The Senate met at 10 a.m. and was called to order by the President pro tempore (Mr. HATCH).

PRAYER
The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Our Father in Heaven, may Your Name be honored. Today, lead our Senators along the road of humility so that You can exalt them in due time. May they have the wisdom to reap the bountiful harvest that comes from planting the seeds of lowliness and reverential awe.

Lord, make them wise and strong as they face national challenges that threaten our freedom. Guide them, strong Deliverer, for they are pilgrims in time who are headed for eternity. Continue in everything to work for the good of those who love You, who are the called according to Your purposes. Keep us, O God, so dedicated to You and Your purposes that we may do justly, love mercy, and walk humbly with You.

We pray in Your majestic Name. Amen.

PLEDGE OF ALLEGIANCE
The President pro tempore led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RECOGNITION OF THE MAJORITY LEADER
The PRESIDING OFFICER (Mr. COTTON). The majority leader is recognized.

TRADEGY IN DALLAS
Mr. McCONNELL. Mr. President, today the city of Dallas will hold a memorial service in honor of the five police officers slain in the senseless shooting during last week’s peaceful protest. The victims are individuals who, like law enforcement officials in each of our communities, willingly put their lives on the line every day to keep us safe. Their loss is a tragic reminder of the courage and selflessness they possessed, just as it is a reminder of the burdens their family bear on our behalf. Today we remember each of them.

I know I speak for the entire Senate in saying our hearts are with the families and friends of each of these victims, the others wounded, the entire law enforcement community, and the city of Dallas.

Our Nation experienced a great deal of suffering and heartbreak last week. We must come together now to overcome these tragedies and allow healing to prevail.

CARA AND MILCON-VA AND ZIKA VIRUS FUNDING LEGISLATION
Mr. McCONNELL. Now, Mr. President, let me speak on an entirely different matter.

Angie was “a beautiful girl with a heart of gold and a smile that would light up a room” before her life was changed by heroin. Angie described her addiction to her mother, saying: “Mom, I need this drug like I need air to breathe.” It would take Angie experiencing an overdose and her mom begging her to quit before she agreed to seek treatment. Unfortunately, though, like so many addicts, Angie left the treatment facility and started using again. She told her mother: “I’m in a black hole and I can’t get out.” Angie would end up dying from an overdose, her body dumped callously at the bottom of a muddy creek by her drug dealer.

Tragically, Angie’s story is just one glimpse into the widespread prescription opioid and heroin epidemic sweeping our country. In fact, drug overdoses now claim 129 lives a day in America. The families of these victims know more must be done to prevent others from enduring the pain of drug addiction and overdose.

Antidrug groups and law enforcement officials also know more must be done to prevent the widespread loss communities have experienced at the hands of this crisis. That is why nearly 250 antidrug and law enforcement groups across the country have voiced their support for the Comprehensive Addiction and Recovery Act conference report.

Just last week, these groups collectively sent a letter urging passage of this legislation, which they called a “truly comprehensive response to the opioid epidemic” that represents “the critical response we need.” These groups represent States from coast to coast, from Lifehouse Recovery Connection in California to Justice and Recovery Advocates in Maryland, to Friends of Recovery in New York, among dozens and dozens of others. They have seen the crisis firsthand, and they know the positive impact this bipartisan comprehensive response can have.

Here is what I mean. The National Association of Counties and the National League of Cities have asked Congress to “act quickly” and pass the CARA conference report. They call it “a pivotal step towards stemming the tide of this epidemic.”

The Addiction Policy Forum has warned Congress “not [to] play politics” by blocking passage of this CARA conference report. They call it “a monumental step forward—a tipping point to better addressing the paralyzing opioid epidemic.”

The Faces and Voices of Recovery has urged support too. They call it “the most expansive Federal, bipartisan legislation to date for addiction support services,” and they say it can “help save the lives of countless people.”

*This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
The Fraternal Order of Police has asked Congress “to adopt the conference report” on behalf of its more than 330,000 members. They call it another “tool to reduce the deaths from this epidemic.”

So we are just one step away from sending this legislation to the President’s desk. The House overwhelmingly passed it by a vote of 407 to 5. With continued cooperation, the Senate can send it to the President this week.

Remember, this Senate has provided more than twice as much funding for opioid-related issues as under the previous Senate majority. Let me say that again. This Senate has provided more than twice as much funding for opioid-related issues as under the previous Senate majority. The passage of CARA would represent another crucial step toward combating this crisis.

Of course, this wouldn’t have been possible without the unwavering commitment of Senators like Senator PORTMAN, Senator AYOTTE, Senator GRASSLEY, and Senator ALEXANDER to move this bill forward. From raising awareness about this crisis to serving as voices for the voiceless and working across the aisle to develop this comprehensive response, these Senators were resolute in their support. In no small part, because of their efforts to drive this bill forward, communities will be better equipped to prevent heroin and prescription opioid abuse in the first place, just as they will be better equipped to save lives and foster treatment and recovery.

I also want to recognize the work of Democratic Members like Senator WHITEHOUSE and Senator KLOBuchar for their efforts to help garner support for this bill and move it through the legislative process. There is no reason every Senator shouldn’t support it now. The sooner we send this bill to the President’s desk, the sooner we can help our communities begin to heal from the prescription opioid and heroin crisis.

Another way to do that is by passing the conference report that would fight Zika and enact record levels of funding for veterans’ medical services, including millions for substance abuse and treatment. Democrats are clearly very nervous about their decision to attack women’s health and veterans with the filibuster of the anti-Zika funding bill. Who wins? They put forth a variety of tortured excuses that don’t stand up to scrutiny. They have offered a proposal they hoped would provide political cover by ditching funding for our Nation’s veterans. That is clearly not a solution.

I don’t know how Democrats plan to explain any of this to veterans this summer. I certainly don’t know how Democrats plan to explain this to pregnant mothers. Either Democrats believe Zika is a crisis that requires immediate action or they do not. Republicans believe we ought to pass this bill now because this is a crisis. Our friends across the aisle will have to decide if they feel the same or if a partisan political group is worth delaying funding to protect families from Zika or fund our veterans.

There is only one option to get anti-Zika funding on the President’s desk before September: that is, passing the conference report. The Senate is sending funding legislation that is before us and sending it down to the President for signature.

The rules don’t allow for a conference report to be amended, and repassing the same one. This conference report will not put a bill on the President’s desk, it will not create a vaccine, it will not kill a single mosquito, and it will not help a single pregnant mother. So let’s do the right thing for our Nation and pass the legislation that is before us.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Democratic leader is recognized.

CARA AND MILCON-VA AND ZIKA VIRUS FUNDING LEGISLATION

Mr. REID. Mr. President, the tortured explanation from my friend the Republican leader this morning about two important issues—opioids and Zika—is an indication of why the Republicans will no longer have the majority come election day. That is very clear. You can’t go on doing what they are doing and expect people to support you.

In the morning, we are going to vote on opioid legislation. It is important we do that. Everyone in this Chamber knows we have to do something to stop this epidemic. It has claimed the lives of too many Americans, and it is doing it every day. Our CARA conference report is a start, but it is a missed opportunity to do something really substantive to stem the number of opioid overdoses across the country, and the reason for that is Republicans refused to allocate money for this legislation.

To have my friend talk about we have done twice as much as we did under the previous majority—why wasn’t anything done before? Because it was filibustered. We couldn’t do it. There is not enough money to do all the authorizing we have done for these programs. There is not enough money.

In conference, Republicans again rejected our efforts to insert funding into the report. Authorizing legislation is a start, but without resources it is very meaningless. Without any real funding, the conference report comes up really short.

For example, editorials around the country have said as much, and I will pick on one—the New York Times editorial board. This morning, in their piece entitled “Congress Is Voting on an Inadequate Opioid Bill,” they say: Congress is about to pass a bill meant to deal with the nation’s opioid epidemic. It contains some good ideas. It will also be far less effective at saving lives than it should be.

The Senate is expected to vote on this measure, approved by the House on Friday overwhelming 48 to 1. It would authorize addiction treatment and prevention programs to stem what has become a scourge and a disgrace—more than 22,000 overdose deaths last year.

And it has gotten worse, not better, but this legislation contains not a penny to support any of these initiatives.

Continuing to read from the article:

d. The overwhelming majority of Republicans voted for this bill, and I am glad they did. The Zika compromise passed, as I said, with 89 votes. Only the most extreme, conservative Members of this body voted against it. That was 2 months ago. But since then, it has become crystal clear the last 2 months that Republicans are not serious. They are playing games again because they are not responding to the threat posed by these mosquitoes and by this horrible, horrible condition that they are causing for human beings.

Instead of working to send the bill to the President’s desk, the Republicans derailed the bipartisan response—89 Senators who voted—to send that to the House of Representatives. There was a conference. The Republicans chose a very reckless approach. They ignored what went on here in the Senate, even as more and more Americans are getting infected every day. There are almost 4,000 people in the United States and territories that have Zika right now. At least 600 pregnant women have shown evidence of infection. We don’t know how many of those pregnant women who have this infection—this virus—will end up bearing very, very, sick babies. We don’t know how many, but it is going to be a lot.

We should be working to fight Zika. We should be working together. We should be providing public health experts with the resources they need to fight this virus. It is not being done, as the Republican leader says. In the Senate, we are stuck in limbo as the Republican leader forces an unnecessary revote on this failed proposal we got from the House of Representatives and approved by the Republicans in the Senate—this conference report. We don’t need to vote on this again. It was already rejected. It will be rejected again. Why? For very good reasons.

It is an abomination of a conference report. It restricts funding for birth control provided by Planned Parenthood. My friend talked about pregnant women. If we want to talk about pregnant women, we ought to talk about women who don’t want to get pregnant. Where do they go? The vast majority of women in America go to Planned Parenthood. Millions go. This legislation that the Republicans are trying to foist on the American people stops them from being able to do that. It restricts funding for birth control provided by Planned Parenthood. Planned Parenthood is a whipping boy for the Republicans.

This legislation also exempts pesticide spraying from the Clean Water Act. They had to get Planned Parenthood, and they had to do something to the environmental community. Here is what they are going to do to whack the environmental community: We will just not have the Clean Water Act apply. Veterans—my friend the Republican leader talks about veterans funding. Understand that the legislation being proposed to help fight Zika takes $500 million—one-half billion dollars—from the veterans program. That money was to be used for processing claims for veterans, which are way behind. We need that extra money. That is going to be gone.

The delayed salvation of the Zika problem also rescinds $543 million from ObamaCare. Right now, I could raise a point of order, and that would go. That would be gone. It rescinds $543 million from ObamaCare. They have to do this. They are so ideological: Let’s go after Planned Parenthood; let’s go after the environmental community; let’s make sure we do something about ObamaCare; and, just for good measure, because Ebola is not an emergency this very second, let’s take more money from that. Two years ago, Ebola was a big emergency, and it will be again. And, just for good measure, to satisfy the right-wing—as Speaker Boehner called them—crazies over there, today, we will strike a provision on the Confederate flag that was in the House bill.

How is that for an effort to do something constructive? We all know the Senate will not pass this Republican conference report. President Obama will not sign it into law. So why waste more time on this? We should pass the bipartisan Senate compromise as soon as possible. My friend said: Well, we can’t amend the conference report. Of course you can amend the bill. With unanimous consent, we can do all kinds of good things.

That is obviously the responsible path forward, and we need to get this legislation to the President’s desk. In order to do that, we must bring the Zika compromise legislation before the Senate as a stand-alone. I tried yesterday to do that. I asked unanimous consent that the Senate move to the compromise legislation and the Senate vote on that. Message. But despite his previous support for this bipartisan legislation, the Republican leader objected. Senate Democrats are not going to be deterred.

Is there a State in the Union that is going to suffer more than Florida? No. So the senior Senator from Florida is going to come to the floor in a little while this morning, and he is going to ask consent that the Senate proceed to the Zika compromise as a stand-alone bill. It has to be done. We should do that. Florida has been hit really hard, and the worst is yet to come. Yesterday alone, as I indicated, there were new cases reported. According to the Palm Beach Post, that brings the number of Floridians—just Floridians—affect ed with Zika today to almost 300, including 43 pregnant women. So I hope they are going to consider the request by Senator NELSON. We are willing to work with Republicans to get this done. The Senate is going to adjourn for the long, 7-week vacation once we get this done.

Our country is facing an emergency. It is time for the Republicans to start treating it as such. “Opioids,” “Zika” are only words from the Republicans. I repeat for the third time this morning, it is so clear why the Republicans are going to lose the majority in the U.S. Senate. All you have to do is listen to what the Republican leader had to say today.

Will the Chair announce the business of the Senate this morning.

RESERVATION OF LEADER TIME
The PRESIDING OFFICER. Under the previous order, the leadership time is reserved.

COMPREHENSIVE ADDICTION AND RECOVERY ACT OF 2016—CONFERENCE REPORT
The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of the conference report to accompany S. 524, which the clerk will report.

The assistant bill clerk read as follows:

Conference report to accompany S. 524, a bill to authorize the Attorney General to award grants to address the national epidemics of prescription opioid abuse and heroin use.

The PRESIDING OFFICER. Under the previous order, the time until 12:30 p.m. will be equally divided between the two leaders or their designees.

The Senator from Illinois.

ZIKA VIRUS FUNDING
Mr. DURBIN. Mr. President, 5 months—5 months—that is how long it has been since the National Institutes of Health and the Centers for Disease Control and Prevention formally asked the U.S. Congress to respond to a public health emergency to combat the Zika virus—5 months.

That time, we have seen the number of Americans infected with Zika soar to 3,667. Of those, 599 are pregnant women. In Illinois, there are 26 confirmed cases of Zika—5 months. To date, seven infants have been born with Zika-related birth defects in the United States. Five pregnancies have ended because of Zika-related birth defects—5 months. Last week, Utah health officials announced the first U.S. death related to the Zika virus—5 months. In Puerto Rico, where this situation gets worse by the day, officials reported a 1-week jump of 49 percent in the number of pregnant women on the island diagnosed with Zika—5 months. Three thousand, six hundred sixty-seven Americans to date are infected with Zika that we know of, 599 pregnant women, 7 babies born with severe birth defects, 5 ended because of the virus, and the first Zika-related death—5 months since the President of the United States said this was a public health crisis.

The Republican-controlled Congress has waited 5 months to respond to this crisis, and now we are on the verge of leaving town for 7 more weeks—until
September, after the conventions—and we will leave without providing our Federal health agencies the money they urgently need to fight Zika. By the time Congress returns, it will be 7 months since the President asked Congress for an emergency basis to address this public health crisis of Zika. Every single American should be disgusted by this, and every single Member of Congress should be embarrassed. What is most infuriating about this situation is that we have a bipartisan Zika funding bill ready to go, and the President would sign it tomorrow if he could. In May, the Senate passed a bill. I will concede, it was 3 months after the President asked for it, but we did pass a bill. We had 89 votes supporting a bill to provide $1.1 billion to fight this public health disaster. It was less than the President asked for, but it was a good-faith, bipartisan effort to get funds to prepare for and respond to that unexpected outbreak, the Ebola cluster in Guinea. In order to release those specialists stationed in West Africa, they made it as disgusting and repellent as possible. Democrats wouldn’t accept these riders because Ebola funds. They knew the Zika virus can be transmitted through sexual contact. Women infected with Zika in their first trimester can face a 13-percent likelihood of a baby born with a serious problem, even if a pregnant woman doesn’t show any signs of infection, her baby can be born with serious, physical, and neurological disorders. It has been 5 months since the President asked for funding. This Republican-led Congress just can’t get it right. Eighty-nine Senators, Democrats and Republicans, came up with a bipartisan answer, they couldn’t get it through the House of Representatives, and we sit here today languishing in this political mess. What is perhaps most infuriating is that drastically improved participation rules and made single-employer pension plans much more stable. The act also made significant changes to defined contribution plans that drastically improved participation. I believe it is safe to say I speak from direct experience. I served as mayor of the city of Gillette, as a member of the Wyoming Legislature, as a member of the Senate Pensions Committee, as a member of the Senate Pensions Committee, as chairman of the Senate Retirement Security Subcommittee, and chairman of the conference committee on the 2006 Pension Protection Act. The President got it right 5 months ago. Why can’t this Congress get it right now before we leave for this 7-week vacation? Enough is enough. It is time for the Republican majority in the House and Senate to do their job: respond to this public health crisis in a sensible, bipartisan way, just as our bill that passed the Senate with 89 votes addressed, instead of making this a political test for the most outrageous claims.

Chairman of the conference report that came out of the House. Despite the fact that 89 Senators of both parties had voted for bipartisan funding in the Senate, when they took it into conference, it turned into a partisan bill. This is a cynical attempt by the Republicans in the House to hijack a public health crisis and push a grab bag of their favorite unrelated poison pill riders. That is why their bill, as shown by the vote here last month, is a non-starter in the Senate, and it is a non-starter with the American people. What is being lost during this entire posturing and politicizing is the very real toll Zika is taking. During the past 5 months, we have learned new and alarming things about Zika. We know the Zika virus can be transmitted through sexual contact. Women infected with Zika in their first trimester can face a 13 percent likelihood of a baby born with a serious problem, even if a pregnant woman doesn’t show any signs of infection, her baby can be born with serious, physical, and neurological disorders.

What about the impact of maternal stress on the baby? I spent the last several weeks meeting with maternal and fetal health care providers and community health leaders in Chicago. Yesterday I was in the Belleville area. They shared with me the fear and stress their patients are experiencing. Hundreds of pregnant women in Illinois are seeking care and advice from doctors. They have undergone tests to make sure their babies are healthy. Sadly, three of those Illinois women have learned they are already infected with Zika. I am sick and tired of this political game being played by the House and Senate Republicans when it comes to a public health crisis. The President got it right 5 months ago. Why can’t this Congress get it right now before we leave for this 7-week vacation? Enough is enough. It is time for the Republican majority in the House and Senate to do their job: respond to this public health crisis in a sensible, bipartisan way, just as our bill that passed the Senate with 89 votes addressed, instead of making this a political test for the most outrageous claims.

Did I mention the fact that in conference, the House and Senate Republicans decided to add another provision when it came to this public health crisis. That provision would allow the display of Confederate flags in veterans cemeteries. Give me a break. What does that have to do with this public health crisis or honoring our men and women who served in the military who have served our country well?

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Mr. President, as chairman of the Budget Committee, I come to the floor on a regular basis and give some bad news, hopefully in small doses. If the small doses don’t work, I am going to have to go to larger doses, these are not a crisis committee meetings. We are going to have some more opportunities to talk about that spending.

Private sector pensions are what I am going to talk about today. Private sector pensions are paid by millions of Americans for retirement security. They are agreements that are made between an employer and its employees or a union and its members which allow the recipients to receive payments in retirement. These payments are based on a formula that includes a number of factors, including years of service.

I have worked on pension policy for all of my professional life. I have dealt with pensions as a young accountant, as the mayor of the city of Gillette, as a member of the Wyoming Legislature, as a member of the Senate Pensions Committee, as chairman of the Senate Pensions Committee, as a member of the Senate Pensions Committee, as chairman of the Senate Retirement Security Subcommittee, as chairman of the Senate Budget Committee, and as chairman of the conference committee on the 2006 Pension Protection Act. I also authored the 2006 Pension Protection Act, which dramatically altered the funding rules and made single-employer pension plans much more stable. The act also made significant changes to defined contribution plans that drastically improved participation. I believe it is safe to say I speak from direct experience. I served as mayor of this body, with a large background in pension policy, and I am concerned about where we are heading.

Out of the 23,361 single-employer pension plans that we have information on, 4,486 are underfunded. The most recent actuarial estimations of the underfunding by the Pension Benefit Guaranty Corporation is over $738 billion. That should concern us because the assets of the Pension Benefit Guaranty Corporation and the single-employer insurance program are $35 billion. Let’s see. Single-employer pensions are underfunded by $738 billion. That is...
rounding it down, actually. It should be $759 billion, with assets of $85 billion.

Let me say that another way and say it again. The insurance program for that $758 billion only has $85 billion in assets, and even our largest union pension plan. Out of the 1,361 multiemployer pension plans, that means the collectively bargained agreements we have information on, 1,238 are underfunded. The most recent actuarial estimations of that underfunding is just over $611 billion.

What are the assets of the Pension Benefit Guaranty Corporation? They are $1.9 billion. In other words, the safety net for $611 billion is one and nine-tenths billion. I would equate that to trying to catch a whale shark with a net made for minnows.

This shouldn’t come as a surprise to anyone. The PBGC wrote in its 2015 annual report that “it is more likely than not that the multiemployer program’s assets will be insufficient.” The insurance policy for collectively bargained pensions is on track to become insolvent in less than a decade. In fact, if the Central States Pension Fund goes under, it will reduce that amount considerably.

Altogether, private sector pensions are underfunded by $1.35 trillion, or to put it in better perspective, $1.35 billion. On top of that, per the most recent actuarial data available, State and local pensions, the total amount of unfunded in public sector pension plans is $1.2 trillion, or $1.2 billion.

The total amount of unfunded liabilities in both private and public sector pension plans is around $2.6 trillion. That means these pension plans have agreed to pay out $2.6 trillion more than they have available. For reference, $2.6 trillion is $2.6 billion. It is more than double what our current annual spending is that Congress gets to make a decision on. That includes defense, transportation, agriculture, and education—twice what we spend on the things we get to make decisions on.

I have heard from some of my colleagues who have come to the Senate floor and speak to the troubling predicaments of specific pension plans. Many of them are currently advocating for shoring up the United Mine Workers of America pension plan, which is just one of the 1,238 union pension plans that are underfunded. I am concerned about this for several reasons.

First, if we take the steps my colleagues are advocating for with regard to the United Mine Workers of America, what are we going to do with the next unfunded pension plan that comes around looking for assistance? What about the plan after that? There are hundreds of private-sector pension plans in critical and declining or endangered status throughout America today so I am not sure how Congress would shored up the United Mine Workers of America and not the others. Paraphrasing President Washington: We are walking on untrampled ground. There is scarcely any part of our conduct which may not hereafter be drawn into precedent.

I have frequently heard my colleagues try to differentiate this case by speaking of a promise of a pension that was made to retirees in this particular union, but that agreement was between the members and the union. It was not an agreement with the Federal Government.

Second, I find it necessary to remind my colleagues this country is $19 trillion in debt and consistently increasing its spending. We don’t have the money to shore up pension plans. To be clear, despite proponents arguing that legislation to shore up coal companies’ contributions to the Abandoned Mine Land Trust, in reality, it would be paid for by the taxpayers. The Surface Mining Control and Reclamation Act is funded by a tax levied on $265.6 million. The AML interest on coal harvested. Interest from the abandoned mine land fund can be transferred to three trusts to support United Mineworkers’ health care benefits. Coal companies are those whose companies no longer exist but whose health plans still exist. If the abandoned mine land interest does not cover these health care costs, the three United Mineworkers’ health care plans would be funded by payments from the U.S. Treasury.

The AML interest payments are often not sufficient to meet the three United Mineworkers’ health care plans’ needs so the general fund of the Treasury is provided. For example, in fiscal year 2012, interest from the abandoned mine land fund paid $48.4 million toward the health care funds, and the U.S. Treasury general fund, the taxpayer dollars, provided $265.6 million. For example, in fiscal year 2012, interest from the abandoned mine land fund paid $48.4 million toward the health care funds, and the U.S. Treasury general fund, the taxpayer dollars, provided $265.6 million. The AML interest can’t take on another obligation. Now my colleagues are asking taxpayers to pay even more than the health care for the United Mineworkers’ beneficiaries.

The portion of funds coming from the U.S. Treasury will only increase. As I mentioned, the AML trust is funded by a tax levied on coal harvested. The key word is “harvested.” It breaks my heart to say this, but according to the U.S. Energy Information Administration, U.S. coal production, or harvesting, is projected to be down over 25 percent this year compared to 2014. In large part, that is due to the mercury air toxics standards rule, the stream protection rule, the Clean Power Plan, the freeze on Federal coal leases, the proposed increase in coal royalty rates, and everything else the administration is doing to shut down coal. Less coal being harvested will be paid into the abandoned mine land trust fund. As those abandoned mine land dollars dry up, more and more of the money this bill proposes to use for United Mineworkers’ health care and pensions will come from taxpayer dollars.

Again, I will point out this agreement was made between the members and the union, not between the members and the American taxpayer. That bears repeating. The United Mine Workers of America agreement was made between the members and the United Mine Workers of America, not the American taxpayer.

It is also worth noting that the AML fund is not unique in that it is comprised of fees paid by a specific industry or user base. One of the most significant pension plan problems we hear about today is the Central States Pension Fund, which I mentioned earlier and which includes a large number of truckers. That fund is going broke. So I will offer my colleagues an analogy using that fund. To be sure that there are roads to drive on, trucking companies pay a higher tax on their diesel fuel as well as taxes on truck and trailer sales, heavy tires, and heavy vehicle usage. Together with a tax that all consumers pay on every gallon of gaso- line and a tax on cigarettes,2 which together amount to a tax levied on the highway trust fund. This trust fund for highways builds roads and pays for repairs and new bridges that the trucking industry and all drivers rely on. Using a dwindling AML trust fund to shore up the United Mineworkers of America pension would be like shoring up the Central States Pension Fund with the fund that builds highways because truckers pay into the highway fund. That is what the United Mine Workers of America would be paid in.

My guess is that, if we examined all of the pension plans in critical and declining or endangered status, we could probably identify a fund that relevant employers or employees paid into in some way. If we go down this road, what is to stop those funds from being raided to shore up the quasi-related pensions? Where do we draw the line?

Lastly, I worry about the claims that we are helping all coal miners with this proposal. In reality, the policy does absolutely nothing for miners who are not members of the United Mine Workers of America. According to Bureau of Labor Statistics, nearly 11,000 workers in the coal industry have lost their jobs in the last year, largely due to this administration’s policies. Yet my colleagues have proposed a bill that would help only a portion of those people, and the bill wouldn’t help put those folks back to work, developing energy sourced from 33 percent of America’s electricity last year. Instead, proponents of this bill are saying: If you are a member of the United Mine Workers of America, we want to help you with your health care benefits and pensions, but if you are not or if you want your job back, then too bad.

I am not without sympathy for the United Mine Workers of America’s coal miners. Remember, I helped the miners get their health care. Coal miners play an integral part in our economy, and my colleagues have heard me say time and again that America runs on coal. Nowhere is that more evident than in
My home State of Wyoming, which produces 40 percent of the Nation’s coal. In fact, we produce more coal than the second through the sixth States in coal production combined. I have the deepest respect for coal miners and the families that have been laid off in Wyoming and across the country. I understand the unique health care needs of miners, and I respect the health care promise this country has made to the miners over many decades. I have supported those health care needs in the past, most specifically by working across the aisle to shore up the three United Mine Workers of America’s health care funds back in the mid-2000s. I believe it is important that coal miners continue to receive quality health care. I also believe it is crucial that they, as well as all Americans, have the opportunity to live out their retirement years in financial solvency, but I also want America to remain financially solvent. I don’t believe the efforts of my colleagues advocating for this United Mine Workers of America bill help the mine workers in a way that is fair to the Federal taxpayers or to the other coal miners in America. I also know the troubling truth about some of America’s pension plans, as I pointed out on this chart, that are underfunded, as well as the faces of the participants within those plans. I have met with them and heard their stories throughout my professional life. There are facets of our retirement system that we can fix to help retirees, but I remain concerned about the use of Federal tax dollars to shore up specific pension plans and to make false promises.

I thank the Presiding Officer, and I yield the floor.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant bill clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. FLAKE). Without objection, it is so ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. NELSON. Mr. President, I come to the floor for the purpose of making a unanimous consent request with regard to Zika.

I ask unanimous consent that the Senate proceed to the consideration of H.R. 5243, which is at the desk; that all after the enacting clause be stricken; that the substitute amendment, which is the text of the Blunt-Murray amendment to provide $1.1 billion for funding for Zika is agreed to; that the time be 1 hour of debate equally divided between the two leaders or their designees; that upon the use or yielding back of time, the bill, as amended, be read a third time and the Senate vote on passage, as amended, with no intervening action or debate.

The PRESIDING OFFICER. Is there objection?

Mr. MCCONNELL. Mr. President, reserving the right to object, let me just walk through this one more time in case anybody is confused about where we are.

As I said yesterday, Republican Senators are eager to pass the conference report which is before us and send it to the President’s desk for signature. We are not going to the President’s desk today. That would accomplish several important things before we leave for the week. First, it would provide $1.1 billion in immediate funding to combat Zika. That is the exact amount of money in the Democrats’ request. However, the Democrats’ request includes only funding for Zika and leaves the rest of the important priorities behind. The conference report that the House passed includes full funding for Zika, funding for military construction, funding for veterans programs, and temporary but meaningful reforms to ensure that we are able to combat mosquito-borne illnesses during the summer months which we value to you.

We should pass the conference report today—this very day. Therefore, I ask unanimous consent that the Senate proceed to the consideration of the conference report to accompany H.R. 2577 and that the conference report be agreed to with no intervening action or debate.

The PRESIDING OFFICER. Is there objection?

Mr. NELSON. Mr. President, reserving the right to object—first of all, did I hear an objection from the majority leader to my unanimous consent request?

The PRESIDING OFFICER. The majority leader has not yet objected.

Mr. MCCONNELL. Mr. President, I believe I reserved the right to object and then offered an alternative unanimous consent request to which I think the Senator from Florida is about to respond.

Mr. NELSON. Mr. President, reserving the right to object, now here we are in the same old political games. With a much needed bill, MILCON-VA—a very good bill—attaching a Zika bill that is loaded down with poison pills, that takes away family planning funds and also takes money out of the Affordable Care Act. So here again it is the same political games, and for that reason, I object.

The PRESIDING OFFICER. Objection is heard to the majority leader’s request.

Is there objection to the request of the Senator from Florida?

Mr. MCCONNELL. Mr. President, reserving the right to object—and I will be objecting—let me just say to my good friend from Florida that regardless of the substantive arguments he is making, as a practical matter, if we were to repass the Senate bill, it would not achieve the result we are looking for. So I guess who is playing political games is in the eye of the beholder.

If we want to get an outcome, if we want to get $1.1 billion appropriated to combat Zika and do it now, and if we want to fund the military construction bill, the proposal the Senator from Florida is asking for will not achieve that, and therefore, I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Florida.

Mr. NELSON. Mr. President, I would just say to the majority leader that one of the items in his proposal takes money away from Puerto Rico. By seeing the unanimous vote we had—not unanimous—the overwhelming vote last week for the financial assistance to help Puerto Rico. How, out of its financial woes—part of those financial woes is in the health care sector. We know that experts have told us that 20 percent of the population of Puerto Rico is estimated to be infected with the Zika virus by the end of this summer. So there is just one example of why we should not take an approach that is taking money out of the Affordable Care Act and taking money away from family planning, but specifically with regard to its effect upon Puerto Rico.

As I shared with the Senate last week, I represent the State that had 11 new cases of the Zika virus last week. Well, lo and behold, we now have 13 more cases; mine workers in a way that is fair to Federal taxpayers or to the other mine workers in a way that is fair to Federal taxpayers or to the other.

I respect the health care promise this country has made to the miners over many decades. I believe it is important that they, as well as all Americans, have the opportunity to live out their retirement years in financial solvency. But, I also want America to remain financially solvent. I don’t believe the efforts of my colleagues advocating for this United Mine Workers of America bill help the mine workers in a way that is fair to the Federal taxpayers or to the other mine workers in a way that is fair to Federal taxpayers or to the other.

I believe that the substitute amendment, which is at the desk; that all after the enacting clause be stricken; that the substitute amendment, which is the text of the Blunt-Murray amendment to provide $1.1 billion for funding for Zika is agreed to; that the time be 1 hour of debate equally divided between the two leaders or their designees; that upon the use or yielding back of time, the bill, as amended, be read a third time and the Senate vote on passage, as amended, with no intervening action or debate.
Mr. NELSON. Can the Senator ask that again? I cannot hear.

Mr. REID. Is it true that your family came to the State of Florida around the turn of the 19th century?

Mr. NELSON. Through the Chair, Mr. President. The Senator from Florida; is that true?

Mr. NELSON. Yes, my family came to Florida right after Florida was acquired as a territory from Spain.

Mr. REID. Is it true that during your lifetime, you have served in various elected offices in the State of Florida. You were, as I recall, the State treasurer, which included insurance commissioner, and you represented the State of Florida in the House of Representatives; is that true?

Mr. NELSON. Mr. President, that is true.

Mr. REID. And you have been in this body since 2000; is that true?

Mr. NELSON. For 15½ years, that is true.

Mr. REID. Is it also true that during your tenure as a Floridian, you had the good fortune to be an American astronaut?

Mr. NELSON. Not only the good fortune but the great privilege, and now I have the opportunity to work on the policies and the Nation’s space program.

Mr. REID. The point I am trying to outline here for the Senator from Florida, I think, without any stretch of the imagination, that you know the State of Florida pretty well, don’t you?

Mr. NELSON. The good Lord willing, I know it pretty much like the back of my hand.

Mr. REID. And you understand as much, if not more, than anyone else the dangers of these mosquitoes that are ravaging your State and other States and, of course, the American citizens of Puerto Rico; is that true?

Mr. NELSON. Yes, sir. And I know that mosquitoes are all over Florida, but now this one strain of mosquito, the aegypti, for dinner feeds not on one human but on four. If the mosquito has the Zika virus, each of those four would then be infected with the virus after the mosquito has had its dinner.

Mr. REID. And you understand, I ask the Senator from Florida, that for generations of time, mosquitoes have caused all kinds of medical problems for people who are infected from different bites from mosquitoes; is that right?

Mr. NELSON. If you think of the building of the Panama Canal, mosquitoes transmitted malaria. So mosquitoes are a vector which transmits a lot of diseases. This strain of mosquito can lay its larvae in stagnant water contained in something as small as a bottle cap.

Mr. REID. It is true, is it not, that in generations past, mosquitoes have caused death and illness that we have tried to handle for the last 100 years?

Mr. NELSON. That is correct, and we usually had wet emergencies with emergency funding.

Mr. REID. Isn’t it true that this strain of mosquito is now causing, for the first time in history that we know of, not only death and sickness but also causing women to give birth to babies who are very ill?

Mr. NELSON. There is a direct link, I would say, Mr. President, in response to mosquito bites. A pregnant woman being infected with the Zika virus and the probability that she will deliver a child who is deformed.

Mr. REID. Is the Senator aware that what we passed out of here by 89 votes was emergency funding for the State of Florida and the rest of our States and, of course, the citizens of Puerto Rico?

Mr. NELSON. Not only that, but with bipartisan support early on in this whole dialogue. And now we are seeing the resistance of the majority leader to take up the very bill that passed with those overwhelming numbers of bipartisan support.

Mr. REID. And the Senator is aware that what we got back from the House of Representatives, this Bi-partisan Republican Senate signed on to is a bill that is an abomination. Is the Senator aware that what it does, among other things, is it allows the flying of Confederate flags at cemeteries; it takes $513 million from Puerto Rico; it takes money from emergencies we have today with Ebola? Is the Senator aware that they are taking a whack at the Clean Water Act with our inability to spray? Is the Senator aware that there are men who go to Planned Parenthood to handle the problems that women have, including wanting help to not get pregnant? Are you aware that the legislation they sent back to us prevents Planned Parenthood from being involved in this?

Mr. NELSON. It is a political message that is so reviled by the people of America. They want us to get down to the business.

If Senator MCCONNELL had a flood or an emergency, we would all support him with emergency funding to meet that emergency. We have an emergency now. Why are they adding all of these poison pills, such as those the Democratic leader has just enumerated, in this bill?

Mr. President, I think the Senator from Nevada has with his cross-examination exposed exactly what the problem is, and it is too bad. The clock continues to tick. At the end of this week, we will go out. We won’t come back until the day after Labor Day, which is in the first week of September. And all along, the Government of the United States is going to have to figure out how it will get the money to the local mosquito control districts and how it will get the money to the drug companies to continue the R&D to find and produce a vaccine and all the other health-related expenses.

Mr. DURBIN. Will the Senator yield through the Chair for a question?

Mr. NELSON. I certainly will yield to the Senator from Illinois.

Mr. DURBIN. Through the Chair, I would ask the Senator from Florida whether it is true that it has been 5 months since President Obama declared this public health emergency and asked the Congress to respond to that emergency in a timely way. He asked for emergency funding of $1.9 billion for mosquito abatement, for medical research, for expanding lab facilities, and for investing in developing a vaccine to protect Americans, if not this year, next year.

Mr. NELSON. It is true, and not only is it true that the President requested it, but immediately, a whole bunch of us out here filed a bill and brought it to the attention of the Senate, and it is now 5 months later.

Mr. DURBIN. Mr. President, I ask the Senator through the Chair, in dealing with a public health emergency, a public health crisis, the potential of an epidemic that we now think could infect 25 percent of the population of Puerto Rico, is that a timely and important part of the congressional response?

Mr. NELSON. Amen to that, and here we are dithering with these political games. We wonder why the American public is so turned off when they see us going on up here, and here is one of the very best examples of an emergency.

Mr. DURBIN. I ask the Senator—and I see my colleague, Senator MURRAY of Washington, on the floor, who is in a very important position, and she is going to address this issue in a few moments. But is it not true that we worked out a bipartisan compromise in the Senate—not to give $1.9 billion, which, on the Democratic side, is our aspiration, but at least to agree with the Republicans in the Senate to $1.1 billion to respond to the President’s request for an emergency response; and that we passed the bill in the Senate with 89 votes—a bipartisan vote—with an agreement and a compromise in May, and this was sent over to the House of Representatives in May of this year?

Mr. NELSON. Not only is it true, but with 100 Senators, when something passes with 89 votes, that is a pretty strong consensus.

Mr. DURBIN. I would ask the Senator through the Chair—so we have the President identifying a public health emergency and the President telling us—and the CDC as well—that delaying this makes a possibility or probability of an epidemic even worse. We have a response by the Senate, on a bipartisan basis with 89 votes, to provide over $1 billion for the President to get to work to protect America and to develop a vaccine. And is it not true that the House was given this measure with 89 votes and failed to send it back to us on a timely basis?

Mr. NELSON. Not only is that true, those four things, but then the House of Representatives put it on a very good bill, the MILCON appropriations, and they sent it down here thinking that we were going to have to take it at the eleventh hour with all of those poison pills, which include the Confederate flag.
Mr. DURBIN. I ask the Senator from Florida, through the Chair, is it also true that the bill sent to us by the House, after we passed a bipartisan bill with 89 votes, had no Democratic signatures—no House Members of the Democratic Party, signing off on this conference report that was sent over to us—it was a totally Republican conference report?

Mr. NELSON. Not only is that true, but it is also indicative of how ideologically driven and how partisan this measure fell apart or broke down when it ended up in the Republican leadership and responding to it. Is it not true, based on the statements made by the Republican majority leader, Senator MCCONNELL of Kentucky, that he is going to give us one last chance in the next 48 hours to either take this partisan version of the bill, addressing this public health crisis, and do nothing for the next 7 weeks?

Mr. NELSON. That, of course, I say to the Senator from Illinois, is such a poor, poor choice.

Mr. DURBIN. I would ask the Senator from Florida my last question. I know my other colleagues are waiting to ask questions. Your State, the State of Florida, appears to be vulnerable—more vulnerable than most States—because of your proximity to Puerto Rico and other places and the number of travelers coming into the State of Florida from areas where we know for certain that the Zika virus is starting to be manifest. I ask the Senator from Florida: What are you hearing back in your State about the need for a timely, bipartisan effort in Congress to deal with the public health crisis of the Zika virus?

Mr. NELSON. I say to the Senator from Illinois, with 276 cases of infection, with 49 pregnant women that we know of just in the State of Florida, is it any wonder that 5 months ago, when we filed the $1.9 billion request of the administration, my colleague from Florida, my friend who I get along with, the junior Senator, Mr. RUBIO, cosponsored the bill with me.

Mr. DURBIN. Well, I said it was the last question. I will ask one more, if I may, through the Chair. I would ask the Senator from Florida this: So you have Senator RUBIO, a well-known Republican from Florida, and Senator BILL NELSON, maybe the best known Democrat from Florida, agreeing that this is an emergency that needs to be dealt with on a timely basis, that the President’s request for $1.9 billion is a reasonable request, that we pass a bipartisan measure—Senate Democrats and Senate Republicans—and that we are moving toward solving this problem and responding to it. Is it not true that this measure fell apart when it broke down in the Republican-controlled House of Representatives, where they did not take a bipartisan approach to the issue?

Mr. NELSON. Not only is that true, I say to the Senator, but there is the fact that this is an emergency, which has always been dealt with in the history of this Senate as a bipartisan thing to meet the situation of the emergency, and now this has been used—launched—so that to get the appropriations—as a political message and ideological, partisan-driven bill.

Mr. DURBIN. I thank the Senator. Mr. NELSON. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. SCHUMER. Mr. President, I want to thank my colleague from Florida for his leadership on this issue and the Senators from Nevada and Illinois for their great questions illuminating us.

I am just going to sum up here in a minute. If the Republican leader wants to get something done, instead of putting this bill on the floor again, he could put in all these poison pills. Is that leadership? Does that show that the bill he voted for and all we voted for of $1.1 billion. I say something else to you. Mr. President, he is from the minority, he kept saying to us: Leadership means working together.

Well, he is from Florida. We have a crisis. Instead of working together, he is putting a bill on the floor that had no input from our side and that doesn’t do the job and is loaded with poison pills. Is that leadership? Does that show that the House is working together again? He has to take the floor after excuse, delay after delay, and refuse to listen to public health experts and women and families who made it clear that Congress needed to act.

Mr. SCHUMER. Mr. President, I want to thank my colleagues from Florida for their great questions illuminating us. It would have helped to accelerate the development of a vaccine. It would strengthen vector control in communities across the United States and help us to better expand access to desperately needed family planning and other health care services.

Mr. SCHUMER. Mr. President, I ask the Senator from Florida: What are you hearing back in your State about the need for a timely, bipartisan effort in Congress to deal with the public health crisis of the Zika virus?
law, and it would be on its way to communities, as we speak. I am deeply frustrated that has not happened.

This is truly urgent. In fact, just last week, the Puerto Rico Department of Health noted a 40-percent increase in the number of newborns with Zika on the island. So, frankly, it is appalling that given what we know about the impacts of this virus, Republicans would put an ideological, partisan bill in front of us and say: My way is the highroad. That is why today Democrats are here giving Republicans another chance to do the right thing. We are urging them to support women and families instead of the tea party and Heritage Action and join us to get a strong bipartisan emergency funding package to communities at risk because of the Zika virus.

This bill has already passed the Senate, as we know, with 89 votes. Democrats supported it. Most Republicans supported it. So we are here to urge Republicans: Don’t waste another minute. Join us in moving a bipartisan bill forward. Women and families across the country have waited long enough for action on Zika. Let’s not make them wait any longer.

I yield.

The PRESIDING OFFICER. The Senator from New Hampshire.

TRAGEDY IN DALLAS

Ms. AYOTTE. Mr. President, I rise today to offer my thoughts and prayers to the five Dallas police officers and their families who were killed in the line of duty on July 7, 2016. I want to recognize them on the Senate floor for the sacrifices they have made, for their heroic service to protect the people of Dallas, and also to recognize our law enforcement officers for what they do every single day on our behalf.

On July 7, 2016, unfortunately, killed in the line of duty—adding to the rollcall, and whose names will be added to the National Law Enforcement Officers Memorial in Washington—are Sergeant Michael Smith, a former Army Ranger who also served our Nation and who had been with the department since 1989; Senior Corporal Lorne Ahrens, 48, who had been with the department since 2002; Officer Michael Krol, 40, who had been with the department since 2007; Officer Patrick Zamarripa, 32, a former Navy Seal and Iraq war veteran, who had been with the department since 2011; and Officer Michael Smith, 43, a former mariner who had been with the department since 2009. Thompson was the first DART officer who was killed in the line of duty since the department’s inception in 1989.

Having served as attorney general for the State of New Hampshire, we have, unfortunately, been through this with our law enforcement officers in New Hampshire when we lose an officer in the line of duty. This is such a tragedy for the Dallas community, but it is a tragedy for New Hampshire. So, today, we stand with those mourning in Dallas.

We stand with the law enforcement community. We stand with all of those who serve our Nation because they go out every single day when we are home with our families and on holidays.

When we are home late at night, when we are sleeping, they are out in the streets patrolling, keeping us safe. We honor them. We honor the police officers and those who want to do us harm.

So, as we look at what is happening around our Nation, law enforcement is the solution to bringing us together. They work in our communities every single day. I have a single word: Phenomenal.

I want to recognize them on the Senate floor for their families who were killed in the line of New Hampshire. I have been to the Police Athletic League and seen what they are doing with the youth in our community. I have seen the outreach they do every day on this horrible drug epidemic that we are facing in the State of New Hampshire. I have seen the difficult situations they face with those struggling with mental illness—every single challenge they are taking on in our communities.

So, to those five brave officers who gave their lives in the line of duty, and let’s remember all those who have given their lives in the line of duty to keep us safe every single day. Without our brave law enforcement officers, we would not be able to enjoy the freedoms we have and not be able to enjoy our own families and our way of life. So we are grateful to all of those who serve. We stand with you. We thank you for what you do every single day on our behalf.

To your family members, we say to you as well, thank you, because families do serve as well. And when your loved ones go out on our streets to keep us safe, we know you worry about their safe return. So we stand with you as well, and we say thank you for your service and sacrifice to keep the rest of us safe.

Mr. President, I would also like to speak today about a very important piece of legislation called the Comprehensive Addiction and Recovery Act, otherwise known as CARA. I have now been working on this piece of legislation with Senators PORTMAN, WHITEHOUSE, and KLOBUCHAR for about 2 years, and I want to thank them for their leadership on this legislation and their partnership in the work we have done, along with hundreds of coalition groups that have helped us put this legislation together.

CARA passed this body in March by a vote of 94 to 1. Not much passes the Senate. It passed this body by such a wide margin that I believe we will continue to be considering on the Senate floor this week. I rise in support of the conference report for a critical piece of legislation called the Comprehensive Addiction and Recovery Act, otherwise known as CARA. I have now been working on this piece of legislation with Senators PORTMAN, WHITEHOUSE, and KLOBUCHAR for about 2 years, and I thank them for their leadership on this legislation and their partnership in the work we have done with hundreds of coalition groups that have helped us put this legislation together.

CARA passed this body in March by a vote of 94 to 1. Not much passes the Senate with a vote of 94 to 1. Numbers like that speak volumes to the fact that every community is facing a heroin and opioid epidemic right now, and we need to take national action. And after conferring the Senate version with a package of House bills related to opioid abuse, just this past Friday the conference committee submitted the final version of CARA. I want to thank the conferees for their hard work.

Today, I rise in support of this legislation—numbers like 129, the number of people who die each day in this country from a drug overdose; or 248, the number of police and other first responders who have endorsed the final version of CARA because they know it takes the right legislative approach to fighting back against this public health crisis.

That number includes some groups from our home State of New Hampshire whom I have had the honor of working with. I appreciate so much their phenomenal work on the frontlines in helping those struggling with addiction, including HOPE for New Hampshire Recovery; Hope on Haven Hill; the Kingston Lions Club in Kingston, NH; and Project Recovery in Newton, NH. And I know there are many other individuals and groups on the frontlines in New Hampshire who are making a difference.

CARA is also supported by nearly 40 chiefs of police across our State, the New Hampshire Association of Chiefs of Police, and the National Fraternal Order of Police because our law enforcement knows we need a comprehensive response. I have heard so many times from our police officers that we cannot arrest our way out of this public health crisis.

Another number never far from my mind is 439—the number of individuals in my home State of New Hampshire who died from a drug overdose last year. And just this year alone, 2016, 161 have died. So unfortunately we are looking at even greater numbers with what we see happening on the streets of New Hampshire.

I will never forget those numbers because they are so much more than numbers; they are the lives of loved ones we have lost, and they represent the heartbreak felt by too many families.

Every time I am out in New Hampshire, I have another family, unfortunately, whom I meet and who tells me about their story of losing someone they loved or a loved one they are trying to get help for who is struggling with addiction. That is why in this debate we must give a voice to those who no longer have a voice of their own. We must put faces, names, and stories to those we know because it is affecting families and communities all across our country.

I want to share some stories from those in New Hampshire who are driving us to take action. In passing CARA, we are remembering them, and we are honoring them and making a change that can help save lives. We are making sure we have the right legislative framework in place as we push for more funding to get the States to address this epidemic. I am spurred to do this by those who told me: I hope that by sharing this here today, my colleagues will join me in passing this legislation.
I just spoke to a woman yesterday from Plaistow, NH—Kathy. Kathy's son Thomas was a hero in his local community. He was compassionate and caring to his peers and even helped a fellow student who was living alone in the woods to dedicate himself to studying and eventually graduate. He literally went out in the woods to find a homeless student and brought him into his home.

Around 7 years ago, this bright young man became addicted to painkillers. This is a story we hear all too often. He had an injury, he became addicted to painkillers, and his family was shocked at how many pills he was legally prescribed before he turned to something else—heroin.

In fact, the national data shows that four out of five people who turn to heroin actually started with non-prescription drugs. Thomas's life, unfortunately, took a turn for the worse, and he spent time in jail before eventually passing away from an overdose.

When I spoke with Kathy, she told me that more needs to be done to help others struggling with a substance use disorder. She wants to see more resources for early education. She wants to fight back against the stigma associated with addiction.

In having this debate on the Senate floor, that is something we need to turn around—the stigma. This is a public health crisis. This is a disease, and we need to get help for those struggling with addiction.

But Kathy is not alone. A woman in Goffstown wrote to me after losing her brother to a heroin overdose:

From here forward, we will never have another holiday where our family is complete. At Thanksgiving, when our close, loving family gathers, there will be an empty seat where he once sat. An unfilled stocking at Christmas will remind us of the void we feel where he once sat. An unfilled stocking at Christmas will remind us of the void we feel where he once sat. An unfilled stocking at Christmas will remind us of the void we feel where he once sat. An unfilled stocking at Christmas will remind us of the void we feel where he once sat. An unfilled stocking atChristmas will remind us of the void we feel each day. Come his 25th birthday this year, we will visit his grave site where he is buried instead of hugging him in our arms and wishing him another wonderful year.

A father in Brentwood, NH, lost his son to an overdose and told me:

I cannot describe the pain, feeling of helplessness and grave despair [my wife] and I went through upon finding our son dead. This has been a tragedy we in the end were tireless to turn the tide against this epidemic. Earlier this year, I met with families in New Hampshire who actually traveled to Washington to urge Congress to take up and pass CARA. If we don’t act, what kind of message are we sending to these families who need our help and need us to act? That is why we need to pass CARA and we need to ensure this framework is passed.

CARA authorizes resources for treatment, prevention, recovery, and first responders—critical facets of a comprehensive approach. And CARA is an authorizing vehicle. Some have made this argument around here: Why should we pass an authorization vehicle if the funding is not attached? Under that reasoning, we wouldn’t have passed the Violence Against Women Act, we wouldn’t have passed the Head Start Program, we wouldn’t have passed a program for vaccines for children, we wouldn’t have passed the Second Chance Act, and there are so many more. The reality is that in the appropriations bill there have been increases in funding for CARA, and we are going to fight for even more increases in funding. In fact, at the end of the day, the Senate appropriators bills include a 46-percent increase in spending on opioid addiction programs since last year. So we know, but if we don’t pass CARA, then we will do a great disservice to the American people.

President Obama’s Director of the Office of National Drug Policy, Michael Botticelli, told CARA a hearing in New Hampshire last year: “Certainly the CARA Act, I think, highlights many of the issues and fills really critical gaps not only in terms of funding but in terms of policy around this issue.”

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Republican leader.

Mr. MCCONNELL. Mr. President, before the Senator from New Hampshire leaves the floor, I just want to say again what I said previously. We wouldn’t be where we are today on the Comprehensive Addiction and Recovery Act without the Senator from New Hampshire, who made an extraordinary contribution to this early on and played an important leadership role. So on behalf of all Members of the Senate, Republicans and Democrats, I want to thank the Senator from New Hampshire for all she did to bring this forward.

ENERGY POLICY MODERNIZATION ACT OF 2015

Mr. MCCONNELL. Mr. President, I ask the Chair to lay before the Senate the House message accompanying S. 2012.

The Presiding Officer said before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendment to the bill (S. 2012) entitled “An Act to provide for the modernization of the energy policy of the United States, and for other purposes,” and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MCCONNELL. I move that the Senate disagree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators MURKOWSKI, BARRASSO, Risch, CORYN, CANTWELL, WYDEN, and SANDERS.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators MURKOWSKI, BARRASSO, Risch, CORYN, CANTWELL, WYDEN, and SANDERS.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators MURKOWSKI, BARRASSO, Risch, CORYN, CANTWELL, WYDEN, and SANDERS.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators MURKOWSKI, BARRASSO, Risch, CORYN, CANTWELL, WYDEN, and SANDERS.

COMPASSIONATE RE ENTRY ACT OF 2016

Mr. MCCONNELL. Mr. President, I ask the Chair to lay before the Senate the House message accompanying H.R. 5607.

The Presiding Officer said before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendment to the bill (H.R. 5607) entitled “An Act to further the principles of rehabilitation, freedom from the effects of crime, and offenders’ safe and successful reintegration into society by establishing a new area of federal jurisdiction, encouraging state and local efforts to link an offender’s reentry efforts with community services, and for other purposes,” and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators RASCALOVICH, Risch, CORYN, SCHATZ, GRAHAM, HARRIS, AXELROD, CANTWELL, WYDEN, and SANDERS.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators RASCALOVICH, Risch, CORYN, SCHATZ, GRAHAM, HARRIS, AXELROD, CANTWELL, WYDEN, and SANDERS.

Mr. MCCONNELL. I move that the Senate agree to the amendment of the House, agree to the request by the House for a conference, and the Presiding Officer appoint the following conferees: Senators RASCALOVICH, Risch, CORYN, SCHATZ, GRAHAM, HARRIS, AXELROD, CANTWELL, WYDEN, and SANDERS.
move to bring to a close debate on the motion to disagree to the House amendment, agree to the request from the House for a conference, and the Presiding Officer appoint the following Senators—Senator Mar- kowitz, Barraso, Risch, Cornyn, Cantwell, Wyden, and Sanders with respect to S. 2012, an original bill to provide for the moderniza-
tion of the energy policy of the United States, and for other purposes.

Mr. MCCONNELL. I ask unanimous consent that the mandatory quorum call be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCONNELL. I ask unanimous consent that this cloture vote occur at 3:30 p.m. today, with the time from 2:15 p.m. until 2:30 p.m. controlled by Senator Supportive designee; then, that the time from 2:30 p.m. until 3 p.m. be controlled by the majority, and the time from 3 p.m. until 3:30 p.m. be equally divided between the two man-
agers.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The Sen-
ator from Minnesota.

Ms. KLOBUCHAR. Mr. President, I come to the Senate floor today to re-
member those who have been affected by the tragic events in my State and across the country over the last week. I am here today to remember the loss, to share in the grief, and to stand with our community as we seek justice and healing and solutions together.

Last week was a tough week in Min-
nesota. There have been and there will be a lot of bleak moments, when all anyone can do is hug their family and their friends and ask why. How can this happen? How can we make sense of the senseless? How can we go on as peo-
ple and as a community that is hurting so badly?

But amidst all the horror, I also saw hope this weekend. Sunday, I spoke at Pilgrim Baptist Church in St. Paul, as well as Greater Friendship Missionary Baptist Church in Minneapolis. When I looked around that room, I saw the horror, the frustration, the anger, but I also saw the hope. Being there with the grieving members of our community gave me strength because I knew that they supported one another, that their hearts must mend, that the neighbor-
hoods must heal. I literally heard them talk about how the love they had with-
in the walls of that church must go be-
yond the church. We have lost so many this week. What can you say to a mother whose precious baby boy—a 2-year-old—is killed in a drive-by shooting while sit-
ting in his father’s car in north Min-
neapolis? And what do you say to the same mother whose precious other child—the little boy’s baby sister—was also injured by that gunfire?

What can you say to comfort elemen-
tary school children who have suddenly lost that friendly face in the lunch-
room who always gave them a smile, a kind word, a healthy snack? There are no words that can take away the pain of losing someone, a brother, sister, and friend. Philando Castile was beloved—a “gentle soul,” in his mother’s words. He loved the kids at his school, and they loved “Mr. Phil” right back. He knew all the kids’ names. There were more than 365 students who had allergies and who might need a little extra help. And, yes, with a little playful nagging, he got them to eat their vegetables. In short, he cared about them, and he let them know it. Everyone knew it. My State’s out-
pouring of grief, especially from his school, and the love and support in the wake of his loss means something.

The loss of that little 2-year-old is also 500 of them. He learned who they loved “Mr. Phil” right back. He loved the kids at his school, and the love and support in the wake of his loss means something.

The loss of that little 2-year-old is also the children who weeps about them, and he let them know it. Everyone knew it. My State’s out-
pouring of grief, especially from his school, and the love and support in the wake of his loss means something.

Second, we must fight for a criminal justice system that works for every-
one. We all know people who have been caught up in a criminal justice system that can be harsh and unfair. It can do the right thing and it can protect vic-
tims, but it can also destroy individual people and it can tear apart. That is why we must pass criminal jus-
tice reform. I have long supported im-
portant policy changes. My State was one of the first that videotaped interro-
gations, and that ended up being a good thing, not only for the defendants but actually for our police officers and those seeking convictions. I have sup-
ported reforms to the eyewitness proc-
ess. I have supported body cameras, di-
versity in hiring, law enforcement re-
sources and training—very important as we go ahead and look at what we should be focused on in the next year—
and meaningful, meaningful work be-
tween law enforcement and our citi-
zens.

What else do we need? In my mind, we need commonsense gun reform. I was proud to join my colleagues on the Senate floor demanding changes to make our communities safer. One of those changes, in addition to the terror watch list bill, was to make sure we find some kind of consensus on improving background checks. The Senate’s failure to pass bipartisan background check legislation has been a big dis-
appointment. Here we had two A-rated NRA Senators that came together. Senator TOOMEY as well as Senator MANCHIN came up with a bill that would have closed some loopholes that would have made it safer. We know that States that have back-
ground checks in place have reduced rates of suicides by guns, and they also have reduced rates of domestic homici-
des. I still remember those Sandy Hook parents in my office advocating for that change in the bill. They knew that wouldn’t have saved their babies, but they also knew of the things that could best save lives going forward and could best bring consensus in this Chamber.

From my time as county attorney, I remember those little children lost to vio-
ence.

Byron Phillips was a little boy killed on his north Minneapolis front porch. We had to put up billboards in the com-
munity saying: If you know who killed me, come forward. Eventually, it worked, and we put the guy in jail.

Tyesha Edwards was killed by a bu-
let while doing her homework at her kitchen table. Her mom said: Get your homework done, and you can go out with us to the mall. That is how she died. Again, we put the guy that did it in jail, but that is not compensation for what happened to that family.

Americans from across the Nation and across the political spectrum sup-
port commonsense proposals. They sup-
port closing the loophole at gun shows by wide margins. In honor of those we have lost in Charleston and Orlando,
San Bernardino, Newtown, Aurora, north Minneapolis, and cities across the Nation, I will continue to stand with my colleagues until we take action on these commonsense measures. I am reminded of President Obama’s beautiful words about losing more Americans to gun violence—this time in Charleston, SC. He said this:

For too long, we’ve been blind to the unique mayhem that gun violence inflicts upon this nation. Sporadically, our eyes are open: When eight of our brothers and sisters are cut down in a church basement, 12 in a movie theater in Colorado, 17 in an elementary school. But I hope we also see the 30 precious lives cut short by gun violence in this country every single day; the countless more whose lives are forever changed—the survivors crippled, the children traumatized and fearful every day as they walk to school, the husband who will never feel his wife’s warm touch, the entire communities whose grief overflows every time they have to watch what happened to them happen to some other place.

My friends, we must stem the tide. But we also know that justice in our laws—which means the criminal justice reform that I noted earlier, which means commonsense gun reforms, which means making sure that these cases are investigated and the law is followed no matter what the victims’ race or ethnic background or how much money they have—must happen to bring justice to these families. But the other part of this, as I look at our neighborhoods that are affected every single day, is economic justice. In the famous words of Dr. Martin Luther King:

We know that it isn’t enough to integrate lunch counters. What does it profit a man to be able to eat at an integrated lunch counter if he doesn’t earn enough money to buy a hamburger and a cup of coffee?

When we see lingering disparities—and “lingering” is kind of a nerdy word for walking about out here—When we see these disparities of economics, when we see health disparities, when we see far too many families working so hard but still struggling to get ahead, and stubborn achievement gaps in our schools, we know there is so much more work to do. The solutions here are a deep commitment to an economic future for the people that live in our cities, to make sure they have access to the jobs that are starting to open up all over this country, that they are trained—that we look at what is happening in their schools and make sure that the training they get matches jobs that are open. We have jobs all over our State now in technology, in science, in manufacturing and this is giving those kids hope—not just in community colleges and regular colleges, not just in high school, but in middle school—that they are going to be able to get one of these jobs. That is economic hope. It is about training our kids, keeping them in school, getting the doors open for businesses, big and small, to people of neighborhoods like the one that I was in yesterday in St. Paul.

Finally, we must all work to protect the innocents among us. That is what I started talking about—how we must convict the guilty and protect the innocent, especially our children. Two-year-olds should not be shot and killed on the streets of north Minneapolis. Four-year-olds shouldn’t watch a man die in the car seat right in front of them. Nobody should have to explain to a classroom of children why their beloved friend “Mr. Phil” doesn’t feed them lunch anymore. We are better than this.

I recently visited a mosque in Minneapolis and heard the story of a Muslim family who had gone out to eat at a restaurant—two parents, two kids. The parents, by the way, had been through 9/11 and understood what had happened then but have been able to live in our community, where we have the largest Somali population in our country, without a lot of discrimination, without a lot of hateful words directed at them. They were in the restaurant with their little kids, and a guy walked by and said: You four go home. You go home to where you came from.

The little girl looked up at her mom and said, “I don’t want to go home. You said we could eat dinner out tonight. I don’t want to go home and eat dinner.”

Those are the innocent words of a child. As sweet and funny as it is, it is disturbing that in the other America, in the other home, her words are the truth. She didn’t even know what that guy was talking about because she knows no other home, because Minnesota is her home, because the United States of America is her home.

America is better than angry words directed at strangers in a restaurant. America is better than babies being shot on the street in broad daylight. America is better than Philando Castile losing his life. And America is better that because of the efforts of two police officers in St. Paul and five Dallas cops being taken from their beat forever.

So I am here today to stand with the people who are not satisfied with how things are—the people who are ready to work to make things better, the people who are the heroes and the peace-makers. Together, we can make this world a better place, and more just.

Mr. President, I yield the floor.

Mr. HATCH. Mr. President, the Senate will soon vote on the conference report for the Comprehensive Addiction and Recovery Act. The importance of this bill cannot be overstated. People are dying, families are suffering, communities are being torn apart. We can help, but we must do so now.

I urge my colleagues to vote in favor of this legislation, which passed in the House last week with only five votes in opposition. The bill is intended to address the growing national crisis with regard to opioid abuse and addiction.

The staggering statistics surrounding this issue are well known and are worth repeating. Every day, approximately 7,000 people show up in an emergency room for problems associated with opioid abuse. Every 30 minutes, on average, someone in our country overdoses from conditions that are opioid related.

My home State of Utah has been particularly hard hit. In 2014, 289 Utahans died due to opioid abuse. That is more than half of all drug overdose related deaths in the State. The CARA conference report represents a thoughtful set of policies that tackle the problems experienced by the real people—with families, children, and friends—who are represented by these statistics. A letter signed by over 200 advocacy organizations supporting the conference report states that the report addresses the “six pillars” of a comprehensive response to drug addiction crises. These pillars are prevention, treatment, recovery support, criminal justice reform, overdose reversal, and law enforcement.

I am proud of the role I played in not only supporting the CARA effort but in helping to shape the conference report. As chairman of the Senate Appropriations Committee, it was important to me that the report include key improvements for Medicare in the fight against opioid abuse. I am glad to say we were successful in that regard. The legislation contained in the conference report directs health plans to identify only one physician to prescribe and one pharmacy to fill all of an at-risk patient’s opioid prescriptions.

Additionally, the conference report contains significant provisions related to medication-assisted treatment, or MAT, which has long been a priority for me. I have a long history of working to improve access to drugs like buprenorphine as a prescription treatment for opioid-use disorders, including heroin and prescription drug addiction.

I was the author, together with Senators Levin and Biden of the DATA 2000 law that first made it possible for patients to be prescribed buprenorphine. I would also like to note that colleagues like Senators Markey and Paul have always been very able champions of the CARA effort to expand access to this effective drug treatment, including the introduction of legislation and our push to get the administration to use its regulatory authority to address this need.

Our efforts helped to encourage the drafting of an HHS rule that was finalized on July 6, the same day as the CARA conference meeting. This rule
raises an individual doctor’s patient cap for buprenorphine from 100 patients to 275 patients. Thanks to these combined administrative and legislative efforts, patients will have greater access to the medication-assisted treatment they need in their recovery from substance dependence.

I am pleased, as well, to see provisions included in this legislation that encourage the National Institutes of Health to intensify fundamental, translational, and clinical research on the use of medications to treat opioid addiction. The hope is that this kind of research will lead to alternatives to opioids for effective pain treatment. These few lines within the legislation will have a significant influence on our understanding of how opioid abuse and chronic pain impact our families and communities.

Another set of highlights in the conference report are the provisions designed to protect infants born to mothers suffering from opioid addiction. Roughly, that, between 2009 and 2012, more than 100 babies each year tested positive for illicit drugs at birth. Once enacted, CARA will strengthen the existing plan of safe care for infants born and identified as affected by substance abuse withdrawal symptoms, as well as fetal alcohol spectrum disorder. Hopefully, this will be an effective step to address what is a tragic problem for too many American children.

My home State is not spared from this heartbreaking problem. A recent Utah Department of Health update indicated that, between 2009 and 2012, more than 100 babies each year tested positive for illicit drugs at birth. Once enacted, CARA will strengthen the existing plan of safe care for infants born and identified as affected by substance abuse withdrawal symptoms, as well as fetal alcohol spectrum disorder. Hopefully, this will be an effective step to address what is a tragic problem for too many American children.

As you can see, these issues are those that have been in need of sensible solutions for some time. As such, I wish to emphasize that the process that has brought us here to the precipice of passing CARA is nearly as impressive as the research itself. That is, roughly 3 minutes to shepherd this effort to the Senate floor, where Senators were able to offer amendments. The Senate passed the amended version by a vote of 94 to 1.

A similar process played out in the House, with the House passing its opioid package by a vote of 400 to 5. I was pleased to serve on the conference committee that produced what should be part of this report legislation. There were many similarities between the House and Senate bills, and we were able to resolve our few differences in a way that produced an improved CARA bill.

I want to commend Representative Fred Upton, the chairman of the House Energy and Commerce Committee—he is a great friend of mine—who was instrumental to the House effort and who also very ably chaired the conference committee. Fred Upton is the very definition of a consensus builder, as are the others that I mentioned.

As I alluded to earlier, the House passed the conference report this past Friday by a vote of 407 to 5. In other words, over the past several months, more than 400 votes in the House and Senate of the two congressional Chambers, and the support has been overwhelming. Counting every vote collectively, the bill has received around 900 yea votes in Congress and less than a dozen nays. Do you know that the two votes in opposition have been cast by a Democrat? One. A single House Democrat voted against passage of the original House opioid package. Every voting Democrat in the Senate voted in favor of our version of the bill. I commend them for that.

Last week, every House Democrat who was present voted in favor of the conference report. I commend them for that. I note these facts not to unduly inflame partisan debate but because we have heard rumbles that a number of Senate Democrats may want to hold up the process in order to extract more concessions. Some have actually suggested that, despite regular order and the overwhelmingly bipartisan support this legislation has enjoyed thus far, Senate passage of the CARA conference report is in doubt. I find this hard to believe, and I hope it is not true.

A few weeks ago, the White House urged Democrats in Congress to “slow down” the effort to finalize an opioid package. Thankfully, this was met appropriately with outrage. All of us, Republicans and Democrats, now have a tremendous opportunity to give vital assistance to many Americans in need and to do so with, hopefully, an almost unanimous voice. These days, we don’t often get to do that around here. We should not let partisan politics get in the way of this pressing issue.

I want to commend Representative Betty McCollum, whose amendment to this bill was agreed to, and her sincere belief is she would not be able alive today if it weren’t for the weapon that was on her person.
I support the Second Amendment, and I accept that the Supreme Court has made it clear that this amendment protects the ability of anyone to buy a weapon for self-defense, subject to certain common sense limitations. But if you are buying a weapon because you think it’s likely you will be mugged and you less likely to be killed by a gun, then you are wrong. If you are standing in the way of policies that crack down on illegal or dangerous weapons on our street because you believe in some kind of gun ownership that you think is more than likely to stop bad guys with guns—then you have it backwards because that is not how it works.

You know how I know this? Because study after study tells us that owning a gun makes you more likely to be killed by that gun than to use it to kill someone who threatens you. Studies show that in countries and States with more guns, there are generally not less gun deaths. There are more gun deaths. The study in the New England Journal of Medicine that showed a gun in your house doesn’t make you less likely to be killed. It isn’t even risk neutral. Having a gun in your home actually increases your chance of getting killed by a gun by anywhere from 40 percent to 170 percent.

How about the study in the American Journal of Epidemiology that showed that people living in a house with a gun are more likely to die from a homicide than a person who lives in a house without a gun.

What about the study from the Violence Policy Center that showed that instances of guns being used in self-defense are so rare that on average there are 44 criminal homicides with guns for every time a gun is used for protection in a justifiable homicide.

How about one more study. The Harvard Injury Control Research Center study in States and communities with greater gun availability, gun homicide rates were higher, not lower, than in communities and States with lower gun availability. It is your decision whether or not to buy a gun. There are certainly instances where it may make sense, and I don’t begrudge the individual who makes that decision, but the data tells us only one story. The actual real, live experience of living in a nation awash in guns shows us to the gun lobby sloganeering, the opposite of their claim is actually true. The more good guys there are who have guns, the more good guys die from guns. We have no clear or more horrifying example of this truth than last weekend in Dallas. When Connecticut implemented a gun law requiring a permit to be issued before a gun could be bought, gun homicides dropped by 40 percent. In States that require background checks for private handgun sales—listen to this—48 percent fewer law enforcement officers are shot to death by handguns, and in States with universal background checks, 46 percent less likely to be shot by their intimate partner than in States without universal checks.

This isn’t conjecture. Good laws save lives. Concentrate on passing laws that keep dangerous weapons out of the hands of criminals and killers, and you will save lives. Load up your streets, schools, and shopping malls with weapons and just hope that the good guys will be the ones to use them against the bad guys, and people will be killed.

People across this country have figured it out, and that is why they support expanded background checks by an astounding ratio of 90 percent to 10 percent. There is no gun lobby to try in this country that is supported by 90 percent of Americans. They know that smart firearms laws save lives, and so they support universal background checks by a ratio of 9 to 1. It is also why there are fewer and fewer American families buying guns. It makes sense for some people, and I am not denying that. A new CBS News poll shows that gun ownership is at a near 40-year low with only 30 percent of Americans reporting that they own a gun. That is down 17 points from its highest rate in 1994 and down a whopping 10 points from just 4 years ago, but be forewarned, this development will simply propel the gun lobby to be even bolder in spreading its lies about the effects of gun ownership.

Just two weeks ago the head of the NRA went on national TV and told Americans that the only way to protect themselves from terrorism is to have a personal defense plan. That makes no sense. If you didn’t parse his words, to go out and buy a gun from a gun company and help the industry stem this tide of declining gun ownership all in the name of collective self-defense. Well, it is a lie. Good guys with guns generally don’t stop bad guys with guns. They didn’t in Dallas. Good laws that keep illegal and dangerous weapons off of our streets, that make sure that only law-abiding, peaceful citizens are obtaining weapons—those laws stop bad guys. When you strip away all of the rhetoric driven by the gun industry profit motivations, that is the truth.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. THUNE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THUNE. Mr. President, I ask unanimous consent to complete my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAA REAUTHORIZATION BILL

Mr. THUNE. Mr. President, over the past 4 months, the Islamic State has carried out two deadly terrorist attacks at airports. Taken together, these attacks are a dire warning that our nation’s transportation infrastructure is not prepared to face the threats that face us today. The one in Brussels followed by the one at Istanbul’s Ataturk Airport—and one at Istanbul’s Ataturk Airport—resulted in more than 500 injuries and more than 70 deaths.
Since September 11, airport security efforts have emphasized securing aircraft against hijackings, but the Brussels and Istanbul bombings highlight other airport security vulnerabilities. As these attacks demonstrate, it is not just planes that are vulnerable abroad; the Brussels and Istanbul attacks sought to exploit the largely unprotected areas outside the principal security checkpoints where the attackers could detonate bombs outside of screening. The large crowds of people who congregate near unsecured areas of an airport—like security checkpoints, check-in counters, and baggage claim—make appealing targets for terrorists who like nothing better than maximum loss of life with minimum effort.

This week, the Senate will take up the Federal Aviation Administration reauthorization bill, which will directly address the vulnerabilities exposed by these attacks. It will ensure that attacks like those that happened in Brussels and Istanbul don’t happen at American airports.

While this bill has gained new urgency in the wake of the bombings in Brussels and Istanbul, the reforms in this bill are not a hasty response to these attacks. They are the product of months of Commerce Committee oversight of our Nation’s transportation safety agencies and extensive Commerce Committee analysis of airport security vulnerabilities.

I am proud that the bill we are considering today is the most significant airport security reform bill that Congress has considered in a decade. As I have already mentioned, one problem that the Brussels and Istanbul attacks highlighted in great detail is the tempting terrorist target offered by large crowds of people in unsecured areas of airports. The FAA bill addresses that problem in a number of ways. For starters, this bill includes provisions that will bar Americans who have already been vetted by the TSA’s PreCheck program. Expanding enrollment in PreCheck will reduce wait times at security, which will help reduce the size of crowds waiting in unsecured areas.

The bill also directs the TSA to more effectively deploy its personnel during high-volume travel times to speed up wait time at checkpoints. It also requires the TSA to develop and test new security systems that expedite the movement of passengers through security. Another important measure we can take to prevent attacks like those in Brussels and Istanbul is increasing the security presence in unsecured areas of airports.

The FAA bill adds more prevention and response security teams, which often include K-9 units, and expands training for local airport security personnel so the airports are better able to deter or respond to bombers or active shooter threats. Increasing security at America’s airports and expediting security checks will go a long way toward preventing terrorist attacks, but threats at U.S. airports are not only threats facing U.S. airline passengers. Americans travel internationally on a regular basis, and on their return flights they depend on the quality of airport security in other countries. Part of protecting the traveling American, this bill will help ensure that Americans traveling to other countries are safe when they return to the United States.

To increase security for travelers abroad, this bill will require the TSA to donate unneeded screening equipment to foreign airports with direct flights to the United States. It will strengthen cooperation between U.S. security officials and similar officials in other countries and authorize the TSA to support training for foreign airport security personnel. It requires the TSA to conduct assessments of security that have received less attention in the past in the areas of airline pilots, and foreign cargo security programs.

Another aspect of airport security that has received less attention but is equally important is the need to make sure that the workforce behind the scenes at airports don’t pose a threat. In October of 2015, terrorists killed 224 people when they brought down Russian Metrojet flight 9268 shortly after it departed Sharm el-Sheikh airport in Egypt. Many experts believe that the terrorists responsible had help from an airport worker. Ensuring that airport workers are trustworthy is essential to keeping passengers safe. However, at times the security officials who allow individuals to work behind the scenes at airports have been issued to individuals who have no business holding them. Right now in the United States, with convictions for crimes, including embezzlement, sabotage, racketeering, immigration violations, and assault with a deadly weapon can all obtain security badges granting them access to restricted sections of an airport.

While most criminals are not terrorists, there are criminals who, for the right price, would happily expand their criminal activities even if it involved assisting terrorists. In fact, in March of this year, an airline ramp agent was arrested in a Florida airport with $20,000 in cash that he allegedly intended to hand off to an unknown individual. News reports indicated that he was aware the money was connected to illegal activity but knew little else. In other words, he could easily have been transported to terrorists without being any the wiser.

The FAA bill that we will pass this week tightens vetting of anyone with access to secure areas of an airport and expands the list of criminal convictions that could disqualify someone from holding a security badge. This bill also provides for an increase in random searches of behind-the-scenes airport workers who are not always subject to security screening the way passengers are.

I am very proud of everything this FAA bill achieves in terms of security, but threats at U.S. airports are still a very real threat. This is the most comprehensive airport security package in a decade, and it will help us make real progress toward keeping airline passengers safer, and that is not all.

In addition to its robust security provisions, this bill includes a number of other important measures, among them new consumer protections. For example, this legislation will require airlines to refund package fees for lost or unreasonably delayed baggage. Passengers have to travel a ton of time tracking down a refund when the airline doesn’t deliver. It will also make sure airlines have policies that will help families traveling with children sit together on flights. It also takes steps to improve air travel for individuals with disabilities, and it ensures that Americans in rural areas will continue to have access to reliable air service.

The bill also takes measures to support the general aviation community. It streamlines the replacement of the third-class medical certificate for non-commercial pilots so private pilots don’t face unnecessary bureaucracy when obtaining their medical qualification, and to reduce the risk of accidents caused by low-altitude fliers like those that have been transporting money to terrorists. This bill also puts in place a number of non-miss collisions by airline pilots. It will also deter drone operators from interfering with emergency response efforts like wildfire suppression, and, in addition to fostering drone safety, this bill authorizes expanded research opportunities and operations that will further the integration of drones into our Nation’s airspace.

Since we took control of the Senate in January of 2015, Republicans have focused on passing legislation to address the challenges facing the American people in our country. I am proud that with this bill, we have found a way to make our increasingly dangerous world a little safer for Americans. I am grateful to my colleagues who contributed to this bill, particularly my Democratic counterpart in the conference committee, Senator Nelson.

Senator Ayotte also led numerous subcommittee hearings in the Aviation Subcommittee to get the bill on a path to success, and both of us appreciate the contributions of Senator Cantwell, our Aviation Subcommittee ranking member.

This bill is an example of what can happen when Democrats and Republicans work together to get things done for the American people. I look forward to working with my colleagues to ensure that the Senate passes this bill with the strong bipartisan support it deserves.
to sending our legislation to the Presi-
dent for his signature later this week.

UNITED STATES APPRECIATION FOR OLYMPIANS
AND PARALYMPIANS BILL

Mr. President, I also wish to speak for
just a moment, if I can today, about a
bill that hopefully will pass the Sen-
ate later today.

In just a few weeks, our Olympic ath-
letes will head to Rio de Janeiro, Brazil, for the 2016 Olympic games. The
following month, America’s Paralympic athletes will compete in the 2016 Paralympic games. These ath-
letes represent what is best about our country. They embody the timeless values of hard work, dedication, and
sportsmanship.

Our Olympic and Paralympic ath-
letes—and their families—have made
innumerable sacrifices over the many
years of training it takes to become a
world-class competitor. Training is not
cheap, and the vast majority of our
amateur athletes put it all on the line
without the help of sponsors or en-
dorsement deals to subsidize their ex-
enses.

Many of these athletes have spent
virtually their entire lives training for
this moment, and I have absolutely no
doubt that young men and women will
represent our Nation with great honor
and distinction.

America’s Olympic and Paralympic
medal winners, in particular, will be
greeted with much enthusiasm and
great appreciation upon their return.
Local communities across America will
find ways to honor their returning
township heroes. Unfortunately, one
of the ways the Federal Government
will welcome home our Olympic and
Paralympic champions is by greating
them with a new tax bill. That is right.
The Internal Revenue Service considers
these medals to be income and will tax
the value of any gold, silver, or bronze
medal awarded in competition as well
as any incentive award our athletes re-
ceive from the U.S. Olympic Com-
mittee.

I believe this tax penalty on our
Olympic heroes is wrong, and that is
why earlier this year I introduced S.
2650, the United States Appreciation
for Olympians and Paralympians Act.

This legislation—introduced with
Senators SCHUMER, GARDNER, GILLI-
BRAND, and ISAKSON—would ensure that
Senators S. CHUMER, G ARDNER, G ILLI-
2650, the United States Appreciation
why earlier this year I introduced S.

Most countries not only compensate
their athletes but also subsidize their
training expenses with taxpayer dol-
ars. Our athletes make considerable fi-
nancial sacrifices to train for the
Olympics and Paralympics and as ama-
eurs receive no compensation for their
time. At a very least we can do is ens-
ure they don’t receive a tax penalty
when they successfully represent our
Nation in the highest level of athletic
competition.

Simply put, when it comes to our vic-
torious Olympic and Paralympic ath-
letes, we should celebrate their
achievements rather than tax their
success.

CONGRATULATING PAIGE MCPHERSON

Mr. President, I would also like to
take this opportunity to extend my
congratulations and best wishes to one
of Team USA’s stars: that is, South Dakota’s own Paige McPherson.

Paige grew up in Sturgis, SD, gradu-
ating from Black Hills Classical
Christian Academy in 2009. She will be
competing in Taekwondo at the Rio
games and will be striving for her sec-
ond medal in a row, after claiming a
medal at the London Olympic Games in
2012.

I know Paige will represent Amer-
ica—and South Dakota—with great dis-
tinction next month, as will all of our
Olympic and Paralympic competitors.

I wish to thank the original cospon-
sors of my legislation, whom I men-
tioned earlier, as well as Finance Com-
mittee Chairman HATCH and Senators
SULLIVAN and MORAN for their support.

I look forward to seeing our legislation
enacted into law this year, and I wish
all of our Olympians and Paralympians
the very best of luck in Rio.

Mr. President, I yield the floor.

RECESS

The PRESIDING OFFICER. Under
the previous order, the Senate stands
in recess until 2:15 p.m.

Thereupon, the Senate, at 12:53 p.m.,
recessed until 2:15 p.m. and reassem-
bled when called to order by the Pre-
siding Officer (Mr. PORTMAN).

ENERGY POLICY MODERNIZATION
ACT OF 2015—Continued

The PRESIDING OFFICER. Under
the previous order, the time until 2:30
p.m. will be controlled by the Senator
from California, Mrs. BOXER, or her
designee; the time from 2:30 p.m. to 3
p.m. will be controlled by the majority;
and the time from 3 p.m. to 3:30 p.m.
will be controlled by the two managers.

The Senator from California

Mrs. BOXER. Mr. President, I ask
unanimous consent that I be permitted
to speak for 15 minutes.

The President pro tempore of the Senate presides over the Senate and is the presiding officer of the chamber. The Senate was not in session on this date, so the Presiding Officer (Mr. PORTMAN) conducted the session in their absence. The Energy Policy Modernization Act of 2015 was discussed, and an amendment to a bill related to Olympic and Paralympic athletes was introduced. The Senate was expected to vote on the legislation later.
believe cigarettes are hazardous; we don’t accept that.”

In 1988, a lobbyist from the Tobacco Institute submitted written testimony for a congressional hearing stating: “In sum, there is no medical or scientific basis for viewing cigarette smoking as an ‘addiction.’ The effort to disparage cigarette smoking as an ‘addiction’ can only detract from our society’s attempt to meet its serious drug problem. That was what the cigarette companies said.

At congressional hearings in 1994, executives from the seven biggest tobacco companies testified that they believed nicotine was not addictive. Do you remember the picture of them swearing to that fact?

A tobacco industry doctor said: “The proposed addiction warning and the assumption upon which it is founded are based neither in science nor fact and will smoking dropped from 43 percent in 1964 to 15 percent in 2015. To anybody out there who is still addicted, I pray God that they will get help. There are very few things where we know the cause and effect. We know the identity of the funders and was called The fossil fuel industry took a page out of the tobacco company’s playbook, funding a network of organizations that create a false sense of uncertainty. So let me tell you that I have joined my colleagues on a resolution condemning the effort by the fossil fuel industry to discredit climate science. Just as the tobacco industry worked to discredit science that proved tobacco causes cancer.

I want to work with my colleagues to call attention to this web of denial. There are organizations out there—

Investigative reporting has clearly shown that those who led the fight against health warnings on tobacco have been involved in the climate denial movement from the beginning. Just as Big Tobacco denied that smoking was dangerous to people’s health, Big Oil and other special interests have tried to undermine scientists’ warnings about harmful climate pollution by claiming that climate change does not exist.

So we had Big Tobacco spreading the big lie that smoking was non-addictive—they even said at one point that it was good for you—and Big Oil telling us that there is no climate change, that it is a hoax. But if we look at the 97 percent of scientists, what have they told us we are going to see? Higher temperatures, more extreme weather, severe droughts, increased wildfires, increasing precipitation, and rising sea levels. That is what 97 percent of the scientists said would happen. Guess what. It is happening.

Don’t take my word for it. Let me give specifics. Mr. President, 2015 was the hottest year on record. Every month of this year continues to set records. Sea levels are rising many times faster than they have in the last 2,800 years. The 2015 wildfire season in California cost $17 billion. My, what a home State, is suffering from its worst drought in modern history, and scientists are predicting megadroughts. Rising temperatures are expected to worsen air quality and threaten public health.

The American public sees what is happening, and they understand the need to act. Seventy-one percent of Americans supported the historic Paris agreement to address climate change by reducing harmful carbon pollution.

A March 2016 Gallup Poll shows that 64 percent of Americans—the highest percentage since 2008—are worried about climate change. Gallup also found that between 2009 and 2015, in public concern about climate change was linked to a well-publicized campaign of misinformation about climate science.

The fossil fuel industry took a page out of the tobacco company’s playbook, funding a network of organizations that create a false sense of uncertainty. So let me tell you that I have joined my colleagues on a resolution condemning the effort by the fossil fuel industry to discredit climate science. Just as the tobacco industry worked to discredit science that proved tobacco causes cancer.

I want to work with my colleagues to call attention to this web of denial. There are organizations out there—

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE APPROPRIATIONS BILL

Mr. SULLIVAN. Mr. President, last week we had a lot going on in terms of national security and foreign policy facing our country and, most importantly, facing our troops, facing our military. The President, the Secretary of Defense, the top leaders in the military were asking a lot of our troops in 1 week. Let me just give you a little example of that.

Just yesterday, Secretary of Defense Ash Carter announced, from where he is in Iraq, that the United States will be deploying 560 more troops to Iraq in our fight against ISIS. Make no doubt about it, the White House might spin what we are doing over there, but our troops are definitely in combat, fighting to protect us.

At the NATO summit on Friday, President Obama announced that the United States will be deploying an additional 1,000 troops and a separate brigade headquarters to Poland. A lot of us—I think bipartisan—support what is going on at the NATO summit and congratulate the President for a successful summit.

On Wednesday, the President announced he plans to leave 8,400 American troops in Afghanistan—more than he originally planned, a number that a lot of us had been advocating for, maybe even more—to combat the Taliban; again, our troops in action.

On Saturday, we learned that North Korea launched a submarine ballistic missile off the coast of the eastern part of the country. Over the weekend, the Wall Street Journal reported that even after reaching the Iran nuclear deal, the Iranians continue to try to illegally procure nuclear equipment from Germany. Finally, just today, there was an important ruling from The Hague stating that there is no Goose is going on in the South China Sea, in keeping sealanes open where we just recently had two carrier battle groups—two U.S. carrier battle groups, thousands of sailors in that part of the world.

So what did the Senate do with regard to all the activities facing our troops? What did the Senate do to support these troops whom the President and the Secretary of Defense are asking to do, a lot of Americans did not see it, but in the late night, on Thursday night, led by the minority leader, unfortunately our colleagues on the other side of the aisle filibustered defense spending, filibustered the Defense appropriations bill.

This is not the first time that has happened. Indeed, that is the bill the other side seems to like to target. Amazingly, they like to target funding for our troops and our military. That is not the first time. It is not the second time. It is not the third time. It is the fourth time, inside of a year, our colleagues on the other side of the aisle filibustered funding our troops, at a time when national security challenges and what we are asking our military to do are at an all-time high.

What I want to do with my colleagues is talk about this, try to let the American people know this is not what we should be doing. Perhaps the media will talk about this and highlight this a little bit more because we are going to vote again on this appropriations bill, which, by the way, came out of committee unanimously. The Democrats on the committee voted for it.

Yet, somehow, when it comes to the floor, they are going to do another filibuster. They did it last Thursday. It is our hope—and one of the reasons we are on the floor right now—to convince our colleagues to change their ways. I am sure they don’t want to have to go home after recess and have to explain to their constituents why they voted not once, not twice, not three times, not four times but five times to filibuster spending for our troops. I hope they don’t have to do that. We are going to vote on that again this week.

I am honored to be on the floor with some distinguished Members of the Senate, some of the Members of the Senate who know a little bit about what she is talking about when it comes to the U.S. military, with 23 years of military service, having just retired as a lieutenant colonel in the Iowa National Guard. I am honored to have her open up and say some words about something that is remarkable that is going on, on the Senate floor—filibustering the spending for our troops at this dangerous time.

It is not what we should be doing. Our colleagues know it. I guarantee you the American people know it. If you ask people, Democratic or Republican: Should we be funding our troops at this point? The answer, clearly, in every State and every part of the country, would be yes.

Senator ERNST.

Mrs. ERNST. I say thank you to Senator SULLIVAN, the distinguished Senator from Alaska. Thank you for your passion as well. You have served in the Marines, in the Marine Reserves. I thank you for that, for your dedication and your commitment to our United States of America through your service as a marine and now through your service in the Senate.

We are also joined by the Senators from Montana and from North Carolina. I would like to thank my colleagues for joining in a coloquy. The filibuster we have seen on the other side of the aisle sends a message to our troops that we don’t care about their security, and we don’t care about the Nation’s security. We must fund our troops, at a time when, as you stated, the world is virtually imploding.

We see going on all around the globe, whether it is from North Africa into Iraq, Syria, North Korea, China, Iran, Afghanistan. We could go on and on, where our troops are needed for safety and security, where they are needed to keep the fight away from our homeland.

So I thank everyone who is joining in today. I appreciate the thoughts we will be sharing with our constituents and with the audience we have. Hopefully, we will see this projected nationwide, with an outcry of outrage that the Democrats are blocking—are daring to block funding for our national security.

This is a bipartisan bill—a bipartisan bill. The Senate version cleared out of our Senate Appropriations Committee by a vote of 30 to 0, Democrats and Republicans. We came together, bipartisan, 30 to 0.

In total, this bill appropriates $515.9 billion for our national security. Some $300 million of this is funding for the National Guard, a critical arm to the United States; our colleagues block and where I ended my 23-plus-year career last November in the Iowa Army National Guard.

In fact, my old unit, the battalion I commanded in the Iowa Army National Guard, that battalion headquarters is currently forward-deployed. So the men and women I served alongside, they are out there protecting our freedoms. They are out there securing an area far away from home. They are doing it not just for me and not just for the Senators who are here, but they are doing that for all of you.

The fact that we would reject funding for our forward-deployed troops is appalling to me. Those are my brothers and sisters. These are my friends, my neighbors, my colleagues. They are fighting on behalf of the United States. The United States is now turning its back, with a filibuster, on these troops. Some of my freshmen colleagues would be on a bill to fund our military, while our troops are forward-deployed. They are out on our frontlines.

I know my colleague from Montana has some troops that recently returned. I know he would like to join us in this discussion as well.

Mr. DAINES. Mr. President, I want to thank the Senator from Alaska. I also want to thank Lieutenant Colonel and Senator Ernst for her service to our Nation. Senator Ernst is the first female combat veteran to ever serve in the Senate. It is an honor to serve with her, and I thank her for her service to our country both as a soldier as well as a Senator.

As I speak today, my friends from across the aisle have already—not once, not twice, but three times—blocked consideration of the Department of Defense Appropriations Act of 2017, which will provide the proper funding and support they deserve. I am proud to be standing here with some of my freshmen colleagues, imploring my friends on the other side of the aisle to stop the political games and get back to work, and that starts with funding our military.

We shouldn’t be playing these petty political games on legislation that is
and should be historically bipartisan. In fact, this bill, the Department of Defense Appropriations Act, passed the House of Representatives in June on a bipartisan vote of 282 to 138, and that included 48 Democrats. That is a very strong bipartisan vote. Over on the Senate side—opposing the Committee on Appropriations, I recall it clearly—it passed our committee 30 to 0. That is called running up the score—30 to 0 out of the Committee on Appropriations on May 26. Not one Democrat opposed the committee. I ask my colleagues: What in the world has changed? Why did we go from 30 to 0 in the committee and now we are seeing a filibuster here on the floor of the Senate?

Just so we are all clear, when Senate Democrats vote no, here is what they are saying no to: 1.2 million military Active-Duty servicemembers and 800,000 reservists. They are saying no to 10,000 troops engaged in combat in Afghanistan, additional military in harm’s way in Iraq, Syria, and other places throughout the world.

We are seeing ISIS expanding into places like Libya. They are attacking Western targets like Paris, Brussels, and there, in places like San Bernardino and Orlando. We need to make sure our military forces have the tools they need to win. As Senator MARCO RUBIO once said: It is either we win or they win. There is no middle ground. And, let us give them the tools they need to win. I can tell you one thing: Our enemies are not waiting for us to consider what is going on here on the Senate floor.

Mr. TILLIS. Mr. President, I want to thank my friends and colleagues from North Carolina, THOM TILLIS. I know Senator TILLIS has some real concerns about what is going on here in the bill. But I want to explain to the people who are saying no to funding important training that is necessary to make sure they can complete these highly dangerous and complex missions wherever a threat may occur.

Now, why is it personal to me in North Carolina? This is a bill providing money to replace the munitions and other consumable items being used to defend America against the likes of ISIS, Al Qaeda, and the Taliban. Passing this also gives confidence to our Eastern European allies.

Back in my home State of Montana, we have a rich legacy of service. I am the son of a U.S. marine. My dad served in the 50th Rifle Company in Billings, MT. In fact, our Nation’s “peace through strength” strategy can be seen clearly at Montana’s Malmstrom Air Force Base. You see, up in Montana, we have one-third of the Nation’s intercontinental ballistic missiles. We play a critical role in meeting our Nation’s security and military needs. In fact, I have the utmost faith—and always do—in the men and women at Malmstrom that provide security for the missiles that silently sit across Montana. I know these airmen will not fail our Nation, but Washington, DC is failing them. Senate Democrats are failing them. And that is unacceptable.

At Malmstrom, the motto on the commander’s coin says this: “Scaring the hell out of America’s enemies since 1962.” And they do so because this body chose duty over politics. So how can Democrats continue to stand here and say no to our military when so much is at stake, when the House passed a bipartisan bill, when this body passed a bill by a unanimous vote of 30 to 0 out of committee? We must say yes to our military who fight for us every day and say no to petty politics in Washington, DC. We must stand up for the rights and the freedoms we enjoy. Senate Democrats, stop using the Senate as a vehicle to hold up the DOD Appropriations bill.

Finally, I urge my Senate colleagues across the aisle to have the courage to vote against the wishes of their leaders and help us move this legislation forward.

Again, I am proud to stand here with some of my Senate freshmen colleagues and the distinguished Senator from North Carolina, THOM TILLIS. I know Senator TILLIS has some real concerns about what is going on here on the Senate floor.

What do I tell the 100,000 Active-Duty military in North Carolina when I go home? I am sorry, but the minority leader and on the Senate side—as a member of the Appropriations Committee said yes. We only need six of them to move this bill to the President’s desk.

I guess the minority leader has a hammerlock on all of the Members who want to vote for this bill. They won’t come to the floor and argue our values and commitment to the men and women in uniform to do the right thing. That is where we are. That is why it is personal to me.

What do I tell the 100,000 Active-Duty military in North Carolina when I go home? I am sorry, but the minority leader and on the Senate side—as a member of the Appropriations Committee said yes. We only need six of them to move this bill to the President’s desk.

people voting against this bill and preventing it from getting to the President’s desk, in my opinion, are failing to live up to their oath.

I want to thank Senator SULLIVAN and Senator ERNST again for their service, and thank my colleague for bringing this to the attention of the American people.

Mr. SULLIVAN. I thank Senator TILLIS, and he put his finger on it when he said it is personal. I think it is personal to all of us. Senator ERNST talked about it. She literally has her former colleagues, the troops she commanded, in Afghanistan right now. There is nothing more personal than that.

Just like Senator TILLIS and Senator DINES, the great State of Alaska also has thousands and thousands of Active-Duty Army, Air Force, Coast Guard, and Marines servicemembers, reservists, and veterans, and they are wonderful. That is what we should be doing before we take a 2-month recess—when, as Senator ERNST said, the whole world is imploding with national security challenges—is voting to fund our troops. So why? I really don’t know the answer.

At one point, the minority leader came to the floor last year and said the bill was “a waste of time.” I am not sure most Americans would agree with him on that. Then they made some kind of excuse: Well, we need to make sure the appropriations bill fits with the bipartisan budget agreement from last year. Well, it does. Nobody is making that argument. He was even recently quoted as saying he doesn’t want his party to be “at the mercy of Republicans.” In essence, that blocking our defense budget gives his political party leverage. Well, I will tell you who gets leverage from blocking this funding—our enemies and our adversaries, not our troops.

There is one other myth here, and I hear it a lot. When these procedural votes happen in the Senate, the troops don’t really see it. They do not really see it. Heck, this vote took place at 10:30 a.m. the night before, and the night was almost at midnight. Maybe nobody saw it. But I want to ask Senator ERNST: Do you think the troops see this? Do you think they understand what is going on? Do you think your troops in Afghanistan or in the Iowa National Guard or all the other military members we have gotten to know through our positions on the Committee on Armed Services see what is happening? How do you think that impacts morale?

Mrs. ERNST. I thank my colleague. Yes, of course, they pay attention. They see what is going on in the Senate. We track this. I tracked this when I was a young captain serving in Kuwait and Iraq. We track this because it is so important that we have the funding necessary for our personnel—just basic funding of our human resources obligations to the U.S. Armed Forces. As to our personnel, we have to have funding to provide our equipment, and we have to have the funding for the training necessary so that our men and women are ready and able to forward deploy. Even when they are forward deployed—in Iraq, Afghanistan, or you name it—they need training.

It is vitally important that what we do here today is to vote on the DOD appropriations bill. We have to stop this filibuster. Our troops are paying attention. Their families are paying attention. Their families here in the United States want to know the Senate is doing the right thing by protecting our military, making sure we have the troops necessary, the equipment necessary, the training necessary to make sure when we forward deploy, they come home safe. That is No. 1—making sure they are properly trained, equipped, and manned so they come home safe.

So yes, Senator SULLIVAN, they do pay attention. As we are standing here debating the importance of this appropriations bill, we have almost 10,000 troops serving today—right now—in Afghanistan. We have almost 5,000 troops in Iraq. Our special operators are deployed worldwide with the military protecting our Nation.

Just last week I had the opportunity to visit a hospital and see one of those special operators, and I am going to come back to that special operator in just a second.

I stated before that the world is imploding, and we only have to look at the headlines over the past several days to see what a risk our globe is in. North Korea test fires a ballistic missile. China tests a nuclear bomb. Chinese Navy holds a live fire drill in the South China Sea—even after the international court has ruled against their claims in the region. Iran, which is now, oddly enough, being fueled by their claims in the region. Iran, which is now, oddly enough, being fueled by the administration entered in, dove their boats dangerously close to ours once again. They came dangerously close to American ships. And the administration says no to military action, testing and evaluation to make sure our men and women who wear the uniform of the U.S. military have the very best tools they need to defeat a very real enemy.

I thank my freshmen colleagues for coming to the floor today. I thank Senator SULLIVAN for leading this effort as we are discussing why we need to stop the filibuster and pass the Defense appropriations bill.

Mr. DAINES. Mr. President, it is certainly an honor to think that we are standing here as Senators with two distinguished veterans: Lieutenant Colonel SULLIVAN, who served in the U.S. Marines. In fact, today, I will be at the Iwo Jima memorial, at a parade, my daughter, honoring my dad, a marine, and honoring the men and women who served in the great uniform of the U.S. military.

There is one group who is cheering right now, and that is our enemies. They are cheering the fact that this body cannot get a defense appropriations bill passed. Maybe we should tie the congressional pay to this bill. You know what. We could ask the minority leader. Let’s put congressional pay in here. Maybe that will get the body to act, to move forward, if we say: If we can’t pass the Defense appropriations bill, we shouldn’t get a paycheck here in Washington, DC.

We ought to stand with the men and women who depend on the appropriations. What this body is saying no to—this filibuster is saying no to military personnel; it is saying no operations; it is saying no to the procuring we need to take the fight to the enemy; and it is saying no to research and development, testing and evaluation to make sure our men and women who wear the uniform of the U.S. military have the very best tools they need to defeat a very real enemy.

I thank my freshmen colleagues for coming to the floor today. I thank Senator SULLIVAN for leading this effort as we are discussing why we need to stop the filibuster and pass the Defense appropriations bill.

Mr. TILLIS. Senator SULLIVAN asked Senator ERNST whether people in uniform are watching. Let’s talk about other people watching. What about the families of those men and women in
uniform, the ones whom Democrats have decided to say no to for a pay raise?

My wife and I have adopted Fort Bragg, where she started a program called Baby Bundles where we create these baby care packages to out-of-county families, EIs and below. These men and women have very little. They are serving their Nation and are not making a lot of money. We are trying to do our best to make up for that by providing them with these gifts as they bring a child into the world.

But what about the mother or father who is left behind as their loved one is somewhere in harm’s way? What are they thinking about when they come home during training and say: You know, we are just not getting the jumps we were getting. We are not getting the equipment we were getting. And, sweetie, I am about to be deployed.

That is happening. That is what this “no” stands for. That is what this action on the part of the Democrats stands for.

We need to vote for this bill. We need to show military families and men and women that we support them. I encourage my colleagues on the other side of the aisle to move this bill to the President’s desk.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. SULLIVAN. Mr. President, I ask unanimous consent for 1 minute to conclude this colloquy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SULLIVAN. Mr. President, I thank my colleagues who bring honor to the Senate by coming down here and talking about this important issue.

Those watching at home should be calling their Senators and telling them: Fund our troops. Fund our troops.

When there are so many national security challenges out there, we need to make sure we do not go on a 2-month recess leaving our troops in the dark and moving forward on this bill. We should not move forward on a vote to have another filibuster vote, the fifth one in a year—the only bill that seems to get the focus of our colleagues and the majority leader.

We need to do the right thing. We need to do the right thing by the American people, and we need to do the right thing by our troops. Fund the troops. Break the filibuster. We need to move forward.

I certainly hope my colleagues on the other side are going to finally see the light and vote to move forward funding for our military, national security, our troops, and our families.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The time now will be controlled by the two managers.

The Senate minority leader.

Mr. REID. Mr. President, what does the previous order say?

The PRESIDING OFFICER. The time is equally divided until 3:30 p.m.

Mr. REID. Mr. President, I will take some of that time.

The PRESIDING OFFICER. The Senator has that right.

ZIKA VIRUS FUNDING

Mr. REID. Mr. President, the Senate’s work higher in good faith, but I am seeing very few good-faith efforts from the Republicans on Zika, among other things. What I am seeing is one cynical Republican ploy after another.

It is clear now that Republicans are not going to provide President Obama and the country with the $1.9 billion in emergency Zika funds that public health officials need, but Democrats still want to get as much funding as the experts tell us they need in order to stop Zika. To that end, the President of the United States, Leader PELOSI, and I have made several entreaties to the Republican leaders—that is, Senator MCCONNELL and Speaker RYAN—pleading with them to work with us. Last Thursday, the ad- ministration, Speaker RYAN and Senator MCCONNELL in the same room with Health and Human Services Secretary Sylvia Burwell and Director Shaun Donovan, the leader of the Office of Management and Budget. This was an opportunity for Republicans in Congress and the administration to get on the same page about Zika and chart a path forward. Speaker RYAN and Senator MCCONNELL said no to me. They wouldn’t even meet with two members of the President’s Cabinet.

Democrats are disappointed, but we continue to look for solutions. The only solution at this point that would get doctors, researchers, and public health professionals what they need is the bipartisan Senate compromise as soon as possible. We were willing to do more, but the Senate compromise I just mentioned passed this body with 89 votes and could pass again today if it were brought up by the Republican leader for a vote.

I spoke with the Republican leader personally and asked him to consider this legislation as a stand-alone bill. And we both agreed to do even more. I told him that. He would not commit one way or the other. Yesterday, I had my staff reach out to the Republican leader’s staff. We haven’t heard back. Instead of getting back to my office with a substantive response, the Republican leader came to the floor this morning and made accusations that were wild and unfair about what we are proposing. I guess that was the Republican leader’s response to our good-faith offer. I guess that was it. But that is not the way the Senate should operate.

Now it is clear that the Republican leader has been stringing us along. He never had any intention of coming back to negotiate a deal. Republicans have no desire to work with us to get a bipartisan Zika funding bill to the President now or at any time in the near future. It has all been a charade.

Republicans are interested in one thing only: attacking Planned Parenthood.

Zika is the sideshow. What Republicans really show their interest in is undermining women’s health by taking potshots at Planned Parenthood. They have been doing this for years, and they will use Zika, Ebola, and anything else to do it.

There is a frightening shortage of integrity in this body, and it is getting worse every day. It doesn’t have to be that way. Democrats and Republicans can work together and should work together, and we should work in good faith.

The chair and ranking member of the Senate Energy and Natural Resources Committee have an agreement that if Democrats agree to go to conference on this Energy bill, Senator MURKOWSKI has given her word to side with Senator CANTWELL in order to produce a congress-based conference report they can both support. Senator MURKOWSKI and Senator CANTWELL will work together to represent the Senate at the conference—not represent Democrats or Republicans but the Senate. That is terrific. Senators CANTWELL and MURKOWSKI have proven in the past that they can work on good, strong legislation without poison pills and with strong bipartisan support. So I look forward to them working with other conferees to complete a final energy bill that Democrats can support and the President will sign.

The basis of this legislation has been going on for 4 or 5 years—or 4 or 5 years. The effort was led by SENATOR MURKOWSKI for years. We almost got it done, but we had Republican obstruction on it. So we are where we are now. We can’t legislate for things done in the past, but the Republican leader should take a cue from the senior Senator from Alaska.

We still want to work together with Republicans to get something done on Zika. It is important to the American people. That would require a good-faith approach from our Republican colleagues. That is not here right now, and it is too bad.

I yield the floor.

Mr. President, I ask unanimous consent that the time in the quorum call that I am about to suggest be charged equally against both sides.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Ms. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.
The PRESIDING OFFICER (Mr. LANKFORD). Without objection, it is so ordered.

Ms. MURkowski. Mr. President, in just a matter of minutes this afternoon, we will proceed to a motion to go to a conference committee on the Senate energy bill, which is the Energy Policy Modernization Act of 2016. There is no doubt in my mind that we should agree to go to conference with the House on this broad bipartisan measure.

I want to be clear in my remarks with a reminder of both the process that we followed to reach this point and the many, many good provisions that the process has allowed the Senate to include within our Energy bill. From the very beginning, we have committed to the regular order, committee-oriented process.

I want to acknowledge the strong working relationship with my friend and colleague on the committee, the ranking member, Senator CANTWELL from Oregon. We set out working this together. We set out with a view in mind that we needed to update our country’s energy laws. In order to get a good product, we were going to have to work cooperatively and collaboratively and be inclusive, and that is what we did. That has been a goal that was worth working toward, and I think the effort that we made as a chair and as a ranking member brought in support from both sides of the aisle and allowed us to come to this place today.

Our Energy Policy Modernization Act is the result of listening sessions, legislative hearings, bipartisan negotiations, a multiday markup held last July, and a multimonth floor process earlier this year. That process concluded with an overwhelmingly bipartisan vote, as 85 Senators voted in favor of the first major Energy bill to pass this Chamber in nearly a decade.

After we passed our bill, it went over to the House. They responded with a series of measures that had already passed their Chamber. While what they sent back has been criticized by some, I certainly think the House was re-energized in its process. They could have passed a highly partisan package that would have been more difficult to reconcile with our bill, but I think they developed a more measured response and chose by voice vote to ask the Senate to conference with them. Now it is our turn.

The very last procedural step is for the Senate to vote to proceed to go to a formal conference. After waiting a month or, actually, that is a little more than a month—about 7 weeks now—I think we are probably at about 6 weeks now—we will have that vote in the next, 10 minutes or so. In looking at all the significant provisions included within our bill, all of which are at stake today, I think this should be a very easy choice for all of us to make.

Our bill includes priorities from 80 different Members of the Senate, including 42 members of the Democratic caucus. When we vote to go to conference, it is no exaggeration to say that at least 80 of us within this body will be voting on whether or not to advance our own ideas and our own policy suggestions.

Let me give you a couple of examples. On a bipartisan provision from Senators BARRASSO and HEINRICH, as well as 16 others that would streamline the LNG export approval process. The bill contains an entire title on energy efficiency that was written by Senator PORTMAN and Senator SHAHEEN, as well as 12 other Members.

The resources title that I developed with the ranking member is a balanced package of some 30 lands and water bills, including a bipartisan sportsmen’s provision that the Senate adopted by a vote of 97 to 0. We made innovation a key priority to promote the developing of promising technologies. We have Senators ALEXANDER, PETERS, CAPITO, MANCHIN, WYDEN, and many others.

We also focused on grid modernization, cyber security, the National Park Centennial, and conservation policies. These are all bipartisan efforts. All of those are a part of this bill.

Now we have to vote to determine whether we will keep going in the last stretch of this legislative process or whether the Senate says: All that work that you did—are we not going to move forward with it. I don’t think that is a good option. It is an option this Chamber will reject.

My very strong preference is that we keep going. I think we should agree to conference with the House of Representatives because I know the conference process can produce a worthy bill that becomes law. I think it is fair to say that it will not include everything that is on the table right now, but anyone who has looked at what each Chamber has passed knows there is plenty out there that we can agree on.

I have a few assurances from Members who may be a little bit hesitant to move forward this afternoon. First, I will reiterate my personal commitment to a final bill that can pass both Chambers and be signed into law by the President. That doesn’t mean we are going to unilaterally disarm ourselves in conference negotiations, but my objective here is to deliver a law. That means I cause product necessarily or the Senate product necessarily. It has to be something the Chambers can both agree on and the President can sign into law. I intend to lead the conference committee the way I led the Senate process—by looking for common ground, by being open, by being fair and inclusive, and by seeking consensus over partisan division.

You don’t have to take just my word for it. A couple of weeks ago, the two House chairmen who will be most heavily involved in the Energy bill conference also released a joint statement that reinforces how we intend to proceed. Here is what the House Energy and Commerce chair, Fred Upton, as well as the House Natural Resources chairman, Rob Bishop, said on June 20:

At the end of the day, our goal is to get something to the President that he will sign into law. From our perspective, a bill that the President will veto is a waste of time and effort and casts aside the hard work we’ve put in up to this point. We remain committed to working in a bicameral, bipartisan manner and remain hopeful that we can set aside our differences and move ahead with a formal conference between the two chambers.

In addition to my approach and the approach the two House chairmen have embraced, there are institutional protections that will help ensure that this process stays on track. If Members are part of the conference committee and decide at the end they don’t want to sign the conference report, then they don’t have to sign it. As we have seen in recent days, conference reports require 60 votes to end debate on them, meaning our bill will need to remain bipartisan in order to pass.

To me, the best argument for going to conference on an energy bill is still the one we started with; that is, it is way past time. It has been almost a decade now. The last time Congress passed a major energy bill was December of 2007. With almost a decade’s worth of changes in technologies and markets taking place since then, our policies have simply become outdated.

There is a whole list of organizations and individuals that have urged us as a Congress to get this done. The American Chemistry Council, the Business Council for Sustainable Energy, the American Chemistry Council, the chamber of commerce. They go on and on.

There is an urgent need to update and reform our Nation’s energy policies. We are overdue. Our policies are deficient. We have advanced many, many good ideas, but we need to get this over the finish line. That is exactly what going to conference will allow us to do.

The Energy Policy Modernization Act gives us a chance to do all of that. We have a chance now to take that next step forward on this broad bipartisan bill—keep it going, proceed to conference, allow ourselves to write a good final bill that we can then send to the President’s desk.

With that, Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Ms. CANTWELL. Mr. President, I join my colleague from Alaska, the chair of the Senate Energy Committee, to urge my colleagues today to move forward on going to conference on the Energy bill.

My colleagues will remember we passed a bill 85 to 12. I think it was, and included a great deal of provisions that my colleague just said—modernizing the electricity grid, building next-generation investments in energy, smart buildings, advanced composite
materials, energy storage and improving cyber security, critical infrastructure, and the energy workforce for tomorrow.

This was a very worked-over process, both in committee and on the Senate floor, and it was a very collaborative effort among our colleagues on both sides of the aisle. It did take some discussion with our House colleagues because the package they passed was a very bipartisan product. I will say, it was a less worked product on a bipartisan basis and certainly a product that had a lot of veto threats in it.

Our House colleagues have made some comments about that legislation that they made it helpful for us to move forward. We met with our colleagues, the Natural Resources and Energy Committee chairs, Mr. BISHOP and Mr. UPPTON. They basically said: Look, they didn’t want to waste time on things that would be vetoed by the President of the United States, so we took that as a good sign that they were willing to sit down and talk about legislation that could move forward in a positive fashion.

Senator MURkowski’s staff, my staff, and we together have rolled up our sleeves and tried to look at ways in which we could talk about how we move forward from here so that all of our colleagues could have confidence that we are going to work on something that would be a final product that really would get to the President’s desk. I thank my colleague from Alas- ka for her indulgence in that process. I know we have made it clear that we want to work with our colleagues in the House across the aisle. It did take some dis- tinction with our House colleagues be- sides of the aisle. It did take some dis- tinction among our colleagues on both parties, and certainly a product was a very less worked product on a bi-

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The bill clerk reads as follows:

The PRESIDING OFFICER. The yeas and nays are necessary absent: the Senator from Wyoming (Mr. BARRASSO), the Senator from Indiana (Mr. COATS), the Senator from Mississippi (Mr. COCHRAN), the Senator from Texas (Mr. CORNYN), the Senator from Texas (Mr. CRUZ), the Senator from South Carolina (Mr. GRAHAM), the Senator from Oklahoma (Mr. INHOFE), the Senator from Kansas (Mr. ROBERTS), the Senator from South Dakota (Mr. ROUNDS), the Senator from Alabama (Mr. SHEPHERD), the Senator from Louisiana (Mr. VITTER) and the Senator from Missis- sippi (Mr. WICKER).

Further, if present and voting, the Senator from Texas (Mr. CORNYN) would have voted “yea.”

Mr. DURBAN. I announce that the Senator from Vermont (Mr. SANDERS) is necessarily absent. The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote? The yeas and nays resulted—yeas 84, nays 3, as follows:

[Rollcall Vote No. 125 Leg.]

YEAS—84

NAYS—3

Paul Perdue Scott

The PRESIDING OFFICER. On this vote, the yeas are 84, the nays are 3. Three-fifths of the Senators duly chosen and sworn having voted in the af- firmative, the motion is agreed to. Cloture having been invoked, the question is on agreeing to the comp- pound motion.

The motion was agreed to.

COMPREHENSIVE ADDITION AND RECOVERY ACT OF 2016—CONFERENCE REPORT—Continued

Mr. MCCONNELL. Mr. President, I ask that the Chair lay before the Senate the conference report to accompany S. 524.

The PRESIDING OFFICER. The clerk will report the conference report to accompany S. 524.

The bill clerk reads as follows:

Conference report to accompany S. 524, a bill to authorize the Attorney General to award grants to address the national epidemics of prescription opioid abuse and heroin use.

The PRESIDING OFFICER. The Sen- ator from Tennessee.

(‘The remarks of Mr. ALEXANDER per- taining to the introduction of S. 3169 are printed in Today’s Record under “Statements on Introduced Bills and Joint Resolutions.”’)

The PRESIDING OFFICER. The Senator from Wisconsin.

JUDICIAL VACANCIES

Ms. BALDWIN. Mr. President, the American public is well aware that there is a vacancy on our U.S. Supreme Court and, in addition, that there is ob- struction going on in terms of our path to do what the Senate is supposed to do—confirm a President’s nomination to the Supreme Court. Because it is the Supreme Court, because that term has come to an end and we have seen a number of 4-to-4 ties, because of the consequence and the gravity of what it is that the Supreme Court does, that has garnered a lot of attention. It has resulted in the calling for the Repub- licans in the Senate to do their job, to not obfuscate and declare that they won’t hold hearings or won’t schedule a vote on President Obama’s nominee, Merrick Garland. As a consequence, that vacancy may persist for well over a year when all is said and done.

I rise today to draw attention to the fact that that is not the only judicial
vacancy we have here in the United States of America. We currently have 83 vacancies in the Federal courts, and 29 of those vacancies have been declared judicial emergencies, meaning that the continuing vacancy has caused serious problems and concerns, so they are deemed judicial emergencies.

Currently, because of the work that has been done by individual Senators, consulting with the President, and what the President has done in terms of forwarding nominees to the Senate so that we can exercise our role of advice and consent, so we can hold votes on confirmations, and because of the work for the Senate Judiciary Committee, currently there are 24 judicial nominees on the Executive Calendar. All of them—every one of them—have garnered majority support of the members of the Senate Judiciary Committee and have been sent to the Executive Calendar. Every one of them is deserving of a full Senate vote.

I rise to draw attention to one particular vacancy; that is, a vacancy on the Seventh Circuit Court. One of Wisconsin’s seats on the Seventh Circuit has been vacant for more than 6¹⁄₂ years. Let me repeat that. It has been vacant for more than 6¹⁄₂ years. Currently, and not surprisingly, it is the longest Federal circuit court vacancy in the country, and it marks 2,378 days that this circuit court seat has been vacant.

The people of Wisconsin and our neighbors in Illinois and Indiana deserve a named appointee in our Circuit Court. We have a highly qualified nominee who deserves a vote from this body.

Don Schott was nominated by the President on January 12 to fill this Seventh Circuit Court vacancy. He has strong bipartisan support. Both Senator JOHNSON and I have returned our blue slips. Bipartisan majorities of the Wisconsin judicial nominating commission have given their support to Don Schott and have voted to advance his nomination to the Senate Judiciary Committee to advance his nomination, and a bipartisan group of former Wisconsin bar presidents support him. Don Schott has the experience, qualifications, and temperament to be an outstanding Federal judge. He was rated unanimously “well qualified” by the American Bar Association. In talking to people in Wisconsin about this nomination, I have heard only tremendous praise for Don Schott.

This nomination deserves a vote. As such, I rise today to urge the majority leader, the Republican leader, to schedule a vote on Don Schott, as well as all of these nominees on the Executive Calendar. The American people deserve a fully functioning Federal judiciary.

I yield the floor.

THE PRESIDENT PRO Tempore. The Senator from West Virginia.

Mr. MACHIN. Mr. President, I rise today in defense of the bipartisan Miners Protection Act. This is a little bit of history that is going to be rolled into the facts of what we are dealing with today.

Our coal miners are some of the hardest working people in America. Any of you who come from a family who had one as a relative—maybe your grandfather, father, uncle—you know those patriarchs are tough. They are hardworking but extremely patriotic. They basically dedicated their lives to making sure that there would not be the kind of government that we have today in the Nation we are today if it had not been for the miners, who now seem to have been cast aside and forgotten about. They powered this Nation. They brought us into the Industrial Revolution, if you will, the industrial age, and created the middle class and one of the largest unions, the United Mine Workers of America. Back in the 1930s and 1940s, especially, if you were working in the mines, you were in the United Mine Workers union. That is just the way things were; that by the end of this year, tens of thousands of our miners are going to receive notices that they are going to lose their health benefits. They are going to lose their health benefits.

I have come to the floor again to answer the points that were called into question by my friend Senator ENZI from Wyoming. First, Senator ENZI specifically questioned the promise that was made to the miners in 1946. He said that he was not aware of the promise that was made to them in 1946, saying that it was made between the coal companies and the unions, not the Federal Government, so therefore we should not have an obligation to be involved. He said there was never an agreement with the Federal Government.

I don’t know how else to say this except that I believe my good friend was totally misinformed. That is not correct, not at all. Now I will give you the facts. This is history.

In May of 1946, the United States was in the midst of a robust post-World War II economic recovery. I mean, everybody was working during the war. We were trying to survive as a nation, trying to defeat tyranny and basically save the world as we know it today. So everybody was working. Now the war is over. We were fearing a shutdown of our economy, and somehow we had to continue to keep this economy moving to keep the country and the economy moving.

The United Mine Workers were actively negotiating. They were actively negotiating their contracts the way you do in a civil bargaining agreement. You sit down and work through that. President Harry Truman knew the vital role the coal industry played in the economic recovery efforts, and he feared a prolonged strike. He issued an Executive order because he thought a strike would grind our recovery to a halt. He feared it would grind our recovery to a halt. He issued an Executive order directing the Secretary of the Interior to take possession of the bituminous coal mines—can you believe that—take possession of all of the bituminous coal mines in the United States and negotiate with the unions. So basically he stepped in and started negotiating with the unions, taking over the mines.

In fact, the first line of the Krug-Lewis agreement—this was the agreement that was signed as a historic document that created the promise of health benefits and retirement security for our Nation’s miners. This agreement is between the Secretary of the Interior acting as Coal Mines Administrator under the authority of Executive Order No. 9728, dated May 21, 1946, and the United Mine Workers of America. The title of this agreement says “Executed at the White House, Washington, D.C., May 29 of 1946.”

I ask unanimous consent to have a copy of this agreement printed in the RECORD, and I will be sending a copy to my dear friend.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL BITUMINOUS COAL WAGE AGREEMENT

EXECUTIVE ORDER NO. 9728

AGREEMENT

This Agreement between the Secretary of the Interior, acting as Coal Mines Administrator under the authority of Executive Order No. 9728 (dated May 21, 1946, 11 F. R. 5560), and the United Mine Workers of America, covers for the period of Government possession the terms and conditions of employment in respect to all mines in Government possession which were as of March 31, 1946, subject to the National Bituminous Coal Wage Agreement, dated April 11, 1945.

1. Provisions of National Bituminous Coal Wage Agreement Preserved

Except as amended and supplemented hereinafter, this Agreement carries forward and preserves the terms and conditions contained in the National Bituminous Coal Wage Agreement issued on April 1, 1941, through March 31, 1943, the supplemental agreement providing for the six (6) day work week, and all the various district agreements executed between the United Mine Workers and the various Coal Associations and Coal Companies (based upon the aforesaid basic agreement) as they existed on March 31, 1943, and the National Bituminous Coal Wage Agreement, dated April 11, 1945.

2. Mine Safety Program

(a) Federal Mine Safety Code

As soon as practicable and not later than 30 days from the date of this Agreement, the Director of the Bureau of Mines, after consultation with representatives of the United Mine Workers and such other persons as he deems appropriate, will issue a reasonable code of standards and rules pertaining to safety and health conditions and practices in the mines. The Coal Mines Administrator will put this code into effect at the mines. Inspectors of the Bureau of Mines shall make periodic investigations of the mines and report to the Coal Mines Administrator any violations of the Federal Safety Code. In cases of violation the Coal Mines Administrator will take appropriate
action which may include disciplining or replacing the operating manager so that with all reasonable dispatch said violation will be corrected.

Prior to time the Director of the Bureau of Mines may, upon request of the Coal Mines Administrator or the United Mine Workers, review and revise the Federal Mine Safety Code.

(b) Mine Safety Committee

At each mine there shall be a Mine Safety Committee selected by the Local Union. The Mine Safety Committee may inspect any mine, faces or equipment used in producing coal for the purpose of ascertaining whether compliance with the Federal Safety Code exists. The Committee members while engaged in the performance of their duties shall be paid by the Union, but shall be deemed to be acting within the scope of their employment in the mine within the meaning of the Workmen’s Compensation Law of the state where such duties are performed.

If the Committee believes conditions found endanger the life and bodies of the mine workers, it shall report its findings and recommendations to the management. Those special instances where the Committee believes danger exists and the Committee recommends that the management remove all mine workers from the unsafe area, the operating manager or his managerial subordinate is required to follow the recommendation of the Committee, unless and until the Coal Mines Administrator, taking into account the inherently hazardous character of coal mining, determines that the authority of the Safety Committee is being misused and he cancels or modifies that authority.

The Safety Committee and the operating manager shall maintain such records concerning inspections, findings, recommendations and actions relating to this provision of the Act. The records shall be kept in accordance with agreements made within the framework of the Union’s organization.

4. Health and Welfare Program

The Coal Mines Administrator undertakes to direct each operating manager to provide its employees with the protection and coverage of the benefits under Workmen’s Compensation Act, Social Security Act, medical, dental, hospital and related purposes. The trustees shall administer this fund to provide, or to arrange for the availability of, medical, dental, and hospital related services for the members of the Union and the beneficiaries of the money in this fund shall be used for the indicated purposes at the discretion of the trustees of the coal mine. The trustees shall provide for medical, dental and hospital related services to their jobs during the qualifying period. All employees with a record of one year’s standing (June 1, 1945, to May 31, 1946) shall receive as compensation for the above-mentioned vacation period the sum of One Hundred Dollars ($100), with the following exceptions: Employees who entered the armed services and those who returned from the armed services to their jobs during the qualifying period shall receive the $100 vacation payment.

All the terms and provisions of district agreements relating to vacation pay for sick and holidays shall be carried forward to this Agreement and payments are to be made in the sum as provided herein.

Pro rate payments for the months they are on the payroll shall be provided for those mine workers who are given employment during the qualifying period and those who leave their employment.

Vacation payment of the 1946 period shall be made on the last pay day occurring in the month of June of that year.

5. Survey of Medical and Sanitary Facilities

The Coal Mines Administrator undertakes to have made a comprehensive survey and

study of the hospital and medical facilities, medical treatment, sanitary, and housing conditions in the coal mining areas. The purpose of this survey will be to determine the character and scope of improvements which should be made to provide the mine workers of the Nation with medical, housing and sanitary facilities conforming to recognized American standards.

6. Wages

(a) All mine workers, whether employed by the day, tonnage or footage rate, shall receive $1.85 per day in addition to that provided for in the contract which expired March 31, 1946.

(b) Work performed on the sixth consecutive day is optional, but when performed shall be paid for at time and one-half or rate and one-half.

(c) Holidays, when worked, shall be paid for at time and one-half or rate and one-half.

7. Vacation Payment

An annual vacation period shall be the rule of the industry. From Saturday, June 29, 1946, to Monday, June 24, 1947, shall be a vacation period during which coal production shall cease. Day-men required to work during this period at coke plants and other necessarily continuous operations or on emergency or repair work shall have vacations of the same duration at other agreed periods.

All employees with a record of one year’s standing (June 1, 1945, to May 31, 1946) shall receive as compensation for the above-mentioned vacation period the sum of One Hundred Dollars ($100), with the following exceptions: Employees who entered the armed services and those who returned from the armed services to their jobs during the qualifying period shall receive the $100 vacation payment.

8. Settlement of Disputes

Upon petition filed by the United Mine Workers with the Coal Mines Administrator showing that the procedure for the adjustment of grievances in any coal producing district is inequitable in relation to the generally prevailing standard of such procedures in the industry, the Coal Mines Administrator will direct the operating managers at mines in the district shown to have an inequitable grievance procedure to effect within a reasonable period of time the generally prevailing grievance procedure in the industry.

9. Discharge Cases

The Coal Mines Administrator will carry out the provision in agreements which were in effect on March 31, 1946, between coal mine operators and the United Mine Workers that cases involving the discharge of employees for cause shall be disposed of within 5 days.

10. Fines and Penalties

No fines or penalties shall be imposed unless authorized by the Coal Mines Administrator.

In the event that penalties are imposed by the Coal Mines Administrator, the funds withheld for that reason
shall be turned over to the trustees of the fund provided for in Section 4 (b) hereof, to be used for the purpose stated therein.

11. Supervisors

With respect to questions affecting the employment and bargaining status of foremen, supervisors and clerical workers employed in the bituminous mining industry, the Coal Mines Administrator will be guided by the decisions and procedure laid down by the National Labor Relations Board.

12. Safety

Nothing herein shall operate to nullify existing state statutes, but this Agreement is intended to supplement the aforesaid statutes in the interest of increased mine safety.

The wage provisions of this Agreement shall be retroactive to May 22, 1946.

14. Effective Date

This Agreement is effective as of May 29, 1946, subject to approval of appropriate Government agencies.

Signed at Washington, D.C. on this 29th day of May, 1946.

J. A. Krug,
Coal Mines Administrator.

John L. Lewis,
President, United Mine Workers of America.

Mr. MANCHIN. I believe the Secretary of the Interior and the White House were representatives of the Federal Government back in 1946, just as they are today.

Second, my colleague from Wyoming stated, worry about the claim that we are helping all coal miners with this proposal.

West Virginia coal miners—union and nonunion—continue to suffer from the devastating effects of the ongoing coal bankruptcies.

Senator, we are willing to help all miners. We truly are. Anybody who has been devastated in this downturn, if you will, of the industry, but we are focusing this particular effort on the United Mine Workers of America.

They try to make this: Well, you are picking union over nonunion. We are not picking union over nonunion. The agreement was made with the UMWA because everybody working in the mines during that period of time belonged to the UMWA. So we have to protect that promise that was made in that Executive order that was signed and made 70 years ago. So I invite the Presiding Officer and all of my colleagues to help us find a way to move forward on this to rest.

Also, Senator Enzi stated he wants America to remain financially solvent. Well, there is no one who wants that more than I do. I understand that if you can’t get your financial house in order, nothing else.

In fact, let me tell you what happens if we do not pass the Miners Protection Act. The Pension Benefit Guaranty Corporation, which we have in place, will shoulder the burden of the outstanding liabilities. In a January letter to Congress, United State Secretary of State, the Honorable John Kerry from West Virginia, one of my colleagues on the other side, the Director of the Pension Benefit Guaranty Corporation confirmed that if the UMWA becomes insolvent, the Pension Benefit Guaranty Corporation of America will actually have to assume billions of dollars in liabilities causing negative ripple effects for many more and for the financial insolvency of our country.

Passing this legislation is important to the UMWA. So we have to recommit to the Miners Protection Act now means covering $3.5 billion in health and pension benefits. If we do not enact this law, the pension liability alone will carry a pricetag of over $8 billion. So, along with my good friend Enzi, I strongly do care about making prudent decisions. That is a savings of $2.5 billion if we pass this legislation—$2.5 billion in saving to the taxpayers.

The Miners Protection Act is important to my home State of West Virginia because West Virginia has more retired union miners than any other State in the Nation. Out of the 90,594 retired United Mine Workers in the country in 2014, more than 27,000 still live in my home State.

I will say this. As to a lot of the devastation we have seen with the floods we have had in West Virginia over the last couple of weeks, it was horrific what happened. Every one of those little communities was a coal mining community that got hit. So you just add more tragedy on top of the already devastating tragedy that we have.

But the impact is going to be felt in every State in the United States of America, including Wyoming. In fact, the Miners Protection Act will help over 900 health beneficiaries and over 2,000 pension beneficiaries in the State of Wyoming. So I would just ask: What do my colleague who opposes this legislation or any of my colleagues who might not be for this legislation expect the widows and pensioners to do? First of all, they have an executive order by the President of the United States in 1946, over 70 years ago. On top of that, this pension plan was sound until 2008. It wasn’t their fault the crash happened. The greed of Wall Street took down so many pension plans.

Most of these widows are making $550 a month. That is their pension—$550 a month. So we are not talking about large amounts of money, but if they lose that, it means the difference of whether they do certain things out of necessity. What do they give up? How do you explain to them that a 70-year-old commitment is now going to go unanswered? We didn’t care. We didn’t mean it.

It is our responsibility to keep the promise to our miners who answered the call whenever their country needed them. So I ask Senator Enzi and all my colleagues to work with me to keep our promise to these miners. Let us sit down and work together and make sure we all agree on the facts.

I have always said this, and it has been said to me many times, we are all entitled to our own facts. We are just not entitled to our own facts. So the facts are very clear here. This is not only a promise, it is a commitment and a responsibility we have to the United Mine Workers of America and all those people who gave us the greatest country on Earth, gave us the greatest amount of abundant energy—reliable, affordable, and dependable. There is a transition going on now, and we are doing the best we can. But the bottom line is that to walk away from an obligation and a commitment we made 70 years ago, which helped us be the superpower of the world and the country we are today, would be a gross injustice to the United Mine Workers of America, the widows, and the families who still depend on this. We have a responsibility to oblige and make sure we take care of them.

With that, I hope the Chair will help me in moving forward on this. We hope to get a vote in September. We were promised a vote in the first part of September, when we come back, and that is one we are counting on to carry this forward. I am hoping we will have our colleagues supporting this.

With that, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. DURBIN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Ms. Ayotte). Without objection, it is so ordered.

CLIMATE CHANGE

Mr. DURBIN. Madam President, I come to the floor today to speak on the issue of climate change. Before I do, I would like to read a quote.

What is a conservative after all but one who conserves, one who is committed to protecting and holding close the things by which we live ... and we want to protect and conserve the land on which we live—our countryside, our rivers and mountains, our plains and meadows and forests. This is what we owe to our children. And our great moral responsibility is to leave it to them either as we found it or better than we found it.

These are the words of President Ronald Reagan, and I agree with those words. Climate change is one of the greatest threats to our planet Earth. When I look at my beautiful grandkids, I feel a moral responsibility to leave this world as well as I found it or even better.

We can’t continue to ignore the problem of climate change. How will future generations judge us if we deny the reality of climate change and say that it is just too hard to do something that might leave them a safer, cleaner, better world? I don’t think they will look on us kindly. Future generations actually count on us.

Climate change is no longer debatable. The facts are in. Climate change is real, and it is not some distant threat from Hurricane Katrina to Superstorm Sandy, from severe flooding on the Mississippi River in 2011 in Illinois to the historic low water levels
just 1 year later and to the devastating drought and wildfires that are scaring the West Coast, extreme weather is the new normal.

So why are there still so many in the Chamber who deny the threat of climate change, not to mention failing to do anything to solve the problem? I have said on the floor before, and I will say again, that there is only one major political party in the world today that denies climate change, only one—the Republican Party of the United States of America.

Well, part of the reason is because for decades the fossil fuel industry and those who cater to them have tried to blur this debate, to blur the science, to create divisions among us, instead of looking for what we have in common to try to solve this problem rationally and reasonably.

Make no mistake, there is a deliberate campaign conducted by the fossil fuel industry—a campaign that uses the pseudoscience of manufactured doubt. It is coordinated. I have seen the likes of it before.

In 1966, the major tobacco companies in the United States were found guilty of "a massive 50-year scheme to defraud the public." Decades before, tobacco company research had already shown that tobacco was truly harmful and addictive. Instead of letting science and the moral imperative behind it promote public health, the companies launched an extensive campaign sowing seeds of doubt about the dangers of tobacco.

I know about this firsthand. I was a Member of the House of Representatives about 27 years ago. I introduced a bill to ban smoking on airplanes. It was opposed by the tobacco lobby, and the leadership in both political parties—Democrats and Republicans—leaders in the House of Representatives—opposed me. We called it for a vote, and to the amazement of everyone, it passed. It turns out Members of Congress are the largest frequent flyers in the world today. Extreme weather is the new normal. I know they knew how outrageous it was to suggest there were smoking and nonsmoking sections on an airplane.

I led that initiative to ban smoking on airplanes, and I was joined by the late Senator Frank Lautenberg who took up the cause in the Senate, and 26 years ago we banned smoking. It made a difference. We had to fight the tobacco lobby all the way. They denied that smoking was addictive. They denied there was a linkage between tobacco and cancer. They created a pseudoscience. They paid scientists to come up with theories that said tobacco really wasn't that dangerous.

We are seeing that same thing today when it comes to climate change. Just as the tobacco industry created a campaign of manufactured doubt to protect their financial interests and profits, a web of fossil fuel industry groups, aided and abetted by one of the very groups that resisted anti-smoking laws, are behind this web of climate denial.

A 1998 American Petroleum Institute, or API, memo has become public. I just read it on my computer upstairs. At the time, the American Petroleum Institute consisted of a dozen lobbyists, think tank members, and public relations gurus. Science wasn’t on their side in 1998. They decided that misleading the public about the reality of climate change—sowing seeds of doubt about whether there was really climate change underway—was the best way to go. The 1998 API memo claimed in those words, “...would be achieved when ‘uncertainties’ about the science became part of the public’s perception.”

In the year 2000, influential Republican pollster Frank Luntz prepared a playbook for those who wanted to create doubt in the public’s mind about climate change. Mr. Luntz wrote:

Should the public come to believe that the scientific issues are settled, their views about global warming will change accordingly. Those who need to continue to make the lack of scientific certainty a primary issue in the debate.

So what is taking place right now with the effort of the fossil fuel industry is a deliberate campaign to mislead the American public.

Sadly, this web of denial that started in 1998 is alive and well today. Just last year, at an ExxonMobil-sponsored meeting of the notorious American Legislative Exchange Council, the president of the Heartland Institute stated:

There is no scientific consensus on the human role in climate change. There is no need to reduce carbon dioxide emissions and no point in attempting to do so.

This quote is in direct opposition to Earth scientists in one of the world’s most highly respected Earth science organizations—the American Geophysical Union, or AGU. This spring, 224 Earth scientists cited these lies in a letter as one of the many reasons why the American Geophysical Union should decline to accept ExxonMobil’s financial sponsorship of their group. The Earth scientists also made clear that ExxonMobil distributed scientifically false and misleading information, are members in or financially support other climate-denying organizations, and donated to climate-denying politicians and past misinformation campaigns.

ExxonMobil is not alone in spending money to influence elections and affect environmental policy. The oil and gas industry pours millions of dollars into campaigns. But it sometimes seems impossible that powerful people put their profits ahead of the future of the planet we live on, but we know it is true. If we don’t act on climate change, there is no backup plan.

Let me end on a hopeful note. When Pope Francis came to Washington, DC, last September, he called for action on addressing climate change and global warming. The Pope said:

All is not lost. Human beings, while capable of the worst, are also capable of rising above themselves, choosing again what is good, and making a new start.

Pope Francis is right. Let’s not run away from our responsibility in the Senate or in life to our children and our grandchildren. Let’s work toward solving the real challenges of climate change with both political parties. It is not too late to make a new start, to do the right thing, and to protect this planet that we call home.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, we all want safety, security, health and well-being for all of our fellow Americans. But it sometimes seems impossible that rewards those with good ideas and principles, not just the person who is the most talented in raising money.

I reintroduced a bill last year called the Fair Elections Now Act. This legislation would establish a voluntary, small-donor public financing system for Senate campaigns. We would finally break the back of Big Money’s control over the American political system.

The Fair Elections Now Act can’t solve all the problems facing our democracy, but it would allow us to fight back against deep-pocketed special interests by dramatically changing the way campaigns are funded, encouraging small donors and matches for those small donations.

These are grapple with important issues like climate change, we have to recognize the influence of money in our political system and why one major political party in the world today still denies climate change. Until we embrace campaign finance reform and ensure that politicians do not feel beholden to special interests like the oil and gas industry, climate-denying politicians will continue to prevent us from taking action.

It is unconscionable that some very powerful people put their profits ahead of the future of the planet we live on, but we know it is true. If we don’t act on climate change, there is no backup plan.
pause briefly, mark that achievement, and consider how we got there.

That is what I hope will happen this week when the Senate votes on the conference report for S. 524, the Comprehensive Addiction and Recovery Act, or CARA.

CARA addresses the opioid crisis in a comprehensive way, by authorizing almost $900 million over 5 years for prevention, education, treatment, recovery, and law enforcement efforts. Last week, the House of Representatives passed the report by an astounding margin of 407 to 5.

We have all heard the statistics about the epidemic of addiction to heroin and prescription opioids that is gripping our country. We won’t belabor them today. When 129 Americans a day die from drug overdoses, we don’t need statistics on a page to tell us about this catastrophe. We only need to listen to our constituents. I hear from Iowans all the time about real-life examples of how this epidemic is hitting home.

A few years ago, I heard the story of Kim Brown, a nurse from Davenport. In 2011, she lost her son Andy Lamp to an accidental heroin overdose. He was only 18. She wound up talking to the Iowa State about the need for expanded treatment options for those with substance abuse disorders. She also advocates for increased access to naloxone, an anti-overdose drug that can save lives.

I heard Kim Brown’s plea—and the conference report helps fill these and other critical gaps. I urge the entire Senate to demonstrate that it has heard her, and thousands like her, by passing the conference report, and sending it to the President for his signature before we return home.

The Senate’s vote this week will be the culmination of a process marked by hard work, bipartisanship, and a commitment to addressing this crisis in an all-encompassing way.

I convened a hearing on attacking the opioid epidemic in the Senate Judiciary Committee in January. The Committee heard from Federal and State officials in the law enforcement and public health communities. We also heard from a courageous young woman who lost her daughter to a heroin overdose and subsequently started a support group to assist those in recovery. The hearing occurred well over three hours. Senators who aren’t even members of the Committee stopped in to listen, and learn. By that time, a bipartisan group of four Senators had already introduced CARA. Soon after the hearing, I sat down with Senators Witehouse, Portman, Klobuchar, and Ayotte—two Democrats and two Republicans—to build on their outstanding work. The leadership of those four Senators on this issue has been indispensable.

We agreed on some changes to CARA that facilitated its movement through the Judiciary Committee. In particular, I worked to include my accountability provisions, which help prevent waste, fraud, and abuse of grant funds, and ensure that resources go to those who need them most.

I also helped make sure that a fixed portion of the funds for first responder training is accessed by rural communities, like much of Iowa, where access to emergency healthcare can be limited.

And finally, because methamphetamine remains such a problem in Iowa, I made sure that the community-based coalition enhancement grants created by the bill would also be available for communities suffering from high rates of meth abuse, in addition to opioid abuse. In fact, these enhancement grants are intended to supplement grants made to community coalitions under the Drug Free Communities Act of 1997. I am proud to have been the lead sponsor of that legislation in the Senate.

The CARA Grassley substitute, with these changes, passed the Judiciary Committee unanimously by voice vote in February. I then managed the bill on the Senate floor, where it was approved 94 to 1 in March. Tackling important problems in a bipartisan way is important to me. That is why, as Chairman of the Judiciary Committee, I have moved eight bills through the Committee, CARA among them, for which the lead sponsor was a member of the Democratic minority. By way of comparison, last Congress the Committee didn’t report a single bill for which the lead sponsor was a Republican in the minority. And every one of the 27 bills I have moved through the Committee this Congress has had bipartisan support. That isn’t just talking the talk on bipartisanship, it is walking the walk.

After the Senate acted on CARA, the House of Representatives passed its own package of bills by a vote of 400 to 5. In May, I worked with a bicameral, bipartisan committee to develop a conference report that would blend the best of the two approaches together. I led the Senate delegation that negotiated the report, along with Senator Alexander, Chairman of the Committee on Health, Education, Labor and Pensions. We concluded weeks of hard work and negotiations with a conference committee meeting on July 6. I voted for a number of improvements to the report during the meeting, offered by both Republicans and Democrats.

In particular, I was proud to support Senator Murray’s amendment that will create an Office of Patient Advocacy at the Department of Veterans Affairs, so that post-partum women who are addicted to opioids have access to the care they deserve.

I am also pleased that the CARA conference report includes a bill that I introduced with Senator Klobuchar, the Kingpin Designation Improvement Act. This bill strengthens the ability of the Federal Government to freeze the assets of foreign drug kingpins, who traffic opioids, methamphetamine and other illegal narcotics into the United States.

There are other parts of CARA that I feel passionately about as well. Many people who abuse prescription drugs get them from friends or relatives. That is why we supported the Kingpin Designation Improvement Act. This Federal initiative that allows patients to safely dispose of old or unused medications, so that these drugs don’t fall into the hands of young people, potentially leading to addiction. I am proud to have helped start these “take back” programs by working with Senators Klobuchar and Cornyn in 2010 to pass the Secure and Responsible Drug Disposal Act. It has been a highly successful effort. Since 2010, over 2,700 tons of drugs have been collected from medicine cabinets and disposed of safely. Iowa also has a similar “take back” program that is expanding rapidly. Anything we can do to encourage these programs is worthwhile.

CARA also authorizes funds for other valuable programs: programs that encourage the use of medication assisted treatment, provide community-based support for those in recovery, and address the unique needs of pregnant and post-partum women who are addicted to opioids.

It is no wonder that the CARA conference report has been met with such widespread praise and support. The Addiction Policy Forum called it a “monumental step forward.” Almost 250 advocacy organizations wrote to Congress in support of the report, concluding that “this bill is the critical response we need.” These organizations include many influential national ones, such as the Community Anti-Drug Coalitions of America, the National Criminal Justice Association, and the National District Attorneys Association.

Iowa community organizations are well-represented in that group as well, including the Partnership for a Drug Free Iowa, the Iowa Municipal Police Association, the Iowa Drug Endangered Children, Community Resources United to Stop Heroin of Eastern Iowa—Dubuque Chapter, Quad Cities Harm Reduction, which Kim Brown leads, and many more.

The National Fraternal Order of Police wrote in support of the conference report as well. The FOP explained that:

Law enforcement officers are almost always the first on the scene—even before the paramedics arrive. In many situations, our officers are not looking to make an arrest, but to save a life. Many States and jurisdictions have successfully equipped their officers with naloxone, trained them to recognize the symptoms of an overdose, and administer it on the scene. We believe that the final conference report on S. 524 will help expand the use of naloxone and give us one more tool to reduce the deaths from this epidemic.

It isn’t every day we can say that legislation we pass could help save lives. But this is one of those days. I urge my colleagues to embrace the bipartisan leadership in both chambers for moving this legislation on the floor, and providing the Senate the opportunity to pass it this week.
Indeed, heroin deaths spiked dramatically from 2010 through 2014, more than tripling, from 3,036 to 10,574. But sadly, during this entire time, the Democratic leader didn’t make it a priority to move comprehensive, bipartisan legislation on the floor to address this epidemic.

Now, some of my colleagues have expressed concern that the conference report, an authorization bill, doesn’t also appropriate money for this epidemic as well. But thankfully, under Republican leadership, appropriations committees have been doing just that. The current Senate appropriations bills increase funding for this epidemic by 57 percent over fiscal year 2016 enacted levels, and by 115 percent over fiscal year 2015 enacted levels. So funding for this crisis is poised to more than double since Republicans took control of the Senate. As this funding continues to increase, the CARA conference report will be the blueprint for where this funding effectively spent.

This bill is just the latest example of the productive, bipartisan work we have been doing on the Judiciary Committee this Congress. I want to thank all of the Members for their hard work and efforts to date. So I urge my colleagues to vote to send CARA to the President this week. And when we come back in September, let’s roll up our sleeves and continue to build on this bipartisan success.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

TRAGEDIES IN MICHIGAN AND ACROSS THE COUNTRY

Mr. PETERS. Madam President, I rise with a heavy heart to address devastating tragedies that have shaken communities in Michigan and across this country. Just yesterday, the community of St. Joseph, MI, suffered a tragic shooting that cost the lives of two police officers, their five-year-old daughter, and injured several others.

I would like to extend my condolences to the families of bailiffs Joseph Zangaro and Ronald Kienzle, who were fatally shot yesterday in Berrien County, MI. Both Joseph and Ronald had distinguished careers as public safety officers prior to serving as bailiffs in the Berrien County Courthouse.

Joseph Zangaro retired from the Michigan State Police as post commander of the Bridgman Post and had worked for the Berrien County Trial Court for over 10 years. Ronald Kienzle retired as a sergeant in road patrol with the Benton Charter Police Department in Benton Harbor, MI, and was a veteran of the U.S. Army.

I also want to wish Deputy James Atterbury and Kenya Ellis a speedy recovery for the wounds they received during this attack.

Yesterday’s incident illustrates a very important fact. Whether as a member of a local police department, a rapid transit officer, or a court bailiff, public safety officers risk their lives every day to keep our families and our communities safe. This is a fact we can never forget and a reality that confronts public safety officers and their families every day.

Across Michigan, our hearts have been broken by senseless violence like this, and I know the grief of my fellow Michiganders because I feel this grief in my own heart as well. Unfortunately, this is not the first tragedy to strike West Michigan this year. We are still reeling from the mass shooting in Kalamazoo where six people were killed and two were critically injured.

We are facing a very difficult time in our country’s history. Last week's tragedies further demonstrate this point. Within just 48 hours, we saw two separate incidents where American citizens died at the hands of those who were sworn to protect them. Then, what started out as a peaceful protest in response to those deaths, suddenly morphed into an unrelated and horrific attack on law enforcement—an attack on officers who died to protect the rights of protesters to peacefully protest.

Let me be clear. Something is wrong when a hard-working and beloved cafeteria supervisor is killed during a routine traffic stop. Something is wrong when police officers, honorably serving and protecting their communities, are killed during a peaceful protest. Something is wrong when a salesman and a father of four dies while selling CDs. Something is wrong when a police officer is ambushed and shot while responding to a 911 call for help. Too many precious lives are being lost, not just in Michigan but in States all across our country.

I was heartbroken by the tragic shooting deaths of Philando Castile in Minnesota and Alton Sterling in Louisiana last week, only to wake up horror-struck to find out that five Dallas police officers, including Michigan native Michael Krol, who were struck down in the line of duty.

We have seen enough violence. Across our countries, our communities are outraged and heartbroken at the number of lives which have been lost. While the events of last week are almost too much to bear, the images from communities like Chicago, Staten Island, Ferguson, and Baltimore have gripped this Nation’s attention as well.

We have seen the madness, burning storefronts, and confrontations between police and young people, as well as peaceful protesters marching through the streets. It is clear there is a persistent and troubling problem in our country that is eroding away Americans' faith in our justice system. With each troubling incident, it becomes clear that justice in this country is sometimes neither fair nor equal, and we must act now to address this inequality.

This problem isn’t isolated to our African-American communities or to our law enforcement communities. These injustices undermine the very values our Nation was built upon. It is the responsibility of each and every one of us to acknowledge that too many Americans are needlessly dying, and we must come together to stop them.

So I urge my colleagues now more than ever to make time for us to unite as a country to encourage understanding and compassion for our fellow Americans. Now is the time for us to walk in another’s shoes and acknowledge the experiences that have shaped their views. Now is the time for us to come together to build a new reality.

The American people need us. It is crystal clear that the relationship between law enforcement and the communities they serve is strained, and an overhaul of our criminal justice system is long overdue. On top of these strained relations, we are continuing to see rising prison populations and unsustainable costs as public budgets remain tight.

We see too many at-risk youths being funneled out of our schools and into our prison systems, continuing a vicious cycle in many of our communities. We see too many people who have served their time only to find that once they get out of prison, they can’t find a good job or a stable home. We need a better understanding of the causes of these concerning trends, and we need to identify solutions that will help ensure we are administering justice in a fair and equitable way for every American—no matter who they are, where they may live, or their income level. That is why I have introduced legislation with Republican Senators Lindsey Graham of South Carolina and John Cornyn of Texas to create a National Criminal Justice Commission. The Commission will be made up of experts on law enforcement, victims’ rights, civil liberties, and social services who will be charged with undertaking an 18-month review of our criminal justice system from the top to the bottom. It is something that has not been done since 1965—more than 50 years ago during another very difficult time in our Nation’s history.

The goal of this Commission is to identify commonsense solutions to the serious issues facing our criminal justice system, promote fairness in our laws, build stronger relationships between law enforcement and our communities, and strengthen faith—basic understanding and compassion for our fellow citizens.

More now than ever, it is time for us to acknowledge that too many Americans’ faith in our justice system is sometimes neither fair nor equal, and we must act now to address this inequality.
Commission made more than 200 recommendations to improve the criminal justice system, including creating the 9-1-1 emergency system that is so ingrained in our society today.

Our country has changed significantly over the last 50 years, but together we can achieve the promise of this great country—justice for every American, no matter who you are, where you live, or how much money you may have in your pocket.

I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

CLIMATE CHANGE

Mr. SCHATZ. Madam President, I hate conspiracy theories. I believe most of the suspicious, confusing, frustrating, or unknowable things in the world are the way they are not because there are 12 people in a room wringing their hands trying to figure out how to trick all of us but because the world is complicated, often unfair, sometimes illogical, and we all operate with incomplete information. So even as a climate hawk, I came to the idea of an organized misinformation campaign with real hesitation. I didn’t want to be that guy who lives in that 9–1–1 mental universe that lies for a living. But here is the thing: I have studied this, and I have learned that there really is an organized, well-financed disinformation and misinformation campaign on the subject of climate change. It is straight out of a bad movie about politics, complete with PR guys, dark campaign money, fake scientists, politicians in the mix, and a weakened media. It is like Rambo and Task actually exists.

I rise today to join my colleagues in combating a pervasive and highly damaging campaign of misinformation, disinformation, and outright lies. For decades, the same hired guns that tried to convince us that there was no link between smoking and lung cancer have been following the same playbook on manmade climate change. They want to sow doubt where no doubt exists. Just like the tobacco companies profited from denial, so too do the fossil fuel companies through profiting by propping up front groups and shame think tanks that try to convince us that the science on climate change isn’t settled and that no consensus exists between mainstream scientists, but of course it does.

The American Association for the Advancement of Science said:
The science linking human activities to climate change is analogous to the science linking tobacco to cardiovascular diseases. Physicians, cardiovascular scientists, public health experts, and others all agree that smoking causes cancer, and this consensus among health professionals has convinced most Americans that the health risks from smoking are real. A similar consensus now exists among climate scientists, a consensus that climate change is happening and human activity is the cause.

It is worth pausing here to make two basic points. The first is one I mentioned earlier, and that is that the same techniques which were used to block science and prevent action on tobacco are now being deployed to prevent action on climate. That stands to reason. If you are looking for public relations techniques to essentially mislead the public, you can find additive years and decades of profitability, then you would be wise to use the techniques, methods, and procedures that worked in the past, so that sort of stands to reason. It shocks the conscience, but it shouldn’t shock us that this is happening. The really shocking part is this. Of course they would use the same techniques to mislead the public regardless of the issue, but the real shock is that it is literally the same people. It is not the same type of person or the same category of person, it is the same human beings and the same professionals. They are the same PR firms, and they have replicated the machinery of the Tobacco Institute, spreading processes, procedures, personnel, and funding sources. But just as we did against Big Tobacco, we are going to win the war of ideas against Big Oil and Big Coal.

The truth is on our side, but the truth is not guaranteed to come out. We actually have to expose their ecosystem of misinformation to make real progress on climate, and so for a moment I will talk a little bit about the media, which has played an unfortunate role.

Generally speaking, people in the U.S. media like to get “both sides of the story” just to be fair, which under many circumstances works just fine. After all, the definition of a bad story is one that is one-sided. What happens when one side of the story is factual and the other side is a house of cards? Many in the media still report it as though, on the one hand, scientists say climate change is true, and on the other hand, some say it is not. To be fair, this has improved over the last year or so, but that was the foundational weakness of the American media—their credulity when reporting on deniers—that the climate denial apparatus took full advantage of.

There are not two sides to every issue. Sometimes there are just facts on one side and bull on the other. We don’t argue about the existence of gravity or whether the Earth is round or, thankfully, whether smoking causes lung cancer. We have known since the 19th century that carbon dioxide traps heat much like a greenhouse. We know that burning fossil fuels releases stored carbon into the atmosphere. We have seen the evidence of increasing temperatures and rising sea levels for decades. The correlation between levels of carbon dioxide in the atmosphere and global temperatures is absolutely undeniable. To deny the reality of manmade climate change in this context requires wilful ignorance.

How is this happening? Academics from Yale and Drexel Universities, among others, have researched and exposed the many sources of dark money that are fueling the climate denial machine. My colleagues are speaking today—and spoke well—about some of the greatest offenders, and I will focus my remarks on just two. One is a small organization that most people haven’t heard of, and another is an organization that I think a lot of people who work in politics have heard of. The first is the Center for Study of Carbon Dioxide and Global Change, and the other is the Heartland Institute.

The Center for Study of Carbon Dioxide and Global Change is a family project out of Tempe, AZ, that claims that global warming will be beneficial to humanity. The center does not disclose funding information because they believe doing so would bias the way people perceive their purpose and publications, and that may be the only thing they say that is true. Transparency is crucial in the world of science because it allows the scientific community and the general public to determine whether there might be a conflict of interest. In this instance, there is a conflict of interest. Very, very least, ExxonMobil and Peabody coal have given significant sums of money to the center. When two companies with a
long history of climate denial are pay- ing you to deny the scientific con- sensus on climate change, it is fair to point out that something smells a lit- tle fishy.

Better known than the Center for Study of Dioxide and Global Change is the Heartland Institute, which gained national attention after putting up a billboard comparing those who believed in manmade global warm- ing to the Unabomber, Ted Kaczynski. This tasteless stunt rightfully cost Heartland $825,000 in corporate dona- tions, but Heartland still receives mil- lions of dollars a year from fossil fuel companies and others with a vested in- terest in continuing the status quo. They still have an outsized impact in the national conversation by insinu- ating that the science on climate change is not settled.

Not surprisingly, Heartland follows the tobacco playbook to a T. Their reli- ance on dark money means that Heartland is notoriously dif- ficult to track. According to the watchdog group Conservative Trans- parency, Heartland has received more than $14 million from the Koch-initi- ated Donors Trust and Donors Capital group—which shield donors’ identities. We know that ExxonMobil has contributed at least $675,000 since 1998, and the Union of Concerned Scientists found that 40 percent of those funds were spe- cifically designated for climate change projects. The money from these organi- zations, along with millions from others, allowed Heart- land to publish nearly 3,000 documents toward climate change skepticism be- tween 1998 and 2013. Heartland also or- ganizes gatherings of climate skeptics and defends fossil fuel funding experts who continue to deny the reality of the changing climate we are already seeing today. We have seen this movie before.

What is happening this week is his- toric. We are no longer going to allow these front groups to pose as on-the- level Think tanks. We have a moral ob- ligation to not only solve this problem but to also fix our politics. We should all be making decisions about how best to solve this problem.

Let’s have this great debate. Let the two major political parties have an ar- gument about the best way to tackle climate change because this isn’t just a climate thing at this point, this is an integrity thing.

With that, I yield the floor.

The PRESIDING OFFICER. The Sen- ator from Colorado.

(The remarks of Mr. GARDNER per- taining to the submission of S. Res. 526 are printed in today’s RECORD under “Submission of Reports.”)

The PRESIDING OFFICER (Mr. GARDNER). The Senator from Min- nesota.

Mr. FRANKEN. Mr. President, I rise today to join my colleagues to expose those who try to deny the reality of climate change and try to deceive the American people. This is important because climate change is an existen- tial threat to our planet and to future generations. By denying climate science and lobbying against efforts to address climate change, these deniers are subjecting the planet and every- body on it to great risk.

Climate change will have significant adverse impacts on all of our States, including my State of Minnesota. Just look at our agriculture sector, which is responsible for one out of every five jobs in Minnesota. Warmer tempera- tures, emerging pests, and drought are going to negatively impact this impor- tant rural economic engine. In fact, a recent study estimates that with no adaptation efforts against climate change, Midwest crop production could decrease by more than 60 percent by the end of the century.

Climate change will also impact our waters, and that is important to my State—the Land of 10,000 Lakes—which includes Lake Superior. Lake Superior alone contains about 10 percent of the world’s fresh surface water, and it is warming by two degrees per decade. Because of this warming, we are seeing more evaporation and lower water lev- els in the lake. Plus, rising tempera- tures allow for more favorable condi- tions for hazardous algae blooms. Warmer tempera- tures could also have severe con- sequences for fish like walleye and trout that are so important to Min- nesota fisheries and ecosystems.

And let’s not forget the threat of cli- mate change to our forests. As in our lakes, warmer temperatures elevate the threat of invasive species such as the emerald ash borer and gypsy moth that are rapidly changing the composi- tion of our forests—or the bark beetle in Colorado, the State the Presiding Officer represents. They destroy trees and cost economies and money and jobs.

So we can see that climate change poses a threat to Minnesota and to our country. I believe it is the defining issue of our genera- tion—an issue that demands immediate action. But, unfortunately, there are some groups that have been trying to prevent action. These groups have spent many millions of dollars mud- dying the water, distorting the science, deceiving the American people, and, ul- timately, delaying the response that we desperately need.

Over the last two days, my col- leagues have come to the floor to ex- pose this web of denial—the extensive network of groups and individuals who are spreading lies about climate change—and I am here today to expose one of the worst actors of all: the Her- itage Foundation.

The Heritage Foundation is a right- wing ideological organization known for advocating for discriminatory so- cial and economic policy—things like attacking voting rights, privatizing So- cial Security, and favoring tax breaks for the rich to the detriment of the middle class. They are also a mouth- piece for climate denial.

If you go to the Heritage Foundation web site, you will find that it says that climate change is “used too often as a vehicle to advance special interests and politically driven agendas.” That is rich, coming from an ideological or- ganization devoted to promoting a par- tisan agenda. No one can deny that.

The Heritage Foundation is noto- rious for trying to undermine the science on climate change. Their favor- ite claim is that “the only consensus on the threat of climate change is that it seems to exist these days is that there is no consensus.”

Even as recently as April, a report that the Heritage Foundation issued referred to climate scientists as “a field that is a mere few decades old” and that “no overwhelming consensus exists among climatologists.”

While these statements may grab headlines, they are utterly false. The climate change conference in Paris and met...
with a delegation of leaders from Bangladesh, a country that has contributed little to industrial air pollution but is one of the most vulnerable to the negative impacts of climate change. It is estimated that unless we act, rising sea levels will inundate 17 percent of Bangladesh, submerging about 18 million people in this low-lying nation by the end of this century. Even now, rising sea levels are impacting Bangladesh through salt water intrusion, reducing agricultural yields and ruining drinking water supplies. It is already having a profound effect.

We are talking about a very poor country that doesn't have the resources to deal with climate change. Bangladeshis will be uprooted and turned into climate refugees without a home. I would bet these individuals would disagree with the Heritage Foundation that the impacts of climate change are "far from terrifying.

If you think the Syrian refugee crisis is dire, try just think of the magnitude of what we will see if we do not address climate change. For a lawyer at the Heritage Foundation to make this claim is not only irresponsible but, frankly, dangerous to the welfare of people around the world.

These are just a few examples of the falsehoods that the Heritage Foundation spreads about climate change. If I had the time, I could go on for hours—maybe, even, days—quoting more of those lies. From 1993 to 2013, the Heritage Foundation published more than 1,600 documents contributing to climate skepticism, and they have published many more since. So I think we can say the Heritage Foundation is disingenuous and unwavering in its fraud and deceit.

One might ask: Why would the Heritage Foundation work to deceive the American people in such a way? What do they get out of it?

Well, let me tell you. It is because they are being paid to do so by self-interested fossil fuel companies like ExxonMobil and people with major investments in fossil fuel companies, like the Koch brothers. Perhaps you have heard of them. The Heritage Foundation's work to espouse lies and prevent action on climate change directly benefits the bottom line of the companies and brothers who are funding them. We know this because over the past two decades, they have donated nearly $1 million to the Heritage Foundation; and the Koch brothers, the owners of the fossil fuel conglomerate Koch Industries, contributed nearly $60 million. These companies and brothers are worried that if people knew what their products were doing to the planet, they would stop buying their products or transition to other renewable energy or public policy would drive the markets away from their products. So in order to protect their bottom line, they set out to spread misinformation about what they do for a living, and Heritage and many other similar organizations, are helping them to spread their falsehoods. That is what they do at the Heritage Foundation for a living.

The money paid to Heritage goes to supposed experts whose jobs are to release thousands of bogus reports about climate change. These experts are not climate scientists. They are lawyers and economists serving as puppets for the fossil fuel industry. These same so-called experts publish op-eds and do interviews in media outlets around the country, taking turns spreading disinformation or misinformation or what we sometimes call lies. They also brief Congress and serve as trusted authorities for staff in many Republican offices. So it shouldn't surprise us that my Republican colleagues deny climate change when they rely on these experts.

Despite the best efforts of the Koch brothers, the Heritage Foundation, and other deniers, people around the country know this because over the past two decades ExxonMobil donated nearly $1 million to the Heritage Foundation. In 1997, under a Republican Governor, my home State established a renewable energy standard to produce 25 percent of our power from renewable sources by 2025. That same year, Minnesota passed an energy efficiency standard to require utilities to become a little more efficient every year. To top things off, Minnesota established an aggressive goal to reduce greenhouse gases 80 percent by 2050. These are the kinds of policies that we need to combat climate change. These are also the kinds of policies that the Heritage Foundation is fighting against and not seeing changes to our crops, lakes, and forests. Instead of sticking their heads in the sand, Minnesotans are taking action.

In 2007, under a Republican Governor, my home State established a renewable energy standard to produce 25 percent of our power from renewable sources by 2025. That same year, Minnesota passed an energy efficiency standard to require utilities to become a little more efficient every year. To top things off, Minnesota established an aggressive goal to reduce greenhouse gases 80 percent by 2050. These are the kinds of policies that we need to combat climate change. These are also the kinds of policies that the Heritage Foundation is fighting against and not seeing changes to our crops, lakes, and forests. Instead of sticking their heads in the sand, Minnesotans are taking action.

It is not just the Minnesota legislature that is taking action. Minnesota farmers are not just fighting the importance of fighting climate change. Last year I joined Dave MacLennan, the CEO of Cargill, in penning an op-ed in the Minneapolis StarTribune to highlight the threat of climate change to agriculture, considering that global population will reach 9 billion by midcentury. As the CEO of a food company focused on agriculture, Dave is concerned about what climate change is going to do to our food supply. He also has businesses all over our State that are installing wind turbines and solar panels and manufacturing cutting-edge energy efficiency technologies.

Minnesota wasn't fooled by the Heritage Foundation. On the contrary, to them, climate change represents a Sputnik moment—an opportunity to rise to the challenge and defeat that threat. In response to Sputnik, we didn't just clean our air, but also drive innovation and create jobs, and not only in the clean energy sector.

We did it before, and we can do it again. By rising to the challenge of climate change, we will not just clean our air, but also drive innovation and create jobs, and not only in the clean energy sector.

I have two grandchildren, and I am expecting my third later this year. God willing, they will live through this century and into the next, and in 50 years I don't want my grandson Joe to turn to me and say: Grandpa, you were in the Senate, and you knew about the severity of climate change. Didn't you do anything to stop it? And also, why are you still alive? You are 115 years old.

I will say it was all investments we made over our age. I ask that if my grandson Joe, when he turns 18, knows that when we had the opportunity to put the planet on a safer path, we seized the moment.

So let's not allow the Heritage Foundation and all of these different members of this web to slow us down. Let's not let the selfish motivations of shadowy donors with ties to the fossil fuel industry prevent us from making the planet a safer and more habitable place for our children, our grandchildren, and future generations. It really is time to stand up to ignorance and denial. It is time for all of us on both sides of the aisle to do what is right for future generations.

I thank the Chair, and I yield the floor.

The PRESIDING OFFICER. The majority leader.

ORDER OF PROCEDURE

Mr. MCCONNELL. Mr. President, I ask unanimous consent that notwithstanding rule XXII, at 11 a.m., Wednesday, July 13, the Senate vote on the motion to invoke cloture on the conference report to accompany S. 524. I further ask that following the cloture vote, the Chair lay before the Senate the message to accompany H.R. 636, the FAA bill; that the majority leader or his designee be recognized to make a motion to concur in the House amendments to the Senate amendments; and that the time until 1:45 p.m. be equally divided between the leaders or their designees. I ask that following the use or yielding back of time, the Senate vote on the motion to concur in the House amendments to the Senate amendments with no intervening action or debate and that all time allocated for consideration of H.R. 636 count postcloture on S. 524, if cloture is invoked.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCONNELL. For the information of all Senators, the cloture vote on the CARA conference report will occur at 11 a.m. tomorrow, with the vote on the FAA bill scheduled at 1:45 p.m. Senators should expect a vote on adoption of the CARA conference report during tomorrow's session.

The PRESIDING OFFICER (Mr. Lee). The Senator from Louisiana.

ZIKA VIRUS FUNDING

Mr. CASSIDY. Mr. President, I come as a Senator, but actually I come wearing two different hats right now—two different hats. One of them is a teacher. I still teach at the LSU Medical School and have for the last 30 years, so I decided to do
congressional record — senate

July 12, 2016

S4985

a presentation on something wearing my next hat.

In my life as a physician, I have done much work in public health and have learned, by the way, that if you head off illness early, you save a lot of money, a lot of money. And after that, I call it the balloon theory. If you put a balloon up to helium and you squeeze the nozzle, it inflates quickly, but if you pull it off the nozzle, it remains deflated.

Right now, we have something at risk with Zika that will be like that helium balloon—inflating rapidly unless we do that initial thing that pulls the balloon off the helium so that it works.

I am a teacher, so I decided to do something different. If anybody in the audience so chooses, they can put their phone and their QR code reader up to the television or the computer monitor and they can scan this barcode, and they will see the slides we are about to go over. We are watching to see if you want to go home and you wish to follow, then you can download these slides, and if you think them important, you can forward these slides to another person. Again, that is my effort as a teacher to try to speak, as the head of Zika, to many other Americans.

This is Jose Wesley, born to a Brazilian mother who contracted Zika probably in her first 3 months of pregnancy. When Zika went through the mom’s blood when Jose was in her womb, it entered the amniotic fluid, passed through the placenta, it entered Jose’s body and went to his brain. That virus stayed inside his brain and terribly affected his brain. Jose was born with microcephaly. You cannot really see from this angle what microcephaly is, but what “microcephaly” means is “small brain.” Here is a profile of a child with microcephaly. You can see that unlike the big head babies normally have—this is a very small head. This is associated with severe neurologic deficits and early death. This is a tragedy and potentially a preventable tragedy.

Again, the teacher in me wants to talk a little bit about Zika. The spread of Zika historically gives us insight as to what we must fear now. Zika was first discovered back in 1951 in Africa, Uganda. Then, at some point in the three decades that followed, it spread quickly to Asia, and then from Asia to Yap in the Pacific, which is in the tropics. In 2013 and 2014, it went to more Pacific islands. In 2015 and 2016, it entered the Americas. At some point, it began to spread rapidly. This is important because it is now in the Americas threatening Americans.

These are States which have cases of Zika. Here is the U.S. Virgin Islands. Here is Puerto Rico. They have the most, but almost every State is affected. Most folks have contracted it elsewhere and brought it back to their State, but there are some folks who received it sexually. So their partner contracted it, perhaps in Brazil, and came back to Texas or Florida or Louisiana, where I am from, and they contracted it sexually.

Nonetheless, the virus is in the United States. It is particularly a problem in Puerto Rico and the U.S. Virgin Islands. These are American citizens. These are American citizens. These Puerto Ricans, if they wish, can board a plane and travel anywhere they wish in the continental United States. That is their right as Americans. Similarly, these folks who are infected in these States can travel anywhere they wish.

Why is that important? Well, theoretically, it is important because these are the areas where the mosquitoes that carry the Zika virus live in the United States. So theoretically, wherever these mosquitoes are—and Hawaii should be on here someplace—the virus can enter and the virus can be transmitted by the mosquitoes to many other Americans.

By the way, though, it is not just that you have to live where the mosquito is. Remember, it spread from Yap Island in 2007, which is in the Pacific islands. In 2015 and 2016, it entered the Americas. At some point, it spread rapidly, three decades that followed, it spread to the U.S. Virgin Islands. It is particularly a problem because we have the sort of subtropical climate in which Zika flourishes. That is why I am particularly concerned.

But wearing my other hat as a public health doctor, I know we have this moment in time. Either we pull that balloon off so it does not inflate with Zika, damaging our country, creating more Joses here in the United States, or not.

Some of you may have seen the barcode that I held up initially. You may have downloaded that. We will hold up that barcode again if you wish to download those slides, but all of these are on the PowerPoint presentation that you may download should you wish.

Public health emergencies are inevitable. Let’s talk about the response to this one. Mr. President, $600 million that was left over from the Ebola fund has been released to CDC and other agencies to mount a response against Zika. Now, $600 million was left over, and only one-fifth of it has been spent. So there are still substantial dollars available, but the CDC and other Federal agencies say they need more.

Reprogramming of the $6 billion in additional funding to fight Zika. My colleagues on the Democratic side—we have a difference over this. They are opposing this $1.2 billion to fight Zika because they say the Republican bill discriminates against Planned Parenthood.

Planned Parenthood is not mentioned in the bill, and the way it discriminates—I have been in Washington—in the Senate, at least—for 2 years, and sometimes you have to kind of figure out what people are taking offense at something. Even though Planned Parenthood is not mentioned, the reason they object is because we specify that the money needs to go to a public agency, one that sees Medicaid patients, the State or territory Federal program that takes care of the uninsured. Planned Parenthood is not a Medicaid provider.

So it is not that they are not mentioning the entity that, in Puerto Rico, does not accept Medicaid. So we could carve in and say: If you are a private entity, you can also receive these Federal dollars to provide family planning. It just so happens that in Puerto Rico, Planned Parenthood does not.

So Republicans are trying to release $1.2 billion to pull the balloon off the helium so it does not inflate with all kinds of cases, and one more case of a Jose would be one case too many. But we are caught up in this snafu about Planned Parenthood. It is the craziest thing in the world, but unfortunately it is how Washington, DC, sometimes works.

As a public health physician, I find that incredibly offensive. As a doctor, I understand the critical nature of this. I am asking folks on the other side of the aisle to accept that this bill may not be exactly what they want—it is not exactly what I want—but it is something that would give additional resources to the Centers for Disease Control and others to begin to fight the Zika virus before it comes more extensively to our Nation’s shores.

We can anticipate that public health emergencies in the future are inevitable. For example, we recently had Ebola. We had the West Nile virus. We have already spoken about Zika. So aside from hoping that my Democratic colleagues will agree to release the $1.2 billion to fight Zika now, there is also something else I am proposing, but I don’t want to sound overly partisan because I am doing this particular bill with my Democrats—with Senator BRIAN SCHATZ from Hawaii. We are putting forward the Public Health Emergency Response and Accountability Act.

I am from Louisiana. We have had hurricanes. Hurricane Katrina is the one that is the most famous. If there is a hurricane or another natural disaster that hits an American State, then FEMA has a budget that is automatically triggered. It does not have to go through this appropriations process. We don’t tie it down in discussions of extraneous matters. It is something that immediately comes to bear to bring relief to those affected by natural disasters.

The other thing that is done is that normal Federal contracting processes are waived. So instead of having to get 10 different signatures—which literally might be the case—for someone to travel from Washington, DC, to Louisiana or Kansas or Florida, it is waived. It is that emergency response coordinator may immediately go. There is oversight, so this is not carte blanche, but it is a more effective way
to bring Federal resources, in partnership with local resources, to bring relief to those affected. We bring that flexibility in the use of funds while retaining accountability.

We call this the Public Health Emergency Response and Accountability Act, and we anticipate entering this in very soon. Senator SCHATZ has been gathering testimony today and today to bring attention to these political front groups that are acting as major roadblocks to the actions we must take as a nation and as a global community to address the difficult and disrupting equivocal scientific reality of climate change.

This web of denial is made up of dozens of organizations propped up by dark money. These political front groups work in concert and sell their interests, donors like the Koch brothers—you may have heard of them—peddle bogus theories that climate change isn't real or, at the very least, the American public should doubt the overwhelming scientific consensus and fear what might happen if we enact policies that move us toward cleaner energy solutions. These organizations are promoting policies that are completely counterproductive at a time when we urgently need to take decisive action to combat climate change and to protect the health of our children and future generations.

As many of my constituents know well, climate change has already had a near-real and costly impact in my home State of New Mexico, as it has across our Nation and around the world. In New Mexico, we are already seeing more extreme and prolonged drought conditions, larger wildfires, shrinking forests, and increased flooding. This is the reality now, not some far-off date in the future, and the longer we wait to act, the more difficult and the more expensive the solutions will be.

That is why the fictitious narratives spun by this web of denial and their organizations are so dangerous and why we, as policymakers, need to stand and refute their lies. We need to disclose who they really are and discredit their campaigns.

I am focusing this evening on the American Legislative Exchange Council, or ALEC. ALEC is an organization made up of State legislators across the Nation, and ALEC claims that nearly one-quarter of our country's State legislators are affiliated with the organization. ALEC calls itself a nonpartisan organization that promotes an exchange of ideas to help create State-based policies that promote economic growth.

Sounds like motherhood and apple pie, doesn't it? But when you take a look at who is behind ALEC's operations, and at the types of policy they are pushing in State capitols across this Nation, you get a sense for their real agenda, and you can tell they are part of the coordinated and well-funded campaign to peddle doubt and skepticism about the settled science of climate change. ALEC has been described as "a dating service between politicians at the State level, local elected politicians, and many of America's biggest companies." ALEC writes "model policy"—thousands of cookie cutter, anti-conservation bills that legislators can introduce under their own name, in their own States, in hopes of turning them into law.

Specifically, in the area of energy policy, ALEC pursues a concerted legislative agenda that is in line with the rest of the Koch network to promote climate skepticism and roll back laws that protect clean air and water. ALEC's "model bills" read like they were written by the biggest polluters in our country because they probably were. These resolutions condemning the Clean Power Plan, calling for States to withdraw from regional climate initiatives and to reconsider national environmental standards such as rules that reduce ozone pollution—and, I might add, save lives. ALEC also pushes bills that call for repealing renewable fuel standards that are moving our electric grid toward cleaner energy sources.

ALEC has also written model resolutions that call for selling off or turning over public lands, such as our national forests in Western States like New Mexico and across our country. The current ALEC State chair in my home State of New Mexico introduced legislation at the Roundhouse in recent years called the Federal Public Land Act, which would call on the Federal Government to turn our public lands over to State management.

The only way Western States like mine could foot the bill for administering America's public lands would be to raise taxes dramatically or—and this is much more likely—sell off large expanses to developers and other private interests. Over time, it would mean public lands that New Mexicans go to every summer to hike, camp and barbecue with their families, the national forests where they go to chase elk and mule deer during hunting season would be closed off behind no trespassing signs.

I have long believed public lands are an equalizer in America, where access to public lands ensure you don’t need to be a millionaire to enjoy the great outdoors or to introduce your family, your children to hunting and fishing. This land is just as ludicrous as denying climate change, just as detached from reality, and similarly comes at the expense of our public health and protection of our public lands and resources.

Recently, you don’t have to do a deep-dive investigation to figure out what is going on. The so-called policy experts and leaders that make up ALEC's board of directors are on the record as climate skeptics. ALEC's CEO, Lisa Nelson, said: "I don't know the science of it." When asked if CO2 emissions are the primary driver of climate change, Texas State representative Phil King, the national board
The reality is, the Organ Mountains-Desert Peaks National Monument in Southern New Mexico, which this group has slandered, serves as a national example of community-driven, landscape-scale conservation. In fact, independent polling shows overwhelming local support for this monument, and I am proud of my close work with the region’s diverse coalition and stakeholders that worked so hard for so many years to make that monument a reality. Two years into the Organ Mountains-Desert Peaks designation, local businesses in the Las Cruces area are attracting major tourism dollars and economic benefits. The Lonely Planet guidebook has named Southern New Mexico as a top 10 “Best in the U.S.” for 2016 destination, and highlights the national monument as a reason to visit.

The tax revenues of the town of Mesilla have jumped over 20 percent since the monument designation, and Las Cruces’ lodgers tax revenues are up since 2015, in part because of new conferences and meetings attracted to the area by the monument.

You can see how out of touch these groups are if they pretend instead sell off this public land. The organizations that make up this web of denial are promoting dishonest and deceptive campaigns that frankly run directly counter to the public interest.

At a time when we desperately need to move our State and national energy and conservation policies forward, we should be taking the overwhelming and indisputable scientific fact of climate change seriously, and we should make smart and forward-looking investments in the sustainable, low-carbon fuels of the future.

I am convinced advances in energy efficiency and generation and transmission of clean power offer us a road map to help us combat climate change but to do it in a way that will create thousands of new jobs and much needed economic activity in New Mexico and all across our country.

That is the reality, just like climate change. Climate change is not theoretical. It is one of those stubborn facts that doesn’t go away just because we choose to ignore it or if we listen to the company line from self-interested Koch donor networks and organizations like the Alliance.

I think it is time to call these “Astroturf” groups out for who they really are and, frankly, who they really answer to. More importantly, it is time to take action on the moral challenge of our time—addressing climate change so that our children can inherit the future they truly deserve.

The PRESIDING OFFICER (Mr. PERDUE). The Senator from New Hampshire.

Mrs. SHAHEEN. Mr. President, I rise today to join my colleagues in speaking out against what I believe is the misleading and dangerous campaign of some in the fossil fuel industry to undermine this Nation’s efforts to combat global climate change.

The science on climate change is beyond rational dispute. Climate change is real. It is a clear and present threat to our planet, and it must be addressed responsibly and urgently.

Scientists have proven unequivocally that CO₂ and other greenhouse gases we release into the atmosphere when we burn fossil fuels act to trap heat and form an invisible blanket to warm the planet. Over the last century, the Earth’s average temperature has continued to rise, with 9 of the 10 warmest years on record occurring since the year 2000.

True to form, 2015 was the Earth’s warmest year on record. Rising global temperatures have led to extreme changes in weather events and in our environment. No country is insulated and no State is insulated from the effects of climate change.

In the United States, we are seeing it in this every region of the country, and we are witnessing its effects very dramatically in my State of New Hampshire. Rising temperatures are affecting our tourism industry, recreation, and our agriculture industries. We are experiencing an onset of negative health impacts and increases of insect-borne diseases—Lyme disease is one—all of which can be tied to the effects of climate change.

In the United States and throughout the world, people acknowledge that global warming is an existential threat that requires immediate action to slow its pace and mitigate its effects, even while those climate deniers are still out there, making noise.

According to the Pew Research Center, two-thirds of all Americans acknowledge that climate change is real and that action must be taken to address it. But there are some, an extreme but influential minority, who argue that climate change is a hoax; that it lacks scientific consensus; that the changes we observe are not due to CO₂ and other greenhouse gas emissions, but they are due instead to variations in the sun or cosmic rays; and that policies to limit greenhouse gas emissions will ruin our economy.

Not surprisingly, these climate deniers are not scientists, though they may pretend to be. They are front groups funded by the fossil fuel industry, generally, and the Koch brothers, in particular. These front groups are part of a web of denial wrapped in ideology with the aim of purposely deceiving the public about the dangers of climate change. This is deceitful and it is wrong, and we are here on the floor this afternoon to call out these groups and once again, find the truth in what to watch for and there is some transparency about what is being said.

One of those groups is the Competitive Enterprise Institute or CEI, based in Washington, DC. This group describes itself as “a public policy organization committed to advancing the principles of free enterprise and limited government.” But if we look more
closely, we find that CEI is not an independent organization. It is funded by powerful corporations designed to spread untruths and disinformation on behalf of its corporate sponsors.

In recent years, CEI has taken up the issue of tobacco, including Philip L. Payne, outspoken in disputing scientific evidence that human-produced greenhouse gas emissions are driving global warming.

Some may recognize CEI not for its work on tobacco, but for its prominent role in misleading the public about the scientific evidence linking smoking to lung cancer and heart disease. Legal documents from major tobacco companies exposed the fact that CEI received more than $800,000 from Philip Morris to launch coordinated media campaigns to attack the Food and Drug Administration's efforts to regulate tobacco.

Mr. President, I ask unanimous consent that a series of these documents be printed in the Record, as follows:

**WHO EFFORTS**

Beginning last fall, the assistance of the Washington-based, tax-exempt, Citizens for a Sound Economy and the Competitiveness Enterprise Institute was sought to define the FDA as an agency out of control and one failing to live up to its Congressional mandate regarding regulation of drugs and medical devices.

Beginning in December, those groups conducted media campaigns toward those goals, incorporating the issuance of policy papers, conducting symposia, filing petitions with the FDA and taking other steps to keep the public and media focus on the agency.

On the legislative front, a group of southern Democrats began negotiating with the White House early this year on behalf of the industry seeking to eliminate any role for the FDA in the regulation of tobacco.

The plan those negotiations would be voluntary concessions on the part of the industry on the issue of youth access to cigarettes. Leading the negotiations were Sen. Wendell Ford and Rep. L.P. Payne. After nearly eight months of discussion, the WH rejected the compromise.

Beginning in January, members of Congress—at the urging of several outside groups including Citizens for a Sound Economy—began taking a much closer look at the FDA appropriations request. That scrutiny led to a successful effort to eliminate the $300 million sought by FDA to consolidate its offices in a new federal campus, by any measure a major setback for Kessler.

Meanwhile also was scrutinizing the regular appropriations and voted to freeze the agency's budget, effectively decreasing the level of funding for next year when adjusted for inflation.

Language was included in that legislation to restrict Kessler's authority to assign employees to various projects and a list of questions was submitted to Kessler regarding his investigation into tobacco, including what resources and personnel were being devoted to the litigation.

Congress has not been satisfied with his responses to date, raising the issue of whether Kessler has been evasive or even engaged in obstruction of justice in his role.

Congress also initiated a series of oversight hearings regarding the agency, conducted in the House by Rep. Thomas Bilbo and in the Senate by Sen. Nancy Kassebaum. Those hearings focused on whether the FDA was fulfilling its mandate and included several demands by Congress for documents and deposition.

At the Senate oversight hearing, former FDA Commissioner Charles Edwards testified, raising the issue of whether the FDA was acting legally and responsibly in pursuing a course that would lead to tobacco regulation.

As a result of the growing focus on FDA from inside and outside Congress and the groundwork laid through the oversight and investigations committee work, legislation to reform FDA was introduced this year and is expected to be formally introduced in September. A key provision in the reform legislation will be to restrict FDA's regulatory authority.

The House Agriculture Committee also requested that Kessler supply all documents he was using in consideration of his tobacco regulations. Kessler has resisted, and that effort continues.

In recognition that Kessler ultimately would play any regulatory role regarding tobacco, that campaign was conducted over the past six months to educate members of Congress and their staffs regarding the issue.

One result of that campaign was a July 15 press bipartisan press conference led by Reps. L.P. Payne and Richard Burr as a result of Kessler's issuance of his regulatory proposal to the White House. Participants circulated Dear Colleague letters throughout Congress and submitted Op-Ed pieces to their hometown newspapers challenging the need for FDA regulation.

Also, as a result of those education efforts, delegations of elected officials met with White House officials to seek federal intervention in tobacco regulation.

The groundwork that has been laid legislatively has been designed to create a receptive atmosphere in Congress for legislation that will be introduced to eliminate FDA's role in tobacco regulation. The timing and specifics of such legislation are under consideration.

Efforts in Congress also were made to identify unlikely allies—those who generally are more concerned with the politics of regulation rather than the science—and resulted in meetings with the WH with Sen. Chris Dodd and Rep. Dick Gephardt. Labor also presented opposition to Kessler's role in regulation.

Recognizing that legislators weren't the only point of White House access, a conference of tobacco growers held this summer focused on the ramifications of FDA regulation. Both Sen. Ford and Rep. Payne spoke to growers, and efforts continue to mobilize the agricultural community in opposition to the proposed regulation.

The support of Administration political advisors was enlisted to discuss the ramifications of FDA regulation, and those efforts also continue.

**STATED ACTIVITIES**

Efforts focused primarily on defining the issue of youth smoking as one that properly should be addressed at the state and local level, rather than having FDA intervene with any regulatory scheme.

In all 50 states, the stated goal was to endorse or pass reasonable marketing laws that are consistent with enforcing existing tobacco-control laws. Third-party spokespeople were identified as taking a public role in PM’s response to the FDA’s efforts to regulate tobacco.

Company employees and outside consultants involved in the issue were formally assigned roles as the FDA response team, and efforts began in January to incorporate the various elements into a program addressing all conceivable actions that could be taken by the Clinton Administration or the FDA regarding tobacco regulation.

These efforts encompassed both public affairs campaigns and potential legal filings. Press releases, statements, fact sheets, video news releases, background video and other materials necessary to convey the company's position were drafted and taped for each of the options considered.

PM representatives with scientific credentials were assigned the task of meeting with various “think tanks” to discuss the issue of FDA regulation and generate guest editorials, letters to the editor and comments on the issues.

Those team members who were identified as taking a public role in PM’s response were given media/communications training, focusing on the effective delivery of company messages.

In late spring, the proposed youth access program was resurrected and the company subsequently announced Action Against Access, incorporating voluntary and proposed legislative steps to address the issue of youth smoking.

The announcement of AAA was made at a New York press conference and was accompanied by an aggressive media outreach campaign, including the use of VRs, backdrops, video feeds, floor shows, federal officials and coordination with third-party allies.
In early July, those involved in the FDA working group participated in a simulation geared to measure company response to an announcement by the FDA of full or partial regulation of tobacco.

That exercise envisioned several different actions Kessler could take on tobacco regulation, and measured the company’s response to an announcement. Planned as the result of that exercise, the action plan was fine-tuned to deal with various options Kessler was believed to have available.

By the time Clinton made his announcement, a video news release and background video was fed by way of satellite to television news departments throughout the country. In the time that was booked to provide stations an opportunity to interview PM spokespeople for local broadcasts.

With assistance from Burson-Marsteller, PM press kits were sent to all major Washington-area media in anticipation of stories generated.

While World Regulatory Affairs was dealing with the public affairs aspects of the FDA announcement, the Washington Relations Office mobilized its plans to reach legislators in Washington and in key southern states to mount criticism of the President’s decision.

All materials disseminated to the press also were circulated on Capitol Hill to provide legislators with the PM’s position and rationale for filing suit. With information in hand, several southern legislators were able to react and respond quickly to media inquiries.

The PM briefings on Kessler’s actions extended to conservative columnists and think tanks, enabling them to provide third-party views of the Administration’s action.

Mrs. SHAHEEN. CEI lobbied politicians, conducted symposia, and published and op-ed articles with titles such as “Safety Is a Relative Thing for Cars: Why Not for Cigarettes?” CEI’s then-policy analyst, Alexander Volokh, even went so far as to describe the act of smoking as a civic duty.

As the documents that we have just submitted for the record detail, CEI’s mission was to portray the FDA as “an agency out of control and one failing to live up to its congressional mandate.” For a while, the PM successfully lobbied Congress took a closer look at FDA’s appropriations requests, and lawmakers slashed agency funding and passed language to restrict FDA’s authority to regulate tobacco. In fact, at one oversight hearing, Members of Congress even questioned whether the FDA was acting legally and responsibly in pursuing a course that would lead to tobacco regulation.

If this sounds like deja vu, that is because it is. CEI and other front groups are using the playbook that the tobacco companies used to deny a link between tobacco use and fatal disease. CEI is now on a new mission to confuse and mislead the public on climate change. It is financing and directing ad hoc groups like the so-called Cooler Heads Coalition, which claims that global warming is a myth and that many scientists are skeptics. CEI has also produced two television ads that allege that the polar ice caps are thickening, not shrinking, and that CO2 emissions are good for the environment.

With its ads sounding more like something that Saturday Night Live might come up with. For instance, this is their tagline about CO2:

They call it pollution. We call it life.

Of course, we all know that CO2 is necessary for plant growth. But what that fails to mention is that too much CO2 in the atmosphere can cause global temperatures to rise, and that there is more of it in the atmosphere today than at any time during the last 420,000 years. So there is more carbon, and twice as much CO2, in the atmosphere than at any time during the last 420,000 years.

Just as in the case of Big Tobacco, one need only to look at the results CEI to see how they determine their messages. They have chart here to show where their funding comes from. I would just point out that this is data all compiled from publicly available records. We see ExxonMobil Foundation. Then we see the Koch family and the Koch Industries. We see Philip Morris. So there is significant funding from people who have an agenda about climate change.

My staff has determined that between 1985 and 2015, CEI has received more than $15 million from rightwing organizations like the Donors Trust and the Dunn’s Foundation for the Advancement of Right Thinking. CEI has also received more than $2 million, as we see here, from ExxonMobil, and more than $1 million from the Koch foundation and the Koch family, as we see Philip Morris. So there is significant funding from people who have an agenda about climate change.

Another industry front group I wanted to talk about this afternoon has been exceptionally loud in denying climate change. It is the so-called Energy & Environment Legal Institute, or E&E Legal. E&E Legal has several different aliases—the American Tradition Institute, George Mason Environmental Law Clinic, and Free Market Environmental Law Clinic—but its MO is one and the same. Like CEI, E&E Legal has a core mission of discrediting climate science and dismantling regulations that protect the environment. However, instead of rolling out a campaign of harassment and intimidation, E&E Legal has a different approach. Its specialty is harassing individual climate scientists and researchers with the aim of persuading the public that human-caused global warming is a scientific fraud. Of course, the group’s lawsuits are frivolous and baseless. But this doesn’t matter because the entirety of the lawsuits is to disrupt important academic research, to undermine the scientists who participate, to avoid, or mitigate the impacts of global warming.

Once again, if we look at the funding behind E&E Legal, we understand exactly why this group is attacking climate scientists. E&E Legal does not publicly disclose its donors. We have seen that before. However, bankruptcy proceedings have identified that the group is funded by Arch Coal and Peabody Energy. This shameful and dishonest behavior of these coal companies funding the harassment and intimidation of scientists. They are putting profits ahead of people, and their disinformation threatens the scientific inquiry and transparency we need in order to make smart climate policy decisions to protect the planet from the growing threats of climate change.

In conclusion, big corporations are using organizations that claim to be independent to spread misleading messages to the American people, knowing that people would be quick to discount these messages if they actually knew they were coming directly from coal companies and from Koch Industries. This campaign of disinformation and propaganda endangers the health, environment, and the well-being of people in the United States and across the world. That is why Senators who acknowledge the science of climate change, Senators who understand the urgency of action to combat climate change are speaking out today and for many days to come.

By coming to the floor, we want to expose groups like CEI and E&E Legal for what they are—front groups whose real aim is to spin a web of denial. By championing clean energy solutions, we want to ensure that the United States reduces its dependence on fossil fuels while creating millions of jobs to support our economy in alternative energy and green energy sources.

By supporting our country’s leadership in negotiating the international climate agreement concluded last year in Paris, we are doing our part to slow global warming and help poorer nations most affected by it. This is just the beginning. We will continue to come to the floor to advocate for policies to reduce carbon emissions, to strengthen our economy, and to protect our environment.

I yield the floor. THE PRESIDING OFFICER. The Senator from Rhode Island.

Mr. REED. Mr. President, today I join many of my colleagues here in encouraging the Senate to continue working on solutions to protect our planet from the growing threats of climate change.
First, I would like to thank Senator Sheldon Whitehouse for his leadership and tireless work on these issues. We both represent the great State of Rhode Island, the Ocean State, and I am lucky to have such a strong partner to work with to improve the health of our oceans and fight sea level rise, beach erosion, and ocean warming and acidification. I am proud to work alongside him as we respond to the serious challenges of climate change. Indeed, in this effort in the Senate, throughout my State, and throughout the country, I applaud his commitment to this endeavor and his efforts to organize all of us to come here and to speak out on this growing danger.

We are alreadyShouldering the costs of climate change as Americans, and these costs are increasing. Climate change is driving severe drought and wildfires in the West, larger and more frequent floods in the Midwest, and sea level rise and storm storms along our coasts. Vulnerable populations, like children with asthma and the elderly, are suffering from higher levels of smog in our cities and longer and more severe heat waves. Farmers and ranchers are struggling with crop failures and livestock losses from drought. Increasingly, acidic oceans are harming shellfish populations and threatening fisheries. Communities are struggling to pay for infrastructure damaged by fires, more extreme storms, and coastal erosion.

In the face of this evidence, as my colleagues have all pointed out, there is a systematic and organized effort to discredit, dismiss it, ignore it, but Americans are sensing dramatically the effects in their own lives, and they understand this.

One area I think is important to emphasize is that climate change is not just a local issue or an issue that is associated with domestic policy. It has profound national security ramifications. Indeed, to the military, climate change acts as a threat multiplier, exacerbating threats in already unstable regions of the world. Climate change creates chokepoints for oil distribution lines and exacerbates our dependence on foreign oil to fuel ships, tanks, aircraft, and tactical vehicles.

To protect our national security, we must take action based on scientific evidence presented by our Nation’s best climate scientists. Such experts have overwhelmingly warned us that the increasingly warmer temperatures will mean oppressive heat in already hot areas. This translates not only to geopolitical issues, but it translates down to the individual soldier. For our infantry personnel, this means carrying several pounds of additional gear across dry and arid regions. And supplying these troops with fuel and water is becoming a difficult challenge for our military logistics. It not only leads to greater energy costs, but also to glacial melt, causing sea level rise and ocean acidification, affecting our seafaring vessels and air-craft carriers, and increasing the complexity for our Navy.

One of the more interesting moments I had on the Committee on Armed Services was to listen several years ago to an admiral describe to me that transit of the Arctic Ocean will become commonplace in just a few years. To someone who was brought up in the 1950s and 1960s and served in the military in the 1970s, that seemed completely implausible, but that is happening. Yet there are groups that are in organizations that are trying to make that disappear.

It is not disappearing for our military. They have to cope with it, plan for it, and, indeed, ensure that our security is protected from the ramifications.

In national security, decisions are made by a careful evaluation of risk. Given the preponderance of scientific evidence, it only makes sense that we find and address the issues caused by climate change. National security and foreign policy leaders across the political spectrum issued a statement last year urging the highest levels of American government and business to take domestic and international action to fight climate change. These are the national security experts. They are a bipartisan group of Americans who have dedicated their lives to this Nation. They are not a self-interested group of people who are profiting from a certain position. These are Secretary of Defense Chuck Hagel, William Cohen, and Leon Panetta; Secretaries of State Madeleine Albright and George Shultz; National Security Advisors Zbigniew Brzezinski and Robert “Bud” McFarlane; Senators Olympia Snowe. Carl Levin, and Richard Lugar; New Jersey Governor and Chair of the 9/11 Commission Thomas Kean; and retired U.S. Army Chief of Staff, GEN Gordon R. Sullivan. These and many others agree that climate change is a threat to national security and have called for U.S. leadership in the global effort to tackle the urgent and complex problem of climate change. And yet, even these wise and selfless Americans are being dismissed, if you will, by the organized effort to undercut scientific evidence.

We took steps and have taken steps. Last December, in Paris, we took a step forward with an international agreement that 195 countries pledged to develop plans to tackle climate change domestically, including countries once reluctant to act, such as China and India. American leadership has been the key to getting these countries on board and agreeing to do their fair share. These countries are also acting because it is in their self-interest to do so—for their own health and for their national security.

It is clear that no country can avoid the impacts of climate change, and no country can meet this challenge alone. As a nation that has contributed more than a quarter of all global carbon pollution, it is our responsibility to lead, not to deny. As a nation already feeling the effects and costs of climate change, it is also in our national interest to do so. As we have seen time and again, other countries would join us if America leads the way—not by denial but by dedication and pragmatic solutions that can be seen to work.

American companies must also do a better job in addressing climate change. It is not enough just for America’s government and military to take action; the private sector also needs to step up to the plate. Companies need to be transparent and provide full disclosure of the impacts their industries have on our climate and environment and must take full responsibility for their actions. Some companies have improved their sustainability practices and have made strides to inform consumers about their carbon footprint, and more need to join them. In fact, many companies concluded it is in their economic self-interest to do so, not just in the national or public interest to do so.

Information about the risks posed by climate change is also something that is critical to investors, some of whom are demanding greater disclosures. For example, Allianz Global Investors, which is a global diversified active investment management with nearly $500 billion in assets under manager has specifically called for “achieving better disclosure of the effects of carbon pollution on the Oil & Gas companies.” This is why I have introduced legislation to enhance climate-related disclosures by publicly-traded companies to ensure that these companies are providing investors with the information necessary to make informed investment decisions.

These companies not only have an obligation, as we all do, to the greater welfare of the country and indeed the world, but they owe a very direct and fiduciary responsibility to their investors and to many of these investors. We owe information—I would suspect at least—that should be disclosed, and we have to ensure that they do this so that the market operates appropriately.

It is not just about broad statements of protecting the climate. It is not just about feeling good. It is about making concrete information available to the public, to investors, to the country as a whole—not to deny, obfuscate, or ignore this information.

I urge my colleagues to support legislation that protects our air, water, natural resources, and environment. The health of our oceans and environment must be preserved for now and for future generations. Indeed, in this effort, I think of no one who is taking a more forceful and constructive role than my colleague Senator Whitehouse. Again, I salute him.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. Peters. Mr. President, as ranking member on the Subcommittee on Space, Science and Competitiveness, I
The scientific community is sounding the alarm about the urgent need to address the causes of global climate change. Scientists here in the United States and across the world overwhelmingly agree that the weight of evidence is clear: Global temperatures are rising, dramatic changes in weather and climate have accompanied this warming, and humans are largely responsible due to our emissions of greenhouse gases into the atmosphere.

Military leaders, doctors, economists, and biologists are among the experts warning us about global climate change and the fact that it is a major threat to national security, public health, our economy, and our natural resources.

Unfortunately, powerful special interests, led by some organizations and companies in the fossil fuel industry, are deliberately spreading false information about climate change to influence public opinion and to muddle the truth. The strategy to confuse the public about climate change science and delay policy action has many parallels to the strategy used by Big Tobacco to mislead the public about scientific evidence linking smoking to lung cancer and heart disease.

The corporations spreading disinformation on climate change are the very same interests that have the most to gain financially by stopping meaningful efforts to reduce greenhouse gases, protect our clean air, and address global warming for future generations.

The Koch brothers are a prime example of this fact. Charles and David Koch made their vast fortunes from owning companies that profit from a range of dirty industries. Much of their wealth is funneled into activist groups that produce questionable information and calculations of risk. Often they must act on less than perfect intelligence, but they understand the importance of controlling the narrative to hide the source of the funding.

As a result, I have heard many climate myths repeated in the halls of Congress that were carefully crafted by the network of climate denial front groups. For example, one example is the Cato Institute. For years, the organization has received funding from fossil fuel interests such as ExxonMobil and the Koch family. At the same time, Cato spreads climate skepticism. Over a span of 15 years, the Cato Institute published 773,000 words and 768 documents expressing climate skepticism.

The web of denial is intended to manufacture doubt among the American public in order to delay action, but the spending efforts by the same corporations also specifically target elected officials and other key decisionmakers to prevent meaningful action on global warming.

The Koch brothers have poured vast sums of money into election ads, lobbying efforts, and campaign donations often funneled through other organizations to hide the source of the funding. As a result, I have heard many climate myths repeated in the halls of Congress that were carefully crafted by the network of climate denial front groups.

Last year, Senator Richard Blumenthal, along with his colleagues, was a consensus among 97 percent of the military that any military commander would agree that climate change is a serious threat to national security. Admiral Titley explained that the military makes decisions based on known information and calculations of risk. Often they must act on less than perfect intelligence, but they understand the importance of controlling the narrative to hide the source of the funding.

While some big polluters seek to confuse and cloud the judgment of decisionmakers and the public, the American people continue to suffer the consequences of our dependence on fossil fuels. These consequences are not just limited to rising global temperatures. The people of Michigan are paying for the costs of coal and oil pollution in many ways, but I would like to focus on just a couple of them.

A few years ago, three-story, high piles of oil-contaminated dirt, coke, and other byproducts of fossil fuels are piled up by the banks of the Detroit River in the open air. Pet coke is essentially the industrial byproduct that is produced during the oil refining process. These particular pet coke piles were owned by Koch Carbon, a company controlled by the Koch brothers.

The pet coke piles are shipping off to other countries, where it is burned as fuel, worsening air quality problems in places like China and contributing to global climate change. In this case, the banks of the Detroit River were being treated as a dumping ground for this pet coke. The wind would blow the pet coke dust everywhere, including into the homes and lungs of those living in the neighborhoods nearby. It was even documented blowing across the river into Windsor, Ontario.

In 2008, the governor of Michigan signed an executive order closing the Detroit Riverfront Coke Yard, an operation that has been determined to have a negative health impact on the neighborhoods nearby. It was even documented blowing across the river into Windsor, Ontario.

One not only was the air being contaminated, the pet coke was fouling the Great Lakes, a source of drinking water for nearly 40 million people. When it rained, pollution would run off from the pet coke piles into the Detroit River, which is part of the Great Lakes system.

I joined residents in Detroit to call for these pet coke piles to be moved, and only through a community-wide effort were they successful. I have also introduced legislation to study the health and environmental impacts of this pet coke but, unfortunately, this same area of Detroit that had to deal with mountains of pet coke in the 1970s now is facing the threat of pet coke dust everywhere, including into the homes and lungs of those living in the neighborhoods nearby. It was even documented blowing across the river into Windsor, Ontario.

to anticipate vulnerabilities and mitigate the impacts related to climate change.

The brightest, most experienced minds in our U.S. military realize that reliance on fossil fuel leaves our troops and citizens exposed to more risk at home, as well as abroad. Unfortunately, Congress has not been as quick to act. Efforts to pass meaningful legislation to address climate change have been blocked. Existing administrative efforts to reduce admissions or invest in clean energy have also been repeatedly attacked.

We can and must pass legislative solutions to address global climate change. Transitioning away from fossil fuels and investing in renewable energy will create sustainable jobs and good-paying jobs here in the United States. Taking bold action on climate change will strengthen our public health, economy, and national security.

We must wake up and realize that those who mislead and confuse must not be successful. I am confident that we will overcome this web of denial and use peer-reviewed, sound scientific information to guide our decisionmaking in order to create a resilient world for our children and grandchildren.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arkansas.

HONORING ARMED FORCES

CHIEF PETTY OFFICER ADAM BROWN

Mr. COTTON. Mr. President, the Senate will pass legislation renaming Post Office 620 Central Avenue in Hot Springs National Park after CPO Adam Brown.

I have visited that post office many times as a child, as a Congressman, and as a Senator. I can't say there is all that much remarkable about it, but it will be remarkable after this law is passed.

I don't know Adam Brown, but Adam was about my age. Adam was a great warrior and a hero. Three years ago on Memorial Day in Hot Springs, a gentleman came up to me after I spoke and handed me a book titled “Fearless” by Eric William. It is a New York Times bestseller. It tells the story of Adam Brown. That title captures his spirit. He was fearless, relentless, and also a joyful and Godly man. As a child in Hot Springs, he was the one who always lined up to hit the biggest kid in football. He would jump off a bridge into the local lake and jump out of trucks. Adam was an all-American boy.

During his teenage years, Adam succumbed to addiction. He began to drink, started to use marijuana, became addicted to cocaine, and that led to many crimes. At one point, he had 16 outstanding felonies.

Larry and his mother Janice didn’t know what to do, so they told the sheriff what was going on, and he was arrested. Adam went to Teen Challenge, a Christian ministry dedicated to helping youth overcome addiction. Through his faith in God, love of his parents, and the love of his wife Kelly, he was able to fight back his addiction, although he continued to struggle with it.

With the help of a good recruiter and out of a sense of deep and abiding patriotism for his country, Adam cleaned himself up and entered the Navy. He didn’t just enlist to do any job, though, he enlisted to be a Navy SEAL. It entails some of the hardest training our military has. Adam, of course, got his golden trident and went on to display the same kind of fearlessness and relentless spirit that so many people in Hot Springs and in Arkansas had known.

As anyone who has been in the military knows, there are always some guys in the unit who are downers, looking on the dark side of things, wondering what was going to go wrong next, and Adam was the antidote to that. He always looked on the bright side, always had a sunny outlook, and always had a helpful word for a friend or buddy. He was ready to help the unit accomplish the mission.

Adam went through multiple deployments as a Navy SEAL, and there was never any quit in him. In 2003, he was injured in a simulation round during a training exercise with a miniature paint ball that the military uses. Somehow it got underneath his eye protection and hit him in the eye, and as a result he lost his eye, but, as he always did, he looked on the bright side. He got a glass eye with an Arkansas Razorback on it, and he would put on a pirate patch and play pirate with his two little kids, Nathan and Savannah. It didn’t stop him from continuing to deploy as a Navy SEAL.

He was later involved in a multicar accident while deployed. His hand was crushed and three fingers were severed. The doctors were able to reattach it, but it could no longer be used. Of course, he was eligible to leave the military because of his combat injury, but he didn’t do that. He learned to shoot with the other hand and use his other eye when shooting. In fact, he went on to become a member of SEAL Team Six, the most elite element of the Navy SEAL community.

He continued to deploy and fight but also showed deep compassion. In Afghanistan, he noticed that many of the poor, little Afghan children didn’t even have shoes on their feet on the darkest, coldest days of winter, so he arranged for a large pastor in his community to send shoes that he could give to them.

On March 17, 2010, Adam was on a mission high up in the mountains in Afghanistan. His unit came under intense enemy fire. Adam helped to save the lives of his fellow SEALs, taking multiple rounds himself, and he ultimately perished as a result of his wounds. Adam received a hero’s welcome in Hot Springs, where he rests today.

Adam’s story is about faith, redemption, service, and love. When little boys and little girls drive by that post office in Hot Springs in the future, I hope they ask their parents who Adam Brown was. I hope their parents can tell them his story and inspire them with his example.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.
ALEC, denies that its policy denied climate change. ALEC commits to fighting science in the shadows because it has no facts to bring into the sun. Indeed, its proposed bill, the Environmental Literacy Improvement Act—a very innocuous bill—actually seeks to serve as a group of approval on teaching climate change denial in science classrooms.

These tactics exist because when groups like ALEC or Americans for Prosperity stand ready to deny the truth, some part of our people will believe it.

One leader of the Americans for Prosperity group, when asked about the science of climate change, responded: "I don't even want to argue the point. To me, it's not that important."

This web of denial has consequences. It delays and distorts common awareness and consciousness about the truth and the need to act.

One of my colleagues compared this web of denial to actions of tobacco companies decades ago denying that smoking and tobacco could cause cancer or heart disease or any of the other serious illnesses that tobacco use causes, in addition to the lifetime addiction to nicotine that inevitably was a consequence to so many people who believed those tobacco companies.

That web of denial was similar to this one. The tobacco companies knew the truth. They denied it. These deniers also know the truth. Our purpose in being here today is to make sure the American people know it as well.

Groups like ALEC and Americans for Prosperity may receive support from the economic interests that have a stake in hiding the truth, but ultimately the American people need to know it, they need to act on it, and they need to appreciate the motives and interests of the web of denial that is spun so artfully and relentlessly by these groups and the special interests that adore them and support them.

Mr. President, I wish to thank my colleagues who have come to the floor today, particularly Senator Whitehouse, who has been so instrumental in organizing this group.

I yield the floor.

The PRESIDING OFFICER. The Senator Arkansas.

MORNING BUSINESS

Mr. COTTON. Mr. President, I ask unanimous consent that the Senate be in a period of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO JUDGE TOM EMBERTON

Mr. McCONNELL. Mr. President, I wish to pay tribute to a good friend and mentor of mine who is receiving a great honor from his alma mater of Western Kentucky University. Judge Tom Emberton, former chief judge of the Kentucky Court of Appeals and a man with a long career of renowned service, will be honored as a member of WKU’s Hall of Distinguished Alumni this October. It is the highest award the university can bestow upon an alumnus.

Judge Emberton recalls that his great aunt began the family tradition of attending WKU, and his mother attended also. Tom met his wife at WKU, and his children were all but one of their grandchildren attended as well.

Tom was an active member of the WKU community during his time on campus. He was named business manager of the College Heights Herald, elected president of his sophomore and junior classes, and president of his fraternity. He temporarily interrupted his studies to serve in the U.S. Air Force, where he was part of the Strategic Air Command. After graduation in 1958, Tom began a long history of public service to the people of Kentucky. In 1965, he was elected county attorney. In 1967, he worked on the winning campaign for Governor from Edmonton. He returned to the Republican Governor to be elected in the Bluegrass State in 20 years. After the campaign, Governor Nunn asked Tom to serve as his chief administrative aide.

Tom then became the Republican nominee for Governor himself in 1971. I remember the campaign well, as I worked on it for Tom. I had left my position as a legislative aide here in the Capitol to campaign for Governor. Senator S.S. Slatton,Senator Marlow Cook to go back to Kentucky to work for Tom’s campaign because I believed in him and in what he could do for the Commonwealth. Unfortunately, Tom did not win that race, but he certainly did make a name for himself and earned admiration and respect around the State. We all knew great things were in store for Tom.

Tom continued to practice law in Barren and Metcalfe counties. Then in the late 1960’s, he was appointed by then-Governor Wallace Wilkinson to the Kentucky Court of Appeals. He was reelected to that panel repeatedly and had a long and distinguished career, capped off by being elected chief judge by his fellow judges after several years of service. He held that chief judge slot until his retirement from the bench in 2004.

To this day, Tom is still active in his community with many volunteer and philanthropic activities. He is also an avid reader, and I know one of his favorite places to relax is in his office surrounded by books.

Western Kentucky University has certainly made the right choice in selecting Judge Tom Emberton as a distinguished alumnus. My friend Tom is highly deserving of this honor, and I am sure his family is very proud of him and all he has accomplished. I know my U.S. Senate colleagues join me in congratulating Judge Emberton for this recognition and wishing him the very best in his future life endeavors.

Mr. President, area publication the Herald News recently published an article detailing Judge Emberton’s life and career. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(From the Herald News, June 29, 2016)

JUDGE EMBERTON HONORED BY WKU

(By Shirley Mayrand)

Every couple of years we’re reminded of why we’re so proud of Judge Tom Emberton. In 2014 he received the Jim C. Coleman Community Service Award, and in October he joined WKU’s Hall of Distinguished Alumni during WKU’s 2016 Homecomings Celebration at the Sloan Convention Center. It brings back some fond memories.

“Western has always been a part of my life,” Tom said, “even from a small first grader. My mother went to Western.” His mom finished a year of college and then got a teaching job at a Monroe County school where they lived at the time. Tom recalls how she told him as a first grader he could continue to have fun when he got to Western.

The family moved to Metcalfe County right after World War II ended and Tom graduated from Edmonton High School. He attended one semester at Western before going into the U.S. Air Force where he was part of the Strategic Air Command under General Curtis LeMay. Tom explained, “that was that Russia could get an atomic bomb off in this country, that we could respond to that in 15 minutes.”

1955, Tom returned to Western to resume his education at Western. He credits his great aunt with starting the family tradition of attending WKU. She enrolled in 1909, just three years after it opened. (H.H. Cherry purchased full ownership of the school in 1899 and the Southern Normal School part of the institution became Western Kentucky State Normal School in 1906.)

Tom met his wife, Julia there, their two children attended and all but one of their grandchildren.

Tom believes that his active role at WKU was what earned him the honor of being selected for the Hall of Distinguished Alumni. As a student he was named business manager of the College Heights Herald, elected president of his sophomore and junior classes and president of his fraternity.

Continuing on to the University of Louisville to pursue a law degree, he continued student leadership activities. He was the president of the Delta Theta Phi fraternity and president of the Student Bar Association. “It’s those things that the alumni association looked at to see what you’d done, rather than just walk into class.” Tom got his law degree in 1962 and was elected county attorney in 1965.

In 1967, Tom was tapped by Louis Nunn to assist in his campaign for governor. When Nunn won the election he asked Tom to move to Frankfort and be his chief administrative aide. At that time a governor could only serve one four-year term. Tom’s own bid for the governorship ended after winning the Republican primary, and he returned to the farm at Cave Ridge to practice law in Barren and Metcalfe where he brought Jim C. Coleman in as a law partner.

Around 1976, Tom opened the Southern Mineral coal mine in Issaquena County. KY. Coal was very lucrative at the time, but within a few years the bottom dropped out and he returned to law once again.

Over a long, successful career, his greatest satisfaction came while serving as a Kentucky Court of Appeals Judge. He was first
Ms. STABENOW. No, the bill does not prohibit the labeling of products developed using gene editing techniques, including RNAi and CRISPR. Additionally, the bill gives the USDA broad authority to periodically amend its labeling regulations to ensure that there are no new scientific biotechnology methods that may escape any overly prescriptive statutory definition of biotechnology.

Mr. LEAHY. I thank the Senator from Michigan for joining me in this colloquy for the purpose of bringing greater clarity to the congressional intent regarding the definition of GMO products contained in this bill.

I ask unanimous consent that the USDA general counsel’s response letter dated July 1, 2016, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE, July 1, 2016.

Hon. Debbie Stabenow,
Ranking Member, Senate Committee on Agri-
culture, Nutrition, and Forestry, Wash-
ington, DC.

Dear Senator Stabenow,

Thank you for your letter of June 29, 2016, inquiring as to the scope and applicability of the GMO labeling legislation currently pending before the U.S. Senate. The United States Department of Agriculture, as the lead implementing agency, has carefully studied this legislation from legal, program policy, and scientific aspects. I will respond in turn below to the questions raised in your letter.

(1) Please explain whether the GMO Labeling Law provides authority to the USDA to require labeling of food products that contain widely used commodity crops, like corn, soybeans, sugar, and canola, which have been genetically modified, as defined by Section 291(1)?

Section 291(1) of the Senate bill provides authority to the USDA to require labeling of food products that contain genetically modified material, which result from gene editing techniques.

(2) Please explain whether the GMO Labeling Law provides authority to the USDA to require labeling of products that contain genetically modified material, which result from gene editing techniques? Section 291(1) of the Senate bill provides authority to the USDA to require labeling of food products that contain genetically modified material, which result from gene editing techniques.

(3) Please explain whether the GMO Labeling Law provides authority to the USDA to require labeling of food products, which may or may not contain highly refined oils, sugars, or high fructose corn syrup that have been produced or developed from genetic modification techniques. As a practical matter of implementation, the Department of Agriculture need not look only at the definition in Section 291(1) regarding the genetically modified crops used to produce the refined or extracted materials, but also consider author-

I am writing to clarify the scope of the products that could be labeled under the GMO labeling legislation.

Does the Senator from Michigan believe that the definition of GMO included in this bill prohibits the labeling of highly refined products derived from GMO crops, including soybean oil made from GMO soybeans, high fructose corn syrup made from GMO corn, and sugar made from GMO sugar beets?

Ms. STABENOW. I thank the Senator from Vermont for joining me in this colloquy for the purpose of bringing greater clarity to the definition included in this bill and the scope of GMO products that could be labeled.

The intent of this legislation is to create a national mandatory disclosure standard for GMO foods. This bill gives USDA broad authority to determine, through rulemaking and with important input from the public and scientific community and after review of both State and international laws, what or developed subject to this bill’s mandatory disclosure standard, including highly refined products derived from GMO crops and products developed using gene editing techniques.

The USDA general counsel, in a response letter dated July 1, 2016, stated that the Department has broad authority under this bill to require labels on GMO foods and products, including all commercially available GMO corn, soybeans, sugar beets, and canola crops used in food today.

To answer your specific question, no, this bill does not prohibit the labeling of highly refined products derived from GMO crops including soybean oil made from GMO soybeans, high fructose corn syrup made from GMO corn, and sugar made from GMO sugar beets.

Mr. LEAHY. Does the Senator from Michigan also believe that the definition of GMO food included in this bill prohibits the labeling of ingredients from plants genetically modified through novel and yet to be developed gene editing techniques in addition to the recombinant DNA editing technique mentioned in the bill?
Chiquito after helping dozens of residents move their belongings when government authorities evicted them from land they had occupied.

And on July 6, 2016, Lesbia Janeth Urquia, also a member of the indigenous organization COPINH, Civic Council of Popular and Indigenous Organizations of Honduras, which Ms. Caceres led, was found stabbed to death. Her body was left at a municipal garbage dump in the town of Marcala in the western department of La Paz. It is Shocking that her death was reportedly one of four murders in a period of 5 days in that town alone, which tragically illustrates the appalling extent of lawlessness in Honduras today.

No one has been arrested for Ms. Urquia’s assassination, and it is too soon to assign a motive, but there are disturbing similarities with the Caceres case.

In the first place, before conducting an investigation, the police speculated publicly that another crime—this time of any credible evidence, that the crime was the result of a robbery, a family dispute, or extortion. This is what we have come to expect of some members of the Honduran police.

Beyond that, Ms. Urquia had reportedly been at the forefront of a community struggle against a privatized hydroelectric project along the Chiname River in Marcala, La Paz. Like Agua Zarca, the Chiname project has the support of top Honduran Government officials and was being implemented without the consent of the local communities whose lives will be most disrupted by it.

Last year the Congress, with my support, provided $750 million to help El Salvador, Guatemala, and Honduras address the poverty, violence, injustice, and other factors that contribute to the flood of unaccompanied minors to the United States. On June 29, 2016, the Senate Appropriations Committee, again with my support, approved another $650 million for these countries.

A portion of these funds is for direct assistance for their central governments and is subject to the Secretary of State certifying that they have met certain conditions. In the case of Honduras, how that government resolves conflicts with local communities over the exploitation of natural resources, such as the Agua Zarca and Chiname hydro projects and others like them, and how it investigates, punishes, and apprehends those responsible for the murder of Berta Caceres, Nelson Garcia, Lesbia Urquia, and other activists will factor heavily in whether I will support the release of those funds.

The government’s efforts to protect civil society activists and journalists, who for years Honduran Government officials and law enforcement officers have treated as criminals and legitimate targets for threats and attacks, will also be a factor.

I have followed events in El Salvador, Guatemala, and Honduras since the 1980s. I have watched governments in those countries come and go. They have all shared a tolerance for corruption and impunity, and I regret to say that, despite this, they were supported by the United States. Top officials and their families have gotten rich, while the vast majority of the population is trapped in poverty and struggle to survive.

During those years the United States spent billions of dollars on programs purportedly to raise living standards, reform the police, and improve governance. The results have been disappointing, and any explanations, I believe the lack of political will on the part of those governments and the willingness of successive U.S. administrations to ignore or excuse the corruption and abuses played a big part. We owe it to the people of those countries and to American taxpayers to not repeat those costly mistakes.

Finally, it is important to note that the persecution and killings of environmental activists are a worldwide phenomenon, as documented by Global Witness in its June 2016 report “On Dangerous Ground.” More than three people were killed each week in 2016 defending their land, forests, and rivers against destructive industries.

The report lists 185 killings in 16 countries—the highest annual death toll on record and more than double the number of journalists killed in the same period. In Brazil alone, 50 such activists died. Just last week, we learned of the assassination of Ms. Gloria Capitan, an environmental activist who opposed the construction and presence of coal stockpile facilities in Lucanin, Bataan province of the Philippines.

So in this regard, Honduras is not unique, but its government is seeking substantial economic and security assistance from the United States. In order for us to justify that assistance, the Honduran Government needs to demonstrate that it has met the conditions in our law and is taking the necessary steps to bring those responsible for these crimes to justice.

NATIONAL GASTROPARESIS AWARENESS MONTH

Ms. BALDWIN. Mr. President, I would like to bring attention to the estimated 5 million Americans suffering from this disease and awareness of National Gastroparesis Awareness Month in August.

Gastroparesis is a chronic medical condition in which the stomach cannot empty properly in the absence of any observable blockage. The condition can affect people of all ages, but it is four times more likely to affect women than men. The symptoms of gastroparesis, which include nausea, vomiting, and inability to finish a normal-sized meal, can be debilitating and often lead to hospitalization. Gastroparesis can lead to malnutrition, severe dehydration, and difficulty managing blood glucose levels.

While there is no cure for gastroparesis, some treatments, such as dietary measures, medications, procedures to maintain nutrition, and surgery, can help reduce symptoms. Unfortunately, gastroparesis is a poorly understood condition, and so patients often suffer from diagnosis, treatment, and management of this disorder. As such, further research and education are needed to improve quality of life for this patient population.

I urge my fellow colleagues to join me in recognizing August as National Gastroparesis Awareness Month in an effort to improve our understanding and awareness of this condition, as well as support increased research for effective treatments for gastroparesis. Furthermore, I encourage the Department of Health and Human Services to recognize and include Gastroparesis Awareness Month in their list of National Health Observances.

Thank you.

TRIBUTE TO GENERAL LLOYD J. AUSTIN III

Mr. MCCAIN. Mr. President, today I honor an exceptional military leader and warrior. After nearly 41 years—a lifetime of service to our Nation—GEN Lloyd J. Austin III retired from the U.S. Army, having served most recently as the commander of U.S. Central Command. On this occasion, I believe it is fitting to recognize General Austin’s many years of uniformed service to our Nation.

Over the course of his military career spanning more than four decades, General Austin took on many of the toughest assignments; he led troops in combat. Most recently, he served as the combined forces commander, overseeing the military campaign to defeat ISIL in Iraq and Syria. General Austin’s stellar career was also filled with a number of firsts. He was the first African American to command an Army division in combat, the first to command an entire theater of war, and the first African-American Vice Chief of Staff of the Army and commander of U.S. Central Command.

But this quiet warrior does not focus on his own accomplishments, and he never takes his eyes away from the mission.

General Austin is a soldier’s soldier. He earned a well-deserved reputation as a leader others wanted to follow into battle. On many occasions, they did. Many soldiers have talked about General Austin’s inspiring leadership, particularly under demanding conditions, including combat. He was gifted with
the ability to inspire confidence in his troops and young leaders. He always led them from the front, and he ensured they were successful in any and all endeavors. We saw this at the outset of the Iraq war in 2003 when, as the assistant division commander for maneuver for the 3rd Infantry Division, he helped to spearhead the invasion, maneuvering the division from Kuwait to Baghdad in a record 22 days. We saw it in Afghanistan in 2003–2004, when he was the commander of Combined Joint Task Force 180. We saw it again in Iraq in 2008 when, as the commander of Multi-National Corps-Iraq during the period when the surge forces were drawing down, he helped to achieve greater stability in the country. We saw it once more in Iraq in 2009–2011 when, as commander of U.S. Forces-Iraq, he oversaw the successful completion of Operations Iraqi Freedom and New Dawn.

In an age of tweets and blogs, General Austin never seeks the limelight, preferring to let his actions speak for themselves. He is a consummate professional, and our Nation and its Armed Services will feel the loss of this distinguished officer, gifted leader, and highly decorated warrior. I join my fellow senators on the Senate Armed Services Committee in expressing my respect and gratitude to GEN Lloyd Austin for his outstanding and selfless service to our Nation. I wish him and his wife, Charlene, all the best.

REMEMBERING COLONEL THOMAS SCHAEFER

Mr. SCHUMER. Mr. President, I come to the floor today to honor a beloved U.S. Air Force hero, COL Thomas E. Schaefer, who sadly passed away on May 31.

In 1979, Colonel Schaefer was among those taken hostage in Iran while serving as a military attaché to the U.S. Embassy. From November 4, 1979, to January 20, 1981, Colonel Schaefer survived 444 days of captivity, but never allowed his ordeal or his captors to undermine his spirit thanks to a strong faith in God. To keep his mind alert during that time, he read over 250 books, walked over 200 miles in his room to keep warm, and studied German.

Throughout this time, he overcame this adversity with bravery, endurance, and a spirit that became an inspiration for his friends, family, and all Americans—many of whom greeted him with open arms in 1981 following his release when he returned to his hometown, Rochester, NY.

Originally from Rochester, NY, where much of his family and many friends still reside today, Colonel Schaefer made a lasting impact on the community through speaking publically about his experiences. He wanted everyone and every person to know that they possess an inner strength which allows them to overcome any challenge that may present itself in their lives.

Colonel Schaefer was a brave man, who endured the unthinkable, and his sacrifices should be remembered forever.

Thank you.

REMEMBERING FELIX AND MARIA NORAT

Mr. SCHUMER. Mr. President, I would like to honor the memory of Sgt Felix Norat and his wife, Maria, two remarkable New Yorkers who were interred at Arlington National Cemetery last week. Sergeant Norat was a WWII veteran who served in the Army’s 45th Infantry Division. His bravery and heroism earned him a Bronze Star for Valor, as well as a Purple Heart. Maria was a native of Puerto Rico who worked for the War Department in New York City. Maria and Felix were married nearly 70 years, a testament to their love and devotion to one another. I would like to commit their story—a quintessentially American story—to the CONGRESSIONAL RECORD today.

Mr. Norat’s unit, the 45th Infantry of the Army, was one of the most battle-tested divisions of the war. And Mr. Norat was still among it when the division came to Munich days before the Germans surrendered.

Mr. Norat’s late wife, Maria, upon moving to New York, rented a room from her future mother-in-law, who noticed Maria’s penmanship and asked her to rewrite her letters to her son who was fighting in Europe. Often, Maria would include a note of her own at the bottom of each letter, encouraging Felix and wishing him well. She later recounted, in an interview with the local newspaper, “I was telling him how proud we were that he was serving this great country and how beautiful that was,” she said. “I never thought I was going to fall in love.”

But that is what happened. When Sergeant Norat returned home and met Maria, it was love at first sight. For Maria, it was nice to meet the man whom she would encourage and write to; love came more gradually. The couple courted for 2 years and married in November 1947. Sergeant Norat attended Brooklyn College for engineering and worked in the construction business after 2 years. He and Maria bought oceanfront property and built the Ocean Beach Motel in Montauk, NY.

Though life moved on, the wounds and aftershocks of war did not so quickly fade. Throughout the year after he returned home, if Felix heard anything about昏迷-in-law, a mortar whizzing by, he would instinctively take cover, a result of several close encounters with mortar fire. During the invasion in southern France, he sustained a serious injury from a mortar shell, resulting in an extended hospitalization, which he earned a Purple Heart. In his later years, he also recounts the story of a stroll that saved his life. Felix reported that, a few yards into a walk down the trench he shared with three other GIs from the 45th Infantry, a German shell hit close by, killing two of his friends and taking off the arm of the third. Felix often recounted seeing photos of his friends’ children and lamented that they never knew what happened to their father.”

Felix and Maria sold the motel in 1984, retired, and moved to Naples, FL, a few years later, where they spent their final years in retirement reflecting on the war and on their lives together.

Let the record show that this body recognizes the faithful service of Felix and Maria Norat and their contributions to this country. May their children, grandchildren, and great-grandchildren accept the thanks of a grateful nation. Thank you.

HONORING OFFICER ASHLEY GUINDON

Ms. AYOTTE. Mr. President, today I rise to recognize the extraordinary life and service of a true hero and dedicated public servant whose time was tragically cut short. Officer Ashley Guindon of Merrimack, NH.

Born and raised in Merrimack, NH, Officer Guindon graduated from Merrimack High School in 2005. She later joined the Marine Corps following graduation, honoring the service of her father, New Hampshire Air National Guard member David Guindon, who passed away after returning from serving in Iraq.

In her high school yearbook she wrote, “As I take flight it only makes me closer to [you] daddy. Mom, thanks for everything it’ll be a long road but we can manage and it will only make [you] stronger.” Underneath her picture in her high school yearbook, the caption read, “live for something rath- er than die for nothing.” Officer Guindon did live for something. She lived for her country and she answered the call of duty.

Officer Guindon began her career with the Prince William County Police Department in Virginia and was sworn in as a police officer on February 26, 2016. Tragically, she was killed in the line of duty on her first day.

Officer Guindon responded to an emergency call on her first day of duty as an officer with the same sense of professionalism and dedication demonstrated by the very best of our law enforcement community. Officer Guindon responded quickly and compassionately, embodying her true spirit of selflessness. Her caring manner and desire to help those in need will not be forgotten.

Officer Guindon left behind her mother, Sharon, and her beloved family pug, Scout. We are deeply saddened by the loss of Officer Ashley Guindon, an extraordinary young woman who served our country and her community with honor, courage, and dedication. She
REMEMBERING LIEUTENANT JAMES “JIMMY” GERAGHTY

Ms. AYOTTE. Mr. President, today I wish to recognize and honor the exceptional service and the extraordinary life of New Hampshire State Police Lieutenant James “Jimmy” Geraghty of Bedford, NH. I join his family, his friends, and the law enforcement community in New Hampshire in mourning Jim’s passing after a courageous battle with cancer. I had the honor of working with Jim over the years, and I know that he made a positive difference for so many people in our State. Jim truly embodied a life of service, a life of heroism, and a life of integrity.

Lieutenant Geraghty served honorably in the U.S. Army for 5 years, where he was stationed at Fort Benning in Georgia, Fort Polk in Louisiana, and Fort Richardson in Alaska. Ultimately, he earned the rank of sergeant and received an honorable discharge. After courageously serving our Nation, he then returned home to New Hampshire and embarked on a career in law enforcement, first serving as a police officer in the Hudson Police Department, after which he became a trooper for the New Hampshire State police.

Jim was a member of the New Hampshire State police for 24 years and rose to the rank of commander of the New Hampshire State police major crimes unit—a post in which he served until he became ill last year. Lieutenant Geraghty handled some of the most challenging and horrific cases. He always conducted himself with incredible dedication and commitment.

In 2009, Lieutenant Geraghty led the investigation into the brutal Mont Vernon homicide that focused on multiple, juvenile defendants and was a “complex, and extremely time-consuming investigation.” Despite these challenges, Lieutenant Geraghty excelled in his professional duties as commander of the major crimes unit. His dedication to the investigation was evident, and his commitment to justice resulted in the successful conviction of all the defendants involved.

As New Hampshire’s former attorney general, I worked closely with the major crimes unit, and those of us who had the privilege of working with Jim saw his natural talent for leadership and keen ability to work collaboratively with others. He represented the very best of New Hampshire’s law enforcement.

While Jim was known for his many professional accolades, he was a humble man who never wanted to discuss his accomplishments. Instead, Jim lived by the motto “family first,” which was very apparent to anyone who knew him. Jim and his wife, Valerie, were married for 30 years. Together they had four wonderful children—a son, Jimmy, and daughters, Colleen, Katie, and Erin.

I am honored to recognize Lieutenant Jim Geraghty and his tremendous contributions to New Hampshire as the commander of the major crimes unit. Jim was an amazing individual and a committed family man. There is no question his tenacity is rewarded when she was elevated to the rank of command sergeant major, a first for a Montana woman. She served her State, her country, and her fellow soldiers selflessly as a member of the honor guard and served in Operation Iraqi Freedom.

During her 34 years of service, she received multiple honors and distinctions, including the Bronze Star and the Legion of Merit Medal. After retiring in 2009, Ronda continued to dedicate her life to others. However, this time her priorities were her beloved grandchildren and the community of Helena. Not only was she a leader in uniform, she volunteered her time for events and organizations such as Race for the Cure, the American Legion, the Wine Fair, and many other veteran service organizations.

Ronda fought her final battle against bone cancer and graciously lost the ultimate fight we wish we could change. Those close to her say that, despite the circumstances, she never lost her cheerful spirit or love of life. I thank Ronda for her service and the impact she left on the city of Helena—she truly paved the way for Montana women. I hope she finds rest and that her family finds joy in all the wonderful memories she left behind.

275TH ANNIVERSARY OF EPPING, NEW HAMPSHIRE

Ms. AYOTTE. Mr. President, today I wish to honor Epping, NH—a thriving community in Rockingham County that is celebrating the 275th anniversary of its founding. I am proud to join citizens across the Granite State in recognition of this historic event.

The land where Epping stands today was given by the town of Exeter in 1710 as the part of the “Great Land Giveaway.” In 1741, Epping officially separated from the town of Exeter and was established under Governor Benning Wentworth during the westward expansion of New Hampshire.

Epping is renowned for its many brickyards that thrive off the town’s supply of naturally occurring clay. While the first brickyard did not open until 1840, many previous generations learned the trade and produced their own bricks. Evidence of their hard work is still visible today and indicative of the nature of Epping’s residents.

Epping has produced three New Hampshire Governors, the most notable being William Plummer. Governor Plummer was a lawyer, a Baptist preacher, a historian, and an author. He was also one of New England’s first weathermen, recording weather conditions daily from 1785 to 1840.

Steeped in a rich history of hard work and dedication, Epping is a shining example of what makes New Hampshire great. This year, on the occasion of Epping’s 275th anniversary of its founding, I am proud to join the more than 6,000 residents in celebrating this special milestone and Epping’s many wonderful contributions to New Hampshire and our Nation.

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 10:02 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 1777. An act to amend the Act of August 25, 1958, commonly known as the “Former Presidents Act of 1958”, with respect to the monetary allowance payable to a former President, and amendments.

H.R. 4372. An act to designate the facility of the United States Postal Service located at 15 Rochester Street, Bergen, New York, as the Barry G. Miller Post Office.

H.R. 4960. An act to designate the facility of the United States Postal Service located at 525 N Broadway in Aurora, Illinois, as the “Kenneth M. Christy Post Office Building”.

The enrolled bills were subsequently signed by the President pro tempore (Mr. HATCH).

The message further announced that the House agreed to the amendment of the Senate to the bill at that point by Mr. Hatch (H.R. 636) to amend the Internal Revenue Code of 1986 to permanently extend increased expensing limitations, and for
other purposes, and agrees to the amendment of the Senate to the title of the bill, with an amendment and an amendment to the title, in which it requests the concurrence of the Senate.

At 2:17 p.m., a message from the House of Representatives, delivered by Mr. Novotny, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4785. An act to amend the Homeland Security Act of 2002 to simplify and streamline the information regarding institutions of higher education made publicly available by the Secretary of Education, and for other purposes.

H.R. 3179. An act to amend the loan counseling requirements under the Higher Education Act of 1965, and for other purposes.

H.R. 4949. An act to require an exercise related to terrorist and foreign fighter travel, and for other purposes.

H.R. 4785. An act to amend the Homeland Security Act of 2002 to direct the Under Secretary for Management of the Department of Homeland Security to make certain improvements in managing the Department’s vehicle fleet, and for other purposes.

H.R. 5056. An act to modernize and enhance airport perimeter and access control security by requiring updated risk assessments and the development of security strategies, and for other purposes.

By Mr. UDALL (for himself, Mr. Mikulski, and Mr. Leahy):

S. Res. 527. A resolution recognizing the 75th anniversary of the opening of the National Gallery of Art; to the Committee on Rules and Administration.

By Mr. ALEXANDER (for himself, Mr. Burr, Mr. Cochran, Mr. Cotton, Mr. Isakson, Mr. Kaine, Mr. Perdue, Mr. Shelby, Mr. Tillis, Mr. Warner, and Mr. Wicker):

S. Res. 528. A resolution commending the Tennessee Valley Authority on the 80th anniversary of the unified development of the Tennessee River system; considered and agreed to.

By Mr. BOOKER (for himself and Mr. HATCH):

S. Res. 539. A resolution calling upon the Government of the Islamic Republic of Iran to release Iranian-Americans Siamak Namazi and his father, Baquer Namazi; to the Committee on Foreign Relations.

By Mr. NELSON (for himself and Ms. Collins):
At the request of Mr. Menendez, the name of the Senator from Hawaii (Ms. Hirono) was added as a cosponsor of S. 214, a bill to amend the Securities Exchange Act of 1934 to require shareholder authorization before a public company may make certain political expenditures, and for other purposes.

At the request of Mr. Grassley, the name of the Senator from Maine (Mr. King) was added as a cosponsor of S. 314, a bill to amend title XVIII of the Social Security Act to provide for coverage under the Medicare program of pharmacist services.

At the request of Mr. Truane, the names of the Senator from Illinois (Mr. Kirk) and the Senator from Florida (Mr. Rubio) were added as cosponsors of S. 386, a bill to limit the authority of States to tax certain income of employees for employment duties performed in other States.

At the request of Mr. Portman, the name of the Senator from Tennessee (Mr. Alexander) was added as a cosponsor of S. 524, to authorize the Attorney General and Secretary of Health and Human Services to award grants to address the national epidemics of prescription opioid abuse and heroin use, and to provide for the establishment of an inter-agency task force to review, modify, and update best practices for pain management and prescribing pain medication, and for other purposes.

At the request of Mr. Cardin, the names of the Senator from Oregon (Mr. Merkley), the Senator from Hawaii (Mr. Schatz) and the Senator from Hawaii (Ms. Hirono) were added as cosponsors of S. 772, a bill to secure the Federal voting rights of persons when released from incarceration.

At the request of Mrs. Murray, the name of the Senator from Massachusetts (Ms. Warren) was added as a cosponsor of S. 773, a bill to prevent harassment at institutions of higher education, and for other purposes.

At the request of Mr. Nelson, the name of the Senator from Washington (Mrs. Murray) was added as a cosponsor of S. 978, a bill to amend title 10, United States Code, to repeal the requirement for reduction of survivor annuities under the Survivor Benefit Plan by veterans’ dependency and indemnity compensation, and for other purposes.

At the request of Ms. Klobuchar, the name of the Senator from Hawaii (Ms. Hirono) was added as a cosponsor of S. 1139, a bill to amend the Help America Vote Act of 2002 to require States to provide for same day registration.

At the request of Mr. Durbin, the name of the Senator from Delaware (Mr. Coons) was added as a cosponsor of S. 1538, a bill to reform the financing of Senate elections, and for other purposes.

At the request of Mr. Wicker, the name of the Senator from Montana (Mr. Tester) was added as a cosponsor of S. 2067, a bill to establish EUREKA Prize Competitions to accelerate discovery and development of disease-modifying, preventive, or curative treatments for Alzheimer’s disease and related dementia, to encourage efforts to enhance detection and diagnosis of such diseases, or to enhance the quality and efficiency of care of individuals with such diseases.

At the request of Ms. Cantwell, the name of the Senator from New Mexico (Mr. Heinrich) was added as a cosponsor of S. 2128, a bill to reauthorize the Small Business Innovation Research Program of the Small Business Administration, and for other purposes.

At the request of Mr. Tester, the name of the Senator from Maine (Mr. King) was added as a cosponsor of S. 2175, a bill to amend title 38, United States Code, to clarify the role of podiatrists in the Department of Veterans Affairs, and for other purposes.

At the request of Mr. Blunt, the name of the Senator from Wyoming (Mr. Barrasso) was added as a cosponsor of S. 2217, a bill to amend the Federal Food, Drug, and Cosmetic Act to improve and clarify certain disclosure requirements for restaurants and similar retail food establishments, and to amend the authority to bring proceedings under section 402A.

At the request of Ms. Cantwell, the name of the Senator from Rhode Island (Mr. Whitehouse) was added as a cosponsor of S. 2373, a bill to amend title XVIII of the Social Security Act to provide for Medicare coverage of certain lymphedema compression treatment items as items of durable medical equipment.

At the request of Mr. Cardin, the name of the Senator from Vermont (Mr. Leahy) was added as a cosponsor of S. 2555, a bill to amend the Internal Revenue Code of 1986 to improve the historic rehabilitation tax credit, and for other purposes.

At the request of Mr. Wyden, the name of the Senator from Indiana (Mr. Donnelly) was added as a cosponsor of S. 2750, a bill to amend the Internal Revenue Code to extend and modify certain charitable tax provisions.

At the request of Mr. Moran, the name of the Senator from Wyoming (Mr. Barrasso) was added as a cosponsor of S. 2774, a bill to amend the Internal Revenue Code of 1986 to exclude from gross income certain amounts realized on the disposition of property raised or produced by a student farmer, and for other purposes.

At the request of Mr. Franklen, the name of the Senator from Oregon (Mr. Merkley) was added as a cosponsor of S. 2791, a bill to amend title 38, United States Code, to provide for the treatment of veterans who participated in the cleanup of Eniwetok Atoll as radiation exposed veterans for purposes of the presumption of service-connection of certain disabilities by the Secretary of Veterans Affairs.

At the request of Mr. Whitehouse, the name of the Senator from Maine (Mr. King) was added as a cosponsor of S. 2904, a bill to amend title II of the Social Security Act to eliminate the five-month waiting period for disability insurance benefits under such title for individuals with amyotrophic lateral sclerosis.

At the request of Mr. Lankford, the name of the Senator from Oklahoma (Mr. Inhoffe) was added as a cosponsor of S. 2927, a bill to prevent governmental discrimination against providers of health services who decline involvement in abortion, and for other purposes.

At the request of Mr. Schumer, the name of the Senator from Oregon (Mr. Merkley) was added as a cosponsor of S. 3026, a bill to amend the Communications Act of 1934 to expand and clarify the prohibition on inaccurate caller identification information and to require providers of telephone service to offer technology to subscribers to reduce the incidence of unwanted telephone calls, and for other purposes.

At the request of Mr. Isakson, the name of the Senator from Illinois (Mr. Kirk) was added as a cosponsor of S. 3032, a bill to provide for an increase, effective December 1, 2016, in the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans, and for other purposes.

At the request of Mr. Menendez, the names of the Senator from Illinois (Mr. Durbin), the Senator from Mississippi
Mr. REED. Mr. President, today, along with my colleague Senator HELLER, I am introducing the Storage Technology for Operational Readiness and Generating Energy Act, or STORAGE Act. I thank Senator Heller for his work with me on this bipartisan bill.

The need for energy storage capacity means unused energy from renewable sources can be made available for use when needed, rather than wasted. As a result, advances in energy storage can help improve the reliability, resiliency, and flexibility of the grid, as well as reduce the potential for future rate increases for consumers.

To further encourage the research and development of energy storage technologies, we are introducing legislation that authorizes the Secretary of Energy to coordinate efforts among various existing programs at the Department of Energy. By streamlining these energy storage research and development programs, we hope to improve the efficiency of the use of funds and expand this vital research. I am pleased that the Senate has already included an amendment I offered with Senator HELLER to add these provisions as part of the Energy Policy Modernization Act that we passed earlier this year.

Our bill also amends the Public Utility Regulatory Policies Act of 1978, or PURPA, to add energy storage systems to the list of strategies states should consider when developing their energy plan in an effort to promote energy conservation and greater use of domestic energy. The bill does not mandate the implementation of this or any technology. Rather it simply encourages states to analyze whether energy storage would provide benefits to the overall system. I look forward to working with Senator HELLER and our colleagues to also find a path forward for these provisions.

I urge our colleagues to join in supporting the STORAGE Act and taking commonsense steps to advance energy storage technology.

By Mr. ALEXANDER:

S. 3169. A bill to support basic energy research and eliminate the wind production tax credit; to the Committee on Finance.

Mr. ALEXANDER. Mr. President, I am here to talk about the importance of doubling funding for basic energy research and making $8.1 billion available in the Federal budget to pay for it. The United States does many things well, but one thing we do better than any other country in the world is innovation through basic research. I have been talking a lot this year about biomedical research. Dr. Francis Collins, the Director of the National Institutes of Health—which he calls the “National Institute of Hope”—tells me that in 10 years, researchers in our country may be rebuilding hearts from stem cells, giving patients an artificial pancreas which would help patients with diabetes, and there may be a vaccine for HIV/AIDS.

Just as remarkable are the opportunities available in clean energy research: lowering the cost of energy, cleaning up the air, improving health, reducing poverty, and helping us deal with climate change—not just in the United States, but all around the world.

Congress has been focused on doubling energy research since the 2007 America COMPETES Act that was passed with overwhelming bipartisan support and signed into law by President Bush. America COMPETES grew out of a report called “Rising Above the Gathering Storm,” a report on American competitiveness, written by former Secretary of Energy and Senate Committee’s chair. The report’s main recommendation was to increase energy research because of the benefits it would provide to our country and around the world.

Eight years ago, in a speech at Oak Ridge National Laboratory, I called for a project that would duplicate the urgency of the World War II Manhattan Project and put the United States on a path to clean energy by the end of the year. I proposed seven “grand challenges”—No. 1, make plug-in electric vehicles commonplace; No. 2, find a way to capture and use carbon; No. 3, help solar become cost-competitive; No. 4, safely dispose of nuclear waste; No. 5, encourage cellular biofuels; No. 6, make new buildings green buildings; and No. 7, create energy from fusion.

In 8 years, energy researchers have made tremendous progress in these areas. For example, the price of solar panels has fallen over 80 percent since 2008. In some of the other challenges, we still have a long way to go. That is why we need to keep our focus on making energy research a priority. The biggest challenge we have is funding basic energy research is how we pay for it.

Today I am introducing legislation that finds a way to pay for it by ending the 24-year-old wind production tax credit at the end of this year, rather than in 2019, as the law now says. Instead of slowly allowing the wind production tax credit to phase out, this bill would end it on January 1, 2017. Then Congress could use the $8.1 billion in savings to increase the funding authority for the Office of Science for the same kind of basic energy research that helped drive our natural gas boom and will provide the basis for the next generation of energy innovation that will mean cleaner, cheaper, and more reliable energy.

Research at the Office of Science benefits other Department of Energy programs, including advanced nuclear reactor research at the Office of Nuclear Energy and research on carbon capture technology at ARPA-E, which was formed by the America COMPETES Act. Energy research through the Office of Science, nuclear and fossil energy programs, energy efficiency research, and ARPA-E have led to amazing new discoveries. If more funding is available, it could be used to make sure energy research is a priority.

Let’s not continue to give away this money to wind developers that have been using it to get rich over the last 24 years, often over the objections of communities, towns, and homeowners who don’t want their farmlands and mountain lands covered with 45-story turbines with blades as long as a football field.

It is obvious what Congress ought to do, and it is obvious how we ought to
pay for it. In 2014, taxpayers committed to spend—or Congress committed for them—another $6 billion to extend the wind subsidy for 1 year. Let me emphasize that—$6 billion to extend the wind subsidy for 1 year. That amount is more than the United States of America spends in an entire year on energy research through the Office of Science. That money could be used instead to put us on a path to double government funding for basic energy research.

Let’s not make that same mistake again. Basic energy research is one of the most important things we can do in this country. We need to unlock our free enterprise system to provide clean, cheap, reliable energy that will power our 21st century economy, create good jobs, and keep America competitive in the global economy.

Political scientist Bjorn Lomborg wrote in the Wall Street Journal last month that “the Obama administration’s nuclear power policy, the Clean Power Plan . . . will accomplish almost nothing.” He said:

We should focus more on green-energy research and development, like that promoted by Bill Gates. His Breakthrough Fund. Mr. Gates has announced that private investors are committing $7 billion for clean energy R&D while the White House will double it to around $5 billion green innovation fund. Sadly, this sorely needed investment is a fraction of the cost of the same administration’s misguided carbon-cut policies.

In fact, every dollar invested in subsidies of today’s inefficient green technologies, those who want to combat climate change should focus on dramatically boosting innovation to drive down the cost of future green energy.

Finally, Bjorn Lomborg writes:
The U.S. has already shown the way. With its relentless pursuit of fracking driving down the cost of natural gas, America has made a momentous switch from coal to gas. That is the end of the quote from the article in the Wall Street Journal.

In my own conversations with Mr. Gates, he has said the government should double its $5 billion annual investment in basic energy research in order to support clean energy innovation in the private sector. For example, that research could help develop small modular reactors which would allow inherently safe nuclear power to be produced at a lower cost and invested in less resulting nuclear waste in more places. Small modular reactors are one way the country can increase cheap, clean, reliable power. Another way is to continue to develop new advanced reactors and do the research that is necessary to begin the process of extending reactor licenses from 60 to 80 years.

Why should we close reactors when our 100 reactors provide 60 percent of the carbon-free electricity in the United States? Nuclear power provides 60 percent of the carbon-free electricity in the United States today. It is available 92 percent of the time. On the other hand, wind, despite these huge subsidies, produces 15 percent of our country’s carbon-free electricity. The wind often blows at night when electricity isn’t needed, and it isn’t easy to store that electricity.

It is hard to think of an important technological innovation since World War II that hasn’t involved at least some form of government-sponsored research. Natural gas, our latest energy boom, is a very good example. The development of natural gas was enabled in part by 3-D mapping at Sandia National Laboratory in New Mexico and the Department of Energy’s large-scale demonstration project. Then our free enterprise system and our traditional of private ownership of mineral rights capitalized on our basic energy research.

Supercomputing, which is part of the Office of Science, is another tool for ending our dependence on oil. Supercomputing could do for nuclear power what massive hydraulic fracturing, new mapping tools, and horizontal drilling did for natural gas. By the end of next year, we expect the world’s fastest supercomputer will be in the United States, and once again, it will be at the Oak Ridge National Laboratory in Tennessee.

That computer is called Summit, and it will help researchers better understand nuclear power, and basic energy science to drive breakthroughs. Supporting the next generation of computers, known as exascale, an area of agreement between the Obama administration and Congress, is also essential to our ability to solve the most complex scientific problems for both our country’s competitiveness and national security.

Exascale computers will have a 1,000-fold increase in sustained performance over today’s petascale computers, which have been operating since 2008. Congress can invest in this kind of innovation or we can invest in subsidizing giant wind turbines that produce a small amount of electricity at a great cost to taxpayers. Some energy developers are reaping great financial benefits provided by the wind production tax credit, which has been in place now for 24 years. It has provided billions in subsidies to the wind industry and has been extended 10 different times.

The subsidy to Big Wind is so generous that, in some markets, wind producers can sell electricity away and still make a profit. This phenomenon is called negative pricing. Most of the time, wind power is unreliable and ineffective at meeting the demands of our industries, our farmers, our homes, and almost everything else we depend upon. Nationwide, wind power is available about 35 percent of the time, and only 18 percent of the time in Tennessee, my home State, while nuclear power on the other hand is available 92 percent of the time.

Wind is not effective at meeting peak power demands because the wind blows, as I said, mostly when demand is low at night and does not blow when demand is high during the day. Wind production tends to peak in the spring and fall when the need for energy is at its lowest. In fact, wind production decreases in the winter and summer, when heating and air conditioning can dramatically increase the demand for electricity.

Until there is some way to cost-effectively store wind power, it would be dangerous for a country our size to rely so heavily on variable wind power when nuclear plants are available is the energy equivalent of going to war in sailboats when a nuclear navy is available.

If reliable, cheap, and clean electricity is the goal, then four nuclear reactors, each occupying 1 square mile, would equal the production of a row of 45-story wind turbines strung the entire length of the 2,178-mile Appalachian Trail from Georgia to Maine. Then we could plan to dispose of those turbines along the most picturesque mountains in the Eastern United States, you would still need a nuclear reactor or gas plant to power your home or business when the wind does not blow.

These are not your grandma’s windmills. Each one is over two times as tall as the skyboxes at the University of Tennessee football stadium and taller than the Statue of Liberty. The blade on each one is as long as a football field. Their blinking lights can be seen for 20 miles.

Many communities—take a look at the windmills in Palm Springs, CA—where wind projects have been proposed have tried to stop them before they go up because, once the wind turbines and new transmission lines are built, it is hard to take them down.

In October, the residents of Irasburg, VT, voted 274 to 9 against a plan to install a pair of 500-foot turbines on a ridge line visible from their neighborhoods.

In New York, three counties opposed 500- to 600-foot wind turbines next to Lake Ontario. People in the town of Yates voted unanimously to oppose the project in order to “preserve their rural landscape.” Yet utilities are talking about closing nuclear reactors, which produce 60 percent of our carbon-free electricity.

Finally, Apex Clean Energy announced it would spoil Tennessee’s mountain beauty by building up to 23 wind turbines in Cumberland County, less than 10 miles from Cumberland Mountain State Park, where for a half century Tennesseans and tourists have camped, fished, cycled, and buck ed alongside herons and belted kingfishers around Byrd Lake. Residents are voicing their opposition. The city council has voted to oppose it.

Finally, Clean Line Energy is proposing to build a single 700-mile direct current transmission line from Oklahoma, through Arkansas, to deliver wind power to Tennessee and other
Southeastern States even though the Tennessee Valley Authority has announced publicly that it does not need the power. Yet the subsidies for wind are so large that developers are continuing with wind projects anyway, Arkansas objections to the project. Wyoming between no need the power. But the Federal Government is attempting to use Federal eminent domain to proceed. According to the Congressional Research Service, this would be the first time that Federal eminent domain has been used in the Federal right of way. The Federal government is using the Federal eminent domain law to get access to eminent domain rights for Federal wind projects. The Federal government is using the Federal eminent domain law to get access to eminent domain rights for Federal wind projects.

The wind production tax credit is bad for taxpayers as giant wind turbines are bad for the environment. Clean energy research can help us lower the cost of energy, clean the air and improve health, reduce poverty, and deal with climate change. Let’s end the wind production tax credit this year instead of 2019 and authorize the $8.1 billion in basic energy research to find more ways to ensure that the United States has reliable sources of cheap, efficient, and carbon-free electricity.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 526—CALLING FOR ALL PARTIES TO RESPECT THE ARBITRAL TRIBUNAL RULING WITH REGARD TO THE SOUTH CHINA SEA AND TO EXPRESS UNITED STATES POLICY ON FREEDOM OF NAVIGATION AND OVERFLIGHT IN THE EAST AND SOUTH CHINA SEAS

Mr. GARDNER (for himself, Mr. MCCAIN, Mr. COTTON, Mr. SULLIVAN, Mr. RUHLS and Mrs. ERNST) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 526

Whereas, on July 12, 2016, the Permanent Court of Arbitration (PCA) of the International Tribunal of the Law of the Sea (“Tribunal”), constituted under the United Nations Convention on the Law of the Sea (UNCLOS), done at Montego Bay December 10, 1982, issued a legally binding ruling on the parties in the case brought at the request of the Republic of the Philippines against the People’s Republic of China concerning a dispute over the maritime jurisdiction in the South China Sea;

Whereas the Tribunal supported the Philippines’ claim that China breached its so-called “nine-dash line” sovereignty claims over the South China Sea, concluding that “as between the Philippines and China, China’s claims to historic rights, or other sovereignty rights or jurisdiction, with respect to the maritime areas of the South China Sea encompassed by the relevant part of the ‘nine-dash line’ are contrary to the Convention and without lawful effect to the extent that they exceed the geographic and substantive limits of China’s maritime entitlements under the Convention’’;

Whereas, on January 22, 2013, arbitration began between China and Philippines concerning a petition by the Philippines under Annex VII of UNCLOS to decide the dispute presented by the Philippines;

Whereas, on February 19, 2013, China rejected and returned the Philippines’ Notice of Arbitration and since that date has refused to participate in the arbitration proceedings;

Whereas, on June 21, 2013, the Tribunal was constituted pursuant to the procedure set out in Annex VII of UNCLOS to decide the dispute presented by the Philippines;

Whereas, on October 29, 2015, the Tribunal held that “both the Philippines and China are parties to [UNCLOS] and bound by its provisions on the settlement of disputes,” that “China’s decision not to participate in these proceedings does not deprive the Tribunal of jurisdiction,” that “the Philippine decision to commence arbitration unilaterally was not an abuse of the Convention’s dispute settlement procedures’’;

Whereas the Philippines is one of the world’s most strategically important commercial waterways, and almost 30 percent of the world’s maritime trade transits the South China Sea annually, including approximately $1.200,000,000,000 in ship-borne trade bound for the United States;

Whereas, according to the United States Energy Information Administration, there are approximately 11,000,000,000 barrels and 190,000,000,000 cubic feet of proven and probable oil and gas reserves in the South China Sea;

Whereas, according to the United States Department of Defense, “[a]lthough the United States takes no position on competing sovereignty claims to land features in the region, all such claims must be based upon land (which in the case of islands means naturally formed areas of land that are above water at high tide), and all maritime claims must derive from such land in accordance with international law’’;

Whereas, according to the Department of Defense, “[s]ince Chinese land reclamation efforts began in December 2013, China has reclaimed land in the Spratly islands. China established eight coastal outposts and, as of June 26, 2015, had reclaimed more than 2,900 acres of land’’;

Whereas, according to Director of National Intelligence, “[c]hina has continued its land reclamation efforts at Subi and Mischief Reefs after 5 August 2015, based on commercial imagery. Between that date and late October, China claimed more than 100 additional acres of land’’;

Whereas, according to the Director of National Intelligence, “We assess that China has established the necessary infrastructure to project military capabilities in the South China Sea beyond what is required for port defense of its outposts. These capabilities could include the deployment of modern fighter aircraft, surface-to-air missiles (SAMs), and coastal defense cruise missiles, as well as increased presence of People’s Liberation Army Navy (PLAN) surface combatants and China Coast Guard (CCG) large patrol ships’’;

Whereas, according to the Director of National Intelligence: “We assess that China will continue to pursue construction and infrastructure development at its expanded outposts in the South China Sea. Based on the pace and scope of construction at these outposts, China will be able to deploy a range of offensive and defensive military capabilities and support increased PLAN and CCG presence beginning in 2016’’;

Whereas, on May 30, 2015, Secretary of Defense Ashton Carter stated: “China has pursued an aggressive program of activities in the South China Sea. In the Asia-Pacific region for decades. There should be no mistake: the United States will fly, sail, and operate wherever international law allows, as United States forces do around the world’’;

Whereas, in October 2015, January 2016, and May 2016, the United States Navy conducted three freedom of navigation operations (FONOPs) in the area; and

Whereas United States reiterates its security commitment to Japan and reaffirms that Article 5 of the United States-Japan Treaty of Mutual Cooperation and Security covers all territories under Japan’s administration, including the Senkaku islands; Now, therefore, be it

Resolved, That the Senate—

(1) supports the July 12, 2016, ruling issued by the Tribunal as binding on all parties in the case, and calls on all claimants to purse peaceful resolution of outstanding maritime claims in the South China Sea consistent with international law;

(2) urges all parties to take action to implement the Declaration on the Conduct of Parties in the South China Sea and take steps towards early conclusion of a meaningful Code of Conduct, which would provide agreed upon rules of the road to reduce tension among claimant states;

(3) opposes any actions in the South China Sea to change the status quo by coercion, force, or the threat of use of force;

(4) calls on the Government of the People’s Republic of China to cease all reclamation and militarization efforts in the South China Sea and end provocative actions in the East China Sea, which undermine peace and stability in the region;

(5) reaffirms Article V of the Mutual Defense Treaty Between the United States and the Republic of the Philippines;

(6) reaffirms Article V of the Treaty of Mutual Cooperation and Security between the United States and Japan;

(7) urges the Secretary of State to utilize all diplomatic channels to communicate unwavering commitment and support for freedom of navigation and overflight in the South China Sea; and

(8) urges the Secretary of Defense to pursue enforcement of freedom of navigation and overflight in the East and South China Seas, which is critical to United States national security interests and peace and prosperity in the Asia-Pacific region.

Mr. GARDNER. Mr. President, I rise to speak about American leadership in the Asia-Pacific region, an area that will be more and more critical to our security and prosperity in the years to come.

Today, an international tribunal issued an important ruling regarding maritime claims in the South China Sea, which can potentially have...
lasting consequences for peace and stability in that region and global security in general as the world chooses between an order of rule or an order of lawlessness. Today, the tribunal ruled in favor of our ally the Philippines and again, against the People's Republic of China, which has refused to recognize and participate in the tribunal altogether, a tribunal sanctioned under international agreement both nations are a party to.

The tribunal began its work on January 22, 2013, when the Philippines served notice to China in international court regarding the violations of its sovereignty and China’s claims in the South China Sea.

On February 19, 2013, China rejected and returned the Philippines’ notification, and since that date, China has refused to participate in the arbitration proceedings. On October 29, 2015, the tribunal held that despite China’s nonparticipation, it has the jurisdiction to deliver a binding legal ruling in this case since both nations are treaty participants. Prior to the tribunal, China “breached the sovereign rights of the Philippines” with regard to maritime disputes between the two nations. More importantly, the tribunal invalidated China’s sovereignty claims over almost the entirety of the South China Sea, stating that “China’s claims to historic rights or jurisdiction, with respect to the maritime areas of the South China Sea, encompassed by the relevant part of the ‘nine-dash line’ are contrary to the Convention and without lawful effect.”

While the United States is not directly a party to this dispute and takes no position on the sovereignty claims among the various claimants, this ruling is important for many reasons:

First, the South China Sea is one of the most important commercial waters in the world. Almost 30 percent of the world’s maritime trade transits the South China Sea annually, including approximately $1.2 trillion in shipborne trade bound for the United States.

Moreover, according to the U.S. Energy Information Administration, there are approximately 11 billion barrels and 190 cubic feet of proven and probable oil and natural gas reserves in the South China Sea itself which China wants to claim. Second, the ruling reinforces the right of our military to operate freely in the region, utilizing our long-standing rights of international transit on the high seas—the rights long established by international law.

On May 30, 2015, speaking at the Shangri-La Dialogue in Singapore, Secretary of Defense Ash Carter stated: “The United States will continue to protect freedom of navigation and overflight principles that have ensured prosperity and security in this region for decades. There should be no mistake: The United States will fly, sail, and operate wherever international law allows, as U.S. forces do all over the world.

The United States has since conducted three freedom of navigation operations—or FONOPs—in the area in October of 2015, January of 2016, and May of 2016, transiting inside the 12-mile nautical zone of the contested features in the South China Sea.

Last month, I attended the Shangri-La Dialogue along with a number of my Senate colleagues, and we heard a tremendous amount of concern from regional leaders, not only about the South China Sea but also about whether or not the United States can ensure regionally and globally. The South China Sea is a place where there are important tests of American leadership and our ability to support our close allies in the face of aggression that is outside of international norms.

So we need to start this conversation, as well, by asking the simple question: How did we get here?

I wish to point out a chart that helps show what is going on in the South China Sea. The situation in the South China Sea stems from a Chinese claim that it is their right to the red chart, within the lines. This is what the international tribunal confirmed today. Now it is up to the United States and the world to address the question as to what comes next.

Make no mistake, through these activities, China has sent a message not only to its neighbors but also to America and the world to address the challenge of the South China Sea. Our resolution, first of all, supports the tribunal as binding on all parties and the United States and the world to address the question as to what comes next.

So here is what the tribunal ruled today. It is the very clear and simple ruling that will be binding on all parties. It states that China’s claim is contrary to the Convention and the tribunal’s understanding of the meaning of the ‘nine-dash line’.

As far as the Tribunal is aware, China has never expressly clarified the nature or scope of its claimed historic rights. Nor has it ever clarified its understanding of the meaning of the ‘nine-dash line.’

For decades we did not pay much attention; the U.S. did not pay much attention to these groundless claims because, while there are certainly incidents and skirmishes, China did not take the highly coercive actions to enforce its claims that we see today. However, over the last several years, China has significantly upped the ante and undertaken a massive effort to reclaim a number of the disputed features in the South China Sea and to militarize these islands.

According to the Department of Defense, “[s]ince Chinese land reclamation efforts began in December of 2013, China has . . . reclaimed more than 2,900 acres of land” and “has deployed artillery, built aircraft runways and buildings and positioned radars and other equipment.”

According to the Director of National Intelligence, we assess that China has established the necessary infrastructure to project military capabilities in the South China Sea beyond structures that are covered under international law.

On May 30, 2016, speaking at the Shangri-La Dialogue in Singapore, Secretary of Defense Ash Carter stated: “The United States will continue to protect freedom of navigation and overflight—principles that have ensured prosperity and security in this region for decades. There should be no mistake: The United States will fly, sail, and operate wherever international law allows, as U.S. forces do all over the world.

The United States has since conducted three freedom of navigation operations—or FONOPs—in the area in October of 2015, January of 2016, and May of 2016, transiting inside the 12-mile nautical zone of the contested features in the South China Sea.”

So here is what the tribunal ruled in 2014—this original structure right here, the Hughes Reef. We can see what it looked like here, and in January of 2015: 75,000 square yards of land reclamation activities, the helipad over here, the original structure—we can see it right here—and the cement plant. There are 14 football fields worth of land reclamation on a structure that is 210 miles away from the Philippines yet 660 miles away from China. These actions not only show blatant disregard for the rights of the other claimants in the South China Sea, but it undermines international law.

This is what the international tribunal confirmed today. Now it is up to the United States and the world to address the question as to what comes next.

Make no mistake, through these activities, China has sent a message not only to its neighbors but also to America and the world to address the challenge of the South China Sea. Our resolution, first of all, supports the tribunal as binding on all parties and the United States and the world to address the question as to what comes next.

So here is what the tribunal ruled today. It is the very clear and simple ruling that will be binding on all parties. It states that China’s claim is contrary to the Convention and the tribunal’s understanding of the meaning of the ‘nine-dash line.’

For decades we did not pay much attention; the U.S. did not pay much attention to these groundless claims because, while there are certainly incidents and skirmishes, China did not take the highly coercive actions to enforce its claims that we see today. However, over the last several years, China has significantly upped the ante and undertaken a massive effort to reclaim a number of the disputed features in the South China Sea and to militarize these islands.

According to the Department of Defense, “[s]ince Chinese land reclamation efforts began in December of 2013, China has . . . reclaimed more than 2,900 acres of land” and “has deployed artillery, built aircraft runways and buildings and positioned radars and other equipment.”

According to the Director of National Intelligence, we assess that China has established the necessary infrastructure to project military capabilities in the South China Sea beyond structures that are covered under international law.

On May 30, 2016, speaking at the Shangri-La Dialogue in Singapore, Secretary of Defense Ash Carter stated: “The United States will continue to protect freedom of navigation and overflight—principles that have ensured prosperity and security in this region for decades. There should be no mistake: The United States will fly, sail, and operate wherever international law allows, as U.S. forces do all over the world.

The United States has since conducted three freedom of navigation operations—or FONOPs—in the area in October of 2015, January of 2016, and May of 2016, transiting inside the 12-mile nautical zone of the contested features in the South China Sea.”

So here is what the tribunal ruled in 2014—this original structure right here, the Hughes Reef. We can see what it looked like here, and in January of 2015: 75,000 square yards of land reclamation activities, the helipad over here, the original structure—we can see it right here—and the cement plant. There are 14 football fields worth of land reclamation on a structure that is 210 miles away from the Philippines yet 660 miles away from China. These actions not only show blatant disregard for the rights of the other claimants in the South China Sea, but it undermines international law.

This is what the international tribunal confirmed today. Now it is up to the United States and the world to address the question as to what comes next.

Make no mistake, through these activities, China has sent a message not only to its neighbors but also to America and the world to address the challenge of the South China Sea. Our resolution, first of all, supports the tribunal as binding on all parties and the United States and the world to address the question as to what comes next.

Make no mistake, through these activities, China has sent a message not only to its neighbors but also to America and the world to address the challenge of the South China Sea. Our resolution, first of all, supports the tribunal as binding on all parties and the United States and the world to address the question as to what comes next.
It urges the U.S. State Department to utilize all diplomatic channels to communicate worldwide, unwavering U.S. support for freedom of navigation and overflight of the South China Sea, and it urges the U.S. Department of Defense to routinely enforce freedom of navigation and overflight in East and South China Seas, which is critical to U.S. national security interests and peace and prosperity in the Asia-Pacific region.

It is my sincere hope that instead of an escalation, China chooses the opposite track and abides by this ruling and immediately ceases its destabilizing activities. But should that not come to pass, the United States and our allies must be ready to lead and defend our allies, our values, and our principles.

The world is better served when those of us around the globe recognize rules of international behavior, international law, and that we can together reinforce responsible behavior. And we will know going forward from this ruling if China is going to be a responsible rising power that respects the rules of international law, or if the history books will later look back at this time period and show a nation that decides to ignore international law, to ignore the law that binds itself with its neighbors and, instead, acts out of self-gain and self-interests.

No matter what happens going forward, the United States must show leadership, resolve, and we must show our allies that we are committed to making sure that international law is respected and upheld.

Mr. President, I yield the floor.

SENATE RESOLUTION 527—RECOGNIZING THE 75TH ANNIVERSARY OF THE OPENING OF THE NATIONAL GALLERY OF ART

Mr. UDALL (for himself, Ms. MUKULSKY, and Mr. LEAHY) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. Res. 527

Whereas March 17, 2016, marked the 75th anniversary of the opening of the National Gallery of Art (in this preamble referred to as the "Gallery";)

Whereas the Gallery is the culmination of the dream of Andrew Mellon to endow a true national gallery in Washington, DC;

Whereas Franklin Delano Roosevelt and the 75th Congress recognized the importance of this monumental gift to the people of the United States by quickly accepting the gift of Mr. Mellon on behalf of the United States;

Whereas the landmark buildings of the Gallery were given to the people of the United States as gifts by Andrew Mellon and his children, Paul Mellon and Ailsa Mellon Bruce;

Whereas the agreement to place the Gallery on the National Mall, side-by-side with the monuments most meaningful to the people of the United States, symbolized the importance of art in the life of the United States;

Whereas the extraordinary collection of Mr. Mellon of 153 works of art served as a magnet to attract other gifts from across the United States and established the highest standard of quality for the works of art, resulting in one of the finest collections in the world, with more than 144,000 works;

Whereas the collections of the Gallery have grown entirely through private donations from generous individuals in service to all of the arts in the United States and in the world;

Whereas the Gallery epitomizes the fruitful collaboration of the United States Government and the people of the United States in creating a world-class institution dedicated to art, education, and service;

Whereas all subsequent Presidents and Congresses have supported the Gallery by providing for the protection and care of the collection;

Whereas Federal support and donations of extraordinary art from generous individuals in the United States have resulted in the most successful public-private partnership in the United States, hosting more than 250,000,000 visitors from every State and from other countries to demonstrate the commitment of the United States to promoting the shared cultural heritage of all humanity;

Whereas the Architect collection of the Gallery comprises masterpieces of art from Europe and the United States from the Renaissance period to the present day;

Whereas some Gallery exhibitions have brought great art from throughout the world, from a wide range of cultures and time periods, to the people of the United States;

Whereas the Gallery has set a standard of generosity in lending works of art to museums throughout the United States and sending those works as ambassadors of good will to countries throughout the world;

Whereas, for 75 years, the Gallery has served as both the birthplace of the fine arts collection of the United States and as an active and vigorous educational resource, serving hundreds of thousands of students who visit Washington, DC;

Whereas, since its founding, the Gallery has provided art education programs without charge to students in elementary and secondary schools and at institutions of higher learning in every State;

Whereas, through the support of Andrew Mellon and his son Paul, the Gallery serves as an international center for scholarship and research and is a leader in internationally published conservation and research;

Whereas the Gallery is a superb center for advanced studies in the visual arts that brings new insights to the human heritage of mankind both nationally and internationally;

Whereas the Gallery has created a major art research library, housing a collection of more than 400,000 books, periodicals, and manuscripts, and a superb art reference collection of art and architecture, and an image collection of some 13,000,000 photographs, slides, negatives, and microform images of Western art and architecture;

Whereas, since 1942, the Gallery has sponsored more than 3,100 free Sunday concerts featuring the National Gallery Orchestra as well as musicians and ensembles from around the world for the enjoyment of more than 1,000,000 visitors, creating what is considered the oldest continuous series of free weekly concerts in Washington, DC;

Whereas, to facilitate learning, enrichment, enjoyment, and exploration, the Gallery has expanded its educational mission by creating a world-class institution dedicated to art, education, and service;

Whereas the Gallery has brought great art from throughout the United States and around the world for the enjoyment of more than 1,000,000 visitors, creating what is considered the oldest continuous series of free weekly concerts in Washington, DC;

Whereas, to facilitate learning, enrichment, enjoyment, and exploration, the Gallery has expanded its educational mission by creating a world-class institution dedicated to art, education, and service;

Whereas the Gallery has provided permanence in an ever-changing world, maintaining a tangible record of human aspirations and values for the people of the United States;

Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the 75th anniversary of the opening of the National Gallery of Art; and

(2) acknowledges the contribution of the National Gallery of Art to the cultural life of the United States;

(3) commends the work of the National Gallery of Art to collect and preserve art, educate people in the United States, and bring exciting exhibitions for all to enjoy;

(4) commends the work of the staff of the National Gallery of Art to ensure that all of the people of the United States have access to the highest quality art; and

(5) continues to support the National Gallery of Art, a national treasure.

SENATE RESOLUTION 528—COMMENDING THE TENNESSEE VALLEY AUTHORITY ON THE 80TH ANNIVERSARY OF THE UNIFIED DEVELOPMENT OF THE TENNESSEE RIVER SYSTEM

Mr. ALEXANDER (for himself, Mr. BURR, Mr. COCHRAN, Mr. CORKER, Mr. ISAKSON, Mr. KAIN, Mr. PERDUE, Mr. SHEPHERD, Mr. TILLIS, Mr. WARNER, and Mr. WICKER) submitted the following resolution; which was considered and agreed to:

S. Res. 528

Whereas the Tennessee Valley Authority (in this preamble referred to as the “TVA”) was created by Congress in 1933 to improve navigation along the Tennessee River, reduce the risk of floods and flood damage, provide low-cost electricity, and promote environmental stewardship and economic development in the region;

Whereas the TVA submitted a plan to Congress in March of 1938 to improve navigation of the Tennessee River and to help control flooding in the Tennessee Valley;

Whereas Norris Dam, the first dam constructed by the TVA, began to operate on July 28, 1936;

Whereas the Tennessee Valley Authority, in creating a great institution dedicated to art, education, and service;

(2) acknowledges the contribution of the National Gallery of Art to the cultural life of the United States;

(3) commends the work of the National Gallery of Art to collect and preserve art, educate people in the United States, and bring exciting exhibitions for all to enjoy;

(4) commends the work of the staff of the National Gallery of Art to ensure that all of the people of the United States have access to the highest quality art; and

(5) continues to support the National Gallery of Art, a national treasure.

Resolved, That the Senate—

(1) recognizes the 75th anniversary of the opening of the National Gallery of Art;

(2) acknowledges the contribution of the National Gallery of Art to the cultural life of the United States;

(3) commends the work of the National Gallery of Art to collect and preserve art, educate people in the United States, and bring exciting exhibitions for all to enjoy;

(4) commends the work of the staff of the National Gallery of Art to ensure that all of the people of the United States have access to the highest quality art; and

(5) continues to support the National Gallery of Art, a national treasure.

Whereas the TVA submitted a plan to Congress in March of 1938 to improve navigation of the Tennessee River and to help control flooding in the Tennessee Valley;

Whereas Norris Dam, the first dam constructed by the TVA, began to operate on July 28, 1936;

Whereas the Tennessee Valley Authority, in creating a great institution dedicated to art, education, and service;

(2) recognizes the important role of Norris Dam, the first dam constructed by the Tennessee Valley Authority, which was completed on July 28, 1936;

Resolved, That the Senate—

(1) commends the Tennessee Valley Authority on the 80th anniversary of the unified development of the Tennessee River system; and

(2) recognizes the important role of Norris Dam, the first dam constructed by the Tennessee Valley Authority, which was completed on July 28, 1936;
Whereas Baquer Namazi is a recognized leader of humanitarian causes, especially poverty eradication, through his United Nations work and his post-retirement civil society activities.

Whereas Secretary of State John Kerry stated on February 25, 2016, in response to a question about the detention of Siamak Namazi, “I am very familiar with this and I am engaged on it specifically”; and

Whereas on January 16, 2016, the Government of the Islamic Republic of Iran released United States citizens Jason Rezaian of California, Saeed Abedini of Idaho, Amir Mirzaei Hekmati of Michigan, Matthew Trevithick of Massachusetts, and Shah Khosravi-Roodsari. Now, therefore, be it

Resolved, That the Senate—

(1) calls upon the Government of the Islamic Republic of Iran to unconditionally release Siamak and Baquer Namazi immediately;

(2) urges the Secretary of State, the allies of the United States, and the United Nations to raise the cases of Siamak and Baquer Namazi with officials of the Government of the Islamic Republic of Iran at every opportunity and undertake efforts to secure their immediate release;

(3) encourages the President to utilize appropriate leverage against the Government of the Islamic Republic of Iran if Siamak and Baquer Namazi are not released; and

(4) expresses sympathy to the family of Siamak and Baquer Namazi for their anguish and expresses hope that their ordeal can be brought to an end in the near future.

Whereas dual citizen of the United States and Iran Siamak Namazi studied international relations at Tufts University and urban planning at Rutgers University;

Whereas Siamak Namazi was named as a Young Global Leader by the World Economic Forum in 2007;

Whereas Siamak Namazi was a former Public Policy Fellow at the Woodrow Wilson Center for International Scholars, was a business consultant, and most recently worked in the petroleum industry for a company based in Dubai, United Arab Emirates;

Whereas Siamak Namazi was prohibited from leaving Iran in mid-July 2015;

Whereas Siamak Namazi was interrogated for 3 months before he was detained on October 15, 2015, without any charges;

Whereas Amnesty International has stated that defendants in Iran have reported “acts of torture and other ill-treatment, particularly during primary investigations, mainly to force confessions” and other forms of “cruel, inhuman or degrading treatment or punishment”.

Whereas on March 14, 2016, the United Nations Special Rapporteur on the situation of human rights in the Islamic Republic of Iran stated that serious human rights abuses continue in Iran including “an alarming surge in the rate of unlawful executions in the country and ongoing arbitrary arrests, detention and prosecution of individuals for the exercise of their fundamental rights” and that at least 966 persons were executed in Iran in 2015, which is the highest rate in more than 20 years.

Whereas Siamak Namazi remains under arrest in Evin Prison even though no charges have been filed against him;

Whereas dual citizen of the United States and Iran Baquer Namazi, who is the father of Siamak Namazi was detained on February 22, 2016, and is also being held in Evin Prison;

Whereas Baquer Namazi worked for UNICEF in New York and served as the UNICEF Representative to Somalia, Kenya, UNICEF in New York and served as the UNICEF Representative to Somalia, Kenya, UNICEF in New York and served as the

Whereas Baquer Namazi is a recognized leader of humanitarian causes, especially poverty eradication, through his United Nations work and his post-retirement civil society activities.

Whereas Siamak Namazi was detained on February 22, 2016, and is also being held in Evin Prison;

Whereas Baquer Namazi was named as a Young Global Leader by the World Economic Forum in 2007;

Whereas Siamak Namazi was a former Public Policy Fellow at the Woodrow Wilson Center for International Scholars, was a business consultant, and most recently worked in the petroleum industry for a company based in Dubai, United Arab Emirates;
Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) acknowledges the financial and moral commitment of the Federal Republic of Germany over seven decades to provide a measure of justice for Holocaust victims; and

(2) supports the goal of ensuring that all Holocaust victims in the United States and around the world are able to live with dignity, comfort, and security in their remaining years.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES
Mr. THUNE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on July 12, 2016, at 9:30 a.m.
The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION
Mr. THUNE. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on July 12, 2016, at 10 a.m., in room SR–253 of the Russell Senate Office Building to conduct a hearing entitled “How Will the FCC’s Proposed Privacy Regulation Affect Consumers and Competition?”
The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS
Mr. THUNE. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on July 12, 2016, at 2:30 p.m., in room SD–366 of the Dirksen Senate Office Building to conduct a hearing entitled “Public-Private Partnerships in Foreign Aid: Leveraging U.S. Assistance for Greater Impact and Sustainability.”
The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE
Mr. THUNE. Mr. President, I ask unanimous consent that the Select Committee on Finance be authorized to meet during the session of the Senate on July 12, 2016, at 10 a.m., in room SD–226 of the Dirksen Senate Office Building to conduct a hearing entitled “FOIA at Fifty: Has the Sunshine Law’s Promise Been Fulfilled?”
The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY
Mr. THUNE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on July 12, 2016, at 10 a.m., in room SD–226 of the Dirksen Senate Office Building to conduct a hearing entitled “FOIA at Fifty: Has the Sunshine Law’s Promise Been Fulfilled?”
The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVATE LEGISLATIVE SESSION
The PRESIDING OFFICER. The Senate will now resume legislative session.

UNITED STATES SEMIQUINCENTENNIAL COMMISSION ACT OF 2016
Mr. COTTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 4875, which was received from the House.
The PRESIDING OFFICER. The clerk will report the bill by title.
The senior assistant legislative clerk read as follows:
A bill (H.R. 4875) to establish the United States Semiquincentennial Commission, and for other purposes.
There being no objection, the Senate proceeded to consider the bill.
Mr. COTTON. Mr. President, I ask unanimous consent that the bill be read a third time and passed and the motion to reconsider be considered made and laid upon the table.
The PRESIDING OFFICER. Without objection, it is so ordered.
The bill (H.R. 4875) was ordered to a third reading, was read the third time, and passed.

EXECUTIVE SESSION
EXECUTIVE CALENDAR
Mr. COTTON. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nomination: Calendar No. 652 only, with no other executive business in order.
The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.
The clerk will report the nomination.
The senior assistant legislative clerk read the nomination of Carol Schwartz Rendon, of Ohio, to be United States Attorney for the Northern District of Ohio for the term of four years.
Thereupon, the Senate proceeded to consider the nomination.
Mr. COTTON. Mr. President, I know of no further debate on the nomination.
The PRESIDING OFFICER. If there is no further debate, the question is, Will the Senate advise and consent to the Rendon nomination?
The nomination was confirmed.
Mr. COTTON. Mr. President, I ask unanimous consent that the motion to reconsider be considered made and laid upon the table, the President be immediately notified of the Senate’s action, and the Senate then resume legislative session.
The PRESIDING OFFICER. Without objection, it is so ordered.
The clerk will report the bill by title. The senior assistant legislative clerk read as follows:

A bill (S. 2650) to amend the Internal Revenue Code of 1986 to exclude from gross income any prizes or awards won in competition in the Olympic Games or the Paralympic Games.

There being no objection, the Senate proceeded to consider the bill.

Mr. COTTON. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be considered made and laid upon the table, and that the papers be held at the desk.

The PRESIDING OFFICER. The bill (S. 2650) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

SEC. 2. OLYMPIC AND PARALYMPIC MEDALS AND USOC PRIZE MONEY EXCLUDED FROM GROSS INCOME.

(a) IN GENERAL.—Section 74 of the Internal Revenue Code of 1986 is amended by adding at the end the following new subsection:

"(d) EXCEPTION FOR OLYMPIC AND PARALYMPIC MEDALS AND PRIZES.—Gross income shall not include the value of any medal, prize, or any prize money received from the United States Olympic Committee on account of, competition in the Olympic Games or Paralympic Games.”

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to prizes and awards received after December 31, 2015.

For further consideration of the bill, the Senate proceeded to consider the resolution.

Mr. COTTON. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 528) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is printed in today’s RECORD under “Submitted Resolutions.”

ORDER FOR WEDNESDAY, JULY 13, 2016

Mr. COTTON. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9:30 a.m. on Wednesday, July 13; that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, and the time for the two leaders be reserved for their use later in the day; further, that following leader remarks, the Senate resume consideration of the conference report to accompany S. 524, with the time until 11 a.m. equally divided between the two leaders or their designees.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT

Mr. COTTON. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it stand adjourned under the previous order, following the remarks of Senators MARKEY and WHITEHOUSE.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate from Massachusetts.

CLIMATE CHANGE

Mr. MARKEY. Mr. President, it is summer. It is supposed to be hot, but if last month felt hotter than past summers, you are right. Last week the National Oceanic and Atmospheric Agency, or NOAA, said the United States experienced its warmest June on record ever. Already this year there have been eight weather-related and climate-related disasters that each caused at least $1 billion in damage. Globally, it was found that 2015 was the hottest year on record, and so far this year is on track to beat it. We can’t even hold the record for a year—2016 has been as hot as Pokemon GO—and anyone watching the Senate floor tonight who is younger than 31 has never experienced in their life a month where the temperature was below the 20th century average.

That last happened in February of 1985. Ronald Reagan was starting his second term as President, and “Beverly Hills Cop” was the No. 1 film at the box office. If you went to the movies that month, you probably saw a trailer for what would be that summer’s blockbuster, “Back to the Future.”

Well, that future is here. Temperatures are increasing, sea levels are rising, rainfall is more extreme, and the oceans are more acidic. Why is that? It is mostly because of carbon dioxide pollution that is released from the extraction and burning of fossil fuel. Virtually all climate scientists agree that the climate is changing because of human interference with the climate is now the driving force of that change.

Thanks to excellent investigative reporting at Inside Climate News and other news outlets, we now know that as far back as the 1970s, Exxon and the other oil companies were following the latest developments in climate science and Exxon was undertaking its own research on the impact of carbon pollution on the climate.

The top leadership of Exxon was warmed in July of 1977 by its senior scientist James Black: “In the first place there is general scientific agreement that the most likely manner in which mankind is influencing the global climate is through carbon dioxide release from the burning of fossil fuels.”

That is from 1977 to Exxon from its own scientists. A year later in 1978, that same scientist once again told senior management: “Present thinking holds that man has a time window of 5 to 10 years before the need for hard decisions regarding changes in energy strategies that might become critical.”

Ten years later in 1988, a memo laid out Exxon’s position, which included three key points: to note the uncertainty in scientific conclusions regarding the potential enhanced greenhouse gas effect; No. 2, urge a balanced scientific approach; and No. 3, resist the overstatement and sensationalization of potential greenhouse gas effects which could lead to economic development of nonfossil fuel resources.

Exxon knew full well back then the impact of carbon dioxide on the climate and what that could mean to their businesses. Exxon and the Koch brothers, Peabody Energy, and other individuals and businesses whose profits might suffer under rules to reduce
carbon pollution have had a vested interest in stopping climate action for decades.

That is why Congress still hasn’t sent comprehensive climate legislation to the President. More than 50 years ago, in 1963, President Lyndon Johnson noted that “the increase in carbon dioxide from the burning of fossil fuels has altered the composition of the global atmosphere.” Since then, the scientific evidence and observations of climate changes already underway have continued to mount.

But even as the science has become overwhelming, climate policies have gotten trapped in a web of denial. During the last 2 decades, we have heard many of my colleagues talk about the many strands of this web of denial. Like a real spiderweb, it is hard to see this web unless the light catches it in just the right way. So this evening I am going to shine a light on a few threads of this web.

At the heart of this web is denial. That is where you find the George C. Marshall Institute, whose attacks on the science of the so-called nuclear winter of nuclear war and its opposition to the nuclear freeze movement expanded over the years to include anti-climate change efforts. The institute was named after the U.S. Army Chief of Staff during World War II who then became Secretary of State. He helped to rebuild Europe and won the Nobel Peace Prize for what is now called the Marshall Plan. Given Marshall’s view of the need to address hunger, poverty, desperation, and chaos, it seems likely that if he were alive today, he would agree that national security experts see that climate change is a security threat to the United States. Marshall himself would likely support efforts like the Green Climate Fund to ensure that the poorest countries have the means necessary to overcome the challenges climate change poses to their economic development. He would likely support American leadership of global climate efforts to ensure that all countries are taking action to address climate change.

But the institute that carries the George Marshall name has countered international climate science and action every step of the way. When the Marshall Institute first expanded into environmental policy in the 1980s, the environment and climate change had bipartisan support. In the 1988 election, George Herbert Walker Bush pledged to Congress multiple times espousing climate change and effort to fight climate change. But the Marshall Institute’s efforts alone were not enough. So they helped form the cynically named Global Climate Coalition in 1989, shortly after the formation of the IPCC at the U.N. to fight climate change.

When I was chairman on the Select Committee on Energy Independence and Global Warming, in the House of Representatives, I heard Dr. Happer use the theatrics of a CO₂ meter as proof that climate change doesn’t exist. He advocated for the government to support an “alternative hypothesis” and to support his alternative hypothesis by funding the denial of climate change. Just last year, while the climate talks in Paris were underway, Dr. Happer testified before the Senate Commerce Committee, continuing to spread doubt. But this past May, William Happer was a signatory on a misleading, full-page ad in the New York Times. The ad, placed by another thread in the web of deceit, the Competitive Enterprise Institute, attacked the reasonable efforts of New York Times editorial board members of manufacturing, automotive, oil and gas, mining and chemical industries, as well as a member of the House of Commerce. They invested in denial and delay to allow business as usual to continue. But climate science and international climate efforts continued to advance after the UN Framework Convention on Climate Change came into force.

Of course, the fossil fuel coalition’s concern continued to increase. As the IPCC worked on its second report in the early 1990s, it decided to include a chapter entitled Detection of Climate Change and Attribution of Causes. It became clear that the world’s climate scientists were examining the considerable collection of climate observations and research to see what they could say about human influence on the climate.

So the Global Climate Coalition sprang into action to influence what the IPCC might say about the human influence on climate. November 18th’s session to finalize the text of the IPCC report, alongside Saudi Arabian and Kuwaiti representatives, the Global Climate Coalition weighed in heavily against the chapter focused on the detection and causes of climate change. After a flurry of negotiations and U.S. government objections, the IPCC agreed that the amassed climate observations “now point toward a discernable human influence on global climate.”

The world’s climate scientists—the government representatives had now acknowledged that humans were altering the climate. So the calls for climate action got louder, and the effort
to extend the 1992 United Nations Framework Convention on Climate Change and draft what would become the Kyoto Protocol in 1997.

But in an effort to silence the calls to action, the investment in the web of denial began.

The Global Climate Coalition spent more than $13 million opposing the Kyoto Protocol. Between 1994 and 1997, they spent $1 million every year downplaying the threat of climate change.

Ultimately, this broad coalition collapsed as their business interests and the impact of climate change on their profits changed. The Global Climate Coalition closed its doors in 2002, but the web of denial was already stretching to find new places to grow. Those threads have since expanded with the careful cultivation and collusion by the fossil fuel industry and the petro-politicians.

We know that the Koch brothers, Exxon, and other major donors have invested millions of dollars into organizations that actively work to discredit climate change and oppose climate legislation. Those organizations pressure elected officials to take increasingly extreme positions on specific issues to gain attention and focus on the members of the Republican Party.

During President George W. Bush’s first campaign in 2000, he promised to fight climate change by limiting greenhouse gas emissions. But when he pulled the United States out of the Kyoto Protocol in 2005, his Vice President, Dick Cheney, helped pass an energy bill that included massive subsidies and tax breaks for the fossil fuel industry.

As recently as 2008, the Republican Presidential nominee, Senator John McCain, recognized the science of climate change and supported action. This was an era that has now passed. The Koch brothers have firmly trapped this issue in the Republican Party in such a way that no action is possible at all. But even in the face of the millions of dollars pumped into the denier machine, the House of Representatives was able to overcome it in 2009.

The Waxman-Markey bill passed the House just over 7 years ago. It was the only comprehensive climate change legislation ever to pass a Chamber of Congress. It has been reported that the oil industry- including the Koch brothers and ExxonMobil, spent $175 million and hired more than 800 lobbyists in 2009 to kill the Waxman-Markey bill. Let me give those numbers again: $175 million and 800 lobbyists to kill a bill that would have put a cap on the increase in greenhouse gas emissions in the United States.

They saw any action on climate, especially legislation, as a threat to their bottom line. But Members of the House knew better. They saw that Waxman-Markey was good for our environment, good for our economy, good for America. A Congressional budget analysis found that Waxman-Markey would have reduced the Federal deficit and cost the average American household less than 50 cents per day. An analysis of the American Council for an Energy Efficient Economy found that Americans would save about as much as CBO’s cost estimate from energy efficiency policies in the bill that CBO did not take into account.

With an outstretched arm to lift them into the clean energy future, the bill included $200 million for the coal industry, $200 billion to capture carbon and to sequester it. Seven years ago, we gave the fossil fuel industry a choice: legislation or regulation.

But Exxon opposed the bill. The Koch brothers opposed the bill. Peabody coal opposed the bill, except for the parts that helped the coal industry. Rather than change their current business model, centered on pumping more CO2 into the atmosphere, they fought against it to change. Peabody coal has filed for bankruptcy. We are continuing to unangle the Koch brothers’ web of denial.

The Koch brothers have lied to the American people about climate change. They have also lied to their own employees. When Waxman-Markey was being debated, the Koch Industries newsletter published an article attacking the climate change legislation and encouraging employees to check out specific Web sites for more information. The listed Web sites were funded by the Koch brothers. They sent their employees to other parts of the web of denial. When a Republican tries to stop them at superhuman climate action, the Koch brothers’ ‘spidy sense’ goes off and their web of denial springs into action. They mobilize, they target, they attack every Republican who stands against their business plan. Their campaign efforts to ensure that their self-serving lies trump in every election.

The oil and coal industry will not stop their efforts because now the pre-emption of climate change legislation is a climate denier. But their obstruction and climate denial tactics are as bogus as a degree from Trump University. Trump says he wants an ‘all of the above’ energy agenda, but we know he is really running on an ‘oil above all’ platform. But the Koch brothers are now bigger than the Republican Party.

The Kochs have built upon the tactics practiced by the tobacco industry generations ago in its campaign to discredit the science linking smoking with increased risks of lung cancer. The Kochs’ goal is to discredit the science itself. How successful are they? Donald Trump has said that if he is President he will abolish the Environmental Protection Agency of the United States—abolish it. I guess he assumes that Americans think that the air is too clean, the water is too clean, the soil is too clean, the rivers are too clean, and that we can afford to abolish the Environmental Protection Agency of our country.

This is the world that the Koch brothers have forgotten. Their mission has always been to create doubt across America on climate science. They fund attempts to counter the fact that climate change is a threat to our national security and to our public health. They spend millions trying to change the fact that action to combat climate change is feasible and necessary and will create American jobs. They fund the web of denial to serve their own interests to make billions in profits at the expense of America’s health, America’s safety.

But for someone who is focused on protecting the poor and the vulnerable of this world—that person understands the threat presented by climate change. I have in my hand Pope Francis’s encyclical on climate change, ‘Laudato si,’’ subtitled ‘‘On the Care for our Common Home.’’ The Pope is a chemistry teacher. That is what he did before he became Pope. When he came to Washington, DC last year, he spoke to Congress and delivered his sermon on the Hill. He said that the planet is dangerously warming and that the science is settled. He said that human beings are a significant contributor to dangerous warming of the planet. He said that since humans are contributing to the problem, we have a moral obligation to do something about it.

When the rest of the world looked up, they saw red, white, and blue CO2. Since the United States has historically been the largest contributor of carbon pollution, we must be the leader in working to reduce our own pollution.

As soon as the Pope spoke out urging action on climate change, the well-oiled climate denial machine shifted into high gear. The Acton Institute for the Study of Religion and Liberty is another strand of the web of denial. Between 1990 and 2014, the Acton Institute had millions from fossil fuel donors or Donors Capital Fund, the Koch-funded dark money ATM, as well as money from the Koch families and from Exxon.

Reverend Sirico, the founder and president of the Acton Institute, testified in front of the Senate Environment and Public Works Committee just last year. Reverend Sirico claims that the Catholic Church does not have expertise in science and should stick to matters of faith and morals. Well, here is the irony. A lack of expertise surely has not stopped Senate Republicans from blocking any and all climate change legislation.

Informed by the scientific evidence, the Pope made a clear moral case to act on climate and to act now. The Pope’s comments came from the heart and from his belief in our ability to act collectively. It is just common sense that when you learn something is dangerous for you, for your health and for your kids, you will do what Pope Francis said to us, its impact on the poorest people on our planet, those who will be most severely harmed by climate
change—we have a moral obligation to stop that harm.

There is no doubt that fossil fuels forever changed our society, but pointing to the benefits from them does not take away the harm they cause or the urgence to clean things up now. Many of those who oppose action on climate invoke the importance of preserving the free market.

As an example, consider the Lexington Institute, an organization funded by, and those pushing so-called free market solutions. The Lexington Institute—and may I add, the Lexington Institute is in Virginia; it is not in Lexington, MA, where the shot heard round the world was fired. No, this is just, again, abscinding with a name and placing it upon an institution to try to give it the veneer of credibility. Of course, beneath the veneer is just more veneer. There is nothing. There is no science. There is nothing that backs up the arguments they are making.

So the Lexington Institute claims that renewables need to be able to compete with fossil fuels without Federal subsidies, but the real truth is, the fossil fuel industry has never succeeded in the free market. It is built on more than a century’s worth of tax breaks and subsidies.

The Lexington Institute sheds these crocodile tears about how much they care about the free market, but for 100 years they were able to collect the subsidies, the coal, the gas, and the nuclear industries were all subsidized by the Federal Government. It is only when wind and solar show up that all of a sudden they become greatly concerned about the fact the free market is being distorted. Well, by giving tax breaks to wind and solar, of course, we are just making it a level playing field so they get the same kind of breaks all of these other industries have received for 100 or more years.

The subsidies for the fossil fuel industry top more than $7.5 billion annually. You got that? It is $7.5 billion per year. These tax breaks go back 100 years. Multiply that by 100, and then the crocodile tears start getting shed over something we do for wind or solar or fuel cells, biomass, geothermal?

There is no need for fossil fuel CEOs to come to Congress to justify the support for long-established subsidies, which have always been getting them. They do not even come up to defend it. They get it automatically—the extension of their tax breaks. The oil and gas industry have the Federal subsidies, coal has Federal subsidies, nuclear has Federal subsidies. What has happened every year, when we try to extend subsidies for renewable energy—for wind and solar—for even just 1 year, it is the end of the world as we know it in the capitalist system.

Just last year, the Koch brothers wrote a letter to every single Member of Congress urging them to oppose the tax breaks for wind and solar, and of course they cited “the free market.”

Because even though billions of dollars in Federal subsidies have benefited their companies for years and years, they have never come up here to say: Oh, take them away. It makes my company feel unclean. Oh no, they took those billions every single year. It is only when wind and solar step up and say: Well, how about us? We are clean. We don’t pollute. We are what the younger generation wants to see us investing in as the technologies of the 21st century are environmentally friendly. Then their free market principles start to get offended.

So the Lexington Institute, citing the free market, has fought the extension of renewable tax credits for wind and solar, but unlike the battle of Lexington that started the American Revolution, this Lexington is trying to stop a renewables revolution. Economic growth and climate action go together. We can have a country with clean air and water and clean energy and a strong economy. History continues to prove that the benefits of environmental regulation are enormous and beyond just financial.

Recently, the annual global economic growth hand in hand with no increase in energy-related carbon pollution. We are seeing GDP go up but not carbon pollution. And in Massachusetts, since the Regional Greenhouse Gas Initiative started in 2009—the real Lexington revolution, the one in Massachusetts—we have seen powerplant greenhouse gas emissions go down 34 percent while Massachusetts’ gross domestic product increased 25 percent.

So we are left with a really simple question: Why do fossil fuel companies continue to get Federal subsidies, but we do not extend them to clean energy? The answer is this: Koch, Exxon, the Marsh, the Institute, the Global Climate Coalition, the Acton Institute, the Lexington Institute, and their partners in the web of denial. Millions of dollars are spent to deceive and to mislead all in the name of self-interest and profit. The argument of the Coalition collapsed more than a decade ago. The Marshall Institute broke up last year, and its climate denial arm morphed into the CO2 Coalition. Exxon is now publicizing their support for a carbon tax that they began espousing in 2009. The American Petroleum Institute is reportedly rethinking its messaging on climate. The threads of the web of denial are breaking and weakening, and more light we shine on it—the more light we shine on it—especially light fueled by the power of the Sun—the sooner it will fall apart.

We are in the midst of a clean energy revolution. The United States has a massive reserve of untapped renewable energy sources. We do not have to extend this potential so massive that just a small fraction could power our entire country. The question is no longer if we can power our country with renewable energy, it is when and how. We will make the transition to 100 percent renewable energy before the year 2050 if we keep the right policies on the books, and I believe we are going to meet that goal.

In the last 10 years, we have seen a dramatic expansion of renewable energy in our country. Just as the Pilgrims harnessed the wind to sail across the ocean to Plymouth Rock, we too can power our economy. Our current capacity is 74,000 megawatts of wind, and we have 14,000 megawatts of wind waiting now to be deployed in our country. U.S. solar capacity is now more than 27,000 megawatts. Over 25 percent of this capacity was added in 2015 alone. We are projected to double that capacity by the end of the year.

Megawatts are hard to understand. Simply put, by the end of this year, we should have enough wind and solar energy to power over 25 million homes. That is one-fifth of all American homes.

We must continue to untangle ourselves from the Koch brothers’ web of denial sewn by lies and doubt. The science is overwhelming. Climate change is real. Carbon pollution is accelerating the warming that is now changing our society. American cities and towns are preparing for an uncertain future in a world with a changing climate and rising seas. While the Senate has yet to knock out all of these old cobwebs of denial that have been behind us, if we take action, we know, if we focus on the future, we cannot continue to have these decisions of today be borne by generations yet to come.

We must focus on resiliency and clean energy, and what we are going to do to leave the world better off for future generations. No matter what lies and information the climate deniers try to peddle, the facts are with us, the moral authority is with us, the economic opportunities are with us.

We have a chance to create a clean energy revolution that increases jobs as it cuts pollution. This is job creation that is good for all of creation. We must take the climate deniers and fossil fuel funders to task for their obstinate, obdurate, oblivious opposition to the clean energy to battle climate change.

Here is where we are. By the end of 2016, there will be 400,000 people employed in the United States in the wind and solar industries and 65,000—65,000—coal miners. By the year 2020, at the current pace, there will be 600,000 people employed in the wind and solar industry.

None of all this new electricity on the planet last year came from renewable electricity. This is a revolution, and it is a revolution we cannot allow to be derailed because we will be employing people, giving them the jobs they want, which will make it possible for us to save this planet.

I thank the Senator from Rhode Island for organizing all of the Members over the last 2 days to come out on the floor to make this case about this web of denial, which is at the core of what we are doing with this Senate from taking the actions necessary to deploy the technologies, to create the jobs which can save the planet by deploying

According to "DeSmogBlog," the

Franklin Center's director of donor de-

velopments comes out of the Charles G.

Koch Foundation—wow. Its senior vice

president in charge of strategic initia-

tives comes out of the Koch brothers'

Americans for Prosperity. The found-

board member who set it up helped

run, oh, Americans for Prosperity in

North Dakota. According to Media

Matters for America, the Franklin Cen-

ter's coalitions coordinator and its

chief of staff also came out of, oh,

Americans for Prosperity. Not surpris-

ingly, the Pew Research Center's Pro-

ject for Excellence in Journalism

ranked the Franklin Center Watch-

dog.org group as "highly ideological."

And here is the stuff they say. In 2015, a

staff member for the

Franklin Center to sow doubt regard-

ing human-caused climate change. It is

no surprise, considering where their

staff and money comes from.

In 2014, a staff reporter for the

Franklin Center's Watchdog.org

wrote: "I continue to contend that 'cli-

mate change' is a meaningless phrase

because the climate obviously changes

data points" so much as it has

been "a trick pulled by global warming

alarmists over the last decade." There

is a responsible view.

In 2011, its outlet, the Hawaii Re-

porter, wrote: "Hard-nosed physical

evidence of man-made global warming

has yet to be provided by the pro-

moters of warming, even after a nomi-

nal $80 billion have been spent in the

attempt to do so."

The Nieman Foundation for Jour-

nalism at Harvard University,

"two hour-long sessions at the

Franklin Center, where a 30,000 word

article that is self-explanatory. So if we

look at what is going on at the Franklin Cen-

ter, we will see Koch people, Koch

money, and Koch buddies.

Then there is the so-called James

Madison Institute, a libertarian think

tank with a long history of trying to

undermine climate science and renew-

al energy policy. Justin Farrell lists the

James Madison Institute's—yes, that

wonderful Unabomber group—senior fellow for en-

vironmental policy is on the James

Madison Institute's research advisory

council. It is such a web of connec-

According to research by the Amer-

ican Bridge Project, the Madison Insti-

tute received over $1.4 million in direct

donations from Koch-affiliated groups.

Between 2003 and 2013, they received

funding from the JohnTempleton
Foundation, which “tries to encourage the integration of religious beliefs and free-market principles into the classroom,” according to the Center for Media and Democracy’s SourceWatch. Mother Jones reported in 2011 that Charles Koch recognized the Templeton Foundation for having donated over $1 million to Koch-related causes, and Dr. Brulle’s research shows that Templeton gave more than $20 million to this web of denial organization he tracks.

Dr. Brulle’s Foundation for the Advancement of Right Thinking turns up again—Franklin, now Madison. The same foundation that gave $13.7 million to these climate change countermovement organizations also gave to the Madison one.

Of course, again, the Lynde and Harry Bradley Foundation gave to the Franklin Center and gave to the Madison Center to the tune of almost $30 million into the climate denial web.

The James Madison Institute is also a member of the State Policy Network. The State Policy Network, according to the Center for Media and Democracy’s SourceWatch, is an “$83 million right-wing empire” that has received money from a Koch family foundation and, of course, the identity-scrubbing Donors’ Trust and Donors Capital—which, by the way, are the big green diamond here at the center of this web.

According to the “DeSmogBlog” examination of the Madison Institute, it opposed the Waxman-Markey cap-and-trade legislation, and in 2009 issued a plea to policymakers in Florida—the State that is going fastest under water because of sea level rise—to stop any action on climate change following the so-called Climategate scandal. After six thorough investigations looked at Climategate, true, there was no scandal at all, but it would appear that the Institute neither rescinded its plea nor set the record straight.

This institute actively fights renewable energy policies in Florida. An institute report co-written by a senior fellow at the Heartland Institute—again, the connection, Madison Institute to Heartland Institute and Heartland Institute to the billboard that compared climate scientists to the Unabomber—opposed a proposed solar constitutional amendment. Well, they weren’t alone. According to news reports over companies contributing big money to a political committee fighting that solar amendment, including over $1 million from Florida Power and Light, $1 million from Duke Energy, over $800,000 from Tampa Electric Company, and $446,000 from Gulf Power. Well, guess what: The president and CEO of Gulf Power was then on the board of, oh, the James Madison Institute.

Then we move on to John Locke, who gives us a twofer. First, there is the John Locke Institute, which is named for the philosopher John Locke, who, with Montesquieu, are the two major philosophical influences of the Founding Fa-

thers. It is listed as one of Dr. Justin Farrell’s organizations contributing to the polarization of climate change debate and “overtly producing and promoting skepticism and doubt about scientific consensus on climate change.”

This is also a John Locke Foundation in defending the tobacco industry and has on its academic advisory council a political scientist from the Global Warming Policy Foundation, a high-profile UK climate denier group.

There is also a John Locke Foundation, which describes itself as “an independent, non-profit think tank that would work for truth, for freedom, and for the future of North Carolina.” It is one of the blue dots here on Professor Brulle’s denial web diagram. Dr. Farrell, too, has the foundation on his list of climate change denier and countermovement organizations. Yes, it is a member of the Koch-funded State Policy Network, of course, and it is funded significantly by a North Carolina billionaire by the name of Art Pope, who, according to Indy Week, is “one of the most trusted members of the Koch’s elite circle: He has been a regular invitee to the Koch’s secretive, semia nnual gathering of the major rich rightist individuals,” and he is a “valuable junior partner in many key Koch operations.”

The foundation center database shows that between 2003 and 2013, the John Locke Foundation received over $2 million in funding from John William Pope Foundation—which is named after Art Pope’s father—and over $500,000 from the Charles Koch Foundation. It gets so cozy between everyone here. According to a 2014 Washington Post profile of Art Pope, he has poured over $30 million through his family’s foundation into the Koch front group Americans for Prosperity—all of whose members, you remember, went over to the Franklin Institute. Professor Brulle has also listed Art Pope as a director at a John William Pope Foundation at over $20 million of total foundation funding to this climate change denial web. Dr. Brulle cites the John Locke Foundation as having received 3 percent of the total income distributed within the climate change countermovement between 2003 and 2010.

An article in Facing South calls the John Locke Foundation “one of the most outspoken voices of climate denial in the nation having that global warming is a ‘pseudoscientific fraud.’” According to research done by Greensea, the foundation stated in a 2005 policy brief that “a greenhouse gas reduction policy would have only costs and no benefits.” In 2005, the foundation released a public policy statement entitled “Global Warming Policy: NC Should Do Nothing,” whose author wrote similar climate denial pieces in the Franklin Center-affiliated Carolina Journal. It is hard to keep track of all these crossings.

In 2007, the foundation released a policy report entitled “A North Carolina Citizen’s Guide to Global Warming,” whose author, according to Facing South, was a visiting scholar at the, yes, Koch-backed American Enterprise Institute. This report falsely declared that consensus on climate change does not exist, and declared: “The greatest threat to freedom is the danger of rushing into foolish and costly policies driven by ill-founded climate change hysteria.”

Art Pope figures in Jane Mayer’s book “Dark Money: How the Family Behind Koch has Shaped America,” a “longtime friend and ally” who shared Charles [Koch’s]’ passion for free-market philosophy.” Mayer writes that Pope was a regular at the Kochs’ secret planning summits and “served on the board of the Koch’s main public advocacy group”—wait for it—“Americans for Prosperity, as he had on its predecessor, Citizens for a Sound Economy.” Mayer adds: “Pope’s role in his home state of North Carolina is in many respects a state-sized version of the Kochs’ role nationally.”

Other Locke Foundation funders identified by Conservative Transparency Project between 1995 and 2014 include the Searle Trust, which, according to Center for Media and Democracy’s SourceWatch, has also funded, yes, Americans for Prosperity, and the American Enterprise Institute, and ALEC—which we have talked about and sponsors the State Policy Network—and, of course, we can’t go without the Heartland Institute, with their wonderful Unabomber billboard.

Dr. Brulle’s research indicates that the Searle Trust gave over $20 million to these groups between 2003 and 2010. Donors Capital Fund—this big spider at the center of the web here—is a donor to the John Locke Foundation, and, of course, the Charles G. Koch Charitable Foundation. The John Locke Foundation is a member of the State Policy Network, that “$83 million right-wing empire” funded by a Koch family foundation and the identity-launderers Donors’ Trust and Donors Capital—and, it is listed as one of Dr. Justin Brulle’s denial web diagram. Dr. Brulle has put the John William Pope Foundation, the state of North Carolina was in many respects a state-sized version of the Kochs’ role nationally.”

That brings us to the so-called Thomas Jefferson Institute for Public Policy. By the way, it is fair to say that yet again when we move from Franklin to Madison, these foundations end up shoving Koch people, Koch money, and Koch buddies. The Thomas Jefferson Institute is a public policy foundation and, yes, another member of the State Policy Network, the $83 million right-wing empire.

By the way, the Center for Media and Democracy’s in-depth investigation of the State Policy Network shows how the network and its member think tanks are all interconnected to ALEC and the Koch brothers. But that is for another speech.

According to “DeSmogBlog,” many of the Jefferson Institute studies are authored by an operative of the Heritage Foundation, the group that Senator FRANKEN spoke about earlier this evening, and the Energy and Environment Legal Institute—two groups that are both on this web.
The Thomas Jefferson Institute prominently displays a statue of Jefferson on its Web page and claims to be a nonpartisan supporter of “environmental stewardship,” but the institute is an outspoken critic of the President’s Clean Power Plan and renewable sources of energy and actively sows doubt about climate science. The institute is right here on Professor Brulle’s web of climate change countermovement organizations.

According to data compiled by the Conservative Transparency project between 1998 and 2014, the Jefferson Institute received funding from the following entities in the denial web: first, of course, is the identity-laundering Donors Trust and Donors Capital Fund. Then there is the Lynde and Harry Bradley Foundation, which, as we recall, also supported the Franklin Center and the Madison Institute and links to the Koch brothers through the far-rightwing John Birch Society. Remember, they were at almost $30 million into climate denial organizations in those years between 2003 and 2010. And then there is the William E. Simon Foundation, whose current president is also a senior fellow at the rightwing Manhattan Institute, a member of the Grant Advisory Committee of the Searle Freedom Trust, and a past member of the Board of Overseers of the Hoover Institution. It is quite a web indeed.

The Jefferson Institute’s director was quoted in 2007 as saying: “When it comes to global warming, I’m a skeptic because the conclusions about the cause of the apparent warming stand on the shoulders of incredibly uncertain data and models.” Tell that to NOAA and NASA and every single one of our National Labs and see how far you get. Tell that to your home State university and see how far you get.

In 2008, he wrote about climate change for the Jefferson Journal, a commentary forum of the Jefferson Institute, that “greenhouse gas reduction goals . . . are both unachievable and irrelevant” and assured “there will be no climate catastrophe due to CO₂ because either the science is wrong or we will use geoengineering.”

In 2011, he wrote two pieces for the Jefferson Journal opposing wind power, contending that—“you are not going to believe this, but here is the quote—“wind is not affordable and it is not clean” and that wind power “has no sensible place in a 21st century civilization.” Tell that to our friend Senator Grassley, whose State gets a third of its power from wind energy.

Franklin, Jefferson, Madison, Locke—these are great names put on the front of very shady Koch-funded front groups in the web of denial, and the organizations share several common features: First, they all propagate what by any reasonable standard is preposterous nonsense and masquerade it as science and independent opinion. Second, they all get massive funding from fossil fuel interests and always line up obediently with those interests. Third, they interlock. The interlocking is almost too complicated to track—in staff, in board members, in funding sources—but it all traces back to fossil fuel money. And, of course, they all mask themselves behind the names of great men from history who would recoil to discover their names and reputations being put to such discreditable use. Who needs to hide behind names like that? I submit it is people who are up to no good and don’t want to be caught out for who they really are.

Let me conclude by thanking the many Senators who have participated in this effort to put a little bit of a spotlight on a very phony web of denial that is operating actively in our democracy to distort and disturb its proper operation and to sabotage America’s ability to respond in a responsible way to the climate crisis. They include our leader Harry Reid, Ben Cardin, Chris Coons, Tim Kaine, Elizabeth Warren, Chuck Schumer, Tom Udall, Jeff Merkley, Barbara Boxer, Dick Durbin, Brian Schatz, Al Franken, Martin Heinrich, my senior Senator Jack Reed, Jeanne Shaheen, Gary Peters, Dick Blumenthal, and Ed Markey. I am honored to participate in this effort with them.

With that, I yield the floor.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 9:30 a.m. tomorrow.

Thereupon, the Senate, at 8:27 p.m., adjourned until Wednesday, July 13, 2016, at 9:30 a.m.

CONFIRMATION

Executive nomination confirmed by the Senate July 12, 2016:

DEPARTMENT OF JUSTICE

CAROLE SCHWARTZ RENDON, OF OHIO, TO BE UNITED STATES ATTORNEY FOR THE NORTHERN DISTRICT OF OHIO FOR THE TERM OF FOUR YEARS.
