SEC. 202. FINDINGS.

Congress finds the following:

(1) The Electronic Communications Privacy Act of 1986 (Public Law 99–508; 100 Stat. 1848) and the subsections thereof ("ECPA") was intended to protect the privacy of electronic communications stored with providers of electronic communications services and remote computing services, while balancing the legitimate needs of law enforcement to access records stored by such providers.

(2) To strike this balance, ECPA authorized certain categories of communications data to be obtained only pursuant to a warrant issued pursuant to this subsection.

(3) It has been well established that courts in the United States lack the power to issue warrants extraterritorially only where the Government seeks to obtain the contents of electronic communications belonging to a United States person.

(4) Nevertheless, Congress also recognizes the legitimate need of law enforcement agencies in the United States to obtain, through lawful process, electronic communications relevant to criminal investigations related to United States persons wherever that content may be stored. Therefore, this title includes the use of search and seizure activities extraterritorially only where the Government seeks to obtain the contents of electronic communications belonging to a United States person.

SEC. 203. SCOPE AND CLARIFICATION OF WARRANT REQUIREMENT.

(a) In General.—Chapter 121 of title 18, United States Code, is amended—

(1) in section 2702(a), by amending paragraph (3) to read as follows:

(2) in section 2702—

(A) inserting subsections (a) and (b) and inserting the following:

"(a) CONTENTS OF WIRE OR ELECTRONIC COMMUNICATION IN ELECTRONIC STORAGE.—A governmental entity may require the disclosure by a provider of electronic communication service or remote computing service of the contents of a wire or electronic communication that is in electronic storage with or otherwise stored, held, or maintained by the provider only pursuant to a warrant issued using the procedures described in the Federal Rules of Criminal Procedure (or, in the case of a State court, issued using State warrant procedures) by a court of competent jurisdiction.

(b) A warrant issued pursuant to this subsection may be used to require the disclosure of contents of a wire or electronic communication that are in the provider’s electronic storage within the United States or otherwise stored, held, or maintained within the United States by the provider.

(b) WARRANT REQUIREMENTS.—A warrant issued under subsection (a) may require the disclosure of the contents of a wire or electronic communication that is in the provider’s electronic storage, regardless of where such contents may be in electronic storage or otherwise stored, held, or maintained by the provider, if the account-holder whose contents are the warrant holder of a United States person. A court issuing a warrant pursuant to this subsection, on a motion made promptly by the service provider, shall modify or vacate such warrant if the court finds that the warrant would require the provider of an electronic communication service to violate the laws of a foreign country;"

(B) in subsection (d), in the first sentence—

(ii) by striking ‘‘sought, are’’ and inserting ‘‘sought and are’’; and

(C) by adding at the end the following:

SEC. 3. SMALL BUSINESS CYBER SECURITY OPERATIONS CENTER.

(a) FINDINGS.—Congress finds the following:
(1) The Federal Government has been hit by a barrage of high-profile cyber assaults over the past year, including the attacks on the Office of Management and Budget and the Department of State.
(2) These attacks exposed the most sensitive personal information of millions of Federal employees and their families.
(3) The President has instituted emergency procedures to immediately deploy so-called indicators, or tell-tale signs of cybercrime operations, into agency anti-malware tools.
(4) According to the Federal Bureau of Investigation, small business concerns have lost more than $1,000,000,000 during the period beginning October 2013 and ending June 2015 as a result of cyber corporate account takeover and business email fraud.
(5) The Federal Government leverages the creation of the Small Business Concerns Assistance Center, which has already responded to reports of small business concerns across the country to accomplish its missions.
(6) The Federal Acquisition Regulations dictate that a percentage of all Federal Government acquisition be set aside for small business concerns.
(7) Ninety percent of small business concerns use the Internet through the course of their activities to conduct business.
(8) Small business concerns tend to have weaker information security, and it is necessary funding for high-end encryption technology or staff expertise.
(9) Industry reports indicate that, on average, there are 154 cyber attacks on small business concerns and of those businesses that are attacked, 59 percent have no contingency plan, while according to a First Data report, the average for a data breach at a small business concern is $36,000 and rising annually.
(10) A 2012 Verizon study shows that in 655 data breaches, 64 percent occurred in businesses with fewer than 100 employees.
(11) Small business concerns are increasingly attacked with data breaches and ransomware, where an attacker encrypts the businesses data until a ransom is paid to the attacker.
(12) It is imperative that small business concerns are provided improved secured guidance to limit negative impacts on the economy of the United States.
(13) There is a vast cyber threat facing the businesses sector of the United States, which poses a direct threat against the national security of the United States, the Department of Defense, private industry, and critical infrastructure components.
