STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CARPER:

S. 674. A bill to amend title 23, United States Code, to establish a grant program for the installation of electric vehicle charging infrastructure and hydrogen fueling infrastructure along the National Highway System, and for other purposes; to the Committee on Environment and Public Works.

Mr. CARPER. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

Mr. CARPER. Mr. President, Today I am introducing the "Clean Corridors Act of 2019." This legislation authorizes \$3 billion in grant funding to public entities for installing electric vehicle charging infrastructure and hydrogen fueling infrastructure along designated corridors.

Earlier this week, Chairman BARRASSO and I sent a letter to the full Senate requesting Senators' priorities for a surface transportation bill reauthorization this Congress. The surface transportation bill is the primary authorizing legislation for the programs of the Federal Highway Administration at the U.S. Department of Transportation, among other programs related to surface transportation.

As the Ranking Member on the U.S. Senate Committee on Environment and Public Works, this legislation is a reauthorization priority of my own.

Nearly two years ago, the Rocky Mountain Institute published a report that said re-installing electric vehicle charging infrastructure should be, quote, an "urgent priority in all states

and major municipalities. Getting it right will require unprecedented cooperation by many stakeholder groups. The time to act is now."

I agree. This legislation would provide grants for the installment of electric vehicle charging infrastructure and hydrogen fueling infrastructure along the National Highway System. This bill is the product of remarkable collaboration between stakeholders, and it will take us one step forward in reducing emissions, improving air quality, and enhancing energy security and fuel choice. This legislation is endorsed by stakeholders from across the electric vehicle supply chain, including the National Electrical Manufacturers Association, Electric Drive Transportation Association, Edison Electric Institute, Auto Alliance, the American Association of State Highway and Transportation Officials, and the American Highway Users Alliance.

As I have stated before, the threat of climate change is greater than any one state, or region or country—we all have to do our part, and the federal government has a leadership role to play. By deploying necessary electric and fuel cell vehicle charging infrastructure, and supporting growth of these needed technologies, doing so will help us lower the rate of emissions of carbon into our atmosphere.

Even better yet, this legislation will help us in our efforts to put the United States back in the driver's seat of the world's clean energy economy, while creating green manufacturing jobs here at home. This legislation is a true win-win for our environment and our economy, and it is my hope that the Senate will support this legislation and that it will be enacted this Congress.

S. 674

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Clean Corridors Act of 2019".

SEC. 2. GRANTS FOR CHARGING AND FUELING INFRASTRUCTURE TO MODERNIZE AND RECONNECT AMERICA FOR THE 21ST CENTURY.

(a) PURPOSE; FINDINGS.—

(1) PURPOSE.—The purpose of this section is to establish a grant program to strategically deploy electric vehicle charging infrastructure and hydrogen fueling infrastructure along designated alternative fuel corridors that will be accessible to all drivers of zero emission vehicles.

(2) FINDINGS.—Congress finds that—

(A) greater adoption of zero emission vehicles will help—

(i) reduce emissions and improve air quality;

(ii) enhance the energy security of the United States by expanding the use of zero emission fuels;

(iii) enhance fuel choice and utilization of electric vehicle charging infrastructure and hydrogen fueling infrastructure in order to benefit consumers;

(iv) ensure that the transportation infrastructure of the United States is equipped to manage the demands and anticipated future needs of the economy; and

(v) develop a new economic sector in the United States that will create middle class jobs;
