

recently commemorating its Centennial. In 1912, a group of parents embarked on a truly remarkable journey by making a commitment to promote excellence in education with an emphasis on the personal development of their students.

Over the past 100 years, The Park School has carried out its mission of building a diverse and creative community that nurtures the joy and responsibility of active learning for all. From its founders, John Dewey and Mary Hammett Lewis, to the current administration, Park has truly left its mark on Snyder and the Western New York community.

I am confident that The Park School will continue its mission of educating our youth and strengthening our community as successfully over the next 100 years.

IN HONOR OF COMMANDER  
HALSEY "BULL" KEATS

**HON. MICHAEL G. FITZPATRICK**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. FITZPATRICK. Mr. Speaker, I rise today to honor Commander Halsey "Bull" Keats upon his retirement from the United States Navy, where he served 20 years. CDR Keats completed four deployments throughout the world which have included ports in over 12 countries. During Enduring Freedom, he was the only Lieutenant Commander who stood in the ship's Captain during combat flight operations, and during Operation Iraqi Freedom he was selected to lead the first ever deployment of the Real-Time Sensor Data Link ground station to Camp Victory, Baghdad, Iraq providing the Commanding General tactical control over the Surveillance System Upgrade S-3 which boasted a streaming video capability.

CDR Keats was selected as the Naval Flight Officer of the Year in 1997. In 2004 he graduated from the Operational Planners Course with distinction at the Naval War College in Newport, Rhode Island. He has logged over 2,000 flight hours. For his exemplary service CDR Keats has received the Defense Meritorious Service Medal, Navy Meritorious Service Medal, Navy Commendation Medal, Navy and Marine Corps Achievement Medal, in addition to numerous unit commendations.

His final tour was Chief, Special Activity plans at U.S. Central Command Operations Directorate from July 2010 through his retirement on 1 April 2013.

Mr. Speaker, Commander Keats exemplifies all of the best qualities of a United States Naval Flight Officer. We have known each other for over thirty years. We worked together as young men back in Bucks County, Pennsylvania where his parents still do reside. Cmmdr. Keats is an outstanding husband and father and he has served his Nation with distinction.

I am honored to be able to stand here today and recognize him for his many years of service.

CENTENNIAL ANNIVERSARY OF  
THE CITY OF REDMOND

**HON. DAVID G. REICHERT**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. REICHERT. Mr. Speaker, as the two members who have the honor of representing this city today and in the future, I rise with my colleague Representative SUZAN DELBENE to honor the centennial anniversary of the City of Redmond, celebrated today, December 31, 2012.

First incorporated in 1912, eligible thanks to the birth of its 300th citizen, Redmond began as a small logging community. A century later, it has turned into a vibrant urban center of 55,000 that still maintains its strong sense of community and is proud of its small-town feel.

Over the last century, Redmond has evolved from logging town, to a small bedroom community east of the big city, to a bustling city in itself. Today, it's home to some of the most prominent high tech companies in the world. Redmond's tremendous growth has been fueled by the pioneering, entrepreneurial spirit of the town's first settlers and, in the century since, has attracted and inspired generations of Washingtonians to turn Redmond into a premier economic engine for the 21st century.

With all this growth and change, Redmond continues to maintain a deep sense of friendship and community. For example, Mr. Speaker, the Redmond Derby Days, a city celebration that grew out of a bicycle race among local paperboys after the depression, is going strong after 70 years. The Derby Days are bigger and better than ever and today, the signature event has the honor of being the nation's longest running bicycle race.

Over the last few years, we have both enjoyed participating in so many activities and events in beautiful Redmond and are honored to represent the great people of this city.

With the further expansion of mass transit, Redmond has an amazing opportunity to continue its growth and impact neighboring cities. Together with Seattle and environs, its influence contributes to form a region that is vibrant, attractive for business and a great place to live, work and raise a family. As Mayor Marchione, along with all of Redmond's dedicated City Council members, continue to build on Redmond's rich history, we look forward to watching and aiding with the city's success in years to come.

Mr. Speaker, Representative DELBENE and I again offer congratulations to the City of Redmond for a wonderful, rich first century and together wish them the best as they move into their second century of prosperity.

---

HEALTH RELATED MATTERS FOR  
MY COLLEAGUES IN CONGRESS  
TO CONSIDER IN 2013

**HON. DAN BURTON**

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. BURTON. Mr. Speaker, as we close the 112th Congress and I prepare to retire from Congress, I would like to leave a few com-

ments regarding health related matters for my colleagues who will return to the 113th Congress. Throughout my decades in public service, I have strived to give consideration to those whose issues fall through the cracks of our government, and to those who become targets of government authorities for daring to deliver or seek alternative therapies.

Complementary and Alternative Therapies: While Chairman of the Committee on Oversight and Government Reform, I initiated a comprehensive evaluation of the role of complementary and alternative therapies in our health care system. During this time we heard from researchers, practitioners, and patients about the value that complementary and alternative therapies can play in our health system. These therapies include acupuncture, massage therapy, traditional healing systems from various cultures around the world such as Traditional East Asian Medicine, Kampo, Native American Medicine, Homeopathy and energy therapies such as QiGong and Reiki as well as the use stress management tools and nutrition and dietary supplements. These also include conventional therapies used for purposes not yet recognized as mainstream such as Chelation Therapy for cardiovascular benefit.

I hope my colleagues in 2013 will continue to protect access therapies and products so that Americans can continue to make their own choices in health care and retain their health freedom. I also believe a hard look at the management of resources provided to these issues is overdue. For instance, the first ever head to head research study looking at an alternative cancer treatment for pancreatic cancer as compared to the mainstream therapy was an absolute management disaster. Ten years, millions of dollars, and several federal investigations validating violations of patient protections by the academic conventional cancer therapy principal investigator has been swept under the rug by the National Institutes of Health's National Cancer Institute and the National Center for Complementary and Alternative Medicine. Too often, I hear that the studies that are funded, especially those on herbs are "designed to fail". After 20 years and more than a billion dollars, too little quality research on the therapies Americans are most interested in has been conducted. When my colleague Senator TOM HARKIN gave the initial instruction to the National Institutes of Health to "investigate and validate" therapies being used around the world, we all envisioned an aggressive campaign to go into the field and look at what is working an report this to the American people. Former Congressman Berkley Bedell championed this issue after being successfully treated with alternative therapies for Lyme disease and Prostate Cancer. Much good has been accomplished, but better work can and should be done.

In early 2013, the results of a national multi-site Chelation Therapy study will be published. I hope my colleagues will review this study and look to the history of how doctors who have provided this therapy have been attacked for daring to use a therapy approved decades ago by the Food and Drug Administration to treat heavy metal exposure in children "off label" for cardiovascular benefit. Medicine is increasingly recognizing that exposure to lead, mercury and other heavy metals have on the body including the cardiovascular system. Chelation Therapy may be improving

cardiovascular health by removing heavy metals. This study was attacked by closed-minded individuals who oppose chelation therapy and all alternative therapies. Sadly, we have lost a decade in looking at the benefits of chelation therapy in children as the National Institutes of Health reneged on its promise to conduct a study at the Clinical Center on chelation therapy in the pediatric population. The American people deserve honest inquiry into chelation therapy for all its possible benefits.

Keep in mind, 1 in 6 women of childbearing age are carrying a higher than normal body burden of mercury, and mercury is the second most toxic substance on the planet. Mercury in all its forms can be harmful especially to babies in the womb and in the first years of life.

We first became aware of mercury in vaccines after the FDA was required by our body to conduct an inquiry on the amount of mercury in the products they regulated. A new inquiry is due in 2013 to determine the amount of mercury still in all FDA regulated products. Congress will once again need to require this of the FDA. I am disturbed that in 2013 we continue to have mercury in any form in medicines and in other products Americans routinely use without the knowledge they are exposing their families to mercury. It is a travesty that public health authorities have discounted the risk of mercury in vaccines and other products because it is a "trace amount". The whole body of evidence on mercury shows it can be harmful and is best avoided. Sadly the American Academy of Pediatrics and the public health officials at FDA and the rest of the Department of Health and Human Services should be leading the charge to get mercury out of all medicines, and they have instead continued to protect the industry and not our children. It has been left to families who have formed organizations such as the Coalition for SafeMinds to fight for children to be protected from exposure to mercury through medicine.

Autism and Vaccine Injury: The Committee did not set out to investigate the epidemic rise in autism rates; however, in late 1999 as we were looking at reports of injury within the military form the adulterated anthrax vaccine, we began hearing about children being injured from vaccines and developing autism. It was a crisis we could not ignore.

Just as Bob Wright, the founder of Autism Speaks, recently testified before the House Oversight and Government Reform Committee that his daughter Katie reports that her son suffered a vaccine injury and developed autism, my both of my own grandchildren suffered vaccine injuries and my grandson developed autism shortly after he was vaccinated with multiple vaccines, exposed to high levels of mercury and suffered adverse reactions. We heard from thousands of families whose experienced similar injuries. Almost 5,000 of these families sought relief through the Vaccine Injury Compensation Program (VICP) as is required by law. Congress and the American people are repeatedly told that vaccine injury does not cause autism. Of the 5,000 families only 1, a little girl named Hannah Poling, has received justice in this program because her parents, both health professionals were able to document a mitochondrial dysfunction that was exacerbated by exposure to mercury and vaccine injury. The government conceded her case, but it still took years of negotiations and legal battles for little Hannah to be compensated. This program is not work-

ing at Congress intended and I hope my colleagues in the 113th Congress will conduct a thorough review of the management of the VICP and direct through legislation improvements to the law so that all that are seriously injured may be compensated swiftly, fairly and without long litigious battles. Sadly the autism omnibus proceeding was fraught with injustices. There was only limited discovery, many actions by government lawyers that in any other court would lead to disbarment, and an appearance of bias by the Special Masters who seemed to work as partners to Justice to defend against vaccine injury rather than to sit as unbiased administrators and many other matters deserve a thorough oversight review by Congress to insure the program operates as it was designed.

While government officials who settled the Hannah Poling case reported her mitochondrial dysfunction is rare, others reported that it is very prevalent in the autism population. Maybe as many as 1 in 5 with autism may have this same mitochondrial dysfunction. These same government officials have failed to share what their database of vaccine cases show—that almost since the inception of the VICP, the government has quietly been settling cases of vaccine induced brain injury that resulted in autism. The Elizabeth Birt Law Advocacy Center (EBCALA) conducted a review of settled cases within the program for vaccine induced brain injury such as encephalitis and seizures, confirmed dozens of cases in which the government compensated the vaccine injured. The way that the government has shielded this is that it is not listed as the primary injury. However, the EBCALA investigators validated through families and records that autism resulted from vaccine injury. There needs to improved transparency within this program. Every case that is settled should be published online in such a way that the public is informed what injuries have been acknowledged and the management of the program improved so that all cases for like injuries are compensated quickly. At present each report of injury is handled in isolation, with no discovery, no ability to refer to other cases and evidence previously accepted in cases, the program is wasteful in the use of its resources and certainly not fair to the injured. If we want to preserve vaccine policies in this country, it is essential to insure that the VICP works as Congress intended. I urge my colleagues to engage and stay engaged in investigating this program, talking to the lawyers and petitioners in the program, and improving it through legislation.

Autism: Autism in and of itself is a national emergency. We have gone in the time that I served in Congress from 1 in 10,000 to 1 in 88 children age 8 on the autism spectrum. This cannot simply be genetics—there is no such thing as a genetic epidemic. There are many issues that I urge my colleagues to address in 2013. The ERISA fix for insurance coverage of autism therapies such as Applied Behavioral Analysis is "low hanging fruit" for Congress. There is an urgent need to address adult and transition services for individuals with autism including those with higher functioning autism who, while often able to live independently as adults, are often under employed. We have a severe shortage of adequate housing for adults with autism who are no longer able to live with their parents. We have invested a billion dollars in autism re-

search over the last decade, mostly on epidemiology and genetics. The autism community is frustrated that environmental factors are not given a greater share of the research dollars and that practically no funding has been provided to evaluate the dozens of therapies families who are able to pay out of pocket are using very successfully. Many of these are dietary related and alternative therapies and if there is ever to be insurance reimbursement, Medicaid coverage, or access through other government programs such as for military families, research to investigate for safety and benefit is needed. I hope my colleagues in 2013 will direct federal research resources to these much needed efforts in collaboration with the families and practitioners who have experience using them. The government cannot continue to sink significant resources simply into counting the children, without addressing the causes of the epidemic increase and focuses on prevention and treatments.

I am pleased that Chairman DARRELL ISSA committed during the November 29 autism hearing to stay engaged in looking at the federal response to autism. He is learning as I did while Chairman that the families and professionals involved in this community are desperate for Congress to do something to improve the Federal response, to hold accountable those who are subverting the truth about the causes of autism, and who have poorly managed the resources provided by taxpayers to get to the truth on autism and vaccine injury. I urge a review on how the Centers for Disease Control and Prevention (CDC) has managed the Vaccine Safety Database, how Poul Thorsen was able to steal more than \$1 million from the autism grant in the CDC-Denmark project, and why Diana Schendel of the CDC has continued publish studies as a co-author to Thorsen. Why does the CDC continue to promote his research after his federal indictment for 22 counts of wire fraud and money laundering? I am concerned that individuals at the CDC have participated in malicious acts of covering up the data showing a direct connection between exposure to mercury in vaccines in the first six months of life and an eleven-fold increase risk of autism. I urge the 113th Congress to shine the light of day on their actions and seek justice.

Military and Veterans: I cannot leave Congress without giving mention to the men and women of our armed services, active duty, National Guard, Reserves and Veterans. We recently lost one our own in the Congress, Senator Daniel Inouye, a World War II veteran. All across the great nation, in veterans' hospitals, hospices and retirement homes, we are losing tens of thousands of World War II, the Korean Conflict, and Vietnam War veterans each month. Too many have no remaining family members to be with them and it is VA staff and volunteers who spend the last hours and days with them.

The signature injuries of the Global War on Terror of the last 12 years is Traumatic Brain Injury and Post Traumatic Stress Disorder. (TBI/PTSD) I like many Members of Congress have been informed of the benefits of hyperbaric oxygen therapy at 1.5 ATA for members of the military who have had concussive injury and developed TBI/PTSD. Professional athletes such as Washington Redskins quarterback Robert Griffin III who suffer a concussive injury are immediately provided access to all therapies that show benefit including hyperbaric oxygen therapy (HBOT).

Sadly our troops not provided the same access. For a decade members of the military and veterans have been working to gain access to HBOT and other therapies and to have these therapies paid for through Tricare. Evidence show HBOT is both safe and effective, and unlike the anti-depressant, anti-psychotic and other drugs being handed out like candy by military doctors, do not have black box warnings for increased risk of suicide and suicidal thoughts. I urge my colleagues returning in 2013 as well as President Obama, the Secretaries of Defense and Veterans Affairs to work together to make HBOT at 1.5 ATA (the validated dose) and other therapies as outlined in the TBI Treatment Act we passed twice in the House available to those with TBI/PTSD. Those who stepped up and volunteered to serve our nation deserve nothing less.

Health Freedom and the Constitution: At the foundation of all of my time in public service is the Constitution. The prevailing theme of the right to life, liberty and the pursuit of happiness for all Americans are as important today as it was when I was first sworn in. As I leave Congress, I am grateful for the opportunity to serve the people of Indiana and the nation. I am grateful for all those who have worked with me over the years in my Congressional office and on Committee Staff. I am thankful to a God who has provided me strength and health to serve and pray that as we enter 2013 and I enter a new phase of my life, with a beautiful and intelligent wife and family whom I love, that new champions for health freedom will emerge.

IN HONOR OF MY FAMILY'S LOVE  
AND SUPPORT

**HON. ELTON GALLEGLY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. GALLEGLY. Mr. Speaker, I rise in honor of my family. As you and almost every Member of Congress knows, doing this job would be impossible without the love and support our families.

Twenty-seven years ago, my wife, Janice, agreed to support my first run for Congress. She agreed on three conditions: I would not put the family into debt. That I would never ask her to do public speaking. And, that she would never have to ask for campaign contributions.

Well before the primary was over, we were in debt. Janice was my surrogate speaker, and she was the best fundraiser anyone could have.

Because of her skills at public speaking and campaigning, we were quickly out of debt from my first run for Congress. For the next 26 years, she spearheaded my campaign and I never again had to borrow from the family. Janice stood by my side as I met with ambassadors, heads of state, and military families. She has been my rock.

Janice and my four children were young adults when I first entered Congress. They have married and given us 10 beautiful grandchildren. They have been my greatest champions.

Shawn Gallegly married Tea. They gave us two grandsons, Adrian and Lucas.

Shawn Payton married Angelique. They gave us a granddaughter, Savannah, and two grandsons, Tanner, and Landon.

Kevin Gallegly married Jennifer. They gave us three granddaughters, Emma, Bethie, and Sammie.

Shannon Payton Breslow married Scott. They gave us a grandson, Payton, and granddaughter, Presley.

Mr. Speaker, without the love and support of my family, I could not have served in this great institution for so long and represented my neighbors as effectively. I know my colleagues join me in thanking them for their love and support. I look forward to spending much more time with my wife, children, and grandchildren and in supporting them achieve their dreams.

HONORING THE LIFE OF DR.  
ROMAIN CLEROU

**HON. KEVIN MCCARTHY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. MCCARTHY of California. Mr. Speaker, I rise today to honor the life of Dr. Romain Clerou, a local doctor from my hometown of Bakersfield, California who passed away on November 20, 2012. Romain selflessly served our community for over 65 years through his medical practice and will be remembered as a good friend to many, and a fixture on the sidelines at the local college and high school football games.

Born in Bakersfield to French immigrants, Romain attended Kern County Union High School, Bakersfield Junior College, the University of California at Berkeley, and Creighton Medical School in Nebraska before serving in the U.S. Navy's 41st Seabees during the Second World War.

In 1946, after the war had passed, Romain set up his medical practice in Bakersfield. Throughout the following decades, he would become well-regarded for his constant availability and the personal attention given to each of his patients. Dr. Clerou treated countless ailments, delivered thousands of babies, and befriended generations of families.

Additionally, Romain was the beloved team doctor for many athletes on Bakersfield football teams, a service for which he was known to never charge. Romain loved sports. He was a gymnast and football player and continued to play competitive rounds of golf up until late February of this year. Only a few months ago, Romain could be found at Bakersfield College taking in a football practice, sitting in a golf cart and smoking the cigars he was so well known for.

Mr. Speaker, it is this kind of dedication to community service that reflects the great characteristics of our nation's people. As someone who lived life to the fullest and spent most of that life serving the people of Bakersfield, Romain was not only a pillar of strength to his community, but also to his country. He is survived by Mrs. Mayie Maitia, along with her family, his six children, and five grandchildren. While I ask that my colleagues join me today in honoring the life of a great American, I have no doubt that Dr. Romain Clerou will be long remembered by the community he served so well.

HONORING BUCKS BEAUTIFUL

**HON. MICHAEL G. FITZPATRICK**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. FITZPATRICK. Mr. Speaker, I rise today to recognize the work being done in my home of Bucks County, Pennsylvania by the dedicated volunteers of Bucks Beautiful.

Founded in 1990 by Robert and Joyce Byers and Carol McCaughan with the goal of beautifying Bucks County, this community organization has dedicated itself to preserving and improving upon the existing natural beauty of my home in southeastern Pennsylvania.

Over the last 22 years, Bucks Beautiful has expanded its mission, offering beautification grant programs, partnering with a local college to offer academic scholarships, and offering scenic tours of Bucks County and other nearby locales.

Most recently, Bucks Beautiful has completed its "Bulbs For Bucks" Program, planting hundreds of thousands of daffodils at strategic locations across the county.

The inspiration of Chuck Gale, owner of Gale Nurseries and a Bucks Beautiful board member, this collaboration of local nursery owners and landscape architects will result in an impressive visual display come spring along major Bucks County thoroughfares.

Chuck Gale and his team complete the first phase of this undertaking in fall of 2010, planting 30,000 Daffodil Bulbs were planted along the Rt. 611 Bypass.

Last fall, 300,000 Daffodil Bulbs were planted along the Delaware Canal at key locations from Bristol to Riegelsville, Bucks County.

Finally, this November marked the completion of Phase 3 with 170,000 daffodil bulbs being planted along the new Route 202 Parkway and Route 202 Bypass.

The completion of this project, which included the acquisition from Holland the only bulb-planting machine in the United States, has laid the foundation for an expanded tourism base for Bucks County. Bucks Beautiful hopes to begin an annual bulb festival adding to the list of fairs and festivals that bring countless tourists from around the country to our community each year.

The hard work and dedication of Chuck Gale, the Central Bucks County Chamber of Commerce and the volunteers of Bucks Beautiful has made this program an outstanding success, and I wish them the best of luck going forward.

ANTIBIOTIC TREATMENTS OVER  
THE PAST CENTURY

**HON. BRIAN P. BILBRAY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, December 31, 2012*

Mr. BILBRAY. Mr. Speaker, I submit an essay by a San Diego innovator, Dr. Jeff Stein, President and CEO of Trius Therapeutics. Dr. Stein provides a fascinating account of the evolution in the discovery of antibiotic treatments over the past century.

Dr. Stein's story is a vivid example as to why the private sector and public sector must work together to innovate as a means to save
