Patterson of Jamaica and Owen Seymour Arthur of Barbados. They served the region well but couldn't be expected to continue forever.

That situation may explain the recent criticism level by Dr. Ralph Gonsalves, Prime Minister of St. Vincent & the Grenadines who complained that the implementation of the CSME was taking a back seat to other things.

So that's why it made sense for the leaders at their meeting in Antigua last week to decide to meet before the end of the year to take stock of the CSME.

''The meeting will review the status of the preparation for the Strategic Plan for Regional Development, Member-States' readiness for the implementation of the Single Economy, as well as the role of stakeholders in the implementation of various elements of the CSME,'' was the way the leaders put it in their joint communiqué issue after the summit. Although lacking in specifics, that statement spoke volumes about where the region stands when it comes to the CSME. It tells us that quite a lot of unfinished business remains to be resolved and it suggests that some countries may be stalling on going forward with the Single Economy. But the sooner the roadblocks are removed the better it would be for the region as a whole.

One thing is clear: Caricom has fostered a sense of togetherness within the region. But the countries must be prepared to give up some of the things they hold dear for the good of the region. One of them is sovereignty. That's how Europe has achieved such progress. The problem is that far too many leaders and countries want to have their cake and eat it too. Without compromises and concessions we aren't going to move forward. Perhaps, the members of the Organization of Eastern Caribbean States should examine their own attitude to the CSME.

Nevertheless, there were some crucial decisions made at the Antigua summit. One of them was the crucial support given to the creation of the Caribbean Public Health Agency that would help bring the various regional health institutions under a single set of operating procedures. It would boost oversight of the management of regional health programs.

Another was the word on the Caricom passport and the movement of people throughout the region. Both Jamaica and Belize have now decided to begin issuing the Caricom passport by the end of the year. That step should reduce many of the hassles people encounter in moving from one territory to another and that's why it is vital for the member-states to put the machinery in place to ensure that the system is well-oiled so that ease of travel would become a reality and not the exception.

A disappointing note was struck however when Caricom devoted only two lines to the question of the free movement of people within the community. The leaders sidestepped the question when they decided to ''review the implementation of the free movement of Caricom skilled nationals with a view to determining its ratification or mediation.'' That's a sure indication of further delay.

There is an understandable level of apprehension about the impact of free movement on individual economies at a time of worries about the global economic picture, the food crisis, skyrocketing oil prices. There is also major worry about the increasing high level of crime.

With the economies of the United States and Britain slowing down and the negative impact that it could have on the vital tourism industry in the Caribbean, countries fear they would be hurt by a declining tourism industry and a steady influx of job seekers from their neighbors. They are also deeply worried about the machinations of regional criminal networks that are far more sophisticated than the police and other security forces.

CONGRATULATING MR. AND MRS. MATTHEW AND DIANE DUNASKISS ON THEIR 30TH WEDDING ANNIVERSARY

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MCCOTTER. Madam Speaker, today I rise to honor and acknowledge Mr. and Mrs. Matthew and Diane Dunaskiss upon their 30th wedding anniversary.

The couple first met in the Lake Orion School District, where they still reside today. Diane Tench had always wanted to be a teacher, and after graduating from Wayne State University, she became an elementary teacher at Pine Tree Elementary in Lake Orion, Michigan. Her loyalty and commitment to the school grew in the year 2000, as she became principal. Diane Dunaskiss was elected state-wide and is serving her second term on the Wayne State Board of Governors. Matthew Dunaskiss put himself through college by making buttons at local fairs and, later, graduated from the University of Michigan. Mr. Dunaskiss started his career in teaching, but life took him on another path, which led him into politics and small business. Matthew served at the state level as a State Representative and State Senator for over 20 years.

While Matthew and Diane developed their careers, they decided to start a family and had three beautiful children, Jamie, Justin, and Jordan. Through all of their hard work, Mr. Dunaskiss still prepares meals he thinks his wife will enjoy, and Mrs. Dunaskiss still finds time to help her husband out around the house. They have raised their children in a loving, fun, and educational environment, and have shown them, through good times and bad, to support and love your spouse unconditionally.

Madam Speaker, Matthew and Diane have demonstrated their enduring love and commitment to one another for the past thirty years. I ask my colleagues to join me in congratulating Mr. and Mrs. Matthew and Diane Dunaskiss on their anniversary as well as their continued devotion to the community and our country.

EARMARK DECLARATION

HON. ANDER CRENSHAW

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. CRENSHAW. Madam Speaker, I rise today to submit documentation consistent with the new Republican Earmark Standards.

Requesting Member: Congressman ANDER CRENSHAW.

Bill Number: H.R. 6599—Military Construction, Veterans Affairs and Related Agencies.

Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Navy.

Legal Name of Receiving Entity: Naval Station Mayport.

Address of Receiving Entity: Mayport, Florida.

Description of Request: I have secured $3,530,000 in funding in H.R. 6599 in the Military Construction, Navy account for an Aircraft Refueling project at Naval Station Mayport, Florida.

This project will construct a two (2) outlet, 300gpm/outlet aircraft direct fueling system to include concrete foundations and slab on grade, 15,000 gallon double wall steel tanks (to be relocated from the existing truck fill stand), concrete containment berms, double walled underground piping, valves, pumps, pressure gauges, filter separators, leak detection monitors for piping and tanks, float switches, double wall steel product recovery tank, emergency shut off valves, fuel quality monitors, pipe vents, fire protection, pressure indicating transmitter and water drainoff system. It would also construct underground double walled fuel transfer line from bulk storage to the direct fueling facility. The project will properly close, by abandoning in place, the existing underground fuel transfer line from the bulk storage to the existing truck fill stand. Closure will include pigging/purging the lines, grout injection of ends, core boring and soil sampling along the fuel transfer line, and submission of a Florida Department of Environmental Protection Closure Assessment Report.

In addition, this project will construct a 150 m2, single story building on a concrete slab on grade and concrete footings. The building and fuel lab will include vinyl floor tile, steel stud/gypsum wallboard walls, hollow core interior steel doors, solid core exterior steel doors, double glazed single hung windows, modified bitumen roofing, interior plumbing, electrical power and lighting wiring, data/communication wiring, fluorescent lighting fixtures, ceramic bathroom tile, HVAC system/distribution/controls and site utilities (electric, water, sanitary, fiber optic communication/data). The project demolishes building 18 (32 m2) and the truck fill stand facility 142 (400 GM).

Naval Station Mayport is a strategic base for the Navy. This project was programmed to receive funding in Fiscal Year 2012 but was identified by the base commander as the highest unfunded priority in Fiscal Year 2009.

Military Construction projects are always 100 percent funded by the U.S. Federal Government so there is no opportunity for matching funds.

INTRODUCTION OF GENETICALLY ENGINEERED REGULATORY FRAMEWORK

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. KUCINICH. Madam Speaker, I rise in support of three bills I have introduced today that will provide a comprehensive regulatory framework for all genetically engineered plants, animals, bacteria, and other organisms. The bills will protect our food, environment, and health. They are a common sense precaution to ensure genetically engineered foods do no harm. Genetic engineering is having a serious impact on the food we eat, on the environment, and on farmers. To ensure we can maximize benefits and minimize hazards, Congress must provide a comprehensive regulatory framework for all genetically engineered products.

Current laws, such as our food safety and environmental laws were not written with this technology in mind. Clearer laws are necessary to ensure that these new scientific capabilities and the associated impacts are closely monitored.

Combined, these bills will ensure that consumers are protected, increase food safety, protect farmers' rights and make biotech companies liable for their products.

THE GENETICALLY ENGINEERED FOOD RIGHT TO KNOW ACT

Consumers wish to know whether the food they purchase and consume is a genetically engineered food. Concerns include the potential transfer of allergens into food and other health risks, potential environmental risks associated with the genetic engineering of crops, and religiously and ethically based dietary restrictions. Adoption and implementation of mandatory labeling requirements for genetically engineered food produced in the United States would facilitate international trade. It would allow American farmers and companies to export and appropriately market their products—both genetically engineered and non-genetically engineered—to foreign customers. This bill acknowledges consumers have a right to know what genetically engineered foods they are eating:

Requires food companies to label all foods that contain or are produced with genetically engineered material and requires the FDA to periodically test products to ensure compliance.

Voluntary, non-GE food labels are authorized.

A legal framework is established to ensure the accuracy of labeling without creating significant economic hardship on the food production system.

THE GENETICALLY ENGINEERED SAFETY ACT

Given the consensus among the scientific community that genetic engineering can potentially introduce hazards, such as allergens or toxins; genetically engineered foods need to be evaluated on a case-by-case basis and cannot be presumed to be generally recognized as safe. The possibility of such hazards dictates a cautious approach to genetically engineered food approvals. However, FDA has glossed over the food safety concerns of genetically engineered foods and not taken steps to ensure the safety of these genetically engineered foods.

A pharmaceutical crop or industrial crop is a plant that has been genetically engineered to produce a medical or industrial product, including human and veterinary drugs. Many of the novel substances produced in pharmaceutical crops and industrial crops are for particular medical or industrial purposes only. These substances are not intended to be incorporated in food or to be spread into the environment. That would be equivalent to allowing a prescription drug in the food supply. Experts acknowledge that contamination of human food and animal feed is inevitable due to the inherent imprecision of biological and agricultural systems. This contamination by pharmaceutical crops and industrial crops pose substantial liability and other economic risks to farmers, grain handlers, and food companies.

This bill requires that all genetically engineered foods follow a strenuous food safety review process and attempts to prevent contamination of our food supply by pharmaceutical and industrial crops:

Require the FDA to screen all genetically engineered foods through the current food additive process to ensure they are safe for human consumption, yet continues FDA discretion in applying the safety factors that are generally recognized as appropriate.

Require that unique concerns regarding genetically engineered foods be explicitly examined in the review process, a phase-out of antibiotic resistance markers, and a prohibition on known allergens and requires the FDA to conduct a public comment period of at least 30 days.

Place a temporary moratorium on pharmaceutical crops and industrial crops until all required regulations put forth by this bill with regard to these crops are in effect.

Place a permanent moratorium on pharmaceutical crops and industrial crops grown in an open-air environment and on pharmaceutical crops and industrial crops grown in a commonly used food source.

Require the United States Department of Agriculture to establish a tracking system to regulate the growing, handling, transportation, and disposal of all pharmaceutical and industrial crops and their byproducts to prevent contamination.

Call on the National Academy of Sciences to submit to Congress a report that explores alternative methods to produce pharmaceuticals or industrial chemicals that have the advantage of being conducted in controlled production facilities and do not present the risk of contamination.

THE GENETICALLY ENGINEERED FARMER PROTECTION ACT

Agribusiness and biotechnology companies have rapidly consolidated market power at the same time as the average farmer's profits and viability have significantly declined. Policies promoted by biotech corporations have systematically acted to remove basic farmer rights enjoyed since the beginning of agriculture. These policies include unreasonable seed contracts, the intrusion into everyday farm operations, and liability burdens. The introduction of genetically engineered crops has also created obstacles for farmers, including the loss of markets and increased liability concerns. To mitigate the abuses upon farmers, a clear set of farmer rights must be established.

Furthermore, biotech companies are selling a technology that is being commercialized far in advance of the new and unknown science of genetic engineering. Farmers may suffer from crop failures, neighboring farmers may suffer from cross pollination, increased insect resistance, and unwanted ''volunteer'' genetically engineered plants, and consumers may suffer from health and environmental impacts. Therefore, biotech companies should be found liable for the failures of genetically engineered crops.

This bill provides several farmer rights and protections to maintain the opportunity to farm and ensures that the creator of the technology assumes all liability:

Farmers may save seeds and seek compensation for failed genetically engineered crops.

Biotech companies may not: shift liability to farmers; nor require access to farmer's property; nor mandate arbitration; nor mandate court of jurisdiction; nor require damages beyond actual fees; nor charge more to American farmers for use of this technology, than they charge farmers in other nations, or any other unfair condition.

Seed companies must: ensure seeds labeled non-GE are accurate; provide clear instructions to reduce cross-pollination, which contaminates other fields; and inform farmers of the risks of using genetically engineered crops.

The EPA is required to evaluate the concern of Bt resistant pests and take actions necessary to prevent resistance to Bt, an important organic pesticide.

The bill prohibits genetic engineering designed to produce sterile seeds and loan discrimination based on the choice of seeds an agricultural producer uses.

The bill places all liability from negative impacts of genetically engineered organisms squarely upon the biotechnology companies that created the genetically engineered organism.

Farmers are granted indemnification to protect them from the liabilities of biotech companies.

The bill prohibits any transfer of liability away from the biotechnology companies that created the genetically engineered organism.

EARMARK DECLARATION

HON. DAVID L. HOBSON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. HOBSON. Madam Speaker, in accordance with the February 2008 New Republican Earmark Standards Guidance, I submit the following:

Requesting Member: Congressman DAVID L. HOBSON.

Bill Number: H.R. 6599.

Provision: Title I, Department of Defense, Military Construction.

Legal Name of Requesting Entity: Ohio National Guard.

Address of Requesting Entity: 2825 West Dublin-Granville Road, Columbus, Ohio 43235–2789.

Description of Request: Provide an earmark of $12,800.00 to fund acceleration of construction of a facility to relocate the Ohio Air National Guard's 269th Combat Communications Squadron and 251st Combat Communications Group to another part of the Springfield, Ohio, Air National Guard Base. The current 25-year-old facility is obsolete and places severe restrictions on the ability to perform equipment maintenance and conduct training operations. It does not comply with existing codes and has excessive operations and maintenance costs. The current building can be reused for other functions but cannot be made functionally adequate for the communications mission.

CONGRATULATING MR. AND MRS. GIOVANNI AND LINA DEL SIGNORE ON THEIR 50TH WEDDING ANNIVERSARY

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. McCOTTER. Madam Speaker, today I rise to honor and acknowledge Mr. and Mrs. Giovanni and Lina Del Signore, who on March 9, 2008 celebrated their 50th wedding anniversary.

Giovanni and Lina both grew up in Italy, where they met, and decided to marry in the spring of 1958. Just one week after the wedding Giovanni left his hometown and wife to pursue a future in the United States. Four years later, Lina was finally able to join her husband in Michigan, and in 1963, the couple opened DiGiovanni's Pizza in Livonia, Michigan. Today the Giovannis are the proud owners of the Laurel Manor Banquet and Conference Center, which has been a family affair since its opening in 1988.

While their restaurant business prospered, John and Lina have made time for their loving family they have built together. Over the years, they have been blessed with four beautiful children, Constantino, Luciano, Nazzrena, and Renata. In subsequent years each of their children went on to assist their parents in continuing the tradition of quality and hospitality within the community.

Madam Speaker, this year John and Lina returned to Italy to renew their vows and celebrate their 50th wedding anniversary. Today, I ask my fellow colleagues to join me in congratulating them on this spectacular milestone and sending our best wishes for many more years of happiness.

ON THE BIRTH OF MADELYN CLAIRE KAPLAN AND AINSLEY ELIZABETH KAPLAN

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. WILSON of South Carolina. Madam Speaker, I am happy to congratulate my friend Andrew Kaplan and his wife Danleigh Kaplan of Washington on the birth of their new twin girls. Madelyn Claire Kaplan and Ainsley Elizabeth Kaplan were born on July 27, 2008 weighing 5 pounds 2 ounces and 5 pounds 8 ounces respectively. Madelyn and Ainsley have been born into a loving home where they will be raised by parents who are devoted to their well-being and bright future.

I am so excited for this new addition to the Kaplan family. On behalf of my wife Roxanne,

and our entire family, we want to wish Andrew, Danleigh, Madelyn, and Ainsley all the best.

THANK YOU FOUNDATION

HON. JEAN SCHMIDT

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mrs. SCHMIDT. Madam Speaker, I rise today to recognize The Thank You Foundation of Lebanon, Ohio. The Thank You Foundation is an all volunteer, non-profit organization whose stated mission is to show appreciation and express gratitude for those who have served in the United States Armed Forces both past and present.

The Thank You Foundation was created by John Guinn, a veteran of the United States Army and the organization's current President. John's inspiration came from his mother, who worked tirelessly for the Am Vets Organization and served as President of the Ladies Auxiliary, Post 24, in Dayton, Ohio. John's mother Juanita believed that gratitude and appreciation for soldiers and veterans should always be a priority and that without exception our support and respect should be presented publicly.

The Thank You Foundation provides an array of support for our soldiers and veterans. This includes sending care packages to active duty personnel serving overseas; providing resume and job coaching services to veterans and their families; and visiting veterans in care facilities. The Thank You Foundation is currently spearheading a large project to construct a Mobile Health Unit for use by the Veterans Affairs Cincinnati Medical Center. Once completed the mobile unit will travel the Cincinnati region and act as a one-stop center for veterans to enroll for care, receive initial examinations, and have access to mental health counseling. Just recently, The Thank You Foundation visited Walter Reed Army Medical Center, where they helped entertain and bring encouragement to the children of wounded veterans.

Madam Speaker, please join me in recognizing all the amazing volunteers from The Thank You Foundation who continually lend their time to give so much to our men and women in the Armed Forces who preserve our Freedom.

RECOGNIZING JUDGE RAMONA ROBERTS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. KILDEE. Madam Speaker, I ask the House of Representatives to join me in congratulating Judge Ramona Roberts as she retires as a Flint District Court judge. A celebration is planned for August 9th to honor Judge Roberts in Flint, Michigan.

Ramona Roberts graduated from Flint Northern High School in 1964 determined to become an attorney. She attended Flint Junior College, now Mott Community College, and graduated from Michigan State University with high honors. She obtained her Doctorate of Jurisprudence from University of Toledo—College of Law in 1980.

Before returning to her hometown of Flint, Judge Roberts spent time working in Ohio completing legal research. Back in Michigan she spent several years working for Legal Services of Eastern Michigan, UAW Legal Services and as a judicial assistant to former Genesee County Circuit Court Judge Earl E. Borradaile. She entered private practice sharing office space with LoLanda R. Johnson and the soon to be named Chief Genesee County Circuit Judge Archie L. Hayman.

She successfully ran for Judge of the 68th District Court in 1992 because she wanted to bring a woman's perspective to the bench. She has served the people of Flint in this capacity since then. In 1992 she was elected by the highest number of votes for any Flint District Court judge and has been reelected twice, unopposed. In addition to her judicial duties, Judge Roberts has also served as the Financial Secretary of the Judicial Council National Bar Association and in 2002 she was President of the Michigan District Judges Association. She is the past President of the Boys and Girls Club of Flint and their learning center is named in her honor.

Madam Speaker, please join me in wishing Judge Ramona Roberts the best as she enters this new phase of her life. The 68th District Court and the people of Flint are losing a wonderful public servant and a diligent legal mind with her retirement.

REMEMBERING THE 55TH ANNIVERSARY OF THE KOREAN WAR ARMISTICE

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. McCOTTER. Madam Speaker, today I rise to acknowledge and remember the 55th anniversary of the Korean War Armistice and to remember the more than 474,000 Allied troops who lost their lives defending our freedom and liberty.

On June 25, 1950, the North Korean People's Army crossed the 38th parallel in blatant contravention of international law and aggression against South Korean democracy. Under the guise of a counter-attack, the North Korean Army struck on the early Sunday morning behind a firestorm of artillery. The North Korean army advanced quickly and eventually gained control of nearly 90 percent of the peninsula. After days of bloodshed, South Korean and Allied troops pushed North Korean forces back beyond the 38th parallel. Then on October 8, 1950, Chinese forces joined efforts with North Korean troops. Fighting continued for the next two years, and both sides struggled until ultimately ended in a stalemate. By July 27, 1953, a ceasefire was established at the front line which by that time was again the 38th parallel. After three years of full scale fighting, tens of thousands of allied troops and South Korean civilians had died.

Today, South Korea and the United States share a deep and abiding commitment to uphold the ideals of freedom, democracy, justice, and human rights.

Madam Speaker, today many people refer to the Korean War as the ''Forgotten War,'' but we cannot forget the sacrifice of our American service men and women. I ask my colleagues to rise with me in remembering the courage and sacrifice of those lost.

EARMARK DECLARATION

HON. ZACH WAMP

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. WAMP. Madam Speaker, as a leader on earmark reform among House Republicans, I am committed to honoring House Republican rules that provide for greater transparency. The Fiscal Year 2009 Military Construction, Veterans Affairs and Related Agencies Appropriation Act contains the following funding that I requested:

Requesting Member: Rep. ZACH WAMP.

Bill Number: H.R. 5658.

Account: Military Construction, Army National Guard.

Legal Name Requesting Entity: Tennessee National Guard.

Address: 3041 Sidco Drive, Nashville, TN.

Description of Request: $10,372,000 for the construction of a new Army National Guard Readiness Center to replace the inadequate Readiness Center that was constructed in 1954. The existing facility has numerous health and safety issues as well as significant electrical code issues, and ADA violations. The new facility will house the 20th Troop Command, and the Company Headquarters of the 1175th Transportation Company. This project is in the Army National Guard's Fiscal Year 2012 Future Year Defense Plan.

H. CON. RES. 361, A RESOLUTION COMMEMORATING THE LIFE AND ACCOMPLISHMENTS OF IRENA SENDLER

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. HASTINGS of Florida. Madam Speaker, I rise today as an original co-sponsor and strong supporter of House Concurrent Resolution 361, a resolution which commemorates the life of Irena Sendler, a woman whose courage and selflessness saved the lives of thousands of Polish citizens from Nazi brutality during the Holocaust.

I would like to thank my friend and colleague, Congresswoman JAN SCHAKOWSKY of Illinois, for introducing this legislation, as well as the 63 other bipartisan Members of Congress for their co-sponsorship of H. Con. Res. 361.

This important resolution commemorates the work of Irena Sendler, a Polish woman who dedicated her life to saving 2,500 Jewish children from Poland's Warsaw Ghetto and Nazi extermination during the Holocaust. As an early activist during World War II, Sendler joined Zegota, an underground movement that provided a safe haven for Jews who would otherwise be sent to death camps throughout Europe. In addition, Sendler built strong connections in Warsaw's Welfare Department that enabled her to help ferry Jewish children from the Warsaw Ghetto.

Sendler was eventually caught by the Nazis, brutally tortured, and sentenced to death for her heroic acts. However, Sendler managed to escape and continued her work of saving children in the Warsaw Ghetto.

After the Holocaust, Irena Sendler was rewarded for her courageous efforts. In 1965, she was recognized as ''Righteous Among the Nations'' by Yad Vashem in Israel. In 2006, she was nominated for the Nobel Peace Prize. Sendler was also awarded the Order of the White Eagle, Poland's highest civilian decoration.

Irena Sendler passed away on May 12, 2008 at the age of 98. A woman who risked her own life to defend the lives of others, it is appropriate for Sendler to be recognized and honored by the Congress. Her selflessness and courage to fight against hate and genocide should serve as a model for others in our world to combat hatred and intolerance and seek to end the genocide in the Sudan.

It is unacceptable for citizens of this country or any other nation to allow, accept, or tolerate acts of hatred. Yet worldwide discrimination continues to exist and Holocaust deniers still serve as leaders of nations.

In honoring the life of Irena Sendler and her courageous acts to save Jewish children from the Nazis, we pay tribute to the righteous among us and reaffirm our commitment to combating worldwide acts of discrimination. I send my condolences to the Sendler family and hope Irena's story will encourage all citizens of the world to uphold justice, equality, and human rights.

I urge my colleagues to vote in favor of this legislation.

EARMARK DECLARATION

HON. KEVIN McCARTHY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MCCARTHY of California. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding an earmark I received as part of H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act, 2009.

Requesting Member: Congressman KEVIN MCCARTHY.

BM Number: H.R. 6599.

Account: Military Construction, Air Force.

Project Amount: $6,000,000.

Legal Name of Recipient Military Installation: Edwards Air Force Base.

Address of Recipient Military Installation: 1 S. Rosamond Blvd., Edwards AFB, CA.

Description of Request: This funding would complete construction of the main base runway at Edwards Air Force Base, CA. The funding will be used to complete paved shoulders on the runway and account for extra costs in the overall runway replacement project from items such as the stabilization of over 41,000 cubic yards of both unsuitable and unstable soil.

The main base runway, which supports almost every flight operation at Edwards Air Force Base, as well as space shuttle landings when necessary, is over 50 years old and is rapidly degrading as a result of Alkali-Silica Reaction (ASR), a reaction between the cement and the aggregate that creates map cracking, scaling and spalling of the concrete. Emergency Foreign Object Damage (FOD) repairs have forced runway closures affecting 10 to 15 flights for each closure. No other runways at Edwards AFB can safely support the current and projected test operations without significant test mission delays, and temporary relocation of these missions is not feasible; however, many of the current and planned test missions can be supported by a temporary runway.

This project was programmed by the Air Force in 2003 for FY06, and was incrementally funded over 3 years (FY06, FY07 and FY08). After the project was programmed, the cost of construction materials escalated dramatically, eliminating all management reserve and resulting in a reduction in the planned scope of the project. Providing the final $6,000,000 in FY09 will complete the project as originally scoped, avoid contractor demobilization and remobilization, and avoid reconstitution of the temporary runway to support this work, saving the government over $4,000,000 in cost avoidance on the temporary runway alone.

CONGRATULATING THE UNIVERSITY OF MICHIGAN'S SOLAR CAR TEAM FOR WINNING THE NORTH AMERICAN SOLAR CHALLENGE

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. DINGELL. Madam Speaker, I rise today to congratulate the University of Michigan's Solar Car Team on their recent victory in the North American Solar Challenge.

The team finished the 2,400-mile course in just over 50 hours, and beat 15 other universities, including the second-place team by an astonishing 10 hours. The victory marks the University's fifth in the nine races since the North American Solar Challenge began in 1990.

The University of Michigan Solar Car Team is an entirely student-run organization whose purpose is to design, finance, build, and race a solar-powered vehicle in competitions around North America and the world. With more than 100 members, Solar Car is one of the largest student organizations on campus, including students from the College of Engineering, the College of Literature, Science, and the Arts, the Ross School of Business, the School of Art and Design, and the School of Education.

This victory is a testament to the team's hard work, creativity, and determination. Many of the students have worked on their car for two years. They raised money, created new systems, tested their designs, and made the necessary tweaks to ensure the car was ready for competition. All of this hard work paid off on Tuesday, when they captured their fifth title.

As University President Mary Sue Coleman said, ''These students have demonstrated the promise of alternative energy and new technologies with the championship run of their car, Continuum. The campus community applauds such an impressive performance in this year's race.''

Madam Speaker, I ask that my colleagues join me in congratulating the students and faculty supervisors of the University of Michigan's Solar Car Team.

INTRODUCTION OF NATIONAL CONSUMER COOPERATIVE BANK ACT AMENDMENTS OF 2008 JULY 29, 2008

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mrs. MALONEY of New York. Madam Speaker, I rise to offer the National Consumer Cooperative Bank Act Amendments of 2008. This legislation is necessary to make a technical correction to the statute of the National Consumer Cooperative Bank Act.

The National Consumer Cooperative Bank, NCB, was created by Congress in 1978 and is dedicated to strengthening communities nationwide through the delivery of banking and financial services, complemented by a special focus on cooperative expansion and economic development.

The National Consumer Cooperative Bank Act of 1978 established a non-profit corporation to reach further into low income communities and to serve disadvantaged populations. NCB Capital Impact is that non-profit, mission-driven subsidiary of NCB that works to provide housing, education, healthcare, cultural centers, small businesses and social services in economically distressed communities.

In the last 10 years alone, NCB Capital Impact has invested more than $600 million in assistance to low- and moderate-income communities. Cumulatively, these funds helped finance 32,000 affordable housing units, 8,700 affordable assisted living units for seniors and persons with disabilities, 94,000 school seats, 2.4 million square feet of community health center space serving 350,000 patients, and helped created 15,000 jobs for low-income individuals.

In my home city of New York, NCB Capital Impact has played a significant role in providing housing finance to much of New York's 14th District. In fact, NCB has participated in more than 600 loans in my district alone. Most of these loans are for housing, including affordable housing, as well as loans for community facilities and loans to non-profit organizations like the Council of New York Cooperatives and Condominiums. Together, these groups are able to provide assisted living, affordable housing and services to the frail and elderly. Presently, NCB Capital Impact is working with 5 community-based organizations to help finance 17 projects that will create 558 housing units.

Despite their good work in serving low-income communities and disadvantaged populations, NCB Capital Impact is not eligible for assistance authorized under the Community Development Banking and Financial Institutions Act of 1994, which is administered by the CDFI Fund. The Fund has ruled it cannot certify NCB Capital Impact as a CDFI because of the corporate structure of its parent NCB. In short, NCB Capital Impact is shut off from critical sources of financial awards that are needed to maintain their housing and community development efforts.

The interest of NCB Capital Impact in gaining CDFI certification is two-fold. First, it has a track record that is comparable to other organizations that received CDFI status; its mission is dedicated to working with low income populations and communities. Second, increasingly in the community development finance field, CDFI certification is viewed as a 'good housekeeping seal' of approval in working with other Federal agencies and other private and public institutions.

I urge my colleagues to join me in supporting this technical amendment to the NCB statute so that the non-profit, mission-driven NCB Capital Impact may continue to provide services to distressed and underserved communities throughout New York and the country at-large.

REMEMBERING THE 34TH ANNIVERSARY OF THE TURKISH INVASION OF CYPRUS

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. McCOTTER. Madam Speaker, today I rise to acknowledge and remember the 34th anniversary of the Turkish invasion of Cyprus, to mourn the thousands of Greek Cypriots who lost their lives, and to condemn Turkey's ongoing occupation of the Republic of Cyprus.

On July 20, 1974, Turkey invaded the island in blatant contravention of international law. After days of bloodshed, Turkey's soldiers maintained a stronghold in the north, and eventually gained control of roughly 37% of the island. As a result of the invasion and occupation, approximately 200,000 Greek Cypriots were forced from their homes and over 5,000 were killed. Furthermore, over 1,400 Greek Cypriots, including 4 Americans, remain missing since the start of Turkey's onslaught.

Cyprus and the United States share a deep and abiding commitment to uphold the ideals of freedom, democracy, justice, and human rights. The international community has a moral and ethical obligation to stand with persecuted Cypriots, reunify the island, and end Turkey's military occupation.

Madam Speaker, we cannot forget the realities of what took place on July 20, 1974, in Cyprus, nor can we continue to ignore the ongoing human rights violations by Turkey's occupying army. Today, I wish to offer my support for a single independent and sovereign Cyprus, which not only respects human rights, but the fundamental freedoms of all Cypriots.

A TRIBUTE TO REVEREND JAMES S. ALLEN

HON. ROBERT A. BRADY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. BRADY of Pennsylvania. Madam Speaker, I rise to recognize my dear friend, Rev. James S. Allen, in honor of his 30th anniversary as pastor of the Vine Memorial Baptist Church of Philadelphia. Reverend Allen has carried the torch for human rights throughout his career and has brought that same passion to his ministry in Philadelphia. Through his work, he has touched the lives of numerous members of my community and continues to be a blessing to all those who encounter him.

Born in rural Arkansas, Reverend Allen was a firsthand witness to the injustices of racial segregation. The young Reverend Allen walked 4 miles both ways to his segregated three-room schoolhouse every day, and in spite of the challenge, he went on to become valedictorian of his high school's graduating class. After Reverend Allen joined the United States Air Force and honorably served in the Korean War until 1956, he returned home to the ever burgeoning issue of racial equality and discovered his life's calling in the ministry. When the integration orders handed down in Brown v. Board of Education were jeopardized, Reverend Allen joined the fight to uphold its central purpose of racial equity. The day that President Eisenhower ordered military troops into Little Rock to ensure its desegregation, Reverend Allen, with the same thought in mind, enrolled at the Arkansas Baptist College.

As a champion of human rights, Reverend Allen has made his mark in a number of places. He assisted Dr. Leon Sullivan in planning the first and second African American Summits and has worked extensively with the Opportunities Industrialization Centers of America Incorporated to help members of his community find and maintain jobs. Reverend Allen has served in numerous leadership positions for various organizations. Most notable has been his service as vice-president of National Baptist Congress of Christian Education and as the first president of the Black Clergy of Philadelphia and Vicinity. Reverend Allen also served as a special assistant to the first African American mayor of Philadelphia, W. Wilson Goode. Currently, Reverend Allen serves as the chairman of the Philadelphia Commission on Human Relations. Above his charitable contributions to the community at large, he is also a loving husband, father, and grandfather.

Madam Speaker, Reverend Allen has been a minister for 51 years, 30 of which have been at the Vine Memorial Baptist Church of Philadelphia. He has served the people of many cities, making a lasting impact everywhere he has been. As a valued member of my community, I ask that you and my other esteemed colleagues join me in congratulating Reverend Allen on this occasion of achieving 30 years of pastoral excellence in Philadelphia and a growing legacy of human rights successes.

EARMARK DECLARATION

HON. J. RANDY FORBES

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. FORBES. Madam Speaker, consistent with Republican earmark standards, the following are detailed finance plans for each of my requested projects in the H.R. 6599, Military Construction and Veterans Affairs Appropriations Act for FY 2009.

Requesting Member: Congressman J. RANDY FORBES.

Bill Number: H.R. 6599.

Account: Military Construction, Navy.

Legal Name of Requesting Entity: Norfolk Naval Shipyard.

Address of Requesting Entity: Norfolk Naval Shipyard, Portsmouth, VA, USA.

Description of Request: Provide $10,590,000 to make Industrial Access Improvements at Main Gate 15 at the Norfolk Naval Shipyard. Mandatory vehicle access control at military installations is a Department of Defense (DoD) requirement per DoD Directives 5200.8 and 5200.8R. Based on a Staff Integrated Vulnerability Assessment conducted in October 2006, the entrance and guardhouse configuration at Gate 15 are inadequate for both industrial access and from a security/safety standpoint and require upgrading. This project provides for industrial access improvements of Gate 15 including the truck and private automobile inspection area, Pass Office Renovations and counterterrorism measures at Gate 15.

Requesting Member: Congressman J. RANDY FORBES.

Bill Number: H.R. 6599.

Account: Military Construction, Army National Guard.

Legal Name of Requesting Entity: Fort Pickett.

Address of Requesting Entity: Fort Pickett, VA, USA.

Description of Request: Provides $2,950,000 to be used to construct a Multipurpose Machine Gun Range for training purposes with a variety of firearms and weapons for the Virginia National Guard and other Army and Guard units along the East Coast. Full budget documentation is a part of the President's Fiscal Year 2009 Department of Defense budget request.

Requesting Member: Congressman J. RANDY FORBES.

Bill Number: H.R. 6599.

Account: Military Construction, Army.

Legal Name of Requesting Entity: Fort Lee.

Address of Requesting Entity: Fort Lee, VA, USA.

Description of Request: Provides $90,000,000 to construct a standard-design training barracks complex for advanced initial training for Army soldiers. This project supports the increase in trainee requirements at Fort Lee as part of the increase in permanent end strength of the Army. The estimated and intended use is 1,200 soldiers. All existing adequate facilities are being fully utilized to support current operations. If this project is not provided, there will not be sufficient adequate permanent facilities to support the Grow the Force initiative and soldiers will continue to work out of temporary and/or relocatable buildings which have limited operational capabilities and limited useful life expectancies. Full budget documentation is a part of the President's Fiscal Year 2009 Department of Defense budget request.

Requesting Member: Congressman J. RANDY FORBES.

Bill Number: H.R. 6599.

Account: Military Construction, Army.

Legal Name of Requesting Entity: Fort Lee.

Address of Requesting Entity: Fort Lee, VA, USA.

Description of Request: Provides $10,300,000 to provide a dining facility to support an increase in the number of soldiers who will receive Advanced Individual Training at Fort Lee. This project supports the Grow the

Force initiative. It will enable the Army to meet the greater training throughput requirement that will result from the increased size of the Army. All existing adequate facilities are being fully utilized to support current operations as well as Army Modularity and Global Defense Posture Realignment (GDPR) initiatives. If this project is not provided, there will not be sufficient adequate dining facilities to support the training requirement as a result of the Grow the Force initiative. All physical security measures and antiterrorism protection measures are included. The Deputy Assistant Secretary of the Army (Installations and Housing) certifies that this project has been considered for joint use potential. Full budget documentation is a part of the President's Fiscal Year 2009 Department of Defense budget request.

EARMARK DECLARATION

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. TIAHRT. Madam Speaker, I submit the following:

H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act; 2009, contains $6,800,000 for MXG Consolidation and Forward Logistic Center, Phase 2 in the Air Force, Military Construction account.

This project is for McConnell Air Force Base located at 57837 Coffeyville St., Kansas, 67221.

The funds will help complete phase two of the Maintenance Group (MXG) Consolidation and Forward Logistics Center that will streamline many different facilities into one maintenance facility, resulting in improved military operations and saving taxpayer dollars by reducing operations and maintenance spending.

No matching funds are required for this military construction project.

TRIBUTE TO FATHER PAUL TIPTON

HON. JAMES P. McGOVERN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MCGOVERN. Madam Speaker, on May 25, my friend, Father Paul Tipton, passed away. He was an incredible man with an irreverent sense of humor who accomplished great things.

I first met Father Tipton in 1989. He was the President of the Association of Jesuit Colleges and Universities and I was a staffer for Congressman Joe Moakley (D–MA). On November 16th of that year, six Jesuit priests, their housekeeper and her daughter were murdered by members of the U.S.-backed Salvadoran Armed Forces. A cover-up ensued and there was a strong sense that the truth would never be known.

Father Tipton organized the Jesuit community in the United States—including all the Jesuit college and university Presidents—to put pressure on the U.S. and Salvadoran governments and demand truth and justice in this tragic case. He worked closely with Congressman Moakley, who headed a special task force that was established to investigate these crimes. His no-nonsense style and his tough talk earned him the nickname ''Father John Wayne.'' He wouldn't give up—and ultimately he helped find the truth.

Father Tipton dedicated his life to helping people and making the world a better place. In addition to his work in El Salvador, he was a champion for education and making sure that everyone who wanted an education could afford to get one. He was a great man and a great friend. I miss him.

Madam Speaker, I would like to ask unanimous consent to insert Father Tipton's obituary, which appeared in the Washington Post on Sunday, June 1, 2008, into the RECORD.

[From the Washington Post, June 1, 2008]

PAUL TIPTON; EXPOSED JESUIT DEATHS IN EL SALVADOR

(By Patricia Sullivan)

Paul Smallwood Tipton, 69, who, while president of the Association of Jesuit Colleges and Universities helped expose the assassination of six Catholic priests, their their housekeeper and her daughter by the Salvadoran army, died of cancer May 25 at Georgetown University Hospital. He lived in the District and Lusby.

Rev. Tipton had just started at the association when he received a call telling him that the sole witness to the Nov. 16, 1989, murders of six Jesuits and two women at Central American University in San Salvador was detained and interrogated by Salvadoran officials, the U.S. State Department and the FBI. He flew from Washington to Miami and took custody of Luisa Cerna, the housekeeper and her husband.

He became active in the case, writing letters that accused the U.S. ambassador of attempting to discredit her.

''The reason we Jesuits in the United States are very angry is that the mistreatment of the Cernas effectively has neutralized the only witness who has come forward, and it means probably no other witness will come forward,'' he told the New York Times at the time. ''This particular institution is a voice for peace and justice, and pursuing the people who pulled the triggers is a very personal matter for us.''

Rev. Tipton later made several trips to El Salvador with U.S. Rep. Joe Moakley, the Massachusetts Democrat who led the congressional task force investigating the killings. The revelations led to a cut in U.S. foreign aid to the Salvadoran government, resolution of the country's civil war and election of a new government.

Rev. Tipton was born in Birmingham Ala., and began studying to be a Jesuit priest in 1958. He attended the University of Virginia and graduated from Spring Hill College in Mobile, Ala. He taught at an El Paso high school, while attending graduate school at the University of Texas at El Paso.

In 1968, he joined the staff of U.S. Rep. Richard C. White (D–Tex.) and did further graduate work in theological studies at Woodstock College in Maryland, Union Theological Seminary in New York and Catholic University. He was ordained a Jesuit priest in 1971 in New Orleans.

The following year, he was named the president of Spring Hill College, where he worked for 17 years. While there, he and a crew of students raced a 40 foot sloop, ''Holy Smoke,'' in a 180-mile overnight trip in the Gulf of Mexico in 1983. Halfway through the race, an intense storm with near-hurricane strength winds generated 20-foot waves. Rev. Tipton and his crew headed home but almost a third of the 29 boats had major problems. The Coast Guard responded to three Mayday calls and one sailor drowned.

Rev. Tipton, who was chairman of the offshore committee of the Gulf Yachting Association, which had sponsored the race, found two of the missing crews the next day on a barrier island according to a contemporaneous article in the New York Times.

He worked at the association of Jesuit Colleges and Universities in Washington from 1989 until 1996, overseeing the legislative activities of the 28 Jesuit postsecondary schools in the United States.

When Georgetown Visitation Preparatory School caught fire July 8, 1993, Rev. Tipton helped lead nuns out of their monastery into the courtyard, then joined other priests in rescuing priceless vestments, chalices, and paintings. With a friend, Davis Feickert, he removed a massive 1821 painting of Jesus, Mary and Martha in prayer, donated to the Sisters of Visitation by Charles X of France.

By 1996, when he became president of Jacksonville University in Florida, Rev. Tipton had left the Jesuits and become a diocesan priest. He returned to Washington in 2000, working as a counselor to the secretary of labor. In 2001, he started the Provident Consulting Group to provide services to nonprofit and faith-based organizations a group he ran until his death.

In 2003, he became president of St. Mary's Ryken High School, a Catholic college preparatory school in Leonardtown, where for the next two years he developed a long-range financial plan, recrafted the misson statement and increased annual giving by 100 percent.

He was a member of numerous education and civic boards.

He had no immediate family survivors.

H.R. 6340, ''CHARLES L. BRIEANT, JR. FEDERAL BUILDING AND UNITED STATES COURTHOUSE''

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. OBERSTAR. Madam Speaker, I rise in strong support of H.R. 6340, a bill to designate the Federal building and United States courthouse in White Plains, New York, as the ''Charles L. Brieant, Jr. Federal Building and United States Courthouse''. I commend the gentlewoman from New York, Ms. LOWEY, for her steadfast actions to ensure that this bipartisan bill received timely consideration.

Judge Brieant was an eminent jurist who recently died at the age of 85. He maintained a full docket until he moved to senior status in 2007. Judge Charles Brieant, Jr. was born in 1923 in Ossining, New York, and served in his hometown during his entire professional career. He graduated from Columbia University and Columbia Law School.

He began his public service practicing in White Plains, New York, while serving as water commissioner for the town of Ossining, New York. Judge Brieant was elected Ossining town justice in 1952 before serving as village attorney for Briarcliff Manor, New York.

From 1960 through 1963, he served as town supervisor for Ossining. He also served in the New York legislature in 1970 and 1971. In 1971, President Richard M. Nixon nominated Judge Brieant to serve on the District Court for the Southern District of New York. He served as Chief Judge for the Southern District of New York from 1986 to 1993. Last year, Judge Brieant took senior status.

During his distinguished career, Judge Brieant received many awards and honors including the Servant of Justice Award from the Guild of St. Ives in 1998 and the Edward Weinfeld Award for Distinguished Contributions to the Administration of Justice in 2006.

During his lengthy career, Judge Brieant rendered many important decisions, including the Texaco bankruptcy case, and the decision to overturn New York's primary system, declaring it ''unconstitutionally discriminating'' by diluting the voting strength of minority voters. He was known as a strong independent thinker, a true gentleman, and a mentor to young lawyers.

It is both fitting and proper to honor Judge Brieant's distinguished public career with this designation. I urge my colleagues to join me in supporting H.R. 6340.

HOUSING AND ECONOMIC RECOVERY ACT OF 2008

SPEECH OF

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 23, 2008

Mr. BACA. Mr. Speaker, the foreclosure crisis is hurting communities all across the Nation and my district has been especially impacted: In San Bernardino County, 11,817 notices of default were recorded in the first quarter, 130 percent more than a year earlier.

Everyone pays when there are foreclosures. Crime increases, home values decline, schools are affected, and cities run deficits which impacts revenues for local police, fire, and social services.

Last Wednesday, I came to the floor in support of a legislative package that would stimulate our Nation's struggling economy and help prevent foreclosures. The House passed the American Housing Rescue and Foreclosure Prevention Act of 2008 with bipartisan support on that same day and the Senate approved it last Saturday, sending the bill straight to the President for his signature.

I am particularly pleased that the final package included an important housing counseling provision which I offered with support from Reps. MAHONEY from Florida and MCCARTHY from New York. This provision directs the Neighborhood Reinvestment Corporation to give greater consideration to counseling agencies that have a demonstrated track record in working with servicers and that provide in-person contact and in-person [face-to-face] housing counseling to borrowers in trouble when awarding their grants. It evolved out of the growing concern that despite all of the media attention given to the foreclosure crisis, as well as the creation of the HOPE Now Alliance, many homeowners were still not receiving assistance they needed to avoid entering foreclosure. According to a Freddie Mac study, 56 percent of homeowners don't even know free counseling exists. Also, counselors across the country have reported delays and challenges connecting with telephone counseling. Counselors that receive referrals from hotlines often have to start fresh with the client, and language minorities report having difficulty reaching a live counselor.

Whenever possible, in-person foreclosure counseling is preferable over telephone counseling alone. In fact, one-on-one counseling is shown preference in the HUD Housing Counseling Program—one that has demonstrated enormous success.

Of course, the intention of this provision is not to exclude any struggling family. If telephone counseling is the only means of support available, the family should absolutely have access to it. The intention is to promote first the most effective and efficient services to families, then ensure a back up is in place. Telephone counseling should augment and supplement in-person counseling when it is unavailable or work is overflowing. Not the other way around.

The intent of the effort which I have described is to make housing counseling dollars as effective as possible and to reach as many borrowers in trouble as possible. Providing in-person outreach to homeowners in trouble and in-person housing counseling is more effective than just sending a default notification in the mail. Having someone individually reach out to these borrowers to work through their options to avoid foreclosure by analyzing their specific situation, including their loan document, is a necessary line of prevention and defense.

My amendment simply directs some of the counseling funding in the American Housing Rescue and Foreclosure Prevention Act (H.R. 3221) to organizations that already promote this proven method.

It is our hope that the lenders, servicers, and federally regulated and federally chartered institutions like the GSEs and HUD would also do everything possible to include in-person outreach and in-person counseling in their efforts, including working with organizations that have the demonstrated capacity to reach out to homeowners needing assistance. Increasing this type of outreach and assistance is especially critical in non-judicial foreclosure states where notice of default and foreclosure is limited.

We also hope the language in this bill will help level the playing field to ensure organizations with established servicer partnerships and the demonstrated experience and capacity to offer more in-depth service through in-person counseling and outreach can receive grant funding so that they have the resources they need to assist those hard-to-reach borrowers.

This is good public policy and good business because it will increase loan modifications and decrease foreclosures and thereby minimize the adverse impact on local communities. It will also strengthen relationships between counseling agencies, servicers, and lenders to enhance outreach out to borrowers who are behind in their payments. More importantly, it will help keep struggling families in their homes.

Mr. Speaker, I am also pleased that the American Housing Rescue and Foreclosure Prevention Act contains another provision I authored in my bill, H.R. 4019, the Mortgage Disclosure Improvement Act and I want to thank Senator REED (RI) the author of the companion bill, for his leadership in shepherding this provision in the Senate. This provision will ensure that consumers are provided with timely and meaningful disclosures in connection with not just home purchases but also for loans that refinance a home or provide a home equity line of credit. It requires that mortgage disclosures be provided within 3 days of application and no later than 7 days before closing. This should allow borrowers to shop for another mortgage if they are not satisfied with the terms. If the terms of the loan change, the consumer must be notified 3 days before closing of the changed terms.

If consumers apply for adjustable rate or variable rate payment loans, there will now be an explicit warning on the 1-page Truth in Lending Act form that the payments will change depending on the interest rate and an estimate of how those payments will change under the terms of the contract based on the current interest rate. The bill also provides a new disclosure that informs borrowers of the maximum monthly payments possible under their loan.

The bill provides the right to waive the early disclosure requirements if the consumer has a bona fide financial emergency that requires they close the loan quickly and increases the range of statutory damages for TILA violations from the current $200 to $2,000 to a range of $400 to $4,000.

Finally, it requires lenders to include a statement that the consumer is not obligated to purchase the mortgage loan just because they received the disclosures. This will give consumers the opportunity to truly shop around for the best mortgage terms for the first time ever. They will be able to compare the payments and costs associated with a certain loan product and decide not to sign on the dotted line if they do not like the basic terms of the loan.

This will help prevent foreclosures in the future especially given the fact that many consumers facing foreclosure on their homes who have adjustable rate mortgages never understood how their loan products worked or how high their payments would be once their loans reset.

EARMARK DECLARATION

HON. TOM FEENEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. FEENEY. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding earmarks I received as part of H.R. 6599, the FY 09 Military Construction and Veterans Affairs Appropriations bill:

I sent the attached letter to the Appropriations committee members on February 4, 2008 asking for complete funding for the veterans hospital being built in Orlando, FL.

The funds for the new medical facility in Orlando, FL come from the Major Construction account under Veterans Affairs. The United States Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, will be receiving the funds. The $220,000,000 will be used toward construction, site preparation, installation of utilities, roads, and an energy plant.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, February 4, 2008.

Hon. ROGER WICKER,
Rayburn House Office Building,
Washington, DC.

DEAR RANKING MEMBER WICKER: I am writing to request that Congress include full funding for the completion of the VA hospital to be located in Orlando, Florida. The

President's budget released today allocates $120 million for the hospital. In order to insure the swift completion of the Lake Nona hospital it is imperative that the VA receive full funding in this budget year.

Today, there are more than 26.5 million veterans living in the United States and Puerto Rico with more than 1.8 million of them residing in the State of Florida. That is the second highest total in America, second only to California. More than one-third of these live in the Central Florida area alone.

According to the VA, Central Florida is the number one destination for combat veterans 65 years of age or older. It is also the number one area for veterans who have 50 percent or more service connected disability and 18 percent of our veterans have Post Traumatic Stress Disorder.

The Department of Veterans Affairs has estimated the cost to complete this hospital at $597 million. This hospital is a top priority for the VA and is badly needed in central Florida. It is vital that the remaining $537 million, to finish construction, is included in the Fiscal Year 2009 Military Construction appropriations bill.

I hope you will consider the inclusion of these funds as you work through the many important requests during the FY09 appropriations process.

Sincerely,

TOM FEENEY,
Member of Congress.

LETTER TO HIS HOLINESS BENEDICT XVI FROM REPRESENTATIVE MCCOTTER

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MCCOTTER. Madam Speaker, today I rise to place into the RECORD my letter to His Holiness Benedict XVI concerning the persecution of the Christian community in Iraq.

JULY 24, 2008.

His Holiness BENEDICT XVI,
Apostolic Palace,
Vatican City State, Europe.

YOUR HOLINESS: It is with great respect that I write to you as both a Member of Congress and a Roman Catholic. Your witness to justice and advocacy of the plight of the persecuted is an instrument of hope.

Your Holiness has emphasized the importance to the Church of the well-being of the ancient Christian community of Iraq. It is now widely acknowledged to be an ''endangered'' community, with nearly half of its members forced to flee Iraq over the past five years. As the U.S. Conference of Catholic Bishops Migration & Refugee Services reported last July: ''Especially critical is the plight of Iraq's minority religious communities, including Christians and Mandeans (or Sabeans). These groups, whose home has been what is now Iraq for many centuries, are literally being obliterated—not because they are fleeing generalized violence but because they are being specifically and viciously victimized by Islamic extremists and, in some cases, common criminals.''

As you meet with Prime Minister Nouri al-Maliki tomorrow, please know that the United States is shifting its burden to the Iraqi government. It is imperative that he acknowledge and commit to the future well-being of Iraq's endangered religious minorities.

Concerned Americans, including the ChaldoAssyrian Christians in my Congressional district, are anxious that the Maliki government address the following issues to ensure that the Iraqi Christians, who have made contributions to Iraqi society far beyond what their numbers suggest, and other smallest minorities are able to maintain their presence as part of the national fabric of that country: Security, including protection for their vulnerable clergy, development assistance, humanitarian aid for the large number of displaced among them, educational opportunities, full civic participation, including thorough measures to guarantee free and fair provincial elections later this year that would allow them just representation, and equal treatment under the constitution that would allow political autonomy in the Nineveh Plains.

Be assured that I will remain actively engaged with the ChaldoAssyrian Church and civic leaders in the United States and Iraq to protect the fundamental dignity of this oppressed ancient community of Iraq.

The psalmist seeking deliverance from his enemies remembers the great mercy of God. ''Blessed be the Lord! For he has shown me the wonders of his love in a besieged city . . . Be strong and let your heart take courage, all you who wait for the Lord'' (Psalm 31: 21,24) The Christians of Iraq have suffered threats of violence, kidnappings, murder and being exiled from their ancient homeland. And yet, they are resilient in the face of what is certainly an existential threat. Their great faith and your advocacy on their behalf, give them hope.

I have the honor to profess myself with the most profound respect, your Holiness, sincerely yours,

THADDEUS G. MCCOTTER,
Member of Congress.

EARMARK DECLARATION

HON. PETER T. KING

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. KING of New York. I submit the following:

Requesting Member: Congressman PETER T. KING

Bill Number: H.R. 6599.

Account: Military Construction, Air National Guard.

Legal Name of Requesting Entity: New York National Guard.

Address of Requesting Entity: 330 Old Niskayuna Road, Latham, NY 12110.

Description of Request: $7.5 million will be used to construct Phase II of the Pararescue Facility. The use of taxpayer dollars is justified because The Francis Gabreski Air National Guard Base improves pararescue operations and survival equipment functions on Long Island.

INTRODUCING THE FOSTER CHILDREN OPPORTUNITY ACT

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. STARK. Madam Speaker, I rise today with Representative XAVIER BECERRA to introduce legislation aimed at ensuring all foster children have a fighting chance to lead healthy and productive lives after they leave care.

Each year, hundreds and perhaps thousands of abused and neglected children leave the child welfare system and become illegal immigrants through no fault of their own. Under current law, abused and neglected immigrant children in the child welfare system are eligible to become legal permanent residents under the Special Immigrant Juvenile Status (SIJS) provisions of immigration law. In order to obtain SIJS, a court must find that the child is in long-term foster care with no opportunity for family reunification (either in the U.S. or in their home country). If a child also meets additional immigration criteria, such as not having a criminal record, they can become a Legal Permanent Resident. Once a child leaves the child welfare system, however, they are no longer eligible for SIJS. A series of articles in the Los Angeles Times and other reports have documented how children have aged-out of foster care or been adopted without obtaining SIJS. The result is that these abused and neglected children are forced into the underground economy, are extremely vulnerable to exploitation, and are under the constant threat of deportation back to a country that is unfamiliar to them and may be home to their abuser.

The Foster Children Opportunity Act aims to correct this terrible situation by requiring that all children in the foster care system be screened for SIJS eligibility and assisted through the legal process to obtain SIJS and eventually Legal Permanent Resident Status. The bill will provide technical assistance to help child welfare agencies better understand this problem and provide resources to train judges, attorneys, and other legal workers in a complex area of law.

This legislation will not change any aspect of current immigration law, nor will it result in any adults who have engaged in illegal behavior from gaining legal status. The bill simply aims to protect abused and neglected children by ensuring they have a fighting chance at leading healthy and productive lives when they exit foster care.

The Foster Children Opportunity Act will:

Require State plans for foster care and adoption assistance to document procedures to assist immigrant children in obtaining SIJS, Legal Permanent Residency, or other appropriate forms of immigration relief when doing so is in the child's best interest;

Require child welfare agencies to assist immigrant children, and document their efforts, in obtaining SIJS, Legal Permanent Residency, or other appropriate forms of relief under immigration law before the child exits foster care;

Require juvenile courts and child welfare agencies to determine whether filing petitions or appointing immigration counsel for a potentially SIJS eligible child is in that child's best interest;

Permit the Court Improvement Program to use funds to educate and train judges and lawyers to assist SIJS-eligible foster children;

Direct the Secretary of the Health and Human Services Agency, in consultation with the Secretary of Homeland Security, to provide technical assistance to child welfare agencies in carrying out the provisions of this bill.

Members on all sides of the immigration debate should put down our differences when it comes to protecting abused and neglected children. We should not let the poisonous politics of immigration interfere with helping foster

children become successful adults. I encourage all of my colleagues to join us me in supporting this simple legislation that will improve the lives of thousands of our most vulnerable children.

EARMARK DECLARATION

HON. TERRY EVERETT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. EVERETT. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding two earmarks I received as part of H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Request No. 1:

Requesting Member: Congressman TERRY EVERETT.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction/U.S. Army.

Legal Name of Requesting Entity: U.S. Army/Congressman TERRY EVERETT.

Address of Requesting Entity: Office of Command, Fort Rucker, 453 Novosel Street, Fort Rucker, Alabama 36362–5105.

Description of Request: The Chapel Center at Fort Rucker earmark request is for $6,800,000. The funding is for the construction of a standard-design chapel complex featuring a sanctuary (400 seat capacity) and an activity center that is capable of seating an additional 239 people in a separate or combined service. The sanctuary will include a raised pulpit area and a baptismal suite. The facility also will include 15 religious education classrooms, two multi-purpose rooms, a blessed sacrament room, sacrisity/robing room, choir room, resource center, nursery, restrooms, kitchen, storage, and administrative space for two Chaplains, Education Director and Assistant.

Additionally, some of the funding will be used for connection to the energy monitoring and control system (EMCS) and interior communications/building information systems and supporting utilities and other expenses in building of the Chapel Center.

Request No. 2:

Requesting Member: Congressman TERRY EVERETT.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction/ U.S. Air Force.

Legal Name of Requesting Entity: U.S. Air Force/Congressman TERRY EVERETT.

Address of Requesting Entity: Maxwell-Gunter Air Force Base, Montgomery, Alabama 36112–5000.

Description of Request: This funding will be used for the Air and Space Basic Course Combat Arms Training Facility at Maxwell-Gunter Air Force Base. The funding will be used to construct a 56-position, 50-meter small arms firing range with automated range target system, and a 639 SM support facility constructed with reinforced concrete foundation and floor slab, structural steel frame, masonry walls and sloped architecturally compatible roof. The $15,556,000 for this project was also included in the Administration's Fiscal Year 2009 budget.

TRIBUTE TO IRENE NELSON

HON. JAMES P. McGOVERN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MCGOVERN. Madam Speaker, I rise today to pay tribute to Irene Norman Nelson on the occasion of her 90th birthday.

Irene Nelson is one of the most extraordinary people I have ever met. She has been a longtime and treasured friend to my family and me. She is a woman of impeccable class, grace and integrity. She has a love and appreciation of life that is inspiring. And she has a wonderful sense of humor.

I cherish my memories of being with Irene at family events, vacations and trips to the theater. I enjoy our conversations. I admire her commitment to the arts and all things beautiful.

Madam Speaker, as a U.S. Congressman, I am privileged to meet many fascinating and incredible people. Irene, without a doubt, is at the top of that list.

I ask that my colleagues join me in wishing Irene Nelson a happy and healthy birthday.

STATEMENT IN SUPPORT OF H.R. 5170, H.R. 5983, H.R. 5531, H.R. 2490, H.R. 6193, H.R. 4806, H.R. 3815, and H.R. 6098

HON. DONNA M. CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mrs. CHRISTENSEN. Madam Speaker, I rise today in support of these Homeland Security bipartisan measures. I would like to commend Chairman THOMPSON and Ranking Member KING for their efforts to bring these bills to the floor today. I would also like to congratulate the authors of these bills Congresswoman HARMAN and Congressmen CARNEY, LANGEVIN, KING, BILIRAKIS, REICHERT, and PERLMUTTER.

Individually, the bills presented today improve operations within the Department of Homeland Security, including issues related to privacy, information sharing and enhanced security. Collectively, they improve on the provisions of H.R. 1, the Implementing 9/11 Commission Recommendations Act.

Protecting the privacy of our citizens is an important but very difficult issue to balance in our Nation's war against terrorism. Under H.R. 1570, the presence of a full-time Component Privacy Officer would ensure that privacy considerations remain at the forefront and are integrated into the decisionmaking process at all of the DHS Components.

Through our oversight work, it is clear that DHS's information systems have been penetrated and remain vulnerable to cyber attacks. H.R. 5983, the Homeland Security Network Defense and Accountability Act of 2008, represents a critical step toward improving the cybersecurity network at DHS by ensuring a robust defense of its information systems, and holding individuals at all levels accountable for mitigating vulnerabilities.

While protecting DHS information systems is critical to our Nation's security, we also need to be mindful of the importance and need for information sharing. H.R. 6193, H.R. 4806 and H.R. 3815 address the need for information sharing in a secure manner. H.R. 6193—Improving Public Access to Documents Act of 2008—dovetails with H.R. 4086's effort to remove obstacles to more and better information sharing in the unclassified category.

Our offshore territories are the first point of entry to the U.S. for many foreigners and our shores are extremely vulnerable to illegal and possibly terrorist activities. I am pleased that H.R. 5531 will put in motion a plan to deploy next-generation radiological detection technology at our ports of entry to more effectively and more efficiently scan persons and cargo as they enter the United States. I fully support the ''Biometric Identification At Sea Pilot Project'' which has allowed the Coast Guard to collect biometrics from individuals interdicted in the Caribbean to run them against terrorist and criminal databases. H.R. 5531 and H.R. 2490 address the vulnerabilities of our Caribbean shores.

Madam Speaker, the implementation of these bills would not be possible without our State, local and tribal entities. Fusion Centers provide much needed support to these entities in the implementation of Homeland Security programs. H.R. 6098 requires DHS to allow State and local governments to use Homeland Security grant funding to hire and keep analysts in fusion centers—for however long State and local officials see fit.

I urge my colleagues to support these bills and their passage.

HOUSING AND ECONOMIC RECOVERY ACT OF 2008

SPEECH OF

HON. CAROLYN McCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 23, 2008

Mrs. MCCARTHY of New York. Mr. Speaker, I would like to thank Chairman FRANK for his hard work on this housing package.

What began with a housing bubble, predatory and subprime lending, and loose regulatory enforcement has resulted in a record number of foreclosures across the country, the failure of financial institutions, a reduction in tax revenue for states and local government, a credit crunch, and a lack of confidence in our market that is affecting millions of individuals and families both directly and indirectly.

Families reliant on the continuously increasing housing market entered into loans they could never afford or adjustable-rate mortgages with the assumption they could refinance at a later date.

Loose regulatory enforcement allowed mortgage lenders and originators to engage in predatory lending practices and the housing bubble provided an incentive for lenders to reduce underwriting standards to encourage the creation of new loans.

Furthermore, the failure on the part of the regulators allowed financial institutions to package and sell these risky new loans on the secondary market with the highest ratings from the rating agencies.

All these events contributed to what we are now facing: increased foreclosure rates, large write-downs by financial institutions that hold a large number of mortgage-backed securities, vacant, foreclosed homes across the country, reduced tax revenue for states and local governments, and a lack of confidence in our financial and housing markets.

This bill, H.R. 3221, the American Housing Rescue and Foreclosure Prevention Act, will address the causes of our current crisis through reform and attempt to assist communities dealing with the current crisis.

Although there are many provisions in this package that are worth noting, I would like to highlight several provisions that are absolutely necessary to ensure the success of this package.

This bill increases the high-cost loan limits for the Federal Housing Administration, FHA, and conforming loan limits for Fannie Mae and Freddie Mac. These increases will allow those in high-cost areas such as my district, the Fourth Congressional District of New York, to take advantage of the FHA home loans program. Although many of us would prefer a larger increase in these limits, I believe the limits in this bill reflect a compromise that will make eligible middle-income families in high-cost areas who are currently precluded from taking advantage of the FHA home loan program. I thank Chairman FRANK and would like to recognize him for working with those of us who represent high-cost areas to ensure that our constituents are not left out.

This bill also allows Fannie Mae and Freddie Mac the flexibility to hold or sell jumbo loans on the secondary market. This flexibility will ensure Fannie and Freddie are not unnecessarily restricted in how they choose to deal with jumbo loans, and will ensure that loans will continue to be available to moderate-income families in high-cost areas.

Although reform is necessary to prevent another subprime crisis, we must also act to limit the effect that this crisis is having on our communities. Over half of the people who lose their homes stop communicating with their lenders within 30–60 days of missing a payment. This may happen for a number of reasons, including the fact that many homeowners are embarrassed or do not know their rights when they are unable to make their mortgage payments.

For these reasons, it is so important that organizations willing to reach out to borrowers at risk of foreclosure utilize in-person counseling and outreach. This is the only way to guarantee that families who need assistance are aware that assistance is available. Consequently, it only makes sense to provide organizations engaging in practices, such as in-person counseling, that are proven to be effective the resources they need to continue to provide these services.

I thank Mr. BACA and Mr. MAHONEY for working with me to ensure that language to this effect is included in this bill.

I also strongly support the almost $4 billion in this bill for state and local governments for the purchase and re-development of vacant, foreclosed homes.

It has been estimated that a home decreases in value by almost one percent if a home within one city block has been foreclosed. This figure is even higher when more than one home in the area has been foreclosed. In my home district, a home price would result in more than a $4,000 decrease in value if one home is foreclosed.

Additionally, tax revenue is severely affected when homes are left vacant or there is a decrease in their assessed value. The vacancy or home value decrease results in a decrease in tax revenue which burdens the budgets of state and local governments. In many cases, this shortfall then results in cuts in services to those most in need, including our children and seniors.

Again, I would like to thank the Chairman of the Financial Services Committee and the many individuals who have worked to ensure that this bill reforms FHA and the GSEs, and tackles the increase in the rate of foreclosures and the devastating effects that vacant, foreclosed homes have on our communities.

MEDICAL EVIDENCE OF TORTURE BY U.S. PERSONNEL

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. HASTINGS of Florida. Madam Speaker, last week the Helsinki Commission, which I Chair, held a briefing at which representatives from Physicians for Human Rights presented the findings of their recently published report, ''Broken Laws, Broken Lives.'' In it, they documented the medical evidence of torture by U.S. personnel in 11 specific cases. I believe this briefing was the first opportunity on Capitol Hill for the public to hear specifically about the medical consequences of the administration's detention policies and to consider some of the ethical questions related to the medical treatment of detainees, including forced feeding and the possible role of medical professionals during interrogations.

We were fortunate to have with us as panelists Leonard Rubenstein, J.D., President of Physicians for Human Rights; Dr. Allen Keller, Advisor to Physicians for Human Rights and Director of the Bellevue/NYU Program for Survivors of Torture; and Dr. Scott Allen, also an Advisor to Physicians for Human Rights.

For many years, members of the Helsinki Commission have been actively engaged on issues related to torture and cruel, inhuman, and degrading treatment or punishment. Over the years, we have raised concern about the nearly constant reports of torture and abuse in Chechnya. We have pressed Turkey to provide detainees with prompt access to lawyers and medical personnel, because we know that when people are held incommunicado, they are more likely to experience torture. We have expressed alarm regarding the number of people who walk into Uzbekistan jails on their own two feet—and who have been returned to their families in boxes.

Last week, it was my sad duty to hear representatives from Physicians for Human Rights describe the torture and ill-treatment some detainees have experienced at the hands of U.S. personnel. As I noted then, I certainly expected to hear about the medical and psychological impact of this torture on the individuals whose cases were investigated by Physicians for Human Rights. But, coincidently, there was a different kind of impact on display last week, when the U.S. also opened its first war crimes trial since World War II.

In the trial of Salim Hamdan, alleged to be Osama bin Laden's driver, the military judge overseeing the case found it necessary to exclude from evidence several statements of the defendant because they were obtained under what the military judge deemed ''highly coercive'' conditions. Another one of the government's efforts to bring a defendant before a military tribunal had already been put indefinitely on hold, reportedly because the evidence in the case cannot be disentangled from the impermissible methods that were used to extract it. In other words, the use of abusive interrogation methods has undermined the government's ability to prosecute people suspected of terrorism or terrorism-related crimes.

Let me repeat: the ill-conceived policy of ''enhanced interrogations'' has undermined our country's ability to prosecute people for the most serious crimes committed against this nation.

As it happened, on the day of our briefing last week, the ACLU released three new ''torture memos'' it had obtained through the Freedom of Information Act. Although highly redacted—indeed, one of them has ten pages that are entirely blacked out—these documents nevertheless provide some additional insight into the development of the policies that set the stage for what Major General Antonio Taguba, in his preface for the Physicians for Human Rights report, called ''a systematic regime of torture.'' (You may recall that General Taguba led the U.S. Army's official investigations into the Abu Ghraib prisoner abuse scandal.)

Here's just one bit of information we now have from a memo prepared by the Department of Justice's Office of Legal Counsel on August 1, 2002 and released last week. This memo, prepared for the CIA, advises that the crime of torture, as defined by U.S. statute, requires a showing of specific intent to cause severe pain or suffering. That specific intent, in turn, will be negated if a defendant acts with a good faith belief that his actions will not cause severe pain or suffering. That good faith belief can be demonstrated by showing that an official acted in reliance on the advice of experts. And guess what? The Office of Legal Counsel is a bunch of experts. And they go on to say that the objective of the interrogation techniques under discussion—we don't know precisely what they are because they're blacked out—is not to cause severe physical pain. Just like magic, you have your expert advice, which gives you your good-faith belief, which negates the specific intent required under the statute which criminalizes torture. So you guys can go ahead and waterboard and God knows what else because the Office of Legal Counsel has told you that it does not cause severe pain or suffering, so you have legal license to ignore your own eyes and ears, which tell you that waterboarding will break a person in minutes.

Madam Speaker, the report by Physicians for Human Rights makes several recommendations that deserve study and consideration. But in light of the release of these most recent torture memos, I would like to highlight today one particular recommendation of the report: ''The U.S. Department of Justice should publicly release all legal opinions and other memoranda concerning standards regarding interrogation and detention policy and practices.''

The Department of Justice is the arbiter of what is the law of the land for this country. And I think the American people have a right to know if their government has sought to redefine ''torture'' as ''not torture.'' Accordingly, I urge the Attorney General to release the full texts of all the memos relating to interrogation and detention policies and practices.

HONORING WILLIAM J. KOWALSKI

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. KILDEE. Madam Speaker, I ask the House of Representatives to join me in honoring William J. Kowalski as he retires from the Federal Bureau of Investigation on August 1st.

William ''Bill'' Kowalski became a Special Agent in May 1983 after receiving his Bachelor of Science degree from the University of Detroit in 1979 and his Juris Doctor from the University of Detroit School of Law in 1982. After taking the oath of office he trained at the FBI Academy in Quantico, Virginia and began his Bureau career by returning to his hometown of Detroit.

After serving tours of duty in Memphis and New York City, Bill was promoted to a supervisory position at FBI Headquarters in 1989. In this capacity he was responsible for counterintelligence and espionage investigations throughout the United States. He was one of the first FBI Agents to travel to Eastern Europe after the collapse of the Berlin Wall.

Returning to Detroit, Bill became a Field Supervisor in the Detroit Division in August, 1992. He assumed supervisory responsibilities in Flint and Ann Arbor. In September 2004 he was promoted to Assistant Special Agent in Charge, Detroit Division, overseeing the FBI Detroit's Joint Terrorism Task Force, with counter-terrorism investigation jurisdiction in the state of Michigan.

Madam Speaker, I ask the House of Representatives to rise and join me in applauding the exemplary work of William J. Kowalski. He has been a dedicated public servant, working to ensure the safety of the United States and its citizens for many, many years. I have appreciated his insight, his thoughtfulness and his commitment to performing his work and I wish him the best as he enters the next phase of his life.

RECOGNIZING STOP CHILD ABUSE NOW OF VIRGINIA ON ITS 20TH ANNIVERSARY

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. MORAN of Virginia. Madam Speaker, I rise today to commend the work of SCAN Virginia—Stop Child Abuse Now—and congratulate this fine organization for 20 years of change in children's lives.

Twenty years ago, in 1988, a group of Alexandria citizens concerned about abused and neglected children in Northern Virginia came together to plan ways to prevent child abuse. As a result, David Cleary founded Stop Child Abuse Now (SCAN) of Northern Virginia, a nonprofit organization to prevent child abuse and neglect and became affiliated with the State organization now called Prevent Child Abuse Virginia.

The first program offered at SCAN was the Court Appointed Special Advocate (CASA) Program that now is the Alexandria/Arlington CASA Program. CASA now serves more children and engages up to 75 volunteers at a time to give voice to the needs and priorities of abused or neglected children, one child at a time.

SCAN works collaboratively with the Arlington and Alexandria Juvenile & Domestic Relations Courts to mold a CASA Program that provides helpful information to the Juvenile Judges who make determinations on the futures of abused and neglected children, while SCAN's CASA volunteers provide an independent voice that focuses solely on the best interest of the children.

SCAN's Parent Education Program has a continuum of services that range from intensive parenting classes, weekly educational parent support groups and developmental playgroups—all offered in English and Spanish. SCAN also offers a tri-annual Parent Connection Resource Guide, a publication that gives critical information about region-wide parenting classes, support groups, playgroups and other resources available to parents in Northern Virginia.

The Allies in Prevention Coalition, which is made up of child welfare professionals from the five major Northern Virginia jurisdictions, is a central part of SCAN's Public Education Program, as is SCAN's website: www.scanva.org. SCAN's Allies in Prevention Coalition engages child and family advocates in communicating regional messages to prevent child abuse and promote children's well-being in Virginia.

Madam Speaker, I can think of no higher calling than to help children in need. Please join me in commending SCAN of Northern Virginia as it celebrates twenty years of serving children and families in Northern Virginia through programs and services that keep children safe, strengthen parenting skills and provide advocacy in the courts, legislature and the community.

HOUSING AND ECONOMIC RECOVERY ACT OF 2008

SPEECH OF

HON. LUCILLE ROYBAL-ALLARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 23, 2008

Ms. Roybal-Allard. Mr. Speaker, I rise in support of H.R. 3221, the American Housing Rescue and Foreclosure Prevention Act of 2008. I thank Chairman FRANK and Chairwoman WATERS for bringing this important legislation to the House floor today.

I am certain that all of my colleagues have heard from constituents about the devastating effect the foreclosure crisis has had on their families and communities. The problem is particularly acute in my home state of California, which has the second-highest foreclosure rate in the Nation. Recent data has shown that the problem is getting worse. In the last three months, foreclosures in California have jumped 33.5 percent from the previous period.

To help my constituents confront this crisis, I recently held a foreclosure prevention workshop in my district. The turnout was enormous—nearly 500 members of our community attended the workshop, where national banks, HUD, and other intermediaries provided one-on-one housing counseling, and information on viable options for preventing foreclosure.

We know that the overwhelming turnout at the event was not an anomaly—I have heard from many of my colleagues that they too have experienced record turnouts at events they have hosted to help their own constituents.

At the workshop I heard from numerous participants who were concerned that Congress was not doing enough to address the crisis.

I am gratified that today we can go back to our constituents and assure them that Congress has taken action to help address this crisis by passing the American Housing Rescue and Foreclosure Prevention Act. H.R. 3221 represents a solid step forward in our efforts to confront the mortgage crisis.

The measure will expand the FHA program so that many homeowners at risk of facing foreclosure can refinance into viable mortgages that are government-insured. This will help many families facing ballooning mortgage payments to get their finances back on track and keep their homes.

I am particularly pleased that this legislation will increase the conforming loan limit for Fannie Mae and Freddie Mac backed loans to $625,000 in high-cost areas such as California. The current limit is far too low to make a meaningful impact in the Los Angeles area, where the average cost of a home is far above the national average.

The $4 billion in Community Development Block Grant funds made available to states and localities to purchase foreclosed properties is also a critical component of the package. Vacant, foreclosed properties exacerbate the crisis by lowering the values of surrounding homes and neighborhoods.

I urge my colleagues to vote in support of this legislation to help families keep their homes and protect their communities.

REMEMBERING THE U.N. SAFE HAVEN OF ZEPA, BOSNIA AND HERZEGOVINA

HON. BRUCE L. BRALEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. BRALEY of Iowa. Madam Speaker, last Friday, July 25, marked the 13th anniversary of the 1995 fall of Zepa, a United Nations-declared ''safe haven'' in eastern Bosnia, to the Army of Republika Srpska. I rise to commemorate the fall of Zepa today on behalf of the thousands of Bosnian Americans who live in my District, the First District of Iowa.

Zepa was a village in eastern Bosnia declared a ''safe haven'' in a May 1993 U.N. Security Council Resolution. This declaration was supposed to guarantee the safety of its population, but the siege of Zepa began in the summer of 1992 and lasted until the fall of the enclave in July 1995. Throughout this period, the population suffered from continuous shelling and starvation, and many Zepa residents and refugees from surrounding areas perished

during the siege. After the fall of Zepa, an unknown number of Bosniak males were taken away never to be seen again, including the commander of the defense of Zepa, Avdo Palic. Thousands of others were victims of ''ethnic cleansing.''

This 13th anniversary took place during the same week as the arrest of Radovan Karadzic, indicted on charges of genocide and other crimes by the U.N. war crimes tribunal in The Hague. I believe that at this time it's very important to remember the tragedy that befell Zepa, and the lives that were lost there. It's also important that we support the efforts of the families of the missing to learn the fate of their loved ones, and the families of those missing and killed in their search for justice. It is only with truth, justice, reconciliation, and democratic governance that a stable and prosperous Bosnia can be built.

HONORING RICHARD BURTON MURPHY

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Ms. KAPTUR. Madam Speaker, I rise today to recognize Sergeant Richard Burton Murphy.

It is with the deepest appreciation that I pay tribute to retired Sergeant Richard Burton Murphy. May 16, 2008 marked the day Sergeant Murphy retired from the Toledo Police Department.

Sergeant Murphy began his career in law enforcement for the City of Oregon, Ohio Police Department, in January 1967. Two years later, he was appointed to the Lucas County Sheriff Office as a road deputy. In 1971, Sergeant Murphy traversed to Ft. Lauderdale, Florida to obtain a new position; however, he returned to Toledo, Ohio in 1973. In March of that year, he was appointed to the Toledo Police Department where he served for 35 years. After hard work and dedication to the Toledo Police Department, he was promoted to Sergeant in 1979. Among other achievements, Sergeant Murphy served as the official and unofficial public information officers for 12 years. Additionally he performed duties in patrol, communication, and in the chief of police's office during these years. While I have the honor to acknowledge his years of public service, the citizens of Toledo, OH have given Sergeant Murphy many exceptional reports. From the Toledo/Lucas County Safety Council, he obtained the Citizen Policeman Award in 1975, Certificate of Appreciation in 1976, Good Samaritan Award in 1992, and Heroism Reward in 1996. He was presented a proclamation from the Mayor's office of the City of Toledo in 1998 and 1999. Sergeant Murphy is a U. S. Navy Veteran who fulfilled active duty from 1962 to 1964, completing four years of reserve duty to follow. He is married to Patricia Ann Murphy, has two daughters Robin and Jill and 6 grandchildren. He is a member of Ottawa River Yacht Club, and plays in 3 golf leagues.

All of Toledo thanks Sergeant Murphy for his commitment to public service and helping keep safe the community of Toledo. When an officer in blue goes to work in the morning, that officer never knows if they will return home at night. Our community values and recognizes the valor, patriotism, and community-mindedness of Sergeant Murphy and his colleagues, who protect and serve a broader community beyond their family. May he find happiness and satisfaction as he enters into a new milestone of his life.

BOXING GREAT AND HEAVYWEIGHT CHAMPION GEORGE FOREMAN

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. POE. Madam Speaker, today I am proud to recognize one of boxing's most feared fighters, Mr. George Foreman. We are near the same age, and I have been a fan since I was a kid.

A product of a less fortunate family, Houstonian George Foreman was in constant trouble with the law. He vowed to make a better life for himself and later joined the Job Corp. While stationed in Oregon, Foreman became infamous for picking fights with fellow trainees. It was then that his fighting skills were noticed and he was introduced to the sport of boxing, which he grew to love. Foreman got his start as an amateur from the AAU in San Francisco.

At the age of 19, Foreman won a gold medal at the 1968 Mexico City Olympic Games. He won his first fight on points and then three fights by stoppage—including the final title bout against the favored Soviet fighter. After winning the gold, Forman walked around the ring, holding high a small American flag following his victory. Some people chastised him for his display; others, however, lauded him for being a patriotic American during a time of political upheaval and strife. Madam Speaker, this was the most patriotic moment I had ever seen.

Foreman, after an amazing amateur record of 27–0, turned professional in 1969 with a three-round knockout of Donald Walheim in New York. He had 12 fights that year, winning all of them, 11 by knockout. Among the fighters he defeated was Cookie Wallace, who lasted only 23 seconds.

In 1970, Foreman continued his journey toward the undisputed heavyweight title. In 1971, he won seven more fights. After amassing a record of 32–0, Foreman ranked as the number one challenger by the World Boxing Association and Council. In 1972, his string of wins continued with a series of five consecutive bouts in which he defeated each opponent within three rounds.

Still undefeated, and with an impressive knockout record, Foreman was set to challenge undefeated and undisputed world heavyweight champion Joe Frazier. Foreman knocked down Frazier six times in two rounds to win the championship by knockout in one of boxing's biggest upsets. In what was HBO Boxing's first broadcast, the call made by Howard Cosell became one of the most memorable in all of sports: ''Down goes Frazier! Down goes Frazier! Down goes Frazier!'' Before the fight, Frazier was 29–0, with 25 knockouts, and Foreman was 37–0, with 34 knockouts. Equally memorable was Foreman's final punch, an uppercut, landed with such force that it lifted Frazier off his feet before sending him to the canvas for the sixth and final time. As he had done following the previous knockdowns, Frazier managed to get to his feet, but the referee called an end to the bout.

Nevertheless, Foreman went on to defend his title successfully twice during his initial reign as champion. His first defense, in Tokyo, pitted him against Puerto Rican heavyweight champion Jose Roman. Roman was not regarded as a top contender, and it took Foreman only 55 seconds to end the fight, the fastest-ever knockout for a heavyweight championship bout. Foreman's next defense was against a much tougher opponent. In 1974, he faced the highly regarded Ken Norton who was 30–2, a boxer notorious for his awkward boxing style. Norton's ability to ''take a punch'' was suspect, and Foreman put him to the test. In an astonishing display of aggression and punching power, Foreman knocked out Norton in just two rounds. The win made Foreman 40–0 with 37 knockouts.

After losing his title to Muhammad Ali in 1974, Foreman remained inactive during 1975. In 1976, he returned to boxing in Las Vegas against Ron Lyle. After a very intense and extensive struggle by both fighters, the fight was stopped and Foreman was declared the winner. For his next bout, Foreman chose to face Joe Frazier in a rematch. Frazier at this point was 32–3 and Foreman was 41–1, but people doubted Foreman's ability. Unable to mount a significant offense, Frazier was eventually floored twice by Foreman in the fifth round and the fight was stopped. Next, Foreman knocked out Scott Ledoux in three and Dino Dennis in four to finish the year.

Foreman fought five men in one night in a 1975 exhibition. He won five straight knockouts on the comeback trail before being decked and decision-ed by Jimmy Young in Puerto Rico in 1977. Foreman stated that he saw God in his dressing room following the defeat and announced he was going to become a preacher and retire from boxing. He became a born-again Christian, dedicating his life for the next decade to Christianity. Although he did not formally retire from boxing, he did stop fighting, became an ordained minister of a church in Houston, Texas, and devoted himself to his family and his parishioners. He also opened a youth center that bears his name. Foreman continues to share his conversion experience on Christian television broadcasts such as The 700 Club and the Trinity Broadcasting Network, and has joked that Young ''knocked the devil out of him''.

When Foreman decided to return to the ring to raise money for his church; experts laughed, but he racked up 18 straight knockout victories. He was defeated in a title bid by Evander Holyfield. In 1994, Foreman again shocked the world by knocking out undefeated World Heavyweight Champion Michael Moorer, 39–0, to become champion again at age 45.

Shortly after the Moorer fight, Foreman faced mid-level prospect Axel Schulz of Germany in defense of his remaining International Boxing Federation title. Foreman finished the fight with an unsightly swelling over one eye, but was awarded a highly controversial majority decision. The IBF ordered an immediate rematch to be held in Germany, but Foreman refused the terms and found himself stripped of his remaining title.

In 1996, Foreman returned to Tokyo, scoring an easy win over the unrated Crawford Grimsley by a 12-round decision. In 1997, he faced fringe contender Lou Savarese, winning a close decision in a grueling, competitive encounter. Yet another opportunity came Foreman's way as the World Boxing Council decided to match him against Shannon Briggs in a 1998 ''eliminator bout'' for the right to face World Boxing Council champion Lennox Lewis. After 12 rounds, there was once again a controversial majority decision, but this time the victory went to Briggs. Foreman had fought for the last time, at the age of 48.

In January 2003, Foreman was elected to the International Boxing Hall of Fame, where he was inducted in June. That same year, he was named boxing's ninth greatest puncher of all time by Ring Magazine.

Foreman said he had no plans to resume his career as a boxer, but then announced in February 2004 that he was training for one more comeback fight to demonstrate that the age of 60, like 40, is not a ''death sentence.'' The bout, against an unspecified opponent, never materialized. Having severed his relationship with HBO to pursue other opportunities, George Foreman and the sport of boxing finally went their separate ways.

Life has definitely gone on after boxing for ''Big George Foreman.'' In addition to becoming the Heavyweight Champion of the World and an Olympic Medal Winner, Olympic Hall of Famer, he wears the titles of pastor, nationally recognized spokesperson, entrepreneur, author, reality television star, mentor and role model. He has been the face of Meineke Mufflers, and countless homes in the country have the George Foreman Lean Mean Fat Reducing Grilling Machine.

In 2004, Foreman began marketing the George Foreman brand of ''Big and Tall'' clothes through the retailer Casual Male. He has even appeared as a judge on the second season of the ABC reality television series American Inventor. Foreman has four books: The Autobiography of George Foreman; God in My Corner: A Spiritual Memoir; Going the Extra Smile; and Fatherhood by George: Hard-Won Advice on Being a Dad.

On May 22, 2007, it was announced that Foreman had become a partner in the Panther Racing Indy Car team, in the Indianapolis 500; and on July 16, 2008, TV Land premiered Family Foreman, a reality TV show, starring George and his family.

Big George Foreman continues to be extremely active in the community. He encourages young people through his George Foreman Youth Center in Houston, and he built The George Foreman Youth & Community Center in 1984 with money saved from his 8-year retirement. Foreman wanted to create a haven for kids to hang out.

I am proud to recognize my friend whom I admire greatly, Mr. George Foreman, for his accomplishments in and out of the boxing ring. He has repeatedly shown us all that you can overcome all odds and obstacles. He is a shining testament of hard work and determination, and I applaud all of his accomplishments and service to the community.

And that's just the way it is.

EARMARK DECLARATION

HON. LINCOLN DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. LINCOLN DIAZ-BALART of Florida. Madam Speaker, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding earmarks I received as part of H.R. 6599, the Fiscal Year 2009 Military Construction and Veterans Affairs Appropriations bill.

Requesting Member: Representative LINCOLN DIAZ-BALART (FL–21).

Bill Number: H.R. 6599, Report 110–775.

Account: Military Construction, Army.

Legal Name of Requesting Entity: United States Southern Command.

Address of Requesting Entity: 3511 NW 91st Ave., Miami, FL 33172–1217.

Description of Request: I received an earmark of $81,600,000 for the second increment of funding for the construction of a new headquarters for the United States Southern Command (SOUTHCOM) in Doral, FL. The funding will continue the work of the first installment in which SOUTHCOM received $100,000,000 in the FY08 Military Construction and Veterans Affairs Appropriations bill. The authorization for this funding was included in the H.R. 5658, the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009, which passed the House of Representatives May 22, 2008. The total cost of the headquarters construction is estimated to be $237,000,000.

Through the Department of Defense, this project has been undergone an open bid process and the planning, engineering and design phase is well underway. The funds would be used by the Department of Defense to build the new SOUTHCOM headquarters adjacent to the current SOUTHCOM facility in Doral, FL. The land for this facility is under long-term lease from the State of Florida.

RECOGNIZING VARALLO'S RESTAURANT AS IT CELEBRATES 101 YEARS IN BUSINESS

HON. JIM COOPER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. COOPER. Madam Speaker, today I rise to recognize Varallo's, Nashville's oldest continuously operated restaurant, and offer my heartfelt congratulations on its 101st anniversary.

Founded in 1907 by Frank Varallo, Sr., a former traveling musician who played for the likes of President Theodore Roosevelt, Varallo's Restaurant has been a gathering place for Tennessee's governors and legislators, Nashville's mayors and politicians, musicians and movie stars, athletes and artists, business leaders and students, and anyone who was hungry.

Four generations of the Varallo family have served their world famous ''chile''—a special recipe acquired by Frank Varallo, Sr., during his travels in South America. At the age of 14, Frank Varallo, Jr., took over the business upon the death of his father. For more than 70 years, Frank, Jr., served the restaurant's unique three-way ''chile'' combination to generations of Tennesseans and made a reputation for himself by providing inspirational messages that came to be known as ''Thoughts from The Bottom of a Chili Bowl.''

Today, great-grandson Todd Varallo, who joined the business shortly after he graduated from high school, operates the restaurant and continues to serve up the ''chile'' that launched the restaurant's ''century of success.'' The restaurant also continues to be the scene of many negotiations, meetings, conferences and consultations that shape the course of Nashville and Tennessee history.

Madam Speaker, I join everyone in Tennessee's Fifth District in applauding Varallo's Restaurant, and I commend the entire Varallo family for their century-long service to the citizens of Nashville and middle Tennessee.

EARMARK DECLARATION

HON. HENRY E. BROWN, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. BROWN of South Carolina. Madam Speaker, I submit the following:

Requesting Member: Congressman HENRY E. BROWN, Jr.

Bill Number: H.R. 6599—Military Construction, Veterans Affairs, and Related Agencies Appropriations Bill, 2009.

Account: Military Construction, Air Force.

Legal Name of Requesting Entity: Charleston Air Force Base, United States Air Force.

Address of Requesting Entity: Charleston Air Force Base, South Carolina, 29404.

Description of Project: Provide $4.5 million for construction of an addition to C–17 flight simulator complex at Charleston AFB. This addition, which was included in the Administration's Fiscal Year 2009 Budget Request, will allow the facility to accommodate a new six-axis flight simulator and loadmaster trainer with space for computers, briefing rooms, component and facility storage and other needed space. Training needs of the aircrews have exceeded the capabilities of the existing three simulators. If this new simulator space is not provided, established training goals will not be achieved at an airbase that currently houses two wings of C–17s currently meeting the needs of our troops deployed abroad.

HONORING SAM BOVA FOR HIS LONGTIME CIVIC EFFORTS IN SUNSET BAY, NEW YORK

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. HIGGINS. Madam Speaker, today I rise to honor a longtime businessman and civic leader in the great community of Sunset Bay, New York. Sam Bova has owned and operated the Sunset Bay Beach since the mid 1990s, consisting of two prime waterfront attractions: the Sunset Bay Beach Club, and Cabana Sam's Sunset Bay Grill.

As a businessman, Sam's business provides seasonal work to more than 150 people, and is the source of a tremendous amount of

seasonal fun in the area of northwestern Chautauqua County. His management of the Beach provides a tremendously enjoyable atmosphere for local residents as well as those who choose Sunset Bay as their summertime vacation destination.

More than just as a businessman, however, Sam Bova has been a dedicated member of the community in northern Chautauqua County, tirelessly dedicating his time and resources to dozens of local and regional charities. Of particular note is an issue very close to my own heart, Sam has a particular affinity for charities associated with the fight against cancer, and has devoted tremendous efforts in support of the Susan G. Komen Breast Cancer Foundation, Carly's Crossing for Childhood Cancer, the Roswell Park Cancer Institute and the Leukemia Society. Moreover, Sam's support of our men and women in uniform is well known throughout the community; he has been a consistent supporter of local, regional and state police efforts, local fire and emergency services personnel, and is particularly interested in helping returning veterans to find jobs and opportunities back home in Western New York.

While summertime is always a special time in Sunset Bay, the summer of 2008 is a special time for Sam Bova. Sam celebrated his 50th birthday recently, once again in the company of his faithful employees, close friends, and uniformed members of our local police, fire and emergency services agencies. As I said before, Sam holds a very close connection to men and women in uniform, and he seeks to honor their service to our country every day. That is why I have requested that a United States Flag will fly over the United States Capitol in Sam's honor, and I plan to present that flag to him, to be flown at Sunset Bay, so that he and all those who visit Sunset Bay may continue to honor the brave men and women who serve our community and our nation so well.

Madam Speaker, I hope that you will join me in honoring a great Western New Yorker and a great friend of the community in northern Chautauqua County. Here is hoping that Sam Bova will put another 50 great years into his business and supporting the many charities he helps each day.

TRIBUTE TO DR. RON DUNHAM

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. LATHAM. Madam Speaker, I rise to recognize the retirement of Dr. Ron Dunham, a chiropractor at Dunham-Fritz Chiropractic in Marshalltown, Iowa.

For 40 years, Dr. Dunham has served Central Iowa as a chiropractor. He became interested in being a chiropractor when he hurt his back doing construction work after he returned from serving in the Army. His attraction to the profession led him to chiropractic college and back to Marshalltown where he has worked ever since. Dr. Dunham is known for being highly dedicated to his patients while having a sense of humor that lifts the spirits in the office each day. Dr. Dunham's practice successfully quadrupled in size during his time as a chiropractor, and the many years of exceptional service to his customers and the town of Marshalltown will be missed.

I know that my colleagues in the United States Congress join me in commending Dr. Ron Dunham for his service to Central Iowa. I consider it an honor to represent Dr. Dunham in Congress, and I wish him and his wife Sue, a long, happy and healthy retirement.

HONORING JOSE AND FELICE ZAMORA FOR THEIR 50TH WEDDING ANNIVERSARY

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. BACA. Madam Speaker, I rise today in honor of two great Americans, Jose and Felice Zamora, beloved parents, grandparents, and friends on the occasion of their fiftieth wedding anniversary.

Jose and Felice—known to all as Tony and Phyllis—first met in the spring of 1958. They met at a Los Amigos dance at Barstow High School. After dating for only four months, they were married on August 29, 1958. Tony proposed to Phyllis in between innings of a baseball game he was playing in. She happily accepted. The two were married in a small private ceremony attended by close friends and family.

After renting a house for a year, Tony and Phyllis bought a house in Barstow, the same house they still reside in today. Tony started work as a bus boy at the Bun Boy restaurant in Barstow. He eventually worked his way up to chef, while Phyllis was a homemaker. In 1967, Tony started working as a warehouseman at the Marine Corps Logistics Base and stayed there until retiring in 1996. Phyllis began working as a housekeeper at a local hotel, and would continue for 20 years.

On July 16, 1959, the Zamoras were blessed with their son, Victor Anthony. On October 10, 1967, the Zamoras celebrated the birth of their daughter Donna Lynn. On October 19, 1981, Tony and Phyllis had their second daughter, Crystal Ann.

Family has always been the focus of the Zamora's life. And they have been blessed with six grandchildren. They have four granddaughters—Kristina Victoria Zamora, Heather Marie Zamora, Ciera Ariel Taylor, and Cienna Faith Davis. They also have two grandsons, Sebastian Antonio Taylor and Simon Antonio Taylor. In addition, they now have three great-grandsons and a fourth on the way. Children have always been a big part of Tony and Phyllis' lives, and since 1959, the sound of kids at play has filled their house in Barstow.

Growing up with Tony, we played fastpitch softball together for many years. He was a great second baseman and I feel fortunate to have such wonderful memories of our days together, all of the great tournaments we used to play in as part of the same team and our young days spent in the sun.

Having known the Zamoras nearly all of my life, I would like to extend my heartiest congratulations on their fiftieth wedding anniversary. On behalf of my wife Barbara, my family and I, felicidades, and may you have many more years of happiness. God bless you.

HONORING THE CITY OF ELKHART ON ITS 150TH ANNIVERSARY

HON. JOE DONNELLY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. DONNELLY. Madam Speaker, I rise today to honor the City of Elkhart, which is celebrating its 150th anniversary.

The Second District of Indiana is proud to have cities like Elkhart with its Hoosier values and entrepreneurial spirit. From RVs to musical instruments, Elkhart manufactures goods that reach across the country. This entrepreneurial spirit started early and helped Elkhart become the strong city it is today, a city of 52,000 residents that has been named as one of the nation's most livable.

Founded in 1831 by Dr. Havilah Beardsley, the city was incorporated in 1858. It grew quickly and created the first hydroelectric dam on the St. Joseph River; a dam still in use today. Elkhart was also the second city in the world to use an electric streetcar system. However, today Elkhart is probably best known for being the largest producer of recreational vehicles, earning it the nickname ''RV Capital of the World.''

Elkhart has a rich cultural life as well. The Elkhart Jazz Festival is considered one of America's premiere jazz festivals. Several museums and theaters also contribute to the Elkhart community. And Elkhart is planning ahead in order to maintain its vibrancy. It is building a wi-fi system that will be accessible to people along River Way.

I am proud today to pay tribute to the City of Elkhart, Indiana and its residents for 150 years of impressive history and wish them an equally prosperous future.

CONGRATULATING HEISMAN TROPHY WINNER TIM TEBOW

SPEECH OF

HON. KATHY CASTOR

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Ms. CASTOR. Madam Speaker, I rise today to pay tribute to not only a great athlete but an excellent student and role model for today's youth.

Tim Tebow exploits on the field are well documented. In addition to being the first sophomore to win the prestigious Heisman Trophy in 2007, he also received the Davey O'Brien and Maxwell Awards for his athletic achievements.

However, his off the field accomplishments warrant praise as well. Tim Tebow is a member of the Southeastern Conference Academic Honor Roll as well being an ESPN the Magazine's Academic All-American first team selection. Tim is just the fourth sophomore to ever receive first team Academic All-American honors at the University of Florida.

While majoring in Family, Youth, and Community Services, Tim Tebow has shown his dedication not only to his local community but to the entire world. He is a SEC Community Service Team Honoree as well as a member of the Goodwill Gators. Through the Goodwill Gators, he has worked to improve lives in his

community at the Children's Miracle Network at Shands Hospital in Gainesville, Florida. He has spent several summers volunteering overseas building housing and hospitals in the Philippines. As a result of his charitable work and leadership skills, Tim Tebow was awarded with the James E. Sullivan Memorial Award. The Sullivan Award recognizes leadership, character, sportsmanship, and strong moral character. He is only the second University of Florida student to ever achieve this award. Notwithstanding all of his athletic and community service activities, Tim Tebow has maintained a 3.77 grade point average.

Madam Speaker, with his achievements in the classroom, his charity in the community, and his dedication to his teammates, I honor Tim Tebow as he is not only a model for today's student-athlete but a role model for children across this Nation.

APOLOGIZING FOR THE ENSLAVEMENT AND RACIAL SEGREGATION OF AFRICAN AMERICANS

SPEECH OF

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Ms. LEE. Mr. Speaker, I rise today in strong support of H. Res. 194, a resolution apologizing for the enslavement and racial segregation of African Americans. I thank Speaker PELOSI, Chairman CONYERS, and Congressman COHEN for their efforts to bring this resolution to the floor and affording the House of Representatives the opportunity to apologize for America's Original Sin.

Mr. Speaker, slavery in America resembled no other form of involuntary servitude known in history, as millions of Africans were captured and sold at auction like inanimate objects or animals during the 246 years between 1619 and 1865. The Africans forced into slavery were brutalized, humiliated, dehumanized, and stripped of their names, heritage, and dignity. Enslaved families were torn apart at the whim of their owners and sold as chattel.

Mr. Speaker, slavery was officially abolished with the passage of the 13th Amendment in 1865 and for the next 12 years African-Americans made fleeting political, social, and economic gains during Reconstruction, nearly all of which vanished under the system of de jure racial segregation known as 'Jim Crow,' which thrived in certain parts of the Nation for nearly the next hundred years.

Under the system of de jure segregation, African Americans could not vote, could not give evidence in court against a white person, were prohibited from marrying outside of their race, could not enter certain professions, could not serve on juries, and enjoyed few, if any, rights that whites were bound to respect. That is what the Supreme Court had decreed 27 years before in the Dred Scott decision in 1850.

Mr. Speaker, the end of Reconstruction in 1877 ushered in a period of oppression and terror for African Americans. The withdrawal of the Federal Government's protection, the rise of the Ku Klux Klan, the proliferation of the ''Black Codes,'' and the Supreme Court's infamous decision in *Plessy* v. *Ferguson* combined to ensure that African Americans would treated as second-class citizens forced to lead separate and unequal lives for four more generations.

Mr. Speaker, it is difficult for many today to understand just how oppressive it was for African Americans to live under the regime of Jim Crow. For those who couldn't understand why African Americans were so impatient to overcome segregation, Dr. King explained why ''we can't wait'' in his Letter from Birmingham Jail:

> ''[W]hen you are humiliated day in and day out by nagging signs reading ''white'' and ''colored''; when your first name becomes ''nigger,'' your middle name becomes ''boy'' (however old you are) and your last name becomes ''John,'' and your wife and mother are never given the respected title ''Mrs.''; when you are harried by day and haunted by night by the fact that you are a Negro, living constantly at tiptoe stance, never quite knowing what to expect next, and are plagued with inner fears and outer resentments; when you are forever fighting a degenerating sense of ''nobodiness'' then you will understand why we find it difficult to wait.''

America has made great strides in overcoming its Original Sin thanks to the modern Civil Rights Movement, which ushered in the Second American Revolution led by giants like Thurgood Marshall and the Rev. Dr. Martin Luther King, Jr.

But we still have some distance to go before we will have fully perfected our Union. Even today there remain the badges and vestiges of slavery. African-Americans continue to suffer the consequences of the damage they suffered, both tangible and intangible, to human dignity, including the loss of life, the deprivations of liberty, the long-term loss of income, and denial of opportunity.

Mr. Speaker, just because we can never fully repay the debt owed to those enslaved and their descendants does not mean that we cannot acknowledge this tragic period in our nation's history and try to atone for it. That is the least we can do.

The resolution before us is an excellent start and I strongly support it.

TOM LANTOS AND HENRY J. HYDE UNITED STATES GLOBAL LEADERSHIP AGAINST HIV/AIDS, TUBERCULOSIS, AND MALARIA REAUTHORIZATION ACT OF 2008

SPEECH OF

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 24, 2008

Mr. HOLT. Mr. Speaker, I rise today to support the Tom Lantos and Henry J. Hyde United States Global Leadership against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008.

The bill, which would reauthorize and expand the President's Emergency Plan for AIDS Relief, would provide $48 billion over five years for programs to combat these three lethal diseases around the world. President Bush is expected to sign the bill into law.

President Bush deserves credit for his work on this issue. I have long supported this bold initiative that has made the U.S. a leader in this critical health and moral issue of our time. By expanding its scope, we would reach far more people around the world and save them from these terrible diseases.

While the first five years of the initiative operated on an emergency response policy, the bill's new provisions would allow for the transition to long-term sustainability programs that can be maintained by the host countries. It would increase HIV/AIDS programs focusing on women and girls, work to better integrate the tuberculosis and malaria programs with the HIV/AIDS programs, double the U.S. contributions to the Global Fund, and strengthen language on countering HIV/AIDS for victims of sex trafficking.

Since its inception in 2003, the United States has invested more than $19 billion to combat HIV/AIDS, tuberculosis, and malaria and helped provide anti-retroviral drug treatments to approximately 1.5 million people with AIDS. It has also supported care for 6.6 million people—including 2.7 million orphans and vulnerable children—and helped to prevent more than 157,000 infant infections.

Upon passage, over the next five years, the bill would greatly expand funding for the initiative, authorizing $39 billion for HIV/AIDS programs, $5 billion for malaria programs, and $4 billion for tuberculosis programs. By 2013, U.S. support provided through PEPFAR could help prevent 12 million new HIV infections, provide medical and non medical care for 12 million people (including 5 million orphans), and train 140,000 new health care workers.

I have heard from numerous Central New Jersey residents who are concerned about the growing AIDS epidemic. This legislation demonstrates the immense compassion Americans hold for the struggles we share as a global community. When 6,000 people become infected with HIV everyday, we must offer a full commitment to fighting the disease.

CONDEMNING JULY 27, 2008 BOMBINGS IN ISTANBUL, TURKEY

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. HASTINGS of Florida. Madam Speaker, as Chairman of the Commission on Security and Cooperation in Europe and the former President of the OSCE Parliamentary Assembly, I condemn in the strongest possible terms the bombings that shook the Gungoren neighborhood of Istanbul, Turkey on Sunday.

This was the deadliest attack to take place in Istanbul in five years, which killed 17 men, women and children and wounded more than one hundred others. I express my most sincere condolences to the families who lost loved ones and to the individuals injured in this terrorist attack.

Madam Speaker, I stand with the Turkish government and the people of Turkey in condemning these cowardly acts and hope to see those responsible brought to justice very soon.

The United States and Turkey have shared a historic partnership for the past fifty-plus years and it is during these difficult times that we must stand together.

Madam Speaker, the United States remains committed to working with Turkey in fighting terrorism in Turkey, in the United States, and around the world. I urge my colleagues to stand with me in condemning these heinous attacks.

IN HONOR OF THE OBSERVER-REPORTER'S 200TH ANNIVERSARY

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. MURTHA. Madam Speaker, on August 15 of this year, the Observer-Reporter will celebrate its 200th anniversary of providing accurate and reliable news to the people of Southwestern Pennsylvania.

In 1808, printers William Sample and William B. Brown were on their way to Kentucky when they stopped in The Sign of the Swan Tavern in the small village of Washington, Pennsylvania. There, they were convinced to set up shop, and on August 15, 1808, The Reporter, a weekly newspaper, was born. Ownership of the paper, as well as its name, changed hands over the next century, until John L. (Jack) Stewart and George E. Acheson formed the Observer Publishing Company on July 24, 1902.

Acheson retired in 1912, turning over ownership and the presidency to Stewart. When Stewart died in 1940, the company was turned over to his wife, Margaretta. Her grandsons John L.S. and William B. Northrop became coowners and president and vice president, respectively, following her death in May 1966.

In 1967, the Observer Publishing Company merged its morning paper, The Washington Observer, and its afternoon paper, The Washington Reporter, into the Observer-Reporter.

Over the last three decades, the Observer Publishing Company acquired additional newspapers throughout Washington and Greene Counties. On April 17, 2000, John and Bill Northrop's sons, Tom and Bill Jr., became copublishers of the company. Tom became sole publisher and president of the Observer Publishing Company in 2004.

Madam Speaker, today the Observer Publishing Company is one of the largest employers in Washington County. Their talented and hardworking staff produces a daily paper that reaches tens-of-thousands of subscribers in Southwestern Pennsylvania. The company is active in both the local community and the newspaper industry. I would like to acknowledge and congratulate the award-winning Observer-Reporter for printing a quality news product that has been part of Southwestern Pennsylvania since 1808.

PERSONAL EXPLANATION

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. GRAVES. Madam Speaker, due to personal reasons on Tuesday July 29, 2008 I missed rollcall votes 534, 535, and 536. Had I been present, I would have voted ''aye'' on all three votes.

TRIBUTE TO ROBERT ANDERSON

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. LATHAM. Madam Speaker, I rise today to recognize the American Culinary Federation 2008 Central Region Educator of the Year, Robert Anderson of Des Moines Area Community College.

Robert is the program chair of the Culinary Arts and Hospitality Careers program and Executive Chef at DMACC. He is a certified executive chef and certified culinary educator. Robert is a member of the Honorary Order of the Golden Toque, one of only 99 such chefs in the United States. Robert trained at the Culinary Institute of America (CIA) and worked in several quality restaurants across the country before joining DMACC to develop the culinary program in 1974. Robert was also selected as DMACC's Distinguished Teacher of the Year in 2000 and is a two-time recipient of the ACF Greater Des Moines Culinary Association Chef of the Year Award.

I consider it a great honor to represent Robert Anderson in the United States Congress. The expertise he brings to Central Iowa is certainly valued and I wish Robert the best as he continues serving Iowa and DMACC in the culinary profession.

HONORING THE CHRIST CHILD SOCIETY OF SOUTH BEND, INDIANA

HON. JOE DONNELLY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. DONNELLY. Madam Speaker, I rise today to honor the Christ Child Society of South Bend, an all-volunteer organization that has served the community for over 60 years. In 1947, a group of women gathered in the home of founder Puddy Crowley to make baby clothes for a few needy families. Since then, the Christ Child Society has grown to a membership of over 500 and a client list of over 4,000 at-risk children and is one of the largest and most active of the 41 chapters in the United States.

The South Bend chapter is an affiliate of the National Christ Child Society, founded in 1887 by Mary Virginia Merrick in Washington, DC. An invalid, Miss Merrick turned her attention from her disability to helping the poor children of Washington. For her selfless work she received the Laetare Medal from the University of Notre Dame and the Papal Cross, among other honors, and has been declared a ''Servant of God,'' the first step toward canonization.

Following the model of Miss Merrick, the South Bend Chapter gives infants, born to needy mothers who are often just children themselves, a bountiful layette containing items such as blankets, clothing and baby items. Children, ages one through twelve, are referred by local agencies, churches, or schools to receive new winter clothing. Each child receives a wardrobe which includes a winter coat, hat, mittens, underwear, socks and shoes, and two outfits.

The Christ Child Society expanded its services to include a project that provides backpacks containing necessities and comfort items for children removed from homes due to abuse and neglect. Volunteers from the Christ Child Society are tutors and mentors and act as classroom helpers at one of the neediest schools in South Bend.

The increased need for clothing and the expansion of services led the Christ Child Society to move to its new location, a former school which has been filled to capacity with children's clothing. The dedication of the new clothing center marks a new chapter in the history of this vital and compassionate organization.

The Christ Child motto is ''Challenging poverty, one child at a time.'' The dedicated members work tirelessly at purchasing, sorting, and distributing clothes and fundraising while demonstrating genuine love and concern for the children they serve. The self-esteem and joy brought to the children is one step out of the cycle of poverty.

So, today, on behalf of the citizens of Indiana's Second District, I honor the members of the Christ Child Society of South Bend and extend my hope for a better life to the children they serve.

CONGRATULATING THE PARTICIPANTS OF THE HOUSE FELLOWS PROGRAM

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. TOWNS. Madam Speaker, I rise today to congratulate the participants of the House Fellows Program. As an initiative of the Office of the Historian, this program is a unique opportunity for a select group of secondary education teachers of American history and government to experience firsthand how Congress really works. They were chosen because they are educators with demonstrated excellence in the classroom.

One of the goals of the program is to develop curricular materials on the history and practice of the House for use in schools. Each Fellow will prepare his or her brief lesson plan on a Congressional topic of their choosing, and these plans will become part of a teaching resource database on the House. During the school year following their participation in the House Fellows Program, each Fellow will have the responsibility to present their experiences and lesson plans to at least one in-service institute for teachers of history and government.

Since the House Fellows Program beginning in 2006, 49 teachers from around the country have participated in this innovative program. With plans to select a teacher from every congressional district over the next several years, the House Fellows Program will be able to impact thousands of high school teachers and their students, providing an inside account of how the House of Representatives functions, energizing thousands of students to become informed and active citizens. As a former teacher, I know that civic education is essential. We must continue our efforts to get our young people involved in the political process, not only in my congressional district but in districts across the country. Educating teachers about the ''People's House'' is one of the best ways to do that.

Among the teachers who are participating this week, I am pleased to welcome Ms. Lyntonia Coston of the Brooklyn Arts and Media High School. I know that all Members will join me in congratulating Ms. Coston and all the teachers who are participating in the 5th session of the House Fellows Program.

Ms. Lynda Good, William A. Shine Great Neck South High School, Great Neck, New York (Ackerman, NY05); Ms. Brooke Goldstein, Francis Marion Military Academy, Ocala, Florida (Stearns, FL06); Ms. Cari Gray, New Braunfels High School, New Braunfels, Texas (Smith, TX21); Ms. Monica Hiranandani, St. Bonaventure High School, Ventura, California (Gallegly, CA24); Ms. Heather Ihde, Riverdale High School, Murfreesboro, Tennessee (Gordon, TN06); Ms. Alma Ortiz, Homer Hana High School, Brownsville, Texas (Ortiz, TX27); Michael Tucker, Ewing High School, Ewing, New Jersey (Smith, NJ04).

Madam Speaker, I would like to urge all of my colleagues to join me in thanking the Office of the Historian for sponsoring this program. Under the leadership of Dr. Remini and Dr. Fred Beuttler, along with their staff; Michael Cronin, Anthony Wallis, Andrew Dodge, and Dr. Charles Flanagan; interns George Dise, Parker Williams, and Mike Ferrin; the Office of the Historian is dedicated to conserving and presenting the history of the House of Representatives, the ''People's House.''

HONORING THE SERVICE OF PASQUALE N. ''PAT'' SALVE

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. GERLACH. Madam Speaker, I rise today to honor a dedicated public servant who is retiring after a 21-year career as a letter carrier with the Chester Springs Post Office in Chester County, Pennsylvania.

Pasquale N. Salve was known to those on his daily route as ''Pat.'' Co-workers described Pat as a gregarious individual who would stop to chat with residents and check in on senior citizens while making his rounds.

On Christmas Day, co-workers said Pat would stop by the Chester Springs Post Office to see if any last-minute packages needed to be delivered in time for holiday celebrations. In another example of his selfless dedication to the residents along his route, Pat would often volunteer to deliver parcels on his way home after his regular shift ended.

It often has been said of letter carriers that neither rain, nor heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds. Pat Salve exemplified this work ethic each day while serving the public with pride. Colleagues will acknowledge Pat's contributions to the community during a small celebration on July 31, 2008 at the Chester Springs Post Office.

Madam Speaker, I ask that my colleagues join me today in praising the outstanding service of Pasquale N. ''Pat'' Salve and all public servants who go beyond what is expected to serve their communities.

CONGRATULATING WKRG–TV 5 REPORTER TIFFANY CRAIGON RECEIVING A 2008 EDWARD R. MURROW AWARD

HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. BONNER. Madam Speaker, it is with both pride and pleasure that I rise today to honor Tiffany Craig, a WKRG–TV5 special assignment reporter, for receiving a 2008 Edward R. Murrow award.

A native of Scotland, Tiffany finished high school in Houston, Texas, and went on to study radio, television, and film at Sam Houston State University. Her celebrated career began at KTRK in Houston, Texas. From there, she went to work for KVII in Amarillo, Texas, and then to WBMA in Birmingham, Alabama, before joining Mobile's WKRG–TV5 in 2002.

Last year, Alabama landed one of the largest private industrial development projects in the United States, ThyssenKrupp's new $3.7 billion state-of-the-art steel manufacturing and processing facility, and Tiffany traveled to Germany to report from the company's headquarters. She traveled across the Atlantic once again to cover the Air Force tanker competition from the Paris Air Show.

Alabama's First Congressional District and indeed the state of Alabama have been blessed with one good news economic announcement after another over the past 18 months. Tiffany and WKRG have provided widespread coverage of each of the recent economic developments for the city of Mobile. This documentary, ''Mobile's Makeover,'' earned reporter Tiffany Craig, editor Ed Smith, photographer Jud Holson, and producer Jennifer Dale a national 2008 Edward R. Murrow Award.

Honoring outstanding achievements and excellence in electronic journalism, the Murrow Awards are give by the Radio-Television News Directors each year. This year, the Murrow Award was given to 54 news organizations representing networks, cable channels, and television stations.

Madam Speaker, Tiffany Craig's career has already been filled with much achievement, and I rise today to honor yet another of these achievements—a national 2008 Edward R. Murrow Award. May she continue to inform and inspire the people of south Alabama. I know her colleagues, her family, and her many friends join with me in praising her significant accomplishments and a job well done.

HAPPY BIRTHDAY COE HAMLING

HON. TOM PRICE

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. PRICE of Georgia. Madam Speaker, I rise today to honor a dear friend and a special American on the occasion of his 90th birthday.

Worthy Coe Hamling was born on August 2, 1918 on the plains of South Dakota. Armed with nothing more than the dogged determination, rugged individualism and unbending family loyalty forged by a birth attended only by his mother and God, Coe embodies the greatest qualities of America.

It was at Hamlyn University in Minnesota that he met his loving wife of 66 years, Betty. His embrace of freedom, family, and the sanctity of every human being is balanced by his unyielding sense of responsibility and self-reliance. Living in Roswell, GA, Coe proudly anchors a family of five children, ten grandchildren and eight great-grandchildren.

Madam Speaker, I know the entire House of Representatives joins me in extending a hearty, happy 90th birthday to Coe Hamling—an American treasure!

HONORING ANTHONY RICCIO FOR HIS OUTSTANDING CONTRIBUTIONS TO THE COMMUNITY

HON. ROSA L. DeLAURO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. DELAURO. Madam Speaker, today, as the Societa' Santa Maria Maddalena marks its 110th Anniversary, New Haven's Italian-American community also gathers to honor one of its most outstanding citizens, celebrated author and community leader, Anthony Riccio. It is my privilege to rise today to join them in recognizing Anthony for his many outstanding contributions to our community.

Since I was a child, Societa' Santa Maria Maddalena—and all of the Italian societies—have been a part of my life. People across the country struggle to create a sense of community, a sense of belonging. The Italian societies have played an important role in forging strong bonds in our community and have been charged with both preserving and celebrating our rich heritage and strong traditions. Perhaps most important was the support that they provided to families and those newly immigrating to America. Society members helped them to find employment and housing, educate themselves and their children, to become productive and active members of the community, giving them a voice and the opportunity to realize the American Dream. It has been through that sense of community—that extended family—that Italian-Americans have flourished and generation after generation share a special pride in their Italian roots.

Each year, the Societa' Santa Maria Maddalena honors an individual whose contributions to the community have furthered this mission. Anthony Riccio has most certainly done much to capture and record the history of the Italian-American experience, particularly in New Haven. His passion for culture and tradition began as a child. As so many of us did, Anthony would spend many hours with his grandmother and she would often receive letters from her family still in Italy. Anthony vividly recounts his memories of their walks through the neighborhood to find someone who could translate them. His enthusiasm and desire to understand Italian culture and history only grew as he got older.

As an undergraduate Anthony was given an opportunity that would later provide inspiration for his work as an author. Anthony spent two summers studying art history in Italy and traveled to southern Italy to find his family. As he traveled to the village of his ancestors, he marveled at the similarities between the villages and towns of Italy and that of his own

hometown neighborhood. After studying in Italy for several years, Anthony returned to the United States and began working with senior citizens in Boston's North End, many of whom were immigrants from Italy. His passion for Italian history only strengthened as he spent more time with them and he began to record their conversations to be sure that the stories were captured accurately. Anthony's first book, Boston's North End: Images and Recollections of an Italian American Neighborhood, was a compilation of those stories and its success led to his second book, The Italian American Experience in New Haven. Collections of photographs and oral histories, each brings a unique perspective of the Italian American experience in these two cities and his hometown of New Haven could not be more proud.

Today, as he is recognized by the Societa' Santa Maria Maddalena, I am honored to join all of those who have gathered this evening in extending my sincere thanks and appreciation to Anthony Riccio for his many invaluable contributions to our community. I would also like to extend my best wishes to him, his wife Dorothy, and his daughter, Annalisa, on this very special occasion.

TRIBUTE TO REVEREND DR. CAESAR ARTHUR WALTER CLARK

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. EDDIE BERNICE JOHNSON of Texas. Madam Speaker, I rise today to pay tribute to Reverend Dr. Caesar Arthur Walter Clark, a remarkable and compassionate leader whose legacy has touched so many North Texans. Reverend Clarke passed on July 27, 2008. His is a deep loss felt by his family, his church congregation, the North Texas community, the State of Texas, and most assuredly, our nation. Reverend Clarke will long be remembered for his social activism and advocacy on behalf of those individuals suffering from poverty, homelessness, and injustice. He fought for the common person and his influence was far reaching, both inside and outside the African American community.

Reverend Clark was born in Shreveport, Louisiana and attended the public schools in his native state. He was converted to Christianity in 1928 at age 14. Pastor Clark began preaching in April 1929, and was ordained four years later in 1933. His first pastorate at age 19 was the Israelite Baptist Church in Longstreet, Louisiana.

Dr. Clark has served as the venerated pastor of Good Street Baptist Church in Dallas for over 58 years. He has delivered his vibrant sermons all over the world during his extraordinary career in the clergy. In addition, he has served as president of the Missionary Baptist Association of Texas and as vice president of the National Baptist Convention.

While his professional focus has always been squarely on the valued worshippers at Good Street Baptist, Dr. Clark is also an involved community leader who continues to enjoy membership on the Boy Scouts of America Advisory Committee and the Dallas Black Chamber of Commerce. In addition, Dr. Clark played an active role in our Nation's civil rights struggle. Perhaps most notably he was responsible for drawing Dr. Martin Luther King to his church in 1958 for his first of many speeches in Dallas.

Madam Speaker, Dr. Caesar A.W. Clark's life is one of dedicated service, compassion, faith and devotion. For all these reasons, please join me in expressing our heartfelt sympathy to his wife, Carolyn Elaine Clark; his son, Dr. Caesar Arthur Walter Clark, Jr.; daughter-in-law, Dr. Slyvia Clark; granddaughter, Chelsi Om'Nira Clark; step daughter, Tonya Bunche; step son, Maurice Bunche and his many relatives and friends.

I urge my colleagues to please join me in conveying our gratitude to his family for sharing this great man with us, and to accept our condolences for their tremendous loss. He was an inspiration to us all.

EARMARK DECLARATION

HON. FRANK A. LoBIONDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. LoBIONDO. Madam Speaker, as per the requirements of the Republican Conference Rules on earmarks, I secured the following earmark in H.R. 6599.

Requesting Member: Congressman FRANK LoBIONDO (NJ–02).

Bill Number: H.R. 6599.

Account: Air Force, Military Construction, Air National Guard.

Legal Name of Requesting Entity: 177th Fighter Wing.

Address of Requesting Entity: 400 Langley Road, Egg Harbor Township, NJ 08234.

Description of Request: Provide an earmark of $8.4 million for the construction of Phase I of a two phase Operations and Training Facility for the 177th Fighter Wing at the Atlantic City International Airport in Egg Harbor Township, NJ. The facility will house key wing administrative functions to better enable the 177th to perform its Air Sovereignty Alert mission in defense of the homeland.

CONGRATULATIONS TO DR. JOHN GEORGE, SUPERVISORY RESEARCH ENTOMOLOGIST AND LABORATORY DIRECTOR/RESEARCH LEADER, UNITED STATES DEPARTMENT OF AGRICULTURE, AGRICULTURAL RESEARCH SERVICE, KERRVILLE, TX

HON. LAMAR SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. SMITH of Texas. Madam Speaker, today I want to congratulate Dr. John George on the occasion of his retirement after 28 years of Federal service with the United States Department of Agriculture.

Through his continued effort and diligence, Dr. George has established a distinguished career in both academia and research. In 1979, Dr. George joined the Agricultural Research Service (ARS) as Research Leader of the Tick Research Unit of the Knipling-Bushland U.S. Livestock Insects Research Laboratory, KBUSLIRL, Kerrville, TX. Dr. George is currently the Research Leader of all Current Research Information System projects at the KBUSLIRL, and in addition was designated Laboratory Director in 1999. Dr. George's work with the Cattle Fever Tick Eradication Program has been instrumental in protecting the U.S. cattle industry from Texas Cattle Fever Ticks.

In addition to the many contributions that Dr. George has made to the ARS, KBUSLIRL, Animal and Plant Health Inspection Service, APHIS, Veterinary Services, and international tick control organizations, he has been an active leader of various professional organizations. He has served as President of the Acarological Society of America, President of the Southwestern Branch of the Entomological Society of America, the Southwestern Branch Representative to the Governing Board of the ESA, and Vice-chairmanship to the Parasitic Diseases Committee of the U.S. Animal Health Association. In addition, to numerous societal committee assignments he has served on the editorial boards of three ESA Journals. In 2003, his peers in livestock entomology recognized his devotion and contributions to his profession when he was presented with the Life-Time Achievement Award, sponsored by Bayer Animal Health, at the 47th Annual Livestock Insect Workers Conference, Atlantic Beach, NC.

PAYING TRIBUTE TO WILLIAM K. KOWALSKI, ASSISTANT SPECIAL AGENT IN CHARGE, DETROIT DIVISION, FEDERAL BUREAU OF INVESTIGATION

HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. ROGERS of Michigan. Madam Speaker, I rise today to honor the accomplishments of William J. Kowalski, who is retiring after 25 years of service in the Federal Bureau of Investigation. Throughout his career with the FBI he has served his country with honor and distinction.

Following his training at the FBI Academy in Quantico, Virginia, Mr. Kowalski began his career with the Bureau in Detroit. During his time with the Bureau, Mr. Kowalski moved quickly through the ranks, a testament to his dedication and commitment to his job. He served tours of duty in Memphis, Tennessee, and New York City.

After his exceptional work in the field he was promoted to a supervisory position at FBI Headquarters in Washington, DC. During his service Special Agent Kowalski was responsible for managing counterintelligence and espionage investigations. After the Berlin Wall fell Mr. Kowalski was one of the first agents to travel to Eastern Europe.

Mr. Kowalski eventually returned home to serve in Michigan, this time in a supervisory role for the Flint and Ann Arbor Resident Agencies of the FBI. In 2004, Mr. Kowalski was promoted to his current position of Assistant Special Agent in Charge in Detroit. While in this position Mr. Kowalski led Detroit's counterterrorism efforts which are so crucial to our nation's security today.

Mr. Kowalski's relentless hard work and dedication was recognized numerous times as

evidenced by his outstanding law enforcement record and repeated promotions within the Bureau. Throughout his career he has exemplified the FBI's motto of Fidelity, Bravery, and Integrity by serving and protecting the people of Michigan and citizens across United States.

Madam Speaker, I ask my colleagues to join me in honoring William J. Kowalski for his model service to United States law enforcement and his commitment to his country. He is truly deserving of our respect and admiration.

EARMARK DECLARATION

HON. JOHN R. CARTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. CARTER. Madam Speaker, I rise today to submit documentation consistent with the new Republican earmark standards.

Requesting Member: Congressman JOHN R. CARTER.

Bill Number: H.R. 6599—The Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Army.

Legal Name of Receiving Entity: Fort Hood, TX.

Address of Receiving Entity: U.S. Army Garrison, Fort Hood, Bldg. 1001, Rm. W321, Fort Hood, TX 75544.

Description of Request: I have secured $32,000,000 in funding in H.R. 6599 in the Military Construction, Army account for Unit Maintenance Facilities at Fort Hood, TX.

This funding will construct standard design unit maintenance facilities. Primary facilities to include vehicle maintenance shops, company operations facilities with covered hardstand, oil storage buildings, organizational unit storage buildings, Unmanned Aerial Systems (UAS) Maintenance Hangar, UAS taxiways and bridge, and organizational vehicle parking. Install intrusion detection systems (IDS) for arms rooms. Connect Energy Management Control System (EMCS) to base-wide network. Special foundations are required due to expansive soils. Sustainable Design and Development (SDD) and Energy Policy Act of 2005 (EPAct05) features will be provided. Supporting facilities include electrical, water, sanitary sewer, and natural gas utilities; fire protection and alarm systems; security lighting; fencing, paving, walks, curbs and gutters; storm drainage; access roads; information systems; landscaping; and site improvements. Access for persons with disabilities will be provided in public areas. Heating and air-conditioning will be provided by self-contained units. Anti-Terrorism/Force Protection (AT/FP) measures will be provided by structural reinforcement, mass notification system, special windows and doors, high curbing, and other site improvements to secure perimeter and maintain stand-off distances. Comprehensive building and furnishings related interior design services are required. Air-conditioning (estimated 300 tons).

Fort Hood, Texas, is a strategic installation for the Army. This project was programmed to receive funding in Fiscal Year 2009. This project is necessary to support the troop increase requested by the Secretary of Defense as part of the "Grow the Force" initiative for the Army.

Military Construction projects are always 100 percent funded by the U.S. Federal Government so there is no opportunity for matching funds.

Requesting Member: Congressman JOHN R. CARTER.

Bill Number: H.R. 6599—The Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Air Force.

Legal Name of Receiving Entity: Fort Hood, TX.

Address of Receiving Entity: U.S. Army Garrison, Fort Hood, Bldg. 1001, Rm. W321, Fort Hood, TX 75544.

Description of Request: I have secured $10,800,000 in authorization funding in H.R. 6599 in the Military Construction, Air Force account for a TACP Joint Air Ground Center at Fort Hood, TX.

This project will construct a Joint Air Ground Center to support the administrative, training, vehicle and equipment maintenance and storage requirements for the 3rd Air Support Operations Group and the 9th Air Support Operations Squadron at Fort Hood, TX. The construction will include reinforced concrete foundation and floor slabs, metal frame work, masonry walls, roof system, fire detection/protection system, utilities, pavements, site improvements, special foundations, communication support, and demolition and asbestos abatement of five facilities (3,611 SM). This project will comply with DoD antiterrorism/force protection requirements per Unified Facilities Criteria.

Fort Hood, Texas is a strategic installation for the Army. This project was programmed to receive funding in Fiscal Year 2009. The project is necessary to support the mission of the 3rd Air Support Operations Group and the 9th Air Support Operations Squadron at Fort Hood, Texas.

Military Construction projects are always 100 percent funded by the U.S. Federal Government so there is no opportunity for matching funds.

Requesting Member: Congressman JOHN R. CARTER.

Bill Number: H.R. 6599—The Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Army.

Legal Name of Receiving Entity: Fort Hood, TX.

Address of Receiving Entity: U.S. Army Garrison, Fort Hood, Bldg. 1001, Rm. W321, Fort Hood, TX 75544.

Description of Request: I have secured $17,500,000 in funding in H.R. 6599 in the Military Construction, Army account for a Chapel with Religious Education Center project at Fort Hood, TX.

This project will construct a standard design chapel complex and religious education center. Primary facilities include a chapel complex, religious education center, administrative area, conference rooms, library, multipurpose activity area, kitchen and storage areas, fire alarm and fire suppression systems, connection to Installation Energy Management Control System (ECMS), and building information systems. Special foundations are required due to the expansive soils. Supporting facilities include electrical, water, sanitary sewer, and natural gas utilities; storm drainage; chilled water distribution; paving, walks, curbs and gutters; security lighting, information systems; landscaping and site improvements. Heating will be provided by self-contained natural gas units. Access for the handicapped will be provided. Comprehensive Interior Design package is required. Anti-Terrorism/Force Protection (AT/FP) measures include mass notification system, structural reinforcement, special doors and windows, high curbing, and other measures to maintain stand-off distance.

Fort Hood, Texas is a strategic installation for the Army. This project was programmed to receive funding in Fiscal Year 2012, but was identified by the garrison commander as the highest unfunded priority in Fiscal Year 2009. The project is necessary to improve psychological and spiritual care for the soldiers and their families.

Military Construction projects are always 100 percent funded by the U.S. Federal Government so there is no opportunity for matching funds.

HONORING THE CITY OF MISHAWAKA ON ITS 175TH ANNIVERSARY

HON. JOE DONNELLY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. DONNELLY. Madam Speaker, today I rise to honor the City of Mishawaka, which is celebrating its 175th anniversary.

The Second District of Indiana is proud to have cities like Mishawaka that exemplify Hoosier values and emphasize the importance of community. Built along the St. Joseph River and named after Princess Mishawaka, daughter of Shawnee Chief Elkhart, Mishawaka has been an evolving city reflecting the needs of the world while maintaining its own culture.

Founded in 1831 and incorporated in 1833, Mishawaka grew from a mining town to the "Peppermint Capital" to a thriving city which is now home to the only Hummer H1 and H2 assembly plants in the United States. Mishawaka is also home to the Grape Road Commercial Corridor, the second largest retail market in the State of Indiana. Mishawaka's picturesque downtown area is undergoing a revitalization with the addition of retail, restaurants and homes that maintain the small town character that defines the city.

Mishawaka has a rich cultural life as well. It is home to the Nation's largest and oldest wiffleball tournament, the World Wiffleball Championship. Mishawaka also believes in the value of neighbors and neighborhoods, demonstrated in neighborhoods intentionally built to maintain a "hometown" feel as well as a total of 27 community parks. One park contains a Japanese style garden created in honor of Mishawaka's sister city, Shiojiri, Japan.

I am proud to rise today to congratulate Mishawaka, Indiana and its 47,000 residents on 175 years of rich history and wish them a bright future.

RECOGNIZING MOBILE COUNTY DISTRICT ATTORNEY JOHN TYSON AND HIS WORK IN CREATING THE ALABAMA SECRET SAFE PLACE PROGRAM

HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. BONNER. Madam Speaker, I rise today to pay tribute to Mobile County District Attorney John Tyson for his leadership and support in creating the Nation's first Secret Safe Place for Newborns program in Mobile, Alabama. As Mobile's Press-Register recently editorialized, "'Saving newborns' lives is a legacy of which Mobile can be proud."

The brainchild of former WPMI–TV reporter Jodi Brooks, the Alabama Secret Safe Place program was created in 1998 through the hard work and support of John Tyson. Due to his leadership, every State has established a program similar to Alabama's as an option for mothers who are unable and unprepared to provide for their newborn baby.

These programs allow mothers to turn over their newborns to a local hospital, fire station, police station, or other public entity without being charged with a crime. Within the time limit set by each State's law, the mothers are able to remain anonymous and will not be accused of child neglect. The mothers also continue to have the opportunity, if they wish to change their minds, to return and reclaim their child.

When the Secret Safe Place for Newborns program began, it was all too common for distraught mothers, in most cases teenagers, to abandon their newborns in trash cans or in public places hoping someone would discover them. Some even went so far as to murder their unwanted babies. Due in large part to John's efforts, an estimated 500 newborns across the country have been saved over the past 10 years because of infant safe haven programs.

John often serves as the spokesman for infant safe haven programs speaking to media outlets throughout the country and around the world on efforts to combat the unsafe abandonment of newborns.

Madam Speaker, I ask my colleagues to join with me in commending District Attorney John Tyson and so many others for their efforts on behalf of newborns in Alabama and across the country. The success of the Alabama Secret Safe Place for Newborns program is a tribute to their efforts to save infants' lives—they are true heroes.

GREATER HOUSTON CONCERNS OF POLICE SURVIVORS (C.O.P.S.)

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. POE. Madam Speaker, the Greater Houston Concerns of Police Survivors (C.O.P.S.) was created to help provide resources to assist surviving families of law enforcement officers killed in the line of duty. This noble organization helps rebuild the lives of those they help, and provides training to law enforcement agencies on survivor victimization issues. They also educate the public on ways to show support for law enforcement professions and their survivors.

The Greater Houston C.O.P.S. instituted two programs that the public can join to show support for the fallen officers and their families. Project Blue Light gets residents to place a blue light in a window of a home or business. By keeping the blue lights burning, it is a constant reminder to everyone that law enforcement officers serve and protect the public "every day, every minute, and every second of the year."

The Blue Ribbon Program encourages the public and law enforcement personnel to tie blue ribbons to their car antennas during National Police Week. C.O.P.S. hopes the blue ribbons are a reminder to the public that many law enforcement officers have already paid the ultimate price and given their lives in the line of duty. They also encourage the public to display their blue ribbons outside of National Police Week, to honor those officers who are in our communities each day, putting their lives on the line to keep the public safe.

The Greater Houston C.O.P.S. is an active chapter of the national organization of Concerns of Police Survivors, Inc. and continues to advocate for citizens in the Greater Houston area to support the law enforcement officers lost, still serving, and the families of these officers.

I applaud C.O.P.S. and Greater Houston C.O.P.S. for their dedication and commitment to law enforcement and their families.

Senior Police Officer Gary A. Gryder assigned to the Southeast Division, Paroled Offender's Unit, while directing traffic was struck and killed at Katy Freeway West service road at Highway 6 on Sunday, June 29, 2008. Officer Gryder was a twenty-three (23) year veteran of the Department joining on January 7, 1985, entering Police Academy Class No. 126. He is survived by his wife, Retired Senior Police Officer Debra L. Gryder, who served the Department for over twenty-seven (27) years, his son, Austin A. Gryder and a daughter, Jennifer Streeter. He is also survived by his Father-in-law, Retired Police Officer Alfred B. Lewis, who retired from the Department after serving over thirty-one (31) years, on March 2, 1981.

Madam Speaker, I attended the funeral of Officer Gryder along with hundreds of other citizens. His wife, Debbie, and his family now join the ranks of C.O.P.S. Our communities need to constantly remember our fallen police and their families that will need to continue on without their loved ones.

And that's just the way it is.

ON THE BIRTH OF MADELYN CLAIRE KAPLAN AND AINSLEY ELIZABETH KAPLAN

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. WILSON of South Carolina. Madam Speaker, I am happy to congratulate my friend Andrew Kaplan and his wife Danleigh Kaplan of Washington on the birth of their new twin girls. Madelyn Claire Kaplan and Ainsley Elizabeth Kaplan were born on July 27, 2008, weighing 5 pounds 2 ounces and 5 pounds 8 ounces respectively. Madelyn and Ainsley have been born into a loving home where they will be raised by parents who are devoted to their well-being and bright future.

I am so excited for this new addition to the Kaplan family. On behalf of my wife Roxanne and our entire family, we want to wish Andrew, Danleigh, Madelyn, and Ainsley all the best.

HONORING WANDA WILSON, CRNA, PhD, MSN PRESIDENT OF THE AMERICAN ASSOCIATION OF NURSE ANESTHETISTS

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. SCHAKOWSKY. Madam Speaker, today I pay tribute to Wanda Wilson, CRNA, PhD, MSN, of the University of Cincinnati and president of the American Association of Nurse Anesthetists, located in my congressional district. Ms. Wilson will soon complete her year as the 2007–2008 national president of the AANA, the professional organization representing more than 39,000 Certified Registered Nurse Anesthetists, CRNAs, and student nurse anesthetists in the United States. She has provided strong leadership in advocating for the practice of nurse anesthesia and the patients who CRNAs serve every day.

Founded in 1931, the AANA celebrates its 77th anniversary as the professional association representing CRNAs, advanced practice nurses who administer approximately 30 million anesthetics in the U.S. every year. CRNAs practice in every setting in which anesthesia is delivered: traditional hospital surgical suites and obstetrical delivery rooms; critical access hospitals; ambulatory surgical centers; the offices of dentists, podiatrists, ophthalmologists, plastic surgeons, and pain management specialists; and U.S. military, Public Health Service, and Department of Veterans Affairs health care facilities.

CRNAs provide anesthesia for all types of surgical cases and, in some states, are the sole anesthesia providers in the vast majority of rural hospitals, affording these medical facilities obstetrical, surgical and trauma stabilization services.

A resident of Cincinnati, Ohio, Ms. Wilson earned her doctorate in nursing science and physiology, a master's degree in nursing, a bachelor's degree in nursing and a bachelor's degree in science from the University of Cincinnati. She also received her nurse anesthesia diploma from Cincinnati General Hospital and her nursing diploma from Holzer Medical Center in Gallipolis, Ohio. A longtime member of the AANA, Ms. Wilson has held numerous leadership positions and served as regional director, treasurer, vice-president, and president-elect before becoming the national president of the AANA in 2007. In addition, Ms. Wilson has served terms as president and president-elect and as a member of the board of directors for the Ohio State Association of Nurse Anesthetists.

She is also the program director at the University of Cincinnati's College of Nursing, Nurse Anesthesia Major, which has been ranked one of the top nurse anesthesia educational programs nationally by U.S. News and World Report.

Adding to her professional accomplishments, Ms. Wilson has been recognized for speaking on anesthesia-related topics over the years. She has taken her experience and knowledge from the workplace and her AANA leadership role to lecture on political and academic anesthesia-related topics for different professional groups. During her AANA presidency, Ms. Wilson has advocated for CRNAs and patients before the Centers for Medicare & Medicaid Services, the Centers for Disease Control and Prevention, the Food and Drug Administration, and other Federal agencies. In addition, Ms. Wilson worked to bring the AANA's perspective to the national debate on how to improve veterans health care, ensuring that AANA was represented in Congressional hearings to testify about the contributions of CRNAs in the Veterans Affairs health system and the dedication with which CRNAs provide safe anesthesia care to members of the U.S. Armed Forces at home and abroad. Finally, Ms. Wilson has been an invaluable advocate in advancing reform and equity in Medicare anesthesia reimbursement in educational settings so that seniors and persons with disabilities will have access to safe anesthesia care. Legislation recently enacted by Congress to reverse Medicare payment cuts also reformed Medicare anesthesia payment teaching rules for CRNAs and anesthesiologists, a longstanding policy objective of the AANA.

Madam Speaker, I hope my colleagues will join me today in recognizing the outgoing president of the American Association of Nurse Anesthetists, Ms. Wanda Wilson, CRNA, PhD, MSN, for her notable career and outstanding achievements.

H. RES. 1288 NATIONAL CAMPUS SAFETY AWARENESS MONTH

SPEECH OF

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 29, 2008

Mr. POE. Mr. Speaker, each fall, students arrive on college campuses and universities across the Nation to further their education. There is a general excitement about campus life and the opportunity to live away from home for the first time with little to no rules. However, the harsh reality soon becomes evident—that campuses are not immune from the threat of crime.

Recognizing the very real presence of crime on college campuses and universities across America, I am a cosponsor of H. Res. 1288, Supporting the goals and ideals of National Campus Safety Awareness Month. This resolution designates the month of September as the National Campus Safety Awareness Month in partnership with hundreds of colleges and universities in the Nation.

As the co-chair and founder of the Congressional Victim's Rights Caucus, I strongly believe that we need to raise awareness about crime issues present on campuses, such as sexual assault, stalking, hazing, and alcohol and drug abuse.

This resolution encourages our Nation's colleges and universities to promote campus safety and crime awareness prevention programs. I am proud to know that several colleges and universities from my home state of Texas participated in the National Campus Safety Awareness Month last year, and my hope is that even more campuses and universities participate this year.

The facts are before us—from 2004–2006 there were 8,114 forcible-sex offenses, 8,923 aggravated assaults, and 37 homicides on college and university campuses. Although we would like to think that these higher education institutions are immune from such heinous acts of crime, sadly they are not.

I join with Rep. SESTAK in support of H. Res. 1288, the National Campus Safety Awareness Month, because although there is a lot of work to be done to make our campuses a safer place, this resolution is a step in the right direction.

TRIBUTE TO MS. LEE STURTEVANT

HON. ZOE LOFGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. ZOE LOFGREN of California. Madam Speaker, I rise today to recognize the accomplishments of Ms. Lee Sturtevant and wish her the very best upon her 85th birthday.

Over her years of service to the County of Santa Clara, Ms. Sturtevant has continually worked within the democratic process to help raise the standard of living for those who have the least.

Ms. Sturtevant has sought to get women involved in politics and to run for office. She successfully managed the 1974 campaign of Assemblywoman Leona Egeland, who was at that time the only woman serving in the Assembly. She continues to be a highly influential and informed leader within the Santa Clara County Democratic Central Committee and of DAWN, Democratic Activists for Women Now.

As a high school student, she was introduced to politics and its ability to benefit society by her mother, who took her to Los Angeles County Democratic Central Committee meetings. And, as a young girl, Sturtevant once dined over lunch with Eleanor Roosevelt.

Although many vibrant and youthful people of her age are enjoying retirement and relaxation, Ms. Sturtevant continues to employ her skills and dedication as a policy advisor for the office of Santa Clara County Supervisor Ken Yeager. In 1981, Lee served as my Chief of Staff when I was first elected to the Santa Clara County Board of Supervisors. She has also worked on the staffs of other prominent Santa Clara County area elected officials.

Her career also includes working as a teacher and librarian for the Cupertino School District in addition to serving on the San Jose Unified School District Board of Education.

I would like to thank Lee Sturtevant for her service to my office and to the community of the County of Santa Clara. Best wishes upon your 85th birthday and may you celebrate many more in the years to come.

25 PINELLAS COUNTY HIGH SCHOOL STUDENTS HONORED WITH ANNE FRANK HUMANITARIAN AWARDS

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. YOUNG of Florida. Madam Speaker, the Florida Holocaust Museum in St. Petersburg, Florida, which I have the privilege to represent, has honored 25 Pinellas County High School students with the Anne Frank Humanitarian Award for their work to improve our community and our world.

These students are being recognized for their volunteer efforts in a wide variety of areas including Special Olympics, Toys for Tots, community food drives, environmental awareness campaigns, mentoring programs for the less fortunate, hurricane and disaster relief projects, supporting our troops overseas, and raising funds to support an African orphanage.

The award was established just after the attacks on our Nation that took place September 11, 2001. Irene Weiss, who is now Chairman of the Museum's Board of Directors, decided that our Nation needed to step up and honor selfless acts of kindness by young people, particularly at a time of such violence and horror. As a result, the museum has honored high school juniors from the five county Tampa area every year since 2002.

The Museum pays tribute to juniors in hope that they will become role models in their schools as seniors to let their fellow classmates know that it is never too early to become community leaders. As the award's namesake Anne Frank once said, ''How wonderful it is that nobody need wait a single moment before starting to improve the world.''

Madam Speaker, join me in congratulating the Pinellas County students that were honored this year. They are: Zachary Northcutt, Admiral Farragut Academy; Lady Nash, Bayside High School; Heather McShane, Boca Ciega High School; Dominic Delgado, Clearwater Central Catholic High School; Leigh Jester, Clearwater High School; Danielle Rodnizki, Countryside High School; Megan Dockerty, Dixie Hollins High School; Bo Everett, Dunedin High School; Jennifer Dipietro, East Lake High School; India Welch, Gibbs High School; Caitlan Welsh, Indian Rocks Christian School; Alyssa Boddie, Keswick Christian School; Christine McLarty, Lakewood High School; Maxwell Brickel, Largo High School; Alexanndrea Wert, Northeast High School; Kathryn Keller, Northside Christian School; Jacquelean Watson, Osceola High School; Danielle Simpson, Palm Harbor University High School; Alicia Griggs, Pinellas Park High School; Caitlin DeMull, Seminole High School; Helen Kline, Shorecrest Preparatory School; Mikel Bryant, St. Petersburg Catholic High School; Amanda Emery, St. Petersburg Collegiate High School; Danielle Rossbach, St. Petersburg High School; Jessica Primiani, Tarpon Springs High School.

These youth, who are our future leaders, should remind us that our Nation is in good and capable hands. It is that volunteer spirit that has allowed our country to grow and prosper and to remain free and strong. Through their leadership, these students will become

our next generation of government, community, business, and civic leaders and I want to commend Irene Weiss and the members of the Board of Directors of the Florida Holocaust Museum for their exceptional work to recognize the talent that we have developing at such an early age.

DECRYING THE SHOOTING OF SOUTH KOREAN TOURIST WANG-JA PARK BY COMMUNIST NORTH KOREA

HON. THADDEUS G. McCOTTER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. McCOTTER. Madam Speaker, this week we commemorate the 55th anniversary of the armistice which theoretically ended the armed hostilities in the Korean War. I say ''theoretically'' because it appears communist North Korea periodically forgets it is the party to the permanent ceasefire. For instance, in July 2003, soldiers in the DMZ exchanged machine-gun fire, with the first shots coming from communist North Korea. This particular attack was not timed arbitrarily. It occurred on the 55th anniversary of the enactment of South Korea's constitution. Fortunately, no one was hurt. Similarly, less than a year ago last August, there was an unprovoked gunfire shot from a communist North Korean guard post toward a South Korean guard post in the Demilitarized Zone (DMZ) which separates the free Republic of Korea from the Democratic People's Republic of Korea. Again, fortunately, in that incident, nobody was injured.

Most recently, on July 11, 2008, a South Korean citizen, Mrs. Wang-Ja Park, was shot dead by a communist North Korean soldier while visiting a beach at Mount Keumgang, a resort that is popular with South Korean tourists who visit communist North Korea. The killing of Mrs. Park is a serious matter that deserves worldwide scrutiny. Even without the context of previous exchanges of military gunfire between North and South Korea, this event should not be considered in isolation from larger policy questions. The unfortunate and regrettable killing of Wang-Ja Park offers illumination to my view, which is shared by others, that the current administration's decision and notification to Congress to remove communist North Korea from the list of state sponsors of terrorism was premature and ill-considered. This incident lays bare the brutality of the communist North Korean regime and suggests we should continue to be vigilant. Madam Speaker, in the wake of Mrs. Park's death, we should all be concerned about the lack of cooperation by communist North Korean authorities in the investigation of the incident. South Korean investigators have been refused access to the scene of the crime by communist North Korean authorities, and there are serious discrepancies in accounts made by eyewitnesses and by the communist North Korean government.

I strongly urge communist North Korea to cooperate fully with South Korea on a joint investigation into this terrible tragedy. The South Korean government has rightly suspended tours to Mount Keumgang and the suspension should continue until a joint investigation has been completed and North Korea's communist government assures this will not happen again. To do otherwise would simply whitewash the incident.

Apart from the very serious foreign policy ramifications of this tragic event, I wish to convey my sincere condolences to the family of Mrs. Park and to all South Korean citizens who have been shocked and dismayed by her death, and I urge my colleagues to do the same.

The people of South Korea should know Americans are thinking about them, about their safety and security, and we remain committed to the shared verities of ordered liberty and democracy which make our nations—the Republic of Korea and the United States of America—prosperous, free, and compassionate.

HONORING THE MEMORY OF U.S. DISTRICT JUDGE THOMAS G. HULL

HON. DAVID DAVIS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday July 30, 2008

Mr. DAVID DAVIS of Tennessee. Madam Speaker, I rise today to honor the memory and life of U.S. District Judge Thomas G. Hull, who passed away Tuesday, July 29, 2008.

Judge Hull lived a life of public service and truly embodied the Tennessee Volunteer spirit. He was known by all for his compassion, integrity and dedication to public service throughout his 82 years of life.

Judge Hull served in the Pacific Theatre during World War II, was a Tennessee State Representative, and a state and federal judge. Judge Hull's passion was evidenced in everything he did whether it was serving as Chief Clerk of the Tennessee General Assembly or as campaign manager for James H. Quillen's first campaign for U.S. Congress.

Judge Hull was appointed as U.S. District Judge by President Ronald Reagan and at times handled the entire caseload for the Eastern District of Tennessee because of judgeship vacancies. He served 23 years with the federal branch of government including 7 years as Chief Judge of the Eastern District of Tennessee.

Judge Hull played a major role in the construction of the James H. Quillen United States District Courthouse to replace the old and overcrowded courthouse in Greeneville, Tennessee.

Judge Hull was active in the business and banking communities and was active in the Republican Party of Tennessee.

Madam Speaker, I ask that the House join me today in offering our sympathies to the family and friends of U.S. District Judge Thomas G. Hull. He was a family man, a compassionate public servant and true friend of the First District of Tennessee.

His service is greatly treasured, and he will be deeply missed.

HAPPY 90TH BIRTHDAY WAYSIDE RESTAURANT AND BAKERY

HON. PETER WELCH

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. WELCH of Vermont. Madam Speaker, I come to the floor today in celebration of the 90th birthday of a well-known Vermont establishment, the Wayside Restaurant and Bakery.

Located on the town line of Berlin and the city of Montpelier, the Wayside was built and opened in the summer of 1918 by the Ballou family. Located on Route 302, the Wayside has offered a convenient stopping place for travelers and locals alike for generations.

When the Wayside was first opened, it did not offer a dine-in service, but rather functioned as a take-out restaurant. The size of the Wayside has grown considerably since 1918, and the restaurant now boasts a 160-seat dining room and a kitchen of equal size.

Nearly all of the Wayside's food—including its renowned breads and desserts—are homemade, and produce from local farms is frequently used. The menu features traditional Vermont dishes like salt pork and chicken pie, and a wide-range of other country favorites.

Serving an average of 1,000 customers each day, the Wayside caters to a diverse clientele. Primarily a place for local Vermonters to enjoy good company and food at affordable prices, the Wayside also attracts legislators, state employees, and tourists. The parking lot is always full, and for weekend brunch, the line runs out the door. Yet despite its incredible popularity, the restaurant maintains a relaxed and authentic atmosphere.

Though recognized nationally by publications such as the New York Times and Gourmet Magazine, the Wayside remains a locally-oriented restaurant, embracing the surrounding community. When the Red Sox won the 2004 World Series, the Wayside's current owners, Karen and Brian Zecchinelli, joined in the local celebration by hosting a rally and rolling back prices to 1918. More than 3,000 customers visited the Wayside for the festivities. It is a true fixture in Central Vermont.

I would like to thank Karen and Brian Zecchinelli for continuing to provide the Vermont community with exceptional food, service, and atmosphere. The Wayside is a wonderful Vermont institution. Congratulations to the Wayside on its 90th birthday. May it continue to serve our community for another 90 years.

EARMARK DECLARATION

HON. JERRY MORAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. MORAN of Kansas. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding an earmark I received as part of H.R. 6599, The Military Construction and Veterans Affairs FY09 Appropriations bill.

Requesting Member: Congressman JERRY MORAN

Bill Number: H.R. 6599
Account: Army Reserve
Legal Name of Requesting Entity: U.S. Army Reserve, 89th Regional Readiness Command
Address of Requesting Entity: 2120 G. Washington Blvd., Wichita, KS 67210
Description of Request: Provide an earmark of $8,100,000 to support the Department of Defense's request to construct a U.S. Army Reserve Center at Dodge City, KS. This project will provide land and facilities with adequate administrative, training, assembly, and supply/storage areas to support the assigned units' requirements and operations. A new organizational maintenance shop (OMS) will provide space for training and to conduct vehicle maintenance activities and operations. A military equipment park (MEP) is included to accommodate vehicles and equipment for the assigned units. A privately owned vehicle (POV) parking area is also included to accommodate the drilling population.

EARMARK DECLARATION

HON. ROBIN HAYES

OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. HAYES. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding requests I received as part of H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act of Fiscal Year 2009:

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009

Account: Military Construction, Additional Defense Access Roads funding for Fort Bragg Access Roads, Phase I (Bragg Boulevard/Murchison Road).

Legal Name of Requesting Entity: BRAC Regional Task Force, Inc. Fort Bragg, NC and the President's FY09 Budget Request.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

Description of Request: This request supports the President's FY09 Budget request level of $13.24 million for additional Defense Access Roads Funding for Fort Bragg, Phase I (Bragg Boulevard/Murchison Road). The increase is due to revisions to the original project necessitated by BRAC and other mission growth at Fort Bragg. This is a high priority security project to close Bragg Boulevard to public traffic through Fort Bragg. This action is necessary to ensure the safety of the new FORSCOM HQ which is being built in close proximity to Bragg Boulevard. The project will widen Murchison Road to flow traffic around Fort Bragg and includes two new interchanges to access control points at Fort Bragg. The project is currently being planned and designed by North Carolina Department of Transportation (NCDOT) in two phases. This increase is needed for Phase I which will widen NC 210 (Murchison Road) to six lanes beginning at the new I–295 Fayetteville Outer Loop interchange and continue north to include a new interchange at Honeycutt Rd. The new interchange, rather than an at-grade crossing is the reason for the additional funds.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Additional Defense Access Roads funding for Fort Bragg Access Roads, Phase I (Bragg Boulevard/Murchison Road).

Legal Name of Requesting Entity: BRAC Regional Task Force, Inc. Fort Bragg, NC and the President's FY09 Budget Request.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

Description of Request: This request increases the Department of Defense funding authorization from the President's FY09 Budget level of $13.24 million by an additional authorization for $8.56 million. The increase is due to revisions to the original project necessitated by BRAC and other mission growth at Fort Bragg. This is a high priority security project to close Bragg Boulevard to public traffic through Fort Bragg. This action is necessary to ensure the safety of the new FORSCOM HQ which is being built in close proximity to Bragg Boulevard. The project will widen Murchison Road to flow traffic around Fort Bragg and includes two new interchanges to access control points at Fort Bragg. The project is currently being planned and designed by North Carolina Department of Transportation (NCDOT) in two phases. This increase is needed for Phase I which will widen NC 210 (Murchison Road) to six lanes beginning at the new I–295 Fayetteville Outer Loop interchange and continue north to include a new interchange at Honeycutt Rd. The new interchange, rather than an at-grade crossing is the reason for the additional funds.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009

Account: New Elementary School (DoDEA)

Legal Name of Requesting Entity: Fort Bragg and the Department of the Army.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

Description of Request: This request supports the $28.17 million requested in the President's FY09 Budget for a new elementary school on Fort Bragg. This funding is required to accommodate enrollment increases due to new housing being built for the Army's Residential Communities Initiative program. The Family Housing Construction program will construct 446 new housing units at Ft. Bragg, resulting in an influx of approximately 714 students (PK through 5th grade) above present capacity. The community schools at Fort Bragg have a current enrollment of 4,517 students. As a result of new housing being added to the main cantonment area, the schools are projected to be filled to capacity. The additional 446 family housing units being constructed in the Northern Training Area will require a 714 student elementary school to be constructed to serve the housing area. Existing schools in the main cantonment area were constructed based on outdated Department of Education and state standards, resulting in undersized classrooms, administrative, and other areas. Adding additional students beyond maximum capacity will adversely affect the quality of the educational programs and greatly limit the number of educational programs offered to students. The influx of students resulting from the Army's Residential Communities Initiative program cannot be supported within current district capacity. New construction is the only method of obtaining the space needed to accommodate the enrollment projected to arrive within the next 3 years. Without this additional capacity, the Army's Residential Communities Initiative program and student education at Fort Bragg would be adversely affected.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Utilities Upgrade for Camp MACKALL (Fort Bragg).

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA This request is in support of the FY09 President's Budget Request for $3.2 million for a Utilities Upgrade at Camp MACKALL (Fort Bragg) and this project is necessary to support the expansion of Camp Mackall, Fort Bragg, North Carolina. The Rowe Training Facility (RTF) at Camp Mackall is being expanded to support an increase in its mission of providing Special Forces (SF) qualified soldiers from a current level of 350 per year to 950 per year. The number of all students passing throgh the Rowe Training Facility annually will increase from 1,000 trainees to 2,700 annually. The Survival, Evasion, Resistance, and Escape (SERE) training course at Camp Mackall will increase from 350 per year to 950 per year. New water, sewage, storm drainage, gas, electric and communications lines will have to be run to support the rapidly expanding training activities at the base.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, New Intermediate School (Irwin) (DoDEA) Fort Bragg, NC

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

This request is in support of the FY09 President's Budget Request for $27.945 million for a new DoDEA intermediate school at Fort Bragg, NC. This school is needed to accommodate 725 students and support present curriculums selected for that age group. Most of the current school facility was constructed in 1962 with seven additions built in various years starting in 1964. The Extended Facilities Condition Index (EFCI—current facility maintenance or repair requirement/replacement cost) is 72%. An EFCI of this value indicates replacement is more cost effective than continuing to address facility maintenance and repair needs. Many of the school's programs are conducted in twelve re-locatable, temporary buildings which are all old, undersized and not suitable for the programs. Space limitations also require many programs to share the same classrooms. The school has force protection issues that will be resolved by this project. Significant health and safety issues exist to include non-fire rated transom windows in all corridors, no fire sprinkler system

in the facility, non-fire rated interior doors and many roof leaks. These deficiencies are costly to rectify.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, New Middle School (DoDEA) Fort Bragg, NC

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

This request is in support of the FY09 President's Budget Request for $22.356 million to construct a new middle school in the Northern Training Area at Fort Bragg, North Carolina. A new middle school is required to accommodate enrollment increases due to new housing being built for the Army's Residential Communities Initiative program. The Family Housing Construction program will construct additional new housing units and upsize most of the existing units to 4 or 5 bedrooms at Ft. Bragg, resulting in an influx of approximately 550 students (6th through 8th grade) above present capacity. The community schools at Fort Bragg have a current enrollment of 4,517 students. As a result of new housing being added to the main cantonment area, the schools are projected to be filled to capacity. The additional 1,524 family housing units being constructed in the Northern Training Area will require a 550 student middle school to be constructed to serve the housing area. Existing schools in the main cantonment area were constructed based on outdated Department of Education and state standards, resulting in undersized classrooms, administrative, and other areas. Adding additional students beyond maximum capacity will adversely affect the quality of the educational programs and greatly limit the number of educational programs offered to students. With the NTA being separated from the main cantonment area this new school is also needed to cut down on student bussing and associated costs to both the school district and parents. The influx of students resulting from the Army's Residential Communities Initiative program cannot be supported within current district capacity. New construction is the only method of obtaining the space needed to accommodate the enrollment projected to arrive within the next 3 years. Without this additional capacity, the Army's Residential Communities Initiative program and student education at Fort Bragg would be adversely affected.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Training Support Center, Fort Bragg.

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

This request is in support of the FY09 President's Budget Request for $20.5 million to Construct a Standard Training Support Center (TSC). Existing substandard warehouse buildings do not have additional capacity to support increased training aids and devices. This project is needed to ensure Fort Bragg can protect its training devices from the environment and the weather. Otherwise they are facing drastically reduced useful life.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, SOF Expand Training Compound—USSOCOM Fort Bragg.

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

This request is in support of the FY09 President's Budget Request for $14.2 million for a Special Operations Forces (SOF) Training Compound Expansion in support of USSOCOM at Fort Bragg. This funding will serve to renovate and expand MacRidge Training Compound to support close quarters and urban combat training.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, SOF Headquarters Facility, USSOCOM Fort Bragg.

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA. This request is in support of the FY09 President's Budget Request for $14.6 million for a Special Operations Forces (SOF) Headquarters Facility at Fort Bragg, NC. This funding will be used to construct a Battalion Headquarters for the 112th Special Operations Signal Battalion (112th SOSB) so that they can accommodate their Department of the Army ordered personnel expansion and meet their requirements.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, SOF Expand Training Compound—USSOCOM Fort Bragg.

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA. This request is in support of the FY09 President's Budget Request for $14.2 million for a Special Operations Forces (SOF) Training Compound Expansion in support of USSOCOM at Fort Bragg. This funding will serve to renovate and expand MacRidge Training Compound to support close quarters and urban combat training.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, SOF Security Force Protection, Pope AFB/ Fort Bragg, NC.

Legal Name of Requesting Entity: Fort Bragg Address of Requesting.

Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA. This request is in support of the FY09 President's Budget Request for $4.15 million to be used for SOF Security/Force Protection (ACC–14th ASOS) at Pope Air Force Base/Fort Bragg. This request supports Joint Special Operations Command.

Requesting Member: Congressman ROBIN HAYES.

Bill Number: H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Account: Military Construction, Fort Bragg, NC.

Legal Name of Requesting Entity: Fort Bragg.

Address of Requesting Entity: P.O. Box 70999 Fort Bragg, NC 28307, USA.

This request is in support of the FY09 President's Budget Request for $5.3 million for a SOF Training Facility at Fort Bragg. This will construct a two story training facility to support USSOCOM joint operations.

A PROCLAMATION HONORING CONNIE FINTON FOR BEING NAMED THE LUCILLE NUSSDORFER TUSCARAWAS COUNTY WOMAN OF THE YEAR

HON. ZACHARY T. SPACE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. SPACE. Madam Speaker:

Whereas, Ms. Finton has made a lasting impact on the quality of life in Tuscarawas County; and

Whereas, she is an innovator for local youth programs such as "Got Milk? Got Cookies? Got Books?" and the Fit Youth Initiative; and

Whereas, Ms. Finton is a driving force in the Tuscarawas County for the education of the dairy and agriculture industry; and

Whereas, Ms. Finton has been an active member of the Union Hospital Auxiliary for thirty years; and

Whereas, she has selflessly served the needs of her community and encourages those around her to do the same: Now, therefore, be it

Resolved That along with her friends, family, and the residents of the 18th Congressional District, I commend and thank Connie Finton for her service to the State of Ohio. Congratulations to Connie Finton on her selection as the Lucille Nussdorfer Tuscarawas County Woman of the Year.

HONORING MOON KHAN

SPEECH OF

HON. PETER J. ROSKAM

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 22, 2008

Mr. ROSKAM. Madam Speaker, I rise today to honor Moon Khan for his devoted service to DuPage County and the State of Illinois.

Moon started serving the community as an anchor on the Indian community's cable television program Bharat Darshan, also working as Community Editor of the India Tribune and Chief Editor of Spotlight Weekly. After earning M.A. and M.B.A. degrees from Northern Illinois University, he founded the Asian American Caucus of DuPage, serving as its first President. From his early dedication to scholarship and community service, Moon has become heavily involved in local government and commerce, serving as a vocal advocate for the Asian American community.

As a member of the Illinois Ethnic Coalition, Moon has advocated for the rights of new immigrants and various ethnic groups, assisting them in the transition to American culture and

helping with the preservation of their heritage. His commitment to unity resulted in Moon being presented the Americanism Award by the Society of Daughters of the American Revolution in 2005.

In April of 2005, Moon was elected as a Trustee for York Township, becoming the first Asian American to be elected to that office and the first Muslim elected to government office in the State of Illinois. As a result of his commitment to serving the Asian American community, Moon was appointed as the Asian American Liaison of the DuPage County Republican Party.

Moon Khan has been an advocate for the rights of immigrants, Muslims, and other ethnic groups. His committed service to empowering all ethnicities has affected countless lives throughout the State of Illinois.

Madam Speaker and Distinguished Colleagues, Moon Khan is a remarkable man who has dedicated his life to serving the people of DuPage County and the State of Illinois. Please join me in honoring him for his public service and recognizing the important work he is doing to build a stronger, better America.

EARMARK DECLARATION

HON. CLIFF STEARNS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. STEARNS. Madam Speaker, pursuant to the Republican Leadership standards, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding a district funding request as part of H.R. 6599, the Military Construction and Veterans Affairs Appropriations Act, 2009.

1. Florida Army National Guard, Regional Training Institute (RTI) Phase IV at Camp Blanding, FL (Department of Defense, Army National Guard) Project ID: 04ee1.

This project is to complete construction of the RTI at the Camp Blanding Training Site, FL. The readiness of the Florida Army National Guard and Air National Guard in general will be affected if the school cannot adequately accomplish its mission to train soldiers. The student quota continues to grow with the need for new training requirements.

The new campus will serve the full-time mission of the RTI. The completion of the new campus will allow the school to accept all projected students and to provide the support needed to run the regional school. The new campus will provide the school with the area required to adequately perform its essential mission. It will house, feed, teach, and train all students attending the institute; students are from all fifty states and territories. The school averages 800 students per cycle.

DON PITTMAN

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. POE. Madam Speaker, today I am proud to honor long-time restaurateur Don Pittman, as he was inducted into the Texas Restaurant Association Hall of Honor in June 2008. From Bar-B-Q to fresh seafood to Cajun delights, Texans take their food very seriously. For Don to receive this honor, he must have done some significant work.

Pittman has been in the restaurant business for almost forty years. His career began in 1970 in Fredericksburg, Texas. He spent some time in Austin before deciding that he should branch out and carve a place for himself. He searched for a location with a community with a positive attitude and decided that Southeast Texas was the best place to start.

Don moved to Beaumont in 1985 and opened eight Short Stop Burger locations across Southeast Texas. He operated these restaurants in Beaumont, Port Arthur, and Orange until the late 1990s. In 1998, he opened a Schlotzky's Deli in Beaumont and another in Port Arthur in 2002. Pittman will serve as President of the Sabine Area Restaurant Association beginning this August. This will be his second term, as he previously served from 1991–1993.

The Texas Restaurant Association Hall of Honor is the highest recognition that a member of the Association can receive. Winners are selected by a committee made up of past TRA presidents and Hall of Honor members. Individuals are honored for their commitment to the foodservice industry, the Association and their communities. This year, they chose to honor Don Pittman for his continuing excellence in serving Southeast Texas.

On behalf of the Second Congressional District of Texas, I applaud Don Pittman for his dedication to serving some of the best food in the entire State of Texas.

SPECIAL MEMORIAL DAY WORDS OF INSPIRATION FROM FALLUJAH, IRAQ

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. YOUNG of Florida. Madam Speaker, Americans all over our Nation honored our fallen heroes for Memorial Day. We gathered in our national cemeteries, at veterans posts, and at town halls to say thank you to those who paid the ultimate price for freedom and to their families who suffered the greatest of losses.

Many forget that today's heroes also celebrated Memorial Day in the far corners of the world, including the deserts of Iraq and the mountains of Afghanistan. One such Memorial Day ceremony took place in Fallujah, Iraq, the site of some of the fiercest fighting and where many of our troops gave their lives.

Marine Corps Major General John F. Kelly led the service for our troops in Fallujah saying, ''There is something about looking out at real Americans who know the price paid for our protection, and the world's freedoms. Soldiers, sailors, airmen, Coast Guardsmen and Marines—heroes all.''

General Kelly knows personally of service and sacrifice, as he is on his third tour of duty commanding Marines in Iraq, his third tour away from his family. He also has two sons serving as Marines in Iraq.

General Kelly told his Marines, ''Our countrymen at home should be on their knees every day thanking God we still have enough young people in America today willing to take up the fight as our veterans did from the earliest days of our Nation. They should know that they are protected today by men and women as good as have ever served; as good today as their fathers were in Vietnam, and their grandfathers were in Korea and World War II. In this, my third tour in Iraq, I have never seen an American hesitate, or do anything other than lean into the danger and, with no apparent fear of death or injury, take the fight to the enemies of our way of life.''

Those who serve make many sacrifices including having to endure the horror of war. As General Kelly told his troops, ''You are all heroes and like many veterans throughout our history, many of us have endured things—sights, sounds and horrors—that will haunt us for the rest of our lives. I know I find great comfort that because I am here those I love and have sworn to protect will never have to deal with memories so terrible. I hope you who have seen these things have the same sense of purpose and balance when you relive the scenes of violence, and of decisions made. America's Armed Forces today know the price of being the finest men and women this nation has to offer, and pay it we do every day in Iraq and Afghanistan.''

Madam Speaker, following my remarks, I would like to include for the benefit of my colleagues the full text of General Kelly's letter to his Marines. It is from the heart and it is to the point of what every American service member and their families give to our Nation in the defense of freedom and liberty. General Kelly concludes his message by reading a letter no officer wants to write, that to the mother or father, husband or wife, brother or child of a fallen warrior. In this case it is to the mother of Jonathan Yale, a Marine who died protecting an Entry Control Point in Ramadi, Iraq from a suicide bomber driving a truck loaded with explosives. He and fellow Marine Jordan Haerter fired upon the truck until it exploded before breaching their security point. They both died during their job that day and in so doing saved the lives of 50 other Marines and countless Iraqi policemen.

General Kelly wrote to Jonathan's mother, ''I have 25,000 Marines under my care here in Iraq, and I fear for their lives every minute of every day as if they were my own. They are out there every day and every night patrolling the most dangerous places on earth for millions of people at home they do not even know. In times of weakness I wonder why they come, young men like Jonathan, why they come when no one makes them. When everything in our society seems to say ''what's in it for me,'' those like your son think of others—not themselves.''

Madam Speaker, it is my hope that every member of this House will read General Kelly's powerful and poignant words and take them to heart as we thank him and every American who goes into harm's way on a daily basis to protect us and our way of life.

MAY 25, 2008.

WORDS FROM A MEMORIAL DAY CEREMONY IN FALLUJAH, IRAQ

FALLUJAH, IRAQ.—Major General John F. Kelly dispatched a letter from Iraq stating that they held their Memorial Day ceremony in Fallujah today and it was inspiring.

''Something about looking out at real Americans who know the price paid for our protection, and the world's freedoms. Soldiers, Sailors, Airmen, Coast Guardsmen and Marines—heroes all,'' Kelly said.

The General continued: ''First, a few statistics to ponder. There are twenty-five million living American Veterans. Since General George Washington commanded the Continental Army, forty-two million Americans have served the colors.

A million have been killed in its defense. Another million and a half wounded. When most of us think about military cemeteries the first thought that comes to mind is Arlington National in Washington, but there are many, many more in the U.S.

Most Americans also don't know there are 24 American cemeteries maintained overseas with 125,000 graves of our fallen—61,000 in France alone—the result of two wars that saved Europe and the world from horrors unimaginable to Americans today; unimaginable, that is, unless you are a Veteran who has seen the terrible face of war so those who remained safe in America, and those yet unborn, would never have to.

There are also memorials overseas to an additional 94,000 Americans who were lost at sea, or their remains never recovered from battlefields around the globe. With all this service and loss, we as Americans can be proud of the kind of people we are as we have never retained a square foot of any country we have defeated, we possess no empire, nor have we enslaved a single human being.

On the contrary, billions across the planet are today—and billions yet unborn—live free because our Veterans have fought and died, and, once peace achieved, we've rebuilt destroyed cities, economies, and societies.

Memorial Day was established three years after our terrible Civil War that finally established what kind of nation we would be. A war in which 600,000 young Americans—North and South—perished. For a century the day continued to mean visiting and decorating graves or town-square memorials to those who died serving our great nation, and celebrating with parades and civic events.

Americans kept the day quiet, pausing to remember, at least for a little while, the kind of men and women they were who gave the last full measure, and the immensity of the sacrifice they made for those who remained protected at home.

Americans should not forget this weekend or any weekend as they relax with a few days off that the country is at war, and a new Greatest Generation is fighting a merciless enemy on their behalf in the terrible heat of Iraq, and in the mountains of Afghanistan. Like it or not America is engaged in a war today against an enemy that is savage, offers no quarter, whose only objectives are to either kill every one of our families in our homeland, or enslave us with a sick form of extremism that serves no God or purpose that rational men and women can understand.

Given the opportunity to do another 9/11, our vicious enemy would do it today, tomorrow and every day thereafter. I don't know why they hate us, and I frankly don't care and they can all go to hell, but they do hate us and are driven irrationally to our destruction. The best way to fight them is somewhere else and that is why we are here. For whatever reason they want to destroy our way of life, our countrymen at home should be on their knees every day thanking God we still have enough young people in America today willing to take up the fight as our Veterans did from the earliest days of our nation.

They should know that they are protected today by men and women as good as have ever served; as good today as their fathers were in Vietnam, and their grandfathers were in Korea and World War II. In this my third tour in Iraq I have never seen an American hesitate, or do anything other than lean into the danger and, with no apparent fear of death or injury, take the fight to the enemies of our way of life.

As anyone who has ever experienced combat knows, and many of you do, when it starts, when the explosions and tracers are everywhere and the calls for the Corpsman or medic are screamed from the throats of men who know they are dying—when seconds seem like hours and it all becomes slow motion and fast forward at the same time—everything in one's survival instinct says stop, get down, save yourself—yet you don't.

When no one would call you coward for cowering behind a wall or in a hole looking to your own self preservation, none of you do. It doesn't matter if it's an IED, a suicide bomber, mortar attack, fighting in the upstairs room of a house, or all of it at once—America should know you fight today in the same way our warriors have since the Revolution.

The wonderful thing about America's Armed Forces is that none of us are born killers. On the contrary we are good and decent Americans mostly from the neighborhoods of America's cities, and small towns. Almost all come from ''salt of the earth'' working class homes, and more often than not are the sons and daughters of cops and firemen, factory and service workers, and farmers.

Most of us delivered papers, stocked shelves in the grocery store, played Little League baseball and pickup hockey in the local rink, and served Mass on Sunday morning. Some are former athletes, and many ''couch potatoes'' who drove our cars and motorcycles too fast, and blasted our music louder than perhaps we should have.

We are all ordinary people performing remarkable acts of bravery and selfless acts of devotion to a cause bigger than ourselves—and for millions who will never know our names. Any one of us could have all stayed in school or gone another way, but yet we chose to serve knowing full well Iraq and Afghanistan was in our future. You did not avoid the most basic and cherished responsibility of a citizen—to defend the nation and its people—on the contrary, you went after it.

You did not fail in life, which the chattering class back home likes to believe is why you chose to serve and risk dying for the nation, but, rather, are the best our nation produces and have consciously put every American at home above your own self interest. You are all heroes and like many Veterans throughout our history many of us have endured things—sights, sounds and horrors—that will haunt us for the rest of our lives.

I know I find comfort that because I am here those I love and have sworn to protect will never have to deal with memories so terrible. I hope you who have seen these things have the same sense of purpose and balance when you relive the scenes of violence, and of decisions made. America's Armed Forces today know the price of being the finest men and women this nation has to offer, and pay it we do every day in Iraq and Afghanistan.

More than four thousand of us have died in this war, and ten-times this number have been wounded. And the sacrifice continues as young Americans have gone to God since we all went to bed last night and slept free and protected.

Their mothers and fathers, brothers and sisters, wives, husbands, and fiancés are sitting in their living rooms right now with casualty officers learning the true price of freedom, and are only just beginning a lifelong struggle of dealing with the pain and loss of someone so dear, but they are not victims as they knew what they were about and were doing what they wanted to do.

Many of today's self-proclaimed experts and media commentators endeavor to make them out to be victims but they are wrong, and this only detracts from the decision these patriots made to step forward and protect the country that has given so much to all of us. We who are serving, and have served, demand not to be categorized as victims—we are not.

Those with less of a sense of service to the nation never understand it when strong and committed men and women stand tall and firm against our enemies, just as they can't begin to understand the price paid so they and their families can sleep safe and free at night—the protected never do.

What the experts, commentators, and elites are missing, what they will also never understand, is the sense of commitment, joy, and honor, of serving the nation in its uniform, but every American Veteran, and their loved ones who support them and fear for them every day, do understand.

We should all be confident that this experiment in democracy we call America will forever remain the ''land of the free and home of the brave'' so long as we never run out of tough young Americans willing to look beyond their own self interest and comfortable lives, and go into the darkest and most dangerous places on earth to hunt down, and kill, those who would do us harm.

In closing I wanted to share a story that you may not be aware of that took place only a few miles from here in Ramadi. On 22 April 2nd Battalion 8th Marines and 1st Battalion, 9th Marines were in the process of turning over a Joint Security Station Nasser.

It's in the Sophia district of Ramadi, and was once the center of the insurgency in that city. Two Marines who barely knew each other as one was coming and the other going were standing guard at the Entry Control Point (ECP): their names were Jonathan Yale and Jordan Haerter.

At 0745, and without warning, a large truck accelerated towards the ECP, careening off the protective serpentine. Both must have understood on instinct what was happening as in less then a second they went to the guns and opened fire until the massive 2,000 lb blast took their lives—but the suicide bomber never passed the post they protected, and 50 other Marines and perhaps as many police didn't die that day inside the JSS.

I spoke to several Iraqi police eyewitnesses and they all told the same story, but one more emotionally than the others.

He said no sane man would have stood there directly in the path of a speeding truck firing their weapons—yet two did. His officers, some as close as ten feet initially from the Marines, fired and ran when it was obvious the truck could not be stopped—and they survived. The Marines stood their ground and stopped the truck before it detonated, and saved the lives of their buddies.

A sacred duty of every commander in combat, yet the one we dread the most, is writing letters home to families who have lost a son or a daughter. I wanted to close by reading you a letter I wrote that night to the mother of one of those two heroes that for me sums up who and what we are as warriors and Veterans, why we serve, and how we will remember each other.''

---

22 APRIL 2008.

I know there is nothing I can write tonight that will help you deal with the loss of your son Jonathan. I do hope you can find some comfort as I try to help you understand what he was doing for every American when he was taken from us all. He was standing watch on a nameless side street in Ramadi at the entrance of a compound that housed a large number of Marines, Iraqi Police, and civilians. In the early morning a truck turned down towards the entrance and ignored the visual warnings he gave to stop.

Jonathan and the Marine he was with must have sensed immediately what was taking place as they went to the guns quickly and fired a very high volume of automatic weapons fire, undoubtedly killing the suicide driver, but not before he detonated the massive blast that took their lives. His fellow Marines did what Marines have done from the beginning of our history, something they do almost without thinking and always without hesitation—they risked their own lives to save his, but he was already gone to God. Mrs. Pride, because of your son and that other Marine, nearly fifty other American families are not mourning tonight; their sons' lives were saved by two Marines who would not abandon their post even to the point of death.

I did not know your son, Mrs. Pride, but I am sure he was just like every Marine I have known in the three decades and more that I have served. Like my own two sons who are Marines and have served here in this war, I bet he was a good looking young man, fun loving, into sports and a good son—but not perfect—boys never are. He was also different, Mrs. Pride, because he chose to leave the comfortable and safe confines of his home and walk a different path than all the rest. The path he chose led him to be one of the nation's finest, to be a Marine. When he did not have to raise his right hand and swear before his God to serve and protect this nation and its people, he did just that. We all owe him an eternal debt of gratitude that can never be repaid. We also owe you, Tammy, and all who loved him a debt—one that can never be settled.

I have 25,000 Marines under my care here in Iraq, and I fear for their lives every minute of every day as if they were my own. They are out there every day and every night patrolling the most dangerous places on earth for millions of people at home they do not even know. In times of weakness I wonder why they come, young men like Jonathan, why they come when no one makes them. When everything in our society seems to say ''what's in it for me,'' those like your son think of others—not themselves. I did not know your son, Mrs. Pride, but I will never forget him. I will keep him in my thoughts and prayers for the rest of my life.

With deepest sympathy,

Major General John F. Kelly, U.S. Marine Corps, Commanding General, I Marine Expeditionary Force (Forward).

EARMARK DECLARATION

HON. PHIL GINGREY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. GINGREY. Madam Speaker, in accordance with House Republican Conference standards, and clause 9 of rule XXI, I submit the following member request for the RECORD. Funding for this request was contained in the Military Construction and Veterans Affairs Appropriations Act for Fiscal Year 2009.

Requesting Member: Congressman PHIL GINGREY.

Bill Number: H.R. 6599.

Account: Army National Guard.

Legal Name of Requesting Entity: Georgia National Guard.

Address of Requesting Entity: Georgia Department of Defense, P.O. Box 1970, Marietta, GA 30061.

Description of Request: This request is in support of President Bush's FY '09 budget submission and provides $45,000,000 for a National Guard Joint Forces Headquarters and Readiness Center to be constructed at Naval Air Station (NAS) Atlanta. This project is contained in the Army National Guard's Future Years Defense Program, and funding for it is critical to ensure a smooth transition for the Georgia National Guard to NAS Atlanta by 2011.

This facility is required to house all elements of the Headquarters, Headquarters Detachment, and the 118th Personnel Service Detachment of the Georgia Army National Guard. It will also house the headquarters of the Georgia Air National Guard and the multiple departments of the Georgia Department of Defense. The readiness center will provide the necessary administrative, training, and storage areas required to achieve proficiency in required training tasks.

HONORING DR. WILLIAM STIFTER FOR HIS DEDICATION AND SERVICE TO THE CITIZENS OF WASHINGTON STATE

HON. CATHY McMORRIS RODGERS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mrs. MCMORRIS RODGERS. Madam Speaker, I rise today to join with the Eastern Washington community to celebrate and honor the life of Dr. William Stifter whose work with cardiac patients across our State has saved countless lives.

Dr. Stifter made significant contributions to cardiac care in our State. He personally provided local access to medical care for heart patients in rural communities across Eastern Washington and was a vital force in establishing higher standards for the care of cardiac patients. Bill risked his life for over 17 years driving through dangerous weather and road conditions to bring essential medical care to his patients living in remote parts of Eastern Washington. This dedication to his patients was also demonstrated by his efforts to continually improve the care he provided as a cardiologist.

Dr. Stifter was the first to achieve certification in using computed tomography, CT, in diagnosing and treating heart patients in our region. Without his leadership in this, the diagnostic attributes of the cardiac CT would not have been as readily available to patients in Eastern Washington. He was a leader in advancing cardiac care throughout his career; most recently leading the partnership of Lincoln Hospital, Sacred Heart Medical Center and MedStar towards adoption and implementation of the Level 1 AMI Emergency Program. This program has been recognized as the new standard for emergency treatment of cardiac patients across our State and is being broadly adopted. Because of his passion and leadership, the collaboration recently received a prestigious award from Qualis Health for Excellence in Healthcare Quality.

Bill's remarkable compassion and dedication to his fellow human beings continued through to the end of his life. In a tragic airplane accident in the frigid waters of Lake Chelan, Bill helped others get to safety at the price of his own life. His heroism and personal sacrifice at Lake Chelan are a testament to his integrity and limitless commitment to helping his fellow human beings in need. He lived and breathed his passion of helping pioneer new standards of care for his patients and finding new ways to save lives up and until, tragically, his own death.

Madam Speaker, I invite my colleagues to join me in honoring the life of Dr. William Stifter for the tremendous care he showed for all of the people of Eastern Washington. He will be missed.

AMERICORPS NCCC WESTERN REGIONAL CAMPUS GRADUATION 2008

HON. DORIS O. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. MATSUI. Madam Speaker, I rise today to congratulate and acknowledge 440 amazing young men and women that exemplify hope, dedication, and patriotism. Today, Class XIV graduates from the Western Regional Campus of the AmeriCorps NCCC program in Sacramento, California.

The National Civilian Community Corps (NCCC) is a full time residential national service program conducting national service efforts across the country. This program is truly one of a kind and is an incredibly valuable asset to our nation. These volunteers support the foundation of our country's infrastructure: our educational system, homeland security defenses, and disaster recovery efforts. Their compassion and hope is essential to our civil society.

In a year that saw devastating tornados, catastrophic floods, dangerous wildfires, and continued recovery efforts in the Gulf of Mexico, the Sacramento NCCC campus graduates contributed their hearts and hard work to helping their fellow citizens when those individuals needed it most.

NCCC participants learn invaluable life skills, but even more important, they learn the intangible value of service. How to pass that value along to others as engaging and organizing local volunteers is an essential part of the program's effectiveness.

In the past ten months, the 440 inspiring men and women of the Western Regional Campus have completed more than 350,000 hours of service nationwide. They have shaped lives by spending 30,000 hours tutoring nearly 10,000 elementary school students. They have given hope to those who need it most by assisting more than 46,000 families in the Gulf Coast, Tennessee, Arkansas, and Oregon, and by constructing 193 new homes with Habitat for Humanity. They have been on the front lines of disaster relief by responding to 12 wildfires in California, Arizona, and New Mexico. But perhaps most important, they have taught others the tools and value of service, leveraging more than 63,000 volunteers, nearly 150 for each program participant.

Madam Speaker, these young men and women from all across the country are a shining example of the benefits of National Service. I ask that my colleagues join me in recognizing the 440 graduates of the Sacramento Western Regional NCCC Campus for their hard work and invaluable service to their country. Congratulations Class XIV!

It is my sincere hope that our country's national service infrastructure will continue to

grow and engage thousands more in the experience of serving their communities and serving their country.

DR. MARK KUBALA

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. POE. Madam Speaker, today I am pleased to honor Dr. Mark Kubala, M.D., for being named Outstanding Neurosurgeon of the Year by the Texas Association of Neurological Surgeons, the latest in a long line of awards given to this extraordinary physician. The award was given to a man that has spent his life displaying excellence in his field and commitment to his community.

Dr. Kubala graduated from the University of Texas in 1955 as a member of the Phi Beta Kappa Honorary Society, considered one of the most prestigious American college honor societies. He received his medical degree from the University of Texas Medical Branch—Galveston and served residencies at the Baylor College of Medicine and the Mayo Clinic. He has engaged in private practice in neurological surgery since 1966 and is Chief of Surgery at all three Beaumont hospitals.

Dr. Kubala has a long history of leadership. He has been a member of the Texas Medical Association since 1969 and has served as the Association's President, Speaker of the House of Delegates, and has served on numerous committees. He helped create the TMA Foundation, their philanthropic association, and served two terms as President. He served as President of the Texas Head & Spinal Cord Injury Prevention Foundation for 7 years. He also has the unique distinction of serving simultaneously on three different school boards in the 1970s. Dr. Kubala is a very busy man.

His honors are numerous, including the Texas Medical Association's 2006 Distinguished Service Award, their highest honor, for his tireless advocacy for patients and physicians at the local, state, and national level. His peers at the University of Texas Medical Branch—Galveston awarded him the Ashbel Smith Distinguished Alumnus Award. He was presented the Distinguished Service Award from the American Association of Neurological Surgeons in 1998 as well as the Dr. J.C. Crager Award for community service from the American Heart Association.

On behalf of the entire Second Congressional District of Texas I would like to congratulate Dr. Kubala on his latest award and thank him for his many years of service to the Southeast Texas Community.

IN HONOR OF KATHLEEN A. REILLY

HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. GALLEGLY. Madam Speaker, I rise in honor of Aviation Electronics Technician First Class (AT1) Kathleen A. Reilly USN, upon her selection as Navy Reserve Sailor of the Year for 2007.

In these halls, Kathleen Reilly is better known as a professional staff member for the Permanent Select Committee on Intelligence. Kathleen has been the professional staffer on several committee CODELS on which I have participated. I have come to greatly respect and rely on her expertise, and have come to consider her a friend. Those of us who know her are not surprised Kathleen was chosen for this honor.

The Navy Reserve Sailor of the Year candidate is typified by sustained superior performance, proven leadership, a proven dedication to self improvement, outstanding professionalism and superior personal appearance. That sums up Kathleen pretty well.

Petty Officer Reilly is a native of Lexington, Massachusetts, and enlisted in the Navy on active duty in November 1988. She attended advanced electronics schools and reported to her first duty station as part of the Fleet Air Reconnaissance Squadron Two (VQ–2) at Rota, Spain. She was one of the first three women selected for airborne combat operations in support of Desert Shield/Storm. Her squadron's mission was to conduct airborne electronic reconnaissance to obtain information on areas and targets of naval and national interest. This tour gave Petty Officer Reilly her first experience with the ways our intelligence community supports our National Command Structure and she developed a reputation as someone who always gave the extra effort.

Following her tour in Spain, Petty Officer Reilly deployed onboard the USS *Abraham Lincoln* and later the USS *Nimitz.* She was the first female Navy Tactical Operations Instructor in her squadron. Kathleen was also selected as the first female Special Intelligence and Radar Operator in a Patrol Squadron supporting the Joint Chiefs of Staff and the Special Operations Command.

These highly classified missions provided intelligence instrumental to maintaining our National Security. Kathleen has continued to prove her leadership skills during her current tour as one of the senior enlisted responsible for the safe load out and operations of cargo aircraft.

On the Intelligence Committee, Kathleen is responsible for overseeing budgets, programs, legislation and preparing funding for members assigned to the Intelligence Committee. Kathleen has been the monitor of the Military Intelligence Program and other intelligence community programs. Her military experience allows her to understand the dual nature of the nation's intelligence apparatus supporting military operations and policy decisions. Her oversight has been instrumental in providing the information necessary to establish, terminate and in some cases preserve military intelligence community programs vital to a balanced portfolio of intelligence capability.

Kathleen has earned numerous military awards, including two Air Medals, three Navy and Marine Corps Achievements, Enlisted Air Warfare Wings and, as a result of her selection as the Navy Reserve Sailor of the Year, is being meritoriously advanced to Chief Petty Officer. Mr. Speaker, we in the Congress are fortunate to have someone with Kathleen's abilities and professionalism as part of our professional staff. I know my colleagues join me in congratulating Chief Petty Officer Kathleen A. Reilly on her achievements and in thanking her for extraordinary service to her country.

INTRODUCTION OF THE ''SELECT AGENT PROGRAM AND BIOSAFETY IMPROVEMENT ACT OF 2008''

HON. JANE HARMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Ms. HARMAN. Madam Speaker, today my colleague MIKE ROGERS of Michigan and I are introducing the House companion to a bill introduced by Senators BURR and KENNEDY—the Select Agent Program and Biosafety Improvement Act.

The bill will provide an important link in the chain of defenses needed to fight the potential threat of bioterrorism.

The bill reauthorizes and updates the Select Agent Program, which limits access to and controls the transfer of dangerous biological agents and toxins.

It requires the National Academy of Sciences to conduct a comprehensive evaluation of the program, and recommend ways in which it can be restructured to enhance biosecurity and international scientific collaboration.

It requires that the program consider newly discovered agents—such as genetically modified organisms, synthetic compounds, and other agents identified in Homeland Security risk assessments—to ensure that the list of agents is current and comprehensive.

It encourages the sharing of information with state emergency planning officials, which is vital to ensuring that our first responders have the tools they need to prevent or respond to an attack.

And it ensures minimum biosecurity and biosafety standards for the training of workers in the laboratories that deal with the most dangerous substances.

These measures are of vital importance. Over the past several decades we have seen revolutions in technology, economics, and politics that are fundamentally changing the world we live in.

The upside of these developments is obvious. The world is more prosperous, healthy, and interconnected than it has ever been before. But with these revolutions also come challenges.

The same advances in biotechnology that help save lives, can also be used to develop dangerous biological agents and toxins that can take lives.

The new global information infrastructure that is now the backbone of our economy can be used to spread knowledge of how to create and disperse biological weapons.

It is more important than ever that the U.S. government be able to track and control the dangerous materials that can be used to construct these weapons. This bill will help that effort.

In closing, I'd like to say a special word about Senator KENNEDY. He has been a legislative hero of mine since my days working as a staffer on the Senate Judiciary Committee. He and Vicki are good friends, and are in my prayers.

Rep. ROGERS has amassed an impressive amount of knowledge on this subject, and will play a major role in securing its passage.

PERSONAL EXPLANATION

HON. THOMAS H. ALLEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. ALLEN. Madam Speaker, on July 29, 2008, I was unavoidably absent from the House.

If I had been present, I would have voted ''yes'' on rollcall vote No. 534, a motion by Mr. THOMPSON of Mississippi to suspend the rules and pass H.R. 2490, a bill to require the Secretary of Homeland Security to conduct a pilot program for the mobile biometric identification in the maritime environment of aliens unlawfully attempting to enter the United States, as amended.

I would have also voted ''yes'' on rollcall vote No. 535, a motion by Mr. DAVIS of Illinois to suspend the rules and pass H.R. 6113, a bill to amend title 44, United States Code, to require each agency to include a contact telephone number in its collection of information in order to assist people with filling out government forms.

Finally, I would have voted ''yes'' on rollcall vote No. 536, a motion by Mr. HARE of Illinois to suspend the rules and pass H.R. 2192, a bill to amend title 38, United States Code, to establish an Ombudsman within the Department of Veterans Affairs.

I ask unanimous consent that this statement be inserted in the appropriate place in the RECORD.

PERSONAL EXPLANATION

HON. MIKE McINTYRE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. MCINTYRE. Mr. Speaker, during rollcall vote No. 531 on H.R. 5501, I mistakenly recorded my vote as ''no'' when I should have voted ''yes.'' I ask unanimous consent that my statement appear in the RECORD immediately following rollcall vote No. 531.

MIDDLE CLASS TAX FAIRNESS ACT

HON. TIMOTHY J. WALZ

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 2008

Mr. WALZ of Minnesota. Madam Speaker last week, I introduced legislation that will allow tens of millions of middle class taxpayers to keep more of their hard earned dollars. My Middle Class Tax Fairness Act will help Americans who are being squeezed by high gas prices, high grocery prices, the high cost of health care, and the high cost of college tuition.

It is unfair that hard-working Americans go to work every day and pay their taxes while corporations and the wealthy exploit loopholes in our tax code to avoid paying their fair share. That's not right—our tax system should be fair all around.

People's paychecks are not keeping pace with rising costs. In fact, the average household income is about $800 less than it was just 5 years ago, while the price of gas has doubled in that same amount of time. All across southern Minnesota, people tell me of the challenges that they face in our weakening economy: choosing between medication or basic groceries because their paycheck doesn't accommodate both, or dipping into their savings accounts just to help pay for a tank of gas.

Meanwhile, our tax code is full of government waste and unnecessary give-aways to big corporations. Oil companies will receive an estimated $13 billion in subsidies over the next 10 years, despite the fact that they are posting record-breaking profits. Foreign corporations that operate in the United States set up dummy headquarters in tax haven countries to avoid paying their fair share of taxes. But middle class Americans sure aren't getting those kinds of breaks.

It's time for a change. It's time to put hard-working families first. My Middle Class Tax Fairness Act will repeal these unnecessary and wasteful subsidies and close these tax loopholes. It provides a real tax break for middle class families by doubling the standard deduction for taxpayers for the next two years. This will provide an average tax cut of $750 for 61 million taxpayers this year alone.

My legislation will also expand access to the Child Tax Credit, helping an estimated 13 million children who will either become newly eligible or receive increased benefits from the tax credit.

The Middle Class Tax Fairness Act will also help offset the rising cost of property taxes for millions of Americans by allowing taxpayers who take the standard deduction to lower their taxable income by taking their property taxes into account. This will benefit more than 32 million homeowners in the United States who did not receive a property tax deduction on their taxes.

Finally, my legislation will help pay down nearly $60 billion of our national debt, to help address the fiscal mismanagement that has contributed to our stagnating economy.

A few days ago, I talked to a young woman in Rochester, Minnesota named Nicole. She's 29 years old and commutes twenty miles to work every day to her job as a legal assistant. Nicole and I estimated that under my proposed legislation, she would save $832 on her 2008 taxes.

I also met with another couple, Diane and John. They have a six year-old daughter and recently purchased their own home. We figured that my Middle Class Tax Fairness Act would allow them to take advantage of the new property tax standard deduction and save them more than $1,280 on their 2008 taxes.

These numbers may not be the billions of dollars that oil companies and foreign multinationals are used to saving on their taxes, but they represent real help for tens of millions of middle class Americans who are struggling to get by.

It's the easiest thing in the world for a politician to promise someone a tax cut. But it's much harder to do it in a fiscally responsible way that is paid for. My legislation does just that, and I urge my colleagues to help me in the effort by cosponsoring my Middle Class Tax Fairness Act.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, July 31, 2008 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 1

9 a.m.
Finance
Business meeting to consider S. 3038, to amend part E of title IV of the Social Security Act to extend the adoption incentives program, to authorize States to establish a relative guardianship program, to promote the adoption of children with special needs, S. 1070, to amend the Social Security Act to enhance the social security of the Nation by ensuring adequate public-private infrastructure and to resolve to prevent, detect, treat, intervene in, and prosecute elder abuse, neglect, and exploitation, and S. 1577, to amend titles XVIII and XIX of the Social Security Act to require screening, including national criminal history background checks, of direct patient access employees of skilled nursing facilities, nursing facilities, and other long-term care facilities and providers, and to provide for nationwide expansion of the pilot program for national and State background checks on direct patient access employees of long-term care facilities or providers.
SD–215

9:30 a.m.
Joint Economic Committee
To hold hearings to examine the employment-unemployment situation for July 2008.
SD–562

SEPTEMBER 18

2:30 p.m.
Commerce, Science, and Transportation
Surface Transportation and Merchant Marine Infrastructure, Safety and Security Subcommittee
To hold an oversight hearing to examine bus safety.
SR–253

Daily Digest

Senate

Chamber Action

Routine Proceedings, pages S7709–S7804

Measures Introduced: Seven bills and four resolutions were introduced, as follows: S. 3363–3369, and S. Res. 632–635. **Page S7780**

Measures Reported:

H.R. 4210, to designate the facility of the United States Postal Service located at 401 Washington Avenue in Weldon, North Carolina, as the ''Dock M. Brown Post Office Building''.

H.R. 5477, to designate the facility of the United States Postal Service located at 120 South Del Mar Avenue in San Gabriel, California, as the ''Chi Mui Post Office Building''.

H.R. 5483, to designate the facility of the United States Postal Service located at 10449 White Granite Drive in Oakton, Virginia, as the ''Private First Class David H. Sharrett II Post Office Building''.

H.R. 5631, to designate the facility of the United States Postal Service located at 1155 Seminole Trail in Charlottesville, Virginia, as the ''Corporal Bradley T. Arms Post Office Building''.

H.R. 6061, to designate the facility of the United States Postal Service located at 219 East Main Street in West Frankfort, Illinois, as the ''Kenneth James Gray Post Office Building''.

H.R. 6085, to designate the facility of the United States Postal Service located at 42222 Rancho Las Palmas Drive in Rancho Mirage, California, as the ''Gerald R. Ford Post Office Building''.

H.R. 6150, to designate the facility of the United States Postal Service located at 14500 Lorain Avenue in Cleveland, Ohio, as the ''John P. Gallagher Post Office Building''.

S. 3241, to designate the facility of the United States Postal Service located at 1717 Orange Avenue in Fort Pierce, Florida, as the ''CeeCee Ross Lyles Post Office Building''. **Pages S7779–80**

Measures Passed:

Veterans' Compensation Cost-of-Living Adjustment Act: Senate passed S. 2617, to increase, effective as of December 1, 2008, the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans, after agreeing to the committee amendment in the nature of a substitute. **Pages S7795–97**

Former Vice President Protection Act: Committee on the Judiciary was discharged from further consideration of H.R. 5938, to amend title 18, United States Code, to provide secret service protection to former Vice Presidents, and the bill was then passed, after agreeing to the following amendment proposed thereto: **Pages S7797–98**

Pryor (for Leahy/Specter) Amendment No. 5257, to amend title 18, United States Code, to enable increased federal prosecution of identity theft crimes and to allow for restitution to victims of identity theft. **Pages S7797–98**

Minority Party Appointments: Senate agreed to S. Res. 635, making minority party appointments for the 110th Congress. **Page S7798**

Measures Considered:

Free Flow of Information Act: Senate continued consideration of the motion to proceed to consideration of S. 2035, to maintain the free flow of information to the public by providing conditions for the federally compelled disclosure of information by certain persons connected with the news media.

Pages S7710–22, S7722–59

During consideration of this measure today, Senate also took the following action:

By 51 yeas to 43 nays (Vote No. 191), three-fifths of those Senators duly chosen and sworn, not having voted in the affirmative, Senate rejected the motion to close further debate on the motion to proceed to consideration of the bill. **Page S7721**

Senator Reid entered a motion to reconsider the vote by which cloture was not invoked on the motion to proceed to consideration of the bill.

Page S7721

Subsequently, the motion to proceed was withdrawn. **Page S7759**

Jobs, Energy, Families, and Disaster Relief Act: Senate continued consideration of the motion to proceed to consideration of S. 3335, to amend the Internal Revenue Code of 1986 to extend certain expiring provisions. **Page S7722**

During consideration of this measure today, Senate also took the following action:

By 51 yeas to 43 nays (Vote No. 192), three-fifths of those Senators duly chosen and sworn, not having voted in the affirmative, Senate rejected the motion to close further debate on the motion to proceed to consideration of the bill. **Page S7722**

Senator Reid entered a motion to reconsider the vote by which cloture was not invoked on the motion to proceed to consideration of the bill. **Page S7722**

National Defense Authorization Act: Senate began consideration of S. 3001, to authorize appropriations for fiscal year 2009 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year. **Pages S7759–68**

A motion was entered to close further debate on the motion to proceed to consideration of the bill, and, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, a vote on cloture will occur on Friday, August 1, 2008. **Page S7759**

A unanimous-consent-time agreement was reached providing for further consideration of the motion to proceed to consideration of the bill at approximately 10:30 a.m., on Thursday, July 31, 2008; provided further, that the time from 10:30 a.m. until 12:30 p.m. be controlled in alternating 30-minute blocks of time between the Majority and Republican sides, with the Republican side controlling the first 30 minutes. **Page S7798**

Message from the President: Senate received the following message from the President of the United States:

Transmitting, pursuant to law, a report relative to the continuation of the national emergency with respect to the actions of certain persons to undermine the sovereignty of Lebanon or its democratic processes and institutions; which was referred to the Committee on Banking, Housing, and Urban Affairs. (PM–61) **Pages S7774–75**

Nominations Received: Senate received the following nominations:

James A. Slutz, of Ohio, to be an Assistant Secretary of Energy (Fossil Energy).

Patrick W. Dunne, of New York, to be Under Secretary for Benefits of the Department of Veterans Affairs.

Committee Meetings

(Committees not listed did not meet)

ORGANIZATIONAL MEETING

Committee on Appropriations: Committee announced the following subcommittee changes:

Subcommittee on Defense: Senators Inouye (Chairman), Byrd, Leahy, Harkin, Dorgan, Durbin, Feinstein, Mikulski, Kohl, Murray, Cochran, Stevens, Specter, Domenici, Bond, McConnell, Shelby, Gregg, and Hutchison.

Senator Byrd, as chairman of the Committee, and Senator Cochran, as ranking minority member of the Committee, are ex officio members of all subcommittees of which they are not regular members.

EXECUTIVE SESSION

Committee on Armed Services: Committee met in closed session to consider pending intelligence matters, receiving testimony from General Norton A. Schwartz, USAF, Commander, United States Transportation Command, Department of Defense.

LAND BILLS

Committee on Energy and Natural Resources: Committee concluded a hearing to examine S. 1816, to authorize the Secretary of the Interior to establish a commemorative trail in connection with the Women's Rights National Historical Park to link properties that are historically and thematically associated with the struggle for women's suffrage, S. 2093, to amend the Wild and Scenic Rivers Act to designate a segment of the Missisquoi and Trout Rivers in the State of Vermont for study for potential addition to the National Wild and Scenic Rivers System, S. 2535, to revise the boundary of the Martin Van Buren National Historic Site, S. 2561, to require the Secretary of the Interior to conduct a theme study to identify sites and resources to commemorate and interpret the Cold War, S. 3011, to amend the Palo Alto Battlefield National Historic Site Act of 1991 to expand the boundaries of the historic site, S. 3113, to reinstate the Interim Management Strategy governing off-road vehicle use in the Cape Hatteras National Seashore, North Carolina, pending the issuance of a final rule for off-road vehicle use by the National Park Service, S. 3148, to modify the boundary of the Oregon Caves National Monument, S. 3158, to extend the authority for the Cape Cod National Seashore Advisory Commission, S. 3226, to rename the Abraham Lincoln Birthplace National Historic Site in the State of Kentucky as the ''Abraham Lincoln Birthplace National Historical Park'', S. 3247, to provide for the designation of the River Raisin National Battlefield Park in the State of Michigan, and H.R. 5137, to ensure that hunting remains a purpose of the New River Gorge National River, after receiving testimony from Senators Levin, Clinton, and Dole; Daniel N. Wenk, Deputy Director, National Park Service, Department of the Interior; Joel Holtrop, Deputy Chief, National Forest System, U.S. Forest Service, Department of Agriculture; Warren Judge, North Carolina Board of Commissioners, Dare County; Derb S. Carter, Jr., Southern Environmental Law Center, Chapel Hill, North Carolina, on behalf of sundry organizations; Coline Jenkins, Elizabeth Cady Stanton Trust, Greenwich, Connecticut; and William H. Braunlich, Monroe County Historical Society, Monroe County, Michigan.

NOMINATION

Committee on Environment and Public Works: Committee concluded a hearing to examine the nomination of Thomas J. Madison, of New York, to be Administrator of the Federal Highway Administration, Department of Transportation, after the nominee, who was introduced by Senator Schumer, testified and answered questions in his own behalf.

BUSINESS MEETING

Committee on Homeland Security and Governmental Affairs: Committee ordered favorably reported the following:

S. 2583, to amend the Improper Payments Information Act of 2002 (31 U.S.C. 3321 note) in order to prevent the loss of billions in taxpayer dollars, with an amendment in the nature of a substitute;

S. 3341, to reauthorize and improve the Federal Financial Assistance Management Improvement Act of 1999;

H.R. 3068, to prohibit the award of contracts to provide guard services under the contract security guard program of the Federal Protective Service to a business concern that is owned, controlled, or operated by an individual who has been convicted of a felony, with an amendment in the nature of a substitute;

H.R. 404, to require the establishment of customer service standards for Federal agencies, with an amendment in the nature of a substitute;

S. 3328, to amend the Homeland Security Act of 2002 to provide for a one-year extension of other transaction authority;

S. 3241, to designate the facility of the United States Postal Service located at 1717 Orange Avenue in Fort Pierce, Florida, as the ''CeeCee Ross Lyles Post Office Building'';

H.R. 6150, to designate the facility of the United States Postal Service located at 14500 Lorain Avenue in Cleveland, Ohio, as the ''John P. Gallagher Post Office Building'';

H.R. 6085, to designate the facility of the United States Postal Service located at 42222 Rancho Las Palmas Drive in Rancho Mirage, California, as the ''Gerald R. Ford Post Office Building'';

H.R. 5477, to designate the facility of the United States Postal Service located at 120 South Del Mar Avenue in San Gabriel, California, as the ''Chi Mui Post Office Building'';

H.R. 5631, to designate the facility of the United States Postal Service located at 1155 Seminole Trail in Charlottesville, Virginia, as the ''Corporal Bradley T. Arms Post Office Building'';

H.R. 5483, to designate the facility of the United States Postal Service located at 10449 White Granite Drive in Oakton, Virginia, as the ''Private First Class David H. Sharrett II Post Office Building'';

H.R. 6061, to designate the facility of the United States Postal Service located at 219 East Main Street in West Frankfort, Illinois, as the ''Kenneth James Gray Post Office Building'';

H.R. 4210, to designate the facility of the United States Postal Service located at 401 Washington Avenue in Weldon, North Carolina, as the ''Dock M. Brown Post Office Building''; and

The nominations of Gus P. Coldebella, of Massachusetts, to be General Counsel, Department of Homeland Security, James A. Williams, of Virginia, to be Administrator of General Services, Carol A. Dalton, Anthony C. Epstein, and Heidi M. Pasichow, all to be an Associate Judge of the Superior Court of the District of Columbia.

FEMA

Committee on Homeland Security and Governmental Affairs: Ad Hoc Subcommittee on Disaster Recovery concluded a hearing to examine planning for post-catastrophe housing needs, focusing on whether the Federal Emergency Management Agency (FEMA) has developed an effective strategy for housing large numbers of citizens displaced by a disaster, after receiving testimony from Harvey E. Johnson, Jr., Deputy Administrator, and David Garratt, Deputy Assistant Administrator for Disaster Assistance, both of the Federal Emergency Management Agency (FEMA), Department of Homeland Security; and Jan C. Opper, Associate Deputy Assistant Secretary for Disaster Policy and Management, Department of Housing and Urban Development.

SUBCOMMITTEE ASSIGNMENTS

Committee on Homeland Security and Governmental Affairs: Committee announced the following subcommittee assignments:

Ad Hoc Subcommittee on Disaster Recovery: Senators Landrieu (Chairman), Carper, Pryor, Domenici, and Stevens.

DEPARTMENT OF JUSTICE

Committee on the Judiciary: Committee concluded a hearing to examine hiring at the Department of Justice, focusing on an investigation into the hiring of attorneys for key career positions throughout the Department, after receiving testimony from Glenn A. Fine, Inspector General, Department of Justice.

GREAT LAKES-ST. LAWRENCE RIVER BASIN WATER RESOURCES COMPACT

Committee on the Judiciary: Committee concluded a hearing to examine S.J. Res. 45, expressing the consent and approval of Congress to an inter-state compact regarding water resources in the Great Lakes-St. Lawrence River Basin, after receiving testimony from Senator Voinovich; Wisconsin Governor Jim Doyle, Madison, on behalf of the Council of Great Lakes Governors; Mayor George Heartwell, Grand Rapids, Michigan, on behalf of the Great Lakes and Saint Lawrence Cities Initiative; Kay L. Nelson, Northwest Indiana Forum, Portage, on behalf of the Business and Environmental Stakeholders of the State of Indiana; and Cameron Davis, Alliance for the Great Lakes, Chicago, Illinois.

HELP AMERICA VOTE ACT

Committee on Rules and Administration: Committee concluded a hearing to examine S. 3212, to amend the Help America Vote Act of 2002 to provide for auditable, independent verification of ballots, to ensure the security of voting systems, after receiving testimony from Todd Rokita, Indiana Secretary of State, Indianapolis, on behalf of the National Association of Secretaries of State; Barbara R. Arnwine, Lawyers' Committee for Civil Rights Under Law, and Jim Dickson, American Association of People with Disabilities, both of Washington, D.C.; Juan E. Gilbert, Auburn University Department of Computer Science and Software Engineering, Auburn, Alabama; and Doug Lewis, National Association of Election Officials—The Election Center, Houston, Texas.

BUSINESS MEETING

Committee on Small Business and Entrepreneurship: Committee ordered favorably reported S. 3362, to reauthorize and improve the SBIR and STTR programs.

INTELLIGENCE

Select Committee on Intelligence: Committee held closed hearings on intelligence matters, receiving testimony from officials of the intelligence community.

Committee recessed subject to call.

House of Representatives

Chamber Action

Public Bills and Resolutions Introduced: 33 public bills, H.R. 6651–6683; and 6 resolutions, H. Con. Res. 398–399; and H. Res. 1390–1393, were introduced. **Pages H7627–29**

Additional Cosponsors: **Pages H7629–30**

Reports Filed: Reports were filed today as follows:

H.R. 2339, to encourage research, development, and demonstration of technologies to facilitate the utilization of water produced in connection with the development of domestic energy resources, with an amendment (H. Rept. 110–801);

Meehann Law Library Improvement and Modernization Act; H.R. 998, amended, Civil Rights History Project Act of 2007; H.R. 6625, amended, Veterans Voting Support Act; H.R. 6627, Smithsonian Institution Facilities Authorization Act of 2008; H.R. 6608, House Reservists Pay Adjustment Act of 2008; and H. Res. 1207, amended, Directing the Chief Administrative Officer of the House to provide individuals whose pay is disbursed by the Chief Administrative Officer by electronic funds transfer with the option of receiving receipts of pay and withholdings electronically.

The Committee also approved the following Committee Resolutions: an amendment to Regulations of the Committee on House Administration pertaining to shared employees; and a resolution adopting amendments to the Committee's implementing Regulations for Student Loan Repayment.

CONTEMPT OF CONGRESS RESOLUTION KARL ROVE; MISCELLANEOUS MEASURES

Committee on the Judiciary: Ordered reported a resolution and report finding Karl Rove in contempt for failure to appear pursuant to subpoena and recommending to the House of Representatives that Mr. Rove be cited for contempt of Congress.

The Committee also ordered reported the following bills: H.R. 6577, Great Lakes-St. Lawrence River Basin Water Resources Compact; H.R. 6126, Fairness in Nursing Home Arbitration Act of 2008; H.R. 6064, amended, National Silver Act; H.R. 6503, Missing Alzheimer's Disease Patient Alert Program Reauthorization of 2008; H.R. 5167, amended, Justice for Victims of Torture and Terrorism Act; and H.R. 4479, To enact certain laws relating to public contracts as title 41, United States Code, ''Public Contracts;'' and private relief bills.

The Committee also approved private relief bills.

U.S. FACILITIES IN IRAQ—DEFICIENT ELECTRICAL SYSTEMS

Committee on Oversight and Government Reform: Held a hearing on Deficient Electrical Systems at U.S. Facilities in Iraq. Testimony was heard from Senator Casey; the following officials of the Department of Defense: Charlie E. Williams, Jr., Director, Defense Contract Management Agency; Jeffrey P. Parsons, Executive Director, Army Contracting Command,

U.S. Army; and Gordon S. Heddell, Acting Inspector General; Keith Ernst, former Director, Defense Contract Management Agency, Department of Defense; and a public witness.

CENSUS BUDGET ISSUES

Committee on Oversight and Government Reform: Subcommittee on Information Policy, Census, and National Archives held a hearing entitled "Critical Budget Issues Affecting the 2010 Census—Part 2." Testimony was heard from Steven H. Murdock, Director, U.S. Bureau of the Census, Department of Commerce; Kenneth Prewitt, former Director, U.S. Bureau of the Census, and Marvin Raines, former Associate Director, Field Operations, U.S. Bureau of the Census, Department of Commerce; and a public witness.

PAYCHECK FAIRNESS ACT

Committee on Rules: Granted, by voice vote, a structured rule providing for consideration of H.R. 1338, the "Paycheck Fairness Act." The rule provides one hour of general debate equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor. The rule waives all points of order against consideration of the bill except clauses 9 and 10 of rule XXI. The rule provides that the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill shall be considered as an original bill for the purpose of amendment and shall be considered as read. The rule waives all points of order against the amendment in the nature of a substitute except for clause 10 of rule XXI. The rule makes in order only those amendments printed in the Rules Committee report. The amendments made in order may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for a division of the question in the House or in the Committee of the Whole. All points of order against the amendments except for clauses 9 and 10 of rule XXI are waived. The rule provides one motion to recommit with or without instructions. The rule provides that, notwithstanding the operation of the previous question, the Chair may postpone further consideration of the bill to a time designated by the Speaker. Testimony was heard from Chairman Miller of California, Representatives DeLauro, Bean, and McKeon.

HIGHER EDUCATION OPPORTUNITY ACT CONFERENCE REPORT

Committee on Rules: Granted, by voice vote, a rule that waives all points of order against the conference report on H.R. 4137, the Higher Education Opportunity Act and against its consideration. The rule provides that the conference report shall be considered as read. Testimony was heard from Chairman Miller of California and Representative McKeon.

NASA'S PAST AND FUTURE

Committee on Science and Technology: Held a hearing on NASA at 50: Past Accomplishments and Future Opportunities and Challenges. Testimony was heard from former Senator John Glenn of Ohio; and public witnesses.

REDUCING REGULATORY BURDENS

Committee on Small Business: Subcommittee on Regulations, Health Care and Trade held a hearing entitled "Burdens on Small Firms: What Rules Need Reform?" Testimony was heard from Susan E. Dudley, Administrator, Office of Information and Regulatory Affairs, OMB; Thomas M. Sullivan, Chief Counsel for Advocacy, SBA; Chris Wagner, Deputy Commissioner, Small Business/Self Employed Division, Internal Revenue Service, Department of the Treasury; and public witnesses.

CREDIT CRUNCH: EFFECTS ON FEDERAL LEASING/CONSTRUCTION

Committee on Transportation and Infrastructure: Subcommittee on Economic Development, Public Buildings, and Emergency Management held a hearing on Credit Crunch: A Hearing on the Effects on Federal Leasing and Construction. Testimony was heard from David Winstead, Commissioner, Public Buildings Service, GSA, and public witnesses.

RESTORING AMERICA'S GREAT WATERS

Committee on Transportation and Infrastructure: Subcommittee on Water Resources and Environment held a hearing on Protecting and Restoring America's Great Waters—Part II: Chesapeake Bay. Testimony was heard from Representatives Sarbanes and Wittman of Virginia; from the following officials of the EPA: Benjamin H. Grumbles, Assistant Administrator, Office of Water; and Wade Najjum, Assistant Inspector General; Anu K. Mittal, Director, Natural Resources and Environment Team, GAO; William Matuszeski, former Director, Chesapeake Bay Program Office, EPA; W. Tayloe Murphy, Jr., former Secretary of Natural Resources, State of Virginia; and public witnesses.

BRIEFING—CONGRESSIONAL NOTIFICATIONS

Permanent Select Committee on Intelligence: Met in executive session to receive a briefing on Congressional Notifications. The Committee was briefed by departmental witnesses.

SECURITY CLEARANCE REFORM

Permanent Select Committee on Intelligence: Subcommittee on Intelligence Community Management held a hearing on Security Clearance Reform. Testimony was heard from Brenda S. Farrell, Director, Defense Capabilities and Management, GAO.

ENERGY INDEPENDENCE—ROLE OF NATURAL GAS

Select Committee on Energy Independence and Global Warming: Held a hearing entitled ''What's Cooking with Gas: the Role of Natural Gas in Energy Independence and Global Warming Solutions.'' Testimony was heard from public witnesses.

Joint Meetings

ENERGY CRISIS

Joint Economic Committee: Committee concluded a hearing to examine ways to solve the energy crisis, focusing on reducing dependence on foreign oil, creating new energy resources, and strengthening the nation's economy, after receiving testimony from Ian Bowles, Executive Office of Energy and Environmental Affairs, Boston, Massachusetts; Dan W. Reicher, Google.org, Mountain View, California; Jonathan Koomey, Stanford University, Stanford, California; and Mark P. Mills, Digital Power Capital, Arlington, Virginia.

NEW PUBLIC LAWS

(For last listing of Public Laws, see DAILY DIGEST, *p. D938)*

H.R. 1553, to amend the Public Health Service Act to advance medical research and treatments into pediatric cancers, ensure patients and families have access to information regarding pediatric cancers and current treatments for such cancers, establish a national childhood cancer registry, and promote public awareness of pediatric cancer. Extensions of Remarks, as inserted in this issue

HOUSE

Congressional Record The *Congressional Record* (USPS 087–390). The Periodicals postage is paid at Washington, D.C. The public proceedings of each House of Congress, as reported by the Official Reporters thereof, are printed pursuant to directions of the Joint Committee on Printing as authorized by appropriate provisions of Title 44, United States Code, and published for each day that one or both Houses are in session, excepting very infrequent instances when two or more unusually small consecutive issues are printed one time. ¶Public access to the *Congressional Record* is available online through *GPO Access*, a service of the Government Printing Office, free of charge to the user. The online database is updated each day the *Congressional Record* is published. The database includes both text and graphics from the beginning of the 103d Congress, 2d session (January 1994) forward. It is available through *GPO Access* at www.gpo.gov/gpoaccess. Customers can also access this information with WAIS client software, via telnet at swais.access.gpo.gov, or dial-in using communications software and a modem at 202–512–1661. Questions or comments regarding this database or *GPO Access* can be directed to the *GPO Access* User Support Team at: E-Mail: gpoaccess@gpo.gov; Phone 1–888–293–6498 (toll-free), 202–512–1530 (D.C. area); Fax: 202–512–1262. The Team's hours of availability are Monday through Friday, 7:00 a.m. to 5:30 p.m., Eastern Standard Time, except Federal holidays. ¶The *Congressional Record* paper and 24x microfiche edition will be furnished by mail to subscribers, free of postage, at the following prices: paper edition, $252.00 for six months, $503.00 per year, or purchased as follows: less than 200 pages, $10.50; between 200 and 400 pages, $21.00; greater than 400 pages, $31.50, payable in advance; microfiche edition, $146.00 per year, or purchased for $3.00 per issue payable in advance. The semimonthly *Congressional Record Index* may be purchased for the same per issue prices. To place an order for any of these products, visit the U.S. Government Online Bookstore at: bookstore.gpo.gov. Mail orders to: Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or phone orders to 866–512–1800 (toll free), 202–512–1800 (D.C. area), or fax to 202–512–2250. Remit check or money order, made payable to the Superintendent of Documents, or use VISA, MasterCard, Discover, American Express, or GPO Deposit Account. ¶Following each session of Congress, the daily *Congressional Record* is revised, printed, permanently bound and sold by the Superintendent of Documents in individual parts or by sets. ¶With the exception of copyrighted articles, there are no restrictions on the republication of material from the *Congressional Record*.

POSTMASTER: Send address changes to the Superintendent of Documents, *Congressional Record*, U.S. Government Printing Office, Washington, D.C. 20402, along with the entire mailing label from the last issue received.
