Let us pray.

Wondrous and sovereign God, thank You for the gifts of a new day and borrowed heartbeats. We trust in Your unfailing love and rejoice in Your salvation.

Lord, Your words are right and true. Your plans stand firm forever. In these challenging times, rule our world by Your wise providence.

As the Members of Congress seek to do Your will, help them to hate lies and embrace the truth. Give them the wisdom to guard their lips and weigh their words. Guide them with Your righteousness and integrity. May they leave such a legacy of faithfulness that generations to come will be inspired by their courage.

And, Lord, we continue to pray for Ukraine.

We pray in Your sovereign Name. Amen.

(B) assigning a DX priority rating under part 700 of title 15, Code of Federal Regulations, to each such program or project;

(8) the assignment of DX priority ratings would help minimize the risk that such programs and projects are unnecessarily delayed due to misallocations of industrial materials, services, or facilities; and

(9) the Secretary of Defense and the Secretary of Energy should promptly inform Congress of any additional opportunities to further reduce risks relating to such programs and projects or the schedules for such programs and projects that could be achieved through the adjustment of existing authorities.

SEC. 1252. SENSE OF CONGRESS ON DEFENSE ALLIANCES AND PARTNERSHIPS IN THE INDO-PACIFIC REGION.

Across the region, the United States will work with allies and partners to deepen our interoperability and develop and deploy advanced warfighting capabilities as we support them in defending their citizens and their sovereign interests.''.

(2) The fact sheet accompanying the National Defense Strategy states, ''[m]utually-beneficial Alliances and partnerships are an enduring strength for the United States, and are critical to achieving our objectives . . . the Department [of Defense] will incorporate ally and partner perspectives, competencies, and advantages at every stage of defense planning.''.

(3) Chairman of the Joint Chiefs of Staff General Milley testified on April 7, 2022, that ''our alliances and partnerships are our most significant asymmetric advantages and are key to maintaining the international rules-based order that offers the best opportunities for peace and prosperity for America and the globe.''.

(4) Commander of the United States Indo-Pacific Command Admiral Aquilino testified on March 10, 2022, that ''a key U.S. asymmetric advantage that our security challengers do not possess is our network of strong alliances and partnerships. (b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense should continue efforts that strengthen United States defense alliances and partnerships in the Indo-Pacific region so as to further the comparative advantage of the United States in strategic competition with the People's Republic of China, including by—

(1) enhancing cooperation with Japan, consistent with the Treaty of Mutual Cooperation and Security Between the United States of America and Japan, signed at Washington, January 19, 1960, including by developing advanced military capabilities, fostering interoperability across all domains, and improving sharing of information and intelligence;

SEC. 1517. SENSE OF THE SENATE AND BRIEFING ON NUCLEAR COOPERATION BETWEEN THE UNITED STATES AND THE UNITED KINGDOM.

(a) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the United States strategic nuclear deterrent, and the independent strategic nuclear deterrents of the United Kingdom and the French Republic, are the supreme guarantee of the security of the North Atlantic Treaty Organization (commonly referred to as ''NATO'') and continue to underwrite peace and security for all members of the NATO alliance;

(2) the security of the NATO alliance also relies upon nuclear sharing arrangements that predate, and are fully consistent with, the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow July 1, 1968, and entered into force March 5, 1960 (commonly referred to as the ''Nuclear Non-Proliferation Treaty'');

(3) such arrangements provide for the forward deployment of United States nuclear weapons in Europe, along with the supporting capabilities, infrastructure, and dual-capable aircraft dedicated to the delivery of United States nuclear weapons, provided by European NATO allies;

(4) in parallel to the independent commitments of the United States and the United Kingdom to the enduring security of NATO, the nuclear programs of the United States and the United Kingdom have enjoyed significant collaborative benefits as a result of the cooperative relationship formalized in the Agreement for Cooperation on the Uses of Atomic Energy for Mutual Defense Purposes, signed at Washington July 3, 1958, and entered into force August 4, 1958, between the United States and the United Kingdom (commonly referred to as the ''Mutual Defense Agreement'');

(5) the unique partnership between the United States and the United Kingdom has enhanced sovereign military and scientific capabilities, strengthened bilateral ties, and resulted in the sharing of costs;

(6) as the international security environment deteriorates and potential adversaries expand and enhance their nuclear forces, the extended deterrence commitments of the United Kingdom play an increasingly important role in supporting the security interests of the United States and allies of the United States and the United Kingdom;

(7) additionally, the extension of the nuclear deterrence commitments of the United Kingdom to members of the NATO alliance strengthens collective security while reducing the burden placed on United States nuclear forces to deter potential adversaries and assure allies of the United States;

(8) it is in the national security interest of the United States to support the United Kingdom with respect to the decision of the Government of the United Kingdom to maintain its nuclear forces to deter countries that are ''significantly increasing and diversifying their nuclear arsenals'' and ''investing in novel nuclear technologies and developing new 'warfighting' nuclear systems'' that could threaten NATO allies, as outlined in the March 2021 report of the Government of the United Kingdom entitled, ''Global Britain in a Competitive Age: The Integrated Review of Security, Defence, Development and Foreign Policy'';

(9) as the United States continues to modernize its aging nuclear forces to ensure its ability to continue to field a nuclear deterrent that is safe, secure, and effective, the United Kingdom faces a similar challenge;

(10) bilateral cooperation on such programs as the Trident II D5 weapons system, the common missile compartment for the future Dreadnought and Columbia classes of submarines, and the parallel development of the W93/Mk7 warhead of the United States and the replacement warhead of the United Kingdom, will allow the United States and the United Kingdom to responsibly address challenges within their legacy nuclear forces in a cost-effective manner that—

(A) preserves independent, sovereign control;

(B) is consistent with each country's obligations under the Nuclear Non-Proliferation Treaty; and

(C) supports nonproliferation objectives; and

(11) continued cooperation between the nuclear programs of United States and the United Kingdom is essential to ensuring that the NATO alliance continues to be supported by credible nuclear forces capable of preserving peace, preventing coercion, and deterring aggression.

(b) BRIEFING.—Not later than March 4, 2023, the Under Secretary of Defense for Acquisition and Sustainment shall brief the Committees on Armed Services of the Senate and the House of Representatives on opportunities to further enhance and strengthen the bilateral partnership between the nuclear enterprises of the United States and the United Kingdom, including potential cooperation in areas such as advanced manufacturing, microelectronics, supercomputing, and production modernization.

Subtitle H—Judicial Security and Privacy

SEC. 6041. SHORT TITLE.

This subtitle may be cited as the ''Daniel Anderl Judicial Security and Privacy Act of 2021''.

SEC. 6042. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds the following:

(1) Members of the Federal judiciary perform the important function of interpreting the Constitution of the United States and administering justice in a fair and impartial manner.

(2) In recent years, partially as a result of the rise in the use of social media and online access to information, members of the Federal judiciary have been exposed to an increased number of personal threats in connection to their role. The ease of access to free or inexpensive sources of covered information has considerably lowered the effort required for malicious actors to discover where individuals live and where they spend leisure hours and to find information about their family members. Such threats have included calling a judge a traitor with references to mass shootings and serial killings, a murder attempt on a justice of the Supreme Court of the United States, calling for an ''angry mob'' to gather outside a home of a judge and, in reference to a judge on the court of appeals of the United States, stating how easy it would be to ''get them''.

(3) Between 2015 and 2019, threats and other inappropriate communications against Federal judges and other judiciary personnel increased from 926 in 2015 to approximately 4,449 in 2019.

(4) Over the past decade, several members of the Federal judiciary have experienced acts of violence against themselves or a family member in connection to their Federal judiciary role, including the murder in 2005 of the family of Joan Lefkow, a judge for the United States District Court for the Northern District of Illinois.

(5) On Sunday July 19, 2020, an assailant went to the home of Esther Salas, a judge for the United States District Court for the District of New Jersey, impersonating a package delivery driver, opening fire upon arrival, and killing Daniel Anderl, the 20-year-old only son of Judge Salas, and seriously wounding Mark Anderl, her husband.

(6) In the aftermath of the recent tragedy that occurred to Judge Salas and in response to the continuous rise of threats against members of the Federal judiciary, there is an immediate need for enhanced security procedures and increased availability of tools to protect Federal judges and their families.

(b) PURPOSE.—The purpose of this subtitle is to improve the safety and security of Federal judges, including senior, recalled, or retired Federal judges, and their immediate family members to ensure Federal judges are able to administer justice fairly without fear of personal reprisal from individuals affected by the decisions they make in the course of carrying out their public duties.

Subtitle G—United States-Ecuador Partnership Act of 2022

SEC. 6281. SHORT TITLE; TABLE OF CONTENTS.

This subtitle may be cited as the ''United States-Ecuador Partnership Act of 2022''.

SEC. 6282. FINDINGS.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States and Ecuador have a history of bilateral cooperation grounded in mutual respect, shared democratic values, and mutual security interests.

(2) On February 7, 2021, and April 11, 2021, Ecuador held democratic elections that included parties from across the political spectrum, paving the way for continued progress towards strengthening democratic institutions.

(3) The United States and Ecuador share strategic interests in strengthening Ecuador's democratic institutions, generating inclusive economic growth, and building capacity in law enforcement, anti-corruption, and conservation efforts.

(4) The United States and Ecuador historically have enjoyed strong commercial, investment, and economic ties, yet Ecuador continues to face significant challenges to inclusive economic development, including—

(A) the heavy economic toll of the COVID–19 pandemic;

(B) vulnerabilities with respect to the growing role of the People's Republic of China in the financing and refinancing of Ecuador's debts, and in strategic infrastructure projects and sectors of the Ecuadorian economy; and

(C) the need to develop and strengthen open and transparent economic policies that strengthen Ecuador's integration with global markets, inclusive economic growth, and opportunities for upward social mobility for the Ecuadorian people.

(5) Since its establishment in December 2019, the United States Development Finance Corporation has provided more than $440,000,000 in financing to Ecuador.

(6) Ecuador's justice system has taken important steps to fight corruption and criminality and to increase accountability. However, enduring challenges to the rule of law in Ecuador, including the activities of transnational criminal organizations, illicit mining, illegal, unreported, and unregulated (IUU) fishing, and undemocratic actors, present ongoing risks for political and social stability in Ecuador.

(7) The activities undertaken by the Government of the People's Republic of China in

Ecuador, including its development of the ECU–911 video surveillance and facial recognition system, financing of the corruptly managed and environmentally deleterious Coca Codo Sinclair Dam, and support for illegal, unreported, and unregulated fishing practices around the Galapagos Islands, pose risks to democratic governance and biodiversity in the country.

(8) Ecuador, which is home to several of the Earth's most biodiverse ecosystems, including the Galapagos Islands, the headwaters of the Amazon river, the Condor mountain range, and the Yasuni Biosphere Reserve, has seen a reduction in its rainforests between 1990 and 2016, due in part to the incursion of criminal networks into protected areas.

(9) On March 24, 2021, the Senate unanimously approved Senate Resolution 22 (117th Congress), reaffirming the partnership between the United States and the Republic of Ecuador, and recognizing the restoration and advancement of economic relations, security, and development opportunities in both nations.

(10) On August 13, 2021, the United States and Ecuador celebrated the entry into force of the Protocol to the Trade and Investment Council Agreement between the Government of the United States of America and the Government of the Republic of Ecuador Relating to Trade Rules and Transparency, recognizing the steps Ecuador has taken to decrease unnecessary regulatory burden and create a more transparent and predictable legal framework for foreign direct investment in recent years.

SEC. 6283. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States should take additional steps to strengthen its bilateral partnership with Ecuador, including by developing robust trade and investment frameworks, increasing law enforcement cooperation, renewing the activities of the United States Agency for International Development in Ecuador, and supporting Ecuador's response to and recovery from the COVID–19 pandemic, as necessary and appropriate; and

(2) strengthening the United States-Ecuador partnership presents an opportunity to advance core United States national security interests and work with other democratic partners to maintain a prosperous, politically stable, and democratic Western Hemisphere that is resilient to malign foreign influence.

(4) establishing competitive and transparent infrastructure project selection and procurement processes in Ecuador that promote transparency, open competition, financial sustainability, and robust adherence to global standards and norms;

(5) developing programs to help the Government of Ecuador improve efficiency and transparency in customs administration, including through support for the Government of Ecuador's ongoing efforts to digitize its customs process and accept electronic documents required for the import, export, and transit of goods under specific international standards, as well as related training to expedite customs, security, efficiency, and competitiveness;

(A) the provision of digitized government services with the greatest potential to improve transparency, lower business costs, and expand citizens' access to public services and public information;

(B) the provision of transparent and affordable access to the internet and digital infrastructure; and

(C) best practices to mitigate the risks to digital infrastructure by doing business with communication networks and communications supply chains with equipment and services from companies with close ties to or susceptible to pressure from governments or security services without reliable legal checks on governmental powers; and

(7) identifying, as appropriate, a role for the United States International Development Finance Corporation, the Millennium Challenge Corporation, the United States Agency for International Development, and the United States private sector in supporting efforts to increase private sector investment and strengthen economic prosperity.

(a) SHORT TITLE.—This section may be cited as the ''Iran Nuclear Weapons Capability and Terrorism Monitoring Act of 2022''.

(b) FINDINGS.—Congress makes the following findings:

(1) In the late 1980s, the Islamic Republic of Iran established the AMAD Project with the intent to manufacture 5 nuclear weapons and prepare an underground nuclear test site.

(2) Since at least 2002, the Islamic Republic of Iran has advanced its nuclear and ballistic missile programs, posing serious threats to the security interests of the United States, Israel, and other allies and partners.

(3) In 2002, nuclear facilities in Natanz and Arak, Iran, were revealed to the public by the National Council of Resistance of Iran.

(4) On April 11, 2006, the Islamic Republic of Iran announced that it had enriched uranium for the first time to a level close to 3.5 percent at the Natanz Pilot Fuel Enrichment Plant, Natanz, Iran.

(5) On December 23, 2006, the United Nations Security Council adopted Resolution 1737 (2006), which imposed sanctions with respect to the Islamic Republic of Iran for its failure to suspend enrichment activities.

(6) The United Nations Security Council subsequently adopted Resolutions 1747 (2007), 1803 (2008), and 1929 (2010), all of which targeted the nuclear program of and imposed additional sanctions with respect to the Islamic Republic of Iran.

(7) On February 3, 2009, the Islamic Republic of Iran announced that it had launched its first satellite, which raised concern over the applicability of the satellite to the ballistic missile program.

(8) In September 2009, the United States, the United Kingdom, and France revealed the existence of the clandestine Fordow Fuel Enrichment Plant in Iran, years after construction started on the plant.

(9) In 2010, the Islamic Republic of Iran reportedly had enriched uranium to a level of 20 percent.

(10) On March 9, 2016, the Islamic Republic of Iran launched 2 variations of the Qadr medium-range ballistic missile.

(11) On January 28, 2017, the Islamic Republic of Iran conducted a test of a medium-range ballistic missile, which traveled an estimated 600 miles.

(12) In 2018, Israel seized a significant portion of the nuclear archive of the Islamic Republic of Iran, which contained tens of thousands of files and compact discs relating to past efforts at nuclear weapon design, development, and manufacturing by the Islamic Republic of Iran.

(13) On September 27, 2018, Israel revealed the existence of a warehouse housing radioactive material in the Turquz Abad district in Tehran, and an inspection of the warehouse by the International Atomic Energy Agency detected radioactive particles, which the Government of the Islamic Republic of Iran failed to adequately explain.

(14) On January 8, 2020, an Iranian missile struck an Iraqi military base where members of the United States Armed Forces were stationed, resulting in 11 of such members being treated for injuries.

(15) On June 19, 2020, the International Atomic Energy Agency adopted Resolution GOV/2020/34 expressing ''serious concern. . . that Iran has not provided access to the Agency under the Additional Protocol to two locations''.

(16) On November 28, 2020, following the death of the head of the Organization of Defense Innovation and Research of the Islamic Republic of Iran, the Supreme Leader of the Islamic Republic of Iran vowed to ''to continue the martyr's scientific and technological efforts in all the sectors where he was active'' in the ''nuclear and defense fields''.

(17) On April 17, 2021, the International Atomic Energy Agency verified that the Islamic Republic of Iran had begun to enrich uranium to 60 percent purity.

(18) On August 14, 2021, President of Iran Hassan Rouhani stated that ''Iran's Atomic Energy Organization can enrich uranium by 20 percent and 60 percent and if one day our reactors need it, it can enrich uranium to 90 percent purity''.

(19) On November 9, 2021, the Islamic Republic of Iran completed Zolfaghar-1400, a 3-day war game that included conventional navy, army, air force, and air defense forces testing cruise missiles, torpedoes, and suicide drones in the Strait of Hormuz, the Gulf of Oman, the Red Sea, and the Indian Ocean.

(20) On December 20, 2021, the Islamic Republic of Iran commenced a 5-day drill in which it launched a number of short- and long-range ballistic missiles that it claimed could destroy Israel, constituting an escalation in the already genocidal rhetoric of the Islamic Republic of Iran toward Israel.

(21) On January 13, 2022, the head of the Islamic Revolutionary Guards Corps Aerospace Force claimed that the military launched a solid-fuel, mobile satellite launch rocket, with implications for development of an intercontinental ballistic missile.

(22) On January 24, 2022, Houthi rebels, backed by the Islamic Republic of Iran, fired 2 missiles at Al Dhafra Air Base in the United Arab Emirates, which hosts around 2,000 members of the Armed Forces of the United States.

(23) On January 31, 2022, surface-to-air interceptors of the United Arab Emirates shot down a Houthi missile fired at the United Arab Emirates during a visit by President of Israel Isaac Herzog, the first-ever visit of an Israeli President to the United Arab Emirates.

(24) On February 9, 2022, the Islamic Republic of Iran unveiled a new surface-to-surface missile, named ''Kheibar Shekan'', which has a reported range of 900 miles (1450 kilometers) and is capable of penetrating missile shields.

(27) On April 19, 2022, the Department of State released a report stating that there are ''serious concerns'' about ''possible undeclared nuclear material and activities in Iran''.

(28) On May 30, 2022, the International Atomic Energy Agency reported that the Islamic Republic of Iran had achieved a stockpile of 43.3 kilograms, equivalent to 95.5 pounds, of 60 percent highly enriched uranium, roughly enough material for a nuclear weapon.

(29) On June 8, 2022, the Islamic Republic of Iran turned off surveillance cameras installed by the International Atomic Energy Agency to monitor uranium enrichment activities at nuclear sites in the country.

(c) SENSE OF CONGRESS.—It is the sense of Congress that—

(9) the Islamic Republic of Iran has delivered hundreds of armed drones to the Russian Federation, which will enable Vladimir Putin to continue the assault against Ukraine in direct opposition of the national security interests of the United States; and

(10) the United States must—

(A) ensure that the Islamic Republic of Iran does not develop a nuclear weapons capability;

TITLE LXXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

SEC. 8101. PLAN TO ACCELERATE RESTORATION OF DOMESTIC URANIUM ENRICHMENT.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States is engaged in a period of intense strategic competition with 2 peer adversaries, each of which aims to develop nuclear forces superior to the nuclear forces of the United States and its allies in the North Atlantic Treaty Organization;

(2) successfully deterring the aims of such adversaries and preserving the national security of the United States and the security of its allies requires that the United States maintain a capable, credible nuclear force, including the capability to produce the materials needed to manufacture nuclear weapons and provide reliable sources of energy for naval vessels and military facilities; and

(3) a key component to achieving those goals is the restoration of the domestic uranium enrichment capability of the United States, a component that will allow the United States to make significant strides toward improved energy independence by reducing reliance on international sources of enriched uranium and opening up tremendous opportunities for improving the competitiveness of the United States in the international energy economy.

(b) PLAN.—

(1) IN GENERAL.—Not later than June 1, 2023, the Secretary of Defense, in coordination with the Administrator for Nuclear Security, shall submit to the congressional defense committees a plan to restore the domestic uranium enrichment capability of the United States by not later than 2035.

(2) ELEMENTS.—The plan required by paragraph (1) shall include the following elements:

(A) Recommendations restore unobligated uranium production, conversion and enrichment capabilities, including production of high-enriched uranium—

(i) to refurbish the nuclear weapons stockpile of the United States over a period of not more than 30 years;

(ii) to satisfy the annual requirements of the United States for naval reactor fuel, including projections for satisfying fuel requirements for all submarines developed using reactor designs and technology of the United States; and

(iii) to satisfy the annual requirements of the United States for defense nuclear power reactors.

(B) Recommendations to improve the production capacity of unobligated low-enriched uranium needed to satisfy annual tritium production requirements for the nuclear weapons stockpile of the United States and associated research and development objectives.

(C) Such other recommendations and information as the Secretary of Defense or the Administrator for Nuclear Security consider appropriate.

SEC. 8102. ASSESSMENT OF READINESS AND SURVIVABILITY OF STRATEGIC FORCES OF THE UNITED STATES.

Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs of Staff and the Commander of the United States Strategic Command, shall submit to the congressional defense committees a report on the readiness and survivability of the strategic forces of the United States, including recommendations for improving such readiness and survivability.

SEC. 8103. U.S. NUCLEAR FUELS SECURITY INITIATIVE.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Department should—

(A) prioritize activities to increase domestic production of low-enriched uranium; and

(B) accelerate efforts to establish a domestic high-assay, low-enriched uranium enrichment capability; and

(2) if domestic enrichment of high-assay, low-enriched uranium will not be commercially available at the scale needed in time to meet the needs of the advanced nuclear reactor demonstration projects of the Department, the Secretary shall consider and implement, as necessary—

(A) all viable options to make high-assay, low-enriched uranium produced from inventories owned by the Department available in a manner that is sufficient to maximize the potential for the Department to meet the needs and schedules of advanced nuclear reactor developers, without impacting existing Department missions, until such time that commercial enrichment and deconversion capability for high-assay, low-enriched uranium exists at a scale sufficient to meet future needs; and

(B) all viable options for partnering with countries that are allies or partners of the United States to meet those needs and schedules until that time.

(b) OBJECTIVES.—The objectives of this section are—

(1) to expeditiously increase domestic production of low-enriched uranium;

(2) to expeditiously increase domestic production of high-assay, low-enriched uranium by an annual quantity, and in such form, determined by the Secretary to be sufficient to meet the needs of—

(A) advanced nuclear reactor developers; and

(B) the consortium;

(3) to ensure the availability of domestically produced, converted, and enriched uranium in a quantity determined by the Secretary, in consultation with U.S. nuclear energy companies, to be sufficient to address a reasonably anticipated supply disruption;

(4) to address gaps and deficiencies in the domestic production, conversion, enrichment, deconversion, and reduction of uranium by partnering with countries that are allies or partners of the United States if domestic options are not practicable;

(5) to ensure that, in the event of a supply disruption in the nuclear fuel market, a reserve of nuclear fuels is available to serve as a backup supply to support the nuclear nonproliferation and civil nuclear energy objectives of the Department;

(6) to support enrichment, deconversion, and reduction technology deployed in the United States; and

(7) to ensure that, until such time that domestic enrichment and deconversion of high-assay, low-enriched uranium is commercially available at the scale needed to meet the needs of advanced nuclear reactor developers, the Secretary considers and implements, as necessary—

(A) all viable options to make high-assay, low-enriched uranium produced from inventories owned by the Department available in a manner that is sufficient to maximize the potential for the Department to meet the needs and schedules of advanced nuclear reactor developers; and

SEC. 5214. POST-EMPLOYMENT RESTRICTIONS ON SENATE-CONFIRMED OFFICIALS AT THE DEPARTMENT OF STATE.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) Congress and the executive branch have recognized the importance of preventing and mitigating the potential for conflicts of interest following government service, including with respect to senior United States officials working on behalf of foreign governments; and

TITLE LIII—EMBASSY SECURITY AND CONSTRUCTION

SEC. 5301. AMENDMENTS TO SECURE EMBASSY CONSTRUCTION AND COUNTERTERRORISM ACT OF 1999.

(a) SHORT TITLE.—This section may be cited as the ''Secure Embassy Construction and Counterterrorism Act of 2022''.

(b) FINDINGS.—Congress makes the following findings:

(1) The Secure Embassy Construction and Counterterrorism Act of 1999 (title VI of division A of appendix G of Public Law 106–113) was a necessary response to bombings on August 7, 1998, at the United States embassies in Nairobi, Kenya, and in Dar es Salaam, Tanzania, that were destroyed by simultaneously exploding bombs. The resulting explosions killed 220 persons and injured more than 4,000 others. Twelve Americans and 40 Kenyan and Tanzanian employees of the United States Foreign Service were killed in the attacks.

(2) Those bombings, followed by the expeditionary diplomatic efforts in Iraq and Afghanistan, demonstrated the need to prioritize the security of United States posts and personnel abroad above other considerations.

(3) Between 1999 and 2022, the risk calculus of the Department impacted the ability of United States diplomats around the world to advance the interests of the United States through access to local populations, leaders, and places.

(4) America's competitors and adversaries do not have the same restrictions that United States diplomats have, especially in critically important medium-threat and high-threat posts.

(5) The Department's 2021 Overseas Security Panel report states that—

(A) the requirement for setback and collocation of diplomatic posts under paragraphs (2) and (3) of section 606(a) of the Secure Embassy Construction and Counterterrorism Act of 1999 (22 U.S.C. 4865(a)) has led to skyrocketing costs of new embassies and consulates; and

(B) the locations of such posts have become less desirable, creating an extremely suboptimal nexus that further hinders United States diplomats who are willing to accept more risk in order to advance United States interests.

(c) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the setback and collocation requirements referred to in subsection (b)(5)(A), even with available waivers, no longer provide the security such requirements used to provide because of advancement in technologies, such as remote controlled drones,

that can evade walls and other such static barriers;

(2) the Department should focus on creating performance security standards that—

(A) attempt to keep the setback requirements of diplomatic posts as limited as possible; and

(B) provide diplomats access to local populations as much as possible, while still providing a necessary level of security;

(3) collocation of diplomatic facilities is often not feasible or advisable, particularly for public diplomacy spaces whose mission is to reach and be accessible to wide sectors of the public, including in countries with repressive governments, since such spaces are required to permit the foreign public to enter and exit the space easily and openly;

(4) the Bureau of Diplomatic Security should—

(A) fully utilize the waiver process provided under paragraphs (2)(B) and (3)(B) of section 606(a) of the Secure Embassy Construction and Counterterrorism Act of 1999 (22 U.S.C. 4865(a)); and

(B) appropriately exercise such waiver process as a tool to right-size the appropriate security footing at each diplomatic post rather than only approving waivers in extreme circumstances;

(5) the return of great power competition requires—

(A) United States diplomats to do all they can to outperform our adversaries; and

(B) the Department to better optimize use of taxpayer funding to advance United States national interests; and

(6) this section will better enable United States diplomats to compete in the 21st century, while saving United States taxpayers millions in reduced property and maintenance costs at embassies and consulates abroad.

(d) DEFINITION OF UNITED STATES DIPLOMATIC FACILITY.—Section 603 of the Secure Embassy Construction and Counterterrorism Act of 1999 (title VI of division A of appendix G of Public Law 106–113) is amended to read as follows:

"SEC. 603. UNITED STATES DIPLOMATIC FACILITY DEFINED.

''In this title, the terms 'United States diplomatic facility' and 'diplomatic facility' mean any chancery, consulate, or other office that—

''(1) is considered by the Secretary of State to be diplomatic or consular premises, consistent with the Vienna Convention on Diplomatic Relations, done at Vienna April 18, 1961, and the Vienna Convention on Consular Relations, done at Vienna April 24, 1963, and was notified to the host government as such; or

''(2) is otherwise subject to a publicly available bilateral agreement with the host government (contained in the records of the United States Department of State) that recognizes the official status of the United States Government personnel present at the facility.''.

(e) GUIDANCE AND REQUIREMENTS FOR DIPLOMATIC FACILITIES.—

(1) GUIDANCE FOR CLOSURE OF PUBLIC DIPLOMACY FACILITIES.—Section 5606(a) of the Public Diplomacy Modernization Act of 2021 (Public Law 117–81; 22 U.S.C. 1475g note) is amended to read as follows:

''(a) IN GENERAL.—In order to preserve public diplomacy facilities that are accessible to the publics of foreign countries, not later than 180 days after the date of the enactment of the Secure Embassy Construction and Counterterrorism Act of 2022, the Secretary of State shall adopt guidelines to collect and utilize information from each diplomatic post at which the construction of a new embassy compound or new consulate compound could result in the closure or co-location of an American Space that is owned and operated by the United States Government, generally known as an American Center, or any other public diplomacy facility under the Secure Embassy Construction and Counterterrorism Act of 1999 (22 U.S.C. 4865 et seq.).''.

(2) SECURITY REQUIREMENTS FOR UNITED STATES DIPLOMATIC FACILITIES.—Section 606(a) of the Secure Embassy Construction and Counterterrorism Act of 1999 (22 U.S.C. 4865(a)) is amended—

(A) in paragraph (1)(A), by striking ''the threat'' and inserting ''a range of threats, including that'';

(B) in paragraph (2)—

(i) in subparagraph (A)—

(I) by inserting ''in a location that has certain minimum ratings under the Security Environment Threat List as determined by the Secretary in his or her discretion'' after ''abroad''; and

(II) by inserting '', personnel of the Peace Corps, and personnel of any other type or category of facility that the Secretary may identify'' after ''military commander''; and

(ii) in subparagraph (B)—

(I) by amending clause (i) to read as follows:

''(i) IN GENERAL.—Subject to clause (ii), the Secretary of State may waive subparagraph (A) if the Secretary, in consultation with, as appropriate, the head of each agency employing personnel that would not be located at the site, if applicable, determines that it is in the national interest of the United States after taking account of any considerations the Secretary in his or her discretion considers relevant, which may include security conditions.''; and

(II) in clause (ii), by striking ''(ii) CHANCERY OR CONSULATE BUILDING.—'' and all that follows through ''15 days prior'' and inserting the following:

''(ii) CHANCERY OR CONSULATE BUILDING.—Prior''; and

(C) in paragraph (3)—

(i) by amending subparagraph (A) to read as follows:

''(A) REQUIREMENT.—

''(i) IN GENERAL.—Each newly acquired United States diplomatic facility in a location that has certain minimum ratings under the Security Environment Threat List as determined by the Secretary of State in his or her discretion shall—

''(I) be constructed or modified to meet the measured building blast performance standard applicable to a diplomatic facility sited not less than 100 feet from the perimeter of the property on which the facility is situated; or

''(II) fulfill the criteria described in clause (ii).

''(ii) ALTERNATIVE ENGINEERING EQUIVALENCY STANDARD REQUIREMENT.—Each facility referred to in clause (i) may, instead of meeting the requirement under such clause, fulfill such other criteria as the Secretary is authorized to employ to achieve an engineering standard of security and degree of protection that is equivalent to the numerical perimeter distance setback described in such clause seeks to achieve.''; and

(ii) in subparagraph (B)—

(I) in clause (i)—

(aa) by striking ''security considerations permit and''; and

(bb) by inserting ''after taking account of any considerations the Secretary in his or her discretion considers relevant, which may include security conditions'' after ''national interest of the United States'';

(II) in clause (ii), by striking ''(ii) CHANCERY OR CONSULATE BUILDING.—'' and all that follows through ''15 days prior'' and inserting the following:

''(ii) CHANCERY OR CONSULATE BUILDING.—Prior''; and

(III) in clause (iii), by striking ''an annual'' and inserting ''a quarterly''.

SEC. 5302. DIPLOMATIC SUPPORT AND SECURITY.

(a) SHORT TITLE.—This section may be cited as the ''Diplomatic Support and Security Act of 2022''.

(b) FINDINGS.—Congress makes the following findings:

(1) A robust overseas diplomatic presence is part of an effective foreign policy, particularly in volatile environments where a flexible and timely diplomatic response can be decisive in preventing and addressing conflict.

(2) Diplomats routinely put themselves and their families at great personal risk to serve their country overseas where they face threats related to international terrorism, violent conflict, and public health.

(3) The Department has a remarkable record of protecting personnel while enabling an enormous amount of global diplomatic activity, often in unsecure and remote places and facing a variety of evolving risks and threats. With support from Congress, the Department of State has revised policy, improved physical security through retrofitting and replacing old facilities, deployed additional security personnel and armored vehicles, and greatly enhanced training requirements and training facilities, including the new Foreign Affairs Security Training Center in Blackstone, Virginia.

(4) Diplomatic missions rely on robust staffing and ambitious external engagement to advance United States interests as diverse as competing with China's malign influence around the world, fighting terrorism and transnational organized crime, preventing and addressing violent conflict and humanitarian disasters, promoting United States businesses and trade, protecting the rights of marginalized groups, addressing climate change, and preventing pandemic disease.

(5) Efforts to protect personnel overseas have often resulted in inhibiting diplomatic activity and limiting engagement between embassy personnel and local governments and populations.

(6) Given that Congress currently provides annual appropriations in excess of $1,900,000,000 for embassy security, construction, and maintenance, the Department should be able to ensure a robust overseas presence without inhibiting the ability of diplomats to—

(A) meet outside United States secured facilities with foreign leaders to explain, defend, and advance United States priorities;

(B) understand and report on foreign political, social, and economic conditions through meeting and interacting with community officials outside of United States facilities;

(C) provide United States citizen services; and

(D) collaborate and, at times, compete with other diplomatic missions, particularly those, such as that of the People's Republic of China, that do not have restrictions on meeting locations.

(7) Given these stakes, Congress has a responsibility to empower, support, and hold the Department accountable for implementing an aggressive strategy to ensure a robust overseas presence that mitigates potential risks and adequately considers the myriad direct and indirect consequences of a lack of diplomatic presence.

(c) ENCOURAGING EXPEDITIONARY DIPLOMACY.—

(1) PURPOSE.—Section 102(b) of the Diplomatic Security Act of 1986 (22 U.S.C. 4801(b)) is amended—

(B) by redesignating paragraphs (4) and (5) as paragraphs (5) and (6), respectively; and

(B) in subparagraph (A), by inserting ''the risk to United States national security of the post's continued closure or suspension of operations,'' after ''national security of the United States,''; and

(3) by amending subsection (c) to read as follows:
