ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SHIMKUS) (during the vote). Members are advised that 2 minutes remain in this vote.

□ 1935

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SUPPORTING NATIONAL MARROW DONOR PROGRAM AND OTHER BONE MARROW DONOR PROGRAMS

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 206.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. WALDEN) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 206, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 423, nays 2, not voting 9, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised that 2 minutes remain in this vote.

□ 1944

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mrs. MALONEY. Mr. Speaker, on rollcall No. 663, I had intended to vote "yea" on H. Con. Res. 206, and request that the RECORD reflect my intentions.

Mr. KENNEDY of Rhode Island. Mr. Speaker, I wish to inform you that I inadvertently misvoted on rollcall No. 663 on H. Con. Res. 206.

I support this legislation and it was my intention to vote in support of it. I did not realize until after the voting had closed that I had mistakenly voted otherwise.

NATIONAL FLOOD INSURANCE PROGRAM REAUTHORIZATION ACT OF 2004

Mr. OXLEY. Mr. Speaker, I ask unanimous consent that the Committee on Financial Services be discharged from further consideration of the Senate bill (S. 1768) to extend the national flood insurance program, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1768

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Flood Insurance Program Reauthorization Act of 2004".

SEC. 2. EXTENSION OF NATIONAL FLOOD INSURANCE PROGRAM.

(a) EXTENSION.—The National Flood Insurance Act of 1968 is amended—

(1) in section 1309(a)(2) (42 U.S.C. 4016(a)(2)), by striking "December 31, 2003" and inserting "December 31, 2004";

(2) in section 1319 (42 U.S.C. 4026), by striking "after" and all that follows through the period at the end and inserting "after December 31, 2004.";

(3) in section 1336(a) (42 U.S.C. 4056(a)), by striking "ending" and all that follows through "in" and inserting "ending December 31, 2004, in"; and

(4) in section 1376(c) (42 U.S.C. 4127), by striking "December 31, 2003" and inserting "December 31, 2004".

(b) EFFECTIVE DATE.—The amendments made by this section shall be considered to have taken effect on December 31, 2003.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. OXLEY

Mr. OXLEY. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. OXLEY:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Flood Insurance Program Reauthorization Act of 2004".

SEC. 2. EXTENSION OF PROGRAM.

(a) EXTENSION.—The National Flood Insurance Act of 1968 is amended as follows:

(1) AUTHORITY FOR CONTRACTS.—In section 1319 (42 U.S.C. 4026), by striking "December 31, 2003" and inserting "March 31, 2004.".

(2) BORROWING AUTHORITY.—In the first sentence of section 1309(a) (42 U.S.C. 4016(a)), by striking "December 31, 2003" and inserting "the date specified in section 1319".

(3) EMERGENCY IMPLEMENTATION.—In section 1336(a) (42 U.S.C. 4056(a)), by striking "December 31, 2003" and inserting "on the date specified in section 1319".

(4) AUTHORIZATION OF APPROPRIATIONS FOR STUDIES.—In section 1376(c) (42 U.S.C. 4127(c)), by striking "December 31, 2003" and inserting "the date specified in section 1319".

(b) EFFECTIVE DATE.—The amendments made by this section shall be considered to have taken effect on December 31, 2003.

Mr. OXLEY (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1945

MAKING IN ORDER AT ANY TIME CONSIDERATION OF H.J. RES. 79, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that it shall be in order at any time without intervention of any point of order to consider House Joint Resolution 79 in the House; the joint resolution shall be considered as read for amendment; the previous question shall be as ordered on the joint resolution to final passage without intervening motion except: one, 20 minutes of debate on the joint resolution, equally divided and controlled by the chairman and ranking member of the Committee on Appropriations; and, two, one motion to recommit.

The SPEAKER pro tempore (Mr. SHIMKUS). Is there objection to the request of the gentleman from Florida?

There was no objection.

GENERAL LEAVE

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.J. Res. 79, and that I may include tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

Mr. YOUNG of Florida. Mr. Speaker, pursuant to the order of the House just adopted, I call up the joint resolution (H.J. Res. 79) making further continuing appropriations for the fiscal year 2004, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The text of House Joint Resolution 79 is as follows:

H.J. RES. 79

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 108–84 is amended by striking the date specified in section 107(c) and inserting ''January 31, 2004.''

SEC. 2. Section 8144(b) of the Department of Defense Appropriations Act, 2003 (Public Law 107–248), as amended by Public Law 108–84, is further amended by striking ''November 21, 2003'' and inserting ''January 31, 2004''.

The SPEAKER pro tempore. Pursuant to the order of the House today, the gentleman from Florida (Mr. YOUNG) and the gentleman from Wisconsin (Mr. OBEY) each will control 10 minutes.

The Chair recognizes the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, yesterday the House passed H.J. Res. 78, the fifth continuing resolution for fiscal year 2004, which extends the date of the current CR through Sunday, November 23. The Senate has chosen to amend this CR so that it would remain in effect until Monday, November 24.

We have, in turn, decided with the Senate leadership just to introduce a clean CR, H.J. Res. 79, that we are now considering. That would extend the date of the CR to January 31, 2004. I think I should be very clear of what this means. It is not our intention with this CR to allow it to run through January 31, but it will allow us great flexibility in scheduling the completion of our work on the final appropriations bills and at the same time ensure that there will not be any disruption in government operations. And I would like to point out, Mr. Speaker, that the Committee on Appropriations has done its job and did so quite a long time ago, but some of the issues that are keeping us from completing work on the actual bills have nothing to do with appropriations. But, nevertheless, they are there, and we do have to deal with them, and we are dealing with them as best we can.

We are proceeding with our work on the remaining appropriations bills. And as my colleagues know, there are two conference reports that have been ready for some time to file, the conference report on Transportation and Treasury and the conference report on Foreign Operations. However, as we proceed, we will finish the remaining bills as quickly as we can, and it will be leadership's decision on when the bills will be filed and when we will vote on it. We are proceeding with our work as diligently as we can.

Mr. Speaker, I believe this CR is noncontroversial, and I urge the House to move the legislation to the Senate since the current CR does expire today.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker I yield myself 6 minutes.

Mr. Speaker, as this joint resolution demonstrates, we are in another year that simply refuses to end. Last year we did not see this Congress finish the work that was supposed to be done by October 1 until well into the winter of the next calendar year. At that time the majority party in the House blamed that inability to get the work done on the fact that there was a majority of the other party in the other body.

This year they do not have Tom Daschle to kick around anymore. This year the Republicans control it all. They control the White House. They control the House. They control the Senate. They control the schedule. They control what gets to the floor. They control how long the votes are held open. They control everything. And yet we are in a situation where tonight, long after the fiscal year is supposed to be over, we still have not seen the budgets passed for VA–HUD, for the State Department, for the Justice Department, for the Commerce Department. We have yet to see the foreign aid budget pass. We have yet to see the budget for the Labor, Health and Human Services, Education, social services agencies pass and the agriculture budget. I think we ought to ask why.

I do not believe that we are in this box because of any failure of the Committee on Appropriations leadership. I think we are in this box because the Republican House leadership is insisting on having every decision made in a top-down style. That means that the only real decisions that count except on minor matters are those made in the office of the Speaker or in the office of the majority leader.

No conferees are appointed unless they agree with the leadership's position on major issues. And yet even after rigging those conferences, even after stacking those conferences, when they still cannot win the votes that they need to win in those stacked conferences, they simply adjourn those conferences and then put legislation together in some off-corner office without any meaningful participation by anybody except perhaps some unelected members of the leadership's staff. So much for the legislative process in what used to be regarded as the greatest deliberative body in the world.

This process is about as respectful of rank and file Members as an AARP board meeting is respectful of the senior citizens they supposedly represent. On the same night that legislation is going to be considered that will bankrupt Medicare, we see the ultimate degradation of the legislative process at the same time as it is demonstrated in the appropriations process.

It is not often, Mr. Speaker, that one can do in senior citizens and the democratic process on the same night, but the House leadership should be congratulated because they have managed to find a way.

Mr. Speaker, I reserve the balance of my time.

Mr. YOUNG of Florida. Mr. Speaker, I yield myself 2 minutes.

I just would like to point out, and I have done this so many times that it does not hurt to be repeated. The House completed its work during the summer, ahead of the end of the fiscal year. And I appreciate the cooperation we had from both parties as we proceeded with our appropriations bills. I am not here to blame anybody, and I certainly would not blame anybody but circumstances.

The Committee on Appropriations, as the gentleman from Wisconsin (Mr. OBEY) pointed out, we had to do all of last year's work this year in January and February. Then we had three supplementals plus we did the 13 regular bills. This Committee on Appropriations has done its work. It has done its work well, and it has done its work on time, as the gentleman from Wisconsin (Mr. OBEY) has conceded. There are other problems.

One of the problems, and I do not know that anybody is going to like to hear this especially on my side of the aisle, one of the problems is this tremendous desire to solve legislative problems that the authorizing committees either cannot or will not solve. They are put onto appropriations bills, and they ask us to solve them because appropriations bills have to pass, Mr. Speaker. They are the only bills here really that have to pass. So we become a magnet for all of those issues that authorizers cannot solve, and we try to do the best we can. I think we are on the verge of having completed this job for this year.

I do not think it does any good to blame anybody. In fact, I would like to say that the chairman of the Appropriations Committee in the Senate is an outstanding leader, a strong, dynamic leader, who is very knowledgeable and understands the process totally. He understands the issues as well as anybody that I know. But he has a very difficult situation in the Senate, and he has done the best job that he could.

Anyway, Mr. Speaker, we are closing in on this. We are really prepared. We have been prepared for 3 weeks to file the Transportation and Treasury appropriations bill. We have been prepared for a week to file the conference report on the Foreign Operations appropriations bill. And they can be completed in a very short period of time.

The other remaining issue would be the omnibus bill that includes five appropriations bills that have not been completed in conference. And we are

very close to having that completed. We are very close to being able to file that bill and vote on it. As a matter of fact, we had hoped that we would file it tonight. A lot of changes happened during the day. And every time we make a change, it takes a little extra time. So we probably will not file that bill tonight unless the House remains in session very late.

Anyway, I would agree that the process has not worked the best, but I would also say that I compliment the Members of House and especially the members of the Committee on Appropriations in the House and the staff that worked so diligently with us. We did our job. We have done our job, and we are attempting to pursue the completion of the whole process.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, as the gentleman from Florida has indicated, the Commerce-Justice bill could very easily have been brought back to this floor separately and passed separately. The Transportation bill could very easily have been brought back to the floor and passed separately. The Foreign Operations bill could very easily have been brought back to the bill floor and passed separately. The Agriculture the same and the VA–HUD bill the same.

The problem is, as the gentleman indicated, that there are many other issues that are being drug into the appropriations process. And we also see the situation complicated by the fact that the House Republican leadership, despite votes to the contrary on a number of issues, is insisting on seeing an outcome on a number of these issues which is at variance with the expressed wishes of the Members of the House. And I think therein lies the reason for the delay and delay and delay.

I think the problem that we have, Mr. Speaker, the gentleman from Florida, my good friend, indicated that the committee product is serving as a magnet for other authorizations. I think a better metaphor would be that it is looking more and more like a garbage truck. And the problem we have is that this bill has not been allowed to proceed because I think the House leadership is still trying to determine what bags of garbage have to be tossed down to the truck before the truck is driven through here in the dead of night.

□ 2000

So that is the choice that we face, Mr. Speaker. It is not a pretty sight, and the outcome is not going to be very good. But there is not much we in the minority can do to affect either the scheduling or to affect how much garbage is tossed on the truck before it is run through the Capitol. I just hope the smell is not too bad before it is over.

Mr. Speaker, I urge a ''yes'' vote on the resolution.

Mr. OBEY. Mr. Speaker, I yield back the balance of my time.

Mr. YOUNG of Florida. Mr. Speaker, I ask for a ''yes'' vote, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SHIMKUS). All time for debate as expired.

The joint resolution is considered read for amendment.

Pursuant to the order of the House of today, the previous question is ordered.

The question is on engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. OBEY. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF JOINT RESOLUTION APPOINTING DAY FOR CONVENING OF SECOND SESSION OF 108TH CONGRESS

Mr. DREIER, from the Committee on Rules, submitted a privileged report (Rept. No. 108–398) on the resolution (H. Res. 464) providing for consideration of a joint resolution appointing the day for the convening of the second session of the One Hundred Eighth Congress, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING REQUIREMENT OF CLAUSE 6(a) OF RULE XIII WITH RESPECT TO CONSIDERATION OF CERTAIN RESOLUTIONS

Mr. DREIER, from the Committee on Rules, submitted a privileged report (Rept. No. 108–399) on the resolution (H. Res. 465) waiving a requirement of clause 6(a) of rule XIII with respect to consideration of certain resolutions reported from the Committee on Rules, which was referred to the House Calendar and ordered to be printed.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 8 o'clock and 4 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 2050

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. SHIMKUS) at 8 o'clock and 50 minutes p.m.

COMMUNICATION FROM HON. NANCY PELOSI, DEMOCRATIC LEADER.

The SPEAKER pro tempore laid before the House the following communication from NANCY PELOSI, Democratic Leader:

U.S. HOUSE OF REPRESENTATIVES,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, DC, November 13, 2003.

Hon. J. DENNIS HASTERT,
Speaker of the House, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to section 7(b)(1) of the Prison Rape Elimination Act of 2003 (P.L. 108–79), I hereby appoint Ms. Brenda V. Smith of the District of Columbia and Ms. Jamie Fellner, Esq. of New York, to the National Prison Rape Reduction Commission.

Best regards,

NANCY PELOSI.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

The SPEAKER pro tempore. The pending business is the vote on passage of the joint resolution, H.J. Res. 79, on which the yeas and nays are ordered.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The vote was taken by electronic device, and there were—yeas 407, nays 16, not voting 11, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SHIMKUS) (during the vote). Two minutes remain in this vote.

□ 2137

Mr. GEORGE MILLER of California changed his vote from "yea" to "nay."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PARLIAMENTARY INQUIRY

Ms. JACKSON-LEE of Texas. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore (Mr. LAHOOD). The gentlewoman will state it.

Ms. JACKSON-LEE of Texas. Mr. Speaker, is it my understanding that the rule we are about to take up for the underlying bill, H.R. 1, is a rule that is pursuant to a conference and a conference report where Democratic conferees were not even allowed into the room and where the Committee on Rules did not address the elimination or the lack of acknowledgment of the participation of the Democratic conferees? Is this H.R. 1 that we are about to take up? And is there any way for the points of order to be in order so that we could address that question on the floor of the House?

The SPEAKER pro tempore. The chair is about to recognize a member from the Committee on Rules to call up the rule, which will be read to the House.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 1, MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003

Ms. PRYCE of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 463 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 463

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 1) to amend title XVIII of the Social Security Act to provide for a voluntary program for prescription drug coverage under the Medicare Program, to modernize the Medicare Program, to amend the Internal Revenue Code of 1986 to allow a deduction to individuals for amounts contributed to health savings security accounts and health savings accounts, to provide for the disposition of unused health benefits in cafeteria plans and flexible spending arrangements, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

The SPEAKER pro tempore. The gentlewoman from Ohio (Ms. PRYCE) is recognized for 1 hour.

Ms. PRYCE of Ohio. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to my colleague and friend, the gentlewoman from New York (Ms. SLAUGHTER), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, H. Res. 463 is a standard rule waiving all points of order against the conference report to accompany H.R. 1, the Prescription Drug and Medicare Modernization Act of 2003. The rule also waives all points of order against its consideration.

Mr. Speaker, I rise today in full support of the rule and of the underlying bill. I would like to thank Chairman THOMAS and Chairman TAUZIN for their outstanding coordination, their remarkable leadership, and the inspiring vision that they have provided on this critical legislation. The conferees have all worked extraordinarily hard to produce the most sweeping Medicare bill in generations.

Since 1965, Medicare has provided a guarantee of health care coverage for most all Americans. Stability, longevity, and integrity have been the hallmarks of this program, offering the promise of a secure retirement. But a lot has changed since 1965. Our investment in research and medicine has yielded us advanced medications, therapies, and technology that have paved the way for our seniors to live longer, healthier lives. Unfortunately, Medicare has not changed with these medical advancements. The most obvious shortcoming is the lack of prescription drug coverage, the best tool medicine has to offer.

Before us today is an opportunity to pass landmark legislation that addresses these shortcomings and finally propels the program of Medicare into the 21st century, most notably by covering these prescription drugs. If we do not act and pass this plan before us today, the future of our seniors will be in doubt, with their happy and healthy lives uncertain. And if we do not act today, the fate of Medicare will be certain: bankruptcy.

So today we will accomplish two long overdue goals. First, we will strengthen Medicare to save it for future seniors; and, second, we will enhance the program by providing much-needed prescription drug coverage, bringing this 1965 health care program into the 21st century. And to those who are telling us to slow down, I say seniors have waited too long. This House has passed a Medicare prescription drug plan three times since Republicans have controlled Congress, each time only to be scuttled. Today we will finally end the denial of benefits to our seniors and end the delay.

Folks in my district tell me that they cannot go another year without the help of Medicare prescription drug coverage. They want us to speed up the process. They tell me that when you are sick and you are elderly, Medicare is not just health care; it is peace of mind. Well, we listened and we acted, producing this historic package.

Our seniors are not the only ones who have spoken out in support of this plan. Let me tell you, some very knowledgeable folks on the front lines of health care delivery, people who understand the needs of our seniors and the problems with Medicare, have made their support for this bill very clear. Allow me to name just a few: the American Association of Retired Persons, the AARP, the largest senior group in the Nation representing 35 million seniors, card-carrying, dues-paying, voting seniors; the American Medical Association; the American Hospitals Association; employers Coalition on Medicare; the Alzheimer's Association; American Society of Radiology and Oncology; Rural Hospital Coalition; National Hospice and Palliative Care Organization; the College of Obstetrics and Gynecology; American Society of Anesthesiologists; American Physical Therapy Association; pathologists; nurse practitioners. The list goes on and on. It includes hundreds and hundreds of supporters. They back this plan because they know how important and long overdue it is, plain and simple.

There are many reasons to vote for this package, but I want to call attention to a few that are significant. First of all, this prescription drug plan is voluntary, universal, and guaranteed. Period. If you are over 65 and you qualify for Medicare, you qualify for this benefit. If you want it, you can have it. If you do not, you do not have to take it. With this benefit, 40 million seniors will begin receiving significant savings on their medications.

□ 2145

To begin with, we offer immediate savings with the prescription drug discount card that will offer up to 25 percent in savings early next year. This drug discount card is a tremendous first step while the larger benefit is implemented.

After the drug is fully phased in in 2006 it will work like this: After a $250 deductible, Medicare will pay 75 percent of seniors' drug cost up to $2,250 a year. Medicare will then provide catastrophic protection, giving seniors 95 percent coverage for out-of-pocket drug costs. That is beyond $3,600. On average this reduces seniors' cost of medication by 50 percent.

This package also switches the focus of health care from reactive disease treatment to proactive disease prevention. The old saying ''an ounce of prevention is worth a pound of cure'' could not be more appropriate in this instance. Gone are the days of waiting until the symptoms are so obvious and the disease is so advanced that the only options are expensive hospital stays and surgeries.

Twenty-first century medicine can prevent, preempt, and predict illnesses through advanced screenings and innovative tests. In many cases taking a pill is all that it takes to prevent a chronic disease from becoming a life-threatening illness. Medicare will cover the preventative medications that keep our seniors out of the hospitals and off of the operating tables. And with this revolutionary shift in focus, Medicare will cover the $20 prescription before the $6,000 surgery even becomes necessary. That is not only real savings for the American taxpayer, but it is a real life savings for our seniors.

This landmark bill improves health care for our seniors, especially those who need it most, through significantly increased assistance for so-called ''disproportionate share hospitals.'' Such hospitals, as the term implies, care for a disproportionate share of low-income patients, and the last thing they need is funding cuts. Under this plan the hospitals will see a significant increase and allow them to care for these low-income families and seniors.

In addition to its strong commitment to our lower-income seniors in general, the plan is particularly good news for women. Since women make up a majority of Medicare beneficiaries and tend to suffer more from chronic illnesses, this landmark improvement in the Medicare system will radically change their lives for better. Half of the senior women who are under Medicare will receive complete drug coverage, an extraordinary step forward for these women who are suffering unnecessarily high drug cost burdens even as we speak. The disease management aspect of this bill will help prevent the progression of the chronic illnesses from which a majority of senior women suffer.

Clearly, this plan means a better life for women and for all of our seniors, but it also will lessen the burden upon the Medicare program by creating a health savings account. Health savings accounts allow forward-thinking and penny-wise workers to start saving for their future medical costs tax free. These accounts are allowed to grow without burdensome taxation, providing all Americans with the opportunity to save for their own future medical expenses. Who can argue with the promotion of these strong values, values like personal responsibility, savings, financial discipline? These things have been gone from our health care delivery system for decades now. It is time we bring them back. And who can argue against a voluntary program that relieves the financial burden of Medicare and the taxpayers who fund it?

Finally, this package includes a provision that I have championed for many years. Under the current system, anticancer drugs are only covered if they are injected or intravenously delivered. But today with the new advances in cancer therapy, many anticancer drugs can be taken orally, and, therefore, are not covered by Medicare. This plan begins to change that finally.

The plan will deliver the comforting pain-relieving and cancer-curing drugs that these patients so desperately need to deal with their illnesses. They need these medications now, and they are going to start to get them now.

Mr. Speaker, there is a value attached to this legislation that resonates not only among our seniors but to all Americans. The value is the freedom to choose the plan that works best for someone in their own situation. Each senior is different with different needs and different family situations. With this plan these differences can, for the first time, be honored. Seniors who are happy with traditional Medicare in their current coverage are free to stay where they are, but if they choose, seniors will have many options available to them and they will be able to pick the coverage that best meets their health care needs. If they are not content with the current coverage, they can choose from other plans to save on their medications and preventative care. This is a win-win solution, a commonsense approach. So today the vote is simple. It is either ''yes'' in favor of millions of seniors who plead for us to pass this bill, or it is another ''no,'' another ''no'' in favor of politics, another ''no'' in favor of partisanship, another ''no'' with an eye toward the upcoming election. In short, another ''no'' against American senior citizens and against the future viability of the Medicare system upon which they rely. Members can choose to listen to the seniors who are asking them to put partisanship, politics and election strategy aside, or they can oppose this bill.

But to those of my colleagues who plan to vote ''no,'' I would ask: How is this package not an improvement for

our seniors who have no coverage and are struggling to pay for their medications? Why would they rather give our seniors nothing at all than give them this plan that will help them? How will they explain that to future generations, their children, their grandchildren why they did not support bringing Medicare up to speed with their generation and their needs?

I remember the opponents of the tremendously successful welfare reform of 1996. They predicted doomsday scenarios, millions of women and children out on the streets starving. The reality is that 7 years later, the welfare rolls have dropped from 14 million to 5 million. The reality is that welfare reform made the American Dream possible for millions of Americans who were previously trapped in generational cycles of poverty and helplessness.

These same naysayers are making the same claims about this Medicare plan today. I say to my friends, their shouts, their cries, their failed predictions were myths in 1996 and they are myths today. To those who plan to vote against strengthening America, I urge them to be bold, to exercise leadership and show courage by propelling America's health care system into the 21st Century. Vote for this bill. If the Members think this bill does good but does not go far enough to help our seniors, then I ask them to support it and let us work together to improve it in the future. Do not let the perfect become enemy of the very good. Our seniors deserve our support, all of our support.

I urge this Congress to pass the underlying bill, but first of all, let us pass this rule.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentlewoman from Ohio for yielding me the customary 30 minutes.

Mr. Speaker, I want to repeat something I said earlier today when I heard the long list of people who support this bill. We have to ask ourselves do they know what in the world is in it? Because we certainly do not.

Seniors, we do know, are drowning from the high cost of prescription drugs and the Republicans are telling them to swim towards an HMO. To paraphrase the old saying, ''Congress giveth and Congress taketh away,'' but in this case it mostly takes away. Congress takes away any hope for meaningful prescription drug coverage. It takes away the existing employer-provided benefits and low-income protections from retirees, and it takes away Medicare as we know it. It lures seniors with the promise of generosity and then gives them a pittance. But when this bill does give, it is wonderfully generous.

The Medicare Prescription Drug and Modernization Act is a boon for the pharmaceutical industry and for the insurance companies but does absolutely nothing to control the skyrocketing prices of prescription drugs. In fact, the bill forbids the government from doing anything about it.

Drug prices have risen dramatically in the last 20 years, increasing 256 percent since 1980. For years seniors have called our Congress to do something about these crushing drug prices, but this plan does nothing to freeze or reduce the out-of-control prices of medications. What it does do, as I said, is prevent the government from using its market power to bring the prices down. The Veterans Administration has had great success in reducing drug prices by bargaining with the drug companies. Why would we purposely tie our own hands? Our health system is crumbling under the burden of the prescription drug costs. Tossing billions of dollars at insurance companies to get them to do what they do not want to do and 70 billion to corporations to get them to do what they should do and a boon to pharmaceutical companies by not allowing reimportation to please them is not going to buttress this health care system. That money would have been far better spent on the prescription drug program. But saddling the elderly with even greater drug costs and our children with even greater deficits is no way to solve a public health crisis.

A few years ago, I organized a busload of seniors to travel to Canada to purchase medicine at a fraction of the prices charged in the American market. We had dozens more people interested in the trip than we could accommodate, but the savings were anywhere from $100 to $650 on a 3-month supply of medication.

Would it not be wonderful if the seniors could save that much at their local drug store? Unfortunately, this bill will not let them go to Canada anymore. Despite having passed the House twice, money-saving drug reimportation would be banned. The out-of-pocket costs for prescription drugs would continue to consume more and more of the seniors' fixed income.

Almost 40 years ago, Mr. Speaker, Congress created the Medicare program and promised to help seniors with the burden of their health care costs. Private insurers did not want to offer the health insurance to older people any more than they do now. The premiums were raised to unaffordable levels, and seniors were dropped from health coverage altogether. Companies saw older people as a threat to the bottom line. So the Federal Government stepped in and filled the void in the marketplace.

And now we face a similar situation. If insurers thought they could make a dollar or two by offering prescription drug coverage to seniors, the plans would have already been in the marketplace. The bill creates a new benefits program unwisely relying on insurance products that do not exist. The Republicans are hoping that a $12 billion slush fund will entice the private insurers to develop prescription drug insurance. But the lucrative pharmaceutical industry with about a 30 percent profit yearly is the big winner in this game. A blank check is being written to the big drug companies, and in the first 8 years of this program, the companies stand to make a windfall of $139 billion over and above their current profits of 30 percent annually. The market recognizes this plan as a boon for drug companies because the stock prices of the major companies went up just over the news that this bill is nearing completion.

The proponents of privatizing Medicare also win. The scheme takes the first giant step to privatize Medicare. In six metropolitan areas, Medicare's guaranteed coverage would be replaced with what is essentially a voucher program to purchase private insurance with public money if they can find it. This ''demonstration'' could force up to 10 million seniors who want traditional fee-for-service Medicare to pay the higher premiums or turn to HMOs. Once Medicare is gone, there will never be another program ever like it in the United States paid for by payroll taxes. I am worried about the seniors that I represent, and it would be devastating for the seniors in western New York to lose those guaranteed benefits.

Mr. Speaker, the pharmaceutical companies, the HMOs, and the insurance industry had far more access to the negotiations than the Democrats did, as the Members have heard that story before, and I will not belabor it. But I do want to say something about the AARP. President William Novelli's endorsement of this plan is no surprise. The support is waved around as if it is the seal of approval of every American senior. But 210 national, State, and local organizations oppose the plan, and seniors from coast to coast are ripping up their AARP cards. Interestingly, Mr. Novelli is the founder of the firm Porter Novelli, the group behind the television ads that brought down the efforts to reform health care in the 1990's. Do any of the Members remember ''Harry and Louise''? Is Mr. Novelli hostile to meaningful health care reform, or can he just be paid to do anything, because $20 million in this bill goes to AARP?

□ 2200

This is not the first time that Congress has messed with Medicare. Congress passed the Medicare Catastrophic Coverage Act of 1988 without even providing the Members sufficient opportunity to read its pages, much like tonight, and the fine print. The result was a momentous backlash. American

seniors were outraged with the legislation, so outraged that Congress was forced to repeal the law the very next year.

Congress later created a Medicare+Choice program, which was also a failure. Within a few short years after its conception, private insurers dropped Medicare+Choice beneficiaries by the thousands, leaving them with no health benefits at all. My constituents are asking, does this face them again? I hope we remember our history and not repeat these mistakes and vote against this bill.

But the prescription drug proposal before us is a placebo, not a cure. It fails seniors, the out-of-control cost of prescription drugs will remain unchecked, and some will argue that this scheme is better than nothing. But believe me, a bad bill is worse than no bill. Medicare must be preserved. To dismantle this historic program is to break the sacred promise that Congress made to seniors.

Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from California (Ms. WOOLSEY).

Ms. WOOLSEY. Mr. Speaker, I rise against this sham Republican prescription drug bill that will harm, not help, elderly women.

Mr. Speaker, I rise today to express my profound disappointment at the Medicare Conference Report and this squandered opportunity to help seniors afford the increasing cost of prescription drugs.

I want to make one thing abundantly clear to everyone here today: This debate is not about prescription drugs. Instead, the majority has taken this opportunity to advance a plan that will undermine the future of Medicare.

Seniors may think this final bill will help them with some of their prescription drug costs. While it will save some seniors a small amount of money after they pay an unspecified premium, this bill will give them little more than a false sense of security.

Seniors will read the newspaper headlines and believe that we have passed a drug benefit that will alleviate all of their financial hardships. They'll mistakenly think that they no longer have to choose between paying for groceries and paying for their prescriptions.

But imagine their surprise when they read the fine print. Our seniors need immediate help. Many will be shocked to learn that this bill won't give them a prescription drug benefit until 2006. If this is such a great plan, why must seniors wait 3 more years to reap its supposed benefits?

They'll find that their out of pocket costs are still enormous. Imagine their outrage, as they dutifully write a check to pay their monthly premium, even though they aren't receiving any drug coverage, because they have fallen into the "donut hole" coverage gap.

Seniors who currently enjoy quality prescription drug coverage many think this doesn't impact them, but they too are in for a rude shock. As many as 2 million will watch their prescription drug benefit provided by their former employer vanish into thin air.

Others will find their previously generous benefit slashed to the bare bones level of Medicare, complete with high deductibles, premiums, and a "donut hole" coverage gap. That's because employers will be eligible for subsidies if they provide any type of coverage—even if it's less than what they promised their employees.

But this bill is about far more than prescription drugs. This is the biggest bait and switch operation I've seen in quite some time. The majority is saving one thing and doing quite another. They'll talk all they want about providing prescription drugs. But their actions will ruin the Medicare program that for decades has so effectively provided seniors with access to health care.

You won't hear them talking about their large subsidies to private health plans. They won't talk about the voucher scheme that will begin in 2010. They'll employ the euphemism "demonstration project", instead of speaking honestly to seniors about their real goal: privatization.

They won't talk about the catastrophic impact this legislation will have on the poorest of the poor. By imposing an assets test on poor seniors who need additional help, this legislation could force a widow living only on her social security benefit to choose between selling her wedding ring and qualifying for an additional subsidy. She could be disqualified from receiving the help she needs because she has purchased a burial plot next to her husband's. This is tragic—and you won't hear about it from the majority.

They also won't talk about the ways in which they are helping their friends in the pharmaceutical industry. By continuing a long standing restriction on the reimportation of prescription drugs, and by prohibiting Medicare from negotiating lower prescription drug prices, the majority is assuring that seniors will continue to pay astronomically high prices for the medicines they need.

Our seniors deserve an honest and complete explanation of what this bill will do to Medicare. Seniors deserve a prescription drug bill that is actually about prescription drugs. Our seniors need a comprehensive benefit, not a false sense of security. I urge my colleagues to join me in opposing this bait and switch proposal.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from New York (Ms. VELÁZQUEZ).

Ms. VELÁZQUEZ. Mr. Speaker, I rise against this sham Republican drug bill that will increase costs, reduce coverage, and dismantle Medicare as we know it.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent to the gentlewoman from Wisconsin (Ms. BALDWIN).

Ms. BALDWIN. Mr. Speaker, I rise in opposition to this conference report which will dismantle Medicare as we know it, harming millions of women who depend on that program.

Mr. Speaker, I urge my colleagues to vote against this sham of a bill. It does not provide the real, guaranteed, affordable drug benefit that our seniors desperately need. Worse yet, this bill sets the stage for dismantling the entire Medicare program.

I think that all of my colleagues would agree with me when I say that one of the issues we hear most about is the need for affordable prescription drugs. Whether I am at the grocery store, at the airport baggage claim, or in meetings all across my district in Wisconsin, the one thing that I hear over and over is that seniors cannot afford to pay for their prescription drugs.

The bill on the floor today does not contain the prescription drug benefit that seniors deserve. Instead of providing an affordable prescription drug benefit, this bill creates an incomplete and expensive benefit—a benefit with a hole, where seniors will be paying premiums and receiving no benefit.

Aside from the meager benefit, there is nothing in this bill that addresses the ever-rising cost of prescription drugs. Instead of including measures to ensure that prescription drugs are affordable, this bill actually prohibits the federal government from negotiating lower drug prices for Medicare beneficiaries. Instead of helping seniors obtain affordable prescription drugs, this bill provides partial coverage of drug spending until total costs reach $2,250 and then leaves seniors high and dry. There is a huge gap in coverage where seniors must pay 100 percent out of pocket and continue paying premiums, until they reach a high out-of-pocket cap. Millions of seniors will fall into this gaping hole. I believe seniors deserve affordable drug coverage, and this bill fails to achieve that goal.

Further, this bill takes us down the dangerous road of privatizing Medicare. It is my strong belief that privatization of Medicare is unwarranted. Our Nation's seniors and persons with disabilities have counted on Medicare since it was first enacted in 1965. It has provided health care insurance to the oldest, sickest, and frailest in our society and done so in a cost-efficient manner. Why then, would we seek to dismantle such a successful program? This bill relies on private insurers to provide a prescription drug benefit. Seniors would have to join HMOs and private insurance plans to get the benefit, meaning that premiums and benefits would vary across the country and seniors would not be able to choose their own doctor or pharmacy.

In addition, this bill includes a provision that authorizes a massive "demonstration" project that could affect up to 6 million seniors. Starting in the year 2010, this "demonstration" project forces Medicare to compete with private plans. This competition is wholly unfair and on an unlevel playing field. Seniors will be given a voucher to purchase health care insurance, either from Medicare or from private insurers. We know from past experience what will happen: the youngest and healthiest seniors will go to private insurers, leaving the sickest and frailest seniors in Medicare. This will automatically drive up Medicare's costs and will give Republican legislators ammunition for dismantling this program. Make no mistake about it; this massive "demonstration" project will be the beginning of the end of Medicare.

Today, we will vote on the most dramatic changes in the Medicare program since its inception. This bill does include unprecedented benefits—unfortunately the benefits will go predominantly to the politically-connected

pharmaceutical and insurance industries, rather than to America's seniors who need relief. It saddens me that the legislation we vote on today will not provide seniors with what they need most: comprehensive prescription drug coverage and affordable prices. Seniors need a comprehensive prescription drug benefit that is affordable and dependable for all—with no gaps or gimmicks in coverage. The conference agreement before us fails on all these counts, and I urge my colleagues to vote against it.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise against this misdirected Medicare proposal that will increase out-of-pocket expenses for the poorest and sickest women.

Mr. Speaker, this is about as ugly as it gets. Just when I thought the Republican Leadership could not work any harder to undermine the Democratic process, to abuse their power, and to play politics with critical issues at the expense of the American people—they have just taken it to a higher, or should I say "lower" level. This bill is a sham and the rule is a sham.

When this process first began, and the President and the House and Senate Leaders proclaimed that they intended to produce a Prescription Drug Plan, my Democratic Colleagues and I tried to give them the benefit of the doubt. We tried to work in a bipartisan fashion. At one point, I wrote a letter to the Members of the House-Senate Conference Committee and encouraged them to include fair provisions for our physicians and hospitals, so that they would be able to afford to continue providing excellent care for our seniors. I am pleased to say that they did respond to that request, and have put in some funds for those deserving groups. But that is where the collaborations ended.

The Democrats on the Conference Committee, among them, had decades of experience in the field of health policy. No one could question their commitment to helping Seniors, but in a deeply cynical move by Republican Leadership, Democrats were barred from even entering conference meetings. That is against everything our Founding Fathers intended this "People's House" to be. We got our first glimpse of this bill just over 24 hours ago. Even in our haste to get it read, we have found numerous flaws and pitfalls in it. In 2006, if it is allowed to come into effect, I am sure our Seniors will find many more.

No one in this House has had a chance to really think through this monstrous conference report. We should all join together and raise a massive point of order against it, so that we will have the time to give it the consideration it deserves. The Rule does not let us make that happen.

The Rules Committee Chairman seems to be saying, "well money is tight, so let's just take what we can get, and be happy with this bill. Let's just shove it through." But the conference report that we are now finally getting a glimpse of is so bad, it would actually leave millions of Senior Citizens worse off than they were without it. And as Doctors say in the Hippocratic Oath, the most important rule in healthcare is Do No Harm.

Furthermore, there is no rush to pass this bill. The Republican authors conveniently made their plan kick in in 2006, well after the presidential elections of 2004. Obviously, they don't want Seniors to go to the poll furious when they realize how bad this plan is. The point is, we can wait till Spring and do this job right—and still make their 2006 timeline.

This rule and this bill really are the epitome of just how bad partisanship and political demagoguery can get. Let's defeat this rule. Let's take a step back, get some fellowship back over Thanksgiving, and start fresh later. We can do this right. Our Seniors deserve it.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from Michigan (Ms. KILPATRICK).

Ms. KILPATRICK. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on this Medicare proposal that takes Medicare from patient care.

Mr. Speaker, I rise today to urge all my colleagues to vote against the Medicare Conference Report offered by the Republican leadership. Seniors want a prescription drug benefit that is affordable and guaranteed under the Medicare system.

Passage of this bill would weaken prescription drug benefits, fail to lower drug costs, and weaken the Medicare program.

Congress needs to pass a good Medicare bill that actually helps seniors and not just any bill that benefits pharmaceutical companies, HMOs, and special interest. Our colleagues on the other side of the aisle have a take it or leave it attitude. They want the American public to believe that if this conference report is not passed then all opportunities for a real prescription drug benefit under Medicare is lost. However, I submit to you that if a true bipartisan effort was made at the conference table, then much could be accomplished.

Mr. Speaker, there are dozens of reasons why this conference report should be defeated and never become law. Many of these reasons have already been mentioned but I want to take this time to highlight a few.

The three Democratic House conferees were shut out of the process and were not allowed in the conferee meeting. The treatment of these House Members is reasons enough for every member of this body to reject this conference report.

The legislation would not create a prescription drug benefit until in 2006. However, HMOs, insurance companies, and pharmaceutical companies receive billions of dollars upon enactment of the conference report.

The bill also explicitly prohibits the Secretary of Health and Human Services from negotiating lower drug prices on behalf of America's 40 million Medicare beneficiaries.

The bill does not allow Americans to import drugs from Canada and other countries where prices are lower. International comparisons of pharmaceutical prices have shown that elderly and uninsured consumers in the United States often pay more for prescription drugs than consumers in other countries. As a result, more and more elderly consumers are traveling outside the country to find cheaper, more affordable prescription drugs. My district borders Windsor, Ontario, Canada, where I have known many of my seniors travel to get their prescriptions filled.

The GOP plan includes provisions that will privatize Medicare and force senior citizens into HMOs and other private insurance plans.

Millions of senior and Americans with disabilities currently covered by Medicare would actually find themselves worse off if the conference report becomes law. Low-income seniors who get additional assistance form Medicaid will pay more for their prescriptions because they will lose their Medicaid benefit.

Currently, Medicare beneficiaries who receive medicine through Medicaid either pay no co-payments or are charged nominal amounts per month per prescription. Under the new plan, people will pay three-to-five dollars per month, per brand-name prescription and one or two dollars for generic drugs. Depending on their income. These co-payments will increase each year.

The GOP plan creates an unlimited program of Health Savings Accounts (HSAs). This tax break benefits the healthy and wealthy and could dramatically raise health insurance premiums for other Americans—particularly families with moderate incomes and those with high health expenses.

Seniors will lose their retiree health benefits. More than two million seniors in employer-based retiree plans are in jeopardy of being dropped from coverage because the bill creates incentives for employers to drop prescription drug coverage.

Mr. Speaker, the Medicare Conference Report before this body will have a detrimental effect on senior and disabled citizens in my home state of Michigan.

143,000 Medicare beneficiaries in Michigan will lose their retiree health benefits.

183,200 Medicaid beneficiaries in Michigan will pay more for the prescription drugs they need.

90,000 fewer seniors in Michigan will qualify for low-income protections than under the Senate bill because of the assets test and lower qualifying income levels.

44,980 Medicare beneficiaries in Michigan will pay more for Part B premiums because of income relating.

Providing affordable prescription drugs to our seniors and the uninsured should have been the goal. The Republican lead Congress squandered this opportunity to include a real prescription drug benefit within the Medicare plan.

Mr. Speaker, there are hundreds of national, state, and regional organizations that have come out against the Medicare conference report. I stand today with the seniors in my district and across the nation in opposition to this bill.

I ask my colleagues to stand with me and vote against this Medicare Conference Report that fails to provide an affordable and reliable Medicare prescription drug coverage, gives billions to HMOs, insurance companies, and pharmaceutical companies, prohibits drug reimportation, and privatizes Medicare.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from New York (Mrs. LOWEY).

Mrs. LOWEY. Mr. Speaker, I rise against this prescription drug bill, because it will prohibit Medicare from negotiating price with the pharmaceuticals to lower prices for our sickest and most elderly population.

Mr. Speaker, we are on the cusp of passing a Medicare prescription drug benefit that should have put seniors first, but, instead, will become the death knell for Medicare.

Some are saying this is a matter of now or never, that we must pass this legislation tonight. That's just not true—where there's a will, there's a way. So, I urge my colleagues to refrain from rushing to judgment, vote against this bill, and work together, Republicans and Democrats alike, through December to craft a plan that will stay true to Medicare's tried and trusted roots.

Mr. Speaker, the bill before us will allow insurance bureacrafts—not doctors—decide which drugs to prescribe and how much to charge seniors; and leaves major gaps in coverage that will affect almost half of Medicare recipients. I will end Medicare as we know it, and will have questionable impacts on some of the most well regarded state-sponsored drug coverage programs, including New York's.

But, my colleagues, the straw that breaks the camel's back is the lack of any attempt to bring down the skyrocketing costs of drugs. H.R. 1 will prohibit the federal government from using the muscle of the 40 million seniors in Medicare to negotiate lower drug prices. And it puts the brakes on the reimportation of pharmaceuticals from Canada and overseas—where drugs are sold for two, three, and four times less than in the U.S.

This one-two punch will not only hurt seniors. It will block hard-working Americans, including the 43.6 million uninsured, from obtaining cheaper drugs—leaving taxpayers to foot the bill for a plan that rewards private industry at the expense of consumers.

The drug companies, with profit margins over 18 percent, have spend hundreds of millions of dollars trying to influence American opinion on prescription drugs. Yet, they will be rewarded with 40 percent profit increases. The same HMOs that left seniors in the cold under Medicare+Choice will be given a $12 billion slush fund to entice their participation in this plan.

I have fought for years to give seniors an affordable, guaranteed, comprehensive, and voluntary prescription drug benefit under Medicare. I am deeply saddened and disappointed that the House leadership in forcing a vote on a bill, which many of us have not even been able to read in completion, that is not worthy of our seniors.

I urge my colleagues to vote "no" on the bill.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I rise against this so-called Medicare proposal devised by former Speaker Gingrich and the pharmaceutical industry that will increase out-of-pocket expenses for the poorest and sickest women.

Mr. Speaker, the sham Republican prescription drug bill will harm, not help, elderly women.

I oppose the Republican Medicare bill because it does not ensure that our seniors, especially our most venerably elderly women, get the long overdue Medicare prescription drug benefit that is available and affordable to all.

How will this Medicare Reform proposal hurt women? First you must realize that women account for the majority of people who are on both Medicare and Medicaid. To make matters worst, the proposal is harmful to the poorest and sickest women because their out of pocket cost would increase above what Medicaid currently allows.

I believe we must carefully draft legislation to protect the health and well-being of our citizens. It is shameful that many American seniors must regularly make the heartbreaking choice between paying for food and paying for prescription medicine. As a former nurse, I have spend much of my career working to ensure that our nation's health care system provides a wide range of affordable services.

But unfortunately, drug prices are going up over 3 times the rate of inflation giving the drug industry more profits than all others—the result: seniors can't afford the medicine they need.

Yet this proposal would actually prohibit Medicare from getting the best price for seniors. This bill states, and I quote, "[Medicare] may not . . . interfere in any way with negotiations between . . . Medicare Advantage organizations . . . and drug manufacturers . . ." In laymen's term that means Medicare must pay whatever the drug companies want to charge. This makes the new law a multi-billion dollar subsidy to the drug industry and a rip-off for America's senior citizens.

This is especially hurtful to women because nearly eight in ten women on Medicare use prescription drugs regularly. Because the bill doesn't allow for the government to negotiate price controls on drugs, our women will have to face higher drug cost, as well as the American Treasury.

Democrats have led the fight to add a drug benefit to Medicare. But what started as a fight to add a drug benefit has become a fight to save Medicare as we know it. Over and over again we have demonstrated our willingness to compromise and accept a less-than-perfect drug benefit when they approved a bipartisan Senate bill this summer. But instead of seeking bipartisanship, Republicans have insisted on including provisions that would turn Medicare into a voucher program and could cap government spending on Medicare. These provisions have nothing to do with providing beneficiaries affordable prescription drugs. They are intended to undermine Medicare.

Medicare was created because the private health care system would not provide affordable health insurance coverage for seniors. We shouldn't be turning back the clock to those times. But that's exactly what the Republican bill—as written—will do.

The American public should be outraged that the Republican leadership is playing politics with the health and well-being of millions of our citizens, and I hope the voters will remember this shameful abuse of power when they go the polls at election time.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from New York (Mrs. MCCARTHY).

Mrs. MCCARTHY of New York. Mr. Speaker, I rise against the Medicare bill that is going to be giving billions of dollars of giveaway money that should be going for prescription drugs and not to the insurance companies and not to the pharmaceutical companies.

Mr. Speaker, I rise, once again, in opposition to this flawed prescription drug bill. It is nothing more than a sheep in wolf's clothing.

I'm frustrated because this Medicare bill contains some provisions I feel are necessary. Indeed, hospitals and doctors may see higher reimbursement rates. It would provide a meager prescription drug benefit, and includes some protections for low-income seniors.

All of these provisions are a step in the right direction. Unfortunately, they are overshadowed by the bill's overall shortcomings.

I had hoped that the effort to add a prescription drug benefit to Medicare would be a discussion about freeing seniors from the skyrocketing costs of medicine.

But instead, it's become a struggle for the future of Medicare.

The bill starts us down the path to privatizing Medicare. It damages the safety net we've stitched for our vulnerable seniors. And worst of all, it does nothing to make drug companies keep the cost of their medicines down, which is what I thought this effort was all about in the first place.

Most of Long Island's seniors would be forced to go to private insurers for their drug coverage. In fact, this bill takes us down the same road Long Island has already traveled with Medicare+Choice HMOs. At first, we throw money at them, the private plans provide coverage, and everyone's happy. But over time, costs mount, federal reimbursements don't keep up, and the private insurers cut and run. This Medicare plan would throw billions more at HMOs and other private insurers with no guarantee that they'd continue to cover seniors. What happens when the HMO gravy train stops? Once again, our seniors will be left holding the bag. That goes against the very reason we created Medicare in the first place: to provide seniors with a safety net that the private insurance market could not and did not provide them with.

In addition, the bill would actually prohibit the government from negotiating lower drug prices. Veterans on Long Island benefit from lower drug prices because the Veterans Administration negotiates prices on their behalf. If it works for veterans, why deny it to our seniors?

Finally, many seniors would find themselves in the "doughnut hole," a gap in the very prescription drug coverage we are supposedly trying to provide them.

Simply put, the bill is not good enough, and I refuse to compromise the needs of our seniors in hopes of advancing a political agenda.

We must go back to the drawing board and create a real prescription drug benefit for seniors. We must do it without damaging their safety net or turning Medicare over to HMOs and insurance companies. Finally, we must do

no harm, I learned years ago as a young nurse.

Mr. Speaker, this bill will do harm. I must vote against it.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from California (Ms. WATSON).

Ms. WATSON. Mr. Speaker, I rise against this sham Medicare proposal that the AARP supports. Bill Novelli is smiling because AARP gets millions of dollars, he gets $420,000 annual salary, and all grandma gets is a doughnut hole.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. LAHOOD). As recorded in section 957 of the House Rules and Manual, although a unanimous-consent request to insert remarks in debate may comprise a simple, declarative statement of the Member's attitude toward the pending measure, it is improper for a Member to embellish such a request with other oratory; and it can become an imposition on the time of the Member who has yielded for that purpose. The Chair will entertain as many requests to insert as may be necessary to accommodate Members, but the Chair also must ask that Members cooperate by confining such requests to the proper form.

Ms. SLAUGHTER. We would be happy to cooperate. Mr. Speaker, is it correct that we can rise for the unanimous consent request to say that we oppose the bill?

The SPEAKER pro tempore. The gentlewoman is correct.

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield for a unanimous consent request to the gentlewoman from California (Ms. LINDA T. SÁNCHEZ).

Ms. LINDA T. SÁNCHEZ of California. Mr. Speaker, I ask unanimous consent to revise and extend my remarks about this sham Medicare proposal that I oppose.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from Ohio (Mrs. JONES).

Mrs. JONES of Ohio. Mr. Speaker, without embellishing my statement, I adamantly oppose the legislation that is before us on behalf of the millions of low-income workers who will not receive adequate funding under this bill.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from California (Ms. LOFGREN).

Ms. LOFGREN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in opposition to the bill because it increases costs for the poorest who are mainly women.

Mr. Speaker, the current Medicare Prescription Drug bill we are debating this evening, if passed, will force many low-income seniors to pay more for their Medicare coverage. Despite its $400 billion price tag, this legislation will leave some 6.4 million of the poorest and sickest Medicare beneficiaries who currently receive prescription drug coverage through Medicaid, worse off, as they will no longer be able to depend on assistance with their co-payments and will no longer depend on getting help paying for prescription drugs that are prescribed by their doctors but are not on the list of drugs and therefore not covered by the private insurers who will administer the new Medicare bill.

Mr. Speaker, this piece of legislation is not "paid for." I expect that it will worsen the nation's long-term fiscal problems substantially adding to the deficit. Is the proposal good enough to justify this?

After weeks of secret hearings, in which not one Democratic Member of the House of Representatives was allowed to participate, we were presented with a Medicare prescription drug plan that is more geared towards benefiting industry, the HMOs, and insurance companies than in serving the healthcare needs of our elderly and disabled.

In the forty years since Medicare was created, it has been hailed as an affordable, defined, guaranteed, and comprehensive healthcare plan for all senior citizens. I agree that Medicare should evolve. I also understand that prescription drug costs are rising at an alarming rate of 17 percent per year. But the current proposal facing Congress does too little to help control drug costs, requires seniors to spend too much out-of-pocket, and compromises many of the basic principles that have made Medicare so valued and effective. This proposal prohibits the federal government from using its vast buying power to negotiate significant discounts for the millions of seniors and disabled who have come to rely on Medicare.

Mr. Speaker, my constituents and seniors across this nation believe that an affordable, guaranteed prescription drug benefit is urgently needed. Sadly, the prescription drug benefit in this bill would not go into effect until 2006.

Mr. Speaker, my constituents and seniors across this nation asked this Congress for a strong prescription drug benefit through Medicare, it did not ask this Congress to begin the process of privatizing Medicare. They believe that reforming Medicare does not mean privatizing Medicare. Under this bill, millions of Medicare beneficiaries are forced to pay more just to stay with their own doctors. Premium support, a provision included in this bill will allow private insurance plans to lure healthy seniors out of Medicare, leaving older and disabled seniors behind to pay higher premiums for the same coverage they're receiving today. Mr. Speaker, my district lies within Santa Clara County in California. Santa Clara County is in one of 41 metropolitan areas that could be selected to participate in this demonstration that would lead to the privatization of Medicare. Under this plan, seniors must be prepared to deal with changing benefits, premiums and access to care from year to year.

Mr. Speaker, these new benefits are not guaranteed. This Republican-drafted Medicare reform bill creates a major gap in coverage that will leave millions of seniors and disabled persons without any drug coverage during parts of the year. Once a senior's drug costs reaches a moderate level of $2,250, all coverage would be cut off. It isn't until the out-of-pocket prescription drugs costs rise to a much higher level—roughly $3600—that coverage kicks back in. It will also erode retiree coverage for up to 2.7 million seniors who, after years of hard work earned a prescription drug benefit through their retirement plans. Those lucky enough to have such coverage must now worry about whether or not they will lose that hard-earned benefit under this proposal.

Mr. Speaker, this bill is not comprehensive. The bill eliminates Medicare's promise to retirees by arbitrarily limiting the ability of Congress to fund the program. As baby boomers retire and require more physician visits, hospital services, and pharmaceutical coverage, Republicans want to limit the amount of money that would be spent on Medicare. This means the services seniors expect and deserve will be cut, premiums will increase, or reimbursements to physicians and hospitals will be severely restricted.

Mr. Speaker, I remind my colleagues and those trying to follow all the possible implications of this bill that the coverage offered under this plan is not, repeat not, like that offered to members of Congress and other federal workers. No Federal employee or member of Congress has a drug benefit that has a deductible, or a $2,850 coverage gap or donut hole in the benefit. In fact, during the debate on the drug benefit, Republican members of Congress voted to ensure that Federal employees' benefits would not be lowered to the level in the new drug plan.

There are many parts of this bill that I applaud. I am happy that the bill includes increased payments to doctors and to hospitals that will allow them to continue to offer services to Medicare patients. I am very happy that the bill includes critically needed funding for safety-net hospitals that serve our needy so well. Indeed in California, this provision alone will restore several hundred million dollars in reimbursements over the next ten years. Mr. Speaker, these provisions are the kind of reforms to Medicare that would pass this house nearly unanimously if they were presented separate from this bad bill.

Mr. Speaker, these good provisions do not override the potential devastating effects of this bill. I cannot support a bill that I feel will destroy the fundamental promise of Medicare, a program that seniors and the disabled have known and trusted for nearly 40 years. With the future of Medicare at stake, I believe that Congress can—and must—do better. Rather than pass a bad bill, we should defeat this bad bill and stand firm as we fight for a prescription drug benefit that our seniors demand and deserve.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks about premium support provisions in this conference report that will undermine the Medicare system on which older women depend.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Ms. LEE) for a unanimous consent request.

Ms. LEE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on this sham Republican prescription drug bill because it will harm, not help, elderly women. I did not come to Congress to dismantle and privatize Medicare.

Ms. SLAUGHTER. Mr. Speaker, I yield for a unanimous consent request to the gentlewoman from California (Ms. LORETTA SANCHEZ).

Ms. LORETTA SANCHEZ of California. Mr. Speaker, I ask unanimous consent to revise and extend my remarks about the premium support provisions in this conference report that I believe will undermine the Medicare system on which elderly women rely.

Mr. Speaker, I wish to express my concerns today over the Medicare bill and how it will leave millions of seniors without the adequate care they deserve.

Under this bill nearly 3 million seniors will loose their prescription drug coverage, while 6 million will likely see an increase in the price of their medications and nearly 10 million would see an increase their Medicare premiums if they refuse to join an HMO.

This bill is not a plan for our seniors, rather it is a plan that benefits drug companies and the insurance industry. This legislation would even prohibit Medicare from negotiating better prices for prescription drugs. It would spend $7 billion, desperately needed for covering all retired Americans, on creating individual health security accounts for only those who could afford them.

I urge my colleagues to vote against this legislation. We need to work for our seniors and provide them with a Medicare bill that helps them and not the big pharmaceutical and insurance companies.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Mrs. DAVIS) for a unanimous consent request.

Mrs. DAVIS of California. Mr. Speaker, I ask unanimous consent to revise and extend my remarks expressing my opposition to this bill, which fails to provide women with the affordable and reliable Medicare prescription drug coverage that they desperately need.

Mr. Speaker, I rise to talk about older women and their need for a real prescription drug benefit. The legislation we have before us represents a hollow substitute for a bona fide Medicare prescription drug benefit.

Every week, I hear from seniors overwhelmed with the cost of prescription drugs. Many find themselves juggling their expenses—often putting off paying some bills—in order to buy their medication. These seniors, our parents and grandparents, who have worked their whole lives and contributed to making our nation great never imagined they would spend their retirement struggling to make ends meet. Congress must act and provide seniors with a prescription drug benefit.

Our seniors—especially older women who, literally, are the face of Medicare—are counting on Congress to provide a real solution to the rising cost of prescription drugs. However, this debate has moved beyond providing prescription drugs to seriously undermine Medicare.

The Medicare conference report before us disportionately harms older women in the following ways: Women account for the majority of people who are on both Medicare and Medicaid. However, this proposal prohibits Medicaid from continuing to provide the poorest and sickest women with drugs that certain Medicare drug plans may not cover.

Older and sicker beneficiaries, often women, have not joined HMOs and tend to rely on the traditional Medicare program. This conference report is harmful to older and sicker women because its "premium support" provisions would undermine the traditional Medicare program and cause costs in that program to rise.

Nearly eight in ten women on Medicare use prescription drugs regularly. This legislation is harmful to women because it prohibits the government from negotiating price controls on drugs, leading to higher drug costs for both seniors.

Where is the benefit for women who are living on a fixed income and cannot afford to pay out-of-pocket during the coverage gap?

Where is the benefit for the women who, because they were stay-at-home mothers and did not earn a pension, cannot afford the prescription drugs they desperately need?

For my constituents, this legislation is not good enough. I cannot support this legislation when I know we can do better. We are doing more than providing prescription drugs, we are legislating the future of Medicare.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) for a unanimous consent request.

Mrs. CHRISTENSEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in strong opposition to the rule and the conference report, which helps HMOs and hurts poor women, minorities, and the disabled.

Mr. Speaker, I rise in opposition to the rule and the Medicare conference report.

The process by which we come to this place has been ugly. The conference committee locked out the democratic leadership from the process, and is sending this bill down without the 3 days to review it that we were promised.

But we should not be surprised. The bill itself is a more important broken promise—this one to the Senior citizens and disabled persons who have relied on Medicare to be there for them, and who have waited long for a comprehensive prescription drug benefit. They would be the real losers if we pass this bill and that is why I am asking my colleagues to vote "no."

Let us not take away the Medicare wrap around provision for those who need it, let us not jeopardize the good prescription drug benefit so many of our seniors and disabled now have, let us not put any more money in the already rich HMO's, let us take the means test and the mean out of this bill, and above all let us not destroy Medicare.

Mr. Speaker, this bill stinks, and no amount of promises to fund rural hospitals or increase physician's reimbursement can make it smell any better. Besides, this is coming from the same Party leadership that has been cutting physician and hospital fees, and refusing to remedy them for years. If they are known for anything, it is for broken promises.

We have no reason to rush and accept this defective piece of legislation that takes away more than it gives, and puts the first nail in the coffin the Republicans have been building for a long time for Medicare.

Any prescription drug benefit won't take effect until more than two years from now, so if we really care about our seniors and disabled we should take the time to get it right.

And if all of the tears I see shedding on the other side of the aisle for our suffering doctors, the struggling hospitals are any more than of the crocodile variety, we should do the right thing before we go home and pass those provisions now.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from Georgia (Ms. MAJETTE) for a unanimous consent request.

Ms. MAJETTE. Mr. Speaker, I rise to oppose the Republican prescription drug bill because it is bad for women, especially poor, elderly women; and they deserve better than this.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Ms. MILLENDER-MCDONALD) for a unanimous consent request.

Ms. MILLENDER-MCDONALD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks about the premium support provisions in this conference report that will undermine the Medicare system on which elderly women in my district depend.

Mr. Speaker, today I rise in opposition to H.R. 1. This conference report represents the beginning stages of this Administration's withdrawal from its promise to seniors. This report being considered on the House floor today, sets the stage for a gradual pullout of the federal government providing benefits to seniors and shifting the responsibility to private insurers.

As our nation's population ages and the baby boomer generation places additional burden on our healthcare infrastructure, we can no longer provide a "one-size fits all" level of healthcare. I am a strong and passionate advocate of a Medicare program that would cover all of our nation's seniors and provide a comprehensive prescription drug benefit. This is not that benefit. Mr. Speaker, this is not a better solution than "no benefits"—it's worse. It gives our seniors false hope. It makes seniors think that this government is expanding Medicare services, while it takes a backdoor approach to privatization of the Medicare program.

Mr. Speaker, in my home state of California, hundred of thousands of Medicare beneficiaries will lose their retiree health benefits. Medicaid beneficiaries will pay more for the prescription drugs they need. Hundreds of thousands of Medicare beneficiaries will pay more for Part B premiums because of so-called income relating provisions.

Last night, Mr. Speaker, I spoke with my Congressional Seniors Council which represents leaders from senior associations in the 37th congressional district. This council has expressed its deepest concerns with H.R. 1. On behalf of the more than 51,000 seniors in the 37th Congressional district, this council fears Seniors, who should otherwise qualify for

a drug benefit, may no longer qualify because of the asset provision in this report. Seniors, who have saved their hard-earned money for use during retirement, who relied on the promises of this Administration, become disqualified from receiving the prescription drug benefit. Very poor and very sick dual eligible beneficiaries will lose wrap around coverage for prescription drugs making out-of-pocket costs more than they can afford.

I urge my fellow colleagues for the sake of Medicare beneficiaries in their districts, to vote against H.R. 1. Our seniors deserve better.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Mrs. CAPPS), who is also a nurse, for a unanimous consent request.

Mrs. CAPPS. Mr. Speaker, I rise in opposition to the harmful cuts in care amounting to $1 billion a year for all those who are being treated for cancer.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from Ohio (Ms. KAPTUR) for a unanimous consent request.

Ms. KAPTUR. Mr. Speaker, I rise to oppose this GOP drug company bonanza that is going to make affordable drug prices impossible for the majority of this Nation's seniors. What a shame.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Ms. SOLIS) for a unanimous consent request.

Ms. SOLIS. Pido permiso para revisar y decir estas palabras.

Sr. Orador, estoy en contra del proyecto de ley Medicare que no ayudara a las mujeres que son el 70 por ciento de los mayores de edad.

(English translation of the above statement is as follows:)

Mr. Speaker, I rise in opposition to this Medicare bill which does nothing to help women, who make up more than 70 percent of the elderly poor.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Ms. WATERS) for a unanimous consent request.

Ms. WATERS. Mr. Speaker, I rise in opposition to this sham Medicare proposal that will end Medicare as we know it and simply fatten the pockets of the pharmaceutical industry and the HMOs.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from Missouri (Ms. MCCARTHY) for a unanimous consent request.

Ms. MCCARTHY of Missouri. Mr. Speaker, I ask unanimous consent to revise and extend my remarks about the premium support provisions in this conference report that will undermine the Medicare system on which the elderly in my district and around this Nation depend.

Mr. Speaker, I rise today in opposition to H.R. 1, the Medicare Prescription Drug and Modernization Act of 2003. I strongly support the inclusion of a prescription drug benefit as part of the Medicare program. Unfortunately, instead of providing a prescription benefit, this legislation includes dramatic changes in the entire Medicare program. As Washington Post columnist E.J. Dionne recently wrote, "They went in to design a prescription drug benefit for seniors and came out with an aardvark."

Mr. Speaker, in 1965, President Johnson and the Congress had the wisdom to create the Medicare program. The program accomplished its mission—it has ensured every single American's health coverage upon reaching 65 years of age. Since the bill's passage, Congress has made changes to the program to keep it current and to ensure that seniors received the highest quality care.

Now seniors are asking us to include a prescription drug benefit within the Medicare program. They want a benefit that offers comprehensive, affordable coverage to all seniors. I agree with them wholeheartedly. Instead of designing a prescription drug benefit, the majority created H.R. 1, which will end Medicare as we know it.

Mr. Speaker, this proposal is confusing and inadequate. For the first $2,000 of coverage, the consumer will pay over $1,100; for the first $5,000 of coverage, the consumer will pay approximately $4,000. If a consumer buys $5,000 of drugs a year, the consumer will pay 80 percent of that cost. Elderly women will be hardest hit.

Under this misguided plan, seniors will be forced to choose private prescription plans each year. A move between states, or even between towns, could force them to select another plan. In my district, seniors who chose to relocate from Kansas to Missouri could face the loss of their chosen prescription drug plan.

I am also concerned that this legislation will encourage companies that offer employer-provided drug coverage to drop or reduce their benefits. While the bill includes billions in subsidies for companies to maintain their benefits, more than 2.7 million retirees are likely to lose their employer provided coverage under this bill.

Seniors have been asking for a prescription drug benefit. They have not been asking for HMOs to take over Medicare. Yet that is what we are being asked to vote on today. This legislation includes "cost containment" provisions that will prompt significant cuts in the Medicare program if more than 45 percent of the costs of Medicare are borne from general tax revenues. Let's be clear—this cost cap would effectively end Medicare as a basic right for our seniors.

In a machiavellian effort to pass this misguided legislation, the authors have included billions in additional payments for doctors, hospitals, rural health facilities, and ambulance services among others. Sadly, these quality health care providers are forced to support this legislation even though many fear it will be bad for seniors and could unravel the Medicare program. Those funds should not be held hostage by this Medicare privatization scheme. I urge my colleagues to consider supporting stand alone legislation that would help our providers and save the Medicare program.

As E.J. Dionne wisely recommended, we should reject this flawed bill and "let's then have a national debate on the future of Medicare, out in the open, and not in some congressional back room." Mr. Speaker, I urge all of my colleagues to reject this measure and go back to the basics. Give seniors what they deserve—a comprehensive Medicare prescription drug benefit.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from Connecticut (Ms. DELAURO) for a unanimous consent request.

Ms. DELAURO. Mr. Speaker, I rise against a prescription drug bill that prohibits the government from using its market power to negotiate the best price for prescription drugs, the central issue of this debate and concern of the people of this country.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from California (Ms. ESHOO) for a unanimous consent request.

Ms. ESHOO. Mr. Speaker, I rise against this bill which, in my view, I used the yardstick to measure it by my mother; and in doing the calculations, my mother, at 89½ years old, will be hurt by this, as will women her age across the country. She and they deserve so much better.

It's with great disappointment that I rise today to express my opposition to this Medicare Prescription Drug legislation. As the daughter of a Medicare beneficiary, I know first hand how important prescription drug coverage is for America's seniors, and I held out great hope that this would be the year we finally succeeded in providing seniors with an affordable, stable benefit.

Unfortunately, now that we have the long-awaited legislation before us, it is clear that it doesn't embody any of these important principles.

This bill does nothing to lower drug costs for America's senior citizens. It provides an unstable insurance benefit, undercuts the viability of the employer-provided retirement health insurance, and fundamentally undermines the Medicare program that has served seniors so well for nearly 40 years.

Specifically, the bill: Brings privatization to the Medicare program in 2010. Although this is being described as a "demonstration project," this "demonstration" will affect as many as 7 million beneficiaries who will be forced to pay higher premiums and more money to keep the same benefits they have today if they don't join an HMO; has a $2800 gap in drug coverage that will leave millions of seniors without any help in paying for their drugs for part of the year, even though they will have to continue to pay their monthly premiums; Creates disincentives to employers to retain retiree drug coverage. An estimated 2 to 3 million seniors who have good drug coverage now through retiree health plans could lose it under the proposed plan.

In California, this means more than a quarter of a million seniors may lose their employer-sponsored health care. Real reform would encourage employers to expand retiree coverage, not take it away; Purposefully creates, for the first time, disparities between seniors across the country. Seniors living in different areas of the country will pay different premiums for the exact same benefits. In another first, this bill links how much a senior earns to how much they will pay in premiums.

If a senior makes more than $80,000 they will pay higher premiums than the rest of the Medicare population.

Does not address the rising cost of prescription drugs for individuals, nor does it harness overall Medicare spending in future years. In fact, the bill specifically prohibits the Secretary of Health and Human Services from negotiating with drug companies for lower prices.

Jeopardizes coverage for cancer patients by drastically cutting funding for chemotherapy drugs.

Finally, this bill dramatically changes Medicare by limiting the total amount of money that can be spent on the program—meaning services will be cut and premiums will increase.

I do want to take a moment to highlight the few bright spots in this bill.

The bill reverses a recent decision by the Centers for Medicare and Medicaid Services (CMS) that threatened seniors' access to innovative treatments. For years biotechnology products, which often represent the most advanced treatments for diseases, were critically under-reimbursed. This bill ensures that these life-saving treatments will be available for all seniors by raising payment levels to an appropriate level. This bill also provides more speedy coverage of new medical device technologies and more streamlined processes by new technologies in the Medicare program.

Second, the bill includes critical funding for relief from the devastating payment reductions to Medicaid disproportionate share hospitals. This is very important for California which has a severe budget shortfall. The funding in the Conference Report restores several hundred million dollars to safety-net providers in California over the next 10 years. With more than six million MediCal recipients and 6.3 million uninsured residents in California, Medicaid DSH funds are invaluable to the safety net hospitals that serve low-income populations.

Unfortunately, these issues aren't enough to overcome the faulty foundation that this bill rests on. It's with a heavy heart that I say "This Medicare Prescription Drug bill should be rejected." We have not honored the seniors who have done so much to make our country great, and I cannot justify a "yes" vote on a bad bill just for the opportunity to say we've succeeded in providing a drug benefit.

Mr. Speaker, I urge my colleagues to vote against the bill.

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from Florida (Ms. CORRINE BROWN) for a unanimous consent request.

Ms. CORRINE BROWN of Florida. Mr. Speaker, I rise against this sham Medicare proposal on behalf of Claude and Mildred Pepper, my grandmother, and all of the other seniors who will be increased out-of-pocket expenses for this sham Medicare bill.

Ms. SLAUGHTER. Mr. Speaker, I am proud to yield to the gentlewoman from California (Ms. PELOSI), our leader, for a unanimous consent request.

Ms. PELOSI. Mr. Speaker, I rise in opposition to this hoax of a plan. How can a plan be for the benefit of seniors when the first $4,000 of $5,000 of benefits have to be paid for by a senior who makes $13,500 a year?

Ms. SLAUGHTER. Mr. Speaker, I yield to the gentlewoman from New York (Mrs. MALONEY) for a unanimous consent request.

Mrs. MALONEY of New York. Mr. Speaker, I rise in opposition to this ill-conceived bill which promises to be a magic potion for seniors, but is a poison pill for Medicare.

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield to the gentleman from Florida (Mr. HASTINGS), my colleague on the Committee on Rules.

Mr. HASTINGS of Florida. Mr. Speaker, after that array, you have to be a very strong man to oppose this bill, and I ask unanimous consent that my remarks be included in the RECORD.

Mr. Speaker it gives me no greater disappointment to rise today in opposition to the co-called Prescription Drug and Medicare Modernization Act Conference Report. I might call it something else but that wouldn't be appropriate.

Since 1965 Medicare has been a vital instrument in ensuring quality healthcare to America's elderly and disabled. Medicare's 40 million beneficiaries use thousands of different health care products and services furnished by over 1 million providers in hundreds of markets nationwide. However, today a great number of you seek to dismantle Medicare with a fool's gold of a bill tilted the Prescription Drug and Medicare Modernization Act.

Despite my Democratic colleagues' best efforts to make this an inclusive and comprehensive process; one that addresses the real concerns of America's seniors and disabled, we were shut out from negotiations. We were shut out in June and we are shut out now. Today we have before us what the Republicans think is a Medicare and Prescription Drug reform. This is not a reform. This is a gutting of Medicare. It eviscerates one of the most successful great society programs in order to line the pockets of pharmaceutical companies.

Mr. Speaker, I am disturbed to my core that any person in their right mind would find this bill fit to deliver to America's seniors. HR 1 is seriously flawed and inept for several reasons. First, the prescription drug benefits is only available through private insurance companies and HMOs.

Second, the bill does not ensure affordable prescription drugs. Because of the arbitrary budget cap pushed by the administration, HR 1 has high deductibles and does not guarantee an affordable premium.

In addition, this scam of a sham bill creates large coverage gaps—with many seniors being required to pay high premiums even when they don't receive benefits.

Lastly, the bill does not promise prescription drug benefits to all beneficiaries. By relying on private insurance companies to offer coverage, this approach does not guarantee the same benefits for seniors, like Larry Colado of Myakka City, Florida, who lives in a rural community. Larry Colado is a Vietnam Veteran turned farmer who cannot afford health coverage and now faces losing the little that he has because, unlike Darwin, this administration believes in the survival of the richest.

Approving this bill may not guarantee a destitute future for members of Congress, but it will guarantee a destitute future for those seniors who do not and have not served in this body.

Mr. Speaker, simply put, this bill should be wrapped around a toilet paper holder and stuck in one of the Capitol's bathroom stalls.

I adamantly oppose the so-called Prescription Drug and Medicare Modernization Act. It is a snake oil and it stinks.

Ms. PRYCE of Ohio. Mr. Speaker, I yield such time as he may consume to the gentleman from California, the chairman of the Committee on Rules (Mr. DREIER).

Mr. DREIER. Mr. Speaker, continuing this spirit of comity, I ask unanimous consent that the conference report on H.R. 1 be debatable for 2 hours, doubling the amount of time that is made in order for consideration for a conference report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Ms. PRYCE of Ohio. Mr. Speaker, I am very pleased to yield 2 minutes to the gentleman from Florida (Mr. LINCOLN DIAZ-BALART), my friend and colleague from our Committee on Rules.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I thank the gentlewoman from Ohio for yielding me this time.

This legislation is very important legislation. It will help seniors, all seniors throughout the land; but especially low-income seniors will benefit, will benefit the most from this law. America's neediest seniors, individuals with up to $12,900 a year of income, $17,000 per couple, will immediately receive a cash credit of $600 to purchase their medications. And, again, in the year 2006, seniors with incomes of up to $10,300, or $13,250 per couple, will pay only $1 for generic prescriptions and $3 for brand-name medicines. Mr. Speaker, 13,235 reside in the district that I am honored to represent. I would urge all of my colleagues here this evening to check.

The gentleman from Florida (Mr. SHAW) has the information and he was so kind to provide it to me, district-by-district, how many low-income seniors will get extraordinary relief by this legislation.

□ 2215

Those with incomes of up to $13,900 a year, $17,900 per couple will pay only $2 for generic medications and $5 for brand name medications.

Mr. Speaker, 20,715 reside in the district that I am honored to represent. Seniors with incomes up to $15,500 a year, $20,000 per year per couple, will pay only a minimum monthly premium and initial deductible of $50 and then only 15 percent of their prescription drug costs up to $3,600 after which they will pay only $2 for generic drugs, $5 for brand names.

Now, all other seniors receive extraordinary help by this legislation,

Mr. Speaker, but low-income seniors more than anyone else.

So I urge everyone in this hall, I think we all have an obligation to check the facts with regard to what we are voting on this evening: Concrete important specific help for seniors throughout the country on an issue that, I think, is the most important domestic issue facing this country. And I am proud to have supported this legislation in the Committee on Rules and to urge all of my colleagues to make it law, send it to the President tonight.

Ms. SLAUGHTER. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts (Mr. MCGOVERN).

Mr. MCGOVERN. Mr. Speaker, Medicare is one of the most important successful social programs in the history of this country. For nearly 40 years, Medicare has been a lifeline for our senior citizens. I certainly do not argue that Medicare is perfect. Thanks to extraordinary advances in medical science, it is clear that Medicare needs a real prescription drug benefit.

The program should be strengthened so that future generations have access to high quality, affordable health care, but I believe that Medicare is a sacred trust between the United States government and the seniors of this country. The Republican majority in this House clearly does not believe what I believe, because if they did, this bill would not be before us.

This is a bill that fails to give seniors the drug benefit they need and deserve and expect. This bill forces millions of seniors to pay more for their prescription drugs. This bill is a huge giveaway to the HMOs and the drug companies. This bill does nothing to control the exploding costs of medicine. And worst of all, this bill shoves Medicare down the path to privatization. It ends Medicare as we know it. This is a defining issue. You can put all the bells and whistles and spin on it that you want. You can add a little money here or a tweak there to buy off a few interest groups or to make the bill more appealing to certain geographic areas. You can try to claw your way to a majority vote, and you might succeed. But your success will not mask the fact that this bill is bad for senior citizens.

So much of what people think is good about the Federal Government the supporters of this bill are ripping apart.

And let me say just a word, actually two words, about the processing used here. It is lousy. No one has had the time to properly review this. There are rules of this House, and we should follow them, especially with regard to giving Members of both parties the chance to actually see what they are voting on. But the Committee on Rules, once again, decided that the rules of this House do not matter. Maybe we should rename it the ''Break the Rules Committee.''

I guarantee you that for weeks to come we will be discovering lots of goods for special interests tucked into the dark corners of this legislation. The leadership of this House is more concerned with doing this bill fast than doing it right. If we take our time and do this right, it would give every Member the chance to read the fine print. Unless, of course, that is exactly what scares the leadership most.

Now, I have heard the argument out there that, well, this bill is not perfect. It is not even very good, but we have to pass something. Mr. Speaker, not if that something is a windfall for HMOs and drug companies. Not if that something is the privatization and dismantling of Medicare. Not if that something is a sound bite rather than a meaningful drug benefit.

There is a fundamental disagreement here because, to me, protecting Medicare is non-negotiable. If I voted for this bill I could not look at the people who sent me here and claim that I was representing their interests.

I believe our seniors deserve a defined, guaranteed, affordable prescription drug benefit under Medicare and that is what I am for. This bill does not even come close.

Vote no on the rule. Vote no on the bill.

Ms. PRYCE of Ohio. Mr. Speaker, I yield 3 minutes to gentleman from California (Mr. DREIER), the very distinguished Chairman of the Rules Committee.

Mr. DREIER. Mr. Speaker, I rise in strong support of this rule and the underlying conference report. My friend from Massachusetts (Mr. MCGOVERN) is absolutely right, Medicare is a sacred trust. He is also right when he says that this conference report, when we pass it, will end Medicare as we know it. Medicare as we know it does not have provisions for prescription drug coverage. And guess what? If we pass this, we will, in fact, end Medicare as we know it by making prescription drugs available to seniors.

It will also end Medicare as we know it because right now under Medicare there is a provision that allows for $148,000 to be expended on heart transplant surgery, but at the same time it does not provide the $1,000 a year that would be necessary for people to prevent heart disease by giving them access to Lipitor. And so it is true, we are going to finally bring about the very important reforms necessary so that we can maintain that sacred trust to which my friend refers.

So I believe, Mr. Speaker, that we have an opportunity to go a long way towards addressing this concern that exists on both sides of the aisle. I know that my democratic colleagues, Mr. Speaker, want to make sure that we do provide access for senior citizens to affordable prescription drugs. And I believe that on both sides of the aisle, Mr. Speaker, there is a clear understanding that if we are going to do that, we have to bring about major reforms so that we maintain the solvency of Medicare for the future. I also believe that as we look at the changes that will come about in the area of potentially creating another new entitlement program, Republicans and Democrats, Democrats who raise concern regularly about deficit spending, should feel good about the unprecedented measures that we put in this bill that allow for our Members to insist on a vote if, in fact, Medicare outlays exceed 45 percent of general revenues.

So I believe we are going a long way towards addressing these concerns. And then that wonderful incentive that also is there for people to plan for retirement with health savings accounts. Planning for their health care needs of the future is exactly what this measure will do by taking those very successful HSAs that have been out there and expanding that program.

Mr. Speaker, this may not be, this may not be the perfect solution, but this is our opportunity to bring about these much needed reforms.

And I urge my colleagues to support this rule, and, in a bipartisan way, do as I know the other body will do, and that is vote in support of this conference report so that we can help our seniors.

Ms. SLAUGHTER. Mr. Speaker, I yield 3 minutes to the gentleman from Maryland (Mr. HOYER), the minority whip.

Mr. HOYER. Mr. Speaker, I rise in opposition to this rule. And I invite the 41 Members of this side of the aisle who wrote a letter just a few days ago, those 41 Members, all Republicans, said to the gentleman from Illinois (Speaker HASTERT) and the gentleman from Texas (Majority Leader DELAY) that this is one of the most important issues that this Congress, or any Congress, will consider, and give us at least, they said, 3 days to consider this bill.

This bill is over 1,100 pages in length. It will affect not only the 40 million Americans who are eligible for Medicare, but it will also affect their families, their children, their sons and daughters who are confident that this country will provide for health care security for seniors.

I invite those 41 Members, this is about the process, this has been a terrible process, a shameful process. Speaker HASTERT, an honorable man, appointed the gentleman from Michigan (Mr. DINGELL), the Dean of this House, serving here since 1955, one of the most knowledgeable people, not Democrats or Republican, most knowledgeable Americans with respect to health care and Medicare and Social Security. And then he appointed one of the most senior Members of this House, the gentleman from New York (Mr. RANGEL) to this conference, and the

gentleman from Arkansas (Mr. BERRY), the only pharmacist that serves in this House.

Shamefully, shamefully, they were neither invited, nor allowed, to come to the table to discuss this bill. I invite the 41 signers of this letter, if they meant what they said in this letter, to vote no on this rule. To vote no on this rule so that we can, in fact, look at it closely. Just 2 more days this bill, 1,100 pages in length, which was put on the Web just last afternoon, just approximately 24 hours ago.

I say to the signatories on this letter, if you meant what you said, if you believe the processes of this House ought to be followed, if you believe this issue is important enough to know what you are doing, to read the bill, to digest its consequences, to understand the adverse consequences that it will have on the poor, on those who were left behind in Medicare when the HSAs take the healthiest and wealthiest out of the system and force premiums higher for those who can least afford it, read this bill, understand this bill. You have not done so.

Some of our most respected colleagues signed this letter, Republicans all. I ask every Democrat to vote against this rule, to give ourselves and our constituents further time to consider this bill. I ask the Republicans honor their letter, honor their rules. Vote no on this one.

Ms. PRYCE of Ohio. Mr. Speaker, I yield 3 minutes to the gentleman from Washington (Mr. HASTINGS), my friend from our Committee on Rules.

Mr. HASTINGS of Washington. Mr. Speaker, I thank the gentlewoman from Ohio (Ms. PRYCE) for yielding, and I congratulate her on the way she excellently laid out the main provisions of this bill in her opening remarks.

I support this bill, Mr. Speaker, and this bill includes several important improvements to Medicare in addition to making prescription drugs available and affordable for seniors. But I am particularly pleased that this bill contains the largest, most comprehensive rural health care package ever considered by Congress to ensure that seniors in rural America are able to get the care they need.

I often hear from seniors they are having a hard time finding a doctor will accept Medicare patients. Now, doctors and hospitals in rural areas provide the same quality care as in urban areas, all too often Medicare fails to pay rural health care providers enough to cover their costs. This often forces doctors to consider whether they can continue accepting Medicare patients and, therefore, causes hospitals to cut back on their services.

As a member of two rural health care caucuses, I have met repeatedly with committee leaders and Secretary Thompson to stress the importance of ensuring that rural areas receive the Medicare payments that they deserve.

Mr. Speaker, until the disparity between rural and urban reimbursement is fixed, seniors in small town America have fewer and fewer health care options. I commend the conferees for recognizing this need. I am pleased that the National Rural Health Care Association has endorsed this bill saying, quote, ''This is a strong step forward this strengthening the health care system for nearly 60 million rural Americans,'' end quote.

By passing this bill, we will permanently end the disparity in Medicare payments between urban and rural hospitals. We will provide more money to rural hospitals for the care of uninsured patients, we will increase funds for critical access hospitals and home health care agencies and raise payments to doctors to encourage them to provide services in physician-short areas.

Simply put, Mr. Speaker, after years of effort H.R. 1 will finally give doctors, hospitals, home health nurses, and other care providers the resources they need to provide seniors who live in rural areas like my district in central Washington the medical care they deserve.

Accordingly, I urge my colleague to support both the rule and the underlying bill.

□ 2230

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. MENENDEZ), the minority caucus chairman.

Mr. MENENDEZ. Mr. Speaker, the Republican plan that we consider here tonight is not a Medicare prescription drug plan, but rather a poison bill for our Nation's seniors and for Medicare itself. The more you know about this bill, the less you like it.

The Republican plan would encourage employers to drop retiree coverage for their employees. And this means that approximately 94,000 New Jerseyans in my State will be left with no coverage. I thought this debate is supposed to be about expanding coverage for our seniors, not taking it away.

Under their demonstration plan, 7 million beneficiaries would be forced to pay more for Medicare if they do not give up their doctor and join an HMO. The Republican plan would cut payments to oncologists nationwide and would result in New Jersey cancer care providers losing $552 million, this in a State that has the third highest instance of cancer in the United States, and in which cancer is the second leading cause of death.

Republicans would include a $14 billion bribe to get private insurance company plans to compete against Medicare. Why give away billions of taxpayers money to private insurance interests when that money could be used to enhance a true prescription drug benefit under Medicare? Obviously, Republicans are more concerned about their special interests than senior interests.

Republicans would make millions of seniors pay more for their drugs. Seniors would pay $4,020 out of the first $5,100 in prescription drug costs. And low-income seniors, like my 83-year-old mother who worked her entire life in the factory of New Jersey and who suffers from Alzheimer's, would pay higher premiums and would lose additional assistance under Medicaid. And only in Washington would Republicans prohibit the Federal Government from using the collective purchasing power of 40 million citizens to obtain lower prescription drug prices.

Let us stand up for our parents and our grandparents and our seniors. Vote against the rule. Vote against this poison pill that is this plan.

Ms. PRYCE of Ohio. Mr. Speaker, I yield 2½ minutes to the gentleman from the State of New York (Mr. REYNOLDS), my very good friend from the Committee on Rules.

Mr. REYNOLDS. Mr. Speaker, I thank the gentlewoman for yielding me time.

Mr. Speaker, I rise in strong support of this rule and the underlying legislation.

For the first time in the nearly 40-year history of the Medicare program, Congress tonight has the opportunity to provide more than 40 million seniors and disabled Americans a guaranteed prescription drug benefit.

In my home State of New York, this means nearly 3 million Medicare beneficiaries will have greater access to life-saving prescriptions. For many of these beneficiaries, this amounts to drug coverage that they would not otherwise have; and for countless others, it means vastly improved benefits.

In providing a prescription drug discount card, greater access to less-expensive generic drugs, enhanced ability to create individualized health savings accounts and strong protections for retirees with current coverage, this bill helps bring Medicare into the 21st century.

What the bill also accomplishes is improved access to care in a variety of other areas that will help Americans all across the country get the care they need and deserve. For example, by updating the critical hospital formulas for marketbasket and indirect medical education, New York State will be infused with over $1.2 billion over the next 10 years.

Of that, hospitals in my congressional district will receive close to $40 million. In cash-strapped regions of western New York that I represent, this payment relief is great news for patients of all ages and income levels.

New York will also be bolstered by many other funding streams that will bring critical Federal funds into the

State and help mitigate local fiscal burdens. And the Federal Government assuming costs of New York beneficiaries eligible for both Medicare and Medicaid, the State will save over $3 billion over 8 years on prescription drug coverage for its Medicaid population.

Because New York already provides a popular, generous prescription drug program, well over 300,000 seniors, the State will have access to $125 million over 2 years in transitional assistance to help the new Federal drug program coordinate with the existing State program.

These funds will ensure a seamless transition and coordination of benefits for many seniors who want to remain in the State program, yet still receive enhanced benefits through the Federal plan.

Mr. Speaker, this body is poised to make history. Today begins the final step in a journey that began not 3 days ago, not 3 years ago, but nearly a decade ago. Congress promised a prescription drug benefit. Congress promised to make Medicare stronger, and it took this majority to deliver on that promise.

I urge my colleagues to support the rule and the underlying legislation.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Speaker, I thank the gentlewoman from New York (Ms. SLAUGHTER) for yielding me time.

We have been here before, Mr. Speaker. We will debate late into the night and consider one of the most important votes we have ever cast. At 2:54 a.m. on a Friday last March, the House cut veterans benefits by 3 votes.

At 2:39 a.m. on a Friday in April, House Republicans slashed education by five votes.

At 1:56 a.m. on a Friday in May, the House passed the Leave No Millionaire Behind Tax Cut Bill by a handful of votes.

At 2:33 a.m. on a Friday in June, the House GOP passed Medicare privatization by one vote.

At 12:57 a.m. on a Friday in July, the House eviscerated Head Start by one vote. And then after returning from summer recess, at 12:12 a.m. on a Friday in October, the House voted $87 billion for Iraq.

Always in the middle of the night. Always after the press had passed their deadlines. Always after the American people had turned off the news and gone to bed. And here we go again, Mr. Speaker.

Republican leadership delivered this bill to us last night at 1:46 a.m.

Mr. Speaker, I do not really blame my Republican colleagues because when Republican leaders sit down with the insurance industry and the drug industry behind closed doors and write a bill to privatize Medicare, of course they do not want the public to know.

When Republican leaders sit down with the drug industry to write a bill to deliver $139 billion in additional pharmaceutical profits to their biggest contributors, of course they do not want the public to know.

When Republican leaders sit down with the insurance industry to write a bill to set up a $20 billion slush fund for HMOs, some of their biggest contributors, of course they do not want the public to know.

This bill proposes the most radical changes to Medicare since its creation a generation ago. We should not do it under the cover of darkness. Americans deserve better.

Ms. PRYCE of Ohio. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. Mr. Speaker, I admire our President and my leaders in the House, but I want to tell you why I oppose this bill.

The average senior is going to pay $4,000 in order to receive the first $1,500 in benefits. Now, we should take care of the 24 percent of seniors across this country that have no drug coverage; but this covers all of them, including the 76 percent that do have coverage.

Employers will, in my opinion, in spite of a $70 billion payoff, drop their seniors and put them on the government program, and they are going to get less coverage than they have right now, and it will cost a lot more.

This program is going to cost much more, in my opinion, than the $400 billion that we estimate. I think it will go as high as maybe a trillion dollars over the next 10 years. And, finally, there is no negotiation with the pharmaceutical companies on drug prices even though Americans are paying as much as five to 10 times more than they are paying in Germany and Canada and other places in the world; and that is just not right.

Ms. SLAUGHTER. Mr. Speaker, I yield 1 minute to the gentlewoman from Illinois (Ms. SCHAKOWSKY).

Ms. SCHAKOWSKY. Mr. Speaker, a little history lesson. August 17, 1989, front page of the Chicago Tribune, outside the Copernicus Senior Center in Chicago. These are the constituents of Congressman Dan Rostenkowski who is in this car.

They are not happy with their Congressman, and they are not happy with the catastrophic health care bill.

When the Congressman escaped from his car, a reporter asked him if he sympathized with the seniors who were mad about this bill, and he said, ''No, they do not understand.'' But, unfortunately, it was not the seniors who did not get it. It was the Congressman. Three months later that bill was repealed.

A big mistake was made. This Congress overwhelmingly passed the catastrophic. Everyone on Capitol Hill liked it including the AARP. They did not check with the seniors, and we are about to make the same mistake tonight. A thousand pages and more, 40 years of Medicare, but 40 hours to read this bill.

I tell you, if you vote for this, you better get your running shoes. The senior citizens will be after you.

Ms. PRYCE of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from the State of Florida (Mr. SHAW), from the Committee on Ways and Means, who worked so hard on this bill.

Mr. SHAW. Mr. Speaker, I thank the gentlewoman for yielding me time.

Medicare passed this Congress on July 27 of 1965 and was signed into law in Independence, Missouri, on July 30 of 1965. It is interesting, and I was watching C–SPAN today and watching the goings on within the Committee on Rules. And I heard several of the Democrat witnesses come in and say, your party did not support Medicare in the first place and you want it to wither on the vine.

After hearing this over and over, I thought, well, it is about time somebody goes into the archives and finds out the truth. The truth is the majority of the Republicans in this House of Representatives in 1965 did support Medicare. So the big lie now can go down and be deflated.

Also, I have heard many witnesses on the other side say what a bonanza this is for big drug companies. Nobody is mentioning the fact that we are shortening the time that generics can get on the market. You think the big drug companies like that? Of course not.

Also, the discount card where prices will be negotiated and seniors will get their drugs for less money. Nobody on that side is talking about that.

What this is actually is a cost-containment bill and probably the largest one that will ever be signed into law providing for the cost containment in drugs.

I sent out a survey as many of us do to some of our constituents and was just simply asking them did they want this drug bill. I received back the biggest number that I have ever received. They are still coming in and they are just now hitting and we already have 12,000 replies. And guess what? Only 100 said no. And most of them were misinformed by this bill thinking they might have lost the coverage that they had. This is a good bill. Let us do it for our seniors. Let us do it for the people at the lower economic levels who desperately need this.

Why would you deny this to them? Somebody can buy drugs for so little and be able to get a better quality of life. Life is meant to be enjoyed, not endured. Let us vote ''yes'' on the rule. Let us vote ''yes'' on the bill.

The SPEAKER pro tempore (Mr. LAHOOD). The gentlewoman from Ohio

(Ms. PRYCE) has 3 minutes remaining. The gentlewoman from New York (Ms. SLAUGHTER) has 9½ minutes remaining.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina (Mr. PRICE).

Mr. PRICE of North Carolina. Mr. Speaker, we began this effort years ago with a relatively simple concept: let us add a prescription drug benefit to Medicare, giving help to the countless older Americans who so desperately need it. But this bill has ended up doing the very thing seniors do not want us to do—to privatize their coverage.

Little do they know that the so-called prescription drug benefit will operate nothing like their other Medicare benefits. An enormous sticker shock awaits them. If a senior needs $5,000 worth of medication, he or she will have to pay $4,000 in order to get it. If drug costs are $3,500, he or she will pay $2,500.

This bill has a gaping so-called doughnut hole where any drug costs that fall between $2,250 and $5,100 are not covered at all. Do you think that is what our constituents have in mind when they think of prescription drug coverage?

But this spotty coverage is not the worst of it. An even more unpleasant surprise awaits. This bill forces Medicare beneficiaries to get drug coverage through private companies or an HMO.

Our Republican friends would apparently rather do anything than strengthen basic Medicare, so they have devised a convoluted scheme to throw enough money at private companies to induce them to offer drug-only policies, policies which these same companies say make no sense in terms of insurance principles.

□ 2245

The Senate bill offered a fallback plan to provide Medicare coverage if these private plans did not materialize, but that fallback has been fatally weakened in the bill before us.

We have heard a lot about choice tonight, but the only real choice most seniors will have under this bill is whether they obtain their prescription drug coverage through a private drug plan or an HMO, and whether they would rather have medications they can afford or a doctor of their own choosing. Under this plan they cannot have both.

Mr. Speaker, this bill is a betrayal of our seniors. This is not an improvement, an expansion of Medicare. It is just the opposite. We should defeat this bill and go back to the drawing board immediately.

Ms. PRYCE of Ohio. Mr. Speaker, I yield for a unanimous consent request to the gentleman from Florida (Mr. SHAW), a member of the Committee on Ways and Means.

Mr. SHAW. Mr. Speaker, I submit to the RECORD a letter of endorsement from the Republican Governors Association and a letter from my own Governor, Governor Jeb Bush, endorsing this bill.

STATE OF FLORIDA,
OFFICE OF THE GOVERNOR,
Tallahassee, FL, November 21, 2003.

Hon. E. CLAY SHAW, Jr.,
Rayburn House Office Building,
Washington, DC.

DEAR CONGRESSMAN SHAW: Today, there is very good news for Florida's three million Medicare beneficiaries. The recent bipartisan conference agreement for Medicare will provide first-time access to prescription drug coverage. As the second largest home to seniors, this drug benefit—along with many other improvements and modernizations—will have the most significant impact for residents in our State since the enactment of Medicare in 1965.

Medicare will increase in value as our beneficiaries will have available to them a prescription drug benefit, and critical protections against high out-of-pocket drug costs. New preventive benefits will keep our residents healthier, and provide a higher quality of life. The new opportunities to be screened for many illnesses and conditions will result in far fewer serious health consequences.

Designed to provide enhanced coverage for the lowest income beneficiaries, over 650,000 of Florida's low-income Medicare beneficiaries—who are not eligible for Medicaid drug coverage—will receive $10 billion in critical prescription drug benefits from 2006 through 2015. The prescription drug discount card will provide our seniors and disabled Medicare beneficiaries with much-needed discounts, and a $600 per year subsidy in transitioning to the new drug benefit.

Another 490,000 low-income individuals dually eligible for Medicare and Medicaid will receive more than $6.7 billion annually in prescription drug benefits, with no gap in coverage. This new federal benefit will save the taxpayers of Florida over $3 billion—in just the first 10 years. These are state Medicaid costs that can be reinvested in other health care needs.

This reform package will strengthen the Medicare program, while providing beneficiaries a prescription drug benefit, more choices and improved care options. All Floridians will benefit from the option to accumulate tax-free health dollars through Health Savings Accounts to pay for medical expenses. Other reforms include a transition to electronic prescribing, creating incentives for our hospitals and doctors to reduce errors by using this new e-technology.

Seniors cannot afford to indulge the political appetites of Washington, where the issue of prescription drugs has turned into a search for the perfect. Our representatives must look to those who are being denied the opportunity for life-saving prescription drugs. Today's bill may not be ideal, but it is just right for those who have been waiting too long.

AARP has led the long fight for a Medicare drug benefit, and I commend their leadership in ensuring passage of this bill. I join with them in urging you to support this historic legislation. There has never been a greater opportunity to do more for the seniors in Florida.

Sincerely,

JEB BUSH,
Governor.

REPUBLICAN GOVERNORS
ASSOCIATION,
Washington, DC, November 21, 2003.

Hon. J. DENNIS HASTERT,
Speaker, House of Representatives, The Capitol, Washington, DC.

Hon. BILL FRIST,
Majority Leader, U.S. Senate, The Capitol, Washington, DC.

Hon. NANCY PELOSI,
Minority Leader, House of Representatives, The Capitol, Washington, DC.

Hon. TOM DASCHLE,
Minority Leader, U.S. Senate, Washington, DC.

DEAR SPEAKER HASTERT, REPRESENTATIVE PELOSI, SENATOR FRIST, AND SENATOR DASCHLE: As Governors, we urge the U.S. Congress to pass the bipartisan Medicare Conference Agreement. Passage of this legislation will provide more choices and better benefits to Americans. Under the bipartisan agreement, Medicare beneficiaries would be provided significant savings and access to broader coverage.

Medicare will provide first-time access to prescription drug coverage to many of our seniors. The agreement also assists states with the costs related to the dual eligible population. Assistance to low income persons as well as critical protection against high out-of-pocket drug costs are essential components of this legislation. Most importantly, the preventive benefits found in this measure will keep our constituents healthier.

Passage of this historic legislation will modernize the delivery of quality healthcare in America. Therefore, we commend you and the conferees for providing leadership in developing this legislation and offer our support of its passage.

Sincerely,

Bill Owens, Governor of Colorado, RGA Chairman.
Bob Taft, Governor of Ohio, RGA Vice Chairman.
Robert R. Riley, Governor of Alabama.
Robert Ehrlich, Jr., Governor of Maryland.
Jeb Bush, Governor of Florida.
Felix Camacho, Governor of Guam.
Mitt Romney, Governor of Massachusetts.
Haley Barbour, Governor-elect of Mississippi.
Mike Johanns, Governor of Nebraska.
John Hoeven, Governor of North Dakota.
Olene S. Walker, Governor of Utah.
Ernie Fletcher, Governor-elect of Kentucky.
Frank H. Murkowski, Governor of Alaska.
John G. Rowland, Governor of Connecticut.
Sonny Perdue, Governor of Georgia.
Dirk Kempthorne, Governor of Idaho.
Tim Pawlenty, Governor of Minnesota.
Kenny Guinn, Governor of Nevada.
James H. Douglas, Governor of Vermont.
Don Carcieri, Governor of Rhode Island.
Mike Rounds, Governor of South Dakota.
Rick Perry, Governor of Texas.

Ms. PRYCE of Ohio. Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentlewoman from Connecticut (Ms. DELAURO).

Ms. DELAURO. Mr. Speaker, this is a defining moment for the senior citizens of this country. For years we have tried to provide a prescription drug benefit to help them with the rising cost of medicine, but this bill does nothing about the central issue, price. It prohibits the government from using its market power to negotiate the best

price for drugs and does nothing to allow Americans to import drugs from countries like Canada where prices are lower. As a result, prices will continue to rise and over time wipe out any gains that seniors realize from the new benefit which does not even begin until 2006.

Rather, the bill is the first step toward eliminating the universal guaranteed benefit that defines Medicare. For the first time, it caps the amount of money that can be spent on the program, meaning services that are guaranteed today will not be guaranteed tomorrow. It creates a two-tiered health care system, one for the affluent, one for everyone else. For as many as 10 million seniors, premium support will force them to give up the doctors that they have been with for years, force them into HMOs that will cut services and cost more.

So today we consider more than a prescription drug benefit. We consider the future of our contract with the families in this country, a contract that says that after a lifetime of hard work, paying taxes, that we have a moral obligation to ensure our parents and our grandparents have a dignified retirement. By ending the guarantee of equal health care provided to every senior in this country for nearly four decades, we are breaking that contract.

I was not elected to preside over the dismantling of Medicare, the embodiment of our country's shared values, in exchange for a feeble prescription drug benefit that does nothing to bring down the prices of prescription drugs. We should send this bill back to the drawing board, do whatever it takes to deliver a real drug benefit that maintains Medicare's promise to senior citizens. We owe them nothing less.

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Arkansas (Mr. BERRY), actually a pharmacist.

Mr. BERRY. Mr. Speaker, this is the most shameful attempt to deceive the Greatest Generation. The question that continues to go through my mind is why would you want to do this to these good people. They survived the Depression, they fought World War II, and they built this great Nation into what it is today.

Being an Anglo-Saxon, male Protestant, I have not known the hurt of being excluded or denied my rights like my dear friend the gentleman from Georgia (Mr. LEWIS). After having served on this conference committee, I have an idea of what that must feel like. At every attempt to be a part of this conference, the House Democrats were ridiculed, humiliated, used every trick that they could imagine to try to make us feel like we just simply should not be a part of this act, and we are not. This is the Republicans' deal. Let them have credit for this sorry piece of work.

I can tell my colleagues, I do not also understand why they would want to continue to give billions of dollars to the drug companies and to pass an act that would make it possible for the drug companies of this country to have the exclusive right to continue to rob the senior citizens. The burden of this dishonorable act rests on those that have written it and those that will vote to pass it.

I suspect that our Founding Fathers must be very sad this evening, but let it be known henceforth and hereafter, the Republicans did this to our seniors, and the Democrats fought every last step of the way to try to keep it from happening.

Ms. SLAUGHTER. Mr. Speaker, may I inquire from my colleague, does she have anymore speakers?

Ms. PRYCE of Ohio. I have one remaining speaker.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. BAIRD).

Mr. BAIRD. Mr. Speaker, I thank the gentlewoman for yielding me the time.

I cannot get up and say this bill is awful entirely. I think there are some very good parts, and I think some good efforts have been put into it, but I have two concerns.

First of all, side effects. I think the side effects of this bill may well be fatal to some, and more importantly, I believe that most Members on both sides of the aisle have not really read this bill and do not fully understand it.

Earlier tonight, I invited the gentlewoman from Ohio to explain a simple passage.

Ms. PRYCE of Ohio. Mr. Speaker, will the gentleman yield?

Mr. BAIRD. I yield to the gentlewoman from Ohio.

Ms. PRYCE of Ohio. Mr. Speaker, I appreciate that. Earlier today, and once again now, a statement was placed in front of me, a statement which was a long, drawn out document, and he was asking me to explain it, and it is very unfortunate that we were not provided with that in advance.

Mr. BAIRD. Reclaiming my time, the point I am making is I do not think the gentlewoman has actually read the bill sufficiently to explain it.

I spent 23 years of my life in health care. I hold a doctorate in clinical psychology. I have spent hours on this bill. My eyes are exhausted. I must say I do not know fully well enough what is in it.

My colleagues have said to us, and I agree, this is one of the most important bills that we will face in our career, and yet my colleagues have given us less than 24 hours to look at it.

The great philosopher Socrates said this when the politicians of Athens imprisoned him, he said to his the young people he taught, he said, These people have imprisoned me for pointing out to them how little they know. Instead of being angry at me for pointing that out, they should be angry at themselves for knowing so little.

His advantage was he admitted that he did not know. What I would ask the gentlewoman is a simple request that we almost never do here. Let us break with precedent. Let us say, you know what, this is important, we are moving too fast. I look around this room and I will say to my distinguished colleagues I bet you, you have not read the bill carefully, and you really, fully cannot explain it to your constituents, and if you have not and if this bill spends $400 billion of the taxpayers' money and is going to blow a hole in the lid of this deficit and is going to deprive people who desperately need pharmaceutical care, then why do we not just take a little bit of time and read it? Who knows, I might actually like it well enough to vote for it, but I cannot vote for something you have not given us enough time to read.

That is what the people of expect of us when they send us here. That is what a republic is all about it, but we do it a great disservice in this institution of late.

Ms. PRYCE of Ohio. Mr. Speaker, may I inquire as to the time remaining and how many speakers the gentlewoman from New York has?

The SPEAKER pro tempore (Mr. LAHOOD). The gentlewoman from Ohio (Ms. PRYCE) has 3 minutes remaining. The gentlewoman from New York (Ms. SLAUGHTER) has 1½ minutes remaining.

Ms. PRYCE of Ohio. I have one speaker.

Ms. SLAUGHTER. I have one more speaker.

Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Speaker, this legislation was written at the behest of insurance companies and pharmaceutical companies. This is the beginning of the end of universal health care for seniors.

Since Medicare was enacted in 1965, seniors went from a group least likely to have health insurance to most likely to have health insurance because of Medicare. Medicare has achieved goals that Congress has not been able to accomplish for the rest of our population by keeping millions out of poverty, increasing access to health care, improving quality of life and even extending life expectancy by 20 percent.

This conference report will eliminate universal health care for the only part of our population that has it. It will lead to benefit cuts by the creation of an artificial cap on Medicare spending. It will increase costs for millions of seniors. It will privatize Medicare in order to dismantle it.

We should be expanding Medicare so that all Americans can have quality health care under a single-payer system with fully-paid prescription drug benefits.

This legislation is a choice between health care in the public interest which we still have with Medicare or health care in the private interest. Choose wisely. Reject the rule, reject the legislation.

Ms. SLAUGHTER. Mr. Speaker, I reserve the balance of my time.

Ms. PRYCE of Ohio. Mr. Speaker, I am very pleased to yield 2 minutes to the gentlewoman from West Virginia (Mrs. CAPITO), my friend and colleague.

Mrs. CAPITO. Mr. Speaker, I would like to thank my distinguished colleague from Ohio for yielding me the time. I rise in support of the rule and the underlying bill.

We have all listened to and viewed the rhetoric surrounding the Medicare prescription drug legislation this week. We have all faced the questions regarding what is in the bill and what is not. There has been a multitude of fallacies about who is covered and who is not. Mr. Speaker, the truth of the matter is this Medicare prescription drug package will grant 40 million Medicare seniors a drug benefit they do not have.

I am especially proud of the low-income provisions in this bill. In my home State of West Virginia where our seniors are clamoring for this coverage, fully one-third of the Medicare beneficiaries will only pay up to $5 for prescriptions. This is real savings for those who need it most.

The truth is that seniors fortunate enough to have coverage through a previous employer will maintain that benefit. Corporations, small businesses, unions, State and local governments will receive serious help to allow them to continue to offer that benefit.

The truth is that in this legislation senior women will now have greater access to more affordable health care. Women live longer than men, with less income and suffer from more chronic illnesses. Disease management and access to a prescription drug benefit will allow women to enhance the quality of life in their senior years.

Mr. Speaker, I can handle this truth. West Virginia's seniors can handle this truth. America's seniors can handle this truth. It is time to get past the rhetoric and deliver on a promise we have all made to America's seniors.

Ms. SLAUGHTER. Mr. Speaker, I yield myself the remaining time.

I am going to ask for a no vote on the previous question so we can amend the rule and restore the right of all Members under the House rules to consider the report for 3 days before they vote on it. Voting no on the previous question will not block consideration of the report. It will simply give all the Members who were not in the secret, closed meetings a chance to read it and a chance to look before we leap.

Mr. Speaker, I ask unanimous consent that the text of the amendment be printed in the RECORD immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

□ 2300

Ms. PRYCE of Ohio. Mr. Speaker, I yield myself such time as I may consume.

We have heard a lot of rhetoric tonight, as the gentlewoman from West Virginia (Mrs. CAPITO) mentioned. You would think we were talking about different bills. But the truth is the 35 million seniors that the AARP represents cannot be wrong. This bill is what America's seniors need. They know it and we know it. We have heard them.

And let me remind my colleagues that we have before us today a historic opportunity, an opportunity to make the most sweeping changes to the outdated Medicare program since it began in 1965. Bring our seniors the financial relief and the lifesaving medications that they so desperately need and deserve. Support this rule and the bipartisan legislation that it supports.

The text of the amendment referred to previously by Ms. SLAUGHTER is as follows:

Strike all after the resolving clause and insert in lieu thereof the following:

"That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 1) to amend title XVIII of the Social Security Act to provide for a voluntary program for prescription drug coverage under the Medicare Program, to modernize the Medicare Program, to amend the Internal Revenue Code of 1986 to allow a deduction to individuals for amounts contributed to health savings security accounts and health savings accounts, to provide for the disposition of unused health benefits in cafeteria plans and flexible spending arrangements, and for other purposes. All points of order against the conference report and against its consideration (except those arising under clause 8(a)(1)(A) of rule XXII) are waived."

Ms. PRYCE of Ohio. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore (Mr. LAHOOD). The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Ms. SLAUGHTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for electronic voting, if ordered, on the question of agreeing to the resolution.

The vote was taken by electronic device, and there were—yeas 228, nays 204, not voting 2, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised 2 minutes remain in this vote.

□ 2328

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment bills of the House of the following titles:

H.J. Res. 79. Making further continuing appropriations for the fiscal year 2004, and for other purposes.

The message also announced that the Senate agreed to the amendment of the House to the bill (S. 1680) entitled ''An Act to reauthorize the Defense Production Act of 1950, and for other purposes,'' with an amendment.

CONFERENCE REPORT ON H.R. 2622, FAIR AND ACCURATE CREDIT TRANSACTIONS ACT OF 2003

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the conference report on the bill, H.R. 2622.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. OXLEY) that the House suspend the rules and agree to the conference report on the bill, H.R. 2622, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 379, nays 49, answered "present" 1, not voting 5, as follows:

ANSWERED "PRESENT"—1

Ruppersberger

NOT VOTING—5

Conyers
Foley
Gephardt
Gordon
Gutierrez

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. LAHOOD) (during the vote). Members are advised that 2 minutes remain in this vote.

□ 2337

Mr. DAVIS of Illinois changed his vote from "yea" to "nay."

Mr. RUPPERSBERGER changed his vote from "yea" to "present."

So (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. GUTIERREZ. Mr. Speaker, I was present today in this Chamber on November 21, 2003. However, I was inadvertently not recorded on rollcall vote number 667. Had my vote been recorded, it would have been a "yea" vote.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 579. An act to reauthorize the National Transportation Safety Board, and for other purposes.

CONFERENCE REPORT ON H.R. 1, MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003

Mr. THOMAS. Mr. Speaker, on behalf of seniors and taxpayers, pursuant to House Resolution 463, I call up the conference report on the bill (H.R. 1) to amend title XVIII of the Social Security Act to provide for a voluntary program for prescription drug coverage under the Medicare Program, to modernize the Medicare Program, to amend the Internal Revenue Code of 1986 to allow a deduction to individuals for amounts contributed to health savings security accounts and health savings accounts, to provide for the disposition of unused health benefits in cafeteria plans and flexible spending arrangements, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Pursuant to House Resolution 463, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 20, 2003, Book II at page 11877.)

The SPEAKER pro tempore. Pursuant to the order of the House of today, the gentleman from California (Mr. THOMAS) and the gentleman from New York (Mr. RANGEL) each will control 1 hour.

The Chair recognizes the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, I yield one-half of my time to the gentleman

from Louisiana (Mr. TAUZIN), chairman of the Committee on Energy and Commerce.

The SPEAKER pro tempore. Without objection, the gentleman from Louisiana will control 30 minutes.

There was no objection.

Mr. THOMAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I called up this bill for seniors and for taxpayers. This evening you are going to hear some very harsh rhetoric. But what I really want to do is remind everyone here that since Republicans became the majority in this House in 1995, there has been a very positive and remarkable change to Medicare. Probably most important has been the introduction of preventive and wellness. For many years, it was available to be added to Medicare, but it was not. It took the Republican majority to add the testing and the education for diabetes, for osteoporosis, for improved mammography, for colorectal cancer screening, for prostate screening; and even today in this bill we continue with cholesterol screening and physical exams.

Tonight, the Republican majority is going to add prescription drugs to Medicare. We earnestly seek our friends across the aisle help in doing this. The conference report before us is bipartisan. It is bipartisan because of the House and the Senate structure. Tonight our friends across the aisle have a chance to make it bipartisan in the House. Our friends say that we are trying to destroy Medicare; but if we are trying to destroy Medicare, why is the American Association of Retired People supporting this proposal? Why is the AARP in favor of this bill? You have heard some very harsh rhetoric from my friends across the aisle describing their abandonment by the AARP. My friends, the AARP has not abandoned you. You have abandoned seniors. AARP has chosen to be with seniors, and they have chosen to be with us.

Fact: current Medicare cannot sustain itself financially. Question: Why in the world would we then be adding a $400 billion expansion of benefits under Medicare? Answer: today's medicine demands that we do so. Yesterday's medicine was hospitals and doctors. Hospitals and doctors still play a role, but prescription drugs play a central role. We simply would not be doing justice to our seniors if we did not try to add prescription drugs to Medicare.

But I also called this bill up for taxpayers, because if we add prescription drugs to Medicare, we need to be able to tell our taxpayers that we are also changing the funding structure of Medicare as well.

□ 2345

It cannot sustain itself, and we are adding an enormous new benefit. It would be irresponsible of us to simply think all we need to do is add prescription drugs. What we need to do is add prescription drugs, modernize Medicare, and make sure that those people who pay taxes today in the hopes of having a program tomorrow will be able to have one.

This bill protects low-income seniors. No one wants to place a financial burden on those unable to pay. But, Mr. Speaker, it is overdue to ask those who are financially well off enough to share.

We are hearing things from our friends across the aisle about how horrendous the suggested financial burdens are. For example, in today's voluntary, optional Part B Medicare, the premium is 75 cents on the dollar paid for by the taxpayers, 25 cents on the dollar paid for by the beneficiaries. This legislation is so radical, so extreme, that what it does is it asks people who are making $100,000 a year in retirement to pay 50 cents on the dollar and have the taxpayers pay 50 cents on the dollar. Ironically, that was the financial split when Part B Medicare began. All we are asking is for those who have the wherewithal to help share the financial burden. And where? There is an opportunity to provide a modest copay, one of the most significant factors in inhibiting overutilization. We ask those who are going to have a prescription drug, $2 on a generic prescription, $5 on a brand name. It will have a significant impact on utilization. It will also show that we understand, we need to be sensitive to taxpayers. Today they foot the bill, but tomorrow they also want a program. This bill is really all about a fair deal. Modernize Medicare with prescription drugs but put Medicare back on a sound financial basis as well.

We are going to hear a lot about what we are going to do for up to 40 million seniors in this legislation. Please understand with the modest structural changes we are asking for, there are going to be 140 million taxpayers who are going to be pleased as well.

This program cannot sustain itself. Add a new benefit and modernize the program. Medicare is not a Democrat program; they do not own it. Medicare is not a Republican program; we do not own it. It is a program that is in need of modernization, prescription drugs and better financing. The American people's Medicare, the seniors who receive the benefits, and the taxpayers who foot the bill deserve H.R. 1.

Mr. Speaker, I reserve the balance of my time.

Mr. RANGEL. Mr. Speaker, I ask unanimous consent to turn one-half of the time allotted to the distinguished gentleman from Michigan (Mr. DINGELL), a member of the Committee on Energy and Commerce, the dean of the House of Representatives, the son of the author of the Medicare bill, who was denied admission into the conference.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RANGEL. Mr. Speaker, I yield myself such time as I may consume.

This must be a very important piece of legislation, Mr. Speaker. It is 10 minutes to 12. When else would the majority bring out an important piece of legislation but in the middle of the night?

But more importantly than that, tomorrow for many of us is a date that many of us will never, never forget, at least those of us that were old enough to know of and to love the late John F. Kennedy. Most all of us will remember where we were or what we were doing on November 22. And I suggest to the Members that history will record what we do this evening and what we do tomorrow. The arrogance that has been displayed on this landmark piece of legislation defies description tonight, but history will record it. The audacity for people to talk about bipartisan here where for hundreds of years we inherited a House of Representatives that whether one was a Republican or Democrat, liberal or conservative, we could say in this House the people rule, and we have enjoyed saying that. Where do the Republicans get the audacity to say that when there is a conference, they would select the willing coalition, that they could look at a person and because they are a Democrat, appointed by the Speaker of this great House of Representatives, they exclude them? And let me tell the Members something else I am proud of, not just being a Member of this House, but sitting on this side of the aisle and taking a look at the faces and the backgrounds of the Members and where they come from, from the rural areas, from the inner cities, from America. We do not have senior citizens? We do not have a contribution to make? We can be excluded? And then to have the audacity to come to this floor, even if it is in the middle of the night, and call it bipartisan because you borrowed two Democrats from the other side. That is shameful.

No, our citizens really will recall what we do tonight, what you have done for AARP, what you have done for the pharmaceuticals, what you have done for the private sector whom you have subsidized. The bill is only 1,100 pages, but seniors know that they asked for some help for prescription drugs. No, they did not ask for competition. They did not ask for you to set up paper outfits. They did not ask for, at the end of the day, that you try to run them out of business. And I am suggesting to you, how would you know what you are going to hear on this side when just common decency

prevented you from allowing you to follow the mandate that the Speaker set when he said that the House and the Senate, Republicans and Democrats, please go to conference, and you locked the door? One thing is clear. Seniors understand it better than a whole lot of Members do because it may in the middle of the night, but tomorrow they will be reading what we have done tonight.

Mr. Speaker, I yield the balance of my time to the gentleman from California (Mr. STARK), who has worked hard for decades on this legislation, and I ask unanimous consent that he be allowed to administer the remainder of the time that has been allotted to me.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. THOMAS. Mr. Speaker, I yield the remainder of my time to the gentlewoman from Connecticut (Mrs. JOHNSON), the chairperson of the Health Subcommittee of the Committee on Ways and Means, and I ask unanimous consent that she control the remainder of my time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 2½ minutes to the gentlewoman from Washington (Ms. DUNN).

Ms. DUNN. Mr. Speaker, it is time to keep our promise and provide a comprehensive and voluntary prescription drug benefit for all seniors. Seniors cannot afford the frighteningly increasing cost of drugs any longer. This bill will protect the poorest seniors by helping pay for their drug costs immediately. By using the same principles already used by private companies, this bill will lower drug costs for seniors by passing along to them larger discounts from manufacturers.

As a result, over 775,000 Medicare beneficiaries in my State of Washington will get access to the drugs they need at affordable prices. The poorest seniors in Washington State, over 206,000 people living on fixed incomes, will pay only nominal fees, and I am talking about $2 to $5 for prescriptions, that is all, while qualifying for full assistance on their premiums, their deductions, and their coverage.

We can only strengthen Medicare's future if we are able to ensure access to the services that seniors need today. In this bill, we increase payments to doctors and hospitals, especially in rural communities, so that doctors will have some reason to stay in practice and seniors will get access to health services that they need.

For Medicare HMOs this bill requires Medicare to account for military retirees in the formula resulting in higher reimbursements in counties with military facilities. To help every State, the Federal Government will assume the drug costs for people eligible for both Medicare and Medicaid. This is hugely important. It will help 82,000 beneficiaries who qualify for both programs in my State with their drug costs, but this bill will also save my State $500 million, half a billion dollars over the next 8 years on drug coverage for its Medicaid population. In all, Washington State will receive at least an additional $800 million to serve our seniors.

Strengthening Medicare also means improving the quality of life for every senior. For this reason, I am very happy that we are able to provide preventative services to all seniors like a first-time initial physical exam. For the first time, seniors will have access to innovative treatments to deal with rheumatoid arthritis and other diseases. Seniors also will profit from disease management care, which means there will be coordination to help those seniors who suffer from multiple serious illnesses.

Mr. Speaker, these treatments will allow seniors to receive treatments in their homes, take the burden off physicians or hospitals, and I will tell the Members for too long our parents and grandparents have paid too much for the drugs they need. The time has come to strengthen the Medicare program so that seniors can get the care that they need and they deserve.

Mr. STARK. Mr. Speaker, I yield myself 2 minutes.

I first start by reminding the distinguished gentlewoman from Washington that the Seattle Times said that one suspects that many conservatives do not really care how the chips fall as long as they are heavy enough to break the back of traditional Medicare. All this talk about choice and updating or modernizing Medicare with market competition is pure malarky. So it does appear that somebody from the State of Washington understands what is going on here tonight.

But we are faced with a problem, and the Republican Party from the very top of its leadership to the very bottom have been lying to us. They have been lying to us about the war. They have been revising history. They have been going back on their word to give us 3 days. They have proven that we cannot trust them.

Just recently, the past few minutes, the chairman of the Committee on Ways and Means indicated that they had attempted to put in preventative measures. He seems to have forgotten that in 1995 he voted against colon cancer testing. He voted against prostate cancer testing. He voted against annual mammography. He voted against diabetes management. He has voted more often to cut Medicare benefits than he can remember, it appears.

So we are faced tonight with people who want to destroy Medicare. They will lie to us. They will lie to seniors for the pure purpose of their own messianic desires to destroy a system that will protect the fragile seniors in this country.

Mr. Speaker, I reserve the balance of my time.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. ENGLISH).

Mr. ENGLISH. Mr. Speaker, I rise tonight without any messianic pretensions to urge my colleagues to cast a vote for our seniors and support improved health care by voting for this bipartisan Medicare bill.

Mr. Speaker, today we have the best, and perhaps the last, opportunity to provide America's seniors with a voluntary and affordable prescription drug benefit as a part of Medicare. This is an unprecedented expansion of an entitlement program that will make life easier and health care better for many millions of Americans.

Mr. Speaker, I acknowledge this legislation is not perfect. There are things I wanted to see included that are not in the bill.

□ 0000

Yet, I am convinced that this is the best and most realistic compromise Medicare bill that Congress has so far developed. There are some here, I realize, who would make the perfect enemy of the good. But when you strip away all of the rhetoric and the partisanship, it really comes down to this: Do you support adding a prescription drug benefit to Medicare, or not?

In my district in western Pennsylvania, we have a diverse population of seniors. Some live on very low incomes and qualify for our State prescription drug benefit, PACE. Others are happy with their own private health plans, and some live in areas where there is only one hospital within a reasonable driving range.

This bill helps all of these seniors by offering a benefit that wraps around PACE, allows seniors to selectively participate in the Medicare plan, and includes a number of provisions to ensure that rural health facilities remain open and accessible.

Mr. Speaker, in 1965, our predecessors took the courageous and compassionate step of creating this important program. Now we have the best opportunity in years to build on their work by guaranteeing access to lifesaving drugs for our seniors. It is time for Congress to put people over politics and pass this Medicare bill.

I urge my colleagues to join AARP, America's doctors, America's hospitals, and major health care providers and vote ''yes'' on prescription drugs for our seniors.

Mr. STARK. Mr. Speaker, I am honored to yield 1½ minutes to the gentleman from Michigan (Mr. LEVIN),

who understands that the United Steel Workers of America have said a vote for this measure is a vote to destroy the stability and long-term viability of the Medicare system.

Mr. LEVIN. Mr. Speaker, the key question: Why not add a prescription drug benefit to Medicare like for physicians and hospital bills? Because Republicans want to force seniors to get their drugs from private insurance companies and HMOs, with no set premium, and insurance companies would decide the benefits and could change them every year.

So again, why not simply add a drug benefit directly to Medicare? Because Republicans want to make sure the government has zero involvement in lowering drug prices for consumers. Indeed, their bill would prohibit Medicare from negotiating lower prices for drugs, and the only thing the government could do would be to keep people from buying cheaper drugs from Canada.

Again, why not simply add a drug benefit to Medicare? Because the real Republican goal is to use a drug benefit as a vehicle for fundamentally changing and undermining Medicare.

The President's Medicare administrator called Medicare a dumb system. Under this bill, there would be a global cap on the size of the Medicare program and a voucher to buy private health insurance instead of getting regular Medicare, with the deck loaded against Medicare, $14 billion to HMOs.

Republican reforms are Medicare's destruction. Vote ''no'' on this Republican bill.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 1 minute and 15 seconds.

I would remind the gentleman from Michigan that 28 percent of his seniors will have no more costs than either $1 per generic or $2 per generic or $3 for prescription and $5, and 35 percent of Michigan seniors have incomes under 150 percent of poverty and will be totally protected under this bill.

Mr. Speaker, I think as we proceed in this discussion, we ought to remember that 38 States, 38 States provide Medicaid coverage for people whose income is 74 percent of the national poverty income. So 38 States are not even at 100 percent of poverty income. We cover people completely, everything, except $1 per generic or $2, depending on income, and $3 or $5 per prescription drug.

Do my colleagues understand that of the Medicare population, 57 percent are women? Mr. Speaker, 57 percent are women, and half of them, half of those women will pay no more than $2 per generic or $5 per prescription. They will have no other obligation, all the way up through catastrophic. Half the women on Medicare. This is a giant stride forward in women's health.

Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I am pleased to yield 1½ minutes to the gentleman from Maryland (Mr. CARDIN), who knows that all of the other members of the Older Women's League understand that this bill was supposed to modernize Medicare, not eviscerate it; and to deny basic health services for those who need it most, to increase the profits of the health care industry is criminal.

Mr. CARDIN. Mr. Speaker, I am very disappointed. I had hoped that I would have an opportunity to vote for a real prescription drug benefit within the Medicare system, or at least I would be able to vote on a bill that provides the foundation on which we could build a real benefit within Medicare. Instead, this conference report provides no guaranteed benefit whatsoever to our seniors for prescription drugs. It uses what is known as ''actuarial equivalent'' which depends solely upon private insurance companies.

We know what happened to Medicare+Choice with private insurance companies. The eight that were operating in my State of Maryland are all gone, leaving my seniors.

It has an ineffective mechanism to control prescription drug costs. It denies the government the tools that every other industrial nation in the world is using to bring down the cost of prescription medicines.

But worse than this, Mr. Speaker, it actually causes harm to our seniors. The Congressional Budget Office has estimated that 2.7 million retirees will lose their prescription drug benefits by the enactment of this bill. Mr. Speaker, this is not a voluntary bill for those 2.7 million Americans; they have no choice. It cost-shifts costs on to our seniors from basic Medicare because of premium support and triggers and caps. We overpay HMOs, using money that could be available to help our seniors. We make it more difficult for our seniors to get cancer treatment by the changes that we make on the reimbursement for cancer drugs.

So, Mr. Speaker, this bill does more harm than good. I support providing our seniors with a meaningful prescription drug benefit within the Medicare system that will strengthen Medicare. Therefore, I must oppose this conference report and urge my colleagues to do the same.

Mr. Speaker, I rise to express my disappointment with the conference report on HR 1. For the past several years, I have worked toward enactment of a prescription drug benefit for those who rely on the Medicare program for their health care needs.

A meaningful Medicare prescription drug benefit must be affordable, guaranteed, and available to all, it must contain an effective mechanism to lower the cost of medicines and it must be built on a sound structure that can be improved upon in future years.

I have carefully considered the legislation that is before us today, and it fails each of these tests. This Congress has missed an opportunity to enact far-reaching, bipartisan legislation that would provide the help that millions of seniors need and deserve.

Some have criticized the Medicare program as outdated, inefficient, a dinosaur. These members are ignoring Medicare's success in providing universal, comprehensive coverage. They are ignoring Medicare's low administrative costs—3%—relative to private insurers at 15 to 20 percent. They are ignoring Medicare's ability to cover a population that has been shunned by private insurers for decades.

Before Medicare was enacted, there was little private interest in covering elderly and disabled Americans. And there is still little private interest in doing so. That is why in my own state of Maryland, several hundred thousand seniors who once had the choice of eight Medicare HMOs, now have no HMO options available to them. As the options dwindled between 1998 and 2002, the remaining plans quadrupled their premiums, slashed their drug coverage and eliminated extra benefits. By 2003, the M+C HMO penetration rate in Maryland was zero percent. Nationwide, since 1997, more than 2.4 million seniors have been abandoned by private insurance plans, even though the plans were paid at 119 percent of fee-for-service Medicare costs.

This conference report changes the name "Medicare+Choice" to "MedicareAdvantage," and adds $20 billion in subsidies to private plans, boosting their payments to equal more than 125 percent of the amount paid for traditional Medicare. But it cannot create private interest in the senior market. We have tried that and failed.

To be successful, a drug benefit must be within basic Medicare and based on a sound structure that can be improved over time. Only a benefit that is based on a solid foundation will give seniors the stability they need and deserve. Rather, this bill relies solely on the willingness of private insurance companies to offer the benefit. In the Ways and Means Committee, I fought for a fallback within Medicare that would be available to every beneficiary in the country. It would have a set premium, deductible, and copays that would always be there regardless of where seniors live and what plans enter their region. If the private sector offered a superior, more efficient plan, seniors would choose the private plan. But if the private plan never materialized, or if it offered a premium that was unaffordable, Medicare would be there for them. In rejecting my amendment, and choosing a "fallback" that could come and go from year-to-year, the conferees bypassed the opportunity to continue Medicare's promise of universally available health care for all seniors.

Ask your constituents if they want a choice of more private plans. They do not. They want a choice of hospitals and doctors, and they want stability, reliability, and real help with paying their prescription drug costs.

This conference report lets them down. It offers seniors an inadequate benefit. The President and the Republican leadership say that this plan gives seniors the same benefits enjoyed by Members of Congress and federal employees. That is untrue for several reasons. First, the benefit packages are nearly mirror images of one another. In most FEHBP plans,

federal employees receive 80% coverage for prescription drugs. A federal employee with annual drug costs of $5,000, would pay about $1,000 out-of-pocket. But under this legislation, seniors with annual drug costs of $5,000 would have to pay $4,020 out-of-pocket.

Second, the Medicare drug benefit has a wide coverage gap that will leave many of our seniors paying premiums for several months when they are receiving no benefits. There is no plan approved by OPM that would require federal employees to continue paying premiums when we are receiving no benefits. Seniors should not have to do that either.

Third, under this bill, seniors who want to remain in traditional Medicare would have to enroll in a stand-alone drug plan to get prescription drug benefits, but there is no such plan in the under-65 market. The conference report does not guarantee them what their premium will be; only that a private company will offer them an actuarially equivalent benefit that can change from year to year. It is a level of uncertainty that our senior should not have to face.

Our seniors now know the details of this bill. They are calculating their prescription drug costs at kitchen tables across the country tonight. They are calling Congress to say how disappointed they are at the inadequate benefits this bill provides, and they are urging us to vote no.

Rather than providing relief to our seniors, this bill shifts additional costs from government onto their backs. Although the drug benefit premium is estimated at $35, the conference report gives insurers license to charge much more. The Medicare Part B deductible will increase by ten percent in 2005 and then by program costs each year.

Some of my colleagues have tried for years to curtail Medicare spending by hundreds of billions of dollars, usually in the form of targeted provider cuts. But our hospitals, doctors, nursing homes and rehabilitation providers need fair reimbursement, and Congress has usually answered the call. In addition, these members have found difficult to argue the need for drastic cost containment given that Part A Medicare solvency is now the third longest in the history of the program. So the conferees have taken a surreptitious approach, adding a provision that was not in the House or Senate-passed bills. They created a new definition of insolvency that caps Medicare's use of general revenues at 45 percent of total Medicare costs and would force government to cut benefits or raise payroll taxes if this limit is exceeded. By triggering an increase in payroll taxes, which disproportionately affect lower-income Americans, this provision shifts the burden of Medicare away from those most able to support it to those who are least able, further jeopardizing Medicare's long-term stability.

Because we are limited to $400 billion in this bill, it would make sense to use every instrument possible to get the best price for prescription medicines. But the conference report contains an inadequate mechanism to lower the price of drugs, which have escalated steadily over the past few years, and show no signs of decreasing. This bill specifically prohibits the Secretary of HHS from using the federal government's purchasing power to negotiate lower drug prices, a tool that has been used effectively in nearly every other industrialized nation in the world. Instead, it relies on pharmaceutical benefit managers, which have had mixed results in past years.

I had hoped that this bill would improve health care for seniors. Unfortunately, the provisions affecting oncology drug reimbursement will do just the opposite for cancer patients and reduce their ability to get needed cancer care. The final bill still contains severe cuts to cancer care providers, nearly $1 billion annually. If this bill becomes law, many cancer centers will close, others will sharply reduce their staffs, and others will be forced to turn away patients.

The Ways and Means Committee and the Energy and Commerce Committee have examined this issue carefully. We recognize that the current payment system for cancer care needs to be fixed. Medicare over-reimburses for the drugs themselves, while it under-reimburses for the services that oncologists provide. I support appropriate reimbursement for cancer drugs, but we cannot make cuts of this magnitude without simultaneously paying oncologists fairly for the care they render. To do so will endanger the lives of cancer patients.

Finally I cannot support a conference report that harms currently covered retirees. I remain concerned about the impact of this bill on retirees with employer-sponsored drug coverage. Because of the inadequate reimbursements to retiree health plans, CBO estimates that 2.7 million retirees are expected to lose their benefits. The bill also encourages employers to drop the coverage they now provide by excluding private plan spending from counting toward the catastrophic limit. Because of provisions written into the bill, most seniors with retiree coverage and high drug costs will never reach the point at which Medicare resumes coverage. The authors of this bill say that the benefit they're devised is voluntary, but for those seniors who lose their private retiree health coverage, this plan won't be optional, it will be the only game in town.

Tonight's vote caps several years' efforts to provide Medicare beneficiaries with desperately needed prescription drug coverage. Unfortunately, the conferees have produced a bill that won't result in better health care for our seniors, a more efficient Medicare program, or fiscal responsibility. It will eventually do more harm than good to Medicare, and to those who depend on it for their health care needs. I support providing our senior a meaningful prescription drug benefit within the Medicare system that will strengthen Medicare. Therefore I must oppose this conference report and urge my colleagues to do the same.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 15 seconds.

Mr. Speaker, if the gentleman will note and other Members will note, and the listening public will note, on pages 49 to 53 of the bill, which is all on the Internet, they will see that there is what we call a hard fall-back. That is, if private plans do not offer prescription drugs to our seniors, the government will. The seniors will be guaranteed a drug plan; that is in the statute.

Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. HAYWORTH).

Mr. HAYWORTH. Mr. Speaker, I thank my good friend, the chairwoman of the Subcommittee on Health of our full committee, for yielding me this time.

It has been interesting to listen to the debate thus far this evening. In fact, it evokes memories of an earlier time when I first arrived in this Chamber and, much to my surprise, heard all of these horror stories about what might happen to senior Americans and how schoolchildren might be starved and all sorts of villainy and demonizations that had no basis in fact.

Mr. Speaker, good people can disagree, but it is important to take a look at what we are doing with this legislation. The first thing we are doing is actually strengthening Medicare and preparing it for the 21st century, for the influx of more seniors, demographically what we will see in the 21st century, in just a few short years. And what we are also doing is updating Medicare for the 21st century to reflect changes in medicine. Prescription drugs are the first line of defense for America's seniors. This legislation recognizes that reality and moves to cover it. But moreover, Mr. Speaker, we first reach out to those seniors most in need, and we provide for all seniors next year immediate discounts, with our discount drug cards. Very, very important.

Now, we have heard a lot of wailing and gnashing of teeth about the endorsement of this plan by the AARP. I think rather than tearing up cards or engaging in personal attacks on those who may serve very competently in that association, it might be good to actually listen to the words of our seniors who belong, the millions of seniors who depend on prescription drugs and believe in the AARP. And they readily admit, as all of us would admit, this legislation may not be perfect, but it is a good place to start. We all know, on both sides of the aisle, change comes incrementally. Let us adopt this legislation for America's seniors and for future seniors.

Mr. STARK. Mr. Speaker, I yield 1½ minutes to the gentleman from Wisconsin (Mr. KLECZKA), who agrees with the Arizona Daily Star from Tucson that by doing nothing to address the cost of medicines and by raising payments to private HMOs that want to compete with Medicare, the bill dooms the Medicare program to major problems down the road.

Mr. KLECZKA. Mr. Speaker, the gentleman from Arizona who just spoke advised us to listen to our seniors; and many of us, I say to my colleagues, are doing just that with our vote today. Here is a senior from my district who advises me to oppose this bill, and they

just canceled their AARP membership this morning.

What is going on here? This bill started out as a drug bill for senior citizens and, all of a sudden, we find the bill before us has over $100 billion for special interests in this country, and the calls we are getting to support the bill are from those special interests. They are saying, here is 200,000 specialty physicians; support the bill. Here, a big fat letter. And not once do they mention Medicare drugs for seniors. They are worried about their own pocket. Letter after letter in my office and on my fax machine are from special interests who have lobbyists in town urging Members to vote for this bill because they are getting something out of it: more money. And none of them are saying, and also the senior provision is good.

That is what is going on here. The seniors who call us are against the bill. The special interests who, in a campaign period can give us $10,000 in campaign contributions, are encouraging us to vote for the bill. Who do you think is going to win at the end of the day, huh? The seniors do not got a PAC. They do not give us $5,000 a crack, $10,000 a crack. That is what is happening, I say to my colleagues. And let us not forget it.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 15 seconds.

I do not consider the AARP a special interest group, or the Coalition to Ensure Patient Access a special interest group, or the Alzheimer's Association a special interest group, or the Kidney Cancer Association a special interest group.

Mr. KLECZKA. The Hospital Association, the American Medical Association, that is who I am talking about.

Mrs. JOHNSON of Connecticut. Mr. Speaker, it is my time.

Mr. KLECZKA. Let us not kid a kidder; we know who they are.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The gentleman will suspend. The gentlewoman from Connecticut has the time.

Mrs. JOHNSON of Connecticut. The Mental Health Association of Central Florida, the Larry King Cardiac Foundation, the Latino Coalition.

Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. GINGREY).

Mr. GINGREY. Mr. Speaker, I rise tonight in support of the House-Senate Medicare agreement. For those of us who had hoped that this bill would contain more reforms or greater cost constraints, I agree. We did not accomplish all that we had hoped. But as a physician, I realize the medical reality of the bill, a medical reality that the prescription drug benefit itself is fiscally responsible and a potential cost-saver for Medicare.

By providing a prescription drug benefit, providers will be able to take the necessary preventive action to potentially stave off or treat an illness in an earlier stage, making it easier to control the cost of treatment.

□ 0015

The medical reality is that prescription medication can help seniors live longer, healthier lives, while saving a tremendous amount of money on treatment by avoiding costlier options.

Although I hope the future will bring about more changes and modernization to Medicare, the Medicare agreement will be a great start. And I urge my colleagues to take this fiscally responsible step and pass the Medicare conference report.

Mr. STARK. Mr. Speaker, I yield for the purpose of making a unanimous request to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, I rise in opposition to the conference report.

Mr. STARK. Mr. Speaker, I yield 1½ minutes to the gentleman from Georgia (Mr. LEWIS).

Mr. LEWIS of Georgia. Mr. Speaker, I stand in strong opposition to H.R. 1. I believe in Medicare, I believe that Medicare is a sacred trust between the Federal Government and the American people. I believe with all my heart, with all my soul, and with all my being that Medicare must have a dependable, affordable, and strong prescription drug benefit. And that is why I cannot support this bill.

Mr. Speaker, 38 years ago the Republicans did not like Medicare and they do not like it now. Republican Speaker Newt Gingrich gleefully stated that he wanted to see Medicare wither on the vine. Mr. Speaker, my colleagues, Newt Gingrich is back, and his fingerprints are all over this bill.

If this bill is passed, it would be a dagger in the heart of Medicare as we know it. This bill is an attempt by the Republican party to privatize Medicare. I stand against privatizing Medicare, and I stand against this bill.

Medicare is a sacred trust. It is a covenant with our seniors. Let us not breach this trust. Let us not violate this covenant. We must do what is right.

I urge my colleagues to vote against this unreliable bill, vote for the seniors, vote for those that are in need. Vote against this bill.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield 1½ minutes to the distinguished gentleman from Massachusetts (Mr. NEAL), who agrees with the Boston Globe that this experiment needs to be stopped before the Republicans in Congress damage a program that has served the elderly well for 38 years.

Mr. NEAL of Massachusetts. Mr. Speaker, it is not always an easy task to agree with the Boston Globe.

Mr. Speaker, I thank the gentleman from California (Mr. STARK). Well, here we are again in the dark of night, whether it is doing Trade Promotion Authority or whether it is doing tax cuts, or whether it is doing the privatization of Medicare, we do it in the dark of night.

Only could the gentleman from California (Mr. THOMAS), the chairman of the Committee on Ways and Means, talk about the crisis that confronts Medicare after they led the charge to rip $2 trillion out of the Federal budget over the next 10 years. Tonight we are children of Roosevelt on this side and Johnson, and let us not forget it. When you hear them talk about their new-found affinity for Medicare, recall that it was Dole and Michael and Rumsfeld and Ford who voted against the establishment of Medicare.

And I want to say something to my colleagues on the democratic side tonight who are tempted by what is about to happen. You mark my words, we are going to be back here in a year, and the next step is Social Security. That is where they are headed. Medicare is an amendment to the Social Security Act. America is a more egalitarian society today because it was our party who stood against the forces of privilege. They are the ones that said no.

Turn down this privatization of Medicare.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 1 minute to my colleague, the gentleman from Pennsylvania (Mr. PETERSON).

Mr. PETERSON of Pennsylvania. Mr. Speaker, I want to congratulate those that have worked on this very complicated bill. I was pleased this morning to receive from the Governor of Pennsylvania, Governor Rendell, an endorsement of this plan. Why would a democrat governor from Pennsylvania support his plan? His people were here and reviewed it.

This allows states like Pennsylvania and 20 other states who have pharmacy plans to wrap around and make a really comprehensive pharmacy program for their state with a state effort and the Federal effort.

Now, those of you who come from rural America better think seriously about voting against this bill. Rural health care has been fighting for its life. This is a lifeline that will for once and forever help stabilize Medicare payments. In rural America what good does a pharmacy program do if you do not have a doctor in a hospital and a home health care agency for him or her to work in?

This program does more to help rural health care than has ever been done. The urban areas of this country have had Medicare Plus Plus while rural America has had Medicare Minus Minus. An unfair system. And this bill does more to equalize that. It also preserves cancer care that has been under

threat. And it brings health savings accounts that will be an offering to our businesses more seriously considering about walking away from health care because they cannot afford the current plan.

COMMONWEALTH OF PENNSYLVANIA,
OFFICE OF THE GOVERNOR,
Harrisburg, PA, November 21, 2003.

Hon. JOHN PETERSON,
Cannon Building,
Washington, DC.

DEAR REPRESENTATIVE PETERSON: I am writing to thank you for your efforts to develop provisions in the Medicare Prescription Drug bill to allow PACE to continue to be the primary source of drug benefits for qualifying seniors in Pennsylvania. As of early 2004, we expect approximately 325,000 Pennsylvania seniors to be in the PACE program, and we owe it to all of them to ensure the program on which they rely continues to work for them.

As the Medicare drug benefit legislation had been in development, our goals have been to ensure seniors in the PACE program would be able to benefit from the new federal benefit without experiencing any changes in the way they obtain prescription drugs and without being forced through a bureaucratic process along the way. Federal legislation must allow for a seamless transition for PACE beneficiaries while at the same time allowing PACE to expand its prescription drug program and services to more of our seniors.

I am informed that the language in the Medicare drug benefit bill achieves our major goals relating to the PACE program. This is good news for our constituents and I appreciate very much all the hard work you and others in the Pennsylvania delegation did to make this happen.

Should the legislation ultimately be enacted, I look forward to working with you and Secretary Thompson to make sure the PACE-related provisions are implemented as we all believe they should be.

Thank you again for your efforts on behalf of Pennsylvania's seniors.

Sincerely,

EDWARD G. RENDELL,
Governor.

Mr. STARK. Mr. Speaker, I yield 15 seconds to the gentleman from Pennsylvania (Mr. DOYLE).

Mr. DOYLE. Mr. Speaker, I just spoke with the Governor's office earlier this evening. I was aware of this letter that was sent out to four Republicans. Governor Rendell does not endorse this program. He does not support this program. And I just want that to be reflected in the RECORD.

Mr. STARK. Mr. Speaker, I yield 1½ minutes to the gentleman from Texas (Mr. SANDLIN) who agrees with the Houston Chronicle, the Republicans are interested only in the illusion of providing a popular benefit, a Republican driven bill to, quote, improve Medicare is impossible.

Mr. SANDLIN. Mr. Speaker, we have heard a lot of pretty words from the Republicans tonight, but every one on both sides of the aisle knows that this bill is nothing but a sham, a charade, a shameless trick on America's seniors.

America's seniors need help right now and yet the bill advanced by the Republicans does not even take effect until 2006. No coverage in 2003, no coverage in 2004, no coverage in 2005, and who knows what will happen in 2006.

Our seniors cannot afford prescription drugs, and in the face of that challenge, the Republicans have presented a bill that requires seniors to pay out of their pockets over $4,000 of the first $5,000 spent on drugs. That is no benefit at all.

Now, have the Republicans done anything to reduce the cost of drugs? No. The HMOs and the pharmaceutical companies will not let them do it. And this bill that is supposed to make drugs more affordable, there is no control over the prices charged by the pharmaceutical companies. Their greed is what got us in this situation in the first place. Do you think that philanthropy has suddenly invaded the boardroom of the pharmaceutical companies. Is that what you think?

Amazingly, this bill prohibits, makes it illegal, against the law for the government to negotiate for lower prices with a pharmaceutical companies. They supply the product, they set the price, the seniors foot the bill, that is a sweet deal for them. And can the seniors save money by getting drugs from Canada or Mexico? Oh, no, the Republicans in this bill that was written by the pharmaceutical companies say no. And that is the way it is.

Finally, Mr. Speaker, the Republicans have the audacity to support a plan that lines the pockets of HMOs by taking $10 billion out of cancer treatment, leaving America's seniors both broke and dying. If this bill passes, it passes on the back of the America's seniors. The Republicans will have to answer. They can run in the middle of the night, but they cannot hide.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield 1½ minutes to the gentlewoman from Ohio (Mrs. JONES), who is a woman who agrees with Al Hunt, who wrote in the Wall Street Journal that this is an open rip-off by HMOs. There is a reason most Americans and, virtually all who have endured serious medical issues, despise HMOs. They are, with few exceptions, vultures.

Mrs. JONES of Ohio. Mr. Speaker, I am proud to have had the opportunity to serve my first year on the Committee on Ways and Means. And I think it is important for America to know that, finally, we had an African American male on the Committee on Ways and Means who rose to ranking member, who rose to representation on the conference committee, and he was excluded from being part of the willing coalition.

I say to people across America, particularly the African Americans in this country, you were not at the table, your interests were not represented. Let me, in addition, say that since we have two Houses in this Congress, the House of Representatives and the Senate, that the House was not represented on the Democratic side in this report.

But let me address another issue. And I have got a written statement that I will submit for the RECORD. Everybody keeps saying about AARP and how renowned they should be. But they do not talk about that in the last 4 years AARP made $608 million in insurance-related expenses, 30 percent of its income. They do not talk about that AARP had a 10-year Medigap contract with some company and the business is now worth $3.7 billion. They do not talk about that AARP made $10.8 million last year by selling its member list to insurance companies. And they do not talk about the fact that AARP spends $7 million in support of this legislation. Talk about a conflict of interest. If there ever was one, it is right there. So I say to you, we are going to ruin neighborhood drug companies. We are not drug pharmacies. Do not vote for this bill. This bill is not in the interest of senior citizens.

Mr. Speaker, I rise in opposition and with great disapproval of the Medicare conference agreement. The republican leadership in the House of Representatives has excluded Democratic Members from the negotiations and has written a Medicare bill that bows to major drug companies and prevents Medicare from negotiating better prices. This agreement masquerades as an attempt to add a long-overdue prescription drug benefit, but this is really a Trojan horse designed to dismantle Medicare, as we know it.

This agreement is flawed in countless ways. Its concentration on privatization is misguided at best and devastating. This is a special interest giveaway to the insurance companies with provisions including a $12 billion slush fund to bribe HMO's and PPO's to participate, all at the expense of taxpayers and the elderly alike. The agreement leaves a substantial number of the 6.4 million low-income Medicare beneficiaries who are also eligible for Medicaid worse off by requiring them to pay higher copayments for prescription drugs than they pay today. This agreement also prevents Medicaid from filling in the gaps of this new, limited benefit. This bill squanders $6 billion needed for coverage on tax breaks for the wealthy which in fact creates an unprecedented tax loophole that would undermine existing employer coverage and adds to the ever-growing number of uninsured. These funds should be used to prevent employers from dropping coverage or to improve the drug benefit. Even worse, this bill would force some low-income seniors who have modest savings to impoverish themselves in order to take advantage of the extra help allegedly available in this bill. A disproportionate share of African American Medicare recipients are disabled. The cut-off points chosen in this conference agreement will pigenhole African Americans into what is referred to as the "donut" on paying for the drug benefit. This will unreasonably hurt African American Medicare recipients, many of whom

have chronic ailments. We are forcing our seniors to choose among purchasing food, prescription drugs or paying for a roof over their heads.

In closing, please let me inform America that this bill does not address the needs of our citizens. This bill would manufacture a crisis when an arbitrary cap on general revenue funding is reached, which would trigger a fast-track process for consideration of legislation to radically cut Medicare, including benefit cuts, payment cuts for hospitals, nursing homes, home health providers and increased cost sharing. Without hesitation, Congress provided $87 billion to rebuild Iraq; is it too much to provide the appropriate funding needed to give our Nation's seniors what they deserve—an affordable and guaranteed medicare drug benefit?

Mr. Speaker, I represent 206,000 constituents in my district who are 65 and older and are below the federal poverty level. The same constituents I promised that I would vote for a Medicare prescription drug bill that would be affordable with reasonable premiums and deductibles that are designed to significantly reduce the price of prescription drugs; a meaningful medicare prescription drug bill that would be defined, provide guaranteed benefits, there would be absolutely no gaps; no separate privatized plan; and most important, I repeatedly told my constituents that I would support a Medicare prescription drug bill that would be available to all seniors and disabled Americans. The results of the Medicare conference agreement is not what I expected. Dear colleagues, I ask that you join me and vote against this measure.

[From USA Today, Nov. 21, 2003]

AARP ACCUSED OF CONFLICT OF INTEREST

(By Jim Drinkard and William M. Welch)

WASHINGTON.—AARP, the nation's leading lobbying force for retirees, has a major conflict of interest in its backing for a new Medicare prescription drug plan, opponents charge.

The organization receives millions of dollars a year in royalties for insurance marketed under its name. It stands to reap a windfall from the plan, which would pump $400 billion into a new drug benefit and open Medicare to private insurance competition.

AARP's annual reports show it has received about $608 million in insurance-related income over the four most recent years for which data are available. That's 30% of its total income, roughly equal to what it collects in membership dues.

"It's almost unimaginable that they wouldn't stand to gain" if the new benefit is passed, says David Himmelstein of Harvard Medical School. He is a proponent of national health insurance.

Much of AARP's insurance business is in policies that pay costs not covered by Medicare—so-called Medigap insurance. UnitedHealth Group signed a 10-year contract with AARP in 1998 to provide health coverage to its 35 million members. The business was worth $3.7 billion last year to the insurance company.

"The same folks who are in the Medigap market would want to get into this, and the best route in is through the AARP membership list," Himmelstein says.

AARP also collects millions of dollars a year from insurance and drug companies that advertise in the magazine it mails to members. It also makes money—$10.8 million last year—by selling its members list to insurance companies.

From its earliest roots in the 1950s, AARP has been closely tied to the insurance business. It grew out of a retired teachers group that sought to provide health insurance to its members. "They have always had this commercial identity," says Jonathan Oberlander, a political scientist at the University of North Carolina who has studied the politics of Medicare.

The breadth of AARP's business activities—which include not only insurance but credit cards, travel packages and prescription drugs—has drawn unwanted attention before. In 1995, Sen. Alan Simpson, R-Wyo., convened hearings that alleged the group was abusing its non-profit status. AARP was forced to pay back taxes on its earnings from those commercial ventures. and the group has faced periodic questioning about whether its business interests at times overshadow the interests of its members.

Simpson, now retired from the Senate, remains one of the group's sharpest critics. "If there was a sublime definition of conflict of interest, it would be AARP from morning to night," he says.

AARP is tax exempt and officially non-partisan. "We made public policy decisions without regard to business considerations," says the group's policy director, John Rother. Spokesman Steve Hahn says some of its Medigap policies and mail-order pharmaceutical sales are likely to be hurt by passage of the Medicare bill because it will increase competition.

Democrats in Congress seemed stunned this week when AARP announced it would support the Republican-drafted Medicare compromise and pour $7 million into a TV ad campaign urging passage.

Senate Minority Leader Tom Daschle, D-S.D., and House Minority Leader Nancy Pelosi, D-Calif., say the legislation would sell out the interests of senior citizens. It "undermines Medicare and serves the agendas of big drug and insurance companies," they wrote in a letter to AARP head William Novelli. They asked Novelli to pledge not to profit from any program that might be created.

Rep. Pete Stark, D-Calif., called the legislation a "special-interest boondoggle" that will split AARP's leaders from its grass roots. On Thursday, a message board on the group's Web site was peppered with angry postings from members, including 839 new missives under the title, "AARP sellout."

For a decade, AARP has been a sleeping giant. The organization felt burned after its support for a catastrophic insurance benefit in 1988 backfired with seniors and had to be repealed. It had since been reluctant to take positions on hot political issues. Its membership is evenly divided among Democrats, Republicans and independents, making it hard to take sides in policy fights.

But when the group does decide to engage, its clout is unmatched. "They are the most important and well-organized association in Washington," says James Thurber, who teaches lobbying at American University in Washington.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 1 minute to my colleague, the gentlewoman from Florida (Ms. GINNY BROWN-WAITE), who has experience legislating in the area of health care reform.

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, I am one of those Republicans who grew up very poor. My dad was a Democrat. And I remember asking him why he was a Democrat, and he said because the Democrats protect the poor.

What I am hearing here tonight says the Democrats do not care about the poor. They do not care about the little old lady whose income is about $11,000, who only has Social Security, who cannot get prescription drugs today. That is the wrong message to be sending if they hope to be the savior of the poor and the drowntrodden.

I also teach health care. One of the things that I teach in my class are statistics. And the statistics are that the African American community and the Hispanic community pass away at a much earlier age from heart attacks, from coronary artery problems, and you know what? These are the prescription drugs that will be available under this prescription drug plan. How can they go back home and say that they are protecting the poor and the down-trodden? These are the same, the poor and the down-trodden, these are the people that are going to benefit from this prescription drug plan. I fully support it. It is a good bill for everyone.

Mr. Speaker, I rise today in support of the Bipartisan Medicare Prescription Drug, Improvement, and Modernization Act because it finally provides the much needed prescription drug relief seniors have asking for, offers help to our rural hospitals and our nation's doctors, and begins the real modernization and reform of a Medicare program in dire need.

Throughout my public service, I have heard a persistent question from my seniors how are you going to help us with the cost of prescription drugs? With the passage of this bill, I feel that I can finally begin to answer that question.

For the first time in history, we are going to provide all 40 million seniors and disabled Americans with prescription drug coverage.

It gives me great comfort to know that in 2006, with this Prescription Drug Plan, drug costs for seniors could be cut almost in half. And as early as next year, senior will begin to save an estimated 25 percent on prescription drugs with their Medicare prescription drug card. In the first year we expect seniors to save an estimated $365.

As a member of the Speaker's Prescription Drug Task Force, this is something we fought for, and this is something we got.

In addition, we are giving Americans more control over their health care by creating Health Savings Accounts, where they can contribute up to $2,500 a year into these tax-free accounts and citizens 55 years or older are permitted to make "catch up" payments. These accounts can be used for future medical expenses and may prove to be an additional much needed asset to our aging population.

Mr. Speaker, I would also like to bring to the attention of my colleagues a very important component to this bill. As we are all aware, in 2004, the prescription drug discount card in Medicare will offer seniors up to 25 percent off

their drug costs and provide low-income seniors, those with incomes of less than 135 percent of poverty into account, a $600 subsidy on top of the discount card. That's great savings, especially for wealthier seniors.

But what if you have an income of over 135 percent of poverty and you're disqualified from receiving the cash subsidy? Currently, hundreds of thousands of seniors in this country are provided discount cards from the prescription drug companies that offer significant savings on medications that a particular company produces. The income-restrictions on these cards are in some cases up to 300 percent of poverty. This means virtually all seniors in my district are eligible for this savings, which in many cases equals up to 80 percent off the retail cost of the drug. For example, Mr. Speaker, Eli Lilly makes Prozac; and if one of my 5th district seniors needs assistance with the cost of that drug, they can sign up to receive a card from Eli Lilly that entitles them to receive a 30-day supply of any Eli Lilly product for just $12. If, due to the new Medicare discount card, these important voluntary programs were discontinued, many of our Nation's seniors would end up paying higher prices. My constituent would end up paying over $75 for the same Prozac he or she is now receiving for only $12. Just as there was a fear this benefit would cause employers to drop coverage once it became available, I was concerned that the drug card would cause drug manufacturers to discontinue their cards.

Mr. Speaker, working with you, Majority Leader DELAY, Majority Whip BLUNT and many of my other colleagues in this House, I took the lead and fought to protect seniors who are benefiting from the current prescription drug cards.

Now, on page 64 of the report language addendum and addressing section 1860D–31 of Conference agreement; Section 105 of House bill; Section 111 of Senate Bill reads:

Seniors currently benefit from prescription drug assistance programs offered by pharmaceutical companies. Conferees intend that these programs continue to be offered until the full implementation of the prescription drug benefit. Nothing in this conference report shall be interpreted as encouraging the discontinuation or diminution of these benefits.

Additionally, I have secured several letters from drug manufacturers in this country indicating their commitment to continuing to offer these worthwhile and necessary card programs, copies of which I'd like to insert into the RECORD.

Mr. Speaker, I simply want to bring this to the attention of my colleagues on both sides of the aisle and especially to the seniors in my district. Neither conference staff nor most of the members of this body were aware of this glitch in the proposal and I am very proud of the work we were able to do together.

In closing, Mr. Speaker, friends, colleagues, the citizens of the 5th Congressional District of Florida elected me to this seat because they believed my voice would be heard and that I would stand with them in making a prescription drug benefit in Medicare a reality. It simply has been too long that our Nation's seniors have had to choose between life-saving drugs and food and this is unacceptable.

No one in this chamber believes that this bill is perfect, including myself, but I believe this bill is a good beginning and it signifies progress in our efforts to provide all of our constituents with the best, safest, and most affordable health care the world has to offer. In the months and years ahead, it is my hope and my promise that I will continue to work with Democrats and Republicans, to continue to make progress in our ongoing battle to improve health care for all Americans, including additional protections for retirees currently receiving health care benefits and addressing the rising costs of prescription drugs.

But tonight we have a choice to make—to take a step forward or to accept the status quo. Instead of concentrating on the weaknesses of this proposal, we must each embrace its strengths and dedicate ourselves to the next step forward. Accordingly, I urge my colleagues to vote in favor of the Prescription Drug and Medicare Modernization Act.

Mr. STARK. Mr. Speaker, I am delighted to yield 2 minutes to the minority whip, the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. Mr. Speaker, this Medicare conference report is, sadly, a missed opportunity. I was here in 1983. Ronald Reagan, Tip O'Neill, and Bob Michael joined together to save Social Security. They came together, President Reagan, Speaker O'Neill, and Minority Leader Michael and said, we need to have a bill that has bipartisan support and will get the job done.

□ 0030

It did.

The Republicans rejected that model. Most Members of this body on both sides of the aisle recognize that it is long past time that we provide for our seniors and give them a prescription drug program; but it is not this bill that they expected, a feeble benefit that forces them to pay 80 percent of their costs.

I will tell the gentlewoman from Florida (Ms. GINNY BROWN-WAITE) her dad was right. He was a Democrat because this party has historically and now believes that we should have done better by our seniors. Even the conservative Heritage Foundation, which is against this bill because they want to see Medicare done away with, says this, ''The politically engineered premiums and deductibles, coupled with the odd combination of 'donut holes' or gaps in drug coverage, are likely to be unpopular with seniors.''

The Heritage Foundation said that. Not STENY HOYER, not Democrats. Even Dick Armey, the immediate past leader of our party wrote in the Wall Street Journal on Friday that this conference report is ''bad news for seniors.''

Your majority leader just past said that. Now, he wants to do away with Medicare. He does not believe we ought to have Medicare. He nevertheless says this is bad news for seniors. Because it is bad news for seniors, we ought to vote against this bad bill.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 10 seconds. I remind the gentleman from Maryland (Mr. HOYER) that of his 713,000 seniors, 31 percent will get total drug coverage under this bill.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. WELLER), a member of the Committee on Ways and Means.

Mr. WELLER. Mr. Speaker, this is historic legislation tonight. Again, we make another positive step forward in modernizing Medicare, a process we have been working on every year the nine years that I have served in the House of Representatives.

I am proud that a majority of House Republicans voted in favor of Medicare when it was created. I am proud a majority of this House, who is the majority, continues to work to modernize and improve Medicare for our seniors.

This legislation that came out of bipartisan work, it is endorsed by the AARP, a trusted organization that represents millions of American seniors. And in the case of Illinois, my home State, 1.7 million seniors benefit in the State of Illinois. They benefit because they will have for the first time ever prescription drug coverage that is voluntary, it is affordable, and it is universal, available for every senior citizen. It will be immediately available.

In fact, within 6 months of this legislation becoming law, seniors will have a prescription drug card immediately this coming year allowing them to see up to a 25 percent savings; and 2 years later, 2006, every senior again will have the opportunity to see up to a 75 percent savings on prescription drugs. They choose to enroll in a prescription drug plan available through this modernization of Medicare. In fact, at a cost of about $1 a day, they can see a 75 percent savings, up to a 75 percent savings. And if they are low income, they will pay little or no premium. This is a good plan. That is why it has bipartisan support.

I want to salute Senator BREAUX and Senator BAUCUS for working with Republicans to come up with a bipartisan plan.

I would also note that hospitals and community health centers do benefit because when you modernize Medicare, you also fix the reimbursements. In communities that I represent, almost all of our hospitals, I think every one of them, is a not-for-profit. They struggle, both the hospitals and community health centers. Some call them special interests, but they get big improvements back for Illinois, $400 million in additional reimbursements as a result of this legislation.

Mr. STARK. Mr. Speaker, the Republicans can lock out two of the leading Democratic legislators from their conference committee, but just to show you that we are bigger than all that, we will turn the other cheek. I yield 2 minutes to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. Mr. Speaker, first of all, I want to make it clear, I am a Republican and I am very proud to be a Republican. However, there are problems with this bill that make it impossible for me to vote for it.

It has been said tonight that 35 million AARP members cannot be wrong, but I am telling you AARP does not speak for all seniors. And when the seniors find out what is in this bill, that most of them initially are going to pay about $4,000 of the first $5,000 they are going to spend on pharmaceuticals, they are going to be so angry it is going to be like 1988 all over again.

Now, I want to talk a little bit about the pharmaceutical industry. There is nothing in here that allows our government to negotiate the prices with the pharmaceutical industry. We pay the highest prices in the world for pharmaceuticals. We pay seven, eight, nine, 10 times as much for Tamoxifen, a woman who has breast cancer and has to have it, than they do in Canada; and yet there is no provision in this bill for negotiation.

You say we have a 25 percent discount card. Twenty-five percent of what? If the pharmaceutical industry has these high prices and you knock 25 percent off, they are still a hell of a lot higher than they are in Canada or Germany, and yet we cannot reimport. Why? It does not make sense.

Do we believe in free trade? We have NAFTA. You can import everything back and forth across the borders, but not pharmaceuticals because it is not safe. Yet when we talk to the Canadians, and I had four hearings on it, they could not find one case where there was a problem. This is not a safety issue. The problem is profit and price.

I want to tell you something. It has been said that for too long seniors have paid too much. They have been paying too much. But we are not doing anything in this bill to lower the price of pharmaceutical products.

Now, I want to say to my colleagues also there is $70 billion in this bill, a pay-off to Big Business to keep their employees and their former employees covered under this plan.

I want to tell you something. As a businessman, they are going to look down the road and they are going to say, hey, Congress changes from time to time and they are going to start dumping their employees on the Federal plan. And when they do, those retirees are going to be so angry at us, you are not going to believe it.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield for the purpose of making a unanimous consent request to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, as one who represents the largest groups of senior citizens, older Americans who are on Medicare and Social Security, I rise in support of this bill.

Mr. Speaker, I rise in support of H.R. 1, The Medicare Prescription Drug, Improvement, and Modernization Act of 2003. This is the most important and comprehensive improvement to the Medicare program since it was established 38 years ago.

For the first time, Medicare will provide prescription drug coverage for 40 million older Americans. It will provide lifesaving help for the millions of seniors who today forgo taking prescription drugs because they have no coverage and cannot afford them. It will allow seniors to take their full dose of medicine as prescribed rather than cut them in half or skip days to make the supply last longer. And it will eliminate the heart wrenching decisions many seniors must make over whether to buy food or prescription medicine, because they cannot afford both.

One of the reasons Americans are healthier and living longer is that prescription medication is available to control many chronic diseases such as high blood pressure, cholesterol, and diabetes. Unfortunately, these medicines are oftentimes not available to those living on fixed incomes. This legislation changes that by creating a tiered benefit program that provides prescription drug coverage for everyone eligible for Medicare. Yet it still allows those who receive prescription drug coverage through their employers or other health benefit plans to elect to retain that coverage.

Because of the complexity of bringing the new Part D prescription benefits on line, those benefits will not take effect until 2006. In the interim, however, Medicare beneficiaries will be eligible beginning next April to receive a Medicare-approved drug discount card. Seniors will take this card to their local pharmacy to receive discounts of 10 to 25 percent off their prescription medicine. This will provide immediate savings to seniors while preparations are underway to launch the full Medicare prescription drug program in 2006.

Once implemented, seniors electing prescription drug coverage will pay a monthly premium of $35. Following a $250 deductible, they will receive federal coverage for 75 percent of the costs of their prescription drugs up to $2,250. For each prescription filled, there will be a $2 co-payment for generic drugs and a $5 co-payment for brand name drugs. If a senior incurs catastrophic drug costs, exceeding $3,600 in out-of-pocket costs, Medicare will cover 95 percent of drug costs over that amount.

For those on small fixed, limited incomes (below $12,123 for individuals and $16,362 for couples), they will pay no deductible and no premium and there will be no gap in coverage between the initial coverage limit of $2,200 and the catastrophic coverage threshold of $3,600. For those with incomes between those levels and 150 percent of the federal poverty level ($13,470 for individuals and $18,180 for couples), the premiums and deductibles will increase on a sliding scale.

In addition, it is estimated that this legislation will drive down the price of prescription medication by as much as 20 percent, to yield further savings for seniors. It also sets in place new federal laws that will allow drug manufacturers to bring to market quicker, more affordable generic drugs.

In addition to the new prescription drug coverage, this legislation will improve the quality of care for seniors in a variety of other ways. Most notably, it provides coverage for the first time for important new preventative benefits. Beginning in 2005, all newly enrolled Medicare beneficiaries will be covered for an initial physical examination. All beneficiaries will be covered for cardiovascular and screening blood tests and those at risk will be covered for a diabetes screen. These new benefits will allow for the screening of patients to catch many illnesses and conditions early, allowing them to be treated and managed in a way that improves their health and quality of life while at the same time lowering medical costs to individuals and the program by preventing later serious health consequences.

Finally, this legislation will ensure that Medicare payments for physician and hospital services keep pace with inflation so that we do not lose health care providers who are available to care for the growing population older Americans. It also seeks to stabilize the reimbursement rates and drug coverage for cancer patients, who have faced increasing problems with the reduction in Medicare payments for these services over the past few years.

Mr. Speaker, as the representative of one of the largest populations of Medicare recipients in this Congress, I know first hand the life-line that this program provides for seniors. My highest priority in the development of this legislation was to ensure that we do nothing to diminish or endanger the health care coverage it provides. We have done a good job in seeing that just the opposite is true. With its enactment, H.R. 1 will provide expanded benefits and will ensure that these benefits are more affordable and more available to all.

H.R. 1 also responds to the three major concerns I have heard from my constituents throughout the development of this legislation. First, it guarantees access to the traditional Medicare program, services, and benefits that they currently receive. It will, however, allow those who are interested to consider new Medicare-approved plans where drug coverage is integrated into broader medical coverage or lower cost managed care plans offering expanded benefits.

Second, H.R. 1 maintains the full Federal commitment and backing of the Medicare program. Some were concerned that the final legislation would in some way privatize the delivery of these health care benefits. That is not the case in this bill.

Third, H.R. 1 does not in any way encourage employers or private health care plans to drop current employees or beneficiaries from their health care or prescription drug plans. Instead, it provides a number of important incentives for employers and private health care plans to retain employees and beneficiaries in their health care plans and allows the new Medicare benefits to supplement the benefits they already receive privately.

Addressing these concerns is one of the many reasons the American Association of Retired Persons has endorsed H.R. 1. In a statement earlier this week, AARP said, "AARP believe that millions of older Americans and their families will be helped by this legislation . . . The bill represents an historic breakthrough and important milestone in the nation's commitment to strengthen and expand health security for its citizens at a time

when it is sorely needed. The bill will provide prescription drug coverage at little cost to those who need it most: People with low incomes, including those who depend on Social Security for all or most of their income. It will provide substantial relief for those with very high drug costs, and will provide modest relief for millions more. It also provides a substantial increase in protections for retiree benefits and maintains fairness by upholding the health benefit protections of the Age Discrimination and Employment Act.''

Mr. Speaker, the historic legislation before us today provides long overdue reforms to the Medicare program. It provides for the first time prescription drug coverage for older Americans. For those seniors currently unable to afford their medicines, it provides important new access to many preventive drugs. It also provides access for them to treat serious conditions before they worsen and require emergency room or hospital care.

This legislation also improves Medicare coverage for preventative health care including physicals and cardiovascular health and diabetes screening tests. This too will improve the quality of medical care our seniors receive and will forestall many serious and costly medical problems.

Finally, this legislation modernizes the Medicare program to provide 21st Century solutions to give seniors more health care choices. It also will bring market forces to bear to ensure that they receive better medical care at more affordable and competitive prices.

This is the culmination of a six year legislative effort that included the consideration of three separate prescription drug bills in the House. Our colleagues in the House and Senate have taken a hard look at the problems facing older Americans who receive their care through Medicare and have agreed upon a thoughtful and comprehensive approach. Certainly we will identify problems that will need correcting as the next step in implementing this complex program begins. For our seniors, however, this legislation fulfills a promise to give them access to prescription drug coverage for the first time through the Medicare program. It is a good response to a long overdue problem and I urge support for its final passage.

Mrs. JOHNSON of Connecticut. Mr. Speaker, how much time remains on each side?

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The gentlewoman from Connecticut (Mrs. JOHNSON) has 9½ minutes remaining. The gentleman from California (Mr. STARK) has 8 minutes remaining.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 30 seconds.

I would like to note that the 25 percent discount means you pay 25 percent less. And once the subsidies go into effect, you pay 75 percent less, and half the Medicare recipients are women and half of those women will be covered totally. So this is a big, powerful prescription drug bill that will help half the women on Medicare by providing all of their drug coverage.

Mr. Speaker, I yield 2 minutes to the gentleman from Iowa (Mr. NUSSLE), chairman of the Committee on the Budget.

Mr. NUSSLE. Mr. Speaker, I thank the gentlewoman for yielding me time and for her leadership on this issue, as well as the chairman of the Committee on Ways and Means.

Mr. Speaker, America has got a big decision tonight and seniors have been waiting a long time. The previous gentleman said that seniors when they wake up tomorrow, if this passes, will find out they still have to pay a little bit of money. Some will not have to pay at all, but seniors will really be mad if they wake up tomorrow morning and find out that we failed yet again.

Four budgets in a row we have had the pleasure of putting into our budget plan a prescription drug benefit. This year is the first time we have been able to get it to this point, a conference report; and that is because the President of the United States has provided the leadership to get us to this point.

In Iowa we have been waiting for 20 years for fairness when it comes to reimbursement. We have been waiting for 20 years when it comes to the difficulty of recruiting physicians and other health care providers. We have been waiting 20 years to stop the cost shifting to the private side of health care that drives up the cost for small business people and farmers. We have been waiting for 20 years for seniors to have prevention and drug benefits and basic services.

Tonight we have the opportunity to solve so many of these problems. It is not perfect, as many people have said; but it is on the road toward making Medicare a fiscally responsible, sound and a very beneficial program for seniors. And it is fiscally responsible. I know there are Members who are suggesting that somehow this may not be perfectly fiscally responsible. Let me ask you the question, If we do nothing tonight, is Medicare going bankrupt? Wake up if you want to talk about fiscal responsibility. We are seeing a program go bankrupt before our very eyes. Doing nothing is not an option.

It is fiscally responsible to fix a program that we know is going bankrupt, to fix a program that would have a prescription drug benefit if it were created today, to fix a program that is not paying the bills in rural America and keeping doctors and health care professionals located there to provide quality health care.

Vote for this bill because it is fiscally responsible. We have been waiting long enough. Seniors deserve our answer tonight.

Mr. STARK. Mr. Speaker, I yield myself 15 seconds.

I remind the gentlewoman from Connecticut (Mrs. JOHNSON) that the seniors do not need to be misrepresented. I will not call it lying, but nowhere in that bill does it mention any percentage that they will save on the drug discount. You cannot find it in the bill because it is not in there. So do not tell the seniors something that is not true. It is not respectful.

Mr. Speaker, I yield 45 seconds to the gentleman from Illinois (Mr. EMANUEL).

Mr. EMANUEL. Mr. Speaker, I rise in opposition to this conference report.

The conferees have three opportunities in this bill to lower the price of prescription drugs. They could have opened the markets and allowed prescription drugs to compete and allowed competition and choices to bring prices down. They passed.

They could have allowed Tommy Thompson to lower prices and create a Medicare Sam's Club, a right enjoyed by private companies and businesses everywhere in this country. They took a pass.

They could have included meaningful provisions for generics to get to market to create competition. They took a pass.

This box of Zocor, a cholesterol drug, was purchased in Germany for $41. Here in the United States it cost $90. It went up 10 percent the last year. It is going up another 10 percent this year.

The only immediate benefit that comes out of this bill is the political benefit that its supporters are expecting in 2004. The elderly, on the other hand, will have to wait until 2006. Hopefully, they can survive 2 years while the politicians take their victory lap.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 2½ minutes to the gentleman from Ohio (Mr. PORTMAN), a member of the committee.

Mr. PORTMAN. Mr. Speaker, I thank the gentlewoman for yielding me time, and I thank her for her leadership as chair of the Subcommittee on Health, as well as the gentleman from California (Mr. THOMAS), in getting us to this point.

This is not the first time we have had a Medicare prescription drug bill on the floor, but I think we have the best one. I think it is a great program that has been misdescribed tonight by a number of the speakers, and I just wanted to clarify a few things.

First of all, it is voluntary. People have come to the floor and talked about this is a mandate and people will be forced to get off their existing plans and get on this plan and so on. It is voluntary. If seniors do not choose to take up the prescription drug plans, they do not have to. Those who have looked at it, the Department of Health and Human Services, Special Budget Office, nonpartisan analysts think most seniors will, 90-some percent.

Second, I have heard people talk about the fact that, gee, some people have employer plans already. Let me give some statistics. In 1993, 40-some percent of employers provided coverage

for their retirees. In 2002 it was 27 percent. It is happening. It is bleeding. People are not providing retiree benefits as they used to.

What I love about this bill is it goes the other way. It puts $88 billion into helping people be able to stay with their employer plans.

EBRI, which is a nonpartisan group that is called the Employee Benefit Research Institute, has studied this this week. Their analysis is that 2 percent, 2 percent of seniors will migrate from their existing retiree plans because their employers no longer offer it, into this. If this does not get passed, it will be greater than 2 percent. So those who have said this will result in a problem, I think it is just the opposite.

We are beginning to stop what is happening anyway. I think that is a good part of the plan.

People have talked about how puny the benefit is. Well, I have to tell you, over 35 percent of the American seniors, one figure says 38 percent, let us say over 35 percent of Americans who are seniors, who are low income, meaning they are less than 150 percent of poverty, their income, are going to be able to get prescription drug coverage with no premium, no deductible, no share. All they will do is pay a nominal co-pay, $5, $3.

□ 0045

That is over 35 percent of our seniors, represented by all of us. Some of us in this House have districts where that number will be as high as 60 percent. So a puny benefit, I do not know where that comes from.

For other seniors that additional, let us say, 65 percent of seniors more than half of their drug costs, some say as high as 70 percent, more than half of their drug costs for the average senior, that is no average senior, but average senior costs for drugs will be covered, more than half of the drug cost.

This is why the AARP supports this. This is why the AARP is standing up for their seniors. Some people on my side of the aisle think it is too generous. People on the other side of the aisle ought to look at this plan, at what it is, not the politics, but the substance. It is a good plan, and I hope people on both sides of the aisle tonight will support it.

Mr. STARK. Mr. Speaker, I yield myself such time as I may consume.

There they go again. I do not think they understand their own bill. Between 135 percent and 150 percent of poverty, there is a 15 percent copay, and regardless of what my colleague says, there are many, many poor seniors are going to pay more under this bill than they do now, but it is sad that the people who wrote the bill do not know what they are talking about.

Mr. Speaker, I yield 45 seconds to the gentleman from Arkansas (Mr. ROSS), the distinguished member of our caucus who is in the pharmaceutical business.

Mr. ROSS. Mr. Speaker, as the owner of a small town family pharmacy and a wife who is a pharmacist, I see seniors who cannot afford their medicine. So I came here to help our seniors with the high cost of prescription drugs. This bill does not do that.

This morning we must decide whether to decide with the big drug manufacturers or side with America's seniors. In 2001, the gentlewoman from Missouri (Mrs. EMERSON) and I sponsored a bipartisan bill that would truly modernize Medicare to include medicine for our seniors, and the Republican leadership refused to give us a hearing or a vote on that issue, and now 2 years later the Republicans offer us a bill that does what? That says the Federal Government shall be prohibited from negotiating with the big drug manufacturers to bring down the high cost of medicine and provide seniors $1,080 worth of help on a $5,100 drug bill.

Have my colleagues ever heard of Medicare fraud? This is Medicare fraud.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I would like to inquire as to the time remaining.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The gentlewoman from Connecticut (Mrs. JOHNSON) has 4½ minutes remaining. The gentleman from California (Mr. STARK) has 6 minutes remaining.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield 45 seconds to the distinguished gentleman from New York (Mr. CROWLEY).

Mr. CROWLEY. Mr. Speaker, I thank the gentleman for the time.

Mr. Speaker, let me see if I got this straight. In 1965, with a Democratic President, a Democratic House and a Democratic Senate the Medicare program was founded. Am I to believe today with a Republican President, a Republican House and a Republican Senate that somehow you all are going to save a program you did not support in the first place? We have an expression in New York and all around this country, give me a break. You are not about saving Medicare or Social Security. You are about dismantling it, and in 40 years, when I look at my children and they ask me where were you when they tried to dismantle Medicare, I will look them in the eye and I will be able to tell them that I voted against the dismantling of this great program.

I will vote against this, and I will vote against any chance that you may bring up to this floor to dismantle Social Security as well.

Mr. Speaker, I rise to support Medicare and oppose the incredibly offensive bill before us tonight. Medicare was created nearly 40 years ago to protect the health of seniors. And today, sadly, Members of this Congress are seeking to destroy the very program that has been so helpful to so many. In its place, Republicans claim they are inserting a new, better, and expanded program. But the reality is that this is not a bill about providing drug coverage under Medicare.

This is a bill about giving billions of dollars to insurance companies and drug companies. This is a bill about killing the Medicare program that seniors have depended on for generations.

Seniors in my district want and deserve prescription drug coverage. This could not be more true, as far too many of them are struggling without it. But I have yet to hear from a senior in my district who is asking for a $17 billion slush fund to be created for private insurance companies. Not one senior has talked to me about making sure that big drug companies are able to protect their massive profits. Not one of them has asked me for a prescription drug benefit where they have to pay $4,000 out of their first $5,000 in prescription drug costs. Not one of them has asked for a bill that would force seniors out of Medicare and push them into HMOs. And yet that is exactly what Republicans are giving them with this bill.

This bill seeks to help drug companies and insurance companies at the expense of seniors and American taxpayers of all ages. This bill does essentially nothing to bring down drug prices. It does not appropriately provide for reimportation despite this body overwhelmingly voicing its support of reimportation. Moreover, it expressly prohibits the government from trying to negotiate lower drug prices like other government entities have been able to do with much success.

Incredibly, Republicans are electing to protect drug company profits over the cost to our government. I have to wonder whose side the Republicans are really on?

Tonight Republicans are asking us to vote for a bill they claim will help seniors with their drug costs. Only the catch is that, in the process, we have to destroy Medicare, give billions to insurance companies and drug companies, and push seniors into HMOs. This bill is a slap in the face of the ideals that Medicare has stood for. This bill is a slap in the face of seniors who have waited far too long for a real prescription drug benefit.

But don't take my word for it. Listen to what the lead author, Republican Congressman BILL THOMAS of California said about this bill—a bill he wrote—and I quote him, "To those who say that the bill would end Medicare as we know it, our Republican answer is: We certainly hope so." Protect Medicare—oppose this sham bill.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. HOUGHTON).

Mr. HOUGHTON. Mr. Speaker, in any situation where there is an argument at stake, there are two things that are important. First of all, it is to get the facts. Secondly, to face the fact, and I do not mean to oversimplify this, and a lot of people know much more of the details, but it seems to me two things come to the floor. One, Medicare needs an update, seniors need help with their drug costs, and I think this bill does both those things.

I have since learned that virtually any piece of legislation that comes before this body can be argued and attacked and counterattacked to death, but who are the customers? Who are we trying to help and are they being helped? Are the seniors being helped? Yes, probably not enough, but we do not know yet. Are the hospitals being helped? Yes, but they certainly could be helped more, but this is a never ending process. Are the doctors being helped who are opting out of the Medicare program? Yes. Are the ambulance drivers being helped? Yes, and it is about time.

Will the companies be helped who are thinking about whether to drop programs for their retirees? Absolutely. Will those purchasing drugs be helped? According to the arithmetic I read, there is absolutely no question about this.

I would rate this bill a B+, and the reason I do this is I do not think there is any bill that can come before this body that can get an A, not with the attack and counterattack process we use.

One of the great poets of this country, Ralph Waldo Emerson, used to say history is no more than a biography of a few stout individuals. It is the few stout individuals, Mr. Speaker, that we need tonight.

Mr. STARK. Mr. Speaker, I yield 45 seconds to the gentleman from Texas (Mr. REYES), who agrees with the Albany Times Union that what older Americans can least afford is for Congress to rush into a sweeping overhaul of a successful health care program without doing its research. This is not only an imperfect bill. It may also be a disastrous one.

Mr. LAMPSON. Mr. Speaker, the previous speaker said that we do not know, and we do not know what all is in this bill, but during this week I have heard from representatives of thousands of senior citizens in southeast Texas, like my 93-year-old mother, that they overwhelmingly oppose this proposal, and they give three reasons why.

They believe the privatization provisions will cause Medicare to wither. They are astounded that the bill prohibits our government from bargaining for better drug prices. They are concerned about the uncertainty of being put back into HMOs that dumped them recently.

Do our seniors a favor, slow this train down. Put some dignity back in the process and open it up. The benefits will not even go into effect for 2 years. What is it going to hurt to wait two more weeks and do what the seniors requested at that White House Conference on Aging in 1995 at the beginning of this debate. Save Medicare and let us live our lives in dignity and independence.

In 1995 I was sent as a delegate to the White House Conference on Aging. 4000 seniors gathered for this non-partisan meeting. They set goals at that meeting and asked our government to do 3 things: protect medicare; protect social security; and allow seniors to live their last years in dignity and independence.

We have been debating medicare and a medicare drug component for years now. I have promised to work to create a program that would help seniors achieve the goals I just listed.

During this week I have heard from the representatives of thousands of seniors in Southeast Texas, like my 93 year old mother, that they overwhelmingly oppose this proposal . . . and the reasons they give are 3:

They believe privatization provisions will cause medicare to wither and die;

They are astounded that the bill prohibits our government from bargaining for better drug prices;

They are concerned about the uncertainty of having to go back into HMO's that dumped them.

My colleagues, do our seniors a favor, slow this train down. Put some dignity back into this process and open it up. The benefits won't even go into effect for 2 years. Let's take a couple more weeks and do what the seniors of this country asked at the beginning of this debate 8 years ago . . . save medicare and let them live their last years with dignity and independence.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I ask what time remains on each side.

The SPEAKER pro tempore. The gentlewoman from Connecticut (Mrs. JOHNSON) has 2¾ minutes remaining. The gentleman from California (Mr. STARK) has 4 minutes and 15 seconds remaining.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield 45 seconds to the distinguished gentlewoman from Oregon (Ms. HOOLEY).

Ms. HOOLEY of Oregon. Mr. Speaker, despite the hard work and good intentions of many Members of Congress on both sides of the aisle, we have lost the forest for the trees, and so I rise today in opposition to conference report on H.R. 1.

We have lost sight of what seniors struggle with most, drug costs and the cost of coverage, and believe me, seniors have noticed that we have lost sight of them.

In the beginning and in the end, for me this issue has always been about the high cost of drugs and the need to affordably expand coverage. Regrettably, this bill prohibits ways to lower costs of drugs for American seniors, and for many, the coverage provided in the bill comes at a high price they simply cannot pay.

I urge my colleagues to reject this bill. Please go back to the negotiating table and give seniors what they really need, affordable drugs and affordable drug coverage.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself 10 seconds.

The gentlewoman from Oregon should know that with this prescription drug insurance plan Medicare recipients in Oregon who are covered will go from 60 percent up to 96.6 percent. This bill brings a benefit to Oregon.

Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield 45 seconds to the gentleman from New York (Mr. HINCHEY), and pending that, I would like to remind the gentlewoman from Connecticut that 41,000 people in Connecticut are likely to lose employer-sponsored coverage under this bill.

Mr. HINCHEY. Mr. Speaker, very few people are surprised that as soon as the Republican Party has control of both Houses of the Congress and the White House they move to destroy Medicare, and that is what this bill essentially will do. It will drive Medicare into the ground.

The disguise that they seek to use in order to accomplish that is a prescription drug program, but just today the National Center on Policy Analysis told us that only $1 out of every $16 in this bill will be spent to provide drugs for senior citizens who would not otherwise get them. Most of the rest of the money goes to drug companies and to insurance companies.

But the thing that surprises me about this bill is the Republican party is engaging in price fixing. They fixed the price of drugs so that they cannot go down, they can only go up. They have made sure that we cannot import drugs from Canada or other places at a cheaper price, and they guarantee that every time the prices change it will go up. Price fixing, increasing the cost of drugs.

Mr. STARK. Mr. Speaker, may I inquire as to the amount of time remaining?

The SPEAKER pro tempore. The gentlewoman from Connecticut (Mrs. JOHNSON) and the gentleman from California (Mr. STARK) have 2½ minutes remaining.

Mr. STARK. Mr. Speaker, I yield 45 seconds of that precious time to the gentleman from Texas (Mr. REYES).

Mr. REYES. Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, I have a long been a strong advocate for an affordable, comprehensive Medicare prescription drug benefit, but I am opposed to this bill. I am opposed because the bill before us tonight would harm, rather than help, more than 77,000 Medicare beneficiaries in my district by breaking this program's promise of guaranteed quality health care for our seniors.

In my district, where approximately one in five seniors live below the poverty line, Medicare and Social Security are their only safety net in retirement. To jeopardize this safety net would be unconscionable.

Mr. Speaker, I urge my colleagues to oppose this conference report so Congress can instead offer America's seniors the kind of Medicare prescription drug benefit that they need and more than anything that they deserve.

Mr. STARK. Mr. Speaker, I am delighted to yield 45 seconds to the gentleman from Arkansas (Mr. BERRY), one of the gentlemen who was a conferee but does not know.

Mr. BERRY. Mr. Speaker, I thank the gentleman from California, and I appreciate his leadership on this matter for many, many years.

In the document that founded this great Nation, it says all men are created equal. Under this bill, the drug companies are a lot more equal than the seniors I can tell my colleagues. Why would we for any reason prohibit the negotiation of lower prices by Medicare? Why would we do that?

Tonight, we make a choice. We either serve the drug companies or serve our seniors. I find this a very easy choice to make. I choose to serve our seniors. I will not be a part of the continued effort to allow the prescription drug manufacturers of this country to rob the senior citizens of America.

Mr. STARK. Mr. Speaker, I yield the balance of our time to the gentleman from New York (Mr. RANGEL), the distinguished ranking member of the Committee on Ways and Means.

Mr. RANGEL. Mr. Speaker, I thank the gentleman from California (Mr. STARK) for the fine work he has done over the years on this subject, and as we close one-half of this debate on this historic subject, I would just like to remind those who are recording this event that when you excluded the Democrats from participating in the conference, you excluded 20 Members who are members of the Hispanic Caucus, 39 Members that are members of the Black Caucus.

□ 0100

You excluded the Congressional Asian Pacific Caucus. And you had the arrogance to believe that you had to be Republican to be concerned about our senior citizens. But the three that were selected by the Speaker, the Republican Speaker, was the gentleman from Arkansas (Mr. BERRY), who knows the problems of our seniors out there. It was me, who served for decades on the Committee on Ways and Means and has worked hard to participate to make this a better bill and a better Congress. But it also was the gentleman from Michigan (Mr. DINGELL), former chairman of the Committee on Energy and Commerce and a person who fashioned a program for the aged who are poor. He too was excluded.

So it is a great honor for me to invite up to manage the other half of the time here the gentleman from Michigan (Mr. DINGELL). He is the dean of this Congress, and we should feel proud that we are able to serve with him. His father is the author of the Medicare bill, and we should feel ashamed that he was excluded from the conference.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself the balance of my time, and I rise in strong support of this legislation. And, indeed, I believe its founders would be proud that tonight we bring a voluntary, generous drug benefit to all seniors under Medicare.

This is a milestone. That is why AARP describes it as a historic breakthrough in the Nation's commitment to strengthen and expand health security for its citizens. Something that has not been talked about much here tonight is the new support for seniors with chronic illness. We forget that one-third of our seniors have five or more chronic illnesses and use 80 percent of the money under Medicare, and yet Medicare has no way of supporting them to prevent their chronic illness from progressing.

In this bill, we couple the drug benefit and the disease management program to help our seniors prevent their chronic illness from progressing and thereby keep them healthy and keep Medicare costs under control. This is particularly important for minorities, for they tend not to use the medical system early, and they tend not to be diagnosed early. In this bill, we provide an entry-level physical so we can see what early signs of chronic illness they have, and we can help them prevent their chronic illness from progressing.

This will be an extraordinary boon to the well-being of our senior citizens. This is a historic advancement in both bringing prescription drugs to Medicare and improving the quality of health care Medicare is able to deliver, and in assuring that Medicare will be able to deliver 21st-century, cutting-edge health care.

And this is a historic bill for the rural communities of our Nation. Without it, they will not be able to attract the next generation of physicians as the current generation retires. They will lose small hospitals. They will lose small home health agencies. In fact, without this, our inner-city hospitals will not be able to continue to provide clinics for the poor, clinics for those with mental health problems. This is an important payer package because it restores fairness to our payment system.

And lastly, it cuts prices dramatically. It cuts prices dramatically by bringing the bargaining power of the seniors to the table to reduce prices and piercing right through that price support system that keeps State prices high. I am proud to support this legislation, and I urge my colleagues to do likewise, for half of America's women will experience free health care under this bill.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Pursuant to a previous order of the House, the gentleman from Louisiana (Mr. TAUZIN) will control 30 minutes and the gentleman from Michigan (Mr. DINGELL) will control 30 minutes.

The Chair recognizes the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I hope you will all bear with me for a second as I tell a short story. I recently accompanied my son, Tom, who is 25 years old, to see the movie ''Matrix,'' the third in the evolution of the ''Matrix'' movies, a rather complex series of movies. Young people follow them, I think, better than my generation; but I try to follow them with him.

When we came out of the movie, I said, Son, what did you take from this? What did this mean to you? And he thought a long while and in the car with me he said, what I take from this movie, Dad, is that freedom is meaningless without choice. And I thought about that and I thought, that is pretty profound for a 25-year-old. What he was saying, basically, from this movie, is that if someone else is making all the choices for you, if you are without choice, you are not really free. Freedom, by definition, is choice. It is your capacity to choose for yourself right or wrong what you do with your life.

And then it occurred to me how meaningful that little profound conversation we had was and how it relates to this issue tonight. Because we are talking about a generation of Americans who Tom Brokaw called the Greatest Generation of Americans, who fought for this entire world to be free, for we in this country to have freedom of choice in our lives. And every day that we live in freedom, we have that generation to thank for it. And the ironic thing about it, when it comes to their health care, is that so far we have not given them choice. We have basically said if you want health care as you get older, after you fought to give us freedom, we will give you one plan. We will give you the choice of government Medicare. And if it works for you, great; if it does not work well for you, sorry, that is your choice.

Every despot, every tyrant, every monarch and feudal lord in medieval time took the attitude that the peasants, the servants were not smart enough to make choices for themselves; that they had to make all the decisions for them. That is the nature of people who think government always knows best and always knows the right answer and people are not wise enough to make good choices for themselves. The essence of this debate tonight is whether we are freedom-loving enough in this body, whether we understand and appreciate the freedoms that they fought for and gave to us, that we can, in the context of health care, give our seniors some real choice about how

and where they take their health care and their coverage.

Now, it is about adding a significant new benefit to Medicare. It is that. But it is also about creating other choices for seniors. And I brought a picture of my mother with me tonight. I thought about her this evening. It is a small picture, but I wish you could all see it. She is a beautiful lady. She is 85 years old. She chose to remain in Medicare when she had a choice of a private plan in our hometown. She probably is going to choose to remain in Medicare and take her prescription drug benefit from Medicare when this program is completed and we pass this bill and it is signed into law. But I want her to have a choice to choose between that plan and any other plan that might be available, the same way we in this government, the workers and the Members of Congress, have choices to choose different plans for our medical needs.

I want Mom to have the same choice. Her generation fought for me to have choices and to make choices, right or wrong. And sometimes it hurt her deeply when I made bad choices, but she always knew I had the right to make them. And people died to give me that right. I think we owe that generation choice. And that is one of the things we do tonight, we give them choice how they take this new benefit. And if they want to choose, like my mother, to stay with Medicare, we fought for the right to make sure it is still in the Medicare bill, and she will have that right.

The other thing we did was to make sure if she chooses to have Medicare, that, indeed, it is still going to be around for her for as long as, God willing, she lives. She is a three-time cancer patient. A marvelous woman. She won eight gold medals at the Senior Olympics again this year. She took top place in the shot put. You do not mess with Mamma Tauzin. She is quite a gal. And she will probably choose to take her prescription drugs out of Medicare in this program. But if she ever wants to take it out of one of the PPOs or the new programs we develop out of this bill, I want her to have that choice. She deserves it. She ought to get it.

And I think that is why AARP has endorsed our bill, because they know we have gotten a great generous coverage for the low-income American seniors who want to stay in Medicare or who want to choose something else. And we create new plans for seniors and nonseniors to begin saving in their own health accounts; tax free in, tax free out, to build their own long-term care the way they want to design it. And I guess some people do not like that. I guess they think government ought to design it all and say, You got one choice, Mamma Tauzin, and that is it.

But I think, I think the benevolent government of the United States of America, respecting the freedom that so many fought and died for to give us choice and freedom, this government now, that we serve as Members of Congress, with such great appreciation of the people who sent us here, we ought to say here in Washington that we return the gift of freedom; that we give seniors more choices, and we give them a brand-new drug coverage program so they do not have to take chances on the Internet or go anywhere else to get drugs they cannot afford, that they can afford them under an insurance coverage here in America, and they can get it under a program they choose to live under.

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield myself 3 minutes.

Mr. DINGELL. Mr. Speaker, almost 40 years ago, this body enacted Medicare. It was a great triumph for the senior citizens. Perhaps the most beloved program, with the exception of Social Security, was Medicare. It is also one of the most financially responsible and successful programs in the history of this country. Tonight, the fight is not about whether or not we are going to give prescription drugs to our seniors; it is about saving Medicare from my Republican colleagues, who now, finally, have figured a way to destroy it.

I want my colleagues to look at the kind of competition that the Republican Party is forcing upon the senior citizens of the United States: 120 or 125 percent of the costs of competing with Medicare is going to be given by the Federal taxpayers and by Medicare to, guess who, the HMOs. The Republicans have been trying to destroy this part for years. They are very close tonight.

A flawed process has brought forth a bad bill, which is laid before the House of Representatives in the wee hours of the morning so that the people will not know what is going on. What is at stake here is the existence of the most successful program to provide health care for our senior citizens.

Let me just tell my colleagues, the competition is unfair, 120 percent and more they give. They put forward a sham discount card, which will probably be given mostly by the retailers, not by the prescription pharmaceutical manufacturers. The senior citizens will not get much out of that.

Now, Medicare is going to be rewarding now the Republicans' friends in the HMOs and the pharmaceutical houses, huge amounts of money to each. No competition whatsoever will take place with regard to prescription pharmaceutical costs. Why? Because the Republican Members absolutely forbid that.

No wonder they want to do this at 2 a.m. in the morning. No wonder they want to foreclose the public from knowing. No wonder they would not let the people on this side of the aisle, they would not allow the Democrats into the meeting. Because it was the only way they could bring forward this slippery and dishonest program which is directed at destroying Medicare as we know it. And take the word not of myself on this, but of Mr. Newt Gingrich, of Mr. Armey, and the chairman of the Committee on Ways and Means on the Republican side. They want to destroy Medicare as we know it. That is what is at stake.

We can anticipate that they will allow Medicare to slowly wither away. And the senior citizens who are dependent upon it will no longer have the assurance that a program that they know they can choose their doctor and their hospital will be available to them. They will have to belong to the HMOs or pay more for it, and all in exchange for a proposal which has a huge donut hole which denies senior citizens care after they pay $2,000.

□ 0115

It does not add it at that point, it takes it away. This is a sham. It is a bad bill. It is one which takes from the senior citizens. It is one which threatens Medicare. It is an unfair, dangerous piece of legislation conceived in the darkness of night and slipped through over the heads of the senior citizens.

Mr. TAUZIN. Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. BILIRAKIS), the chairman of the Subcommittee on Health of the Committee on Energy and Commerce.

Mr. BILIRAKIS. Mr. Speaker, I would say I wish I had $100 for every hour that I spent in the wee hours of the morning during the time that the gentleman's party was in charge of this House.

Mr. Speaker, we have before us today an opportunity to finally provide our constituents with a meaningful prescription drug benefit that our Nation can afford. To finally do it; to finally do it, not to merely talk about it and to demagogue it. For four decades the other party controlled, and they did nothing. It seems every time we, since gaining the majority, attempt to meet a need, the Democrats finally awaken with nay comments. They do nothing. We attempt to do something, and they call our efforts a charade. We have not taken a pass, as one gentleman from the other side of the aisle said earlier. I would suggest the gentleman's party, which controlled for 40 years, took the pass.

While the bill before us certainly is not perfect, and we have admitted that, it targets the $400 billion available under our budget resolution towards areas where it can do the most good. Our bill provides a great deal of assistance to our low-income seniors. In fact, seniors who earn under $13,470 as a single or $18,180 as a couple will only be responsible for nominal copayments

and will not experience a coverage gap. This is very generous coverage for the population of seniors who need it the most.

The conference report will also ensure that seniors will have the peace of mind of knowing that they will only be responsible for a very small amount of cost sharing once their out-of-pocket drug costs exceed $3,600 annually. It is a critical provision, and one I strongly support. This bill helps the poorest and sickest, and who can argue against that.

The conference report makes many other improvements to the Medicare program; in fact, too many to list tonight. However, I want to point out that the bill contains two provisions that I have long advocated for: Improved reimbursements for our Nation's physicians, and Medicare coverage for a physical exam upon entering the program. I call that the Dr. William Hale, ''Welcome to Medicare Program.'' Dr. Hale of Dunedin, Florida, gave me the idea some time ago. I am confident that this new benefit will ultimately save the program billions of dollars in the long term.

I would like to close by quickly dispelling a number of myths that we have heard on the House floor tonight, and over the past few months. The conference report does not privatize Medicare. It improves it, namely by adding a voluntary prescription drug benefit available to everyone, including those who do not wish to leave traditional fee-for-service Medicare. We are not pushing seniors into HMOs; I will not be a part of that. Or creating a voucher system. We are offering seniors voluntary choices other than traditional Medicare. And, finally, the conference report does not signal the end of Medicare. Instead, it marks the beginning of a new, better Medicare that will be available for generations to come.

Mr. Speaker, I would like to close by thanking all of the staff members who have worked to help make this bill possible.

Mr. DINGELL. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Speaker, I thank the gentleman from Michigan.

Earlier this year President Bush stood in this well and pronounced solemnly, ''Medicare is the binding commitment of a caring society.'' Today just a few short months later, those words sound so empty.

Our Medicare offers the same reliable health coverage to retired and disabled Americans regardless of whether they are rural or urban, whether they are rich or poor, whether they are healthy or sick. Our Medicare is equitable, dependable, it is flexible, and cost efficient; but their bill takes $20 billion out of our constituents' pockets and showers those dollars on HMOs. It rigs the game so that the coverage seniors have today, the equitable, reliable, flexible coverage they have today, is sure to wither on the vine. That is the way they have set it up. As one of the authors of this bill, the gentleman from California (Mr. THOMAS) said, ''To those who say this bill would end Medicare as we know it, our answer is we certainly hope so.''

A binding commitment, Mr. President? Their bill leaves seniors with such high drug costs they still will not be able to afford their prescriptions. Their bill places retiree drug coverage of $12 million seniors at risk. Their bill forces seniors to either pay significantly more if they want to keep their doctor and their hospital, or join an HMO that may or may not cover needed drugs, that may or may not raise premiums beyond the $35 guesstimate, that may or may not skip town if projected profits are not met. A caring society, Mr. President?

This bill is a big win for drug companies who stand to earn $139 billion in additional profits. No surprise there, the drug companies helped write the bill because the drug companies have given $50–60 billion to President Bush and to the Republican majority. It is a big win for insurance companies who are the beneficiaries of a $20 billion slush fund, no surprise there because the insurance industries and the HMOs gave tens of millions of dollars to the President and Republican leadership.

This is a tragic loss for America's seniors. Medicare should be the binding commitment of a caring society.

Mr. TAUZIN. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. FERGUSON), a valuable, distinguished member of the Committee on Energy and Commerce.

Mr. FERGUSON. Mr. Speaker, in addition to expanding Medicare to include prescription drug coverage for 40 million seniors, this important conference report also represents significant benefits for my home State of New Jersey. For years, my State has offered one of the Nation's most generous prescription drug benefits. It is called PAAD. Under this historic agreement to strengthen Medicare, New Jersey wins big time. In addition to ensuring a seamless integration of the new Medicare drug benefit and PAAD, this conference report also provides New Jersey with billions of dollars to strengthen PAAD and expand the number of seniors who benefit.

By using the drug discount card before the PAAD coverage begins, the State government will save $73 million. Because PAAD's enrollees will receive their drug benefit from Medicare, the State will save $2.8 billion. New Jersey will receive a 28 percent tax free subsidy to offset the drug costs it provides for retired State employees, saving the State $222 million. PAAD will no longer be forced to pay drug costs for seniors who qualify for both Medicare and Medicaid, saving the State $872 million.

How else does New Jersey benefit? In addition to $80 million for increasing the Medicaid reimbursement rate, an additional $756 million will be forwarded to New Jersey's hospitals. That is nearly $5 billion in Federal aid for New Jersey.

This bill has language to require coordination between Medicare and PAAD, no disruption for any senior currently enrolled in PAAD, and billions and billions for our State government to strengthen PAAD, offset low-income seniors' drug costs and expand the number of seniors who are served under PAAD.

My colleagues from New Jersey on the other side of the aisle can try to hide behind their partisanship, but they cannot ignore the fact that this conference report represents one of the biggest and most important victories New Jersey has ever, ever received in Congress.

Mr. Speaker, shame on them.

Mr. DINGELL. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Speaker, today we should be voting on legislation that makes a good prescription drug benefit a part of the Medicare program. We should give people real help without gaps in coverage requiring seniors and the disabled to pay thousands of dollars for drugs out of their own pockets.

Instead, what we have got is a bill that makes seniors buy private insurance to get drug coverage or go into HMOs where they might not be able to see their own doctor, a bill that lets insurance companies interested in their own profits decide what premium to charge and what drugs to put on their formulary, and a bill that will lead people holding the bag for most of their drug costs in far too many cases.

This is not what seniors and the disabled want. This bill uses the cover of providing drug coverage, inadequate as it is, to make very dangerous changes in Medicare. This bill is based on the point of view that Medicare was a mistake, that we should have left it to private insurers to provide health care for our seniors. Well, if we had done that, we would have a lot more seniors today who would be uninsured and struggling with their medical bills.

I do not want to turn the clock back on Medicare, I want to make it better. Much as I want prescription drug coverage for seniors, this inadequate drug benefit is not worth destroying Medicare. I do not want a Medicare where seniors and disabled people have to spend a lot more just to be able to stay in regular Medicare. I do not want a Medicare where seniors in Los Angeles have to pay premiums that are twice as high as premiums in some other area of the country, and depend on private insurance companies for what benefits they get.

So we might wonder, who benefits from this bill? Well, not the almost 3 million retirees who will end up losing the drug coverage they now have, not the 6 million of our poorest seniors who end up being worst off, and not the 40 million Medicare beneficiaries who cannot use their bargaining power to get lower prices from the drug companies, and not the people who have been able to get their drugs cheaper by going to Canada. It is the drug companies and the insurance companies who benefit from this bill. Let us improve Medicare, not ruin it.

Mr. TAUZIN. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. GINGREY), one of the three Members of the House who is an OB–GYN physician, and who happens to know something about health care.

Mr. GINGREY. Mr. Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN) for yielding me this time.

Mr. Speaker, 35 million senior Members of AARP, 330,000 physician members of the American Medical Association who are providing care to hundreds of millions of Americans and 40 million Medicare beneficiaries, the American Hospital Association, the Rural Hospital Association, the United States Chamber of Commerce; Mr. Speaker, with so many for a prescription drug and Medicare modernization for our beloved seniors, who could be against it, and why?

The answer to that first question is pretty obvious, obstructionist Democrats. And why? Because they are more interested in attempting to embarrass President Bush and the Republican leadership of this House than they are in doing the right thing, the compassionate thing.

To suggest that this bill is nothing but a windfall for the pharmaceutical industry is like suggesting that Medicare Part A is nothing but a windfall for the hospital. Who is going to provide the prescription drugs, the chocolate chip cookie company? Give me a break.

But I say to my colleagues on the other side, stop the alliteration, stop the bizarre logic, the Mediscare rhetoric. Vote with us, vote for our seniors and make this truly a bipartisan victory.

Mr. DINGELL. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. PALLONE).

□ 0130

Mr. PALLONE. Mr. Speaker, I have listened to the rhetoric of the Republicans this evening, and it is cynical. They are trying to fool the seniors. I listened to the gentleman from Louisiana say that seniors are going to have a choice. They are not going to have any choice. They are going to lose their choice of doctors because they are going to be forced into an HMO. I listened to the gentleman from Florida say that seniors are going to get a meaningful benefit. Again they are fooling the seniors. There is no meaningful benefit here. They are going to have to shell out more out of pocket than they are going to get back in terms of a drug benefit. I listened to the gentlewoman from Connecticut earlier saying that she is going to give the seniors a discount. What a joke that is. There is no cost containment in this bill. The bill says that the Secretary cannot in any way negotiate price reductions. There is no reimportation in this bill. There is no way you are even going to be able to get discount drugs from other countries. There is no discount. There is no savings. They are just trying to fool the seniors.

I heard another speaker say that Medicare is going broke. The only reason it is going broke is because you have taken money away from their trust fund through your tax policies. You are trying to fool the seniors again. And then you are saying that the seniors are going to be able to have traditional Medicare, they can stay in their traditional Medicare. Again you are trying to fool them because they are going to be forced out of traditional Medicare. You are going to limit them to a voucher, a certain amount of money. You have something in the bill that would cap the amount of money that comes from the Federal Government. They are not going to be able to stay in traditional Medicare. They are going to be forced out of it. Then finally you say, oh, they are going to get the drug benefit immediately. You talk about the drug card or whatever it is, the discount card. Again you are fooling the seniors. This bill does not even take effect, there is no drug benefit until the year 2006.

I want to tell you, the last thing of all was when I listened to my colleague tonight here from New Jersey (Mr. FERGUSON) say that New Jersey is going to benefit from this. There are 1.2 million Medicare beneficiaries in New Jersey; 91,000 of them will lose their employer-based prescription drug benefits; 186,000 of them in South Jersey would be subject to premium support and will lose their traditional Medicare. The list goes on. New Jersey is no different than any other State. You are not going to be able to fool the seniors. You should not try to. You ought to be ashamed of yourselves.

Mr. TAUZIN. Mr. Speaker, I yield myself 30 seconds to point out that the statement that this bill does not go into effect until 2006 is erroneous. The fact is that the drug discount card is effective immediately when this bill goes into effect early next year. The fact is that $600 per senior for drug costs is allocated immediately, next year. Not only that, but the $1,200 per couple that is allocated for drug costs for seniors is rolled over. If the senior does not use it the first year, they can use it the second year. It becomes a $2,400 benefit for seniors for that second year while the full program is enacted by the year 2006.

Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. UPTON), the distinguished chairman of the Subcommittee on Telecommunications and the Internet of the Committee on Energy and Commerce.

Mr. UPTON. Mr. Speaker, I would like to focus on one misconception about this plan that we are debating today and set the record straight. I have heard from a lot of retirees who have been led to believe that enacting the conference agreement will cause them to lose their employer-provided prescription drug and health care coverage. That is not true.

First, it is important to note that under current law, employers who provide solid retiree health care benefits receive no assistance at all from the Federal Government. And even in the absence of a Medicare prescription drug plan, many of these same employers under increasing pressure from rising prescription drug and other related health care costs are already cutting back or entirely dropping their coverage that they provide to their retirees today. Under this plan if we pass it today, the Federal Government will partner with employers who maintain or improve their current health care retiree health plans. They will receive a subsidy of up to 28 percent of their retiree drug costs between $250 and $5,000 and the subsidy will not be subject to taxation. So the reality is if we do not enact this plan, there will be no incentives for those employers to maintain or improve their current retiree coverage. Thousands of retirees will wind up with no help with their prescription drug costs, and we most likely will continue to see those retiree benefits continue to be slashed. With this plan, they will have an incentive to keep it.

I also remember back to the days when we passed a catastrophic health care plan, back in the early nineties. It was mandatory. Guess what? We repealed it because it was mandatory. This is voluntary. You can participate if you want; and if you do not want, you do not have to participate. I also remember a woman that came up to me at my son's little league game. Her mom had just had a stroke, $600 in additional costs that she was going to face every month. She said, Mr. UPTON, will this plan help my mom? Yes, it will help her a lot. It will in fact save her family thousands of dollars, provide her with some quality of life that her family expects and the plan will help.

I urge my colleagues to vote for this plan this morning.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentlewoman from California (Ms. ESHOO).

Ms. ESHOO. Mr. Speaker, we have all not only been taught but tried to abide by something, part of the Ten Commandments, honor thy father and thy mother. I think more than anything else this evening, that is really what we are talking about, honoring our fathers and our mothers, our grandfathers and our grandmothers, the seniors, the elders of our Nation that are part of our Nation's family. It is not just my mother and father, and it is not just yours. It is collectively those that have built the country and handed it over to a new generation.

I do not believe that the process in this House for this bill is anything for the Members of Congress to be proud of, because if you do not honor those that represent the mothers and fathers of this country, it is a singular disgrace. So I start with that process. And I do not believe my friends, whom I have worked with day in and day out on the other side, tonight in their heart of hearts can be proud of that. It is dark. It is bad. It is wrong. And it has set a very bad tone for this bill.

We love Medicare on this side. You cannot drive a wedge between us and Medicare. If this were prescription drugs only, it would sail through the House. But that is the loss leader on this. This is about rewriting the contract between our mothers and fathers and our Nation. We object. We do not think it should be parceled out. My grandparents never said God bless the insurance companies. They said God bless America. Vote against this bill. It is wrong and it is bad. It dishonors our mothers and fathers and our grandparents.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Oregon (Mr. WALDEN), a member of our committee.

Mr. WALDEN of Oregon. Mr. Speaker, my parents are both gone now. They died before this Congress could act to provide prescription drug coverage for them under Medicare. So they both paid for it out of their pocket. Let us talk about what this bill would do for those who survive. The agreement would provide 514,456 Oregonian seniors with access to a Medicare prescription drug benefit for the first time in the history of this program. Beginning in 2006, there would be 129,000 Medicare individuals in Oregon who would have access to drug coverage they would not otherwise have, and it will improve it for many more. They will get a $600 card if you are in the lower-income level of $12,000 a year. Couples who make $16,000 a year who lack prescription drug coverage today would be given $600 in annual assistance to help them afford their medicines along with the discount card of 15 to 25 percent. That is a total of $92 million for Oregon seniors that would help 76,000 of them be able to pay for their drugs in 2004 and 2005.

There are 151,000 seniors in Oregon who have limited savings and low incomes who will qualify for even more generous coverage. They will pay no premium, no deductible for their prescription drug coverage, and they will just be responsible for a minimal copayment. They will get the coverage. If you are low income under this plan, they get the coverage. Perhaps that is part of why the Portland Oregonian has endorsed this program. More importantly, my State like many has faced some fairly difficult fiscal challenges. I was there when we implemented the Oregon health plan and helped put it into place. Today because of the fiscal challenges, they are having to cut people off of Medicaid in Oregon. This plan over 8 years will return $279 million by having Medicare pick up the cost of those senior low-income people.

This is a balanced plan that will help our seniors get the prescription drug coverage they need. We ought to enact it.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentleman from New York (Mr. ENGEL).

Mr. ENGEL. Mr. Speaker, for many years I have sponsored and worked for a real prescription drug bill for seniors and this bill breaks my heart. This bill is not a bipartisan bill. It is a Republican fraud. The Republican leadership would like to privatize Medicare and replace it with private insurance vouchers and HMO health care. That is what this bill does. It is the beginning of the destruction of Medicare and the destruction and privatization of Social Security is next.

You mark my words. We should be giving seniors a clean prescription drug bill under the Medicare program, but we do not have money for that because the Republican tax cuts for the rich and the stealing from the Social Security trust fund make it impossible to have any money left to pay for a real prescription drug program. The hodgepodge of benefits will do nothing but confuse seniors. After spending $2,200 in drug bills, seniors will have to pay the next $1,400 out of pocket without any help whatsoever while they still pay their monthly premiums. What kind of assistance is that? Seniors want a real drug bill and they want it to begin now, not in 2006. They want help in bringing drug prices down. This bill does none of that.

When I first came to Congress 15 years ago, I asked my mother what was the best thing we could do to help senior citizens and she said, give us a prescription drug program. Tonight, my colleagues, my mother gave me some more good advice. She said, vote against this sham bill. And that is exactly what I am going to do. Shame on this Congress for betraying our seniors and ramming this bill through in the middle of the night.

Mr. Speaker, I rise today in strong opposition to the Medicare Prescription Drug and Modernization Act. When I came to Congress 15 years ago, one of my highest priorities was to strengthen Medicare, provide drug coverage for seniors, and ensure that my children and generations to come would always have access to quality health care in their golden years. What the Republican leadership has put before us today does none of these things and threatens the very fabric of the Medicare program. The Republicans chose to give the richest Americans billions and billions of dollars in tax cuts rather than truly provide our seniors with relief from the high cost of prescription drugs. If this legislation is enacted, Medicare, and the cornerstone of Lyndon Johnson's Great Society, will be decimated.

There is nothing I would like more than to vote for legislation that would provide a meaningful Medicare drug benefit for seniors. In fact, I authored legislation to do just that. My legislation would have provided seniors with coverage comparable to most private plans and those utilized by federal employees. But what we have in this Conference Report is a fraction of that coverage. Most seniors will see little relief from the high cost of prescription drugs. Seniors will pay at least $35 a month in premiums with a $250 deductible, but these are just benchmarks and seniors may wind-up paying much more. There is also a gap in coverage where seniors will pay the premium while receiving no benefit. The gap in coverage is between $2,200 and $3,650 of out-of-pocket drug costs. This could mean that for half the year a senior will be paying a premium and getting no assistance. Additionally, the drug benefit doesn't even begin until 2006. Seniors in my district tell me they need help now. They don't want to wait two more years for this benefit to begin. I certainly think that they have waited long enough for assistance in paying for medicines that save and improve their lives. Our seniors deserve better treatment than this.

In keeping with the poor design of this benefit, it is expected that millions of retirees currently receiving drug benefits from their employers will lose it. So the Republican bill offers seniors a paltry benefit while taking away the quality benefits they currently enjoy. Wait till our seniors get a load of this.

As bad as all this sounds, it only gets worse. Despite the large outcry by seniors and Democrats across the country, this Conference Report embodies not the first small step toward privatization, but a giant leap that breaks the promise we made to our seniors and have kept since 1965 when Medicare was created. What is being dubbed as a demo project to "test" premium support, what is at best a voucher program, will encompass about ⅙th of Medicare beneficiaries. We're talking about 7 million people being forced out of traditional Medicare and into HMO's. These, the unluckiest of all the Medicare population, will pay higher premiums and receive some type of benefits, but we don't know what they are because the HMO's will package them as they see fit. For the first time in history seniors in different areas will be paying different premiums and receiving different benefits.

What is most troubling is that this legislation is setting Medicare up to fail. This legislation includes a provision that automatically triggers

cuts in the program if Medicare spending increases to an amount determined by the Republicans. The likely scenario regarding this is that sometime over the next several years Medicare spending will increase triggering the cuts. In order to get under the arbitrary cap traditional fee-for-service Medicare will be decimated. Republicans will then point to their privatization as Medicare's savior and they will have finally succeeded in their ultimate goal of ending Medicare and leaving seniors to fend for themselves in the private market where HMO's will be the order. Make no mistake, we agreed on the path to full privatization and an end to one of the most successful government programs in our history.

We have all heard that this group endorsed the bill and that group endorsed the bill, so why are Democrats opposing it. The only reason this legislation has any life in it is because the Republicans have doled out billions of dollars in payouts to insurance companies, drug companies, and other special interests. These groups are not endorsing the bill because it helps seniors, they are looking out for themselves. Well I am not going to sell out our seniors.

Mr. Speaker, the greatest generation is about to face the brunt of the greatest hoax since since I have been in Congress. Most seniors are not watching this debate. They will have on their local news that Medicare will soon be covering their prescription drugs and they will be ecstatic. "Finally" many will say. What a shame it is that we re playing a political game with the lives of seniors around the country. I urge all of my colleagues to vote this bill down so that the can enact a real benefit that strengthens Medicare and provides a comprehensive drug benefit that will make this wonderful program even better.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Texas (Mr. BRADY).

Mr. BRADY of Texas. Mr. Speaker, I appreciate the leadership of our chairman on this important issue. For the last 4 decades, Medicare has helped millions of American seniors get needed health care, helping them live longer than any other generation before them. However, Medicare has become dangerously outdated. In America today, Medicare refuses to pay $80 a month for Lipitor to prevent heart disease, but will pay $20,000 in hospital costs after a life-threatening emergency has occurred. That does not make sense. Medicare needs to keep pace with these medical breakthroughs.

Medicare must also be preserved and strengthened for future generations. We worked hard and we must act now so that seniors, baby boomers, and our young people can count on Medicare decades from now. We have worked hard to make sure Medicare is more like the health care plans Congress enjoys, more choices, better plans, and lower expenses for Medicare down the road. There are thoughtful new reforms to keep Medicare costs from ballooning out of control, and there are exciting new savings accounts that give Americans of every age more freedom to determine their health care costs.

Our seniors deserve a modern prescription plan now and future generations deserve Medicare that they can count on. The bottom line is we can invest a dime now to help seniors afford their medicines, or we can pay a dollar later when they end up in the hospital or face emergency surgery that we could have prevented. Our seniors deserve a modern prescription plan today, and Republicans in Congress are going to deliver it.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentleman from Texas (Mr. GREEN).

Mr. GREEN of Texas. Mr. Speaker, I rise in opposition to this so-called Medicare prescription drug conference report. Much as I want to support legislation creating a prescription benefit for our Nation's seniors, I cannot support this bill. First, the bill does absolutely nothing to drive down the outrageous costs of prescription drugs. In fact, it expressly prohibits Medicare from negotiating for 40 million seniors lower prices, and yet it still allows the insurance companies to do it. But they prohibit the government from doing it. The benefit has a huge doughnut hole that forces seniors to pay all their costs from $2,250 to $5,100. I guess I am so frustrated with this bill the best I can do is read a poem about America's Greatest Generation.

Rest gently, America's Seniors
You saved democracy in WW II
You survived a depression, too.
You built this Nation
to a great world power
so it is right you rest
at this late hour.

□ 0145

But while you slumber
There are voices raised
In our Capitol yonder
Of your high costs for your drugs of wonder.
This proposed legislation
Considered in the dark of night
Will not reduce your cost a "widow's mite."
Awake you will from your night's slumber
To repay and respond to those who plunder
Your hard-earned Medicare benefits.

Mr. Speaker, I rise in opposition to this so-called Medicare prescription drug conference report.

Much as I want to support legislation creating a prescription drug benefit for our Nation's seniors, I cannot support this bill.

The bill does absolutely nothing to drive down the outrageous costs of prescription drugs. In fact, the legislation expressly prohibits Medicare from using the negotiating power of 40 million seniors to demand reasonable prices for our Nation's seniors but allows insurance companies to negotiate.

The benefit has a huge "donut hole" that will force seniors to pay for all of their costs from $2,250 until their costs exceed $5,100.

So if you have drug costs that are $300–400 per month, you're only going to get a benefit for the first half of the year.

The rest of the year, you'll continue to pay premiums, but get absolutely nothing from them.

And finally, this plan would require Medicare to compete with private plans that would be paid more to treat healthier seniors.

There is no way Medicare could honestly be expected to compete with these overpaid plans, and I think the bill's crafters did that on purpose.

Mr. Speaker, this legislation leaves people worse off than they were before it. The CBO estimates that 2.7 million employees will lose their retiree benefits.

More than 6.4 million Medicaid beneficiaries will lose their wrap-around coverage.

And in the long run, seniors will be left shouldering a significantly higher portion of their health care costs. This is unacceptable, and I urge my colleagues to vote against this bill.

Mr. TAUZIN. Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Ohio (Mr. STRICKLAND).

Mr. STRICKLAND. Mr. Speaker, I thank my friend for yielding this time.

I probably will not need a minute to say what I want to say. But this bill was written by and for the pharmaceutical companies. Do the Members want an example of why I say that? A few days ago the Blue Dogs met with our Secretary of Health and Human Services, Mr. Tommy Thompson, and two Democratic Senators were there, Senator BREAUX and Senator BAUCUS. And in that meeting, a question was asked: Why is there a prohibition against the Secretary from negotiating discounted costs for America's senior citizens? And Senator BAUCUS said it is in there because PhRMA insisted that it be in there. Shame, shame, shame on you.

Mr. TAUZIN. Mr. Speaker, I yield myself 30 seconds.

I want to point out that the language that the gentleman just referred to in the bill first appeared in the motion to instruct by none other than the gentleman from California (Mr. STARK), who offered a motion to recommit H.R. 4680 with instructions that included the very same language that the gentleman is complaining about that was referenced in the Blue Dog meeting.

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentlewoman from Colorado (Ms. DEGETTE).

Ms. DEGETTE. Mr. Speaker, the Hypocratic oath requires that doctors first do no harm. There is no such oath for Members of Congress. But we would be wise to heed it when we consider the Medicare prescription drug benefit tonight, for this bill certainly will do harm to millions of Americans. I know this. My constituents know this, and seniors across the country know this. They are furious with the organizations and the Members of Congress that support this plan.

This is not an abstract debate. This has a huge impact on real people. It

will do harm to people like Helen Lay, my constituent, a retiree in Colorado. Helen is worried because, as she sees it, this bill has something in it for everyone except the senior citizens. Helen and her husband, Frank, are fortunate enough to have good prescription drug coverage through their retirement plan. Right now, they spend about $800 a year on prescription drugs. Without insurance, they would be spending nearly $12,000.

This bill will do great harm to Helen and Frank and millions of other seniors because it will encourage employer retirement plans to end prescription drug coverage, forcing seniors into substandard plans that cost more, and no one knows what the coverage or the price will be.

Helen and Frank have other serious problems. They take 12 brand-name medications per month. But this bill specifically prohibits Medicare from negotiating drug prices, even though private companies like Wal-Mart and agencies like the Veterans Administration are able to negotiate cheaper drugs. That means even if this bill passes, Helen and Frank will still pay exorbitant prices.

I say to Helen that we are here to stand up for her today.

Congress first must do no harm. Send this plan back.

Mr. TAUZIN. Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentlewoman from California (Mrs. CAPPS).

Mrs. CAPPS. Mr. Speaker, I rise in opposition to the Medicare conference report. Seniors deserve a good prescription drug benefit through Medicare. This bill cripples Medicare and truly is not a prescription drug benefit at all. It forces seniors into private insurance plans to get all of their health care and contains a time-released poison pill that will starve Medicare of needed resources by arbitrarily capping federal funds.

But on top of this, the conference report cuts cancer care by $1 billion a year, $10 billion over 10 years. So many rural cancer centers will close as a result, and others will lay off oncology nurses and critical support staff. These centers are essential to the delivery of cancer care today. How can we do this to cancer patients? It is hard enough to live with this dreaded diagnosis, let alone the horrendous side effects of the treatments. And now this.

I repeat. This bill cuts $1 billion out of cancer care. I am ashamed.

Mr. TAUZIN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. ROGERS) for the purposes of colloquy.

Mr. ROGERS of Michigan. Mr. Speaker, I thank the chairman for his leadership on this for the millions of seniors who today have no access, no access to prescription drugs that will have that when this bill is signed into law. I thank him for each and every one of them.

For the purposes of colloquy, it is certainly not the chairman's intent that the cuts to oncology practices across the country would go below such a level that would cause practices to close, thus jeopardize access to care for thousands of cancer patients, and should we see that CBO's projections were wrong and that oncologists were found not to be made whole for their drug reimbursement under the new Average Sales Price that we would swiftly reverse this payment methodology?

Mr. TAUZIN. Mr. Speaker, will the gentleman yield?

Mr. ROGERS of Michigan. I yield to the gentleman from Louisiana.

Mr. TAUZIN. Mr. Speaker, the gentleman is correct, but let me point out that CBO's estimates now indicate that this bill makes oncologists perfectly whole in this first year of the changeover. In fact, for the first 2 years, it is a neutral completely, and oncologists will be getting something like 2½ to 3 times the practice expense allowance that CMS now estimates they would get under their own data. This bill will actually give oncologists 100 million more dollars than they are currently getting under the old AWP formula this year, 2004, and $100 million less the second year. So it is a total neutral policy for that 2-year period.

Mr. ROGERS of Michigan. Reclaiming my time, Mr. Speaker, I thank the gentleman for clarifying.

In addition, it is not the chairman's intent that small rural cancer centers across the country would be detrimentally impacted under the new Average Sales Price reimbursement method for their drugs based on their inability to buy in volume like their suburban neighbors. And if we found that to be the case, we would swiftly review the specific impact such a payment methodology had on access to care in these rural areas.

Mr. TAUZIN. Mr. Speaker, will the gentleman yield?

Mr. ROGERS of Michigan. I yield to the gentleman from Louisiana.

Mr. TAUZIN. Mr. Speaker, the gentleman is of course correct. That is why we built an ASP, Average Sales Price, plus a percentage to give the smaller oncology units a chance to buy, in case the larger units buy at a lower price, they could at least get coverage on top of the Average Sales Price to reimburse them, but we would always review that to make sure cancer care is indeed preserved.

Mr. ROGERS of Michigan. Mr. Speaker, I thank the gentleman for his attention on this matter.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentlewoman from Illinois (Ms. SCHAKOWSKY).

Ms. SCHAKOWSKY. Mr. Speaker, I thank the gentleman for yielding me this time.

Earlier the gentleman from Louisiana (Chairman TAUZIN) waxed poetic about the deep meaning of a movie, of all things, and about the centrality of choice in our democracy. And I agree about choice.

But I have to tell the Members in all the years that I have worked for and with seniors, never, not once, did a senior citizen come up to me and say "What I really want is a choice of insurance plans. I want more salesmen to call me, send me those brochures, include all those charts and graphs and fine print. I cannot wait to sit down each year and choose among HMOs." Never, not once.

Seniors want a choice all right. They want to choose their doctor. They want to choose the drug that their doctor prescribes for them. They want the choice of their pharmacy if they want to go to their neighborhood pharmacy. They want the kind of real choice they get under Medicare, the Medicare that they know and love. And that is the kind of choice they will lose under this bill and under a pile of brochures that they are going to be burdened with. But do the Members know what? That is okay. I want to tell the Members it is okay because the seniors know the difference between real choices and phony choices. And we can put all kinds of fancy pictures on it, but senior citizens will know, and I want to tell the Members that it is to their peril that they vote for this legislation and give seniors a phony choice.

Mr. TAUZIN. Mr. Speaker, I yield 1½ minutes to the gentleman from Arizona (Mr. RENZI).

Mr. RENZI. Mr. Speaker, I thank the chairman for yielding me this time.

There has been some talk about this not being about prescription drugs and more about the changes that we are looking at for Medicare.

In the 1950's and 1960's on the border of Nevada and Arizona at the test sites for the atom bomb, the schoolchildren in Arizona, in Kingman, Arizona, were given the day off to go up on the mountains and watch the A-bomb blasts. The skies would turn brilliant pink and orange. Years later, those adults are the ones that come down with the highest cluster rates of cancer in America. A lot of the folks in the Rust Belt send their cancer patients out to beautiful, warm Arizona, whereas one of the benefits of their suffering has been our ability to understand how to better treat cancer in these communities now rather than in the hospitals.

The nurses who provide that cancer care under the current Medicare are not allowed to bill and get their full amounts. That is because Medicare has not changed enough or at all since its inception.

Medicare must be updated. It must be modernized. To do so denies the ability

to provide the proper billable hours for our nurses who provide cancer care and the better system of cancer care that we are seeing out in the West.

Modernize Medicare. Do not deny those nurses that kind of coverage.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the distinguished gentleman from Maine (Mr. ALLEN).

Mr. ALLEN. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, we have talked a lot about this bill. I want to say just a couple of words about my seniors up in Maine. Two points. First, they are desperate for lower prescription drug prices. Number two, they want to keep the Medicare program that they have because it is all they have. There are no HMOs in Maine to provide services to them.

And here is what they do. To get lower prescription drug prices, they call my office in Maine every day. They pile into buses to go to Canada. They try to get their prescription drugs from Canada over the Internet.

And so what do they get out of this bill? They get a provision that says the government will not be able to negotiate lower prices for them, will not be able to negotiate lower prices. They get an inadequate benefit that is not as helpful to most seniors in Maine as the Canadian drug prices. It is a big win for PhRMA and a big loss for people in Maine.

Our seniors have come to rely on the stability, predictability, and continuity of Medicare. The chairman of the committee did talk about choice, but as in Illinois, no one in Maine has ever asked me for a choice between insurance plans. They have got the choice that matters now, a choice of doctors and hospitals. This bill over time drives them out of fee-for-service Medicare into HMOs. It is funded by an outrageous overpayment to private plans and HMOs.

My parents for 1 year were in a Medicare+Choice plan. It was not golden. It was not modern, not efficient, not fair. Just a bureaucratic nightmare. Defeat this Medicare bill. It is bad for Maine's seniors.

□ 0200

Mr. TAUZIN. Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1 minute to the distinguished gentleman from New York (Mr. ISRAEL).

Mr. ISRAEL. Mr. Speaker, last June I was one of nine Democrats who voted to move Medicare modernization into a House-Senate conference. That bill was flawed, but I wanted to give it a chance for bipartisan compromise and improvement. It saddens me that this bill was not improved, Medicare was not modernized; it has been privatized in this bill. I said when I voted for H.R. 1 that if it looked like privatization, if it sounded like privatization, if it felt like privatization, if it smelled like privatization, that I would oppose final passage. This bill sounds, it feels, it smells, it looks, it is privatization; and I have to oppose final passage.

Now, some say, well, it is not really privatization; this is just an experiment in six different areas. Do not worry. Mr. Speaker, when you are the guinea pig, you tend to worry.

We could have done a much better job with this bill, Mr. Speaker. We could have come up with a bill that Republicans and moderate Democrats could embrace, a bill that protects seniors and does not subvert them. I gave this bill every chance that I could. Tonight this bill robs our seniors of any hope that they have had for true Medicare reform. Medicare should be the Federal Government's obligation to seniors who need the right bill, not a profit center for the special interests who wrote this bill.

Mr. TAUZIN. Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1 minute to the distinguished gentleman from New Jersey (Mr. ANDREWS).

Mr. ANDREWS. Mr. Speaker, I thank the gentleman for yielding me this time.

Several Members of the majority have said that this is a historic morning. They are correct. History will record that this is the day that any pretense the majority had, the Republican Party had of fiscal responsibility, ended.

Mr. Speaker, for every $100 we are spending to run our government tonight, we are only taking in $80, and you are taking every nickel out of the Social Security trust fund and then some to make up the difference. So what is your strategy to deal with this deficit? It is to add a $400 billion entitlement that you cannot pay for. You are using Social Security funds that are supposed to fund future retirements for our kids to pay for a sham prescription drug benefit for our grandparents.

This borrowing will purchase a Trojan horse, a massive giveaway to the health insurance industry disguised as a prescription drug benefit for senior citizens.

I listened to your speeches when you came here 10 years ago and said we could not afford to expand entitlements, and many of us on our side stood with you and made sure that we did not do that.

To have a real prescription drug benefit, you should repeal your sacred tax cut and pay for what is really necessary for America's seniors. Shame on the Republican Party for turning its back and releasing a torrent of red ink that we will pay for, for generations to come, when this bill metastasizes in the future. Oppose this ill-considered bill.

Mr. TAUZIN. Mr. Speaker, I yield myself 30 seconds. That was an interesting speech, but I got a letter from the Congressional Budget Office indicating that they prepared a preliminary estimate of the impact of the Democratic amendment to H.R. 1, the Democratic plan; and the estimate of CBO of their plan is $1 trillion. So a speech complaining about the fact that we in this House passed a budget that included $400 billion for this important program for seniors is wrong, when the other side prepared an amendment for $1 trillion; that is a little outrageous.

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 30 seconds to the distinguished gentleman from Arkansas (Mr. BERRY).

Mr. BERRY. Mr. Speaker, I rise at this time to just express my gratitude and the gratitude of my caucus to the two gentlemen who have worked tirelessly for years on this issue, the gentleman from Michigan (Mr. DINGELL) and the gentleman from New York (Mr. RANGEL). And I hope that this entire body, even though they have been treated shamefully and disgustingly by the Republican leadership and by this conference committee, I hope that everyone here this evening will join me in thanking them for the magnificent job that they have done for America and America's seniors.

Mr. TAUZIN. Mr. Speaker, I yield myself 30 seconds. While he is not here, I think the Members on our side ought to show their appreciation for the chairman of the Committee on Ways and Means, the chairman of the conference who did an amazing job in bringing this excellent bill to the floor for our consideration, the gentleman from California (Mr. THOMAS).

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 1½ minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, 40 years ago today, President Kennedy's assassination released an energy in our country that led to the passage of the Civil Rights Act and Medicare. By contrast, the bill before us today was conceived in secret, crafted by special interests, and cloaked in a prescription drug benefit to disguise its real purpose: the destruction of the Medicare program as we have known it in the United States over the past 40 years.

This bill is a Thanksgiving turkey, and this turkey will not fly. It forces senior citizens into HMOs. It gives HMOs billion-dollar subsidies. It raises drug costs for the poorest Americans, and it drops millions of seniors from their retirement plans.

Some claim this bill will provide America's senior citizens with new prescription drug coverage, but it will force millions of our frail elders to pay more for prescription drugs than they

do now. Some claim it will lower Medicare premiums, but it will require Medicare beneficiaries to forfeit the power to choose their own doctors or their own drugs. Some claim it will make the Medicare program more efficient, but it will stick taxpayers with the bill for billions of dollars in subsidies to HMOs and new tax shelters for the rich.

This bill is not the elixir for Medicare; it is, rather, a poison pill that leads to the destruction of the Medicare program as John F. Kennedy and Lyndon Johnson envisioned it.

Mr. TAUZIN. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, it is the season of Thanksgiving, and this House is about to say thank you to a generation of Americans who we ought to say thank you to, and we are about to say it in the most important way we can. We are about to pass a $400 billion-insured drug account for these citizens who have no drug insurance today. We are about to pass a voluntary plan that gives them the right to join or not join, their choice, not mandated by government. It includes catastrophic coverage so they never have to lose everything they have worked for and saved for all of their lives. And we give to all Americans on this Thanksgiving holiday a chance to open up health savings accounts, tax-free in, tax-free out, tax-free interest earned to build their own long-term health care plans for the future.

This, indeed, is a time of Thanksgiving, and it is indeed a time for this generation to be true to our obligations of the previous generation. This bill does that. It gives the new generation choice in drug coverage for the first time.

It is amazing to me tonight, this debate. I have taken my parents to the hospital many times during my dad's life and my mom's. I do not ever once remember a doctor asking me as I checked in to the room there whether my mom was a Democrat or a Republican. This is not a partisan issue. I have gone and filled my mom's prescriptions every now and then for her. They never asked me at the pharmacy what party she belongs to. And when health deserts us in our senior years, when the ravages of time take us and we pass away, no mortuary worker stamps Democrat or Republican on our tombstones.

Health care is not a partisan issue, and it should not be a partisan issue. We have a chance today to do something that seniors desperately need, and we ought to join tonight together to do it.

There are a lot of people who helped write this bill. Let me tell you who they were. They were, of course, the members of the conference committee who worked together to put this bill together, but there were a lot of staffers; and I want to mention them today. They are the staff of the House and Senate legislative counsel. Special thanks to the House legislative counsel, Ed Grossman, who is a draftsman extraordinaire. Additional thanks go to Pierre Poisson and Peter Goodloe.

From the Senate side, Ruth Ernst and John Goetcheus and Jim Scott.

Other staff members of the Congressional Budget Office and analysts, these individuals deserve great compliments for their analysis, their integrity, and their hard work. I want to thank Doug Holtz-Eakin and Steve Lieberman, Tom Bradley, and the entire CBO staff who worked night times and days for us.

I want to thank Tom Scully and the whole staff at HHS and CMS who sat and worked with us day after day to craft this bill.

I specifically want to thank the staffs of our committees. From Ways and Means, John McManus, who did such a great job; Madeleine Smith and Deborah Williams, and Joel White. From the majority side of the Finance Committee, I would like to thank Linda Fishman, Mark Hayes, Leah Kegler, Colin Roskey, and Jennifer Bell. Recognition is deserved to Liz Fowler and Andrea Cohen, Pat Bousilman and Jonathan Blum.

Last, but not least, all of the Committee on Energy and Commerce staff who toiled so hard for us, let me thank them again, over and over again: Dan Brouilette, Patrick Morrisey, Chuck Clapton, Jeremy Allen, Patrick Ronan, Kathleen Weldon, and Jim Barnette. They did a marvelous job for this House, and we owe them a debt of thanks. Thank you all.

Mr. DINGELL. Mr. Speaker, I yield such time as she may consume to the gentlewoman from California (Ms. ROYBAL-ALLARD).

Ms. ROYBAL-ALLARD. Mr. Speaker, I rise in strong opposition to this bill.

Mr. Speaker, I rise in strong opposition to this extremely flawed bill. A bill that takes care of drug and insurance companies at the expense of our Nation's seniors.

Instead of helping our seniors, Mr. Speaker, this bill will result in higher drug prices, increased Medicare premiums for seniors who refuse to be forced into HMOs, and the erosion of retiree coverage for over two million seniors.

These are just a few of the problems with this bill, Mr. Speaker. There are far too many to name in the limited time I have.

Our seniors deserve better. They have worked and sacrificed and contributed greatly to our country.

We must not turn our backs on them, Mr. Speaker, with the passage of this bill. Instead let us honor our seniors by defeating this bill and coming back with a prescription drug plan that is affordable, comprehensive and guaranteed. A plan, Mr. Speaker, that protects Medicare not destroys it.

Let tonight's victory be for our seniors, not the pharmaceutical and insurance companies.

Mr. DINGELL. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina (Mr. SPRATT).

Mr. SPRATT. Mr. Speaker, I rise in strong opposition to this bill.

Mr. Speaker, when we began this quest several years ago, our object was to make Medicare better by filing a big gap in its coverage. This conference report covers that gap with a drug benefit that is barely adequate and badly in need of redesign. The bill then goes on not to make Medicare better, but to move Medicare toward privatization, heavily subsidizing managed care with funds that could better be used to improve the meager drug coverage this bill provides.

I will vote against this bill not to kill it but to send it back to an open conference, where all participate, in an effort to make the bill worthy of our senior citizens who badly need this coverage, and depend on Medicare.

Here are some of the problems and objections that I find with this bill:

H.R. 1 couples meager drug coverage with major changes that move medicare toward privatization. The terms of coverage seem reasonable at first until you realize that they are not guaranteed. The premium of $35, the deductible of $250, and the co-payment of 25 percent are illustrative of what insurance companies may offer, but not written in stone. In any event, coverage stops after $2,250, just when it is needed most, and catastrophic coverage does apply until one has spent $5,100. For this first $5,100 in coverage, the consumer pays $4,020. Put another way, the plan pays 20 percent the consumer pays 80 percent. Catastrophic coverage starts after $5,100 has been spent, and seems reasonable, until you realize that this threshold, like all the other terms of coverage, is indexed to the rising cost of prescription drugs, and is likely to double in ten years. This is meager coverage, and a poor trade-off for all the changes crammed into this package to move Medicare toward privatization.

H.R. 1 contains a drug benefit that is flawed and needs to be fixed before it becomes law. Rather than providing continuous coverage, the Medicare benefit has a $2,850 gap in coverage that will leave millions of seniors without drug coverage for a good part of the year, even though they continue to pay premiums.

The drug benefit has a deductible of $250, and a coverage gap that begins at $2,250 in drug spending and ends at $5,100. According to CBO, this coverage gap of $2,850 will double to $5,065 by 2013. The structure of the benefit means that there will be several months out of the year when seniors are paying premiums and are not receiving any additional drug coverage. This odd benefit design, with its coverage gap does not currently exist as an insurance product.

H.R. 1 needlessly complicates prescription drug coverage by making it available only through private insurance policies and not through medicare. Even through stand-alone drug policies don't exist, and health insurance companies, fearing adverse selection, have made clear that they do not wish to write it, this bill provides primarily for private insurance coverage. Out of disdain for Medicare, the bill does not choose the simple solution and make

drug coverage a feature of Medicare. Instead, in one of many steps toward privatization, this bill calls for drug coverage to be written by private insurance companies, adding unnecessary cost, complexity, and uncertainty.

H.R. 1 requires that drug coverage be purchased from a private insurance company even when there is only one underwriter and no competition. In regions where only one insurance company offers a drug-alone policy, Medicare will not provide "fallback" coverage under this bill, so long as there is a Medicare PPO or HOM in the area. The beneficiary will have three unappealing choices: take the coverage at a non-competitive price, leave Medicare fee-for-service and join the HMO, or go without drug coverage.

H.R. 1 bars the Federal Government from using the purchasing power of 40 million seniors to drive down the price of drugs—H.R. 1 flat prohibits the Secretary of Health and Human Services from negotiating better prices for prescription drugs. The bill divides Medicare's 41 million beneficiaries into numerous regions and to one or more private plans within each region. This fragmentation runs contrary to trends at the state level, where states have used the purchasing power of big beneficiary pools to negotiate better prices. This prohibition also flies in the face of prevailing federal practice, which requires government officials to seek the best possible price when spending the taxpayers' money—especially when spending $400 billion.

H.R. 1 overpays HMOs to induce them to join medicare and draw seniors into private plans—H.R. 1 provides $16.5 billion to sweeten subsidies paid to managed care plans and induce them to enter markets they have not found profitable. After spending billions to subsidize managed care plans, this bill then forces traditional Medicare to compete with the plans. This competition, known benignly as "premium support," will destabilize Medicare as we have known it and lead to premium increases for seniors who want to stay with the government-run program.

According to the Medicare Payment Advisory Commission, Medicare already overpays managed care plans by 19.6 percent. They are paid 19.6 percent more than their members would cost if enrolled in traditional fee-for-service Medicare.

H.R. 1 increases HMO payments by another $4.5 billion and sets up a $12 billion fund to induce private plans to enter new markets. According to MedPAC, these changes will result in overpayments to managed care plans of 25 percent.

Medicare fee-for-service will then have to compete with private plans in six metropolitan areas starting in 2010. Obviously, the increased payments will allow private plans an advantage in the competition, one they will enhance by marketing their services to healthy seniors.

Managed care plans have a record of designing and marketing benefit packages that appeal to healthy beneficiaries. As private plans "cherry pick" healthier beneficiaries, traditional Medicare will be stuck with sicker, more expensive beneficiaries. If competing private plans run costs below traditional Medicare, the beneficiaries in fee-for-service Medicare will be assessed the difference through their Part B premiums. Traditional Medicare premiums will spiral upwards, forcing seniors who cannot afford the rising premiums to move into private plans that limit their access to doctors. The process will repeat itself year after year, beginning an insurance "death spiral" that will destroy traditional Medicare.

H.R. 1 will cause over six million low-income seniors to be worse off—The 6.4 million low-income and disabled individuals who now receive health coverage from both Medicare and Medicaid will be worse off under this bill.

Under current law, when a benefit or service is covered by both Medicare and Medicaid Medicare serves as the primary payer and Medicaid "wraps around" that coverage. Medicaid fills gaps in coverage that exist under the Medicare benefit. Medicaid also picks up most or all of the beneficiary co-payments that Medicare charges.

This bill largely eliminates Medicaid's supplemental—or "wrap around"—coverage under the new Medicare drug benefit. As a result, substantial numbers of poor elderly and disabled people would be forced to pay more for their prescriptions than they now do.

In addition, in cases where Medicaid covers a prescription drug but the private plan that administers the Medicare drug benefit in the local area does not provide that particular drug under Medicare, poor, elderly and disabled beneficiaries who now receive the drug through Medicaid could lose access to it.

Under current law, low-income beneficiaries have co-payments that run from zero to as high as $3; but these amounts do not increase from year to year. The conference report raises cost-sharing for those with the lowest incomes by requiring $1 and $3 co-payments for beneficiaries whose income is less than $8,980 a year and $2 and $5 co-payments for beneficiaries whose income is between $8,980 and $12,123 a year. In addition, the $1 and $3 co-payments grow at CPI (1.5 percent to 3 percent). The $2 and $5 co-payments will rise at the same level as prescription drug spending, which is projected to average 10 percent a year, far exceeding the annual 1.5–3 percent. Social Security COLAs.

According to the Center on Budget and Policy Priorities, this provision will result in higher drug costs for 4.8 million seniors.

H.R. 1 will cause nearly 3 million seniors to lose retiree coverage—According to CBO, some employers will stop providing retiree coverage due to the structure of the drug bill, and this will result in 2.7 million seniors losing retiree drug coverage, in many cases far better than this plan.

According to the Congressional Budget Office, 11.7 million seniors currently have retiree coverage through their former employers. However, 23% of these seniors, or 2.7 million individuals, will lose this coverage. This loss of coverage results from the structure of the drug benefit, which gives employers an incentive to drop retiree coverage.

The drug bill targets Federal assistance toward those seniors who lack supplemental private drug coverage, most noticeably through the requirement that payments made by supplemental coverage don't count toward the beneficiaries' out-of-pocket limit. In effect, the out-of-pocket provision reduces Federal subsidies for beneficiaries with supplemental insurance. As a result, it provides a clear financial disincentive for employers to supplement the benefit.

Second, some employers see the enactment of a drug benefit as an opportunity to reduce the costs and risks of providing drug coverage.

H.R. 1 spends nearly $7 billion on tax shelters for the healthy and wealthy—Rather than marshaling funds to improve drug coverage, H.R. 1 diverts $7 billion to Health Security Accounts, which have nothing to do with Medicare drug coverage, and create an unprecedented tax break, which could undermine our employer-sponsored insurance system.

Under H.R. 1, tax-advantaged savings accounts to pay out-of-pocket medical expenses would be made universally available. These could be used with high-deductible health policies, but not with the comprehensive health coverage traditionally offered by employers. Holders of these accounts could make tax-deductible deposits, watch the earnings compound tax-free, and pay no tax upon withdrawal if the funds are used for medical expenses.

This would establish an unprecedented and lucrative tax shelter. In the existing tax code, when funds deposited in a tax-favored account are deductible, withdrawals are taxed. On the other hands, withdrawals are not taxed when deposits are not deducted. There is no precedent in the tax code for providing both "front end" and "back end" tax breaks. The political pressure to do the same for other types of savings and retirement accounts could become irresistible. A proliferation of such tax-free accounts would only send Federal deficits higher.

These savings accounts would also undermine comprehensive health insurance. Healthy, affluent workers would have an incentive to opt out of comprehensive health insurance in favor of the Health Security Accounts. They would receive a large tax break, and would not be much affected by switching to a high-deductible health policy since they generally use fewer health services. If large numbers of such workers opt out of comprehensive plans, the pool of people left in comprehensive plans would be older and sicker, causing premiums for comprehensive insurance to rise significantly.

That, in turn, would drive still more healthy workers out of comprehensive insurance, making those that remain even more costly to insure, adding pressure on employers to stop offering comprehensive coverage. Older and sicker workers could wind up paying more for health coverage or losing it altogether and becoming uninsured.

This suggests what could be done to make this bill better if it were taken back to a fair and open conference committee. The $7 billion allocated to Health Security Accounts and the $17 billion allocated to subsidizing HMOs could be used instead to narrow the "doughnut hole," the zone where there is no coverage between $2,250 and $5,100. This is just one example of how this bill can be fixed and improved, and should be before it is passed.

Mr. DINGELL. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. FATTAH).

Mr. FATTAH. Mr. Speaker, I rise in opposition to this conference report.

Mr. DINGELL. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Arkansas (Mr. ROSS).

Mr. ROSS. Mr. Speaker, I thank the gentleman from Michigan for yielding me this time.

Mr. Speaker, in 2001, the Republican Congresswoman, the gentlewoman from Missouri (Mrs. EMERSON), and I offered up a bipartisan plan that would truly modernize Medicare to include medicine for our seniors, that recovered 80 percent of the cost of prescription drugs for our seniors, while taking on the big drug manufacturers, and the Republicans told us that we could not afford it. They said we could not afford $750 billion over 10 years.

But what has happened since then? They passed a $350 billion tax cut for the wealthy, and now they are proposing a $400 billion major prescription drug plan. I was not real good in math in high school, but I think I can figure that one out. That totals $750 billion. Two years later, we are getting a plan that does not even kick in until 2006. Our plan would be in effect today.

□ 0215

Seniors get $1,080 worth of help on the first $5,100 worth of medicine they need every year, and the Republicans even had the nerve at the urging of the big drug manufacturers to put language in the bill that says the Federal Government shall be prohibited from negotiating with the big drug manufacturers to bring down the high cost of prescription drugs. This is a bad bill. This is a bill that does not even fit our seniors, only the big drug manufacturers.

Mr. TAUZIN. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, again let me read the language of the bill that the gentleman just referred to, that terrible piece of language. It says in effect that in administering the prescription drug benefit program established under this, the Secretary may not, number two, interfere in any way with negotiations between private entities and drug manufacturers or wholesalers; or, three, otherwise interfere with the competitive nature of providing prescriptive drug benefit through private entities. That language in the bill comes from a motion to recommit prepared and filed in this House in the 106th Congress by the gentleman from California (Mr. STARK) on his motion to recommit. It is language of the other side that they are complaining about.

Mr. DINGELL. Mr. Speaker, I yield 2½ minutes to the gentleman from Texas (Mr. TURNER) for purposes of explaining the motion to recommit, which will be offered at the conclusion of the debate. I hope my colleagues will listen closely to this.

Mr. TURNER of Texas. Mr. Speaker, for years the pleas of our hurting seniors fell on the deaf ears of our Republican majority until one day our Republican friends were struck with an ingenious idea, wrapping a plan to privatize Medicare into a deceptive package called prescription drugs for seniors.

It keeps the drug companies happy because they can still charge twice as much for medicine here as anywhere else in the world. It keeps insurance companies happy by paying them 25 percent more to cover seniors than taxpayers pay to cover seniors under traditional Medicare. It keeps doctors and hospitals happy by paying them billions while leading them like sheep into the perils of managed care.

And it costs taxpayers $400 billion for a meager prescription drug savings of 25 percent, a savings that could be achieved at no cost to taxpayers by giving seniors the right to buy drugs at the same price they can get them in Canada. All this slight of hand to force seniors into private insurance and some day to give them a voucher and tell them fend for yourself. No security, no certainty, no guaranty of coverage, you are on your own. And the promise of Medicare is no more.

My seniors in east Texas see right through this. In a poll conducted tonight, over 6,000 seniors in my district, 85 percent said they were opposed to the Republican plan. Dress it all up as fancy as you can, it is a bad deal for America's seniors and they know it.

Mr. Speaker, I will be offering a motion to recommit to give seniors a meaningful prescription drug plan. This motion matches the conference report dollar for dollar on provider payments. It allows the Secretary of HHS to negotiate lower drug prices. It eliminates premium support ensuring that seniors will not have to pay more to keep the Medicare coverage they know and trust. It rejects the poison pill language that guts reimportation, and it prevents millions of retirees from losing their benefits and protects low-income seniors by allowing Medicaid to provide wrap around coverage.

Mr. Speaker, let us give the greatest generation the certainty, the security, and the guarantee they deserve. Vote for this motion to recommit.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The Chair would advise Members that there are 2 minutes remaining on either side. The gentleman from Louisiana (Mr. TAUZIN) has the right to close.

Mr. TAUZIN. Mr. Speaker, I might inquire of the gentleman from Michigan (Mr. DINGELL) if he has further speakers. I am reserving for the Speaker of the House to close.

Mr. DINGELL. Mr. Speaker, at this time I would inform my distinguished friend in the House, the gentleman from Louisiana (Mr. TAUZIN) that we have only one speaker remaining who will close for this side.

Mr. TAUZIN. Mr. Speaker, then I would advise my friend to take advantage of that time at this time and the Speaker will close on the Republican side.

Mr. DINGELL. Mr. Speaker, is my good friend assuring me he has only one speaker remaining?

Mr. TAUZIN. Mr. Speaker, I can assure my friend that is true.

Mr. DINGELL. Mr. Speaker, then with a great deal of pride and pleasure I yield the remainder of my time to the distinguished minority leader, the gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Speaker, I first I want to invite my colleagues to join me in expressing our appreciation to our Democratic conferees who have been true champions of a defined affordable prescription drug benefit under Medicare, the dean of the House and ranking Democrat on the Committee on Energy and Commerce, the gentleman from Michigan (Mr. DINGELL), the distinguished ranking Democrat on the Committee on Ways and Means, the gentleman from New York (Mr. RANGEL), and a true champion for health care in this Congress and the country, the gentleman from Arkansas (Mr. BERRY), all for their leadership on this important issue.

Sadly, Mr. Speaker, the Republicans would not let these appointed conferees into the conference room. And this bill does not reflect the benefit of the thinking and experience of our very diverse caucus. That is a great loss to this debate and a great loss to our country.

Mr. Speaker, the Democratic Party has made ensuring the dignity and security of our seniors a cornerstone of our mission for generations. Nearly 40 years, ago a Democratic Congress and the Democratic President, Lyndon Johnson, honored that mission by making Medicare the law of the land. Ever since then, America's seniors have known where Americans stand. We created Medicare, we want to protect it and strengthen it.

Americas seniors have also known where Republicans stand. For 40 years, they have waged war on Medicare. When Congress passed Medicare in 1965, only 13 Republicans in Congress supported it. Only 13 in Congress supported it. When Newt Gingrich and the Republicans tried to gut Medicare in 1995, President Clinton stopped them. That same year, Newt Gingrich made his intentions about Medicare clear. He said, "Now, we did not get rid of it in round 1, because we do not think that is politically smart, but we believe it is going to wither on the vine." And tonight the Republicans want to deliver the final blow. On behalf of America's seniors and disabled, we must stop them.

Recognizing the desperate need of America's seniors citizens, Democrats proposed a guaranteed, defined, affordable prescription drug benefit under

Medicare. Instead of joining us in this historic opportunity, Republicans offered up a Trojan horse, a deceptive gift intended to win their 40-year war against Medicare.

Republicans said this is a first step toward a prescription drug benefit. This Republican plan is not a first step, it is a false step, it is a mistake. It puts profits for HMOs and big pharmaceutical companies over seniors, providing a $12 billion slush fund for HMOs and gives a $139 billion in windfall profits to the pharmaceutical companies over 8 years.

The Republican plan does not lower costs for prescription drugs. It prohibits the government from negotiating for lower prices. It privatizes Medicare and pushes seniors into HMOs. It makes seniors pay more to keep the Medicare they know and trust. It does all of this for a deceptive plan that makes most seniors pay $4,000 out of their first $5,000 in prescription drug costs. How do you explain that to mom? You are going to get a new benefit, this is the Republican plan. And of the first $5,000 of prescription drugs cost, you, senior citizen of America, are going to pay the first $4,000.

Nearly half of all Medicare beneficiaries, up to 20 million seniors and disabled Americans, will fall into a coverage gap, meaning they will pay premiums all year without receiving benefits all year. Under the plan most seniors will be worse off than before, and millions of retirees will lose their existing employer provided coverage.

Republican priorities are clear: They place the special from interest of the HMOs and the pharmaceutical companies before the public interest of America's seniors and disabled. This is not the beginning of a real prescription drug benefit under Medicare. On the contrary, this is the beginning of the end of Medicare as we know it. The more seniors across America learn about the details of this scheme, the less they like it, and the more they want us to keep fighting for real prescription drug benefit that really answers their needs.

Mr. Speaker, this is an hour of decision. Tonight there is own one way to improve this bill and that is to and to provide the benefit seniors need and deserve and that is to vote no. I urge my colleagues to vote against this Republican hoax. I urge them to send all of the conferees, Democrats and Republicans, to the conference room to produce a bipartisan bill that will be sustainable over time and meet the needs of our seniors and disabled. I urge them to stand with 40 million seniors and disabled Americans who look to us for help and hope at this defining moment.

Speaking on the day when he signed Medicare into law, President Johnson said that this Nation's commitment to its seniors was part of a noble tradition that calls upon us never to be indifferent toward despair, never to turn away from helplessness, never to ignore or spurn those who suffer untended in a land that is bursting with abundance. Tonight the hopes of 40 million seniors and disabled Americans rest upon us. They have waited too long, fought too hard, endured too many broken promises, only to be sacrificed on the alter of the special interest. We cannot, we must not, and we will not abandon them now.

Mr. TAUZIN. Mr. Speaker, in order to close this historic debate we yield the balance of our time to the distinguished Speaker of this, the whole House of Representatives, the gentleman from Illinois (Mr. HASTERT).

Mr. HASTERT. Mr. Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN). I also want to thank those many, many staff members who spent uncounted hours, night and day, to help make this bill possible. I especially want to thank my own staff member, Darren Willcox, who sacrificed many late nights and early mornings and long weekends despite having a wife and a baby boy at home. I want to thank Brett Shogren of the majority leader's staff, and many, many other young men and women who committed their time, dedicated their time to try to do a good job in this people's House.

I want to thank those folks at the legislative counsel who spend untold hours of trying to craft the right language to make this legislation the right legislation for the American people, and those folks at the Congressional Budget Office who crunched numbers day after day after day to make things work.

In this time and space of legislative arena, there are times when things come together. There are times of great opportunity. And there is a time for change.

□ 0230

This, indeed, is one of those times for that opportunity. This, indeed, is one of those times for great change. A poet once said that ''things fall apart, the center cannot hold. The best lack conviction while the worst are full of passion and intensity.''

For the good of our senior citizens and for the good of our Nation, the center must hold. The best must be full of passion and intensity. And today, we must pass this historic legislation.

I want to thank all of those who have put aside their partisanship and worked together for the good of this Nation. I want to thank the conferees, especially the gentleman from Louisiana (Mr. TAUZIN), the gentleman from California (Mr. THOMAS), the gentleman from Texas (Mr. DELAY), the gentlewoman from Connecticut (Mrs. JOHNSON), the gentleman from Florida (Mr. BILIRAKIS) in the House, and Senator FRIST and Senator BAUCUS and Senator BREAUX of the Senate.

They have worked long and they have worked hard on this product through many late nights and long weekends, and they deserve our gratitude.

The third time is a charm when it comes to prescription drugs. This Congress under this leadership passed drug prescription legislation in the 106th Congress. The House passed a prescription drug bill only to see it die in the Senate. In the 107th Congress, we passed a prescription drug bill only to see it die in the Senate. And finally, we are poised to complete this long journey.

When Medicare was first conceived, the baby boomers were young adults and most seniors got their health care from a doctor's visit or a trip to the hospital. Thus, those who constructed the program were not overtly concerned about long-term cost projections or about prescription drugs.

Today, we face a different story. The baby boomers are now thinking about retirement, and they want their prescription drugs. Prescription drugs now make up more than a third of health care costs.

This conference report makes two fundamental changes to the Medicare system. It makes it more sustainable in the future, and it provides seniors with a prescription drug benefit. Why do we have to make Medicare more sustainable in the future? Because if we do not, my kids and all those other young adults out there will be forced to pay 30 percent of their salary in the next decade or two for the Medicare program. And I just do not think we can make that happen, and that will not sustain Medicare; and I do not think it is fair to them.

So in this bill we start the process of making Medicare more sustainable. We means test the part B premium and index the deductible to inflation. We introduce free-market principles and give consumers more power to choose their health care. We include cost-containment measures so that if Medicare costs grow too quickly, the Congress and the President will be forced to confront that fact.

Finally, we create health savings accounts which might be the most dramatic and exciting reform of our health care system in generations. These health savings accounts give consumers the ability to make health care choices. This will hold down skyrocketing health care costs and deliver better health care for our citizens and for our seniors.

As we make these necessary financial reforms in Medicare, we also modernize the program with a prescription drug benefit. And after this legislation goes into effect, low-income seniors will never be confronted with the choice of

putting food on the table or paying for life-saving prescription drugs. Low-income seniors will finally have the benefit that will take care of their drug costs, and this will save the deposit money in the long run. For example, if a low-income senior has diabetes, the monthly cost of Glucophage, a drug that helps control that disease, is about $30 a month. But if diabetes is left untreated, a single hospitalization for renal kidney failure is about $6,700. The benefit is both penny-wise and pound-wise.

It will also help the typical senior by cutting down their drug costs by 40 percent. And those seniors with high drug costs will save even more, up to 60 percent or more. In other words, this prescription drug benefit is a good deal for all seniors.

This legislation has other important factors. It includes incentives to employers so that they will not drop their current plans. In fact, this bill will make it more likely that if you have coverage with your employer, that employer will continue to offer that benefit. It also includes vitally important help to rural America. And if you live in the cities or urban America, it is probably not a problem. But if you are trying to compete with your rural hospitals and keep doctors and hospitals going in rural areas, you know that is a problem.

This bill solves the problem. It takes care of rural hospitals. It provides rural health care. That is something that many of us have been fighting for for a long, long time. Let me be the first to admit that this conference report is not perfect. The far left does not like it. And some of our friends on the far right do not like it. But let me tell you who does like it.

The AARP has endorsed it. So has the American Hospital Association and the American Medical Association and almost every other major seniors organization and doctor and patient group.

I urge my colleagues to put politics aside. I urge you to consider this piece of legislation for the good of this Nation. I urge you to stop and think when is the last time that we have really been able to change the paradigm of health care in this country. When is the last time that we have really had the chance to offer our seniors in this country a future for good health care, for good pharmaceutical coverage and for a chance to live and enjoy a great future.

I ask for a positive vote.

Mr. FILNER. Mr. Speaker, I rise today to say shame on this body for passing this reprehensible Medicare bill that has been rammed through Congress today by the Republican leadership.

This legislation does nothing that its supporters claim it does. They claim that this bill will help seniors with their prescription drug costs and give them more choices in their healthcare. But actually, this bill does none of that. It does not provide a comprehensive, affordable or reliable prescription drug benefit. Further, it unravels the consistent, guaranteed healthcare coverage that seniors have come to expect under Medicare. This bill is so bad, that even some Republicans refused to support it. Opponents of this terrible legislation see through the smoke and mirrors that supporters are putting up and realize that this bill was not about helping seniors pay for their prescription drugs or giving them access to better care, but that this bill was actually about helping the bottom lines of private insurance companies, HMOs and the pharmaceutical companies.

There are many, many bad provisions in this legislation, and I would like to highlight some of the worst of them here.

One: Under this bill, Medicare as we know it is completely unraveled. First, Medicare Part B will be forced to compete with private managed care plans. This leaves the health of our seniors to the whims of private insurance companies and does not guarantee that all seniors will be receiving the same benefits across the country. That means seniors in my District in San Diego, CA, might have better coverage than seniors in New York. Or seniors in New York might have better coverage than those in San Diego—we just don't know—it's completely up to the private insurance companies and HMOs to decide how much coverage they want to provide. Not only is the amount of coverage going to vary, but so are the costs of the premiums. Again, that means seniors in San Diego might pay more than seniors in New York—or vice versa—depending on how much the private insurance companies and the HMOs decide they want to charge!

Secondly, this bill would institute a "means test." In layman's terms, that means that in 2007, the Medicare part B premium would be linked to income. This not only goes against the main tenet of Medicare—which grants coverage to everyone, regardless of income—but also, higher premiums create an incentive for healthier seniors to leave Medicare. This would leave only the sickest seniors in Medicare and drive up premiums even more.

Two: The so-called prescription drug "benefit" is absolutely inadequate and actually decreases coverage for some seniors and can cost them more than they're paying right now. Supporters of this bill claim that the prescription drug benefit will help seniors cover the costs of their medications. However, there are so many problems with this benefit that it's hard to decide where to begin. First of all, this benefit does not even kick in until 2006. When it finally does begin, seniors are expected to pay a high deductible. Then, there is a piece de resistance of this so-called benefit: there is a big hole in coverage. Rather than providing continuous coverage throughout the year, this bill has a $2,850 coverage gap in which seniors don't receive any coverage at all. Half of America's seniors fall into this hole. The icing on the cake is that despite the fact that they would not be receiving coverage for part of the year, they are still expected to continue to pay the premiums.

Additionally, more than 2 million retirees, who currently have drug coverage through their former employers, will lose that coverage. Because drug costs keep rising and this bill has no measures to keep drug costs low, it is very tempting for employers to simply drop their coverage and force seniors onto this inadequate drug coverage plan. Furthermore, rather than having Medicare kick in when a retiree reaches catastrophic coverage, this bill forces the employer-provided benefits to cover those costs—yet another reason for employers to pull their coverage.

Three: This bill explicitly prohibits the government from negotiating with drug companies for lower drug prices. One of the greatest strengths of a prescription drug plan under Medicare is that it could reduce drug prices for participants using the large number of participants in the Medicare program to bargain with pharmaceutical companies for better prices on their products. Yet this bill denies Medicare participants those lower costs, ensuring continued skyrocketing prescription drug prices.

It is for those reasons—and many many more—that I could not support this poison pill for Medicare and a placebo of a prescription drug benefit.

Mr. THORNBERRY. Mr. Speaker, like most bills brought before us, this bill is a mixture of provisional I support and provisions I oppose. Unlike most bills brought before us, it affects every American and will have significant, long-term consequences for our Nation.

I believe that providing access to quality health care is one of the most formidable challenges facing our Nation now and in the decades to come. The retirement of the baby boom generation, which begins in less than 8 years, will make that challenge enormously difficult.

When the House considered its version of this bill in June of this year, I said that our objective should be to "update and strengthen Medicare so that it does a better job of providing health care for seniors and at the same time put Medicare on a sound financial footing so that it can be sustained through the baby boom generation retirement." This conference report does begin to update Medicare by adding prescription drug coverage. It does little to put Medicare on a sound financial footing.

Making prescription drug coverage available to all seniors is very important. Not only will that benefit keep seniors from having to choose between buying medicines and other necessities of life, it will help them stay healthier. As they stay healthier longer, hospital and other medical expenses should be less.

This bill includes reforms of the system which are also important. Allowing all Americans to choose Health Savings Accounts gives everyone a new option to pay for health care and could help stem the tide of rising insurance rates and rising health care costs. Beginning to consider income in calculating Part B premiums is a significant change in the law. Other provisions related to provider reimbursements and reducing the discrimination against rural health care providers are worthy of support.

I am concerned that the total cost of this bill is vastly underestimated, as has happened before in Medicare. There are payments or tax credits for virtually every group interested in health care, yet of all of the groups affected by this bill, I worry that the interests of those paying the bills, especially future taxpayers, are given the least consideration.

So, we are left weighing the benefit of modernizing Medicare and some reforms versus the danger that this bill will hasten the day of Medicare' collapse. It is not an easy judgment to make.

It is clear that if we do nothing, millions of seniors will go without the prescriptions they need and that none of the reforms essential to Medicare's survival will occur. We must begin somewhere. Reluctantly, I have concluded that this most imperfect bill is at least a place to start.

If we are honest, we have to admit that this bill is something of a gamble. We are betting that the limited reforms begun here will flourish and work to strengthen Medicare for the 21st century. If we are wrong, the added benefits and payments may sink the entire program. Tonight, I choose to vote with my hopes rather than my fears, prayerfully mindful of both my parents and my children.

Mr. UDALL of Colorado. Mr. Speaker, I want to support a Medicare drug bill, but I can't support this bill. Instead of giving us a foundation to build on, I believe it will compromise the effectiveness of a very popular healthcare program for seniors in order to deliver an inadequate, unreliable and unfair drug benefit. Under this bill seniors will pay higher premiums, higher deductibles and higher prices for drugs. It will force seniors into HMOs, and millions of seniors will lose drug benefits that they get through their retirement plans. Instead of crafting a drug bill, the Republican leadership has used the opportunity to dismantle Medicare and turn it over to private insurance and drug companies.

I have long believed that Congress should act to help seniors with their prescription drug expenses. Congress should give seniors greater choice in coverage, but it should not force seniors into HMOs in order to get a drug benefit. Colorado could be chosen as part of the demonstration project under this bill, which would force seniors into HOMs in order to get the drug benefit. According to a recent analysis by the Department of Health and Human Services, most seniors would see increases in their premiums with some facing increases as high as 88 percent. Colorado seniors would pay some of the highest premiums in the country. For example, seniors in Adams County, CO would pay $100 a month while seniors in some parts of North Carolina will pay $58 a month. Why should Coloradans pay higher premiums than seniors in other parts of the country for the exact same benefit?

It's no wonder that seniors in my district are skeptical about this plan. Let's not forget, we tried private competition in Medicare when HMOs were allowed to participate in the program as a result of legislation that passed in 1997. Seniors were told that managed care was better able to deliver healthcare services to them. Managed care aggressively courted seniors to join Medicare+Choice plans and then dropped them because they couldn't make a profit. That left millions of seniors searching for doctors and coverage. Now, this bill includes billions of dollars in subsidies to managed care to provide coverage. If privatization is such a good idea, why do insurance companies need these large subsidies in order to participate in Medicare?

There are a few provisions in this bill that I support, such as the payment increases for hospitals and physicians and other providers. In fact, I have consistently voted to increase provider payments and I have cosponsored legislation to change the flawed formula upon which these payments are based. But those payments should have been brought up separately rather than as part of the Medicare bill.

It is grossly ironic that Medicare will pay for a senior's care following a stroke but will not pay for the anti-hypertension drugs that prevent them. The time is ripe to pass a Medicare prescription drug benefit, but not as proposed in this legislation. I had hoped that we would vote on a bill that created a fair, workable, financially sound prescription drug benefit. But I am not willing to set in motion forces that will lead to the destruction of a program that seniors and the disabled have trusted for nearly 40 years in exchange for a feeble prescription drug benefit. We should work to get it done right rather than get it done right now.

Mr. BUYER. Mr. Speaker, the measure before the House tonight, the conference agreement on the Medicare Prescription Drug and Modernization Act, H.R. 1, is not a perfect bill. But, it is also not the bill that I opposed several months ago when the House first considered the measure. As with any conference agreement, this bill is a product of compromise and negotiations. It is an improvement in the House-passed bill in some respects, a disappointment in others. Nonetheless, I think it is time to end the debate on a prescription drug plan in Medicare and move forward.

While this bill has some troubling flaws, it does take major steps forward in improving access to health care of our nation's seniors. It serves as a blueprint for enhancements to Medicare that will enable Congress to resolve the long-term solvency issues in Medicare's structure.

Reform cannot occur in a vacuum. We must be vigilant as we take these necessary steps to reform Medicare to provide greater choice and health care services to beneficiaries.

This measure will require close scrutiny by Congress to oversee the implementation of the drug plan to insure that it provides cost containment and prevention of drug overutilization. The provisions before us to enhance Medicare are likely to require annual maintenance by Congress.

If the provisions of this bill that expand Medicare Advantage plans, that improve Medical Savings Accounts in Medicare, and that create Health Savings Accounts, are successful in the marketplace, beneficiaries will have alternatives to government-run health care and greater choices to meet their health care needs.

I applaud the inclusion in this bill of provisions to address the needs of rural providers, especially rural hospitals. Under this bill rural hospitals will see an equalization on reimbursement on inpatient care as compared to their urban counterparts. This bill includes provisions which I have urged that give Critical Access Hospitals more flexibility in their bed limits. I also applaud the conferees for including a provision that will enable hospitals to seek a reconsideration of their classification. The bill also extends Medicare cost contracts until Medicare Advantage plans are available. These are good provisions that will directly address patient care in my district.

I am also pleased to see the inclusion of regulatory reforms that this House has passed twice.

Finally, the bill gives seniors help with their prescription drugs almost immediately by authorizing a discount drug card. In a serious level of effort, I worked with four of my colleagues in drafting legislation to add a drug card to the Medicare program. Under our approach seniors would have been able to choose from a variety of discount drug cards available at a very low annual fee. We also included funds for seniors, based on income, to help seniors pay for drugs; a catastrophic limit; and a mechanism for seniors to save and for others to help seniors pay for their drugs.

Frankly, I think this is a better approach and I would have preferred to see it made a permanent feature of this bill, rather than expiring at the end of 2 years. Nonetheless, the discount drug card provisions of H.R. 1 do incorporate many of the ideas that my colleagues and I advocated. It would be my hope that Congress will see the wisdom of extending the drug card program.

I am troubled by the present fallback provisions, by the extent of the subsidies permitted under the bill, and by the uncertainty as to whether Medicare will be adequately reimbursing physicians for providing care to patients needing injectable drugs. I am also concerned that this bill still does not effectively keep the costs in-line with the ability of the taxpayers to fund the benefits.

Nonetheless, the bill, on the whole, is more positive and I am fully aware that Congress will have to tackle difficult issues down the road, however, I will support H.R. 1, to add a prescription drug benefit to Medicare and create long-term solutions to solve access, choice, and solvency of Medicare when baby boomers become seniors.

Mr. BEREUTER. Mr. Speaker, this Member wishes to add his support for the Medicare conference report and would like to commend the distinguished Chairman of the House Ways and Means Committee (Mr. THOMAS); the distinguished Chairman of the House Energy and Commerce Committee (Mr. TAUZIN); and the other Medicare conferees for their leadership, expertise, and good efforts on this comprehensive Medicare reform package. This Member would especially like to thank the distinguished gentleman from California (Mr. THOMAS) and his staff for the time he spent briefing this Member on the rural health provisions as Medicare conference negotiations were taking place and for his work to bring greater equity to the rural health care delivery system.

This measure may well be one of the most complex and important bills that this Member has ever had to consider during his tenure in Congress. Although the conference report lacks immediate controls on the high cost of pharmaceuticals—the market-oriented and pro-competition cost-containment provisions provided for the existing Medicare program are critically important reforms. The conference report makes Health Savings Accounts available for the first time ever to all Americans, and includes the undoubtedly controversial, but necessary means-testing of Part B premiums on a sliding scale, beginning at

$80,000 (for singles). The rural health care reforms are also exceedingly important for millions of Americans. The conference report is certainly not perfect, for the prescription drug benefits may be both unaffordable and a huge disappointment to the intended beneficiaries. Yet, the Medicare reform and greater Medicare equity for citizens of rural and non-metropolitan areas make this conference report on H.R. 1 worthy of an "aye" vote. Congress will have ample time and opportunity to address concerns, enhance, revise, and improve upon this historic legislation.

Until this year, there has been nothing but gridlock and delay in terms of how to reform the Medicare program. The Medicare conferees worked long and diligently to develop the Medicare reform agreement before us today. We cannot afford to let this prospect of Medicare reforms slip away.

Mr. Speaker, the rising cost of prescription drugs has become an issue that simply must be addressed. Senior citizens in Nebraska and throughout the United States should not have to compromise their quality of life or their health because the cost of their prescriptions is more than their income allows. Without an end to the ever higher prescription drug cost—the product largely of huge international cost-shifting onto the backs of American consumers—the prescription drug benefits we are adding will cost more than the $400 billion allocated—it will quickly be too expensive for our Nation to bear, even with Federal taxpayer funds. Therefore, this Member is very concerned that the measure lacks immediate restraints on the high cost of pharmaceuticals.

This Member is extraordinarily disappointed, but not surprised, with the intentionally unimplementable reimportation language included in the conference report. Drug re-importation from Canada was not the best approach to meeting the problem of escalating drug costs and it could be only an interim approach, but it is the only tool now available. The provisions of the bill allow for the importation of drugs from Canada, but the measure contains language in which the Department of Health and Human Services can say it cannot responsibly or legally implement the provision, as it has done on two previous congressional efforts. This language is the "poison pill," and it is wholly unsatisfactory.

Mr. Speaker, it is additionally important that the conference agreement authorizes $50 million for fiscal year 2004 for the Agency for Healthcare Research and Quality (AHRQ) to conduct research on health care outcomes, comparative clinical effectiveness, and appropriateness of health care items and services—including prescription drugs. This Member has been a strong advocate for such research, as evidenced by his amendment to the Labor, Health and Human Services, and Education appropriations bill (H.R. 2660).

Americans deserve the best health care for their dollar. Clinicians, patients, and those financing health care services need credible, objective information on the benefits, risks, and costs of prescription drugs so that they can make informed decisions about the prescriptions they consume and prescribe. Consumers need information regarding the effectiveness, quality, and cost-effectiveness of new drugs, in comparison with existing alternatives, especially when new drugs can cost much more than those now on the market. This Member is pleased that the conference report language authorizes the AHRQ to conduct such research and that comparative clinical effectiveness is referenced but is concerned that cost-effectiveness is also not mentioned.

Mr. Speaker, in addition to adding a long overdue prescription drug benefit to the Medicare program, the conference report provides for robust reform of the rural health care delivery system. It is the best bill ever for the health care of citizens living in rural and non-metropolitan areas; it moves them to a more equitable position with respect to their urban counterparts.

This Member is extremely pleased that the Medicare conference report includes a substantial amount of funding specifically for rural areas and small communities. As the Interim Co-Chair of the House Rural Health Care Coalition, this Member has been working diligently to address rural health care issues and the needs of those individuals who practice, work, and live in rural areas. This conference report includes funding that is dedicated to assisting community hospitals, outpatient facilities, home health agencies, skilled nursing facilities, ambulance service providers, rural physicians, and other skilled health professionals. Such funding is crucial for cash-strapped rural facilities which are near a breaking point and in need of urgent aid.

This Member is especially pleased that the Medicare conference report includes language to address the significant differential in Medicare reimbursement levels to urban and rural skilled health care professionals. For the past 2 years, this Member has introduced the Rural Equity Payment Index Reform Act to assure that physician work is valued, irrespective of the geographic location of the physician. The Medicare conference report establishes a 1.0 floor on the Medicare physician work adjuster from 2004 to 2006, thereby raising all localities with a work adjuster below 1.0 to that level. This is a huge victory for this Member, my very able legislative assistant, Ms. Michelle Spence, for Nebraska, and for all Medicare localities with a physician work adjuster below 1.0.

Several other provisions are included in the Medicare conference report to assist rural areas physicians and other skilled health professionals. For example, the measure protects senior citizens' access to physicians by replacing a 4.5 percent across-the-board physician payment cut—scheduled to take effect on January 1, 2004—with 2 years of payment increases. Additionally, this Medicare agreement provides a five percent bonus payment for primary and speciality care physicians who practice in scarcity areas.

This Member is also pleased that the Medicare conference report addresses hospital payment disparities to ensure that facilities in rural areas and small cities can stay in business and continue serving patients who need care by permanently extending the standardized base payment. This policy will help maintain access to care in rural and less populated urban areas of the country by better aligning hospital payments to actual costs. The estimated impact of eliminating the base rate differential will result in $26.7 million over 10 years for Nebraska hospitals in the First Congressional District, according to the American Hospital Association.

Additionally, the Medicare conference report lowers the labor share of hospital wage index to 62 percent. This change will increase inpatient reimbursement for many rural hospitals and will more accurately reflect the labor costs of many rural facilities. According to the American Hospital Association, this provision would bring $3.3 million over 10 years to the First Congressional District of Nebraska.

Several other provisions are included in the Medicare conference report to address rural hospitals. For example, the agreement increases disproportionate share hospital payments for small rural and urban hospitals and increases critical access hospital payments to 101 percent of reasonable costs.

Mr. Speaker, in closing, this Member supports the Medicare conference report. It finally gives the American people some of the critical reforms that are essential if the system is to avoid fiscal disaster or unaffordable burdens on American employers and employees. And, on what is a gamble, at least until we reduce the huge international pharmaceutical cost-shifting onto Americans, it will provide senior citizens with access to prescription drugs when they need them most and it will greatly improve health care for Americans living in rural areas.

Mrs. MALONEY. Mr. Speaker, the seniors in my district have made their views on Medicare clear.

They believe that it should provide the same coverage for prescription drugs that it does for doctors' appointment and hospital stays. And they think that they should no longer pay the highest prescription drug prices in the world.

Unfortunately, however, the bill before us will provide inadequate benefits that would leave half our seniors paying more out of pocket for prescription drug coverage than they do now. And it contains a gap in coverage that will leave half of seniors without any drug coverage for part of the year.

Just as bad, this bill will impose a global ceiling on the size of Medicare. If the overall cost of the Medicare program exceeds a predetermined cap, Congress will immediately be forced to slash benefits or hike premiums for those currently on Medicare.

To add insult to injury, this bill will undermine initiatives to cut the cost of prescription drugs. It would bar by law any effort by the Secretary of Health and Human Services to try to negotiate with pharmaceutical companies to lower prescription drug prices.

This bill will undermine and ultimately destroy Medicare as we know it.

It's not a magic potion. It's a poison pill.

I urge my colleagues to vote "no."

Mr. LANGEVIN. Mr. Speaker, I rise today gravely disappointed by, and opposed to, the Medicare Modernization and Prescription Drug Act of 2003. The 108th Congress has squandered our best opportunity yet to provide a meaningful prescription drug benefit for our nation's seniors. I am outraged that the republican leadership has taken advantage of the public's cry for medication coverage. They have used the demand to exploit the elderly, funnel money to drug and insurance companies and privatize Medicare. Sadly, this debate

is no longer simply about a prescription drug benefit. This debate is about the survival of the health care system that has been serving and protecting our seniors since 1965.

In a striking divergence from the universal nature of Medicare, the conference report we are voting on today establishes a system wherein seniors rely on private, drug-only companies to administer their drug coverage. Each of these companies will develop their own rules about premiums, deductibles and what medicines are covered. The standard this bill sets for the companies only offers 75 percent coverage of the costs up to $2,250—and no coverage at all until the expenses then reach $5,100. During that significant gap in coverage, seniors will still be responsible for paying a $35 monthly premium. Even more infuriating, that premium will not count toward their out of pocket expenses, making it take even longer for them to reach the catastrophic level. The Republican conferees claim to offer help for the poor, and indeed, premium subsidies are available to individuals earning less than $6,000 a year or couples earning less than $9,000. But these vulnerable, low-income seniors must first meet a strict assets test, where cars, burial plots and even wedding rights will be counted as assets. Additionally, I remain deeply concerned that the legislation fails to include a meaningful fallback plan seniors can rely on if private companies fail to emerge in their area, an all too likely scenario that it is our duty to protect against.

The prescription drug component of this bill contains a particularly troubling provision that strictly forbids the Secretary of Health & Human Services from using the bulk purchasing power of Medicare beneficiaries to negotiate for lower drug prices for senior citizens—a tactic that has proven effective in the state programs, as well as 25 other industrialized nations. America's seniors have made it clear that they want the government to assist them in obtaining their prescription drugs at a fair price. It infuriates me that that we have over 40 million people with a common and basic, need, yet instead of taking advantage of that power to secure lower prices for the most rapidly increasing component of health care, the Federal Government, under the proposal put forward, would outlaw that practice. This tremendous missed opportunity makes it clear to me that this bill was written with the interests of drug companies, not America's seniors, in mind.

The problems with this conference report go far beyond the inadequacy of the drug benefit. This bill not only fails to meet the needs of seniors and jeopardizes the retiree coverage used by 12 million Americans, it also lays a strong foundation for the demise of the Medicare program as we know it. Beginning in 2010, this agreement will expose millions of seniors to new cost and benefit uncertainties in as many as six large metropolitan areas, possibly including my home state of Rhode Island and neighboring Massachusetts.

This vast demonstration project, which will involve up to 7 million seniors, will subject Medicare to competition with private companies, coercing seniors into HMOs and private plans. These private companies will be given huge financial incentives to offer health coverage for seniors, funneling critical resources away from Medicare and those who rely on it. If a senior wishes to stay in the Medicare program, he or she will be required to pay the difference between the cost of the private plan and the cost of Medicare—which will, no doubt, skyrocket as private plans court the healthier seniors out of Medicare, leaving Medicare the more costly task of providing for a sicker, poorer risk pool. This plan breaks the fundamental promise of Medicare. It replaces a guarantee of quality health care with increased premiums, provides a voucher for health insurance, and leaves seniors and people with disabilities to fend for themselves in a market where they may not be able to find a health care plan that meets their needs. Medicare was created in 1965 because the private industry was unable to provide adequate health coverage for this population. The virtue of the system is that it creates a large risk pool. Injecting private competition, and subsidizing that competition with billions of taxpayer dollars, will leave the healthiest seniors with the ever-changing and unstable options of private plans, and will resign those who are not as fortunate, our most vulnerable population, to an even more uncertain fate.

Seniors in Rhode Island, and no doubt the rest of the country, will see through this scheme. My constituents remember the devastating effect of the abrupt departure of Harvard Pilgrim, an HMO that covered over 150,000 Rhode Islanders. The scramble to find a health insurance plan that would allow patients to keep their doctors, and the struggle to understand new sets of benefits that followed Harvard Pilgrim's exit from our state would be replicated on a regular basis in the regions affected by the so-called demonstration project contained in this bill.

I must also touch upon the issue of provider relief. I am a strong supporter of doctors and hospitals that serve Medicare beneficiaries, and voted three times this year in favor of striking the premium support provision from this bill and using that money to update provider payments instead of subsidizing private companies. The conferees failed to take this approach, instead providing some temporary relief to providers for the upcoming year, but no long term fix to the systemic problem that plagues doctors and hospitals year after year. Providers are already overburdened by Medicare-related paperwork and receive lower-than-average reimbursement rates for their services. Should the premium support provisions in this conference report become law, providers will be forced to negotiate new terms for payment annually with every private plan that emerges to serve Medicare beneficiaries in a region. This bill signs away the rights and responsibilities Congress currently has to these providers, leaving decisions about provider payments up to the CEOs of insurance companies. The high turnover rate of providers in participating Medicare + Choice plans signals the instability this will cause, for providers and patients alike.

In this year's debate over Medicare, once again, Congress has lost sight of what the public has asked for, and what American seniors need. Our seniors are choosing between paying their rent of buying food and obtaining the medication they need to stay alive. They need relief from prescription drug costs. They do not need the additional challenges, burdens and costs of navigating through a system of HMOs, subjected to a different plan, a different doctor and higher premiums each year. Our Medicare providers need a fair payment system over the long term. All Americans need their government to take action against the soaring cost of prescription drugs. Given the opportunity to make a difference in each of these areas, the Republican leadership chose to put their resources and their trust in the hands of insurance companies and drug companies. This Is a matter of priorities and principles. I urge my colleagues to make American seniors our priority, vote no on the conference report and immediately begin to take meaningful steps to solve these problems.

Ms. HOOLEY of Oregon. Mr. Speaker, over the last 7 years, Oregon seniors have told me that their top concern is the high cost of prescription drugs coupled with the lack of coverage for these lifesaving medicines under the Medicare program.

Regrettably, the bill before us today does nothing to address the high cost of drugs, and it comes at too high a price for coverage. Many seniors would lose the expanded coverage they currently have through their retirement and many others couldn't afford the high premiums, deductibles and gaps in coverage.

Despite the hard work and good intentions of many members of Congress on both sides of the aisle, we have lost the forest for the trees.

And so I rise today in opposition to the conference report on H.R. 1.

In August, I sat in the House gallery with some guests as the reimportation bill came to the floor. We sat with a group of interns and junior staffers. Along the back wall was a line of representatives of the pharmaceutical industry. It was an interesting mix.

From that unique vantage point, we watched members on the floor who were not speaking to represent "sides of the aisle," but who joined together across the aisle to form the People's House. It was an interesting perspective on the situation.

You couldn't necessarily tell what anyone's party affiliation was by the impassioned way they spoke about an issue that cuts across party lines. The vast majority of us were adamant about fighting for the people we represent back home who are no longer willing to tolerate the fact that people in Mexico and Canada can get their drugs for less than Americans.

That bill passed overwhelmingly, and yet this conference report has failed to include drug reimportation. It has failed to address the elephant in the middle of the living room: the high cost of drugs.

Seniors can't afford drugs, and they can't afford high priced coverage, or loss of coverage they currently enjoy.

Unfortunately, when we were closest to getting agreement on making medicines more affordable for all of the Nation's seniors, the pharmaceutical companies, who make the lifesaving drugs that patients need, killed every attempt to allow Americans to benefit from the same low drug costs that other countries enjoy.

They also made sure that this legislation specifically prohibits the Medicare program

from negotiating the prices of drugs, a power that even other government agencies, such as the Department of Veterans' Affairs, have. Why? Because seniors would finally have the leverage to lower drug costs for themselves in this country. They would make one heck of a purchasing pool.

And, when we were closest to getting agreement on improving coverage for everyone, the conferees failed to adequately protect retirees' health coverage. Unfortunately, somewhere along the way we forgot that this isn't just a pharmaceuticals bill, this is a seniors' bill.

We lost sight of what senior's struggle with most . . . drug costs and the cost of coverage. And believe me, seniors themselves have noticed that we've lost sight of them.

Take 79-year old Ruth Beale of Portland who was just diagnosed with Parkinson's disease who writes: "I still work 3 days a week as a companion to a 103 year-old. This gives me just enough cash to pay the $300/month for my prescriptions. Of course that doesn't include the pain medication for the Parkinson's, my doctor gives me free samples when she can, though sometimes she runs out.

My Social Security check is barely enough to cover rent, (and I live in a subsidized senior apartment), food and the $72 per month for my Medicare HMO premium. Under this plan, I wouldn't get any help for my drug costs. I really can't afford to pay any more than I do now. So I guess I'll just keep on working until I can't anymore—I'm going to give this Parkinson's a run for it's money though."

And God bless her.

Although Dorothy Patch of Salem has supplemental insurance, she still pays over $230.00 per month out of pocket for her prescription drugs. Dorothy is concerned about being pushed out of the coverage.

Dorothy figures that she would actually pay more for her coverage if this legislation passes. Why?

1. Only 75 percent of her drugs would be covered up to $2,250 per year.

2. From $2,250 to $5,100 Dorothy would fall into the "donut hole" and not receive any coverage at all, while she is still responsible for paying a $250.00 deductible and $35.00 monthly premiums.

3. Even though under her current plan, Dorothy is paying $230.00 per month, there is no donut hole in her coverage and she is covered no matter how high her drug costs become per year.

4. She is using a fee for service system and does not want to be forced into an HMO.

The truth of the matter is that people who currently have no coverage would gain a little at a very high price, a cost that many who have contacted me say they cannot afford. For many in the district I represent, this legislation is a step backwards. For others, it is a sore disappointment that we were unable to slay the giant and make reasonably priced medicines within their grasp.

At the beginning and in the end, for me, this issue has always been about the high cost of drugs and the need to affordably expand coverage. Regrettably, this bill prohibits ways to lower drug costs for American seniors and, for many, the coverage provided in the bill comes at a high price they simply cannot pay.

I urge my colleagues to reject this bill, go back to the negotiating table and give seniors what they really need: affordable drugs and affordable drug coverage.

Mr. MATSUI. Mr. Speaker, I rise to express my strong opposition to the Medicare conference report before us today. It shortchanges seniors who have waited far too long for a comprehensive, affordable prescription drug benefit and it undermines the Medicare coverage they have counted on for almost four decades.

First, the drug benefit in this bill is woefully inadequate. Seniors will have to pay a $250 deductible before they receive any benefit, and there is a significant gap in coverage, or "donut hole", where seniors will continue to pay monthly premiums but receive no assistance towards the cost of their drugs. In fact, a senior with $5,100 in annual drug costs would pay $4,020 of that cost out of their own pocket.

The fact that seniors have to pay 80 percent of their first $5,100 in drug costs is appalling. But, it doesn't stop there. This bill does nothing to lower drug prices. To the contrary, it explicitly prohibits the government from using the collective purchasing power of more than 40 million seniors to negotiate lower drug prices. So, not only does this bill make seniors pay 80 percent of their first $5,100 in drug costs, it prevents the use of reasonable tools to bring those costs down.

Now, let me address for a moment the 12 million retirees who already have health insurance from their former employers. The Congressional Budget Office estimates that this bill will cause 2.7 million of them to lose their existing coverage. This happens because the bill excludes employer contributions from counting towards the prescription drug catastrophic cap. This will incentivize employers to reduce their coverage to the level in this bill or drop it altogether to avoid having to pay the cost of prescription drugs in the donut hole.

Finally, this bill undermines the fundamental commitment of Medicare to seniors. Beginning in 2010, Medicare will be forced to compete with private companies for the provision of all Medicare and prescription drug benefits. Often referred to as "premium support" or "privatization", this provision shifts Medicare from the guaranteed, defined-benefit program it currently is to a defined contribution plan. Under this legislation, privatization is aided by almost $20 billion in subsidies to insurance companies and HMO's, creating a competitive advantage that allows them to attract healthier seniors, leaving sicker or chronically ill seniors in Medicare. The result will be a Medicare program that is unaffordable for the seniors who need it the most.

Mr. Speaker, as we consider the merits of this legislation, it is critical to look at the history of health coverage for seniors in this country. Medicare was created in 1965 because seniors were unable to find health insurance in the private marketplace. The bill before the Congress today would return us to that very same scenario and I urge my colleagues to vote against it.

Mr. CASTLE. Mr. Speaker, I rise today in support of the Medicare Prescription Drug Conference Report, and thank all the Conferees for their dedication to providing relief for our seniors. This landmark legislation updates Medicare and finally brings the program into the 21st Century by modernizing the program and providing a prescription drug benefit. While not perfect, this bill presents us with an historic opportunity of providing 40 million Medicare beneficiaries with relief in the face of rising prescription drug costs. Every member of this body has identified health care reform as a top priority and now we have the opportunity to make progress. The reality is clear—every year we postpone this debate and fail to compromise on a Medicare and prescription drug bill, while the burden of drug costs on seniors continues to increase.

In 1965 when the Medicare program first began, the average senior's spending for prescription drugs was $65 a year. In 2002, overall spending had risen to $2,149—a 35-fold increase. The average retail prescription price increased more than three times the rate of inflation from 1998 to 2000. Over 60 percent of seniors spend more than 1,000 per year on prescription drugs and of those seniors, 17 percent spend more than $5,000. And with 80 percent of retirees using a prescription drug every day, the expense for many is out of reach. These statistics clearly show the transition of patients relying mostly on hospitals and physician for their health care needs to patients relying more on prescription drugs as measures for health treatment and prevention.

The bill aims to make prescription drugs more affordable and more accessible by creating a voluntary prescription drug benefit. For the first time, since the creation of the Medicare Program, seniors, no matter where they live, will be able to receive financial assistance to help pay for these drugs, which are becoming increasingly integral to disease prevention, management and treatment. Seniors can keep whatever drug coverage they have now, choose a private plan or stay in the traditional Medicare program.

Once the benefits is in place, Medicare will pay 75 percent of seniors' drug costs up to $2,250 per year, with a $250 deductible and a monthly premium of $35. With the CBO estimate indicating that the average senior will spend $1,891 on drugs in 2006, I think most seniors will find this to be a strong improvement. Importantly, this legislation provides the most generous benefit to the lowest income seniors. These seniors do not pay a premium, nor do they have a deductible and there will not be gaps in coverage for the drug benefit.

This bill also takes strong steps towards preparing Medicare for future challenges, such as being equipped to meet the needs of retiring baby boomers. We offer new preventatives measures including an initial physical and certain preventative benefits such as diabetes and cholestrol screening as well as chronic care disease management. These common sense reforms are long over due—who can believe that Medicare was not covering an initial physical for our seniors? Encouraging beneficiaries to participate in preventive and early detection programs can not only improve their immediate health, but has potential to save billions in future healthcare costs.

Another key component of this legislation are incentives for employers to retain and enhance retiree coverage. During the debate in both the House and Senate a significant

amount of time focused on employer-based coverage. With increasing costs of health care as a whole, it is logical that employers are looking for a way to reduce their overhead. Most likely, retirees who tend to be more costly than younger, healthier workers, are targeted for cost cutting measures. These are concerns that provisions would be included in this legislation to allow employers to drop coverage based on age, but fortunately, due to the work of many, that did not happen.

One-third of all Medicare beneficiaries currently have prescription drug coverage through their former employers. Retirees want to keep that coverage and frankly, I believe they should be able to make that choice for themselves. This legislation provides a percentage subsidy to employers who maintain coverage for their retirees, which also saves Medicare money. Specifically the legislation will provide a federal subsidy to employers equal to 28 percent of drug spending by their retirees between $250 and $5,000. This applies not only to private companies, but also to state governments, and unions, like teachers unions, which often have very generous retiree packages. Of course, this is not a fail-safe solution. The higher costs associated with retiree health care coverage is an expensive matter for most corporations, unions and other providers. But, we hope that these incentives will help curtail the problem.

Importantly, this legislation also contains numerous provisions intended to speed the entry of generic drugs into the market by preventing multiple 30-month stays by brand drugs and incentives for generic manufacturers to challenge weak or inappropriately listed patents. Generic drugs often provide consumers with a low cost alternative and I hope that the medical community will continue to make efforts to inform patients about the availability of generic drug options.

We also address the reoccurring problem of physician fee cuts by increasing reimbursements by 1.5 percent instead of earlier proposals to cut them by 4.5 percent. I have spoken to a lot of doctors in Delaware who said these cuts were likely to put them out of business. With the rising cost of malpractice premiums compounded by cuts in reimbursements, some physicians may have already been forced to close their doors, which clearly impacts all of us. However, this is only a temporary fix. We must now move forward to fix this physician fee formula that was laid out in the Balanced Budget Act so doctors are not strung along year in and year out worrying about this potential cut. I hope to work with my colleagues to ensure this formula is fixed in the coming years.

This legislation is not perfect and no one here today will tell you that it is. One of the major issues missing from this bill is a good faith provision allowing the reimportation of prescription drugs. Despite the overwhelming support in the House for true reimportation, this bill simply encourages the status quo by requiring the Secretary of Health and Human Services to certify the safety of these drugs coming from Canada. Essentially this is the current law of the land, yet we do not see pharmacists and wholesalers importing drugs from Canada and passing those savings on to consumers. Seniors will be forced to continue the bus trips to Canada and mayors and governors will continue to negotiate agreements with Canada, until we truly address our prescription drug costs. This bill does include a study to research the major safety and trade issues regarding reimportation, and I hope it will be conducted in good faith and in a timely manner so we can return to this important discussion.

I also have serious concerns about premium support and forcing Medicare to directly compete with private insurance plans because I believe it can lead to higher costs for those seniors who choose to stay in Medicare. While I believe the demonstration language in this legislation is far less disconcerting than a full premium support provision, I will continue to monitor this closely. In the end, we cannot undermine the basic tenets of the Medicare program, which has a history of providing an equal benefit no matter where seniors live. Varying premiums within and among states is surely not the message we want to send our seniors. Hopefully this demonstration program will yield positive results that drive costs down—only time will tell. I will work to ensure that Medicare is viable and that seniors who choose to stay in Medicare are protected.

I commit myself and I hope others will join me, in continuing to address the rising cost of health care, prescription drugs and the rising ranks of the uninsured. According to the U.S. Census Bureau, an estimated 15.2 percent of the population or 43.6 million people were without health insurance coverage during the entire year of 2002, up from 14.6 percent in 2001. That is an increase of 2.4 million people. What's even more disconcerting is the percentage of people who are employed but lack health care coverage. That number dropped from 62.6 percent to 61.3 percent. However, these are clear and challenging issues that we must address in the upcoming session.

Despite these and other concerns I have, I am supporting this legislation because I believe it provides desperately needed relief to Americans suffering from their overwhelming health care costs. American seniors have waited long enough for this assistance and I encourage my colleagues to provide them with the immediate relief in this bill.

Mr. RODRIGUEZ. Mr. Speaker, I rise to express my strong opposition to the Medicare Prescription Drug Conference Report that we will be forced to vote on today. This bill has been crafted behind closed doors with the help of those corporate interests which will most benefit. Unfortunately, the bill they have created offers nothing more than empty promises to our Nation's seniors.

Medicare was built on the principle that all seniors should have access to health care, regardless of how much you make or where you live. And for over forty years, this program has successfully worked to provide access to health care, offering hope and security to America's seniors. As the nature of health care has changed over the years, however, we recognize there is a need to improve upon the program and address the prescription drug price crisis.

Seniors that I have met with back home have asked that I fight for a prescription drug benefit under the traditional Medicare plan and that is exactly what I have done. Over the years, I have worked to enact legislation that would establish a guaranteed and affordable prescription drug benefit for all Medicare beneficiaries.

The industry-backed bill that Congress will vote on today falls far short of a benefit that will truly fit seniors' needs. While the bill provides $112 billion to entice managed care companies to participate in the program, seniors will receive little assistance with their drug costs. For the first $2,000 of coverage, the consumer will pay over $1,100; for the first $5,100 of coverage, the consumer will pay approximately $4,000. Put another way, if a consumer buys approximately $5,100 of drugs a year, the consumer will pay nearly 80 percent of that cost.

Despite the $400 billion price tag, millions of retirees and low-income beneficiaries will find themselves in an even worse situation. Up to 6.4 million of the poorest and sickest Medicare beneficiaries, including close to 390,000 Texans, could have drug coverage reduced. The bill prohibits Medicaid, the nation's low-income health insurance program, from helping with co-payments or paying for prescription drugs not on the formularies of the private insurers administering the new Medicare benefit. And 2 to 3 million seniors could lose retiree prescription coverage, including at least 132,000 Texas retirees, due to a provision that lowers Medicare assistance to employer-sponsored retiree health plans.

Furthermore, by relying on private companies to deliver a benefit, we force seniors into the arms of the health insurance industry. We have learned all too well that private Medicare insurance plans do not work. In the early 1990s, Medicare HMOs were touted as the way to control escalating costs, but by the end of the decade, private plans abandoned thousands of seniors in rural regions. Over the past couple of years, Medicare+Choice beneficiaries in metro areas have faced dramatic increases in premiums and co-payments, and reduced benefits. Given that the Republican Medicare bill does not guarantee a defined premium and plans will have substantial flexibility to create their drug benefit, millions of beneficiaries will face the same situation in the years to come.

Lastly, this bill forces us down a path towards privatization. By employing measures like the voucher-type premium support system and the creation of an overall budget cap, we end Medicare as we know it. Congress established Medicare to rescue seniors from the failure of the private sector to offer insurance or health coverage. Now we are going back.

This 600-page measure will produce the biggest change to our safety net system in over forty years. The crafting of the legislation was done behind closed doors with the help of special interest groups. Incredibly, most Members of Congress have had less than twenty-four hours to pore through the pages and analyze how the bill will truly impact America's seniors.

I understand there are important provisions in this bill for certain hospitals and providers such as increased Medicare reimbursement rates for physicians and an increase in the Medicare DSH cap for rural hospitals. I have supported similar measures in the past either

by cosponsoring legislation or voting in support of such legislation.

However, there are also provisions in this bill that will hurt patients tremendously. The Medicare bill still contains drastic cuts to our nation's cancer care system. Despite several efforts by the cancer community to reach a compromise, the bill will deprive America's cancer care system of $1 billion a year. A cut like this will be devastating to cancer care. If this happens, many cancer centers will close, others will have to admit fewer patients, and still others will lay off oncology nurses and other critical support staff.

Mr. Speaker, I urge my colleagues to vote against this bill. I do not agree with those who say something is better than nothing. I say a bad bill is worse than no bill at all. This proposal goes against the fundamental principles of a program created to serve all seniors. Let's not give America's seniors more bad medicine. Reject the Republican plan and adopt one that provides real coverage for all seniors.

Mrs. TAUSCHER. Mr. Speaker, "I strongly believe that seniors deserve and need a prescription drug benefit that's part of Medicare. I believe we should strengthen Medicare by adding drug coverage that will save seniors money and preserve the choices that matter. I will vote against this bill because it does not get us where we need to be.

"This legislation prohibits Medicare from negotiating lower drug prices; gives big drug and insurance companies $82 billion in subsidies just to compete with Medicare; and will privatize Medicare by pushing seniors into HMOs.

"I introduced a bill that would have provided immediate, real drug discounts to all seniors without turning over part of Medicare to HMOs. Unfortunately, it was not brought to a vote.

"There are many serious problems with the bill being debated today that people are trying to sweep under the rug. Up to a quarter of seniors on Medicare would pay more for prescriptions than they do now. Up to seven million seniors would pay higher Medicare premiums unless they join an HMO and give up their choice of doctor. Two to three million retirees would lose the drug coverage provided by their former employers. Millions of seniors would go without drug coverage for parts of every year, even though they would be charged premiums year-around. Seniors would be prohibited from purchasing American-made drugs from Canada at lower prices. After they have spent $1,169 on prescription drugs, seniors will have to pay their full drug costs until they reach $3,600 in drug expenditures.

"I am deeply suspicious that this bill, written almost entirely by Republicans, put the special interests of HMOs and pharmaceutical companies over seniors' interests. It will give $82 billion to private insurance companies so they can compete with Medicare, yet Medicare will be forbidden from negotiating lower drug prices with drug companies and competing in the same way. Even AARP has a financial stake in this bill. The company derives almost 60% of its annual revenue from selling insurance products. If they capture even 10% of the prescription drug market, their profits would be $1.5 billion.

"As a former investment banker, I know risk management. The magic of Medicare is that everyone has always been in the pool—the wealthy and healthy as well as sick and lower-income seniors. This bill will turn that on its head—driving the healthy and wealthy out of Medicare and creating large tidal pools in which sick and lower-income people are left without anything.

"It is a bad bill that will hurt millions of seniors and not really benefit anyone but the drug and insurance companies. I will vote against it, and I encourage all of my colleagues to stand up for seniors and do the same."

Mr. HOLT. Mr. Speaker, I rise in opposition to this legislation.

As my constituents in central New Jersey know, I have been working ever since I came to Congress to provide Medicare beneficiaries with coverage for the prescription drugs that improve their quality of life and often save or extend lives. Today we are considering a bill that purports to provide such coverage, but unfortunately fails on several counts.

I have pledged to the seniors in my district that I will not support any legislation that undermines Medicare, a program that has succeeded in providing adequate health care to tens of millions of seniors for nearly 40 years. That is why I cannot and will not support the proposal that is before us. We can do much better, and with something this important, we should not get it wrong.

First and foremost, this legislation would devastate the Medicare program. It forces several million seniors into private plans and lays the groundwork for privatizing the traditional fee-for-service program. In New Jersey alone, an estimated 186,000 seniors will be affected. We need to strengthen Medicare with a drug benefit, not use prescription drug coverage as a mechanism for dismantling the entire program. It is simply not good policy to spend $12 billion of taxpayers' money just to set up a for-profit competitor to Medicare.

Second, even after the government spends all this money, seniors will not even get a very good benefit. It is true that any level of assistance will be of some help to seniors, but the gap in coverage under this bill will leave most seniors still paying thousands of dollars out-of-pocket. In fact, seniors with high drug costs must pay over $4,000 to receive $5,100 worth of medications. For many seniors, after August or September or whenever their drug bills reach $2,250, they would get no benefit—even though they would continue to pay their monthly premiums.

Third, this bill clearly undermines the universal nature of the Medicare program. Everyone, no matter what his or her income level, pays Medicare payroll taxes, and everyone is entitled to an equal benefit. But under this legislation, many low-income seniors would be subject to an assets test to see if they qualify for low-income subsidies. I know seniors in my district will be up in arms when they hear they have to send in bank statements or declare the value of things they own, potentially even having to sell some to get the benefit.

This bill is also bad news for the 220,000 seniors who currently receive prescription drug coverage through New Jersey's highly successful Prescription Drug Assistance for the Aged and Disabled (PAAD) program. While the bill will allow the state to receive Medicare funds for its PAAD spending, it also means that seniors will not receive their prescription drugs in the same simple, reliable way they did under PAAD. Seniors may find themselves limited to a list of approved drugs and face other restrictions not imposed by PAAD.

The bill also fails our physicians and other health care providers. While it purports to solve the problem of insufficient reimbursements, it actually offers little more than a Band-Aid. Two years of a 1.5 percent increase will provide some small measure of relief, but Congress must still address the long-term problems inherent in the current physician payment system.

Health care providers should also be alarmed by the provision that triggers an automatic congressional procedure once general revenues make up an arbitrary proportion of Medicare spending. This means that a few years down the road, providers may find themselves facing drastically insufficient reimbursement levels, and seniors will find themselves with fewer benefits and fewer doctors willing to accept Medicare patients. One editorial writer noted that the spending trigger would sound an alarm if Medicare spending exceeds certain levels, but the bill itself does almost nothing to control spending.

This bill fails our seniors, and unfortunately, it will fail the test of history. We have a historic opportunity to craft a bill that genuinely helps seniors afford the medicine they need. Sadly, the Republican leadership has decided to write a bill that privatizes Medicare, moves seniors into managed care plans, leaves gaping holes in coverage, and puts current retirees' benefits in jeopardy. I will not support such a plan.

I urge the Congress to address this again in January. I firmly believe we can pass a bipartisan prescription drug benefit that is universal, voluntary, dependable, and affordable, if we make the choices that put seniors first.

Mr. SKELTON. Mr. Speaker, there is no truer indication of a nation's priorities than the investment it makes in the health of its citizens, particularly our senior citizens. Medicare was created nearly 40 years ago with a basic fundamental principle in mind: health care coverage should be guaranteed, affordable, and equitable to all seniors. Throughout the time I have been privileged to serve in Congress, I have worked to make sure Medicare remains strong for those currently benefitting from its coverage and for those who will rely upon its benefits in the years ahead. As a member of the Rural Health Care Coalition, I was pleased when the administration and congressional leadership announced earlier this year that providing a prescription drug program within the reliable Medicare system was a high priority for the 108th Congress. However, it has become clear throughout the year that efforts to provide a meaningful prescription drug benefit within Medicare were being undermined by a systematic attempt to destroy the Medicare program. I am disappointed that the bill before us today, H.R. 1, does just that, undermining the very foundation of Medicare while creating a confusing and inadequate prescription drug coverage program for rural Missouri's seniors.

As I visit with seniors throughout Missouri's Fourth Congressional District, it remains clear that they depend on Medicare for their health care. They understand Medicare and trust it

cannot be taken from them. Medicare is part of a health care contract with the senior citizens who brought this Nation out of the Depression, fought in our wars, and paid into the Medicare trust fund so they would have health coverage when they need it most. Unfortunately, H.R. 1 seeks to destroy the Medicare system on which these Americans have depended for nearly 40 years. Under this bill, in just six short years, millions of senior citizens in America could be coerced out of Medicare and into private insurance plans that generally don't do business in rural America. While the drafters of this measure explain that these private plans are simply a demonstration project and seniors don't have to participate if they don't want to, once the door is open to privatizing this vital government program, I am afraid it will not be closed.

It is also troubling that if these so-called demonstration projects take root around the nation as H.R. 1 prescribes, seniors within Missouri could be paying very different prices for the exact same health care benefit. It would create a very confusing situation, where folks in Versailles could pay more than citizens of Blue Springs or Lamar for their health care needs. Show-Me State seniors trust Medicare because they know that everyone participating in this program will pay the same rate for their health care insurance no matter where they reside. H.R. 1 undermines this fundamental principle, which could create even more disparity in the health care coverage of rural Missourians.

In addition to undercutting Medicare, I am concerned that the prescription drug portion of H.R. 1 will negatively impact seniors living in rural Missouri. This measure would require Medicare beneficiaries who wish to receive the new prescription drug benefit to enroll in private drug plans which rarely operate in rural America. These plans would be run by large insurance companies that would likely charge different premiums for the same prescription drugs. As an added benefit to large insurance companies, H.R. 1 would provide them with a $12 billion taxpayer subsidy while creating a $2,800 gap in prescription drug coverage for seniors. According to an article published in The Wall Street Journal on November 18, 2003, "for the drug industry, the legislation is good news, at least in the short run." This is just plain wrong.

For rural Missourians, H.R. 1 would also impose an assets test on low-income seniors who earn below 150 percent of the federal poverty level. Seniors whose income falls within this financial threshold may be forced to either pay additional prescription drug costs if their assets—their car, their farm equipment, or their acreage, for example—total $10,000 per individual or $20,000 per couple, or sell their possessions to get cheaper pills. Many seniors in rural areas rely solely on their Social Security checks to get by each month and they should not be forced to sell their belongings or their property to qualify for a more comprehensive drug benefit.

While I am dismayed that the leadership of this Congress would work to dismantle Medicare through this legislation, I am pleased that conferees were able to address Medicare reimbursement rates for rural doctors and hospitals. Through the years, I have worked with my colleagues in the Congressional Rural Caucus to boost reimbursements to those who provide health care in rural America. In fact, time and time again on the House floor, I have voted to instruct the conferees writing the Medicare bill to abandon divisive ideas of privatization in order to provide more adequate reimbursement to rural providers. Unfortunately, these motions were defeated each time.

Mr. Speaker, senior citizens throughout Missouri understand and trust Medicare. They have worked all their lives, paid their taxes, and contributed to a system that takes care of their health care needs. Medicare is a contract with our seniors that should not be broken. That is why I will oppose H.R. 1 and urge all my colleagues to do the same.

In the days ahead, I look forward to working with my colleagues in a bipartisan manner to provide senior citizens with a real prescription drug benefit that strengthens Medicare.

Ms. CORRINE BROWN of Florida. Mr. Speaker, today the Republican party will finally do what it has been trying to do for 35 years, destroy Medicare.

Claude Pepper, my mentor on health care issues, the most well known advocate for seniors, a man who fought for years and years to strengthen Medicare and Social Security, would be rolling in his grave if he were here today.

This is a life and death issue for many of our senior citizens, and this hollow bill does nothing for them.

A snake is a snake, no matter what color it is. And AARP is getting into bed with a snake, the Republican party, in supporting this bill. To the AARP leadership, I have some sage advice that my Grandmother used to tell me: "Those who sleep with dogs, wake up with fleas".

Each provision in this bill is one more nail in the coffin of a program that has guaranteed health care for this Nation's seniors for 38 years. Under the Republican plan, HMO's that offer an alternative to Medicare will pick and choose their customers, and get paid more than Medicare to do it. And yes folks, these are the same Plus Choice providers that are fleeing your districts in droves, and leaving your seniors with absolutely no healthcare options.

Even more disturbing is the fact that this bill prohibits, yes, prohibits, Medicare from using its bargaining power to cut drug prices.

What happened in the 2000 election is a U.S.A. coup d'etat. This is what happens when you don't have fair elections. Folks, it matters who is in the White House. This is entirely a Republican initiative, and their goal is to destroy Social Security and Medicare entirely. Their goals is not to modernize it, but to have it wither on the vine.

Mr. STRICKLAND. Mr. Speaker, today, this Congress is missing a golden opportunity to pass a real prescription drug benefit for all seniors. During the Energy and Commerce Committee's consideration of the prescription drug bill this summer, my colleagues and I offered many amendments that would have improved this bill to ensure that all seniors, regardless of where they live, have access to an adequate, affordable, reliable prescription drug benefit. But my Republican colleagues defeated our amendments and pushed through a partisan bill that will do little to give meaningful help to the middle income seniors who most need a prescription drug benefit.

In other words, Congress is passing up an opportunity to ensure that the retired, 68-year-old steelworker who had a heart surgery last spring and lost his retiree health insurance this summer, and who, along with his wife, has an annual income of about $28,000 can afford the prescription drugs they need to stay healthy. This bill does not even ensure that a person under these circumstances can access affordable prescription drugs from Canada or elsewhere in the world. For shame that we are passing up such an opportunity to do the right thing by our seniors.

The AARP says that the prescription drug bill we are considering today is better than nothing, that it's one foot in the door. I disagree. The voucher demonstration program in the bill lays dangerous groundwork for a privatization scheme that I believe will undermine Medicare's ability to provide a guarantee of health security for all Americans when they turn 65. In addition, the drug benefit created by this bill will force many seniors to private insurance plans for their drug benefit. My colleagues who support this bill say that seniors want "choice" and that the private plans will give them the choice they want. Well, the seniors I talk to want choice, but not choice of a private plan. Instead, they want choice of their doctor, pharmacist, and hospital; they want the ability to choose their treatment plan when they are sick and the choice to access preventive services to keep them as healthy as possible. If seniors in my district have the choice of a private plan, the Medicare safety net as we know it today is no longer there. This is especially true since the bill we are considering tonight doesn't require these private plans to offer a standard premium, deductible, or copayment—in fact, where these private plans have been tried, monthly premiums have ranged as high as $85 a month, not the $35 promised by proponents of this bill. I cannot overstate this: the bill we are voting on does not mandate a $35 premium.

Additionally, this bill includes a $12 billion slush fund to bribe private HMOs to participate in Medicare. This $12 billion is in addition to about $8 billion in huge overpayments to private plans. I believe that the billions we are spending in this bill in payments to private plans are simply to support an ideology of privatization that seeks eventually to destroy Medicare. This ideology is needless when you consider that traditional Medicare has both a strong track record with seniors and the amazingly low administrative overhead cost of only 2 to 3 percent.

It is for all of these reasons that I cannot support this bill. However, it does include some good provisions that I wish I could vote for today. I wholeheartedly support the physician and hospital provisions, particularly for rural providers. For the last 2 years, doctors have faced significant scheduled cuts in their Medicare reimbursements, leading some to stop-taking new Medicare patients or drop out of the program altogether. Especially in the current environment of high malpractice rates, rising medical school costs and medical school debt, rising overhall health care costs,

and a growing Medicare population, it is unacceptable for Congress to ask doctors to continue providing the same care for less money. And our rural hospitals are struggling to maintain their ability to serve as our health care safety net for the uninsured. Seniors depend on a strong network of physicians and hospitals to provide care; each time a physician decides he or she cannot afford to take new Medicare patients, seniors are forced to look elsewhere to find care. This is particularly troubling in rural areas, where there are fewer physicians and where it may be more difficult to travel to a doctor's office.

I realize how important these provider provisions are, and I would say to the doctors and hospital advocates who are asking me to vote yes tonight that it is unfair to hold their needed reimbursement increases hostage in a bill that includes so many controversial provisions. We can and should pass a provider reimbursement bill apart from this Medicare package. In fact, I hope that we can defeat this Medicare bill and immediately pass these provider increases in a stand alone bill before we leave this session.

In closing, I reiterate my support for adding a strong, adequate prescription drug benefit to Medicare. Seniors need such a benefit and Medicare is not a complete health insurance program without it. But the benefit before us tonight does more harm than good, particularly in the long term. I urge my colleagues to vote no.

Mr. SERRANO. Mr. Speaker, I rise in strong opposition to the conference report on H.R. 1, the Republicans' Medicare ''reform'' bill. On procedure and on substance, the legislation is deeply flawed and the best course now would be to start all over and work toward a bipartisan package that truly provides benefits to our elderly and disabled Medicare participants.

Others have eloquently expressed the reasons to oppose this legislation, so I will not take much time to repeat what has been said. But I will quickly mention the major flaws.

This enterprise was meant to help seniors and the disabled get the prescriptions they need at affordable prices, but that's certainly not where it is ending up. This bill both increases the burden on seniors and lays the groundwork for taking Medicare apart altogether.

Coverage is limited and complicated, and there is a huge ''donut hole'' in coverage that, when combined with premiums, deductibles and copayments, can leave seniors paying up to $4,000 of the first $5,000 of prescription expenses as well as paying premiums but receiving no benefits for part of the year. Worse, dual eligibles, the Medicare beneficiaries who are poor enough also to be eligible for Medicaid, will end up worse off under an all-Medicare regime.

Drug prices in this country are high and rising fast, keeping even seniors with drug coverage through their employers facing difficult choices between medicines and other necessities. But the bill before us explicitly prohibits the Federal government from negotiating lower prices for Medicare beneficiaries. It also ignores the will of most Members of Congress who support reimportation of prescription drugs from Canada and other select countries. What a windfall for the pharmaceutical companies!

Millions of retirees who now have coverage through their former employers may end up without it when the bill's incentives cause employers to drop retiree health benefits.

The premium support demonstrations present insurers with the opportunity to cherry-pick healthier, wealthier beneficiaries, leaving Medicare covering the high-cost sicker and poorer elderly and disabled, which would force fewer beneficiaries to pay higher premiums until Medicare became unaffordable and unsustainable.

There are many other reasons to oppose this conference report. Let me just note that it does not include the Senate provision to remove the 5-year bar on federal health benefits for legal immigrant children and pregnant women.

The Republicans have not been shy about announcing their intention to dismantle the Medicare program, and this bill is a major step down that path.

Mr. Speaker, this is a profoundly bad bill that should go back to the drawing board. As the National Committee to Preserve Social Security and Medicare wrote to Members yesterday ''. . . a bad bill is worse than no bill at all''.

Mr. Speaker, I urge my colleagues to vote ''no.''

Mr. MORAN of Virginia. Mr. Speaker, I rise in opposition to the Medicare prescription drug benefit conference report that the House is scheduled to consider today.

I want to make it clear that I strongly support a Medicare prescription drug benefit for our nation's seniors and am supportive of a universal, affordable, voluntary and guaranteed Medicare prescription benefit for all.

Unarguably, the enactment of the Medicare program in 1965 was one of the wisest things Congress has ever done. At that time, there were very few prescription drugs with wide applicability, and that is why Medicare did not cover prescription drugs.

In large part, because of Medicare and Social Security, we have raised the life expectancy of our citizens, lifted millions of Americans out of poverty, and vastly increased the quality of life for our nation's senior citizens.

Unfortunately, this conference report does not reflect the vision and ideals of Medicare set forth by President Johnson and Congress, and will, if passed and signed into law, harm the 57,000 seniors that reside in my congressional district and millions of other seniors in America.

It had been my hope that any expansion of the Medicare program to include a prescription drug benefit would be above partisan politics. We have all heard first-hand from seniors how the high prices of their prescription drugs negatively impact their already limited incomes.

This issue which cuts across political lines should be about what's in the collective interest of our nation's seniors.

Unfortunately, this debate on one of the most important domestic issues, which not only affects today's seniors, but future generations as well, did not rise above partisan politics or enhance our democratic process.

In a decade, 10,000 people a day will turn 65 years old and with the retirement of the Baby Boom generation, America's senior population will almost double.

This conference report provides a weak prescription drug benefit for all seniors—regardless of income, and will change the Medicare program as we currently know it, by overpaying private insurance companies to administer this drug benefit, while giving them great latitude in setting premiums, deductibles, and pharmacy choice with little oversight through a premium support system.

One of the reasons why I voted against the House version of the Medicare Prescription Drug and Modernization Act of 2003 (H.R. 1) was that Medicare beneficiaries would pay 20% of their drug costs up to $2,000 and 100% of drug costs from $2,000 to $3,500, while still subjecting them to monthly premiums that would result in a gap of prescription drug coverage for most beneficiaries.

The coverage gap that exists in this conference report is even worse. Seniors will pay 100% of costs between $2,250 and $5,100—a gap of $2,800 which will be increased to over $5,000 by the year 2013.

I also cannot support a conference report that does nothing to alleviate the high costs of drugs imposed on seniors. This conference report actually prohibits the Secretary of the Health and Human Services from negotiating lower drug prices with the bargaining clout of the 40 million Medicare beneficiaries as well as the importation of drugs from countries where drug prices are lower, except Canada and only if they are certified by the Food and Drug Administration.

While I am pleased that this Congress has finally addressed the issue of reimbursement rates for doctors, hospitals, and other important health providers, I am discouraged that this conference report is still a bad deal for our seniors, and the endorsement of this legislation by the AARP, comes into question. The AARP is not recognizing its membership's need and desire for a true Medicare prescription drug benefit without the heavy reliance on the private health insurance industry.

It is with great sadness that I will have to vote no on this conference report. My constituents want a legitimate Medicare prescription drug benefit, lower drug prices and better Medicare services.

This conference report undermines the Medicare system, and I am afraid, will do more harm in the long run than good in the short term for our seniors.

Mr. ETHERIDGE. Mr. Speaker, I rise in opposition to H.R. 1. As the Representative of North Carolina's 2nd District, I know firsthand how hard our older people have to struggle to pay for their prescription medicines. Since I began my service in the people's House in 1997, I have worked to create a prescription medicine benefit for our seniors. Seniors deserve a guaranteed Medicare prescription medicine benefit, not empty promises. I have consistently supported a prescription medicine benefit plan that features low, predictable premiums and allows seniors to obtain medicine from any doctor they choose. And I want seniors to be able to get their medicine from the local pharmacy, not some huge mail order company.

I oppose H.R. 1 because it does not deliver on its promises. This bill will force 73,000 Medicare beneficiaries in North Carolina to lose their retiree health benefits entirely and

leave thousands more with significantly reduced benefits. According to the nonpartisan Congressional Research Service of the Library of Congress, this bill will force 222,800 Medicaid beneficiaries in North Carolina to pay more for the prescription medicines they need. Under this bill 99,500 fewer seniors in North Carolina will qualify for low-income protections than under the Senate bill because of the assets test and lower qualifying income levels. This provision will hit particularly hard the many farmers in North Carolina whose farm equipment and land are considered financial assets even if the farmers' income is below the poverty line. Also according to CRS, under this bill, 37,920 Medicare beneficiaries in North Carolina will pay more for Part B premiums because of income relating. And according to the CMS Actuary Tables, the premium variation under the bill's premium support program would range form $1,225 in some parts of North Carolina to $675 in other areas of the state. The bill contains a huge hole in coverage which will result in no benefit at all for seniors with prescription costs between $2,200 and $5,044.

I oppose H.R. 1 because this bill will have devastating economic consequences because the $400 billion price tag will be added directly to our massive national debt of $6.8 trillion. A few short years ago, we had achieved surpluses as far as the eye could see and were on pace to erase the national debt. But this Administration's tax policies have produced record budget deficits that will be compounded by the conference report on H.R. 1. Deficits matter for our current economy because in creased borrowing means the government has to spend more and more tax money on interest costs and will have less available for other important priorities. "For example, even before this bill passage, this year the federal government will pay $156 billion for interest on the national debt. That is three times what the federal government will spend on education. When I asked a White House representative where the money will come from to pay for this bill, I was told that it is "new money." This is not new money. These are borrowed funds that will be paid for by our grandchildren and their grandchildren.

Mr. Speaker, prior to holding elected office, I spent nearly twenty years as a small businessman. There can be no doubt that I strangely support the private sector. But there are some things the private sector does well and some things the private sector does not do well. Medicare was created because the private sector by itself does not do well at the important priority of providing a strong public health system for older Americans. This bill is a $400 billion ticket back to the days when senior citizens were forced to fend for themselves in the private health care marketplace. This bill sacrifices Medicare as we know it, and will cast senior citizens to the mercy of HMOs and force them to give up their own doctors and pharmacists.

Congress should reject this flawed bill and go back to the drawing board and get it right once and for all for our seniors. I urge my colleagues to vote "no" on the Republican Medicare Privatization bill.

Mr. EVANS. Mr. Speaker, this has been a disappointing week in Washington for seniors around the country. Not only are we voting on a bill that provides a meager prescription drug benefit through Medicare, but the once-regarded AARP has apparently put their profit margins before the health of the seniors by endorsing this Republican Prescription Drug bill.

There are so many disturbing provisions in this bill that I will only take the time to mention a couple.

This bill explicitly prohibits the Secretary of Health and Human Services from negotiating lower drug prices on behalf of America's 40 million Medicare beneficiaries. With my support, the Veterans' Administration adopted this practice some time ago, and the VA enjoys the ability to negotiate drug prices for numbers of veterans. This restriction on the Secretary of Health and Human Services clearly crimps efforts to keep prices down for seniors.

Another troubling provision is the "demonstration project" in this bill that coerces seniors out of the traditional Medicare program they know and enjoy to sign on with an HMO. Up to 7 million seniors may be forced to choose between staying in Medicare and purchasing a likely expensive drug-only plan from a private insurer or leaving their trusted doctors to join an HMO or other plan that would provide Medicare-like benefits including drug coverage. This is hardly a choice for our nation's greatest generation.

As our healthcare delivery system moves increasingly toward managed care, many people have expressed concerns about the care they receive from HMOs. Today it is frighteningly common for insurance companies, rather than doctors, to make the medical decisions that affect people's lives. As these concerns are aired, we are ready to throw our seniors into this lion's den. Until doctors are free to give the best medical advice based on a patient's need, not an insurance company's bottom line, our seniors are better served by traditional Medicare. While others have let HMO reform legislation die away, I still believe that we need to address these concerns, and they should be addressed before seniors are coerced into the system.

This debate has been fundamentally changed from one focused on providing seniors with a solid prescription drug benefit to defending the integrity of one of America's finest programs, Medicare. I have been part of the Democratic fight for years to add a meaning drug benefit for our nation's seniors, but I will not be a part of destroying a vital program that seniors have trusted for almost 40 years to settle for inadequate drug coverage. I strongly urge my colleagues to reject this bad bill.

Ms. SOLIS. Mr. Speaker, in 1965, Congress created Medicare and promised seniors that after a lifetime of working and paying into the system they would have access to health care coverage during their retirement years, regardless of where they live, their age or their income. Thirty-eight years later, instead of honoring our commitment to affordable, accessible health care for all seniors, Congress is set to create a prescription drug benefit program that will destroy Medicare as we know it and turn it over to the unreliable for-profit insurance industry.

A Medicare prescription drug bill should use the purchasing power of our nation's seniors to negotiate lower prescription drug costs, just as we do for veterans now, and it should provide assistance to low-income seniors who need extra help in their retirement years. Our hard working seniors and their families expect a high quality, affordable, universal and guaranteed prescription drug benefit within their trusted Medicare program.

Unfortunately, the Republican plan dismantles Medicare as we know it by turning it into a voucher system with private HMOs competing with the traditional Medicare system. Under this system, seniors who want to stay with the traditional Medicare system they trust would face premiums that could vary dramatically across the nation. Premiums for traditional Medicare in the Los Angeles area could be as much as $1,700 per year—119% more than seniors in other parts of California.

This bill is especially troubling for retirees who have health benefits through a former employer. I have received dozens of calls and letters from retirees concerned about the Medicare proposal's impact on the prescription drug coverage they have through a former employer. Well, under the Republican bill an estimated 244,860 Medicare beneficiaries in California will lose their retiree health benefits because the bill does not sufficiently stem the tide of employers reducing or dropping their retiree health coverage.

Nearly 6,000 seniors in my district are living below the poverty level, so I am especially troubled about what this bill will mean for low-income seniors struggling to pay for the medicines they need. The bill will increase drug costs for six million elderly and disabled Medicaid beneficiaries by imposing co-payments on their prescription drugs and prohibiting Medicaid from filling in the gaps of the new Medicare benefit. It is shameful that this bill would harm our most vulnerable seniors.

The supporters of this bill talk about the funding it provides for disproportionate share hospital (DSH) payments to hospitals that serve a high number of indigent patients and for improved Medicare payments to physicians. I have a strong record of supporting DSH funding, which is critical to protecting California's safety not hospitals. I have also long supported fixing the flaws in the Medicare physician payment system in order to help doctors who serve elderly patients, and recently voted to increase physician payments. It is important to note that the Democratic Medicare prescription drug proposal would have done substantially more to help doctors and hospitals than the bill before us today.

I would like to take a moment to comment on AARP's endorsement of the bill. AARP claims to represent the needs of seniors throughout the country, but I can tell you that the seniors I represent are upset that AARP has chosen to endorse this wrong-headed bill that doesn't even meet the criteria they set back in July. I encourage seniors to continue to contact their lawmakers and let them know their views on this Medicare bill.

Let's be clear—the endeavor to make prescription drugs more accessible for seniors began as a bipartisan effort to modernize Medicare for our new era. Now it has turned into a fight for the soul of Medicare. I am tremendously disappointed that my Republican colleagues have chosen to reward the private

insurance companies and big pharmaceutical industry at the expense of seniors. However, I will continue my efforts to ensure that seniors have access to the medicines they need.

Mr. REYES. Mr. Speaker, it is with great regret that I rise in opposition to the conference report on the Medicare Prescription Drug and Modernization Act of 2003.

I regret that I must do so, because I have long been a strong advocate for providing America's senior citizens with an affordable, comprehensive prescription drug benefit under Medicare. Unfortunately, however, the bill before us today would harm rather than help the more than 77,500 Medicare beneficiaries in El Paso County, Texas, which I represent, and millions of others like them across the country.

For example, instead of a comprehensive, continuous prescription drug benefit, the bill offers a benefit that has a $2,800 gap in coverage that will leave about half of Medicare beneficiaries without any prescription drug coverage for part of the year, even though they will still be paying monthly premiums. While without coverage, many Medicare beneficiaries in my district will have to pay the entire cost of their prescription drugs out of their own pockets, which is the very circumstance we are supposed to be remedying.

Rather than doing more to help low-income seniors, this bill fails to ensure that they will receive the prescription drugs they need under the proposed new program. The bill would, for the first time, prohibit federal Medicaid funding from being used to pay for drugs not paid for by Medicare. In Texas alone, it is estimated that 389,400 Medicaid beneficiaries would pay more for their prescription medications under the bill. In my congressional district, where approximately one in five people over age 65 lives below the poverty line, this change could be devastating.

At the same time, the bill requires states to make large annual payments to the federal government, offsetting the savings states would have realized by having the federal government provide drug coverage for low-income seniors under Medicare. In short, for the first time ever states will have to fund a federal Medicare benefit, at a time when my state of Texas and many other states are facing budget troubles.

Insteaad of expanding re-importation of prescription drugs, with appropriate safety checks, the bill blocks re-importation. By doing so, it ensures that Americans will continue to subsidize low drug prices in other countries, while paying the highest drug prices in the world here at home.

Rather than empowering Medicare with the authority to use its purchasing power to negotiate better drug prices, as the Veterans Administration currently does, the bill specifically prohibits Medicare from doing so. As a result, the pharmaceutical companies benefit, but hard-working taxpayer will have to foot the bill for the higher costs.

Perhaps most troubling, the bill puts us on a path toward privatizing the entire Medicare system, breaking our government's solemn promise to America's senior citizens to provide guaranteed, quality healthcare under Medicare. Two generations of seniors have relied on Medicare and Social Security to ensure their quality of life in their retirement years. For many poor seniors in my district, these programs are their only safety net. To jeopardize that safety net would be unconscionable.

This bill, with all its shortcomings, will cost the American people nearly $400 billion over the next decade. It does include a few provisions that I strongly support and have voted in favor of repeatedly—most notably provisions providing increased Medicare reimbursement rates for healthcare providers and funding to reimburse local governments and emergency medical providers for providing care to undocumented immigrants. However, the bill would do such significant harm to Medicare recipients and the Medicare program that, on balance, I find that I cannot support the legislation.

Mr. Speaker, I urge my colleagues to oppose this conference report, so Congress can instead offer America's seniors that kind of Medicare prescription drug benefit they desperately need and truly deserve.

Mr. BACA. Mr. Speaker, I rise in opposition of the Republican Conference Report on H.R. 1.

I oppose this Republican plan because it is bad for seniors. It's bad for California. And it's simply bad for the American people.

There are 40 million seniors across this Nation that need a safe and reliable healthcare plan that protects them, whether they are sick or not.

This plan will not help seniors. This is a $400 billion plan that will privatize care and cost seniors more than they pay now.

This plan is similar to having car insurance that doesn't really protect you. You're fine as long as you don't get into an accident.

Seniors are only fine under this plan if they don't get sick. But because of privatization, when a senior gets sick, this plan offers no guarantee that their premium will stay the same or that their carrier will continue to cover them.

Under Medicare, seniors at least had a guarantee that they would be insured. They at least had a guarantee that if they got sick; someone would be looking out for them.

Under this plan, privatization could force as many as 7 million seniors into HMO's. Seven million. How is this fixing Medicare? Who is this guaranteeing that all seniors have coverage?

Our parents and grandparents deserve better. They do not need privatization. They need to know they are going to be insured.

They need to know that they are going to be protected despite the cost.

Under this plan, there is a $2,800 gap that will leave millions of seniors without drug coverage. This plan leaves seniors uninsured for part of the year despite the fact that they are paying premiums.

Much like car insurance, if you knew your car wasn't going to be insured for half of the year, you wouldn't drive it.

But we can't do that with our health. Seniors can't say I just won't get sick. It doesn't work that way.

In my district of San Bernardino, California, we have seniors who board buses to travel down to Tijuana to purchase life saving prescription drugs.

Will this plan help the seniors in my district get off that bus?

No. If we pass this bill, seniors will still have to travel to Mexico to get their prescriptions.

The practice of forcing seniors to go across the border must stop. We have no way of knowing what our seniors are actually purchasing. This isn't safe and it isn't fair.

This bill could actually raise the cost of prescription drugs for over 6 million low-income seniors, and one in six Hispanics. In my home state of California, almost 900,000 will have to pay more.

Those are the people in my district. Those are the people that are risking their lives, going across the border, to purchase their prescriptions. And this bill does nothing to help them.

The Republicans are ignoring what seniors need.

Under this plan, over 3 million low-income seniors are going to be forced to pass a test before they get help paying for prescription drugs.

If you are a senior and you simply own a home, a car, or even a burial plot you could be considered too wealthy to get help with prescription drugs, under this plan.

If you are a homeowner, you'd better catch the bus for Tijuana because that is the only way you will be able to afford your prescription drugs because the Republicans think that you are too wealthy.

Many seniors in my district have worked hard their entire lives trying to put food on the table for their families. Many of them have been fortunate enough to have some health coverage from their employers.

Under this plan, 3 million retirees could lose that coverage. That affects over 250,000 seniors alone in California.

This plan leaves the seniors in my district will no option but privatized healthcare.

Our abuelos, our grandparents, have worked too long and too hard to be ignored.

They need a prescription drug coverage that preserves traditional Medicare, helps low-income seniors afford prescription drugs and keeps retirees in employer sponsored health plans.

It's time to give seniors what they want, what they need, and what they deserve.

Mr. OSBORNE. Mr. Speaker, I rise in support of H.R. 1, the Medicare Prescription Drug, Improvement and Modernization Act.

Today, this House will consider landmark legislation to help our Nation's seniors afford their prescription medications. I am particularly pleased with the generous assistance this legislation provides for the low-income seniors in my district.

Those seniors with incomes below 135 percent of poverty (individuals with incomes under $12,123 and couples under $16,362) will be eligible for a prescription drug discount card that immediately applies $600 annually toward the purchase of their medicines and covers up to 90 percent of their prescription drug costs. Seniors with incomes between 135 and 150 percent of the federal poverty level ($12,123–$13,470 for individuals and $16,632–$18,180 for couples) could ultimately have 85% of their drug costs covered.

Beginning in 2006, seniors without coverage would have the option to join a Medicare plan that requires a $35 monthly premium and would cut seniors' yearly drug costs roughly in

half. For example, a senior without any drug coverage and monthly drug costs of $200 would save more than $1,700 each year. Seniors with no drug coverage and monthly drug costs of $800 would save nearly $5,900 on drug costs each year. In addition, seniors would be protected against high out-of-pockets costs with Medicare covering as much as 95% of drug costs over $3,600 each year.

Mr. Speaker, this legislation also provides a historic opportunity to help strengthen the rural health care delivery system with billions of dollars in additional Medicare payments. For far too long, Medicare has short-changed rural health care providers in my district, which threatens seniors' access to care. This legislation eliminates many of the disparities that exist between rural and urban physicians, hospitals, and other health care providers.

Finally, this bill includes important cost-containment provisions. These accounting safeguards will alert future Congresses and Presidents if the expenditures of the entire Medicare program exceed 45 percent of total Medicare spending so they can address the problem.

This may not be a perfect bill, but it is a good bill, and I urge my colleagues to support the Medicare conference report.

Mr. KANJORSKI. Mr. Speaker, I rise today to speak about the conference report on H.R. 1, the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. While I wholeheartedly support providing a prescription drug benefit to our Nation's seniors, I cannot support this bill in its current form because it does more harm than good.

Since the House of Representatives first began debating the creation of a prescription drug benefit for Medicare recipients, I have consistently maintained that this proposal must adhere to four key principles to garner my support. In my view, we must create a benefit that is affordable, easy to administer, nationally available, and comprehensive. I believe that the bill crafted by the conference committee falls short on all counts.

In addition, there are many other provisions folded into this bill that will substantially alter the Medicare system as we know it. These provisions would privatize the program, cause millions of seniors to lose their prescription drug coverage through their employers, and result in insufficient reimbursements for some Medicare providers. These ill-crafted proposals also influenced my decision to vote against this bill.

AFFORDABLE PRESCRIPTION DRUGS

In working to create a prescription drug benefit, we must ensure that the plan is affordable for Medicare participants. The benefit that is outlined in this legislation, however, will provide little relief for the senior citizens in my district. Because the plan requires sizable premiums, deductibles and copayments, seniors can still expect to pay between 50 and 80 percent of the cost of their prescriptions. This bill also creates a gap in coverage that will leave millions of seniors with drug costs between $2,250 and $3,600 without any benefit, even though they continue to pay premiums. While some may conclude that this is a good start to providing a prescription drug benefit, I disagree. We must do more to make prescription drugs affordable.

Seniors across the country, and especially in my district, cannot afford to pay thousands of dollars each year in prescription drug costs. Those seniors living on fixed incomes must already sacrifice on other necessities in order to afford their costly medications. These seniors need immediate relief and this legislation will not provide that help. In addition to the cost-sharing provisions of this bill, the benefit does not even go into effect for another two years. In the interim, seniors will receive a discount drug card that will provide only minimal relief.

This legislation also purports to protect low-income senior citizens. Individuals at the poverty level will not pay premiums under the program and will have copayments of only $1 to $3 for each prescription. In addition, for individuals slightly above the poverty level, assistance with premiums and the deductible will be available. These individuals, however, will be subject to an assets test. Individuals must have less than $6,000 in assets to receive the benefit while married couples must have less than $9,000 in assets. Therefore, any low-income senior who owns a home, a car, or any other large asset will not be eligible for this financial assistance. In my view, we should not force senior citizens to choose between selling their homes and getting their prescription drugs.

In addition, this legislation does nothing to address the high cost of prescription drugs. Under the current bill, there is no methodology for insurance companies to negotiate for lower drug prices. If the program were administered through Medicare, the Government could negotiate with the pharmaceutical companies for lower, more affordable prices because the program would cover a larger number of seniors.

Furthermore, with my support, the House recently passed legislation that would allow for the reimportation of prescription drugs from 24 foreign countries. These medications are often the same as those sold in the United States. They are, however, sold at a much lower price. Unfortunately, this legislation provides only for the reimportation of drugs from Canada and requires that the U.S. Food and Drug Administration certify that the reimportation of drugs is safe. While this may seem like progress, it is not. The Food and Drug Administration has already indicated its unwillingness to consider such a certification. Consequently, this legislative sleight of hand on drug reimportation will not increase the availability of affordable prescription drugs in the United States.

EASE IN ADMINISTRATION

A Medicare prescription drug plan must also be easy to administer. The proposal before us fails to meet this standard. This plan will create a complicated system of payments and programs. As a result, it will be difficult to administer.

In particular, senior citizens should not have to worry about whether the amount of money they spend on prescriptions during the year will leave them paying the whole amount of their drug costs at some point during the year as this bill does. Seniors who annually spend more than $2,250 for prescription drugs will find themselves without any coverage at all for a portion of the year. In order to remain in the program, however, these seniors will need to continue to pay the monthly premium, whether the program provides assistance or not.

Such a system will create confusion for seniors. This benefit should provide a sense of security for the elderly, who are used to receiving their benefits through the Medicare program. Instead, this complicated program will only serve to provide older Americans with more worries about their health care needs.

NATIONWIDE AVAILABILITY

An effective Medicare prescription drug plan must also be available nationwide. By making the benefit available through private insurance companies, there is no way to ensure that benefits will be equal across the country. in an area like Northeastern Pennsylvania, this scheme would have a devastating effect. By moving towards privatization, areas like mine would be disadvantaged because insurance companies would not be enticed to operate there. Northeastern Pennsylvania has a higher concentration of older residents than most areas in the country, and insurance companies will not want to operate in our area because they would not find it profitable, unless they charge exorbitant premiums. As a result, the government fallback provision would engage, but it would still result in these seniors paying more than those in other areas across the country.

We have tried such a scheme before. In 1997, we created the Medicare+Choice program. This failed experiment operated in Northeastern Pennsylvania for awhile. Initially, this program provided tens of thousands of seniors in our area with prescription drug benefits. Insurance companies, however, discovered that they could not make a profit because of the economics of the region. As a result, they abandoned the program, leaving thousands of senior citizens without affordable prescription drugs once again. By providing a prescription drug benefit through private insurance companies, we can expect this legislation to result in a similar outcome for Northeastern Pennsylvanians.

In addition, this faulty Medicare plan already anticipates that there will be a problem with providing prescriptions through private plans in areas like Northeastern Pennsylvania. Included in the bill is a provision to set aside $12 billion to pay insurance incentives to provide the prescription drug benefit. One must ask why, if we already anticipate the failure of the program, we are not considering alternatives, such as adding the benefit through Medicare.

COMPREHENSIVE BENEFITS

Finally, a prescription drug program must be comprehensive. Under a government program, seniors should have access to any drug prescribed by their doctor and the program should cover the costs of that drug. This bill, however, establishes a limited list of categories and classes of drugs, and only these drugs will be covered under the program. Hence, this exclusion will leave many seniors to cover more costly medications and experimental treatments out of their own pockets.

PRIVATIZATION OF MEDICARE

In addition to the prescription drug coverage, there are other changes made to "reform" Medicare by this legislation. If passed, for example, this legislation would put in place a radical system to privatize Medicare.

For example, rather than providing a prescription drug benefit through the current

Medicare system, it will, as I have previously noted, instead be offered through private insurance companies, which can profit from their participation in the prescription drug program. Once the system is in place it will be difficult to go back and make the necessary changes to make the prescription drug benefit affordable, easy to administer, available nationwide, and comprehensive. Earlier this year, I supported the Democratic version of this legislation that would have provided prescription drugs through Medicare and achieved these objectives. We should be considering that bill today.

This bill will also change the way the current Medicare program is run and move it towards a total privatization of the benefits Americans have worked their whole lives for and have come to depend on in their golden years. In 2010, this legislation would create a premium support demonstration program. This program would require seniors to enroll in a private plan and would provide a voucher for the cost of the insurance premiums. In addition, this bill would break the country into sections, providing different benefits in each. Therefore, the amount of money a person in Northeastern Pennsylvania pays could be substantially higher than the amount paid by a senior living in another part of the country.

In my view, this program will move the country on the slippery slope towards the total privatization of Medicare. Rather than providing health care benefits to senior citizens that are guaranteed, money would instead be provided to insurance companies to support seniors in a private program. We should not allow Medicare to wither on the vine. There is also no reason to believe that other benefits, such as Social Security, would not also eventually be privatized if we begin to privatize Medicare now.

PROVIDER ISSUES

This prescription drug bill also seeks to increase Medicare payment to physicians and hospitals. I must acknowledge that some of the provisions in this bill would provide relief to the doctors and hospitals in my area. In particular, the bill's provision altering the weight given to labor costs when determining the reimbursement rate for an area would provide millions of dollars to the hospitals in my district. In addition, physicians who are anticipating a 4.5 percent cut in their payment through Medicare would instead receive a 1.5 percent increase. Further, this bill provides additional funding for rural hospitals and for teaching hospitals.

For hospitals like the ones in my district, this legislation provides only minimal relief and these changes should not be used as a justification for voting for this bill. As one hospital administrator in my district said, "If you are dying of thirst in a desert, even a drop of water looks good." Rather than providing a band-aid fix to these hospitals experiencing genuine financial difficulties, we should have worked to equalize reimbursements across the country.

In addition, there are portions, of this bill that will have severe impacts on the providers in my district. For example, the legislation provides for a system to competitive bidding for durable medical equipment to begin in 2007. This change in the program will have a devastating effect on the numerous small- and medium-sized medical equipment providers in my district. The competitive bidding system will cause a race to the bottom, resulting in cost cutting measures like layoffs and the loss of services provided for users of durable medical equipment.

RETIREE COVERAGE REDUCED

Beyond privatizing Medicare, this legislation will result in millions of retirees losing their employer-sponsored drug coverage, dealing an irreversible blow to the employer-based system that is the backbone of our Nation's health care system. Employer-sponsored retiree health benefits are the single greatest source of drug coverage for retirees, providing benefits to one in three Medicare beneficiaries. They also generally offer the best coverage available—generous benefits and low-cost sharing.

The Congressional Budget Office, however, projects that 2.7 million seniors in employer-based retiree plans will lose the coverage they have today due to the discriminatory treatment of seniors with retiree coverage in this legislation. As a result, those individuals would be forced into the flawed prescription drug program outlined in this measure. Men and women who have worked their whole lives with knowledge that they will have health and prescription drug benefits in their retirement should not be forced into a program that could leave them with inadequate benefits.

CLOSING

In sum, I cannot support this legislation. It falls short of providing seniors with an affordable, widely available, easily administered, and comprehensive prescription drug benefit. It will privatize the program and it will result in millions of retirees losing coverage through their former employers. Ultimately, this legislation will hurt senior citizens more than it will help them. We should do better for Americans in their golden years by defeating this bill and drafting a new one.

Mr. PASTOR. Mr. Speaker, I strongly support efforts to give prescription drug coverage to the Medicare patients who do not currently have it. But, this bill does a poor job of meeting our prescription drug needs, and it drastically and negatively alters the overall structure of the Medicare program.

We have the ability to give Medicare patients prescription drug coverage. But our hands have been tied by the arbitrary budget limits Congress has set on funding such a program.

Congress and the President decided that, over the next 10 years, $400 billion was all we could spend on helping the elderly who need prescription drugs. So, in order to meet this number, a prescription drug bill has been written that will prove inadequate for meeting the basic needs of today's senior citizens while proving itself a champion at destroying health care for the senior citizens of the future.

Simply put, Mr. Speaker, this bill is no longer about prescription drug coverage. It is about ending traditional Medicare coverage.

I oppose this bill for several specific reasons.

First, the bill will do little to alleviate significant out-of-pocket costs for most senior citizens. A senior who spends $2,200 a year, less than $200 a month, on prescription drugs, will be required to pay almost $1,200 for this coverage and the drugs. A senior spending $3,500 a year on prescription drugs will be forced to pay almost $2,500 out of his pocket. That is 70 percent of the total drug costs. While this bill provides some help, I fear it will not be enough to keep the poorest of our elderly from making the difficult choices between buying medicine and groceries.

I am also opposing this bill because, in essence, it is designed to privatize Medicare. The "demonstration" projects to be established in six areas of the country, the so-called Premium Support Program, is nothing more than a first step toward complete privatization. The authors of this bill hope that more and more people will forego traditional Medicare for cheaper private HMOs with less overall choice and coverage. In fact, the private insurance companies would receive billions of dollars in subsidies for luring patients away from the traditional program. We all know that the private insurance companies will only accept the healthiest of patients, leaving the sickest patients in traditional Medicare. This, in turn, would result in higher costs for traditional Medicare because it would serve a sicker population.

Additionally, I am opposing this plan because it will mean that a good portion of the 75 percent of Medicare patients who already have prescription drug coverage, many through former employers, will be dropped from their current plan and forced into a more expensive plan with less coverage. In hopes of avoiding that event, this bill is paying a tremendous subsidy to keep these companies from dumping their beneficiaries.

So, this bill provides billions and billions of dollars to private companies to help them lure senior citizens away from traditional Medicare and to continue to provide prescription drug coverage to former employees.

There is some disconnect here. As Robert Robb, the noted Arizona Republic conservative columnist writes, "Congress is proposing to subsidize private drug plans that are currently being offered at no cost to taxpayers, in order to offer taxpayer-financed drug coverage to seniors that Congress hopes they won't take." He continues, "See what I mean about being sort of stupid."

Mr. Robb and I rarely agree on issues. But he has hit this nail right on the head.

A more logical solution might be to take these subsidies and use them to simply pay for prescription drugs for those who don't currently have coverage.

Mr. Speaker, I say, let's give prescription drug coverage to the senior citizens who need it. We could do that, in a fair and meaningful way. We only need the desire to do so. But, let's not hurt the seniors who have coverage, and all those in future generations, by passing this ill-advised legislation. We have the opportunity to do something good and important. Yet, the drafters of this bill have taken it as an opportunity to change the Medicare program so drastically that it can only prove devastating to this country's older population. Let's reject this bill and force ourselves to set aside partisan ideologies and help the current and future senior citizens of this great land.

Mr. BLUMENAUER. Mr. Speaker, our senior citizens need help with spiraling drug costs. It

is outrageous that moderate income seniors pay the highest prescription drug prices in the world. The idea was to fix this problem, but somewhere along the line, the bill was hijacked by the Republican leadership for other purposes. I can't remember how many of my Republican colleagues have told me that they think this is a bad bill. From the Wall Street Journal to consumer advocates, thoughtful conservatives to people who classify themselves as very liberal, all find this bill deeply flawed.

Spending what's claimed to be $400 billion, but will actually entail far more cost to the Treasury, and the unprecedented pressure and advertising may pass this bill. The fascinating reversal of position by the leadership of the AARP gives a public relations boost, but that move has already been attacked by its own members.

The authors of this bill are putting something in for almost everybody: not just the drug companies, but doctors, hospitals, insurance companies, and so on, but ignoring the fundamental needs of senior citizens. As over a thousand pages come into focus, details leak out and are investigated by outside groups, the press, even Members of Congress, it is clear the bill still does not meet the needs of our seniors. After all the dust settles, our senior citizens will still pay out of their pockets the highest drug prices in the world.

There's something wrong when the only people who appear to be happy with the Medicare Prescription Drug bill are the drug companies. They were able to strip out provisions that would have allowed reimportation of cheaper drugs from Canada. It will be illegal for the government to negotiate lower prices for Medicare recipients. Future price increases will not be indexed to inflation, but to the rate of runaway drug costs, ensuring that spending will continue to spiral out of control.

For the drug companies, the holidays may come a little early this year. Sadly, deserving senior citizens who need help won't even get this inadequate drug plan until 2006. Told that even in 2006, they will have to pay $4,000 of their first $5,100 of drug costs, they'll feel that they didn't get a present. I will vote against the conference report.

Ms. JACKSON-LEE of Texas. Mr. Speaker, this is about as ugly as it gets. Just when I thought the Republican Leadership could not work any harder to undermine the Democratic process, to abuse their power, and to play politics with critical issues at the expense of the American people—they have just taken it to a higher, or should I say lower level. Call it what you will. The Alliance for Retired Americans calls the Republican drug bill a lemon. Others call it a rotten turkey. Whatever it is, it sure isn't medicine for the American seniors who need it.

When Medicare was founded in 1965, U.S. Government formed a covenant with the people, and said, ''If you work hard and pay your share, we will make sure that you have access to health care when you retire.'' Modern medicine has made great strides over the past decades at managing health problems, not just through surgery and hospitalizations, but also with pharmaceutical drugs developed through great research at the National Institutes of Health, and in pharmaceutical companies here and around the world. These drugs can lead to dramatic improvements in quality of life, by helping Americans live longer, more comfortable, more productive lives.

As great visionaries Lyndon Johnson and the Members of Congress designed Medicare, however, they did not predict that prescription drugs would revolutionize medicine, and therefore they did not include drug coverage in Medicare. Medicine has changed, but the promise that the U.S. Government made to the American people has not. It is time for Medicare to change with the times. It is time to do the right thing and create a real prescription drug benefit for our Nation's seniors in Medicare.

I, with my Democratic colleagues, have been fighting day after day to make that happen. We have gone to the people of this Nation, and to our academics, and health care providers and developed bold plans to get people the medicine they need. We had developed great momentum and help might have been on the way. The problem is that ever since the times of Newt Gingrich, the Republican dream has been to privatize or destroy Medicare. That is why the Republican plan is a risky scheme only an HMO could love.

The Bush administration's Medicare Administrator has called traditional Medicare dumb and a disaster, highlighting Republicans' hatred for a program that Democrats have been fighting for since 1965. While Democrats have worked to modernize Medicare with prescription drugs, preventive care and other new benefits, Republicans are insisting on a riskier course even the conservative Wall Street Journal calls a business and social experiment.

When this process first began, and the President and the House and Senate leaders proclaimed that they intended to produce a prescription drug plan, my Democratic colleagues and I tried to give them the benefit of the doubt. We tried to work in a bipartisan fashion. At one point, I wrote a letter to the Members of the House-Senate Conference Committee and encouraged them to include fair provisions for our physicians and hospitals, so that they would be able to afford to continue providing excellent care for our seniors. I am pleased to say that they did respond to that request, and have put in some funds for those deserving groups. But that is where the collaborations ended. I wish that they could take the handful of good pieces in this bill and move them as separate legislation—the reimbursement pieces I asked for, the rural health provisions, the Hatch-Waxman Reforms—but they won't. These good things are being held hostage to leverage passage of a terrible bill.

Ultimately, the core mission of this bill is to provide prescription drugs to seniors and the disabled on Medicare. On that, this bill fails horribly. The Democrats on the Conference Committee, among them, had decades of experience in the field of health policy. No one could question their commitment to helping seniors, but in a deeply cynical move by Republican leadership, Democrats were barred from even entering conference meetings. That is against everything our Founding Fathers intended this ''People's House'' to be. We got our first glimpse of this bill just over 24 hours ago. Even in our haste to get it read, we have found numerous flaws and pitfalls in it. In 2006, if it is allowed to come into effect, I am sure our seniors will find many more.

Instead of merely blocking our ideas, as they have done for years, they hijacked this issue and in the name of a prescription drug bill, they are trying to shove a piece of legislation through Congress that will destroy Medicare as we know it. It privatizes Medicare, pushing seniors into HMOs and private insurance plans expecting them to do what is right for seniors. And we know from Medicare+Choice, that we cannot count on that. In one year alone, 46 percent of Medicare beneficiaries in Houston were chopped out of HMOs. Switching plans every year jeopardizes health and wastes time and money. The Republicans have invented new gimmicks like artificial caps on spending, and buzzwords, like ''premium support'' instead of what it really is a ''voucher'' system to replace Medicare in 2010.

It is a misdirected attempt, with a terrible benefit—with a giant doughnut hole in coverage. And as bad as the benefit package is—even it is not guaranteed. The entire system is just basically a guideline that Republicans hope and pray insurance companies will follow, and develop drug plans for seniors.

It seems like at this point, we might say, ''well money is tight, so let's just take what we can get, and be happy with this bill.'' But the conference report that we are now finally getting a glimpse of is so bad, it would actually leave millions of senior citizens worse off than they were without it. And as doctors say in the Hippocratic Oath, the most important rule in healthcare is do no harm.

Furthermore, there is no rush to pass this bill. The Republican authors conveniently made their plan kick in in 2006, well after the Presidential elections of 2004. Obviously, they don't want seniors to go to the polls furious when they realize how bad this plan is. The point is, we can wait until spring and do this job right—and still make their 2006 timeline.

AARP used to agree with us on every point I am making, but in a bizarre twist, this week the group, that supposedly represents the interests of our Nation's seniors declared that they would support this lousy bill. I was mystified by this until I learned that, according to a study done by Public Citizen that AARP will make an extra $1.56 billion in profits if this bill goes through. AARP is in the insurance business, and has become too tied to that industry and the Republican leadership. They have breached the trust of the American seniors, and seniors are angry. It is a sad turn of events.

With the measly Republican benefit, the average senior will actually be paying more for their prescription drugs a year after the bill kicks in, than they are paying now. And as every senior knows, it has a giant donut hole in the benefit plan, where seniors have to pay every nickel for their medications—thousands of dollars—while they keep paying premiums. This is tragic for seniors on fixed incomes, and it will be an administrative nightmare for pharmacies. It is a gimmick to compensate for the fact that the Republican administration has squandered and mismanaged our economy to a point that now they say we have no money to fund critical programs.

It seems that at every turn, the people who need our help are getting the short end of the stick. Minorities, who already suffer from tremendous disparities in health and health care, are left behind. While this bill gives a giant gift to the drug and insurance industries and other special interests, it does little to reverse those life-threatening disparities. My Democratic colleagues and I, in both the House and Senate, all came together recently and put forth the Healthcare Equality and Accountability Act of 2003. Our bill is the kind of thoughtful and comprehensive approach that healthcare deserves. One provision I wrote will create a Center for Cultural and Linguistic Competence to help every American take advantage of the health revolution that is upon us. The Republican Medicare bill seems to have the opposite goal.

For example, this conference report does not contain the Legal Immigrant Children's Health Improvement Act (ICHIA), included in the Senate Medicare bill, which would have removed the 5-year bar on Federal health benefits for legal immigrant pregnant women and children. While these children and pregnant women may still get emergency medical care, States are unable to cover this population with basic medical services that may reduce the need for such emergency care. This unnecessarily increases the cost to taxpayers.

Hispanics are the largest minority group in the United States, and it's estimated that by 2025, Hispanics will account for 18 percent of the elderly population. Currently, one in six Hispanics seniors live under the poverty level. For these Americans, an increase in prescription drug payments or doctor's visits could mean disaster. Houston has a strong Hispanic population, and therefore my district will be hit especially hard by this bill.

And there is more bad news for Texas. 132,300 Medicare beneficiaries in Texas will lose their retiree health benefits. 389,400 Medicaid beneficiaries in Texas will pay more for the prescription drugs they need. 209,000 fewer seniors in Texas will qualify for low-income protections than under the Senate bill because of the assets test and lower qualifying income levels. 97,420 Medicare beneficiaries in Texas will pay more for Part B premiums because of income relating.

When we look at the health care system for our seniors in the United States today, we see two undisputable facts. One is that Medicare is an excellent program that seniors trust, and that delivers quality care at a fair price to those who pay in. The other is that drug costs are out of control and need to be brought down.

The Republican bill preserves the bad, the high cost of drugs—and it dismantles the good—Medicare.

Americans pay about twice as much for drugs as people do in other rich countries in the world—Canada, Germany, England, Japan. This is outrageous, since many of those drugs were developed here, by our workers, trained in our universities, funded by our National Institutes of Health. Our seniors deserve to get the same prices as they get across the border in Canada. The reason they don't is because the Canadian government negotiates with the drug companies, and says "Hey, there are 30 million of us in Canada buying your products, give us a fair price." Both the Republican bill forbids the Secretary of Health and Human Services from bargaining on behalf of the 40 million seniors on Medicare. That is outrageous, especially considering how well such negotiations have worked at the Veterans Administration. This bill is a gift to the pharmaceutical industry and HMOs and the insurance industry.

This bill really is the epitome of just how bad partisanship and political demagoguery can get. Trying to pass it before Thanksgiving is a cruel—and expensive—joke on our seniors on Medicare. I don't want to do that to Houston. Let's don't do that to America.

I will vote against this bill, and keep fighting to get this done right.

Mrs. CHRISTENSEN. Mr. Speaker, I have listened to the debate tonight, and I think everyone agrees that some seniors and disabled would benefit by this bill. But if truth be told, many would lose, which is not what we set out to do—we need and promised a bill that provides a prescription drug benefit for all Medicare beneficiaries, not just a few.

What is clear and why we should oppose this bill, is that if passed it would sound the death-knell for Medicare.

We must insist that the Republicans provide funding to shore up our rural hospitals. We must insist that the Republican leadership not only increase the physician payments this fiscal year, but fix the formula, so that the payments won't be cut again next year.

But what we must not do, is let this divide and conquer tactic make us pass a bill that would do more harm than good and physicians and hospitals should not allow themselves to be used to dismantle the very program they and the patients they are sworn to serve, depend on for the long run.

With a few crumbs to seniors and the disabled, and playing on the dire need of hospitals and doctors, this bill is nothing more than another corporate give-away.

We can afford to vote this bill down, start again, with an inclusive process—the benefit doesn't start for two years anyway. What we cannot afford to do and must not do is to kill Medicare; we must vote no on H.R. 1.

Mrs. KELLY. Mr. Speaker, I rise in support of this important legislation. The Medicare Prescription Drug and Modernization Act will provide prescription drugs to seniors, and provide additional money for doctors and hospitals, both of which are the front line in providing health care.

I am particularly pleased with provisions in the bill which seek to provide financial assistance to hospitals currently experiencing difficulties with inadequate wage index reimbursement rates. And I am encouraged by the potential this bill holds for assisting hospitals in the Hudson Valley which are adversely affected by their proximity to the New York City Metropolitan Statistical Area (MSA).

I would also like to direct my colleagues' attention to an aspect of this legislation which perhaps hasn't received a great deal of attention, and that's the provision that creates Health Savings Accounts.

For years we have been concerned about the many people in this country who have no health insurance. Many of the uninsured are small business owners or employees who simply cannot afford health insurance. With the Health Savings Accounts established in this bill, the small business owner can not only save tax free money for health care, but offer tax free health care money to their employees.

Think of it. Now, because of Health Savings Accounts, the owners of small businesses across the country can make contributions—tax free contributions—to their employees.

Money in these accounts can be used for insurance premiums or spent directly on medical care. This means many more people can buy coverage. For the first time, health care will be more accessible to the millions of small businesses in this country.

This is a powerful tool for empowering working Americans who deserve to control important decisions over their own medical care.

Mr. NUSSLE. Mr. Speaker, I rise today to support a long overdue, welcome victory for Iowa's seniors and health care providers.

Medicare's policies have penalized health care providers in Iowa and other rural areas since the 1960s. While Medicare's primary purpose is to provide health care for seniors, its policies affect both our health care system and our economy. The flawed policies have had an impact not only on seniors, but on all Iowans.

As many of my House colleagues know, I have worked long and hard to address the problems affecting health care providers in rural states such as Iowa. In fact, I wrote this year's budget to reserve significant resources for rural health care as part of a $400 billion Medicare Reserve Fund. Later, in the Ways and Means Committee, I successfully amended the Medicare legislation to ensure that sufficient rural health care funds were included in the bill that was reported from committee. And I continued fighting on the House floor to ensure that these funds—the most generous rural package ever considered by the House—remained in the Medicare legislation as it worked its way through the House.

Today, we are considering a conference report that carries this rural health care package to the end of the process. The benefits for Iowa will be multiplied for years to come. This conference report contains an unprecedented $25 billion rural package including benefits of over $400 million for Iowa alone. I am proud to have worked toward this day with the distinguished chairman of the House Ways and Means Committee and with the senior Senator from my home state of Iowa.

With these significant strides to improve Medicare's reimbursement policies on Iowa's behalf, we help our health care providers to pay the bills and to continue recruiting and retaining top-notch professionals. With a more secure health care system in place, we can further job creation and economic growth for our state.

In addition to taking several steps to strengthen the overall program, we are, of course, finally giving seniors what they have sought since Medicare's inception in 1965—a prescription drug benefit that is affordable, accessible and completely voluntary. All seniors will save on their current prescription drug costs.

Another important feature in the bill is the provision to establish Health Savings Accounts (HSAs). These accounts will allow pre-retirees

to accumulate tax-free savings over their lifetime and these savings will remain with the individual once they reach Medicare eligibility. Even with reforms such as these, I want to remind my colleagues that Medicare will still face long-term demographic pressures and Congress will likely have to take additional steps to address the program's sustainability.

Finally, as Chairman of the Budget Committee, I am pleased that the Medicare conference report—with a total cost of around $395 billion—is generally consistent with the $400 billion Medicare Reserve Fund that was laid out in this year's budget resolution. In a year of intense demands for limited government resources, this Medicare Reserve Fund was the largest policy initiative in the budget resolution and was arguably its centerpiece. Because the budget resolution struck a responsible balance between seniors' needs on the one hand and affordability on the other, we were able to generally stay within our own guidelines. I commend the conferees for staying within the $400 billion threshold.

Mr. Speaker, I have been spreading the word and twisting arms for a long time on behalf of legislation that would meet Iowa's health care needs. I am gratified that our message has been received and our persistence has paid off.

Mr. CAMP. Mr. Speaker, I rise in support of H.R. 1.

In the last five days, I've heard a lot about what this bill doesn't do. Let me be frank: life is not about what we don't do; it's about what we accomplish.

And, if I had a friend in need who asked me for $100 and all I had was $20, I wouldn't give him nothing. But that's what some here are prepared to do—turn away a friend in need.

For years we have agreed that our seniors needed a prescription drug benefit in Medicare; but unfortunately we have yet to provide them with any relief.

This Medicare bill offers a prescription drug benefit through competing private health insurance plans—marking the first time private sector plans and consumer choice would be the principal vehicle for delivering Medicare benefits. It also includes common sense reforms like preventive care and health savings accounts.

This is the first step in the direction of true reform. It's a step in the right direction and it is time we take it.

Mr. ORTIZ. Mr. Speaker, Congress created Medicare in 1965 to make healthcare affordable and available for all senior citizens. My colleagues and I have fought to maintain this original intent.

Today, the leaders in Congress are pushing dangerous legislation—called Medicare reform—on South Texas seniors that fails to include an adequate prescription drug benefit while privatizing Medicare, killing the program at the end of the decade.

This prescription drug "coverage" is not what seniors expect or deserve. When seniors have more than $2,200 in drugs costs, they will hit a gap, where Medicare will no longer cover the costs of their prescriptions until they reach $5,000.

When this happens, these seniors will be forced to pay 100% out of their own pockets while still paying monthly premiums. Meanwhile, their HMOs will select their doctors and their pharmacies.

Over 185 organizations with an interest in seniors' issues are wholly opposed to this bill. While one of the largest senior organizations has lent support to this bill (The American Association of Retired Persons, AARP), it is the only one to do so . . . it is the only one that provides insurance to seniors at a profit of $635 million . . . and the only one poised to take advantage of billions of dollars in the bill to entice private insurers to cover seniors.

The bill effectively ends drug reimportation by allowing the Secretary of Health and Human Services (HHS) to decide what prescriptions could be reimported. The HHS Secretary has already said he would allow none.

If this is not the answer, what is? I stand on my record, voting 8 times for a complete Medicare Rx drug plan . . . voting 6 times and cosponsoring 6 bills supporting higher reimbursements to doctors and hospitals . . . voting 6 times not to kill Medicare . . . and voting 8 times and co-sponsoring 3 bills to improve rural healthcare.

Nothing in this bill makes prescription drugs cheaper. Other Federal programs, such as the Veteran's Administration, get cheap drugs negotiating directly with the big drug companies. The plan will keep the government from negotiating for lower drug prices for Medicare beneficiaries.

This plan protects the profits of drug manufactures instead of providing real savings to seniors. Rising drug prices are unaddressed in this bill, a victory for the drug industry for preventing any attempts to lower drug prices.

Meanwhile, the value of some seniors' property will be used to determine their level of coverage—including jewelry, cars, and other property of value for which they worked their entire lives.

In South Texas, for the short term anyway, the bill (which would not take effect until 2006) would help only about 30% of low-income seniors. Effectively, that means this bill will not help over two-thirds of our most needly seniors.

When I think about the seniors that bill will affect, I think of the ladies who took care of me as I grew up of Robstown, Texas. Life for them revolves around family and children, paying the bills and finding health care in their senior years.

These are the people affected by the bill, which ends Medicare as we know it, privatizing the entire progrm by the end of the decade. It is thousands of South Texans like these who have raised voices in opposition to this bill. I stand with them.

Medicare has been a trust between the government and those who do the hard work in our society, our senior citizens. Too many seniors depend on Medicare for their healthcare needs, and I will not support a bill that destroys that trust.

Mr. LARSON of Connecticut. Mr. Speaker, I rise today in opposition to H.R. 1, the Medicare Prescription Drug and Modernization Act of 2003. Some may claim that this legislation is the answer to the high prices seniors are paying for their prescription drugs. That is far from true. The reality is that this legislation is a Medicare privatization plan masquerading as a prescription drug relief bill. The big winners in this bill are not the seniors that desperately need relief, but pharmaceutical companies and big business.

Does this conference report strengthen the Medicare program that seniors know and trust? The answer is no. It includes a premium support demonstration project that is the first step towards forcing all seniors to choose private insurers to get the prescription drug benefit they need, or to pay more to stay in the traditional Medicare program. This bill having any effect at all is contingent upon the willingness of HMOs and insurance companies to participate, and the track record does not paint a positive outlook. We in Connecticut remember HMOs pulling out of Medicare Plus Choice plans because they simply could not make a profit.

Does this conference report allow the Government to negotiate the costs of prescription drugs and provide relief to seniors? The answer is no. The bill specifically prohibits the Secretary of Health and Human Services from leveraging the tremendous buying power of the Federal Government to negotiate lower drug prices for 40 million Medicare recipients, a system the VA currently uses.

Does this conference report allow reimportation of drugs from other industrialized nations so that seniors will be able to purchase less expensive drugs? The answer is no. It ignores the reimportation measure that this House passed this summer and places the decision in the hands of health officials who have vocally opposed reimportation.

Does this conference report help low-income seniors who need help the most? The answer is no. First, the proposal actually reduces coverage for the 6.4 million lowest-income and sickest beneficiaries who qualify for Medicaid today. It prohibits Medicaid from helping these beneficiaries with copayments or from paying for prescription drugs not on the formularies of the private insurers administering the new Medicare benefits. It also leaves behind 3.9 million seniors that would have qualified under the Senate bill. One reason for this is the imposition of an invasive assets test. This means that seniors with modest savings will not receive any assistance with the cost of their premiums, the deductible, copayments, or the cost of the medications while they are in the $2,850 coverage gap.

Does this conference report help cancer patients? The answer is no. It falls well short of the drug and practice reimbursements needed to provide millions of cancer patients with the care they need.

Will this conference report prevent employers from dropping health insurance for their retirees? The answer is no. Though incentives were added to encourage employers to maintain their retiree plans, the Congressional Budget Office estimates 2.7 million retirees will lose the existing coverage they rely upon and countless others may have their benefits reduced. Furthermore, it does nothing to protect retired teachers, firefighters, police officers, State and local government employees, and those who worked for nonprofit organizations.

Does this conference report help the hospitals and doctors struggling to meet the needs of their patients? The answer, surprisingly, is yes. It provides an increase in the Medicare Disproportionate Share Hospital cap

for rural hospitals and urban hospitals with fewer than 100 beds. It increases payments for indirect medical education that would provide increased funding for the twenty Connecticut hospitals that have medical education programs. Also, it eliminates the 4.2% reduction in payments to physicians in 2004 and replaces it with a 1.5% increase for the next two years. These provisions are positive. But, this was intended to be a prescription drug relief bill and these positives are by far outweighed by the negatives of this legislation.

So, who are the winners in this conference report? The answer is pharmaceutical companies. They will receive the majority of the $400 billion that this legislation will cost. But, even better for them, they will not be forced to lower their prices. The Government will not be allowed to negotiate prices and seniors will not be allowed to purchase imported drugs from other industrialized nations. Apparently, the industry's army of lobbyists and $22 million in campaign contributions were effective.

Who are the losers? The answer is seniors, the ones this bill was meant to assist. They asked for prescription drug relief and we are trying to give them a Medicare privatization bill. That is why I urge my colleagues to join me in voting against this conference report.

Mr. UDALL of New Mexico. Mr. Speaker, I rise today with great disappointment in the conference agreement that has been brought to the floor. I sincerely hoped that the bill that passed the House in July would have been moderated with provisions included in the other chamber's bill.

Unfortunately, instead of considering legislation today that would have modernized the Medicare program to provide prescription drug cost relief and coverage for seniors throughout this great nation, we have this agreement that is geared toward dismantling one of the most successful government programs ever implemented. Instead of considering legislation to modernize the Medicare formulas to fix the inequities between rural and urban areas, we are considering an agreement that wraps these crucial fixes in with a prescription drug benefit that is designed to achieve the ideologically extreme goal of privatizing Medicare.

Mr. Speaker, I will certainly admit that the provider package included in this agreement is excellent. For years doctors, hospital administrators, and other health care providers have suffered under the unfair Medicare formulas that severely hampered their ability to provide care to Medicare beneficiaries. The labor share revision, the geographic physician payment adjustment, increasing home health services furnished in rural areas, critical access hospital improvements—these are all incredibly important provisions that I strongly support in order to help strengthen the health care system in rural areas. I also support fixing the inequitable disproportionate share formula, which is done to a degree in this agreement. Unfortunately, however, the conference agreement removes language that would have given New Mexico a larger increase of DSH payments to $45 million. The physician fee formula update is another provision that is incredibly important. Without this fix, physicians will have no other choice but to stop seeing Medicare beneficiaries, which will lead to the total breakdown of a system that is already badly strained to its limits.

I recognize the importance of these provisions. I understand the difficulties that those in the health care industry are facing. I understand the difficulties seniors are facing in trying to purchase and pay for their medications. That is why I have cosponsored legislation to fix the disproportionate share provisions, I have cosponsored legislation to fix the Medicare physician payment updates, I have written letters supporting these provisions and urging Chairman Thomas to include these rural fixes in the legislation, I have written a letter to conferees asking them to retain this provisions, and, when this bill passed in July, I voted in favor of the Democratic alternative that not only included stronger rural provisions than those included in the Majority's bill, but also contained a real prescription drug benefit—not a benefit engineered to bring about the demise of the Medicare program.

Mr. Speaker, lets be clear about what our goal was supposed to be. We were supposed to create a new prescription drug benefit in Medicare. That's what we were supposed to be doing with this important legislation.

Unfortunately, we are doing much more than that, and a lot of it is terrible. We were supposed to be reducing the costs of drugs for seniors. Yet this plan prohibits the federal government from using its clout to force down the price of medicine.

We were supposed to help seniors keep their current drug coverage if they are fortunate enough to have it. Yet this plan may force up to three million seniors out of their current employer-based plans.

We were supposed to be strengthening the Medicare program by adding a voluntary benefit for prescription drug coverage. Yet this plan, under the guise of a premium support demonstration, weakens the Medicare program by forcing beneficiaries to pay more for Medicare if they don't give up their doctor and join an HMO.

We were supposed to help low-income seniors who get additional assistance from Medicaid afford their prescriptions. Yet this plan not only forces 6 million low-income seniors to pay more for their medications, but also imposes an unfair assets test that disqualifies seniors if they have modest savings.

We were supposed to be providing a prescription drug benefit that would ease the cost and emotional burden seniors face in dealing with medication purchases. Yet this plan leaves millions of seniors without drug coverage for part of the year due to the $2800 gap in coverage.

Mr. Speaker, I am extremely disappointed with this agreement. I am disappointed because what should have been a straightforward approach took a wrong-turn along the way. I think this is a terrible way to spend $400 million dollars on a supposed prescription drug benefit, and I will be forced to vote against this measure. I urge my colleagues to reject this shameless assault on Medicare.

Mr. STUPAK. Mr. Speaker, I rise today in opposition to this Medicare bill with limited prescription drug coverage.

This plan is bad for America's seniors and especially bad for rural areas like Northern Michigan, which I represent.

Medicare should be a right—this Republican Medicare bill threatens to undercut this right and destroy a program that seniors have trusted for nearly 40 years.

For most seniors, the prescription drug plan does not begin until 2006 while the Democrats' plan would have begun next year.

The Republican plan has a gap in prescription coverage the size of the Upper Peninsula. This gap starts at $2,250 and goes on until you hit $5,100.

We should be giving our seniors a real prescription benefit not one that gives you part-time coverage.

Illnesses and diseases do not take time off—you're not sick part of the time—seniors need full prescription drug coverage now.

Those seniors who now have coverage may lose it—CBO estimates that up to 3 million could lose their existing prescription drug coverage.

I cannot support a bill that will undercut our seniors' right to Medicare.

While Congress provides universal health coverage for Iraq that includes full prescription drug coverage—seniors in America will receive part-time prescription drug coverage but pay 100 percent of the costs.

Vote "no" on this ill-conceived bill.

Mr. DAVIS of Illinois. Mr. Speaker, I have heard my colleagues describe the prescription drug plan as "not perfect" and a "step in the right direction." However, this legislation is neither. Our seniors will not gain better health coverage or a prescription drug benefit that is affordable. Instead the CBO estimates that approximately 2–3 million seniors, 107,000 alone in my state of Illinois, who currently have drug coverage from their employer, will lost that coverage. This bill lowers Medicare's assistance to the employers making it unaffordable to keep their retirees' coverage. The new cap on general revenue spending will cause reductions in provider reimbursement rates, higher out of pocket cost, or even raise the payroll tax—once again passing the buck along to future generations. Worst of all for our senior consumers, we do not even allow the Secretary of HHS to negotiate lower drug prices for them.

I am disappointed in this House for turning its backs on fulfilling our promise to seniors, but I am extremely disappointed that we are completely abandoning our Nation's most needy—our Nation's poor seniors. We are expecting our States to pay the Federal Government 90 percent of the cost of drugs for our low-income seniors. During a time when States are already faced with large debts and complicated decisions on what to cut next—how do we expect the States to afford 90 percent of the cost of drugs for our poor seniors? An estimated 6.4 million low-income and disabled people will have significantly worse coverage under this new plan. It is probably because this bill actually prohibits Medicaid from helping with copayments or paying for prescription drugs that are not approved by the private insurers. This means that certain, needed medications that are currently covered by Medicaid will no longer be available to seniors. This plan does not even provide assistance for our seniors that are between 150 percent and 160 percent of the federal poverty line that is an annual income of $15,300 to approximately $17,850.

Mr. Speaker, no one is saying that we should give our seniors something for free.

But we are saying lets give them something that is fair, reasonable, and makes sense.

Mrs. BONO. Mr. Speaker, I rise in strong support of the Medicare Prescription Drug and Modernization Act of 2003. This has been a very long and cumbersome process; however, I believe that the American citizens will be pleased with what we have accomplished. I would particularly like to laud the accomplishments of the conferees who put in tireless hours crafting this monumental legislation.

More often than any other concern, I hear from the constituents of the 45th District regarding health care. They are legitimately frightened that without reform, they will lose their existing benefits and the standards of care to which they have become accustomed. The time had come to pass substantive legislation that will allow seniors to spend less money on prescription drugs and spend less time navigating through the red tape and paperwork.

This landmark legislation is responsive to the needs of our seniors and will allow access to affordable prescription drugs and improve health care to millions of our most needy senior citizens. This is the most generous package Congress has considered for rural and suburban health care giving seniors will have better access to doctors, hospitals and crucial treatment options, regardless of where they live. Additionally, this bill addresses the needs of the low income.

I am particularly proud that the bill includes the critical funding for relief from the drastic payment reductions in the Medicaid disproportionate share hospital (DSH) program. The provision will go a long way toward protecting California's fragile health care safety. The funding in the conference report will restore several hundred million dollars to safety-net providers in California over the next 10 years.

Safety net hospitals across the state of California, two of which are located in the 45th District in Moreno Valley and Indio, have had to absorb drastic reductions in Medicaid DSH funding at a time when demand for their services has been increasing. The additional funding will help ensure that services to the most vulnerable populations are available.

This bill represents a breakthrough in the nation's commitment to strengthen and expand health security for its citizens at a time when it is most needed. I rest assured knowing that our nation's future generations will continue to receive the highest level of health care available.

Mrs. BIGGERT. Mr. Speaker, no single piece of legislation is as important to meeting the health care needs of Americans as is the bill we will vote on shortly, the conference report to H.R. 1, the Medicare Modernization and Prescription Drug Act. I rise to express my strong support for this legislation.

Today is truly a momentous day. Finally, Medicare will catch up with the realities of twenty-first century medicine. When the program was first created in 1965, the majority of medical treatment was done in a hospital. This is reflected in Medicare's current generous hospitalization benefit and paltry prescription benefit.

Well, times have changed, to say the least. Today, life-saving medications are helping seniors stay out of the hospital and live longer, happier and more productive lives. But, as we all know, prescription drugs are expensive, and seniors too often are forced to cut back on other necessities to afford the medicine they need. Passage and enactment into law of this conference report will help to ensure that this never happens again.

Here's how it works.

Six months from now, seniors will begin to see the benefits. In April of 2004, any senior who wishes to have one will be issued a voluntary drug discount card that will save them 10 to 25 percent on their prescriptions. For low-income seniors, $600 automatically will be added to their cards to help them afford the drugs they need. The discount card will work like a supermarket discount card, giving users a discount at the time of the purchase.

Another very important benefit kicks in beginning in 2005, when all newly enrolled Medicare beneficiaries will be covered for an initial physical examination. At last, patients and physicians will have an early baseline that can signal if problems exist or what areas might need to be monitored more closely in the future.

All beneficiaries also will be covered for cardiovascular screening blood test, and those at risk will be covered for a diabetes screen. These new benefits can be used to screen Medicare beneficiaries for many illnesses and conditions that, if caught early, can be treated, managed, and can result in less serious health consequences.

And perhaps most importantly, beginning in 2006, for the very first time in the history of Medicare, seniors will have a prescription drug benefit. If they choose to participate, seniors would pay about $35 a month. Once they have met the $250 a year deductible, 75 percent of their drug costs will be covered up to $2,250. When drug costs exceed $3,600 a year, 95 percent of costs will be picked up by Medicare.

No matter where in the country they live, seniors will be able to choose between at least two prescription drug plans.

If seniors are happy with the coverage they now have—and many in my district are—they do not have to switch into a new plan. This new benefit is absolutely, completely, 100 percent voluntary.

But there is much, much more to this bill than a prescription drug benefit option for seniors. In fact, this bill can affect the health and welfare of every American citizen, no matter how young or old. How is this so?

Well, first, this bill will expand access to health care for everyone.

As you know, physicians who see Medicare beneficiaries are reimbursed for the extra cost of treating these patients. These payments are already woefully inadequate and physicians have been forced to stop taking on Medicare beneficiaries because they simply cannot afford to keep seeing them. Under current law, these reimbursements will be cut by an additional 4.5 percent next year.

I am very, very pleased that the conference report addresses this issue by reversing the scheduled cut and increasing the payments by 1.5 percent. This means that more doctors will be able to treat more seniors, and more seniors will have a choice of which doctors they see.

Hospitals also will be better off under this bill. The conference report provides increases in payments to teaching hospitals and increases funding for hospitals that treat a large number of Medicare patients. It also reimburses hospitals for the costs of using the most advanced technology. In short, the conference report ensures that hospitals can continue to care for Medicare beneficiaries.

Finally, this legislation encourages Americans of all ages to save for their own healthcare needs. The Health Savings Accounts—HSAs—will let people save money and accumulate interest—tax-free—in order to take care of health care premiums and other medical expenses.

HSAs are completely portable, so when people change jobs, they can take their accounts with them. Individuals also can make ''catch-up'' contributions to their accounts once they turn 55, and still enjoy the tax benefits.

These accounts will help thousands of individuals who do not have access to health insurance—or who wish to augment their coverage—to better afford it.

Our seniors have worked hard throughout their lives. They should be enjoying their golden years, not worring about how to pay for their life-sustaining medicines. This legislation will go a long way in helping them get back to the business of enjoying life.

Drug discount cards, baseline physical examinations, prescription drug coverage, and disease screenings are just a few of the great new features that will help seniors stay healthy.

Health savings accounts and improved levels of physician and hospital reimbursements will go a long way to improving access to health care for Americans of all ages.

I am honored to support this legislation and I encourage my colleagues to do so as well.

Mr. CAPUANO. Mr. Speaker, I rise today to voice my strong opposition to H.R. 1, the Republican Prescription Drug Bill.

This bill represents the first step in a Republican plan to end Medicare as we know it. Under the guise of providing seniors with the prescription drug coverage they so desperately need, this Congress is attempting to destroy the program that seniors have depended on for over 35 years to provide them with the affordable, reliable health care they need and deserve.

Mr. Speaker, not only does this bill fall far short of what the senior citizens of this country expected of us, but it fails by the most basic of standards: it prohibits the federal government from negotiating for lower-cost drugs; it may lead to 3 million seniors losing the good prescription drug coverage they currently have through former employers; it subsides HMOs at 124 percent of what it pays to traditional fee-for-service Medicare; it creates new Health Savings Accounts, which benefit mostly the wealthy; and it sets up new ''cost-containment'' measures, designed to lay the groundwork for future cuts to beneficiaries and providers. But most alarmingly, this bill contains a massive demonstration program that it the first step toward the privatization of Medicare.

The ''premium support'' demonstration project in this bill could force 7 million seniors to be subject to a social experiment that has never been tested. Under the demonstration

program, HMOs could "cherry-pick" healthy and wealthy seniors citizens, leaving the poor and sick in the traditional program, undermining the social insurance pool. Premiums for those in the traditional program would be driven up, and they could also vary by region and fluctuate from year to year. This is an unacceptable assault on the Medicare program that will only result in higher profits for the insurance industry.

There is no denying that some people may benefit from this bill. For example, it does provide some prescription drug coverage for those with the lowest incomes. Although instituting the first assets-test for low-income beneficiaries in Medicare's history, it will mean that many of these senior citizens now have access to prescription drugs.

Further, as the Member representing many of the teaching hospitals in the Boston area, I am well aware of the important provisions in this bill that will provide essential funding for the world-class hospitals, dedicated doctors, and other health care professionals who work so hard to provide quality care to all the citizens of my district.

However, the positive elements of this bill do not outweigh my concern for the damage this bill could do to a program that has become an integral part of our society. The steps toward privatization contained in this legislation are unacceptable. I am not willing to gamble with the health of our nation's seniors, placing their well being in the hands of the insurance industry. I do not believe this is a risk worth taking. Medicare has served us well for over 35 years. Its demise would mean an America where senior citizens are left to fend for themselves in the private insurance market without a safety net. While this bill may offer some appealing short-term benefits, the price could be the end of Medicare as we know ti. I cannot and will not be a part of it.

I urge Members to vote "no" on H.R. 1.

Mr. SHERMAN. Mr. Speaker, I rise to protest the process that brings H.R. 1, the Medicare reform and prescription drug legislation, before the House today. These procedures could only be described as undemocratic and unfair.

Republican Leaders were in the room for weeks as this bill was drafted, and were able to brief their members on its contents. Democratic Members could not begin to analyze the bill's provisions until yesterday.

We were given almost no time to review the conference report for this momentous legislation. We have waived the rules of the House to allow for this hasty, almost immediate consideration of a bill more than 1,000 pages long, so that not even the members of this body, to say nothing of the public, can fully grasp what is included.

There is no way that we, with a fairly full day of debate in this body, could have read the bill in the short time provided. And it is not enough that we merely read the bill. One must understand its implications. This alone demands that we vote "no" now, to give ourselves more time to fully deliberate and debate this legislation.

Mr. Speaker, again, I rise to express my strong opposition to the process by which we are today voting to overhaul one of the most important institutions in our country. American seniors deserve better, and we owe them more of our time; we owe them full deliberation, debate and our full consideration of this legislation.

Mr. ROTHMAN. Mr. Speaker, for seven years, I have been pushing and voting for a voluntary prescription drug benefit under Medicare. Such a plan would give seniors access to the quality, affordable, life-saving medicines they need. Unfortunately, the final Medicare bill—written in secret by the very same Republicans who eight years ago shut down the federal government as part of their strategy to force Medicare to wither on the vine—does exactly the opposite of what it is supposed to do. Instead of providing seniors with a voluntary, guaranteed drug benefit, the bill provides no drug coverage until 2006, and then forces millions of seniors to pay more for drugs if they don't give up their doctor and join an HMO—HMOs that can raise premiums at will and will throw out seniors who get too sick. The bill is nothing less than an outrageous giveaway of taxpayer funds to the health insurance industry.

A $12 billion slush fund in the bill will be doled out to insurance companies that offer privatized Medicare services and employers are given a $70 million windfall to maintain their retiree drug plans. These subsidies create a huge bias in favor of private plans. That's not competition, it's corporate welfare, and it's wrong.

The Congressional Budget Office projects that when the drug benefit begins in 2006, the average senior will spend $3,155 annually on prescription drugs. Under the Republican bill, because it so loaded up with giveaways to the private insurance industry, a senior with an income over $13,500 will pay $2,075 out of the first $3,155 in total drug costs—66 percent or two-thirds of the total—including the $35 monthly premium and the $250 annual deductible. And on top of these costs, 52,000 New Jersey seniors will face additional increases in their Part B premiums.

Also, instead of a voluntary benefit under Medicare, seniors will lose their doctors and be forced out of the system they know and trust. Worse still, 220,000 New Jersey seniors enrolled in PAAD and Senior Gold will have their health jeopardized and their choice of medicines limited by restrictive drug formularies imposed on the State by managed care plans. These seniors will face disruption in their coverage and will likely get less help than they currently receive. And it's a bad bill for doctors, whose reimbursement rates will be set not by the federal government, but by HMOs out to make a profit.

It is an especially bad deal for New Jersey seniors. As a result of the Republican bill, 94,000 New Jersey retirees will lose their drug coverage, 2–3 million nationwide. Over 150,000 Medicaid beneficiaries in New Jersey will pay more for drugs and 186,000 New Jersey seniors will be forced to leave traditional fee-for-service and accept vouchers to enroll in private plans starting in 2008.

The Republicans controlling the House of Representatives today dislike Medicare so much that they are literally willing to subsidize private health insurance companies to compete with Medicare, paying those companies $82 billion to create new private bureaucracies to handle prescription drugs for seniors and to even go so far as to build in a profit for them. We tried this experiment once already, giving private plans subsidies to offer Medicare services in the form of Medicare+Choice. But despite these subsidies, private Medicare+Choice plans felt they could not make enough of a profit, so they cut benefits and dropped hundreds of thousands of policyholders. Not only will this bill ultimately destroy Medicare and force seniors and their doctors into dealing with private HMOs, but the $82 billion could have been invested into the existing Medicare infrastructure, covering all seniors with a voluntary prescription drug program and reducing the premiums and co-pays for our nation's seniors.

Most galling the bill expressly prohibits the federal government from negotiating prices with the drug industry. The government already permits such negotiation in prices by the Department of Veterans Affairs and the Department of Defense—if this is good enough for veterans and those serving on active duty in the armed forces, why not for seniors? This is a $139 billion gift to drug companies in windfall profits. If Republicans were serious about reducing costs, their bill would not block the Secretary of Health and Human Services from using Medicare's enormous purchasing power to bring drug prices down.

AARP, which claims to speak for seniors, but is in fact a big insurance company with over $200 million in commissions on health and life insurance policies and prescription drug plans, has hastily endorsed the bill. Like hundreds of rank and file AARP members in my district who have called my office to disavow the national group's decision, I am outraged that AARP renounced the anti-privatization principles it claimed were central to its support. For this reason, I have resigned my AARP membership.

As many have said, this bill is a Trojan Horse: a radical dismantling of Medicare masquerading as a prescription drug bill. We must not forget that only a handful of Republicans voted for Medicare when Democrats created the program nearly 40 years ago. And at every turn since 1965, the Republican Party has worked to weaken a popular and successful health care system that allows seniors and their personal doctors to manage their own care.

We must not now adopt a privatization scheme that will harm seniors and risk Medicare's future. Instead, Congress ought to add a simple, straightforward and voluntary drug benefit to Medicare, save the $82 billion in subsidies to private insurance companies and private plans, and apply that money to lessen seniors Medicare drug premiums and co-pays. And then we should engage in a real bipartisan discussion about the future of Medicare—out in the open and not in a secret congressional backroom.

Mr. COSTELLO. Mr. Speaker, I rise in strong opposition to H.R. 1, the Medicare Prescription Drug and Modernization Act of 2003 conference report. Since coming to Congress, I have consistently promised over 70,000 seniors in my district that I would not support legislation that would fundamentally change the nature of Medicare and provide a prescription drug benefit that relies solely on insurance

companies. This legislation does just that and I cannot in good faith support it.

Medicare has been a success because it provides guaranteed coverage for all elderly and disabled Americans. This legislation would end Medicare as we know it and may particularly harm rural areas that depend on the traditional Medicare program. Beginning in 2010, up to 6.8 million people could be part of a demonstration program that forces the Medicare fee-for-service program for doctors and hospital visits to compete with private insurance plans. People who wanted to remain in traditional Medicare would find their premiums going up as other beneficiaries opted for private insurance coverage. Seniors and the disabled would essentially be forced out of the traditional fee-for-service program and into some form of managed care.

In addition, this approach does not guarantee the same benefits for all seniors. Seniors who live where hospitals and doctors negotiate lucrative contracts with managed care plans would have to pay more; seniors with higher incomes would have to pay more; seniors in rural areas would have fewer choices of doctors and pharmacies; and seniors with low incomes but with assets such as a savings account might get nothing at all. These provisions violate the central promise of Medicare: to provide a consistent, guaranteed benefit that allows everyone, no matter where they live, how much they have, or how sick they are, access to quality medical care.

Further, I support a voluntary prescription drug benefit paid for by Medicare. However, this ill-conceived plan before us today will result in as many as three million retirees losing their employer-sponsored drug coverage which is more comprehensive than this legislation. At present, employer-sponsored retiree health benefits are the greatest source of coverage for retirees, providing drug coverage for one in three Medicare beneficiaries. Yet, this conference agreement creates an incentive for employers to drop retiree coverage they currently provide, rather than encouraging them to maintain it. In addition, it fails to help retirees from state and local government, multi-employer groups, and non-profit organizations. The additional funding, under the premise of shoring up retiree coverage, is meaningless to those who retire from public service, such as teachers, firefighters, and police, or other organizations with no tax liability.

Finally, the conference agreement is flawed because it offers seniors an inadequate prescription drug benefit. I am committed to providing a comprehensive benefit that is affordable and dependable for all beneficiaries with no gaps or gimmicks in its coverage. However, this legislation provides a huge gap in coverage leaving half of seniors without prescription drug coverage for part of every year.

Further, the bill is sorely lacking in any provision that might restrict the skyrocketing costs of the drugs themselves. It does not include meaningful reimportation language, strong language ensuring access to generic drugs, or the ability to negotiate prices as is done currently by the Veterans Administration.

This legislation relies too heavily on the insurance industry to bring drug costs down and does not guarantee seniors access to the medicine prescribed by their doctor or that they can get prescriptions filled at their local pharmacy. Seniors deserve fair drug prices and a real, affordable prescription drug plan.

Mr. Speaker, for these reasons, I oppose the conference report. I ask my colleagues to join me and reject this bill and send it back to the committee with instructions to bring the bill back to the floor with a real prescription drug plan that guarantees seniors affordable and dependable coverage.

Ms. MCCOLLUM. Mr. Speaker, tonight, Republican leaders in Congress are poised to pass an overhaul of Medicare that provides a weak prescription drug benefit, fails to lower drug costs, and starts the process for the privatizing of Medicare—a program that seniors have depended upon and trusted for almost 40 years.

Seniors have been fighting for years for a Medicare prescription drug benefit that is affordable; available to all seniors and disabled Medicare beneficiaries by providing meaningful benefits within the Medicare program.

However, the legislation Republicans have produced does not make prescription drugs affordable, does not offer a guaranteed benefit under Medicare and does not sufficiently protect current retiree plans. Instead, this bill caters to the pharmaceutical industry, bribes the HMOs with $12 billion in subsidies, and allows the AARP to reap $1.56 billion in profits. This bill threatens the future of Medicare and the health of America's seniors.

Under this Republican Medicare bill: $88 billion in tax credits will be given to employers to retain coverage for their retirees, and; Despite this windfall, 2 to 3 million seniors will still lose benefits from their employer-based coverage; and millions of seniors will pay more in Medicare premiums if they refuse to join an HMO.

The prescription drug plan that Republicans have proposed is a sham. Seniors will pay more than 50 percent of their drug costs for coverage up to $2,250. Most troubling, the bill leaves a huge ''coverage gap.'' Seniors will have zero prescription drug coverage for medication costs that run between $2,250 and $5,100—and those beneficiaries will still have to pay the monthly premium! Over half of all Medicare beneficiaries would fall into this ''coverage gap.'' And this bill will scale back coverage for the poorest seniors. Up to 6.4 million low-income Medicare beneficiaries will get less drug coverage than they have now as a result of new low-income thresholds and stringent asset testing. Also, seniors will only be eligible for drug coverage through private insurance companies that will have wide latitude in setting premiums and deductibles. Private insurance companies will also be able to make decisions about which drugs are covered, as well as which pharmacies seniors can use.

Today, there are approximately 648,000 Medicare enrollees in Minnesota. According to the Minnesota Department of Health, about 46 percent have no prescription drug coverage. In Minnesota alone, this bill that may cause at least 39,480 Medicare beneficiaries to lose their coverage from their former employers and 89,800 Minnesotans will pay more for prescription drugs.

And the most outrageous part is that the Republican plan benefits the pharmaceutical industry by explicitly prohibiting the Secretary of Health and Human Services from negotiating lower drug prices on behalf of America's 40 million Medicare beneficiaries. It also blocks the re-importation of drugs from Canada at lower prices. Additionally, the plan will create health savings accounts, which are tax-free savings accounts for medical expenditures. This creates an unprecedented tax loophole that would undermine existing employer coverage and provide $6.7 billion in tax relief for the wealthy.

Earlier this year, I supported a bill that provides for a voluntary prescription drug benefit under Medicare. Medicare would pay 80 percent of drug costs after a $100 deductible and no senior will have to pay more than $2,000 in costs per year. This plan would cover all Medicare beneficiaries, regardless of previous health conditions, and guarantee people's choice of medication, pharmacy, doctor and hospital. The plan that I supported would also give the Secretary of Health and Human Services the authority to use the collective bargaining power of 40 million beneficiaries to secure lower costs for the most popularly prescribed medications to end price gouging by the big drug companies.

Minnesota seniors and persons with disabilities deserve better than the Republican bill that is before us tonight. I will only vote for a prescription drug benefit that is affordable and available to all seniors and disabled Medicare beneficiaries regardless of geographic location or health condition.

Mr. BISHOP of Georgia. Mr. Speaker, although the massive conference agreement over Medicare reform contains some of the provisions the country needs and that I support, the overall legislation is deeply flawed. Congress can do better. By voting against the agreement, I am calling on Congress to correct the flawed provisions that would deny many seniors any prescription drug benefit, increase health care costs for many lower income citizens, push many seniors into managed care, put employer-based prescription drug coverage at greater risk, and create an uncertain privatization process that could change the face of Medicare forever.

By voting down this proposal, we could fix the critical flaws and still have time to enact a sound Medicare reform bill that the country desperately needs before the end of the 2003 session. I am cosponsoring a bill introduced Friday (11/21) that would shore up rural providers and maintain the integrity of Medicare for rural communities, while putting aside the more rancorous issues until later. I urge its consideration.

Among the agreement's provisions that I strongly support are those that would provide realistic reimbursements to providers, including giving rural hospitals parity with urban hospitals. Many community hospitals have shut down, and many are struggling to survive. This puts the health of many of our rural citizens, and the vitality of many rural communities, at risk. Relief for at-risk hospitals is one of the positive things about the agreement, and it should be a part of any health care reform enacted by Congress.

But I cannot overlook the agreement's overwhelming downside.

Dr. Kenneth Thorpe, a noted health policy authority from Emory University, calculates

that under this agreement 51,450 Georgians would lose employer retiree health benefits; 161,300 Georgians would pay more for prescriptions; 82,000 fewer Georgians would qualify for low-income benefits than under the Senate version; and 34,000 Georgians would pay more for Part B premiums for doctor and outpatient care.

There are other sections of this lengthy bill, released the same day debate began, that few outside the conference committee have had an opportunity to examine. But much of what we know is disturbing.

There are no measures in this bill to respond to the problem of skyrocketing of drug costs. Not only would the government be prevented from negotiating drug prices, the possibility of reimportation of less expensive medicine from Canada is effectively killed.

The actual prescription drug benefit is skimpy, with an enormous coverage gap and an asset test designed to limit access for thousands of truly needy Americans. Moreover, millions of retirees will see the superior coverage they now receive from their former employers weakened or eliminated. That's nearly 3 million individuals nationally and more than 50,000 in the state of Georgia alone.

One of the biggest concerns is the agreement's push to privatization. As drafted, it appears private insurers would tend to pull in the healthiest beneficiaries while those with medical problems would remain with Medicare, causing Medicare costs to sharply rise. This could create what some are calling a 'death spiral' of escalating costs in traditional Medicare. More and more seniors would be pushed into the less-expensive HMOs and PPOs simply because they could not afford the higher cost of Medicare.

From the enormous premium support "demonstration projects" to the weakened Federal fallback for areas without meaningful access to private prescription drug plans, this agreement reveals a poor understanding of the needs of rural providers and residents.

All of these flaws make this agreement unattractive in the short term. But if we look just a bit further down the line, the picture becomes even bleaker. In 2006, when the prescription drug benefit would actually begin, the benefit would be essentially worthless to the average citizen. And, when 45 percent of spending on Medicare comes from general revenues, extreme measures to curtail Medicare spending would be triggered. It's extremely cynical to include such a dramatic cost-containment mechanism while excluding responsible measures to control Medicare spending.

There is much that is wrong in this bill, and much less that is right.

Rarely will we consider any legislation that will have a greater impact on the well being of the American people.

Let's get it right!

Mr. OBERSTAR. Mr. Speaker, Medicare is the most successful health initiative in American history—improving the quality of life for America's senior citizens, extending their longevity, and relieving their anxiety about affording the health care they need.

For the past several years, Democrats in Congress have worked tirelessly for affordable, comprehensive, and guaranteed coverage for prescription drugs under Medicare. This week, the Republican majority in Congress is poised to pass legislation that will require seniors to pay significant out-of-pocket costs for prescription drugs, will eliminate employer-provided health care coverage for 2.7 million retirees nationwide, and will ultimately undermine the entire Medicare program. Simply put, the Republicans brokered a deal that prioritizes the pharmaceutical and the insurance industries over providing a comprehensive benefit to seniors and the disabled.

I. EFFECTS ON MEDICARE BENEFICIARIES

I am particularly concerned with the inclusion of "premium support," a misguided proposal that will undermine Medicare. Instead of providing a Medicare prescription drug benefit for seniors, congressional Republicans have embarked on a radical and untested social experiment that threatens the future of Medicare. The final Medicare bill clearly takes the first step toward privatizing Medicare by implementing a "premium support demonstration project" in six metropolitan areas.

The bill threatens traditional Medicare because it includes provisions designed to stack the deck in favor of the health insurance industry. The legislation allots $17 billion to HMOs to lure them into the market to provide senior citizens with taxpayer-financed health and drug benefits. As the Washington Post recently pointed out, if Medicare "privatization is such a good idea, why do the private insurance companies need such big subsidies to enter the Medicare market? . . . That's not capitalism or competition. That's corporate welfare." Rather than divert $17 billion from Medicare to prop up private sector competition, it would be far better to invest that money in Medicare's future.

Seniors will essentially receive a voucher for services to cover the lowest-cost private insurance plan, if such plans are offered, which is not at all certain. If this plan does not pay for the services they need, seniors will have to cover the difference—which could be a big figure—out of their own meager income. Masquerading as increased efficiency, this concept disproportionately benefits healthier seniors and leaves seniors with more costly health care needs paying an estimated 25 percent more for traditional Medicare. Seniors living in different regions will also pay different prices for the exact same benefit. I believe America's seniors deserve a guaranteed drug plan that is available for all Medicare beneficiaries—regardless of where they live.

II. IMPROVED MEDICARE REIMBURSEMENT FOR RURAL HEALTH CARE PROVIDERS

I have strongly supported efforts to eliminate disparities in Medicare reimbursement for rural areas, and I am very pleased that the conference report contains significant improvements for rural health care providers. Health care is essential in greater Minnesota. The hospitals in many small communities throughout northern Minnesota are the major employer in town, and the health care they offer is critical for economic development and tourism.

It is encouraging news that 31 hospitals in my congressional district would receive $39 million over 10 years under this bill in improvements in Medicare reimbursement, including fourteen Medicaid Disproportionate Share Hospitals (DSH) and 12 Critical Access Hospitals (CAHs). Other notable changes in the policies for CAHs—albeit not attached to a dollar amount—would improve the delivery of mental health services in rural northeastern Minnesota by permitting 10 beds to be used for psychiatric or rehabilitative services. Physicians would see a payment increase of 1.5 percent rather than a 4.5 percent decrease. Teaching hospitals would each receive $183,000 spread out over 10 years in additional payments for Indirect Medicare Education, which would greatly assist the training of medical students at the University of Minnesota, Duluth, as they prepare to serve rural Minnesota.

III. PRESCRIPTION DRUG BENEFIT

Seniors will be eligible for drug coverage only through private insurance companies that will have wide latitude in setting premiums and deductibles. Private insurance companies will also be able to make decisions about which drugs are covered, as well as which pharmacies seniors can use.

The plan is difficult to explain, but let me try: it begins with uncertain private health insurance premiums, estimated to be $35 per month, but not specified in statute; then, seniors must pay a $250 deductible before they receive any assistance, after which they will pay a 25 percent co-insurance for up to $2,250 in drug costs. However, there is a large coverage gap where no assistance is provided between $2,250 and $5,100 in drug spending, the "hole in the doughnut," where seniors will be paying premiums but receiving no assistance at all. Those seniors with $5,100 in drug costs annually will still pay $4,020 under this bill. This plan is as unfair as it is complicated and costly to older Americans living on fixed incomes.

IV. IMPORTATION/COST ISSUE

I firmly believe that in order to ensure the continued affordability of Medicare benefits for seniors, greater efforts must be made to address escalating health care costs, particularly the price of prescription drugs. Yet this bill does precious little to contain the cost of prescription drugs in the future. The legislation once again deceptively appears to permit drug importation from Canada, while including a poison pill that the Secretary of the Department of Health and Human Services must certify to the Congress that its implementation does not present a health risk. During the Clinton Administration, HHS Secretary Donna Shalala refused to make such a certification, as has the current Secretary, Tommy Thompson. When Americans are paying 30 to 300 percent more for prescription drugs than Canadians or people in other industrialized countries, there must be a concerted effort to fix the safety concerns in the legislation rather than jettison the entire effort with this poison pill.

Despite claims that this legislation introduces free market principles and competition, I am deeply troubled that the Republican Medicare plan prevents federal cost-saving efforts that would reduce prescription drug costs for seniors. At a time when many seniors must pinch their pennies to afford the basic necessities, this bill—incredibly—explicitly prohibits the Secretary of the Department of Health and Human Services from negotiating lower drug

prices on behalf of America's seniors. Unlike the Department of Veterans Affairs, which does have such authority, the Secretary of HHS would not be allowed to leverage the market power of 40 million Medicare beneficiaries to reduce prices.

In my view, the big winners are the drug and insurance companies, at the expense of our nation's seniors. In addition to providing $17 billion to HMOs and prohibiting the Secretary of the Department of Health and Human Services from negotiating lower prices, the final Medicare bill will eventually undermine community pharmacies. Pharmacy benefit manages (PBMs), charged with administering the prescription drug benefit, will be able to contract out and establish an unequal playing field whereby mail order companies can sell larger quantities for lower co-pays than community pharmacies can. There is no transparency for PBMs—just a conflict of interest; PBMs are not held responsible to report rebates or kick-backs they might receive from the pharmaceutical industry for selling specific drugs—that provision was stripped from the conference report. I am continually dismayed that Republicans go to great lengths to serve special interests rather than the public good.

I have voted many times this year in support of a strong prescription drug program that would strengthen the Medicare program. However, I am not willing to cast a vote to undermine a program that seniors and the disabled have trusted for nearly 40 years, in exchange for an atrocious prescription drug benefit that directs formidable sums of money to special interests. Congress can do better; our seniors certainly deserve better.

Mr. DAVIS of Illinois. Mr. Speaker, it is said that the cruelest lies are often told in silence—in what you don't say. If that's the case, then the silence is deafening as the Medicare prescription drug legislation looms ever closer to final passage.

We promised the American people we would protect and strengthen traditional Medicare. This legislation does the opposite—it begins coercing millions of seniors out the common Medicare insurance pool into private HMOs.

It creates huge new tax shelters for the ultra wealthy with the ironic name of ''Health Savings Accounts.''

Meanwhile the very poorest seniors, those who also qualify for Medicare, will see their benefits slashed.

The bill places draconian new caps on future Medicare services and spiraling new tax burdens on middle income working families.

The bill inaugurates the process of means-testing and asset-testing seniors before providing them benefits—of checking their wallets before checking their health.

It would also add heavy new financial burdens to state budgets already strained to bursting by federal cutbacks.

All this in return for a pathetically inadequate prescription drug benefit and skyrocketing drug company prices and profits as far as the eye can see.

Fool me once, shame on you. Fool me twice, shame on me. Fooling our seniors shame on all of us.

Mr. Speaker, this Medicare prescription drug bill is not what it is advertised to be. It is a cruel hoax and a danger to the health and well-being of America's seniors.

As Representatives of the American people, we have a special moral responsibility to be honest with the people.

This legislation breaks that sacred trust. This bill deceives and dispossesses America's seniors.

I'm with Will Rogers: I'd rather be the man who bought the Brooklyn Bridge than the man who sold it.

Mr. VAN HOLLEN. Mr. Speaker, with regret, I rise in opposition to the Medicare conference report now before us. Rather than giving seniors the simple, comprehensive and affordable prescription drug benefit they deserve, this bill recklessly undermines the Medicare program, threatens many seniors' existing drug coverage and fails to bring down skyrocketing drug costs.

Let's be clear: This is not about whether we ought to add a prescription drug benefit to Medicare. Democrats—including myself—have been calling for a meaningful Medicare prescription drug benefit for years. Now that the Republican party has dropped its historic opposition to modernizing Medicare, there is broad consensus—at least rhetorically—on the importance of this goal.

Additionally, this is not about whether doctors should receive a positive payment update for services rendered under Medicare. I think everyone in this chamber understands we could pass a free-standing positive payment update for physicians today—and by a wide margin. Frankly, I would be first in line—because I don't think you can ask providers to participate in a program without adequate reimbursement. But if we were really interested in giving doctors a fair reimbursement rate, we would end this untenable ritual of dodging the next round of scheduled payment cuts with stop-gap, band-aid measures and finally get around to fixing the obviously flawed Medicare reimbursement formula once and for all. Unfortunately, that's not what we are doing here today.

Instead, after months of secretive negotiations and much highly publicized bickering, the majority is now presenting this House with a prescription drug bill that blatantly violates the first tenet of responsible medicine: Do No Harm.

If this conference report is enacted into law, as many as 7 million seniors will be forced to pay more for Medicare—unless they agree to give up their doctor and join an HMO, according to analysis done by the House Ways and Means and Energy and Commerce Committee minority staff. Additionally, over 2 million retirees who already have private prescription drug coverage stand to lose that coverage, according to the same report.

That is also the conclusion reached by the former Republican Majority Leader of the House Dick Armey, who called on Congress to reject this misguided bill in today's Wall Street Journal, saying in part: ''(T)his bill is going to cost millions of seniors their current prescription drug coverage.''

In my home state of Maryland, an estimated 60,000 Medicare beneficiaries could lose their existing private prescription drug benefits, according to analysis based on CBO data prepared by the Senate Health, Education, Labor and Pension Committee minority staff. Moreover, similar analysis from the Senate HELP Committee minority staff using CRS data projects that 75,000 Maryland Medicaid beneficiaries will pay more than they do now for the prescription drugs they need.

This legislation puts seniors with existing coverage—and the future of the entire Medicare program—at risk. And for what? A prescription drug benefit that—after all the premiums and deductibles and co-pays and coverage caps and out-of-pocket costs are accounted for—provides $1 of assistance for every $4 that seniors with significant drug costs will still have to pay themselves.

There are smarter, more efficient ways to spend $400 billion on a Medicare prescription drug plan. For starters, we should eliminate the $12 billion subsidy being offered the private insurance industry as an inducement to participate in the Medicare market. If PPOs and HMOs are really more efficient than traditional than traditional Medicare in delivering high quality care at a lower cost, they don't need a $12 billion taxpayer handout to do it. Additionally, we should scrap the Administration's ill-conceived and deceptively named ''Health Security Accounts'', which amount to little more than a $6 billion tax break for the wealthy. And finally, we should get serious about making drugs affordable for seniors and for all Americans—through such common sense steps as permitting re-importation from our industrialized trading partners and allowing the federal government to negotiate for lower drug prices on behalf of Medicare's 41 million beneficiaries—something the bill before us today actually forbids the government to do.

The ultimate value of allowing the Center for Medicare and Medicaid Services (CMS) to negotiate for lower prices will obviously turn on the outcome of those particular negotiations. But we know from the experience of the Veterans Administration—which does currently have the ability to negotiate for lower prices—that the savings can run upwards of 60 percent. In the absence of meaningful steps to curb the exorbitant cost of drugs, this bill does more for the pharmaceutical industry than it does for consumers.

I believe seniors deserve a real Medicare prescription drug benefit plan; one that is comprehensive, affordable and easy to understand; one that will strengthen Medicare rather weaken it; and one that will not reduce the benefits of seniors who already have prescription drug coverage.

Mr. Speaker, we should defeat this fatally flawed conference report, come together on a bipartisan basis and give seniors the meaningful prescription drug assistance they are asking for and need.

Mr. CUMMINGS. Mr. Speaker, I rise today to speak against the woefully inadequate Medicare prescription drug conference bill being considered today.

Mr. Speaker, this report is an insult to our seniors. Instead of a bill that helps our seniors, we have a bill that makes an untenable trade-off. A meaningless prescription drug benefit and the dismantling of the Medicare ''healthcare'' program for 40 million seniors and disabled Americans as we know it today. Quality healthcare coverage should come along with a prescription drug benefit, which

Democrats have been fighting for over the past six years, not at the expense of it. But that is what this bill does. So today, what we have to consider is a bill that will do more harm than good—one that represents a giant first step in privatizing and the emasculation of Medicare—a program that our seniors and disabled know and love.

Under this disastrous plan:

Gone are retiree benefits. Because it gives employers no incentive to maintain prescription drug coverage for their retirees two or three million retirees will lose their current private drug coverage. In my home state of Maryland this includes 59,640 retirees.

Gone are wrap-around services. Six million low-income beneficiaries will pay more for their prescription drugs. Those who are dually eligible to receive both Medicare and Medicaid—seniors who are so poor that they need what we call wrap-around services to have healthcare coverage—will pay more for their prescription drugs under this plan. To add insult to injury this bill does not allow states to use their federal Medicaid monies to supplement them. This includes 75,800 seniors in Maryland.

Gone is the traditional Medicare Program as we know it. They say fee-for-service stays intact. Well if you as a beneficiary want to be nickeled and dimed to death—and pay almost 80 percent out of pocket for Medicare and prescription drug coverage up to $5,044, then it stays intact. Let me explain, that means that after a senior or disabled person has paid almost $4,000 out-of-pocket in premiums, deductibles and contributions, then the traditional Medicare coverage kicks back in.

Soon to be gone is traditional Medicare. Traditional Medicare is most threatened by what has been termed premium support. Beginning in 2010, about 7 million beneficiaries will be forced into a premium support demonstration that will make them pay more for Medicare if they don't give up their doctors and join an HMO. This also means that there will be tremendous premium variation from region to region even in the same state when this plan is fully rolled-out. While it may be just 7 million seniors in 2010, now make no mistake the goal is to end Medicare as a social compact, where eventually, Medicare will indeed "wither on the vine" and private insurance and pharmaceutical companies will rule the day. Unfortunately, passage of this legislation will mean that many of our seniors will wither right along with the Medicare program—which will no longer be seen as a guaranteed benefit—a concept our nation embraces.

Here to stay are vouchers for Medicare beneficiaries—to take to an HMO which will give these folks what they want them to have—there will be little real choice. Seniors want stability—knowing who their doctors will be, who will be able to fill their prescriptions, which drugs will be covered, and in which hospital they can receive services. I have not ever been told by a single senior that they want to be able to choose between profit-driven private insurer providers which may or may not want to have them as clients.

Here to stay is assets testing. What's good about this bill is that those beneficiaries who are 15 percent below the poverty level are able to forego paying the monthly premiums of $35 and the yearly deductible of $275, and to escape the donut hole in coverage from $2,200 to $5,044. But again our compassionate conservative friends give with one hand and take with the other.

In order to qualify as low-income, seniors have to go through the degradation of proving that they are poor enough to receive it—meaning all of their assets, not just incomes are tested. The one saving grace of this bill is poisoned by the lack of compassion. This means that low income seniors will be kicked out of receiving the low-income benefits of the plan depending on their assets—simply because they have been able to squirrel away a few thousand dollars into a savings account. This affects 53,000 seniors in Maryland, many in my district.

I ask, who is going to invade their privacy and check their assets—isn't it sufficient that they're already living off of meager means 150 percent below the poverty level, should they too have to pay $4,000 to receive both Medicare and prescription drug coverage? What a trade-off. How despicable. I think my colleagues can agree that this is a very troubling proposition and a totally unfair result.

Here to stay is big money to the drug companies and HMOs. In fact, this bill overpays the private insurance plans by $1,920 per beneficiary at the expense of traditional Medicare by creating a $12 billion slush fund for these companies just to take on these beneficiaries. Mr. Speaker, our seniors do not need a handout, but a hand-up—use that $12 billion to give to our current providers and hospitals who already give outstanding care to our seniors, along with a meaningful prescription drug benefit.

Here to stay are HMOs that seniors will feel coerced into joining because they will not be able to pay for the traditional Medicare they enjoy today.

Additionally, with the establishment of the Voluntary Prescription Drug Benefit Program, beneficiaries again lose because of the lack of negotiated prices for the prescription drugs. Why not leverage the power of the 40 million Medicare beneficiaries? Why not mandate containment of drug costs in this bill? Why give seniors and the disabled a prescription discount card they cannot use until 2006 while the drug companies still get to determine the cost? Why enact health savings accounts that only the well-off can afford? Why include a poison-pill that kills any chance of reimportation of affordable medicines? Why include an artificial budget cap on general revenues funding for Medicare that triggers a fast-track legislation procedure that would allow immediate cuts in benefits, cut payments to nursing homes and home health care providers and increase cost-sharing? Why leave our seniors and disabled powerless?

I know the answers. It's because this bill is not a reform bill, but a rewards bill—and the pharmaceutical and the private insurance companies are the winners.

Mr. KIND. Mr. Speaker, I rise in reluctant opposition to the bill before us today. It was my hope that the conference committee would work in a bicameral, bipartisan manner and produce a bill focused on providing prescription drug coverage to seniors and improving Medicare. Instead, House Democrats were shut out of the discussion completely, and special interest groups were given more information than members of Congress. Even more troubling than the process, however, was the legislation that came out of this conference. This bill is a bad deal for American seniors and an even worse deal for our children and grandchildren. Estimated at $400 billion, this bill is not paid for and, without basic cost containment measures, like price negotiation or drug reimportation from Canada, will leave a legacy of debt for our children and grandchildren to inherit. The easiest thing to do in politics is pass a bill and don't pay for it.

Certainly, there are portions of this bill which I support—portions which generously and correctly bring aid and equity to hospitals, especially those in rural areas like western Wisconsin. For far too long, rural hospitals and critical access hospitals have been treated as second-best, and I have long been a champion of bringing equity to these hospitals which do such important work throughout our country. This bill will at last begin to equalize the base inpatient payment rate, increase the cap for Medicare disproportionate share hospitals, and bring the hospital update to full market basket. Providers also benefit a great deal from this bill, and I am pleased that instead of receiving a cut, Medicare providers would receive a 1.5% update for the next two years. Furthermore, the assistance to our providers is paid for with offsets in the budget, so it does not add to the historically large federal deficit. If these provisions were separate from the bill, I could support them in a heartbeat, and I am confident that such a bill would pass overwhelmingly in Congress. In fact, just today my colleagues and I have introduced a bill that is identical to the rural health care package included in the Medicare Conference Report. We could still pass such a bill if the Republican leadership wanted to, but they do not. Instead, they are holding the rural provisions hostage to all ill-advised and costly prescription drug program to be delivered to private insurance companies after we bribe them with billions to do it, even after they have told us they do not want to do this.

As important as it is to sustain our hospitals and our doctors, aspects of the bill which will hurt our seniors, our pharmacists, and our states make it impossible to support this bill. Too many seniors in my district in western Wisconsin have told me stories of skipping meals in order to afford prescription drugs or cutting their pills in half to make their expensive prescriptions last longer. I came to Washington to work towards a real solution to this problem, and I have championed the New Democratic Coalition's plan, which is simple, progressive, and affordable. I would be proud to stand on this floor today and support the Dooley prescription drug plan. I would have been able to compromise and support a bill that was close to the Senate's bipartisan bill. But I am unable to support a bill that will do relatively little to provide seniors with drug coverage, that bribes insurance companies, that threatens to destabilize existing coverage for retirees, that undermines Medicaid, and that has no reasonable measures to contain costs.

Sadly, for all the excitement over a prescription drug benefit, this bill would bring little relief to struggling seniors. The drug benefit does no start until 2006, leaving struggling seniors a few more years before they receive any help in paying for their prescription drugs. Once 2006 rolls around, many seniors will find a drug benefit far less generous than the one they expected. In fact, a senior who spends slightly over $5,000 per year on prescription drugs will have to spend over $4,000 of his or her own money, meaning the consumer still pays 80 percent of drug costs. This is hardly the relief from expensive prescription drugs that seniors have been promised and that they deserve.

Also of concern is the effect this bill will have on seniors who currently have drug coverage. Astoundingly, an estimated 58,170 Medicare beneficiaries in Wisconsin will lost their retiree health benefits because of this bill. And they are not the only seniors who will suffer. Wisconsin's Seniorcare program is a shining example of the great work that can be done to aid our nation's seniors when federal and state governments cooperate. The bill before us would punish Wisconsin's leadership on this issue; Wisconsin would most likely lose the matching funds it receives for Seniorcare and be forced to drastically scale back the program. Wisconsin's Seniorcare participants currently pay a nominal enrollment fee, low drug co-payments, and a modest deductible, with those seniors below 160 percent of the poverty level paying no deductible whatsoever.

The Wisconsin Medicaid program, as well as the 110,200 seniors who are dual eligibles, will see a significant risk in their drug costs as a result of this legislation. The bill purports to do good things for low-income seniors, but in my state, it will have exactly the opposite effect. For the 99 percent of seniors in my state who already have health insurance, the introduction of a new prescription drug plan means a confusing new benefit with higher costs to the state and beneficiaries and less coverage than many Wisconsin seniors already enjoy.

All of this speculation over a prescription drug plan assumes, of course, that drug-only plans will be around to offer this less than substantial coverage. Currently, there are no drug-only insurance plans, and representatives of the industry have maintained they do not want to start such plans. Because of this reluctance, the bill bribes private insurance companies, pouring billions into the industry in an attempt to entice the companies to create drug-only plans. Clearly, $400 billion is just a floor, costs will explode, and the insurance companies will return to Congress in the future to ask for more money or they will drop coverage of our seniors, just as many Medicare plus Choice plans are doing today.

The $400 billion price-tag is only the beginning of spiraling costs to the federal government; we have no idea what costs might be in the future for this benefit. Incredibly, even the original $400 billion is not paid for, and there are no attempts at cost control in this measure. The government, for both Medicaid and the Veterans Administration, negotiates drug prices. The 40 million Americans covered by Medicare constitute an immense and potentially powerful purchasing pool. Great savings could be realized by negotiation, yet this bill specifically prohibits the government from negotiating with drug companies. Another potential for savings is reimportation from Canada; once again, this cost-cutting measure is prohibited, as the Secretary of Health and Human Services would have to approve reimportation, and the agency has already indicated no such approval will be granted.

Finally, Mr. Speaker, I would like to speak of a group that has received little attention in a debate focused on seniors—our children and grandchildren. While I fully support providing seniors with a prescription drug benefit, I do not believe it is right to shift the costs of this benefit to future generations. We must devise a way to pay for these benefits now; we cannot and must not rely on future Congresses and future taxpayers to fix a problem of our creation. The party in power in Washington today wants tax cuts for the wealthy and pays no attention to fiscal responsibility. It is wrong to create a larger deficit than the one we already face. To protect seniors, to protect our children and grandchildren, I am opposing this bill, and I urge my colleagues to reject the flawed proposals contained in this bill. We can and must do better.

Mrs. DAVIS of California. Mr. Speaker, I support providing our seniors with prescription drug benefits under Medicare. It is one of the most important efforts we have undertaken this session, and, I believe, one of the most attainable. This is why I rise, with regret, to oppose this Medicare Conference Report. The legislation before us fails our seniors and places them at the mercy of private plans and insurance companies.

There are some good items in this legislation. For example, the increased funding for hospitals and hard-working physicians is greatly needed in our communities. Unfortunately, the overall bill does not accomplish what our seniors need.

When I reviewed this legislation, I needed to answer the following questions: ''What are the benefits for our seniors?'' and ''What do the changes mean in the long run?''

In the very limited amount of time I had to review this legislation, I have concluded that, in reality, this Medicare bill will hurt seniors by making health care less reliable and more costly.

We needed a prescription drug bill. We received, instead, legislation that has been called a ''Medicare monstrosity.'' It mandates huge changes to Medicare, but evades the underlying issue of providing seniors with a comprehensive prescription drug benefit.

This legislation ends Medicare's guarantees to seniors. It gives billions for managed care, for tax shelters, and for many other special interests unrelated to prescription drugs. It significantly worsens current levels of coverage for millions of Medicare beneficiaries with increased Part B premiums and threats of disappearing employer benefits.

Are all of these changes worth a weak drug benefit that will disappoint millions of seniors? No.

Mr. Speaker, our seniors deserve better!

At townhall meetings and in thousands of letters, phone calls and emails, seniors have told me that they want a prescription drug benefit that is affordable, comprehensive, and guaranteed, and they would like the coverage provided in the current Medicare system. The bill before us meets none of these standards.

Instead this bill will make our seniors anxious—anxious about substantial cost increases; anxious about having to switch doctors; and anxious about losing he security that Medicare has provided for almost 40 years.

The Conference Report before us is a missed opportunity. I hope Congress does the right thing by going back to the drawing board, and giving seniors a reliable and affordable prescription drug benefit. We can do better or our seniors—and we must!

Join me in defeating this bill and working to pass legislation that truly addresses our seniors' needs.

Mr. RAMSTAD. Mr. Speaker, I rise in strong support of the Medicare Prescription Drug, Improvement and Modernization Act.

This is truly a historic day. After years of hard work, Congress is finally on the verge of delivering on our commitment to America's seniors. The bill before us will honor our promise to create a meaningful and long overdue prescription drug benefit for Medicare beneficiaries.

This legislation means seniors will no longer have to choose between purchasing life-saving drugs or the basic necessities of food and housing.

In addition to this important new prescription drug benefit, the bill modernizes and improves Medicare to give seniors better choices and greater access to state-of-the-art health care.

I am grateful for the many important provisions in this package from the bill I sponsored, the Medicare Innovation Responsiveness Act (H.R. 941), which will increase seniors' access to lifesaving medical technology. These provisions provide long needed reforms that will bring the Medicare program into the 21st Century.

As founded and co-chair of the Medical Technology Caucus, I have witnessed first-hand the remarkable advances that lifesaving and life-enhancing medical technology has made to treat and cure debilitating conditions. The current Medicare system is antiquated because of its failure to incorporate modern day advances in technology.

Currently, seniors face unconscionable delays of up to 5 years before Medicare grants access to new technology. This delay can literally be a matter of life or death for many seniors.

The legislation before us incorporates many of the reforms I proposed that will vastly improve medicare's coverage, coding and payment process. These reforms will remove barriers to FDA-approved, lifesaving technology for millions of seniors. The result will not only improve lives, but in many cases save lives as well.

Thanks to this legislation, we are finally eliminating the barriers that discourage innovation and deny America's seniors the medical technologies they desperately need. Seniors have waited too long for access to the same treatment options that other Americans routinely enjoy.

I am also pleased the bill includes legislation I introduced with Mr. Cardin to break down regulatory barriers facing specialized Medicare+Choice plans that serve the frail elderly.

I also worked diligently to ensure that seniors suffering from serious mental illness will have the necessary access, under the new drug benefit, to the psychotropic medication they desperately need. I am pleased that this legislation addresses this critical need.

Mr. Speaker, this package of reforms will improve the lives of today's seniors and seniors for generations to come. I urge my colleagues to support this landmark legislation and deliver on our promise to preserve, protect and strengthen Medicare.

Mr. CANTOR. Mr. Speaker, tonight is a truly historic night. Tonight we will reform and modernize the Medicare system to reflect the needs of seniors. This legislation will save Medicare for our children while allowing seniors access to affordable prescription drugs starting next year.

One important feature of this legislation that allows seniors to have more control of their health care is the inclusion of new Health Savings Accounts (HSAs). These tax-preferred savings accounts work like IRAs and allow individuals, not the government, to make choices that best suit their needs. HSAs, will put individuals back in the driver's seat when it comes to their own health care.

The success of 529 college-savings plans and Roth IRAs proves that HSAs will work. I am glad that we were able to add this conservative and common sense proposal to the bill.

Tonight for the first time in Medicare's history, we will provide nearly 1-million Virginians with access to affordable prescription drug coverage. I am proud to deliver this much-needed and past-due assistance to my fellow Virginians.

Mr. Speaker, I support the Medicare legislation before us. It is a critical step in the right direction, and I encourage my colleagues on both sides of the aisle to support this bill.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Without objection, the previous question is ordered on the conference report.

There was no objection.

MOTION TO RECOMMIT OFFERED BY MR. TURNER OF TEXAS

Mr. TURNER of Texas. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the conference report?

Mr. TURNER of Texas. Yes, I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. TURNER of Texas moves to recommit the conference report on the bill H.R. 1 to the committee of conference with the following instructions to the managers on the part of the House:

(1) Strike the provisions of section 1860D–11(i) of the Social Security Act, as added by section 101(a) of the conference substitute and relating to noninterference of the Secretary of Health and Human Services with the negotiations between drug manufacturers and pharmacies and PDP sponsors.

(2) Substitute the provisions of title I of the Senate amendment to the bill for title I of the conference substitute recommended by the committee of conference, but provide for medicare as primary payor for prescription drug coverage for low-income individuals (as contemplated by the House bill), and permit State medicaid programs to provide wrap-around coverage (as contemplated by the Senate amendment).

(3) Substitute the provisions of title II of the Senate amendment to the bill for title II of the conference substitute recommended by the committee of conference with the following changes:

(A) Omit the provisions of section 231 of the Senate amendment (relating to establishment of alternative payment system for preferred provider organizations in highly competitive regions).

(B) Omit the provisions of subtitle E (relating to the establishment of a National Bipartisan Commission on Medicare Reform).

(4) Within the scope of conference and to the maximum extent possible, take up and reconsider title VIII of the conference substitute.

(5) Strike section 1123 of the conference substitute (relating to a study and report on trade and pharmaceuticals).

(6) Within the scope of conference and to the maximum extent possible, take up and reconsider the issue of importation of prescription drugs.

(7) Within the scope of conference and to the maximum extent possible, take up and reconsider the issue of special rules for employer-sponsored programs, including qualified retiree prescription drug plans.

Mr. TURNER of Texas (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

POINT OF ORDER

Mr. THOMAS. Mr. Speaker, I make a point of order.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. THOMAS. Mr. Speaker, do we have the motion to recommit in written form?

The SPEAKER pro tempore. The Clerk is reading the motion now.

Mr. THOMAS. Mr. Speaker, are we allowed to have the motion?

The SPEAKER pro tempore. The gentleman submitted his motion to the desk.

The Clerk will read.

The Clerk concluded the reading of the motion to recommit.

The SPEAKER pro tempore. The motion to recommit is not debatable.

Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. TURNER of Texas. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 211, noes 222, not voting 2, as follows:

NOT VOTING—2

Ehlers
Gillmor

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HASTINGS of Washington) (during the vote). Members are advised 2 minutes remain in this vote.

□ 0301

Mr. SHADEGG, Mrs. BONO and Mrs. JO ANN DAVIS of Virginia changed their vote from "aye" to "no."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

Stated against:

Mr. EHLERS. Mr. Speaker, on rollcall No. 668 I was delayed on the way to the floor to vote, and the vote ended just as I walked in the door. Had I been present, I would have voted "no."

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DINGELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to rule XX, this 15-minute vote on adoption of the conference report will be followed by a 5-minute vote on the motion to suspend the rules on S. 877.

The vote was taken by electronic device, and there were—yeas 220, nays 215, not voting 0, as follows:

Mr. MILLER of Florida and Mr. CULBERSON changed their vote from "yea" to "nay."

Messrs. ISTOOK, FRANKS of Arizona, OTTER, MARSHALL, DOOLEY of California, and SCOTT of Georgia changed their vote from "nay" to "yea."

□ 0553

So the conference report was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Without objection, the motion to reconsider is laid on the table.

Mr. FRANK of Massachusetts. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. FRANK of Massachusetts. Mr. Speaker, I move reconsideration. I move reconsideration, thanks to your arm-twisting.

The SPEAKER pro tempore. The gentleman will suspend.

Did the gentleman vote on the prevailing side?

Mr. FRANK of Massachusetts. I was until the game started.

The SPEAKER pro tempore. The motion to reconsider may be entered only by someone who voted on the prevailing side.

PARLIAMENTARY INQUIRY

Mr. FRANK of Massachusetts. Mr. Speaker, parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. FRANK of Massachusetts. After all the razzle-dazzle, exactly what was the prevailing side?

The SPEAKER pro tempore. The yeas have it. Without objection, the motion to reconsider is laid on the table.

Mr. HOYER. Mr. Speaker, reserving the right to object, and I am not going to object, I am not going to put people to the purpose of voting; but I will again say the democratic process is that we come to this floor. I will remind you that you said we had 17 minutes to vote. You made it very clear. You sent us a notice, and you said come with 15 minutes; we will give you 2 more minutes.

This vote has now been held open longer than any vote that I can remember. I have been here 23 years. Perhaps some of you have been here longer. The outrage that was discussed when Speaker Wright held the vote open for far less time than this was palpable on your side of the aisle. Democracy is about voting. But just as you cannot say on Tuesday of Election Day, we will keep the polls open for 15 more hours until we get the result we want, you ought not to be able to do it here, Mr. Speaker. We have prevailed on this vote. Arms have been twisted and votes changed. And I will continue to reserve.

The SPEAKER pro tempore. Is there objection to tabling the motion to reconsider?

Mr. FRANK of Massachusetts. Objection.

Mr. THOMAS. Mr. Speaker, I move to reconsider the vote just taken.

MOTION TO TABLE OFFERED BY MR. DELAY

Mr. DELAY. Mr. Speaker, I move to lay the motion on the table.

The SPEAKER pro tempore. The question is on the motion to table the motion to reconsider. That is not debatable.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRANK of Massachusetts. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 210, nays 193, not voting 32, as follows:

□ 0613

Mr. FRANK of Massachusetts changed his vote from ''nay'' to ''yea.''

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid upon the table.

CONTROLLING THE ASSAULT OF NON-SOLICITED PORNOGRAPHY AND MARKETING ACT OF 2003

Mr. TAUZIN. Mr. Speaker, I ask unanimous consent that the motion to suspend the rules and pass the Senate bill S. 877, as amended, which is the spam bill that we have bipartisan agreement on, be modified by the amendment that is at the desk, which has been cleared with the other side.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). The Clerk will report the amendment.

The Clerk read as follows:

On page 17, line 8 strike ''misleading'' and insert ''falsified.''

On page 27, line 9 strike ''misleading'' and insert ''falsified.''

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the Senate bill, S. 877, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Louisiana (Mr. TAUZIN) that the House suspend the rules and pass the Senate bill, S. 877, as amended, on which the yeas and nays are ordered.

Without objection, this will be a 5-minute vote.

There was no objection.

The vote was taken by electronic device, and there were—yeas 392, nays 5, not voting 37, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HASTINGS of Washington) (during the vote). Members are advised that 2 minutes remain in this vote.

□ 0623

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. TAUZIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 1.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

ADJOURNMENT TO TUESDAY, NOVEMBER 25, 2003

Mr. DELAY. Mr. Speaker, I move that when the House adjourns this legislative day, it adjourn to meet at noon on Tuesday, November 25, 2003.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DELAY).

The motion was agreed to.

APPOINTING DAY FOR THE CONVENING OF THE SECOND SESSION OF THE 108TH CONGRESS

Mr. DELAY. Mr. Speaker, I offer a joint resolution (H.J. Res. 80), and ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the joint resolution.

The Clerk read as follows:

H.J. RES. 80

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DAY FOR CONVENING OF SECOND REGULAR SESSION OF ONE HUNDRED EIGHTH CONGRESS.

The second regular session of the One Hundred Eighth Congress shall begin at noon on Tuesday, January 20, 2004.

SEC. 2. AUTHORITY FOR CALLING SPECIAL SESSION BEFORE CONVENING OF SECOND REGULAR SESSION.

If the Speaker of the House of Representatives (or the designee of the Speaker) and the Majority Leader of the Senate (or the designee of the Majority Leader), acting jointly after consultation with the Minority Leader of the House of Representatives and the Minority Leader of the Senate, determine it is in the public interest for Congress to assemble during the period between the end of the

first regular session of the One Hundred Eighth Congress at noon on January 3, 2004, and the convening of the second regular session of the One Hundred Eighth Congress as provided in section 1—

(1) the Speaker and Majority Leader, or their respective designees, shall notify the Members of the House and Senate, respectively, of such determination and of the place and time for Congress to so assemble; and

(2) Congress shall assemble in accordance with that notification.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR ADJOURNMENT SINE DIE AFTER COMPLETION OF BUSINESS OF FIRST SESSION OF 108TH CONGRESS

Mr. DELAY. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 339), and ask for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the concurrent resolution.

The Clerk read as follows:

HOUSE CONCURRENT RESOLUTION 339

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on any legislative day from Friday, November 21, 2003, through Friday, November 28, 2003, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned until 2 p.m. on Tuesday, December 2, 2003, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first; that when the House adjourns on any legislative day from Tuesday, December 2, 2003, through the remainder of the first session of the One Hundred Eighth Congress, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first; that when the Senate recesses or adjourns at the close of business on any day from Friday, November 21, 2003, through Friday, November 28, 2003, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand recessed or adjourned until noon on Tuesday, December 2, 2003, or at such other time on that day as may be specified by its Majority Leader or his designee in the motion to recess or adjourn, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate adjourns at the close of business on any day from Tuesday, December 2, 2003, through the remainder of the first session of the One Hundred Eighth Congress, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned sine die, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, or their respective designees, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble at such place and time as they may designate whenever, in their opinion, the public interest shall warrant it.

The concurrent resolution was agreed to.

A motion to reconsider is laid upon the table.

NATIONAL TRANSPORTATION SAFETY BOARD REAUTHORIZATION ACT OF 2003

Mr. DELAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 579) to reauthorize the National Transportation Safety Board, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 579

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''National Transportation Safety Board Reauthorization Act of 2003''.

SEC. 2. AUTHORIZATION OF APPROPRIATIONS.

(a) FISCAL YEARS 2003–2006.—Section 1118(a) of title 49, United States Code, is amended—

(1) by striking ''and''; and

(2) by striking ''such sums to'' and inserting the following: ''$73,325,000 for fiscal year 2003, $78,757,000 for fiscal year 2004, $83,011,000 for fiscal year 2005, and $87,539,000 for fiscal year 2006. Such sums shall''.

(b) EMERGENCY FUND.—Section 1118(b) of such title is amended by striking the second sentence and inserting the following: ''In addition, there are authorized to be appropriated such sums as may be necessary to increase the fund to, and maintain the fund at, a level not to exceed $3,000,000.''.

(c) NTSB ACADEMY.—Section 1118 of such title is amended by adding at the end the following:

''(c) ACADEMY.—

''(1) AUTHORIZATION.—There are authorized to be appropriated to the Board for necessary expenses of the National Transportation Safety Board Academy, not otherwise provided for, $3,347,000 for fiscal year 2003, $4,896,000 for fiscal year 2004, $4,995,000 for fiscal year 2005, and $5,200,000 for fiscal year 2006. Such sums shall remain available until expended.

''(2) FEES.—The Board may impose and collect such fees as it determines to be appropriate for services provided by or through the Academy.

''(3) RECEIPTS CREDITED AS OFFSETTING COLLECTIONS.—Notwithstanding section 3302 of title 31, any fee collected under this paragraph—

''(A) shall be credited as offsetting collections to the account that finances the activities and services for which the fee is imposed;

''(B) shall be available for expenditure only to pay the costs of activities and services for which the fee is imposed; and

''(C) shall remain available until expended.

''(4) REFUNDS.—The Board may refund any fee paid by mistake or any amount paid in excess of that required.''.

(c) REPORT ON ACADEMY OPERATIONS.—The National Transportation Safety Board shall transmit an annual report to the Congress on the activities and operations of the National Transportation Safety Board Academy.

SEC. 3. ASSISTANCE TO FAMILIES OF PASSENGERS INVOLVED IN AIRCRAFT ACCIDENTS.

(a) RELINQUISHMENT OF INVESTIGATIVE PRIORITY.—Section 1136 of title 49, United States Code, is amended by adding at the end the following:

''(j) RELINQUISHMENT OF INVESTIGATIVE PRIORITY.—

''(1) GENERAL RULE.—This section (other than subsection (g)) shall not apply to an aircraft accident if the Board has relinquished investigative priority under section 1131(a)(2)(B) and the Federal agency to which the Board relinquished investigative priority is willing and able to provide assistance to the victims and families of the passengers involved in the accident.

''(2) BOARD ASSISTANCE.—If this section does not apply to an aircraft accident because the Board has relinquished investigative priority with respect to the accident, the Board shall assist, to the maximum extent possible, the agency to which the Board has relinquished investigative priority in assisting families with respect to the accident.''.

(b) REVISION OF MOU.—Not later than 1 year after the date of enactment of this Act, the National Transportation Safety Board and the Federal Bureau of Investigation shall revise their 1977 agreement on the investigation of accidents to take into account the amendments made by this section and shall submit a copy of the revised agreement to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.

SEC. 4. RELIEF FROM CONTRACTING REQUIREMENTS FOR INVESTIGATIONS SERVICES.

Section 1113(b) of title 49, United States Code, is amended—

(1) by striking ''Statutes;'' in paragraph (1)(B) and inserting ''Statutes, and, for investigations conducted under section 1131, enter into such agreements or contracts without regard to any other provision of law requiring competition if necessary to expedite the investigation;''; and

(2) by adding at the end the following:

''(3) The Board, as a component of its annual report under section 1117, shall include an enumeration of each contract for $25,000 or more executed under this section during the preceding calendar year.''.

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of S. 579, the National Transportation Safety Board (NTSB) Reauthorization Act of 2003. The bill is substantially the same as the NTSB reauthorization passed by the House on May 15, 2003, by voice vote. Passage of the Senate bill will enable the bill to go to the President.

In the last 5 years, NTSB has investigated 8,124 aviation accidents, 166 highway accidents, 24 marine accidents, 41 pipeline/hazardous materials accidents, and 82 railroad accidents. In addition, the NTSB has issued a total of 881 safety recommendations: 374

aviation; 188 highway; 24 intermodal; 112 marine; 51 pipeline; and 132 railroad.

To maintain its position as the world's preeminent investigative agency, it is imperative that the NTSB has the resources necessary to handle increasingly complex accident investigations. The NTSB has recently broken ground for its new training academy that will teach state of the art investigative techniques for transportation accidents. The NTSB now needs sufficient funding to sustain budget and personnel for both its Headquarters operations as well as the academy. Accordingly, S. 579 authorizes increased funding over the next 4 years: $73 million in fiscal year 2003; $79 million in fiscal year 2004; $83 million in fiscal year 2005, and $87.5 million in fiscal year 2006. The bill also authorizes approximately $5 million per year for the training academy. This funding is critical to ensure that the Agency has the necessary resources to hire additional technical experts as well as to provide better training for its current workforce.

In 2000, Congress authorized the transfer of investigative priority from the NTSB to the Federal Bureau of Investigation (FBI) in the event of an accident caused by an international criminal act. However, there was no mechanism for the transfer of family affairs responsibility. Since the events of September 11th, the NTSB now believes that once the FBI has been transferred investigative responsibility for an aircraft accident, the family affairs responsibilities should transfer as well. S. 579 provides for the transfer of the family affairs responsibility when investigative authority has been relinquished in aviation accidents.

S. 579 also addresses another matter of great import; that is, the DOT's notoriously slow response to NTSB's safety recommendations. The bill requires an annual report from DOT on the regulatory status of safety recommendations on NTSB's "most wanted list." The bill also requires DOT to report biennially on NTSB safety recommendations concerning 15-passenger van safety, railroad grade crossing safety, and medical certifications for a commercial drivers license. These reports will enable the Committee to keep tabs on the progress of these very important recommendations.

Having a well funded, well-trained NTSB workforce is of the utmost importance for the American traveling public. I urge my colleagues to support this critical piece of legislation, and I compliment Chairman YOUNG, Chairman MICA, and Ranking member DEFAZIO for their efforts.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HOMETOWN HEROES SURVIVORS BENEFITS ACT OF 2003

Mr. DELAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 459) to ensure that a public safety officer who suffers a fatal heart attack or stroke while on duty shall be presumed to have died in the line of duty for purposes of public safety officer survivor benefits, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ETHERIDGE. Mr. Speaker, reserving the right to object, I will not object, but let me thank the leader and his staff. I want to take this opportunity to thank the gentleman from Wisconsin (Mr. SENSENBRENNER) and his staff; the ranking member, the gentleman from Michigan (Mr. CONYERS), and his staff; the subcommittee chair, the gentleman from North Carolina (Mr. COBLE), and his staff; the ranking member, the gentleman from Virginia (Mr. SCOTT), and his staff; and my staff for all their hard work; the gentleman from Pennsylvania (Mr. WELDON); and the gentleman from Maryland (Mr. HOYER) and others because this bill is an important piece of legislation.

It provides for our first responders and their families a bit of security. There is a gap in the law where currently if they die of a heart attack or stroke doing their duties, their families would not get benefits. This is a bipartisan piece of legislation. Over 283 Members of this body have signed it. Let me thank the leader. I appreciate his help and the help of others in getting this to the floor.

Mr. SENSENBRENNER. Mr. Speaker, current law provides $267,494 to the survivors of public safety officers such as police officers, firefighters and rescue squad officers who die "as the direct and proximate result of a personal injury sustained in the line of duty". S. 459, the "Hometown Heroes Survivor Benefits Act of 2003", as introduced would provide that if a public safety officer dies as the direct and proximate result of a heart attack or stroke suffered while on duty or within 24 hours after participating in a training exercise or responding to an emergency situation, that officer shall be presumed to have died as the direct and proximate result of a personal injury sustained in the line of duty for purposes of that officer's survivors receiving a $267,494 death benefit.

The intent of the legislation was to cover officers who suffered a heart attack or stroke as a result of nonroutine stressful or strenuous physical activity; however, testimony at the hearing indicated that the legislation as drafted was overboard. Witnesses testified that the legislation as drafted would undermine the purpose of the Public Safety Officer Benefits program, which was intended to provide a benefit to heroes who gave their lives in the line of duty for their communities. As drafted, it would cover officers who did not engage in any physical activity but merely happened to suffer a heart attack at work.

A substitute amendment was introduced to address these concerns. The substitute amendment would create a presumption that an officer who died as a direct and proximate result of a heart attack or stroke died as a direct and proximate result of a personal injury sustained in the line of duty if: (1) that officer participated in a training exercise that involved nonroutine stressful or strenuous physical activity or responded to a situation and such participation or response involved nonroutine stressful or strenuous physical law enforcement, hazardous material response, emergency medical services, prison security, fire suppression, rescue, disaster relief or other emergency response activity; (2) that officer suffered a heart attack or stroke while engaging or within 24 hours of engaging in that physical activity; and (3) such presumption cannot be overcome by competent medical evidence.

For the purposes of this Act, the phrase "nonroutine stressful or strenuous physical" activity will exclude actions of a clerical, administrative or non-manual nature. Included in the category of "actions of a clerical, administrative or non-manual nature" are such tasks including, but not limited to, the following: sitting at a desk; typing on a computer; talking on the telephone; reading or writing paperwork or other literature; watching a police or corrections facility's monitors of cells or grounds; teaching a class; cleaning or organizing an emergency response vehicle; signing in or out a prisoner; driving a vehicle on routine patrol; and directing traffic at or participating in a local parade.

Such deaths, while tragic, are not to be considered in the line of duty deaths. The families of officers who died of such causes would therefore not be eligible to receive public safety officers benefits.

For the purposes of this Act, the phrase "nonroutine stressful or strenuous physical" actions will include, but are not limited to, the following: involvement in a physical struggle with a suspected or convicted criminal; performing a search and rescue mission; performing or assisting with emergency medical treatment; performing or assisting with fire suppression; involvement in a situation that requires either a high speed response or pursuit on foot or in a vehicle; participation in hazardous material response; responding to a riot that broke out at a public event; and physically engaging in the arrest or apprehension of a suspected criminal.

The situation listed above the types of heart attack and stroke cases that are considered to be in the line of duty. The families of officers who died in such cases are eligible to receive Public Safety Officers Benefits.

Mr. ETHERIDGE. Mr. Speaker, I withdraw my reservation of objection.

□ 0630

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 459

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Hometown Heroes Survivors Benefits Act of 2003".

SEC. 2. FATAL HEART ATTACK OR STROKE ON DUTY PRESUMED TO BE DEATH IN LINE OF DUTY FOR PURPOSES OF PUBLIC SAFETY OFFICER SURVIVOR BENEFITS.

Section 1201 of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796) is amended by adding at the end the following:

''(k) For purposes of this section, if a public safety officer dies as the direct and proximate result of a heart attack or stroke suffered while on duty, or not later than 24 hours after participating in a training exercise or responding to an emergency situation, that officer shall be presumed to have died as the direct and proximate result of a personal injury sustained in the line of duty.''.

SEC. 3. APPLICABILITY.

Section 1201(k) of the Omnibus Crime Control and Safe Streets Act of 1968, as added by section 2, shall apply to deaths occurring on or after January 1, 2003.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. DELAY

Mr. DELAY. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. DELAY:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may cited as the ''Hometown Heroes Survivors Benefits Act of 2003''.

SEC. 2. FATAL HEART ATTACK OR STROKE ON DUTY PRESUMED TO BE DEATH IN LINE OF DUTY FOR PURPOSES OF PUBLIC SAFETY OFFICER SURVIVOR BENEFITS.

Section 1201 of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796) is amended by adding at the end the following:

''(k) For purposes of this section, if a public safety office dies as the direct and proximate result of a heart attack or stroke, that officer shall be presumed to have died as the direct and proximate result of a personal injury sustained in the line of duty, if—

''(1) that office, while on duty—

''(A) engaged in a situation, and such engagement involved nonroutine stressful or strenuous physical law enforcement, fire suppression, rescue, hazardous material response, emergency medical services, prison security, disaster relief, or other emergency response activity; or

''(B) participated in a training exercise, and such participation involved nonroutine stressful or strenuous physical activity;

''(2) that officer died as a result of a heart attack or stroke suffered—

''(A) while engaging or participating as described under paragraph (1);

''(B) while still on that duty after so engaging or participating; or

''(C) not later than 24 hours after so engaging or participating; and

''(3) such presumption is not overcome by competent medical evidence to the contrary.

''(1) For purposes of subsection (k), 'nonroutine stressful or strenuous physical' excludes actions of a clerical, administrative, or non-manual nature.''.

Mr. DELAY (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

SENATE BILLS REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1561. An act to preserve existing judgeships on the Superior Court of the District of Columbia; to the Committee on Government Reform.

ENROLLED BILLS SIGNED

Mr. Trandahl, Clerk of the House, reported and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3182. An act to reauthorize the adoption incentive payments program under part E of title IV of the Social Security Act, and for other purposes.

H.J. Res. 79. Joint resolution making further continuing appropriations for the fiscal year 2004, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 117. An act to authorize the Secretary of Agriculture to sell or exchange certain land in the State of Florida, and for other purposes.

S. 286. An act to revise and extend the Birth Defects Prevention Act of 1998.

S. 650. An act to amend the Federal Food, Drug, and Cosmetic Act to authorize the Food and Drug Administration to require certain research into drugs used in pediatric patients.

S. 1685. An act to extend and expand the basic pilot program for employment eligibility verification, and for other purposes.

S. 1720. An act to provide for Federal court proceedings in Plano, Texas.

S. 1824. An act to amend the Foreign Assistance Act of 1961 to reauthorize the Overseas Private Investment Corporation, and for other purposes.

ADJOURNMENT

Mr. DELAY. Mr. Speaker, in honor of Scott Palmer's birthday, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 32 minutes a.m., Saturday, November 22, 2003), under its previous order, the House adjourned until Tuesday, November 25, 2003, at noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports concerning the foreign currencies and U.S. dollars utilized for speaker-authorized official travel during the third and fourth quarters of 2003, pursuant to Public Law 95–384 are as follows:

NOTICE OF PROPOSED RULEMAKING

U.S. CONGRESS,
OFFICE OF COMPLIANCE,
Washington, DC, November 20, 2003.

Hon. J. DENNIS HASTERT,
Speaker of the House of Representatives, Washington, DC.

DEAR MR. SPEAKER: A Notice of Proposed Rulemaking (NPR) for amendments to the Procedural Rules of the Office of Compliance was published in the Congressional Record dated September 4, 2003. Subsequent to the publication of this notice, this office announced a hearing for public comment on the proposed amendments in the Congressional Record on October 15, 2003.

The Board of Directors of the Office of Compliance cancels the hearing regarding the proposed amendments to the Procedural Rules of the Office of Compliance which had been scheduled for December 2, 2003, at 10:00 a.m. in room SD–342 of the Dirksen Senate Office Building.

We request that this notice of cancellation be published in the Congressional Record. Any inquiries regarding this notice should be addressed to the Office of Compliance at our address below, or by telephone 202–724–9250, TTY 202–426–1665.

Sincerely,

SUSAN S. ROBFOGEL,
Chair.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

5566. A letter from the Acting Under Secretary, Department of Defense, transmitting the Secretary's certification that the survivability testing of the E/A-18G system otherwise required by section 2366 would be unreasonably expensive and impractical, pursuant to 10 U.S.C. 2366(c)(1); to the Committee on Armed Services.

5567. A letter from the Acting Under Secretary, Department of Defense, transmitting a status report on each research and development program that is approved as a spiral development program, pursuant to Public Law 107—314, section 803(e); to the Committee on Armed Services.

5568. A letter from the Principal Deputy, Department of Defense, transmitting the Annual Report for the Armed Force Retirement Home (AFRH) for Fiscal Year 2002, pursuant to 24 U.S.C. 411(h); to the Committee on Armed Services.

5569. A letter from the Administrator, Energy Information Administration, transmitting the Administration's Short-Term Energy Outlook for October 2003, together with the special article entitled ''Winter Fuels Outlook: 2003-2004,'' pursuant to 15 U.S.C. 790f(a)(2); to the Committee on Energy and Commerce.

5570. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting notification concerning the Department of the Army's Proposed Letter(s) of

Offer and Acceptance (LOA) to Saudi Arabia for defense articles and services (Transmittal No. 04-03), pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

5571. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of major defense equipment and defense articles to Israel (Transmittal No. DDTC 119-03), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

5572. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of major defense equipment and defense articles to the United Kingdom (Transmittal No. DDTC 092-03), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

5573. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold commercially under a contract to Israel (Transmittal No. DDTC 115-03), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

5574. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting a copy of Presidential Determination No. 2004-07 on Waiving Prohibition on United States Military Assistance to Parties to the Rome Statute Establishing the International Criminal Court, pursuant to Public Law 107—206; to the Committee on International Relations.

5575. A letter from the Administrator, Office of the Independent Counsel, transmitting the annual report on Audit and Investigative Activities, pursuant to 28 U.S.C. 595(a)(2); to the Committee on Government Reform.

5576. A letter from the Secretary, Department of the Treasury, transmitting the Department's Performance and Accountability Report for FY 2003, as required by the Reports Consolidation Act of 2000; to the Committee on Government Reform.

5577. A letter from the Director, Office of Management and Budget, transmitting a draft bill ''To make technical corrections in the Act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2004, and for other purposes''; to the Committee on Resources.

5578. A letter from the Senior Staff Attorney, United States Court of Appeals for the First Circuit, transmitting an opinion of the United States Court of Appeals for the District of Columbia Circuit (No. 02-2362 — United States v. Miguel Rosa-Ortiz (October 28, 2003)); to the Committee on the Judiciary.

5579. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Regulated Navigation Area and Security Zones; Port of Miami, FL [CGD07-03-144] (RIN: 1625-AA00, 1625-AA11) received November 18, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5580. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Security Zone: Pacific Ocean, San Diego, California [COTP San Diego 03-033] (RIN: 1625-AA00) received November 18, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5581. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Drawbridge Operating Regulation; St. Croix River, Hudson, Wisconsin [CGD08-03-043] (RIN: 1625-AA09) received November 10, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5582. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Special Local Regulations; World Championship Super Boat Race, Deerfield Beach, FL [CGD07-03-099] (RIN: 1625-AA08) received November 10, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5583. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Regulated Navigation Area; Reporting Requirements for Barges Loaded with Certain Dangerous Cargoes, Inland Rivers, Eighth Coast Guard District; Correction [CGD08-03-029] (RIN: 1625-AA11) received November 10, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5584. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Homeland Security, transmitting the Department's final rule — Notification of Arrival in U.S. Ports; Correction [USCG-2002-11865] (RIN: 1625-AA41) received November 10, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5585. A letter from the Paralegal Specialist, FAA, Department of Transportation, transmitting the Department's final rule — Modification of Class D Airspce; and Modification of Class E Airspace; Topeka, Philip Billard Municipal Airport, KS [Docket No. FAA-2003-16407; Airspace Docket No. 03-ACE-75] received November 20, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5586. A letter from the Paralegal Specialist, FAA, Department of Transportation, transmitting the Department's final rule — Modification of Class D Airspace; and Modification of Class E Airspace; St. Joseph, MO [Docket No. FAA-2003-16026; Airspace Docket No. 03-ACE-70] received November 20, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5587. A letter from the Paralegal Specialist, FAA, Department of Transportation, transmitting the Department's final rule — Establishment of Class E Airspace; Viroqua, WI [Docket No. FAA-2003-16058; Airspace Docket No. 03-AGL-06] received November 20, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5588. A letter from the Paralegal Specialist, FAA, Department of Transportation, transmitting the Department's final rule — Amendment of Class E Airspace, Dunkirk, NY [Airspace Docket No. 02-AEA-08] received November 14, 2003, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

5623. A letter from the Secretary, Department of Veterans Affairs, transmitting a draft bill, ''To amend Title 38, United States Code, to improve veterans' benefits programs, and for other purposes''; jointly to the Committees on Veterans' Affairs and Education and the Workforce.

5624. A letter from the Chairman and Vice Chairman, U.S.-China Commission, transmitting the record of the Commission's hearing on September 25, 2003, on ''China's Industrial, Investment and Exchange Rate Policies: Impact on the U.S.''; jointly to the Committees on Ways and Means and International Relations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk

for printing and reference to the proper calendar, as follows:

Mr. POMBO: Committee on Resources. H.R. 1629. A bill to clarify that the Upper Missouri River Breaks National Monument does not include within its boundaries any privately owned property, and for other purposes (Rept. 108–392). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMAS: Committee on Ways and Means. H.R. 2896. A bill to amend the Internal Revenue Code of 1986 to remove impediments in such Code and make our manufacturing, service, and high-technology businesses and workers more competitive and productive both at home and abroad; with an amendment (Rept. 108–393). Referred to the Committee of the Whole House on the State of the Union.

Ms. PRYCE of Ohio: Committee on Rules. House Resolution 463. Resolution waiving points of order against the conference report to accompany the bill (H.R. 1) to amend title XVIII of the Social Security Act to provide for a voluntary program for prescription drug coverage under the Medicare Program, to modernize the Medicare Program, to amend the Internal Revenue Code of 1986 to allow a deduction to individuals for amounts contributed to health savings security accounts and health savings accounts, to provide for the disposition of unused health benefits in cafeteria plans and flexible spending arrangements, and for other purposes (Rept. 108–394). Referred to the House Calendar.

Mr. TOM DAVIS of Virginia: Committee on Government Reform. Efforts to Rightsize the U.S. Presence Abroad Lack Urgency and Momentum (Rept. 108–395). Referred to the Committee of the Whole House on the State of the Union.

Mr. OXLEY: Committee of Conference. Conference report on H.R. 2622. A bill to amend the Fair Credit Reporting Act, to prevent identity theft, improve resolution of consumer disputes, improve the accuracy of consumer records, make improvements in the use of, and consumer access to, credit information, and for other purposes (Rept. 108–396). Ordered to be printed.

Mr. POMBO: Committee on Resources. H.R. 2696. A bill to establish Institutes to demonstrate and promote the use of adaptive ecosystem management to reduce the risk of wildfires, and restore the health of fire-adapted forest and woodland ecosystems of the interior West; with an amendment (Rept. 108–397 Pt. 1).

Mr. LINCOLN DIAZ-BALART of Florida: Committee on Rules. House Resolution 464. Resolution providing for consideration of a joint resolution appointing the day for the convening of the second session of the One Hundred Eighth Congress. (Rept. 108–398). Referred to the House Calendar.

Mr. LINDER: Committee on Rules. House Resolution 465. Resolution waiving a requirement of clause 6(a) of rule XIII with respect to consideration of certain resolutions reported from the Committee on Rules. (Rept. 108–399). Referred to the House Calendar.

Mr. POMBO: Committee on Resources. H.R. 958. A bill to authorize certain hydrographic services programs, to name a cove in Alaska in honor of the late Able Bodied Seaman Eric Steiner Koss, and for other purposes; with an amendment (Rept. 108–400). Referred to the Committee of the Whole House on the State of the Union.

DISCHARGE OF COMMITTEE

Pursuant to clause 2 of rule XII the Committee on Agriculture discharged from further consideration. H.R. 2696 referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

TIME LIMITATION OF REFERRED BILL

Pursuant to clause 2 of rule XII the following action was taken by the Speaker:

H.R. 2696. Referral to the Committee on Agriculture extended for a period ending not later than November 21, 2003.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. RANGEL (for himself, Mr. CARDIN, and Mr. MCDERMOTT):

PETITIONS, ETC.

Under clause 3 of rule XII,

45. The SPEAKER presented a petition of the Legislature of Rockland County, NY, relative to Resolution No. 500 of 2003 petitioning the United States Senate to pass the Kennedy-Dodd Head Start Bill (S. 1483) or, in the alternative, pass the Alexander Head Start Bill (S. 1474); which was referred to the Committee on Education and the Workforce.

DISCHARGE PETITIONS—ADDITIONS OR DELETIONS

The following Members added their names to the following discharge petitions:

Petition 2, by Mr. JIM MARSHALL on House Resolution 251: David Vitter.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 3482

OFFERED BY MR. PETERSON OF MINNESOTA

AMENDMENT NO. 1: Page 4, after line 24, insert the following:

(d) LIMITATION.—The Secretary may not award a grant to a State under this section if the laws of the State treat residents and non-residents differently with respect to the period in which an individual may engage in hunting or taking of migratory birds which are water fowl.

Page 5, line 1, strike ''(d)'' and insert ''(e)''.

Page 5, line 4, strike ''(e)'' and insert ''(f)''.

EXTENSIONS OF REMARKS

SENATOR ROBERT C. BYRD'S 86TH BIRTHDAY

HON. NICK J. RAHALL, II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. RAHALL. Mr. Speaker, recently U.S. Senator ROBERT C. BYRD, D–W.Va., received the prestigious "Freedom from Fear" Medal from the Franklin and Eleanor Roosevelt Institute in Hyde Park, N.Y.

Shakespeare warned us, "men close their doors against a setting sun." But, in the extraordinary moments of human endeavor, when light of liberty dares to fade, often only a single soul stands to embrace its care—a soul who has stood vigil through the night armed with reason, buoyed by history and strengthened by vision. This award and Senator BYRD's honor reflect his place in human history.

Today marks the 86th Birthday of West Virginia's finest. Senator ROBERT C. BYRD's personal life and his public service have consistently embraced the same principles: diligent work, constant improvement, unwavering commitment, unswerving honesty, and an overarching sense of history.

In his 86 years Senator BYRD has been a legislative craftsman, parliamentarian extraordinaire, skillful architect, master builder, visionary, dreamer, and doer. From teacher, scholar, mentor, leader, author, historian, and diplomat, Senator BYRD has borne many mantles throughout the years. But the one of which he is most proud, and perhaps cherishes the most, is that of being a West Virginian.

He has been a mentor to me, a pillar of strength for West Virginia, and a voice of reason for the Nation. After 86 years and five decades of service in Congress, his work is not yet done. The West Virginian of the Past Century is quickly forging a sterling legacy in the new one. And, as before, he is leading the way.

TRIBUTE TO BOB BOWERS

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is with a solemn heart that I take this opportunity to pay tribute to the life of Bob Bowers who passed away recently at the age of 74. Bob was a pillar of the Alamosa, Colorado community, and as his family mourns their loss, I think it is appropriate that we remember his life and celebrate his contributions to our nation today.

Bob was born in Springfield, Massachusetts in 1929. As a young man, Bob answered our nation's call to duty and joined the United States Air Force, where he served honorably before moving to Colorado. Bob served the state of Colorado for 25 years as a Health Inspector for the Colorado Department of Health. He married his wife Jo in 1948; they were married for 55 years.

Bob was very active in the Alamosa community. He was a volunteer for 4-H, the Boys and Girls Club, Share Colorado, the American Legion and the Alamosa Senior Citizens Center. Bob also served as a Boy Scout leader, where he passed along his outdoors skills, knowledge and morals to young people. Each year, Bob spent his winter holidays volunteering as Santa Clause for charitable organizations throughout the San Luis Valley. Bob was truly dedicated to bettering the lives of the citizens of Alamosa and many people there are better off as the result of his contributions.

Mr. Speaker, the dedication and selflessness that Bob Bowers has shown is certainly worthy of recognition before this body of Congress. It is my privilege to pay tribute to him for his contributions to the State of Colorado and our nation. I would like to extend my thoughts and deepest sympathies to Bob's family and friends during this difficult time.

TRIBUTE TO IRV KUPCINET—KNOWN TO MANY AS MR. CHICAGO

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. DAVIS of Illinois. Mr. Speaker, it was virtually impossible to live in Chicago and not be affected by Irv Kupcinet or Kup as he was fondly called. Kup knew everybody who had any public presence in Chicago and of course, knew powerful people and celebrities from around the world.

Kup was best known as a columnist for the Chicago Sun Times but was much more than a columnist, he was a communicator and used many mediums for that purpose. He had a television show, was a great emcee, was actively involved in civic, community, charitable and philanthropic activity. He was a fundraiser, a promoter, an icon, a legend.

Kup had the ability to make use of not only himself; but he was also able to rely upon others in very serious and strategic ways as he did with his assistant for 34 years, Ms. Stella Foster.

Kup was a creative genius who could take a mere occurrence and turn it into a great and glorious event. He was very open, comfortable and at ease with practically any and everybody. Kup grew up on the westside of Chicago, which is the heart of my Congressional District. He learned to walk with kings and queens; but never lost the common touch, yes, all men and women did matter with him but none too much. Over the years, Kup's column was distributed to more than 100 newspapers around the world. In 1982, he was elected to Chicago's journalism Hall of Fame. He broadcast Chicago Bears Football games with Jack Brickhouse for 24 years, he appeared in two movies and had a syndicated television program "The Tonight Show," which ran from 1959 to 1986 and at one point was on 70 stations.

Kup never forgot the community of his birth, north Lawndale in Chicago which had some transitions and fell upon hard times. Kup was a star athlete, played football on a team with former president Gerald Ford and was drafted by the Philadelphia Eagles. Kup was many things to many people, but most of all he was husband and companion to his beloved wife Essee, father to his children, grandfather, son to his parents, brother to his siblings and friend to many.

There was nothing quite like being mentioned in Kup's column, and if you were on the scope, you'd eventually get there.

Yes, Kup walked with Kings, Queens, Presidents, Stars and Captains of business and industry, but never lost the common touch.

TRIBUTE TO MRS. HELEN EVERSON

HON. TAMMY BALDWIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. BALDWIN. Mr. Speaker, I rise today to extend my congratulations to Mrs. Helen Everson, who has been selected as Edgerton Rotary's Honored Citizen of the Year. Helen and her husband, Harland Everson, purchased the Edgerton Reporter, in 1951 and made the risky yet insightful decision to change from hot type to offset printing, the first paper in Wisconsin to do so. I rise today to pay tribute to a constituent whose life-long commitment to serving her community as an entrepreneur, philanthropist, and mother serves as a shining example to us all.

Helen was raised on a 5,000-acre sheep ranch in northwestern South Dakota and attended a two-room country school until her graduation. Helen's professional experience began at Keating Buick where she quickly gained greater responsibility and expertise and eventually became the Secretary-Treasurer of the car dealership.

Helen's life would change dramatically after she met and married Harland. The couple tackled the challenges of operating a growing and award-winning newspaper, in addition to raising a family. Harland and Helen's daughters, Carol and Diane, are both accomplished women in their own right. Carol is an associate professor at the Medical College of Wisconsin and Diane is the publisher of the

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Edgerton Reporter and past president of the National Newspaper Association.

Diane describes her mother as a "heat seeking missile with boundless energy." She is still a tireless advocate for civic development and the Edgerton community. Under her leadership of Edgerton's annual Tobacco Heritage Days, the celebration grew in popularity and became profitable for the first time. For an impressive 52 years, the Everson family has been the steward of one of the state's only independent newspapers.

Mr. Speaker, I join the Edgerton Rotary and the Edgerton community in recognizing Helen Everson's achievements and congratulate her as she accepts the Honored Citizen of the Year award.

IN RECOGNITION OF LeROY CARLSON

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. UDALL of Colorado. Mr. Speaker, I rise today to honor LeRoy Carlson for his three decades of exemplary work with the United States Fish and Wildlife Service. Leroy Carlson is one of Colorado's outstanding field biologists, preserving and protecting the Rocky Mountain region's wildlife.

Lee received his bachelor's degree from Colorado State University in Wildlife Biology and his master's degree in 1974 with an emphasis on the wildlife impacts from oil shale development. He began his career in Galveston, Texas as a field staff biologist for the U.S. Fish and Wildlife Service where he did permitting work for the Army Corps of Engineers on housing developments, levies and wetlands.

After 2 years in Texas, Lee moved to the Lakewood, Colorado offices of the U.S. Fish and Wildlife Service where he worked for the next 27 years until his retirement in 2003. His innovative approaches to a wide range of issues enabled him to provide oversight and protection to the region's threatened and endangered species and to guide many of the region's largest projects to successful completion.

Lee's ability to coordinate the protection of wildlife was most evident on large Federal projects, such as the Animas-LaPlata water project in Southwest Colorado. He earned the respect of all involved during his 3-year oversight of negotiations between the Bureau of Reclamation, the regional Native American tribes, local water users and regional environmental groups. From these contentious discussions, the San Juan Recovery Program was created, which provided significant mitigation for fish and wildlife resources and included an additional 7 years of research on listed fish.

His experience and problem solving attitude in managing complex water projects led to the successful re-issuance of agency water permits on projects throughout the Roosevelt and Arapahoe National Forests. Lee also provided skilled leadership on the Platte River Program for endangered species conservation, involving multiple States and Federal agencies. The Platte River Program included a unique approach to conserving listed wildlife species through the conversion of water use to financial contributions paid by project developers.

When the Colorado Department of Transportation (CDOT) needed a new way to address U.S. Fish and Wildlife endangered species requirements, Lee developed an innovative solution that included staffing within CDOT to help that agency evaluate the impacts on wildlife so that the needs of CDOT could be met in a timely manner. His plan became a model for future projects and allowed CDOT to determine project impacts for the next 20 years and develop mitigation plans. The Short Grass Prairie Project received two national awards for the creative approaches Lee used with State and Federal agencies. This became the Colorado model for the Prebles Project in the East Plum Creek area, protecting the Prebles Meadow Jumping Mouse, a rare species that was placed on the Endangered Species list in 1998.

Lee's service and achievements show how a skilled public servant can make important contributions to the quality of our natural environment, as well as our communities. I ask my colleagues to join me in thanking LeRoy Carlson for his far-reaching accomplishments and his commitment to the protection of our wildlife resources. I wish him good health and happiness in the future.

TRIBUTE TO TOMMY THOMPSON

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a man who has done a great deal for the betterment of the State of Colorado. Tommy Thompson is a Sergeant At Arms in the Colorado State legislature. At the age of 80, Tommy is the oldest person working in Colorado's State Capitol. However, he is also one of the most energetic and one of the most beloved. I am proud to call Tommy's contributions to the attention of my colleagues and our nation here today.

Tommy was serving as Vice-Chairman of the Arapahoe County Republican party when he was appointed as Sergeant At Arms in 1997. Tommy loves his job and comes to work each day with a smile. That smile, and Tommy's friendly demeanor, remain with him throughout the day. Tommy has many friends throughout the Capitol and he gets along fantastically with members from both sides of the aisle. Nearly everyone who has worked in the Capitol has fond memories of times spent with Tommy.

Tommy's contributions to our nation reach far beyond the steps of Colorado's state Capitol. In World War II, Tommy answered our country's call to duty and served honorably aboard the USS *Mount Vernon* for over three years. Following the war, Tommy went to work for Ford Motor Company, and then opened a bicycle repair shop. He is still active in the Republican Forum, in addition to his work at the state Capitol. At the age of 80, Tommy Thompson has never slowed his pace, and he has no plans to do so now.

Mr. Speaker, it is my honor to rise and pay tribute to Tommy Thompson before this body of Congress and our nation. Tommy has dedicated many years to assuring that Colorado's government runs efficiently. Tommy has touched the lives of many Coloradans, and it is my honor to pay tribute to his contributions here today. Thanks for your service, Tommy.

TRIBUTE TO MR. JOHN DONOVAN, EXECUTIVE DIRECTOR CHICAGO COALITION FOR THE HOMELESS

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. DAVIS of Illinois. Mr. Speaker, the poet Robert Frost is quoted as writing, "Some people see things that are and ask why, I dream of things that have never been and ask, why not." Such was the life, such was the philosophy and such was the work of John Donovan, known to his friends as Juancho.

John was a former Catholic priest who found his niche in organizing, working with and working for people in our world known as being poor. He worked in Panama, in the Rogers Park and Uptown communities of Chicago before becoming executive director of the coalition to end homelessness. He also worked as a priest, administrator and teacher at Chicago's Visitation High School. He was educated with a bachelor and masters degrees from Saint Mary of the Lake University in Mundelein.

John was the recipient of many awards and honors and was featured in Studs "Terkel's Hope Dies Last." In an interview with Studs, John said: "Some people who are better off have the luxury of losing hope. But poor people never lose hope. They can't afford to. That's the only thing they can hold on to, and that's where hope springs eternal." Some people say, "How can you continue to work with the homeless and the poor?" That's where I get my energy because they never lose hope." "I'm not practicing as a priest, but my ministry, remember is organizing. My job is organizing hope. There are people in the community who still have hope. That's the last thing they lose. I'm organizing hope for change."

John Donovan, a man of hope, a force for change. May he rest in peace. I extend condolence to John's wife, their children, and other members of John's family.

CHAPTER 12 BANKRUPTCY EXTENSION BILL

HON. TAMMY BALDWIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. BALDWIN. Mr. Speaker, today I am once again introducing legislation to extend authorization of Chapter 12 of the bankruptcy

code. This legislation should not be necessary, but a permanent Chapter 12 authorization remains a hostage to more comprehensive bankruptcy law changes.

Chapter 12 provides an important backstop for our Nation's struggling family farmers by allowing them to reorganize their debts and keep their farms. It provides an important bankruptcy option to farm families to keep their livelihood and maintain their way of life.

This bill provides a textbook example that what we do here in Washington directly affects the lives of real people facing real financial challenges.

In Wisconsin recently, a Columbus farmer filed for Chapter 12 bankruptcy. He works night and day to make his farm a success. Unfortunately, like many farmers, the weather and the market conspired to disrupt his cash flow. Filing Chapter 12 gave his family time to negotiate with his creditors, while he switched production from corn and soybeans to vegetable production and local market sales. He sells his produce at farmers markets in Madison and Princeton. And he is paying his debts. Under Chapter 12, it was not only the Columbus farmer that benefited. His creditors are receiving their money, the people in my district can purchase his bounty, and he can continue to support his family.

Chapter 12 does not just provide a direct benefit to those using its protections. Many farmers who face possible bankruptcy never get to a court filing. The very existence of the option of a Chapter 12 filing promotes negotiations between farmers and creditors.

Chapter 12 bankruptcy protection expires at the end of 2003. Before we leave town for the year, Congress should renew this bankruptcy law. That is why I am introducing this bipartisan bill today. I am pleased to be joined by my colleagues NICK SMITH of Michigan and TIM HOLDEN of Pennsylvania.

Once again, we are forced to approve a temporary extension of this vital protection. Since I was first elected to Congress 5 years ago, we have passed 8 temporary extensions. Making this noncontroversial program permanent is beyond overdue. In both this Congress and last Congress, I introduced legislation to modify Chapter 12 to include more family farmers and make it a permanent part of our bankruptcy law.

There is great consensus that Chapter 12 bankruptcy protection works well. It is for that reason that we have included a permanent authorization in the comprehensive bankruptcy reform bill for the past three Congresses. In fact, it is considered so popular that it has been held hostage to the bigger bill. Every time we come to the floor to extend Chapter 12, we are told that a permanent extension cannot be passed separately from the big bill because taking out popular items will slow the bill's momentum. We were told we had to strip the permanent extension from last year's farm bill because it would slow down the bankruptcy bill. We were told in June when we extended Chapter 12 again that we had to wait. Our farmers have been waiting for more than 5 years. It is time to just get this done. Let's end the uncertainty these extensions cause by passing a permanent authorization.

In reluctant acknowledgment that passage of the permanent Chapter 12 legislation is unlikely this year, I am introducing this 6-month extension. In the absence of a permanent authorization, I would prefer even longer than 6 months. This legislation is a realistic time period that can ensure passage in the few days we have left in this session.

Since the current authorization will expire at the end of the year, farmers will need the relief provided by this extension. As our family farmers begin to decide whether they can afford to plant next year, we need to make sure they have the ability to stay in farming by using Chapter 12 to reorganize their debts. This bill will provide the security family farmers to make that difficult decision.

Mr. Speaker, I hope that you and the chairman of the Judiciary Committee move this bill before we adjourn for the year. Chapter 12 has expired before, leaving many farmers in great uncertainty. Let's not let that happen again.

BASIC PILOT PROGRAM EXTENSION AND EXPANSION ACT OF 2003

SPEECH OF

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Mr. UDALL of Colorado. Mr. Speaker, I rise today in support of S. 1685, the Basic Pilot Extension Act of 2003.

The Basic Pilot Verification program was created in 1997 to assist employers in verifying the eligibility of prospective employees to work in the United States Currently the program is only available to employers in six States. Recently I voted against a bill to expand and extend the program, H.R. 2359, because I thought an expansion of this program deserved more debate and allowance for amendments to fix some of the more problematic parts of the bill.

The Senate-passed measure that we are considering today, S. 1685, is an improvement on the House bill.

Unlike the House bill, this bill does not open up access to the databases of the Homeland Security Department and the Social Security Administration to other Federal agencies or to State and local government agencies. I had grave concerns about the infringement of civil liberties in the House bill, which would have permitted widespread sharing of employee information. I am also pleased that concerns already identified by the Department of Homeland Security about the Basic Pilot program are being addressed. I still have apprehensions that the data used in this program is not always up-to-date or accurate, specifically in regard to the visa status of employees. However, I am hopeful that the Homeland Security Department report required under this legislation will address these concerns so that they can be resolved by the time the program is expanded to all fifty states.

The Basic Pilot Verifications program provides an efficient and effective method for ensuring that employers are hiring eligible employees. I hope that through the extension and expansion provided for in this bill, this program will provide accurate information about prospective employees and continue to address the needs of American employers.

PAYING TRIBUTE TO BUD ROMBERG

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable man from my district. Bud Romberg has dedicated many years of his life to the betterment of the community of Steamboat, Colorado and it is my honor to pay tribute to him before this body of Congress and our nation.

Bud is a retired schoolteacher who has held a seat on the Steamboat Springs School Board for 18 years. He also serves on the City Planning Commission and just completed a four-year term of service on the Steamboat City Council. As a Councilman, Bud's tenure was defined by his honesty and integrity. Bud had no use for political double-speak or bureaucracy and approached his position in a straightforward and direct manner.

During Bud's tenure, he played a direct role in assuring that Steamboat maintained its small town charm, and family atmosphere. He was also instrumental in helping to form strong working relationships between the City of Steamboat and government agencies throughout Colorado.

Mr. Speaker it is my privilege to pay tribute to Bud Romberg before this body of Congress and our nation. Bud is a man of great honor and integrity and the community of Steamboat Springs is a better place as the result of his dedicated service. Thank you for your service, Bud.

TRIBUTE TO SILAS PURNELL

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. DAVIS of Illinois. Mr. Speaker, I rise to pay tribute to one of the most remarkable and most successful men that this country has produced, Mr. Silas Purnell, who is credited with assisting more than 50,000 students to gain acceptance to colleges and universities. Silas Purnell was born on March 10, 1923, graduated from Wendell Phillips High School, received a degree from the Sheil Institute, attended Roosevelt and Northwestern Universities. Silas went to World War II, was a member of the famed Tuskegee Airmen, got married to his wife Marilyn in 1946, and they had five children, Rosalind, Silas, Rosalinda, Ronald, and Donna.

Mr. Purnell took a job and worked 13 years for the Coca Cola Bottling Company. It was during this period that he began helping students get into college. He eventually went to the Ada S. McKinley Community Services Agency and established their education division. As director of this program Mr. Purnell hit

stride and became one of the most knowledgeable persons in the country relative to the availability of grants, scholarships, special programs and opportunities for individuals who wanted to attend college.

Si Purnell developed such a reputation that people from all over the country would consult with him about getting into school.

By the time Mr. Purnell became ill and retired in the year 2000, it was partially documented and estimated on good authority that Silas Purnell had helped more than 50,000 individuals gain acceptance and receive some form of financial aid for college.

Mr. Speaker, there has never to my knowledge been a person to do more single-handedly to get individuals help with their educational pursuits.

If I can help somebody as I pass along, If I can cheer somebody with a word or song, If I can steer somebody right who may be traveling wrong, then my living will not have been in vain.

I commend Mr. Silas Purnell for his passionate and effective work, extend condolences to his family, and urge passage of this resolution.

STOP PEER-TO-PEER USE BY PAEDOPHILES

HON. JOSEPH R. PITTS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. PITTS. Mr. Speaker, I submit the following for the RECORD:

[From the Guardian, Nov. 4, 2003]

SPECIAL INVESTIGATION—RACE TO SAVE NEW VICTIMS OF CHILD PORN

(By Audrey Gillan)

Paedophiles are swapping thousands of hardcore images of child sex abuse in a new form of computer child pornography that police believe is feeding a demand for more real-time victims of abuse.

The Guardian has established that the demand for child porn through the use of file-sharing technology—normally associated with swapping music and movies—has grown so rapidly that law enforcement agencies are now employed in a global race to track down the children who are being abused. Some of the children, police believe, are being abused on a daily basis to provide a constant supply of new computerised material.

Senior officers have revealed that the scale of peer-to-peer traffic in illegal images of children now dwarfs almost any other paedophile network they have encountered. The images are generally more extreme and at least 20% of the users are what police class as Category One, meaning that the suspect is ''of significant risk to children''.

But resources available to police to tackle peer-to-peer child porn are limited and though they are catching some offenders, it may take months or even years to track down the location of some victims. In such cases, officers monitoring the images can only watch as the children grow older and continue to be abused.

Many of those addicted to child porn have flocked to peer-to-peer file sharing software such as KaZaA, Morpheus and Grokster because they are free so, crucially, users do not have to leave any credit card details, leading them to believe that they cannot be traced. The explosion in file sharing, driven by the demand for music files, has also made the technology readily accessible, quick and easy to use.

It also has the attraction of not requiring the users to be part of a traditional organised paedophile ring using password-protected, covert means to distribute images; rather peer-to-peer technology allows them direct access into the hard drives of other paedophiles' computers with no third party authority monitoring content as is the case with chat rooms and news groups.

Scotland Yard officers have told the Guardian that they stumbled across this phenomenon by accident during another inquiry and say they have been stunned by its exponential growth. They believe the phenomenon is more alarming than previous internet-related cases, such as the high-profile Operation Ore.

The Met's child protection hi-tech crime unit has already built a list of 800 suspects involved in file swapping illegal images in the UK alone. While most are involved only in sharing or downloading the images, a significant proportion are active abusers producing the material themselves, often using their own children, their neighbour's children or—in rarer cases—by luring strangers. At least 30 peer-to-peer cases in the UK so far involved hands-on abuse in which the children in the images were real-time victims.

Police found one man who had wired webcams into his daughter's bedroom so that he could share video images of his abuse with other peer-to-peer file sharers.

Detective Superintendent Peter Spindler, who heads Scotland Yard's paedophile unit, said: ''We are finding real-time live abusers. These people are able to get brand new images straight up on the net.'' His officers have found that when new images appear, the children involved are often related to or live nearby the person distributing the material.

But the sheer volume of new material, combined with the fact that it could have been produced anywhere in the world, has meant that police have often been unable to pinpoint the child's location.

Detectives rely on two methods of tracing location: electronic footprints left by the user while online and forensic analysis of the images to find clues pointing to the country of origin, such as telephone books in the background or the style of furnishings. In some cases, often where the child is being held prisoner and abused in a completely blank room, there are not enough leads for police to chase.

One case being investigated involves a prepubescent girl who is being held prisoner in a room and repeatedly abused. International law enforcement agencies know only that she is in the United States and the FBI is trying to pinpoint her exact location. New images of the child are shared through KaZaA and other services but police have been unable to find her.

Gemma Holland, victim identification project manager at the University of Cork's Combating Paedophile Information Networks in Europe (Copine) which has a database of more than 600,000 child porn images, said: ''This is a global problem. The abuse could be in the next village or somewhere near you but the problem is the images are being shown globally. Identifying the kids in these images should be our prime concern and of the greatest importance.''

The decentralised nature of the internet and peer-to-peer specifically make it difficult to define numbers of images in circulation or children involved but experts says it is growing daily. Washington's national centre for missing and exploited children, which acts as a clearing house for child porn tip-offs, said that reports of such images in shared files had increased by 400% this year.

David Wilson, professor of criminology at the University of Central England in Birmingham, said: ''Peer-to-peer facilitates the most extreme, aggressive and reprehensible types of behaviour that the internet will allow.''

The Guardian understands that the National Crime Squad is considering coordinating all of this work, rather than leaving it to small groups working within the country's various forces; so far the leading forces have been the Met, West Midlands and Greater Manchester.

Peer-to-peer has become more attractive for paedophiles in the wake of Operation Ore, the high-profile British police operation which was launched after US authorities handed over the names of 7,200 people suspected of subscribing to websites offering paedophilic images. While Ore has grabbed headlines, many senior officers and child abuse experts believe that targeting people at the lower end of the paedophile spectrum has been a distraction in terms of child protection.

Prof Wilson believes Ore showed how the criminal justice system concentrated on the wrong type of offender, the people who downloaded the material rather than produced them. It needed to refocus on activities such as peer-to-peer file sharing and the producers of child pornography.

He said: ''Police operations have not been getting to the type of paedophile that we need to get to. It's in their interests to keep the debate moving towards the kind of people they should be spending time and resources on.

''The achilles heel of peer-to-peer is that it makes something that is secret and furtive into something that is public and when it is public that offers the police a window of opportunity to police it.''

In a room on the fifth floor at Scotland Yard, officers in the hi-tech crime unit are trying to do exactly that, sitting at computers, monitoring activity on the peer-to-peer boards. They are part of a team working on Operation Pilsey which started as a smalltime inquiry in March 2001 by the Met's clubs and vice unit and burgeoned with the number of people posting images via file sharing. The detectives working here are now inundated.

They explain that they can use technology to detect the location of those who download the images and sometimes that of the abusers. If there is a child immediately in danger, officers will conduct a raid as soon as they have a location.

Paedophiles believe it is harder for them to be detected through peer-to-peer software but investigators are able to access their shared folders and quickly discover if they contain illegal images of child abuse. They are then able to establish the location of the owner of the shared folder.

VETERANS' DAY SPEECH BY MG ROBERT SHIRKEY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. SKELTON. Mr. Speaker, Major General Robert Shirkey, USA, Retired, delivered the following address at a Veterans' Day Memorial Service at the Liberty Memorial in Kansas City, MO. This is an excellent address by a highly decorated veteran of World War II and the Korean War. His speech is set forth as follows:

MAJOR GENERAL SHIRKEY, USA, RET., VETERANS' DAY OBSERVANCE, LIBERTY MEMORIAL KANSAS CITY, MO—NOVEMBER 11, 2003

I am an American—Let me tell you why:

Years ago persons from Ireland, Norway, Poland, Germany, and other locations, hugged their families for the last time and left their ancestral homes. These people boarded old, crowded ships to sail to America, leaving behind everything and everyone they knew in search of only one thing: Freedom.

These people crossed the ocean with the determination to stand firm in their new home and fight for the freedom which had been denied them for centuries. America was born from a union of courage and passion for freedom. This is my heritage.

My ancestors, under a new flag, represented a country that came to be known as the United States of America.

One Irishman, O'Sharkey, went through the Revolutionary War. As indentured servants from Norway, my grandmother's family worked out the $36.00 passage to become Americans. A Polish girl in Poznan, Poland, saved the life of a Prussian soldier being chased by Germans by hiding him in a haystack during the Prussian Revolution of 1848. He returned after peace was declared, married her and together with his parents migrated to the United States. He also then served with the 27th Wisconsin Cavalry during the Civil War. Another part of my heritage who served with the South during that long war was General Wade Hampton. These men were the Privates, Captains, Majors, Colonels and Generals. When the Revolutionary and Civil Wars were over, they were once again free.

They had paid the price with their lives, bloodshed, hardship and poverty. One of my ancestors, a second cousin, still lies in France, having paid the supreme sacrifice on September 27, 1918, for such freedom.

I am an American—Let me tell you why:

My patriotism can neither be contained nor displayed within the span of four (4) designated days every year. When I look at my country's flag, I see not only the Revolutionary War and Civil War, but ancestors who fought against injustice. I also see my ancestors who were on opposite sides of the Battle of the Wilderness, Chickamauga, and others. They smelled the gunpowder and heard the roar of musketry. Some of these men would never see another beautiful sunset, yet in each of their eyes were these same dreams of freedom and independence and a willingness to fight to the death for what they believed in.

Lest we forget: For those who have fought for it, freedom has a taste the protected will never know. As General Pershing said at this Memorial dedication:

". . . there are many forces trying to destroy this freedom, so band together and dedicate yourselves to protecting that freedom you have so valiantly won on the battlefield."

Never forget that the Ancient Romans sought freedom from responsibility and, as a consequence, lost all freedom.

My flag has flown over ancestors and fellow soldiers in distant parts of the world who were slain giving all their tomorrows for our todays. My flag flew over my best friend's hastily dug grave at Legaspi, Luzon, following his untimely death April 15, 1945. He gave his life to save five wounded comrades by crawling up under machine gun fire. An attempt to save a sixth man was rewarded with death. For my symbolic flag he knew he was expected to die. Like many others, my life was spared by the controversial atomic bomb. I came home carrying my flag. My best friend came wrapped in my country's flag. My flag went to Viet Nam and returned with some of my dear friends wrapped in it. My flag is the same flag that belongs to victims of the Bataan Death March as well as survivors. The attitude of those men is epitomized in the gallows humor of war correspondent Frank Hewlett which still echos amongst the jungle foliage:

"We're the battling bastards of Bataan.
No mamma, no papa, no Uncle Sam.
No uncles, no aunts, no nephews.
No nieces, no pills, no planes, no artillery pieces.
And nobody gives a damn."

These are the men who have carried my flag. Later, in fighting on Luzon, I walked that hallowed ground on Bataan. I saw the refuse of war and the fox holes-many of which had been dug with bayonets. In the words of William Lindsay White, author of They Were Expendable, "Where do we get such men?"

Tribute on this day is paid to those fellow Americans who served in the Korean War, which ended fifty years ago. Over one hundred thousand men were wounded; fifty-six thousand two hundred forty six killed; nine thousand were captured; three thousand five hundred eight were repatriated; six thousand died as a result of criminal acts of the enemy. By the peace agreement in 1953, not one of the enemy was prosecuted. The odds of death of those of us in the front lines in Korea were one in nine. By contrast the odds were one in eighteen in World War II and in Viet Nam the odds were one in twenty-three, a striking example of the dangers in Korea.

I fought through the Pacific War with one of the more noted Infantry Units the 158th RCT "Bushmasters." We were comprised of twenty-two Indian tribes, Hispanics, Chinese, Japanese and men from thirty-eight different states. General MacArthur opined that "no greater combat team has ever deployed for battle." Little known is the fact that Indians were finally given the right to vote in 1946. Strangely enough, not one black soldier was in our Infantry units!

I am an American—Let me tell you why:

To those Korean Veterans present and those of you who may read or hear what I have to say today, I want you to know as one soldier to another, we fought not for glory, for there was none, not for loot, for there was none. No crusading zeal drove us on. Our homeland was not threatened. Our countrymen at home made no comparable sacrifice. We fought and endured, while not understanding the geopolitics of that distant war and at a time when thousands of our fellow countrymen said we were engaged in a senseless war. We kept on much as we did in World War II. The real answer as to why we—the living and the dead—did this lies deep in the tissue of the substance which keeps America from becoming unstuck. It has to do with our parents, teachers, 4–H Clubs, Scouts, neighborhood centers, and belonging to a team; an implicit, unreasoned belief in our country and a natural belief in ourselves. To those present, to those now living, I bow to your patriotism. Many like myself were asked to again serve our country. I left behind two sons, one six months old and one three years old. Forty-eight hours after leaving Kansas City, I was again in the Korean front-lines.

Let me say now, for all to hear and know, as a rifle company commander of one hundred fifty to two hundred men, I personally led one of the first integrated companies in Korea. The twenty to twenty-five black soldiers I led served with honor, distinction and bravery. We cry the same salty tears and bleed the same red blood. Equally important, in our hour of need on the battle field, we do not care who rescues us or carries our stretcher. I shall never forget Lovell Page who gave his life at the Inje River. His beautiful smile is etched in my memory and will be throughout eternity.

These are the men who have carried my flag.

That same flag gave comfort and hope to those who endured horrors including war camp. It is the same flag the men and women carry who came home crippled and maimed so that the social class into which I was born would not determine the limits of my potential.

It is the flag that is seared into my memory as it lay draped over my dearest friends coffins while the echos of Taps were carried Heavenward on a windy day. It is the same flag that will someday drape over my coffin. I trust that you are as proud of that flag as I am. Protect it well. Protect it as I have.

Forty-Five million of us have served our Nation since 1776. We have never, ever, let our nation down. We took the Hill!!

I quote the last stanza of the poem by Billy Rose, which reflects the dedication of every American in their commitment to serve their country.

"I am the unknown soldier and maybe I died in vain, but if I were alive and my country called, I'd do it all over again. While I fought with and along side of the elite American Army troops, lest we forget, I should like to pay tribute to the troops of the twenty-one nations that comprised the United Nations forces in Korea. The undaunted courage and bravery of the Turks, British and Ethiopians, to mention a few that I witnessed, shall forever be with me. Likewise, the bravery of Republic of Korea soldiers like Chung Mun Joe, who served in my company, will never be forgotten as they fought for the freedom we Americans almost take for granted. To those who have not served and to those who never will, I quote Prophet Micah, as is etched in stone on the North side of this Monument, that all God requires of us is that "we should do justly, love mercy and walk humbly with thy God."

You now see that:

I am an American—I have told you why.

In closing, I quote the Unknown Confederate Soldier's words:

"I asked God for strength that I might achieve; I was made weak that I might learn humbly to obey.
I asked for health that I might do great things; I was given infirmity that I might do better things.
I asked for riches that I might be happy; I was given poverty that I might be wise.
I asked for power that I might have the praise of men; I was given weakness that I might feel the need of God.

I asked for all things that I might enjoy life; I was given life that I might enjoy all things.
I got nothing I asked for, but everything that I had hoped for, almost despite myself.
My unspoken prayers were answered. I am, among all men, richly blessed.''

I am indeed an American.

PAYING TRIBUTE TO SOUTHEAST MENTAL HEALTH SERVICES

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable non-profit organization located in my district. Southeast Mental Health Services was recently awarded the Silver Achievement Award from the American Psychiatric Association for being among the top mental health programs in the nation. I am proud to call the attention of my colleagues and this nation to all that Southeast Mental Health Services has done for those suffering from mental illness.

Southeast Mental Health Services has developed a revolutionary approach to treating the mentally ill. Their program focuses on helping each individual patient to live the happiest and most fulfilling life possible. Southeast Mental Health Services has found great success with this program. The dedication and selflessness of the program's administrators and staff set a fine example to all mental health care professionals.

Mr. Speaker, it is my honor to call the attention of this body of Congress and our nation to the many contributions of Southeast Mental Health Services. The organization's programs have made a significant contribution to the quality of life of numerous Coloradans suffering from mental illness. It is with great pride that I rise before you to recognize Southeast Mental Health Services and the notable contributions they have made to the community.

RECOGNIZING THE LIFE AND ACCOMPLISHMENTS OF YEVGENY YEVTUSHENKO

HON. GINNY BROWN-WAITE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, ''A poet in Russia is more than a poet.'' Yevgeny Yevtushenko was speaking of poetry's unique role in Russia, but the words apply equally to Yevtushenko himself—the world's most famous living poet, and also prose writer, photographer, filmmaker, congressman, professor, world traveler. In the civic tradition of Russian poetry, the poet is the voice of the people, the ombudsman, the champion of truth and justice, and the catalyst for social change. Because poets express the strivings and needs of the people, they are revered in Russia as nowhere else. In the Soviet Union, the message had to be elliptic, and poetry was read closely, between the lines.

Yevgeny Yevtushenko, born in Zima Junction, Siberia in 1933, burst onto the scene when very young, his first poems published in 1949, when he was just sixteen. He and his peers, Akhmadulina, Voznesensky, Rozhdestvensky, drew enormous, agitated crowds to their readings, and their popularity could be compared only to that of rock stars. They shaped an entire generation, the generation of Gorbachev and Yeltsin, who began the changes that ultimately brought an end to the Soviet Union.

His famous poem ''Babi Yar,'' against anti-Semitism, was written in 1961 and set to music by Shostakovich. In 1952, Yevtushenko wrote ''the Heirs of Stalin,'' with a call to throw off the oppressive shadow of the tyrant. He began his nonpoetic political protest activity with a telegram to Brezhnev condemning the Soviet invasion of Czechoslovakia in August 1968. Thirty years later, his political activity was channeled into a formal democratic role—he was elected a congressman with an overwhelming 74.9 percent of the vote (in a field of nine candidates). There was a national write-in-vote to select the cochairmen to join Andrei Sakharov in leading the Memorial Society, dedicated to the memory of the victims of Stalinism. Yevtushenko was one of the three co-chairmen selected, further evidence of the faith in his integrity and appreciation of his outspokenness among his countrymen.

Yevgeny Yevtushenko traveled extensively, and he brought the world to the Soviet Union through his writing, but he also brought Russia to the world. In 1960, he was the first Russian poet to break through the Iron Curtain and to recite his poetry in the West, where he was befriended by Pablo Picasso, Max Ernst, Henry Moore, Federico Fellini, John Steinbeck, Graham Greene, Heinrich Böll, T.S. Eliot and Gabriel García Marquez. Over the years, Yevtushenko has toured 94 countries, all of the republics of the USSR, and all of the states of the U.S.A. He has recited his poetry in sports arenas from Russia to Santiago, Chile (where he appeared with Pablo Neruda), in the Opera di Roma, in London's Albert Hall, in the Library of Congress, Smithsonian Institution, and National Cathedral in Washington, D.C, and in Madison Square Garden, Carnegie Hall, the Cathedral of St. John the Divine, and Lincoln Center in New York. His works have been translated into 72 languages. Eighteen of his books have been translated into English. Most of his readers in France, Cambodia, Africa, Greenland, Australia, Germany, and China—among other places—have never been to Russia but they know and love Russian poetry.

Yevtushenko has been in the center of the action for fifty years. Yet his insatiable curiosity about the human experience and his monumental energy remain at their highest levels. He celebrated his seventieth birthday in Moscow this July, reading to enormous, adoring crowds, and then continued the extravaganza across the country, reaching out to his readers. His life is heartening proof that one man's voice, raised high and often, can alter the course of events.

Welcome all over the world, Yevgeny Yevtushenko and his wife, Masha, have chosen to divide their time between Russia and the United States, where they are bringing up their family. He is Distinguished Visiting Professor at The University of Tulsa, Oklahoma, and tenured at Queens College, in New York City. He has received numerous international prizes in literature and the arts. In addition to receiving four honorary degrees, he was elected an honorary member of the American Academy of Arts and Letters and a member of the European Academy of Arts and Sciences, was awarded The American Liberties Medallion of the American Jewish Committee, and in 1999 was appointed Poet-in-Residence of the Walt Whitman House Museum in Long Island, New York. Naturally, he is writing poetry and a new novel and is in the finishing stages of a major anthology of Russian poetry. We are fortunate to have Yevgeny and Masha Yevtushenko in our country and even more fortunate to have them here at the Russian Fireworks gala.

THE IMPACT OF LEFT-WING SPECIAL INTEREST GROUPS ON THE JUDICIAL NOMINATION PROCESS

HON. MARK E. SOUDER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. SOUDER. Mr. Speaker, today I rise to introduce into the RECORD two more memos—written by Democratic congressional staff—that illustrate the extent to which liberal special interest groups are controlling the judicial nomination process. These groups have been allowed a virtual veto power over any nominee they dislike. For example, groups like the so-called People for the American Way have apparently been able to delay or block the approval of judges who do not share their antilaw enforcement views, while groups like the National Abortion Rights Action League (NARAL) have been given a similar veto power over anyone who doesn't agree that parents shouldn't even be notified that their child is considering an abortion. One nominee, according to the memos, had to be cleared with ''the gay rights groups'' before he would even be considered. These memos show just how far the process has deteriorated—and are a wake-up call to anyone who wants to see fairness and objectivity restored to our Federal judiciary.

MEMORANDUM

To: Senator Kennedy.
Subject: Judges—Schedule for the Year & Chairing A Hearing.

I. SCHEDULE FOR THE YEAR AND THE SHEDD AND COOK PROBLEMS

As you know, during your meeting with the groups, you and Schumer discussed approaching Leahy regarding the Shedd hearing. You proposed telling him that because of the number of unpublished opinions and the divisiveness of the nomination (angering the African American community prior to the election), you think we should refrain from having a hearing on Shedd in June. Based on the groups recommendation, you were also going to propose an end-of-June hearing on another nominee. The following has happened in the interim:

Lott approached Daschle with an unreasonable request for nominations hearings before the July 4th recess. Daschle told him

''no'' but approached Leahy to discuss a more aggressive hearing schedule. The proposed schedule is as follows:

June 13th Rogers—(6th Circuit)
June 27th Shedd—(4th Circuit)
July 18th Owen—(5th Circuit)
August 1st Cook—(6th Circuit)
September 5th Raggi—(2nd Circuit)
September 19th Estrada—(DC Circuit)
October 3rd McConnell—(10th Circuit)

The August 1st Cook hearing is a surprise to us, and it will be a huge problem for the judges coalition. For many, many months they have told us that Cook is highly problematic—particularly for labor. Cook is consistently bad on labor/workplace injury cases, right to jury trial issues, civil rights and rights of criminal defendants cases. Her frequent dissents (from the moderate majority) show a pattern at least as egregious as Pickering. We must press Leahy not to schedule Cook (Cook is strongly supported by DeWine, but how many times did Hatch disregard your request to move DC Circuit nominee Alan Snyder?).

Regarding Shedd, Wade Henderson spoke with Mark Childress, Daschle's Chief Counsel and Childress is going to speak with Hollings' staff director. But, because we feel Leahy will not cancel the Shedd hearing unless Hollings backs off (and because several of the outside groups believe the same), we don't think you should expend a great deal of effort trying to change Leahy's mind about the Shedd hearing.

Instead, you should speak with Schumer, and the two of you should bring Durbin up to speed (since he couldn't attend the meeting in your hideaway). The three of you should approach Leahy as soon as possible and tell Leahy that:

You are very concerned about Shedd because he has numerous unpublished opinions and because his nomination will infuriate the African-American community before the SC election, but you understand the Hollings problem. If Hollings can be moved, you propose postponing the Shedd hearing.

You understand he is contemplating a more aggressive hearing schedule that includes a hearing for Debbie Cook for the 6th Circuit; and you believe she should not get a hearing this year. For months, labor and other groups have told us that she is highly problematic, and we should send her nomination back to the White House. We won't suffer publically if we don't have a nomination hearing for her.

Ultimately, if Leahy insists on having an August hearing, it appears that the groups are willing to let Tymkovich go through (the core of the coalition made that decision last night, but they are checking with the gay rights groups).

Given this information, do you want to talk to Schumer—and Durbin—about having this conversation with Leahy and then speak with Leahy? We strongly recommend that you have these conversations, and we believe Leahy must be approached quickly.

Decision:

Yes, I will talk to Schumer and Durbin; the three of us will go to Leahy _____.

No, I will not speak with Schumer and Durbin or Leahy _____.

II. CHAIRING A HEARING

As you know, Senator Leahy asked that you chair the last nominations hearing, but given your schedule, you could not. His staff is now asking us to choose the hearing you would like to chair (see the schedule above).

I propose that you chair the Owen hearing on July 18th. As you know, Owen will probably be our next big fight. The grassroots organizations are organized in Texas, and the national groups are prepared, as well. In addition, Judiciary Democrats expect to fight her, hearing attendance should be good, and the issues are clear—Enron/pro-business and choice.

You should know, the Leahy staff (and the Schumer staff) propose that you chair the Estrada hearing and I disagree. Although other staffers see Estrada as a civil rights problem, because he has no record, there isn't civil rights ammunition. We don't believe Estrada is ''your kind of fight.'' We think Durbin or Schumer might be better for the Estrada hearing (and, at least on the staff level, there's interest from the Schumer office).

Decision: I will chair a hearing on:

Shedd (6/27) _____.
Owen (7/18) _____.
Cook (8/1) _____ (we want this to go away).
Raggi (9/5) _____.
Estrada (9/19) _____.
McConnell (10/3) _____.

MEMORANDUM

To: Senator Durbin.
Date: October 15, 2001.
Re: Meeting with Civil Rights Leaders, Tuesday, October 16, 2001 at 5:30 p.m.

You are scheduled to meet with leaders of several civil rights organizations to discuss their serious concerns with the judicial nomination process. The leaders will include: Ralph Neas (People For the American Way), Kate Michelman (NARAL), Nan Aron (Alliance for Justice), Wade Henderson (Leadership Conference on Civil Rights), Leslie Proll (NAACP Legal Defense & Education Fund), Nancy Zirkin (American Association of University Women), Marcia Greenberger (National Women's Law Center), Judy Lichtman (National Partnership), and a representative from the AFL–CIO. The meeting will take place in 317 Russell, with Senators Kennedy and (possibly) Schumer also present.

The immediate catalyst for Tuesday's meeting was the announcement last Thursday that the Judiciary Committee would hold a hearing in one week on district court judge Charles W. Pickering, Sr., a highly controversial nominee for the Fifth Circuit. The interest groups have two objections; (1) in light of the terrorist attacks, it was their understanding that no controversial. judicial nominees would be moved this fall; and (2) they were given assurances that they would receive plenty of notice to prepare for any controversial nominee.

Judge Pickering, you will recall, has a checkered past: he wrote a law review student note recommending that the Mississippi legislature restore its miscegenation law; as a state legislator, he opposed the Equal Rights Amendment and voted to seal the records of the infamous sovereignty commission; and as a Republican activist; he promoted an anti-abortion plank to the national party platform. He has written some controversial opinions while serving on the district court, criticizing prisoner access to the courts and the ''one person-one vote'' principle. The interest groups believe that a high percentage of Pickering's opinions are unpublished, one reason why they object to the lack of time to prepare for his hearing.

Recognizing that Thursday's hearing is likely to go forward, the groups are asking that the Committee hold a second hearing on Pickering in a few weeks, when they will have had adequate time to research him fully. The decision to schedule Pickering's hearing was made by Senator Leahy himself, not his staff, so the groups are likely to ask you to intercede personally. They will also seek assurances that they will receive adequate warning of future controversial nominees.

TRIBUTE TO GRAHAM NIELSON

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, November 20, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable man from my district. Recently, Graham Nielson was awarded the "McGuffey Award" by the Colorado Association of School Boards for his twelve years of dedicated service on the Dolores School Board. Graham recently announced his retirement from the Board, and I would like to take this opportunity to join my colleagues in thanking him for his service.

Graham moved to Dolores while he was in grade school. After high school, Graham married Dianne Carver. Later, Graham and Dianne moved to Santa Fe, where Graham became an EMT and Fireman. In 1985, Graham and his family returned to Dolores, where he eventually took his current position as a computer systems analyst for Nielson Skansa, Inc. Until recently, Graham also served the community as a member of the Dolores Fire Department, and still holds a position on the board of the Colorado Firefighter's Academy.

Graham and Dianne have had five wonderful children. When the children entered the Dolores school system, Graham decided to run for a position on the School Board. He has served as the director of the RE–4 School Board for 12 years. Graham has dedicated a great deal to assuring that the children of Dolores have a positive educational experience. The children of Dolores have certainly benefited as the result of Graham's tireless dedication to their interests.

Mr. Speaker, I am proud to call the contributions of Graham Nielson to the attention of this body of Congress and our nation. Graham has dedicated his life to the betterment of others and I am proud to pay tribute to him here today. Thank you Graham, and congratulations on a well-deserved award.

IN MEMORY OF LANCE CPL. DAVID OWENS, JR., USMC

HON. FRANK R. WOLF
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, November 20, 2003

Mr. WOLF. Mr. Speaker, I was honored recently to be asked to participate in a memorial service for my constituent, Lance Cpl. David Owens, Jr., USMC, who was killed in action in Baghdad on April 12 of this year. The presentation of a memorial plaque was held in Winchester, Virginia, on October 24 during halftime ceremonies on the football field at James Wood High School, Corporal Owens' alma mater.

I would like to share with my colleagues the remarks given that evening in memory of this

brave young man who served his nation proudly and who died defending our freedoms.

REMARKS BY FREDERICK COUNTY SUPERINTENDENT OF SCHOOLS, DR. WILLIAM C. DEAN

Good evening, The war in Iraq claimed the life of a James Wood High School graduate of the class of 2000. On Saturday, April 12, 2003, 20-year-old Marine Lance Corporal David Owens was killed in action in Baghdad.

It is with great pleasure that I introduce you to the parents of Corporal Owens, Mr. and Mrs. David Owens.

In creating this memorial, it is our hope this service tonight will remind Mr. and Mrs. Owens of one of the many places where David made an impact at James Wood High School. And, I also extend an invitation to them to return here often.

James Wood High School is a place David enjoyed, and we enjoyed and valued David's presence here. He is missed by his classmates, his teachers and those who knew him.

Ladies and gentlemen, I am honored to present David and Debbie Owens.

Thank you for allowing us to honor your son this evening.

REMARKS BY JAMES WOOD HIGH SCHOOL PRINCIPAL, JOSEPH SALYER

David E. Owens, Jr. a graduate of JWHS, entered as a freshman in 1997. During the span of this high school career many would describe David as an individual with strong character, high integrity and a sincere love for his school.

David was not merely a student who focused his attention on attending classes. He also took an active part in the life and traditions of JWHS.

He was a dedicated athlete who participated in the school's football and wrestling programs. During his senior year, he excelled by placing 4th in the Commonwealth District wrestling tournament. This earned him a spot representing the school in the regional wrestling competition. He also was the recipient of the 2000 Winchester Wrestling Officials Association Sportsmanship Award.

In addition, David was committed to serving in his local Future Farmers of America (FFA) chapter. He participated in a wide range of forestry-related events, sponsored by the FFA, because of his love for natural resources.

It is because of David's sincere devotion, that we the staff, faculty and student body of the James Wood community will forever be indebted to his legacy as a James Wood student and to the life he gave for his country.

REMARKS BY CONGRESSMAN FRANK R. WOLF, 10TH DISTRICT, VIRGINIA

It is important to remember those who have made the ultimate sacrifice for their country.

Marine Lance Cpl. David Owens Jr., age 20, served his country with pride and honor. His loss has touched many in this community. It is fitting that this plaque have a permanent place at James Wood High School as a remembrance of David's sacrifice for his country.

I know this has been a difficult time for his parents. As the father of five children, my heart goes out to them. They, too, have made the ultimate sacrifice.

I ask that everyone here tonight remember all the service men and women who have lost their lives defending our freedom. We owe them and their families a huge debt of gratitude.

I also ask that everyone pray for the men and women in uniform who are in harm's way in Iraq, in Afghanistan and other parts of the world where we have a military presence. They need and deserve our support.

I want to read the words of the hymn ''Eternal Father,'' also known as the ''Navy Hymn,'' which is often sung at the funeral of service men and women, particularly sailors and Marines.

It was the favorite hymn of President Franklin Delano Roosevelt, a former secretary of the Navy, and was sung at his funeral in Hyde Park, New York, in 1945.

It also was played by the Navy band in 1963 as President John F. Kennedy's body was carried up the steps of the U.S. Capitol to lie in state.

Eternal Father, strong to save
Whose arm hath bound the restless wave,
Who bidd'st the mighty ocean deep
Its own appointed limits keep;
Oh, hear us when we cry to Thee.
For those in peril on the sea!

Eternal Father, grant, we pray,
To all Marines, both night and day,
The courage, honor, strength and skill
Their land to serve, they law fulfill;
Be thou the sheild forevermore
From every peril to the Corps.

May we all remember Lance Cpl. David Owens, Jr. and keep his family in our thoughts and prayers.

REMARKS BY FREDERICK COUNTY BOARD OF SUPERVISORS CHAIRMAN, RICHARD SHICKLE

Tonight we are here to honor Marine Lance Cpl. David Owens, Jr. He made the ultimate sacrifice. He gave all that he had for his Country. He gave his life for each and every one of us. But he is not the only one that gave something to this great country and to each and every one of us. David Edward Owens, Sr. and Deborah Owens, mother and father, gave us their son Marine Lance Cpl. David Owens, Jr.

As a father of four I cannot imagine the pride and the pain that these two people must feel each and every day. The questions ''Why him?'' and ''Why us?'' must haunt them every minute of every day.

Mr. and Mrs. Owens, all that we can say is ''Thank you'' from the bottom of our hearts. Please allow the citizens of Frederick County to become part of your family.

REMARKS BY FREDERICK COUNTY SCHOOL BOARD CHAIRMAN, STUART WOLK

Tonight I stand before you humbled. Humbled by a life short lived but more accomplished in those few years than I can imagine accomplishing in my lifetime.

A few short years ago, David Owens engaged in battle on the ground we are now standing on. He fought valiantly for his team then and upon leaving James Wood, continued to fight valiantly. Only this time, the stakes were bigger and his new team for which he was fighting was our country. He made the ultimate sacrifice for his team and we mourn his loss tonight, as we have since receiving the tragic news. There is no greater love for country, for humanity than to give one's life for the freedom we all cherish. Let us never take those freedoms for granted and let us always remember the supreme sacrifice made by our hero: Lance Cpl. David Owens, Jr.

I cannot begin to fathom the loss that Mr. and Mrs. Owens have experienced but I wish to thank them for their son and the manner in which he always conducted himself. As a member of the Frederick County School Board, as a citizen of Frederick County and of this great country, I feel fortunate to stand here in his memory and in his honor.

Thank you.

BASIC PILOT PROGRAM EXTENSION AND EXPANSION ACT OF 2003

SPEECH OF

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Mr. BEREUTER. Mr. Speaker, this Member rises in strong support of S. 1685, the Basic Pilot Extension Act of 2003. This Member, who is a cosponsor of the House measure, would like to thank the distinguished gentleman from Iowa (Mr. GRASSLEY) for introducing the measure.

Under S. 1685, the Basic Pilot Program, which is an employment verification program, would be extended through 2008 and, indeed, would expand access to the program for the entire U.S.

Mr. Speaker, the Immigration Reform and Control Act (IRCA) of 1986 correctly prohibited employers from knowingly hiring illegal aliens or people with non-immigrant visas. Unfortunately, at that time, Congress did not give employers the corresponding tools with which to comply with this Act.

For example, due to concerns regarding discrimination, employers are limited in the questions they may ask of potential employees to verify if those individuals are authorized to work in the U.S. If the employment verification documents that potential employees produce appear to be legitimate, then employers must accept the documents as legitimate without further inquiry of the potential employee.

During Immigration and Naturalization Service (INS) enforcement raids, certain employers were found to have hired large numbers of illegal aliens, either knowingly or unintentionally, and subsequently they were subject to penalties. As technology has progressed to allow for the cheap and quick production of legitimate-looking fraudulent documents, the inability of employers to distinguish between valid documents and fraudulent documents has significantly increased. It became clear that businesses dedicated to complying with the IRCA needed new tools to assist with the endeavor.

When the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996 was enacted, it authorized the creation of three employment verification tools, including the Basic Pilot Program. Initially, employers in California, Florida, Texas, Illinois, Florida, New York, and Iowa could voluntarily use the Basic Pilot Program to compare the information received from potential employees with Immigration and Naturalization Service (INS) databases to determine if potential employees could be employed legally in the U.S.

Mr. Speaker, throughout the 1990's, many legal immigrants and illegal aliens moved to Nebraska seeking jobs in the meatpacking industry. Subsequently, this Member began to receive contacts from businesses in his district concerned about their capacity to comply with the IRCA. Therefore, on November 30, 1999, this Member joined his House and Senate colleagues in the Nebraska Congressional Delegation in a letter to then-INS Commissioner Doris Meissner requesting the extension of the

Basic Pilot Program to Nebraska. This Member continues to firmly believe that providing Nebraska businesses with the tools to hire a legal workforce is an important component in maintaining a stable economy in the state and in meeting needs to effectively enforce immigration laws in this country's interior. On March 19, 1999, the U.S. Department of Justice granted Nebraska businesses access to the Basic Pilot Program. Currently, about eight Nebraska businesses actively utilize the program.

Mr. Speaker, for Congress to allow the Basic Pilot Program to lapse following the horrific and unspeakable terrorist attacks of September 11, 2001, would demonstrate true negligence. More than ever, the U.S. must fully enforce its immigration laws to protect its citizens from future attacks. In its capacity to identify document fraud and illegal aliens, the Basic Pilot Program can indeed play a role in the fight against terrorism.

In conclusion, this Member encourages his colleagues to vote for S. 1685.

TRIBUTE TO PAT ELSBERRY

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is with great pride that I rise today to pay tribute to a devoted patriot from Denver, Colorado. Pat Elsberry is a great citizen who works to inspire America's youth to become involved with the American legion. Her enthusiasm permeates through the community as she passes her knowledge of the military and veteran's issues to her fellow Coloradans. I would like to join my colleagues here today in recognizing her tremendous contributions to the Denver community.

Each day, Pat proudly flies an American flag above her home. In Pat's garage, she displays scores of pictures, flags, articles and other memorabilia from the Korean War. Each keepsake is illustrative of Pat's patriotism and deep love for our country. During the Korean conflict, Pat answered our country's call to duty and honorably served in the Army for four years.

Pat has held the position of Commander of American Legion Post 37 for the past three years. In that time, membership numbers have soared from 40 to more than 160. Under Pat's guidance, the American Legion visits various schools in the area to talk about previous wars and what it means to be a veteran and serve our nation in the armed forces.

Mr. Speaker, Pat Elsberry is a dedicated individual who enriches the lives of her fellow Americans by educating them on the history of our country. Pat has encouraged the support of our American servicemen and women through her compassionate speeches and leadership. Pat's enthusiasm and selfless service to those in the Denver community, and this nation, certainly deserve the recognition of this body of Congress.

INTRODUCTION OF H.R. 3550 "THE TRANSPORTATION EQUITY ACT: A LEGACY FOR USERS"

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. YOUNG of Alaska. Mr. Speaker, today, along with nearly every member of the Committee on Transportation and Infrastructure, I and Congressman JIM OBERSTAR are introducing a truly historic highway and transit funding bill that will benefit every State in the Nation.

The introduction of this bipartisan legislation would not have been possible without the support and cooperation of Congressman OBERSTAR. In addition, the Chairman PETRI of the Subcommittee on Highways, Transit and Pipelines, along with the subcommittee ranking Democrat, Congressman LIPINSKI were instrumental in getting this legislation written for introduction.

The legislation provides $375 billion over the next six years. This proposed level of funding is based upon the needs of our country as outlined in the U.S. Department of Transportation Condition and Performance report.

With this bill, we will have the resources to maintian our existing transportation infrastructure and begin to improve it as well. We can address our national congestion crisis and safety problems.

Our transportation infrastructure is old and getting worse. Thirty two percent of our major roads are in poor or mediocre condition and 28% of our bridges are structurally deficient or functionally obsolete.

Congestion is affecting our quality of life and costing our nation $67 billion a year—more than $1,100 for the average commuter each year.

Commuters are sitting longer and longer in traffic jams and billions of gallons of fuel is wasted each year due to congestion.

Most importantly, this country is facing a transportation safety crisis. More than 42,000 people die each year on our roads and highways. Nearly one-third of all these fatal crashes are caused by substandard road conditions and roadside hazards. This is totally unacceptable for the most advanced nation in the world.

Over the next six years, we provide $298 billion for highway, road and bridge improvements . . . and $69 billion for transit programs.

This legislation proposes to increase the minimum guaranteed percentage for every State from 90.5 percent to 95 percent by 2009. We understand that more equity is needed for all 50 States.

The bill significantly increases funding for highway safety programs.

In addition, the bill authorizes $17.6 billion for "Projects of National and Regional Significance"—a major boost for these important projects.

It also authorizes $7.5 billion to address the problem of railroad-highway crossings and the elimination of road hazards.

Our legislation will also have another positive benefit by giving a major boost to our nation's economy. Nationally, this proposal creates more than 1.3 million new highway jobs over the next six years.

It is time to face the facts—our highways, bridges and transit systems are aging and not up to the standards which our citizens expect. We need to stimulate the economy and this important legislation will do just that. America's congestion and safety crisis will not go away—it must be addressed immediately.

Enactment of this landmark legislation is a legacy for all users of our transportation infrastructure, both today and for future generations and moves our aging transportation system into the 21st century.

IN SUPPORT OF THE LIFESPAN RESPITE CARE ACT OF 2003

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MARKEY. Mr. Speaker, I rise in support of the Lifespan Respite Care Act of 2003 and in celebration of the Nation's family caregivers during National Family Caregivers Month and Alzheimer's Awareness month. This week before Thanksgiving, as we anticipate gathering with family, friends and loved ones, I am privileged to recognize and honor the millions of family caregivers who care for family members with disabling or chronic conditions such as those afflicted by Alzheimer's disease. There is no doubt in my mind that caregivers—those who devote themselves selflessly to caring for loved ones with disease such as Alzheimer's—are the true heroes. I know because my dear mother was a victim of Alzheimer's and my father was a hero caring for her to the day she died.

Today over 4.5 million Americans suffer from Alzheimer's disease. Almost half of all Americans over age 85 suffer from this devastating debilitation. With the graying of the baby boomer population a sharp increase in Alzheimer's disease is expected. Over 70 percent of people afflicted with Alzheimer's disease live at home, with 75 percent of home bound care provided by family and friends. There are over 25 million family caregivers in America and by 2020, the number of adults requiring assistance with daily living will increase to almost 40 million, placing a tremendous load on the family caregivers.

We cannot afford to lose any family caregivers to stress or illness. We as a nation cannot afford it because family caregivers provide $250 billion per year in unpaid care. Yet, the lack of support is taking its toll on caregivers. While a large proportion of caregivers report finding an inner strength, significant numbers report serious physical or mental health problems, including headaches, stomach disorders, back pain, sleepless nights and depression. Mortality risks for caregivers are 63 percent higher than for noncaregivers.

In addition to serious health consequences, many families suffer emotionally and economically. Families of children with disabilities face a significantly higher divorce rate than families of children without disabilities. Lack of respite care has even been found to interfere with the

ability of parents of children with disabilities to accept job opportunities.

Without adequate family support, children with disabilities face a nearly 4 times higher risk of abuse and neglect than children without disabilities and the abuse rate of the elderly is unacceptably high.

Respite works. It allows families to remain together and avoid more costly out-of-home placements. Hospitalizations, institutionalization, nursing home and foster care placements have been shown to actually decline when respite or crisis care is the intervention.

This bill will help create a family caregiving respite policy in our country, not just a band-aid solution. Families are under greater stress today than ever before and the numbers who will assume caregiving roles is rising at an alarming rate. Respite works, respite saves money, respite save families. We cannot afford to ignore the family caregivers any longer. We must give them respite.

PAYING TRIBUTE TO MATT McCHESNEY

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, November 20, 2003

Mr. McINNIS. Mr. Speaker, it is with great pride that I rise today to pay tribute to a dedicated law enforcement officer from my district. Deputy Matt McChesney is a caring and capable law enforcement professional who is committed to improving the lives of families impacted by domestic violence. I am proud to join my colleagues here today in recognizing Matt's tremendous service to the Colorado community before this body of Congress and our nation.

Matt often sacrifices sleep, and the few days he has off, to come into the District Attorney's office the morning after a domestic abuse arrest. There, he works tirelessly to ensure that each victim is treated with dignity and respect. In addition, Matt works with the Victim's Assistance Program and the Operations Division to educate and train volunteers on how to assist victims. For Matt's dedication and commitment to others, he was recently named Law Enforcement Officer of the Year. The people in Matt's district are safer as the result of his service and protection.

Mr. Speaker, Matt McChesney is a dedicated individual who sacrifices his time to helping those who are victim to the terrors of domestic violence. His compassion and selfless service to our state definitely deserve the recognition of this body of Congress and this nation. Thanks for your service Matt, and congratulations on a well-deserved award.

PERSONAL EXPLANATION

HON. JOSEPH M. HOEFFEL
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, November 20, 2003

Mr. HOEFFEL. Mr. Speaker, I was absent for four votes on Wednesday, November 19, 2003. Had I been present, I would have cast my votes as follows:

Rollcall No. 641 (H. Con. Res. 288): "aye."
Rollcall No. 642 (H. Res. 393): "aye."
Rollcall No. 643 (H. Res. 423): "aye."
Rollcall No. 644 (H.R. 3140): "aye."

TRIBUTE TO VACAVILLE'S CRIME PREVENTION EFFORTS

HON. GEORGE MILLER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, November 20, 2003

Mr. GEORGE MILLER of California. Mr. Speaker, I would like to take this opportunity to call my colleagues' attention to a real success story in the City of Vacaville, California. As this article printed in the Fairfield Daily Republic explains, the Police Department in Vacaville is receiving a good deal of well-deserved recognition for the programs and services it provides. The Vacaville P.D.'s comprehensive and preventative approach to crime is a welcome one, and it is having an amazing effect. Despite statewide increases in crime this past year, major crime in Vacaville is significantly down. In a sense, by investing time and effort in the community, they are stopping crime even before it happens. This should be a lesson to all of us. I urge my colleagues to read the attached article, and I commend the City of Vacaville and its Police Department for all their hard work.

[From Fairfield Daily Republic, Nov. 27, 2003]

COMBATTING CRIME "HOLISTICALLY"—VACA POLICE USE NEW APPROACHES TO MAKE COMMUNITY SAFER

(By Nada Behziz)

VACAVILLE.—For decades, American doctors have prescribed pills for pain—white ones, blue ones, big ones, new ones.

And for centuries, practitioners of traditional Chinese medicine have eased aches, strains and spasms through herbal remedies and preventive care.

Now, those two philosophies are merging in Vacaville in a slightly different venue: public safety.

The Vacaville Police Department's transition from the "war on crime" model to more of a preventive slant is what police officials attribute to the city's decrease in crime.

"We're not at war with our community," said Vacaville police Chief Bob Harrison. "We're looking at crime more holistically. We want to provide comprehensive care to really get at the problem."

Vacaville is one of the only cities in California that not only provides preventive programs within elementary and grade schools but has a department within the police department that provides comprehensive, preventive resources to the community.

Sarah Jacobs was torn between loving her husband and saving her children. It wasn't until a rainy evening when her husband threw her and her two sons out of the house with bruises that she packed her bags and left.

"We had no where to go, but I knew we had to leave," Jacobs said. "I heard from friends that the police department could help, so that was the first place I went."

Jacob found a warm place to sleep, an arrest warrant for her husband who left bruises all over her body and parenting resources to help her children recover, all in the same place.

"The police department was able to take care of my every need," Jacobs said. "Now it's time to take care of myself emotionally."

Vacaville's Family Investigative Response and Services Team office based within the police department staffs investigators, counselors and volunteers that provide resources for at-risk families.

Officials say their FIRST program helps stop crime before it happens by nourishing families and showing them non-violent ways of solving disagreements.

Many Vacaville residents in need of services, including parenting classes and access to computers, don't know where to find them. The center provides a "one-stop-shopping place" for people to get the help they need.

Through FIRST, 28-year-old Jacobs was placed in transitional housing, a furnished home of her own where the agency could counsel and monitor her.

And she was introduced to a new family.

"Anything I could possibly say I need, they're on top of it. I've never had to call my counselor in the middle of the night, but I know she's there," she said. "I never had family that I was close to and could trust, now I found them."

Today Jacobs plans to return to school next year to earn a bachelor's degree in business administration. She has hopes of one day becoming a lawyer.

The department first focused on domestic violence issues six years ago, but it wasn't long before police officers noticed that residents who visited were not in need of police services as much as they were human services. The program expanded to incorporate elder abuse, sexual assault and child abuse situations more than four years ago when FIRST opened its doors.

"People ask us often if we believe this is our job as a police department," said Lt. Scott Paulin, who runs the FIRST division of Vacaville Police. "We have to look beyond putting handcuffs on people and fill the gaps to prevent the criminals in the first place."

The gap between criminal activity and the department's clearance rate is slowly closing. While crime increases at a steady rate in California, this year alone, part one crimes—which include homicides, rape, assault and theft—have already dropped 6 percent from last year in Vacaville. The department's clearance rate hit almost 30 percent, a goal that Harrison says the department will surpass this year.

With one of the lowest percentages of overall crime in California, Vacaville was chosen this year by the California attorney general as one of two state police agencies for its "Best Practice Program," which will be featured on the attorney general's Web site as examples of excellence for other cities. The decline in crime, Harrison says, is in part due to the officers visibility in the area and their personal investment since the vast majority live in the city.

"If it's in your back yard, you care if it's clean," Harrison said. "Many of our officers live in town and it's a place they use on a daily basis and want to take good care of."

But Officer Erwin Ramirez says the commute from the Bay Area is worth not worrying about a parolee coming after his wife and three children.

"When you have three kids and a wife, you want to keep them away from danger," said Ramirez, who says he makes at least five arrests each month. "It's a great city but I

don't want to risk my family's danger by living here.''

Ramirez came to Vacaville three years ago after beginning his career as a patrol officer with the Suisun City Police Department and says the stark difference between the community's reaction to police officers is what makes Vacaville special.

Driving around in his patrol car, Ramirez is approached by children on their scooters smiling and waving as he drives by.

''The department has done a great job at dispelling the stereotype that comes with the police,'' Ramirez said. ''We go around the neighborhoods and talk with the people and hand out stickers to the kids. Hopefully they will remember that the next time we come by.''

TRIBUTE TO DENNIS DEVOR

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is with great pride that I rise today to pay tribute to a dedicated volunteer from Montrose, Colorado. Dennis Devor is a humble and caring individual who commits his free time to the betterment of his community. His enthusiasm for serving others resonates throughout Colorado. I would like to join my colleagues here today in recognizing Dennis, and his tremendous service to the Montrose community before this body of Congress.

Dennis was recently awarded the prestigious ''9Who Care'' Award given out by a Denver television station to honor unsung heroes in the community. Dennis' primary occupation is in the law, but he makes time before and after work to be involved in charitable organizations like the Montrose Education Foundation, Salvation Army, Montrose Rotary Club and the Chamber of Commerce. In addition to those organizations, Dennis is also an active member of United Methodist Church. Dennis always makes volunteer work an important priority in his life. His tireless dedication often results in early mornings and late nights spent working to better the lives of those in need.

Mr. Speaker, Dennis Devor is a hard-working individual who has enriched the lives of many members of the Montrose community. He demonstrates a passion for public service that sets a fine example for all Americans. Dennis serves with enthusiasm and commitment, and he certainly deserves the recognition of this body of Congress and this nation. Thanks for your hard work, Dennis, and congratulations on a well-deserved award.

CONDEMNING THE TERROR ATTACKS IN TURKEY

HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mrs. LOWEY. Mr. Speaker, I rise to condemn the horrendous and cowardly attacks carried out in Istanbul, Turkey, on November 15, 2003. Twenty-five people were killed and over 300 were injured, as suicide bombers in trucks attacked two synagogues crowded with families attending bar mitzvahs. We should all mourn the unspeakable nature of this tragedy, and we must take decisive action against those responsible.

We are witnessing the resurgence of a pervasive and violent anti-Semitism, last seen on a widespread scale in the 1930s and 1940s in Europe. Some claim that this resurgence can be tied to the continued violence and political conflict between Israel and the Palestinian Authority, but I fear it goes beyond that.

The November 15 attacks struck at Turkey's heart—deliberately—because since the 15th century, it has been a place of peaceful coexistence between Jews and Muslims. By targeting Jews there, the radical Islamic fundamentalists want to send a message: forget history and forget tradition. If you are Jewish, we will target you in any place, at any time. Ironically, and tragically, most of those who lost their lives in this attack were Muslim.

This is hatred, plain and simple. It is anti-Semitic and inhuman. As it destabilizes the Middle East, Asia, and Europe, it threatens our own national security and the security of our closest allies. I know that this Congress and the entire country have the resolve to combat these destructive forces wherever they might reside. I ask my colleagues to join me in mourning with the families of those killed in Istanbul and to stand firm with me as our long and difficult struggle against terrorism continues.

TRIBUTE TO ILLINOIS STATE SENATOR STAN WEAVER

HON. TIMOTHY V. JOHNSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. JOHNSON of Illinois. I rise today to pay tribute to my friend and mentor, the late Illinois State Senator Stan Weaver. When Senator Weaver passed away last week, aspiring public servants lost a role model. Few people in public life received the respect that he had among his colleagues, friends and constituents. His successful service to the people of east central Illinois began in 1956 when, at the urging of many citizens of Urbana, Illinois, he ran for mayor. He went on to serve one term as a State Representative then 10 terms as a State Senator. Best known for his exemplary service to his constituents and his ceaseless promotion of the University of Illinois, it is estimated that Stan Weaver alone guided over one billion dollars in construction projects to the University over 30 years.

Consistently prevailing in his campaigns for office, he never spent exorbitant amounts of money and rarely gave grand speeches but, instead, with quiet authority and an intimate knowledge of the political process and the inner-workings of government, translated his personable style into an incredible ability to relate with people and get things done.

I am very honored to have had such a close personal relationship with Senator Weaver and I am deeply saddened by the loss of my friend whom I knew and admired for, literally, my entire life.

TRIBUTE TO MARY JEAN STONER

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MCINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a very special woman from my district. Mary Jean Stoner from Grand Junction, Colorado is known to many as the Grand Valley's favorite candy lady. Mary is retiring this year after 20 years in business and it is my honor to call her contributions to the attention of this body of Congress and our nation here today.

Mary grew up in Sutherland, Iowa and it was there that she began educating herself in the art of candy making. After graduating from Iowa State University, Mary was able to apply a number of her Home Economics and Art classes to become an expert candy maker. Over time, she became a true master of her trade.

Mary and her candy have been bringing smiles to the faces of Grand Valley residents for many years. The candy that Mary makes is truly amazing. The people of the Grand Valley will be sad to see Mary go. However, they will be glad that she now has more time to visit and catch up with her friends and neighbors.

Mr. Speaker, it is my honor to rise and pay tribute to Mary Jean Stoner. Mary dedicated her professional career to making people happy and it is my honor to call her contributions to the attention of this body of Congress and our nation. Thank you Mary.

HONORING EXERCISE TIGER FOUNDATION

HON. KENNY C. HULSHOF

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. HULSHOF. Mr. Speaker, I rise today to honor a distinguished group of Americans. On November 14, 2003 the Exercise Tiger Foundation held its National Adopt a Serviceman Program in Jefferson City. It is essential that we take a moment to remember not only the sacrifice of veterans of Exercise Tiger, but also those men and women currently serving our Nation in the military. Allow me, Mr. Speaker, to take a moment to remind all of us of the story of Exercise Tiger during the Second World War.

Unfortunately, for many people, the words ''Exercise Tiger'' hold no special significance. Few know of the sacrifice made by so many in late August of 1944. At its outset, Exercise Tiger was one of several training exercises conducted to prepare American and British troops for the upcoming invasion of Normandy. Concentrated on a beach near Dover, England, these operations were meant to prepare the raw recruits for combat, not provide them their first taste of war.

In the calm, early morning hours of April 28, 1944, tragedy struck. As eight Navy landing ships, or LST's, and their lone escort approached their landing area, nine German U-

Boats patrolling the English Channel attacked. LST–507 was the first ship to be torpedoed; it quickly caught fire and survivors abandoned ship. Moments later, LST–531 was hit and sank within 6 minutes. The American ships quickly regrouped and returned fire, with LST–289 suffering significant casualties.

In a moment, the green American recruits became battle-tested veterans. Out of a 4,000 man force, nearly one-quarter were either missing or dead. While the heroism of the American troops under heavy enemy fire deserves high praise, the men who participated in Exercise Tiger had a job to do—practice landing operations resumed the very next day, April 29, 1944.

In most cases, the casualty information and details surrounding the mission would have been made public within days or even hours of the attack. With Exercise Tiger, however, this information was not released until after the D-Day invasion. This was necessary to keep the German military from learning about the impending invasion of mainland Europe.

As the world now knows, the allied invasion of Europe on D-Day was a success. Unfortunately, those who helped make D-Day possible have not been properly recognized for their sacrifice. This too, must change. We must take it upon ourselves to ensure that the virtues those who served in Exercise Tiger—courage, humility and steadfast devotion to completing the task at hand—remembered and documented for future generations.

As such, it is only appropriate that the Exercise Tiger Foundation has nominated eight members from various branches of the active and reserve forces as part of the National Adopt a Serviceman Program. This year's honorees are Staff Sergeant Patrick Reed, 1107th AVCAD, Missouri Army Reserve National Guard, Command Sergeant Gary L. Murphy, 139th Security Forces Squadron, U.S. Air National Guard, Master Sergeant Robert A. Jackson, 442nd Fighter Wing, U.S. Air Force Reserve, Staff Sergeant Billy Jack Roberts, 509th Bomb Wing, U.S. Air Force, Petty Officer 2nd Class Yancy Woodard, Staff Sergeant Matthew Beadle, U.S. Marine Corps, Sergeant Dennis Payne, 110th Engineers, Missouri Army Reserve National Guard, and Boatswain's Mate 2nd Class Kristian Sova, U.S. Coast Guard. Without a doubt, their exemplary service to our Nation honors the example of those who came before them.

These individuals certainly deserve our recognition and support as they continue to defend our freedom both here and abroad. We stand united behind them, and united behind the freedom our Nation guarantees. May God continue to bless this Nation as well as all of those men and women who have served in uniform.

THE INTRODUCTION OF THE SURFACE TRANSPORTATION RESEARCH AND DEVELOPMENT ACT OF 2003

HON. VERNON J. EHLERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. EHLERS. Mr. Speaker, today I rise to introduce an important piece of legislation, "The Surface Transportation Research and Development Act of 2003." Our Nation's transportation system faces tremendous challenges. We have more drivers who are driving more miles leading to severe congestion, particularly in many urban areas. An aging infrastructure is putting a strain on State and local transportation budgets, which are tied up in maintaining our existing system, with little, if any, money left for improving the system and planning for the future. And an aging population and changing development patterns that demand an innovative response to ensure the transportation system meets future needs. The public demands safer, less congested roads, and more transportation choices. Considering that we won't have the ability to simply build more roads to address these challenges, especially in urban areas, we must look at new ways to improve the overall system, to make it safer and more efficient, and to ensure that the system meets future needs.

Fundamental improvements to the entire transportation system depend on high quality surface transportation research. Research can provide the proper tools and information needed to drive solutions. The last time Congress fully examined our Nation's transportation policy was through the debate and passage of the Transportation Equity Act for the 21st Century (better known as TEA–21). While Congress increased funding for overall transportation programs by upwards of 40 percent, funding for transportation research remained relatively flat. I think that lack of investment in research has hurt our ability to meet new challenges. However, simply providing more money for research will not solve our problems. Increased funding must be accompanied by some reforms of the existing research programs.

As Chairman of the House Science Subcommittee on Environment, Technology and Standards, which shares jurisdiction over surface transportation research with the Transportation and Infrastructure Committee, I held a hearing earlier this year to hear from experts on the state of the Federal Government's current surface transportation research program. In addition, we heard from a wide array of interests on how to improve and reform the research program, and the levels at which research should be funded. Based on this input, I am proud to introduce the Surface Transportation Research and Development Act of 2003.

This legislation has three overarching goals: to increase stakeholder input to ensure that the folks who must implement and use the research agree that it is worthwhile and transferable into practice; to create the highest quality research through increased competition and peer-review of all projects; and to ensure greater accountability so that our research supports the goals of our surface transportation system.

More specifically, the bill:

Creates and funds an important research program run by the National Academy of Sciences to address short to medium-term research needs. Research will focus on reducing congestion, renewing existing roads and bridges while minimizing impact to the public, improving safety by reducing crashes, and developing tools for getting more out of our existing highway capacity and assessing future needs. All projects funded by this program will be competitively awarded and peer-reviewed;

Provides needed funds to implement a public-private cooperative environmental research program, with the goal of developing the knowledge, tools, and performance measures that will help us understand the linkage between the environment and the transportation system;

Calls on the U.S. Department of Transportation to take the lead in carrying out fundamental, long-term research to achieve breakthroughs in transportation research;

Increases funding for University Transportation Centers and ensures greater competition among universities which seek to become transportation research centers;

Reforms and increases the responsiveness of the Bureau of Transportation Statistics to the needs of the transportation community; and

Provides States with additional resources to better train and educate the transportation workforce.

This legislation will significantly, yet prudently, increase funding for transportation research starting at $500 million a year in fiscal year 2004 for Federal research programs and gradually rising to $850 million a year by 2009. These funding levels are based on an overall level of $375 billion for the comprehensive six-year surface transportation reauthorization advocated by the House Transportation and Infrastructure Committee, which I support. I believe my approach ensures that our transportation research is well planned, peer-reviewed, properly funded, and evaluated and will go a long way to help solve the many challenges facing our Nation's transportation system.

I look forward to working with my colleagues on the Science and Transportation and Infrastructure Committees, the U.S. Department of Transportation, State transportation departments, and all other interested stakeholders as this legislation and the overall reauthorization of TEA–21 progress.

TRIBUTE TO ROBIN GARVIN

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable woman from my district. Robin Garvin has dedicated her life in service of the children of the Roaring Fork Valley. It is my honor to pay tribute to her contributions here today.

Robin recently announced her retirement from the Roaring Fork School District's RE–1 Board of Education. Robin was an outstanding member of the Board for eight years and spent the last half of her tenure serving as the Board's President.

Robin approached her position with the best interests of children in mind. Her term was defined by a tireless commitment to providing the students of the Roaring Fork Valley with the best possible education. The Roaring Fork Valley is undoubtedly a better place as the result of Robin's service.

Mr. Speaker, I am honored to bring Robin Garvin's contributions to the attention of this body of Congress and our nation. Robin has managed to devote herself to bettering the Roaring Fork Valley's system of education while happily acting as a devoted mother, wife and friend. I am proud to join the citizens of the Roaring Fork Valley in thanking Robin for her service.

THANK YOU TO SCARLET TREU

HON. GARY G. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. GARY G. MILLER of California. Mr. Speaker, it is with great pride and personal interest that I rise to commend Mrs. Scarlet Treu of Hacienda Heights, California.

Since my election to Congress in 1999, Scarlet has served as my Senior Advisory for Asian-American issues in my congressional district. Her knowledge and insight into this important constituency has served me well. Unfortunately, after five years of service, she has decided to retire from congressional politics. Not only has she been an excellent employee, but she has also become a close personal friend.

Scarlet's life history is one of inspiration and admiration. Born in Taipei, Taiwan her family was forced to flee from China due to the repressive Communist Regime, Scarlet was able to complete her education at the prestigious Ming Chuang College and earned a degree in business administration. Upon graduation, she went on to serve as the original and founding member of the marketing department for Chase Manhattan Bank's Taipei branch. Immigrating to the United States in 1976, she went to work as an immigration section supervisor and then as a civil litigation specialist for two respected law firms in southern California.

Scarlet met her loving husband, Rolf Treu, in 1977 and they set out to establish two law offices before he was appointed to a State judgeship in 1995. Rolf and Scarlet have two wonderful children, Jacqueline and Eric.

Aside from her many children-related activities, Scarlet has focused on the needs of her community as well. For many years she has been supportive of and actively engaged in the Hacienda Heights Improvement Association Board, LA County Supervisor Don Knabe's Art Award, the Colima-Hacienda Women's Club, the Hacienda Heights Chinese-American Parents Advisory Board, and various Republican Party political appointments. She also formed my Business Advisory Board which has provided me with a forum to work with community leaders on issues important to their industries.

In 2001, Scarlet co-chaired a successful $221 million bond campaign for Mt. San Antonio College that will benefit future generations of students.

Mr. Speaker, I want to thank Scarlet for her years of service, hard work and personal sacrifices on my behalf.

IN HONOR OF DONNA TERESA, THE 2003 ANNE RICHARDSON READING IS FUNDAMENTAL VOLUNTEER OF THE YEAR

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. FARR. Mr. Speaker, I rise today to commemorate Donna Teresa, a compassionate and devoted member of the children's literacy community. In recognition of her activism, Ms. Teresa has been selected by Reading is Fundamental, as the Western representative for the "2003 Anne Richardson Reading is Fundamental Volunteer of the Year." For over six years, Ms. Teresa has worked tirelessly to develop and improve literacy programs at Henry F. Kammann School. In this effort, she has truly embodied the spirit of volunteerism and empathy that is attributed to the distinguished few who receive this award.

In her position as the school librarian, Ms. Teresa has restored the wonder and excitement that reading can provide to our Nation's children. She understands the value of literacy and has implemented many new programs to encourage reading, including a summer program that gives each a child a free book. Ms. Teresa has expressed her concern that for many of her students, books are scarce at home and the break from school puts many students behind their peers. This type of understanding and consideration of a student's living situation has allowed Ms. Teresa to reach out to each child and cater to their interests and needs. She also manages a student book club with more than 60 students and personally acquaints herself with each new text before giving it to a child to ensure that it is appropriate for their reading level and interests. Ms. Teresa derives her inspiration from the hope that her push towards literacy will encourage students to continue their education and make better choices down the line. Her efforts have also been recognized in Monterey County, where she was recently awarded the "2003 Monterey County Lighthouse for Literacy."

Mr. Speaker, on behalf of the United States Congress, I would like to honor the accomplishments of Donna Teresa and express sincere gratitude for her commitment to our community's children. I wish Ms. Teresa much success in her endeavors and I am confident that the efforts of those who strive to improve literacy will be valued for many generations to come.

NO ATTAINMENT—NO TRADE BILL

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MORAN of Virginia. Mr. Speaker, today I am introducing the "No Attainment—No Trade bill."

This legislation amends the Clean Air Act to prohibit power plants and other major point sources of nitrogen oxide (NO_x) pollution that are in an ozone nonattainment area from participating in EPA's emission trading program.

In 1990 Congress passed amendments to the Clean Air Act to deal with the issue of acid rain deposition.

Harmful acid rain was destroying our buildings, personal property and turning freshwater lakes into dead zones.

The new law established an innovative emission trading program to reduce the precursors of acid rain, harmful nitrogen oxides and sulphur dioxides emitted by coal-burning power plants and major industrial boilers.

Since its establishment, the trading program has worked extremely well, better than even proponents of the 1990 amendment to the Clean Air Act ever expected.

While nitrogen and sulphur dioxides have been reduced, and reduced by millions of tons, an unanticipated new wrinkle has emerged as states and localities work to reduce urban smog and bring ozone non-attainment areas into compliance with other requirements in the Clean Air Act.

States and localities are bumping into the emission trading program for nitrogen oxides.

Not only are nitrogen oxides the precursors of acid rain, they also mix with hydrocarbons and form ground-level ozone.

Giving power plants in an ozone non-attainment area the authority to buy a credit from elsewhere and avoid nitrogen oxide reductions may help EPA meet its national acid rain reduction goals, but it can frustrate State and local efforts to lower ozone and urban smog.

I speak from experience.

Just across the Potomac River in Alexandria we have one power plant operated by Mirant that continues to violate its permit.

In fact, this past summer during the ozone season it violated its clean air emission limits by more than 1,000 tons of nitrogen oxide, double the tonnage allowed under its permit.

It my understanding that Mirant is trying to get off the hook by purchasing credits of emission reductions from sources elsewhere, outside this region, to meet its emission reduction goal.

"Not so," says the Commonwealth of Virginia.

The State's position, however, may be on less than firm legal ground.

I hope the Commonwealth holds its ground and stands strong, and I have encouraged them to do so.

The legislation I am introducing gives them the clear legal authority they need and discourages power plants from challenging State ozone implementation plans in court.

I also hope this legislation will give other States the authority they need to block power plants in a non-attainment area from engaging in NO_x emission trading and avoiding their responsibility to reduce ozone and urban smog.

It is my understanding that Mirant, the same company operating the plant in Alexandria, has violated its NO_x permits at its three coal-fired plants in Maryland.

During this summer's ozone season, Chalk Point, Morgantown and Dickerson power plants collectively exceeded their summer NO_x permits by more than 3,500 tons.

Unlike Virginia, State officials in Maryland appear inclined to let them buy credits through the emission trading program.

That's an additional 4,600 tons of nitrogen oxide that entered our air this past summer beyond what Virginia and Maryland agreed Mirant should emit.

It makes no sense, to force this region, or the jurisdictions of any ozone nonattainment area, to rachet down nitrogen oxides from other sources, beyond what may be necessary, simply because a few large sources are able to buy their way out of compliance.

It isn't fair, and it is not in anyone's best interest to do so.

My legislation puts an end to it.

It deserves consideration.

ESTABLISHING NATIONAL AVIATION HERITAGE AREA

SPEECH OF

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mrs. JOHNSON of Connecticut. Mr. Speaker, I rise today in support of H.R. 280 the National Aviation Heritage Area Act which includes in Title VI the Upper Housatonic Valley National Heritage Area Act. The Upper Housatonic Valley, encompassing 29 towns in the hilly terrain of western Massachusetts and northwestern Connecticut, is a singular geographical and cultural region that has made significant national contributions through its literacy, artistic, musical, and architectural achievements, its iron, paper, and electrical equipment industries and its scenic beautification and environmental conservation efforts.

The Upper Housatonic Valley National Heritage Area would extend from Lanesboro, Massachusetts 60 miles north to Kent, Connecticut. This region of New England is home to many of the Nation's first industrial iron sites. The iron produced at these sites was used to make weapons for the Revolutionary War. Furthermore, the area includes homes of historical significance belonging to Edith Wharton and author Herman Melville as well as the Monument Mountain Reservation, where Melville and Nathaniel Hawthorne picnicked. The area also has great outdoor recreational resources and is the base for much of Connecticut's agri-tourism business.

From the 1730s to the 1920s, it was home to many of the Nation's earliest iron industries. The first blast furance was built in 1762 by Ethan Allen and supplied the iron for the cannons that helped George Washington's army to win the American Revolutionary War. While most of the furnaces, mine sites and charcoal pits have been lost to development and time, the few that remain are in need of refurbishment. The Beckley Furnace in Canaan, Connecticut was designated an official project by the Millennium Committee to Save America's Treasures.

The Valley's history as a cultural retreat from the Boston and New York areas provides both past and current riches for the country. Since the 1930s visitors from all over have come to hear the music at Tanglewood, Music Mountain and Norfolk, see the paintings at the Norman Rockwell Museum, watch serious theater at Stockbridge and musical treats at Sharon. Today's local authors draw on a long tradition going back to the 19th century, when Herman Melville, Nathaniel Hawthorne and Edith Wharton lived and wrote here. The Upper Housatonic Area, with its remoteness from but ties to large cities, occupy a special niche in our national culture.

The Housatonic Valley is also rich with environmental and recreational treasures. The Housatonic River, just below Falls Village, Connecticut, is one of the prized fly-fishing centers in the Northeast and is enjoyed by fisherman from not only Connecticut and Massachusetts but the entire eastern seaboard. Olympic rowers have trained in this river as children have learned to swim, boat and fish and value its ecosystem.

Through this broad, flexible and locally led initiative, the states of Connecticut and Massachusetts will be able to make real progress in protecting the river and its heritage. Rather than depending on the Federal bureaucracy, States will be able to facilitate locally led, and truly voluntary programs that will help protect the river for future generations. This legislation encompassing all heritage areas has broad bipartisan support, I would like to thank the Resources Committee for bringing this legislation forward and I encourage my colleagues to support this legislation.

PERSONAL EXPLANATION

HON. ALLEN BOYD

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. BOYD. Mr. Speaker, I was unavoidably detained and unable to cast my vote on rollcall votes 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633. Had I been present I would have voted ''aye'' on rollcall votes 620, 621, 622, 623, 624, 625, 626, 627, 631, 632, 633. In addition, I would have voted ''nay'' on rollcall votes 628, 629, and 630.

IN HONOR OF STIRLING D. SCRUGGS, DIRECTOR, INFORMATION, EXECUTIVE BOARD AND RESOURCE MOBILIZATION DIVISION—UNITED NATIONS POPULATION FUND

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mrs. MALONEY. Mr. Speaker, at the end of this year, Stirling Scruggs will be retiring after 22 dedicated years with the United Nations Population Fund (UNFPA). Stirling is a living example of the ideals behind the creation of UNFPA and the United Nations itself. A former high school football star in Tennessee, Stirling had many opportunities open to him in life. But his overriding ambition was one that so many of us shared in our youth: to make a difference in the world. Stirling has remained true to his youthful ideals and has made a difference, a substantial difference measured in millions of women and babies that survived because of his dedication and efforts; measured in the essential bonds between mothers and their children who survived to know each other and in the love of husbands and fathers who, rather than seeing their wives and children die in childbirth, have had long and full lives with their loved ones.

In speaking with his colleagues, there are three words that are always repeated when they describe Stirling Scruggs—Passion, Integrity and Kindness.

Passion: Stirling Scruggs has worked in some of the poorest places in the world. He has seen first hand the deprivations and struggles that hundreds of millions—in fact, billions of people—bear every hour, every day, every week throughout the year. Stirling Scruggs brings to his work a passion that bespeaks his own compassion and his own commitment to the cause of basic health, women and voluntary family planning around the world.

Integrity: Stirling combines his passion with unshakable integrity. He is unwavering in his commitment to basic health and rights for all the world's people. He has stood up for these ideals in some of the most difficult circumstances, including in China, where he worked tirelessly—as UNFPA does—to convince the Chinese about the greater wisdom of a voluntary, rights-based approach to family planning. Stirling Scruggs is a monument to personal integrity and professional dedication.

Kindness: Finally, and perhaps most importantly, Stirling brings to his work a core kindness—not only in his outlook to the dispossessed in our world, but in his dealings with all people. Stirling always has a kind word and a warm smile for those he works with, on behalf of and for. He is a tender man, who has a compassionate outlook toward those less fortunate and a compassionate manner with everyone he relates to.

There are few better, kinder men than Stirling Scruggs. He has represented the United States so well in the United Nations system. All Americans can be proud of the service he has rendered and we all wish him well as he continues his efforts to make the world—and each of us—a little better.

TRIBUTE TO WESLEY HEDSTROM

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. OBERSTAR. Mr. Speaker, I rise today to pay tribute to former Cook County Commissioner Wesley Hedstrom, who passed away on November 7, 2003.

Wes Hedstrom was born in 1924 in Grand Marais, Minnesota, the youngest of thirteen children. After graduating from Grand Marais High School in 1942, Wes joined the U.S. Army and served during World War II. Returning to Minnesota, Wes, along with five of his brothers, took over operation of their father's business, Hedstrom Lumber, and he was company president from 1986 to 2000. In 1984, Wes was elected to the Cook County Board of Commissioners, on which he served for the next 16 years.

Except for the few years he was in the Army, Wes lived his entire life in Grand

Marais, a small fishing town along Minnesota's north shore. Many people say that Wes was largely responsible for the enormous growth of his family's lumber business, turning it into one of the region's largest and most successful companies. For Wes, however, it was more than a business; it was a way of life. He had extensive knowledge of lumber and the woodlands. I learned more from Wes about forestry, forest management and sustainable yield forestry than from any other source.

Wes understood the need for balance between the lumber industry and protections for the environment. He applied that fair-minded attitude to all the projects he worked on in the community, both as a County Commissioner and as a civic volunteer. From the renovation of a local hospital, to the creation of a new airport, to the advocacy for education funding, Wes worked to nurture people, find a consensus, and do what was in the public's best interest. That was his signature and his trademark.

Some called him an activist. Others said he was a pioneer. All who crossed his path considered him a friend. I knew Wes since he worked on my first Congressional campaign in 1974, and over the years, I marveled at his friendliness, magnanimity and selflessness. To me, Wes was a teacher, counselor and partner in ventures for the Northland, and he was a good friend to me. He was one of those rare people who truly made a difference in his community. I know my colleagues join me in honoring Wes Hedstrom for his many years of dedicated service to his town, his State and his country.

COMMENDING DENTON HOUSING AUTHORITY

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. BURGESS. Mr. Speaker I rise today to recognize the Denton Housing Authority to commend them for receiving three National Association of Housing and Redevelopment Officials (NAHRO) Merit Awards in Tampa, Florida this year.

The Denton Housing Authority has been active in the North Texas community for years, working hard to provide quality public and affordable housing. This year at the 2003 NAHRO awards ceremony, the Denton Housing Authority was recognized for their achievements in Program Innovation for Resident and Client Services. NAHRO President Kurt Creager said, "These agencies are accomplishing remarkable levels of service for their communities and their residents. They are setting up programs and establishing standards that can be duplicated by other housing authorities around the country."

The Denton Housing Authority was recognized for three of their programs. The ARTS program brings together the DHA, University of North Texas, Center for Public Service, and Greater Denton Arts Council to provide an arts program and promote social skills for disadvantaged youth in low-income neighborhoods. The New Direction of Community Oriented Policy Services (COPS) program partners with the Denton Police Department to encourage community outreach services to create and sustain safer neighborhoods. Also, the Phoenix After-School Program teams with the University of North Texas and DHA to encourage social and academic success for socially challenged youth 4–11 years old living in the Phoenix Development. These are the kind of great programs that will create a better society in the future by giving our youth a strong foundation and forming a safer environment for our neighborhoods.

Once again, I would like to express my sincere congratulations to the Denton Housing Authority for their innovation and hard work in providing community outreach services to the City of Denton and surrounding communities.

TRIBUTE TO DAVID A. WIRSING

HON. DONALD A. MANZULLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MANZULLO. Mr. Speaker, I rise today in tribute to my colleague and friend in Illinois, David A. Wirsing, State Representative from the 70th district. Dave went home to be with the Lord suddenly on Sunday, November 16, 2003. He leaves a loving wife of over 40 years, Nancy, four grown children—Mark, Steven, Angela and Susan—and 11 grandchildren.

Dave Wirsing was a friend in the truest sense of the word. He was a man of deep personal faith, a loving and faithful husband to Nancy and a wonderful father to his four children. He spent the majority of his life in agriculture as a former pork producer and grain farmer. He and Nancy had the same phone number their entire lives, and their address always ended with "Sycamore, Illinois". Then, in 1992, he decided to enter public service and run for State Representative of the 70th district.

Mr. Speaker, I want to pay tribute to Dave today not only for his selfless public service to the people of Illinois, but to Dave as a friend. Before Dave ever ran for public office, he was simply a husband, father and grandfather. He raised his children with a sense of humor, a stern discipline, high moral standards, a deep and abiding faith in God and taught them leadership skills and simple common sense. Mostly, he raised his children and provided his wife, Nancy, with love. Few knew at this point how much he would impact the lives of so many people or that so many would seek his counsel. His children never dreamed that the man they simply called "Dad" would become the man many would call "great."

Dave Wirsing was a friend to many. His small and large acts of kindness are unfathomable to some. However, to Dave, it was just the way he was meant to live his life. He was a humble man, never quite understanding why people outside of his family would honor him for achievements that to him were just what he was supposed to do. He was a man who dedicated his life—indeed, his heart and soul, to serving others—his family, his neighbors, his friends, his constituents.

Dave led by example—he lived by the Golden Rule, and yet he never expected anything in return for his kindness and compassion. He loved being around people—be it the company of his wife and family or in the presence of colleagues, acquaintances and even strangers. He was able to laugh at himself—a trait seldom seen these days. He dedicated his life to serving others. He helped his children grow, learn and prosper; he helped his neighbors in times of need; he helped his friends to resolve problems; he helped his colleagues see both sides of an issue and then beyond that to a resolution; he helped his constituents obtain the assistance and guidance they had a right to; he helped many young people grow in life through his wisdom, his gentle and jovial encouragement, his love and respect for each person as an individual, and his high regard for bettering oneself.

Mr. Speaker, Dave Wirsing's accomplishments were many, but most importantly, not a day went by that he did not share himself with someone. Solutions and advice came to him from principle and philosophy. He was not out to make a name for himself, he just wanted to make things right in his part of the world. If he did not have the skill necessary to help someone, he sought it out. He lived by the philosophy that if you always tell the truth, you won't have to remember what you said. Dave Wirsing did not live his life to achieve great moments, but instead had a lifelong commitment to a set of values and ideals. As I reflect today on the whole of his life, that is his greatest accomplishment. He leaves behind a legacy of faith, kindness, compassion and love for his family, friends and constituents. He will be deeply missed.

HONORING THE 30TH ANNIVERSARY GALA OF THE KOREAN AMERICAN MEDICAL ASSOCIATION, INCORPORATED OF DISTRICT OF COLUMBIA, MARYLAND AND VIRGINIA

HON. TOM DAVIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. TOM DAVIS of Virginia. Mr. Speaker, I would like to take this opportunity to honor the 30th anniversary of The Korean American Medical Association of District of Columbia, Maryland and Virginia, Incorporated.

The Korean American Medical Association of District of Columbia, Maryland and Virginia, Incorporated (KMA) is one of the most respected Korean-American nonprofit organizations in America. The association was founded in 1974 by a small group of respected Korean physicians. The KMA was the first Korean Medical Association in the United States. Its hard work and dedication has led the association to grow from a handful of members to a membership of about 400 physicians from the District of Columbia, Maryland and Virginia.

Since its inception, the association's involvement in the Great Washington, D.C. Metropolitan community has been commendable. The KMA provides health care services, seminars and educational opportunities to the community. The dedication that the members of the KMA have to its community is exceptional.

The KMA provides a forum for its members to exchange ideas and continue education helping its members continue to provide excellent service to the community. The care and services these physicians provide to their neighbors and friends is a testament of their hard work. The KMA certainly has distinguished itself as an outstanding group.

Mr. Speaker, in closing, with all the contributions to the community made by The Korean American Medical Association of District of Columbia, Maryland and Virginia, Incorporation, we have a great reason to celebrate today. I want to commend the association 30 years of excellence and extend my warmest wishes for the years to come. I call upon my colleagues to join me in applauding the KMA on its 30th anniversary.

IN HONOR OF LOULA LOI-ALAFOYIANNIS

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mrs. MALONEY. Mr. Speaker, I rise today to pay tribute to Loula Loi-Alafoyiannis, the Executive Global President and C.E.O. of the Euro-American Women's Council (EAWC). Loula has spent her professional life facilitating the needs of Greek and American entrepreneurial communities and advancing the cause of women's rights in the areas of business and education.

Loula has demonstrated that intelligence, integrity, energy, clear objectives and the love of a task well executed create credibility. Her love for Greece and her desire to promote greater understanding between Greece and America has made her a strong advocate and a wonderful ally.

Loula, like so many talented women of her generation, has had several careers. For two decades, Loula served as an elementary school teacher, helping to ensure that young people have a strong educational foundation. Her work with young people inspired her to create a Youth Leadership Award given annually by EAWC.

She then turned to the challenges offered by business, public relations and event-planning. Loula's entrepreneurial skills are widely recognized and, as a result, she has served as a delegate to White House Conferences on small businesses since 1990, and has advised numerous public officials and government leaders. Loula has also sponsored numerous White House luncheons for prominent and influential business women from across the United States and Greece.

In 1991, she founded and organized the "Best Buddies Foundation" in Greece, along with Anthony Kennedy Shriver, who serves as its Global President and C.E.O. As the Founder and the executive Global President of Euro-American Women's Council, Loula has established a spirit of cooperation among business women globally. The women of EAWC bridge nations and cultures, set trends, exercise influence, innovate positive change and make a difference around the world. Since 2001, Loula has been the Coalition Partner for Europe of the Women Impacting Public Policy (WIPP) organization. She is currently a board member to the Human Rights Advisory Council of New York.

Loula has received a number of prestigious awards for her outstanding contributions, including the Crown Award, which recognizes her as one of the most creative minds of the top leading entrepreneurial women of the world. She has also earned the distinguished award of "Honorary Citizen of Baku" as a result of her pioneering efforts to improve entrepreneurial training in the former Soviet Union.

Mr. Speaker, I am pleased to bring to the attention of my colleagues the outstanding work of Loula Loi-Alafoyiannis. Her unwavering dedication to improving relations between the Greek and American entrepreneurial communities and promoting opportunities for women is truly worthy of our recognition.

A TRIBUTE TO REVEREND DR. JOHN L. GILES

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. TOWNS. Mr. Speaker, I rise in honor of the Reverend Dr. John L. Giles in recognition of his pastoral anniversary.

While Reverend Giles was born in the tiny town of Sanger, TX, located 38 miles southwest of Fort Worth, he considers himself a native of San Francisco. It was during high school that he joined St. Kevin's Catholic Church and learned the Catholic discipline. He was also a member of Bethel A.M.E. Church. Upon graduating from Balboa High School, he had saved enough money to attend college and support himself. Through his hardships, he learned independence, responsibility, the importance of healthy living, and helping others and his family.

Drafted in the Vietnam War, he spent 18 months in Friedberg, Germany where he earned the rank of sergeant in 15 months and he attended both Catholic and Protestant churches. He read the bible more and more and his favorite scriptures are Psalm 23, 27, and 121. In May 1997, Pastor Giles earned his doctorate in Holistic Ministry at the United Theological Seminary in Dayton, OH.

Upon returning to San Francisco, he joined the Solid Rock M.B. Church and was baptized. In August 1970, he was accepted at the American Baptist Seminary of the West in Berkley, CA. He also attended Morehouse School of Religion and served briefly at Ebenezer Baptist Church in Atlanta as a youth minister under the late Dr. Martin Luther King, Sr. Additionally, he has served at First Baptist in LaGrange; First African Baptist, Bainbridge and the Beulah in Quitman. He served as Chaplain at the VA Medical Center in Bay Pines, FL and as pastor of New Hope M.B. Church until 1994. Presently, he is the Pastor of True Faith Inspirational Baptist Church in Tampa, FL.

He is married to JoVanore Sims Giles, who serves as chairperson of the Deaconess Ministry and participates in the choir and other activities. They have two daughters, JoVanore Giles-Galbreath and Jenee Codallo-Nelson, and one son, Johnathan who is attending college at the School of the Holy Cross.

Mr. Speaker, Reverend Dr. John L. Giles has honorably served our Nation in the armed services and has provided spiritual guidance and leadership to several parishes across the country. As such, he is more than worthy of receiving our recognition today and I urge my colleagues to join me in honoring this truly remarkable person.

CONGRATULATING PAUL SIMON

HON. RAHM EMANUEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. EMANUEL. Mr. Speaker, I rise today to join in congratulating former Senator Paul Simon, who will be celebrating his 75th birthday on November 29. As one of Illinois' favorite sons, and a man who fought hard for the people of the United States in this building for twenty-two years, it is only appropriate that this body honor one of the most outstanding and respected leaders our country has ever known.

Born in Eugene, Oregon on November 29, 1928, Paul Simon moved to Troy, Illinois upon his graduation from college and worked as a newspaper editor and publisher, eventually building a chain of fourteen weekly papers. After serving in the United States Army from 1951–1953, Senator Simon first ran for elective office in 1955, winning a seat in the Illinois General Assembly. He served as a State Representative from 1955–1963 and as a State Senator from 1963–1968. From 1969–1973 he served our state as Lieutenant Governor. He was elected to the Ninety-fourth Congress, and served in the House from 1975 to 1985. In 1984 he won election to the Senate and served until 1997 when he chose not to run for reelection. Additionally, Senator Simon was a candidate for the Democratic nomination for President of the United States in 1988, winning the Illinois Primary.

As a Member of Congress, Senator Simon championed many progressive issues, many of them long before they became fashionable, including campaign finance reform and the creation of new programs to make college more affordable and accessible for our children.

Since retiring from elected office, Senator Simon has continued to advance a lifetime passion of his: education. The founder and Director of the Public Policy Institute at Southern Illinois University, Senator Simon still teaches classes in journalism, political science and history. The author of over a dozen books, his 1998 autobiography P.S. remains a must-read for those interested in Illinois politics in the post-war period. Additionally, Senator Simon was one of the founders of the magazine Illinois Issues, which remains the definitive journal of Illinois' political landscape.

But despite winning elections in five different decades, serving his state and country in many different capacities, and being a leading educator, Senator Simon's character, integrity and intelligence are what have made him the most enduringly popular political figure in our

state. The advice and support of Senator Simon remains cherished by those of us who have attempted to advance his ideals.

Mr. Speaker, I thank you for the opportunity to congratulate a true hero of mine and the entire State of Illinois, Senator Paul Simon, on the occasion of his 75th birthday.

PERSONAL EXPLANATION

HON. ROBERT E. ANDREWS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. ANDREWS. Mr. Speaker, on Wednesday, November 19, I did not vote on the following measures, because of family commitments, and would like to include in the RECORD how I would have voted, had I been present: On H.R. 1006, I would have voted "yea"; on H. Con. Res. 320, I would have voted "yea"; on H.R. 3491, I would have voted "yea"; on rollcall No. 637, to instruct conferees on H.R. 1, I would have voted "yea"; on H.R. 2420 I would have voted "yea"; on H. Res. 427, I would have voted "yea"; on H. Con. Res. 83, I would have voted "yea"; on H. Con. Res. 288, I would have voted "yea"; on H. Res. 393, I would have voted "yea"; on H. Res. 423, I would have voted "yea"; and on H.R. 3140, I would have voted "yea."

A TRIBUTE TO MRS. EVERLEE SMAW MILLS

HON. FRANK W. BALLANCE, JR.

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. BALLANCE. Mr. Speaker, I rise to honor Mrs. Everlee Smaw Mills, one of my most senior constituents on the occasion of her 90th birthday. Mrs. Mills has lived through and experienced every noteworthy event in our nation's history that has punctuated the 20th Century. At the tender age of 16, instead of engaging in some of the lighthearted, fun activities enjoyed by youth today, Mrs. Mills was experiencing an America devastated by the stock market crash of 1929 and the onslaught of the Great Depression. At a time when she should have been enjoying life and planning for what little prosperity a segregated nation could offer an under-education Black woman, Mrs. Mills as a youth was facing bread lines and food rations.

Mr. Speaker, Mrs. Mills is a remarkable woman, not just because of her long tenure but also because of her resolve to do well in all circumstances. For instance, she lived through the death of both parents at an early age, World War I, death of her spouse, World War II, the Korean War, Vietnam War, Gulf War, death of three of her children, and has seen our troops sent to Iraq to battle terrorists.

Mr. Speaker, Mrs. Mills gave birth to 11 children and fed and nurtured many others, including grandchildren and neighborhood youth who wandered home with her children. It is my understanding, Mr. Speaker, that she never turned anyone away who needed a helping hand. Mr. Speaker, this remarkable lady, worked in a domestic capacity until she retired at the age of 75, and over the years she and her husband, (decedent) William Mills never once accepted welfare. As a widow, since the late 1940s, Mrs. Mills taught and stressed the importance of self-sufficiency to her children. They were taught to "pay their own way" in society.

To Mrs. Mill's credit, Mr. Speaker, her children have grown under the shade of her guidance to enter a cadre of notable professions. For instance, her children are employed in the following capacities: US Air Force serviceman, an engineer who has been assigned to work on NASA projects, a representative with the Wall Street Currency Exchange Department, the first Black elected to the Board of Commissioners in Beaufort County, an accomplished welder for the most prestigious truck body builders in the country, Hackney & Sons, and one daughter and son who have become ministers.

Mr. Speaker, Mrs. Mills is a lifelong member of Beebe Memorial CME Church of Washington and was named the Woman of the Year in the 1980s and Woman of Distinction in 2001. She is revered in her church for the solid advice that she imparts to the youth and her peers, and has become a well-respected pioneer in building church programs.

Mr. Speaker, Mrs. Mills is a true marvel. She still lives independently and enjoys "Soap Operas". She reads the Bible religiously. Her family history is traced in Beaufort County as far back as slavery. Her love for the area runs deeper than we understand. It pleases Mrs. Mills greatly to be simply a loving mother, devoted church member and lifelong resident of Beaufort County, North Carolina. I ask my Colleagues to join me in paying tribute to Mrs. Everlee Smaw Mills, an exemplary citizen.

HONORING BERT S. TURNER

HON. DAVID VITTER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. VITTER. Mr. Speaker, I rise today to honor Bert S. Turner, a distinguished alumnus of Louisiana State University. He has been selected by the LSU Alumni Association Hall of Distinction to receive the Alumnus of The Year Award. Every year, this award is bestowed to an individual not only for his or her distinguished accomplishments, but also for commitment and generosity to the university and the LSU Alumni Association.

Mr. Turner began his engineering and military career at LSU in 1939, where he became President of the College of Engineering Student Council, the LSU Post of American Society of Military Engineers, and a member of Tau Beta Pi. Following military duty, he then went to the Harvard Graduate School of Business Administration and graduated in 1949. For eleven years, from 1946 to 1957, Mr. Turner was recognized for his personal and civic accomplishments. Most notably, he was given the Distinguished Service Award for Baton Rouge in 1954, which recognized him as a loyal member of the community. After working in various engineer and management positions, he eventually became President and Chairman of the Board of Nichols Construction Corporation, a position he held for twenty years.

He has also served on the boards of the Baton Rouge Chamber of Commerce, the Louisiana State Museum Board, the Louisiana Labor Management Commission, the Salvation Army, the State of Louisiana Board of Regents for Higher Education, and the YMCA. He was previously inducted into the LSU College of Engineering Hall of Distinction in 1993 and the LSU Alumni Association Hall of Distinction in 1996. Presently, he is the Chairman Emeritus of the Board for Turner Industries, Ltd.

I extend my best wishes to Mr. Turner, the most recent recipient of this prestigious award, and to LSU for its support.

RECOGNIZING THE WORK OF MR. PHILIP WORKMAN, EXECUTIVE DIRECTOR OF THE OHIO PSYCHIATRIC ASSOCIATION

HON. TED STRICKLAND

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. STRICKLAND. Mr. Speaker, I stand today on the floor of the United States House of Representatives to recognize Mr. Philip Workman's contributions to the field of mental health treatment.

For nearly twenty years, Phil Workman has served as the Executive Director of the Ohio Psychiatric Association (OPA), the OPA Education and Research Foundation, and the Ohio Psychiatrists' Political Action Committee. In these positions, he has made an outstanding contribution to advancing education and treatment and reducing stigma and discrimination of mental illness.

Under Mr. Workman's watch, the membership of OPA has doubled to over 1,000 members; this growth in membership is due, in part, to his ability and willingness to reach out to residents and psychiatrists who are just beginning their careers in order to develop young leadership in the organization.

Mr. Workman has been a leader in Ohio and across the country in the fight for mental health parity. He worked in concert with other Ohio groups to establish the 1984 Fair Benefits Coalition. The Fair Benefits Coalition led directly to the creation of the Coalition for Healthy Communities, a coalition of over 25 professional agencies and consumer organizations devoted to providing quality mental health and substance abuse services in Ohio. And, he worked in the American Psychiatric Association to establish several groups and task forces that have been critical to the vitality of the national organization.

Appropriately, Mr. Workman's outstanding leadership, commitment, and dedication was honored in 2002, when he was named a "Mental Health Champion" by the National Alliance of the Mentally Ill of Ohio.

Phil Workman's long service to the Ohio Psychiatric Association and his strong advocacy for those who suffer from mental illness has inspired and served as a model to his

many friends and professional associates. It has been said that "some people strengthen society just by being the kind of people they are." Mr. Speaker, Philip Workman is such a person.

JAMES R. BROWNING UNITED STATES COURTHOUSE

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. PELOSI. Mr. Speaker, I am pleased to announce that today I am introducing legislation to designate the United States Courthouse located at 95 Seventh Street in San Francisco, California as the "James R. Browning United States Courthouse," to honor Judge Browning for his lifetime of outstanding public service.

James R. Browning was born in Great Falls, Montana, and received his law degree from the University of Montana. Prior to his appointment to the bench, he served in the Pacific Theater during World War II, worked in the Antitrust Division of the U.S. Department of Justice, practiced in a law firm, and served as Clerk of the U.S. Supreme Court.

In 1961, President John F. Kennedy appointed James Browning to the United States Court of Appeals for the Ninth Circuit. He dedicated the rest of his career to the Ninth Circuit, becoming the longest serving judge in the history of the circuit. Judge Browning became very active in the Judicial Conference of the United States, serving on a number of committees that worked to strengthen the federal judiciary.

Upon becoming Chief Judge of the Ninth Circuit in 1976, Judge Browning focused on improving the function of the circuit, which was struggling with a large backlog of cases and delays in appeal decisions. Due to his efforts and innovative practices, additional judges were added to the court of appeals, the time required to decide appeals was cut in half, and the backlog was eliminated. He also improved communication among the justices, emphasizing the importance of good colleague rapport. His innovations were studied and adopted by other circuit courts, and he has received several prestigious awards in recognition of his achievements.

Judge Browning's contributions to national jurisprudence are also outstanding. During his forty-two years on the Ninth Circuit, Judge Browning has participated in almost 1000 published appellate decisions and authored many other unsigned per curiam opinions. In a 2001 tribute, a colleague described him as "the consummate appellate judge . . . he treats each case that comes before him with careful attention and produces succinct, clearly reasoned opinions." Colleagues have also lauded him for his seminal contributions to national antitrust jurisprudence and his attentiveness to ensuring that citizens have access to the justice system.

Judge Browning stepped down as Chief Judge in 1988 but did not retire, remaining an active circuit judge and a member of myriad committees and judicial groups. He took senior status in September 2000. His activities have been significantly curtailed due to declining health. It is my hope that we can enact this bill in the 108th Congress, so that Judge Browning can witness this much-deserved tribute to his lifetime of public service.

Judge Browning's achievements would be fittingly acknowledged by naming the historic federal building at Seventh and Mission streets in his honor. As one of his supporters said, "A great and sturdy courthouse needs the name of a great and sturdy judge." I invite my colleagues to cosponsor the "James R. Browning United States Courthouse" bill.

SOUTH MAUI COASTAL PRESERVATION ACT OF 2003

HON. ED CASE

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. CASE. Mr. Speaker, I rise today to introduce a bill directing the Secretary of the Interior to undertake a study to determine the suitability and feasibility of designating and acquiring lands located along the southern coast of the island of Maui as a National Seashore, National Recreation Area, National Monument, National Preserve, or other unit of the National Park Service.

The study area covered by the proposed South Maui Coastal Preservation Act of 2003 includes lands from and including the 'Ahihi-Kinau Natural Area Reserve to Kanaloa Point, a distance of approximately six miles.

The area is rich in archaeological, cultural, historical, and natural resources. Important sites in the proposed park area contain remnants of dwellings, heiau (places of worship), fishing shrines, platforms, enclosures, shelters, walls, graves, and canoe hale (houses) that date back as early as 1100 A.D. This portion of the southern coast is also the home of unique native plants and animals, some of which are endangered.

The County of Maui passed Resolution 00–136 on October 6, 2000, expressing its support for having this area designated as a National Park. The Hawaii State House and Senate also passed bills in support of having the area managed by the National Park Service. Both these resolutions were in support of my predecessor, Congresswoman Patsy T. Mink's bill, H.R. 591, introduced in the 107th Congress, to study the feasibility of designating the more limited area from Keone'o'io to Kanaloa Point as a National Park.

An initial reconnaissance survey by the NPS indicated that the resources deserved protection but stated that the more limited area was not appropriate for a National Park because most of the land was owned by the state. However, I believe the expressions of support for NPS control of the area by the County and State offer a firm basis for moving forward. Therefore, I have included a provision in my bill to ensure that the proposed study includes consultation with the State of Hawaii to assess the feasibility of transferring some or all of the State lands in the study area to the federal government.

The State of Hawaii has been unable to effectively manage and protect these important resources due to lack of funds. Operators of four-wheel drive vehicles are unknowingly destroying valuable resources at this site due to lack of supervision, signage, and cultural interpretation materials. Further, this pristine coastline lies directly in the path of development and, absent action, too soon will be lost forever.

This is a site of national significance, which deserves the level of protection only the National Park Service can provide. I urge my colleagues to support this bill.

PERSONAL EXPLANATION

HON. FRANK W. BALLANCE, JR.

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. BALLANCE. Mr. Speaker, I was unavoidable detained on official business and was not present for rollcall votes Nos. 634 through 637. Had I been present, on rollcall vote No. 634, I would have voted "yes", on rollcall vote No. 635, I would have voted "yes", on rollcall vote No. 636, I would have voted "yes", and on rollcall vote No. 637, I would have voted "Yes."

RECOGNIZING GENE ARGO OF HAYS, PRESIDENT OF MIDWEST ENERGY

HON. JERRY MORAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. MORAN of Kansas. Mr. Speaker, I rise today in recognition of a Kansan, Mr. Gene Argo, for his commitment to excellence and his devotion to service. This year, Mr. Argo will retire as president of Midwest Energy, based in my hometown of Hays, Kansas.

A true man of the west, Gene Argo drew many of his life lessons from his youth in Texas, including a profound love of nature and a respect for his fellow man. An avid bareback rider, Gene has learned that, through hardship and in the face of failure, you must always get back on your horse.

For the past decade, Mr. Argo has tirelessly devoted himself to the Midwest Energy Corporation. As president and general manager, he has guided the success of the company since 1992. Through his efforts, Midwest Energy has grown to serve 40 counties in western Kansas. As president, Gene Argo is respected by his employees not only because of his work ethic, but because he respects his employees in turn.

Mr. Argo's passion for progress has also made a profound difference in his community. In Hays, Gene Argo served on various civic and industry organizations, including the board of directors of the Hays Medical Center and the Hays Medical Center Foundation. The community of Hays has also benefited under Mr. Argo's leadership as chairman of the Ellis County Economic Development Coalition and the Ellis County United Way. The growth of Ellis County is a testament to his vision and direction.

Gene Argo has also invested a great deal in the future of the State of Kansas. He supports Kansas youth as a member of the Kansas 4–H Foundation and also serves on the board of the Kansas Wildscape Foundation. An ardent hunter and sportsman, Gene is dedicated to preserving Kansas' natural beauty. As a small token of Kansas' appreciation, Mr. Argo was selected as the Leadership Kansas Alumnus of the Year in 2002.

In light of his many efforts and achievements, his family comes first. Gene and his wife Linda raised three children and are proud grandparents of three grandchildren.

Respected for his motivation and leadership, his employees will miss his starched shirts and smiles upon his retirement. I join his friends and family in extending to him my best wishes in all of his future endeavors.

TRIBUTE TO MATTIE MARIE FRANKLIN MARSHALL

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I pay tribute today to one of Texas' truly outstanding citizens, Mattie Marie Franklin Marshall. As we recognize her 70 years of service to our State's education and her multitude of contributions to our community, I would like to take a moment to reflect on the remarkable achievements of this great woman.

Mattie Marie Franklin Marshall has devoted her entire life to the great State of Texas. Her life has been spent serving her fellow man—teaching, counseling, leading, advising, guiding, and nurturing.

She was born in Washington, Texas. Her father passed away when she was only two, but her mother watched her work her way upward despite many difficult obstacles.

Mattie continued the legacy of her sisters Ellie O. Laster, Anna M. Taylor, and Susie L. Jingles by becoming an educator. She began her adult life by working hard and knew success meant accepting life's challenges. She remained an educator for 35 years until she retired from the school system in 1977.

Following her retirement, Mattie broadened her public service from the school system to the greater community.

She was actively involved in the Girl Scouts of America, Young Women's Christian Association, the Friendly Neighborhood Club, Philodendron Garden Club, the Chanelle Club, and a Life Member of the Erma D. Leroy Club.

One of the highlights of her life was the organization of Fifth Ward Baptist Church. She was a founding member of the committee that organized the church and served as its first recording secretary. She has served her church with dedication for the last 59 years. In honor of her tireless efforts on behalf of the Fifth Ward Baptist Church, its library was renamed the Mattie M.F. Marshall Library in June 2003.

Just as significant as all of Mattie's achievements is the spirit of community service she represents. Her willingness to help individual community members of our society as a whole is what makes her especially deserving of our recognition and praise.

The spirit of service she actively portrays is something we see far too little of in this society. And we all would do well to follow the shining example that Mattie Marshall has given us.

I know that Mattie will continue to play an important role in our community for years to come, and that America will continue to benefit from her dedication and service.

Mr. Speaker, I urge you and my colleagues in the U.S. House of Representatives to join me in saluting Mattie M.F. Marshall and in applauding this remarkable citizen for all she has done, and for all she has meant to those of us whose lives she has touched.

AMERICAN DIABETES MONTH

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. BACA. Mr. Speaker, I rise in support of American Diabetes Month.

In order to combat this deadly disease, we must focus on prevention, education and diet. Diabetes is the fifth-deadliest disease in the nation.

In California, there are about 2 million people with this disease. In my home county of San Bernardino over 100,000 have been diagnosed.

While this disease affects people of all walks-of-life, Hispanics are particularly vulnerable. Hispanics are almost two times as likely to develop Diabetes as non-Hispanic Whites. Twenty-four percent of Mexican-Americans in the United States currently have diabetes. Almost two million Hispanics struggle with the disease.

I don't have diabetes but my parents, my brother and my brother-in-law did. My father died of diabetes along with my brother. They didn't take care of it. We had a large family and could not afford health care.

Growing up, we ate what we could afford and too much of our diet contained foods like tortillas and frijoles that cause health problems and can eventually lead to diabetes. There was no health education or awareness. They didn't know how to take care of their diabetes. When they were diagnosed with diabetes they ignored it and it cost them their lives.

Fortunately, this disease can often be prevented.

We must educate our children and communities about the dangers of this disease. That is why American Diabetes Month is so important. We need to teach children prevention. The lifestyles they adopt today will carry over into their adult years. We are placing children at risk when we allow them to come home day after day, play videogames, sit in front of the TV and snack on soda and chips. Children eat what their parents eat and can afford. Eating a diet of high sugary foods—like tortillas, rice, and chips—at every meal is teaching our children unhealthy habits.

To help educate our children and our communities I participated in an educational video with Edward James Olmos and Liz Torres. This video, which comes in English and Spanish, helps educate Hispanics and all Americans about the disease. Additionally, with the help of Congressman PUTNAM and CARDOZA, we recently introduced legislation that would allow schools across the country to serve fresh fruits and vegetables in school lunch programs. This will help children afford to eat healthy and stay healthy.

I have been active in leading the charge to restore food stamp benefits to hard working immigrants, so that their children may have access to the healthier foods that help prevent diabetes.

But it is not enough to just educate people. We also must make sure that preventative screening and medical services are affordable and available to all Americans.

One of the biggest problems in early prevention is financial. People do not have the resources to seek medical help so the problems escalate. In California, the cost of diabetes per person per year is approximately $13,243. If they have additional problems, like dialysis, syringes, medications, or other items, the cost goes up an additional $8,500. Now the cost is over $22,000.

The healthcare costs of a person with diabetes are about 2½ times higher than the average person's healthcare costs. How can an uninsured person in this country afford $22,000 when some don't even make that much in a year?

To help those that can't afford to take care of their diabetes, I have co-sponsored the Diabetes Prevention, Access and Care Act and the Access to Diabetes Screening Services Act. These bills will increase access to diabetes screening, treatment and prevention in minority communities and all communities that are affected by Diabetes.

In the spirit of American Diabetes Month, we must not only look to legislation to help those that suffer from diabetes but we must educate our communities. We must take a personal interest. We must become involved on a personal level.

American Diabetes Month is a great opportunity to educate all Americans on how to help prevent diabetes.

CONFERENCE REPORT ON H.R. 6, ENERGY POLICY ACT OF 2003

SPEECH OF

HON. JERRY F. COSTELLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. COSTELLO. Mr. Speaker, I rise today in support of H.R. 6, the Energy Policy Act of 2003 Conference Report. Completion of this energy bill is yet another step forward in our struggle for energy security and independence. A reliable and affordable energy supply is crucial to America's economic vitality, security, and quality of life.

While this final conference report is not perfect, we continue to make progress towards promoting energy conservation and efficiency; increasing the use of all domestic energy resources, including coal; improving energy infrastructure; and promoting the development of advanced energy technologies.

The combustion of fossil fuels is essential to our energy policy and must continue to be a part of a balanced energy plan for this country. Coal is absolutely critical to our nation's economic health and global competitiveness. Coal accounts for more than 50 percent of U.S. electricity generation, far ahead of nuclear power, natural gas, hydroelectric power, petroleum and other sources. There is no present alternative to coal to meet our energy needs. New and improved technologies hold the promise of far greater emissions reductions and increased efficiency.

Clean coal provisions are included in the final conference report that would assist in burning coal more efficiently and cleanly. These clean coal technology initiatives encourage development of new technologies for cleaner, higher efficiency coal combustion in new and established plants with the hope of achieving a healthier environment while maintaining jobs. America's substantial investment in clean coal technology creates 62,000 jobs and ensures Americans new electricity that is abundant, reliable, affordable and cleaner than ever before.

The bill includes a $1.8 billion authorization for the Secretary of Energy to carry out the Clean Coal Power Initiative, which will provide funding to those projects that can demonstrate advanced coal-based power generating technologies that achieve significant reductions in emissions. Further, the bill authorizes $1.422 billion for coal research and development. I fought hard for increases to coal within the fossil energy research and development budget and I was glad to see they were included in the final version.

Finally, the legislation includes a provision, which I authored, called the Clean Coal Centers of Excellence. Under this provision, the Secretary of Energy will award competitive, merit-based grants to universities that show the greatest potential for advancing new clean coal technologies. Southern Illinois University Carbondale (SIUC), which I represent, continues to be a leader in clean coal technology research, doing extensive work at its Coal Research Center. With funding and collaborative support from industry and government, SIUC has conducted long-term projects relating to surface mine reclamation, mine subsidence, coal desulfurization, coal characterization and combustion, coal residue management and utilization, coal market modeling, and environmental policy. Faculty, staff, and students in fields as diverse as engineering, science, business, education, law, and agriculture have contributed to the University's international reputation in coal research. It is well-positioned to be a potential recipient of the Clean Coal Centers of Excellence.

In addition to the clean coal provision, the bill contains provisions instrumental in helping increase conservation and lowing consumption. Included in this are ethanol provisions that are used as a replacement and additive for gasoline consumption. Under this legislation, ethanol use would increase, nearly tripling the current requirement. This is expected to increase the average price of corn paid to farmers 6.6 percent, or 16 cents per bushel and increase average net cash income to farmers by $3.3 billion over the next decade, or more than six percent.

This increased use of ethanol will save 1.3 billion barrels of oil by 2016, improve the trade deficit by $28.5 billion over 15 years, add $135 billion to the American economy by 2016 through increased agricultural demand and new capital spending, and generate $32 billion in income for American consumers over 15 years.

Mr. Speaker, this energy bill will shape energy policy for the next decade and beyond. I am glad coal and ethanol remain an integral part of our energy future and I urge my colleagues to support this legislation.

CONFERENCE REPORT ON H.R. 6, ENERGY POLICY ACT OF 2003

SPEECH OF

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. YOUNG of Alaska. Mr. Speaker, electron scrubbing is the only air control process that allows older power plants to meet the Clean Air Act Amendments of 1990 (CAAA) and the New Source Performance Standards (NSPS) while burning the least cost, highest energy fuel—high sulfur coal. The electron scrubbing process removes almost all the pollutants emitted from power plants burning high sulfur coal. In a single step, the electrons convert the pollutants into a high grade, agriculture byproduct.

The Department of Energy's (DOE) Chicago Operations Office (COO) has been briefed on the electron scrubbing project at Eagle Valley and has agreed to manage the program. However, DOE must first transfer $5 million in earmarked funds to the COO so the Director can immediately implement the program.

A letter of intent, dated April 16, 2002, from Greg Daeger, program manager for the electron scrubbing project at Eagle Valley, attests to the commitment and due diligence of Eagle Valley to implement the project pursuant to Congress' direction and intent.

Electron scrubbing uses high-energy accelerators for air pollution cleanup. DOE's COO has the technical management capability in accelerator-related programs and air pollution programs used in other DOE applications. This location is an ideal venue for the effective and successful oversight of the electron scrubbing program. The transfer of funds would allow COO to continue and expand its management of high technology air pollution programs in the area of high-energy electrons.

The energy bill directs DOE to "use $5,000,000 from amounts appropriated to initiate, through the Chicago Operations Office, a project to demonstrate the viability of high-energy electron scrubbing technology on a commercial-scale electrical generation using high sulfur coal." Because it has both the authority and capability to oversee this demonstration project, $5 million must immediately be transferred from DOE to COO.

RESOLUTIONS IN SUPPORT OF H.R. 2656

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. WOOLSEY. Mr. Speaker, today I am submitting for the RECORD resolutions in support of H.R. 2656 from cities in the California Bay Area. The resolutions are regarding the planned casino in my congressional district. The communities surrounding the proposed site are doing all they can to ensure that their voices are heard on this controversial issue and it is extremely important that all sides of the issue are given a platform to do so. I hope that H.R. 2656 is brought before the House for a vote in the near future.

RESOLUTION NO. 2003–220 N.C.S.

Whereas, the Petaluma City Council respects the rights of Native Americans to establish and have recognized tribal sovereignty, and to secure lands under their jurisdiction; and,

Whereas, under the existing federal legislative requirements, there is no provision for coordination of gaming proposals or associated major tribal enterprises with established and approved off-reservation local or regional planning law and General Plans in any timely and meaningful way; and,

Whereas, developments of great magnitude are being proposed which are dependent upon local and regional public infrastructure, including highways, streets, transit systems, water, wastewater and energy systems and resources, affordable housing, and emergency services, both built and yet to be built; and,

Whereas, without appropriate mitigation, the developments proposed are very likely to have substantial negative impacts and place substantial burdens on the public infrastructure with a substantial burden falling upon existing and future taxpayers, residents, visitors and businesses; and,

Whereas, with the rapid construction of tribal gaming facilities, local governments are experiencing serious, adverse impacts related to off-reservation economic, environmental, health and safety issues; and,

Whereas, the current conditions placed on Indian gaming to achieve and preserve the environmental, public safety, and public health objectives of both state and local government have been insufficient to prevent such adverse impacts; and,

Whereas, when California voters approved Proposition 1A (Indian Gaming) in March of 2004 as a means of supporting the laudable goal of Indian economic development and self-sufficiency, they were not aware that such approval would allow Nevada developers to seize prized off-reservation environmental resources for intense development without regard to locally approved general plans or any meaningful environmental review or protection; and,

Whereas, under the provisions of Proposition 1A and the Tribal-State Compact, local communities have not been granted effective input into the development of proposed tribal casinos that threaten their rights and the State appears to have no effective redress for significant environmental impacts these gambling casinos impose on local communities; and,

Whereas, on February 6, 2003, the California State Association of Counties has

adopted a policy document that includes seven principles of critical concern to counties, including a principle that tribes and local governments enter into binding and enforceable local agreements for the mitigation of off-reservation impacts that arise from a local gaming project; and,

Whereas, approximately 360 acres of prime agricultural lands west of Rohnert Park are presently in imminent danger of being withdrawn from County land use control and placed into trust for the purposes of casino development—including an extensive gaming complex, with a 300 room hotel, spas, restaurants, a 2000 seat entertainment venue, parking and other support services, by Station Casinos, a Las Vegas-based developer and the Federated Indians of the Graton Rancheria (Graton Tribe); and,

Whereas, Station Casino and the Graton Tribe's gaming proposal will have substantial negative impacts upon the federal highway system (US Highway 101), upon which it is dependent for bringing its customers into and out of the region; on local and regional roads; to the Santa Rosa Plain groundwater aquifer, to water quality, along with unknown local and regional fiscal impacts; and,

Whereas, the proposed Graton Tribe casino site is proposed on property whose zoning is inconsistent with the Sonoma County General Plan (on prime agricultural land, in the community separators and outside Rohnert Park's Urban Growth Boundary), within the Laguna de Santa Rosa's flood plain and within critical wetland habitat for several federally endangered species; and,

Whereas, the proposed Graton Tribe casino proposal is not subject to a thorough CEQA-like process that identifies fiscal and environmental impacts then to be mitigated by the Graton Tribe, nor is administrative consideration by the Department of the Interior required to determine if the use of this land, sought for gaming, will have significant detrimental impacts on the neighboring communities which outweigh the benefits to the tribe; and,

Whereas, the Graton Tribe was restored in 2000 based, in part, on its promise not to engage its Indian casino gaming: Now, therefore, be it

Resolved, That the Petaluma City Council strongly supports the revisions in federal legislation [HR 2656/S1342] introduced by Representative Woolsey and Senator Feinstein. The Petaluma City Council also urges all members of the Senate and House of Representatives to support these important statutory changes and immediately move for their passage; and be it further

Resolved, That the Petaluma City Council supports the California State Association of Counties policy document regarding compact negotiations for Indian Gaming; and requests that the Graton Tribe follow the principles contained therein; and be it further

Resolved, That the Petaluma City Council, based on the information currently available, strongly opposes the creation of a gambling casino resort on any site that is inconsistent with the local land use planning and zoning policies; and be it further

Resolved, That the Petaluma City Council calls on the Board of Supervisors of the County of Sonoma, in all negotiations with the Tribe concerning creation of a gambling casino resort, to safeguard the vital and legitimate interests of all Sonoma County citizens by requiring that the following minimum standards be included in a binding, legally-enforceable Memorandum of Understanding with the Tribe:

1. The proposed casino/resort project must be subject, at a minimum, to the same level of environmental review as would be required by the pending Federal legislation; and

2. The proposed casino/resort project must be subject to the principles of the California State Association of Counties policy document regarding compact negotiations for Indian Gaming; and

3. Even though the pending federal legislation does not require environmental mitigation, in order to ensure that the citizens of Sonoma County do not bear the costs associated with the impacts of the casino/resort, the Tribe must agree to mitigate, and must in fact mitigate, all environmental impacts caused by its project; and

4. In order to prevent Sonoma County cities from having land within their jurisdiction exempted from local land use control by reason of future acquisition by the Graton Tribe, the Tribe must agree that it will take NO OTHER LAND anywhere in Sonoma County or in any adjacent county into tribal trust NOW OR IN THE FUTURE.

5. The proposed casino/resort project must be subject, at a minimum, to the same level of public safety review and enforcement as would a private developer.

HELP PARENTS GET REAL JOBS, REAL WAGES, AND REAL SUCCESS

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. SCHAKOWSKY. Mr. Speaker, today I am introducing a bill, the Business Links Act of 2003, that would provide needed resources to parents facing serious barriers to employment. The bill would provide grants for transitional jobs programs in order to support State efforts to help TANF recipients find work. Transitional jobs can provide the right combination of support, work, and vocational training and have the potential to turn many job seekers into permanent wage earners.

I would like to thank my colleagues who have joined me as original cosponsors on this bill. I would also like to commend Senator JEFF BINGAMAN who has already introduced companion legislation, S. 786, in the Senate.

This legislation would replace the TANF bonus grants currently provided to States and instead provide $200 million for each of fiscal years 2005 through 2009 for grants to be awarded to nonprofit organizations, local workforce investment boards, States, localities, and Indian tribes. The grant funds could be used either to promote business links by improving employee wages and job skills in partnership with employers or to provide fully subsidized wage-paying jobs to individuals who have been unemployed because of limited skills or other barriers. The legislation also includes worker protection provisions that, among other things, prohibit transitional job participants from displacing or replacing existing workers or positions and provide participants the same worker protections that all other workers receive. Parents who are currently receiving or have recently received Temporary Assistance for Needy Families (TANF), parents who are at risk of needing TANF, individuals with disabilities, and unemployed, noncustodial parents who are having difficulty meeting their child support obligations would be eligible to participate in transitional jobs programs.

Transitional jobs programs would provide intensive case management and access to needed support services such as vocational skills training, basic education, job placement services, and child care to all participants. Transitional jobs programs, which are aimed at helping those who have limited English proficiency and other barriers to employment, can be particularly effective for the hardest to serve welfare recipients. Program participants must work 30 to 40 hours a week, unless they have a child under the age of six, and participation is time limited to between six and 24 months. The goal of transitional jobs programs is to prepare and help participants find unsubsidized, permanent jobs. Because of the individual attention given to each transitional job holder, various programs across the country have proven very successful in achieving that goal. From January 2000 to July 2001, a Chicago program known as Transitional Community Service Jobs placed over 75 percent of its participants in unsubsidized jobs, more than one-third of which paid over $8.00 an hour.

Many cities and communities across the country have implemented transitional jobs programs because they understand the importance of helping those facing serious barriers to employment, and they recognize the long-term benefits of investing in a future workforce that is well-trained and able to contribute to the economy. However, because the Welfare-to-Work funds that help support transitional jobs programs are nearly exhausted and because of tight State budgets, many of those successful programs are at risk. This bill would provide a more stable funding source to allow many of these programs to survive, enable the development of new programs, and require a rigorous evaluation of funded programs.

I am proud that this bill would help those who are having a difficult time supporting their children by providing them with resources and skills that will help them immediately, as well as sustain them in the future. I urge my colleagues to join me in cosponsoring the Business Links Act of 2003.

EXPRESSING SENSE OF HOUSE REGARDING COURAGEOUS LEADERSHIP OF UNIFIED BUDDHIST CHURCH OF VIETNAM

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am here today as a staunch supporter of freedom of religion. While we have made progress in our own country, there are other areas in the world which still persecute unjustly. Buddhism has a 2,000-year tradition in Vietnam and the Unified Buddhist Church of Vietnam (UBCV) is an heir to this tradition. In 1981, the Government of Vietnam declared the UBCV, one of the largest religious denominations in the country, illegal, confiscated its temples, and persecuted its clergy for refusing

to join the state-sponsored Buddhist organizations.

The Government of Vietnam has often imprisoned UBCV clergy and subjected them to other forms of persecution; the Patriarch of the UBCV, the 85-year-old Most Venerable Thich Huyen Quang, has been detained and restrained for more than 2 decades in isolated areas of Vietnam. The Vietnamese Government has held the Most Venerable Thich Quang Do, the Executive President of the UBCV and his deputy, the Venerable Thich Tue Sy, in various forms of detention since 1977. In 1978, he was tortured to death in a reeducation camp.

Many other leading UBCV figures have been detained and harassed. Evading tight surveillance, others have fled to Cambodia to escape religious repression and harassment.

Vietnam has acceded to international treaties that prohibit the forced repatriation of UNHCR-recognized refugees and that protect the right to faith, belief, and practice.

Vietnam's constitution protects the right of religious belief, yet on October 8, 2003, Vietnamese authorities initiated a tense standoff following the meeting, where police stopped a vehicle carrying the UBCV's new leadership and subsequently detained the eleven passengers. According to reports by the United States State Department, the United States Commission on International Religious Freedom, and the European Union, the Socialist Republic of Vietnam systematically limits the right of religious organizations to choose their own clergy.

During the 107th Congress, I along with my colleagues in the House of Representatives, passed H.R. 2833, the Vietnam Human Rights Act, on September 6, 2001, which noted the persecutions faced by various members of the UBCV over the past 25 years. Because of systematic, egregious, and ongoing abuses of religious freedom, the United States Commission on International Religious Freedom recommended that the President of the United States designate Vietnam as a ''country of particular concern'' under the provisions of the International Religious Freedom Act of 1998.

Today, I am pleased to join the House of Representatives in congratulating the new leadership of the Unified Buddhist Church of Vietnam and urging the Government of Vietnam to respect the right of all independent religious organizations to meet, worship, operate, and practice their faith in accordance with Vietnam's own constitution and international covenants to which Vietnam is a signatory.

We are joined by our allies in being committed to promoting religious freedom in Vietnam, and, in furtherance of this goal, and urge the implementation of the recommendations of the United States Commission on International Religious Freedom.

We ask that the United States Embassy in Vietnam to closely monitor cases of abuse of religious belief and practice, routinely visit detained clergy members, especially those in need of medical care, and report to the Congress on specific measures taken to protect and promote religious freedom in Vietnam.

HONORING SEEDS OF PEACE FOR ITS PROMOTION OF UNDERSTANDING AMONG YOUTH FROM REGIONS OF CONFLICT

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am pleased to be here today to honor such a valuable program. Seeds of Peace was founded by John Wallach in 1993. It is a program designed to bring together young people from regions of conflict to study and learn about coexistence and conflict resolution.

The original focus of Seeds of Peace was to bring Israeli, Palestinian, Jordanian, and Egyptian youth together, the program has since expanded to involve youths from other regions of conflict, including Greece, Turkey, Cyprus, the Balkans, India, Pakistan, and Afghanistan.

Seeds of Peace provides young people with the opportunity to study, learn and interact at a summer camp in Otisfield, Maine, and also through regional programs at the Jerusalem Center for Coexistence. Seeds of Peace works to dispel fear, mistrust, and prejudice, which are root causes of violence and conflict, and to build a new generation of leaders who are committed to achieving peace.

Seeds of Peace has been successful at revealing the human face of those whom youth have been taught to hate, by engaging campers in both guided coexistence sessions and ordinary summer camp activities such as living together in cabins, sharing meals, canoeing, swimming, playing sports, and creative exploration through arts and computers.

The Arab-Israeli conflict is currently at a critical juncture, and sustained progress towards peace depends on the emergence of a new generation of leaders who will choose dialogue, friendship, and openness over violence and hatred.

In addition to Seeds of Peace, I am a cosponsor of Global Family Day, a House Resolution that seeks to raise awareness of children by having a one day holiday every year dedicated to family, community and sharing global traditions.

Similar to Global Family Day, Seeds of Peace provides year-round opportunities for former participants to build on the relationships they have forged at camp, so that the learning processes begun at camp can continue back in the participants' home countries, where they are most needed.

Programs such as these bring us closer to our foreign policy goals of raising our future leaders to think about global issues, and see the neighbors as other children like them, rather than enemies.

Both Global Family Day and Seeds of Peace are strongly supported by participating governments and many world leaders. It is especially important to reaffirm that youth must be involved in long-term, visionary solutions to conflicts perpetuated by cycles of violence. I am glad we have the opportunity to honor Seeds of Peace, for the work it has accomplished thus far, and for the impact it will have for generations.

COMMENDING AFGHAN WOMEN FOR THEIR PARTICIPATION IN AFGHAN GOVERNMENT AND CIVIL SOCIETY

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am pleased to be here today to support H. Res. 393, commending Afghan women for their participation in Afghan government and civil society, encouraging the inclusion of Afghan women in the political and economic life of Afghanistan, and advocating the protection of the human rights of all Afghan women in their Constitution.

As we are all aware, the women of Afghanistan suffered horrible tragedies under the Taliban regime. The Afghan people have since rejected the Taliban and are in the process of building a free and democratic republic and repairing the damage. These efforts have improved the daily lives of all Afghan citizens, particularly Afghan women, children, and refugees.

More Afghan girls are attending school than ever before in the history of Afghanistan. Millions more adult women are either returning to school to make up for being forbidden to attend school during the Taliban regime, or taking vocational training classes to prepare for the job market. Now, women in Afghanistan are able to work outside the home and hold positions in all levels of government and in private sector organizations, something unheard of during the Taliban regime.

In order for women to fully participate in Afghan society, they must have the right to vote, the right to run for office, equality of opportunity, and access to health care, education, and employment. This is why I am joined by my colleagues today to advocate that women's human rights should be guaranteed in the Afghanistan Constitution.

I have traveled to Afghanistan and seen the plight of these women. I have heard their stories of hardships and their wishes for a better life for them and their children. I support this resolution because I know how timely and vital it is for the future of Afghani women to have these rights. The United States is actively involved in encouraging the full inclusion and participation of Afghan women in the political and economic life of their country, and must continue to do so throughout the reconstruction process. We must continue to urge the participation of women in the continued efforts toward a lasting peace in Afghanistan.

RECOGNIZING THE 5TH ANNIVERSARY OF THE SIGNING OF THE INTERNATIONAL RELIGIOUS FREEDOM ACT OF 1998

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H. Res. 423

which properly recognizes the 5th anniversary of the signing of the International Religious Freedom Act of 1998. The International Religious Freedom Act is an essential demonstration of our commitment to observing religious freedom for all human beings throughout the world.

Mr. Speaker, this Nation was built by those who escaped persecution in their own homelands. Today we continue to see people throughout the world who still can not freely practice their faith. The International Religious Freedom Act created the Office of International Religious Freedom in the Department of State and the United States Commission on International Religious Freedom. This has resulted in a greater awareness of religious persecution both in the United States and abroad. It is vital in order to protect the principles of freedom that this nation was founded on, that we protect the ability of each person in the United States to freely observe their religious practices. This also means that we as a Nation must push other countries throughout the world to meet this same ideal standard on religious freedom.

Mr. Speaker, it is truly tragic that so many people throughout the world have been murdered, raped, tortured, and brutalized simply because of the faith they belong to. This type of religious hatred must be countered strongly by this body. We can not insist on having full religious freedom for our own citizens and then turn a blind eye to the plight of oppressed people throughout the world. The International Religious Freedom Act was a step in the positive direction of eliminating this global scourge. Religious freedom is a fundamental human right as affirmed by numerous international declarations and covenants, as well as by the United Nations General Assembly. I stand proud of this body's work to pass the International Religious Freedom Act five years ago and I remain hopeful that we will continue with further efforts to fight religious intolerance.

TORTURE VICTIMS RELIEF REAUTHORIZATION ACT OF 2003

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, the Torture Victims Relief Reauthorization Act of 2003, H.R. 1813, would authorize appropriations for domestic and foreign torture victims treatment centers and for the United Nations Voluntary Fund for Victims of Torture.

In many places around the world, the survivors of torture have to grapple with the lingering effects of their torture alone. In the United States, we have 20 torture treatment centers that provide treatment and care for torture survivors. These centers help the survivors to overcome debilitating psychological and physical problems such as post traumatic stress disorder, depression, anxiety, limbs rendered useless, chronic pain, and excessive guilt. Moreover, torture assaults the victim's core values as a human being, including his humanity and his sense of trust in himself and in the world around him. The treatment centers also assist the victim in restoring these values and in getting on with his life.

Although funding has been increasing, it still remains insufficient to meet the treatment needs of torture survivors. The Torture Victims Relief Reauthorization Act of 2003 would help address these funding issues by authorizing the appropriation of $37 million for the treatment and care of torture survivors both in the United States and overseas. This would include $20 million to fund United States treatment centers, $11 million to fund treatment centers overseas, and $6 million to fund the United Nations Voluntary Fund for Victims of Torture.

With the additional funding, it is estimated that the American centers would have the capacity and ability to serve an additional 2,800 torture survivors per year.

The overseas funding would serve dual purposes. In addition to providing resources needed for treatment, it also would provide resources that the centers need to combat torture in their respective countries, some of which continue to have serious problems with torture.

I urge you to vote for H.R. 1813, the Torture Victims Relief Reauthorization Act of 2003.

HONORING VICTIMS OF CAMBODIAN GENOCIDE THAT TOOK PLACE FROM APRIL 1975 TO JANUARY 1979

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H. Con. Res. 83 which honors the victims of the Cambodian Genocide. Truly, this recognition is overdue for a people who suffered for so long under the brutal dictatorship of Pol Pot. It is unfortunate that the plight of the Cambodian people has not been more recognized in the United States. I want to thank Rep. MILLENDER-MCDONALD for introducing this legislation which affects not only the large Cambodian population in her district, but so many Cambodian people throughout the world who were forced to leave their homeland due to the brutalization they faced.

Mr. Speaker, the fact that between April 1975 and January 1979, up to 3 million Cambodians were deliberately and systematically killed shows the depth of suffering that the Cambodian people had to endure. Not only were scores of people brutally killed but they had to suffer through a vicious system of forced labor. In 1975, Pol Pot led the Communist guerilla group, the Khmer Rouge, in a large-scale insurgency in Cambodia that resulted in the removal of Cambodians from their homes and into labor camps in an attempt to restructure Khmer society. The Khmer Rouge maintained control by mass public tortures and executions. Families were separated. Men, women and young children were sent into labor camps and forced to do strenuous farm work with very little food. Famine and disease were epidemic while health care was non-existent. Literally these Cambodians were put through hell in order to maintain Pol Pot's hold on the nation.

We as a body must try to ensure that events like the Cambodian Genocide never go unnoticed again. Too many lives were lost and many of those who were killed were simply disposed of by the regime, in their effort to ensure that the victims would be forgotten. This resolution demonstrates that the victims of the Cambodian Genocide will not be forgotten by this Congress or by anyone of conscious. Many of those who suffered during the Cambodian Genocide are now residing in the United States. They are a living testament to the fact that brutality can not crush the spirit of even the most oppressed people.

OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 2003

SPEECH OF

HON. SHEILA JACKSON-LEE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today as a supporter of S. 1824 which amends the Foreign Assistance Act of 1961 to reauthorize the Overseas Private Investment Corporation. It is important that we as a Nation continue these efforts to invest abroad. This resolution will continue a successful program of overseas investment that was begun more than four decades ago.

I am also encouraged by the provisions in this resolution that outreach to minority-owned and women-owned businesses. The Overseas Private Investment Corporation will collect data on the involvement of minority-owned and women-owned businesses. Indeed, this outreach is needed as minorities and women continue to lag behind their counterparts when it comes to establishing businesses. This economic disparity often results in social inequality that this body must continue to work against. We have made efforts to support these same businesses in the United States and we must make similar efforts abroad.

I want to thank Chairman HYDE and Ranking Member LANTOS for their work in reauthorizing this important endeavor. In the future, I hope we will continue to come together as a body to support increased overseas investment especially among the disenfranchised.

SENATE—*Saturday, November 22, 2003*

The Senate met at 10 a.m. and was called to order by the President pro tempore [Mr. STEVENS].

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us Pray.

O God our God, in our more honest moments we must admit that because a chaplain prays or because we bow our heads it does not necessarily mean that we seriously desire Your presence. Yet invited or not, You are here.

Lead us to such a knowledge of You that our actions will be supported by belief. If our eyes have been closed to Your blessings, open them. Make us ever aware of Your providential movement in our lives.

We pray today, for the Members of this body, its officers, and its servants. Help them to remember that You govern in the affairs of humanity and that the hearts of the world's leaders are in Your hands. Give them the wisdom to permit You to direct their paths. Send Your power among us and give us Your peace. We Pray in Your strong Name. Amen.

PLEDGE OF ALLEGIANCE

The PRESIDENT pro tempore led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. FRIST. This morning the Senate will begin debate on the Medicare conference report. Senators who wish to make statements on this historic bill are encouraged to come to the floor during today's session. If possible, we will need to be in session tomorrow, Sunday, to continue debating the Medicare bill. It is my hope that we will be able to schedule a vote on the conference report for Monday. I will continue to work with the Democratic leadership to reach an agreement for a final vote. I do not anticipate votes this weekend. However, Senators should prepare for votes early on Monday.

At this point, I announce that no votes should occur any time until afternoon Monday, and we will be in discussion with the Democratic leadership as to the appropriate time for votes over that day.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. DASCHLE. Mr. President, it is my understanding that we already have an agreement where we will alternate in recognition of Senators on either side of the aisle as we debate the Medicare bill. We have several hours of requests already from our colleagues. I will not propound a unanimous consent request, but I might propose that we consider limiting at least comments today on the floor to 15 minutes to accommodate as many Senators as possible.

I know there are a lot of Senators who are going to be attempting to schedule their day around their opportunity to come to the floor. If we have that understanding, if there are four or five in line, it would seem to me it would work. As I say, I will talk to the majority leader about that. I do hope Senators on this side of the aisle will call the cloakroom or call Senator REID or myself to let us know their intentions with regard to speaking so that we can coordinate the effective use of time.

As the majority leader has already announced, we will be in tomorrow as well. So Senators will have an opportunity to speak throughout the weekend in addition, of course, to Monday. We will work with him to accommodate all Senators who wish to speak. We will work on a time certain for a vote at a later date.

I yield the floor.

The PRESIDENT pro tempore. The majority leader.

Mr. FRIST. Mr. President, as our colleagues are well aware, the Democratic leader and I have set aside all day today, and we can stay as late today as necessary. We initially said around 5, but this issue is so important, and there are so many people, as the distinguished leader implied, who do want to come to the floor, and it is the only opportunity for some to come, therefore, we are going to spend all day today on it, as much time tomorrow as necessary, and in all likelihood Monday morning.

I hesitate a little bit trying to limit people to 15 minutes because I do know some people have 30 minutes of comments, but I think that we should stress keeping the comments to as short a period as possible to make their points because we have a lot of people on both sides of the aisle who have called and said we are going to be there all day Saturday; we want to be able to participate.

With this many Senators, it does mean that people need to keep their remarks fairly short. I understand we will be alternating back and forth. We do want to keep the time equally divided so that both sides will have the opportunity over the course of the day to speak. Then if there are a number of people who have waited and are unable to talk today or tonight, if we need to go into later tonight, we can come in a little bit earlier tomorrow or stay longer tomorrow as well.

Again, I appreciate the cooperation of all of our colleagues because it is not customary for us to be in session on Saturday, and certainly not on Sunday, but in order to pay respect to people's schedules over the holidays and to address this very important issue, we have elected to spend all day today and possibly tomorrow.

The PRESIDENT pro tempore. The minority leader.

Mr. DASCHLE. I ask the majority leader if it is his intention to set aside a moment of silence this afternoon in commemoration of the 40th anniversary of the assassination of President Kennedy. It is my understanding that some thought had been given to that time, and I think it would be helpful, if that time has been set aside, if we could make that announcement in the interest of all Senators.

Mr. FRIST. Mr. President, I believe the time will be set aside at 12:30 today. If there is a change in that particular time, we can make that announcement very shortly.

Mr. President, I do have a statement on an unrelated issue, which I can do now or we can proceed.

RESERVATION OF LEADER TIME

The PRESIDING OFFICER. Under the previous order, the leadership time is reserved.

ASBESTOS LITIGATION CRISIS

Mr. FRIST. Mr. President, before entering into the debate on Medicare, I will comment on an issue that the Democratic leader and I have worked on very aggressively over the last several months, and it relates to the current asbestos litigation crisis. The current asbestos litigation system is broken, and it is clear that we in this Congress should fix it. We have an obligation, a real responsibility, to fix it.

I would like to lay out what our plans are to resolve this asbestos litigation crisis early next year. We have made very good progress toward enacting Chairman HATCH's FAIR Act, which is the Fairness in Asbestos Injury Resolution Act. I have made it a personal priority that the Senate participate aggressively in resolving this challenging issue.

Why do we call what is occurring today a crisis? First, the events that are occurring are overwhelming. The torrent of asbestos litigation has wreaked havoc on asbestos victims, on American jobs, and this havoc has extended into our economy.

Over 600,000 claims have been filed and those 600,000 claims have already cost about $54 billion in settlements, judgments, and litigation costs. Yet even after 600,000 claims and $54 billion, the current asbestos tort system has become nothing more than a litigation lottery at this point in time.

Why do I say that? First, a few victims receive adequate compensation but far more suffer long delays for what ends up being unpredictable rewards—also, if one looks at the data, inequitable awards. Some deserving victims do not receive anything at all. It is a system that there is only one real consistent winner, and that is the plaintiffs' trial lawyers.

I say that because of all of these settlements. They are taking as much as half of every dollar that is awarded to the victims.

If you look to the future, it is a problem that only gets worse. It is accelerating in the negative aspect. But if you look to the future, it gets even worse.

Future funds for asbestos victims are threatened because company after company after company is going bankrupt. About 70 companies have gone bankrupt, and about a third of those have gone bankrupt in the last 2½ to 3 years. The pace of bankruptcies of very large companies with thousands and thousands of employees is accelerating.

Again, this is an issue for us to address. That is why I want to set a schedule for that in a few minutes.

Companies such as Johns Mansville, bankrupt; Owens Corning, bankrupt; U.S. Gypsum, bankrupt; and, W.R. Grace, bankrupt: these are large reputable companies that have gone bankrupt because of this crisis with the associated job losses.

Now the hunt is on to get new targets and to go out and sue. People say this is easy money, and the easy way is to go out in terms of bringing a lawsuit and filing a lawsuit. Thus, the hunt is on for new targets to sue. What is unfair and inequitable is that many of these lawsuits have no connection at all to asbestos. If you really look at the connection between asbestos and the victims, it is just not there.

Victims aren't the only ones who suffer but also the workers of these companies that are going bankrupt suffer. Asbestos-related bankruptcies spell doom for these workers' jobs; thus, their families, and, of course, incomes and retirement savings. Already, these lawsuits have cost more than 60,000 Americans their jobs. For those who lose their jobs, the average personal loss in wages over a career is as much as $50,000, and that doesn't include the loss of retirement wages or the loss of health benefits. Workers at asbestos-related bankrupt firms with 401(k) plans lost about 25 percent of the value of their 401(k) accounts because of this.

The economic reality of this crisis is not lost on my colleagues in this body. They understand that under the status quo the national asbestos crisis could cause our economy more than the savings and loan crisis of the 1980s and 1990s, and more than the Enron debacle or the WorldCom debacle. Member after Member from both sides of the aisle has voiced their agreement with the assessment of the Supreme Court that the system is broken and the Congress should fix it.

There is only one question: what can we do? Can we create a system better than the status quo? The answer is yes.

The FAIR Act—the Fairness in Asbestos Injury Resolution Act—has already made significant headway, and we look forward to progress today. Under the leadership of Chairman HATCH, it was passed by the Senate Judiciary Committee last July, and there have been ongoing discussions and negotiations since then.

I commend Chairman HATCH and the ranking minority member, Senator LEAHY, for their hard work on the bill.

I also want to recognize Senator SPECTER for his hard work in conjunction with Judge Becker.

I also want to note that my Democratic colleagues, organized labor, and other stakeholders have been deeply involved throughout the process. Led by Senator HATCH, bipartisan breakthroughs have been made on issues that previously have proved impossible to address, including such issues as—and there are many of them—the linchpin issue of the medical criteria that had proven historically to be so difficult and controversial.

In addition, agreements among stakeholders following the committee markup have resulted in even more modifications. The resulting bill creates a system that, while not perfect, is far superior to the current tort system for resolving asbestos issues.

I became deeply involved in the post-Judiciary Committee negotiating process, working in concert with Senator DASCHLE, as well as Chairman HATCH and Senators LEAHY, SPECTER, DODD, and CARPER, and some others on both sides of the aisle. We have made good progress. I know during the debate over this legislation all of the relevant issues have been unearthed. They have been exposed to public debate, and all parties have had an opportunity to get involved to contribute their points of view.

What emerged under S. 1125 and the current negotiations is a streamlined national trust fund for paying asbestos claimants quickly, paying them fairly, and paying them efficiently. The new system provides more certainty and efficiency for claimants, and more certainty and predictability for businesses.

Passing this bill will create enormous economic benefits. I say that because the certainty that flows from the bill will stimulate capital investment. It will also preserve existing jobs and create new jobs as well.

I had hoped that we would bring this bill to the floor before the end of this session, but we were unable to achieve that goal. Chairman HATCH and Senator LEAHY worked hard to resolve many difficult issues at the committee level. Senator DASCHLE and I, along with our staff, have continued to work with stakeholders to put more issues behind us over the past several months.

While there are several issues that remain outstanding, the core principles of an effective bill are now clear.

What are they?

First, the bill must create a trust fund that is capable of awarding adequate compensation to victims while providing more financial certainty and finality to the business community. The new funding proposal that I put on the table would generate payments that would exceed by $10 billion the expected funds which victims would receive if the current flawed tort system is left intact.

Second, the legislation must establish a schedule of claims values that will ensure victims consistent and equitable awards. We cannot tolerate the current system where payments can depend on where a plaintiff lives or which is capable of awarding only pennies for every dollar promised.

I am also prepared to consider further modest increases in claims values as requested by the Democrats and as requested by organized labor, provided that any new increase is targeted to the most severe disease categories where the relationship to asbestos exposure is most certain.

We must make sure, however, that lung cancer claims not caused by asbestos are not allowed to overwhelm the fund.

Third, the fund must be a nonadversarial program that ensures prompt payment of awards to eligible claimants while minimizing transaction costs, including attorney's fees. Care must be taken to ensure that the fund is established on an expedited basis, and adequate moneys are available to pay exigent claims from the outset.

Fourth, we must preserve the bipartisan medical criteria included in S.

1125 as reported by the Judiciary Committee. Only by ensuring the use of real diagnoses of asbestos-related illnesses can the fund avoid the pitfalls that plague the current mass tort system.

Fifth, and finally, asbestos victims should not bear the risk of inadequate funding or incorrect predictions about future claims, as is the case under the current tort system.

The legislation should make clear that if the fund cannot guarantee that victims will receive all of their claims, a program review is triggered, and if not corrected the fund should end and claims should revert to the tort system. To work, however, such a reversion would have to be to Federal court and should contain certain additional protections to ensure the current litigation morass is not recreated.

Such an approach reduces, if not eliminates, the need to worry about which claims projections are correct.

Clearly, a more thorough discussion of these observations, recommendations, and outstanding issues is warranted.

I ask unanimous consent that a document entitled ''Moving Forward in Asbestos Injury Resolution Act, S. 1125'' be printed in the RECORD at the conclusion of my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit I.)

Mr. FRIST. Mr. President, this allows a more complete discussion of the principles and observations I have made thus far. I do hope people take a look at that document.

As for the future, if we intend to make good on our collective hope to pass legislation, at some point the ongoing discussions and negotiations must cease and a bill must be brought to the floor. Victims are still going uncompensated today, companies are still going bankrupt today, and the economy is still unnecessarily burdened. We must act.

The minority leader as well as Senator LEAHY and other Democratic Members have made clear to me their interest in working toward consensus legislation. It is clear we still need a little more time for discussion. Consequently, we will not force a vote on the FAIR Act this session. Instead, I will give stakeholders more time to negotiate a compromise. There will, however, be a limit to these discussions because we must act. Thus, I will commence floor action on an asbestos bill by the end of March 2004. Again, I will commence floor action on an asbestos bill by the end of March of 2004.

There is no perfect solution to the current asbestos litigation crisis, but it is clear that maintaining the status quo is unacceptable. We have a responsibility to act, and we will act in this body. We must not let this historic opportunity to enact fair and meaningful reform pass in order to pursue a perfect solution that is unachievable. The time has come for the Senate to fashion the right solution to one of the most pressing issues facing us, facing our economy and this Nation today.

EXHIBIT I

MOVING FORWARD ON THE FAIRNESS IN ASBESTOS INJURY RESOLUTION ACT, S. 1125—STATEMENT OF SENATOR FRIST

To bring an end to the current asbestos litigation crisis, Congress must pass legislation creating a national no-fault asbestos trust fund (''Fund'') that ensures adequate compensation to victims, while providing financial certainty to the business community. This kind of program would provide more direct compensation, more quickly to victims than the current system can deliver. Moreover, it would provide that compensation without the bankruptcies or the lost workers' jobs, incomes, and retirement savings that asbestos personal injury litigation produces. It represents, therefore, a tremendous achievement in the creation of a solution to a problem whose future economic consequences are enormous—in the magnitude of more than $100 billion if the claims stay in the tort system.

This past July, under the leadership of Chairman Hatch, the Senate Judiciary Committee approved S. 1125, the Fairness in Asbestos Injury Resolution Act (''FAIR Act''), which establishes the framework for reaching a bipartisan solution. To reach a consensus, we must build upon that structure, making improvements where possible but not jeopardizing the two most fundamental elements of the legislation—adequate, timely, and equitable compensation for claimants and financial predictability for the business community.

I. ENSURING ADEQUATE COMPENSATION FOR VICTIMS

According to the two actuarial studies on the magnitude of the problem, one by Tillinghast-Towers Perrin and the other by Milliman USA, ultimate loss and expenses under asbestos personal injury litigation are projected to reach $200 to $265 billion. With $70 billion already spent, total estimated future costs thus range from $130 to $195 billion. Victims, however, can expect to receive barely half that amount in actual compensation.

According to RAND's analysis of asbestos compensation, transaction costs under the current system—plaintiffs' attorney fees, defense costs, and expenses—consume more than half of the money that goes into the asbestos litigation system. In other words, only about 40 cents on every dollar spent in the asbestos tort system actually reaches victims. Thus, while today's system has a future price tag of $130 to $195 billion, victim compensation is estimated at only $61 to $92 billion of that total.

If adopted, the Act will rein in those runaway transaction costs and provide quick, certain, and fair payment for victims. In fact, my funding proposal, which has been agreed to by the defendant companies and insurers, will actually provide asbestos victims at least $10 billion more than they would receive if the current litigation crisis is left intact.

The primary source of funding under the Act is derived from mandatory contributions: the Act (as reported) required $104 billion in total mandatory contributions from defendants and insurers. In reaching that total, companies and insurers were to be assessed equally and according to specific statutory provisions. Meanwhile, confirmed bankruptcy trust contributions are estimated to provide an additional $4 billion, bringing total mandatory funding under the Act (as reported) to $108 billion.

That funding proposal represented a very fair amount to solve the problem, and provided victims more in direct compensation than they would receive under the current system. The Committee, however, went well beyond this benchmark during markup. S. 1125 (as reported) included significant additional funding provisions. An amendment offered by Senators KOHL and FEINSTEIN authorized the Administrator to compel companies and insurers to pay additional contingent contributions of up to $31 billion, and allowed the Administrator to request back end contributions that could have reached a combined total of $48 billion.

The net effect of these changes to the Act was dramatic. S. 1125 (as reported) could have required businesses and insurers to provide compensation at up to two times the most credible estimates of total future plaintiffs' recoveries under the tort system. As a result, insurers almost uniformly withdrew their support for the Act, calling it ''dangerously unaffordable'' and ''potentially worse than the existing system.''

In order to get the legislation back on track, I initiated a mediation process between insurers and defendant companies. We were able to reach agreement on such major issues as overall funding, allocation of funding obligations, and insurance policy erosion, and gain renewed insurer support for the Act. The agreed-upon revisions not only garnered the support of the business community and insurers for the Act, but would also ensure greater Fund liquidity.

Under my funding proposal, insurers would make nominal mandatory contributions of $46.025 billion on an accelerated payment schedule. Meanwhile, defendants would pay $57.500 billion in total mandatory contributions and, if necessary, defendants would provide $10 billion in additional contingency funding. Most importantly, with confirmed bankruptcy trust assets and interest earned, my proposal would provide at least $10 billion more than the current tort system. It will also preserve one of the great breakthroughs that made widespread business community support for the Act possible—the landmark agreement on a fair and reasonable formula for sharing the funding obligation among defendants. Chairman Hatch is to be commended for shepherding the larger business community to his unprecedented agreement.

In addition, my proposal would better address the Fund's liquidity needs than the Act (as reported). The greatest stress on the Fund is expected to be in the early years when it is required to pay pending as well as current claims. In order to address the resulting liquidity demands, the Act (as reported) allows the Administrator to borrow against the Fund in an amount equal to that of the following calendar year's anticipated contributions. My proposal would give the Administrator authority to obtain billions of dollars of additional funds, if needed, by expanding the Administrator's borrowing authority. All of the Fund's repayment obligations would be fully collateralized by the defendants' and insurers' mandatory contributions, ensuring that federal monies are not put at risk.

Although there are still some funding issues to be worked out, the progress we have made to date is the result of unprecedented cooperation between industry and insurers to find an acceptable solution to the

asbestos litigation crisis. We are confident that we can bridge the few remaining differences in the time frame provided.

II. AWARD VALUES

A further step on the path to providing fair compensation for asbestos victims is the establishment of a schedule of claim values that will result in consistent awards. The history of awards under the current tort system is one plagued by uncertainty and unfairness to asbestos victims. Many plaintiffs receive little or nothing, or die before their cases can be heard in court. Of those who do receive awards, the amount of compensation typically depends more on where and when the claims are filed than on the nature of the plaintiffs's illness. In one 1999 Mississippi case involving 4,000 plaintiffs, allocation of a $160 million settlement was based on how far plaintiffs lived from the courthouse in Mississippi. The Mississippi residents each received $263,000. Similarly situated plaintiffs from Ohio, Pennsylvania, and Indiana received only $14,000 each. (See David Cosey, et al. v. E.D. Bullard, et al).

As introduced, S. 1125 contained claim values that were among the highest of any federal compensation program: For example, the award value for claimants compensated under disease level X (mesothelioma) exceeded by three times the maximum death benefits generally available under the National Childhood Vaccine Injury Act, one of the most generous of comparable existing federal programs. Claimant compensation under the FAIR Act's other most serious disease levels was also very generous compared with existing federal programs. Moreover, although the Act's claim values were based loosely on those awarded in existing bankruptcy trusts, it ultimately paid more in real dollars. The Manville Trust, for example, has a scheduled value of $350,000 for mesothelioma claimants, but is only able to pay 5 cents on the dollar, resulting in an award of $17,500. Under S. 1125 (as introduced) such a claimant would have received $750,000—about 43 times the amount actually paid by the Manville Trust. Nonetheless, many Democrats indicated that the values under the Act should be even more generous to claimants.

During Committee consideration of S. 1125, a bipartisan amendment offered by Senators Graham and Feinstein significantly increased the claim values. This amendment was approved by a 14–3 vote of the Judiciary Committee. The Committee also considered and rejected an amendment offered by Senators Leahy and Kennedy to provide even higher claim values. That amendment misallocated funds too heavily toward those with illnesses less clearly linked to asbestos exposure. In addition, the Committee adopted an amendment to index claim awaard values to inflation, further providing billions of dollars in additional payments. Moreover, all claimants meeting Level I requirements—potentially over a million exposed workers—would be eligible for medical monitoring reimbursement and would have their statute of limitations tolled so that, if they do get sick, they would have recourse to all the benefits of the Fund. Since the Committee's consideration, Democrats and organized labor have suggested that the medical monitoring should include the out-of-pocket cost of the physician's examination. I believe this is reasonable and should be in the final bill.

With the changes reported out of Committee, the scheduled values under the FAIR Act were even more generous than before. Continuing an example previously mentioned, S. 1125 (as reported) set the Level X (mesothelioma) claim value at an amount that was not three times, but four times higher than the death benefits generally available under the National Childhood Vaccine Injury Act—a difference of $750,000. Similarly, in the bill as reported, mesothelioma claimants would have received not 43 times, but 57 times the amount at which the Manville Trust actually compensates similarly situated victims.

Finally, as introduced, S. 1125 granted the Administrator broad authority with respect to the timing of award payments. Organized labor expressed concerns that payments would drag out over a long period of time, and argued that claimants should receive payments over three to four years. The Judiciary Committee addressed this concern by providing that payments should be disbursed over a period of three years, and in no event more than four years from the date of final adjudication of the claim. Organized labor has continued to express concern, however, that there is no standard to guide how much of their awards claimants should receive each year. Again, this concern should be more adequately addressed, if possible. To address organized labor's concerns, negotiators have accepted a presumption for payment of awards over three years in the following percentages: 40 percent in the first year, and 30 percent in each of the next two years. However, if necessary to protect the fund from short-term liquidity problems, the Administrator has the authority to make payments in equal 25 percent installments over four years.

Notwithstanding the Committee's action to substantially increase claim values, my Democratic colleagues and organized labor continue to believe further increases are warranted. Although I believe the values in S. 1125 are more than fair, even generous, in a no-fault system, and will bring more to claimants in the aggregate than the current system, I am prepared to consider further modest increases in claims awards in an effort to forge a bipartisan consensus, provided they are targeted to categories most uniquely caused by asbestos exposure (versus other possible causes). Consistent with the express philosophy of S. 1125, the greatest increases must be targeted to the most severe disease categories in which the causal relationship to asbestos exposure is most certain.

A remaining challenge, and a prerequisite to any additional increase in claim values, is to address the concern that the criteria for eligible claims under Level VII are sufficiently broad that they could potentially sweep in claimants whose lung cancer is not caused by asbestos but by alternative causes, such as smoking. The American Cancer Society estimates that in 2003 alone there will be over 170,000 new lung cancer cases from all possible causes—or 30,000 more than the Fund's highest projected total of eligible claims over 50 years and over 110,000 more than the highest projections made by Dr. Mark Peterson (who testified before the Senate Judiciary Committee during the debate over the FAIR Act) for the same period. Exacerbating that risk is claims experience demonstrating that well over 90 percent of Manville Trust lung cancer claimants are current or former smokers. There is a substantial risk that, in moving to a no-fault system and eliminating the need to establish asbestos as the cause of the disease, compensating a large number of smoking-caused lung cancer claims could jeopardize the solvency of the Fund. If the current exposure criteria do not adequately narrow eligibility to those lung cancer claims where asbestos exposure significantly increases the risk over smoking, the Fund could potentially collapse.

Accordingly, a provision should be added to the legislation to make sure that lung cancer claims not related to asbestos exposure are not allowed to overwhelm the Fund's ability to compensate claimants who have disease caused by asbestos. I will continue to work with my Republican and Democratic colleagues to craft a program review which would authorize the Administrator (in consultation with Congress) to protect the fund if the total number of Level VII claims substantially exceeds projections.

III. ADMINISTRATION AND STARTUP

In addition to ensuring the availability of adequate funds to pay fair and consistent awards to asbestos victims, another critical element of any solution is to create a system that ensures prompt and efficient payment of awards to eligible claimants, while minimizing transaction costs. Again, this is an area in which we have made great headway towards resolution, but there are still some aspects to be worked out.

A number of parties have expressed concerns with the system for filing, evaluating, and reviewing claims established by the FAIR Act. Under S. 1125 as reported from Committee, claims would be filed with, and reviewed by, special masters operating under the guidance of the U.S. Court of Federal Claims. If a claimant were not satisfied with his or her initial award determination, the claimant could appeal to a separate panel of three special asbestos masters. From there, a claimant could appeal an adverse decision to an en banc panel of three judges of the Court of Federal Claims, sitting as the United States Court of Asbestos Claims. Appeals from the Court of Asbestos Claims would be heard by the U.S. Court of Appeals for the Federal Circuit. A separate Administrator would manage the Fund and pay final claims awards. Because the system was court based, there was no provision authorizing the promulgating of substantive regulations, which could help guide special asbestos masters through the establishment of generally applicable policies for claims evaluations and eligibility determinations. Instead, these issues have necessarily been addressed on an ad hoc basis in the context of individual claims determinations.

This court-based system was heavily criticized by Democrats and by organized labor as too complex and adversarial from the perspective of claimants. Labor in particular has insisted instead on an administrative review process, which it believes could resolve more claims in less time using a no-fault, non-adversarial system. With an administrative process, substantive regulations could be utilized to establish generally applicable presumptions and to help guide those evaluating claims to ensure eligibility criteria are fairly and consistently applied. Such a process could also be more ''user friendly'' and would allow claimants themselves, if they so desired, to navigate the process for filing claims without the need to retain counsel. While all parties recognize that legal representation may be beneficial or even necessary at some level of claims review, organized labor has consistently expressed the desire for an administrative system that minimizes the need for attorneys in order to maximize the recovery of a award values by claimants.

I recognize the benefits of such a system. I believe we can find common ground on developing a non-adversarial system that can effectively and quickly deliver benefits to claimants. I urge the parties to continue

working towards a consensus on this issue. Such a system should significantly reduce transaction costs. We should therefore include a provision limiting plaintiffs' attorney fees to ensure that actual awards to victims are maximized. If done correctly, a new administrative process can also address another problem with the bill as reported by the Committee, by ensuring that the program is operating and processing claims in the minimum amount of time following passage of the FAIR Act.

On a related note, S. 1125, as introduced, provided that the new federal trust fund would be the exclusive remedy for all asbestos claims under state and federal law, and that all other remedies were preempted and barred as of the date of enactment. Exclusivity and finality are key elements of the necessary reform. The current tort system has failed victims, and it has done so largely because filing claims on behalf of the unimpaired has become too profitable a business for too many lawyers. Any legislation we pass must end the massive misallocation of limited funds to unimpaired claimants and their lawyers at the expense of those who are ill from asbestos-related disease. We cannot continue to tolerate the expenditure of limited funds into this broken system, a system which spawns inventory-style settlement agreements entered into by attorneys on behalf of claimants who have not even been identified much less bound by the agreement. Nor can we leave insurers and businesses exposed to collusive default judgments or other efforts to evade the Act's exclusivity provisions. Similarly, the bill should plainly foreclose all asbestos-related litigation by claimants against insurers and businesses, including direct actions. In short, given the consensus that the tort system is terribly flawed, we cannot allow the current abuses to persist. Proposals that would have the effect of continuing the status quo—and draining resources that would otherwise be available under the Fund for the truly impaired—are unacceptable.

During the markup, Democrats, organized labor, and the trial bar expressed concerns that asbestos victims could be faced with a period of time during program startup when they would have no remedy for their injuries—all tort suits would be preempted but the Fund would not yet be processing claims. In response to this concern, the Committee adopted an amendment offered by Senator Feinstein, which provided that the preemption and bar on asbestos claims would not be effective until the Administrator determined that the Fund was ''fully operational and processing claims.'' Until that time, all remedies would remain available under state law, and defendants' and insurers' contributions to the Fund would be offset by ''the amount of any claims made payable'' during the startup period.

The Feinstein amendment was intended to address the legitimate concern that asbestos victims could face a potentially lengthy period of time during which they would be without a remedy. Unfortunately, the amendment would leave the current tort system, with all of its inherent problems, intact for too long and would allow some parties to manipulate this interim period for their personal benefit. No one wants to see the expectations of asbestos claimants undermined by the kind of legal chicanery that created the current crisis. If not fixed, the amendment could cause the very problem the bill is attempting to fix—even more bankruptcies and the continued diversion of resources away from legitimate victims.

Moreover, in practice, the Amendment would effectively doom the prospects of the Fund. As was the experience in states that have recently adopted tort reform laws, such as medical malpractice limits, the pending demise of a segment of the tort system inevitably leads to a flood of claims before the courthouse door is effectively closed. Under the Feinstein amendment, awards to plaintiffs, but not defense costs, could be offset against future Fund contributions. As a result, settling claims would be cost free to defendants and insurers, while defending claims in the tort system would continue to be prohibitively expensive. The certain result of this provision would be a very strong incentive, perhaps even a duty for publicly traded companies, to immediately settle all pending claims at potentially elevated values in order to avoid the expense of defending even the most illegitimate claims. Because all these settlement costs would be offset against Fund contributions, the financial effect on funding would be disastrous. Therefore, it is clear that the amendment is not the right solution to a very real problem.

To ensure that victims are not left without a remedy for an unjust period of time, I believe we need an alternative to the Feinstein amendment that will address the concerns raised by (1) authorizing the creation of an administrative program on an expedited basis that will be capable of quickly processing the most serious claims, and (2) enhancing the funding provisions to ensure adequate funds are available from the outset to pay these exigent claims on an expedited basis. The bill as reported by the Committee goes a long way toward ensuring that the Fund receives the mandated contributions within a reasonable time frame. Since that time, there has been a number of innovative suggestions relating to the funding and administrative provisions that would work in concert to address the concerns raised, without the dire consequences of the Feinstein amendment. I am confident we can resolve this issue, so that claimants with the most serious injuries are not left without a remedy, and I intend to continue working in conjunction with my Democratic colleagues toward a solution.

IV. ELIGIBILITY AND MEDICAL CRITERIA

Once the necessary funding is assured, and an administrative process is in place to manage claims fairly and efficiently, the next essential element is to make sure that available resources are directed to the most deserving claimants. In contrast to the existing tort system, in which many if not most asbestos claimants are unimpaired, the FAIR Act will ensure that awards are directed principally to those who have suffered the most from exposure to asbestos. This is assured through the consensus eligibility criteria in the bill, which set forth the applicable exposure, latency, medical, and diagnostic requirements for receiving compensation from the Fund.

The basic premise of the FAIR Act is to ensure that true victims of asbestos disease receive fair and consistent awards. To be eligible for compensation from the Fund, claimants must satisfy the eligibility criteria for various disease categories. The FAIR Act also provides a mechanism for consideration of exceptional cases, where claimants can clearly establish the presence of an asbestos-related disease but may not satisfy the otherwise applicable medical criteria. Exceptional cases, as well as those related to ''take home'' exposures where asbestos was brought into the home by an occupationally exposed person and those related to the high levels of environmental exposures of residents and workers in Libby, Montana, are eligible for review by a Medical Advisory Committee, made up objective, experienced physicians, to determine whether the claimant is eligible for compensation. Because the medical conditions of Libby residents are currently being studied by various agencies, claims filed by Libby claimants are automatically designated as exceptional medical claims and referred to the Medical Advisory Committee.

The consensus criteria reflected in S. 1125 provide a solid foundation to ensure that eligibility decisions are based on sound medical practices and real diagnoses by the claimants' physicians. As a doctor, I cannot emphasize enough the importance of a diagnosis by the claimant's physician. The success of the program hinges on ensuring that the Fund compensates only those with conditions caused by asbestos exposure and not other causes. Only by ensuring the use of real diagnoses of asbestos-related illnesses can the Fund avoid the pitfalls that plague the current mass tort system.

The eligibility criteria reflected in S. 1125, as reported, are the result of an unprecedented agreement among the various stakeholders working to find a solution to the current asbestos litigation crisis. I commend Chairman Hatch and Ranking Member Leahy for an achievement few thought possible. I appreciate how complex and contentious an issue the medical criteria presented. The approval of these criteria by a unanimous vote in the Judiciary Committee markup created the opportunity we have for an historic achievement.

V. PROTECTING VICTIMS FROM RISK

From the very beginning, one of the key goals of S. 1125 has been to ensure that compensation is directed at those legitimately ill from asbestos exposure and is awarded on a timely basis. The bill accomplishes this fundamental change from the status quo by moving from a system that compensates claims of questionable validity to one based on sound medical evidence and real doctors' diagnoses.

Nonetheless, legitimate concerns remain about the accuracy of estimates of the number of future claimants that will be eligible for compensation under the Act. Obviously, prior attempts to forecast asbestos claimants have proven inaccurate, leaving the very people who most deserve compensation with no real recourse. For example, claims to the Manville Trust have exceeded initial projections, and the Trust has been forced to reduce claim values to the point where today the Trust pays claimants as little as five cents on the dollar. Congress cannot and will not recreate the Manville experience.

Various experts have developed estimates about future claims, and the Congressional Budget Office has offered its own predictions based upon its review of the available evidence. The truth, however, is that there is no guarantee that any of these estimates is accurate. The legislation creates new eligibility criteria and establishes a new system for processing claims, one designed to weed out unimpaired claimants and those who suffer from diseases not caused by exposure to asbestos. Since there is no comparable system operating today, what is happening with the existing private asbestos trusts can at best offer only some general indication of what may happen over the 50-year life of the proposed Fund. Obviously, this reality makes it even more important for Congress to make sure that if we establish a national asbestos trust fund, that we also make sure

that asbestos victims have someplace to go to seek compensation if the Fund cannot handle all future claimants.

The FAIR Act, as reported by the Judiciary Committee, includes an amendment offered by Senator Biden that requires the Fund to terminate and claims to revert to the tort system if funding proves inadequate. Specifically, the Administrator would be required to certify annually that 95 percent or more of the eligible claimants that year had received 95 percent of their compensation under the FAIR Act. If not, and the situation could not be remedied within 90 days, the program would sunset immediately. Although this language clearly shifts the risk away from claimants, it unnecessarily jeopardizes the Fund from its very inception and fails to provide sufficient flexibility to address unexpected, and possibly fixable, fluctuations in claims.

I agree with the key principle that the risk of inadequate funding cannot fall on those truly ill from asbestos exposure. However, the business community cannot be subjected to an open-ended funding commitment to accommodate an unknown and unlimited number of claimants into the future. Similarly, American businesses cannot risk paying over $100 billion dollars into a Fund only to see it sunset in a few short years. Either of these outcomes would be worse than the current broken system. To succeed, the business community believes the solution must provide at least a limited window of ''peace'' to bring certainty to business and to allow the economy to recover from the burden that asbestos litigation has imposed on it.

Therefore, I propose an alternative that will balance these competing tensions while fully protecting sick victims. Under my proposal, if victims do not receive 100 percent of their claim values, the Fund would end and claims would revert to the tort system so that claimants will still have a guaranteed avenue to receive compensation. This approach significantly reduces the need to worry about which claims projections are correct. If the estimates of eligible claims over the next 50 years are too low and the funding is exhausted, then claims will automatically return to the tort system and claimants will be able to preserve their ability to receive compensation. To avoid many of the abuses that have created the current crisis, however, this reversion to the tort system must be to the federal courts and must contain certain additional protections to ensure that the current litigation crisis is not recreated. Obviously, while protecting asbestos victims from risk, my proposal does impose a price on the business community. It compromises to a degree the absolute certainty and finality that have been the hallmarks of a solution for those that must fund the program. They will be forced to bear the risk that the total program funding is not sufficient.

There is also a legitimate concern that the Fund could sunset, not because of inaccurate claims projections, but because the new and untested eligibility criteria in the FAIR Act end up compensating the wrong kinds of claims. These would include claims for injuries not caused by asbestos (for example, smoking-related lung cancers, idiopathic pulmonary fibrosis, rheumatoid arthritis, byssinosis, etc.) or because the Fund's medical, diagnostic, and exposure criteria do not sufficiently eliminate unimpaired claimants. Future victims of asbestos-related disease, as well as those funding the program, have a legitimate and strong interest in ensuring that the Fund is not exhausted because of those kinds of claims. To address that risk, I propose the Fund undertake a periodic review of the program to ensure it is compensating legitimate asbestos-related illnesses. This program review would regularly evaluate the claims submitted, the quality of the supporting evidence, and eligibility and award determinations to determine whether the Fund is compensating the wrong kinds of claimants and to provide the authority and opportunity for the Administrator to address the problem early if that occurs.

My proposal also would address another reality—under the current tort system, too much of the risk already falls on victims. Today, some victims go uncompensated because they cannot remember the product to which they were exposed. Others are without recourse because they were exposed in connection with military service and cannot sue the federal government. Other victims who should be compensated too often experience long delays before they receive payment, waiting for their litigation and all possible appeals to be exhausted, and then only seeing half of their award, the rest taken by the lawyers. This is especially true for claimants who are suing companies that have been forced into bankruptcy. There, the legal process can take half a decade and consume millions of dollars, leaving claimants able to recover only pennies on the dollar from the resulting bankruptcy trust. In short, victims bear much of the risk under the status quo, and they will continue to bear that risk until Congress acts. My proposal protects victims from those risks, and offers asbestos victims far more protection and certainty than they have today.

The PRESIDING OFFICER (Mr. CORNYN). The Senator from Nevada.

Mr. REID. Mr. President, I want to make sure, having heard the distinguished majority leader speak about asbestos, that we understand, as he has indicated, it is a very complicated, difficult issue. But there are concerns that I have, and I think I speak for lots of people in this country. I am very concerned about how it affects business, but I am also concerned how it affects individual people.

I called Mrs. Bruce Vento this week, a woman from Minnesota whose husband served in the House of Representatives, a wonderful man. He worked in an asbestos facility for a few months as a young man. He is 58 years old, he gets sick, he is dead within a year as a result of the disease that comes from being around asbestos, mesothelioma. The average life expectancy of a person who is diagnosed with this disease is a little over a year. They die quickly.

Then we have asbestosis, where people live longer but it has a detrimental effect on their health.

What we have to do is get rid of the spurious lawsuits, those that don't deal with those two conditions about which I just spoke.

So I hope, as we proceed through asbestos legislation, we worry about and are concerned about these very sick people. People in this Senate have worked extremely hard to come up with a solution. The distinguished Senator from Utah is in the Chamber, the chairman of the Judiciary Committee. He and the ranking member, Senator LEAHY, have worked days and weeks to try to come up with something. We always get close but never quite close enough.

So I hope as we proceed, as the distinguished majority leader indicated, toward legislation dealing with this, that we keep in mind the main reason we are doing it. The main reason we need to legislate, in my opinion, is to take care of the people who get afflicted with the diseases that are related to asbestos. In the process, I hope we can ban the importation of asbestos into our country. We continue to import thousands of tons of this stuff on a yearly basis, even as we speak.

So I appreciate the concern of the majority leader. I have concerns also. But if I were giving a speech in a prolonged fashion, I would speak about the people who get sick, as Bruce Vento did, and are now dead.

Mr. LEAHY. Mr. President, I thank the distinguished Senate Majority Leader for his remarks today on the need for the Senate to consider asbestos legislation next year. I wholeheartedly agree with him on the need for reform to establish a better system for providing fair and efficient compensation to victims of asbestos-related diseases. I remain committed to working with Senator FRIST, Senator DASCHLE, Senator HATCH, Senator DODD, Senator SPECTER, and others, to forge a bipartisan solution to this complex challenge.

Last fall, as Chairman of the Judiciary Committee, I held the Committee's first hearing to begin a bipartisan dialogue about the best means to compensate current asbestos victims and those yet to come. Chairman HATCH wisely held two additional hearings this year. Our knowledge of the harms wreaked by asbestos exposure has certainly grown since last fall, as have the harms themselves. Not only do the victims of asbestos exposure continue to suffer, and their numbers to grow, but the businesses involved, along with their employees and retirees, are suffering from the economic uncertainty surrounding this litigation. More than 60 companies have filed for bankruptcy because of their asbestos-related liabilities.

These bankruptcies create a lose-lose situation. Asbestos victims who deserve fair compensation do not receive it, and bankrupt companies can neither create new jobs nor invest in our economy.

A solution has never before been closer than it is today. Since the beginning of 2003, we have come to complete accord on the idea that the fairest, most efficient way to provide compensation for asbestos victims is through the creation of a national fund that will apply agreed-upon medical criteria in evaluating patients' injuries. We have been working tirelessly with representatives

from organized labor, defendant companies, insurers, and other interested parties, to craft an effective trust fund system that will bring the certainty of fair payments to victims and financial certainty to industry. A myriad of issues have been resolved, from the definitions of the panoply of illnesses resulting from asbestos exposure to a ban on the use of asbestos in the United States. We are working, even today, on the details of other aspects of this scheme, down to the fine points of the administrative mechanism for processing claims.

We have made real progress in finding common ground. But we have yet to reach consensus, and without consensus we cannot end this crisis. Too much is at stake for us to walk away when we have come so far. An effective and efficient means to end the asbestos litigation crisis is within reach, and we must grasp it. Although the year is drawing to a close, our bipartisan commitment to this effort remains strong. I look forward to continuing to work with my colleagues and all stake holders to craft a consensus bill that we can move through the legislative process and into law next year.

MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003—CONFERENCE REPORT

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of the conference report to accompany H.R. 1, which the clerk will report.

The assistant legislative clerk read as follows:

> The Committee of Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 1), to amend title XVIII of the Social Security Act to provide for a voluntary prescription drug benefit under the medicare program and to strengthen and improve the medicare program, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

The PRESIDING OFFICER. The Senate will proceed to the consideration of the conference report.

(The conference report is printed in the proceedings of the House in the RECORD of November 20, 2003, Book II.)

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, we are now on this historic piece of legislation. I want to begin a discussion of that shortly.

But since the majority leader discussed the subject of asbestos legislation, and the chairman of the Judiciary Committee, who has been largely responsible for moving that legislation as far as it has come to date, is here and wishes to make a couple of comments, I would like to yield a couple of minutes to the distinguished Senator from Utah and then regain the floor to discuss the Medicare bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Utah.

Mr. REID. I am sorry, what was the concern?

The PRESIDING OFFICER. The Senator from Arizona has yielded to the Senator from Utah for 2 minutes and then will reclaim his time. Without objection, it is so ordered.

The Senator from Utah.

ASBESTOS REFORM

Mr. HATCH. Mr. President, I thank my colleague. I appreciated the remarks of the distinguished majority leader on the asbestos reform legislation. I certainly appreciate the kind remarks of the minority whip with regard to this. I think both of them spoke eloquently.

I rise today in support of the comments of the distinguished majority leader with respect to the asbestos legislation. This is an absolutely vital issue, and we have the opportunity with S. 1125, the Fairness in Asbestos Injury Resolution Act, to correct what has been a gross injustice—both to asbestos victims and to our economy.

For more than 20 years now, compensation to legitimate victims of asbestos exposure has been delayed and diminished, while scores of companies with almost no connection to the problem have had to file for bankruptcy and hundreds of others live under the constant threat of insolvency from litigation. As a result tens of thousands of victims are not compensated and tens of thousands of workers have lost their jobs.

We've heard the statistics, but they bear repeating. The RAND Institute for Civil Justice tells us that, to date, approximately 70 companies have been forced into bankruptcy—at least three with operations in my home state of Utah.

The number of claims continues to rise as does the number of companies pulled into the web of this abusive litigation, often with little, if any, culpability. More than 600,000 people have filed claims, and more than 8,400 companies have been named as defendants in asbestos litigation.

This has become such a gravy train for some abusive trial lawyers that over 2,400 additional companies were named in the last year alone. RAND also notes that "about two-thirds of the claims are now filed by the unimpaired, while in the past they were filed only by the manifestly ill." Former Attorney General Griffin Bell, amongst many others, has denounced this type of "jackpot justice."

To address this problem, I introduced a bipartisan bill with my friends Senators BEN NELSON, MIKE DEWINE, ZELL MILLER, GEORGE VOINOVICH, GEORGE ALLEN, SAXBY CHAMBLISS and CHUCK HAGEL. This bill creates a fund to provide fair compensation to victims, while reducing wasteful transaction costs dramatically. Let me first just dispel a few myths about this bill and set the record straight on a couple of issues. First, some Democrats and unions are saying there isn't enough money in the bill but the fact is that this bill gets more money to claimants on average than the current system does.

Let me explain how. There have been several studies of future asbestos-related costs under the current system, and the one which shows the highest reasonable estimate of prospective costs—the Milliman study—would result in approximately $92 billion for victims, after attorney fees and expenses.

Under the FAIR Act, it is estimated that claimants will receive 90 percent or more of the total funds under the no-fault, non-adversarial system. This means the FAIR Act fund—which will have $114 billion under the agreement proposed by Senator FRIST—will allow claimants to take home more than $100 billion. This is more total money than they are projected to receive under the current tort system.

But it is not just more money in the pockets of victims, it is faster and more certain compensation as well. We anticipate that claimants will not have to endure years of discovery battles and endless litigation before they get paid. Currently, some victims are dependent on the solvency of businesses to decide if they get paid or not. Under the FAIR Act, these victims will no longer have to go without payment. It is time to end the current system of Jackpot Justice where only some win and many lose.

Some have also argued that there aren't adequate safeguards to ensure solvency of the fund. Baloney. This fund—which is funded at the highest reasonable claim-rate scenario—is equipped with many mechanisms to ensure that the pay-in and pay-out requirements are met. This includes borrowing authority against future contributions.

It also includes guarantee surcharge and orphan share reserve accounts which set aside money to grow and pay for unexpected shortfalls. Another safeguard is the provision to empower the Attorney General to enforce contribution obligations and ensure collection. And beyond these, there is $10 billion in contingent funding as one more additional safety net. On top of all these safeguards, if the fund still becomes insolvent, claims would revert back to the tort system—a provision, by the way, which Democrats insisted be part of the bill.

Given that this bill is a clear net monetary gain for legitimate victims,

and provides payments faster and with more certainty, I am at a loss as to why anyone could object to this bill. The unions that continue to oppose the bill risk throwing away the last, best chance to compensate fairly those who are truly sick and provide some protection to those whose jobs and pensions are at risk because of the asbestos litigation crisis.

Quite frankly, the only entity that stands to lose under this bill is the plaintiffs' bar which has siphoned off more than $20 billion of the costs incurred on this issue as of the end of last year. If the FAIR Act is passed, they will not be able to use unimpaired claims to continue to squeeze a projected $41 billion more for themselves from remotely-connected companies by abusing a broken system.

Fair is fair—I am all in support of compensating plaintiffs' attorneys for the value of their work. But when it diverts valuable resources away from sick victims, something is wrong with the system.

No one can accuse us of being unwilling to compromise in order to finally be able to address this overwhelming crisis being caused by asbestos litigation. When you look at where our bill started—and it was a good start—and where it is now, our efforts at compromise are blatantly clear.

In May we circulated a bipartisan draft measure and my staff met with Democrat staff to listen to their concerns and we incorporated several requests—even before introduction. We then embarked on several weeks of markup which saw 23 Democratic-initiated amendments adopted into this legislation. Now I didn't agree with all of them, but it can hardly be said that there hasn't been strong participation by Democrats on this bill. This chart behind me lists just some of the changes we made at the behest of Democrats; let me highlight a few of them for you.

We increased overall funding. Our bill started with a mandated $94 billion in contributions, which by most reasonable estimates should have provided sufficient resources for compensating legitimate claimants. In committee we increased base funding to $108 billion dollars. That additional $14 billion is not pocket change. We also took steps to ensure the enforcement of contributions as an added protection to the solvency of the fund.

We increased the number of claimants that would receive compensation by modifying the qualifying medical criteria and by including a provision to accommodate the unique circumstances of the victims in Libby, MT.

Moreover, we increased the amount of money that will go to claimants. Even though our original claim values would have on average provided more money to legitimate claimants, we increased the values even more. And we removed most collateral source offsets to ensure that more of the award goes directly to the claimant.

These changes listed on the chart behind me do not even include other changes that we have offered since the bill was reported out of committee to even further accommodate their requests, such as an additional $6 billion increase in overall funding and significant increases in claims values in many categories. And we also offered a more flexible borrowing authority as another safeguard for solvency.

Now I understand that some want to make further changes, including streamlining the claims process even more, and I have said I'm willing to look at such proposals. But this and other complaints have been raised without the follow up of a concrete, alternative proposal. I hope that before this issue comes up in March as the Majority Leader indicated that we will resolve the outstanding issues.

We cannot delay any longer—we need to ensure that the truly sick get paid, while providing stability to our economy by stemming the rampant litigation that has resulted in a tidal wave of bankruptcies, endangering jobs and pensions. This crisis reaches far and wide—and it hurts everyone.

On Monday, this body will pass an historic bipartisan Medicare bill that will provide our seniors with drug benefits.

We can and should use this spirit of bipartisanship to come together on the asbestos issue.

I thank Senator FRIST for his leadership on Medicare and the constructive role he is playing on asbestos. Working together I am confident that Senators DASCHLE, SPECTER, LEAHY and DODD will all join together when we bring the asbestos bill to the floor in March.

Mr. KYL. Mr. President, I say again, this asbestos legislation, discussed by the leader, is very important for us to conclude early next year, and I make the point again, were it not for the work of the chairman of the Judiciary Committee, we would not be at the position where we hope to be close to finishing that legislation at some point.

Mr. CRAIG. Will the Senator yield to determine where we might be this morning?

There are several in the Chamber who wish to begin to speak on the Medicare prescription drug issue. Have we established any order for that purpose?

The PRESIDING OFFICER. There is no order other than to alternate speakers.

Mr. REID. Mr. President, if the distinguished Senator will yield for a response?

Mr. CRAIG. I will be happy to yield.

Mr. KYL. I will be happy to yield to the Senator from Nevada.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. What is in place is an agreement, gentlemen's in nature, that we would go back and forth. We are trying to work out an agreement where we would divide the time between proponents and opponents until 11 o'clock tonight. That has not been done yet, but there is something that has been typed up.

The reason going back and forth may not be fair is someone may speak for an hour and a half and someone else may speak for 10 or 15 minutes. So we have to come up with something better than that. That is what we are trying to do now.

Mr. KYL. Mr. President, might I suggest that during the time I am speaking, those who would like to speak in conjunction with the Senator from Nevada begin to work up a schedule. I would be happy to propound a unanimous consent request when that is concluded to reflect the agreement, at least for the next several hours, if that could be done.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, this is a historic day. Obviously, when one goes back to 1965 and thinks about the creation of Medicare, a lot has changed since then. We are here today to begin debating in the Senate a bill which passed early this morning in the House of Representatives, has long been advocated by President Bush, and which many people have worked on for a very long time, to try to modernize our Medicare system which, after 35 years, we recognize in this new 21st century needs to be changed to some extent.

For example, during that period of time, prescription drugs have become a major component—indeed, in many cases the first component—of treatment for ailments, disease, and afflictions of people.

Mr. President, 35 years ago prescription drugs were used to alleviate symptoms of pain and occasionally to treat conditions, but more intrusive methods were the order of the day at that time. The Medicare program for seniors reflects the conditions then by covering hospital stays and physician benefits, but not outpatient prescription drugs. The prescription drugs which have over the last 35 years become a key, if not the key, component of medical treatment have not been a part of Medicare because they were not as key in 1965. So we know we need to add prescription drug coverage for our seniors and for those who are disabled and who qualify for Medicare.

There are other changes we know, also, that would help to strengthen Medicare, to ensure that as we proceed to provide Medicare to the baby boom generation, we will be able to do so with the highest quality of care possible, at prices that both they and the American people can afford and, as I say, which really encompasses the new

concepts of modern medicine in this treatment.

So the question was how we would develop a system to provide prescription drugs as a component of Medicare. There were several different options, but the option that has been finally settled upon is one which I can support, and as someone who actually advocated a somewhat different approach, I would like to speak to those primarily who, like me, were not particularly pleased with the initial direction in which this legislation proceeded, to talk about why, at the end of the day, it is the best we can do under these circumstances and I think under any foreseeable circumstances of the near future, and therefore why it is important to move forward with this legislation.

It is momentous, it is huge in terms of the amount of money we are talking about, a commitment over the next 10 years of $400 billion. That was the amount that Congress agreed to with the adoption of our budget and the crafting of this legislation. We resolved that this money would be set aside to provide this prescription drug benefit and make changes in Medicare to ensure the benefits of Medicare would be available to everyone in a quality way during the 21st century.

Let me discuss first of all some disappointments I have with the bill because these have been discussed by others and I want them to know I am very cognizant of the concerns that have been expressed.

I served on the conference committee that crafted this legislation and I spent literally hundreds of hours working with colleagues through these issues. Some of the battles we fought, I helped to prevail on, others we did not prevail on. But it is the nature of compromise between the two bodies and between the two parties, especially when the Senate is almost equally divided that no one is going to get everything they think is best.

Let me first of all talk about the approach that was taken here and why in some respects I think we made some wrong turns, but how we have tried to recognize that and to ameliorate the effects of those wrong turns as much as we could.

There was a sense in this country, because there are many people who could not afford all of the prescription drugs they need in their treatment, that the Medicare plan had to be modified to ensure they could have access to those drugs at a reasonable cost. That was an approach that many Members thought would best utilize the funding available, to provide the maximum amount of benefit to those who most needed it.

Somewhere along the way, a major decision was made which fundamentally altered that concept. It was a decision that was strongly favored by the AARP, for example, a group which I am very pleased to say is in support of this legislation and has taken a strong role in educating America about the benefits of this legislation. That decision was to make the benefit of prescription drugs universal; that is to say, to make it available to all Medicare-eligible people, not simply to try to help those who needed the help the most.

The first result of that was it significantly reduced the amount of money we could make available to those who need it the most because, obviously, if you provide a universal benefit, you are providing it to everyone who qualifies for Medicare basically equally to those who do not need the benefit, because they have more money, as well as those who do need the benefit. Once that decision was made, it reduced the amount of money we could allocate to help those who needed the help the most. I regret that. We could have structured a plan that would have more targeted the benefits where they were needed the most.

In addition, we created some other problems. One of the problems is, employers who provide prescription drug retiree benefits will have less incentive to do that in the future because the Government will do so if they do not. Many will argue, why should we spend our money, our corporate funds, to support the prescription drug retiree benefits that we have done in the past when, if we stop that coverage, the Government will pick it up? The result of that was we had to allocate over $70 billion of this money to be paid to these business plans, union plans, and even government plans, that provided retiree health care benefits with drug coverage. We had to provide that money to them to enable them to continue providing the coverage. Some call it a subsidy. It is a fair term, I suppose. But one might say we are paying them three fourths of what it would cost the Government, to provide this particular benefit.

So from the Government's point of view, we are saving money because if these company plans did not continue the coverage, the Government would have to pick up 100 percent of the cost. Nevertheless, it took a chunk of the money out of the program to pay for benefits that are already being paid for by somebody else, thus further reducing the amount of money we could allocate to those that need the care the most.

So those are just two examples of problems created by this initial decision.

The original idea of many Members was that we should provide more choices to seniors. Many Members came to that conclusion because Federal Government employees such as Members of Congress have a lot more choices in our drug coverage. We are entitled to enroll in something called the Federal Employees Health Benefits Program, or FEHBP, and we have a lot of health insurance options. These insurance options are integrated healthcare plans. They provide all of our care, from hospitals to doctors as well as prescription drugs.

A lot of Federal employees, 10 million strong, like those kind of plans. Many are PPOs, preferred provider organizations, where you go to any one of the doctors on a list who has signed up with that organization, or you can even go out-of-network, you can go to a different doctor, and that is still OK. This was the concept the President originally announced and it is a concept I strongly supported because it would maximize choices.

At the same time, we recognize that a lot of people would still want to maintain what they currently have, what we call traditional fee-for-service Medicare, and simply add a drug benefit on top of that. We did not want to take that choice away. So the concept was to have basically two choices: Stay in traditional Medicare with the new drug benefit, or sign up with one of these new insurance programs, a PPO or what we call today Medicare+Choice, which is predominantly HMOs. That choice has been created in this legislation. The choice is a good choice.

I regret, however, that I don't think we have given the health insurance option a good enough chance to attract very many beneficiaries. There are efforts in the bill to do that, but I think we put too many restrictions on the PPOs, in particular, to expect they will be very successful. For one thing, we strongly regulate how much they can be paid. As a matter of fact, their payment rates are directly tied to what we pay in regular fee-for-service Medicare. That is price control. Congress and the administration set the prices that can be paid under the traditional Medicare Program. We were trying to get away from that heavy price control with this new insurance option. Unfortunately, in an effort to make sure we could keep the costs ratcheted down and compare those costs to what we are paying for traditional Medicare, there is a direct relationship between what we pay in traditional Medicare and what will be paid on the private health insurance side. It is not really like regular private insurance. This is very highly regulated, controlled price, controlled private insurance as the alternative to fee-for-service Medicare.

I think it is less likely those PPOs are going to succeed as a result of that. Nevertheless, we at least, for the first time, have the concept of private health insurance as an option to traditional fee-for-service Medicare for all beneficiaries.

Senator NICKLES, in particular, and I worked strongly to increase the flexibility that the insurance option could provide so there could be literally dozens of products out there like the

FEHBP for Federal employees, and people could decide what was best for them. Again, unfortunately, that flexibility has been greatly limited in this legislation, primarily because of concerns by the Congressional Budget Office that if very much flexibility were provided, the cost of the program could exceed the $400 billion.

As a result, the options that are offered by these private plans will be very limited. For example, as you will hear others get into the details of the legislation, especially the drug benefit—and my colleague, the Senator from Iowa, the chairman of the Finance Committee, Mr. GRASSLEY, is in the Chamber. I know he will go into great detail about precisely how this works.

When that occurs, and you see how this benefit is going to be provided, one of the things you will see is that even though there is a very generous benefit—the Government will pay 75 percent of your drug costs up to $2,250, after a $250 deductible; so it will pay about $1,500 worth of drug benefits—at that point, then, the individual is going to be responsible for a little under $3,000 worth of drug benefits, before the catastrophic coverage of 95 percent Government-paid kicks in. Some people refer to this as a donut hole.

Obviously, with $400 billion allocated to the problem, we are not going to be able the pay all of everybody's drug costs. There is not enough money in the Federal budget for us to do that. As a result, you can only cover what that amount of money will cover.

Well, it is hoped that the private sector insurance option will provide different ways of ensuring against that donut hole, ensuring against that out-of-pocket expense that individuals will have to pay. But, unfortunately, that cannot be done under this legislation. The threshold can be raised, but the out-of-pocket amount still has to remain the same. As a result, there is a limitation on the insurance product that can be offered.

Again, Senator NICKLES and I had hoped there would be a lot more flexibility. I am hoping in the future we can loosen this up so these health insurance options can act like regular insurance options.

Another point: If you go to an insurance company today, a preferred provider organization, and you would like to get treatment from a different doctor who is not in their network, you can go to that different doctor. The plan will only pay an agreed-upon amount, and then you are billed for the difference between that and the physician's reasonable and customary fee. That is standard practice today.

That cannot be done under the way this legislation is written. That has to be fixed as well. Right now there is a price cap on that, and, therefore, it will discourage people from going out of the network, which will discourage people from signing up with PPOs in the first place.

These issues will have to be addressed later because we did not give sufficient flexibility to the insurance company alternative in this current bill. Again, I am speaking primarily to those who, like me, approach this with the idea that we could provide coverage similar to FEHBP coverage that the President originally articulated as the goal, and as someone who did not win all of the battles in this negotiation, but who still believes that at the end of the day, this is the best we are going to do, either now or any time in the future, that I can predict, given the politics, given the closeness of the Democrat-Republican split in the Senate and in the House of Representatives and the various other factors that influenced the decisions that we made.

Let me talk a little bit more about the drug benefit. Seniors today buy Medigap insurance, and that provides them a certain degree of drug coverage. It is regulated by the Government, but I think a lot of seniors believe they have pretty good drug coverage because of the Medigap insurance they have. The reality is, they are paying a lot of money for not that great of coverage. They pay almost as much money in premiums as the amount of coverage they receive. So it is not completely dollar for dollar, but it is not the kind of insurance that ordinarily we would think of.

As a result, the drug benefit that we provide here will be more substantial for the amount of money that is paid. But I do fear a lot of people will see the drug benefit we provide here as less than they are able to obtain today through their Medigap insurance, and it is going to be incumbent upon all of us to explain to people how this drug benefit will work. Again, it calls for us to try to loosen up the way the private insurance market can provide the drug coverage to meet seniors' objectives, not all of which are precisely the same.

Therefore, in order to convince them there are good alternatives to what they have today, since they are not going to be able to purchase the new drug benefit through the means of Medigap insurance anymore—that will be done through a different mechanism—it is going to be important for us, I think, to provide them the maximum type of flexibility and choices, something, again, that we are going to have to address in the future because it is too restricted in the bill as we have it written today.

There are other items—and I do not want to dwell on the negative—but just to cite two or three others to show areas in which we could have done better.

Today, we reimburse physicians and hospitals in a very irrational way. It is very tightly controlled. It is price controls. We never get it right. We tend to want to save costs, so we do not reimburse them enough, and then hospitals begin to shut down, doctors begin to get out of Medicare, and we realize we have made a horrible mistake. So then we ratchet the payments back up, and it is a very herky, jerky way of reimbursing the very people we rely upon to provide the critical health care that we want. As a result, we have tried to figure out ways to make this more rational.

Well, the best example is in the case of oncologists, doctors who provide us drugs to treat cancer. The oncologists are not reimbursed at anywhere near what it costs them to provide this service for us. As a result, what they have to do is to buy the drugs for the chemo part of chemotherapy, and they mark up the value of those drugs, sell them to the patient, and that is how they get reimbursed for what they do. Of course, people have said: Well, it is a huge markup. They are making a lot of money off these drugs. And it is true that there is a huge markup. It is not a rational way of reimbursing them.

So what we tried to do was to go back and fix the basic formula, called the practice expense formula, to figure out how much it really costs those doctors to stay in business to provide this all-critical care for cancer patients, and we begin to re-adjust that formula so it will pay them more, and, at the same time reducing the markup they get on the drugs so they would not have to be paid out of that pot of money, in effect.

Well, we got about halfway there, but we still have more work to do on that particular formula. So it is just an example of how the Medicare system served seniors well, but there are clearly things in it that need to be fixed if we are going to continue to provide high-quality care and to ensure that we have physicians and hospitals that can stay in business to take care of us.

Cardiothoracic surgeons are another group. The very best of these surgeons go into the operating room with their own team. This is life and death. They have teams that work together for years. They have had a lot of experience in doing what they do. But they do not get reimbursed for their team members, their nurses, and so on. What they have to do is pay for that out of their own pocket. You can obviously see, at a certain point, they are not going to be able to provide the high-quality care. What they have to do is basically go into the hospital and take whoever the hospital has at that time. They do not work together as a team, and they provide about half as many people as some of these surgeons need in order to provide the highest quality cardiac care.

Here is another area in which we could have provided at least a demonstration project or two to figure out

how best to reimburse these cardiothoracic surgeons. We failed to do so in this legislation. We need to do that in the future. Cost containment was another matter. We wanted, given the fact this legislation could explode in cost, to have something in this bill that would ensure that the costs would be controlled.

There is a section in here that purports to do that, but it is largely illusory. It basically says, at a certain point in time we have to get together and make some recommendations. The President has to send some recommendations down to us. We do not have to act on them, of course. And it is really very hard to change the rules of the Senate to force us to act on something like this.

So I just want to let my conservative friends know that, no, there is not good cost containment in this legislation. But I would also ask them to think about one other thing; and that is, there is no free lunch. If you want high-quality health care, you are going to have to be willing to pay something for it.

I think sometimes conservatives look at one side of that ledger but not the other. We have to do everything we can to ensure that taxpayers can afford this expense. But we also do not want to be penny-wise and pound-foolish when it comes to providing quality health care for our seniors and for others who are on Medicare.

Indeed, for those who say we are going to control the costs in this legislation, I would say that the means of doing so that are in the bill are primarily price controls by the Government, which have been demonstrated not to work very well, and I think we can expect that the younger generation is going to bear the full brunt of this expense.

It is a $400 billion expense over 10 years. It is not taken out of any kind of payroll tax or other kind of payment by the beneficiary for that segment of what we are providing. It is going to be paid for out of the pockets of people who are working to earn a living and pay for their kids' education. We have to stop and evaluate whether, with a lot of seniors who are well enough off to afford drug coverage, it is fair to ask their kids, who are struggling at this point to make a living, to bear more of the burden.

There is well over $100 billion of this, probably about $150 billion, in premiums and copays and deductibles that will go toward the benefit we are providing here that is worth $400 billion. But let us not forget that the $400 billion money is being paid by taxpayers. So cost containment is important, and it will boil down to the discipline that we in the House and Senate and the President can exercise in keeping the right balance between cost containment and providing high-quality care.

I have stressed the negatives to try to establish a point. I didn't get my way negotiating this legislation despite hundreds of hours of work in the conference committee. Nobody got 100 percent of what they wanted. For those conservatives who are disappointed because of the kind of things I have been talking about here or the lack thereof that shows we really missed a historic opportunity to make the bill better, I would like now to address why I think, nevertheless, they should support the legislation.

It boils down to the fact that it is extraordinarily difficult with something this big and this complicated and important to so many people, with every Senator and every Representative having a very big stake in trying to get it right, to reach the kind of compromise that is going to make any particular group happy.

I note there was a scathing op-ed piece against one of the Democratic Members who was substantially involved in these negotiations, criticizing him for not representing his point of view well. I can't tell you how wrong the writer of that piece was. From my perspective, that distinguished Senator got far more than I did out of this. He won more of the battles than I did.

I think one should be a little bit careful about simply putting the ideology out there and saying, because one side didn't get everything it wanted, therefore it is a bad bill. The reality is that under the circumstances we face today, I think it would be impossible to put together a bill that would provide drug benefits for our seniors that would do it any better than what we have done here.

Why do I say that? Some people say, let's let this bill fail and we will come back and simply provide a drug benefit to those who need it the most. I think we have gone too far for that. Groups such as AARP are not going to support that. Their support is very important for a program such as this. I don't think a lot of Senators would support that. So even though that might have been how I would have liked to have started this process, I don't think that is going to pass.

Do we let 2 or 3 more years elapse without providing a drug benefit? I don't think that is an alternative. So I would challenge anybody who says this bill isn't perfect to demonstrate to me how they could cobble together a majority to provide an important drug benefit and still achieve all of the objectives they want to achieve and get it passed.

We do need to include prescription drugs in Medicare. They haven't been included, and we all know this is the preferred method for treatment by most physicians for many illnesses and diseases today. We also need to ensure that those who don't have coverage can get it. The options we provide in this bill at least get us part way down that road.

Importantly, we will be reducing the costs of prescription drugs both to third party payers, whether it be the Government or the employers, as well as the seniors for the part they have to pay. How is this done? There are a variety of mechanisms in the bill. One of them is the fact that the Government and the private plans will be buying in bulk. Everybody can understand that concept. You can buy for a lower cost if you buy in bulk. Another is that there are a lot of incentives to use fewer drugs, to use generic drugs, drugs that are based on a formulary that more specifically fits the particular patient's need, and not to have a lot of extra drugs sitting around in the drug cabinet. Almost all of us have extra drugs sitting around, which is probably not a very healthy thing. It is a costly thing as well.

There are a lot of incentives built in this legislation that should permit us to reduce the cost of drugs both for the third party payers as well as for the seniors themselves for the portion they are going to have to take care of.

Another important thing in this legislation is that we at least go a little way toward rationalizing the system of paying the doctors and the hospitals and other health care providers that have not been adequately reimbursed. There were large cuts in store for hospitals and doctors. Those cuts are no longer in place. In fact, there are very modest increases for physicians and hospitals: A 1.5 percent increase for the physicians, instead of the 4.5 percent cut that was going to take place starting January 1 if we did not act. At least there is modest support for those that we really count on when the chips are down to take care of us.

As I said, if we defeat this bill now, I don't see how we can come back and provide these things, how we can get consensus to do it anytime in the near future.

Another important item is the health savings accounts provision. Many of us have believed for a long time this could really provide a long-term way for people to build up the savings they can apply toward health care for insurance and out-of-pocket expenses so that they won't need to rely as much on Medicare when they get to be eligible for Medicare.

We know one of the reasons we have high-priced drugs is that Americans have to bear almost the full burden of the cost of production of drugs since other countries, such as our friends to the south and north, have price controls on how much they can reimburse the drug companies for their prescription drugs. This is unfair trade. It puts all of the burden, a cost shift, on the American consumer. This bill provides instruction to our Trade Representative to come up with a way to deal

with those other countries to get them to share more of the burden of the expense of producing these important drugs for us.

We also include the affluence testing of the Medicare Part B premium for those at the very wealthy end of the spectrum; a senior who makes over $80,000 a year, for example. I think it is not too much to ask them to pay a little bit more in their Medicare premium for the coverage they receive.

We index the Part B deductible so we don't have to come back every 10 years and have Congress pass a law. This will basically keep up with the cost of inflation. We also include a change for so-called 340B hospitals. These 340B hospitals are public safety net hospitals, and we enable them to purchase their inpatient drugs cheaper than they can purchase them today. I introduced legislation earlier on this subject, and I am pleased we have that provision included here.

Then finally a provision that is important to those States such as the border States—Arizona, Texas, California, and others—that are required under Federal law to provide treatment to illegal immigrants because of the law called EMTALA, the Emergency Medical Treatment and Active Labor Act, that says no emergency room can turn away a patient whether that patient can pay or not.

Because emergency rooms now are faced with treating illegal immigrants under this requirement and because the Federal Government has not been able to enforce the law to prevent those people from coming into the country illegally in the first instance, we believed it was important for the Federal Government to at least help these hospitals defray some of the expenses they are incurring, which in some cases are so severe, it is forcing hospitals to consider closing down and certainly shutting down emergency room care.

That can't be. American citizens should not suffer because of a law that requires that we provide care to illegal immigrants. We can at least reimburse those hospitals for a portion of the cost they bear. This bill provides $250 million a year for 4 years to provide that kind of reimbursement.

There are a lot of positives in the bill. There is a lot more I know the chairman of the Finance Committee will discuss in more detail.

What I want to do is discuss it from the standpoint of somebody who has been critical, who has constantly said: We can do better. We are missing opportunities. We ought to do this in a way that is more flexible, that looks more like the FEHBP. I didn't win a lot of those battles, but we have an opportunity to at least implement a plan that we have a possibility of making better over time as people see the advantages of the concepts we have put in the legislation.

We have the knowledge that at least in the foreseeable future, because we are adequately reimbursing those people upon whom we rely for care, that we are going to have that care provided to us in a quality way and that our seniors will not suffer because we didn't consider it important enough to provide for them the very best.

Without this legislation, they will continue to pay more than they should for prescription drugs. They won't receive as much in the way of prescription drug coverage or care. And that will be a shame at a time when this country has the capability of providing that kind of care.

Notwithstanding all of the concerns I have noted, the challenges we need to face in the future, we should support the legislation.

I chair the Health Care Subcommittee of the Finance Committee in the Senate. I intend to have hearings next year into areas that may need improvement. I look forward to working with my colleagues to improve this historic legislation as we move forward. We owe our senior citizens no less.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. REID. Mr. President, we are alternating back and forth. It is obvious that it is not fair. The Senator from Arizona did not speak for an inordinate amount of time. If somebody comes and speaks for 5 minutes who is opposed to the legislation and someone speaks for 45 minutes in favor of it, that doesn't work out. I am somewhat at a loss as to why we have not worked out an arrangement that the time between now and 11 o'clock be equally divided between proponents and opponents, with no limit as to how much they could speak.

If someone who wanted to speak in favor of the legislation were here and there was nobody to speak in opposition, that person could go ahead and speak. For reasons I don't understand, the floor staff has not gotten that approved by the managers and leadership.

The Senator from West Virginia is here in the Chamber. He is going to speak against the legislation. With the agreement now in effect, it would be his time to speak. I know the manager is here. Is that OK with the Senator?

Mr. CRAIG. Will the Senator yield? I know the Senator is going to speak at 11 o'clock. I was told I could speak. The Senator from Illinois has been here for some time. I understand both of these Senators anticipate fairly lengthy statements. I do not. I anticipated no more than 10 minutes. Is it possible that I could slip in there somewhere?

Mr. REID. Mr. President, I think the Senator from West Virginia would be happy to yield for 10 minutes to the Senator; is that right? I don't know that to be the case. This shows how unfair this whole situation is.

Mr. CRAIG. Exactly right.

Mr. REID. I cannot imagine what is holding up the UC to allow the time to be divided equally.

I yield to the Senator from West Virginia. He has an obligation. That is why he is here at 11. The Senator from Illinois said he would be happy to yield, following the statement of Senator BYRD, to the Senator. He has that right anyway; he doesn't need consent to do that.

Mr. BYRD. Mr. President, in any event, the distinguished Senator from Illinois would be recognized at the same time—if I understand the request of the Senator from Nevada. If the Senator from Idaho goes first and then I go next, then the Senator from Illinois would go; or if I go first, and the Senator from Idaho goes next, then the Senator from Illinois would go. So the Senator from Illinois, through his gracious courtesy, which is so characteristic of him, either way, that would suit the Senator from Illinois.

That being the case, I have no problem with yielding to the Senator from Idaho next, if he can limit his statement to 10 minutes, which I understood he would.

Mr. CRAIG. I would do that under a unanimous consent, certainly.

Mr. REID. Just understand that following Senator BYRD is Senator DURBIN. There could be as much as an hour and a half. I want to make sure everybody understands that.

Mr. President, I ask unanimous consent that the Senator from Idaho be recognized for up to 10 minutes, and then the Senator from West Virginia, followed by the Senator from Illinois.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BYRD. I will not speak longer than 20 minutes.

Mr. CRAIG. Will the Chair signal me when I have spoken for 9 minutes?

The PRESIDING OFFICER. The Chair will do so.

Mr. CRAIG. Mr. President, the Medicare conference report now before the Senate, brings to fruition President Bush's early and strong commitment to prescription drug relief, and it reflects nearly 6 years of difficult congressional debate.

The Senator from Iowa is here in the Chamber. He has played a key role in shaping the final package, in hours and hours of work with our majority leader and with leaders from the other side, to try to strike a critical balance.

This historic legislation, like the 38-year-old program it seeks to reform, is indeed expensive, complex, and unweildy but it is a compromise I can and will support, although not without some very strong reservations.

This bill is a solid step toward accomplishing two core goals: Providing prescription drug relief to seniors in need, and strengthening Medicare's future through greater market competition.

This legislation also includes dramatic improvements in consumer choice through health savings accounts, and perhaps the best package of rural health care improvements Congress has ever considered. I know its impact on the rural hospitals of Idaho will be significant.

Despite its deep and undeniable faults, this bill offers a rare opportunity unlikely to return for several more years, if ever—years in which millions of seniors will continue to suffer for lack of needed drugs and years in which the retirement of America's baby boomers will draw ever closer, and the modernization of Medicare will become ever more urgent. No, it is not perfect, but to hold out for perfection would risk a permanent sacrifice of much that is good and necessary in this legislation.

As chairman of the Senate Special Committee on Aging, I have chaired several hearings examining many of the hard questions in this debate—including the long-term demographic and financial pressures facing Medicare, and the importance of integrating competitive alternatives into Medicare's future. I am pleased to see some of these themes reflected in the legislation before us today.

Mr. President, my reasons for supporting this legislation are straightforward:

First, the legislation provides long overdue drug relief for our Nation's seniors. Nearly every health insurance plan in America today contains drug coverage. It is time Medicare did, too.

Beginning in 2006, seniors who decide to enroll in this completely voluntary new program and will pay a premium of about $35 and will receive a 75 percent subsidy for the first $2,250 in annual drug costs, after meeting an initial $250 deductible. And after a senior's annual drug costs reach $3,600, Medicare will cover 95 percent, providing essential relief for those seniors with catastrophic drug needs.

Overall, the average senior enrolled in this program will see annual drug costs reduced by 44 percent to 68 percent. In the nearer term, prescription drug discount cards will be available, offering seniors drug discounts of up to 10 to 25 percent.

Second, I am very pleased that the bill devotes the greatest share of its relief to seniors of modest and low income, those who need it the most.

For these seniors, the relief will be even greater than in the basic package. In Idaho, nearly 35 percent of our Medicare beneficiaries are likely to qualify. Seniors whose incomes fall below about $13,500 for an individual or $18,200 for a couple will receive deeply discounted premiums and deductibles, and those whose income is below about $12,100 for an individual or $16,200 for a couple will have no premium or deductible and will pay only a few-dollar copayment for each prescription.

The important thing to keep in mind is that the proportion of seniors today who have no private drug coverage at all is relatively small—about 25 percent—and it is on these seniors, as well as those whose current coverage is inadequate, that this bill is focused. In short, those in the greatest need get the greatest benefit and that is as it should be.

Third, the bill before us today seeks to bring Medicare into the 21st century, not just by providing prescription drug coverage, but also by offering seniors the choice to enroll in federally supervised but privately operated health care plans—that same kind of choice and coverage currently enjoyed by other Americans under 65.

Medicare today remains weighted down by rigid bureaucracy and complex regulations—regulations that are already beginning to drive doctors and other health care providers out of the program. Even more distressing, the heavily bureaucratic Medicare Program has utterly failed to keep up with the kinds of medical innovations and coverage options most of the rest of us take for granted.

By contrast, this bill's new competing regional preferred provider plans will give seniors one-stop shopping for comprehensive and integrated coverage, including prescription drugs, preventive care, care coordination, and protection against very high catastrophic medical bills—benefits which are largely unheard of in today's Medicare Program. Even more encouraging, six large-scale demonstrations, beginning in 2010, will test direct price competition between private plans and traditional Medicare. Although not as extensive as I would have wanted, these competition-based reforms are nevertheless the most substantial steps Medicare has ever taken toward bringing marketplace innovation into the program.

Importantly, all of these new choices will be completely voluntary. Seniors who want to keep their current coverage and stay in the traditional Medicare will be free to do just that. No senior will see any reduction in any Medicare benefits under this bill. No benefits will be taken away—none.

Fourth, this legislation contains landmark improvements in the ability of Americans to take charge of their own health care through expanding the use of health savings accounts.

To a greater degree than ever before, this bill will permit individuals to build significant tax-free health care savings for use in meeting a family's health care needs, including long-term care. As we try to encourage those who are becoming seniors to acquire long-term health care insurance, here is a way to finance it and finance it with tax-free dollars. Together with high deductible insurance for very high medical expenses, this approach puts control of health care where it belongs—in the hands of the individual citizens of our country.

This is something I have been fighting for since I first came to Congress, and I believe this bill's health savings account provisions are among its most important accomplishments.

Fifth, I am tremendously pleased, as should be every Idahoan, that this bill includes an unprecedented package of nearly $25 billion in improvements for rural health care. Senator GRASSLEY can be extremely proud of the work he has done to ensure the stabilizing of rural hospitals and rural health care. Most importantly, this legislation achieves a permanent evening out of rural and urban Medicare reimbursement rates. For far too long, doctors and hospitals in Idaho and other rural States have suffered under payment classifications and reimbursement levels that put them at a significant disadvantage—and that makes the already difficult task of providing rural health care even more daunting.

Sixth, the conferees have included, for the first time, a requirement that high income seniors (those making over $80,000 individually or $160,000 as a couple) pay slightly more in Medicare premiums than those who are less well off.

In the decades to come, I believe our children will thank us for recognizing that America's taxpayers simply cannot afford to continue subsidizing care for the wealthiest among us at the same level we provide for the less well off.

Finally, I believe it is important to recognize that the conferees have taken great care to include protections against something I know has concerned many seniors—namely, Will this bill cause me to lose the drug coverage I already have? The final bill includes very significant assistance to employer-sponsored plans to help assure their continued participation in retiree health care. Indeed, some are concerned that this assistance is, in fact, too substantial. But Congress's intent on this issue is clear: Seniors who are happy with the coverage they have today should be free to keep it.

The underlying framework of this bill is a sound one, and it follows the strong and guiding principles laid out by President Bush earlier this year—namely to strengthen traditional Medicare and keep it as an alternative for those seniors who want it—but also to provide a new foundation for the future, one built on choices, competition, and innovation.

This said, however, I remain gravely troubled by certain aspects of this bill.

First, it troubles me deeply that this legislation will add substantially to an entitlement program whose long-term future is already sobering in the extreme. Even without a new $395 billion drug benefit, Medicare is expected to

spend nearly $3.9 trillion over the next 10 years—and by 2075, these costs will nearly triple.

Nothing can change the fact that desperately hard choices lie ahead, regardless of what we do this year. Nevertheless, what we sow today, future generations will reap.

Second, I am disappointed that the conferees chose not to adopt firm expenditure restraints if and when Medicare cost growth rises faster than currently projected. Nearly all honest observers predict that this bill will ultimately cost more than the $395 billion over 10 years that is now budgeted. Such a cost restraint measure would have gone a long way toward assuring future generations that we are serious about fiscal restraint and preserving a viable Medicare program for our children and grandchildren.

Third, I believe this bill should have moved Medicare more assertively toward a 21st century competitive approach, with an even greater role for private plans and the innovation they generate—an approach patterned, for example, after the highly successful program now available to Members of Congress and other federal employees. As it is, this bill makes a credible start in that direction, but much more remains to be done.

And finally, I am concerned by this legislation's very high level of complexity and prescriptiveness. Of course, Medicare legislation is never simple. However, this bill runs to many hundreds of pages and is very heavy with exceptions, rules, and carveouts—including literally dozens of provisions and billions of dollars relating to specifics of provider payment.

This bill's new competitive alternatives, if they succeed, are intended to take us away from this kind of micromanagement. Unfortunately, if the complexity of this bill is any guide, we may yet have a ways to go.

My concerns about this bill are very serious ones. However, on balance, I believe this legislation is a positive step forward for America's seniors, for the Medicare program, for Idaho, and for the country as a whole.

President Bush deserves tremendous credit for making Medicare and prescription drugs a top priority this year, as do Majority Leader FRIST, Senator GRASSLEY, and the other conferees for bringing us to where we are today.

Medicare urgently cries out for a better future, and America's seniors desperately need meaningful prescription drug relief. This legislation moves solidly toward reaching both of these goals, and I urge my colleagues to stand with the President and support its passage into law.

I close by thanking the Senator from West Virginia for his courtesy. I will adhere to our agreement. I yield the floor, and I thank my colleague.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, our friend, the distinguished Senator from Idaho, who serves on the Appropriations Committee, is welcome. I thank him for his kind references to me.

I thank the Chair, Senator CORNYN of Texas, who has had the good fortune of presiding over the Senate on many occasions this year. I say, I have had the good fortune of speaking on almost every occasion that the Senator from Texas has presided over the Senate, and he presides so well. He presides with a degree of dignity and skill and aplomb that is so rare as a day in June.

I also thank my majority whip, the best whip the Senate has ever had. And I have been the whip. I was the whip for 6 years. But I say—I will repeat the words of a great poet—''You're a better man than I am Gunga Din.''

HARRY REID is a better whip than I was, and it wasn't because I didn't do my best. I don't grow lax in any job. Any duty that is placed on me, I do my very best. But he is a jewel, HARRY REID.

Let me thank the Senator from Illinois also, the distinguished Senator, Mr. DURBIN. He is always so gracious, but he can afford to be gracious. He is so able, an inimitable debater. He can speak at the drop of a hat, and the hat won't hit the ground. That man, DURBIN, is a very fluent and ready speaker. I am so pleased that he is my friend and that he is a Senator on my side of the aisle. I thank him for his courtesies on this beautiful morning in November.

It is a beautiful morning. May I say to the young pages who are here so early in the morning:

Ah, great it is to believe the dream
As we stand in youth by the starry stream;
But a greater thing is to fight life through
And say at the end,
The dream is true!

Mr. President, I had hoped to be out here on the floor talking about a plan to give senior citizens a prescription drug benefit for Medicare.

I had hoped to be extolling the virtues of a bill that would give needed relief to the millions of our Nation's elderly citizens who have been serving their country and their communities for so long and who are entitled to needed relief. Instead, the Congress will be voting on a measure that would undermine Medicare—undermine Medicare, I say. Listen to me. Hear me now. The elderly citizens who are watching through those electronic lenses, and also the sons and daughters of the elderly citizens as well, will be affected. So instead of voting on a measure that would give relief to the elderly citizens of this country, we are going to vote on something else.

In speaking of the elderly citizens, I speak of the young people as well. Why do I say that? I say it because I can remember the days when there was no Social Security or Medicare Program in this country. I used to go by the old county poor farm in Raleigh County, and as I traveled by there many years ago I would see sitting on the porch up there at the old county poor farm, sitting just within sight of the road, those old people in their rocking chairs. They had no dreams to look forward to. When they grew old, as some of them did—and those coal miners especially grew old early in life—they had no place to go, no place to go but to the homes of their sons and daughters. They would stand with their hats in their hands waiting to be taken in by their children. What a life.

Then there came to the White House of this country a crippled man, a man who was paralyzed, a man who could not walk, as I can walk even at my young age of 86. There they stood waiting at the gates of their children hoping that they could be taken in. Then that man came to the White House and a Democratic Congress worked with him to give to the people of this country, the elderly citizens and their children, that promise. He fulfilled that promise of Social Security so that no longer would the old folks stand at the gates of their children with their hats in their hands. They could live out their lives with dignity and not be such a burden to their children.

Then I remember Medicare when it came. I was a Member of the Senate and voted for that program. That was when Lyndon Johnson, a great Democrat, was President of this land. Again, the Democratic Congress, working with that Democratic President, gave to the country this program of Medicare, the most successful program that the country has ever had, a program that today's Senators know and trust.

The Congress should be fashioning a real prescription drug benefit. That is what the American people have been told we are doing, but we are not doing that. Instead, the Congress debates a major restructuring and a step toward the privatization of Medicare.

I watched them tearing a building down,
A gang of men in a busy town.
With a ho-heave-ho and a lusty yell,
They swung a beam and a sidewall fell.
I asked the foreman, ''Are these men skilled,
As the men you'd hire if you had to build?''
He gave me a laugh and said, ''No, indeed!
Just common labor is all I need.
I can easily wreck in a day or two
What builders have taken a year to do.''
And I thought to myself as I went my way,
Which of these two roles have I tried to play?
Am I builder who works with care,
Measuring my life by the rule and square?
Am I shaping my deeds by well-made plan,
Patiently doing the best I can?
Or am I a wrecker who walks the town,
Content with the labor of tearing down?

That is what we are doing here. That is what we are about to do. That is what we are getting ready to do. That is what the seniors and their children of this country are about to see happen. This building which was built by

careful hands, by caring hands, is about to be torn down.

This is a debate that has largely been hidden from the public, a debate for which our Nation's seniors did not ask. They did not ask for this.

The conference report before us was hatched behind closed doors. We see so much of that time and again under this Bush administration—programs, plots, hatched behind closed doors. Most Members of Congress have been largely excluded from the backroom deals—largely excluded from the backroom deals—that produced this conference report.

Some have asserted this legislation is merely a Trojan horse designed to get rid of Medicare. I hope that is not true, but there is something awfully suspicious about this particular horse that is galloping through the Congress.

We need to slow down and consider the unintended consequences of this massive bill. We may be signing off on the assisted suicide of Medicare as we know it. This legislation takes the first step to undermine a health care system that has benefited millions of retirees, and it is all happening within legislation designed to enhance Medicare to provide a drug benefit. Proponents are selling it one way but may be doing something quite different. You know the old magic tricks? I can remember vaudeville. I can remember when the vaudeville shows came to those coal camps in the hills of southern West Virginia and the actor would say: Watch my right hand, watch my hand, watch my hand. Don't look at this one. Watch this hand. Don't look at what's going on over here.

There is my friend from Maryland—he knows; he remembers—Senator SARBANES, one of the great pillars of the Senate, one of the truly great Senators, a thinker in the tradition of the venerable Socrates: PAUL SARBANES.

So proponents are selling it one way but may be doing something quite different—a classic bait and switch. But seniors are not falling for the bait. Many letters coming to me clearly reveal a genuine fear that this Medicare bill will leave seniors worse off. West Virginians have not been clamoring for enrollment in HMOs. They don't want restrictions on their choice of doctors. They have not been pushing for a new Medicare system that could leave them bouncing in and out of private health plans. My constituents are rightly fearful at the thought of having to pay significantly higher premiums just to stay in their current Medicare plan.

Some analysts of this bill estimate that as many as 29,000 beneficiaries in West Virginia will lose their retiree health benefits as a direct result of this bill and that as many as 45,000 Medicaid beneficiaries in my State will pay more for the prescription drugs they need. I thought our goal was to help seniors, not hurt them, as this bill may do.

Senior citizens across America are fed up with fast rising drug costs that they cannot afford. They are traveling by the busload to Canada—yes, traveling by the busload to Canada and Mexico—just to obtain the medications prescribed by their doctors. And this bill does nothing, zilch, to help reduce the price of prescription drugs. In fact, this legislation explicitly prohibits the Federal Government from directly negotiating with pharmaceutical companies to use the bargaining power of 40 million senior citizens to lower the cost of prescription medicines. This is something the Veterans' Administration, the Department of Defense, the Medicaid Program do every day to save money on drugs. Why in the world are we prohibiting Medicare from saving money?

Unfortunately, this bill offers more of a figleaf than sufficient prescription drug coverage—a figleaf. Do Senators remember the first question that was ever asked in the history of the human race? It occurred during the evening, during the cool of the day when God came walking through the Garden of Eden looking for Adam and Eve. There they were in that paradise—how it might have been, how it might have been. God came through in the cool of the evening looking for Adam, and it was there and then that God asked that first question:

> Adam, where art thou? Adam, where art thou?

Adam was hiding. Adam and Eve were hiding. They were trying to hide from that all-seeing eye that pierced through every veil. Yes, they were hiding back in the bushes with a figleaf—a figleaf.

That question: Where art thou? These seniors, senior citizens all over this country, are going to be asking their Senators: Where were you? Where were you when the critical moment came?

I hear the siren call: ''You better take it. It's all you are going to get.''

This Senator will never bow to that siren call. And there are others who will not.

Rather than building on the traditional and successful Medicare Program, the measure in front of us would force Medicare beneficiaries to rely on a private, untried, untested, drug-only insurance market for their prescription drug coverage. Is that what our seniors want? Is that what the people of West Virginia want? No. No.

It would cover less than a quarter of the Medicare beneficiaries' estimated drug costs over the next 10 years. The complicated coverage formula has a large, gaping hole smack in the middle, providing zero coverage just when seniors might need that coverage most—a large hole, large enough for Attila the Hun to drive his thousands of horsemen through.

This legislation includes copayments, premiums, and deductibles that may be unaffordable for many low- and middle-income seniors. A closer look at the fine print of this legislation reveals that private insurers could choose to charge seniors double or even triple these amounts. Seniors may find that their premiums could fluctuate dramatically based upon where they live and how healthy they are. At the same time, the Federal Government will be handing over billions of taxpayer dollars to for-profit insurance companies, just to get them to participate in Medicare.

Let's face it, the kind of prescription drug benefit that we have repeatedly promised to our Nation's seniors and they now rightly expect would cost at least $800 billion during the next decade. Drug costs for senior citizens alone are expected to total almost $2 trillion during this same period. Yet the Bush administration and congressional leadership have only set aside $400 billion for a Medicare prescription drug benefit. Although, isn't it remarkable that we can afford to spend $1 billion a week—$1 billion a week—in Iraq?

I will have plenty more to say about that. I made 62 speeches on that gargantuan mistake. I will make some more, the Lord willing.

Missiles? Yes. Medicines? No. Missiles? Yes. Medicines? No.

Where are the priorities of this administration? Where are the priorities of the Congress?

It seems that this Congress is trying to pull the wool over the eyes of our Nation's seniors hoping to claim victory and keep seniors in the dark until they become painfully aware of the fine print in this legislation upon a visit to their local pharmacy—in 2006. That will be my next election year, 2006, the Lord willing.

In the Book of James, we are told always never to say, I will go here, I will go to this city or to that city, I will buy this, or I will buy that tomorrow, but always to say, the Lord willing, I will go to this city or I will go to that city and I will buy this or that. So, the Lord willing, 2006 is my next election day. Eighty-six is not too old. I am 86 years old. Abraham lived to be 175, Isaac lived to be 180, Jacob lived to be 147, Moses, 160; and so on.

Mr. GRASSLEY. He lived to be 120.

Mr. BYRD. Was I wrong on that?

Mr. GRASSLEY. Moses lived to be 120, not 160.

Mr. BYRD. All right, 120. The distinguished Senator from Iowa corrected me. But he won't correct me on this bill. He won't correct me on the tragedies of this bill. But I accept his correction. I will go look it up to make sure.

As lobbyists for the pharmaceutical and health industry swarm all corners of the Capitol, the Congress is on a mad dash to pass this bill before Thanksgiving, regardless of its contents or its flaws, so long as it can be called prescription drug coverage. Unfortunately, when it comes to their

health care security, it appears our Nation's senior citizens will find that they have little for which to be thankful.

I have heard some Senators argue that something is better than nothing. Is that what we are being given? Something rather than nothing? Nothing?

They try to rationalize a bad bill by claiming that this may be our last chance and you had better take it; something is better than nothing. They argue that we should vote for this now and fix the bill's problems down the road. I have been down that road. I have seen that and heard that many times in my 51 years in Congress. This conference report is a pill that is too bitter to swallow.

I am one of perhaps only a handful of Senators in this body who voted to create Medicare. I can say to you, Mr. President, that it was not created overnight. It was not created in the hidden dungeons, in the hidden subterranean caverns under this Capitol. It was created in response to a private sector that would not offer affordable and reliable health insurance to the elderly and the disabled.

Few can argue that seniors are not better off today as a result of Medicare. We should not turn our backs on one of the most successful Government initiatives ever created. We should seek ways to strengthen Medicare, not dismantle it.

Senior citizens who need life-sustaining medicines want us to get it right. They trust us to get it right. We should reject this bill and work to pass a bill that does get it right. Thanksgiving is an arbitrary deadline. It means nothing when measured against the potential damage that could be done in haste—haste that could jeopardize the health care security of generations to come. We should do better for our senior citizens. We owe them that much.

In closing, I thank Senators who have worked hard on this bill, Senators who have toiled late into the nights and weekends. I thank Senator GRASSLEY. I thank Senator BAUCUS. I thank all Senators. I thank all Senators for listening.

By the way, as to Joseph, how long did he live? He lived to be 110 years old.

The PRESIDING OFFICER (Mr. BENNETT). The Senator from Nevada.

UNANIMOUS CONSENT AGREEMENT

Mr. REID. Mr. President, I am sure the Chair can protect the majority if there is a problem. We need to get this unanimous consent agreement, which has been approved by both sides.

I ask unanimous consent that the time until 11 o'clock tonight be equally divided between the opponents and proponents; provided that when time expires on either, it be in order for either side to consume additional debate time; further, that the debate time used beginning with Senator KYL's statement this morning be counted against the time allotment. I further ask unanimous consent that notwithstanding the order for an alternating fashion following the remarks of Senator DURBIN, it be in order for two Republicans to speak consecutively, one Senator for 20 minutes and the other Senator for 15 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Mr. President, further, so Senators will have some understanding as to when they can speak, I ask unanimous consent that the Democrat order be Senators STABENOW and REED of Rhode Island following Senator DURBIN, and that the Republicans be Senators SNOWE, CORNYN, COLLINS, BENNETT, HATCH, BOND, NICKLES, and GREGG.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

Mr. DURBIN. Mr. President, before saying a few words about this Medicare bill, I would like to say a few words about the senior Senator from West Virginia. This man is such an amazing person. At 86 years of age, what he brings to public service and what he brings to the Senate is incredible.

I was in the Chamber earlier this morning when Senator BYRD arrived. He said he would like to say a few words. I said, quite honestly, I am ready to follow you into battle any day. I deferred to him, which I was happy to do. He is a grand person and such an amazing Senator.

I have been fortunate to represent a congressional district in Illinois and the State of Illinois for over 20 years on Capitol Hill, and I have many favorite moments. But in the top tier of those favorite moments was the time in a conference committee downstairs from this Chamber involving Senator BYRD, and I would like to tell those who are following this debate about that experience because I still marvel at what he did that day.

He came to a conference committee on the Transportation appropriations bill facing a critic in the House who said that Senator ROBERT C. BYRD of West Virginia had put too much in this bill for the State of West Virginia. And your critic from the House was going to have his day with you at that conference committee.

As some people know who follow the Senate, the appropriations conference committees gather at a large, long table and the House Members sit across the table directly from the Senate Members. So your critic in the House came and took his seat with a sheaf of papers prepared to do battle with you over the Transportation appropriations bill. You arrived and just fortuitously happened to sit directly across from him at that table. He began his peroration about how terrible it was that West Virginia would have so much in this Senate bill and he was going to do something about it. He went on for all of 15 minutes. He got red in the face, his arms were waving, and finally he was spent. He had nothing more to say.

Then, as I recall, you turned to the chairman—which could have been Senator Hatfield of Oregon—and asked if you could be recognized.

The Senator began his remarks, and that is what I thought was the most remarkable moment, saying, in the history of the United States there is an exchange of speeches between two individuals which defined Federalism as we know it and the role of small States like West Virginia in the Senate and larger States. That exchange was between Daniel Webster and Robert Hayne.

Senator BYRD went on to say, Webster's reply to Mr. Hayne was delivered on January 20, 1830. And then Senator BYRD added, ''and if my memory serves me, it was a Thursday.'' He proceeded to give an important history lesson to all who had gathered, Members of the House and the Senate, about why West Virginia had a fighting chance in the Senate but might not have that same chance in the House, as each State has two Senators, of course, in this Chamber, and represented proportionately in the House.

I was absolutely spellbound by his performance that day in that small room. When it was all over, of course, West Virginia fared well in that appropriations bill, as it always has since Senator BYRD has been here to make sure his State was not shortchanged. I was in the House at the time, and a few years later I came to the Senate and said to Senator BYRD: Of all the things you said in the speeches, when you said, ''If my memory serves me, it was a Thursday,'' I still remember those words.

Senator BYRD said: Well, Mr. DURBIN, if I am not mistaken, it was a Thursday.

I said: I am not questioning you; I am sure it was a Thursday.

Later in the day, he called me over to his desk and pulled out a perpetual calendar, and said, yes, January 20, 1830, was a Thursday.

It says a lot about this Senator, not only his reverence for history and this institution, but the fact that he brings to many of these political battles an insight that many Members admire so much and respect. Whether you are on his side or not, you best sit back and listen closely when Senator BYRD takes the floor because he brings to each one of these debates the very best in public debate and the very best in public service.

This Senator was happy to step back and listen very carefully as the Senator from West Virginia made another compelling argument on a very important and historic piece of legislation.

Mr. SARBANES. Will the Senator yield?

Mr. DURBIN. I am happy to yield.

Mr. SARBANES. I listened to the able Senator from Illinois with great pleasure because I strongly share his feeling and views about Senator BYRD. I took the floor for a brief moment to underscore the extraordinary contribution that Senator BYRD has been making to the national debate in the recent period on issues of critical national importance. He has taken to the floor time and time again and spoken with a clear strong voice. He has sounded a clarion call to the country. I know from people I talk to that voice is reaching into many corners across the land and prompting Americans to think deeply about the issues that confront the Nation, and even more deeply and fundamental about how we go about conducting our business and making these decisions.

The vote last night in the House of Representatives was held over for 3 hours in order for the Republican leadership to twist arms in order to change the outcome, which was already up on the board, where they had lost by two votes. That rollcall vote was held open indefinitely. My able colleague from Maryland, Congressman HOYER, remarked afterwards, it would be as though you had election day, the time came for the polls to close, and you held the polls open for another 15 hours while you went out and somehow found the votes to assure you the result. It is an abuse of the democratic process.

The Senator from West Virginia has always spoken. He sounded a loud trumpet about our Nation. We are deeply in debt to him and appreciate that.

Mr. DURBIN. I thank the Senator from Maryland. I might just add something I have said in the Senate and I told Senator BYRD during the debate on Iraq. I went to my church in Chicago with my wife—this is highly unusual in my church—as we came back from communion, and we are kneeling, an elderly man came up to me and leaned over on his way back from communion and he said: Stick with BOB BYRD.

I came back to tell Senator BYRD that his message reached beyond this Chamber and beyond the State of West Virginia. It has been not only heard, but it has been applauded by the Nation of grateful people who are glad you are here in service to our country and continue to be. If you reach the age of Methuselah, Abraham, Isaac, or Moses, I hope I am still here to defer to you and listen carefully as you make these presentations.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. DURBIN. I am happy to yield.

Mr. BYRD. Mr. President, I am deeply grateful to these two fine Senators for the kind words they have just spoken, Senator DURBIN and Senator SARBANES. I will go to my everlasting resting place with love and gratitude and affection and admiration and respect for these two Senators and how they have served the Nation and this institution and been loyal and true to the Constitution of the United States forever. I shall think of them and be in their debt. I thank the Senator.

Mr. DURBIN. I thank the Senator from West Virginia.

The Senator from West Virginia, when he came to the floor, gave us an important message. He asked us to look at this very carefully. This, my friends and fellow colleagues, is a proposed law. It is huge. But that is not uncommon. And that should not be a reason to vote against it. The reason to vote against it is what is contained in this law, this proposal, this bill.

When we started this debate about prescription drugs for seniors, overwhelmingly the President, the Republicans, Democrats, all agreed on one thing: We needed to find a way to provide affordable prescription drugs for senior citizens. Medicare, as good as it is, provides good care through hospitals and doctors but not enough help when it comes to paying for prescription drugs. We understood that needed to be done.

The solution was obvious from the start. The solution to this challenge was to put under the Medicare Program a voluntary, comprehensive, and universal plan to pay for prescription drugs, to use the same successful model that has guided us for 40 years in keeping seniors healthy through good doctors and good hospitals, and also provide prescription drugs. We knew if we did that, it would work as Medicare has worked. The proof of Medicare's success is the fact that seniors are living longer, they are healthier, they are independent, and they are strong.

But there was a criticism of using this so-called Government approach. The criticism came from political extremes that argue that the Government shouldn't be involved, and also from the pharmaceutical industry which understood full well, if Medicare could bargain for seniors across America, Medicare could bring down the prices of prescription drugs just as the Canadian Government has brought down the price of those same drugs for its citizens.

The pharmaceutical companies lived in dread that Medicare would be able to have cost control and competition and bring down the price of drugs.

So we started on this convoluted path to find an alternative. The first suggestion was, why not let private insurance companies provide this prescription care benefit? Let them compete. There is nothing wrong with that from this Senator's point of view. If private companies want to offer prescription drug benefits and compete with Medicare, so be it. Let's see what happens. Let's see if that competition will also help seniors.

But they said, wait a minute, we are not wanting these private companies to compete with Medicare. We want Medicare out of the business of competition completely. That was the starting point for the Republican approach to prescription drugs. Of course, the pharmaceutical companies applauded this because if they do not have to answer to Medicare with 40 million Americans under its protection but, rather, to smaller companies, they have more bargaining power. So we went through this long exercise in the Senate about this proposition that private insurance companies would somehow provide prescription drug benefits to seniors.

I offered an amendment on the floor, supported by most of my colleagues who are here today, that said: Give Medicare a chance to compete. We did not prevail. In fact, we did not get any votes from the other side of the aisle. The Republican approach to this from the start was to say they believed in Medicare, but then to turn their backs on Medicare when it came to prescription drug benefits.

Well, eventually we were faced with the prospect, in the Senate bill, of either accepting their approach, and moving toward prescription drugs for seniors, and passing it out of the Senate, or doing nothing. Most of us voted to move the bill forward and into the conference committee. But, sadly, that was not the end of the story.

When it came to the conference committee, there was a new political force at work, not just the people who wanted to keep Medicare out of the prescription drug business but a new group from the House of Representatives with a much more radical agenda. What they wanted to achieve was not just private insurance companies offering prescription drug benefits, they, in fact, wanted to privatize Medicare itself.

We started by wanting to add a benefit to Medicare, and now the House Republicans, and their cohorts in the Senate, have said: We want to change Medicare. We want to make certain that Medicare as you know it will not be there in the future.

One of the proponents of this point of view was former Speaker of the House Newt Gingrich, who this week came to the Republican House caucus and said: Vote for this bill; this is a good bill. That should be proof positive to anyone listening that this is a bad bill. Because it was that same Speaker Newt Gingrich, whom I served under in the House, who said, at one point, that we should allow Medicare to wither on the vine. There was no personal or political commitment by Speaker Gingrich to Medicare. And for him to endorse this huge bill is proof positive to me that within the four corners of this bill are

threats to Medicare we need to take seriously.

This morning, as I came to the office, on Saturday, I had an e-mail from one of my staffers who fields the phone calls that come into my office. She wrote and said: Senator, something unusual is happening out there. When you first started debating prescription drugs under Medicare a few months ago, the phone calls were generally positive. Seniors were saying: Let's do it; we have waited too long. But she said: Something's happened. There is a sea change out there. The phone calls are overwhelmingly negative now.

Seniors have come to understand this bill not only does not give them good prescription drug coverage but it is a full-scale assault on Medicare itself, and they are calling every office, congressional and senatorial office alike, saying: Defeat this legislation.

Now, doesn't that tell us something? Doesn't it tell us something, that what we started off in believing—that seniors wanted prescription drugs—has now been rejected by them when they learned what is at stake? And there is a lot at stake.

This bill will raise Medicare premiums, something which lower income seniors will find very difficult to deal with. It will force seniors into HMOs. And you know what that means. That means insurance companies will pick their doctors and their hospitals for them and say that they will lose the right to choose their own doctors and hospitals.

Of course, that is the grand old Republican plan: that Medicare as we know it would change; that, instead, we would be dealing with HMO insurance companies. And I can tell you, I have yet to run into a senior citizen anywhere who endorses HMOs, nor many doctors who believe they are very good when it comes to quality health care. Yet that is the solution that is being offered here.

It is not bad enough that my friends on the Republican side of the aisle have said they want to move toward private insurance companies and privatizing Medicare. They do not even believe in the value of the free market in this experiment. Because they are not saying to HMOs: We want to open the door and give you your chance to compete. No. They are coming through with more than $10 billion in Federal taxpayers' subsidies to be given to these HMO insurance companies so that they capture more and more seniors out of Medicare.

Think of that. The Republican free market, entrepreneurial spirit that is being sustained by a $10 billion Federal slush fund for HMOs so they can take more and more seniors out of Medicare.

What is even worse, as they draw seniors out of Medicare, they will look for, as most insurance companies do, the healthiest of the seniors, leaving behind the poorest and the sickest seniors in Medicare, meaning that the costs of Medicare per person are going to go up, and Medicare will become more expensive, and perhaps less popular from a budget point of view.

That is the grand plan here: Starve Medicare; have it wither on the vine. Newt Gingrich's vision for Medicare is finally realized in this 1,200-page bill. Speaker Gingrich rides again. He has prevailed. His was the voice that prevailed when it came to the contents of this bill.

Sadly, too, this bill will eliminate drug coverage for millions of Americans. We have had a Congressional Budget Office review of what happens when this bill goes into effect.

Mr. President, 2.7 million retirees will lose the private insurance coverage they currently have. Understand who these people are. These are people who have worked for a lifetime for a company, with the understanding they would receive a retirement benefit which included prescription drug coverage. And when this goes into effect, this proposal that has been brought before us, the Congressional Budget Office and other sources tell us 2.7 million Americans will lose their prescription drug coverage. They may lose all of their health coverage during retirement.

Over 100,000 of these unlucky retirees are in my State of Illinois. For them, if for no other reason, I will be voting no on this. I will be voting no because, frankly, we are basically saying: We want to reward HMOs. We want to reward pharmaceutical companies at the expense of people who have worked a lifetime for security in their retirement and will lose it because of this bill.

How can we, in good conscience, stand here and say we are going to create a mechanism where companies will have the rationale and the opportunity to drop their retiree health care coverage? That is sad. Medicare was created because seniors across America did not have a helping hand when it came to doctors and hospitals. And now, in this effort to privatize Medicare and reward the big drug companies, we are going to provide less coverage for seniors across America.

Let me speak for a moment about the pharmaceutical aspect of this bill. We know if we have competition, we can bring prices down. We also know if the Government shows leadership, as they have in Canada, prices of drugs will come down. But the pharmaceutical companies have prevailed. The pharmaceutical companies have won the argument.

The most important question asked about any piece of legislation before the Congress is this: Who wants it? Who wants this bill?

First and foremost, the pharmaceutical companies want this bill because there is no effort to bring down the cost of drugs that American families and seniors have to pay—no effort whatsoever.

We had a provision included that called for generic drugs, one way to try to get good drugs that are lower priced in the hands of seniors, and it was weakened dramatically in the conference. We had an opportunity, through a provision proposed by the House of Representatives, for reimportation of drugs from Canada and Europe so seniors had a chance to get a break there if they could not afford the drugs here in the United States. That was dramatically weakened, too. And the Bush administration has vowed they will never let it happen, they will not allow reimportation to happen.

So if you do not have generics encouraged, and you do not have reimportation, and Medicare is not competing for cost, what it means is the pharmaceutical companies have their prayers answered, their dreams come true. They will continue to hike the cost of pharmaceuticals and drugs, and this Government and this bill will do nothing to stop it, and seniors across America will find this so-called prescription drug benefit of little or no value as time passes. Because if the cost of drugs goes up 10 or 15 percent a year, no matter what the Federal Government offers, in the end, there is little to show for it—less and less each and every year.

Mr. SARBANES. Will the Senator yield for a question?

Mr. DURBIN. I am happy to yield for a question from the Senator from Maryland.

Mr. SARBANES. Am I correct in my understanding that under this bill, the Government, through Medicare, could not, in fact, bring its weight to bear in order to lower the cost of prescription drugs through a buying program, where they are a heavyweight in the scale—that the bill actually precludes that from happening?

Mr. DURBIN. The Senator is correct because Medicare is not given the option of offering prescription drug coverage here, an option which most seniors would gladly endorse. And the reason is obvious: If Medicare can bargain on behalf of 40 million Medicare recipients, it has the bargaining power to bring down the cost of drugs for seniors. The pharmaceutical companies hate that concept, ''like the devil hates holy water,'' to quote our old friend Senator Bumpers, who used to say that on the floor from time to time.

They don't want competition. They don't want cost control. They have won the day.

The Senator from Maryland has turned on his television at home in the last few days and weeks and maybe heard his name mentioned on television commercials that are being paid

for by the pharmaceutical companies saying: Senator MIKULSKI, Senator SARBANES, vote for this bill. They are spending millions of dollars saying vote for this bill because this bill will mean millions and millions more in profit for those same pharmaceutical companies.

Mr. SARBANES. Will the Senator yield for a further question?

Mr. DURBIN. I am happy to yield.

Mr. SARBANES. In addition to precluding the Government from bringing its weight to bear in purchasing in order to lower the cost of drugs because they would be a very big purchaser and obviously they would have an impact, some have said: Well, let's at least allow for the reimportation of drugs from other countries, particularly Canada. Some of our people have been going to Canada in order to get their prescription drugs. They cross the border, and they can buy them at 40, 50, 60 percent less than they pay in this country. So there were provisions that passed to allow reimportation. Am I correct that, in effect, this bill eliminates that?

Mr. DURBIN. The Senator is correct. This bill gives the last word to the Bush administration and the head of the FDA who have said categorically they are opposed to reimportation. The reason they are opposed is that it would be more competition for pharmaceutical companies that want to charge higher prices in the United States. I have believed all along that we are not importing drugs from Canada, we are importing leadership from Canada. The Canadian Government has stood up for its citizens and said: We are not going to allow the drug companies to raise their prices every single year. This Government, this Congress, refuses to show the same leadership, and now is effectively blocking the reimportation of drugs that seniors need to survive.

Mr. SARBANES. Will the Senator yield for a further question?

Mr. DURBIN. I am happy to yield.

Mr. SARBANES. I also understand there was an effort to clear the path for generic drugs to become available. Of course, generic drugs sell at a lesser cost than brand name drugs. A lot of the pharmaceutical people are opposed to that.

It is also my understanding that this bill fails to carry through on the efforts to make it easy to bring generic drugs to market. Am I correct in that respect?

Mr. DURBIN. The Senator from Maryland is correct. It is another success story for the pharmaceutical industry because they bring the drugs to market, brand name drugs, under patent, and during a period of time they have a right to sell them exclusively in America. But when that patent runs out, then other companies can make that same drug and sell it, usually at a much lower cost. So the pharmaceutical companies that make the brand-name drugs found ways to delay the process so that the generic drugs could not replace the brand-name drugs, so they could continue to make millions and millions of dollars off the brand-name drugs even when their patents expired. We changed that in the Senate.

We put in language that said we are going to move toward generic drugs so consumers can have affordable drugs. And, frankly, in conference committee, the pharmaceutical companies won again, another reason they are running ads about this Senator and the Senator from Maryland saying vote for this bill right now, because they know it means more money to an industry that is already the most profitable industry in America.

Mr. SARBANES. Will the Senator yield for one final question?

Mr. DURBIN. I am happy to.

Mr. SARBANES. I hate to intrude on his time, but this is a very important point. With this legislation, the pharmaceutical companies have, in effect, slowed the ability of generic drugs to come to market, which would be one source of competition that would lower their prices. The reimportation provisions have been written in such a way that it is completely in the hands of the administration whether reimportation of drugs, say, from Canada is allowed. The administration has been very clear that they are opposed to doing that. The legislation also, in effect, knocks out the Government from being a direct purchaser and controlling the prices.

Every source that potentially could exercise some pressure or influence on the pharmaceutical companies to lower or restrain their prices is being blocked out by this legislation. So the end result is that it is an absolute bonanza for the drug companies. Would you say that is a reasonable perception of what this legislation does?

Mr. DURBIN. I would say the Senator from Maryland is correct. I would refer him to a Bloomberg News article yesterday with the headline ''139 Million Dollar Lobby Blitz Thrown at Medicare Bill.'' And it leads by saying:

> Health care companies, led by drug makers Merck & Co. and Eli Lilly, spent a record $139.1 million in six months to lobby Congress on a Medicare bill that will help the elderly buy prescription medicines. The pharmaceutical companies were the biggest spenders in the health care industry putting money into this lobbying effort.

The Senator knows, as I do, that if you find pharmaceutical companies working feverishly night and day to pass this legislation, it isn't because they want to make less money. They want to make more money. So we have the GOP, which could now be the acronym for the Greedy Old Pharmaceutical companies; that is what is pushing this legislation. That is proof positive that the seniors will be the losers.

The seniors understand that, as do families across America. It isn't bad enough that it is just pharmaceutical companies that are going to make out so well. The same thing is true about HMO companies, the HMO insurance companies with the more than $10 billion Federal slush fund so they can compete with traditional Medicare, $10 billion, and a reimbursement level of 109 percent for these same companies for their expenses while they are competing.

Then to add the crowning touch is something called health savings accounts. I would say to the Senator from Maryland, you are going to recognize this song after I sing a few lyrics. A company called Golden Rule Insurance Company, originally out of Evansville, IL, now based out of Indianapolis, with a man named Mr. Rooney as its CEO, has been locked at the hip with the Republican leadership on Capitol Hill since Speaker Gingrich took over in the House. That is when they dreamed up this idea of medical savings accounts and said: Here is the wave of the future. We can replace health insurance as we know it with the Golden Rule model of medical savings accounts, resulting in our efforts in 1996 of a demonstration project to so see if this flawed concept would work. So few people were interested in signing up for it, it was a failure on its face.

Guess what. In this bill there is a $6 billion subsidy for health savings accounts. In other words, not only are we guaranteeing record profits for pharmaceutical companies, not only are we creating a $10 billion slush fund for HMOs to take seniors out of Medicare, we are putting $6 billion into this boondoggle health savings account. I was on the floor watching the Energy bill yesterday and thinking it was scandalous that we were putting $2 billion into the MTBE and oil industry—$2 billion. They did us better with this bill. The Republican conferees came back and said: Let's up the ante; let's make it $6 billion to subsidize this crazy concept of health savings accounts engendered by the Golden Rule company, one of the greatest benefactors of the Republican Party on Capitol Hill. If that isn't proof positive that this bill has gone astray, I don't know what is.

I say to seniors who continue to call congressional offices, keep the calls coming in. Let me suggest to them as well that if many of them happen to be members of AARP, here is that telephone number. Call your friends at AARP, ask Mr. Novelli, who has endorsed this boondoggle, why in the world has he turned his back on seniors? Why is he not fighting for more competitive drug prices? Why isn't he trying to stop the HMOs from privatizing Medicare? And why are we

putting a $6 billion subsidy in here for friends of the Republican Party, the Golden Rule Insurance Company. I think seniors across America get the message.

There was just a poll taken this week of members of AARP, which I hope Mr. Novelli will have a chance to read.

The poll shows that once seniors have been told what is in this bill, 65 percent of the members of AARP said they should stop trying to pass this bill and work for a better plan, and only 18 percent of the members of AARP supported it. So by a margin of almost 4 to 1, the members of AARP are saying to their leadership: You have it wrong.

I think, frankly, it is a burden now on AARP to come back to its roots and decide whether it is going to stand up for seniors or for pharmaceutical companies and HMOs. I hope the seniors across America who are as upset about this as many of us are will call AARP and tell them to stop spending millions of dollars trying to pass this bill. Instead, they should try to save Medicare first, and they should say basically don't sell out the seniors of America.

AARP is now in lockstep with these pharmaceutical companies and HMOs. They have forgotten their mandate, which is to stand up as a voice for seniors across America. That is unforgivable. I think they are going to find a lot of their members tearing up their cards and walking away from this organization. It has become very political and insensitive to the seniors across America.

Mr. SARBANES. Will the Senator yield for a question?

Mr. DURBIN. Yes.

Mr. SARBANES. The Senator made reference to a better bill. The very able Senator from Illinois, in the course of debate in the Senate, offered a better bill, which I was very pleased to support. That bill would have been a very significant and substantial step forward. Among other things, it did not have this ''donut'' in coverage that is in this bill.

As I understand this bill, at a certain point—I think $22.50 in drug cost—and beyond that, up to $3,600, the burden falls back on individuals; is that correct?

Mr. DURBIN. The Senator is correct.

Mr. SARBANES. In the Senator's bill that didn't happen; is that correct?

Mr. DURBIN. That is correct. This is a moving target. The fact is that there is a gap in coverage for prescription drugs built into this proposal so that the sickest seniors with the highest prescription drug costs will find some coverage on the front end of the year for their illness and then find themselves paying out of pocket $2,850, if I am not mistaken, before they get more coverage from the prescription drug benefit. So this so-called donut hole is one that I think seniors who are really sick and those who need expensive drugs should be aware of.

The bill we offered said Medicare will come in and compete for lower drug costs and the savings we can gather for lower drug costs will close this donut hole.

Mr. SARBANES. Will the Senator further yield for a question?

Mr. DURBIN. Yes.

Mr. SARBANES. Would we not also have been able to not have a donut hole if these moneys the Senator made reference to that are going to the HMOs—the $10 billion, I think you said—

Mr. DURBIN. Yes, a $10 billion slush fund for HMOs.

Mr. SARBANES. Also $6 billion—

Mr. DURBIN. Yes, for health savings accounts, for their buddies at Golden Rule.

Mr. SARBANES. So that $16 billion could have been taken and put directly to improve the benefit for our seniors, could it not?

Mr. DURBIN. The Senator is correct. The Senator starts with the same premise I do—that seniors are most comfortable with Medicare. If this started off as an added benefit to Medicare, this bill would have been much smaller and more understandable and supported by seniors. But when they rejected that and said, we are going to go to private companies, they really opened up all sorts of problems. They guaranteed profitability, put in slush funds, and they complicated it to the point where most seniors will struggle to understand it. This didn't have to be the case.

When you are out to privatize Medicare and reward pharmaceutical companies and help HMOs, that is where you end up.

Mr. SARBANES. As I perceive it, all of these things that are being done—the HMOs, the medical accounts, the limitation on Medicare being able to act directly, and so forth—if this stack of papers on the desk represents the Medicare Program itself, they are circling around it to undermine and undercut it. This bill has taken on an added fundamental dimension.

So as we look at this bill, we have to look at not only its shortcomings in adding prescription drugs to the Medicare Program, but we have to perceive that built into the bill are a number of efforts being put into place that will undercut the Medicare Program itself. Is that a reasonable view of the potential of this legislation?

Mr. DURBIN. The Senator is correct. There are those who began this debate saying: We are going to change Medicare. Well, they had their way. Many came here saying: We want to help seniors pay for prescription drugs. If we had stuck to our original goal and focused on what seniors really want and what works, I think we would have achieved this result through Medicare a long time ago. It would have been at the expense of the profitability of pharmaceutical companies.

I say to my friend, who follows some of these corporate reports more than I do, this pharmaceutical industry is the most profitable in America. Look at this chart. Profits as a percentage of revenue in 2002: No. 1, pharmaceutical companies, with 17 percent return on revenues. Return on assets: No. 1, pharmaceutical companies, with 14.1 percent. Then they were nosed out when it came to return on shareholders' equity by household and personal products, but they are still No. 2, with 27.6 percent profit as a percent of equity.

This bill is giving them more profit at the expense of families and low-income seniors in America. That is why the pharmaceutical companies are spending millions of dollars for television, radio, and newspaper ads telling this Congress to ''do our bidding.'' That is why they already spent $139 million lobbying Congress to pass this bill.

If the pharmaceutical companies wanted to help seniors, they could have done this long ago. They could have charged more reasonable prices, particularly to low-income seniors. But that isn't their goal. Their goal is more profitability. Sadly, they found allies with the Republican majority who are attempting to pass this bill and make certain they are more profitable.

Mr. SARBANES. If the Senator will yield on that point, in confirmation of the Senator's analysis, the markets, in the last few days, have been boosting the price of the stocks of the pharmaceutical companies. The perception in the capital markets of the smart money people is that this legislation is going to significantly benefit the pharmaceutical companies, and they are building up the stock prices, which only goes to confirm and corroborate the analysis the Senator from Illinois has made on this issue.

Mr. DURBIN. The Senator from Maryland is correct. I will make this one last reference as I see colleagues in the Chamber who want the floor.

Represented on this chart are the compensation packages for the HMOs. This is another group that is benefiting. The $12 billion slush fund will be going to HMO companies such as these on the chart. They will leave poor and sicker people behind. There will be a $12 billion slush fund and some more benefits given to HMO companies. Look at the compensation for the executives. It runs from the obscene at Oxford, where Norman Payson gets $76 million.

Mr. SARBANES. Is that per year?

Mr. DURBIN. Yes. Mr. Payson had a very good year. Alan Wise at Coventry gets $21.6 million. This man must be really gifted if he is worth that to run a managed care company, which is now going to be in the category of companies eligible for the $10 billion Federal subsidy.

Down here is United Health Group, where R. Channing Wheeler is getting

$9.5 million. I bet he was embarrassed going to the country club with his friends and only making $9.5 million.

Incidentally, United Health Group—do I remember that name from the AARP newsletter? Yes. It turns out they are in business together. It turns out that AARP, which is for this bill, is in business with United Health Group, a managed care company. Frankly, as I understand it, 60 percent of the revenues of AARP come through their insurance and advertising. Is it any wonder that AARP is pushing for this bill, when seniors are opposed to it?

I want to close because I see other colleagues in the Chamber. I say to seniors across America: If you have received your AARP solicitation and sent back your membership card, please call AARP at 1–800–424–3410. Tell them to stand up for seniors for a change, to reject this bad bill that won't result in lower prescription drug costs and will privatize Medicare.

Tell them you are opposed to a slush fund that is being created for HMOS. Tell them you think it is scandalous that we give $6 billion to Golden Rule for health savings accounts. And tell them it is time for your organization, AARP, to stand up for seniors and stand up for Medicare instead of caving in to the special interest groups and supporting this legislation.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader.

REMEMBERING PRESIDENT JOHN F. KENNEDY

Mr. FRIST. Mr. President, we discussed this morning that we will have a moment of silence at 12:30. I request we have a moment of silence.

The PRESIDING OFFICER. The Senate will observe a moment of silence.

(Moment of Silence.)

The PRESIDING OFFICER. The majority leader is recognized.

Mr. FRIST. Mr. President, this moment of silence gives us an opportunity to reflect in a way that expresses our deep respect and also an opportunity to contemplate how we can capture what happened in the past and those lessons of the past and project them to the future but also in terms of carrying out our responsibilities in the Senate.

The PRESIDING OFFICER. The Democratic leader.

Mr. DASCHLE. Mr. President, for those of us who are old enough to remember President Kennedy, November 22 is always tinged with a sense of sadness and loss. Today, on this 40th anniversary of President Kennedy's death, we are especially aware of that loss.

One floor above us, in a corridor leading to the House side of the Capitol, there is a wonderful exhibit by a longtime Senate photographer named Arthur Scott—''Scotty.'' He was an official Senate photographer from 1955 until his death in 1976.

One of my favorite of his photos up on the third floor shows a very young-looking Senator John Kennedy playing catcher in a baseball game with other Senators in 1958. Scoop Jackson is at bat and Mike Mansfield is umpiring. John Kennedy looks more like a staffer than a Senator.

About 12 feet down that same hall hangs another photograph. This one was taken on January 20, 1961. It shows a smiling, older-looking JFK walking into the Rotunda shortly before he was sworn in as President. Next to that is another photograph, also taken in the Rotunda. It shows a grim-faced Everett Dirksen with his arm around the shoulders of Hubert Humphrey as the two men walk past President Kennedy's casket in November 1963.

Only 5 years passed between that first photograph and the last. Only 1,000 days elapsed between John Kennedy's inauguration and his death. Not long at all. Yet, 40 years after that terrible day in Dallas, President Kennedy remains vivid in our memories and he continues to inspire even people who were not yet born when he died.

There are many reasons for this, I believe.

John Kennedy believed that politics can be a noble profession. Many of us in this Senate are here, in part, because we were inspired by his belief and his example. That is certainly true of me. That belief was also shared by his brother Robert, and it continues to be demonstrated today by his last surviving brother, our friend and colleague, the senior Senator from Massachusetts.

Another reason that President Kennedy remains such a force in our national life is that he inspired us to be our best possible selves.

He led by appealing to our better instincts, not our base fears. He showed us that we need not fear great challenges, as when he said America chose to go to the moon not because it was easy, but because it was difficult. He understood that there is almost nothing Americans cannot achieve when we are united and willing to sacrifice and work together toward a common goal.

John Kennedy was, indelibly, the grandson of immigrants. He was deeply grateful for the freedoms and opportunities that America affords. But he also understood that, with rights come responsibilities. As he said so often, ''To those whom much is given, much is required.''

President Kennedy understood that the most powerful weapon America possesses is the power to do good in this world. And he transformed that belief into the Peace Corps.

President Kennedy understood that we are all connected to each other, as he said to the Soviet Premier Nikita Khrushchev when the two leaders began negotiations on the first limited nuclear test ban treaty following the near-cataclysm of the Cuban missile crisis. ''In the final analysis, we all share the same planet, we all breathe the same air, we all cherish our children's future.''

Today, thousands of people are expected to visit President Kennedy's grave in Arlington National Cemetery. They will file past that eternal flame. But we don't need to go to Arlington to pay our respects to John Fitzgerald Kennedy. That eternal flame also shines in the hearts of every American and every person on Earth who recalls what President Kennedy taught us in his too-brief life and who tries to live those lessons today.

Finally, Mr. President, I want to say a word about my friend, Senator KENNEDY. I know this is a sad day for him.

In the drawer of every desk on this floor are the names of the Senators who occupied these desks before us. I suspect we have all had the experience of seeing those names and thinking what an awesome responsibility it is to follow in such footsteps. In the drawer of Senator KENNEDY's desks are the names of two of his brothers, John and Robert. I am grateful to my friend that he chose to follow in his brothers' footsteps, despite the pain that public service has brought him and his family. It is an honor to work with him. America is better for the Kennedy family's service and sacrifices.

I yield the floor.

MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003—CONFERENCE REPORT—Continued

Mr. REID. Mr. President, I ask unanimous consent that the next Democratic speaker following Senator REED of Rhode Island be Senator HARKIN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Maine is recognized. Does the manager of the bill seek recognition?

Mr. GRASSLEY. Mr. President, I ask unanimous consent to speak for 4 minutes and that Senator SNOWE and Senator CORNYN not lose their right to speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I want to speak a lot longer to respond to what the Senator from Illinois has said because there is so much that can be so successfully rebutted. I will speak to two or three very obvious statements that are wrong.

The first one is that the Senator from Illinois has never run into a senior who endorsed HMOs. Forty percent of the seniors in Miami are voluntarily in Medicare+Choice. That is an HMO. And 6 percent of the seniors in his own large city of Chicago are members of HMOs. They are there because they

want to be there. They can get in or, if they leave the area in which they live to go someplace elsewhere and they don't have HMOs, they are going to have fee for service. These seniors are there because they want to be there.

That brings me to the point that a major portion of this legislation is the right of seniors to choose. Seniors who want prescription drugs can have them or they don't have to buy into it if they don't want to. If they want to keep fee-for-service Medicare just as it is, they can stay there. They do not have to go into any of the new programs that we provide in this bill. They have the right to choose.

I believe members of the other party don't believe that seniors ought to have the right to choose because their response to Government health programs for seniors or others is more Government, more Government, more Government.

Another obvious point that was made that ought to be rebutted is the question about the AARP becoming so political. Why does the AARP support this legislation? ''Seniors are the losers.'' The AARP speaks for 40 million members. Why is it that this year when we are dealing with bipartisan legislation and the AARP backs it that they are political, but last year when they backed the Democrats in their efforts to have a partisan bill, the AARP, at that point, was not partisan?

I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from Maine is recognized.

Ms. SNOWE. I thank the Chair.

Mr. President, today we stand at the precipice of opportunity. Culminating a decade of work, we have before us legislation that will forever change the face of Medicare, providing every senior in America with a prescription drug benefit under the Medicare Program that will experience the largest expansion in its 38-year history.

We would not have arrived at this day without the exceptional commitment by Finance Committee Chairman GRASSLEY to advance this issue and to meld the considerable policy and political differences that have marked the development of this legislation. His efforts were nothing short of Herculean from the outset and guided us through a very challenging and contentious conference committee over the last 4 months.

He, as well as Ranking Member BAUCUS, have remained committed to the bipartisan principles that forged the Senate legislation which garnered the support of 16 members of the Senate Finance Committee, as well as in the overall passage of the legislation last June of 76 Members of the full Senate.

I also wish to recognize the outstanding leadership of the President who, in 2001, challenged Congress to enact a Medicare prescription drug benefit, propounded a set of principles, and has provided strong impetus during this home stretch for Congress to complete our work and to send to his desk legislation that he can sign this year.

I know firsthand from my conversations with the President that this is a cornerstone of his agenda, and absent his driving force, we would not be here today.

So, too, has the majority leader redoubled his longstanding and unflagging commitment to enacting into law a bipartisan bill, moving us ever closer to that goal. And thanks to the unique confluence of his skills, his unparalleled knowledge and grasp of the issues, and his single-mindedness of purpose, more than three-quarters of the Senate came to support S. 1 that we passed last June. And in bringing that to the eve of final passage of this conference report, he has typically been respectful of and responsive to wide-ranging concerns and recommendations that have been voiced by me and others. I thank him for his leadership and for shaping this process to its ultimate and I know successful conclusion of this report.

I also extend my appreciation to my colleagues, Senator HATCH, Senator BREAUX, and Senator JEFFORDS, with whom I have worked so closely on a prescription drug benefit over the last 3 years. They have been stalwarts in this fight and developed the template tripartisan bill of which so many of the principles have been incorporated in this conference report.

Certainly no one has more fiercely championed the cause than another colleague I have joined with in this battle in the past, Senator KENNEDY, who I recognize does not support this conference report but whose early involvement and passionate policy advocacy unquestionably built momentum for this issue in Congress.

Finally, I want to thank my good friend and colleague, Ron WYDEN, with whom I began my prescription drug coverage journey almost 6 years ago when we developed the first bipartisan prescription drug plan in Congress, which established the principles that we both believed were so crucial and essential to shaping this benefit. We reached across this political aisle because we recognized that only through a bipartisan plan could we ever see the light of day in enacting this kind of benefit as part of the Medicare Program.

We joined forces, as members of the Budget Committee, to carve out the 2001 budget, believe it or not, which was a $40 billion 5-year reserve fund. Well, how far we have come from the $370 billion tripartisan plan developed last year to the historic passage of S. 1 this last June of $400 billion.

But I can tell my colleagues from my own personal professional experience that Congress' journey along this road has never been easy, although it has been infinitely more arduous for America's seniors. The process has borne witness to a multiplicity of goals and philosophies across the spectrum.

Some have wanted to add a drug benefit to the existing Medicare Program that would leverage purchasing power for the more than 40 million Medicare beneficiaries, while others sought to use the issue as either a vehicle for the wholesale privatization of Medicare or full scale Government-administered benefits. Some have said we are providing too great an incentive for people to enroll in private plans, while others argue we are starving those very same plans. As some have argued, the benefits provided in a particular bill are inadequate while others submit that they are, in fact, too generous and should be limited to a low-income catastrophic plan.

Today, we essentially all agree we are well beyond one question: The question of need. Therefore, it is imperative that we acknowledge the reality that just as the journey thus far has been imperiled by the slings and arrows of those on all sides of this issue that we have heard this morning, it will not be easier with the passage of time, not when we are debating the creation of the largest domestic program in nominal terms ever, not when we are attempting the largest expansion in the history of the third largest Federal domestic spending program.

I think it is important to emphasize the extent to which this is a sizable expansion. So for those on the other side who are talking about the fact that we are not doing enough, this is a substantial beginning. When we consider all of the significant challenges that are looming on the horizon, such as strengthening Social Security and Medicare as 77 million baby boomers will begin to retire in the year 2013, all the while we are facing record-setting deficits.

We did have an optimal window for positive change just 2½ years ago when the Congressional Budget Office was projecting surpluses as far as the eye could see, about $5.6 trillion through 2011. Now we have next year's Federal deficit alone projected to be nearly $500 billion. We know the reasons: In the aftermath of September 11, the war in Iraq, a declining economy.

It begins to illustrate how quickly the tide can turn; that is, how quickly the opportunities can be lost. Just think, many of the same speakers today are standing on the Senate floor arguing from different perspectives and plans on adding a prescription drug benefit to the Medicare Program. At that time, just a year ago, the Senate was presented with a choice between a tripartisan plan that ensured coverage would be available to all seniors—comprehensive, maximum benefit possible for low-income seniors and was a permanent part of the Medicare Program.

The alternate that we were debating at the time was temporary. It would have sunset and would have statutorily restricted access to drugs because it would have been a Government-run system that would have cost close to approximately $1 trillion; although at the time, as my colleagues recall, we did not have any CBO scores, so we could not possibly know or ascertain the exact cost, but we knew that it would probably be $1 trillion and counting because it would have been a Government-run system. It would have restricted choices to seniors, and they would not have had access to the array of drugs that are available on the market today with that type of system. The benefit sunsetted after 7 years.

Those who are dissatisfied with what we have before us today should fondly recall the tripartisan bill and lament its unfortunate demise because at that time we had a plan that brought together disparate interests for a very favorable benefit. That was then and this is now.

We are here, and the conference report before us is the result of an attempt to balance the competing viewpoints not only among Members but the stunningly disparate views between the House-passed legislation and the Senate-passed legislation. The simple truth is, while I continue to prefer the Senate bill, as many of us do, it is this conference report upon which we will vote.

After careful review, I have concluded that while it is not everything it could be, it is not everything it should be, in the end, make no mistake about it, millions of seniors will benefit over the stagnation of the status quo benefit.

Margaret Thatcher once said, you may have to fight a battle more than once in order to win. Well, some of us have been fighting this battle now for nearly 6 years, and for some even longer. The bottom line is, we cannot hold hostage our seniors' futures to a political unwillingness to compromise. This bill provides us with our best available opportunity to secure for the first time a legislative foothold that honors the same basic principles that I and others have expounded upon since I first came to this issue more than 6 years ago; that in keeping with the basic tenets of Medicare, this prescription drug benefit will be universal. Everybody in the system will have access to this benefit. That is important because there were other divergent views that simply wanted a low-income and a catastrophic.

We preserved the universal principle of Medicare, and that is not to be underestimated for a variety of reasons. It is comprehensive. It is a wide-ranging benefit. It is affordable, particularly for those at the low-income scale. It is voluntary participation and not mandatory. Seniors can choose to participate if they want to. It is permanent. Unlike what we were considering a year ago on this floor, it does not sunset because the costs were so prohibitive that the benefit had to be sunsetted. We have a permanent benefit, and it provides equal benefits across the spectrum of plans. That is also very important. So everybody will have access to the same benefit, regardless of what plan they choose.

Like the Senate bill and the tripartisan proposal before that, it directs the most assistance toward those seniors with the lowest income and includes a reliable Government fallback mechanism of last resort to make sure that every senior, regardless of where they live in America, will have access to and the stability of the traditional Medicare Program. But they will also, regardless of where they live in America, have access to a prescription drug benefit so there will be that reliability, with a Government fallback program.

In its totality, looking at this conference report, it fulfills all of those principles. That is very important. It is something we cannot overlook. It cannot be minimized. It cannot be denigrating. Those principles have been captured in this legislation, irrespective of all the other disparate views that come in between. Those principles framework this conference report. Those were the principles that were in the Senate-passed legislation.

Now let's look at some of the individual components of the package before us. We should be mindful of how we arrived at this destination because we have to put this conference report in context, not only for why we are here today but what happened previously, what happened last year, what happened 4 years ago, what happened 6 years ago, because it illustrates the long journey we have taken down this road and what has happened in the House—what has happened in America, in terms of the rising cost of prescription drugs and the impact on seniors.

As this Senate passed a bill with overwhelming bipartisan support, those 76 votes I was referring to earlier, last June, the House passed legislation with the most razor-thin margin of just 1 vote—just 1 vote. We all witnessed what unfolded this morning in the early morning hours when the House with a 5-vote margin passed the conference report. Obviously, it reflects some very different views between both Chambers, among philosophies, among regions of the country. We cannot overlook that, in terms of what do we do now. What can we ever potentially do in the future that will be even better?

We see the results, obviously, in those differences. Some have referred to the benefit that is available in this conference report. I think it is important to talk about some of those issues.

We see the result, obviously, in the starkest terms reflecting different philosophies in the nature of the benefit that ultimately was designed by the conference committee to sort of split the differences, because that is what conference committees are all about. No, it can't be all one way or the other. You have to sort of go back and forth, to figure out what can you do to design an equilibrium of thought. It has to be carefully calibrated so that you do not compromise what you believe but it advances the legislative agenda on your ultimate goal, in this case designing a prescription drug benefit as part of the Medicare program. So let's look at the underlying benefit when it comes to the drug plan.

It includes aspects that are modeled after each bill. The deductible was set at the House lower level of $250. We had $275. And the conferees worked to improve this proposal by offering a benefit that had an actuarial value that was higher than the benefit from both bills. However, in providing these improvements, concessions had to be made. In doing so, the Senate's benefit cap that was referred to by other speakers—we had a $4,500 benefit cap, a spending threshold—that was lowered to $2,250. So while they got a better actuarial benefit for all beneficiaries, the spending cap was lowered to $2,250.

But in the same respect, the cost sharing provided under this cap was lowered from 50 percent to 25 percent that was in the legislation in the Senate bill.

So we had a cost sharing between Government and the beneficiary that was 50–50. But in the conference report, now the Government will provide the 75 percent and the beneficiary 25. So that is an improvement. We see it is not all perfect, but again this benefit represents the art of the compromise. You have to think again, is this better than the status quo? I think there is no question that it is because millions will stand to gain, No. 1, getting a benefit; No. 2, getting generous assistance on the low end of the income scale. But everybody stands to gain who participates in the Medicare Program, who wants to participate in accessing this prescription drug plan.

As I see it, this conference report will at least get the Federal foot in the door in providing a significant level of assistance to one out of four Americans who, right now, don't have any assistance. They don't have any assistance currently. If you look at the graphs, a quarter of Medicare beneficiaries have nothing. So are we saying this is not better than that status quo?

We also design a benefit for all seniors with a $35 monthly premium that will save 50 percent on their cost of prescription drugs. So, for example, a senior who spends $3,600 on prescription drugs will realize a saving of $1,714 annually.

Then as I mentioned earlier about the lowest income and the assistance

they will receive under this conference report, which was in keeping with the principles of the Senate-passed legislation for which we received 76 votes, we find that the conferees utilized the model that was established in the Senate bill. Most critically, no senior who qualifies for one of the low-income categories will experience a gap in coverage—none. So for those under the 150 percent of poverty level, they will experience no gap in coverage.

It also means in Maine, for example, there will be 93,450 Medicare beneficiaries, more than 40 percent of the overall Medicare population, who will receive a generous benefit with no gap in coverage, not to mention that it will be at a high level of assistance—up to 150 percent, with minimal copays, in some instances—most instances, no deductible, no premiums, and, as we know, a sliding scale on the monthly premium of 135 to 150.

The PRESIDING OFFICER. The time of the Senator has expired.

Ms. SNOWE. I did not know there was a time restriction, Mr. President.

The PRESIDING OFFICER. There was a 20-minute time limitation. The Senator may ask for additional time. The Senator's time has expired.

Ms. SNOWE. I ask unanimous consent for an additional 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized for an additional 10 minutes.

Ms. SNOWE. While the Senate has extended this to a greater number of seniors, unlike the Senate bill, this proposal ensures all seniors, even the so-called dual eligibles, will be part of this conference report. That certainly benefits my beneficiaries in Maine but 6 million nationally.

Not only do seniors deserve a subsidy to help make prescription drugs more affordable, they should also have the benefit of choice when it comes to the coverage they purchase. Seniors should not be limited in their options for coverage, so that we ensure all seniors have a choice of at least two privately delivered drug plans.

Options are important. They will have choice among prescription drugs as well. That is critically important because the choices will be there, and they will also have the benefit of a fallback to ensure this coverage and those options are available nationwide.

Finally, I want to get to the one remaining point because of time limitations. We have heard so much about the privatization of Medicare, what this would do. This conference report unquestionably represents the end of the House bill's open-ended efforts to move Medicare towards a national privatized system through an untested, untried policy known as premium support that could have led to a patchwork quilt of uneven health care delivery that existed prior to the creation of the Medicare Program in 1965. This approach would have fostered wild fluctuations in the premiums for the traditional Medicare Program whereas, incredibly, Medicare now provides all seniors with the same benefit for the same premium. Under this proposal, premium variations would have occurred not just from State to State but within a State and even within congressional districts across the country.

There are many illustrations of that point. For example, from the Center for Medicare and Medicaid, they indicated that in Miami, FL, they would pay $2,100 a year for the traditional Medicare Program compared to $900 to seniors who would pay that in Osceola, FL, for the same benefit.

When you compare North Carolina to variations from State to State, it would have been extreme.

For example, they would have paid $750 for the traditional Medicare; whereas, in Florida they were paying $2,100 for that same benefit but their premium, obviously, would be much higher.

In response to a letter that 43 colleagues and I sent—I ask unanimous consent to have printed in the RECORD two letters, along with an editorial on this subject.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 23, 2003.

Chairman CHARLES E. GRASSLEY and Ranking Member MAX BAUCUS,
Senate Finance Committee,
Washington, DC.

Chairman W.J. (BILLY) TAUZIN and Ranking Member JOHN D. DINGELL,
House Energy and Commerce Committee, Washington, DC.

Chairman WILLIAM M. THOMAS and Ranking Member CHARLES B. RANGEL,
House Ways and Means Committee, Washington, DC.

DEAR CONFEREES: The Medicare conference has reached a critical junction in its effort to craft a conference agreement to develop a Medicare prescription drug and modernization bill: The time is fast approaching when final agreements must be made if a proposal is to be developed prior to the November 7 target-adjournment date. However, many key issues remain unresolved, which will determine whether this bill can garner strong bipartisan support and ultimately become law. As you progress into this critical stage, we urge you to remain committed to the bipartisan principles contained in the legislation developed and passed by the United States Senate.

First, the Senate bill takes strong steps to provide every senior and disabled American, no matter where they live, with choices in coverage. Notably, this is done in a manner that preserves the traditional Medicare program as a viable option. This balance was achieved by providing all seniors with access to the same level of drug coverage no matter the coverage option chosen. Further, the Senate bill assures this choice will be a fair one that will not disadvantage senior citizens who remain in traditional Medicare. Accordingly, we urge you to remain committed to principles that provide a level playing field between the private sector and Medicare and reject proposals that would unduly raise Medicare premiums or otherwise advantage private plans.

Second, the Senate bill assures affordable, comprehensive coverage to those with incomes below 160 percent of the federal poverty level or $15,472 for an individual in 2006. Generous and affordable coverage for this population is essential, given that most presently do not have access to a prescription drug benefit. The conference must assure that the generous assistance provided to low income beneficiaries is maintained and reject measures that would reduce the benefits presently accorded Medicaid recipients.

Third, we urge the conferees to include a mechanism that will ensure that all seniors have access to a prescription drug benefit, no matter where they live. The Senate bill assures that private plans interested in providing this benefit can do so and will be the preferred mechanism of delivery in every geographic locality; however, it is not possible to guarantee their participation. Therefore, it is necessary that the final proposal include a ballback mechanism, as was included in the Senate bill, that will ensure that beneficiaries will have access to the drug benefit in the event that private plans are not available in a region.

Finally, we caution the conferees against including provisions that will circumvent established congressional procedures or delegate responsibilities for establishing the benefit and cost-sharing requirements to the Secretary of Health and Human Services (HHS). The responsibility for developing and overseeing benefits included in the Medicare program rests with the Congress, and this bill should not violate that principle.

Enactment this year of a bill that adds a Medicare prescription drug benefit and improves the program is a top priority for each of us. America's seniors have waited too long for comprehensive drug coverage and the addition of market-based options. However, to achieve this goal, we must continue to work together to develop agreements that will receive bipartisan support in each chamber, In 1965, the original Medicare bill garnered this level of support and a change to the program of this magnitude should be no different.

We remain ready to help you address these and other issues that will impact the final proposal, and hope you will work with us to develop bipartisan proposals that we can support.

Sincerely,

OLYMPIA J. SNOWE,
ARLEN SPECTER,
MIKE DEWINE,
EDWARD M. KENNEDY,
JEFF BINGAMAN,
BLANCHE L. LINCOLN,
JAMES M. JEFFORDS.

CONGRESS OF THE UNITED STATES,
Washington, DC, November 13, 2003.

The Hon. BILL FRIST,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR LEADER FRIST: It has come to our attention that leadership is considering the inclusion of a new version of the policy model known as premium support. As you know, this policy places the traditional Medicare program and private plans into direct competition and according to the Centers for Medicare and Medicaid Services (CMS) will lead to dramatic increases in the annual premium for the traditional Medicare program.

We are extremely concerned about the inclusion of this policy proposal in a Medicare

bill. Thought some may consider this a demonstration project, we disagree. This appears to be a veiled attempt to institute this policy into law. According to CMS data this proposal could capture up to 10 million seniors, 25 percent of Medicare beneficiaries. Further, it will require them to bear the burden of cost increases associated with the demonstration project.

This policy also unfairly targets some seniors simply based on their geographic location and mandates their participation. The likely result will be significant increases in traditional Medicare premiums for seniors living in the affected areas and could destabilize the Medicare program for all seniors.

We understand that leadership and some conferees may be considering possible changes to this latest proposal. We urge you to remove this policy from the bill. We believe there are other possible options that will encourage private plan participation in the Medicare program that do not negatively impact the traditional Medicare program.

Thank you for your consideration of this vitally important issue.

Sincerely,

SIGNED BY 44 MEMBERS OF CONGRESS.

[From the Bangor Daily News, Nov. 21, 2003]

HOBSON'S MEDICARE

Never have so many dollars been put to so little use. The $400 billion Medicare bill before Congress establishes what all sides agree is necessary—a prescription drug benefit—but blasts away at much of Medicare's foundation. It is a deal that makes all previously rejected Medicare reform look wise and generous by comparison. It is also the best deal the current Congress is likely to get.

The difficult calculation is this: Is a badly flawed bill that contains a needed drug benefit worth passing when the alternative is to reject it without the chance to enact approved legislation? The $400 billion has been set aside for funding this legislation; should it fail, the money would disappear and given the extent of the deficit for the next decade or more, would not be available next year, even in the unlikely chance a bill could be passed in an election year or perhaps after that.

Much of the debate this week has focused on the plan's intent to establish privatization pilot projects—subsidized private insurers would offer Medicare in six metropolitan areas in competition with traditional Medicare—but other aspects of it are equally important and equally troubling. The means-testing provision in the bill, for instance, raises costs for middle-class seniors; reimbursements for medical residents, harm clinic work; those who remain in traditional Medicare for the pilot program will see increases in their costs; states that could negotiate for their Medicaid-Medicare clients lose much of their bargaining power while also losing their federal support for the program. The fear remains strong among health care advocates that the entire reform is an attempt to cap the federal contribution to Medicare and shift future costs to seniors. Several of these problems are being debated now—Sen. Olympia Snowe has been in the middle of negotiations all week; imagine the time and argument that would have been saved had she been put on the conference committee. Some of these issues may be resolved but several are likely to remain as the House and Senate vote.

Some members of Congress do not support the bill for these many reasons; some don't support it because of its cost and relatively small nod toward privatization. But for those who believe a drug benefit is important and will become more important in the coming years, the choice is to vote yes, and immediately set about chipping away at some of the worst aspects of the bill. This is a terrible way to build a health care safety net for the nation's seniors, but lamenting the process is not an excuse for allowing this opportunity to pass by without approving the drug benefit.

At 1,100 pages, the Medicare bill is too long and complex to describe it merely as a sop to industry (though pharmaceutical manufacturers should love it), an ideological document (though its medical-savings accounts are a GOP crowd-pleaser) or a broad expansion of entitlements (though the drug benefit is exactly that). It is fair to say the bill is a poor version of what should have been passed years ago and now that Congress is out of time and out of money, it is about as much as the public can expect.

Ms. SNOWE. Mr. President, in that letter, we expressed our strong opposition to this ideological venture. It is important to know that significant changes were made to transform the full-scale national premium support proposal into a limited bone fide demonstration project. That is important to know.

I have it here on the chart. I hope it is something I can get back to on Monday.

It is important to know how far we have come from where it was. The open-ended privatization of the Medicare Program, starting in 2010, would have been a wholesale privatization which didn't offer any seniors any protection, regardless if they were low income, from premium fluctuations. Because it would open it up to competition in the private sector, the conferees shifted it to a bone fide limited demonstration project. We moved from that open-ended privatization to the first proposal in the conference report which provided protection for low-income seniors for any type of open-ended privatization.

They also moved to a demonstration project so it wouldn't be national—it wouldn't be permanent for one region in four metropolitan statistical areas. We said that is not enough; that is too open ended. We finally were able to reduce it to six MSAs with limited criteria. That limited the number of people who would participate in those six metropolitan areas.

It is very important, because what we had before was nationwide and open ended, which would have been a frontal assault on the traditional Medicare Program as we know it with an untested and untried approach where we don't have a scintilla of evidence whether it would work. Through our efforts and through the responsiveness of the leader and Chairman GRASSLEY, we were able to move from a nationwide approach to six metropolitan areas which includes criteria that GPO says will limit this to 1 million—anywhere from 650,000 seniors to 1 million seniors—and it would be sunset by the year 2016. It would kick in in the year 2010. It will be phased in and will be sunset in 2016.

That is important.

What is also important is the fluctuation in premiums, which I was referring to earlier. That is critical because that won't occur. Originally, there was no protection, with huge, wide variances, depending on where you live in America, and subject to undermining and destabilizing of the Medicare Program. The Congress agreed originally to fluctuations which would vary from 10 percent per year compounded. We were able to weigh in. Finally, what we have here is a reduction in the level of allowing increases in premiums to 5 percent, removing the compounding mechanism that originally would have had a total cumulative impact of 30 percent over 6 years.

We have come a long way from where this proposal was in the House that would have undermined the traditional fee for service.

When I hear speakers on the other side of the political aisle talking about privatization, I think it is important to stick to the facts of what we now have.

This is a sea change from the original initial proposal that was in the House-passed legislation. Obviously, the Senate had nothing referring to this premium support program. What we have now is a limitation to one Federal demonstration project for a legitimate avenue to experimenting with new options for potentially improving upon the Medicare Program in the future. But we cannot do it unless we absolutely have assurances that it will work.

That is what demonstration projects and programs are all about. We learn from them. I didn't want to use seniors as an experiment on the road to learning. That is why this is very limited. Now it is no longer nationwide. It is down to six MSAs.

It includes selection criteria that the Congressional Budget Office says will limit the number of impacted seniors to 1 million. It also offers protection even in that demonstration project to seniors under 50 percent of poverty level or below.

That is very important to note.

We are essentially holding seniors harmless even in those demonstration projects. But, again, this is no longer what it was in the House-passed legislation.

I think it is important that we understand that.

This is a means to evaluate anything in the future that may be potentially an improvement to strengthen the future of the Medicare Program. But, obviously, we don't want to use open-ended programs at the expense of the traditional program that has worked so well.

Ironically, in all of this, that is why this was not viable to what was in the

House-passed bill—that the traditional Medicare Program worked. In fact, the Congressional Budget Office told us it would not achieve the savings that the proponents were suggesting. It would only save $1 billion potentially, and it could threaten the underlying traditional fee for service. Where would the seniors be? Where they were prior to 1965 where a lot of working Americans are—barely being able to have access to any type of health care, let alone health care with consistency, or where the costs were so prohibitive they were restricted to catastrophic coverage. Why do we want to assign that problem to our seniors until we know what could work in the future?

I can tell you that there is not one scintilla of evidence in the public sector or in the private sector that would tell you that any premium support plan would work at this point. That is why it should be confined to a limited demonstration project of no more than 1 million—it could be as low as 650,000—to learn what will work to potentially improve. It sunsets, we will learn from it, and decide what it can do for the future.

I urge my colleagues to take a very careful look at this legislation because this is a transformational moment in history, and there will be no going back.

I yield the floor.

The PRESIDING OFFICER (Mr. ALLARD). The Senator from Texas is recognized for 15 minutes.

Mr. CORNYN. Thank you, Mr. President.

Mr. President, I wanted to speak for a few minutes about this conference report which is before the Senate.

I did not support the Medicare bill voted out of the Senate. I voted against it hoping and praying all along that this bill would be improved as a result of the collaboration of the leadership in the House and the Senate in the conference. Indeed, I believe it has. That is not to say that I believe this is a perfect bill—far from it. But this bill does represent an improvement.

This bill provides coverage for those who need it most. In Texas, nearly 300,000 low-income Medicare beneficiaries who are not eligible for Medicaid and who did not have any prescription drug coverage will be covered under this new bill.

It will increase the percentage of Medicare beneficiaries in Texas with prescription drug coverage from roughly 60 percent to 95 percent.

I would like to express my congratulations to leadership, to Majority Leader FRIST, who I know has taken a personal interest in this cause as a medical doctor and as someone who has worked very hard to get us to where we are today; Chairman CHUCK GRASSLEY, who has the patience of Job and who I know has worked very closely with Senator BAUCUS, the ranking member of the Finance Committee, and Senator JOHN BREAUX of Louisiana on other side, as well as Senators NICKLES and KYL and others who specifically shared some of the concerns that I had with the Senate bill but which I believe have produced as a result of their collaboration a much improved bill, and one which I am now proud to support.

I do not view this bill as the finished product. I view this as a good start. But I think it would be a mistake to say because we view the glass is half empty as opposed to half full that we ought to vote against this Medicare conference report. I have no confidence the stars will align and the political climate will be such that we could ever get to this point any time in the near future. It is important we deliver on the promise that each Member in this Chamber made when we ran for this office and which the President made when he was elected, that we would strengthen and improve Medicare by providing prescription drug coverage for seniors who need it. The reason I am proud to support this bill today is because this represents delivery on that promise.

In the end, I don't think the American people care very much about demagoguing certain aspects of the bill. They do not care very much about partisan differences. They do not care that much, really, about some of the ideological differences, the competing ideas that now have been melded into this bill and which create, to some extent, a hodgepodge, but on balance, an improvement over the status quo. It is our responsibility to govern. Governing means delivering results and not just criticizing things that are easy enough to criticize.

Frankly, any bit of legislation that comes before this floor has defects that are easy to criticize. We are sent here to get the work of the American people done. This bill represents delivery on a promise we have made.

We spend about $1.4 trillion a year in this country on health care. We know as much money as is spent on health care that still we have large segments of the population that are underserved and who do not have access to good quality health care. Fortunately, since 1965, our seniors have been provided access to good quality health care through the Medicare Program. We also know unless you happen to be among even the most modest means in our society, you would not have coverage. For example, under Medicaid, only those who are of very modest means who fall beneath the poverty level are eligible for that free health care program. Children are provided coverage to health care under the S-CHIP program which has provided coverage for many children who come from families of modest means who would not otherwise have access.

We still have about 45 million people in the United States who do not have health insurance and who have limited access to health care coverage. That is something that we need to address. Fortunately, it is something that has been addressed, at least in part, in this bill.

For example, in my State of Texas, we have many people who are uninsured and, indeed, who are undocumented. In other words, they have come to this country without the benefit of the legal process. But under Federal law, the Federal Government says you must provide free medical care at your emergency rooms and hospitals all across the country.

Finally, rather than to foist that financial burden on the local governments and the local taxpayers and the State government and State taxpayers, this bill starts at least a downpayment to provide for that previously unfunded mandate. Indeed, it provides $250 million a year to be distributed among the States based on their percentage of population of undocumented immigrants. For example, the State of Texas will receive about $50 million a year over the next 4 years to help make good on that broken promise by the Federal Government.

Indeed, that unfunded mandate will at least be funded to that extent. It is not by any stretch of the imagination enough to make Texas whole, but it is a start, a movement in the right direction.

The other reason I am for this bill is because in 1965 the U.S. Government made a promise to our senior citizens that if you played by the rules, if you worked, if you paid your Medicare taxes, when you turn 65, Medicare would be there for you. While we know there have been enormous changes in the practice of medicine and the delivery of health care since 1965, Medicare has not changed. It is in response to the demands of that passage of time that we see this bill which does actually strengthen and improve Medicare today.

If there is one fundamental reason I am for this bill it is because I think it is the best this body and our counterparts across the Rotunda are able to come up with at this time. It would be unconscionable to leave our seniors without prescription drug coverage, especially after all Members in this Chamber and elsewhere have campaigned on that issue, year after year after year, and left perhaps too many people skeptical or maybe even cynical about whether we actually intended to follow through on our campaign promises. This bill represents the kind of results I think they deserve and the kind of results that make good those promises we have made.

As I say, I believe this is a good start. This is not a finished product. One of the best aspects of this bill is it changes the nature of Medicare to some extent by turning at least to

some small degree from the command and control model that says the Federal Government knows best, which provides no choice, no alternatives, no opportunities for seniors to actually get better service or better health care by having some competition in the marketplace. Now, 38 years after Medicare was first passed in 1965, we see better coverage under this bill. We see more choice. We see coordination of medical therapies because, of course, many people are on multiple types of therapies, even drugs that may interact. This bill provides for a coordination of those medical therapies in a way that will enhance and protect the health of our seniors, not damage them.

This bill places an important emphasis on prevention. This is one of the areas on which we need to do a lot more work. Frankly, it is much more humane and much cheaper and, indeed, much more compassionate to prevent disease than to wait until it has occurred and then try to treat it, perhaps with some or no success. This bill does provide for screening for cardiovascular disease, for diabetes, for greater access to mammography so that breast cancer can be diagnosed earlier, and it will provide an opportunity for every senior, as they go into Medicare, to get a complete physical examination so that if there is some way we can prevent them from becoming ill or perhaps address that illness much more effectively and efficiently by getting to it earlier, we can improve the quality of life and also save the taxpayers money when it comes to treating full-blown illnesses as they run amok.

This bill is a vast improvement over the status quo because it has strong provisions for prevention of fraud, waste, and abuse. It is inevitable in a bill this big, some $400 billion over the next 10 years, that there is potential for fraud, waste, and abuse. I congratulate Chairman GRASSLEY and the conference committee for writing into this bill important protections that will allow for the detection, indeed, for the investigation and hopefully for the prosecution of fraud, waste, and abuse when it comes to the taxpayers' dollars.

I know the chairman of the Finance Committee shares a passion for protecting people in the rural parts of his State, and certainly across the United States. I share that passion with him.

I still remember when I was campaigning up in the panhandle of Texas, a place where there is low-population density, in a rural part of our State where the county judge, who is the chief administrator for the county government, came up to me. She was concerned about her mother. She said the doctor for her mother, who was 80 years old, had refused to continue to accept Medicare patients. And this individual's mother had no other way to pay for her health care other than Medicare. So literally she lost access to the only doctor she had ever had and that she had ever known, at least during that period of her life.

This bill addresses that concern, too, by providing greater access to health care in rural parts of our country, and it imposes reimbursement rates for doctors and hospitals. Frankly, I have always thought it was wrong for us to try to balance the budget on the backs of health care providers because, frequently, these people provide free health care out of the goodness of their heart, for which they have no hope of compensation. I think it is only just and it is only right that we provide for fair and adequate reimbursement for treatment of Medicare patients. Frankly, that is the only way we are going to continue to see ready access for our seniors to the health care they need.

There were two reasons I was very concerned about the bill as it left the Senate. One was because it lacked any means testing; in other words, the young man or young woman who earns minimum wage would be expected, out of their Medicare taxes, to pay for the prescription drugs of Bill Gates or Ross Perot from my State, someone who is more than capable of paying for their prescription drugs. I, frankly, thought it was unfair to foist that on the minimum-wage worker.

Then the other concern I had was that I wanted to make sure we were not providing incentives for employers who maintain health insurance coverage for their employees after they retire, to simply drop them and create a greater burden on taxpayers.

I think both of those issues have been addressed.

Finally, Mr. President, I think the provision of health savings accounts represents a tremendous victory for those of us who believe that individuals ought to have greater choice, greater opportunity to manage their health care costs, by taking pretax dollars to pay for medical costs that are not otherwise covered by insurance.

So for all those reasons, I congratulate again Chairman GRASSLEY and those who have worked so hard on this bill. I know it has not been easy. It is not perfect, but, again, I do not think we should let the best be the enemy of the good. So I will proudly support it and work with Chairman GRASSLEY and others to see that this gets to the President's desk for signature as soon as possible.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Rhode Island.

Mr. REED. Mr. President, I ask unanimous consent, with the concurrence of Senator STABENOW, that I be allowed to go in her place and she go in my place in the order of speaking.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. Mr. President, reserving the right to object, could I ask, is that in line with what we have agreed to?

Mr. REED. Absolutely. The original order was that Senator STABENOW speak as the next Democratic speaker.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island is recognized.

Mr. REED. Mr. President, opinion has already been registered with respect to this Medicare proposal before us today. I think one of the more interesting comments was from the Des Moines Register editorial board, describing this legislation as ''a big, sloppy kiss to the pharmaceutical and insurance industries.'' That is essentially what this bill is. It is a huge payoff to pharmaceutical companies and to the insurance industry. It is not really about giving seniors what they deserve and what we have all labored for many years to provide them with; and that is, comprehensive drug coverage.

There is another fallacy that is operating, too, in our debate today. That fallacy is that this bill is the best we can do, so let's just move on. I think it is a fallacy because I checked this morning the discussion of the vote early, early this morning in the House of Representatives. Apparently, the last few votes that were arm-twisted into supporting this bill from conservatives in the House was based upon the logic that if this bill failed, the next bill, which would come promptly after this bill, would be, from their perspective, worse; but from the perspective of seniors, much better because it would not represent ''a big, sloppy kiss to the pharmaceutical and insurance industries.'' It would represent a commitment to provide prescription drugs—real prescription drugs—and maintaining the Medicare system. And that is what seniors want.

So I believe we can make this bill better simply by holding our ground, by debating it extensively, by not rushing to judgment, by not surrendering to artificial deadlines of the Thanksgiving holiday or even the Christmas holiday.

This is the largest proposed change in the Medicare Program since its inception in 1965, and to rush through this in a few hours, not because of the substance of the bill, but because of the timetable for airplanes and trains to get home for the holidays, is wrong. We should stay here and do our job, just as thousands and thousands of young Americans are staying across the globe and doing their job to protect us.

I think there is another issue here, too; and that is the notion that this is the end of the privatization argument. On the contrary, this is the beginning of privatization. That is the quid pro

quo for the support, particularly support of conservatives, of this bill in the House and here in the Senate. I can envision and anticipate that with each new reconciliation bill that is forced upon us, with a procedure that does not allow unlimited debate in the Senate, we will see again and again the slow erosion of the traditional Medicare Program, under the guise of cost savings, under the guise of competition, under the guise of so many other claims and so many other excuses.

So we are at a position where we are looking at legislation that represents, again, a massive giveaway to pharmaceutical and insurance companies, that does not provide an adequate benefit for seniors, and that really does begin the privatization of the Medicare Program.

Since 1965, Medicare has provided dependable health care for our seniors. But we have all recognized in the last decade or more the rise of pharmaceuticals as a principal, and expensive, way to treat diseases. We have all recognized that Medicare must adjust to this change. We have urged and fought to get an adequate benefit for our seniors for drug coverage.

Now, in Rhode Island, with 14.5 percent of the population over 65, this is of central concern to me. And I have worked very hard, as so many others have, to try to get a good drug benefit program, but not at the expense—not at the expense—of Medicare.

Now what has happened is that the administration, their allies in Congress, the pharmaceutical industry, and the insurance industry have all gotten together and have attempted not just to provide a drug benefit that is adequate for seniors, but to provide a drug profit bonanza for the pharmaceutical companies and the insurance companies and to alter fundamentally the shape of traditional Medicare.

Now, in the wake of the Gingrich revolution in 1995, Newt Gingrich declared his intention of letting Medicare wither on the vine. His undisguised hostility to Medicare met a swift rebuff from Democrats but, more importantly, from the American people because they understand the critical need and the value of Medicare.

Today, this hostility to Medicare persists, but it has been camouflaged under the cloak of a prescription drug benefit. As a result, we are on the verge of a historic bait and switch. Under the guise of providing drug coverage, the Bush administration is beginning the unraveling of the Medicare Program. The bait is drugs; the effect is the slow unraveling of the Medicare Program.

This bill was cobbled together by the administration, by their allies in Congress, and by lobbyists for the drug and insurance industries to entice support based upon the notion of a drug benefit. But the goal, ultimately, and the plan, in effect, is to privatize Medicare.

There is a memorable scene in America cinema in the movie ''Patton,'' of George C. Scott, who plays the illustrious general, watching the retreat of the German forces from the Battle of El Guettar.

He bellows at the top of his voice: Rommel, I read your book.

Of course, the obvious inference is people will declare their intentions years before and then carry them out. And that is exactly what is happening here. If you read the Gingrich book, if you read the conservative ''book'', this is about the privatization of Medicare. Now it might take a few years because tactically the lessons have been learned since 1995. You can't get up on the rooftops and announce: We are ending traditional Medicare. This is a program that allows, in my view, more choice than an HMO because traditional Medicare allows seniors to choose their doctor, to change their doctor. In fact, if you ask most seniors if they could, they would have that choice without any type of condition whatsoever.

That is what is happening here. The intention is clear. But the tactics have been adjusted since 1995, since they ran into popular opposition. Now it is a subtle change, a series of changes over time, reconciliation bill after reconciliation bill. That would be incredibly disastrous to the system and a disservice to our seniors.

The drug benefit is scheduled to begin in roughly 2006. Conveniently, it is after the 2004 election, and it also allows additional time to fiddle with the benefits before any of this becomes real in the lives of our seniors. One can anticipate that these benefits will be adjusted as our fiscal crisis becomes deeper and as we try desperately to constrain costs within not just this program but every other program. The benefits, as they exist today, are a monthly premium averaging about $35, a deductible of $250 or so before Medicare covers 75 percent of an individual's drug costs. But because of inadequate funding in this bill—the $400 billion was never enough—and because of the lavish contribution to HMOs in a $12 billion slush fund, the lavish contribution to health savings accounts of $6 billion, we already have defects within the drug protection for our seniors because if a senior's drug costs reach $2,200, Medicare will pay nothing until that senior has already paid out of pocket $3,600. There is a gap, the proverbial donut hole. Must this donut hole exist? One could argue it has to. But certainly, if we had extra resources, if we had the $18 billion that this bill lavishes upon HMOs and insurance companies, why don't we simply close the gap? Because we are not interested in providing the best benefit under available resources to seniors. There is another priority: Let's go ahead and begin the slow privatization of Medicare.

There are those who say: Well, something is better than nothing; we will take anything now.

Again, we can do better. We could do better in this Congress because the fear last night that motivated those last few holdout votes was that the Senate would do better, that we would bring another bill to the Senate and to the House, and that bill would not have such a big gap; that bill would not be such a big sloppy kiss to the pharmaceutical and insurance industries; it would be something seniors could use, something seniors could use much more effectively than what we are presenting them today.

They should recognize, too, that ''something is better than nothing'' doesn't apply because the price of that something is the withering away of Medicare. We know what this is about. We know that if unchecked, that is what you will insist upon and demand over each coming year.

Medicare works because it covers every senior. It spreads the risk. An essential, fundamental point of any insurance plan is spreading the risk. It works also because Medicare is willing to subsidize the cost of providing health care to seniors. The reason the private insurance industry did not cover seniors before 1965 is simple: It was too expensive. They couldn't make any money on it.

It took the Government to say: We will use public resources to subsidize the health care costs of these seniors, and we will try to do it in an efficient way by first cutting out the overhead of a private health insurer, cutting out the profits of a private health insurer, making this a nationally based program having the broadest possible coverage for all seniors. That is the essence of Medicare.

This bill is turning that on its head. This bill is fragmenting the pool of seniors who will be covered. It is tilting the playing field against traditional Medicare by providing incentives for insurance companies. It is giving money not directly to subsidize the health care of seniors but to subsidize the bottom line of insurance companies. That is the only reason they will play in the senior market, because they are being paid to do so, paid in the form of their profits, not essentially in the form of services to seniors.

I suggest that if the market for senior health care was there to be exploited by private companies, it would have been exploited in 1965, in 1955, in 1945, but it wasn't. And we all know because this body contains people who at least have reached middle age. We all can remember in every home there was an elderly relative—a grandmother, a grandfather, an aunt or uncle—who had to live with you because they could not afford the price of health care; they could not afford the price of a nursing home. That all changed, not because

private health insurance companies stepped up to the plate. It is because Medicare and Medicaid stepped up to the plate. And we are about to change that fundamentally. There are those who will say this is just a modest demonstration program. No, this is the first step. The path has been charted. The direction was declared years before. You just have to read the book.

This bill fragments senior health care coverage. It does so along the lines of age and health. By giving incentives to HMOs, it will encourage them to enroll the youngest and healthiest seniors.

Here is how you make money as a health insurance company. First you get a large subsidy from the Federal Government. Then you carefully select your risks so that they don't incur costs. That increases your profits. That is what any of my colleagues would do if they were directing an HMO, that is what I would do, because their business is to provide profits to their shareholders. That is what is going to happen. It is not because suddenly they have thought of a much more efficient way to deliver services to seniors.

Frankly, the way they derive efficiencies is to ration health care. We all know it because we have all heard the complaints from seniors and from doctors: They won't pay me for what I am doing. It takes me 6 or 7 months to get a bill through, and they give me 10 percent of what I claim as my true cost.

That is what the doctors tell me. They don't want to work with private insurers. They like Medicare. They like the fact that it is predictable. It pays them on time or certainly in a predictable range of time. That is not what HMOs do. They are in it for the money. That is the essence of what they do.

We think we can change the morbidity and the mortality rates of seniors and the costs associated with senior health care? We can't.

So what do we do? We give the HMO's subsidies, and then they will use the subsidies and the leverage of this new law to seek out the healthiest risk, and they will maximize their profits.

That is clear because Wall Street certainly has already voted on this bill. Pharmaceutical stocks are soaring; health insurance HMOs are doing very well. That is what is happening.

What happens also is that we take these healthy seniors out of the pool of traditional Medicare. Then what happens to the cost of traditional Medicare? It goes up. We no longer have the 65-year-old or 68-year-old marathon runners and triathletes. We have 85- and 90-year-old frail elderly who need increased care. No insurance company is going to underwrite those people if they can avoid it, and they can avoid it very easily. So the cost of traditional Medicare will go up.

Then, of course, a year or two from now the people who say this is not about privatization, this is about choice, will come in and say: Look how expensive Medicare is. The private sector is doing so much better. And we will see, I think, the inevitable erosion of traditional Medicare. The irony is that we already know traditional Medicare delivers high quality at essentially a lower cost than an HMO.

A report by the trustees of Medicare this year estimated that reimbursements for HMO enrollees would exceed the average cost of traditional Medicare. That makes sense. Medicare is not advertising on every billboard in Rhode Island like the Plan 65 is. Medicare is not putting out glossy 25-page brochures describing its great programs, or advertising on the radio for profit. Medicare doesn't have to run a multimillion-dollar profit. Medicare is not paying a CEO of an HMO $26 million, or $9 million a year. It is obvious why they are running more costs.

So, again, we know this already. We have Medicare+Choice. Every year, they say "we need greater reimbursement." Why are we then trying to tilt resources to induce private companies to come and do something that seniors will say general traditional Medicare does just as well? It is not about efficiency or a new innovative way of paying for health care, it is about ideology and catering to special interests—that big sloppy kiss again to the pharmaceutical industry and the insurance industry.

The Bush administration proposal, this proposal, divides seniors along the lines of income. For the first time, we are using means testing to determine how much someone must pay to participate in Medicare. Now, one could argue that if this was a last-ditch effort to save traditional Medicare and you had to make sufficient financial calls, you could consider means testing. But this is not about saving Medicare, this is about privatizing Medicare. This is about not saving the system but essentially destroying the system. It creates this fragmentation along the lines of income. When you start seeing the costs accumulate—when seniors start seeing those costs accumulate, a very wealthy senior might say, I don't want to participate anymore, and they will begin walking away from the system. That is not a lot of people, but once you have a public program, and people say, I don't want to participate any longer, and you see the income lines start dividing people it will undercut the support and the strength of the system.

I listened intently to my colleague from Texas say it is so unfair to have the minimum wage workers pay as much as the very wealthy who pay in. I am someone who is pretty sympathetic to minimum-wage workers. Unlike many of my colleagues on the other side, I think we can increase the minimum wage, and I think we can do that right now. They have avoided a vote on that for months and months.

Let me tell you, you have to recognize that, through our tax system, those upper income Americans are paying much more into the Medicare system during the course of their lifetime. But that is beside the point. I think that is a footnote. The fundamental point is that this program has worked so well because it is a social insurance program, not a welfare program. It is a program which every senior comes to, regardless of their health, age—other than meeting the 65-year-old threshold—or their income. It is really a common ground. That has a value above and beyond simple accounting, or who is paying what and who is doing what. So this is another way the program is divided. Again, I believe this is the wrong approach.

Now, this whole proposal eliminates the stability, dependability, and reliability of the Medicare Program. It is unfortunate that this process was essentially hijacked behind closed doors. All of the conferees didn't even meet. Two of our colleagues on the Democratic side, Senators BAUCUS and BREAUX, were admitted to the conference, but there were others who were deliberately excluded, which is against, if not the rules, the spirit of the Senate. I think that is wrong. This is not a product of the free interchange between all interested parties, this is simply a backroom deal. If they weren't willing to deal, they could not get in the back room.

This legislation will affect all seniors. That is another reason we need more time on this floor to debate this bill, explain the bill, to have the opinions registered by seniors who are not dazzled at first by an attempt or a first glimpse of a drug benefit but by the underlying reality of the bill.

There is much to be criticized in the bill, but I believe there are three general areas. First, when I was considering a drug benefit for seniors being attached to Medicare, I believed it had to meet three tests: affordability, accessibility to all beneficiaries, and uniform coverage. This bill fails those tests miserably.

In terms of affordability, seniors will pay, over the next 10 years, $1.8 trillion for drugs—a staggering total. We began this debate with $400 billion over 10 years for Federal support—much too inadequate, I believe. We were stuck with that. But as I pointed out in previous remarks, we didn't use all the money in this bill to creatively and innovatively help seniors buy drugs. It went to help the insurance companies and pharmaceutical companies.

We are beginning with a benefit scheme where a senior will have, first, a $250 deductible, roughly $35 a month premium; and if they do that, and they pay the deductible and the premiums, 75 percent of their cost of drugs up to

$2,250 will be absorbed by the Federal Government.

But these deductibles and premiums will increase each year. Our seniors should know that. In fact, by 2013, CBO estimates that beneficiaries will be paying a $445 deductible and almost $60 a month premium, and a quarter of their drug costs will be deferred up to $4,000. So we are looking not at a fixed benefit for seniors over the next 10 years, we are looking at increased premiums and deductibles.

I mentioned the donut hole before. Even paying these fees, this doesn't provide for continuous coverage for our seniors for the drugs. They will spend up to $2,250, and then they will get nothing. I would like to be around in at least—perhaps if this bill passes—I hope it doesn't—a few months or years because it doesn't really begin until 2006—when our offices get flooded with calls saying: I just got a bill for my premium this month, but I was informed that I will get no help with drug costs, and I have to choose—not between eating or buying drugs, but I have to choose between paying my premium or buying my drugs. That will happen to seniors when they get in this donut hole, this gap. That will be their choice.

I hope we are preparing good answers by saying: Oh, that is just the way it works. Keep paying your premium because if you don't, you will never be able to qualify for help $2,000 or $3,000 down the road—after you have spent that much more on drugs. It is a baffling system of insurance.

It is interesting because I have heard so many people on the floor talk about and say: We are just going to give the seniors what we have in the Federal Employees Health Benefits Plan. I can tell you, we don't have a donut hole in the Federal Employees Health Benefits Plan. We don't reach a point at which our drug coverage stops, while we spend some more money. No, we have what most insurance plans have; we have continuous coverage. Our deductibles and premiums might be different, but we have continuous coverage. So this is nothing close to the Federal Employees Health Benefits Plan.

It might be an interesting experiment—maybe our plan should be changed. Maybe we should have this gap. Maybe we should experience the fact of paying premiums and not getting anything for them.

Again, this is one of the problems we have with the bill. When this bill passed the Senate, there was some good work—some. One of the areas where we had good work was in trying to cushion the blow for poor people who could benefit from this drug bill. Specifically, the Senate bill had a section also for people at 160 percent of poverty. That has been pulled back to 150 percent of poverty—the threshold for low-income assistance. It is estimated that because of that change, over a million beneficiaries with annual incomes between $13,000 and $14,000, approximately, will lose out on their income assistance. Now, an annual income of $14,000 might be a lot of money in some States, but in the Northeast it is very difficult to get by on that.

When you are paying $800 a month for an apartment—and, indeed, we are doing so poorly at providing affordable housing for our seniors that more and more seniors are on the private market—if you are paying $800 to $1,000 a month for an apartment, that is about $10,000, $12,000 a year. And you don't qualify for this benefit? This is protection for low income seniors?

Millions more will be further disqualified by the imposition of an asset test. I must say, I voted against the Senate version of this bill for many other reasons. But, there were some commendable elements in that proposal. One was the elimination of the asset test. The asset test is back. That means if your income is below 135 percent of poverty and you have assets over $6,000, you will be disqualified for low-income assistance.

Let me put it in the vernacular. Assets over $6,000: If you have a Ford Escort, it is probably worth maybe $6,000. Certainly, if you own a Crown Victoria, it is $6,000. So let's tell the seniors right now, if they can afford to have a car or a little bit of savings, they are disqualified from the income protections for low-income seniors because of this asset test. That I think is wrong.

There is another aspect to this bill that has been much discussed and debated, and that is what are we going to do with dual eligibles, those individuals who qualify for Medicaid but also, because of age or disability, are in the Medicare system. There is a lot of discussion about the success of this bill dealing with dual eligibles, making sure they are protected. Frankly, I think the protections are ephemeral.

First, the States are not actually relieved of their fiduciary responsibility for these dual eligibles. The Governors all want the Medicare system to go in and say: You are going to take care of these people; they are Medicare individuals now with a drug benefit. Effectively what we have done is something called a clawback, I believe, which requires the States to keep paying forever.

More than that, I am told, is that before, the Medicaid systems in the State could negotiate better drug prices, and now I believe they are subject to whatever the traffic will bear in terms of prices established by this bill. And there is no cost containment on the drug companies. There are cost containments on what we can spend for seniors, but not on what the drug companies can charge. That is another real major problem with this bill.

When I go up to Rhode Island and talk about cost containment, what seniors say to me is: Hallelujah, you are finally going to be able to constrain these accelerating prices from drug companies. You are finally going to be able to do what we all want you to do—use the market creatively, not price controls but market force to get these prices down. No, because this bill essentially prevents Medicare from negotiating for drug prices effectively against the drug industry. That is why, again, it is a ''big sloppy kiss'' to the insurance industry and to the drug industry because they have their way. There will be no market power. There will be no Medicare with approximately 41 million beneficiaries saying: Give us your best price, drug companies. It is fragmented by region, by private entities. It is fragmented deliberately so there is no market power.

For those people who preach on and on about the power of the market, that we have to get away from all this command-and-control economic policy, they walked away from using the market creatively to deal with the No. 1 issue that has driven this whole debate: the ever-increasing cost of prescription drugs.

It is not an accident because the people who wrote this plan and the biggest beneficiaries of this plan are those in the drug industry.

There is another aspect of this whole issue of the States and Medicaid. We have prohibited the States from using Medicaid money to help address these increased drug costs. We have essentially said: You can't use Medicaid money for that. Again, this is not only something that is unfortunate, but it puts tremendous strain on the States.

It has been estimated that my State, over the next 10 years or so, could be paying up to $500 million to the Federal Government in this clawback. I hope my Governor is aware of that. I am going to make him aware of that because the states had always expected that the federal government would pay these costs if a Medicare drug benefit was created.

There is another issue. Because of the ambiguity of some of the language, it is unclear what happens to individuals in the TriCare Program and individuals who are in the Veterans Administration program. What happens to their drug coverage? Are they displaced? That remains to be seen.

Also, in terms of the approach to Medicare, as I said several times over, it is just not adding a pharmaceutical benefit. That is what seniors want many of us to do; create a Part D in Medicare, a pharmaceutical benefits with rules, with fair costs, and with protections. The overall effect to the Medicare Program is we are raising Part B from $100 to $110 in 2005, and then indexing it to expenditures in future years. We know that is going to

keep going up, and some of the fastest growing costs in the country are health care expenditures.

By contrast, the Social Security benefits are tied to increase in the Consumer Price Index. Here is what is going to happen to seniors: The Social Security check goes up, a very modest figure because of the CPI indexing, and the part B goes up like a rocket because it is tied exclusively to the health care expenditures. In a way, it could lead to the point where Part B is more and more expensive and less and less attractive to seniors.

Again, with the means test, with deductibles, all those things, we could find initially wealthy seniors leaving the system, and that erosion could spread.

There is another aspect to this, too, and that is access to home health services. Again, there was a proposal initially to put on a copay, a co-fee, for home health care. That was defeated. I see my colleague from Maine, Senator COLLINS, in the Chamber. She led the fight to see that was protected and did it admirably and graciously, as always.

What I am reading in this bill is that we are reducing reimbursement rates for home health care providers by an estimated $6.5 billion over the next 10 years. We already know the home health care industry took a significant cut in the Balanced Budget Act. In fact, many were pushed to the brink of bankruptcy, some beyond and failed and closed their doors.

Now they have to adjust to a $6.5 billion reimbursement reduction over the next 10 years. Once again, why didn't we take some of this money going to the pharmaceutical industry and the insurance industry and keep the home health care industry strong and vibrant? We all know it is a much more efficient way to treat seniors, more so than having them traipse to the emergency room, then having them go home without home health care, and then come back a week later.

Frankly, in my view, that is what made traditional Medicare a very attractive program. We have ransacked many of the aspects of traditional Medicare to fund this experiment, this demonstration in privatization.

Another general topic of concern is the accessibility issues. There is a complicated scheme now that says we are not going to let Medicare run a drug program unless, of course, there are no private vendors. When it left the Senate, the fallback would begin to operate—i.e., a Federal program—a Medicare Program for drug provisions would operate when two drug-only plans were not available in the market. That has been changed. Now, it is a drug-only or another private plan. So essentially we are doing all we can to keep Medicare from running this drug plan, not because of efficiency, not because of anything except special interest politics and an erroneous ideological commitment to use the private market anytime, even when the market and the market for senior health care is not, without major subsidies, conducive to private plans.

If it was, why did we have to create Medicare in 1965? Because no insurance company will voluntarily enroll sick, elderly people unless they are highly subsidized. We did it not because we had a profit motive but because the American people decided in 1965 that this society would be more decent, stronger, and the fabric of this country would be better if we devoted public resources to help seniors with their health care needs.

The other aspect of this, which time and again is repeated, is why do we need a $12 billion slush fund to do what we think private health insurance companies will do anyway? Because we do not believe they will do it anyway. We know they will not. We have to give them lots of money to participate. Why can we not use that money to strengthen traditional Medicare? Why can we not use that money to decrease the gap in coverage? Why can we not use that money to provide further reimbursement to home health care, which we know is an efficient, valuable program? This does not make sense to me on simple grounds of economic efficiency, but it does have a certain logic if one is rewarding their friends and appealing to ideological concerns.

There is another important aspect, too, and that is the fact that we have seniors, retirees, already with health care and drug benefits through their employers. Two point seven million of these retirees are in danger of losing those benefits.

There have been attempts in this legislation that comes before us to bring that gap down. In fact, it was estimated that there were about 4 million retirees who would lose their benefits under previous versions of this legislation. That has been reduced, but 2.7 million Americans—at least 9,000 Rhode Islanders—are likely to lose better private drug benefits that they have today because of this proposal.

I can guarantee my colleagues, we will hear from every one of those 2.7 million retirees—the at least 9,000 in Rhode Island—because that is not what they thought Congress was doing when it was debating a drug benefit.

As I mentioned before, not only does this approach fragment the healthy and young seniors from the older and sicker seniors based upon the cherry-picking of the insurance industry—which they will do—it also fragments them in terms of income because of the nature of this means testing. It might not happen right away, but anyone who is under any illusion that we are setting in concrete this proposal right now has not been here long enough.

I can imagine, my colleagues can imagine, with every reconciliation bill—and for those who are not devotees of the parliamentary musings every year when we come and have a special procedure where there is no filibuster, it is just 50 or 51 votes—we find all sorts of interesting provisions in that bill. We all stand up and say, oh, that is terrible, but I have to vote for it because it is the budget.

What we will find is this means testing will become broader because the principle has been established. What we will find is these demonstration programs for privatization will become larger.

Let me talk about this demonstration program. It allows for demonstration projects to be established in six metropolitan statistical areas where there is a 25-percent private plan participation. Presently, there are 41 MSAs around the country that meet this test, including most of my State of Rhode Island, as well as border communities in Massachusetts. It is estimated that almost 7 million seniors and disabled beneficiaries, one in six Medicare beneficiaries, could find themselves subject to this privatization experiment. That is a heck of a demonstration project, 7 million people.

As I mentioned before, what are we demonstrating? We have had Medicare+Choice for a while. We know the problems. We know that seniors will go into it. In fact, in my home State of Rhode Island we have about 30 percent who have gone into these managed care plans. They went in originally because of the offer of pharmaceuticals and drugs. Every year we get complaints when they change the plan, when they raise the copays, when they do all of these things. We know how it is going to work and we also know that we have to pay more and more each year to subsidize these private plans to participate. As a result, we are going to see tremendous erosion. Seven million seniors could be affected.

What does this mean in terms of their coverage as they look at the competing plans? According to the office of the actuaries at CMS, beneficiaries could pay up to 5 and 25 percent more to remain in traditional Medicare in areas where these demonstration projects are going on. However, the proposal at least caps that increase at 5 percent. Why would premiums go up? Let me go back to two basic points. We are subsidizing the private plan and then they are out carefully selecting to minimize their risks. They do not have to do it by offering inducements. They can put signs up at the health club, go to these 5K races and hand out brochures. They will not go into neighborhoods with high rates of disease. They will not go into senior centers in low-income areas where people have the kind of health issues associated with having earned a low income all of their lives. They will not do that. They will go to the country clubs, to the affluent

suburbs, and sign everybody up. Then we will subsidize it.

So when one is a senior trying to make a choice between traditional Medicare and this new plan, well, if they have to pay even 5 percent more, that might make them choose the new plan—not because they have better quality, not because they maintain their doctor, not because of any substantive reason, but simply because it is a little cheaper, in the beginning. Then a year later, when they discover it is a little more expensive, and 2 years later as Medicare continues to decline, the options start evaporating.

So, again, this proposal is not only dangerous but unnecessary. We could have simply done what many Americans think we are doing, create a Medicare drug benefit.

So I believe we can do much better. We should do much better. We have the time to do much better. Anyone who is saying that we cannot spend 2 weeks or 2 months continuing to discuss this bill, I think is putting an undue premium on enjoying the holiday over the health care of seniors and the structure of our health care for seniors that has been in place for more than 35 years.

I hope that rather than beginning the path of privatization of Medicare, providing an inadequate benefit not only because we started out with insufficient funds, but then diverting those funds to take care of the insurance industry and the pharmaceutical industry, that we would go back to principles and try to create, under the $400 billion cap, a program that would work for seniors. I hope we can do that, and I hope we can continue this debate.

I yield the floor.

The PRESIDING OFFICER (Mr. BOND). The Senator from Maine.

Ms. COLLINS. Mr. President, the Senate will soon have an historic opportunity to pass landmark legislation to make affordable prescription drug coverage available to all of our Nation's seniors, as well as to people with disabilities who receive Medicare benefits. This legislation, which represents the largest expansion of Medicare in the program's 38-year history, is long overdue, and it deserves our support. Prescription drugs are as important to the health of our seniors today as a hospital bed was back in 1965 when the Medicare Program was first created.

I have long been a supporter of providing a prescription drug benefit as part of an effort to strengthen the Medicare Program, and I believe that were prescription drugs as important back in the 1960s as they are today the creators of the Medicare Program undoubtedly would have provided for that coverage. But back then the focus was on covering hospitalization.

While I continue to have reservations about some of the conference agreement's provisions, we simply cannot allow the perfect to become the enemy of the good. This historic opportunity may never come again, and we cannot afford to let it pass. We cannot allow yet another year to go by without taking action to help our seniors with the soaring cost of prescription drugs. Millions of older Americans and their families will be helped by this legislation. Millions more will be helped in the future. I, therefore, will cast my vote in favor of the conference report, and I want to take a moment to commend the majority leader, the chairman of the Senate Finance Committee, Senator GRASSLEY, Senator BAUCUS, Senator BREAUX and, indeed, all of the conferees who have worked so hard to craft a compromise and to bring this bill before us.

With recent advances in research, prescription drugs can literally be a lifeline for many patients. They reduce the need to treat serious illness through hospitalization and surgery. They allow our seniors to live longer, healthier, happier lives. Soaring prescription drug costs, however, have placed a tremendous financial burden on millions of our disabled citizens and senior citizens who must pay the full retail price for these essential drugs out of their pockets. Monthly drug bills of $300 or even $400 or even more dollars per month are not at all uncommon for older Mainers living on very limited incomes.

Lorraine White, of Winthrop, ME, wrote to tell me that she and her husband spend about $400 each month on vital prescription drugs. They live on limited income and they have had to draw down their savings to make ends meet. They wonder what they are going to do when their savings are depleted.

Time and again, seniors in Maine have come up to me to tell me they simply cannot afford the essential prescription drugs their physicians have prescribed. I remember an elderly woman coming up to me in a grocery store in Bangor and telling me she could only get 12 of the 36 pills for which her doctor had written a prescription. None of our seniors should be faced with those kinds of decisions. They should not be choosing between paying their bills and buying the pills that they need to stay healthy.

The legislation that is before us today will make affordable prescription drug coverage available to seniors such as the Whites, like so many seniors with whom I have talked in Maine, and it will protect them from these high out-of-pocket costs that are such a burden.

Under this legislation, the Whites' drug costs would be cut by more than half, and the savings would be even greater for this couple if they qualify for the low-income subsidies provided under this legislation.

The legislation before us today makes prescription drug coverage a permanent part of the Medicare Program, and it provides a benefit that will be available to all seniors and disabled individuals on Medicare, regardless of where they live.

It is also crafted in a way that, if a senior citizen is very happy with their health care insurance, the drug coverage that that senior already has, he or she does not have to take this additional benefit under the Medicare Program. It is a voluntary benefit.

Beginning in 2006, all seniors will be eligible to get both upfront and catastrophic protection for an average premium of $35 a month. Moreover, low-income seniors, those who are most burdened with the high cost of prescription drugs, will receive generous subsidies and get additional protections. The more than 12 million older and disabled Americans nationwide, including 75,000 Mainers, with incomes below 135 percent of poverty will not have to pay any premiums at all to secure comprehensive prescription drug coverage, and they will have only minimal cost sharing. An additional 18,500 low-income Mainers will qualify for reduced premiums, lower deductibles, and coinsurance rates, and no gaps in coverage.

The senior Senator from Maine spoke earlier today about this legislation, and I agree wholeheartedly with her contention that our Medicare beneficiaries will, indeed, be far better off once this legislation is signed into law. Clearly, we are providing meaningful and realistic help to our seniors, particularly those who are struggling the most—low-income seniors and those with very high drug costs.

The one drawback that I see in the way this benefit is structured, that I want to discuss right now, is that, unfortunately, it takes time for this new benefit to come on line. I fear many of our seniors believe this benefit is going to be available immediately and, unfortunately, that is not the case. But there is still help, immediate help, in this bill for our seniors. To provide some interim assistance, starting next year seniors will receive discount cards that will save them between 15 and 25 percent on each prescription drug purchase. Moreover, low-income beneficiaries will receive a $600 credit on that card, in both 2004 and 2005, that they can apply to the purchase of their drugs. This subsidy in conjunction with the discount card will give our most vulnerable seniors immediate assistance in purchasing drugs that they otherwise might not be able to afford.

In addition to the prescription drug benefit, there are other significant features in this bill that I strongly support. For example, the bill takes major steps to make Medicare payments more equitable. This is an issue I have been working on since my first year in the Senate. The bill tracks very closely legislation that Senator FEINGOLD and I introduced earlier this year.

Medicare's reimbursement systems have historically tended to favor large urban areas and failed to take into account the special needs of rural States. This simply is not fair. Ironically, in Maine the low payment rates are also the result of the State's long history of providing high-quality, cost-effective care.

In the early 1980s, Maine's lower than average costs were used to justify lower payment rates to doctors and hospitals. Since then, Medicare's payment policies have only served to widen the gap between low-cost and high-cost States. I am, therefore, particularly pleased that the chairman of the Finance Committee worked so hard to include in the conference report significant steps to strengthen the health care safety net by increasing Medicare payments to physicians and hospitals in rural States such as Maine.

According to the American Hospital Association, these provisions will increase Medicare payments to Maine's rural hospitals by more than $125 million in the next 10 years.

Moreover, they will increase payments to physicians in Maine by an estimated $7 million a year.

I can't tell you how important these rural provisions are to my State. Maine ranks near the bottom in the rate of Medicare reimbursement despite the cost of survival care in my State and despite the fact that the providers in Maine give very high quality care. This inequity has only worsened as additional payments under the Medicare system have gone to large urban hospitals.

I am very pleased that the rural health care package will help relieve some of the stress on our rural hospitals which are so important to rural States such as Maine. It will help ensure that there is more equity in the Medicare reimbursement system.

I also include a special thanks to the conferees for including a provision at my request that will ensure continued Medicare graduate medical education funding for Maine's family residency programs. These family practice residency programs are absolutely essential in training physicians who tend to stay in Maine and serve. They practice in underserved areas of the State.

I am also pleased that the legislation restores the rural add-on; that is, the enhanced reimbursement for Medicare home health payments that is vital to sustaining home health care in the rural areas of our country.

The Presiding Officer, the Senator from Missouri, and I have worked very hard over the years to sustain and revitalize home health care. We are well aware that many of our elderly citizens would prefer to receive the health care they need in the privacy and security of their own home. But Medicare reimbursement rates, particularly in rural areas, have been so lacking that that home health care has been in jeopardy. I wish the bill went further. I think we should have had a 10-percent rural add-on in order to compensate for the additional costs in terms of travel time, long distances between patients, and other factors that come into play when home health care is provided to seniors and disabled citizens in rural areas.

In fact, surveys have shown that the delivery of home health services in rural areas can be as much as 12 to 15 percent more costly. But certainly the extension of a 5-percent rural add-on is a major step in the right direction.

I am also very relieved that the conferees rejected an ill-advised proposal to have our seniors have a copay for the cost of home health care. I am convinced that had that been included in this package and signed into law, it would have discouraged many of our most vulnerable sick seniors from getting the home health care they need. The conferees made a wise decision, indeed, in dropping that provision which was included in the House version of this bill.

The conference report will also make prescription drugs more affordable for all consumers by closing loopholes in our patent laws that some of the large brand name pharmaceutical companies have exploited in order to delay consumers access to lower priced generic drugs. According to the Congressional Budget Office, these provisions will help to reduce our Nation's drug costs by some $60 billion over the next decade.

I am very pleased to have played a role in drafting this legislation with leaders on the bill—Senator SCHUMER, Senator MCCAIN, Senator EDWARDS, and Senator GREGG. All of us worked very hard to bring this about. This is a really significant provision. It is going to help reduce the cost of drugs in State Medicaid programs. It will help to control the cost of drugs in the Medicare Program as we are adding this benefit. It will help uninsured individuals because it will lower the cost of drugs for them. It will help employers who are providing prescription drug coverage as part of a health insurance plan. This is a very important provision and one I advocated very strongly to be included in this conference report.

In addition, the conference report includes the provision which I offered, and which the Presiding Officer cosponsored, to the Senate bill to establish a pilot program to help modernize the outdated ''homebound'' definition that has impeded access to needed home health services for many of our elderly and disabled Medicare beneficiaries.

I know that when we start talking about the definition of ''homebound'' in the Medicare Act it may sound esoteric, but in fact it is vitally important for so many disabled and elderly citizens who, because of the interpretation of the law by some of the fiscal intermediaries in the Medicare Program, have literally become prisoners in their own homes fearful of leaving in that they will jeopardize their ability to continue to receive essential home health care.

I particularly thank David Jayne, the courageous advocate who inspired this legislation, a truly heroic individual, and also Senator Bob Dole who has been such an outstanding advocate for disabled Americans for so many years. They worked very hard to ensure that this provision was retained in the final version of the bill.

Overlooked in much of the discussion of this Medicare bill are other very important provisions that will provide better coordinated care for seniors with chronic conditions such as diabetes. As the cochair, along with Senator BREAUX and the founder of the Senate Diabetes Caucus, I believe these provisions will greatly improve the quality of care for individuals suffering from diabetes. I am very pleased that these provisions have been included in this bill.

I have talked now at some length about the many provisions in this conference report that I strongly support. I do, however, have reservations about other provisions.

The House bill included provisions based on a premium support model that would have called for direct competition between private plans and traditional Medicare. I have serious concerns about the implications of this proposal, particularly that it could result in driving up premiums in the traditional Medicare Program. That would be particularly problematic in a rural State such as Maine where seniors are not likely to have a host of insurance companies competing for their business because of the small size of the market.

Moreover, the House bill could have resulted in sharply different premiums for seniors in different parts of the country and even within a single State. Those health provisions really troubled me because I did not think that a senior living in Fort Kent, ME, should be paying a different rate for the same coverage as a senior who is living in San Francisco, CA. I therefore joined a number of my colleagues in sending a letter to the majority leader expressing concern about the inclusion of this controversial policy in the Medicare bill.

The final bill, while it still causes me a lot of concerns in this area, is different from what was in the original House proposal. The original proposal was significantly downsized to a limited pilot project that would not begin until the year 2010 and that would provide significant protections for those seniors who are remaining in the traditional Medicare Program.

While I continue to have reservations about even the demonstration project,

I urge my colleagues to look at the package as a whole. I agree with the AARP and the National Council on the Aging that its strengths clearly outweigh its weaknesses. When I hear some say that somehow this legislation spells the end of the traditional Medicare Program, I know that is not true. I know it is not true because I have carefully studied this bill. I also am convinced it is not true because the AARP, the Nation's largest seniors organization, would never endorse a bill that spelled the end of the Medicare Program. That is just not conceivable.

This conference report represents the last real hope of getting an affordable Medicare prescription drug benefit anytime in the foreseeable future. Our seniors have already waited too long for this benefit. We cannot delay; we cannot continue to push this issue off to the future. Since the cost of providing a meaningful drug benefit will only increase as time passes, it is imperative we act now. Our seniors have waited too long for this coverage. We cannot push this off another year, another month, another week. Let's act now. Let's not let the perfect be the enemy of the good.

This package is worth supporting despite its flaws. I urge my colleagues to join me in voting yes on the conference agreement.

I yield the floor.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator from Michigan.

Ms. STABENOW. Mr. President, I ask unanimous consent that Senator BARBARA BOXER be the next Democrat to speak after Senator HARKIN, who I believe is the last person at the moment we have unanimous consent for in terms of speaking order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. STABENOW. Mr. President, it is interesting to listen to the debate with colleagues today on both sides of the aisle concerning this legislation. To hear the discussion from the other side of the aisle, there would be no reason at all to oppose the bill; there would be no reason at all, last night, to have to hold the voting boards open for 3 hours to twist arms to be able to change votes, to be able to get the votes to actually pass the bill; there would be no reason that overwhelmingly Members on the Democratic side of the House and the Senate who crafted and led the creation of Medicare would be opposed to this bill.

On its surface, what is happening makes no sense if, in fact, this is a good bill for seniors. There is no way, if this were a good bill for seniors and for the disabled in this country, that I would be standing here opposing it. There is no way my colleagues in the House of Representatives—some of whom were there when Medicare was passed, some of whom have championed health care and senior citizen services for decades—would have stood on the House floor and voted no if it was good for seniors and for the disabled.

On its face, that makes no sense.

For those who have worked for years on this issue, Mr. President, I actually came into public service over 25 years ago; I often joke that I was 5 at the time—I came into public service over the issue of senior health care in Michigan. That is what brought me into public service. Since that time, I have worked very hard to continue to improve services, access to care, expand home health care, to be able to modernize health care as we have changed with new technology, new medicines, and new opportunities. I was very pleased that the first bill I introduced coming to the Senate was a bill to lower prescription drug prices by allowing our local pharmacist to do business across the border in Canada and other States to lower prices. So I care very deeply about this issue.

Nothing would please me more than to be able to stand here today and declare a victory for our seniors and a victory for all Members because we have finally done the right thing. Seniors have waited too long, there is no question. They have waited way too long.

Unfortunately, under this plan, they are still waiting. Not only will an awful lot of people continue to wait, some of them will find instead of a step forward—which we all would like this to be—a step forward that I supported with the Senate bill, even though it was not all that I wanted it to be, but it was a bipartisan bill. It was truly a step forward. I supported it as something we could build on. Instead of this being a step forward for seniors, for too many it is a step off the cliff.

Let's look at what we are talking about, just the facts. For someone who is putting out $5,100 worth of prescription drugs in a year—which, unfortunately, is not a high amount given what people are having to pay for prescription drugs—if they are paying $5,100 for prescription drugs, they would have to have out of pocket under this bill $4,020 of that $5,100. They would still pay $4,020 for that $5,100.

Some would say—and I respect that—Well, at least it is something. It may not be much, but at least it is something. The question is, What are you giving up to get that less than $1,100 in help when you have a $5,100 drug bill? The first thing, you may be giving up your coverage altogether to get that benefit. Estimates are that 2.7 million retirees will lose their coverage as a result of this bill. That is about one out of four people in Michigan.

Some would say: Well, 75 percent will not lose coverage. That is great, if you are one of the 75 percent. But what if you are one of the 25 percent of folks who worked all their life, probably along the way gave up some pay raises to get a good health care benefit, may have made a number of tradeoffs to make sure in your retirement you and your family had quality health care?

To get a very meager amount of money for prescription drug help, one out of four folks will lose their benefits. We do not have to do that under a bill we passed when there was a Democratic majority in this Senate. That bill was brought forward under Senator BOB GRAHAM's leadership and sponsorship. I was pleased to be a cosponsor. We had a bill where nobody lost their coverage. We do not have to write a bill where 25 percent of the retirees lose their private insurance coverage. It is all in how it is designed.

This is designed in a way to give incentives, unfortunately, for some employers to drop their coverage—not everyone, but if you are that fourth person when it is one out of four, that is 100 percent of you, 100 percent of your coverage and your family's coverage. So for those folks, this is not a good deal.

Well, let's look at some more. Who else isn't it a good deal for? Well, we are told that about 6.4 million people are low-income seniors who will have less access to the drugs they need, and possibly pay more. These are folks who are the poorest of the poor seniors. These are the folks who really are sitting down tonight at the kitchen table and deciding, do they eat or do they get their medicine?

This is not some platitude, some rhetoric. This is real for people where a dollar or two-dollar or five-dollar copay on a prescription makes the difference between eating, paying their electric bill, or having a roof over their head.

We understand from the Center on Budget and Policy Priorities that many of these 6.4 million low-income and disabled Medicare beneficiaries would pay more for their prescription drugs, possibly much more because they would be moved from Medicaid for low-income seniors—where many only have a one-dollar copay for their prescriptions—to a system where they would be paying more. In addition to that, there are certain drugs now that seniors need or the disabled need that they receive under Medicaid that may not be available under the private insurance plans.

So when they move this system to private plans, which is the intent as much as possible—where there is one or more private insurance plans, plus an HMO or PPO—when they move in that direction, they possibly limit the prescription drug choices of our seniors.

So under this bill, if you have folks who have a bill of $5,100, they still pay $4,020 of it. On top of that, they may be one of the folks who loses all of their benefits. And they may be one of the folks who actually ends up paying

more and having less choice about the prescriptions they will receive.

On top of that, what do folks get? Well, they get the pleasure of knowing there is no new competition put in this bill to lower prices. There, in fact, is language which is stunning to me, absolutely stunning, that prohibits Medicare from bulk purchasing, group purchasing, and negotiating on behalf of all Medicare beneficiaries to lower prices.

So no wonder the pharmaceutical lobbyists are thrilled. I have spent a lot of time on this floor talking about how there are at least six drug company lobbyists for every one Member of the Senate. They earned their pay in this bill, that is for sure. I am sure they are high-fiving it all the way to the bank because what has been done in this bill is lock in a whole new group of customers, millions—39 million customers potentially—locked in at the highest possible prices. That is what we get.

So on top of continuing to get very little prescription drug benefit—and you could pay more; you could lose your coverage, but you might get some; you might get $1,000 out of about a $5,000 drug bill—but you are hooked into the highest prices because of the inability to negotiate as broadly as possible to lower prices, the inability to go to Canada.

For Michigan that is a pretty big deal. That is 5 minutes across the bridge and the tunnel, and you can drop the prices in half—or 60 percent or 70 percent. We have, for years, been saying: Let the local pharmacists be able to do business to bring back safe FDA-approved drugs, with a closed supply chain so all the safety is there, to bring them back to the local pharmacies just as the drug companies do every single day. We are not talking about mail order. We are not talking about the Internet. We are talking about licensed pharmacists bringing back lower priced drugs, many of which we have helped to pay to make, to the local drugstores to lower prices.

So we are not seeing that. We are not going to see that in this bill. The prohibition continues. We are not going to see a strong bill to close patent loopholes, to be able to allow more generic drugs on the market to increase competition. There is some language, but it has been weakened. We actually have in the bill a prohibition on Medicare using their clout to lower prices.

The VA uses its clout for our veterans, and we do not pay retail for our veterans for prescription drugs. We get a 30- to 40-percent discount because, on behalf of the veterans, we use our clout, through the VA and the Federal Government, to negotiate a group price.

Well, the drug companies do not want that. I understand that. Their sole mission is to make sure their profits and their prices stay as high as possible, that they stop any competition and keep the prices high. I understand that. That is not our job. That is not our job. The seniors in this country, the families, the workers, the businesses that would benefit by more competition to lower prices—the taxpayers expect us to be fighting for them. When I look at this bill, it is shocking the extent to which that is not the case.

So we have a situation where one out of four people could lose their coverage. In a State such as mine, where we have a lot of retirees who have good benefits, this is a big deal. We have very low-income seniors, the poorest of the poor, living on Social Security, with no pension, trying to make it. They could pay more. Many of them will pay more. And we have everybody locking in to these high prices so that more and more we will see the Medicare dollars—the precious dollars we have—going for those high prices rather than helping more people on Medicare.

Then, to add insult to injury, in 2010—which is not that far away, much as we would like to think it is; basically, 6 years away or so, 7 years—this plan opens up a Pandora's box. It allows the beginning to experiment with privatizing Medicare.

It says—even though when folks, who had a choice between picking a private plan and traditional Medicare, 89 percent of them said, I like my Medicare, I am going to stay right where I am, only 11 percent picked private plans—even though that is the case, this bill now moves to put more people in the 11 percent.

This bill even says: We are going to take precious money from Medicare and give it to HMOs and insurance companies and we are going to actually pay them so they can compete with traditional Medicare. We are going to pay them more. We are going to spend more over here to get people over here.

Now, that would not seem to make sense if you are trying to look at the fact, as many have lamented, that we have a financial crisis with Medicare. We have a concern about not enough dollars under Medicare. Why would we set up a system that would cost more rather than less? Why would we set up a system that people have said they do not want? That does not make any sense, either.

This, starting in 2010, begins the process. It is called a pilot, but it begins a process where—instead of being in this column, where you can pick your own doctor and you know what you are going to pay, and you know what the copay is, and you know what the premium is; it does not matter where you live, you can have access to Medicare; in Michigan you can be up in Iron Mountain or Marquette or Houghton or Escanaba or Sault Sainte Marie in the upper peninsula or in northern Michigan or Detroit or Three Rivers or Lansing or Grand Rapids; you know you have Medicare; you know you can go to the doctor of your choice, the hospital of your choice; and you have health care coverage—now what they are putting in place, starting in 2010, is a system where the folks who look at analyzing this have said, for those who go into this privatizing process, you would be given, essentially, a defined contribution instead of a defined benefit.

You would be given what some call a voucher, some call it a contribution, X amount of money that you could then purchase between a private plan, an HMO, or traditional Medicare. It would begin to diffuse and pull people out into different kinds of plans. Some people have asked: What is wrong with that?

Unfortunately, what happens is that if you are healthy, you are a younger senior, you are going to get a better rate going to a private insurance company or into an HMO. So you may go in that direction. And gradually what happens is that they all have different rates, different costs, cover different things, cover different doctors. In some, you have your own doctor; in some, you can't have your own doctor.

What happens with traditional Medicare? Those who are the sickest, the most elderly, the most disabled, who can't get a good rate outside of traditional Medicare, will stay. The experts tell us the cost of Medicare will go up; because there are sicker, older, more disabled people here, and we are going to see increases. It has been estimated there will be a 25-percent increase over time in those costs.

What happens in the long run in that system? Gradually Medicare will have more and more costs, fewer and fewer people, and we will have what Newt Gingrich said he was hoping would happen or he expected to happen; that is, Medicare will wither on the vine.

It will take a few years. We can say: We are not going to be around then. It doesn't matter to me.

But what we vote on in the next couple days will begin a process that will unravel what has been one of the greatest American success stories ever—Medicare. That is what we are seeing happen here. Someone like myself, who cares so deeply about Medicare, who cares so deeply about providing prescription drug coverage and lowering prices, has to say, no way, no way will I support this.

I understand that there is a major philosophical difference—I respect that—between those who never supported Medicare, who view it as a big government program. I know that. I know that when Medicare originally passed, there were only 12 Republicans who supported it. There is a big philosophical difference.

I say Medicare is a big success story, so is Social Security. Other colleagues

say: Big government program, it needs to be privatized or eliminated. Let folks go to the private sector. Let them buy insurance.

Prior to Medicare, half the seniors couldn't find or afford health insurance. They couldn't find it or afford it. Ask folks today, ask a small business person who is trying to find or afford health care, ask somebody who is a single entrepreneur or in a small nonprofit or single business person in their own private consulting business how easy it is to find and afford health insurance. We need to be addressing those issues.

I find it ironic that when we need to be addressing that and creating bigger insurance pools so that we can actually lower prices and create more access to health care and work with the business community to do so, this bill does exactly the opposite. It unravels the only piece we have had that has worked because it takes 39 million people, puts them in one plan—the sick, the healthy, the older, the younger. Because it spreads the costs and the risks in such a large pool, they have been able to keep the administration down, keep the growth in the program down. It has worked.

On the face of it, we would say: Why in the world would we want to change that? Why in the world would we want to create a system where it costs 2 percent right now to administer Medicare; private HMOs, it costs 15 percent? And we would set up a way to begin to move to this?

If we have a financial crisis with Medicare, I would argue it is because of a self-inflicted set of decisions. The tax cuts passed 2½ years ago were paid for by Medicare and Social Security. We would have dollars to be able to take care of everything we want to do with Medicare right now, and Social Security, if it were not for a decision that was more important—to give to those who already have great opportunity and have done well with it. It was decided it was better to give to them and hope it would trickle down to everybody else rather than keeping our promises to Medicare and Social Security.

So now folks say: We have to change it because the resources are gone. Well, the resources are a problem because of decisions made by this Congress and this President.

Even with that, if you say, well, we can't sustain Medicare as we know it, why would you then say, I have an idea: because Medicare is in crisis and because there is going to be a problem down the road funding it, let's make it more expensive? That doesn't make any sense. It doesn't make any sense at all.

It only makes sense in two ways: One, if you just consider Medicare a big government program and you believe everything should be done in the private sector, then from your standpoint, paying 15 percent instead of 2 percent is OK. But I think there is a broader issue at stake. The underlying focus, unfortunately, is that the folks who want to move us away from Medicare are the folks who benefit by this system. And even more than the insurance companies and the HMOs, that are going to have to be paid more to entice them into this, the folks who are benefiting are in the pharmaceutical industry.

What this battle has always been about is making sure that if we are going to provide prescription drug coverage, we are not doing it under one plan where all 39 million seniors are in one plan and they can get together and have the clout to force a group discount.

That is what all this is about. All of it is about the pharmaceutical industry that fought for years to try to make sure we would not have a prescription drug benefit because we could then get a group discount.

But then a couple years ago they changed their strategy. They said: OK, well, if we are going to have a benefit—because it is clear that seniors need help and we are not going to be able to stop it because seniors need help, something is going to happen—let's change our strategy and make sure that this is a plan that is putting seniors in a lot of different pots, lot of different insurance and HMO pots, so they can group purchase a little bit but they won't have the clout of 39 million people, they will have the clout of just a few, a little bit here, a little bit here, a little bit here; and let's make sure we don't allow any new competition; and if we were really good, we would even write in the bill that Medicare can't negotiate on behalf of everyone for a group discount.

I am sure that was their big wish list. And, lo and behold, in this great big bill, most of which has nothing to do with prescription drug coverage, they got it. They got it.

Because they got it, someone like me, who wants more than anything to see seniors helped in paying for their medicine, has to stand up and say, no, no way, no way is this thing a good deal for the seniors of this country.

(Mr. BOND assumed the Chair.)

Ms. STABENOW. Mr. President, I want to speak briefly to one thing that I believe in the bill is a good deal. There are positive things. I don't think it is all a negative bill. I think there are positive things in it. I know there are people who have worked hard, including our occupant of the chair, who led efforts to work in a bipartisan way and tried hard to get the right thing done.

On balance, there is no way I can support this bill, but there are some good provisions in it. I believe there are provisions in this bill that, right now, we could pass overwhelmingly, on a bipartisan basis, if we were to pull them out, take away all the bad provisions, and start over on prescription drugs.

I would simply say that to have no bill is better than to have a bad bill. Let's go back to work and get it right for our seniors. Absolutely, they have waited too long. They have waited so long to get this, and they are saying, I waited so long and this is what I got? So let's go back to the drawing board. We can do it quickly if we want to and get it right—lower prices, real prescription drug coverage.

But there is one section I believe we have a tremendous sense of urgency on right now. I know that my distinguished colleague in the chair has been a leader in this effort, and that is our rural providers and what happened with our hospitals, home health agencies, and doctors, and the cuts they have had to take. I want to speak to the fact that I am frustrated that we have not, before now, been able to help our providers.

I was in the House of Representatives in 1997 when we passed the balanced budget agreement at that time, putting into place certain reductions for providers. Unfortunately, since that time, they have seen cuts of twice as much as was originally suggested would happen at that time. It is the health care delivery organizations that will lose reimbursement. Frankly, the citizens of Michigan, indeed the citizens of the country, lose care when our providers are not given the assistance—the dollars to cover the care they need to be able to deliver.

I have been working since that balanced budget agreement in 1997 to turn that around. In fact, the very first amendment I offered on the floor of the Senate to the budget bill was to stop the 15 percent cut in home health care that was scheduled to take place. We have known about this latest round of cuts since December of 2000. We knew it was coming. At that time, we enacted a Medicare relief package, but we knew there was going to be another 15 percent cut in home health or a $1,500 cap on physical therapy services.

Unfortunately, there were a number of cuts that were just postponed at that time. We have known for 3 years that these cuts were coming, and there is no question that the portion of the bill that deals with help for our rural and urban hospitals, help for our doctors, nursing homes, home health agencies, physical therapists, all of the other providers of Medicare services need to be addressed. We need to fix that. We need to stop the cuts that are stopping services from being provided.

If health care providers are not able to get reimbursed for their services at a reasonable rate, we know they are going to simply decide not to serve Medicare recipients. Too many of them

have made that decision—not because they wanted to but because they felt they had to. We know patients cannot simply decide not to seek care. It is our responsibility to make sure that providers are available in every community, every rural community, urban, or suburban area.

In the past 5 years, the numbers of physicians accepting Medicare patients has declined by 10 percent. I know there is a sense of desperation now as we look at this package. I have physicians saying to me: We know in the long run that this is not a good deal for seniors, not even a good deal for us; but we are so desperate for something that we feel we have to say yes to this package and then come back and fix it.

Of course, I say to them, I don't know if we can fix it. If we cannot get it right now, I have no confidence that we can come back and get the votes to fix this later and stop the bad things that I talked about earlier.

But I know that there is a sense of desperation. I know the annual increases in Medicare payment rates from my State of Michigan are less than the rate of inflation. In 2000, more than half of Michigan hospitals lost money helping Medicare patients. One of the things that happens when Medicare is cut and not covering the costs, as well as Medicaid, is that those costs—what it takes to care for people—is shifted to people who have insurance. So the providers are private sector providers now, and they are saying now that they have a stake in making sure that hospitals and doctors and other providers are reimbursed at a fair rate, covering their costs, so that those costs don't shift over onto our large businesses, small businesses, and so on. So we all have a stake in making sure that Medicare is paying a fair rate. Certainly our small businesses, which have seen their insurance rates at least double in the last 5 years, have a stake in this.

In my State, our big three automakers and other manufacturers struggle with issues of health care. So I am deeply concerned that the provisions in the bill that deal with our providers be passed.

This next round of cuts in 2004 to Michigan providers would be about $69 million to our hospitals; $53 million to teaching hospitals; $70 million to nursing homes; $120 million to physicians; and for independent home health care agencies, $16 million. Altogether, it is about a $329 million cost.

My concern is that these desperately needed funds are being held hostage in this bill. If we were addressing this package independently, I believe we would have overwhelming bipartisan support, if not unanimous support, for these provisions. They are long overdue. Many of us have been saying now for 3 years that this needs to get fixed. Our hospitals desperately need help, as do doctors, home health agencies, nursing homes, et cetera. And we need to do this now. But I am concerned that it is put in the middle of a bill that is not in the long-term best interest of these same providers.

I spoke a minute ago about how the highest possible pharmaceutical prices are locked into this bill. Because the highest possible prices are locked into this Medicare bill, as soon as the increases to providers are done with in this legislation, and because of the increases in pharmaceutical prices every year—we are seeing 12, 13, 14, 18 percent increases every year—I believe our providers will be in great jeopardy of being cut significantly once again, because an explosion in prescription drug prices will not have any accountability. There will be nowhere to go but back to the doctor to cut, back to the hospital, back to the home health agency, back to the nursing home, the physical therapist, the cancer services. There will be no place else to go. So even though my good friends, who are desperate, feel they have to support this package, which they know is not good for them a few years down the road, I believe we can do better by pulling that language out and today making it clear that we are not going to hold those who provide health care to seniors and the disabled hostage in this legislation.

We are not going to hold them hostage to a broader bill where there is such disagreement and controversy. I believe it is up to us to pass this legislation today.

UNANIMOUS CONSENT REQUEST—S. 1926

Mr. President, I ask unanimous consent that the Finance Committee be discharged from further consideration of S. 1926, which is cosponsored not only by myself but Senators GRAHAM, CLINTON, MURRAY, LEAHY, DASCHLE, PRYOR, LEVIN, CANTWELL, and SCHUMER—this is a bill to restore Medicare cuts to providers—that the Senate proceed to its immediate consideration; that the bill be read a third time and passed; and that the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. Mr. President, as chairman of the Senate Finance Committee that has jurisdiction over the legislation, and I want to take a good look at it, I object.

The PRESIDING OFFICER. Objection is heard.

Ms. STABENOW. Mr. President, if I may take another moment, that is very disappointing to me. I believe our providers need help now. We can do this in a bipartisan way. My legislation would allow that to happen immediately. I will continue to work to make sure that happens.

In conclusion, I say to all of my colleagues, we can do better for our seniors than what is in this bill. I would like very much if we would all vote no and go back to work and get it done right. I thank the Chair.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. BENNETT. Mr. President, as this debate goes forward, it is beginning to take on somewhat of a formulae pattern with one side saying, There are some good things in this bill, but it is so bad that we must do nothing, and the other saying, We have problems; there may be some bad things in this bill, but we have to move forward. Both sides agree the bill is not what individual Senators might prefer, but the way the argument comes down on one side or the other as to the balance.

I am reminded of the statement my father used to make when he served in this body. He said: We legislate at the highest level at which we can obtain a majority. With the Senate as equally divided as this one, with only a one-vote margin between the parties, obtaining a majority is very difficult. I pay tribute not only to the chairman of the Finance Committee, but to the ranking member of the Finance Committee who, in a bipartisan fashion, obtained a majority within that committee and brought a bill that has now obtained a majority in the House of Representatives, however close that was, and is on its way to obtaining a majority in the Senate.

As the debate has gone on, those who are saying, No, this bill is more bad than it is good, seem to have another mantra that I have heard over and over again. That mantra is this: This bill will destroy Medicare. Indeed, there are some who have gone so far as to say that it is the motive and purpose of the Republicans in this matter to destroy Medicare. I have had some say the Republicans have hated Medicare ever since it was established, and they want to kill it, and this bill is somehow a Trojan horse aimed at killing Medicare from the inside.

I reject the notion that the Republicans are trying to kill Medicare. I think that is ridiculous. I don't think there is any indication that is the case, never has been, but it is part of the political mantra that we hear over and over again.

More importantly, I want to address the question of the present health of Medicare absent this bill. We hear over and over again: Medicare is wonderful; we can't tinker with it in any way. The best thing we could do is just take a prescription drug program and put it into the present Medicare mix. Some of the provisions that are in this bill are innovative. Some of the provisions that are in this bill tinker with this wonderful program that everybody loves.

I would suggest to those who have that particular point of view that they should go out and spend some time dealing with Medicare as it presently is constituted, not in the theory of a

committee hearing, but on the firing line with providers. Let me give you a few anecdotes out of the real world that have convinced me that while I believe the Federal Government should have the responsibility that it has adopted with respect to Medicare, I do not believe that the present Medicare system is so wonderful that it should not be tinkered with.

Example No. 1: As I have held town meetings around my State, people come to me and talk about their problems. I am sure every Senator has the same experience. Very often, the problems they talk about have to do with Medicare.

A woman came to me and said: I have finally figured out how to deal with Medicare.

It struck me as a little bit strange that she should be talking about Medicare because she didn't strike me as being old enough to worry about Medicare. Then she made it clear; she handles her mother's financial affairs.

So she said: On behalf of my 85-year-old mother, I handle all of her relationships with Medicare. She said: Again, I finally figured out how to handle it: I throw away everything unopened, and then once a month, I call the Salt Lake Clinic and say: How much do I owe you? She said: I am a professional. I am a college graduate. I am an educated woman. I am probably at the top of my powers in terms of my career. I cannot understand anything that comes from Medicare. I open these envelopes, and I try to read what it has to say. It is absolutely impenetrable, and I spent time trying to figure it out; I spent time trying to work it through and finally I adopted my present strategy. Once again, I throw away everything unopened. I don't even bother to look at it, and then at the end of every month, I call the Salt Lake Clinic—which is where her mother gets her health care provided—and I say: How much do I owe you? They give me a number, I write out a check, and life is simple.

She said: I may be overpaying, I may be underpaying, but who knows? Indeed, I don't think there is anybody on the planet who knows how much the bill really should be. She said: I decided that the peace of mind that comes from being able to handle this in this kind of fashion is worth whatever financial discrepancies there might be.

That does not sound to me like a program that is working so well that we can't do a little tinkering with it or a program that is going so smoothly that we can't try some innovation.

Our friends on the other side of the aisle are so horrified that this bill calls for some health savings accounts. I say to them: What are they afraid of? That they will work? Are they afraid the health savings accounts might demonstrate that there is a different way to deal with this, a way that is a little more straightforward, a way that does not involve the mountains of paperwork and the tremendous bureaucracy connected with it?

Example No. 2: I have a daughter of whom I am enormously proud who has a master's degree in speech therapy. After she graduated with that degree from George Washington University, she went to work in a nursing home. This daughter is a very enthusiastic young lady. Some might even suggest she is a little bit excitable. I would not, as her father, make that kind of a charge, but I have heard some who have suggested she gets excited.

She had been on the job, I imagine, a week, maybe a week and a half. She called me. The call came in as calls from my children usually do: Just as I am getting ready to go to bed.

I am so delighted to hear from my children that I do not resent the fact that they prevent me from getting the amount of sleep I would normally like. They can call any time. When she called and I answered, she said: Dad, you are a Senator. You have got to fix Medicare.

I said: OK. Calm down. Tell me what you are talking about.

Then she described the details of the difficulty she was having in her first job in this nursing home trying to provide therapy for seniors who were having serious problems with respect to Medicare. She made this fascinating statement to me. She said: Dad, do you know who the highest paid person in this facility is?

Well, I would have assumed it would be the administrator.

No.

Well, if it is not the administrator, then the most skilled doctor. I can see that a doctor might be paid more than an administrator.

She said: No. The highest paid person in this facility is the woman who is in charge of handling Medicare regulations.

I stopped to think about that for a minute. That means the skill required to understand all of the regulations relating to Medicare is in shorter supply and therefore can command a higher salary than the skill necessary to administer an entire facility or the skill necessary to provide medical services from a skilled physician.

She gave me an example. She said there was a senior in that facility who was having some problems swallowing. The doctor looked at it. The doctor said, I do not understand what the problems are, and called the speech therapist. My daughter, the speech therapist, came in and said: Yes, I understand the problems connected with this. It is fairly straightforward. It is fairly normal among seniors. Here is the way you deal with it. She needs this kind of therapy to deal with her swallowing problems. They are not just minor problems. They could affect her ability to eat and ultimately her ability to live because she needs the nourishment.

So my daughter said: This is what needs to be done.

Well, the relatives of the woman who had the swallowing difficulties said: Absolutely not, until we are sure Medicare will pay for it. We cannot have this kind of procedure and therapy prescribed unless we are sure it is covered by Medicare. If Medicare will pay for it, then grandma can have it, but if Medicare will not pay for it, we are not paying for it, no.

My daughter, in her innocence, first time on the job, said: Let me find out. So she made the inquiry, Will Medicare cover this particular treatment? Three days later, she gets an answer. It took that long to wade through all of the regulations, and all of the rest of it, by this person who was the highest paid person in the nursing home, to figure it out.

My daughter has had the tragic experience of having patients die on her, patients whom she believed she could have helped but was unable to help because of the delays built into dealing with all of the complexities connected with Medicare.

She said, again: Dad, you are a Senator. Fix it.

I said: Well, it takes a little more than one Senator to fix this.

Then she made a very interesting statement. She said: I cannot admit to any of my coworkers in this facility that my father is a Senator because they will be so outraged that my father is a Senator and is not doing anything about fixing Medicare.

So I suggest to those who say Medicare is so sacrosanct that we cannot try anything new, they ought to spend a little time dealing with patients and providers to discover that Medicare has become a bureaucracy of incredible impenetrability and needs to be addressed.

This bill addresses some of those problems. The most significant one, of course, is the fact that Medicare as it currently stands does not provide reimbursement for prescription drugs. Now that is a scandal. Every other health program in this country immediately recognized, as it came along, the shift in the way medicine is practiced in this country, but because Medicare is written by the Congress, it is not flexible enough to make that kind of shift.

We now have prescription drugs that prevent hospitalization, that prevent the necessity for operations and surgical procedures, but Medicare will not reimburse for that even though ultimately it would save tremendous amounts of money. The reason: Medicare is the best Blue Cross/Blue Shield fee-for-service indemnity plan of 1965 frozen in time.

It is almost like a bad movie, a Woody Allen movie where he sleeps for awhile and comes back 40 years later.

Medicare has not kept up with the changes in the way medicine is practiced. It has not kept up with all of the things that happen outside of Medicare, in the private world, that happened just because the administrators of the plan look at what is happening in the practice of medicine and say we need to change the plan to adapt to the way medicine is practiced.

Medicare cannot because it has to be changed by Congress, and every time Congress comes along and says we need to try to make some of these changes, we run smack into the political reality that there can be some political hay made by standing up to defend Medicare, by saying the other side is trying to destroy Medicare. The scare tactics of this kind of campaign are something with which we are all familiar.

One of my colleagues on this side described a conversation she had during the 2000 election with her aunt who was in her nineties. Her aunt said: I am not sure I can vote for George W. Bush.

The Senator said: Why not?

She said: Well, he is going to destroy my Social Security.

Wait a minute, said the Senator. Governor Bush has not talked in any sense about your Social Security. He is talking about the future. He is talking about the teenagers. He is talking about the 20-somethings who are just coming into Social Security.

Oh, no, said the woman in her nineties, he is going to destroy Social Security and Medicare. Because she had seen television ads that suggested that any attempt to try to improve, modernize, change, or help either Social Security and Medicare meant destroy, meant we are against it.

We are hearing those same kinds of arguments today. Any attempt on the part of the Finance Committee to improve, change, innovate, experiment, or move in any direction other than the 1965 model is somehow an attempt to destroy.

Well, it is not. I think we all understand that. But that makes for a great bumper sticker. It makes for a great television 30-second sound bite to attack anybody who wants to try anything new as being against the old and, therefore, trying to destroy the whole program.

I have problems with this bill, as does every other Member of this body one way or the other. There are lots of things in it that I do not like and lots of things in it that I think will make the problem I have just described worse, make Medicare even more impenetrable than it is now, but I intend to vote for it. I intend to vote for it with enthusiasm, and I ask my colleagues to do the same thing, because for the first time since 1965, it is at least willing to break down some of the walls that have been built around this program. For the first time since 1965, it is at least willing to try and see if we can get a little experience with a few things that can move us into the 21st century.

I am sure I will be attacked in my election this November as being one who voted to destroy Medicare by virtue of this vote, by those who will want to continue to raise the specter that any kind of innovation or change is an attack at the fundamental program.

But let us understand the most important thing we are faced with here. Let us understand if we do nothing, if we preserve this program as it currently exists, it will destroy itself. This is not a partisan statement, this is not some conclusion Republicans have come to and Democrats dispute. The demographics are irresistible. What is happening in our country as we become older and older, as the good health care that we are receiving makes us live longer and longer, that demonstrates a financial situation that is unsustainable.

If we do nothing with Medicare in the name of preserving Medicare, we watch Medicare self-destruct. That is inexorable. There is no way around it.

I would have suggestions that would go far beyond what this bill does in moving us away from the present paradigm of Medicare into a world of innovation, change, and experimentation, not because I want to destroy Medicare but because I want it to survive. If you leave it on its present course, it is not going to survive.

There are a few halting steps in the right direction in this bill. We need more of them. We cannot stop with this bill. The Congresses of the future will have to deal with this problem, and it will only get worse the longer we delay taking those steps.

So I say let's take those steps now. Let's start with this bill with the full understanding, and with eyes wide open, that the future is going to bring us back to this issue again and again. The demographics are inexorable. They are going to require changes in the next Congress and in the Congress after that and in the Congress after that. They are going to force us to get out of the mindset that we have had since the 1960s, and that has nothing to do with who is in the White House or who controls the Senate in a partisan fashion. Those demographics are there. They are bearing down on us. The quicker we can understand that and begin to think in new ways, begin to experiment with new methods, the sooner we will solve the problem, not only for our existing seniors but, perhaps more important, for the baby boomers who are becoming seniors. We have to think in a new fashion or they will run into a demographic brick wall that will see this program self-destruct regardless of what we do.

So, as I say, for that reason, with all the problems I see in the bill, I am going to vote for it, and I am going to hope that future Finance Committees and Ways and Means Committees will move us in the direction of innovation and experimentation so we can boldly begin to find solutions to the problems that we face.

The PRESIDING OFFICER. The assistant minority leader.

Mr. REID. Mr. President, it is my understanding, on the Democratic side, the speaking order has been set for the next few speakers. Is that true?

The PRESIDING OFFICER. The Senator is correct.

Mr. REID. Who would they be?

The PRESIDING OFFICER. Senators HARKIN and BOXER.

Mr. REID. Following Senator BOXER, I ask that Senator CLINTON be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I believe that is all we have at this stage, Mr. President.

For tomorrow, whatever time we come in, I ask on our side the Democratic leader be recognized first, I be recognized second, that Senator GRAHAM of Florida be recognized third, and Senator KERRY of Massachusetts be recognized fourth—that is for Sunday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. I reserve the right to object.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. Was the request just in the order on the Democrat side?

Mr. REID. Unless there is some change by the leadership, I assume we will do the same thing tomorrow we are doing today.

The PRESIDING OFFICER. Without objection, the order will be that stated by the Democratic whip.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Iowa.

Mr. HARKIN. Mr. President, I do have quite a lengthy statement. I had estimated it might take me upwards of about 45 minutes. I know others want to speak. I am going to try to collapse it as much as I can, but I had a number of things I wanted to say. Hopefully, I can get them said within a certain amount of time. I don't mean to drag it out, but I did have a number of things I wanted to point out about this bill.

We are debating an issue of utmost importance—the health and security of this Nation's elderly and disabled. To repeat what has been said, Medicare was created 40 years ago with the purpose of providing this Nation's aged and disabled with a safety net to protect them from debt and destitution. For years, seniors have counted on health security in their golden years thanks to Medicare. This program stands as a social contract between the American Government and the American people, a social contract between one generation and the next.

The contract is simply this: After a lifetime of work, when you turn 65 you are promised health insurance covering doctors visits, hospitals, and many other health costs. But there has been one exemption from this social contract—no coverage for prescription drugs.

It is not possible to overstate what Medicare means to a citizen of modest means who has worked hard for a lifetime, who doesn't want to be a burden on the rest of his or her family. It is really kind of hard to overstate what it means. Medicare has been a rock-solid, reliable, guaranteed lifeline for a great number of America's senior citizens.

I think back to my father's own experience, my own family's experience in the days before Medicare. In 1958—I just pick that year because I was a senior in high school at that time—my father at that time was 74 years old. He had worked most of his life in coal mines, in Iowa. A lot of people don't know it, but we had a lot of coal mines in Iowa. He had a number of accidents in those mines and elsewhere. He suffered from what was then called miner's lung. That is what they called it at that time, miner's lung. Today we call it black lung disease.

As I said, he had several chronic injuries as well and he was in pretty tough shape. Keep in mind, my father only had an eighth grade education, and all of his work life basically had been prior to Social Security coming into existence.

My father's total income in retirement was less than $1,500. Again, thank goodness during World War II, even though he had been old then, he had worked for a while and was covered under Social Security. Other than that, he had no assets, he had no money, no stocks, no bonds. He did own a small house in Cumming, IA. Oh, yes, he had a model A Ford that was 30 years old. That was the only car he ever owned.

Of course, in 1958 he had no Medicare because the program didn't exist. This meant that my father couldn't afford the luxury of seeing a doctor. But every year, like clockwork, my father would get sick in the middle of wintertime. He had this terrible chronic lung problem, black lung, miner's lung. My mother had passed away 8 years prior to 1958. He was on his own and basically taking care of us. As I said, I was a senior in high school at the time.

Every year he would catch a cold, he couldn't get over it, he would come down with pneumonia, and a neighbor of ours who had a car would rush him to the hospital in Des Moines.

He would arrive at the hospital in Des Moines. They would take care of my father. They would put him in an oxygen tent. They would give him his antibiotics and send him home in a week or two.

How could he afford to do that if we were so poor and had no income? My father was 74 years old. Did we have a rich uncle? No. So what happened? I will tell you how we afforded it. We thanked Sisters of Mercy at the Mercy Hospital in Des Moines who gave us charity care because our family didn't have any money. That is the only way that my father got health care.

We forget. Those of us who are young perhaps forget that 45 years ago that was the status of elderly health care in America. My father was not unique. Our family was not unique. In my little town of 150 people, it was all the same. All my father's brothers, his sisters, our family—of all who were that age, none of them had any health care. None of them had any money. If it wasn't for the charity of the Catholic Church and the Sisters of Mercy, my father would have had no health care whatsoever.

Had my father had any money or health insurance, he could have seen a doctor. He could have had annual checkups. He could have prevented long stays in the hospital. But in the absence of anything like Medicare, he ended up in a dire situation, in effect, in the emergency room. For many uninsured in this Nation, things are still that way. But fortunately, Medicare has offered a better alternative for our Nation's elderly and disabled.

I can remember as though it were yesterday. After I left high school, I went to Iowa State University. I had a Navy ROTC scholarship. I was in the Navy. I was flying planes. And I can remember coming home on leave once. It was Christmas of 1966. I came home, and my father, who was nearing his 81st birthday, still with his bad lung problems—I remember coming home and I remember when he proudly showed me his Medicare card. He said: Now I can go to see a doctor. I can go to the hospital, if I have to. But I can see a doctor. We don't have to take charity anymore.

I think of the impact that Medicare card had on my father, and the impact it had on my family and what it meant to my father to be able to get health care without accepting charity. What a tremendous difference. I often think about what my father's later life would have been like had he had Medicare. I think about how much healthier he could have been with good preventive care, and how much more he could have enjoyed his later years if he had had decent health care.

Today, seniors rely on Medicare. It means everything to them. If you do not have your health in your older years, you just do not have much of anything.

Unfortunately, back in 1966, we weren't nearly as sophisticated about medicine and health care as we are now. Surely, if we were creating the Medicare Program today we would include coverage of prescription drugs. We know that drug breakthroughs and innovations have made it possible to prevent illness, control illness, and keep people out of the hospital. For many in this society, modern prescription drugs have been a lifesaver and a life sustainer. Here we are today debating a proposal that was originally supposed to accomplish one simple goal: To fill in the gap that was left in Medicare—to right the wrong in Medicare by providing coverage of prescription drugs and simply to make medicine more affordable to seniors.

That is what we started out to do.

I deeply regret that in writing this bill Congress has strayed from that straightforward objective. This bill got hijacked, and it got hijacked by the corporate special interests, insurance and HMOs, and it got hijacked by the pharmaceutical industry.

We have forgotten who we are supposed to be helping—our Nation's seniors. Instead of a straightforward drug benefit, we now have a Medicare privatization proposal that threatens to undo the entire Medicare Program that seniors and the disabled rely on each and every day—seniors like my father who relied upon the stability and the affordability of Medicare in his later years, and seniors like him back in my home State of Iowa who simply want and need affordable medical care. That is all they want.

But what they are offered in this bill is something else entirely. This bill totally violates the spirit and substance of the original Medicare Program. I call it the ‘‘Big Medicare Gamble.’’ It is a roulette wheel. If you know anything about odds in roulette—I don't. I just learned this: The odds are tremendous against you. Roulette—that is what they are playing with Medicare. This bill threatens to unravel Medicare as we know it. Seniors are being told to head to the back of the line because the special interest drug companies and HMOs are more important than they are.

Seniors are being told there isn't enough money for a full drug benefit. That is because we have already squandered our surpluses in tax cuts worth trillions of dollars for the wealthy.

I heard someone the other day say: Look, we can't do any more in Medicare than we are doing now because we are limited by the $400 billion that was put in the budget. So all of you people want all of this stuff, but we can't do that, you see. We can't do it. We simply don't have the money. The very same person saying that voted for the tax cuts in 2001 and in 2003.

I am saying: Well, fine. If you vote for the tax cut, fine. But then don't say we don't have enough money to have a good meaningful prescription drug benefit under Medicare. What you are saying is you had different priorities. Your priority was to give tax breaks to the wealthy. That is your priority, and the

seniors and elderly who need prescription drugs, they can go to the back of the line someplace else.

We had the amount of money—I will continue to say this because it is true—that we gave up in the tax breaks. If you spread that out over 75 years, that money is three times more than what we need to make Social Security and Medicare whole for 75 years—three times. So don't tell me we don't have the money. People just have different priorities on how to spend the money.

Once again, the well heeled on Wall Street are more important to this administration and to the supporters of this bill than the elderly and the disabled on Main Street.

What we have before us today is a bill drafted behind closed doors in the dark of night that amounts to a bonanza for special interests. Don't take my word for it. Look at what others are saying. Here is the Los Angeles Times: ''Deal Would Alter the Essence of Medicare.''

As Congress prepares to vote on the final $400 billion Medicare prescription drug bill, there is one thing on which most lawmakers agree. The legislation would over time change the essence of the 38-year-old health insurance program for the elderly and disabled.

We are doing that and we are told that we have 2 days to debate it—2 days, Saturday, today, and tomorrow—and we are going to vote on Monday. My prescription for this bill is to put it out in the countryside, send it out across America, let us get out of here, go back home for Christmas, go back to our constituents, get it out among the elderly, let us see what they say about it, and come back here as we are going to do on January 20 and take it up in February. Let's hear what the American public has to say about it before we pass it. It does not go into effect until 2006, so what is the rush? If it does not go into effect until 2006, why not take a couple, 3 months to put it out there and let people think about it? No, no, we have to debate this Saturday, Sunday, and vote on it Monday.

Here is my own Des Moines Register editorial:

This legislation is a big, sloppy kiss to the pharmaceutical and insurance industries.

From the Albany Times Union:

This is not only an imperfect bill. It may also be a disastrous one.

That is what others are saying about it.

Another one, from the New York Times, on the 19th:

. . . gift to pharmaceutical companies and insurers and a threat to elderly Americans.

From the Los Angeles Times:

Deal would alter Medicare's core.

Continuing:

If a comprehensive bill on prescription drugs passes, the government program will become a massive subsidized insurance market.

That is what we are doing. It is not just the media. Here is what conservative organizations are saying. Here is the Cato Institute, a more libertarian institute, perhaps, than conservative. I am not certain if it is conservative or libertarian:

The Medicare prescription drug bill to be voted on by Congress is a terrible mistake that will dearly cost our children and grandchildren. This is not a Medicare reform bill. This is barely a Medicare prescription drug bill. This is a bill for politicians and special interests. Sometimes the better part of valor is recognizing when you have made a mistake. Congress should recognize this bill as a mistake and go back to the drawing board.

That is Cato director of health and welfare studies Michael Tanner.

From the Heritage Foundation:

The agreement contains an unworkable and potentially unpopular drug benefit with millions of Americans losing part of their existing coverage.

That is not just me, a Democrat, saying that. It is the Heritage Foundation. They go on to say:

More than four million seniors with existing private coverage are bound to lose it or have it scaled back. Meanwhile, the politically engineered premiums and deductibles coupled with their odd combination of ''doughnut holes'' or gaps in coverage are likely to be unpopular with seniors.

That was November 17, 2003, Heritage Foundation.

From the American Conservative Union:

The Medicare prescription drug benefit bills that have passed the House and Senate would drive up costs for millions of senior citizens.

They go on:

Millions more would lose their current coverage under private medigap insurance and employer-provided plans. The House-Senate conference committee should reject the current bill and start over with a bill that includes real Medicare reform.

That was the American Conservative Union, August 21, 2003.

It probably seems odd for this progressive Democrat to be agreeing with conservatives, but sometimes they get it right, and they are right on this.

This bill would provide billions of dollars in subsidies—make that bribes; they say subsidies, it is bribes; call it to what it is, bribes—to private plans and HMOs. It would ensure billions of dollars in profits, a projected $139 billion in profits to pharmaceutical companies.

It speaks volumes that on Wall Street this week, drug and health industry stocks have surged up on the news of this big money, special interest bonanza. I often pointed out that during the deliberations on this so-called prescription drug bill, you never saw any pharmaceutical companies around here. I can tell you one thing. I have been here 29 years, and I have seen times in the past whenever we had bills dealing with drugs or pharmaceutical companies, if it is something that is going to cost the pharmaceutical companies one penny, they are here. They are in the halls. Their private jets are parked out at the airport. They are calling; they are phoning; they are in our offices. If there is any legislation that is going to take a nick out of the pharmaceutical companies, believe me, you see them up here.

I never saw a one, not one during this entire debate and development of this bill, which indicates to me they love it. Why wouldn't they, with a projected $139 billion in profits?

Now, I don't mind pharmaceutical companies making profits. They have a right to it. They provide good drugs. They do good research. But what I mind is that the $139 billion in profits they are getting are coming out of taxpayers' pockets—not to buy drugs, just as a subsidy, a blatant subsidy. It is not something they are making in the marketplace; it is a funnel from taxpayers to the taxing power of the Government and giving it right back out to the pharmaceutical companies.

One of the oldest statements in medicine goes back to Hippocrates: The first thing in medicine is ''do no harm.'' That is the oath that each doctor takes in this country: First do no harm.

We have to look at this bill. It does tremendous harm. Most egregiously, this legislation seeks to privatize Medicare, despite the fact that 89 percent of seniors are in traditional Medicare, and that is what they have chosen.

I listened to the Senator from Michigan, Ms. STABENOW. She pointed out we offered seniors a choice in this country in 1997. It is called Medicare+Choice. They could stay with traditional Medicare or they could join an HMO. Guess what, 89 percent of the seniors in this country stuck with Medicare and 11 percent went with HMOs. It seems to me they have already stated what they want.

Despite the fact that traditional Medicare is less expensive to administer—this is something else that a lot of people do not understand—they say private industry can do it cheaper than Medicare. The fact is, since we have had Medicare for over 40 years, we have good data. We know. We can look at the figures. This is not something on which you have to guess. So we look at the figures, and what do we find? We find that the average administrative expense in Medicare is 2 to 3 percent. In other words, for every $1 that goes to a Medicare recipient, 2 to 3 pennies are used in administration. In private plans, it is 15 percent. For every $1 that goes through a private plan in health care, 15 cents is used in administration; only 2 to 3 pennies in Medicare.

Why is that? With traditional Medicare, we do not have to spend millions on corporate CEO salaries or give them the private jets in which they fly all

over the country. How about all the big page ads they take out in USA Today, New York Times, and Newsweek magazine? Those cost a lot of money. Medicare does not do that. So we have very cheap administrative expenses.

Despite the fact that administrative costs are 2 to 3 percent in Medicare and 15 percent in the private sector, they want to privatize Medicare. Despite the fact that under Medicare+Choice, which I just mentioned—they came in a few years ago in the late 1990s. HMOs have a history of dumping seniors. They get signed up, they are not making enough money, they leave town, and they dump them. But, still, we want to privatize it. They want to privatize it despite the fact that Medicare expenditures are growing at a slower rate than private plans. This is fact. This is not something we are guessing at. We have the data, how much Medicare has grown expenditures percentage-wise compared to private plans. We have the data. No one on that side will ever dispute it because it is factual. Medicare expenditures are growing at about 9.6 percent a year; private plans, 11.1 percent. Their expenditures are growing faster than Medicare.

They want to privatize Medicare despite the fact that private plans are concerned first with what? Profits. I do not say that as a bad word. That is their business. They are in business to make money for themselves and their shareholders. So their first concern is profit.

Senior citizens and the sickest are not profitable. The elderly are not profitable. The sickest and the disabled are not profitable for insurance companies.

Despite the clear wishes of senior citizens in this country, they want to privatize Medicare. The conferees have chosen to ignore all of these facts. Instead, they have concocted a witch's brew—a witch's brew—of seemingly appealing schemes which are designed to let Medicare wither on the vine, and to set the stage, next year and beyond, for attacking Social Security. Make no mistake about it; that is what this is designed to do. And I will have more to say about that in a minute because of what Newt Gingrich stood for.

The ideological experiment that we have confronting us is the result of what I call private sector worship. It is sort of a faith-based notion among some of our colleagues and administration officials that the private sector will take care of everything. It is a blind faith that free markets solve every problem. But this private sector worship flies in the face of past experience.

The entire reason we have Medicare today is because there is no private sector market for health insurance for sick seniors—none, zero, zip, nada—no private sector market because there is no money to be made in insuring the sick, the elderly.

The free market works just fine when you are talking about automobiles and airplanes and TVs, and widgets, et cetera. But the free market is not stupid. It cares about profit, not people. So by its very nature the free market shuts out people with disabilities, people with mental illnesses, people in the last years of their lives—in short, people who are not profitable.

So I have news for my colleagues who believe the free market is the answer to everything. The free market did not break down barriers to people with disabilities in our country.

When the Americans with Disabilities Act was passed in 1990 and signed into law, it was not the free market that did that. It was Government. It was us, the elected officials here in the Congress, working with the President, who did that. It was our free Government that had to step in to ensure that opportunities and openness in our country was there for people with disabilities. In the survival-of-the-fittest free market, these folks are just simply left behind.

Another example: We have been fighting in this Congress for years now to pass a bill ensuring mental health parity. But people with mental illnesses are not a profitable group. So the free market, left to its own devices, will have nothing to do with mental health parity in insurance. That is why I hope, as soon as we get back in our session next year, we can get to work passing the Paul Wellstone mental health parity bill because when we leave it up to the free market, folks with mental illness simply get left behind.

Another prime example of those left behind is simply the elderly. The elderly are not a profitable group of people to include in an insurance risk pool. They are sick. They are older. They have chronic illnesses. They are expensive to treat. On this score, the proof is all around us.

It is impossible to imagine private insurers fighting and competing with one another for the privilege of covering the elderly. That is why this bill has to bribe these companies with billions of dollars in subsidies to participate in this wrong-headed scheme we have before us.

As I said in my opening comments today, I have seen this proof firsthand. Now, back in 1958, when my father, as I said, was then 74, getting sick every year, going to the hospital, relying upon the charity of the Sisters of Mercy, we had insurance companies. There were a lot of insurance companies in those days.

Why weren't those insurance companies rushing out to Cumming, IA, with a population of 150 people, knocking on our door and competing with one another to cover my father with health insurance? Because they would never make any money off my dad. He got sick all the time. And he did not have any money.

Where was the free market? Where was the free market to cover my father in his time of need when he was elderly? The only market that was there was the charity market. Somehow I get the uneasy feeling that those promoting this bill see that as, once again, sort of the last kind of stopgap to helping our elderly, relying on charity once again, relying upon your kids, relying upon your families.

So do not tell me the private sector will solve every problem. I have lived through its failures firsthand. And I know that many elderly in my State of Iowa and around the country are in the same situation. They do not want to be let to not-so-tender mercies and whims of HMOs.

Now, it may sound like I have a real case against insurance companies. I do not. In fact, in my State of Iowa I think we are proud that we are the second largest domiciliary of insurance companies in the Nation, next to Connecticut, I believe. We are proud of our insurance companies in Iowa. They employ a lot of people. They are good corporate citizens. And they provide a very valuable commodity: insurance.

What the heck, I have a lot of insurance. I have life insurance, health insurance, car insurance. I probably have more insurance than I know what to do with, but it is a good tool, and I can afford it.

Insurance has been good for us ever since the first insurance scheme started about, I think it was, 3,000 years ago, in China, when Chinese farmers were sending their barges down the Yangtze River, down to the ports, down to the cities. They found the storms would come up, and they would lose some of the barges, so a few of them got together and they decided to pool—to pool—their risks so that if one barge went down, that one person would not be totally wiped out. They found out by doing that, they could cover one another. Thus began the whole idea of insurance—risk pool, sharing the risk, spreading the risk around.

So, no, I have a great deal of respect for insurance. I think it provides a very valuable, meaningful commodity for all of us. But it is not adaptable here in health care for the elderly. It is just not adaptable.

Many of my colleagues prefer the free market over Government intervention. In many cases this is a wise preference. But in other instances it is a misplaced faith that the free market can do anything. There is a time and a place for the Government to step in where the private sector either fears to tread or fails to tread because it is not profitable. No question, this is the case when it comes to helping people with disabilities, people with mental illnesses, and seniors with serious health problems.

We hear the claim that private sector competition will drive down costs and save Medicare.

Come on, let's get real about this. The only competition in this bill will be the competition for healthy seniors. That is where the competition will come.

It says right here in the Washington Post: ''Medicare Deal Likely To Spark More Health Care Competition.'' When you read that, you say that is good, that is what you want. Except when you read in here, it says:

''This could be like the wild west out there,'' Hayes said. ''If suddenly there are five or six or seven plans out there, the insurance companies will be pricing their product to make a profit, as they are obligated to do. If the consumer is kind of shooting in the dark because of the complexity of this—and the darkness is deepened by age or disability—you'll have a customer primed for exploitation. We're real concerned that people could get ripped off.''

If you are sick and you are a senior, you are going to be shunned. If you are a senior and you are healthy, you are going to have people fighting for you. Why? Not on a free-market basis, but that is where the subsidies go. We are going to give them subsidies to do this.

We hear the claim that Medicare should compete with the private sector, but they don't want an even playing field. This bill will give billions of extra dollars to the private plans so they can compete and make profits. That is not competition, that is simply another excuse to shovel taxpayers' dollars to the special interests. In fact, this bill will pay private plans 9 percent more than traditional fee-for-service Medicare.

But that is not the end of it. On top of that, the conferees have come up with what they call a stabilization fund, which amounts to a $12 billion slush fund for private plans.

Once again, the writing is on the wall. Privatization costs everyone more money. So understand this: They say they will pay the private plans 9 percent more, but when you add the $12 billion in this stabilization fund, it is more like 26 percent more. In other words, taxpayers of this country are going to pay, out of our tax dollars, 26 percent more to the private plans so they can compete with Medicare. What a sweetheart deal that is; what a sweetheart deal. And then they say that is competition, that is fair competition. It is nothing more than a scheme to give money to special interests.

We hear the claim that seniors should have a choice. Many people have said seniors should have a choice as we Members of Congress have. I can tell you this: When they find out what is in this bill, they are going to be disappointed to find out their options are nothing like our options.

Yes, I believe the seniors of this country ought to have what we Members of the Senate and Congress have. But they aren't going to get it under this bill.

Many seniors could actually end up with reduced choice with this legislation. Under this plan, if there are two private health plans, say an HMO and a PDP—I know, aside from a few people probably around here, no one has ever heard of a PDP. And why not? Because they don't exist. They have just been conjured up out of this witch's brew. It is called a prescription drug plan. There is no such animal out there now. In a particular area, if a senior wants drug coverage, that senior will be forced to get their drug coverage through one of those private plans, not Medicare. That senior will not be allowed to get their drugs through traditional Medicare. So they can go to the PDP or the HMO.

Well, they don't want to go to an HMO. Eighty-nine percent of seniors have already said they don't want to join an HMO. They want their choice of doctor. They want fee-for-service. So they can join a PDP, but we don't know what they are like because no one has ever built one. But once the senior goes in this private plan, they could face restrictions on what doctors they can see. The plan can change the drugs that are available to them. You could be on one drug and they could say: Well, we aren't going to cover that drug; we are going to cover another drug.

Now, why would they switch from one drug to another? Well, maybe they are getting a kickback from the pharmaceutical manufacturer that is making the drug. Maybe they get a bigger kickback on one drug than they do another. So they tell you: We are not going to cover that drug. So seniors could be forced to change drugs in midstream.

This is not competition. This is another excuse to shovel money to the special interests. I don't call that choice. That is not choice at all.

There is a lot of rhetoric surrounding this bill that doesn't match reality. This administration has said many times that seniors deserve choice, that seniors deserve what Members of Congress have. I am all for that. But let's put our money where our mouths are.

Right now, as a Senator, I pay about 25 percent of my drug costs, period—a heck of a deal. But the prescription drug plan put before seniors today won't even come close to this. Instead, it is a confusing, convoluted maze that—mark my words—will leave our seniors feeling betrayed and bewildered once they find out about it.

I say to my colleagues, if you like our seniors' reaction to the catastrophic health insurance plan of 1987, you are going to love their reaction to this grossly inadequate prescription drug plan.

In 1987, I was here. We all voted for a catastrophic health plan for the elderly. The AARP supported it and said it was wonderful. Guess what. We came back a year later and had our heads handed to us by seniors in our States. I know I had mine handed to me. We came back a year later and undid it.

I can barely lift the bill that we have before us. It got delivered to us sometime this morning or last night. I didn't see it last night when I went home so it must have been sometime during the night or this morning this was handed to us. I am not going to kid anybody. I haven't read this. I have been here all day. I haven't read this. I am not about to. I will have my staff look it over, and we will try to get through it. But no one is going to read this prior to the vote on Monday.

How many seniors in the country will go through this before Monday and be able to tell us what they think about it? Yet we are given 2 days—today and tomorrow—and we vote on Monday. A bill such as this, that is this big, that could have disastrous effects, is a bill that ought to be out there, around the countryside. Let's go home for Christmas and Thanksgiving. Let's let it out there. Let's get people looking at it, talking about it. See what the effect is going to be in your State and mine, urban and rural, wealthy, poor. Come back in February and let's take it up and see how we feel about it then. To me, that is the way democracy works.

This President wants to bring democracy to Iraq. I sure hope they are not watching this. I sure hope they are not watching this exercise. They might think democracy may be something they may not want if they watch this.

Look at what our seniors are going to be faced with. Once a year, we in our plan, the Federal Employees Health Benefits Program, get an open season in which we can leave the plan we are in and pick another one. Here are all the books I get once a year to look through to decide which plan I want.

I get 30 days, or something like that, to look through them and decide which one. Here is MD Individual Practice Association; here is GEHA; here is NALC; here is the Mail Handlers Benefit Plan; here is BPP and PPP—never heard of that; here is Kaiser Foundation; here is APWU—on and on and on. You get my point.

So we are now going to say to the seniors that every year you get a change and you will get all these wonderful books, like we do, to read, and you go through them and decide which plan you now want to be in. Give me a break. Maybe a person out there is sick and just hanging on, and they are supposed to decide by looking at these books. I suppose maybe they will have to go out and hire somebody to look at them. They will have to give a subsidy to somebody else. Maybe we will give a subsidy to the trial lawyers to help them decide which one to choose. Every single year. Who knows what

drugs will be covered or what doctors? It is convoluted, bewildering. Every year they can bounce them around; you can be in a different plan.

At the end of the year, the plan can say: I am not making enough money, so I am out of town. Nothing in this bill stops them. Nothing in the bill says: We don't care if you don't make any money, you have to stay. If you are not making money, you can get out of there, and the senior is dropped, period.

Let's talk about what Senators are going to pay with this. They are going to find out, to their dismay, what they are going to have to pay. Aside from being confused and bewildered, being able to be dropped every year, let's see what they have to pay. Seniors who have an annual income above $13,470 per year—that is right, $13,470 a year—that is not a lot of money. If they have an income above that, they pay a yearly deductible of $250 before their coverage kicks in. They will pay $35 a month in premiums. Can I tell you also that this $35 is not fixed in law; it is estimated. It could go up every year. It could be $40, $42, $45, or who knows? There is no guarantee it is going to be $35. So now you have about $420 a year. As I said, the number could change every year. When a private plan is not making enough profits, they can increase the premiums every year. So seniors end up paying more.

So after seniors put at least $670 upfront into the program, they can start receiving some benefits. You might say, well, $670 is not a lot of money. If you are making $14,000 a year, or $13,470 a year, that is a lot of money. That is asking a lot. Then, after they pony up the $670, they pay 25 percent of their drug costs up to $2,250. At $2,250, the senior hits the gap—what we call the donut hole—at which point they pay 100 percent of their drug costs until they hit the catastrophic amount, even though they are still paying monthly premiums into the program.

So during the course of the year, a senior could have coverage one day, and the next day they could go to the pharmacy and be charged the full sticker price for the prescription drugs. That is the donut hole. It is not fair. It is outrageous.

Look at what they are paying now: Part A premium, zero. Part A deductible, for hospitalization, $876 per benefit period; Part B premium for doctors, $66.60 a month. The deductible is $100 a year with doctor visits. The cost share for doctor visits is 20 percent. That is straightforward, simple, and easy to understand. There are not income limits, asset tests, or anything else. It is just very straightforward. Seniors who have annual drug costs of $500 actually pay more into the program than what they receive. They would pay $500 for drugs, but they would pay $751.25 into the program. Tell me how fair that is. A senior with $1,000 in drug costs would pay $876.25. At the higher end, a senior with $5,000 in drug costs would pay nearly $4,000 for his or her drugs. What a deal. And for that, they get to read all these books every year. They get all these, I say to my friend from California, every year. And they have to try to decide. They can get bounced every year from one plan to another. For that, they pay $5,000, or they pay 4,000. It should not come as a surprise.

It is estimated that seniors, over the next 10 years, will have $1.8 trillion for prescription drugs costs, but we are allocating $400 billion to pay for it. Where did that money go? Well, it went to tax cuts. Hopefully, the people who voted for the tax cuts now will not bemoan the fact that we don't have the money. They voted to blow the money on tax breaks for the wealthy.

Now, let's look at one other thing. To make things even messier, this program would create several tiers of class under Medicare. Right now, you have one class. Everybody knows what he or she has to pay. Under the new program, we are going to classify you and have a lot of different strata here. There are different low-income benefits for those under 135 percent of the poverty level—$12,123, single—and another set of benefits for those under 150 percent of poverty—$13,470.

On top of that, to receive the low-income benefits, a senior has to undergo an asset test. Again, hang on here, folks. We will see if we can understand this. We will have a little test afterward. For those at 135 percent of the poverty level and below, the asset test is $6,000 for a single person, $9,000 for a couple. For the group at 150 percent of poverty and below, the asset test is different. In this group, a person cannot have more than $10,000 in assets, or $20,000 for a couple. Follow me?

So what you are going to have is this. I predict this is exactly what is going to happen. You are going to have seniors at the senior citizen center, or at the local McDonald's having a cup of coffee; and old Bob is going to say: You know, this thing they passed is a pretty good deal. I am getting all my free drugs and stuff like that. His friend, Sue, is sitting there and she might say: What are you talking about? I just took a job at the local supermarket bagging groceries or stocking shelves; I am retired and have Social Security, but I need to make ends meet and pay for my drugs. Because I took that extra job to help make ends meet, to pay for heating bills, to meet my drug costs—I took this job that doesn't pay a heck of a lot—minimum wage—but because I got bumped up a little, I don't get the same benefits you get, Bob. And Margaret, who is sitting there, thought she was going to get the low-income benefits, but she filled out her forms and found out she had too much life insurance, over $10,000 in life insurance. She cannot afford her medicine, but her life insurance is considered an asset.

If you are going to go to McDonald's in the morning and you are sitting and having coffee, they are going to talk about this. But for the spread of $25 a year—maybe $50 a year—one person will get great benefits and the other person won't. You tell me if this is not a formula for an uprising among the elderly. It is not rich and poor. I am talking about people who make $13,470 a year, or they make a little less than that.

Or $12,123 versus $12,150. That is the kind of difference you are going to have, and that is going to decide what you get. Then they are going to say: You know, old John over there is getting those low-income benefits, but, by gosh, he is cheating because I know he owns something else. He owns a better car than what he said or he has a little something stashed away someplace. How do we get those low-income benefits? We know he has more than that.

It is going to arouse suspicion among the elderly: Why do you get a better benefit than I get? We are both in the same boat, and you make 50 bucks more a year than I do and you get all these benefits and I don't.

Hang on to your hats. It is going to happen.

How are they going to know where they fit in? You will have several people who make nearly the same amount of money each year and they receive drastically different benefits. This is a formula for confusion and confrontation among the elderly.

Right now, there is only one group. When you have Part A deductible, you all pay. When you have a Part B premium of $66.60, everybody pays it. When you have deductible of $100, everybody pays it. When you have a Part B cost share of 20 percent, everybody pays it.

When they sit around McDonald's having their coffee in the morning, Bob isn't suspecting that Joe is getting away with something or that Sue maybe has a little something extra, and Margaret who took that job at the supermarket to have a little extra money doesn't feel as if she is discriminated against because she has a little extra pocket change. They all pay the same.

Wait until this program heads south. You just wait. You just wait and see what happens.

I don't know, did the authors of this bill deliberately design a system that is going to fail, that does more harm than good? There were a thousand pages delivered to us on Thursday. The drug and health industries are spending millions to ram this bill through immediately, even though seniors across the Nation don't know what is in it.

What is the rush, I ask again? It doesn't go into effect until 2006. What

is the rush? Why must we pass this bill before seniors have had a chance to examine the provisions and voice their views?

I saw this cartoon in a newspaper from Newark, NJ. This is the cartoon. Here is the pharmacy and the pharmacist. This, obviously, is a senior citizen who has come in. She has a prescription to fill out. The pharmacist represents Congress. He is saying to her: Have a seat. It'll be ready in 2½ years.

That is what we are saying: Have a seat; in 2½ years, this will be ready. Why do we have to rush it through right now? Why do we have to fill the prescription now if she doesn't get it for 2½ years? Maybe we ought to write the prescription later on, next year after we have had a chance to really look at it.

I think seniors in this country deserve more. They deserve to be put first in the process. They have been given short shrift in this process by the corporate special interests who have a very different view about the direction of Medicare. As I said earlier this week, the stocks of pharmaceutical companies and health insurance stocks have gone up.

Maybe a lot of seniors assume that AARP would stand up for their interests; that AARP would come in here and stick up for them. But AARP, the American Association for Retired Persons, has brazenly betrayed the wishes of its members on this issue. Seniors with whom I have spoken from all across Iowa do not like this bill.

AARP came to Iowa late this summer and had three big town meetings on this drug bill. Several hundred people showed up. I was told when AARP presented it, they presented the House version and the Senate version, as we passed them, in a straightforward manner without editorializing whether one was better or worse or good or bad.

After presenting this to several hundred Iowans in three different locations, at every meeting, they asked the 200 to 250 people who showed up, all senior citizens: How many of you would sign up for this plan? Do you know how many hands were raised? Zero. Not one hand went up. Not one hand. Now AARP is saying this is a great bill. I don't know with whom they talked. When they talked to the elderly in Iowa, they didn't get any takers.

My constituents want an affordable, reliable benefit under the traditional Medicare Program. Seniors across the country agree. A poll released this week found that almost two-thirds of seniors view this bill unfavorably. Most of them identify themselves as AARP members. Among those, only 18 percent said Congress should pass the bill; 65 percent said Congress should go back to work on this bill. They need to know the direction Medicare is taking and whose side AARP is on.

It says everything about this bill that Newt Gingrich is urging Republicans to vote in favor of it. For those of you who have forgotten who Newt Gingrich is, he was Speaker of the House and was the one who uttered the famous phrase: It was his desire to let Medicare ''wither on the vine.''

Mr. Gingrich is one of those ideologs who insists the private marketplace will solve all the problems. It would make his day to see Medicare dismantled through privatization, and that is exactly why he is pulling out the stops in lobbying for this bill—because under this bill, Medicare not only withers on the vine, it is cut away from the vine.

This bill is a realization of Newt Gingrich's fondest dream: to end Medicare as we know it. I might also say that Newt Gingrich made no bones about it. He wanted to privatize Social Security—privatize it, put it out on the stock market. That is next. But he sees this as the first step to that privatization.

The newspapers have been full of accounts of Mr. Gingrich's ''pull out the stops'' lobbying for this bill. He says:

> Every conservative Member of Congress should vote for this Medicare bill.

I submit, if Newt Gingrich is for this bill, that is a serious red flag. That ought to raise a lot of questions because, as I said, Mr. Gingrich has made no bones about it—I give him marks for honesty—he has said time and time again that Medicare ought to wither on the vine; we ought to privatize Social Security. Not only does it privatize Medicare, it is a bonanza for Mr. Gingrich's corporate friends, the big money corporate interests.

This bill is like Christmas in November for Mr. Gingrich's corporate friends. It allows people to sock away thousands of dollars a year in tax-free medical savings accounts. Of course, the people from where I come don't have money for tax-tree accounts. It will be used mostly by the wealthy, not low-income seniors. Newt Gingrich is ecstatic. This Medicare bill is yet another tax cut bill with the benefits flowing overwhelmingly to the wealthy.

Here is more of what Mr. Gingrich has to say about this Medicare bill:

> I think this is one of the great historic moments in moving the Nation in a conservative direction.

He said—get this—this is Newt Gingrich:

> If you are a fiscal conservative who cares about balancing the Federal budget, there may be no more important vote in your career than one in support of this bill.

I guess as a supply-side zealot, he believes that the tax-cut provisions in this bill will help us balance the budget. That is bizarre. That is just bizarre. They just want to privatize Medicare. That is all they want to do.

They want to privatize Social Security. Mr. Gingrich claims that the shift towards medical savings accounts would be ''the largest change in health policy in 60 years.''

He made this claim to a gathering of his right-wing anti-tax enthusiasts at the Americans for Tax Reform headquarters in Washington. Of course, the head of Americans for Tax Reform, Mr. Grover Norquist, is famous for saying, ''My goal is to cut government in half, to get it down to the size where we can drag it in the bathroom and drown it in the bathtub.''

That includes Medicare and Social Security. That is part of his government. That is what he wants to drown in the bathtub.

So it is no wonder that Mr. Gingrich and his right-wing friends love this bill. Not only does it undermine a Government program that they despise; even better, it serves up another fat tax cut for the rich. Only the wealthy and healthy will benefit from this bill.

Mr. Gingrich is outspoken in his belief that pharmaceutical companies are getting unfair treatment and they are punished by their success. Well, Mr. Gingrich, that is wrong. This bill does not ask one penny from the pharmaceutical companies. In fact, it protects drug companies from Government efforts to negotiate lower costs. I am the first to support drug research and development, but the Medicare burden should not be taken solely out of the pockets of seniors and taxpayers.

In closing, I would have to ask: Exactly why are Newt Gingrich and AARP in the same bed? That seems odd. What are they up to? AARP's slogan is ''the power to make it better.'' They claim to represent American seniors. However, millions of seniors are furious that AARP has endorsed this lousy bill. As I said earlier, a Peter Hart poll found almost two-thirds of seniors viewed the bill unfavorably, and most of those were AARP members. Among AARP members, only 18 percent said we should pass this bill, while 65 percent said we had to go back to work on it.

Yesterday, AARP members from Maryland, New York, and Pennsylvania tore up their membership cards in front of their organization's Washington headquarters. AARP's Web site community message board is filled with outraged comments. Members are accusing William Novelli, CEO of AARP, of selling out to conservatives and Newt Gingrich.

Now, where, I wonder did they get that idea? In fact, the relationship between Newt Gingrich and the bigwigs at AARP goes way back. William Novelli, executive director of AARP, wrote the preface to Newt Gingrich's book, ''Saving Lives, Saving Money.'' In that preface, Mr. Novelli states that: Newt's ideas are influencing how we at AARP are thinking about our national role in health promotion and disease prevention and in our advocating for

systems change. That is Mr. Novelli's preface in Newt Gingrich's book.

Well, I have to ask: Which of Newt's ideas are ''influencing how we at AARP are thinking''? Is it Newt's fond wish that Medicare ''wither on the vine''?

No wonder members of AARP feel so betrayed. I too feel betrayed that AARP's leaders have chosen to endorse the right-wing principles of this Medicare bill and endorse Newt Gingrich's ideas of how to undermine and privatize our Nation's health care system.

AARP's endorsement is disturbing for another reason. They have a flagrant conflict of interest in this matter. Bear in mind AARP receives vast revenues from the sale of insurance to seniors. Royalties from such arrangements include deals with United Health Care Insurance Company, Metropolitan Life Insurance Company, and Advanced PSC Pharmacy Benefit Management, accounted for more than one-third of AARP's $636 million in revenues last year, according to AARP's 2002 annual report. There we have it. AARP is looking at the insurance end of it, of course.

American seniors deserve better from the AARP and from Congress. They deserve a bill that includes an affordable prescription drug plan, that strengthens Medicare, that does not penalize the sickest and the poorest in our Nation.

This bill reflects the priorities of this Republican administration and of Newt Gingrich who have been hostile to Medicare since its inception. This bill needs to be written by individuals and groups that believe in Medicare, not those who want to undermine it. Seniors know that this bill is a betrayal. They know who the winners and losers are with this bill.

Under premium support, HMOs, PPOs, and pharmaceutical companies, they win; seniors and the disabled lose. Under cost containment, the private companies win; the seniors and disabled lose. Under drug coverage, pharmaceutical companies win; seniors lose. Under health savings accounts, the wealthy HMOs win; seniors and disabled lose. Under the so-called stabilization fund, this slush fund, HMOs, PPOs, and pharmaceutical companies win; seniors and the disabled lose. Under so-called competition—boy, there is a misnomer if I have ever heard it—HMOs, PPOs, and pharmaceutical companies win; seniors and disabled lose.

The seniors know this. Again, it is a question of priorities. This administration rammed through this Congress $1.6 trillion in tax cuts. Now they say they cannot take care of the elderly who have worked their entire lives, contributed to their communities and served this country. Once again, the administration has made a clear choice. They have chosen the folks on Wall Street over the folks on Main Street.

It is a big deal. I got to thinking the other day. I talked about how my father, during the Depression—I was born November 19, 1939. I just had my birthday this week. In 1939, my father was out of work. He had a wife, five kids, and one on the way. I was the sixth one. He had no money. He had an eighth grade education. My mother was an immigrant who had no formal education. They lived in a small house in a small town in rural Iowa, and my father had no hope. He was already 54 years old, had worked in the coal mines most of his life, and the only thing they had was this tiny little house in this small town.

As I walk out of my door every day, I have on my wall a little framed orange piece of paper. It is dated July 19, 1939, 4 months to the day before I was born. On that orange piece of paper, it is printed and it says: You, Patrick F. Harkin—that is my father—are to report to work at once as a laborer on a project, $48.30 a month. It was signed by somebody, and then my father signed it—4 months to the day before I was born. It was his WPA form when my father went to work on a WPA project.

Now, I look at that because I remember once George Bush, when he was a candidate for President, said: Government cannot give hope to people. Every day when I walk out of my office and I look at that piece of paper, I say: Mr. Bush, you are wrong. If it had not been for Franklin Roosevelt and the New Deal, I do not know what would have happened to my family and my father. They gave him a job. They gave him hope.

Years later, when I was in high school, my father took me to some of those projects he built. One of them was at Lake Okoboji. It is still in use as a recreational facility in Iowa; a high school in Indianola is still being used today built by WPA. Why do I say that? Because I got to thinking about the new deal and I got to thinking, it was a Government program, Roosevelt's New Deal. Who was the benefactor? The unemployed. To my father, who had no hope, it gave him hope and it gave him a job.

Then we had Truman's Fair Deal, and who benefited from that? The uninsured and low-wage workers.

Today we have a new Government program that they are trying to push on us, Bush's Big Deal. Not the New Deal, not the Fair Deal, but the Big Deal. Who wins? The HMOs, big pharmaceutical companies and private health plans. I call it the Big Deal because the bigger you are, the better the deal. Compare that to Franklin Roosevelt's New Deal and Harry Truman's Fair Deal, that reached down and helped bring people up. No, today we have the Big Deal: the bigger you are the better the deal.

This is a radical departure for Medicare. It changes the nature of this program as an entitlement. The conferees set an arbitrary cap on how much Medicare money can be spent. Instead of a cap, we ought to just be spending the money more wisely. We ought to be spending less on HMO subsidies, less on subsidies to the pharmaceutical companies, and more on preventive health care, keeping our seniors more healthy, getting them better diets and better exercise—more preventive health care to keep them healthy.

This is an article called ''Entitlement Change Is Inevitable, Key Administration Officials Say.'' They went on to say: ''In the long run, Social Security cannot meet its commitments.''

That seems to be the constant refrain we hear from this administration. Social Security cannot meet its commitments. Of course not; we just took the huge surplus that had been built up under the Clinton administration and we squandered it on tax breaks for the wealthy.

I say again, the amount of money going out in tax breaks to the wealthy in our country that was passed in 2001 and 2003, over the next 75 years, is three times more than what is necessary to ''save Social Security and Medicare.'' Don't tell me that the money is not there and that Social Security can't meet its commitments. It can't meet its commitments now because we squandered all the money on tax breaks for the wealthy. Sure, Medicare is headed for a train wreck, but it is a train wreck planned and plotted by this administration.

You can be sure as soon as this bill is out of the road they are going to start on Social Security. Headline: ''Bush Pushes For Expanded Private Role in Medicare.'' That is what it is all about.

''The foundation of this . . . compromise—is a level playing field between Medicare and private plans,'' said Senator Edward Kennedy. ''What conservative Republicans are now trying to do is rig the system in a way that would coerce senior citizens away from Medicare and into private plans.''

Senator KENNEDY said it right.

To be fair it is not just Mr. Gingrich and Mr. Bush who are hostile to the Medicare Program. Many others share their views.

The junior Senator from Pennsylvania and third ranking Republican, Mr. SANTORUM, said—I believe this is a direct quote:

I believe the standard benefit through the traditional Medicare program has to be phased out.

That is the third ranking Republican on that side of the aisle.

The junior Senator from Utah, Mr. BENNETT, has said:

Medicare is a disaster. Medicare will have to be overhauled. Let's create a whole new system.

Tom Scully, head of the Centers for Medicare & Medicaid, the top Medicare official in the Bush administration, said this about Medicare; he called it

''an unbelievable disaster'' and a ''dumb system.''

Medicare is not a disaster or a dumb system in the eyes of millions of seniors who rely on it every single day. As I said, this is too big an issue to address in a day or 2 days.

We have to act now, we are told.

Nonsense. The provisions in this bill don't kick in until 2006. We received the bill on Thursday, this right here. We received it this morning on our desks. We didn't have time to look at it. We ought to withdraw the bill, get it out to the public, and bring it back for consideration in February. That will allow time for seniors back home to analyze it, discuss it, and share their views with Members of Congress. Then we can take an informed vote on this bill, taking into consideration the views of seniors in our respective States.

This is the Senate, supposedly the world's greatest deliberative body. We can take more time, as we did last week, in going all day and all night and all day and all night, talking about four judges who were held up—we can take more time to do that than we can to debate and discuss this profound change in Medicare in the United States. What does that say about the state of affairs in the Senate today? Oh, yes, we can deliberate over four judges—168 that got approved and 4 that didn't. We can talk about that for days or weeks on end. But, no, to discuss this profound change in Medicare we take Saturday and Sunday and vote on Monday.

The Senate has ceased being the world's most deliberative body. It is now the world's most rushed body: Rush it through, stampede it, and get it done. This is a complex, confusing, bureaucratic nightmare of a bill. It is a bad bill procedurally.

This bill contains untested experimental privatization plans that especially threaten seniors in rural areas. To top it off, it offers yet another big tax break for wealthy Americans.

There is supposedly a fix in this bill for the disparities. There is supposed to be fairness, in terms of addressing the disparity between the States, in reimbursement for Medicare on a per beneficiary basis.

I have taken the floor many times to talk about how Iowa is No. 50 in the Nation in the per beneficiary reimbursement for Medicare. So Iowa has been 50th out of 50 States.

This bill was supposed to have a fix in it to make it more fair. So they put, I think, $25 billion into this bill to make it more fair over the next 10 years. Right now, the per beneficiary reimbursement in Louisiana is $7,336. In Iowa it is $3,053. In Virginia it is $4,611.

I say to the occupant of the chair, the citizens of Virginia pay the same Medicare taxes as anybody else in this country. Yet the seniors in Virginia get back $4,611 per beneficiary, the seniors in New York get $6,924; the seniors in Texas get $6,539; the seniors in Maryland, right next-door, get $6,301, but in Virginia they only get $4,611 per beneficiary. In Iowa it is $3,053. Yet we pay the same Medicare taxes.

So we have been fighting for a long time to try to straighten this system out and make it a little bit more fair.

They put some money in the bill. But guess what they did—they made it worse because what they basically did is they kind of gave a percentage increase. You know how that works.

If you get $100 and I get $10 and we get a 10-percent increase, you get a lot more money than I get. Right now, Iowa, we are 50th. Louisiana is first in terms of how much money they get per beneficiary. Now we are 50th. The disparity in payments for seniors between Iowa and Louisiana is $4,685. In other words, a beneficiary in Iowa gets $4,685 less. We get less in reimbursement per beneficiary than it cost Louisiana. Under this bill, supposedly meant to fix this, Iowa is still last. We are number 50th. The disparity has gone from $4,685 per beneficiary to $5,017 per beneficiary. It is worse. This was supposed to be fairness?

There are some who will say that Iowa, in terms of the beneficiary and the amount of money they got, is 13th. That is all right. It may be 13th. But other States are more.

As you can see, it increases the disparity rather than lessening it. That is what we want to do—lessen the disparity in the States.

Lastly, the Washington Post this morning said it all. ''2 Bills Would Benefit Top Bush Fundraisers.''

At least 24 Rangers and Pioneers could benefit from the Medicare bills as executives of companies or lobbyists working for them, including 8 clients affected by both bills.

Meaning the Energy bill. ''Pioneer'' is someone, I guess, who raises $100,000 for the President, and ''Ranger'' is someone who raises $200,000 for the President.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

2 BILLS WOULD BENEFIT TOP BUSH FUNDRAISERS

(By Thomas B. Edsall)

More than three dozen of President Bush's major fundraisers are affiliated with companies that stand to benefit from the passage of two central pieces of the administration's legislative agenda: the energy and Medicare bills.

The energy bill provides billions of dollars in benefits to companies run by at least 22 executives and their spouses who have qualified as either ''Pioneers'' or ''Rangers,'' as well as to the clients of at least 15 lobbyists and their spouses who have achieved similar status as fundraisers. At least 24 Rangers and Pioneers could benefit from the Medicare bill as executives of companies or lobbyists working for them, including eight who have clients affected by both bills.

By its latest count, Bush's reelection campaign has designated more than 300 supporters as Pioneers or Rangers. The Pioneers were created by the Bush campaign in 2000 to reward supporters who brought in at least $100,000 in contributions. For his reelection campaign, Bush has set a goal of raising as much as $200 million, almost twice what he raised three years ago, and established the designation of Ranger for those who raise at lest $200,000.

With the size of donations limited as a result of the campaign finance law enacted last year, fundraisers who can collect $100,000 or more in contributions of $2,000 or less have become key players this election cycle. The law barred the political parties from collecting large—sometimes reaching $5 million to $10 million—''soft money'' contributions from businesses, unions, trade associations and individuals. This has put a premium on those who can solicit dozens, and sometimes hundreds, of smaller contributions from employees, clients and associates.

The energy and Medicare bills were drafted with the cooperation of representatives from dozens of industries. Power and energy company officials; railroad CEOs' pharmaceutical, hospital association and insurance company executives; and the lobbyists who represent them are among those who have supported the bills and whose companies would benefit from their passage.

The Medicare bill was scheduled to be acted upon by the House late last night. If passed, it will go to the Senate. The first comprehensive revision of energy policy in more than a decade passed the House this week, but in the Senate, the measure ran into a roadblock yesterday when opponents stopped it from coming to a vote. Sponsors promised to make further efforts to get the 60 votes to break the filibuster.

The energy bill provides industry tax breaks worth $23.5 billion over 10 years aimed at increasing domestic oil and gas production, and $5.4 billion in subsidies and loan guarantees. The bill also grants legal protections to gas producers using the additive methyl tertiary-butyl ether (MTBE), whose manufacturers face a wave of lawsuits, and it repeals the Public Utility Holding Company Act (PUHCA), a mainstay of consumer protection that limits mergers of utilities.

The bill has been the focus of a bitter ideological and partisan fight for three years. A leading sponsor, Rep. W.J. ''Billy'' Tauzin (R–La.), chairman of the House Energy and Commerce Committee, praised the legislation, saying, ''All Americans can look forward to cleaner and more affordable energy, reliable electricity and reduced dependence on foreign oil for generations to come.''

Public Citizen, which has tracked the legislation and correlated patterns of contributions to members of Congress and to Bush, denounced the bill as ''a national energy policy developed in secret by corporate executives and a few members of Congress who are showered in special interest money.''

Perhaps the single biggest winner in the energy bill, according to lobbyists and critics, is the Southern Co. One of the Nation's largest electricity producers, it serves 120,000 square miles through subsidiaries Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric, along with a natural gas and nuclear plant subsidiary.

The repeal of PUHCA, for example, would create new opportunities to buy or sell facilities; ''participation'' rules determining

how utilities share the costs of new transmission lines that are particularly favorable to Southern; two changes in depreciation schedules for gas pipelines and electricity transmission lines with a 10-year revenue loss to the Treasury of $2.8 billion; and changes in the tax consequences of decommissioning nuclear plants, at a 10-year revenue loss of $1.5 billion, according to the Joint Committee on Taxation.

At least five Bush Pioneers serve as a Southern Co. executive or as its lobbyists: Southern Executive Vice President Dwight H. Evans; Roger Windham Wallace of the lobbying firm Public Strategies; Rob Leebern of the firm Troutman Sanders; Lanny Griffith of the firm Barbour Griffith and Rogers; and Ray Cole, of the firm Van Scoyoc Associates.

The railroad industry also has a vital interest in the energy bill. For years, it has been fighting for the elimination of a 4.3 cent-a-gallon tax on diesel fuel, and, at a cost to the Treasury of $1.7 billion over 10 years, the measure repeals the tax. Richard Davidson, chairman and CEO of Union Pacific, is a Ranger, and Matthew K. Rose, CEO of Burlington Northern, is a Pioneer.

Among the major lobbying firms in Washington, Akin Gump Strauss Hauer & Feld has been one of the most successful collecting fees for work on the energy and Medicare bills. In the first six months of this year, Akin Gump, which has two partners who are Prioneers—Bill Paxon and James C. Langdon Jr.—received $1.6 million in fees from medical and energy interests.

Mr. HARKIN. Mr. President, I apologize to my fellow Senators. I have taken a long time. I have taken over 1 hour and 15 minutes, I believe. But I believe we ought to take a lot longer than that. I think we ought to get this bill out of here, send it into the countryside, let people see it, and come back in February rather than taking Sunday, Monday, Tuesday. Let us, as I said, take a week or two to get into this bill, debate it, discuss it, and yes; and amend it if we need to, rather than being ramroded through as they are doing.

If the seniors reject it, then we can reject it and go back to the drawing board. We should not at the eleventh hour when people want to go home for Thanksgiving be stampeded to support a bad bill, a bill that will destroy Medicare as we know it.

I yield the floor.

The PRESIDING OFFICER. The distinguished Democratic leader.

Mr. REID. Mr. President, I know the distinguished Senator from Missouri is anxious to speak. He is going to visit his son who is coming home on leave from the Marine Corps.

I will be very quick. Following the Senator from California, Mrs. BOXER, our next speaker will be Senator LINCOLN. Tomorrow, the Democrats, other than those we have already lined up—the last Member we lined up I believe was Senator KERRY—would be Senators WYDEN, LEVIN, KENNEDY, MURRAY, DORGAN, CORZINE, and AKAKA.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. Mr. President, reserving the right to object, I want to ask a question. In the process of reserving the right to object, I want to know how much time has been used on the respective sides.

Mr. REID. Mr. President, I have spoken to the Parliamentarian. The opponents of this legislation have approximately 2 hours left tonight before 11 o'clock.

The PRESIDING OFFICER. The proponents have 3 hours 57 minutes remaining, and the Senator from Nevada, the assistant Democratic leader, is correct in his estimate.

Mr. GRASSLEY. I have no objection.

Mr. REID. Mr. President, following Senator AKAKA, we would like to have Senators JOHNSON, DAYTON, BINGAMAN, and Bill Nelson.

The PRESIDING OFFICER. If there is no objection, the Chair is prepared to rule.

Without objection, it is so ordered.

The Senator from Missouri.

Mr. BOND. Mr. President, I ask unanimous consent that I may go out of order to speak for 5 minutes prior to Senator HATCH, and then Senator HATCH may be recognized.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BOND. Mr. President, I am most grateful to my colleagues. I have been here on the floor for 3 scintillating hours, and I have other commitments that I have to make.

Early this morning the House passed historic bipartisan legislation to improve and strengthen the Medicare program and give all seniors access to prescription drug coverage. Seniors will finally receive the prescription drug coverage they need and the health care security they deserve.

This Medicare conference report is a compromise in the truest sense of the word. It is not perfect—some on the far left don't like it and some on the far right don't like it either. But I will tell you who does like it: The AARP—this agreement has been endorsed by the leading voice for older Americans—representing 35 million members nationwide and 743,000 members in my home State of Missouri. As well as the hospitals, doctors, other health care providers and employers.

Why do these groups support this bill? Because in AARP's own words, ''This is about getting vital help to people that need it most.''

Before I talk about some of the strengths on this bill I wanted to take this opportunity to address some of the criticism from my friends on the other side of the aisle. I have heard some Members say that this bill ''keeps drug prices high.''

That is untrue. Seniors will realize significant savings off their current drug bills under this bill. In 2004–2005, senior citizens will receive a Prescription Drug Discount Card that the Department of Health & Human Services—HHS—estimates will cut drug costs by up to 25 percent.

In 2006, the prescription drug benefit is added to Medicare that HHS estimates will help seniors currently without coverage save up to half off what they're paying today. For the typical senior who spends $1,285 a year on prescription drugs, more than $640 they get to keep in their pocket translates into significant savings.

Lastly, the bipartisan Medicare plan also ensures generic drugs, less expensive than brand-name pharmaceuticals, are moved to market much faster to help hold down costs.

I have heard some members say that this bill will ''cause two to three million retirees to lose drug coverage.'' This bill contains $88 billion worth of employer incentives to help protect retirees' private coverage. This bill will actually strengthen the safety net for seniors by providing financial incentives for employers to continue offering prescription drug coverage for their retirees.

This marks the first time that Medicare will provide a federal subsidy of 28 percent of beneficiaries' drug costs between $250 to $5,000—up to $1,330 per beneficiary. This subsidy is excluded from taxation, providing another incentive for employers to offer coverage.

Lastly, qualified retiree plans have maximum flexibility on plan design, formularies and networks, and allows employers to wrap-around Medicare coverage options. That is why the AARP and major employer groups, such as the National Association of Manufacturers, Employers' Coalition on Medicare, Chamber of Commerce and Business Roundtable, endorse the bipartisan Medicare plan. Some Members have said this bill is ''bad for seniors'' and cited a recent Consumers Union report.

Truth is this Medicare bill provides help to the two groups that need it most—low income seniors, and seniors with high drug costs. Even Consumers Union acknowledges that low-income seniors ''will be eligible for substantial subsidies for their prescription drugs.'' Consumers Union also acknowledges that seniors with catastrophic drug expenditures get ''measurable relief'' under the bill, which will cover 95 percent of a senior's drug costs over $3,600. In other words, the Medicare bill provides help to the two groups that need it most—low income seniors, and seniors with high drug costs.

And finally some have claimed that this Medicare bill will destroys Medicare as we know it and privatize the whole program. That is one of my personal favorites. Bottom line is the AARP would never endorse a bill that privatizes or in any way destroys the Medicare program period.

I will support this bill because it is the first major upgrade to Medicare in

38 years, providing help to the two groups that need it most—low income seniors, and seniors with high drug costs.

For nearly four decades, Medicare has provided peace of mind and health care security for millions of seniors. Yet, increasingly this cherished program is no longer meeting the security needs of our seniors. Medicine has advanced exponentially since 1965, but the Medicare Program has not kept pace. When Medicare was launched 38 years ago, modern medicine meant surgery and hospitalization—and that is what Medicare covers.

Today, doctors routinely treat their patients with prescription drugs, preventive care and groundbreaking medical devices—but Medicare has not kept pace with these changes.

For example, today Medicare covers only about half of the typical seniors' health care costs. Medicare lacks good preventive coverage, wellness care, and chronic disease management. It doesn't even cover the costs of an annual physical. It does not protect against large, catastrophic health costs should serious illness strike. And we all know that it does not cover outpatient prescription drugs.

Additionally, the program faces serious financial and demographic pressures in the coming years. Between now and 2030 the number of seniors will nearly double from 40 million to 77 million. The program's costs will more than double to nearly $450 billion annually, even before we add prescription drug coverage or improve other benefits. And the number of taxpayers paying into the system to finance health coverage for seniors will drop from 4 today to 2.4 by 2030. This underscores the need to act and the need to act responsibly. We need to improve the program for today's seniors but we also need to put in place a more stable structure that will provide health care security for generations to come.

My goal is and has always been to give seniors the best, most innovative care. This will require a strong, up-to-date Medicare system that relies on innovation and competition, not bureaucratic rules, price controls and regulation.

The bill before us takes a bold new step and is an important achievement in the effort to strengthen and improve Medicare and provide meaningful prescription drug benefits to seniors. This bill offers beneficiaries a meaningful and reliable drug benefit through the private sector, with reasonable and fair cost-sharing. Beneficiaries will have the ability to receive the drugs of their choice without government interference and with better coverage options.

Most importantly, it will provide prescription drug coverage at little costs to those who need it most—people with low incomes. It will provide substantial relief to those with very high drug costs and relief to millions more. In a country as prosperous as ours, we can no longer tolerate situations where seniors have to split their pills in half or cannot fill necessary prescriptions because they can't afford the vital drugs they need.

This bill ensures access to drug benefits for beneficiaries who live in rural areas. Reliable coverage will be available everywhere in Missouri—wherever there is Medicare coverage, there will be prescription drug coverage.

As we work to implement this new Medicare benefit, this bill will provide immediate prescription drug assistance for beneficiaries through a temporary drug discount card available to seniors 6 months after the bill is signed into law.

This discount card is expected to yield a savings of between 10 and 25 percent. Some of our most vulnerable seniors would receive an additional $600 subsidy annually to assist with the purchase of prescription drugs. This drug card would be available until the Medicare prescription drug benefit is fully implemented in 2006. Adding vital prescription drug coverage is not the only thing that we are doing to improve Medicare coverage for seniors.

Medical experts long ago learned that preventive care extends and improves quality of life. The bill before us today adds vital preventive care, wellness services, and chronic care management. This long overdue step will keep seniors healthy and will save money and most importantly save lives.

This bill also includes $25 billion in new assistance to ensure patient access to hospitals, doctors and other health care providers, especially in rural areas. The Medicare bill corrects existing rural inequities by infusing billions of dollars over the next decade into rural and small towns as well as small hospitals everywhere.

Admittedly I remain concerned about the magnitude of the reductions in payments for cancer care included in the bill. I hope to work with the Senate leadership as well as Chairman GRASSLEY and Senator BAUCUS moving forward to ensure that these cuts do not threaten access to cancer care for patients in Missouri and across the country.

We must bring Medicare into the 21st century: add a prescription drug benefit, expand coverage, improve services, and give seniors more control over the health care they receive.

This week we are poised to make historic changes with bipartisan support to improve the Medicare Program, to strengthen it for seniors and to preserve and protect it for future generations.

I want to say why I am in favor of this Medicare conference report. I think that Senator GRASSLEY and Senator BAUCUS, in a bipartisan coalition, came up with a great compromise. Nobody should be surprised that it makes enemies left and right. That is what a compromise or a moderate proposal does.

I will tell you one group that is for it. That is the AARP, with 35 million members nationwide. There are 743,000 seniors in my State who have been deeply involved in the preparations of this legislation. They say it is a good deal because it is about getting the vital help to people who need it most.

I was a little amused hearing some of the folks on the other side of the aisle condemning AARP. Generally, AARP may side with the Democrats, but in this instance we have worked with them and on a bipartisan basis. It isn't just Republicans. Now that they endorse a bipartisan compromise, rather than going with the Democrats, they condemn them.

Let me just talk about a few of the misconceptions I have heard in the last 3½ hours: Drug prices will be high. There will be a senior citizen discount card with a 15 to 25 percent reduction; $600 for low-income seniors the next couple of years. HHS estimates in 2006 the typical senior will save approximately half of what he is paying today. This plan also ensures the less expensive generic drugs will get the market faster, helping to hold down the cost.

Some have said this is bad for seniors. The truth is that the Consumers Union acknowledges it will help the two most needy groups—the low-income seniors and those seniors with high drug costs. These are the people who really need the help.

Finally, this is the favorite charge: Some have said this is going to destroy Medicare; that it is going to privatize it. That is really one of my personal favorites.

I think the Senator from Utah, Mr. BENNETT, did a wonderful job of pointing out some of the demagoguery we hear when people talk about destroying Medicare.

There are problems in Medicare with the way it is administered. Senator BENNETT outlined quite a few of those. We can tell you about a lot of problems. I have staff people who work all the time helping people sort through Medicare.

To say that the Republicans and the Bush administration want to destroy it is a big, fat, flat lie. No matter how many times you repeat it, it is not true.

The whole purpose of this is to assure that there is a reliable drug benefit and health care benefit for seniors now and in the future. We are asking the next generation to pick up the ball for a $400 billion, 10-year plan that is going to continue to grow, and we owe them the solid viable Medicare program that is still in operation when they reach Medicare-eligible age.

One of the problems that Senator COLLINS of Maine discussed which she

and I have been fighting with the former Health Care Financing Administration, HCFA, is they were ordered to save some money in Medicare. They squeezed it down so tightly that instead of saving $16 billion a year, they cut the cost by $64 billion a year, and they threw one-third of the home health care agencies out of business in Missouri.

Seniors could not get the home health care they needed because of HCFA. Somebody said the costs are not going up. The problem with Medicare is fewer and fewer doctors and hospitals can afford to take it because the Federal bureaucracy has ground down the reimbursements.

Then someone said Newt Gingrich wanted to abolish Medicare or have it wither away. That is absolutely flat wrong. Members cannot use that form of demagoguery in this body and expect to get away with it. Former Speaker Gingrich said HCFA is a problem. Frankly, I can show case after case after case where HCFA and the bureaucracy were a problem. He wanted to change the system so that seniors got good health care and you did not have a bureaucracy ratcheting down and controlling prices so rural hospitals such as a hospital in my home State could not afford to take seniors and doctors had to say: We cannot take any more Medicare patients because we are getting reimbursed from Medicare less than it costs us and we cannot give balanced billing so we have to arbitrarily ration on health care to the elderly because of the way Medicare is implemented.

That is wrong. That is what this bill is going to improve. I hope my colleagues will look at the significant improvements this $400 billion, 10-year bill will bring to improving health care for seniors and giving the seniors now better health care and assuring that seniors in the future—the current generation will be paid for—have the health care when they need it.

I thank my colleagues. I yield the floor.

CLOTURE MOTION

The PRESIDING OFFICER. The majority leader is recognized.

Mr. FRIST. Mr. President, I send a cloture motion to the desk and ask unanimous consent that it be in order at this time.

The PRESIDING OFFICER. Without objection, it is so ordered. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the conference report to accompany H.R. 1, the Medicare Prescription Drug and Modernization Act, an act to amend Title XVIII of the Social Security Act to provide for a voluntary prescription drug benefit under the Medicare Program and to strengthen and improve the Medicare Program, and for other purposes.

Bill Frist, Charles Grassley, John Ensign, Ted Stevens, Susan Collins, Lisa Murkowski, Jon Kyl, John Cornyn, Orrin G. Hatch, Larry Craig, Craig Thomas, Robert F. Bennett, Olympia J. Snowe, Jim Bunning, Christopher Bond, John Warner.

Mr. FRIST. Mr. President, I ask unanimous consent that the live quorum under rule XXII be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FRIST. Mr. President, I regret that it has become necessary to file a cloture motion on this bipartisan legislation being considered on the floor of the Senate. However, it appears that at this juncture we have no option.

I do want to express my deep disappointment that the senior Senator from Massachusetts has stated he intends to filibuster this landmark legislation. I seriously hope he will reconsider these intentions. His decision is particularly disappointing because it is clear to those of us who have followed this debate for the last several months, indeed, over the course of the day, that there is a strong bipartisan majority in this body in favor of this Medicare prescription drug legislation.

I am equally disappointed because it really points to what is going to happen to 40 million seniors in America today.

They have waited 38 years for what we are about to accomplish, and that is access, affordable access to prescription drugs. Prescription drugs are not a part of Medicare today for those 40 million Americans, and they will be once this legislation is passed. They are just moments away from what they desperately need, desperately have asked us for, and what we have a responsibility to deliver.

Senator KENNEDY has said that he intends to block the vote or do everything within his power to block an up-or-down vote; that he will obstruct a bipartisan Senate majority, and that he will stand in the way of health care security for these millions of seniors and individuals with disabilities.

In my own State of Tennessee, there are nearly a quarter million seniors who have no prescription drug coverage. There are millions all across the United States for whom this legislation means the difference between life and death. They simply cannot afford to wait any longer.

This generation that will be served by this legislation has survived the Depression, has fought in World War II, has helped make the United States into the prosperous Nation that we have. Again and again, they have answered the call. Now is the time for us to fulfill our duty to that generation, many of whom, as we all know, are sick and poor. Now is the time for us to answer their call. That is what this legislation does.

Those who would support a filibuster of this bill would hold our parents and grandparents, 40 million seniors, hostage to Washington politics. Our seniors simply deserve better.

In 1965, when President Johnson signed that Medicare bill into law, he said:

No longer will this Nation refuse the hand of justice to those who have given a lifetime of service and wisdom and labor to the progress of this . . . country.

Let us not stay that hand of justice now. Let us not turn our back on America's seniors and individuals with disabilities.

Once again, I regret this cloture motion is necessary, but we do need to protect our seniors. As I have said, for many this is a life-or-death issue. They simply cannot wait for help. I hope that, working with the minority leader, we can move toward vitiating this cloture motion at the appropriate time and, working together, schedule an up-or-down vote on this vital measure.

I implore the senior Senator from Massachusetts to listen to his own words of November 5 this year when he said:

Senior citizens want help and they want it now. They don't want a partisan deadlock.

I think he was right then. I believe he is wrong now.

Mr. REID. Mr. President, I apologize to the Senator from Utah. If the Senator will allow me to ask a couple questions, through the Chair, I appreciate the majority leader coming in an hour earlier tomorrow. We have 15 speakers lined up on our side for tomorrow. We are going to try to work out some kind of time arrangement. I say to the staff listening, what we would like to do on our side is limit the time to a half hour each. If anybody has any objection to that, they should call here as soon as they can. Otherwise, it is unfair to people who are at the bottom of the list.

I also say to the majority leader, we have gotten a number of calls today about this being the last item of business before we go home until January. I know the majority leader is working on that. I hope that is the case. Some of our folks are willing to give up time and do various things as a result of family obligations they have at home. If they have to come back again after Thanksgiving, I think their family obligations will become so paramount that they may not be as cooperative as we would like them to be.

Mr. FRIST. Mr. President, the Democratic leader and the leadership on both sides of the aisle have been in conversation throughout the day. Our intention is to continue to address Medicare aggressively and I have a feeling we will be here for a while tonight to give people an opportunity to speak.

Tomorrow, we are going to start earlier, and we will run as late as necessary to give people the opportunity to speak.

Regarding Monday, I want to warn people a little bit because people who want to speak, I encourage them to come tonight, tomorrow, or tomorrow night. Monday, I have a feeling everybody is going to come back in and say: I want to speak.

In order to complete Medicare on Monday and to address the appropriations bills we are working together on, we can address that on Monday and Tuesday—to finish business and be gone for good, which is what we are working toward, so we don't have to come back after Thanksgiving. That is the objective of both sides of the aisle. It means we have to continue doing what we have done all day today, tomorrow, and Monday. We need to stay focused, keep our remarks short enough so everybody can participate. With that, I intend not to have to come back after the Thanksgiving holiday.

Mr. REID. Mr. President, briefly, I appreciate very much the majority leader mentioning that. We have had people say they want to speak Monday. What I have said is that we can have 90 minutes per side on Monday. That is my understanding, having spoken to the two leaders. People will only have very short periods of time because the managers will need to make the paramount arguments on Monday. You are absolutely right. For people wanting to come back, the time is going to be very minimal. I appreciate that from the majority leader.

Mr. FRIST. I thank the Senator.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator from Utah.

Mr. HATCH. Mr. President, I have sat here for hours now and listened to some of the comments by our colleagues on the other side. They must not have paid any attention to what this bill is all about or any attention to what the conferees, who worked day and night, did to put this bill together in a bipartisan way. They must not have paid any attention to the words in the bill or paid any attention to their respective caucus meetings where we discussed the aspects of it.

When a Senator said this bill is being ramrodded through, I want to make it clear that we have been trying to improve Medicare for 40 years, especially in the last 10, 15 years. That is hardly ramrodding it through.

This is it. This is the last chance to have prescription drug benefits for our seniors. It is amazing to me how many on the other side just want to say no to anything: No to judges. No to prescription drug benefits unless they are way out of sight as far as expenses go. No to any possible private sector improvements that might possibly work. No to all the ideas that Democrats and Republicans have worked on, 7 o'clock in the morning meetings, 3 o'clock to midnight, in the afternoons, day after day after day, week after week. We were not doing that for our fun. We were not doing that for political reasons. We were not doing that to try to hurt one side or the other or to make political points on one side or the other.

We were doing it the best we could to try to come up with a bill that would improve Medicare and get prescription drugs to our seniors who need them, who do not have drug coverage right now, or who do not have access to drugs because they cannot afford to pay for them.

We take care of beneficiaries from 150 percent of poverty or less. If I had my way, the whole $400 billion would have gone to those at 200 percent or 250 percent or less and we would not have made any benefits for people such as Bill Gates and Warren Buffett, billionaires who can afford their own prescription drugs. But no, there is a desire by some on the other side to have what is called ''universal'' health care. That is, the Federal Government controls everything, pays for everything, and we have socialized medicine. Not many people who think it through want to go to that extent. That is why they are not getting their way so they will continue to moan and groan. One of the most offensive things of all is the people whom AARP basically have supported through all these year, the Democrats, and some of these Democrats condemning AARP for supporting this legislation.

I have seen Democrats stand on the floor and put the AARP's number up and tell people to call AARP and tell AARP they are wrong.

We are here to make decisions as to what should be done. The decisions cannot always be no, no, no.

I have to admit I was irritated with my party in times past because we seemed to say no to everything the Democrats wanted. I will state what is really behind this. Many of our colleagues who are against this on the other side just plain do not want President George Bush to get any credit for this Medicare reform bill. They cannot tolerate that this President has called for this, has fought for this, has provided a climate for this, has a bureaucracy working for this, has his staff working for this, has helped us every step of the way. Health and Human Services Secretary Thompson, as tough as it was to sit in those meetings, said virtually every one of these meetings was tough on him. There were a lot of tough discussions.

They are so afraid President Bush might get some credit for enacting a prescription drug law. President Bush will probably be the last one to take credit for it, although he deserves credit for it because he has been a leader who has helped to bring this about. And he would deserve the credit. But so would every Democrat who votes for this. Above all, Senators Baucus and Breaux, who sat through every one of those meetings. They deserve a lot of credit for not letting politics distort their worldview of what should be done and for standing up for this bill. It is one of the reasons the AARP is for this bill.

Another reason happens to be our two leaders: Speaker of the House DENNY HASTERT, and of course our majority leader in the Senate, Dr. FRIST, who has worked with these problems his whole professional lifetime. He has wanted to get this done as much as, if not more than, anyone else. And Senator GRASSLEY worked day and night on this with his staff. We could not have a better person.

Then we have cheap politics because they know former House Speaker Newt Gingrich has not always been the most followed person in this world even though he is one of the brightest people with one of the brightest political minds in America today. So what do they do? They distort what former House Speaker Newt Gingrich said—not only distort it, they do it downright offensively. I am frustrated by the continued references to the alleged comments by the former Speaker of the House about the ''Medicare Program,'' and those who insist that the former Speaker wanted Medicare to wither on the vine. We have heard it all day long by these people who are against everything. They are sadly mistaken. They are misrepresenting his remarks.

What the former Speaker said was that the agency that controlled Medicare, HCFA, the Health Care Financing Administration, which has evolved into CMS, said that HCFA should wither on the vine because that bureaucracy was so filled with command-and-control bureaucrats who were more concerned about redtape than seniors' health.

That is a far cry from condemning Medicare, which is the way they would present it. I personally resent that kind of distortion of what the former Speaker of the House had to say. Gingrich believed these bureaucracies were strangling Medicare. If anything, he was standing up for Medicare. He was arguing against large bureaucracies and for seniors to have more individual control over their health care dollars.

So do not believe this gibberish coming from some on the other side. That is exactly what it is.

I have heard Democrats who were opposed to everything with regard to Medicare, unless it is an $800 billion to $1 trillion program, and even then would be opposed to some of the approaches here.

They argue that 25 percent of seniors will be worse off than they are today

because of this bill. That is pure, unmitigated bunk, and they know it. It is not true.

First of all, we are adding $400 billion to the Medicare Program in new spending for drug benefits and Medicare improvements—$400 billion. That is not chickenfeed. So how can anybody say they are going to be worse off?

Secondly, we take care of those who are in lower income brackets and those who have high drug costs. That is what this bill ought to do, and it does, and they are better off.

Very important to me, to Senator GRASSLEY, to Senator BAUCUS, and virtually all of us who have rural States, is that we improve access to quality care in rural areas—something that just has not happened under the old Medicare system, under traditional Medicare. We improved it. This bill does a lot towards helping those in rural America who have been shortchanged for years.

I do not see how anybody standing up from a rural State, with lots of farmers, can have the gall to come on this floor and say they are going to be worse off with this bill when we put very strong language in with regard to rural health care. Yet we have had some Senators from the other side doing that.

Unlike the 1988 catastrophic bill, which I virtually argued against at the time—it was a mandatory bill—but unlike that bill, this is a bill where you have a choice of whether you go into this program or not. You do not have to do it. You can stay right where you are in traditional Medicare if that is what you want. I do not think most people are going to do that, but who knows? But they have a right to do so. It is not like the 1988 catastrophic bill which was mandatory. And when the people found out they had to pay for it, yes, they rebelled because they did not want us telling them they had to pay for the benefit. Today, we are not telling them they have to participate. In fact, the two bills are quite different.

The Government is going to pay 75 percent of the cost of drugs for Medicare beneficiaries over 150 percent of poverty. Now, tell me that is not better than the current system.

The Democrats do not seem to understand the fact that a lot of corporations are dropping health care coverage because they cannot afford it anymore or they do not want to pay for it anymore.

I will never forget, I had a conversation with the head of IBM a few years back. He said: We are paying $7,000 per employee for health care. If it goes up any more, we are just going to turn around and give them the $7,000 and say, go get your own health care. He said: We just can't afford to keep going in this direction.

Well, before this bill, it was estimated that the corporations were going to drop the health care of 37 percent of retirees. Now it is estimated that the drop out number will be below 20 percent, probably closer to 15 percent. We have made some strides in trying to solve that problem.

This bill contains Hatch-Waxman reforms. For those who do not understand this, let me explain it as the author of the Hatch-Waxman bill in 1984.

Hatch-Waxman created the modern generic drug industry that is in competition with the pioneering companies and has brought drug prices down $10 billion in consumer savings every year since 1984. It is called, even by my friends on the other side, one of the greatest pieces of consumer legislation in the last century, and rightly so, because it has saved billions and billions of dollars for consumers.

But there was a gaming of Hatch-Waxman by some companies, and we have corrected that in this bill, which is a pretty important thing. These reforms will prevent gaming of the system, and they will provide seniors with less expensive generic drugs more quickly.

I get so tired of the demagoguery against the pioneering companies; that is, the PhRMA companies; that is, the large pharmaceutical companies. The generic companies know that if the large pharmaceutical companies do not spend their $30 to $35 billion every year in research and development, there will not be any drugs for them to take off into generic form. If these large companies spend that kind of money, then they have to find a way of recouping that money. Because of our current FDA system, it takes up to 15 years of patent life.

If you develop a gizmo, you have 20 years of patent life, or what you call market exclusivity, to sell your gizmo. In the case of prescription drugs, you might only have 5 years to recoup the moneys you have put in. And just for people's understanding, it takes up to 6,000 scientific misses, in other words, experiments—up to 6,000 of them—to arrive at a marketable drug, at a cost of around $1 billion per drug.

You wonder why companies have to charge as much as they do to get their money back? If they do not get their money back, they cannot conduct more research and development on future pharmaceutical products which are really saving our seniors and causing them to be able to live longer lives today.

I will talk a little bit more about drug reimportation in a few minutes. But in all honesty, that is an overblown, demagogued position, too. Our pharmaceutical industry in this country is one of our great industries. It is one of the reasons we have a balance of trade surplus. The pharmaceutical industry and the entertainment industry are about the only two that provide balance of trade surpluses.

What I hear from the other side that we have to have price controls, which is what Canada has; it is important to remember that Canada no longer has a pharmaceutical industry. The reason is that you cannot afford to do what it takes to get these drugs developed when you have price controls. Now, these are things that just are demagogued here on the floor, and I am personally getting tired of it.

There is so much I would like to say that would refute the demagoguery I have heard from some on the other side. Let me just take a second on AARP because it is amazing to me. The AARP has basically sided with the Democratic Party on almost everything with regard to seniors, and with the more liberal Republicans. They have been involved in this intimately for years. And here we have Democrats trashing the organization that has been one of their mainstays of support because all of a sudden the AARP is thinking for itself and doing what is right for seniors, and not keeping seniors under the thumb of Government regulation. So AARP has to be trashed here on the floor of the Senate by some of our friends on the other side.

I find it ironic that my friends on the other side of the aisle are criticizing the AARP for supporting legislation that will provide Americans access to drug coverage through Medicare. It is the first time this is going to happen, and they are trashing AARP?

What a difference a year makes. Last year, AARP could do no wrong as far as the Democrats were concerned. This year, it seems the AARP can do nothing right. That is because the more liberal Democrats, who are opposed to this bill because it is not socialized medicine, are up in arms that the AARP has finally decided to do what really is a bipartisan approach.

AARP made a courageous decision by endorsing our drug plan, a bill that I predict will soon be signed into law. And maybe my friends are just upset because they are on the losing side on this issue for a change, and they just do not want President Bush to get any credit for it.

Well, I also want to stress that the so-called slush fund I have heard mentioned on the other side, that my friend from Iowa raised, is no slush fund at all. This is a stabilization fund that is important for rural States such as Utah and Iowa. It is crucial to our States. Utah did not benefit from Medicare+Choice because it just did not work in my state. Health plans told me that the payments were too low.

So this stabilization fund provides assistance to those States, such as Iowa and Utah, that may not have regional PPOs, preferred provider organizations, or local plans that provide coverage they would offer to these beneficiaries living in rural areas.

Of course, look at what happened to Medicare+Choice. In Utah, the Medicare+Choice plans left the State, leaving my beneficiaries with nothing because Medicare+Choice plans could not survive in rural Utah. This bill will help to solve that problem. The stability fund will be used to encourage plans to enter rural States such as Utah and Iowa and stay there once and for all. It is not a slush fund.

This is a fund designed to help give rural beneficiaries choice and coverage through the HMOs, PPOs, and stand-alone drug plans. It helps seniors in rural areas. I find it disconcerting that someone from Iowa would criticize that aspect of this program. That shows he has not read the bill, does not understand the bill, has not listened to Senator GRASSLEY, who has read the bill, does understand it, and helped to implement it, and who is probably rural America's strongest advocate in the Congress. This is no exception.

Let me tell you what this legislation does for my folks in Utah. I think you can extrapolate this into every State in the Union, but let me talk about my State because I want my folks in Utah to realize this is a good bill.

The bipartisan agreement provides all of my 219,973 beneficiaries in Utah with access to a Medicare prescription drug benefit for the first time in the history of the Medicare Program, beginning in January of 2006. Beginning in 2006, the bipartisan agreement will give 55,538 Medicare beneficiaries in Utah access to drug coverage they would not otherwise have and will improve coverage for many more.

Within 6 months after this bill is signed, Utah residents will be eligible for Medicare approved prescription drug discount cards which will provide them with savings of between 10 and 25 percent off the retail price of prescription drugs, of most drugs. That is something they do not have now but they will have.

Beneficiaries with incomes of less than $12,123 or $16,362 for couples who lack prescription drug coverage, including drug coverage under Medicaid, will get up to $600 in annual assistance to help them afford their medicines along with a discount card. That is a total of $53,619,525 in additional help for 44,638 Utah residents in the years 2004 and 2005.

Mr. President, beginning in 2006, all 219,973 Medicare beneficiaries living in Utah will be eligible to get prescription drug coverage through a Medicare approved plan in exchange for a monthly premium of approximately $35. Seniors who are now paying the full retail price for prescription drugs will be able to cut drug costs roughly in half. In many cases, they will save more than 50 percent of what they pay for prescription medicines, and those at less than 150 percent of poverty basically will have their drugs for free.

Mr. President, 63,560 beneficiaries in Utah, who have limited savings and low incomes, generally below $12,123 for individuals and $16,232 for couples, will qualify for even more generous coverage, as I have said. They will pay no premium for prescription drug coverage, and they will be responsible only for a nominal copayment, no more than $2 for each generic drug or $5 for brand name drugs. Now, 17,613 additional low-income beneficiaries in Utah, with limited savings and incomes below $13,470 for individuals and $18,180 for couples, will qualify for reduced premiums, lower deductible, and coinsurance, and no gaps in coverage.

Additionally, Medicare, instead of Medicaid, will now assume the prescription drug costs of 17,739 Utah beneficiaries who are eligible for both Medicare and Medicaid. This will save Utah $51 million over 8 years on prescription drug coverage for its Medicaid population.

This is a bill that will help every State. I cite Utah just to show that in a State the size of mine, which is smaller in population than many other States but fairly substantial, there are substantial benefits that will come from this bill.

I want to make it clear that this is the last train out of town. We have been trying to do this for years and years. I listened to at least four of my colleagues on the other side who, in my opinion, were demagoguing this issue all day long. Frankly, they are wrong in most of their assertions, and they act as if all we have to do is take this back to committee and work it through again. If people had sat through those meetings we held in the conference committee, they would realize we went through every word, every aspect of this legislation. We had a heck of a time putting together a total bipartisan package such as this as it was. If you look at it, it barely passed the House—but it did pass the House. I hope it will pass the Senate because our seniors will be better off with the choices this bill gives them than with current law.

Yes, I wish we could have done more to reform Medicare; I wish we could have done more to put more private sector capability in this bill. I think over the long run that would really pay off. I wish we could have done more in a wide variety of areas that would have cost a lot more money. But I have to say, under the circumstances, the conference committee members really worked hard, and I think we did a good job.

So I rise to express my strong support for the final conference agreement on H.R. 1, the Medicare Prescription Drug Improvement and Modernization Act. Over the years, countless Medicare beneficiaries in Utah have written to me to express their desperation over the fact that Congress has not added a prescription drug benefit to the Medicare Program. Time after time, session after session, in Congress after Congress, we have tried to answer their pleas. Fifteen years ago, we almost made it. The plan was so flawed that it had to be repealed. Last year, I thought we might make it with the tripartisan initiative. I was one of the five tripartisan Senators, as was Senator GRASSLEY who is sitting in the chair now, and Senators SNOWE, JEFFORDS, and BREAUX. The five of us have come up short each and every time we have tried—except this year. I think if we had not had Presidential support this year, we probably would have come up short again.

We cannot afford to fail America's seniors. We cannot afford to fail America's disabled. I am dismayed to hear many colleagues preparing for us to fail again. Not if this Senator can help it. To me, it is unconscionable to let this opportunity pass us by out of a concern that this is not a perfect bill. I spent years working on this issue. Unlike some on the other side, who have been complaining about the issue, I have worked on every health care program in the last 27 years, and a number of them have my name on them. I believe I know the issues as well as anybody in this body. I worked hard on the conference committee as well.

Let me tell you, in all the experience of 27 years, I can tell you something I know is categorically true: We cannot have a perfect bill.

The intersection of Medicare, Medicaid, and responsible public policy is about the most complex pathway Congress has ever negotiated. On the one hand, we want to provide as many seniors and disabled with as comprehensive and affordable coverage as possible. On the other hand, we want to minimize Government and its attendant bureaucracy and cost. The two are in inherent conflict. So we do the best we can—and we did.

Since Congress first enacted Medicare nearly 40 years ago, we have seen miraculous breakthroughs in medicines that have allowed for diseases, conditions, to be treated by innovative prescription drugs. As seniors and the disabled have gained access to many treatments, many are faced with the choice of splitting pills or missing meals in order to afford their vital prescription drugs.

This is simply unconscionable. Providing access to these vital treatments is the right thing to do for our seniors and the right thing to do for our children. It will make our society more healthy, and it will save countless medical expenses. Seniors will live longer, as they are doing now, because of these inroads we have made.

Is there anyone who doubts that greater access to preventive medicine will save our Medicare system in the long run perhaps by tens of billions of dollars?

My constituents have been waiting for close to 40 years for this day to come. The time is here; the time is now. We are about to pass historic legislation that will make the most significant changes to the Medicare Program since it was created in 1965.

I say to my colleagues, Monday will be a momentous day in the Senate, and I hope we will invoke cloture so we can proceed with this bill. If we invoke cloture, we will pass this bill and millions and millions—40 million—of our senior citizens in this country will benefit. The whole country will benefit. Medicare beneficiaries will finally be offered a prescription drug benefit plan.

Medicare will offer beneficiaries more choice in coverage, and Medicare's fiscal solvency will be preserved for our children and grandchildren.

This bill has countless extra benefits. We have made improvements in the way health care is delivered to rural America, as I mentioned. Beneficiaries, like so many in the State of Utah, will receive quality health care. Providers in these areas will be reimbursed appropriately and have incentives to give good care.

Overall, we cannot escape the conclusion that this is a good bill. Whenever I go back home to Utah, the Medicare Program is the one topic that comes up in almost every conversation I have with constituents. No matter where I go—Salt Lake City, St. George, Beaver, Ogden, Cedar City, you name it, from the north to south, from east to west, the question is still the same: When will drugs be covered by Medicare? I have looked forward to this day for a long time—the day when I will be able to answer: Now.

I would like to read a letter, one of many I have received, from a different kind of constituent. For the past several years, Medicare providers, especially those in rural Utah, have complained about their insufficient Medicare reimbursement in Utah. As a result, many have threatened to leave the State if Medicare payments are not increased. Let me give you a quote from Dr. Beth Hanlon, a Utah physician, who is complaining about unfair reimbursement rates. Here is what she had to say:

> My patient population is 30 to 40 percent Medicare. I cannot continue to see our senior patients if rates drop further. My overhead costs continue to increase; I cannot provide the same services I did a year ago because of lower reimbursements. I will have to refer patients to consultants and the emergency room for problems I could previously have managed in my office. This is so distressing, as our population ages and we see more doctors planning retirement.

Dr. Hanlon, we have good news for you. We took your concerns seriously, and this bill takes the necessary steps to increase your Medicare reimbursement rates.

Let me talk a little bit about the process and how we got to this historic place in the annals of the Senate. As I said, I was privileged to serve as a member of the House-Senate Medicare conference committee. I served on many conferences during my 27 years in the Senate, but this was probably the most complex and technical conference I have ever encountered, and it was a difficult conference to be on.

Every Senate and House conferee—especially conference Chairman BILL THOMAS, chairman of the Ways and Means Committee, and Cochairman BILLY TAUZIN of the Energy and Commerce Committee, and conference Vice Chairman CHUCK GRASSLEY, chairman of the Finance Committee—did a great job, a fine job of guiding members to this final agreement. It was no easy task, and it took several months and many long hours to complete our work.

Other conference members made significant contributions to this historic conference report, and I would like to take the opportunity to recognize all of these members for their diligence and commitment to the process.

They certainly include Senate majority leader, BILL FRIST; Senate minority leader, TOM DASCHLE; Senate Finance Committee ranking member, MAX BAUCUS; Senator DON NICKLES; Senator JAY ROCKEFELLER; Senator JON KYL; and Senator JOHN BREAUX; House majority leader, TOM DELAY; the Speaker of the House, DENNY HASTERT; Ways and Means Committee ranking member, CHARLIE RANGEL; Energy and Commerce Committee ranking member, JOHN DINGELL; Ways and Means Health Subcommittee chairwoman, NANCY JOHNSON; and Energy and Commerce Health Subcommittee chairman, MIKE BILIRAKIS.

These are all the people who were concerned about this bill. Most of them worked to try to work out the differences between the House and Senate bills. Some of them did not, and some of them are complaining to this day.

I also wish to take this opportunity to recognize the staff who worked literally around the clock on this conference agreement for several months. They are: Dr. Mark Carlson, who was my legislative fellow this year; Colin Rosky; Leah Kegler; Jennifer Bell; Ted Totman; Alicia Ziemiecki; Liz Fowler; Bill Dauster; Russ Sullivan; Judy Miller; Jon Blum; Pat Bousliman; Andy Cohen; Danial Stein; Diana Birkett; Joelle Oishi; Jenny Wolff; Allison Giles; Julie Hasler; Patrick Morrisey; Chuck Clapton; Patrick Rowan; Jeremy Allen; Dean Rosen; Liz Scanlon; Eric Ueland; Sarah Walter; Michelle Easton; Paige Jennings; Lauren Fuller; Stacey Hughes; Don Dempsey; Diane Major; Lisa Wolski; Jane Lowenstein; Kate Leone; Susan Christianson; Bridgett Taylor; Amy Hall; John Ford; Cybele Bjorklund; and Terry Shaw.

Mr. President, I would like, though, to recognize the hard work of our Senate Finance Committee staff, especially Linda Fishman, Mark Hayes, Liz Fowler, and Jon Blum; and the staff of the Ways and Means Committee, John McManus, Deb Williams, Madeleine Smith, and Joel White; and staff of the House Energy and Commerce Committee, especially Patrick Morrissey and Chuck Clapton.

I also wish to acknowledge the work of my own staff: Pattie DeLoatche, Trish Knight, Bruce Artim, and others who worked very hard in this area.

I wish to acknowledge the work of the Senate and House legislative counsel staff, Jim Scott, John Goetcheus, Ruth Ernst, Ed Grossman, Pierre Poisson, and Pete Goodloe.

They have been the unsung heroes in this process and have given up significant time with their family in order to draft this legislation.

Another organization that deserves special recognition is the Congressional Budget Office. The staff of Steve Lieberman worked tirelessly for us, and it was a continuous process.

Finally, the Department of Health and Human Services, especially the Centers for Medicare & Medicaid Services staff, led by Administrator Tom Scully and Rob Foreman, worked around the clock to provide us with detailed information on questions we had about the Medicare legislation.

I thank all of these fine people for a job well done.

I have been involved in this issue for more than a decade, as I mentioned—actually for most of my Senate career. I worked closely with my Finance Committee colleagues to get this bill through the Finance Committee and the Senate earlier this year. I was also one of the authors of the Senate tripartisan Medicare bill which was considered last Congress and shot down because of nothing more than politics, something that appears to be rearing its ugly head right now.

In addition, I was lead sponsor with our colleague, Senator BILL ROTH, of the legislation establishing the Bipartisan Medicare Commission, which was included in the Balanced Budget Act of 1997.

Both the Medicare tripartisan bill and the Bipartisan Medicare Commission, which was chaired by my friend and colleague, JOHN BREAUX, laid the groundwork for the agreement we are currently considering.

We have learned from those efforts, and that has only improved the legislative effort that is before us today. That is why this bill presents the best opportunity that we will ever have to provide our seniors with the drugs they need so desperately.

Of course, the bill is not perfect. No compromise ever is to any one person. But after all these years, considering all the policy differences and all the differing views on entitlement programs and how a drug benefits should be delivered, we now have a bill that can pass.

With all of those differences, we finally have a bill that represents the best possible compromise. There will most certainly never be another opportunity like we have when we vote this Monday.

There is a lot of misunderstanding about what is in this bill. There is a lot of misinformation. I have mentioned some of it in my earlier remarks, but I would like to take a few more moments to clear up some of this.

First, I would like to explain one of the most important components of this legislation to my colleagues at this time, which is the drug benefit. Many Utahns are under the mistaken impression that they will be forced to participate in this new drug program, and that is simply not true. So I want all of you out there who are listening and watching and those who will read comments in the papers to note these comments by some of my colleagues, such as "you don't have any choice," are wrong. You have a choice whether you want to be in this program or not. No one will be forced into the new drug plan. No one is going to be forced into an HMO. No one will be forced to leave traditional Medicare on which they have come to depend.

I simply cannot stress enough that this is a voluntary benefit. If Medicare beneficiaries do not want drug coverage, they do not have to participate. I hope that point is clear to everyone across the country listening to this debate, especially senior citizens.

Second, in one word, this bill provides choice. Seniors will be able to choose the drug benefit that best suits their needs rather than be forced into a one-size-fits-all Government handout.

(Mr. ALLARD assumed the Chair.)

Mr. HATCH. Everyone will be offered a Medicare-endorsed drug discount card in April 2004. This will cost no more than $30 per year.

These drug discount cards will immediately provide our seniors with drug savings ranging from 10 to 25 percent. Right off, that's a benefit you don't have now.

In addition, this is a fair bill and a fair provision.

We have targeted the lion's share of this benefit to those seniors who have the greatest need. Those under 135 percent of the federal poverty level will receive $600 per year to buy their prescription drugs and will not be required to pay enrollment fees. That's a total of $53.6 million in additional help for 45,000 Utah residents in 2004 and 2005.These low-income beneficiaries would only be required to pay coinsurance between 5 and 10 percent for each prescription drug. That is a tremendous change from today.

The prescription drug card program concludes when the larger benefit kicks in on January 1, 2006.

Beginning in 2006, 220,000 Medicare beneficiaries will be offered access to the new standard prescription drug program. Standard coverage includes a $35 monthly premium, a $250 annual deductible, beneficiary coinsurance of 25 percent up to $2,250, and protections against high drug cost once out-of-pocket spending reaches $3,600.

While individual drug plan sponsors may change some of the specifications, every beneficiary who participates will be guaranteed a drug benefit that is at least equal in value to the standard benefit.

Those wishing to remain in traditional Medicare will have access to a stand-alone prescription drug plan.

Beneficiaries who want private, integrated health coverage may receive their drug benefits through local or regional Medicare Advantage plans. No one—not one senior or person with a disability—would be forced to give up the coverage that they receive from traditional Medicare. And this bill will provide 56,000 Medicare beneficiaries in Utah with access to drug coverage that they would not otherwise have.

This bill also has additional coverage for 63,000 Utahns with low-incomes.

For the dual-eligibles 18,000 in Utah—who are below 100 percent of the Federal poverty level, there would be no monthly premium, annual deductible, or gap in coverage. These individuals will merely have copayments of $1 for generic drugs and $3 for brand name drugs. Once the catastrophic limit is reached, there would be no beneficiary coinsurance for these individuals.

But there's even more help for our low-income beneficiaries. Those below 135 percent of poverty, there will be no monthly premium, annual deductible or gap in coverage. These individuals would have copayments of $2 for generic drugs and $5 for brand name drugs. Once the catastrophic limit is reached, there will be no beneficiary coinsurance for these individuals.

For those below 150 percent of poverty, there will be a sliding scale for monthly premiums, a $50 annual deductible, and up to 15 percent beneficiary coinsurance on the out-of-pocket spending. Once the catastrophic spending limit is reached, there will be beneficiary copayments of $2 for generic drugs and $5 for brand name drugs.

Let me illustrate how this would work.

Evelyn, a widow from Sandy, Utah makes $35,000 annually. She has diabetes, high blood pressure and arthritis and her annual drug expenditures are close to $5000. Evelyn decides to join the Medicare prescription drug plan. It's her choice.

Under the bipartisan Medicare agreement, her out-of-pocket spending on drugs will be reduced from $4800 per year to approximately $2400 cutting her prescription drug expenditures significantly. Factoring in her monthly premiums, she will save almost $2000 per year.

I continue to hear arguments on the floor about seniors being in worse shape if this bill becomes law.

Would Evelyn think saving $2000 puts her in worse shape? Not on your life.

This conference agreement provides additional assistance to the poorest and the sickest beneficiaries—that has always been my goal—to provide assistance to those beneficiaries who need the most help.

Who can argue against that?

It gives beneficiaries something that they have wanted for 40 years—prescription drug coverage—and it is strictly voluntary.

H.R. 1 also improves the traditional Medicare program by enhancing preventive services offered to beneficiaries.

The conference agreement includes a Welcome to Medicare preventive physical examination, cardiovascular and diabetes screening, and improved payments for mammography.

The new benefits will be used to screen Medicare beneficiaries for many illnesses, and in most cases, if these illnesses are caught early they may be treated. Conditions like diabetes, heart disease and asthma will be treated far more effectively due to this one-time physical examination. Would patients think they are worse off because their conditions are detected earlier and treated more effectively? Not on your life.

This conference agreement also establishes Health Savings Accounts, better known as HSAs. HSAs are tax-advantaged savings accounts which may be used to pay for medical expenses, and they have worked in numerous other forms in the private sector. They are open to everyone with a high deductible health insurance plan; however, the annual deductible must be at least $1,000 for individual coverage and at least $2,000 for family coverage, and the out-of-pocket expense limit must be no more than $5,000 for individual coverage and $10,000 for family coverage.

Employee HSA contributions are not included in the individual's taxable income. In addition, contributions by an individual are tax deductible. Also, the accounts are allowed to grow tax free and there is no tax on withdrawals for qualified medical expenses. Boy, does that make sense. But that is sticking in the craw of a number of those who want Government to pay for everything and don't want people to have to save for their own health care. I mean, that is in my view.

HSAs are portable, like an individual retirement account (IRA), the HSA is owned by the individual, not the employer. If the individual changes jobs, the HSA travels with them. In addition, individuals over age 55 may make extra contributions to their accounts and still enjoy the same tax advantages. In 2004, an additional $500 can be

added to the HSA. By 2009, an additional $1,000 can be added to the HSA.

The inclusion of these new accounts is a significant part of the agreement that made this conference report possible. Yet some on the other side, because it is giving people a choice to save on their own, tax free, and pay for their own health care tax free, don't want this. It is easy to see why, if what you want is socialized medicine. The inclusion of these new accounts is a significant part of the agreement that made this conference report possible. Allowing individuals to take charge of their own savings for future health care expenses is an important and necessary change in the direction of our health care policy, and is one I support strongly.

In my opinion, the conference agreement made great strides in perfecting the Senate-passed language sponsored by Senators GREGG, SCHUMER, and KENNEDY pertaining to the Drug Price Competition and Patent Term Restoration Act of 1984, better known as the Hatch-Waxman Act.

The intent of the 1994 law is to provide incentives to develop valuable new drug treatments through patent and exclusivity protection, and also to facilitate access to generic versions of the drug after the innovator's patent or exclusivity expires. The CBO estimated that the Hatch-Waxman Act saves consumers $8 billion to $10 billion each year. I was pleased to be the prime sponsor and to work out every word in that Act.

In recent years, however, access to generic drugs has sometimes been delayed by litigation. The Judiciary Committee, which I chair, highlighted these problems in a hearing held in May of 2001 and two hearings this year.

The HELP Committee reported legislation on these matters both last year and this year. The Senate adopted these amendments by wide margins both last year and this year.

Although I opposed the specific provisions in these bills, I recognize the sustained efforts of Senators MCCAIN, SCHUMER, KENNEDY, COLLINS, EDWARDS, and FRIST. I want to especially commend Senator GREGG for his leadership in bringing this year's vehicle more in line with the policies that I have long advocated.

I also want to commend the leadership of President Bush who took regulatory action earlier this year to close a significant loophole in the 1984 law, which will save all Americans an estimated $35 billion over 10 years. Secretary Thompson and the Commissioner of Food and Drugs, Dr. Mark McClennan, deserve a lot of credit for completing this important rulemaking in less than one year. The expert advice given by the Chief Counsel for Food and Drugs, Dan Troy, must also be acknowldged.

Medicare legislation that passed the House and Senate earlier this year included the codification of the new FDA rule modifying the 30-month-stay provisions of Hatch-Waxman. Enactment of these provisions as part of the bipartisan agreement will lower prescription drug costs for millions of Americans by improving access to generic drugs, which are safe and effective and can be much less costly alternatives to brand-name prescription drugs.

A key component of the bipartisan agreement codify the recent regulation that limits drug manufacturers to one and only one 30-month automatic stay in patent infringement litigation involving a generic drug application. This is the policy that I advocated in May 2002 testimony before the HELP Committee and on the Senate floor during the debate of 2002.

Although the McCain-Schumer bill in the 107th Congress, S. 812, contained a very different provision with respect to the 30-month stay, in time the wisdom of my position on the 30-month stay took hold.

Last July, the Federal Trade Commission issued a report that recommended the policy I advocated and became a central feature of the FDA rule and the legislation contained in the conference report.

I want to commend the sustained effort and considerable expertise of FTC Chairman Muris in this area.

As well, I would be remiss not to single out such dedicated and thoughtful public servants as Mike Wroblenski at FTC and Jarilyn DuPont, Amit Sachdev, and Liz Dickinson at FDA, and many others.

One of the key provisions of the Greater Access to Affordable Pharmaceutical Act amendments are those pertaining to declaratory judgments. It was this provision that was discussed at our two most recent Judiciary Committee hearings on this legislation in June and August of this year. The Department of Justice, ably represented by a fellow Utahn, Deputy Assistant Attorney General Sheldon Bradshaw, understandably took the position that the Senate declaratory judgment provision was unconstitutional.

I am pleased that the conferees fixed the constitutional defect in the Gregg-Schumer-Kennedy language that passed the Senate.

The problem with the language, adopted by the Senate by, as I recall, a 94–1 margin, is that it tried to legislate directly counter to the ''case or controversy'' requirement of Article III of the Constitution.

Before reaching the merits of a case, including declaratory judgment actions, a Federal judge must first determine that there exists an actual dispute between the parties. Courts are not permitted by our Constitution to hear hypothetical cases or cases in which there is only a possibility of future litigation.

As both of the hearings of the Judiciary Committee documented, the law is settled with respect to the standards that must be met before a declaratory judgment may be heard in patent litigation. A court may only take a declaratory judgment case if and only if it finds that a ''reasonable apprehension'' of being sued by the patentee is present at the time the action is brought.

This is only common sense because it would be imprudent to allow the courts to be flooded with speculative, time consuming and costly patent suits. As the erudite statements of Mr. Boyden Gray fully documented, the Senate-passed language essentially stood the Constitution on its head by defining the absence of a lawsuit as a statutory basis for satisfying the ''case or controversy'' requirement.

I certainly enjoyed reading the several intriguing missives written on this topic by my former Judiciary Committee General Counsel, Professor John Yoo.

But neither his statements nor his surprise visit and testimony at our committee hearing have convinced me of either the constitutionality or policy wisdom of the declaratory judgment provisions contained in S.1. If we only knew Professor Yoo was coming to testify, we would have given Mr. Gray equal time.

In any event, in the provision the Senate considers today, the settled case law of the ''reasonable apprehension'' test remains undisturbed and the Constitutional requirements are observed.

In adopting this language it is important to note that the presence of the two factors referred to in the statute, the filing of an ANDA application with a Paragraph IV patent challenge certification and the absence of a suit filed by the patent-holding innovator firm, do not alone satisfy the reasonable apprehension test.

Certainly courts should, and in fact, must under the new language consider these two important factors but that should neither be the start nor the end of the inquiry.

For example, the result in the case of Dr. Reddy v. Pfizer, commented upon by many, including my friend from New York, Senator SCHUMER, does not appear to be affected by the language in this bill. In that case, which involved a challenge to patents set to expire three and one-half years later, the court found that the reasonable apprehension test was not satisfied.

Refiling the suit more proximate to the patent expiration date may yield a different result. That will be a matter for the courts to decide applying the new statute and the existing standards of the ''reasonable apprehension'' test.

I also want to make explicit, the implicit—that nothing in this new language pertaining to pharmaceutical patent-related declaratory judgments creates a new cause of action separate

from the existing authority under title 28.

On balance, I believe that the conferees arrived at a fair resolution on the declaratory judgment provision that is a marked improvement over the Senate language.

I want to commend my colleagues in the Senate for recognizing the serious flaws in the language of S.1. I want to commend my colleagues in the House for recognizing the importance of retaining a strong declaratory judgment provision so that generic drug firms will be able to determine the status of their patent challenge in an appropriate fashion.

I plan to monitor closely the history of litigation of these new rules pertaining to pharmaceutical patent litigation and hope that the FTC and other governmental agencies and outside groups will also provide us with their analysis of how well the new provisions work in practice.

We need to be vigilant in assessing whether we have the proper balance between the interests of patent holders and patent challengers. I will expect and request an FTC report, similar to the agency's extremely helpful 2002 study, at an appropriate time.

There are also additional important provisions in this bill that affect Hatch-Waxman, but I would like to reserve my comments for this coming Monday.

One other important issue that we have addressed in this legislation is the preservation of retiree health coverage. My office has been flooded with calls from seniors worried about losing their retiree benefits.

And we have seen published reports indicating that rising drug and health care costs are pushing more and more employers and unions to drop their retiree health coverage.

We took these concerns very seriously as we negotiated this conference agreement.

That is why we have dedicated nearly one-quarter of the spending in this bill to protect retiree health benefits.

For the first time, Medicare will provide funding and incentives so employers and union officials will continue retiree health coverage. Under this bill, no beneficiary will be forced to drop retiree health coverage and participate in the new prescription drug program.

However, if employers drop health coverage in the future, those losing coverage will be allowed to enroll in the Medicare drug program without being penalized.

In addition, this legislation contains a 28 percent non-taxable employer subsidy for each retiree's annual drug spending between $250 and $5000—as high as $1,330 per beneficiary. To qualify, employer coverage must be as generous as, or more generous than, the Medicare Part D drug benefit.

We have made a lot of progress on this provision—protecting retiree health benefits was one of the primary goals of the Medicare conference committee. Let me tell you how much progress we have made—when we considered S.1 in the Senate this summer, CBO told us that the employer dropout rate was 37 percent. The last CBO estimate on the conference report's employer drop-out rate is below 20 percent. This is a remarkable achievement.

The conference agreement is good for rural America. We want to ensure that Medicare beneficiaries will have access to quality health care—no matter where they live—and especially that rural providers, who provide these important health services to beneficiaries, will be properly reimbursed for their services.

Si Hutt, the CEO of Ashley Valley Medical Center in Vernal, Utah wrote to me asking:

Please vote for the Prescription Drug Bill that came out of the conference committee. It not only assists Medicare beneficiaries with escalating drug costs, but it has key provisions which are important to rural hospitals and physicians.

The last data that I looked at actually showed a negative margin for our Medicare business. At the same time, over 50 percent of our patients are Medicare, Medicaid, or self-pay.

As you know, Medicare payment is very complicated and has some inequities that are improved with this bill. The bill stops a reduction of physicians' reimbursements—which is crucial in today's horrible malpractice premium situation and rising costs.

It also gives a full market basket increase to hospitals for the next couple of years if hospitals participate in the American Health Association's (AHA's) national quality effort. We were among the first to sign up for this initiative.

Please vote yes for this bill. Thank you.

Hospitals across America will receive a full market-basket update as long as they submit appropriate quality data to CMS. Medicare payments to hospitals providing services to a disproportionate share of low-income and uninsured patients, typically rural and small urban hospitals, were increased from 5.25 percent to 12 percent. It was an increase that was overdue.

There also is an increase in Medicaid DSH payments.

In addition, the legislation redistributes unused hospital residency positions and rural hospitals will be given top priority for receiving these redistributed resident positions.

The conference report does several things to assist critical access hospitals: namely, it increases payments for these hospitals and eases several burdensome requirements that have been imposed upon them.

Rural physicians benefit greatly under this conference report. We included legislation I helped develop that relieves Medicare providers from burdensome regulations and requirements.

Physicians will no longer be subjected to a 4.5 percent reduction; instead they will be receiving a slight increase in Medicare reimbursement for the next two years. We also modify the geographic adjustment for physician Medicare payments, which is extremely important to my Utah physicians back home.

And we reward physicians who are willing to provide care to Medicare beneficiaries who live in scarcity areas—areas that have medical shortages.

Home health care, skilled nursing facilities and hospice facilities in rural areas also receive an increase in Medicare payment. In addition, there are no home health care co-payments for beneficiaries.

As one of the authors of the home health care bill many years ago, I am proud to be able to say we were able to get that done in this bill. Finally, ambulance services in rural areas will be rewarded through increased payments.

Another issue that is extremely important to me is the reimportation of prescription drugs. I mentioned I would talk about this for a few minutes. My Utah constituents are deeply concerned about the high price of pharmaceutical products. But allowing drugs to be reimported from other countries is not the solution. In fact, it makes the problem worse because the safety of these drugs cannot be guaranteed by the Department of Health and Human Services. The recent Government sting operation in one U.S. port discovered that 85 percent of the reimported drugs seized were found to be counterfeit, outdated, or improperly packaged, knock-off packages.

This is very disturbing to me and an example of why I simply cannot support the reimportation of prescription drugs. The possibility of mistake and deception is just plain too great. People could die. Already the FDA has documented many cases of what appeared to be FDA-approved imported drugs that were, in fact, contaminated or counterfeit, contained the wrong product or incorrect dose, were accompanied by inadequate distributions, or had outlived their expiration date. These drugs would be, at a minimum, ineffective and would actually be harmful, if not fatal.

Those safety concerns are real and those in Congress who advocate reimportation ignore them not at their own risk but at the risk of the lives of millions of Americans. If we truly care about our seniors and others who depend on prescription drugs, we should not expose them to what amounts to pharmaceutical Russian roulette.

I might add that I will come up with an amendment that will give tort liability for local and State governments that encourage reimportation.

In addition to these safety concerns, reimported drugs are a threat to the innovation that Americans and the rest of the world have come to expect

from our pharmaceutical industry. I am author of the FDA Revitalization Act that now is providing for, after 10 years, finally building the White Oak FDA Central Laboratories with the finest equipment and facilities in the world. It will take us another 10 years to do it. It should have been done 10 years ago. That should move this drug price problem forward because it would, hopefully, give them the facilities to acquire even better people to work there, tough scientists, whom they have not been able to attract for years, who basically will move these drugs through in a more safe and expeditious fashion, thus saving costs to those who develop the drugs, and thus bring prices down.

Canada and other countries with lower drug prices generally import superior American products but they impose price controls to keep costs down. However, it can cost up to $1 billion, as I have said, to produce a new drug, test it, win FDA approval, educate doctors, and make the drug available to patients. No pharmaceutical company could go through this without a chance to recover some of its costs, which will not be possible if we impose in America, however indirectly, Canadian-style price controls. They do not have a pharmaceutical industry in Canada anymore because they basically have thrown their business right out of the country. I don't want to see that happen in our country where we have the greatest pharmaceutical companies in the world. We should be proud.

I do not believe sacrificing the safety supply of our drugs by reimportation is the right answer to the high cost of prescription drugs. The conference committee reimportation provision is similar to what we passed earlier this year. The Secretary of HHS is directed to establish a program that would allow for the reimportation of drugs from Canada by pharmacists, wholesalers, and individuals. However, the Secretary has the authority to suspend such a program if public safety is compromised.

The conference agreement directs the Secretary to conduct an extensive study that identifies the barriers for implementing a drug reimportation program and the potential problems associated with it. I believe it is imperative that such a study be conducted by implementing a program that can pose such a serious public health risk.

Before I close, I take this opportunity to refute some of the arguments I have heard from the other side of the aisle. In fact, I will repeat some of the things I have said before but, hopefully, make them more clear.

My colleagues have said that 25 percent of seniors will be worse off when this bill passes than they are today. That is simply not true. It is false. And it is wrong for them to make these statements. This conference agreement provides Medicare beneficiaries with the benefit they have been demanding for close to 40 years, prescription drug coverage and quality health coverage. This week, we are finally going to give them what they want. We spend almost $400 billion in new money to accomplish that goal.

I also heard some say that this is catastrophic all over again and we will be back a year later repealing this legislation just like we repealed the Medicare Catastrophic Coverage Act of 1988. There is one fundamental difference between the current Medicare conference agreement and the Medicare Catastrophic Coverage Act of 1988—although there are other differences as well. Our Medicare benefit is voluntary. The Medicare catastrophic coverage law was mandatory. That is a major difference. No one is forced to participate in this program. But I think virtually everyone will want to.

In addition, this legislation offers drug coverage to the 33 percent of Medicare beneficiaries who do not have coverage today. I have mentioned how that benefits folks in my State. The Hatch-Waxman reforms on generic system drugs get less expensive drugs to the market faster, providing everyone with less expensive drugs.

This bill makes significant health care improvements for Medicare beneficiaries in rural America and the health care workers who care for these beneficiaries.

Before I close, I make an observation about the endorsement of this legislation from the AARP. Regarding the American Association of Retired People, I have not always been in agreement throughout the years, but I have a new regard for that organization because it made a courageous decision by putting seniors first. I respect the AARP for taking such a positive stand on this legislation. I personally resent some of the irresponsible attacks that have been made against them. If we are going to attack AARP, make sure we are right in doing so and do not use phony arguments because you are losing in the Senate.

In conclusion, passage of this Medicare conference agreement is the right thing to do for our seniors, especially those who currently do not have prescription drug coverage because they cannot afford it. I am pleased I have had an opportunity to play an important role in making this dream a reality for 41 million Medicare beneficiaries across the country. I am pleased I was able to work with such fine members of the conference committee, every one of them. Every one of them worked well. Every one of them deserves credit. Every one of them played a specific role. There were hardrock conservatives who made this bill passable in the House. There were those who were more liberal who made this bill acceptable to many in the Senate, if not the vast majority. There were many in the middle who were trying to make sure we got this thing done right and did the very best we could to do achieve that goal.

Again, I have mentioned the people who basically deserve most of the credit for working on this bill. Everyone on those conference committees worked long, hard hours.

So I resent some of the comments that were made by those who did not participate or, if they would have participated, would have done nothing but complain throughout the process and would have stalled the process. They are complaining because they did not have their way and we will not go towards a socialized medicine approach. They want Government to handle all these problems. We think Government can do a good job if it has some competitive aspects with the private sector as well. The vast majority of this is government, but in a reformed way, with new programs that do a lot of good for every senior citizen who wants to participate in them. It will be a sea change advantage to all as we go forward.

I hope my colleagues will pass this bill. This is a historic opportunity for to us do what is in the best interests of our senior citizens in this country. It is the only opportunity that has been brought to both floors of Congress and the only opportunity for us to pass legislation. This bill is important. This bill should not be subject to petty partisan politics, a superabundance of which I have seen through this process, but particularly yesterday and today. I hope all of our colleagues will vote for this bill.

I yield the floor.

Mrs. BOXER addressed the Chair.

Mr. HATCH. Mr. President, could I do just a little bit of wrap-up?

Mrs. BOXER. Of course.

Mr. HATCH. I thank my colleague from California. I thank her for her graciousness throughout this process with regard to my speech.

RECOGNIZING THE IMPORTANCE OF RALPH BUNCHE AS ONE OF THE GREAT LEADERS OF THE UNITED STATES

Mr. HATCH. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Con. Res. 82 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 82) recognizing the importance of Ralph Bunche as one of the great leaders of the United States, the first African-American Nobel

Peace Prize winner, an accomplished scholar, a distinguished diplomat, and a tireless campaigner of civil rights for people throughout the world.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. HATCH. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to this concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 82) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 82

Whereas Ralph Bunche's life of achievement made him one of the 20th century's foremost figures and a role model for youth;

Whereas Ralph Bunche graduated valedictorian, summa cum laude, and Phi Beta Kappa from the University of California at Los Angeles in 1927 with a degree in International Relations;

Whereas Ralph Bunche was the first African-American to receive a Ph.D. in Government and International Relations at Harvard University in 1934;

Whereas Ralph Bunche served as a professor and established and chaired the Political Science Department at Howard University from 1928 to 1941;

Whereas, in 1941, Ralph Bunche served as an analyst for the Office of Strategic Services;

Whereas Ralph Bunche joined the Department of State in 1944 as an advisor;

Whereas Ralph Bunche served as an advisor to the United States delegation to the 1945 San Francisco conference charged with establishing the United Nations and drafting the Charter of the organization;

Whereas Ralph Bunche was instrumental in drafting Chapters XI and XII of the United Nations Charter, dealing with non-self-governing territories and the International Trusteeship System, which helped African countries achieve their independence and assisted in their transition to self-governing, sovereign states;

Whereas, in 1946, Ralph Bunche was appointed Director of the Trusteeship Division of the United Nations;

Whereas, in 1948, Ralph Bunche was named acting Chief Mediator in Palestine for the United Nations, and, in 1949, successfully brokered an armistice agreement between Israel, Egypt, Jordan, Lebanon, and Syria;

Whereas Ralph Bunche was deeply committed to ending colonialism and restoring individual State sovereignty through peaceful means;

Whereas the National Association for the Advancement of Colored People awarded its highest honor, the Spingarn Medal, to Ralph Bunche in 1949;

Whereas for his many significant contributions and efforts toward achieving a peaceful resolution to seemingly intractable national and international disputes, Ralph Bunche was awarded the Nobel Peace Prize in 1950, the first African-American and the first person of color to be so honored;

Whereas Ralph Bunche was named United Nations Under-Secretary-General in 1955, in charge of directing peacekeeping missions in several countries;

Whereas, in 1963, Ralph Bunche received the United States' highest civilian award, the Medal of Freedom; and

Whereas Ralph Bunche's critical contributions to the attempt to resolve the Arab-Israeli conflict and towards the de-colonization of Africa, and his commitment to and long service in the United Nations and numerous other national and international humanitarian efforts, warrant his commemoration: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) recognizes and honors Ralph Bunche as a pivotal 20th century figure in the struggle for the realization and attainment of human rights on a global scale; and

(2) urges the President to take appropriate measures to encourage the celebration and remembrance of Ralph Bunche's many significant achievements.

RECOGNIZING ALTHEA GIBSON FOR HER GROUND BREAKING ACHIEVEMENTS

Mr. HATCH. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H. Con. Res. 69 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 69) expressing the sense of Congress that Althea Gibson should be recognized for her ground breaking achievements in athletics and her commitment to ending racial discrimination and prejudice within the world of sports.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. HATCH. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to this concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 69) was agreed to.

The preamble was agreed to.

RECOGNIZING THE IMPORTANCE OF RALPH BUNCHE AS ONE OF THE GREAT LEADERS OF THE UNITED STATES

Mr. HATCH. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H. Con. Res. 71 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 71) recognizing the importance of Ralph Bunche as one of the great leaders of the United States, the first African-American Nobel Peace Prize winner, an accomplished scholar, a distinguished diplomat, and a tireless campaigner of civil rights for people throughout the world.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. HATCH. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to this concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 71) was agreed to.

The preamble was agreed to.

EXPRESSING THE SENSE OF CONGRESS SUPPORTING VIGOROUS ENFORCEMENT OF THE FEDERAL OBSCENITY LAWS

Mr. HATCH. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 375, S. Con. Res. 77.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 77) expressing the sense of Congress supporting vigorous enforcement of the Federal obscenity laws.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. HATCH. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table en bloc, and that any statements relating to the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 77) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 77

Whereas the Supreme Court in Miller v. California, 413 U.S. 15 (1973) held that obscene material is ''unprotected by the first amendment'' (413 U.S. at 23) and that obscenity laws can be enforced against '' 'hard core' pornography'' (413 U.S. at 28);

Whereas the Miller Court stated that ''to equate the free and robust exchange of ideas and political debate with commercial exploitation of obscene material demeans the grand conception of the first amendment and its high purposes in the historic struggle for freedom.'' (413 U.S. at 34);

Whereas the Supreme Court in Paris Adult Theatre I v. Slaton, 413 U.S. 49 (1973) recognized that there are legitimate governmental interests at stake in stemming the tide of obscene materials, which include—

(1) protecting ''the quality of life and total community environment'' (413 U.S. at 58);

(2) protecting ''public safety'' (413 U.S. at 58);

(3) maintaining ''a decent society'' (413 U.S. at 59–60);

(4) protecting ''the social interest in order and morality'' (413 U.S. at 61); and

(5) protecting ''family life'' (413 U.S. at 63);

Whereas Congress, in an effort to protect these same legitimate governmental interests, enacted legislation in 1988 to strengthen federal obscenity laws and in 1996 to clarify that use of an interactive computer service to transport obscene materials in or affecting interstate or foreign commerce is prohibited;

Whereas the 1986 Final Report of the Attorney General's Commission on Pornography found that ''increasingly, the most prevalent forms of pornography'' fit the description of ''sexually violent material'' (p. 323) and that ''an enormous amount of the most sexually explicit material available'' can be categorized as ''degrading'' to people, ''most often women'' (p. 331);

Whereas the Internet has become a conduit for hardcore pornography that now reaches directly into tens of millions of American homes, where even small children can be exposed to Internet obscenity and older children can easily find it;

Whereas a national opinion poll conducted in March 2002 by Wirthlin Worldwide marketing research company found that 81 percent of adult Americans say that ''Federal laws against Internet obscenity should be vigorously enforced'';

Whereas a May 2 report from the National Academies' National Research Council stated that ''aggressive enforcement of existing antiobscenity laws can help reduce children's access to certain kinds of sexually explicit material on the Internet'';

Whereas vigorous enforcement of obscenity laws can help reduce the amount of ''virtual child pornography'' now readily available to sexual predators; and

Whereas it continues to be the desire of the People of the United States of America and their representatives in Congress to recognize and protect the governmental interests recognized as legitimate by the United States Supreme Court in Paris Adult Theatre I v. Slaton, 413 U.S. 49 (1973): Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that the Federal obscenity laws should be vigorously enforced throughout the United States.

FAIR AND ACCURATE CREDIT TRANSACTIONS ACT, 2003—CONFERENCE REPORT

Mr. HATCH. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of the conference report to accompany H.R. 2622, the Fair and Accurate Credit Transactions Act of 2003.

The PRESIDING OFFICER (Mr. BURNS). The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2622) to amend the Fair Credit Reporting Act, to prevent identity theft, improve resolution of consumer disputes, improve the accuracy of consumer records, make improvements in the use of, and consumer access to, credit information, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment, and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 21, 2003.)

Mr. HATCH. Mr. President, I ask unanimous consent that the conference report be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the conference report be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The conference report was agreed to.

HOMETOWN HEROES SURVIVORS BENEFITS ACT OF 2003

Mr. LEAHY. Mr. President, I rise today to express my pleasure with the House passage of the ''Hometown Heroes Survivors Benefits Act of 2003,'' S. 459, at daybreak today. This bill, as amended and passed by unanimous consent in the House, will improve the Department of Justice's Public Safety Officers Benefits program by allowing survivors of public safety officers who suffer fatal heart attacks or strokes while participating in nonroutine stressful or strenous physical activities to qualify for Federal survivor benefits.

I want to pay special thanks to Congressman BOB ETHERIDGE, the author of the House companion bill, and House Judiciary Committee Chairman SENSENBRENNER for their leadership and fortitude while negotiating this legislation. Without their perseverance and willingness to find bipartisan compromise language, passage of this bill in the House would not have happened.

I also commend Congressman COBLE, Congressman BOBBY SCOTT, the Fraternal Order of Police and the Congressional Fire Services Institute for working with us on bipartisan compromise language so that we could pass the Senate bill through the House. I look forward to working with Senate Judiciary Chairman HATCH, Senator LINDSEY GRAHAM, the lead Republican cosponsor of this bill, and Senate leadership to quickly pass the Senate bill, as amended by the House, and send it to the President's desk for enactment into law.

Public safety officers are our most brave and dedicated public servants. I applaud the efforts of all members of fire, law enforcement and EMS providers nationwide who are the first to respond to more than 1.6 million emergency calls annually—whether those calls involve a crime, fire, medical emergency, spill of hazardous materials, natural disaster, act of terrorism, or transportation accident—without reservation. Those men and woman act with an unwavering commitment to the safety and protection of their fellow citizens, and forever willing to selflessly sacrifice their own lives to provide safe and reliable emergency services to their communities.

Sadly, that kind of dedication can result in tragedy, which we all witnessed on September 11 as scores of firefighters, police officers and medics raced into the burning World Trade Center and Pentagon with no other goal than to save lives. Every year, hundreds of public safety officers nationwide lose their lives and thousands more are injured while performing duties that subject them to great physical risks. And while we know that PSOB benefits can never be a substitute for the loss of a loved one, the families of all our fallen heroes deserve to collect these funds.

The PSOB program was established in 1976 to authorize a one-time financial payment to the eligible survivors of Federal, State, and local public safety officers for all line of duty deaths. In 2001, Congress improved the PSOB regulations by streamlining the process for families of public safety officers killed or injured in connection with prevention, investigation, rescue or recovery efforts related to a terrorist attack. We also retroactively increased the total benefits available by $100,000 as part of the USA PATRIOT Act. Survivors of first responders killed in the line of duty now receive $267,494 in PSOB.

Unfortunately, the issue of covering heart attack and stroke victims under PSOB regulations was not addressed at the time.

Service-connected heart, lung, and hypertension conditions are silent killers of public safety officers nationwide. The numerous hidden health dangers dealt with by police officers, fire fighters and EMS personnel are widely recognized, but officers face these dangers in order to serve and protect their fellow citizens.

The intent of the legislation Senator GRAHAM and I introduced earlier this year was to cover officer who suffered a heart attack or stroke as a result of nonroutine stressful or strenuous physical activity. As drafted and passed by the Senate by unanimous consent on May 16, however, members of the House

Judiciary Committee felt the bill's language would cover officers who did not engage in any physical activity, but merely happened to suffer a heart attack while at work. Chairman SENSENBRENNER, Congressman ETHERIDGE, Congressman COBLE, Congressman SCOTT, FOP, CFSI and I worked out a substitute amendment to address those concerns.

The substitute amendment to S. 459 will create a presumption that an officer who died as a direct injury sustained in the line of duty if the following is established: That officer participated in a training exercise that involved nonroutine stressful or strenuous physical activity or responded to a situation and such participation or response involved nonroutine stressful or strenuous physical law enforcement, hazardous material response, emergency medical services, prison security, fire suppression, rescue, disaster relief or other emergency response activity; that officer suffered a heart attack or stroke while engaging or within 24 hours of engaging in that physical activity; and such presumption cannot be overcome by competent medical evidence.

For the purposes of this act, the phrase ''nonroutine stressful or strenuous physical'' will exclude actions of a clerical, administrative or non-manual nature. Included in the category of ''actions of a clerical, administrative or non-manual nature'' are such tasks including, but not limited to, the following: sitting at a desk; typing on a computer; talking on the telephone; reading or writing paperwork or other literature; watching a police or corrections facility's monitors of cells or grounds; teaching a class; cleaning or organizing an emergency response vehicle; signing in or out a prisoner; driving a vehicle on routine patrol; and directing traffic at or participating in a local parade.

Such deaths, while tragic, are not to be considered in the lien of duty deaths. The families of officers who died of such causes would therefore not be eligible to receive PSOB.

For the purposes of this Act, the phrase ''nonroutine stressful or strenuous physical'' actions will include, but are not limited to, the following: involvement in a physical struggle with a suspected or convicted criminal; performing a search and rescue mission; performing or assisting with emergency medical treatment; performing or assisting with fire suppression; involvement in a situation that requires either a high speed response or pursuit on foot or in a vehicle; participation in hazardous material response; responding to a riot that broke out at a public event; and physically engaging in the arrest or apprehension of a suspected criminal.

The situations listed above are the types of heart attack and stroke cases that are considered to be in the line of duty. The families of officers who died in such cases are eligible to receive PSOB.

Heart attacks and strokes are a reality of the high-pressure jobs of police officers, firefighters and medics. These are killers that first responders contend with in their jobs, just like speeding bullets and burning buildings. They put their lives on the line for us, and we owe their families our gratitude, our respect and our help. No amount of money can fill the void that is left by these losses, but ending this disparity can help these families keep food on the table and shelter over their heads.

I urge the Senate to take up and pass the Hometown Heroes Survivors Benefits Act, S. 459, as amended and passed this morning by the House, and show its support and appreciation for these extraordinarily brave and heroic public safety officers.

ADDITIONAL STATEMENTS

IN MEMORY OF JUDGE RAYMOND J. PETTINE

• Mr. REED. Mr. President, on Monday, November 17, 2003, Rhode Island, the judicial community and the entire Nation lost a great jurist, a great scholar and a great man. U.S. District Court Judge Raymond J. Pettine passed away leaving a legacy of protecting individual liberties and constitutional rights.

Judge Pettine was born July 6, 1912 on America Street in Federal Hill, one of the original Italian neighborhoods in Providence; a fitting place to be born for someone who would champion the Constitution that distinguishes this country, America, from so many others. His father was a wigmaker in Italy who immigrated to these shores to find a better life for his family and to make a better America through his labors and his sacrifice. Judge Pettine was sustained and inspired by the example of these good people, his mother and father. The hard work, the great patriotism, the unwavering decency and integrity, the deep respect for both family and faith, the gracious manners of a true gentleman were learned in that home on America Street.

Early in his life, Judge Pettine became fascinated with the law. As a child of eight, he scrawled a note to the Dean of Harvard Law School and asked him, ''What do you have to do to become a lawyer?'' The Dean wrote in reply ''study hard, be a good boy, always have a dream.'' His dream led him to Providence College and Boston University Law School. Soon after graduation, he enlisted in the U.S. Army and served on active duty from 1941 until 1946 rising to the rank of major. He later would be promoted to colonel in the Judge Advocate General Corps as a reservist.

After his discharge from active duty and a brief stint in private practice, Judge Pettine began a 13-year career as a prosecutor in the Rhode Island Attorney General's office. Like every task he undertook, he brought great passion and determination to this endeavor. He understood that our adversarial system of justice requires that both the prosecution and the defense must bring the full weight of the facts and the law before the jury so that they may have the benefit of principled and forceful advocacy to make their decision. He was a tough and uncompromising prosecutor determined to enforce the law.

His reputation and his record as a prosecutor earned him appointment as the Federal Attorney for the District of Rhode Island is 1961. His service as Federal Attorney won him the praise of Attorney General Robert F. Kennedy as one of the nation's top three federal prosecutors. And, this prosecutorial experience would help make him a superb judge upon his appointment to the bench in 1966 by President Johnson. Judge Pettine recognized that the role of a judge was different than that of a prosecutor or defense counsel. He was charged with something greater than simply enforcing the law or arguing for a client. He was charged with seeking justice, that delicate balance that rests on fairness and a keen understanding of the nature of people as well as the tenets of the law. He was also charged in a special way with defending the Constitution and the Bill of Rights. He recognized that our democracy, in his words, ''prizes itself in having a Bill of Rights designed to protect us against despotic abuse of authority by the government.''

There was no more courageous, forceful or principled defender of the Constitution than Raymond Pettine. In 30 years on the Federal bench, and as chief judge from 1971 to 1982, Judge Pettine staunchly guarded the individual rights enshrined in the Constitution. He said the Constitution should be interpreted in ways that ''give meaning to the heart and soul of what it's all about: a kinder, more understanding Constitution that recognizes the disenfranchised, the poor and underprivileged.''

In his rulings, he repeatedly upheld the Bill of Rights' freedom of speech, of religion and of privacy.

Pettine stood by the Constitution and showed courage in the face of controversy when he, a practicing Catholic, ruled that municipalities could not erect Christmas Nativity scenes on public land. As he said, ''I firmly believe this with great conviction: that there has to be a separation between church and State—that one of the saving graces of this country is the fact that we are tolerant of all religions, and even of those who have no religion. And, if we start breaking that down, we are going to be in an awful lot of trouble.''

His wise defense of the Constitution and its protections for individual conscience brought him vicious criticism and personal scorn. But, no amount of criticism or scorn could deter him from his obligation to extend the protections of the Constitution to the poor as well as the powerful, to the maligned as well as the popular.

Judge Pettine embraced his judicial duties with remarkable dedication. He became a scholar of the law and, in order to insulate himself from even the appearance of partiality, he led a life focused on his family and the lonely rigors of his judicial responsibilities. Nevertheless, he cut a dashing figure in Rhode Island. He was a man of great culture and erudition who exuded style and panache.

Judge Raymond J. Pettine has left a remarkable legacy. His wisdom, his integrity and his selfless devotion to the Constitution made him a judge of extraordinary achievement. His love of family and his compassionate regard for all he met made him a man of singular worth. I admire him greatly. He has given us the example and the confidence to carry on. And, his presence will continue to be felt whenever we stand up in defense of the Constitution and in defense of those who are ‘‘disenfranchised, the poor and underprivileged.’’

My deepest condolences go out to his family and friends, especially his daughter, Lee Gillespie, his granddaughter, Lauren Gillespie and his son-in-law, Thomas Gillespie.●

MESSAGE FROM THE HOUSE

At 10:01 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1) to amend title XVIII of the Social Security Act to provide for a voluntary program for prescription drug coverage under the Medicare Program, to modernize the Medicare Program, to amend the Internal Revenue Code of 1986 to allow a deduction to individuals for amounts contributed to health savings security accounts and health savings accounts, to provide for the disposition of unused health benefits in cafeteria plans and flexible spending arrangements, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2622) to amend the Fair Credit Reporting Act, to prevent identity theft, improve resolution of consumer disputes, improve the accuracy of consumer records, make improvements in the use of, and consumer access to, credit information, and for other purposes.

The message further announced that the House agrees to the following bills, each with an amendment in which it requests the concurrence of the Senate:

S. 459. An act to ensure that a public safety officer who suffers a fatal heart attack or stroke while on duty shall be presumed to have died in the line of duty for purposes of public safety officer survivor benefits;

S. 877. An act to regulate interstate commerce by imposing limitations and penalties on the transmission of unsolicited commercial electronic mail via the Internet; and

S. 1768. An act to extend the national flood insurance program.

The message also announced that the House has passed the following bill, without amendment:

S. 579. An act to reauthorize the National Transportation Safety Board, and for other purposes.

The message further announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate.

H.R. 1964. An act to assist the States of Connecticut, New Jersey, New York, and Pennsylvania in conserving priority lands and natural resources in the Highlands region, and for other purposes;

H.R. 2584. An act to provide for the conveyance to the Utrok Atoll local government of a decommissioned National Oceanic and Atmospheric Administration ship, and for other purposes;

H.R. 3181. An act to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to reauthorize the predisaster mitigation program, and for other purposes; and

H.J. Res. 80. Joint resolution appointing the day for the convening of the second session of the One Hundred Eighth Congress.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 206. Concurrent resolution supporting the National Marrow Donor Program and other bone marrow donor programs and encouraging Americans to learn about the importance of bone marrow donation; and

H. Con. Res. 339. Concurrent resolution providing for the sine die adjournment of the first session of the One Hundred Eight Congress.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Ms. COLLINS, from the Committee on Governmental Affairs, without amendment:

S. 1683. A bill to provide for a report on the parity of pay and benefits among Federal law enforcement officers and to establish an exchange program between Federal law enforcement employees and State and local law enforcement employees (Rept. No. 108-207).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. BUNNING (for himself, Mr. MILLER, Mr. INHOFE, Mr. NELSON of Nebraska, Mr. CRAIG, Mr. LUGAR, Mr. SANTORUM, Mr. COLEMAN, Mr. SMITH, Mr. HATCH, and Mr. CARPER):

S. 1931. A bill to repeal the sunset of the Economic Growth and Tax Relief Reconciliation Act of 2001 with respect to the expansion of the adoption credit and adoption assistance programs; to the Committee on Finance.

By Mr. CORNYN (for himself, Mrs. FEINSTEIN, Mr. HATCH, Mr. SMITH, Mr. ALEXANDER, and Mr. GRAHAM of South Carolina):

S. 1932. A bill to provide criminal penalties for unauthorized recording of motion pictures in a motion picture exhibition facility, to provide criminal and civil penalties for unauthorized distribution of commercial prerelease copyrighted works, and for other purposes; to the Committee on the Judiciary.

By Mr. HATCH (for himself, Mrs. FEINSTEIN, and Mr. CORNYN):

S. 1933. A bill to promote effective enforcement of copyrights, and for other purposes; to the Committee on the Judiciary .

ADDITIONAL COSPONSORS

S. 1549

At the request of Mrs. DOLE, the names of the Senator from Maine (Ms. COLLINS) and the Senator from Wisconsin (Mr. KOHL) were added as cosponsors of S. 1549, a bill to amend the Richard B. Russell National School Lunch Act to phase out reduced price lunches and breakfasts by phasing in an increase in the income eligibility guidelines for free lunches and breakfasts.

S. 1926

At the request of Ms. STABENOW, the name of the Senator from Nevada (Mr. REID) was added as a cosponsor of S. 1926, a bill to amend title XVIII of the Social Security Act to restore the medicare program and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUNNING (for himself, Mr. MILLER, Mr. INHOFE, Mr. NELSON of Nebraska, Mr. CRAIG, Mr. LUGAR, Mr. SANTORUM, Mr. COLEMAN, Mr. SMITH, Mr. HATCH, and Mr. CARPER):

S. 1931. A bill to repeal the sunset of the Economic Growth and Tax Relief Reconciliation Act of 2001 with respect to the expansion of the adoption credit and adoption assistance programs; to the Committee on Finance.

Mr. BUNNING. Mr. President, I rise today in celebration of National Adoption Day by introducing legislation to repeal the sunset on two current-law tax provisions that make adoption more affordable for American families.

In 2001, this Congress passed and President Bush signed into law the Economic Growth and Tax Relief Reconciliation Act. This act contains many much needed tax relief provisions for the American people. However, because of procedural rules in the

Senate, this law sunsets and expires after December 31, 2010.

The legislation I introduce today makes permanent two tax provisions contained in that law, the adoption tax credit and the exclusion for employer-provided adoption assistance benefits. If we do not pass this bill and therefore allow these provisions to sunset, then this tax credit will be cut overnight from a maximum of $10,000 to $5,000. Families who adopt special needs children will no longer receive a flat $10,000 credit, and instead, they will be limited to a maximum of $6,000. As well, families claiming the credit may be pushed into the Alternative Minimum Tax.

Today, National Adoption Day, we celebrate the adoption of over 3,000 children from foster care. There are over 542,000 kids in foster care. Of these, more than 125,000 children are waiting to be adopted permanently. We here in Congress need to continue to help these children to find loving homes. We need to make it easier for families to adopt, not throw up barriers. If the adoption tax credit is cut to the prior law level of $5,000, many families will not be able to afford adoptions. And therefore less children will be welcomed into what they want the most, a permanent family.

Last year, the House of Representative passed this permanent extension of the adoption tax credit by a vote of 391 yeas to 1 nay. We in this Chamber failed to act. I am hopeful that my colleagues in the Senate recognize the importance of moving on this legislation to permanently extend this tax credit. The children and parents deserve to see this adoption tax credit set into law for good. This is not a partisan issue, but something all Americans can agree on. We owe it to them all.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1931

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPEAL OF APPLICABILITY OF SUNSET OF THE ECONOMIC GROWTH AND TAX RELIEF RECONCILIATION ACT OF 2001 WITH RESPECT TO ADOPTION CREDIT AND ADOPTION ASSISTANCE PROGRAMS.

Section 901 of the Economic Growth and Tax Relief Reconciliation Act of 2001 is amended by adding at the end the following new subsection:

''(c) EXCEPTION.—Subsection (a) shall not apply to the amendments made by section 202 (relating to expansion of adoption credit and adoption assistance programs).''.

Mr. INHOFE. Mr. President, I rise today to join my colleagues in introducing this bill to repeal the provisions of the Economic Growth and Tax Relief Act of 2001 that sunset the adoption tax credit and adoption assistance programs.

Under the current legislation, families with adopted children are given a tax credit of up to $10,000 to cover their adoption expenses and families who adopt children with special needs are credited the full $10,000. Providing this type of assistance is important in easing the costs of the adoption process and helping families cover expenses incurred by adopting children with special needs.

Currently, there are around 550,000 children in foster care. Of this number, 126,000 are up for adoption. In order to facilitate and expedite the adoption process, I have worked as a member of the Congressional Coalition on Adoption to encourage and support families who are willing to provide a loving, stable, and permanent home for these children. The Coalition has been active in promoting adoption around the country through a number of programs, including the National Adoption Day, a day set aside to draw attention to expediting and finalizing adoptions. In fact, Oklahoma held 20 adoptions this week in celebration of the day.

I strongly believe that it is critical to repeal the sunset provision of the Economic Growth and Tax Relief Act and continue to support those families who are making it possible for children to grow up in a loving and caring environment. As the grandfather of an adopted granddaughter, I can say through personal experience that providing a home where a child can be nurtured and given opportunities to become a contributing member of society is one of the greatest and most rewarding gifts we can ever give.

By Mr. HATCH (for himself, Mrs. FEINSTEIN, and Mr. CORNYN):

S. 1933. A bill to promote effective enforcement of copyrights, an for other purposes; to the Committee on the Judiciary.

Mr. HATCH. Mr. President, I rise to introduce the Enhancing Federal Obscenity Reporting and Copyright Enforcement Act of 2003, the EnFORCE Act. This bill makes three sets of narrow, but important, changes that will build greater flexibility and accountability into our system of intellectual property laws.

First the EnFORCE Act will expand an existing antitrust exemption to conform the law to market realities. Today, an antitrust exemption in the Copyright Act gives record companies and music publishers the flexibility they need to negotiate mechanical royalty rates in the rapidly evolving market for legal music downloading. These parties now need the same flexibility to ensure that they can negotiate royalties associated with innovative forms of physical phonorecords, like enhanced compact disks and DVD audio disks.

The music industry has sometimes been criticized for being too slow to adopt its business models to new technologies. The industry is now responding to such concerns by developing new products and new distribution channels. The EnFORCE Act will ensure that Federal law allows the music industry to provide consumers with these innovative products and services.

Second, the EnFORCE Act will also resolve two narrow issues relating to statutory damages in copyright infringement litigation. Some accused infringers have tried to avoid liability for statutory damages by challenging the accuracy of the information in copyright registrations; this bill clarifies that courts should resolve such challenges by applying the existing judicial doctrine of fraud-on-the-Copyright-Office. In other cases, disputes have arisen about how many ''works'' have been infringed for purposes of computing statutory damages. These disputes are important for the music industry, which has received inconsistent adjudications about whether an album consisting of ten songs counts as one or ten works for statutory-damages computation. The bill gives courts discretion to conform the law of statutory damages to changing market realities.

Third, and finally, the EnFORCE Act will also enhance both the enforcement and oversight of federal intellectual property law. The bill authorizes appropriations to ensure that all Department of Justice units that investigate intellectual property crimes have the support of at least one agent specifically trained in the investigation of such crimes. The bill also requires the Department of Justice to report to Congress detailed information about the scope of its efforts to investigate and prosecute crimes involving the sexual exploitation of minors or intellectual property.

For the above reasons, I urge my colleagues to support the Enhancing Federal Obscenity Reporting and Copyright Enforcement Act of 2003. I look forward to working with my colleagues in the Senate and the affected public to ensure that this bill achieves its important objectives.

PRIVILEGES OF THE FLOOR

Mr. HATCH. I ask unanimous consent that Grace Becker, a detailee from the Sentencing Commission, be granted the privilege of the floor for the duration of the 108th Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that Grant Menke and Brett Swearingen be granted floor privileges throughout the debate on the conference report on H.R. 1.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I ask unanimous consent that Jenelle

Krishramoorthy be granted the privilege of the floor for the remainder of the debate today, and the remainder of the debate on this Medicare conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003—CONFERENCE REPORT—Continued

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, this debate so far has been very illuminating, in a way fascinating, to see how different Members of the Senate view the bill that is before us. I hope that America's seniors are watching this debate. I hope they are listening. I hope they will make up their own minds.

There are many groups out there who are going to give their opinions, and I respect them all. But I think if you just go to the debate and you listen to all sides of it, seniors will come up with their own conclusions. As a matter of fact, I also hope people in their fifties and forties are watching this debate because many of the changes that will be made, if this bill becomes law, are going to impact people in their fifties, people in their forties.

Let's face it, Medicare is a program that impacts all families because the children of senior citizens oftentimes bear the burden, if there are health problems. Of course, they care deeply about their families.

We know that Medicare is a nationwide health plan for aged and certain disabled Americans, and it was created 40 years ago for seniors to offer them access to good quality health care. There was a huge debate at that time about whether this was the right thing to do. But people looked around and saw that our seniors were in trouble. They were spending their money on health care, didn't have anything left, oftentimes had to move in with their families. Their families had to pick up their health care bills, and it was very difficult.

This program has fulfilled its promise. Is it perfect in every way? Of course not. What program is? What corporation is? What person is? But Medicare has saved many lives and has made the golden years golden for a lot of our seniors. That is why they feel so strongly about it.

I have been listening to some of the call-in shows. I have heard seniors identify themselves as Republicans, Democrats, and Independents. They are worried about the changes that are about to hit the system, and so am I.

The one thing I think everyone agrees on is that there ought to be a prescription drug benefit. At least I think most of us believe that from both sides of the aisle. We know this cost is heavy on our seniors. We know drug prices are skyrocketing because, unfortunately and very sadly, we don't allow drug reimportation from places like Canada and Mexico, although I have to tell you that in my State, people are going to Mexico.

I received a letter from a constituent of mine from San Marcos, CA, earlier this year. She told me that her annual cost for prescription drugs this year will top $10,000. Think about that, $10,000. How do our seniors deal with this when they are retired?

A retired physician from Marina del Rey told me that a pill he takes for his heart disease went up 600 percent, from $15 a month to $85. For seniors who have to take an assortment of medicines to manage their chronic diseases, the costs really start to add up.

Very sad to say, in this bill there is virtually no cost containment. Even though the House version said reimportation from Canada was a good idea, this has not happened. We will continue to pay the highest drug prices in the world. It is very sad, indeed. The provisions on generic drugs were watered down a bit. We have some in there but not what they should be.

For all the reasons that I talked about—the fact that I feel deep compassion for my constituents who have to pay these huge sums for medicines—I voted for the Senate bill. The Senate bill left here. I thought it made some sense. So let's look at what the Senate bill did for our seniors.

It had about six things that it did that I thought were really important.

First, there was a modest benefit for seniors that were hardest hit by the costly prescription drugs. That benefit was a lot better than the benefit that is currently before us. I will go into the differences. The benefit that is before us is so weak, it barely has a pulse. It is barely worth filling out the forms. It is barely worth your time. You could probably do better if you become friendly with your pharmacy down the road. They will probably give you a better deal.

The benefit before us, unlike the benefit we voted on, is this: If you have $5,100 worth of drug costs, you will pay $4,020 for those drugs. In the meanwhile, you will have to figure out what are your deductibles, what are your copays, filling out the forms, being nervous, getting notified that you no longer have the drug benefit because there is a benefit shutdown, which I will get into later. So think about it. You have a $5,000 drug bill, and you are paying $4,000. And you are going through probably bureaucratic hell to get that thousand dollars off.

So the benefit, when we got the bill, we voted it out. I voted for it. I wanted it. It was a modest benefit but a decent benefit. It was much better than this one. We will get into that later.

Secondly, all seniors were guaranteed a Medicare prescription drug benefit if they didn't have two private plans in their area. So you had a good fallback. If you didn't have two private drug plans competing for your business, could you say: Forget this. I can go to Medicare.

Third, Medicare could have bargained for lower prescription drug costs. Now, why is this important? Just look at the Veterans' Administration. They can get way lower costs for the drug benefits for their veterans because they represent millions of veterans. Therefore, they have bargaining power. It is not like if I walked into a pharmacy myself and said: Hi, I am a veteran, can you lower my drug prices. And the pharmacist looks at me and says: Well, no. But if I bring millions of people into the store, the pharmacist is going to say: You know, now I can talk to you about some bargain prices.

That is what we have done with the VA. In the original bill that came out of the Senate, Medicare could have bargained. We will talk about the current bill in a minute.

Then, No. 4, there were steps to privatize Medicare, but they were minor steps. They were balanced by a $6 billion sum that was added to Medicare. So while they gave the private plans $6 billion in the Senate bill to ''encourage'' them to stay in the Medicare business, I didn't agree with that. When I think about competition, I don't think about paying people to compete. I didn't think that is what capitalism is. I was a stockbroker. That is news to me. To me competition is what it says. You come in, you see you have a chance to make a profit, and you compete.

Well, we were giving them $6 billion. I wasn't happy about it, but I felt that, all in all, because we balanced it and gave $6 billion to Medicare to add prevention and some other very important benefits, it was worth it.

So just sum that up. I want to be clear here. I supported the Medicare prescription drug bill that was before the Senate because it was a decent benefit for seniors. It gave them about a third off their drugs. So it gave you a third off of your drugs. I thought that was a good benefit. You paid two-thirds and you got a third off. Again, I thought it should have been better. It was modest. I wasn't thrilled with it. I tried to have amendments to close the benefit shutdown, to bring the benefit up to 50 percent, but I did not succeed in that effort.

All seniors were guaranteed a Medicare drug benefit, that fallback, if they didn't have two private drug plans competing. Frankly, I wanted a Medicare fallback for everybody. I remember the debate. But they convinced me to compromise. I wasn't thrilled, but I voted for it. Medicare could have bargained for lower prices for drugs. I assumed that would be part of what we would do. We didn't prohibit it. The

steps to privatize Medicare, to incentivize HMOs to stay in the Medicare business, were balanced by $6 billion added to Medicare for some important new benefits.

The last thing is, for the lowest income seniors, they got prescription drugs at no cost. That was a wonderful thing in the Senate bill. The poorest of the poor people who worked all their lives and found themselves in a horrible situation today would have gotten drugs at no cost. For all those reasons, I was very pleased in the end that I was able to move that bill forward.

I want to show you something I hope you can appreciate, as I hold this bill up for a minute. The bill itself that has now come back to us is very heavy. Here it is. This is the bill that is before us today. This bill I am holding is 678 pages. How much of this is the prescription drug benefit? It is 181 pages. What does that tell you? It tells you that most of this bill has nothing to do with prescription drugs. Think about it. We sent a prescription drug bill into the conference committee to come back to us, and here it is. This yellow tab shows me where it is. This is the prescription drug benefit. It is 181 pages. The balance of this bill is way more, 5 times more.

Think about it. If the folks who brought you this bill were sincere about giving you a prescription drug benefit, why did they then use that as an excuse to begin changing Medicare—changing Medicare in ways that are perplexing, that are going to be difficult to understand, and the rest?

Now, I am not, generally speaking, someone who is paranoid about things. But I have to tell you, I am when I hear Newt Gingrich, praising all 600 pages of this bill, who said in 1995:

> Now, we don't get rid of it [Medicare] in round one because we don't think that that's politically smart, and we don't think that's the right way to go through a transition. But we believe Medicare is going to wither on the vine, because we think people are voluntarily going to leave it.

Voluntarily. If you mess up Medicare and you make it confusing and start doing the things that they do in this bill, Newt Gingrich will be proven right. Why do you think he went over to the caucus on the other side, in the House, and talked to the Republicans who didn't like the bill? Because they thought it was too good to seniors.

He said: No, it is not. Trust me. Would I lead you astray?

That is Newt Gingrich. The senior citizens in this country, in my view, are the smartest of the folks when it comes to Medicare. They know it. They get it. They understand Social Security and they understand Medicare. They understand when Newt Gingrich said that Medicare should ''wither on the vine,'' and that this isn't something they want to see happen.

Well, folks, please listen. ''We don't have to get rid of it in round one,'' Newt said, ''because we don't think it's politically smart.'' So what did they do? They take a prescription drug benefit that is popular—by the way, it is voluntary, but I will talk about that because it is not voluntary if you are on Medicaid, and it is not voluntary when you find out that your pension plan has dropped your prescription drug coverage because then you will have nothing. You will be forced into it. It is not voluntary for those folks.

But I can tell you that this is just what Newt Gingrich planned. You cannot do it all at once. Not in round 1. We have to go through a ''transition.'' Remember that word because it shows up in this bill—''transition.'' So here is prescription drugs, and here is the withering on the vine.

A lot of the people who fought Medicare in the beginning are embracing this bill. Do you think they had a change of heart? Do you think those of us who built our careers on protecting seniors have somehow gone wacko on you by saying that this bill does more harm than good? Think about the Senators who are standing up here and extolling the virtues of this bill. One of them was here before and he said that people on the other side are saying we are trying to destroy Medicare. How ridiculous, he said. That's crazy. We would never do that. Then he launched into a harsh criticism of Medicare and how it needs to change.

Another, I thought, belied his point of view when he stood up and said—it is on the record from this afternoon—we need to get away from the ''command and control'' of Medicare.

Well, I have news for the Senator from Texas, who said that. In Medicare, do you know who is in command and control? The senior citizens. That senior citizen can go anywhere—to the doctor of choice. That is the beauty of the Medicare system. They are in command and control.

What this bill does is start the unraveling of that command and control and gives it to a whole new system that is so confusing that I would assure you, when you begin to hear the words and the acronyms associated with this new system, if you went up to any Senator and asked him or her a question about it, not one of them would pass the test of understanding every acronym—not even close. So the Senate bill benefited seniors. What we have before us is quite different.

To me, the saddest thing about this bill is that it turned a modest, but decent, benefit for seniors into an enormous benefit for the largest pharmaceutical companies and HMOs in America. Here is what we have now in the bill. This is what we have now. The bill benefits drug companies and HMOs.

First of all, the bill sets up a slush fund of $14 billion for HMOs. I have to say something here. The deficit that we are facing in our country today is nothing short of an abomination. From the minute this President took over until today, we have seen deficits as far as the eye can see and balanced budgets turn into $500 billion-a-year deficits every year. But the folks in the conference committee found $14 billion to give to those profitable corporations in America. Why do you think that is the case?

There is an article today in the Washington Post that tries to explain it. This is the headline on the front page:

> 2 Bills Would Benefit Top Bush Fundraisers. Executives' Companies Could Get Billions.

This is the selling of America. I want to quote from this article.

> More than three dozen of President Bush's major fundraisers are affiliated with companies that stand to benefit from the passage of two central pieces of the administration's legislative agenda: the energy and Medicare bills.

We stopped the Energy bill. I don't know how long we will be able to hold that, but the Energy bill is a clear-cut case. We talked about that the other day, and now there is the Medicare bill.

Continuing the quote:

> The energy bill provides billions of dollars in benefits to companies run by at least 22 executives and their spouses who have qualified as either ''Pioneers'' or ''Rangers''—

That is what they call the big fat cats, Pioneers or Rangers——

> as well as to the clients of at least 15 lobbyists and their spouses who have achieved similar status as fundraisers. At least 24 Rangers and Pioneers could benefit from the Medicare bill—

Twenty-four Rangers and Pioneers, and those are the people who give the most money——

> could benefit from the Medicare bill as executives of companies or lobbyists working for them, including eight who have clients affected by both bills.

Talk about hitting the lottery. They benefit from the Energy bill and this bill. We know where the money is going. It is going out of the Federal Treasury to the fat cats. Face it. Unfortunately for the folks around here, we know now. We have it.

How about this?

> Hank McKinnell—

He may be a lovely man; this is not a personal attack on him——

> chairman and CEO of Pfizer, has pledged to raise at least $200,000 for Bush's reelection, although he is not yet listed as a Pioneer or Ranger. Pioneer Munr Kazmir, who runs a direct-mail drug company called Direct Meds Inc., estimates that he has about 100,000 customers on Medicare who will have more money to buy drugs from his company. ''We know the patients, we know how important this bill is,'' he said.

Follow the money. Dress it up any way you want. Talk about how great this bill is. Follow the money. I hope seniors are watching this tonight. They will make up their own minds. They are calling my office. My phones are

overwhelmed. What are they running on this? About 1,000 calls to 200 calls against this bill. For every 100 yeses, there are 1,000 nos. Seniors are smart.

They trust the AARP. Now they are finding out that the head of the AARP wrote the foreword to Newt Gingrich's book. Now they are finding out that the AARP gets 60 percent of their funds from selling insurance. Now they are finding out that the head of the AARP represented big drug companies. Follow the money.

There is a $14 billion slush fund for HMOs at a time when we don't have money to fully fund education. We can't fully fund education, but we can find $14 billion for a slush fund for HMOs. They don't call it a slush fund. They call it a few other names—a stabilization fund. They call it a stabilization fund.

Over 7 years, HMOs get $14 billion. This includes $10 billion in direct subsidies to HMOs handed out at the discretion of the head of the agency overseeing Medicare. How would you like to be that guy? At his whim, this bureaucrat can write checks to HMOs to bribe them to participate in Medicare.

In addition, there are nearly $4 billion of payments to the HMOs that already participate in Medicare just to bribe them to stay in Medicare. What kind of capitalism are we living in this country when we have to pay the private sector extra money when they went in the business in the first place? Things have changed. When I was a stockbroker, it wasn't that way. We didn't give corporations the kind of welfare we are giving them today. This is corporate welfare. Follow the money to the Presidential campaigns and you will get a very interesting story.

This $14 billion slush fund is particularly egregious when you consider that Medicare already pays HMOs more than the per-patient cost of traditional Medicare. Let me repeat that.

HMOs are getting paid more than the traditional Medicare. Do my colleagues know why? The overhead in Medicare is very small. Do we know exactly—is it 2 or 3 percent? Anyway, we do not pay CEOs millions and millions of dollars. They are taking that money right off the top and lining their pockets. Oh, but why not? They are nice people, give them $14 billion.

It is not that they are so great, these HMOs. People get the runaround. They do not get the care they need. People want their traditional Medicare.

Remember what I said. The bill I voted for in the Senate gave $6 billion to HMOs. I was not happy with that at all, but at least it gave $6 billion to traditional Medicare to help us do more prevention. Guess what happened. It is gone. The conference committee took it away. But they have added it on to the $6 billion already there. They added $6 billion that was going to go to Medicare. They put it in the HMOs, and they added $2 billion just in case it was not enough money for their friends.

Secondly, this bill benefits drug companies and HMOs. There is a gag rule on Medicare price negotiation. I talked a little bit about that before. Medicare has all of these clients. Think about the clout Medicare could have when they call a drug company and say that their drug X, Y, Z is a drug for arthritis and our patients like it; we are going to buy a lot of it for our patients; please give us a deal.

Oh, no, the conferees said, Medicare has a gag rule. Watch out. They may do it to the veterans next. The VA can bargain, but Medicare cannot bargain. The drug companies and the HMOs can bargain explicitly. They can bargain, and they can pocket some of the profits that they bargain, but not Medicare. Medicare cannot bargain. There is a gag rule on Medicare.

They will stand up on the other side and say: We are not trying to destroy Medicare; we think it is a great program. Just remember Newt Gingrich: Let it wither on the vine.

Seniors are expected to spend $1.6 trillion in prescription drugs over the next decade. By the way, there are a lot of pharmaceutical companies and a lot of wonderful research companies in my State. I have a great relationship with them. I support them getting an R&D tax credit; in other words, a tax credit for every penny they put into research and development. Why? Because I think that is important. I support their patents—reasonably support their patent rights. I support research through the NIH very strongly, and a lot of that benefits the drug companies as well. So I work very closely with my biotech companies, with my pharmaceutical companies, but, by God, I do not believe in giving them welfare.

Fourteen billion dollars? Is that because we have so much money? Is our deficit not big enough? It is only up to $500 billion in 2½ years or 3 years. Gee, we could do better. Why do we not make it $600 billion? Do I hear $700 billion?

I do not know what has happened, but it is not good. It took us 8 years to balance that budget. The other side said: We want a constitutional amendment to balance the budget. And our side said: Let's just balance it. Why do we need to amend the Constitution? Let's balance it. And President Clinton did that with us over 8 years.

Now it is gone. Now we have $14 billion to add to the deficit, and we are not going to let Medicare negotiate for us because, for whatever reason, they are tying Medicare's hand. I think it is because they want Medicare to wither on the vine. That is what Newt Gingrich said. That is the only thing I can come up with.

We know the cost of drugs could be lowered if Medicare negotiated those drug prices. One might say, well, maybe, Senator BOXER; that would be highly unusual for Medicare to negotiate with the drug companies. I would say, not at all. Medicare negotiates payments to hospitals. They have done that for years. When the bill left the Senate, there was no prohibition, but now there is. Why? Because they do not want the Medicare drug plan to be able to offer lower prices. They have given the right to negotiate to the private sector. They are going to push seniors into those plans.

Just remember where I started from. Just remember, ''wither on the vine,'' and ''follow the money.'' These are some simple concepts. At the end of my statement, just put a little ribbon and tie the bow and everyone will get the picture as to why we are going down a very dangerous path.

In this bill, we are going to be giving to HMOs payments above their stated cost to deliver service. Has anyone ever heard of anything like that in their entire life? A firm bids on a contract. They say: We can supply you with X number of widgets for a thousand dollars. On the dot, you get it. You deliver the thousand widgets, I give you $1,000.

Here, HMOs are saying: We can deliver health care for patients at a cost of X dollars per patient. In this conference committee, they said: Well, we are going to give them more money than they say they need. It is called a lot of different names, such as premium support. It is payment above and beyond what they said it would cost. So put together the slush fund and the payments above their cost of service and you are scratching your head, saying, maybe I ought to get into this business.

I say to people all over the country, small businesspeople who work hard in their business, be it retail or wholesale, you do not have a deal like this. You open up your doors, you go into business, and suddenly Uncle Sam is knocking on the door: Hey, I got a check for you HMOs, $14 billion over 7 years just to stay in the business; and, by the way, we love you so much, we are going to give you dollars above and beyond what you say it costs. And, by the way, no one will catch on. We are going to call these names different things. We are not going to call it a slush fund.

So the bill left the Senate. It was a good benefit, a decent benefit, but a modest benefit. It was not perfect, but at least it was a bill on prescription drugs. It came back a benefit for drug companies and HMOs. Somebody said to me there was a hostile takeover in the conference committee of the Medicare bill, that the Senate passed, by the HMOs and the prescription drug companies.

If we look at Wall Street, follow the money. Look at the prices of these stocks. They are going out of sight because people know this is a deal of a lifetime, that is for sure.

The last point I want to make is that this bill hurts our seniors. I am going to be specific. First, it hurts all our seniors, and in the end I am going to show you how it hurts my seniors in California, the largest State in the Union.

These are facts. We have gotten them from the staff that worked on this conference bill. Six million seniors will pay more for prescriptions than they do now. Let me tell you who these people are. Six million low-income and disabled beneficiaries currently receive prescription drug benefits from the Medicaid Program, which is a matching Federal-State program administered by the State. These programs are more generous in coverage than the proposed bill that is before us because they serve our very sickest Americans.

For example, a Medicare/Medicaid-eligible person in California can, but does not have to, pay a $1 per prescription copayment. The copayment is voluntary. A dollar may sound like zero, nothing, to people. But if you are an inch away from owning nothing, every dollar counts.

Under the conference bill the same person will now be required to make a copayment, maybe, up to $5. Some will pay premiums of $50 and be subject to a strict asset test. Studies have shown that even small copayments for prescription drugs can make essential medicines unaffordable for low-income seniors, resulting in an 88-percent increase in hospitalizations and deaths, and a 78-percent increase in emergency room visits.

So they say to my State, now you can't help these poorest of the poor. Sorry. They gave that a name, too, which we will get into later. They give it a nice name, but the bottom line is the people, the poorest of the poor, the States that help them can no longer help them once they get into this program.

The copayments to these poorest of the poor are indexed for inflation. So they can and they will go up. Remember, most of these people don't make any money. When you get hit with inflation and you are on a fixed income, that bites. That takes food off the table. So we know there will be an increase in hospitalizations. That was in the background information, that 88-percent increase in hospitalizations and deaths because people will not take their medicine.

States are prohibited from covering the out-of-pocket costs of these dual eligibles, and the bill prohibits States from establishing more expansive drug lists for the mentally ill, disabled, and other groups.

That is important. They may be taking a drug that isn't covered on this formulary.

I want to talk about people with AIDS. We have a high number in our State. People are suffering. Many of them are dual eligibles. They are eligible for Medicare disability and Medicaid. For them this bill is catastrophic. My phones are ringing off the hook with calls from them, their parents, their families. It is likely that they may not have access to or be able to afford all the drugs they need. So this is why this bill is opposed by the AIDS Medicare Project, San Francisco; AIDS Project, Los Angeles; Project Inform, San Francisco; San Francisco AIDS Foundation. But let's face it, it is not just AIDS patients who are going to be harmed. Anyone with a life-threatening illness runs the risk of not having coverage for the drugs they need. If they are denied coverage for these drugs under Medicare, they can appeal the decision, but this doesn't mean they can afford them.

So when it comes to my State, I will show you later the numbers of people who will be worse off. It goes in the hundreds of thousands—the hundreds of thousands.

Now there is a very cruel asset test. When I voted for the bill in the Senate that the Senator from Iowa worked so hard on with the Senator from Montana, that was a good bill. That bill would have allowed low-income seniors to receive assistance without forcing them to sell a car because it was worth over $4,500 or a ring that maybe was their most precious possession from their loved one or a family heirloom.

The conference bill imposes a Draconian asset test of $6,000 per person, $10,000 per couple, for the poorest of the poor. As a result, 3 million low-income seniors nationwide, and 300,000 in California, will be deprived of assistance that would not only help them with their prescription drugs but help them pay the premium so they could receive the coverage in the first place.

In other words, the bill that is before us has some generosity towards the poorest of the poor, but they have added an asset test into it so if you have a family heirloom or you own a car worth more than $4,500 or you have a diamond ring and a gold wedding band that your husband may have given you when you were married, you have to sell it. You have to get rid of it. Otherwise you don't get the benefit of this prescription drug benefit.

I don't get that. I am sad the conferees didn't go with the bill that most of us voted for in the Senate.

Now you come to seniors who are forced into demonstration projects that penalize them for staying in Medicare. That happens in 2010. You say we are just in 2003. We are almost in 2004—that is 6 years away, big deal. One thing I have learned, as long as I have lived, is that time goes fast. Six years will be here. If you are in one of those demonstration projects, what is going to happen is plain and simple: Your premiums are going to go up if you stay in Medicare—bottom line. Even though people say you are not forced into these other plans, the costs may force you into these other plans.

One in six Medicare beneficiaries will be forced to participate in this experiment. In California, 12 of its metropolitan statistical areas will qualify for these demonstration projects. Let's say two of the largest are chosen; one is in L.A. and the other is in San Francisco. So what we will have is my seniors in those areas will have to make a very tough choice. Do they stay in Medicare and pay more money or do they go into an HMO and lose the choice of their doctors?

We have already had some experimentation. We know the healthy people will choose the HMOs because they are cheaper. After all, they are healthy so they are not worried about getting messed up by an HMO. If they are not sick, you know, it is not a problem.

But the sicker seniors would be left in Medicare, and we know that we will see costs spiral out of control because there will be a sick pool of seniors, rather than spreading the risk, which is what insurance is all about.

Now we have a situation where premiums for middle and upper class people are going to go up. My colleagues say they are only going to go up if you earn $80,000 a year. I understand that is quite a bit. That is not that many people. But this is the problem. This number of $80,000 a year is not indexed for inflation. So it looks like it is a lot now, but in the future it will not look like it is that big.

For example, if this provision, the one that my colleague from Iowa supports, was in place in 1980, the equivalent level of income would be $33,000, and the person at that level would have to pay much more for their Medicare. So the fact is, they have done an interesting thing: They have not indexed this, so in the end you will have people of very moderate incomes paying huge premiums to Medicare.

Now what is going to happen? It will wither on the vine because people will say: I don't want anything to do with this. It is too costly. I don't need it. I will just go out and buy a catastrophic policy elsewhere.

I will tell you, if you take that fact, along with the fact that this bill sets up health savings accounts for the wealthiest people, you are going to have middle-income people and wealthy people walk away from Medicare, and you will lose the class you have when you have a larger pool. That is just a fact of life. That is why we have had a successful program—because insurance needs a very big pool.

I am going to put up a chart that I hope all of you who might be crazy enough to be watching this will remember. I know this isn't exactly prime-time television. But I want to

show you a chart of ''Fear and Confusion.'' This is a BARBARA BOXER homemade chart. This is the chaos and confusion that our seniors are going to be facing.

If any of you are watching this tonight, I am telling you to take note. I am telling you to call the AARP. Senator DURBIN gave you the number. I do not know it. I want you to take notes and ask them to explain each of these concepts they have endorsed in this bill. Then I want you to call everyone who votes for this bill, if this bill passes, and call your Senators and ask them to explain what all of this means. I am not going to tell you what it means tonight because we would be here all night. These are the terms that have been thrown around in this bill. You are going to have to understand this if you are going to understand what Congress is about to do to you. You will have to understand this.

Confusion and fear—some of them you know; HMO, you know that one. There is fear there, but it has nothing to do with the fact you don't know what Health Maintenance Organization stands for.

Risk corridors: I want you to learn what risk corridors mean; copayments, plan retention funding, MA-prescription drug plans, or MA–PD plans; donut hole. No, it is not what you buy in the store that is so good. I am on a diet. I haven't had one of them in a while. But a donut hole is something you had better understand because it is going to cost you when you get to it.

Here is another one: MA-Regions; catastrophic, premium support, assets test. I explained that one to you. That is one where you have to sell your wedding band, if you are poor, in order to qualify for getting your drugs free.

Average weighted premium; MSP, Medicare Secondary Payment; coordination requirements; initial coverage limit; CMS, you had better know that because the man who is the head of it is the one who is going to control the slush fund for HMOs.

Here is one which is kind of my favorite because I actually understand it: Claw back. That is a new word for you. That expresses what happens if you are a State and you have helped your poorest people pay for their Medicaid. You no longer can help them, but you can't keep the money. You have to send it to Uncle Sam. That is a claw back.

Transitional assistance, MSA. That stands for Metropolitan Statistical Area. If you are in one of those, you are forced into a demonstration project even if you do not want to be.

Benefit shutdown: This is one I know very well. After you buy a certain amount of drugs—around $2,000—you get a letter in the mail from your company that is giving you this drug benefit, and they say: Sorry, sir, your benefits shut down until you go past $5,100. Benefit shutdown is not a good thing.

Risk adjustment premiums—you all know what that means; Part D, income relating, SA-wraparound; national bonus payment. But don't get excited. It doesn't go to you. Comparative Cost Adjustment Program; Stabilization Fund—that sounds as if it is a good thing. If you are an HMO, that is the money you get to keep you in business.

I tell you, if something happens to me and I am not back here after my next election, which could happen to anybody, I am going to consider helping one of these big HMOs. I understand half of this. I may help them.

Medicare advantage competition, wraparound—we did that—MA-regional plans; MA-prescription drugs; annual out-of-pocket threshold. Watch out for that one. Annual out-of-pocket threshold is what you have paid for your drugs out-of-pocket before you can get the benefit. However, if your drug isn't on the formulary, it doesn't count. So don't count on it too soon.

Return disclosure: This has to do with your tax return. You are going to have your tax return sent to the IRS from the Health and Human Services Department if you are an upper income senior. They want to know what you earn. Before, Medicare never asked that because it is an insurance program. Now, do you know in this bill that the people who do not like taxes are making sure the IRS receives from the Health and Human Services Department information about your tax return?

Deductible: Again, very tricky. You have to understand that.

PDP sponsors, Prescription Drug Plan sponsors; monthly benchmarks. I am not sure about that one myself. But monthly benchmarks, we have to be careful about those.

Fallback: The fallback is in the prescription drug plan. In the Senate bill that I voted for, if you didn't have two plans come in to compete, you could always fall back to Medicare. Now it is basically one plan.

I told you about fallback. I went over all of it. MSP; average weighted premium—I think I pretty well went over this; coverage gap; plan retention funding.

The way I have done this chart, it looks kind of chaotic. It is to make a point. I don't even have half of the terms that are in this bill. I am going to work on this so that after the cloture vote when we have a little more debate, I will be able to get a better list.

But there is no secret why seniors are calling up our offices. They are smart. They are the smartest folks around. They have lived a long time. They are smart. They know what Newt Gingrich said: Let it wither on the vine. And then he endorses this. They weren't born yesterday.

The one thing I was interested in with C–SPAN is the people who were calling were Republicans and Democrats, and they all sounded alike. One out of 10 said they liked the deal. So this bill hurts seniors. We know that for sure.

Confusion and fear, large benefit shutdown, which is daunting and penalizes innocent seniors.

I told you before. You get to a certain point, and your benefits stop. A couple of thousand dollars, and then it starts up again at $5,000. Name for me one other drug program that does that. I checked it out. There are hundreds of them. Maybe there was one other that had a small benefit. I have never seen it. We don't have that in our plan. We just go in the pharmacy and give them our Senator's health card. We get a good deal. They never shut us down. Why should we shut you down? It is a bad thing. It is not right. If I was a local pharmacist, I would say to my seniors, I can do better than this plan. Come into my store, buy your drugs here, and I will give you a discount card.

Seniors will have to worry about filling out this form, filling out that form, is this drug on the formulary, and so on—fear and confusion. The bill hurts seniors.

Now we will look at what it does to my State's seniors. This is the direct impact on my State's seniors: 867,000 sick low-income seniors will have worse Medicaid prescription drug coverage. Boom. This starts in 2006 when 867,000 sick low-income seniors will have worse Medicaid prescription drug coverage than now.

Mr. President, 250,000 retirees will lose their more generous prescription drug coverage even after we give payments to the employers. I supported that. That was a good move. But even with that, they are dropping coverage once they know their retirees have another option. Wait until those people get the clue that is happening.

Years ago we passed a catastrophic medical bill and I remember seniors were attacking Congress people. Wait until they hear they get dropped—retirees who worked all their life, who like their plan and they get dropped. They do not have a choice. If they want prescription drugs they have to come with this plan. Wait until they have to deal with benefit shutdowns.

Mr. President, 296,000 fewer low-income seniors will qualify for low-income protections than under the Senate bill because of the assets test that I talked about and lower-qualifying income levels. The poorest of the poor—when compared to what we did in the Senate, the bill I voted for—are worse off. These numbers are huge because I represent a big State. And 230,000 Medicare beneficiaries will pay higher Part B premiums because they are upper middle income and wealthy. That will happen to them.

Also, because they are in the MSA or metropolitan statistical area, that

demonstration project, 1.4 million could be forced into them as we projected because we have the big metropolitan areas, or be penalized for staying in traditional Medicare because the people who are healthy will go into those private plans and the people who are sick will stay in Medicare and the costs will go up.

We have fear and confusion. I don't know how many of these figures are double-counted, so I cannot just add them up. Some of these figures may fit into more than one category, but I can state with certainty a couple of million of my 4 million people on Medicare are going to be worse off with this bill, much worse off. That is a very bad thing to do.

I don't know where the votes are. I think they have the votes to pass this. But if seniors across this country got a couple of days—there are about 48 hours to pick up your phone, call your Senator and say: Senator, maybe you are right. But this thing is confusing. I am fearful. Give me a little more time.

The bill was just printed and we saw it for the first time the day before yesterday. This bill is bigger than I am, and we got it the day before yesterday.

I have shared some of the new bureaucratic ''wordspeak'' in the bill and I have just had a couple of days to look it over. At the least, we should say to our colleagues, put this thing off. We are going to come back in January. This Congress goes 2 years. That is the beauty of it. If it was next year, the legislation would die. But we have 1 more year of this session. What is the rush? Tell your Senator, maybe Senator BOXER is wrong when she says this will hurt me. I am not sure, but she has raised some issues.

Change, if it is positive change, is something we all want. But change could be negative, could be disruptive, could cause us to be confused or fearful. What is the problem in taking a little while longer? To be honest, I would love to have the Christmas holiday recess to read every line of this bill. I started to do that. That is how I came up with all of these words, by reading the bill and trying to understand all of this. I did not even scratch the surface.

This Senate voted down an Energy bill which I felt, frankly, was in many ways a giveaway for a lot of special interests. And the good that was in it—and there were good things in it—was outweighed by the special interest provisions. We should be here for the public interests, for the people we represent.

I remember one of my colleagues saying to me, when someone asked a question about oncology, because there has been some concern about how the oncologists are being treated—someone in the room said, just look, there is a company being traded, a health care company that deals with oncology, and the stock is shooting up. It must be that oncologists are being treated fairly.

I used to be a stockbroker. It is not of any interest to me to do things that make the stock of a company go up. Do you know what I want to go up? The stock of the American people, the lives of the American people, the quality of life of the American people, the quality of life of grandmas and grandpas and their families.

This is truly not a partisan issue. It is an issue of how do we give a prescription drug benefit to our senior citizens and keep Medicare strong and not make this bill a giveaway to the largest HMO and pharmaceutical companies and insurance companies in the country. They are doing very well. This debate has been a good debate so far. We have serious disagreement. I am sure I will be back in the Senate after we have a cloture vote, one way or the other, just to add more terminology to my fear and confusion chart.

I know my colleagues on the other side of the aisle are waiting with bated breath to see my next version of this fear and confusion chart because I know they understand every single one of these terms. It is interesting to look at these terms and to realize how far reaching and how bureaucratic this new bill is.

I will say one last thing and then I will leave the floor, much to the delight of the Senator from Iowa and the Senator from Montana. I say to any senior citizen, any human being who is within the reach of my voice, and there may be a few at this late hour, if you feel we need more time to see whether Senator BOXER is right or Senator GRASSLEY is right or Senator BAUCUS is right or Senator KENNEDY is right or Senator DURBIN is right or Senator HATCH is right, if you think you need more time to take a look at this bill, to get this bill analyzed, this bill that weighs a lot, this bill that is over 600 pages, call your Senator, e-mail your Senators and tell them to take some more time, to put this thing over until after the first of the year and we can come back here and have the whole year to work on this bill, which is really rewriting the Medicare Program.

Thank you very much, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I think the place for me to start is where the Senator from California left off; that is, the impression that is left that this bill is going to confuse the seniors of America, and almost that the purpose of it might be to confuse seniors.

But let me make very clear to all the seniors who are listening, and everybody else who is listening, one of the keystones of this legislation is to say to the seniors of America: If you do not want to do anything, if you do not want anything to do with this, you do not have to have it. This is strictly voluntary.

For any senior in Iowa or California who comes to their respective Members of Congress and says: Congressman so and so, or Senator so and so, just leave my Medicare alone; I am satisfied, each of us can say to them: If you do not want to worry about all this that we are talking about—prescription drugs or anything new about Medicare—you do not have to because you can keep traditional Medicare as you have known it for the last 35 years. Just keep it as is, if you are satisfied with it.

But for those who might not be satisfied, we give them several options. They have a right to choose. They have a right to keep traditional Medicare with a prescription drug program that they can choose to go into, or they also have the right to choose a new Medicare—preferred provider organizations—that is very close to what baby boomers now have in the workplace. They can choose that with an integrated drug benefit plan.

So we are not trying to confuse anybody. We are trying to give seniors the right to choose. We are trying to give seniors who are totally satisfied with what they have right now an opportunity to just stay where they are right now. It is the right of seniors to choose.

I think I better be very clear because so much of the opposition to this bill today has come from the other side of the aisle, mostly Democratic Members of the Senate.

We are here today with a piece of legislation because over the years 2001 and 2002—after Senator JEFFORDS switched from being a Republican to being an independent and casting his lot with the Democrats, so they were a majority during the remainder of 2001 and all of 2002—there was an effort early on to develop a bipartisan approach to a drug benefit during the last Congress.

When that was developing, there was a fear that there might be a bipartisan bill reported out of the Senate Finance Committee, a year ago, and the then-majority leader, now the minority leader, Senator DASCHLE, decided that this was an issue that ought to be brought to the Senate floor, not worked out in committee.

Remember, you develop bipartisanship in the Senate in the committee. You do not do it very often here on the floor of the Senate. You build coalitions.

Remember, nothing gets done in the Senate that is not bipartisan—unlike the House of Representatives, where partisan things can be done—because, remember, the Senate of the United States is that only institution in our political system where minority rights are protected.

So a year ago, the then-majority party decided that this ought to be debated on the floor. But they also knew that it would be impossible to get the bipartisan majority that it takes to get things done. They gambled that they needed an issue for the last election rather than a product. They gambled on an issue that we would not do anything last year, and the way they maneuvered this, nothing was done because nothing in a partisan way, even by majority Democrats, can be produced out of this body that is not somewhat bipartisan.

Then there was an election, and they found out that issue did not work for them; that Republicans were put in a majority. This gave, in this new majority, in this new Congress, Senator BAUCUS and I, the top Democrat and the top Republican on the committee, an opportunity to do our magic and put together a bipartisan bill. That bill came to the Senate floor and was passed 76 to 21. It went to conference, and came out of conference in a bipartisan way. And we are here because the majority Republicans and some sensible Democrats want to produce a product and not have an issue for the next election. I happen to think, from the comments I have heard today—all the fault that can be found with this bipartisan product—that there are still too many people on the other side of the aisle who have not learned a lesson: No. 1, how do you get anything done in the Senate? It has to be bipartisan. And, No. 2, they did not learn from the mistakes of the last election when they thought they needed an issue. Do they think if it did not work in 2002, it is going to work in 2004?

So that is why we are where we are because there are Democrats who know that you do not get anything done in the Senate if there is not a bipartisan coalition. There are Republicans who have understood that for a long period of time.

So that is background to what I want to tell the people of America and my colleagues about why this bill should be adopted. During this process, I am going to correct some of the statements made by my colleagues so far today.

I want to correct what my colleague from Iowa said earlier about this bill's impact on rural America and on our State of Iowa in particular.

The rural health provisions of this bill go further and wider than any other legislation that this Congress has ever considered. It enjoys the strong support of the Nation's doctors and hospitals, and it is also strongly endorsed by the Iowa Medical Society and by the Iowa Hospital Association, two of the strongest advocates for rural equity in my State and my colleague's State.

I will read an excerpt from each and then ask unanimous consent that both letters be printed in the RECORD.

This is from the Iowa Medical Society president, Tom Evans, M.D.: ''[P]assage of the bill,'' meaning the bill before us, ''is critical for rural states like Iowa.'' ''He said: ''In addition to providing seniors with prescription drug coverage''—and I want to emphasize this part of his statement—''this legislation fixes many of the reimbursement issues that have unfairly penalized rural States. Congress must pass this legislation before the Thanksgiving [Day] recess.''

Now, I go to the Iowa Hospital Association, which in 2001 circulated statistics, already referred to, showing Iowa in last place in per-beneficiary spending. The Iowa Hospital Association: ''The Iowa Hospital Association strongly endorses passage of this legislation.'' ''In an evaluation of the per-beneficiary increase, this legislation provides Iowa hospitals with the second largest percentage increase per Medicare beneficiary of any state in the Union. This amounts to a per-beneficiary increase of $583, which is the thirteenth highest increase of any state in the Union.

Mr. President, beyond those quotes, I could give a lot of evidence, but I think those quotes speak volumes about our rural package. That package in this legislation speaks for itself. It brings real improvements and equitable payments to hospitals and doctors in Iowa and way beyond.

I ask unanimous consent to have these letters printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IOWA HOSPITAL ASSOCIATION
Des Moines, IA, Nov. 20, 2003.

Hon. CHARLES GRASSLEY,
U.S. Senator, Hart Senate Office Building Washington, DC.

DEAR SENATOR GRASSLEY: Congratulations in reaching an agreement on a conference report that directly and significantly impacts the issue of equity and fairness for hospitals and physicians in rural America and particularly for Iowa. Just this morning, the entire Iowa Hospital Association Board was briefed on the impact of your Medicare legislation and on a unanimous vote endorsed the pending legislation.

In an evaluation of the per-beneficiary increase, this legislation provides Iowa hospitals with the second largest percentage increase per Medicare beneficiary of any state in the Union. This amounts to a per-beneficiary increase of $583, which is the thirteenth highest increase of any state in the Union.

The Iowa Hospital Association strongly endorses passage of this legislation and will today ask its entire membership to weigh-in on behalf of the legislation with the entire congressional delegation of Iowa in an effort to support your work to achieve passage of this legislation before the Thanksgiving holiday. It is our hope that when Congress completes its work and you return to Iowa for the holidays, that all Iowa providers will have an opportunity to congratulate you for successful passage of this historic legislation.

Sincerely,
KIMBERLY A. RUSSEL,
IHA Board Chair.
KIRK NORRIS,
President/CEO.

IOWA MEDICAL SOCIETY STRONGLY SUPPORTS PASSAGE OF MEDICARE REFORM LEGISLATION

The Iowa Medical Society (IMS) announced today its strong support for the Medicare Prescription Drug and Modernization Act of 2003 conference report.

IMS President Tom Evans, MD, said passage of the bill is critical for rural states like Iowa. ''In addition to providing seniors with prescription drug coverage, this legislation fixes many of the reimbursement issues that have unfairly penalized rural states,'' he said. ''Congress must pass this legislation before the Thanksgiving recess.''

Evans said the bill protects Iowans' access to physicians by replacing a 4.5 percent payment cut scheduled for 2004 with two years of modest payment increases. The bill also fixes a component of the reimbursement formula that deals with geographic practice cost adjustors that causes huge reimbursement swings from state to state.

''If this legislation isn't passed, the American Medical Association estimates that a 4.5 percent cut in reimbursement will take $30 million away from Iowa's health care system in 2004,'' he said. ''Now add to this the fact that Iowa already receives among the lowest payment rates in the country, and you can see how Medicare is threatening our ability to care for our patients.''

Evans also thanked Senator Charles Grassley for his work on this bill as Chair of the Senate Finance Committee, and he urged Iowa Senator Tom Harkin and Iowa's Congressional Representatives to support the Medicare conference report.

The Iowa Medical Society is the professional association representing over 4,600 MDs and DOs. The IMS core purpose is to assure the highest quality health care in Iowa through its role as physician and patient advocate.

Mr. GRASSLEY. Now let me speak to what this bill does for Iowa's seniors. The bipartisan agreement provides all of the 485,042 beneficiaries in Iowa with access to Medicare prescription drug benefits, as I have stated previously, on a voluntary basis. It does it for the first time in the history of the Medicare Program. That begins January 2006. Beginning in 2006, the bipartisan agreement will give 142,297 Medicare beneficiaries in Iowa access to drug coverage they would not otherwise have and will improve coverage for many more.

Within 6 months after this bill is signed—in other words, during the year 2004—Iowa residents will be immediately eligible for Medicare approved prescription drug discount cards which will provide them with savings between 10 percent and 25 percent off the retail price of most drugs. Beneficiaries with incomes of less than $12,123, or $16,362 for couples, who lack prescription drug coverage, including drug coverage under Medicaid, will get up to $600 in annual assistance to help them afford their medicine along with a discount card. That is a total of $100,840,345 in additional help for 84,034 Iowa residents during these years of 2004 and 2005, as this interim program is in place, helping Medicare recipients with drugs

until we get the permanent program put in place. Then beginning in the year 2006, all 485,042 Medicare beneficiaries living in Iowa will be eligible to get prescription drug coverage through a Medicare approved plan.

In exchange for a monthly premium of about $35, seniors who are now paying the full retail price for prescription drugs will be able to cut their drug costs roughly in half. In many cases, they will save more than 50 percent on what they pay for their prescription medicines. One hundred thirty-three thousand beneficiaries in Iowa who have limited savings and low incomes—and this would generally be those below $12,000 for individuals and $16,000 for couples—will qualify for even more generous coverage. They will pay no premiums for their prescription drug coverage, and they will be responsible for a nominal copayment. That copayment would be no more than $2 for generic drugs and $5 for brand name drugs.

We have 41,300 additional low-income beneficiaries in Iowa with limited savings, and incomes below $13,500 for individuals and $18,000 for couples, qualifying for reduced premiums and a reduced deductible of $50 and a Medicare that will cover 85 percent of their prescription drug costs with no gap in coverage.

Additionally, Medicare, instead of Medicaid, will now assume the prescription drug cost of 50,000 Iowa beneficiaries who are eligible for both Medicare and Medicaid. These seniors generally will pay $1 and $3 per prescription and those in nursing homes will pay zero dollars for their prescriptions. This will save Iowa $175 million over 8 years on prescription drug coverage for its Medicaid populations.

I have tried to address for my colleagues, but particularly for my residents and constituents in Iowa, how this program will impact them as individual beneficiaries of the prescription drug part of our bill. And I have tried to inform my colleagues and my residents of Iowa how the rural equity package will help provide quality care for Iowans because we are increasing the reimbursement for our hospitals and for our doctors in rural America.

Now I will address several of the most egregious misconceptions about the bill that have been spoken on the floor of the Senate today. First, I will address the issue of protecting retiree drug coverage. This would be those people who have, for the most part, coverage from places where they used to work that also continue to cover people with health benefits and prescription drugs after they leave employment.

During the debate on S. 1, when this bill passed the Senate the first time in June of this year, it passed by a 76-to-21 bipartisan vote. At that time, even though we had that high bipartisan majority, my colleagues raised concerns about what they referred to as the high level of employers that would drop their retiree prescription drug coverage should we enact the prescription drug benefit into the Medicare Program.

At that time, the Congressional Budget Office told us that 37 percent of the seniors who have drug coverage—that is roughly one-third of the seniors under Medicare—would lose that coverage if we passed the bill. I think I ought to say that there was another group, the Employer Benefit Association, that studied the same issue and said it would be 3 percent to 9 percent who would lose coverage. So we probably have an intellectually honest difference of opinion by the Congressional Budget Office on the one hand and the Employer Benefit Association on the other hand. But we in the Congress are stuck, as we determine the cost of programs, with what the Congressional Budget Office says. We would rather—and it would be easier—if we could just go by what the Employer Benefit Association says, but we go by CBO because they are God when it comes to saying what something costs. So we had to live with that 37 percent.

Well, as we all know, however, employers have been dropping or reducing prescription drug coverage for many years. So this is really nothing new. If we were not even talking about this bill today, some board of directors of some corporation in America could come to the conclusion that they couldn't afford to cover their retirees anymore and drop them. What could Congress do about that? Nothing. But it is nice to have a program when that happens for people to fall back on. That is one of the reasons for this legislation.

Of course, we want to take care that we can do everything possible to make sure that corporation X doesn't do that. In just the past 2 years, retiree health care coverage has dropped by 22 percent. That was with this Congress not doing anything, not considering this legislation.

We know these days employers are finding it harder and harder to continue to voluntarily provide health insurance coverage. That is due to a lot of factors, including rising health care costs overall. Now, as we were in conference between the House and the Senate, we took this marketplace dynamic of company XYZ, ABC, or whatever corporation—that they could do this. This is a dynamic we had to take very seriously. So we went to great lengths to improve employer participation in drug benefits to keep employers in the game; to keep their retirees covered, as retirees would expect to be covered, but sometimes they are surprised when they are not.

Our conference report reflects this. It includes remarkably better policies for employers than those that were in either the bill that passed in the Senate 76 to 21 or that passed the House in June as well. So I am saying to you we brought back a conference report that was better in regard to employee-retiree coverage than either passed the Senate or the House in the first place.

So what happens when we do that good work? The policies in this conference report have led to major corporate plans endorsing our conference report. So the people on the other side of the aisle, with their charts, who are saying bad damage is being done by this legislation, what would they have us do? Pass nothing? If corporation X decides to drop, and there is nothing there for their employees, do you think those same people are better off if Congress does zilch? Where were they when they voted in the first place, complaining about S. 1 or H. 1, the House bill, when we passed them in June?

Here we are bringing back a conference report that is being endorsed by these corporate plans. Doesn't that mean anything to any of you? Under this conference report, employers will be given an enormous amount of flexibility and options—employers that already provide retiree benefits beyond Medicare coverage. This legislation will help make it more affordable for these employers to continue providing these benefits. We do that by a direct subsidy worth 28 percent of their drug spending between deductibles and the coverage gap.

I should add, too, this conference report makes this 28 percent completely excludable from taxation, so that instead of doing 65 percent good because of a 35 percent tax bracket that corporations are in, it does 100 percent good, bringing down the number of people who might lose coverage.

Now, some people would say, what is this corporate welfare all about—Congress giving money to corporations to do something they have been doing forever. Some people might say, well, when you buy a Chevrolet, you pay for these retirement plans. How many times do you have to pay for them? You pay for them when you buy a car and when you pay a 28 percent subsidy. We are cautious about the fact that some do that.

So I tell my colleagues over there—each of them who are complaining about this—this 28 percent subsidy is something you ought to be glad to have. Sometimes when we give corporations something, you condemn us for giving corporations something; but you cry when we do it and you cry when we don't do it because they might dump their retirees. In the final analysis, we are also doing it to protect the taxpayers and the Medicare Program because it is better to encourage these employers to keep their retirees in these plans at a 28 percent subsidy, which is about $750 per person, instead

of having those corporations dump those plans on the Medicare Program, and it is going to cost about $1,250. So that is why we do that.

Now, besides this 28 percent help, we also say that employers can use the flexibility this legislation provides to structure plans that complement Medicare's new drug benefits and provide them even enhanced benefits for their retirees. They can even do better than they are presently doing because of this flexibility we have in the legislation.

These new choices and options will do much more to help and, consequently, not threaten employer-sponsored health care coverage for those who currently receive it.

In fact, the Congressional Budget Office now estimates that the so-called drop rate—in other words, the rate by which corporations will drop their retirees—is now 17 percent because of the changes that were made in conference. In other words, we listened to our colleagues over there complain about a 37 percent potential drop rate because of the way S. 1 was written. But it goes to conference and it comes back from conference with, instead of 37 percent, 17 percent, and you folks are still complaining. I don't understand it. And these 2.7 million retirees will still be better off with Medicare coverage, likely paid for by their former employees. In other words, the 2.7 million people who would have been dropped, according to CBO, because of what we did in the conference—that is better than either bill when first passed in June; 2.7 million people are still going to be in their corporate retiree plan.

So I say to my colleagues—I hope you hear this—we have come a long way since June, when 76 people, in a bipartisan way, voted for this. Half of you over there voted for it. I believe company plans have a lot to be happy about under this conference agreement.

All seniors deserve health care benefits. All seniors deserve access to prescription drug programs. This compromise between the House and Senate provides that, and it makes certain that good sources of existing coverage remain intact. I urge my colleagues to embrace the strong employer provisions we have agreed to and vote for this conference report.

We have also heard from a lot of them over there that somehow we are trying to privatize Medicare. How many times do I have to say it? This program is voluntary. Nobody has to go into anything in this bill if they don't want to. If they want to keep traditional Medicare, keep it. But this issue has been brought up. Do you know why? Because these folks over there, my colleagues over there—every one of them—like to scare seniors. You know, it is called Medicare, but you like to make Medicare into ''medi-scare.''

You know, it is easy to scare seniors. I have my town meetings around Iowa. I hold town meetings in each of the 99 counties every year so I can keep in touch with my constituents. There are people—the older, the more so—but seniors come up to me and they actually believe what is said on that side of the aisle when people say somebody is going to take their Medicare away from them. They believe that ''medi-scare.''

They are really nervous. Some of them even have tears in their eyes. I tell them, if you just knew as seniors how you have a hook on Congress, that Congress is scared to death of you, you would be laughing at me instead of being scared of something we might do. That is how the concerns of the seniors of America are taken into consideration by people in the Congress of the United States.

Maybe we ought to have a little more of an independent view than be so concerned about the electoral power of the seniors, but they have tremendous influence on Congress. Maybe some people say too much influence. Regardless, it is wrong for people over here to ''medi-scare'' our seniors.

I wish to address this issue of privatization, but the easiest answer is that if you are satisfied with what you have—traditional Medicare—don't worry. Also, if you like other provisions in this bill, they are voluntary. You don't have to do them.

This bill before us today brings Medicare into the 21st century practice of medicine. It does not privatize traditional fee-for-service Medicare. Overall, this conference agreement relies on the best of the private sector to deliver drug coverage, supported by the best of the public sector to secure consumer protections and important patients' rights. This combination of public and private resources is what stabilizes the benefits and helps keep costs down.

Seniors will be able to purchase prescription drug coverage on a voluntary basis as part of Medicare's traditional fee-for-service program or be part of a new Medicare-approved private plan where the drug benefit is integrated into broader medical coverage. These Medicare-approved plans have the advantage of offering the same benefits of traditional Medicare, including prescription drugs, but on an integrated, coordinated basis. This creates new opportunities for chronic disease management and access to innovative new therapies.

Let me comment on chronic disease management. That is very important if we are going to keep costs down in the future. We won't have to squeeze seniors at all. In fact, seniors will have a better quality of life under chronic disease management because 5 percent of the seniors are responsible for 50 percent of the cost of Medicare. The reason for that is that we only pay doctors to make people well after they get sick. We never pay enough to keep them well in the first place.

We can concentrate on this 5 percent in chronic disease management, and by so doing, we are going to provide a better quality of life because they will not be in and out of the hospital as much, and we save money there. But also their quality of life is going to be better, and it protects the taxpayers in the process and preserves the longevity of Medicare.

Unlike Medicare+Choice, we set up a regional system where plans will bid in a way that doesn't allow them to choose the most profitable cities and towns. Cherry-picking cannot take place. Systems like this work well for Federal employees, such as the postmaster in New Hartford, IA, my hometown. He has a choice of several plans. We want to give that same choice to his parents who today only have traditional Medicare. They have no right to choose.

We provide an alternative plan for people who want to try something new, something that is probably close to what baby boomers have for health plans where they work. We have set up preferred-provider organizations. Are they right for everyone? We give seniors the right to choose. Our bill sets up a playing field for preferred-provider organizations to compete for beneficiaries. We believe preferred-provider organizations can be competitive and offer a stronger, more enhanced benefit than traditional Medicare, assuming seniors want to choose that. They have that choice.

Let me be clear, no senior has to go into a preferred-provider organization. My policy has always been to let seniors keep what they have if they like it with no changes. All seniors, regardless of whether they choose a PPO or not, can still choose prescription drug coverage if they want to, to go along with their traditional Medicare, but it is their right to choose.

I can't mention preferred-provider organizations without correcting the record regarding the preferred-provider organization stabilization fund that the other side has called a slush fund. It is no slush fund. It is something that those of us who live in rural America know we have to have. We learned a lesson from Medicare+Choice because in 1997, I worked hard to bring greater reimbursement to rural America through Medicare+Choice so that people in Iowa would have the same options that 40 percent of the people in Miami have chosen: to go into an HMO. It is a voluntary choice. If they don't like it, they can get out tomorrow. Get in today; get out tomorrow. In rural America, we enhanced greatly the reimbursement for them, but they have not come because of cherry-picking.

We want the preferred provider organizations to serve all of America, rural

as well as urban. The stabilization fund is so those of us in rural America have an opportunity to get the same benefits as people in New York City or Los Angeles or Miami.

The bipartisan agreement on a final Medicare bill establishes this stabilization fund. It was not in the Senate bill. Some people say the Kyl provisions were similar to that, but Senator KYL will tell you he had a whole different idea in mind. His idea is not even in this bill, but we did take a stabilization fund to accomplish something he wants to accomplish. He wants his entire State of Arizona to be served by PPOs, not just Phoenix. We did this in an effort to expand access to private health plans in all areas of the country and, additionally, to maintain existing health care choices in areas where health plans face particularly difficult challenges.

My colleagues on the other side who find fault with this conference report are always talking about this slush fund as benefiting some organization's profit motive.

Every one of them has rural areas. My colleagues ought to want the people in the rural parts of their State to be served the same way as people in the urban parts of the State.

The reality is that this is not a slush fund, but it is to help beneficiaries have equal services, whether they live in rural America or urban America, and that will be helped by this stabilization fund. It is targeted and its plans are held accountable. Resources will be distributed from the stabilization fund only when specific conditions are met. Moreover, in instances where these conditions are met, then health plans will be accountable for using these funds only to promote affordable health coverage to beneficiaries, not for profit. Under no circumstances will plans then be permitted to use these funds to pad their bottom line.

It expands choices and ensures access in rural areas. The fund is designed to expand and preserve beneficiary choices and benefits in areas where it is most difficult to provide private health plans and to get them to participate in this program.

The stabilization fund will ensure that millions of additional beneficiaries, including many in rural areas, will have access to health plans offering high quality, comprehensive benefits, and low out-of-pocket costs. If the stabilization fund is not successful, the worst case scenario is that the funds will be returned to the U.S. Treasury.

Now I will speak about the accurate explanation of how this bill helps low-income seniors. We did something in the conference report that the House did so the Senate receded to the House on this point, and that is where we in the Senate decided to leave dual eligibles who were covered by Medicaid. That is the way it passed the Senate. The House wanted to have one program for seniors, a totally Federal program, so dual eligibles in the House bill were taken away from Medicaid and put in Medicare. We accepted what the House wanted to do, as a matter of equality I suppose. We had other motivations for doing it in the Senate.

In fact, most of the support for doing that—that was one of the shortcomings that Democrats said about the Senate bill in June. Now we are hearing complaints from them about aspects of this dual eligible, how it impacts seniors, particularly on asset tests. That is one of the reasons we tried to avoid putting dual eligibles under Medicare in the Senate bill, because we wanted asset tests to be the same for this group. Now they are complaining, I think inaccurately, which I will prove in a minute, about it negatively impacting people with less coverage than they presently have.

We have heard from the other side how 6 million low-income eligible seniors will be worse off under this conference report. That is inaccurate. It is a lot of talk, and I want to tell the American public the truth about this issue. Beneficiaries are not hurt by this bill. They are helped. This bill provides generous predictable coverage to 6.4 million dual eligibles, but it does not stop there. It provides coverage to an additional 7.7 million low-income seniors. Madam President, 14.1 million seniors are eligible for low-income subsidy, nearly 36 percent of Medicare beneficiaries.

So who are these dual eligibles? They are the 6.4 million who are enrolled in both Medicare and Medicaid.

This conference report for the first time provides drugs to dual eligibles through Medicare rather than Medicaid. This is a great help for the States that have budget problems, and Medicaid is a growing, biggest part of State budgets.

As I said, the Senate bill left dual eligibles in Medicaid. That policy allowed the Senate to provide generous coverage for low-income seniors. S. 1 focused on providing drug coverage to seniors who did not have any coverage whatsoever, and duals did have that coverage. So in the spirit of compromise, the Senate conferees changed the policy in the Senate bill.

The conference report provides prescription drugs for dual eligibles through Medicare. It is not exactly the same, but in general policy it is the same way they were treated in the House bill. Providing drugs for dual eligibles through Medicare was a cornerstone issue for House conferees.

The conference report covers duals in the Medicare Program. The coverage is designed to benefit as many low-income seniors, including duly eligibles, as possible, given the budget constraints of $400 billion in our budget.

This bill comes out at about $395 billion. Blanket statements about the reduction of benefits for the dual eligibles in the conference report are not accurate. We have heard some of those inaccurate statements this Saturday as we have debated this bill. This bill is generous and does not leave 6.4 million seniors worse off. I will bet tomorrow those over on the other side will be putting those signs up again that say that. Well, don't do it.

For instance, unlike the Senate bill or the current Medicaid Program, the conference agreement does not have cost sharing above the catastrophic limits for the dual eligibles. That is right. There is no cost sharing. I hope my colleagues on the other side get that.

I will put this in perspective, then, from the State level. According to the Kaiser Family Foundation, the Commonwealth of Massachusetts currently charges $2 for every prescription filled by dual eligibles. There is no catastrophic limit for duals in that Medicaid Program in that State, just a requirement for beneficiaries to pay $2 for every single prescription.

Like many Medicaid Programs, this bill establishes copayments for a majority of the dual eligibles who are either equal to or less than those required by most State Medicaid Programs. So let's get that straight. These copayments are no more than, and in some cases less than, those required in most State Medicaid Programs.

More specifically, today 25 States have copayment levels for generic and brand-name drugs set at $1 or higher for dual eligibles enrolled in their Medicaid Programs. In this conference agreement, dual eligibles with incomes below 100 percent of poverty will be responsible only for a copayment between $1 and $3 for their Medicare drug benefit. Taking a step back, it seems to me that this level of cost sharing is very similar to what the duals pay for in Medicaid coverage.

In fact, in South Dakota, duals pay $2 per prescription. That policy is on par with the coverage offered through this bill. This conference report contains a generous drug benefit, then, for dual eligibles. There is no donut, or no loss of coverage, no gap in coverage, for low-income Medicare beneficiaries. But my colleagues on the other side would lead us to believe otherwise.

The bill guarantees all 6 million dual eligibles access to prescription drugs. Under the conference report, dual eligibles will have better access through Medicare than they do today, specially since State Medicaid Programs are increasingly imposing restrictions on patients' access to drugs because of budget problems that 45 of our 50 States have.

Further, States have the flexibility to provide coverage for classes of drugs, including over-the-counter

medicines that might not even be covered by the Medicare Program.

This bill ensures appeal rights for dual eligibles. Under the agreement, duals will maintain appeal rights, such as those that they presently have in the Medicaid Program. The dual eligibles are a fragile population and are well taken care of in this bill. The conference report recognizes and provides generous coverage to these 6 million beneficiaries and in fact goes further by providing full drug coverage to 7.7 million more low-income seniors.

So I turn now to highlighting what this bill does to protect Medicare in the long run. I have heard some Members trying to assert that this $400 billion expansion of one of the most successful social programs in our country's history is going to destroy traditional Medicare; you have said it, ''Medicare as we know it.'' That is another one of your ''medi-scare'' tactics.

I know Members are tired. I know we are nearing the closing of our first session of the 108th Congress. Many Members are using these wornout lines because they would rather not take a serious look at the bipartisan Medicare agreement we put together and really assess whether or not those scare tactics are true. I am here to tell all my colleagues and the people of this country that the allegations that this Medicare bill destroys traditional Medicare are falsehoods.

This Medicare bill strengthens and improves traditional Medicare in a number of ways. We are not talking about just Medicare as it has been for the last 38 years. We are talking about some improvements we made in traditional Medicare that seniors will have the choice, the right to choose to stay in if they want to. I will discuss just three.

First, we add new preventive program benefits. For the first time ever, every new Medicare enrollee will receive a ''Welcome To Medicare'' physical; they go to the doctor when they go into Medicare, get a benchmark physical. Hopefully, nothing is wrong. But if something is wrong, we know about it right away and it is part of our effort to see that we zero in on keeping people well, as opposed to waiting until they get sick and it costs a heck of a lot more. It is part of our program, of a quality of life for our seniors. It is part of our program of zeroing in on the 5 percent of the people who, because of not having chronic care management, are costing us 50 percent of the total costs.

Seniors are going to have physicals that will help them—maybe their lifestyle, like getting their weight checked, but more seriously, the heart; receive cancer, diabetes, and bone mass screenings. It is very important to have an initial physical because, as we say in Iowa, an ounce of prevention is worth a pound of cure.

Consider these statistics. In 2000, 6.2 percent of the U.S. population had diabetes. Heart disease and stroke are the first and third leading causes of death in the United States. In 2003, 1.1 million Americans will have a heart attack. Diabetes, heart disease, and other chronic conditions exact an awful toll on our seniors. By getting an initial physical, seniors can get valuable information on their health status. They can enroll in weight loss programs, start a blood pressure medicine, or know whom to call if something goes wrong.

We have also eliminated the deductibles and the copays on screening tests for heart disease and diabetes, so beneficiaries do not incur any costs. There is an extent to which that cost today may inhibit them or divert them from having needed tests, so this is an additional incentive, particularly for those with limited resources who might not otherwise access these benefits. Adding preventive benefits is just one way we have improved traditional Medicare.

A second way we have improved the fee-for-service program is by providing access to disease management. It is a common option available to younger people in health insurance. If you have a chronic health condition such as heart disease, diabetes, asthma, you can get extra help managing your condition. You may be taking a lot of medications and seeing several doctors. Disease management programs help patients take responsibility for their health care and better control of their lives, but they also involve health professionals in that process, to aid you.

When this Medicare bill becomes law, seniors with access will have access to these services. It will be a voluntary program and one that will improve the quality of life for millions of Medicare beneficiaries.

Another improvement is this bill provides an additional $25 billion for rural health care providers. That is new money to strengthen our Nation's hospitals, physicians, ambulance riders, and dialysis clinics, just to name a few. This is the biggest funding boost Congress has ever passed for our rural health care system. This is going to help fee-for-service, traditional Medicare because in some places in this country there is not an adequate number of health care providers. Providers in rural States such as mine, Iowa, practice some of the lowest cost medicine in the country. Yet health care providers in rural areas lose money on every Medicare patient they see. This Medicare bill takes historic steps toward correcting geographic disparities that penalize rural health care providers.

So when I hear people in Washington say this bill is going to destroy traditional Medicare, I suggest that each of them take a closer look at this legislation. Providing new preventive benefits, allowing seniors to access state-of-the-art disease management programs, and mending the rural health care safety net will help millions of seniors with these three important ways we are strengthening Medicare.

I would like to turn now to a subject that is important to me, to the taxpayers, and to the seniors, and that is the issue of curbing waste, fraud, and abuse. You just read in your news releases from HHS, $11.5 billion of waste, fraud, and abuse within health care. If we can save that money, we are going to make Medicare strong for a long time in the future.

When it comes to reimbursements for many of the items and services that Medicare covers, the price, historically speaking, has not been right. That goes, for instance, for doctors and hospitals in rural areas who are paid too little, and some drugmakers and equipment suppliers, to name a few, who are paid too much.

This conference agreement makes great strides toward correcting both the underpayment and the overpayment that plague the Medicare Program. I have already talked about the underpayments to rural States such as Iowa and how this bill corrects that through the $25 billion of new money we are injecting into making Medicare reimbursements equitable.

But I want to talk now about just the opposite. There are overpayments in Medicare. Overpayments eat away at Medicare's reserves, eating away at its solvency slowly, like a cancer. Overpayments are bad for taxpayers, they are bad for beneficiaries, both of whom deserve to pay a fair price. In certain areas of Medicare, in many payment systems there are few fair prices.

Fee schedules pay too much, providers play games with complex rules and regulations, and beneficiaries pay a higher copay as a result. The sad fact is that Medicare's price is often far higher than the marketplace price. This conference agreement begins to change that in significant ways.

My colleagues should read title III of the conference report, and that is entitled, ''Combating Waste, Fraud, and Abuse.''

Our bipartisan initiative in this bill will end overpayments, reduce fraud, and cut down on opportunities for abuse to the tune of $31.3 billion as scored by the Congressional Budget Office. That is significant.

These measures in this bill directly reduce Medicare's spending on overpriced, wasteful, fraudulent items, and services to the tune of $31.3 billion over 10 years.

Throughout my time in Congress, I have worked hard to combat fraud and waste in Federal programs. In 1986, I successfully passed False Claims Act improvements that give whistleblowers new rights and protections under Federal law. In just the last year alone,

civil fraud recoveries have tallied a record $2.1 billion, the Justice Department announced just last week. This is a 75-percent increase over the prior years' recoveries of $1.1 billion, and brings total recoveries to over $12 billion since I got that bill passed. Of the $2.1 billion, $1.4 billion is associated with suits initiated by whistleblowers.

While the False Claims Act is one of our best weapons in the war on fraud and abuse, our policies in this new language of the title III conference agreement adds still more weapons to our arsenal.

First, we make important technical clarifications to existing law that strengthen and improve what is known as the secondary payer statute. The purpose of the statute is to ensure that Medicare pays first for seniors' medical needs when other sources should be, in fact, paying instead of the taxpayer paying.

These other sources include, for instance, employer coverage. In addition, when a Medicare beneficiary is injured by wrongful conduct of another entity, that entity's liability insurance or the entity itself, if it has no insurance, or it might be self-insured, is always required to pay first instead of having the taxpayers pay. The provisions in title III do not change existing law in this area but, in fact, clarify the intent of Congress in protecting Medicare's resources.

According to the Congressional Budget Office, these clarifications alone promise to restore Medicare over $9 billion out of that $31 billion.

Second, we change the way Medicare pays for durable medical equipment, first by slowing the spending growth in these areas for 3 years, and then by instituting a competitive mechanism that will deliver a fair market price for seniors.

While I have concerns about the impact of such a new system on very many small businesses across America, the supply of high-quality equipment especially in rural areas, I am confident that good protections are in this conference agreement for small business and for our seniors as well.

The Congressional Budget Office estimates that these changes will save Medicare $6.8 billion out of that $31 billion.

Next, title III institutes what we call market pricing mechanisms for drugs administered in the doctors' offices that both the Office of Inspector General and the GAO have concluded are priced far higher than their actual costs.

In addition to the financial toll these overpayments take on the taxpayers, they also affect Medicare's beneficiaries who are often required to pay dramatically higher copayments for the drugs they rely on. In some instances, these copayments can even exceed the actual prices the doctors paid for the drug.

In recommendations to Congress, the GAO urged Medicare to take steps to begin paying doctors for Part B-covered drugs and related services at levels that reflect the doctor's actual acquisition costs—not some inflated cost. And they use information about actual market transactions prices to bring that about.

I am pleased that our conference agreement accomplishes this first by reducing the so-called average wholesale price by 10 percentage points, and then instituting a new payment system based on manufacturers' reported average sale price—or ASP reporting—which will be closely scrutinized by the inspector general on an ongoing basis ensuring its accuracy.

Errors or abuse of the system will be corrected swiftly so that Medicare will never again pay an unfair price.

These changes result in Medicare savings of approximately $11 billion out of that $31 billion total.

Finally, title III takes similar steps to correct overpayments for respiratory medicine which the Office of Inspector General has said are priced far in excess of their actual costs. These drugs will be reduced by 10 percentage points in 2004, and then priced on a similar average sale price system, as others I just mentioned, and that will begin in the year 2005.

The Congressional Budget Office says that this policy alone will save Medicare $4.2 billion of that $31 billion total.

I have listed three or four examples of how you save that $31 billion.

I believe all of these changes have been carried out in a compassionate fashion with twin goals of protecting both the Medicare Program's resources and our senior citizens' access to those services. We have done both.

Our market-based improvement Part B drug payments are accompanied by sweeping changes in payments for clinical services associated with delivering them.

We worked closely with oncologists to ensure that access to cancer care was not harmed.

Similarly, we went to great lengths to ensure that seniors who rely on medical equipment supplies will be able to rely on them as they do today.

Finally, to my colleagues who talk about cost containment and the need for Medicare to curtail its spending, I say this: It starts right here. Cost containment begins by ensuring that the costs to Medicare and to the taxpayers who finance it are, in fact, fair.

The conference agreement starts us down the road. The sum total of $31.3 billion of savings, and the market prices we are imposing on future spending in this area, are in my view, the most significant cost containment policies in this conference agreement.

In the months and years ahead as Medicare spending increases with the expansion of benefits that we are going to pass here shortly, our focus on cost containment will obviously increase. The best thing that Congress can do is to be vigilant. We all need to watch Medicare's outlays closely, and to listen to whistleblowers who are patriotic citizens telling us when there is fraud and crying for government to do something about it.

We also need to pay attention to other private individuals who have inside information on wrong doing. We need to heed the warnings of the Office of Inspector General, and, most of all, insist that Medicare never pay more than market price. Taxpayers, on the one hand, and the seniors' Medicare services, on the other hand, deserve nothing less.

I want to conclude by talking about the views of very many organizations that support the conference report.

Mr. GRASSLEY. Madam President, I want to quote from some.

As you know, I have a chart up here talking about the AARP. All of you colleagues on that side of the aisle have been saying to me all day how dastardly it is that the AARP is backing this legislation. Some Members have even spoken of them becoming a political organization. They cannot become a political organization or they will lose their tax-exempt status. But you accuse them of being a tax-exempt organization.

It is funny, last year when they did not come out for the bipartisan bill that several Members brought out, that the Democrat majority did not want to let pass because they wanted an issue in the last election instead of a product, the AARP was not backing what I, Senator SNOWE, Senator JEFFORDS, Senator BREAUX, and Senator HATCH wanted to do. Ours was a bipartisan effort, or a tripartisan effort, with Senator JEFFORDS being an Independent, to get a bill through because you cannot get through anything in this body if it is not bipartisan. The AARP did not like what we were doing. They did not discourage us but they did not help us. They actually sent letters out to support what Senator KENNEDY was trying to do a year ago.

I did not accuse the AARP of being a tool of the Democrat Party like Members on the other side are accusing the AARP of being in bed with the Republicans. They are not in bed with the Republicans. They are in bed with a bipartisan group of this body who want to do something for seniors of America. It is funny how the AARP is OK when they are helping Senator KENNEDY but they are not OK if they are helping a bipartisan group led by Senator GRASSLEY and Senator BAUCUS.

I would say they are discretionary in what they do. They may not be consistent, but thank God they are not consistent because they would not be representing the diverse group they represent.

Here is what the AARP says in their endorsement:

AARP believes that millions of older Americans and their families will be helped by this legislation.

They continue:

This bill provides prescription drug coverage at little cost to those who need it most: People with low-incomes, including those who depend on Social Security for all or most of their income. It will provide substantial relief for those with very high drug costs and will provide modest relief for millions more.

The last sentences I will read:

An unprecedented $88 billion will encourage employers to maintain existing health retiree benefits. The legislation will help speed generic drugs to market and add important new preventive and chronic care management services. This legislation protects poor seniors from future soaring prescription drug costs.

All the Members complaining about the AARP, put that in your pipe and smoke it.

Then we have the National Council on the Aging:

. . . we find it too difficult to again say to millions of vulnerable seniors in need: Sorry, come back in a few years and maybe there will be some help for you then.

Another sentence:

We urge Congress to pass the Medicare bill so that millions of seniors with greater needs will receive long-awaited and badly-needed prescription drug coverage.

Are Members trying to tell me the National Council on the Aging does not know what is good for seniors when they see it? Put that in your pipe and smoke it.

The Alzheimer's Association says:

This is a historic accomplishment that may potentially provide meaningful relief to the 4.5 million Americans dealing with Alzheimer's disease—many of whom also suffer other health issues.

That is from Sheldon Goldberg, president and CEO of the Chicago-based national organization for the Alzheimer's Association.

Are Members telling me the Alzheimer's Association cannot make a judgment if this bill is good for their members? Go put that in your pipe and smoke it.

From the American Diabetes Association:

. . . contains important improvements to the Medicare Program that will benefit many people living with or at risk for diabetes.

. . . the prescription drug package assists seniors living with diabetes by providing coverage for insulin and syringes, a critical component for seniors that take insulin to manage their diabetes.

. . . the American Diabetes Association supports passage of—and strongly urges Congress to enact—the Medicare package as a way to improve the lives of millions of seniors living with diagnosed and undiagnosed diabetes.

Are Members trying to tell me the American Diabetes Association does not know a good piece of legislation when they see it? Put that in your pipe and smoke it.

We have a statement by Advancing Health in America, AHA, saying:

It provides prescription drug benefits to the elderly and provides needed Federal relief to hospitals, particularly rural hospitals.

The legislation includes important provisions that help patients by providing hospitals the resources necessary to continue caring for America's seniors.

Tell me an organization called Advancing Health in America does not know what is good for their Members.

From the American Medical Association:

Congress listens to America's patients and physicians who serve it.

The status quo is unacceptable to patients and their physicians. The Medicare conference agreement includes numerous provisions that will improve seniors' access to medical services.

Tell me the American Medical Association does not know what is good for their members or what is good for their members' patients.

The Arthritis Foundation says:

The Arthritis Foundation supports a Medicare Prescription Drug, Improvement, and Modernization Act for 2003 that for the first time would provide coverage for prescription drugs and biologicals for persons with arthritis.

Can Members tell me the Arthritis Foundation does not know what is good for their members, know a good piece of legislation when they see it?

We have the American Pharmacists Association:

. . . APhA supports this as an important, long-overdue step toward providing Medicare beneficiaries greater access to medications and critical pharmacist services.

The proposal creates a comprehensive benefit that provides coverage for drug products and pharmacist services, and provides seniors their choice of pharmacists and ensures any willing pharmacist can participate in a plan and incorporates important administrative efficiencies.

Those Members who oppose this bill, are you trying to tell the people of America that the American Pharmacists Association does not know a good piece of legislation when they see it and that they cannot speak for not only their membership but also their patients and clients they serve?

From the College of American Pathologists:

This legislation will improve Medicare coverage for seniors and protect access to the physicians and services upon which they rely for quality of care.

The conference agreement also preserves critical health care services provided by independent laboratories in to hospital patients, especially in smaller and rural communities.

Are Members telling me, as they criticize this legislation, that the College of American Pathologists would support legislation that is not good for their patients and the people they serve?

The Federation of American Hospitals:

This agreement does more to improve Medicare coverage for seniors than any legislation since its program inception.

That is 38 years.

The Federation of American Hospitals commends President Bush, the Congressional leadership, and members of the Medicare Conference Committee for their great efforts in bringing these vital improvements to the Medicare to fruition.

H.R. 1 would greatly enhance the ability of hospitals to provide necessary care medical care to Medicare beneficiaries. It would make important strides in ensuring that all hospitals have sufficient funding to meet the medical needs of this nation's seniors and would particularly aids though hospitals that serve seniors in rural areas.

Every Member has rural areas in their State. And we have a major hospital association supporting this legislation because it is particularly going to serve seniors in rural America.

Now, tell me that they do not know a good bill when they see it.

Here is something that answers complaints that were heard late this morning or early this afternoon. One of the first speakers on the other side of the aisle, the Senator from Illinois, was complaining about this not doing enough for generics. But here we have the Generic Pharmaceutical Association:

The Generic Pharmaceutical Association today called the Medicare Conference compromise on generic drugs a tremendous victory for all consumers that will ensure timely access to affordable pharmaceuticals. . . .

The House and Senate conferees have met the challenge of eliminating some of the most serious barriers to generic competition by closing loopholes that have unnecessarily delayed the timely introduction of affordable pharmaceuticals—and American consumers, young and old alike, will be the winners.

Now, how many of you speaking today have complained about this legislation not doing anything about the cost of drugs? And we know that putting generics on the market sooner is one of the ways to bring down tremendous drug costs.

Now, the Generic Pharmaceutical Association supports this legislation, and yet you do not recognize that they understand a good piece of legislation when they see it.

We have the United Seniors Association:

We commend the Senate and House Conferees on their historic step to benefit every senior in America. Partisan politics and rhetoric-without-results on prescription drugs are simply unacceptable. Years of hard work by many in Congress and years of heartache for America's seniors have led us to this point. The whole senior world is watching and Congress must not collapse so near the finish line.

Are you trying to tell me that the United Seniors Association looks at this legislation and sees it is good for their members, and yet you cannot see that?

We have The 60 Plus Association:

The bill makes available much needed assistance to millions of seniors who lack any

prescription drug coverage. Significantly, those who can least afford to pay will get the most help [from this legislation].

From the Rural Hospital Coalition:

We support your efforts to modernize Medicare and give senior citizens a prescription drug benefit that they deserve. . . . [T]his bill strengthens health care in rural America.

From the National Rural Health Association:

This bill is a big boost for the rural healthcare system. . . . A stronger healthcare system will help revitalize rural economies which will positively impact rural Americans throughout the country.

We have the National Hospice and Palliative Care Organization:

NHPCO strongly supports these provisions and believes these changes will improve the quality and timeliness of hospice and palliative care for seniors and their families.

From the Mayo Clinic, 150 miles from my home in Iowa:

Mayo Clinic supports the compromise Medicare reform legislation that has emerged from a congressional conference committee.

We have NAMI, The Nation's Voice on Mental Illness:

This conference agreement does represent an improvement for Medicare beneficiaries living with mental illness. . . . NAMI feels strongly that it is time for Congress to end partisan stalemate over this issue and take advantage of the $400 billion available this year to spend on a new drug benefit.

This is kind of a partisan statement I am going to read to you, but it does represent a group of people who are impacted by what we do here with dual eligibles. It is from the Republican Governors Association:

Medicare will provide first-time access to prescription drug coverage to many of our seniors. The agreement also assists states with the costs related to the dual eligible population. Assistance to low income persons as well as critical protection against high out-of-pocket drug costs are essential components of this legislation. . . . [T]he preventive benefits found in this measure will keep our constituents healthier.

From the Alliance For Aging Research:

With this act the millions of Medicare beneficiaries will no longer have to wait from 15 months to 5 years for access to new state-of-the-art medicines and life-saving and life-enhancing technologies. In addition, and most importantly, it targets those with the greatest need by providing significant low-income subsidies for prescription drugs that will assist millions of Medicare beneficiaries living longer and healthier lives. . . . This will be a giant step toward expanding and modernizing Medicare, while preserving the power of science and technology to improve and enhance the lives of our people in the future.

Lastly, we have the American Benefits Council, a news release. The headline: ''Medicare, prescription drug reform bill represents historic, positive achievement.''

We urge swift enactment of the legislation. . . .

I have quoted these statements from these outstanding organizations for the RECORD because they speak louder than any Member of this Senate can about what is good about this legislation.

I would hope that you folks on the other side of the aisle would take these statements into consideration, particularly tomorrow, when I am told 15 of you are going to speak, probably most of you against this legislation. I would appreciate you taking into consideration what these major groups have said.

Madam President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Ms. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

Ms. MURKOWSKI. Mr. President, I realize the hour is late. This body has been discussing the issue of Medicare legislation for close to 12 hours now on this Saturday.

I want to speak briefly this evening about the legislation that is under consideration in the Senate and its impact on senior citizens in my home State of Alaska as well as around the Nation.

We have heard a great deal today on the floor about the need for reform, about what we need to provide for our senior citizens.

We must keep in perspective what we owe our seniors. This is the generation of Americans who paid most dearly to protect the freedoms we enjoy. Many of our older Americans today went through the Depression and have very personal, truly gut-wrenching memories of the hunger that they perhaps went through at the time. They were the generation who settled the frontier areas of America, including my State of Alaska. They remember the horror and the stories from Pearl Harbor. We owe this generation of Americans many things, not the least of which is honesty.

Since Medicare was enacted in 1965, it has provided health security to millions of America's seniors and people with disabilities. Medicare is that promise of health security we must always keep.

Many of my colleagues on the other side of the aisle would like Americans to believe that the bill in front of us today is designed to kill those promises made in 1965. I remind my colleagues that Americans deserve more than the rhetoric and the scare tactics we have heard saturating the airwaves from here. Earlier this evening in listening to the debate, one of my colleagues made reference to the fact that seniors are going to have to sell their wedding rings in order to meet certain levels for low-income subsidies for Medicare beneficiaries.

I thought, wait a minute, that can't be true. That is not a part of this legislation. Seniors will not have to do that. So I said: Show me. Let me know for sure that, in fact, this is not the case.

We pulled it out and looked at the application of the asset test. It very clearly states those resources that are not counted for an asset test, excluded resources, include, and No. 3 on the list is memorabilia such as a wedding ring. For us to stand here on the Senate floor and suggest to a senior citizen that in order to meet certain requirements to keep your Medicare benefits you might have to give up your wedding ring, I sure hope my 84-year-old next-door neighbor was not hearing that because I know she wouldn't sleep well knowing that that could be true.

We have to be real. We have to be honest with our statements, and we have to talk the truth about what is and is not contained in the legislation before us.

Americans deserve to know that this bill, while not perfect—I don't think any of us would suggest it is perfect—will provide good drug coverage for any senior citizen who wants to enroll. Americans deserve to know that this bill doesn't force seniors to join HMOs to get prescription drugs.

This legislation is designed to provide choice, not coercion. If seniors want to add prescription drug coverage to the Medicare plan that they have right now, they would have that option. Their benefits would not be reduced, would not be taken away. If they don't want the drug coverage or if they are happy with the coverage they have now through their retirement plan, they don't have to accept the voluntary Medicare benefit.

The incentives for employers to keep offering their own prescription drug benefits: The Employer Benefit Research Institute indicates that they expect between 97 percent and 99 percent of beneficiaries won't have any change in benefits. We need to clearly repeat these provisions.

The bottom line is this: If you like Medicare the way it is today, you can keep it that way because it is designed to be a voluntary benefit.

The problem is for many Americans, including those in Alaska, Medicare has not been living up to its promises. It will only pay for your drugs if you have been hospitalized. And for many, it does not pay for the health care professionals. Essentially, this program is still stuck in the 1960s mindset of reactive care rather than the kinds of proactive care we expect today.

Several months back I had an individual up in the State who was meeting with me and going out to senior centers. We were talking about the Medicare legislation in front of us at that time. She made the analogy that Medicare is like the telephone. In 1965, the

telephones that we had in our homes were the black rotary dial. They came in one color and one style, and that was it. And that was how we talked.

Now in the year 2003, we talk on cell phones, by fax, e-mail, on colored phones. The technology has changed incredibly, but we are still doing the talking.

Medicare is essentially the rotary dial system of health care that just hasn't been ramped up.

Americans need to know that Medicare still doesn't provide full coverage for preventive care, including cancer, diabetes screenings. It doesn't offer protection against catastrophic medical costs, these things that can rob our seniors of their hard-earned savings. There has been a lot of rhetoric about the drug benefit. But if you cut all through it, if you do the number crunching, you get to the indisputable fact that the average senior citizen, after paying their premium, is going to see a savings in the cost of their drugs—we estimate about a 63-percent savings in the cost of drugs.

For those seniors with limited income and limited savings, which is about half of Alaska's senior citizens, half of Alaska's senior citizens are in this lower income bracket, they will have closer to 90 percent of their drug costs covered, and this is not a skimpy benefit.

The bill also adds important preventive benefits that are many years overdue. In order to combat our Nation's No. 1 and No. 3 killers, which are heart disease and stroke, Medicare would be required to cover screening blood tests with no cost to the senior. This bill helps the millions of Americans who struggle daily with the chronic diseases such as asthma and diabetes. The bill adds principles of disease management to Medicare which will help the seniors navigate the oftentimes confusing health care system and get them the access to vital specialty care and educational resources.

While we all seem to agree that it is important to add preventive benefits to Medicare, there has been a lot of discussion about whether to allow government-regulated private plans to offer these Medicare benefits. I have to step back a little and wonder if perhaps I am the only one who finds it ironic that we would use taxpayer-funded subsidies to give each one of us in Congress a choice of health plans, but yet we would deny our senior citizens that same choice.

The bill before us rejects this philosophy of ''big Government knows best,'' and tells our seniors: You have the right to select a benefit that meets your needs. If you don't need drug coverage, you don't have to enroll. You can keep Medicare the way it is today. If you don't want to join a private plan, you don't have to. If you don't want to change anything about Medicare, you don't have to.

I also want to address a comment that a number of Members—primarily on the other side of the aisle—have made characterizing Medicare as good the way it is now. I have even heard a number claiming that the Medicare Program today gives seniors such things as a choice of doctors. While I agree with them that Medicare is a good program, and I believe we need to make sure it still exists for our children's children, I need to let my colleagues know that the way the current Medicare Program does business, it hurts those in my State who have been promised care.

Every week, Senator STEVENS, Congressman YOUNG, those in the Alaska delegation, and I come to work and we are faced with a huge stack of mail, e-mail, phone calls, and the like from Alaskans about the problems they are having with Medicare. I mentioned earlier that this summer, back in my State, I held a senior citizen forum in the community of Chugiak. What I learned may actually surprise some of my colleagues who seem particularly enamored with the way Medicare is today. Seniors in Alaska are not only being denied a choice of doctors, but in many cases they don't have the ability to see a doctor at all. This is because doctors, or health care providers, in Alaska are paid just about 37 cents on the dollar for the care they provide to seniors on Medicare. Medicare is a price-fixer. So what we have is somebody in Baltimore sitting in a cubical, and they are deciding how much to pay for medical care in the community of Delta Junction, in Alaska; or take the community of Bethel, not on the road system, completely cut off from the rest of the world. If the payment the folks in Baltimore have said we are going to be charging is less than the cost of actually providing the care, Medicare basically tells our doctors: Tough, you are out of luck. This price-fixing causes problems not only in the rural areas of the State—as I mentioned, in a place such as Bethel or Delta, where you would expect these problems—but the sad truth is that even seniors in the urban centers of Alaska, in Anchorage and Fairbanks, cannot find a doctor who will accept new Medicare patients.

Perhaps I need to go a little further in explaining to my colleagues how much of a problem this is in my State. When a senior in the lower 48 cannot find a doctor in their community to help them, they can hop into their car and drive to the next town and find a doctor—just go to the city. But when seniors cannot find a doctor in Fairbanks—and the whole State knows seniors in Anchorage are having the same problem—there are two options for them. The first one is that there are few things you can do. Second, there are bad things you can do.

The simple fact is that for many of my constituents, their choice for a doctor is limited to those who are practicing in the emergency room. Who is the doctor on call that night? That is their choice of doctors.

The only other choice is—and this is probably a choice only for a few—to fork over the $1,400, or whatever the price of the airplane ticket is, to make the 8-hour roundtrip flight to Seattle and try their luck with doctors there.

Just 2 weeks ago, I had a constituent in my office who told me she flies to Virginia every year to see her doctor. She lives in Alaska. She flies to Virginia to see her doctor. She does this because she cannot find one in Anchorage who will accept new Medicare patients. The cost for the ticket alone, not counting her lodging and meals while she is there, is about $1,500. Unfortunately, these situations in Alaska right now are not the exception; they are the rule.

We have somewhere between 1,000 and 2,000 senior citizens in Anchorage alone who cannot find a doctor who is willing to treat them. The situation in Fairbanks is not much better. We recently called up the State to one of the larger clinics there that accepts Medicare patients. We asked them: Are you accepting new Medicare patients, and when would the first available appointment be? We were told mid-July. This is not choice when it comes to your doctor.

How is this situation keeping the promise we made to our senior citizens in 1965 when we established Medicare? What kind of treatment are you advocating for when you keep Medicare the way it is? We can come up with grand plans here in Washington and we can talk about Medicare reform, but if we don't have doctors who can write the prescriptions, if we don't have access to physicians, we have not done anything to fix the problem with Medicare.

Keeping Medicare as we know it in Alaska means Alaskans will go to the emergency room for primary care. It means making Alaskans pay to fly across the country by themselves to go find a doctor, and it means making Alaskans go without preventive screening.

Medicare as we know it doesn't give patients a choice of providers or access to the care of their choice, as some of my colleagues have stated. Medicare isn't working perfectly and desperately needs reform. I believe the legislation we have in front of us is a good compromise. It includes provisions that will ensure that senior citizens around the Nation and in Alaska will be able to find a doctor somewhere other than in the emergency room.

We owe our seniors a little more honesty in this debate. They deserve to know clearly that the prescription drug is voluntary. They deserve to know they will not be forced to join a program they don't want to join. They deserve to know the average senior citizen who joins will save somewhere

around 63 percent on the cost of their prescription drugs. They deserve to know low-income seniors will pay no deductible, no monthly premium, and have no gap in coverage; and Medicare will pay about 90 percent of their drug costs. They deserve to know the group purchasing power we are giving to seniors is going to make the drug companies work for their business.

Mr. President, those who stood defending our freedom deserve more than the partisan rancor that has been sailing around this Chamber. They deserve to know more than some of the half-truths that have been told. Medicare, as we know it, should provide seniors with access to vital health care services and the physician of their choice. I believe this bill does those things, and I believe it will meet the needs of my constituents.

We have come a long way toward making good on our promise to our senior citizens, and that is to the credit of the administration and to the leadership of this Congress, certainly to the leadership of the Senator who is presiding this evening. We do need to strengthen Medicare, and seniors do need access to vital prescription drugs.

Many who are now on Medicare fought for the freedom that we enjoy today, and Monday we will, hopefully, have the opportunity to keep our promise to seniors and to fight on their behalf by providing them with a voluntary prescription drug benefit.

I urge my colleagues to support this legislation.

ORDERS FOR SUNDAY, NOVEMBER 23, 2003

Ms. MURKOWSKI. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today, it adjourn until 1 p.m., Sunday, November 23. I further ask unanimous consent that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, the time for the two leaders be reserved for their use later in the day, and the Senate then resume consideration of the conference report to accompany H.R. 1, the Medicare Prescription Drug Modernization Act, with the understanding that speakers will alternate between the sides with the order of speakers on the opponents' side, as previously requested by the assistant Democratic leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Ms. MURKOWSKI. Mr. President, tomorrow the Senate will continue debate on the Medicare conference report. We had an extended and vigorous debate today, but there are many others who wish to make statements on this historic bill. Because we have a large number of Senators who wish to speak tomorrow, we ask Senators to limit their remarks to 30 minutes. We will talk further tomorrow on the best way to accommodate Members as we go forward.

As a reminder, a cloture motion on the conference report was filed today. That vote will occur during Monday's session at approximately 12:30.

Finally, on behalf of the leader, I thank not only the Members who participated in the debate but also the Senators who presided throughout this session.

ADJOURNMENT UNTIL 1 P.M. TOMORROW

Ms. MURKOWSKI. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 9:33 p.m., adjourned until Sunday, November 23, 2003, at 1 p.m.

EXTENSIONS OF REMARKS

IN RECOGNITION OF THE PORT AUTHORITY EMPLOYEES WHO LOST THEIR LIVES ON SEPTEMBER 11, 2001 ON THE OCCASION OF THE DEDICATION OF A MEMORIAL AT McMANUS PARK IN ASTORIA, NY

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. MALONEY. Mr. Speaker, I rise to pay tribute to the 75 employees of the Port Authority of New York and New Jersey who tragically lost their lives in the attacks on the World Trade Center on September 11, 2001. In recognition of the ultimate sacrifice they made while striving to rescue others, these fallen heroes have been honored with the dedication of a memorial in McManus Memorial Park in Astoria, New York.

I attended the dedication of the memorial and was deeply moved by the heartfelt testament to these fallen heroes by friends, family, and area residents. This park will bear witness that their courage and selflessness will never be forgotten, while offering a quiet and tranquil oasis amidst the busy city that affords an opportunity for reflection upon the terrible losses borne on that tragic day.

I ask that the following speeches given at the dedication ceremony be entered into the record:

THE UNITED COMMUNITY CIVIC ASSOCIATION

(By Rose Marie Poveromo, President)

Good evening ladies and gentleman. Tonight's memorial dedication ceremony is a joint effort shared by the United Community Civic Association and our neighbor, the Port Authority of New York and New Jersey.

This living memorial of ''A Grove of Trees'' is to specifically honor the 75 Port Authority employees as well as all the other innocents who so tragically lost their lives in the 9111 shattering, horrific attack on, and total collapse of, the twin towers.

PORT AUTHORITY OF NEW YORK AND NEW JERSEY

(By Bill De Costa)

I am grateful to be here to dedicate this memorial to the 75 Port Authority employees, and neighbors who lost their lives in the attacks on the World Trade Center on September 11, 2001. This ceremony also honors the memory of all the New York City police officers, firemen and all the other citizens who gave the ultimate sacrifice that day.

Any event is always more meaningful when you receive acknowledgment from your family, so we are particularly honored that our neighbors and friends represented by the United Civic Community Association have been so thoughtful and considerate in their recognition. Thank you Rose Marie!

Yes, whether we are Port Authority or New York City employees, we are all actual members of this vibrant and wonderful community.

As we stand here today and view the McManus Vietnam Memorial at one end of the park, and now this Port Authority memorial at the other end of the park, we should always be reminded of the words of President Harry Truman: ''Freedom is still expensive. It still costs money. It still costs blood. It still calls for courage and endurance, not only in soldiers, but in every man and woman who is free and who is determined to remain free.''

Seventy-five Port Authority employees, including 37 police officers, made the ultimate sacrifice that September morning. Always remember these people who were our neighbors, family members and friends. The greatest testimony that we can now give them is to continue our resolve for security and freedom and to continue to work and live in this spirit.

Thank you all for attending and remembering them.

Mr. Speaker, I ask my colleagues to join me honoring the Port Authority employees, the police officers and firefighters, and all those who paid the ultimate price on September 11, 2001 and to recognize those who planted a beautiful memorial grove of trees in their honor. It aptly serves as a living tribute to the brave men and women of the Port Authority and all who lost their lives on that tragic day.

BASIC PILOT EXTENSION ACT OF 2003

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. UDALL of Colorado. Mr. Speaker, I rise today in support of S. 1685, the Basic Pilot Extension Act of 2003.

The Basic Pilot Verification program was created in 1997 to assist employers in verifying the eligibility of prospective employees to work in the U.S. Currently the program is only available to employers in six States. Recently I voted against a bill to expand and extend the program, H.R. 2359, because I thought an expansion of this program deserved more debate and allowance for amendments to fix some of the more problematic parts of the bill.

The Senate-passed measure that we are considering today, S. 1685, is an improvement on the House bill.

Unlike the House bill, this bill does not open up access to the databases of the Homeland Security Department and the Social Security Administration to other Federal agencies or to State and local government agencies. I had grave concerns about the infringement of civil liberties in the House bill, which would have permitted widespread sharing of employee information. I am also pleased that concerns already identified by the Department of Homeland Security about the Basic Pilot program are being addressed. I still have apprehensions that the data used in this program is not always up-to-date or accurate, specifically in regard to the visa status of employees. However, I am hopeful that the Homeland Security Department report required under this legislation will address these concerns so that they can be resolved by the time the program is expanded to all fifty states.

The Basic Pilot Verifications program provides an efficient and effective method for ensuring that employers are hiring eligible employees. I hope that through the extension and expansion provided for in this bill, this program will provide accurate information about prospective employees and continue to address the needs of American employers.

A TRIBUTE TO DAVID LOFYE

HON. NICK LAMPSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. LAMPSON. Mr. Speaker, I rise today to wish a fond farewell to a member of my staff, David Lofye, who will be leaving Capitol Hill at the end of this calender year. David is leaving his position as my Deputy Chief of Staff, and will be moving to Austin, Texas with his wife, Andrea Lofye.

All of us who serve in Congress know how important our staff members are to us. David came to my office after completing law school nearly six years ago. His knowledge of legislative issues, his strong work ethic, and his desire to make a difference have grown exponentially during this time. I value David's councit and his pragmatic and methodical approach to each task he undertook.

David has staffed me on both the Transportation and Infrastructure Committee, as well as the Science Committee. His depth of knowledge on these and other issues has been invaluable over the past six years.

I am grateful to have had the opportunity to know and work with David. I am confident that his abilities and his work ethic will continue to serve him well in the years to come.

David, thank you for your hard work over the last six years. You will truly be missed.

RECOGNIZING THE MORRIS ISLAND LIGHTHOUSE AND SAVE THE LIGHT

HON. HENRY E. BROWN, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BROWN of South Carolina. Mr. Speaker, I rise today to recognize the Morris Island Lighthouse and to applaud the efforts of Save

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

the Light. Save the Light is a non-profit entity dedicated to the preservation of the Morris Island Lighthouse. The Morris Island Lighthouse, a National Historic Landmark which began operation in 1876, is a true historical treasure, playing significant roles in both the Revolutionary and Civil Wars. It was decommissioned in 1962 by the U.S. Coast Guard, but is now owned by the State of South Carolina and leased to Save the Light.

The island on which the lighthouse is situated has all but washed away, leaving the lighthouse precariously perched on a tiny sandbar that sits underwater at high tide. I want to thank Chairman Taylor and the Appropriations Committee for providing the first federal funding for this project in the recently passed Interior Appropriations Bill.

Save the Light has been coordinating monumental preservation efforts dedicated exclusively to the foundation repair of the Morris Island Lighthouse. The organization began as a grass roots effort by concerned citizens and has taken charge of the preservation of this historic site when public agencies would not. Save the Light has generated significant public support in raising funds for the project, worked with the Army Corps of Engineers and established a long-term maintenance program for the lighthouse.

The level of public support generated for its preservation underscores the importance of the Morris Island Lighthouse to the community, and I applaud Save the Light for all of their hard work and dedication. Thank you, Mr. Speaker.

CONGRATULATIONS TO THE DENTON HOUSING AUTHORITY

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the Denton Housing Authority to commend them for receiving three National Association of Housing and Redevelopment Officials (NAHRO) Merit Awards in Tampa, Florida this year.

The Denton Housing Authority has been active in the North Texas community for years, working hard to provide quality public and affordable housing. This year at the 2003 NAHRO awards ceremony, the Denton Housing Authority was recognized for their achievements in Program Innovation for Resident and Client Services. NAHRO President Curt Creager said, "These agencies are accomplishing remarkable levels of service for their communities and their residents. They are setting up programs and establishing standards that can be duplicated by other housing authorities around the country."

The Denton Housing Authority was recognized for three of their programs. The ARTS program brings together the DHA, University of North Texas, Center for Public Service, and Greater Denton Arts Council to provide an arts program and promote social skills for disadvantaged youth in low-income neighborhoods. The New Direction of Community Oriented Policy Services (COPS) program partners with the Denton Police Department to encourage community outreach services to create and sustain safer neighborhoods. Also, the Phoenix After-School Program teams with the University of North Texas and DHA to encourage social and academic success for socially challenged youth 4–11 years old living in the Phoenix Development. These are the kind of great programs that will create a better society in the future by giving our youth a strong foundation and forming a safer environment for our neighborhoods.

Once again, I would like to express my sincere congratulations to the Denton Housing Authority for their innovation and hard work in providing community outreach services to the City of Denton and surrounding communities.

CENTRAL NEW JERSEY RECOGNIZES AND CELEBRATES MARVIN REED

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, I rise today to recognize the career of Mayor Marvin Reed, who has served the Borough of Princeton as mayor for 13 years.

A resident of the borough for 45 years, he began his career of public service in 1985 as a member of the Borough Council. Since that time the people of Princeton have chosen him as their leader for three consecutive terms.

Under his direction the town has made a deliberate and concentrated effort to make affordable housing available to all within the community. He has secured five affordable housing developments and has laid the groundwork for at least 68 units of low-income senior housing.

He has worked with the local police department to establish a strong community presence and to work hand in hand with residents. Throughout his years as mayor the borough has seen an increasingly strong community grow, one that works together to support senior programs, youth activities and growth within the community.

Through his efforts the borough has seen the renovation of Borough Hall, the reconstruction of Monument Park and the Suzanne Paterson Senior Center. His commitments to creating open space and historic preservation have made Princeton Borough a stronger community.

As an inspiration to his community and the State of New Jersey, Mayor Reed has contributed significantly to the life of his community. He has earned our heartfelt appreciation for his efforts.

HONORING WILLIE L. BROWN, JR.

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. LEE. Mr. Speaker, I rise today to honor Mayor Willie Brown of San Francisco on his upcoming retirement after 40 years of dedication and spirited service to the community.

As we honor Mayor Brown, I want to thank him for being an exemplary role model, leader, and friend. I take great pride in joining his family, friends and colleagues to recognize and salute the accomplishments and contributions of Willie L. Brown, Jr.

Mayor Brown's personal story is an inspirational one. He was born into poverty on March 20, 1934, in Mineola, Texas, a small, racially-segregated Texas town, where he earned his first dollar as a shoeshine boy. Throughout his high school years, he worked as a janitor, a crop harvester and a messenger. On graduating, he moved to San Francisco, bringing with him a little more than a cardboard suitcase and hope in his heart.

He worked his way through and graduated from San Francisco State University and from the Hastings College of the Law. He was admitted to the State Bar of California and built a thriving law practice in what was then a predominantly white legal world.

Brown was elected to the California Assembly in 1964 and was re-elected 16 times, serving a total of 31 years in the Assembly. In 1980, he was elected Speaker of the Assembly, a position of power second only to that of the governor. The state's only African American Speaker, he held the position for an unprecedented 15 years.

Mayor Brown's personal experiences in the realm of racial discrimination have made him a tireless advocate for affirmative action. During his years as a state assemblyman, dozens of his bills became laws, including the passage of the most comprehensive educational reform and financing bill in 20 years. He also passed bills that requested the United States Congress to grant citizenship to Filipino veterans of WWII and eliminated criminal penalties for private sexual acts between consenting adults, a bill that was introduced before the Assembly five times before its ultimate passage.

While in the Assembly, several organizations awarded Brown for his tireless work on behalf of minority groups; he received the California Association of the Physically Handicapped Special Service Award, the ACLU Human Rights Award from the Gay Rights Chapter, the Tree of Life Award from the Jewish National Fund, the Japanese American Bar Association Award, and was honored by the California Advisory Commission on Special Education.

As mayor, he has continued his career-long commitment to civil rights and higher education, notably by designating the address of the refurbished City Hall as Dr. Carlton B. Goodlett Place after the recently-deceased San Francisco NAACP Chapter president and community activist. During the renaming ceremony and in front of a crowd of 7,000 people gathered at the 13th annual Martin Luther King Holiday rally, Mayor Brown restated his dedication for the betterment of education, his continued fight for civil rights, and his dedication to representing all of the minority groups that make up San Francisco.

Mayor Brown continues to make good on this promise. He championed and signed legislation requiring all companies doing business with the city to grant equal benefits to their

workers' domestic partners. As mayor, he presided over seven domestic partner commitment ceremonies, the latest taking place in City Hall. His administration is also working toward guaranteeing universal health care for its 130,000 residents currently without medical coverage. Thanks to commitment from the City and the private sector, the University of California at San Francisco will break ground on its first new campus in over twenty years.

During his seven years at the helm of one of America's most diverse cities, Mayor Brown has shown continued leadership, creating continued vitality and economic energy in San Francisco. Respected in the ethnically diverse neighborhoods as well as in the burgeoning business community, a San Francisco Chronicle reporter said of Brown, "He's been magical in his ability to unite the city. There's been this unbelievable camaraderie between camps that have been at war for years."

As the city's first African American mayor, Mayor Willie L. Brown, Jr. continues to represent the past, present and future of civil rights and the cultural and intellectual diversity that symbolizes San Francisco's history of acceptance.

Mayor Brown has been a mentor and a friend since the early 1970's. He has been consistent in championing the rights and the plight of those shut out of the American dream, and he has never forgotten his humble roots in Mineolea, Texas.

I had the privilege to serve with Mayor Brown while in the California Legislature. As speaker of the Assembly, Mayor Brown led our state through many challenging years. He was my "shadow Governor" and made sure that communities of color, women and the poor had a seat at the table.

As a skilled legislator, Speaker Brown guided me with my very aggressive and successful legislative agenda, which I continue to embrace with pride and humility.

Mayor Brown leads with his head and his heart. His intellect, his wisdom and his spirit is something to behold.

As one whose life and work has been enriched by this giant of a man, I say thank you, and Godspeed. Enjoy this next glorious chapter of your life.

PERSONAL EXPLANATION

HON. ROB PORTMAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. PORTMAN. Mr. Speaker, on November 20, 2003, I was unavoidably detained and missed the vote on Roll Call Number 654 on H.R. 1828, the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003.

Had I been present, I would have voted "Yes."

RECOGNIZING WORLD AIDS DAY

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. SOLIS. Mr. Speaker, I rise today to recognize December 1, 2003, as World AIDS Day. On this day, many around the globe will celebrate the progress made in the battle against AIDS while raising awareness to the challenges that remain.

Worldwide, an estimated 42 million people are living with the disease; 11.8 million are young people aged 15 to 24. Furthermore, more than half of those newly infected with HIV are between 15 and 24 years old—six thousand new infections each day, or 4 every minute.

In Latin America, in 2001, approximately 130,000 adults and children were infected with HIV and 80,000 died of AIDS. Unfortunately, young people and women are becoming increasingly vulnerable.

As we recognize World AIDS Day and celebrate the successes achieved, let us remember that our young people are at the center of this global crisis. They are our greatest hope in fighting this deadly disease and we should do all we can to deliver effective treatments and prevent new infections.

PERSONAL EXPLANATION

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DAVIS of Illinois. Mr. Speaker, I was unavoidably detained in my district had I been present, I would have voted yea on the following roll call votes:

Roll Call 650 (H.R. 1), Medicare Prescription Drug and Modernization Act—On Motion to Instruct Conferees;

Roll Call 651 (H.R. 2660), Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2004—On Motion to Instruct Conferees;

Roll Call 652 (H.J. Res. 63), Compact of Free Association Amendments Act of 2003;

Roll Call 653 (H. Con. Res. 209) Commending the signing of the United States-Adriatic Charter, a charter of partnership among the United States, Albania, Croatia, and Macedonia;

Roll Call 654 (H.R. 1828), the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003; and

Roll Call 655 (H.R. 253), National Flood Insurance Reauthorization.

AMERICAN EDUCATION WEEK

HON. CIRO D. RODRIGUEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. RODRIGUEZ. Mr. Speaker, this week marks the 82nd annual celebration of American Education Week, a time for us to acknowledge and praise the important role of education for our social and economic future. In the United States, the public school system provides the backbone of our youth's education, a system that deserves our active support and continued respect.

In 1919 the American Legion and the National Education Association joined together in concern over illiteracy rates among World War I draftees. The two groups agreed to support a national effort to increase awareness of the importance of education. The first American Education Week was observed from December 4–10, 1921. In many parts of our state, literacy remains a great challenge, and the need for a strong public education system is more important than ever.

Each year American Education Week focuses on a different issue; this year's theme is "Great Public Schools for Every Child-America's Promise." The week's co-sponsors include the United States Department of Education, National PTA, and various national educator associations.

Every child deserves the opportunity to attend a quality public school where he or she can learn and excel in a safe, stable environment. Students should receive an education that teaches not only practical skills and specific knowledge, but that also passes down our nation's core values. Public schools nurture American traditions such as tolerance, freedom, and equality that create productive citizens.

Public schools in Texas continue to show great progress in many areas. According to statistics compiled by the NEA, Texas ranks in the top ten states for 4th graders scoring well in math tests. More and more Texas schools are offering advanced placement courses, and Texas now ranks first in the nation for the proportion of students taking advanced math courses. Texas stands among the top four states nationally for the percentage of public primary schools offering foreign language immersion. Excellence in math and language are not only important personal education skills, but they are critical to our future economic growth.

At the same time, challenges remain. The Administration and the Congress have failed to make the financial investments needed to expand the areas of progress and provide the quality education needed by all of America's children. Elementary schools in Texas are overcrowded and many are desperately in need of major repairs. Quality teachers, our most valuable educational resources, are becoming more and more difficult to recruit and retain.

Despite the promise to leave no child behind, the current federal leadership has adopted policies that break the commitments to reform and accountability in the No Child Left Behind Act. Rural and inner city schools will suffer the most, as will children with special needs and challenges. The President's budget and congressional appropriations are underfunding the No Child Left Behind Act by as much as $8 billion. Similarly, the Individuals with Disabilities Education Act (IDEA) remains woefully underfunded, leaving states and school districts with the burden of complying with the important federal goal of providing a public education to all students.

This lack of funding contributes directly to the problems facing Texas schools and schools across the Nation: larger classes, schools closing earlier, cutting out after school and summer programs, and laying off teachers and staff. What is the response to this starvation diet by the Administration and congressional leaders? Private school vouchers . . . Blame the public schools for meeting standards without providing resources to comply . . . Failure to make the commitment to provide all students, of all backgrounds and needs, with the education they deserve and we as a society need.

The best investment in America's future is an investment in our children's education. We should take this week to give special attention to promoting quality in our nation's public schools; however, our vigilance should not end this week, but continue until every child has the chance to realize his or her educational potential.

TRIBUTE TO LARRY CORNMAN, ROBERT SHARMAN, AND PAUL POLAK

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCINNIS. Mr. Speaker, it is with great pride that I rise today to pay tribute to three brilliant scientists from my home State. Larry Cornman, Robert Sharman, and Paul Polak have an impressive grasp of the most technical aspects of science, and they are using those talents to improve the quality of life of millions of people throughout the country and the world. I would like to join my colleagues here today in recognizing these three gentlemen and their tremendous service to the global community.

Larry, Robert and Paul were recognized recently with three of the year's top fifty science and technology awards by Scientific American magazine. Larry and Robert, of the National Center for Atmospheric Research, developed a computer program that allows the Doppler radar on commercial airplanes to see turbulence at the edges of a storm. This system will serve to increase the safety and comfort for all future commercial air flights. Paul, who is the President of International Development Enterprises, helped to create a low-cost drip-irrigation system for Third World farmers. The system has the potential to aide more than 30 million rural farm families to escape poverty.

Mr. Speaker, Larry Cornman, Robert Sharman, and Paul Polak are bright, enthusiastic individuals who dedicate themselves to the noble endeavor of improving the lives of citizens around the world. These three men have demonstrated a passion for science that resonates in their extraordinary achievements. I am honored to pay tribute here today to these devoted scientists before this body of Congress. Congratulations on your awards, gentlemen. I wish you all the best in your future endeavors.

TRIBUTE TO BARBARA CARMICHAEL, FORMER NORCO CITY COUNCILMEMBER

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CALVERT. Mr. Speaker, I rise today to honor and pay tribute to an individual whose dedication and contributions to the community of Norco, CA are exceptional. Norco has been fortunate to have dynamic and dedicated community leaders who willingly and unselfishly give their time and talent and make their communities a better place to live and work. Barbara Carmichael is one of these individuals. After 13 years of service to the city, Barbara will step down as a councilmember.

Barbara moved to Norco in 1980 and quickly became involved in the community as a 4–H leader. As an honorary FFA Chapter farmer Barbara truly fit in to the rural lifestyle of Norco. Barbara has been involved with many community organizations including the Chamber of Commerce Fair Committee, a Foundation Board Member for Corona Regional Hospital and member of the Riverside Community Hospital college advisory board. She has also represented the City of Norco as a Mosquito Abatement Trustee, on the Economic Development Advisory Council, the Ad Hoc Committee for the retention of the Naval Warfare Assessment Center. She is a member of the Corona/Norco School Advisory Board and the host of monthly Senior Town Hall meetings. She is also the current President of the Norco Seniors and Pet Relief organization and is a Charter and active member of the Norco Horsemen's Association.

Barbara was first elected to the Norco City Council in November 1990, was elected Mayor in 1992 and 1998. She has served as Mayor Pro-Tempore three times. During her tenure on the Norco City Council Barbara has accomplished an enormous amount for the residents of Norco including the construction of five low-to-moderate income homes; a pilot curbside recycling program and the Sixth Street Façade program; a Directional Sign Program for new homes was approved; a new City Hall was opened; an agreement was reached with the City of Jurupa for the purchase of desalter water; the Lake Norconian Club and central hotel were designated as historic landmarks; the second phase of senior housing was approved; a new senior center was completed; the Animal Keeping Ad Hoc Committee was formed; the proposal to purchase Hidden Valley Golf Club was rejected and barbed wire was prohibited adjacent to equestrian trails.

Barbara's tireless passion for community service has contributed immensely to the betterment of the community of Norco, California. She has been the heart and soul of many community organizations and events and I am proud to call her a fellow community member, American and friend. I know that many community members are grateful for her service and salute her as she steps down from the Norco City Council.

A RESOLUTION IN SUPPORT OF NATIONAL SURVIVORS OF SUICIDE DAY

HON. SUE W. KELLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. KELLY. Mr. Speaker, I rise today to call attention to an issue that is too often overlooked in our society: the problem of suicide

According to the Centers for Disease Control, a suicide occurs once every 18 minutes. In the year 2000, we lost 29,350 people to suicide. It is the third leading killer of children ages 10 to 14 in the U.S., causing 7.2 percent of the total deaths in that age group. For children ages 15 to 19, the percentage jumps to 12 percent. When most people are starting a family and beginning their careers, between the ages of 25 and 34, suicide is the number two cause of death.

Too often suicide has been stigmatized as a weakness or character flaw. Instead, suicide must be viewed as it truly is: a symptom of mental illness. Viewing suicide as such allows us to recognize the warning signs (including depression, reckless behavior, substance abuse, and a drastic change in attitude and behavior) and helps encourage people to seek help.

While the number of males who commit suicide is about four times higher than the number of females, it is important that we pay special attention to suicide attempts among females, especially teenage girls. It is estimated that women attempt suicide at a three-to-one margin. In the case of teenage girls, these attempts are often a cry for help at a very confusing time in their lives.

We lose one person to suicide every 18 minutes. To put this in perspective, this equates to nearly 13,000 more deaths per year than homicide. We must do more to educate people about suicide, thereby helping to prevent it. For this reason I am sponsoring a Concurrent Resolution in support of National Survivors of Suicide Day and the ideals it upholds. This resolution recognizes and praises the work that numerous public and private sector groups carry out to raise awareness about suicide and provide treatment for depression.

REINTRODUCTION OF THE CAMINO REAL DE LOS TEJAS NATIONAL HISTORICAL TRAIL ACT

HON. CIRO D. RODRIGUEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. RODRIGUEZ. Mr. Speaker, today I am pleased to reintroduce the Camino Real de los Tejas National Historical Trail Act. This legislation would recognize the historical significance of the oldest highway system in Texas.

Translated, camino real means "royal road" and was used exclusively to describe roads between economically important Spanish towns and Spanish capitals. In keeping with its roots, the Camino Real de los Tejas was the

first overland route from the Rio Grande to the Red River Valley in Louisiana, and contributed enormously to the settlement and development of the Texas frontier. First traveled in 1689, for the next 300 years the road was worn by traders, immigrants, mail carriers, missionaries, cattlemen and their herds, soldiers, and settlers into an early-day "superhighway".

We would not only pay homage to our ancestors by designating the Camino Real as a National Historic Trail, but also develop a positive tool for economic development and historical preservation in the many towns and cities along the route. By promoting the preservation of this historic resource, the public will gain an opportunity to learn and small, rural communities will have greater opportunity for cultural tourism.

The bill I am introducing today contains special provisions to ensure that trail designation will not impair private property rights. Unlike prior versions of the bill, this one designates the trail only on public lands. Land condemnation is prohibited, and only willing sellers will be approached for acquisition purposes. No private lands will be included in the trail designation unless the private property owner affirmatively opts in.

Spanish conquistador Cabeza de Vaca, the first European to explore Texas, ventured up and down this trail. Both Davy Crockett and General Santa Anna journeyed to battle at the Alamo by way of the Camino Real.

The trails deserve national recognition for their tremendous historical and cultural value. In marking the trail, we honor our history and heritage.

Mr. Speaker, I ask my colleagues to support and cosponsor the reintroduction of the Camino Real de los Tejas National Historical Trail Act. Join me in building up communities rich in history and economic opportunities.

IN HONOR OF CLEVELAND POLICE COMMANDER MARVIN CROSS

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. KUCINICH. Mr. Speaker, I rise today in honor and recognition of Commander Marvin Cross, upon the occasion of his retirement from the Cleveland Police Department—Following twenty-two years of dedication to the citizens of Cleveland; and twenty-two years of honor to the force and to the badge.

Commander Cross was born and raised in Cleveland, and graduated from Max Hayes High School. He earned a Bachelor of Science degree from Myers University, and later graduated from the FBI Academy. In 1981, Commander Cross joined the city of Cleveland Police Department. By 1983, Commander Cross was promoted to the position of Detective, and within ten years, he was appointed to the position of Sergeant in the 6th District. His extensive experience regarding hate crimes, combined with his passion for social justice, led Commander Cross to create the city of Cleveland's Ethnic Intimidation/Hate Crime Task Force. This Task Force has resulted in a 62 percent reduction of hate crime activities since 1998.

Commander Cross' great intellect, combined with his exceptional interpersonal skills, brought people and agencies together for the common good and protection of Cleveland citizens. He developed a Fugitive Tracking System that led to the apprehension of over 2,500 fugitives; and reduced fugitive tracking expenses by more than forty percent.

The list of Commander Cross' accomplishments and accolades is long and far-reaching. He was twice-named Police Officer of the Year; was honored with the Distinguished Service Award from the city of Cleveland Police Department; and was bestowed the Red Cross Biennial Volunteer Hero Award, among others.

These extraordinary honors reflect the extraordinary nature of Commander Cross himself, His integrity, vision, heart, and concern for others has served to uplift the lives of countless families and individuals within our community. Commander Cross in the ultimate hero and role model for our youth. His sincere concern for our children has been witnessed through his involvement in the Amateur Athletic Youth Basketball League, the Special Olympics Torch Run and the Greater Cleveland Big Brothers/Big Sisters Shadow Blue Program.

Mr. Speaker and Colleagues, please join me in honor, gratitude and celebration of Commander Marvin Cross, as we reflect on his twenty-two years of significant service to the citizens of Cleveland. Commander Cross' positive nature, personal integrity, expertise, and focus on protecting his constituents in the city of Cleveland have all served to raise the grade of safety and protection within the City limits to an exceptional level. Commander Cross' outstanding years of service has been a guiding force within our community, and is worthy of our gratitude and recognition. We wish Commander Cross and his entire family many blessings, great happiness and abundant health today and always.

PERSONAL EXPLANATION

HON. VERNON J. EHLERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. EHLERS. Mr. Speaker, on rollcall Nos. 626 and 627 I was absent because I was giving a major lecture on science and engineering to the American Society of Mechanical Engineers.

Had I been present, I would have voted "aye" on both issues.

ON THE DEATH OF JAMES A. GRAHAM, FORMER NORTH CAROLINA COMMISSIONER OF AGRICULTURE

HON. RICHARD BURR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURR. Mr. Speaker, North Carolina lost a great friend today. For 36 years, the Old North State's agricultural interests were overseen with care, love, and passion by Jim Graham. For 36 years, Jim Graham served as Commissioner of Agriculture for my State, and he was probably the most beloved figure in public life in 20th century North Carolina.

Anyone who met the Commissioner—whether they met him once, or knew him for all of his 82 years—knew the same Jim Graham. He was affable, kind, and passionate. Mr. Graham grew up in Rowan county, was educated at State College (now North Carolina State University), and held several agriculture-related jobs before he entered public service, including managing the Dixie Classic fair in my home town of Winston-Salem. He was appointed Commissioner of Agriculture in the summer of 1964, was elected to the position that fall, and held it until his retirement in 2001.

Mr. Speaker, the Commissioner was a passionate member of the other political party. So passionate, in fact, that when introduced at political rallies, he would let out the loudest donkey bray you have ever heard. But while he brayed loudly for his party, he never spoke louder, or with more passion, than he did when preaching for the betterment of the North Carolina farmer. He always held the land, and the people who worked the land, in the highest esteem.

With all the changes that have occurred in North Carolina agriculture in the last 30 years, it is a good thing that we had Jim Graham looking out for us. When he was looking out, he was looking forward. He took the Tar Heel State from near-total dependence on the golden leaf of tobacco, to today, when tobacco income is complemented by hogs, poultry, winegrapes, soybeans, sweet potatoes, and more.

He was a positive voice for the future of North Carolina, and just as he would never forget your name, not soon will many forget his ever-present cigar and cowboy hat, his kind manner and love for his state.

No farmer anywhere had a better friend than Jim Graham. No State in the Union had a better public servant than Jim Graham. Well done, good and faithful servant.

HONORING SAMUEL HUNTINGTON AND BILL STANLEY

HON. ROB SIMMONS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SIMMONS. Mr. Speaker, I rise today to recognize two individuals who are genuine Connecticut treasures—Samuel Huntington and Bill Stanley.

On Monday I will attend a ceremony to reintern Samuel Huntington. Mr. Huntington will be laid to rest in Norwich, Connecticut, a community in the Second District, which I am proud to represent.

Samuel Huntington was born in Windham, Connecticut on July 2, 1732. He did not have the benefit of a formal public education as he was the eldest son and his father needed him to help work the family farm. Possessing a fine mind, when he was finished with his farm

chores he devoted himself to reading. Mr. Huntington enjoyed studying the law and when he turned 22 he left the farm to pursue his interest. Unable to afford a formal legal education, he studied on his own. The library of an attorney in a neighboring town provided him with access to the necessary books—his own determination accomplished the rest.

He did well. In 1774, he became an associate judge in the superior court. Mr. Huntington was among those who early on spoke against British tyranny. In October 1775, his wisdom and patriotism earned him an appointment by the Connecticut General Assembly to represent the colony in the Continental Congress.

In the July 1776 Mr. Huntington joined his colleagues in voting for the Declaration of Independence. In 1779, Mr. Huntington served as president of the Congress. As such, some say he was the first President of the United States. He remained a member of that honorable body until 1781, when ill health forced him to retire. Samuel Huntington died on January 5, 1796.

Recently the Norwich Historical Society embarked on a campaign to renovate the tomb of Mr. Huntington and his wife. Over time the tomb had decayed and was in danger of collapse. Our Founding Fathers deserve more, and the leaders of Norwich have responded.

The second individual I recognize is President of the Norwich Historical Society, William Stanley. He is also one of Connecticut's treasures. Bill organized the effort to renovate the tomb and I was very pleased when he called me for support. Bill is a good man and a good friend.

For five decades Bill Stanley has dedicated himself to public service. His resume shows an individual who has a profound devotion to his community and has worked to make it a better place in which to live, work and raise a family.

In 1963, Bill was chairman of the Norwich Flood Rehabilitation Drive and from 1966 to 1970 he was a state senator, representing the 19th District. Over the decades he has served as chairman of the Eastern Connecticut District of the American Cancer Society; led Eastern Connecticut Recruitment for the Boy Scouts of America; been treasurer of the Norwich Industrial Park Association; served as director of the William W. Backus Hospital, and has been vice chairman of the Southeastern Connecticut Water Authority.

Motivated by a desire to improve the lives of our senior citizens, Bill became the founder, treasurer and president of St. Jude Common, a non-profit elderly housing facility in Norwich. St. Jude's provides high quality housing. Bill has also dedicated his time to Norwich Free Academy and served as Chairman of the Norwich Charter Revision Commission.

Bill's public service has not gone unnoticed. He is the 1995 recipient of Norwich Rotary's Outstanding Citizen Award and in 1991 the Eastern Connecticut Chamber of Commerce named him Norwich's Citizen of the Year. Bill is the unofficial Norwich historian, having published several books chronicling the city's past. His "Once Upon a Time" column has appeared in both the New London Day and the Norwich Bulletin.

These are merely a few of the public citations from Bill's years of service. They do not include the many times Bill quietly helped people by making a phone call or offering good advice. Bill served in the Marine Corps. He is a Korean War veteran.

I am proud that I was able to be of some assistance to Bill Stanley in ensuring one of our nation's Founding Fathers received the honor and respect he deserves as America's first president.

IN RECOGNITION OF LILA DE CHAVES-CHRONOPOULOS

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. MALONEY. Mr. Speaker, I rise to pay tribute to Lila De Chaves-Chronopoulos. A remarkable woman, Lila De Chaves-Chronopoulos serves as President of the National Museum of Greek Folk Art, Lifetime Honorary Chair and Executive Global Cultural Director of the Euro-American Women's Council, and President of the Hellenic Federation of Friends of Museums. It is a pleasure to honor this ambassador of Greek folk art and culture.

Lila De Chaves-Chronopoulos has had a distinguished career as an ethnologist specializing in historical and ethnic textiles, jewelry and costumes. Among other accomplishments, she is currently professor of visual arts at American University in Athens. Ms. De Chaves-Chronopoulos is known for her participation in numerous international exhibitions of metalwork in Greece and abroad. She has also given various seminars through the American Women's Organization of Greece, as well as consulting for Hellenic organizations in Greece and the United States. In addition to her educational efforts, Ms. De Chaves-Chronopoulos has worked tirelessly to preserve Hellenic culture and promote Hellenic achievements to audiences around the world.

Granddaughter of an immigrant to America, Lila has strong ties to both the Greek and American communities. Her grandfather, Konstantin V. Chrones, came to the United States at the turn of the century and lived and worked here for 15 years prior to returning to his native Greece to raise a family. Lila's grandfather passed his American experience and his love of Greek culture on to his children and grandchildren. Lila's father, Vassilis K. Chronopoulos, was a well known doctor and revered philanthropist in Greece. The influence of her grandfather's American experience and her father's philanthropic efforts profoundly shaped Lila's life. Just as Lila has helped increase American awareness of Hellenic culture, she has also helped Europeans to understand and appreciate America's unique history, culture and way of life.

As President of the friends of the Museum of Greek Folk Art, Lila has authored numerous articles in both scholarly and mass media publications. Over the years, Lila De Chaves has shared the breadth and depth of her vast knowledge of folk art and jewelry with a wide audience. Her endless efforts to support the arts and culture, and to enlighten communities around the world are commendable.

In recognition of her outstanding achievements, I ask my colleagues to join me in honoring Lila De Chaves-Chronopoulos.

TRIBUTE TO HANK STOVALL, BROOMFIELD COUNTY AND CITY COUNCILMAN

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. UDALL of Colorado. Mr. Speaker, I rise today to acknowledge the outstanding work of Hank Stovall. Hank served for 24 years on the Council for the City and County of Broomfield as a member for Ward 4 and as Mayor Pro Tempore for a number of years.

Along with his colleagues on the city council, Hank helped make Broomfield the diverse and vibrant community that it has become today. He has also helped preserve the high quality of life that citizen in this community at the foothills of the Rocky Mountains have come to expect and appreciate.

The citizens of Broomfield have benefited greatly from Hank's dedicated leadership. He helped secure a quality transportation system in the Broomfield region, including support for the Northwest Parkway, an important highway that will connect this community with the Denver International Airport and other important access roads in the region. This Parkway will also include an open space buffer that will add to the quality of the Broomfield neighborhoods as well as increase transportation efficiency and access. He also worked with coalition to improve the US 36 highway corridor and the Broomfield intersections to this important highway corridor.

He also has helped ensure that Broomfield's transition from a city to a county was smooth, effective and successful. He and his colleagues recognized the importance of establishing Broomfield as a city and county so as to better serve its citizens. Before the conversion to a county, residents were required to travel to four distant county offices as the city was spread across four separate counties. By making Broomfield a county, the citizens of this community can now enjoy the efficiencies that come with that designation as well as further develop the sense of community that he and others have sought to accomplish.

Hank has been involved in many regional and State governmental committees, authorities, task forces and coalitions. All of this work was designed to promote effective governmental function and quality services to citizens and communities in the Broomfield region.

But perhaps his most lasting legacy will be his leadership on issues related to Rocky Flats, the former U.S. Department of Energy nuclear weapons production facility just south of the city and county. He brought his knowledge of nuclear issues to the table as strategies and approaches for cleaning up this facility were being discussed and developed. He insisted that the cleanup be thorough, cost effective and protective of the health, safety and environment of the surrounding communities. He was also a strong proponent of preserving the open space resources at this site and was an early advocate of designating the site as a national wildlife refuge. His support, as well as the support of other leaders surrounding the site, helped make this a reality.

He remained very concerned with public health and safety issues related to this site

and its cleanup, closure and conversion to a national wildlife refuge. He was especially concerned about the health and safety of the workers at the site and pushed for instituting a high level of safety in all facets of the work done there.

Hank leaves the Broomfield County and City Council with a long and distinguished record of accomplishment and service. The citizens of Broomfield enjoy a quality of life, a strong sense of community and a solid reputation for service and leadership on regional issues because of Hank's involvement and public service work. I ask my colleagues to join me in wishing Hank every success in his future endeavors and hope that he remains active in community and regional issues for years to come.

IN HONOR OF THE FERTITTA FAMILY 105TH ANNIVERSARY REUNION

HON. NICK LAMPSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 21, 2003

Mr. LAMPSON. Mr. Speaker, I rise today to pay tribute to the 105th Anniversary of the highly regarded Fertitta Family in Galveston, Texas. The Fertitta family generously devotes their time, integrity, and leadership to every community their journey encounters.

This family reunion is a rare celebration of perseverance, achievement, loyalty, and love of an incredible ancestry. The Fertitta family heritage traces their roots back more than a century ago to Palermo, Sicily where a courageous young man named Joseph Fertitta made the pivotal decision to come to America in 1897.

Joseph and Olivia Fertitta have inspired hundreds of descendents to travel across the country to Galveston, Texas to celebrate the trials and joys of life together as a family. It is to he and his wife Olivia that a profound amount of respect and honor should be paid to, and upon whose base this incredible family is built upon.

Mr. Speaker, on November 29th, this family will commemorate its anniversary of over 100 years of faith and love. I ask you, and all of my colleagues, to join me in recognizing this remarkable family's triumph that has passed the test of time and remains a shining example of America's strength and unity.

H. CON. RES. 257—PRESIDENTIAL MEDAL OF FREEDOM TO HARRY W. COLMERY

HON. HENRY E. BROWN, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BROWN of South Carolina. Mr. Speaker, I rise today in strong support of House Resolution 257 urging President Bush to bestow this Nation's highest civilian honor, the Presidential Medal of Freedom Award, on Harry W. Colmery, former national commander of The American Legion.

Mr. Colmery is credited with drafting the Servicemen's Readjustment Act of 1944, otherwise known as the World War II "GI Bill of Rights." The GI Bill not only enabled the successful transition of millions of World War II veterans back to civilian life, but also paved the way to create America's modern middle class.

In fact, about 7.8 million men and women were educated or trained by the World War II GI Bill, arguably our most successful domestic program ever.

With our brave service men and women currently engaged in dangerous military operations in Iraq, Afghanistan and other areas of the world in support of the Global War on Terrorism, it is so critical for Congress to continue to provide our military personnel with top-notch benefits like today's Montgomery GI Bill. As I travel throughout the first district of South Carolina, veterans and current service members always remind me of the importance of these educational benefits.

Mr. Speaker, I ask my fellow colleagues to support this Resolution to honor Harry W. Colmery, a man of extraordinary wisdom and foresight.

VETERAN TRIBUTE FOR CHIEF GUNNERSMATE WILLIAM L. WRAY

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Chief Gunnersmate William L. Wray.

Chief Gunnersmate Wray served as a United States Navy Frogman in World War II and the Korean War. Throughout his military career Chief Gunnersmate Wray earned three purple hearts, the World War II Commemorative Medal, and was a Prisoner Of War in World War II. He also received the Korean War Medal with two stars, United Nations Korean Service Medal, and numerous other accolades for his service.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Chief Gunnersmate Wray, for your service and sacrifice. You are a true hero.

CENTRAL NEW JERSEY RECOGNIZES AND CELEBRATES JOHN G. McCORMACK, CHIEF OF POLICE, MANALAPAN, NJ

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, I rise today to recognize the career of Chief John G. McCormack, who has served the Manalapan Police Department and the people of Manalapan for 30 years and as chief for 7 years.

In his 30 years of service he has risen through the ranks of the Manalapan Police Department, starting as a police dispatcher in 1973.

Along with his commitment to the department he has spent numerous hours serving as the Emergency Management Coordinator for the Township of Manalapan for the last seven years. He also serves as the Municipal Disaster Control Director for the town and sits on the Monmouth County Community Crisis Response Planning Committee.

His dedication to his work earned him the honor of being named Chief of the Year by the Princeton Education Research Institute and the Law Enforcement Man of the Year by the Manalapan-Marlboro Post 972 Jewish War Veterans of the United States.

Prior to serving and protecting his community, Chief McCormack served his country. He served four years in the United States Air Force, including a tour in Vietnam.

As an inspiration to police officers in his department and the state of New Jersey, Chief McCormack has contributed significantly to the life of his community. He has earned our heartfelt appreciation for his efforts.

HONORING ST. PAUL AFRICAN METHODIST EPISCOPAL CHURCH

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. LEE. Mr. Speaker, I rise today to honor St. Paul African Methodist Episcopal Church, and its Bishop, John Richard Bryant. On Sunday, November 23, 2003, St. Paul AME will celebrate seventy years of serving the greater Bay Area community.

The Reverend E.N. Elliott developed the foundations for the Berkeley Mission in 1933. He was very proud to report his three members to the African Methodist Episcopal 69th Annual Conference.

Early developmental meetings were held in the home of Rev. and Mrs. Speese, but the needs of a rapidly-growing congregation led to the establishment of a temporary church headquarters at the corner of Grove Street and Russell in Berkeley. The Sunday school was set up during the very first week at that site.

Later on, the property at 1630 Fairview was purchased under the leadership of Rev. H.C. Claybrook. The name, Berkeley Mission, was changed to St. Paul AME Church, and the Seal of Incorporation was secured in early

1937. In 1953, St. Paul moved to the current location at 2024 Ashby Avenue.

The St. Paul AME family has come a long way from its humble beginning. The congregation has expanded to over 1,100 members and continues to grow today. St. Paul enjoys the distinction of being the only African Methodist Episcopal Church in Berkeley, California. Its ministries provide a wide spectrum of service, offering food, clothing, and housing referrals for those in need. Additionally, its doors are open for meetings of Narcotics Anonymous, Alzheimer's, and diabetes support groups. Children in the Berkeley community are served through education, tutorial and Saturday programs, as well as exercise classes.

Today, St. Paul AME is under the guidance of Presiding Prelate Fifth Episcopal District Bishop John Richard Bryant and Episcopal Supervisor Reverend Dr. Cecelia Williams Bryant. Reverend Dr. Vernon Steven Burroughs is the Presiding Elder and Reverend Dr. Allen Williams is the Pastor.

I take great pride in joining friends, family, and the congregation to salute St. Paul African Methodist Episcopal Church and its leader, the extraordinary Bishop John Bryant, on the seventieth anniversary of service.

DEPARTMENT OF THE TREASURY INSPECTOR GENERAL CONSOLIDATION ACT OF 2003

HON. ROB PORTMAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. PORTMAN. Mr. Speaker, today I am introducing legislation, the Department of the Treasury Inspector General Consolidation Act of 2003, which will promote efficiencies and improve oversight at the Department of the Treasury. The measure I am proposing will merge two existing Inspector General offices at the U.S. Treasury—the Office of Inspector General of the Treasury (OIG) and the Treasury Inspector General for Tax Administration (TIGTA)—into a new office called the Office of the Treasury Inspector General (TIG).

The Department of the Treasury is the only agency with two Inspectors General. The benefit derived by consolidating OIG and TIGTA will be better oversight for all of Treasury, including the IRS, while ensuring that the new organization has all the same powers and authority as its predecessors have under current law.

The legislation I am introducing is necessary because the creation of the Department of Homeland Security has resulted in significant reduction in agencies and personnel at Treasury. The U.S. Customs Service, U.S. Secret Service, the Federal Law Enforcement Training Center, and most of the Bureau of Alcohol, Tobacco and Firearms have been moved to the Department of Homeland Security and the Department of Justice. The current TIGTA and OIG structure does not recognize the new organizations, where IRS has 87 percent and the rest of Treasury has 13 percent of the remaining personnel resources.

A single, elevated IG will provide strong oversight to all of Treasury's current operations. The Department also will gain the efficiencies from the merger by eliminating duplication and creating a more effective and efficient operation to further the mission of both offices.

TRIBUTE TO SERGEANT FIRST CLASS KELLY M. BOLOR

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. SOLIS. Mr. Speaker, I rise to pay tribute to Sergeant First Class Kelly M. Bolor, 137th Quartermaster Company, United States Army Reserve, located in South El Monte, California. This brave and compassionate man dedicated his life to protecting our country and the freedoms that we all enjoy. On November 15, 2003, Sergeant First Class Kelly Bolor made the ultimate sacrifice and was killed while serving our country during Operation Iraqi Freedom.

Sergeant First Class Kelly Bolor was born December 20, 1965, and raised in Hawaii with his twin brother. He graduated from Lahainaluna High School in June 1984. Shortly after graduating Sergeant First Class Bolor enlisted in the United States Army, beginning an almost 20 year military career.

In 1984, Sergeant First Class Bolor graduated from a 92Y Supply Specialist course from Fort Jackson. Subsequently, in 1986, he completed Fort Benning Airborne School. On March 1, 1998, Sergeant Bolor joined the United States Army Reserve. He rose to the rank of Platoon Sergeant for the 137th Quartermaster Company on January 10, 2002.

Sergeant First Class Bolor is a Desert Storm veteran, and served overseas duty in Fort Wainwright, Alaska in 1988, Southwest Asia in 1991, Camp Humphrey's Korea in 1993 and finally Iraqi Freedom in 2003.

Sergeant First Class Kelly M. Bolor served our country as a true patriot and defender of democracy. He leaves behind widow Kelly Bolor and son Kyle, age three. Let us preserve the memory of Kelly M. Bolor so that his son may learn about his father, who was a kind-hearted man who put the safety and well-being of his country and fellow soldiers first.

HONORING THE LIFE AND WORK OF KENNETH WILEY

HON. CIRO D. RODRIGUEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. RODRIGUEZ. Mr. Speaker, I rise today to honor the life and work of Kenneth Wiley. Kenneth has been a leader in the San Antonio community, and he serves as a positive role model for future generations of labor advocates.

Born in Union Valley, Texas, Kenneth married Dorothy Sutton Wiley. He is the proud father of Sharron Kay Pacheck, Terry Marshall Wiley, and James Arthur Gross and the beloved grandfather to 11 grandchildren and 6 great-grandchildren.

Kenneth began working at Southwestern Bell Telephone Company in 1948 where he served as a lineman, an installer, a telephone repeaterman, and a central office technician. During his years of service at Southwestern Bell, he served his fellow workers as a job steward, a chief steward, legislative director, and vice president for the Communications Workers of America (CWA). He also served for 13 years as the president of the CWA, Local 6143.

A tireless advocate for labor in local, state, and national politics, Kenneth also worked for the rights of his fellow workers as a member of the State Democratic Committee and the San Antonio and Texas AFL/CIO Councils.

Kenneth has also worked to improve his local community serving on the boards of the San Antonio United Way, San Antonio's Council on Alcoholism, the USO, Goodwill Industries, and San Antonio's Centro 21 Committee.

I have had the great privilege of knowing Kenneth for many years, and I am well acquainted with his good works, his strong moral character, and his selfless dedication to his friends, families, co-workers, and community. I rise today to honor Kenneth Wiley's legacy of community service and his commitment to protect the rights of American working men and women.

RECOGNIZING COLIN A. HANNA

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GERLACH. Mr. Speaker, I rise today to recognize Colin A. Hanna for his eight years of service as commissioner of the Chester County Board of Commissioners.

Colin Hanna was first elected Chester County Commissioner in November 1995 and ran successful races to serve as Chairman of the Chester County Board of Commissioners in 1998, 1999, 2001 and this year, 2003. After only six months, he was elected by his colleagues to represent the County on the Delaware Valley Regional Planning Commission, which he chaired for two terms spanning four years from 1996 to 2000. He was also appointed Chairman of the Housing Authority of Chester County where he saved the agency from insolvency by undertaking an extensive reorganization process. During his tenure, the nationally-acclaimed County comprehensive plan, "Landscapes," was adopted and Chester County achieved its first bond-rating increase in 28 years, bringing it to the second highest in the Commonwealth. Mr. Hanna is a two-time recipient of the Governor's Award for Local Government Excellence—once with his commissioner colleagues and once individually.

Mr. Hanna has lived in Chester County virtually his entire life and chose to attend college at the University of Pennsylvania in nearby Philadelphia where he met his wife Pricie in 1967. After graduating from the University in 1968, Colin was commissioned an officer in the U.S. Navy. When his military service ended, he became employed with the CBS network in New York before returning to Chester County in 1972. He continued his work

with CBS in Philadelphia before becoming President of Industrial Advertising Incorporated, which at the time was Chester County's largest advertising agency. Eventually, he would sell his ownership in the agency and pursue work in the marketing field as a management and executive search consultant. He continued his consulting work until 1991 when he founded PC Helper, a computer support and maintenance firm specializing in small business networks. In 1996, Colin Hanna sold his firm and chose to devote his time and energy to public service and the job of County Commissioner where he has remained a tremendous asset to the community. Mr. Hanna brings with him to the Chester County Board of Commissioners years of hard work, experience and leadership that has allowed him to be a driving force in making Chester County a better place for all of its residents.

I ask that my colleagues join me today in recognizing Colin Hanna for his exemplary citizenship and service to our community. His enduring devotion and unwavering support has made him a man for which Chester County and our entire nation can be proud.

TRIBUTE TO MOUNTAIN PARK ENVIRONMENTAL CENTER'S EARTH STUDIES PROGRAM

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCINNIS. Mr. Speaker, it is with great pride that I rise today to pay tribute to an award-winning Earth Studies Program at Mountain Park Environmental Center in Beulah, Colorado. The program provides children with the wonderful opportunity to learn about the environment while providing them an alternative to abusive lifestyles such as gangs and drugs. I would like to join my colleagues here today in recognizing the Mountain Park Environmental Center's tremendous service to the Pueblo community.

The Earth Studies Program is a yearlong outdoor-based education course that covers basic subjects in language art, math, social studies, and geography in addition to environmental sciences. Students learn firsthand about ecosystems, three identification, and stream ecology. Recently, the Earth Studies program was recognized by the Colorado Alliance for Environmental Education for excellence in environmental education. It is truly an outstanding program.

Mr. Speaker, the Earth Studies Program at Mountain Park Environmental Center is an educational organization that encourages students to develop a love for nature. The program enriches the lives of Pueblo's students and the entire Colorado community. The Earth Studies Program is a learning experience that positively affects every child who is able to participate. It is my honor today to pay tribute to this fine educational program before this body of Congress.

TRIBUTE TO RAY BECKER, PRESIDENT, BUILDING INDUSTRY ASSOCIATION

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CALVERT. Mr. Speaker, I rise today to honor and pay tribute to an individual whose dedication and contributions to the community of Southern California are exceptional. Southern California has been fortunate to have dynamic and dedicated community leaders who willingly and unselfishly give their time and talent and make their communities a better place to live and work. Ray Becker is one of these individuals. Ray will be stepping down as President of the Building Industry Association of Southern California (BIA) and I would like to thank him for his service.

Ray originally came to the Inland Empire in the early 1980s as Vice President and Division Manager with the Lusk Company. During 20 years in Southern California real estate development, Ray has managed the construction of more than 3,000 homes and 16,000 home sites. For eight years Ray taught Light Construction and Development Management at the University of California, Riverside.

Ray is also Senior Vice President of Lennar Communities Inland, a division of Lunar Homes of California. Lunar is a national real estate company listed on the New York Stock Exchange and is one of the largest public homebuilders in the United States. Under his leadership, Lunar acquires, plans, entitles, develops, markets, sells, and manages medium and large scale communities.

Ray has been an excellent President of BIA and continually promotes the building profession. He is also involved in California BIA and the National Association of Homebuilders. He is past President of the Inland Chapter of HomeAid, an industry charitable foundation, and has held the Presidency of the Youth Service Center and Parkview Community Hospital Foundation. Ray's commitment to the community and to Southern California is exemplary.

Ray's tireless passion for the building industry has contributed immensely to the betterment of the community of Southern California. I am proud to call him a fellow community member, American and friend. I know that many BIA members and homebuilders are grateful for his service and salute him as he steps down from his position.

H.R. 1964, THE HIGHLANDS STEWARDSHIP ACT

HON. SUE W. KELLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. KELLY. Mr. Speaker, I rise today to urge the passage of H.R. 1964, the Highlands Stewardship Act.

The Highlands region is spread through parts of New York, New Jersey, Connecticut, and Pennsylvania and covers more than two million acres of pristine, undeveloped land. In studies in 1992 and 2002, the National Forest Service recognized the Highlands as "nationally significant" and estimated that 5,000 acres of land are lost to development just in the New York and New Jersey portions of the Highlands.

The Highlands also serve as an "oasis" amid the urban centers of Philadelphia, Hartford, and New York. The region, with its networks of reservoirs and aquifers, supplies clean, safe drinking water for over 11 million Americans. At the moment, only 23% of those watershed lands are protected, with almost 100,000 of those acres being immediately threatened. Without these water sources, the sprawling metropolises we know today and New York and Philadelphia would have never developed.

The tourist value of this region cannot be overlooked. Every year, over 14 million people visit the Highlands. This total is higher than the number of people who visit Yellowstone National Park every year, and we don't even have a geyser.

Twenty million people live within a two hour drive of the Highlands. With the ever-increasing rigors of city and suburban life, it is important to have a place for families to unwind and interact with the natural splendors that are too often missing from their lives. The Highlands provides that and so much more. This bill will ensure that these natural beauties survive so that future generations can enjoy them as we do now.

IN HONOR OF FATHER MARINO FRASCATI

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. KUCINICH. Mr. Speaker, I rise today in honor of and recognition of Father Marino Frascati, founding member of the Detroit Shoreway Community Development Organization—and spiritual guide, healer, and beloved mentor and friend to many in this Westside community for more than fifty years. Father Frascati, parish priest of Our Lady of Mount Caramel Church, continues to serve the Detroit-Shoreway neighborhood with integrity, compassion, and grace, and was bestowed the honorary appointment of President for Life with the Detroit Shoreway Community Development Organization. Father Frascati has been a steady and focused instrument of healing, preservation, growth and hope along the streets of this neighborhood.

When others lost hope and turned away, Father Frascati dug in, continuing his quest to improve the lives of the families, seniors and individuals who live and work within this Westside community. His rare ability to connect with others and bring people and groups together for the common good has significantly improved all aspects of this neighborhood.

Father Frascati was instrumental in renovating and developing countless commercial and residential structures along Cleveland's Westside. Due to his persistence and personal

meetings with Monsignor Barone, then Undersecretary for the U.S. Department of Housing and Urban Development, the Detroit-Shoreway neighborhood was the first community in Cuyahoga County to be awarded the Urban Development Action Grant for a neighborhood project. This grant resulted in the construction of Father Caruso Boulevard and restoration of the historical Gordon Square Arcade. Despite opposition and adversity, Father Frascati remains a tireless and unwavering champion of this neighborhood. Father Frascati established Nolasco Corporation which resulted in new housing for senior citizens and low income families. Additionally, Father Frascati has created strong and enduring bonds with local business owners, bringing businesses and jobs—like Bank One at the Gordon Square Arcade—back into the neighborhood.

Mr. Speaker and colleagues, please join me in honor, recognition and gratitude of Father Marino Frascati, whose compassion, commitment and energy continues to create a haven of assistance, hope and renewal along the streets of Detroit-Shoreway and beyond. His presence, vision, leadership, and unwavering faith in the people and possibilities of this community have restored and uplifted the very foundation of this neighborhood—reclaiming the heart and soul of this community one brick, one senior citizen, one family at a time.

PERSONAL EXPLANATION

HON. VERNON J. EHLERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. EHLERS. Mr. Speaker, on rollcall No. 641, 642, 643, and 644, I was absent because I was receiving a major named award from and giving remarks to the national meeting of the American Society of Mechanical Engineers.

Had I been present, I would have voted "aye" on all four votes.

THE ISRAELI-PALESTINIAN CONFLICT

HON. RICHARD BURR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURR. Mr. Speaker, I rise today to discuss the lack of progress in the Middle East peace process. Aside from our own Nation's ongoing military operations in the war against terrorism, the Israeli-Palestinian conflict is one of the most important foreign policy issues being discussed and debated by my constituents.

Clearly, there is a wide range of points of view on this critically important issue, and they cover the range of the political spectrum. I would like to take this opportunity, Mr. Speaker, to outline some of my own thoughts on some of these subjects.

I should state at the outset that I believe Israel has a right to defend herself against the actions of Palestinian extremists. It would be the height of hypocrisy, Mr. Speaker, for our own country—engaged in its own fight against terrorists bent our destruction—to deny Israel the right to pursue those bent on her destruction. Since obtaining independence in 1948, Israel has been engaged in a near-constant struggle for survival.

The current violence, and Israel's military response to it, is a reflection and continuation of that struggle. There are some on the Palestinian side, many of whom have close ties—if not direct connections—to Yasser Arafat and the Palestinian Authority, who desire nothing less than the destruction of the state of Israel. These are the very groups sending young Palestinians to detonate suicide bombs on buses, in pizza parlors, in sidewalk cafes, and even at Jewish religious celebrations. On that basis alone, Israel has no choice but to continue efforts to round up those responsible. Even prior to the eruption of the latest violence more than two years ago, Arafat refused to do so. He refuses to do so to this day.

It is clear, Mr. Speaker, that Arafat has abdicated his position as a responsible negotiator and representative of the best interests of the Palestinian people. On too many occasions, he has walked away from the peace table and given tacit approval to renewed violence by Palestinian extremists. Arafat remains—for better or worse—the "chosen" representative of the Palestinian people. For real progress to occur, however, the Palestinian people need a prime minister with real authority—the authority to go after the extremists, the authority to negotiate with the government of Israel, and the authority to make decisions that will not be overturned at Arafat's whim. If a lasting peace in the Middle East is the ultimate goal, and I firmly believe that it must be, the Palestinian people must have a capable, effective prime minister. I am hopeful that Ahmed Qureia, sworn in as the Palestinian prime minister earlier this month, will be permitted to take the steps necessary to end the terror attacks against Israel and return the Palestinians to the peace table.

I am not opposed to the establishment of an independent Palestinian state. Neither, for that matter, are the people and government of Israel. That state, however, can only be established if it and the larger Arab world in turn recognize Israel's right to exist. Without that recognition, there can be no lasting peace. If Israel were to accept the establishment of an independent Palestinian state that maintained its opposition to Israel's existence, the country would only be ensuring its own destruction.

I firmly believe that our country should continue providing financial and military assistance to the Israeli people. As long as the nations surrounding Israel continue to provide assistance to those trying to destroy the country, the United States should continue its efforts to support her. As the region's only democratically elected government, Israel deserves our support.

Our Nation has an important role to play in the peace process, Mr. Speaker, and we should continue to do so. We can and should continue diplomatic efforts to bring a lasting peace to the region. It remains to be seen if the Arab states, which have called on us to play a more active role, will actually respect that role. I do not believe, however, that our involvement should extend to the deployment of U.S. troops to "police" any final peace agreement. Any agreement that requires peacekeepers to be deployed is flawed to begin with—it means neither side actually expects the other to abide by the agreement's provisions. We must pursue a comprehensive agreement that both sides accept.

Having accepted Israel's right to defend herself, I also believe there must come a time for negotiations and a legitimate peace process. Israel should make every effort to limit incursions into Palestinian-controlled areas. There must be recognition, both in this country and around the world, that both sides must be willing to talk. The Israelis have shown that willingness in the past, and have made significant proposals aimed at achieving a lasting peace. What remains, however, is the need for a serious commitment on the part of the Palestinians to return to the table and actively work with the Israelis.

In order for that to happen, though, the new Palestinian leadership must denounce terrorism once and for all and make a firm commitment to restrain, arrest, detain, and destroy those militant elements in Palestinian areas that want the violence to continue. After all, there are groups who have stated that they will never accept cease-fire, nor respect any peace agreement. More than a firm commitment, however, the Palestinians must take firm action—or empower a prime minister to take firm action on their behalf.

In crisis, Mr. Speaker, there is opportunity. The only thing that remains is for both sides to accept the challenge, and take advantage of the opportunity. Peace in the region is long overdue, but it will take the active participation of both sides to achieve it.

HONORING PAUL J. SIMMERT OF NORWICH, CONNECTICUT

HON. ROB SIMMONS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SIMMONS. Mr. Speaker, I rise today to honor Cadet Paul J. Simmert of Norwich, Connecticut who was recently named Chief Petty Officer of the Nautilus 571 Division of the United States Naval Sea Cadet Corps.

At only 17 years of age, Paul will be in command of 50 cadets, ranging in age from 11 to 17 years. This appointment follows tremendous hard work and dedication, including the completion of regulation U.S. Navy courses and many months of training throughout the country over the past 4 years.

Having a father in the Navy inspired Paul's interest in serving his country at a very young age. At 12, he took the first steps toward what will be a very successful career in the U.S. Navy by joining the U.S. Sea Cadet Corps. Through this program, Paul has been able to take on important responsibilities and learn the ropes of the United States Navy.

Chief Petty Officer Simmert is an exemplary young man and is highly deserving of this great honor and responsibility. I am most proud to have him serving his peers in this capacity. Now more than ever, we need young

men like Paul to take the lead in protecting the freedoms that this great country was founded on for future generations.

Mr. Speaker, I would encourage the Members of the House of Representatives to join me in congratulating Chief Petty Officer Paul J. Simmert in receiving this prestigious award and thanking him for the contributions he makes to his country.

IN RECOGNITION OF AN INTERFAITH CELEBRATION OF THANKSGIVING

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. MALONEY. Mr. Speaker, I rise today to pay tribute to a group of congregations in my district that will come together to give thanks in the true spirit of Thanksgiving. These congregations are of different faiths, different sects and different practices. Nonetheless, they have in common a love for our country and gratitude to our Creator for bringing them or their forebears to a democratic country where civil rights and individual freedoms are protected. This inspired them to plan a joint service to give thanks.

Thanksgiving is a holiday that belongs to every American. It unites our country and embodies the principles upon which our great nation was founded. The first Thanksgiving is an account of immigrants arriving on a remote continent, launching a new life, surviving dangerous conditions, encountering a different culture, and sitting down with strangers to enjoy the bounty of this land. As waves of new Americans have found welcome here, they have embraced American values and joined in celebrating Thanksgiving.

Thanksgiving symbolizes the bond that unites the very first immigrants with every subsequent generation of Americans. When we recreate the meal eaten at the first Thanksgiving, we remember the importance of sharing, kindness and tolerance, and we are grateful for the rich bounty offered us by this country. This is a land filled with plenty—fertile soil, rich resources and, most of all, liberty. We also recall, with sadness, that although the early immigrants were greeted with friendship by the native Americans, they reciprocated with hostility, greed and intolerance. Thanksgiving gives us an opportunity to be at our best, to welcome friends and family into our homes, and to recall those who are not as well off. Many Americans take time to feed the hungry in Thanksgiving celebrations at homeless shelters, soup kitchens and neighborhood civic organizations.

The Pilgrims arrived in the new world in November 1620, too late to plant crops. Of 110 men and women who arrived here from Europe, fewer than 50 survived the first hard winter. With help from a neighboring tribe, the Pilgrims learned how to cultivate local produce. In the fall they celebrated the harvest with members of the tribe. Over time, this harvest celebration became an institution. In 1817 New York State adopted Thanksgiving Day as an annual custom. By the middle of the 19th century many other states also celebrated a Thanksgiving Day. In 1863 President Abraham Lincoln appointed a national day of thanksgiving. Since then every subsequent President has issued a proclamation designating a day of Thanksgiving.

At dark times in our history the celebration of Thanksgiving has seemed especially poignant. For example, in 1942, London's Westminster Abbey held its first secular service in nine centuries, hosting a Thanksgiving event for U.S. troops stationed in England. More than 3,500 people filled the church, reveling in singing "The Star Spangled Banner" and "America the Beautiful". Everything that marked their differences—geography, religion, race—seemed insignificant in comparison to the things that united them and the liberties they had joined in battle to defend.

In times of tragedy, Thanksgiving has served to rally our nation. Six days after the assassination of President Kennedy, President Lyndon Johnson addressed the nation on Thanksgiving Day. He asked his fellow citizens to remain "determined that from this midnight of tragedy we shall move toward a new American greatness."

Mr. Speaker, I pay tribute to the congregations that honor the true spirit of Thanksgiving by setting aside the differences among their faiths and joining together to celebrate the liberties and freedoms we all treasure.

H.R. 2417, INTELLIGENCE AUTHORIZATION AGREEMENT

SPEECH OF

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. UDALL of Colorado. Mr. Speaker, I rise in opposition to H.R. 2417. I voted for this bill earlier this year, but I cannot support it today.

I have concerns about a provision in the conference report that would expand financial surveillance authority of our intelligence agencies. I also had concerns about this provision in the first version of the bill that passed the House, but I supported the bill then in the hope that the language would be further clarified in the final conference report. It has not been.

Whereas currently banks, credit unions, and other financial institutions are required to provide certain financial data to authorized intelligence agencies and the Treasury Department, this legislation would expand the list of institutions to include car dealers, pawnbrokers, travel agents, casinos, and other businesses.

This expanded definition of "financial institution" may indeed be necessary for effective counterintelligence, foreign intelligence, and international operations of the United States. But since this will represent such a significant expansion of the powers of our intelligence agencies, I believe it is important that it be clear and not go further than necessary.

In particular, I am concerned that the language in the conference report only vaguely limits this expanded definition to financial information. I understand that report language makes this distinction more explicit, but that bill conferees objected to including this clarifying language in the conference report itself. The legislative intent of this provision is to expand surveillance in the area of financial—not other—information, but there are no assurances that this intent will be observed when the legislation is implemented.

Mr. Speaker, this provision in the conference report involves the privacy rights of Americans—rights that I believe strongly we must protect even as we work to combat terrorism. Because I'm concerned that this conference report does not strike the right balance, I am voting against it today.

COMMENDING BUSINESS AND INDUSTRY ON EXEMPLARY EFFORTS TOWARD THEIR MILITARY GUARD AND RESERVE EMPLOYEES

HON. HENRY E. BROWN, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BROWN of South Carolina. Mr. Speaker, I rise today to commend the efforts of many in the business and industry community who far exceed current-law requirements of the Uniformed Services Employment and Reemployment Rights Act, better known as USERRA. The act simply states that when a Reserve or Guard member returns from active duty he or she is entitled to the job that they left behind.

However, USERRA not only protects Reserve and Guard members and their families, it also gives America's business and industry a chance to be part of the ongoing effort to protect our freedoms.

Companies like Schering-Plough, ExxonMobil, SCANA Corporation, Wal-Mart, W. W. Grainger, International Paper, and the McNaughton-McKay Electrical Company in South Carolina, all have added enhancements such as paying the full salary deferential, continuing health and life insurance for the servicemembers and their families, and even creating special Web sites for spouses. These are outstanding corporate citizens and I applaud them.

With more than 150,000 reserve component service members still on active duty in support of Operation Iraqi Freedom and the Global War on Terrorism, this effort is very critical. Mr. Speaker, I urge all employers to not only follow the letter of the law with respect to mobilized Reservists, but to also do their part in supporting the war on terror.

VETERAN TRIBUTE FOR STAFF SERGEANT BILLY J. WEBSTER

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Staff Sergeant Billy J. Webster.

Staff Sergeant Webster began his military service in the United States Navy during World War II, where he partook in raids on Tokyo Bay under the command of legendary Admiral Halsey. Following the conclusion of World War II, Staff Sergeant Webster joined the Air Force, and he concluded his military service with a posting at Little Rock United States Air Force Base in Arkansas. Staff Sergeant Webster received numerous awards throughout his armed services career. Some of these awards include the World War II Victory Medal, American Campaign Medal, Air Force Longevity Service Award with 2 Oak Leaves, and the National Defense Medal.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Staff Sergeant Webster, for your service and sacrifice. You are a true hero.

CENTRAL NEW JERSEY RECOGNIZES AND CELEBRATES THE CAREER OF HERBERT BARRACK

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, I rise today to recognize the career of Herbert Barrack, who has served the Federal Environmental Protection Agency for 32 years.

A resident of Manalapan, he has risen through the ranks of the EPA by demonstrating his commitment to the protection of public health and the environment.

Under Herb's direction as the Chief Financial Manager of the New York Regional Office of Policy and Management, the department has expanded its capacity in administrative areas such as information systems management, financial management, grants management and human resources management

Mr. Barrack was the first EPA Assistant Regional Administrator for Policy and Management, as well as the first Executive Director of the Administrator's Environmental Financial Advisory Board.

In 1994 Mr. Barrack became one of only two regional representatives on the Regulatory Policy Council, overseeing the EPA's implementation of new Executive Orders on Regulatory Development.

His dedication to his work earned him both the Silver and Gold Medal for Exceptional Service. Mr. Barrack has also received Presidential Rank Awards of SES Meritorious Executive three times in recognition of quality and efficiency in public service.

As an inspiration to his community and the state of New Jersey, Mr. Barrack has contributed significantly to the life of his community. He has earned our heartfelt appreciation for his efforts.

RECOGNIZING KAREN L. MARTYNICK

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GERLACH. Mr. Speaker. I rise today to recognize Karen L. Martynick for her twelve years of service as Commissioner on the Chester County Board of Commissioners.

Karen Martynick has been a Chester County Commissioner since 1992 and has served as Chairman of the Board for five years. As Commissioner, Ms. Martynick oversees a budget of $450 million and a workforce of 2500 employees and is responsible for administering and funding a wide array of departments, programs and services.

Under Commissioner Martynick's leadership, Chester County implemented a new comprehensive land development plan called "Landscapes" which has received numerous awards and been cited as a model for other counties around the Commonwealth and the country. Her land use work resulted in her selection by Governor Ridge to participate on his Sound Land Use Advisory Committee. Ms. Martynick was also selected by her colleagues to chair the Sustainable Communities Task Force, a special initiative of the County Commissioners Association of Pennsylvania. In addition, she also serves on the Board of Directors of the Association and has chaired the Legislative and Community and Economic Development Committees. In 1999, Commissioner Martynick was elected to the Board of Directors of the National Association of Counties. During her tenure, she has been named to the Commonwealth of Pennsylvania's "Honor Roll of Women" and in 1998 was selected by her colleagues throughout the state as the Outstanding County Commissioner of the Year.

In addition to her duties as County Commissioner, Karen Martynick has served for ten years as a member of the Southeastern Pennsylvania Transportation Authority (SEPTA). As a SEPTA Board Member, Commissioner Martynick has been an advocate for increased public transit in the suburbs and pushed for improved service to Chester County. She has served on the Operations Committee and the Budget and Planning Committee of SEPTA and currently chairs the Administration Committee. In 2001, Ms. Martynick was named by Administrator Christie Todd Whitman as one of 15 local officials from around the country to serve on the EPA's Local Government Advisory Committee.

Karen Martynick has been active in her community for many years. She has served on the Board of Directors for the United Way of Chester County, the People's Light and Theatre Company and as President of the Friends of Historic Goshenville, where she was instrumental in raising money to preserve two historic buildings. She was active for many years with the Boy Scouts of America, most recently serving as a Merit Badge Counselor and as a member of the District Executive Search Committee. She also served on the Capital Campaign Committee for the Goshen Fire Company, the Women of Achievement Dinner Committee for the March of Dimes and has taught Sunday school at her church.

Mr. Speaker, I ask my colleagues join me today in recognizing and honoring Karen L. Martynick for the hard work and civic dedication she has demonstrated over the years in making Chester County and the Commonwealth of Pennsylvania a better place to live.

TRIBUTE TO PUEBLO MOTIVE SERVICE

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable business in my district. Pueblo Motive Service has been serving the Pueblo community since 1946, and it is my honor to rise and pay tribute to their contributions to the people of Pueblo before this body of Congress and our nation.

The employees of Pueblo Motive Service have always approached their work with the customer in mind. The current owner, Jim Ward, often spends a large portion of his day on the phone discussing mechanical problems with his many customers. The store always maintains a family atmosphere. Longtime customers can often be found discussing old times with the store's owner and staff. There is even an honor system in which the store trusts its customers to place their payment in a mailbox when they are in a hurry.

In addition to its magnificent customer service, Pueblo Motive Service is also active in the community. Past owner Ralph Simmons made a significant donation to the University of Southern Colorado in order to help students enhance their education. To this day, Pueblo Motive Service continues to support the university's automotive parts and service program, which educates students in the automotive industry.

Mr. Speaker, it is my honor to rise before this body of Congress and our nation to call attention to the contributions of Pueblo Motive Service. Over the years, Pueblo Motive Service has been dedicated to keeping the citizens of Pueblo equipped with safe and reliable transportation. The business continues to serve the people of Pueblo with dedicated and friendly customer service and I would like to join the customers of Pueblo Motive Service in thanking them for their hard work.

A PARTNERSHIP COMMITTED TO DEMOCRACY

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. WOLF. Mr. Speaker, I would like to commend the President for highlighting the longstanding friendship between the United States and the United Kingdom in his recent speech delivered at Whitehall Palace in London. It is encouraging that this administration is taking a strong stand against tyranny, but I

am further encouraged that we are not forced to travel this road alone. The history of the United States and the United Kingdom has been forged on the belief that freedom is the natural right of all men. It is the role of governments to preserve this right, not hinder it.

The conflict in Iraq is our joint commitment to promoting democracy in the 21st century. Our countries will not idly stand by while dictators, hunger, disease, war and corruption ravage human beings across the globe. However, the United States and United Kingdom cannot combat these evils alone. I therefore support the three pillars set forth by the President in combating tyranny. International organizations that are equal to the challenges of our world, free nations willing to meet evil by force, and a commitment to the international spread of democracy.

I support the President's vision to see peace and stabilization in the Middle East. I am hopeful that the world will one day see a secure Israel and an independent Palestinian state. The people of Israel and Palestine deserve our best efforts in helping them to achieve a future that restores peace and dignity to a land rich with history and culture. I share the President's passion spreading democracy and commit my efforts to help him achieve this end.

Below is the President's speech:

[Remarks by the President at Whitehall Palace, Royal Banqueting House-Whitehall Palace, London, England]

PRESIDENT BUSH DISCUSSES IRAQ POLICY AT WHITEHALL PALACE IN LONDON

The President: Thank you very much. Secretary Straw and Secretary Hoon; Admiral Cobbald and Dr. Chipman; distinguished guests: I want to thank you for your very kind welcome that you've given to me and to Laura. I also thank the groups hosting this event—The Royal United Services Institute, and the International Institute for Strategic Studies. We're honored to be in the United Kingdom, and we bring the good wishes of the American people.

It was pointed out to me that the last noted American to visit London stayed in a glass box dangling over the Thames. (Laughter.) A few might have been happy to provide similar arrangements for me. (Laughter.) I thank Her Majesty the Queen for interceding. (Laughter.) We're honored to be staying at her house.

Americans traveling to England always observe more similarities to our country than differences. I've been here only a short time, but I've noticed that the tradition of free speech—exercised with enthusiasm—(laughter)—is alive and well here in London. We have that at home, too. They now have that right in Baghdad, as well. (Applause.)

The people of Great Britain also might see some familiar traits in Americans. We're sometimes faulted for a naive faith that liberty can change the world. If that's an error it began with reading too much John Locke and Adam Smith. Americans have, on occasion, been called moralists who often speak in terms of right and wrong. That zeal has been inspired by examples on this island, by the tireless compassion of Lord Shaftesbury, the righteous courage of Wilberforce, and the firm determination of the Royal Navy over the decades to fight and end the trade in slaves.

It's rightly said that Americans are a religious people. That's, in part, because the ''Good News'' was translated by Tyndale, preached by Wesley, lived out in the example of William Booth. At times, Americans are even said to have a puritan streak—where might that have come from? (Laughter.) Well, we can start with the Puritans.

To this fine heritage, Americans have added a few traits of our own: the good influence of our immigrants, the spirit of the frontier. Yet, there remains a bit of England in every American. So much of our national character comes from you, and we're glad for it.

The fellowship of generations is the cause of common beliefs. We believe in open societies ordered by moral conviction. We believe in private markets, humanized by compassionate government. We believe in economies that reward effort, communities that protect the weak, and the duty of nations to respect the dignity and the rights of all. And whether one learns these ideals in County Durham or in West Texas, they instill mutual respect and they inspire common purpose.

More than an alliance of security and commerce, the British and American peoples have an alliance of values.

And, today, this old and tested alliance is very strong. (Applause.)

The deepest beliefs of our nations set the direction of our foreign policy. We value our own civil rights, so we stand for the human rights of others. We affirm the God-given dignity of every person, so we are moved to action by poverty and oppression and famine and disease. The United States and Great Britain share a mission in the world beyond the balance of power or the simple pursuit of interest. We seek the advance of freedom and the peace that freedom brings. Together our nations are standing and sacrificing for this high goal in a distant land at this very hour. And America honors the idealism and the bravery of the sons and daughters of Britain.

The last President to stay at Buckingham Palace was an idealist, without question. At a dinner hosted by King George V, in 1918, Woodrow Wilson made a pledge; with typical American understatement, he vowed that right and justice would become the predominant and controlling force in the world.

President Wilson had come to Europe with his 14 Points for Peace. Many complimented him on his vision; yet some were dubious. Take, for example, the Prime Minister of France. He complained that God, himself, had only 10 commandments. (Laughter.) Sounds familiar. (Laughter.)

At Wilson's high point of idealism, however, Europe was one short generation from Munich and Auschwitz and the Blitz. Looking back, we see the reasons why. The League of Nations, lacking both credibility and will, collapsed at the first challenge of the dictators. Free nations failed to recognize, much less confront, the aggressive evil in plain sight. And so dictators went about their business, feeding resentments and anti-Semitism, bringing death to innocent people in this city and across the world, and filling the last century with violence and genocide.

Through world war and cold war, we learned that idealism, if it is to do any good in this world, requires common purpose and national strength, moral courage and patience in difficult tasks. And now our generation has need of these qualities.

On September the 11th, 2001, terrorists left their mark of murder on my country, and took the lives of 67 British citizens. With the passing of months and years, it is the natural human desire to resume a quiet life and to put that day behind us, as if waking from a dark dream. The hope that danger has passed is comforting, is understanding, and it is false. The attacks that followed—on Bali, Jakarta, Casablanca, Bombay, Mombassa, Najaf, Jerusalem, Riyadh, Baghdad, and Istanbul—were not dreams. They're part of the global campaign by terrorist networks to intimidate and demoralize all who oppose them.

These terrorists target the innocent, and they kill by the thousands. And they would, if they gain the weapons they seek, kill by the millions and not be finished. The greatest threat of our age is nuclear, chemical, or biological weapons in the hands of terrorists, and the dictators who aid them. The evil is in plain sight. The danger only increases with denial. Great responsibilities fall once again to the great democracies. We will face these threats with open eyes, and we will defeat them. (Applause.)

The peace and security of free nations now rests on three pillars: First, international organizations must be equal to the challenges facing our world, from lifting up failing states to opposing proliferation.

Like 11 Presidents before me, I believe in the international institutions and alliances that America helped to form and helps to lead. The United States and Great Britain have labored hard to help make the United Nations what it is supposed to be—an effective instrument of our collective security. In recent months, we've sought and gained three additional resolutions on Iraq—Resolutions 1441, 1483 and 1511—precisely because the global danger of terror demands a global response. The United Nations has no more compelling advocate than your Prime Minister, who at every turn has championed its ideals and appealed to its authority. He understands, as well, that the credibility of the U.N. depends on a willingness to keep its word and to act when action is required.

America and Great Britain have done, and will do, all in their power to prevent the United Nations from solemnly choosing its own irrelevance and inviting the fate of the League of Nations. It's not enough to meet the dangers of the world with resolutions; we must meet those dangers with resolve.

In this century, as in the last, nations can accomplish more together than apart. For 54 years, America has stood with our partners in NATO, the most effective multilateral institution in history. We're committed to this great democratic alliance, and we believe it must have the will and the capacity to act beyond Europe where threats emerge.

My nation welcomes the growing unity of Europe, and the world needs America and the European Union to work in common purpose for the advance of security and justice. America is cooperating with four other nations to meet the dangers posed by North Korea. America believes the IAEA must be true to its purpose and hold Iran to its obligations.

Our first choice, and our constant practice, is to work with other responsible governments. We understand, as well, that the success of multilateralism is not measured by adherence to forms alone, the tidiness of the process, but by the results we achieve to keep our nations secure.

The second pillar of peace and security in our world is the willingness of free nations, when the last resort arrives, to retain* (sic) aggression and evil by force. There are principled objections to the use of force in every generation, and I credit the good motives behind these views.

Those in authority, however, are not judged only by good motivations. The people have given us the duty to defend them. And

that duty sometimes requires the violent restraint of violent men. In some cases, the measured use of force is all that protects us from a chaotic world ruled by force.

Most in the peaceful West have no living memory of that kind of world. Yet in some countries, the memories are recent: The victims of ethnic cleansing in the Balkans, those who survived the rapists and the death squads, have few qualms when NATO applied force to help end those crimes. The women of Afghanistan, imprisoned in their homes and beaten in the streets and executed in public spectacles, did not reproach us for routing the Taliban. The inhabitants of Iraq's Baathist hell, with its lavish palaces and its torture chambers, with its massive statues and its mass graves, do not miss their fugitive dictator. They rejoiced at his fall.

In all these cases, military action was proceeded by diplomatic initiatives and negotiations and ultimatums, and final chances until the final moment. In Iraq, year after year, the dictator was given the chance to account for his weapons programs, and end the nightmare for his people. Now the resolutions he defied have been enforced.

And who will say that Iraq was better off when Saddam Hussein was strutting and killing, or that the world was safer when he held power? Who doubts that Afghanistan is a more just society and less dangerous without Mullah Omar playing host to terrorists from around the world. And Europe, too, is plainly better off with Milosevic answering for his crimes, instead of committing more.

It's been said that those who live near a police station find it hard to believe in the triumph of violence, in the same way free peoples might be tempted to take for granted the orderly societies we have come to know. Europe's peaceful unity is one of the great achievements of the last half-century. And because European countries now resolve differences through negotiation and consensus, there's sometimes an assumption that the entire world functions in the same way. But let us never forget how Europe's unity was achieved—by allied armies of liberation and NATO armies of defense. And let us never forget, beyond Europe's borders, in a world where oppression and violence are very real, liberation is still a moral goal, and freedom and security still need defenders. (Applause.)

The third pillar of security is our commitment to the global expansion of democracy, and the hope and progress it brings, as the alternative to instability and to hatred and terror. We cannot rely exclusively on military power to assure our long-term security. Lasting peace is gained as justice and democracy advance.

In democratic and successful societies, men and women do not swear allegiance to malcontents and murderers; they turn their hearts and labor to building better lives. And democratic governments do not shelter terrorist camps or attack their peaceful neighbors; they honor the aspirations and dignity of their own people. In our conflict with terror and tyranny, we have an unmatched advantage, a power that cannot be resisted, and that is the appeal of freedom to all mankind.

As global powers, both our nations serve the cause of freedom in many ways, in many places. By promoting development, and fighting famine and AIDS and other diseases, we're fulfilling our moral duties, as well as encouraging stability and building a firmer basis for democratic institutions. By working for justice in Burma, in the Sudan and in Zimbabwe, we give hope to suffering people and improve the chances for stability and progress. By extending the reach of trade we foster prosperity and the habits of liberty. And by advancing freedom in the greater Middle East, we help end a cycle of dictatorship and radicalism that brings millions of people to misery and brings danger to our own people.

The stakes in that region could not be higher. If the Middle East remains a place where freedom does not flourish, it will remain a place of stagnation and anger and violence for export. And as we saw in the ruins of two towers, no distance on the map will protect our lives and way of life. If the greater Middle East joins the democratic revolution that has reached much of the world, the lives of millions in that region will be bettered, and a trend of conflict and fear will be ended at its source.

The movement of history will not come about quickly. Because of our own democratic development—the fact that it was gradual and, at times, turbulent—we must be patient with others. And the Middle East countries have some distance to travel.

Arab scholars speak of a freedom deficit that has separated whole nations from the progress of our time. The essentials of social and material progress—limited government, equal justice under law, religious and economic liberty, political participation, free press, and respect for the rights of women—have been scarce across the region. Yet that has begun to change. In an arc of reform from Morocco to Jordan to Qatar, we are seeing elections and new protections for women and the stirring of political pluralism. Many governments are realizing that theocracy and dictatorship do not lead to national greatness; they end in national ruin. They are finding, as others will find, that national progress and dignity are achieved when governments are just and people are free.

The democratic progress we've seen in the Middle East was not imposed from abroad, and neither will the greater progress we hope to see. Freedom, by definition, must be chosen, and defended by those who choose it. Our part, as free nations, is to ally ourselves with reform, wherever it occurs.

Perhaps-the most helpful change we can make is to change in our own thinking. In the West, there's been a certain skepticism about the capacity or even the desire of Middle Eastern peoples for self-government. We're told that Islam is somehow inconsistent with a democratic culture. Yet more than half of the world's Muslims are today contributing citizens in democratic societies. It is suggested that the poor, in their daily struggles, care little for self-government. Yet the poor, especially, need the power of democracy to defend themselves against corrupt elites.

Peoples of the Middle East share a high civilization, a religion of personal responsibility, and a need for freedom as deep as our own. It is not realism to suppose that one-fifth of humanity is unsuited to liberty; it is pessimism and condescension, and we should have none of it. (Applause.)

We must shake off decades of failed policy in the Middle East. Your nation and mine, in the past, have been willing to make a bargain, to tolerate oppression for the sake of stability. Longstanding ties often led us to overlook the faults of local elites. Yet this bargain did not bring stability or make us safe. It merely bought time, while problems festered and ideologies of violence took hold.

As recent history has shown, we cannot turn a blind eye to oppression just because the oppression is not in our own backyard. No longer should we think tyranny is benign because it is temporarily convenient. Tyranny is never benign to its victims, and our great democracies should oppose tyranny wherever it is found. (Applause.)

Now we're pursuing a different course, a forward strategy of freedom in the Middle East. We will consistently challenge the enemies of reform and confront the allies of terror. We will expect a higher standard from our friends in the region, and we will meet our responsibilities in Afghanistan and in Iraq by finishing the work of democracy we have begun.

There were good-faith disagreements in your country and mine over the course and timing of military action in Iraq. Whatever has come before, we now have only two options: to keep our word, or to break our word. The failure of democracy in Iraq would throw its people back into misery and turn that country over to terrorists who wish to destroy us. Yet democracy will succeed in Iraq, because our will is firm, our word is good, and the Iraqi people will not surrender their freedom. (Applause.)

Since the liberation of Iraq, we have seen changes that could hardly have been imagined a year ago. A new Iraqi police force protects the people, instead of bullying them. More than 150 Iraqi newspapers are now in circulation, printing what they choose, not what they're ordered. Schools are open with textbooks free of propaganda. Hospitals are functioning and are well-supplied. Iraq has a new currency, the first battalion of a new army, representative local governments, and a Governing Council with an aggressive timetable for national sovereignty. This is substantial progress. And much of it has proceeded faster than similar efforts in Germany and Japan after World War II.

Yet the violence we are seeing in Iraq today is serious. And it comes from Baathist holdouts and Jihadists from other countries, and terrorists drawn to the prospect of innocent bloodshed. It is the nature of terrorism and the cruelty of a few to try to bring grief in the loss to many. The armed forces of both our countries have taken losses, felt deeply by our citizens. Some families now live with a burden of great sorrow. We cannot take the pain away. But these families can know they are not alone. We pray for their strength; we pray for their comfort; and we will never forget the courage of the ones they loved.

The terrorists have a purpose, a strategy to their cruelty. They view the rise of democracy in Iraq as a powerful threat to their ambitions. In this, they are correct. They believe their acts of terror against our coalition, against international aid workers and against innocent Iraqis, will make us recoil and retreat. In this, they are mistaken. (Applause.)

We did not charge hundreds of miles into the heart of Iraq and pay a bitter cost of casualties, and liberate 25 million people, only to retreat before a band of thugs and assassins. (Applause.) We will help the Iraqi people establish a peaceful and democratic country in the heart of the Middle East. And by doing so, we will defend our people from danger.

The forward strategy of freedom must also apply to the Arab-Israeli conflict. It's a difficult period in a part of the world that has known many. Yet, our commitment remains firm. We seek justice and dignity. We seek a viable, independent state for the Palestinian people, who have been betrayed by others for too long. (Applause.) We seek security and recognition for the state of Israel, which has lived in the shadow of random death for too

long. (Applause.) These are worthy goals in themselves, and by reaching them we will also remove an occasion and excuse for hatred and violence in the broader Middle East.

Achieving peace in the Holy Land is not just a matter of the shape of a border. As we work on the details of peace, we must look to the heart of the matter, which is the need for a viable Palestinian democracy. Peace will not be achieved by Palestinian rulers who intimidate opposition, who tolerate and profit from corruption and maintain their ties to terrorist groups. These are the methods of the old elites, who time and again had put their own self-interest above the interest of the people they claim to serve. The long-suffering Palestinian people deserve better. They deserve true leaders, capable of creating and governing a Palestinian state.

Even after the setbacks and frustrations of recent months, goodwill and hard effort can bring about a Palestinian state and a secure Israel. Those who would lead a new Palestine should adopt peaceful means to achieve the rights of their people and create the reformed institutions of a stable democracy.

Israel should freeze settlement construction, dismantle unauthorized outposts, end the daily humiliation of the Palestinian people, and not prejudice final negotiations with the placements of walls and fences.

Arab states should end incitement in their own media, cut off public and private funding for terrorism, and establish normal relations with Israel.

Leaders in Europe should withdraw all favor and support from any Palestinian ruler who fails his people and betrays their cause. And Europe's leaders—and all leaders—should strongly oppose anti-Semitism, which poisons public debates over the future of the Middle East. (Applause.)

Ladies and gentlemen, we have great objectives before us that make our Atlantic alliance as vital as it has ever been. We will encourage the strength and effectiveness of international institutions. We will use force when necessary in the defense of freedom. And we will raise up an ideal of democracy in every part of the world. On these three pillars we will build the peace and security of all free nations in a time of danger.

So much good has come from our alliance of conviction and might. So much now depends on the strength of this alliance as we go forward. America has always found strong partners in London, leaders of good judgment and blunt counsel and backbone when times are tough. And I have found all those qualities in your current Prime Minister, who has my respect and my deepest thanks. (Applause.)

The ties between our nations, however, are deeper than the relationship between leaders. These ties endure because they are formed by the experience and responsibilities and adversity we have shared. And in the memory of our peoples, there will always be one experience, one central event when the seal was fixed on the friendship between Britain and the United States: The arrival in Great Britain of more than 1.5 million American soldiers and airmen in the 1940s was a turning point in the Second World War. For many Britons, it was a first close look at Americans, other than in the movies. Some of you here today may still remember the "friendly invasion." Our lads, they took some getting used to. There was even a saying about what many of them were up to—in addition to be "overpaid and over here." (Laughter.)

At a reunion in North London some years ago, an American pilot who had settled in England after his military service, said, "Well, I'm still over here, and probably overpaid. So two out of three isn't bad." (Laughter.)

In that time of war, the English people did get used to the Americans. They welcomed soldiers and fliers into their villages and homes, and took to calling them, "our boys." About 70,000 of those boys did their part to affirm our special relationship. They returned home with English brides.

Americans gained a certain image of Britain, as well. We saw an island threatened on every side, a leader who did not waver, and a country of the firmest character. And that has not changed. The British people are the sort of partners you want when serious work needs doing. The men and women of this Kingdom are kind and steadfast and generous and brave. And America is fortunate to call this country our closest friend in the world.

May God bless you all. (Applause.)

VETERAN TRIBUTE FOR CAPTAIN HENRY (HANK) SCHEIBLE

HON. MICHAEL C. BURGESS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Captain Henry (Hank) Scheible.

Captain Scheible served our country during the Vietnam War in the United States Air Force. He flew 102 combat missions with over 500 hours of navigation combat time. Captain Scheible holds the Air Medal with 9 Oak Leaf Clusters. He received the Distinguished Flying Cross. Captain Scheible is also a recipient of the Republic of Vietnam Campaign Medal and two Vietnam Service Medals.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Captain Scheible, for your service and sacrifice. You are a true hero.

CENTRAL NEW JERSEY RECOGNIZES AND CELEBRATES HARRY J. KLIENKAUF, CHIEF OF POLICE, CRANBURY, NJ

HON. RUSH D. HOLT
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, I rise today to recognize the career of Chief Harry J. Klienkauf, who has served the Cranbury Police Department and the people of Cranbury for 32 years and as chief for 12 years.

In his 32 years of service he has seen the department quadruple in size from four officers to 16. And under his leadership plans for a new police station have become a reality. The 16 officers will no longer have to work in a doublewide trailer, but will have a fully functional station to better serve the community.

Along with his commitment to the department, he has spent numerous hours in the schools teaching children the importance of safety. He established a first aid patrol for students, teaching them the fundamental skills that can save lives.

Aside from being a hardworking and dedicated police officer, Chief Klienkauf found time in his day to volunteer as a firefighter in his hometown. He also spent years serving on the local first aid squad. He remains an active member of the New Jersey State Association of Police Chiefs and the Middlesex County Association of Chiefs of Police.

As an inspiration to police officers in his department and the state of New Jersey, Chief Klienkauf has contributed significantly to the life of his community. He has earned our heartfelt appreciation for his efforts.

RECOGNIZING WALTER J. STYER

HON. JIM GERLACH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. GERLACH. Mr. Speaker, I rise today to recognize Walter J. Styer, retiring Supervisor of Upper Uwchlan Township, Chester County, Pennsylvania, and commend him for his lifelong service to our community.

When Walter Styer first took office as Supervisor, Upper Uwchlan Township was a rural farming community with only 1,200 residents. Today, after three decades of continuing growth and development, there are now 7,000. As the community has grown, so has the job of supervisor. Mr. Styer's primary responsibility during his time in office has been to make sure that Upper Uwchlan grew responsibly and that the needs and desires of its citizens were continually met. In the beginning, his meetings would take 20 min, and would revolve around paying the bills and reading the road report. In recent years, it has not been uncommon to have multiple meetings in a single week for several hours at a time. His participation in the supervising of a rapidly growing community is a true testament to his commitment and his willingness to adapt to the increasing demands of the position. Over the years, as more and more time was required as supervisor, Walter Styer still found time to run his own businesses, remain active in his church and raise four children. What has kept him going all these years was his desire to see all of his projects and undertakings to a successful conclusion—a testament to his character and drive. His tremendous leadership and experience as been an enormous asset to Upper Uwchlan Township and has allowed it to grow responsibly and successfully for all these years.

Mr. Speaker. I ask that my colleagues join me today in recognizing and honoring Walter J. Styer for his lifetime of exemplary citizenship and civil works to make Upper Uwchlan Township a better place to live.

TRIBUTE TO JUNE VALENTINE

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable woman from my district. The Southern Colorado Livestock Association recently named June Valentine Stockman of the Year. June is the first woman to receive this honor in the history of the association, and it is my privilege to call her contributions to the attention of this body of Congress and our nation today.

June has been a rancher in Las Animas County her entire life. As a rancher, June is passionate and knowledgeable. In the ranching industry, June has transcended gender stereotypes and proven herself as able as any rancher in Colorado.

June is also well known for her contributions to the community. She is an avid historian who shares her knowledge of the county's history with her many friends and neighbors. In addition, June is also involved in local government and has held many offices in service of the community.

Mr. Speaker, it is my honor to rise and pay tribute to June Valentine before this body of Congress and our nation today. June is an amazing rancher, historian, public servant and friend. Her contributions set a fine example for all Americans. Congratulations, June, on a well deserved award.

PERSONAL EXPLANATION

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DAVIS of Illinois. Mr. Speaker, I was unavoidably detained in my district. Had I been present, I would have voted yea on the following roll call votes:

Roll Call 620 (S.J. Res. 22), Recognizing the Agricultural Research Service of the Department of Agriculture for 50 years of outstanding service to the Nation through agricultural research;

Roll Call 621 (S.J. Res. 18), Commending the Inspectors General for their efforts to prevent and detect waste, fraud, abuse, and mismanagement, and to promote economy, efficiency, and effectiveness in the Federal Government during the past 25 years;

Roll Call 622 (H. Con. Res. 299), Honoring Mr. Sargent Shriver for his dedication and service to the United States of America, for his service in the United States Navy, and for his lifetime of work as an ambassador for the poor and powerless citizens of the United States of America, and for other purposes;

Roll Call 623 Motion—On Hour of Meeting.

HEALTH EMPOWERMENT ZONE

HON. DONNA M. CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. CHRISTENSEN. Mr. Speaker, on March 20, 2002, the Institute of Medicine (IOM) released a landmark report entitled: Unequal Treatment: Confronting Racial and Ethnic Disparities in Health Care. Among other key findings, the report documented that minorities in the United States receive fewer life-prolonging cardiac medications and surgeries, are less likely to receive dialysis and kidney transplants, and are less likely to receive adequate treatment for pain. Its first and most telling finding States that "racial and ethnic disparities in healthcare exist and, because they are associated with worse outcomes in many cases, are unacceptable." The reasons for these disparities in treatment are wide and varied, and include, but are not limited to: healthcare provider prejudice or bias, the implicit nature of stereotypes, and broader historic and contemporary social and economic inequality. The report included a series of recommendations and interventions for policy changes to eliminate these unacceptable disparities.

Whether it is the recently released IOM report on Unequal Treatment: Confronting Racial and Ethnic Disparities in Health Care, the Commonwealth Fund's report Diverse Communities, Common Concerns: Assessing Health Care Quality for Minority Americans or a recent report by Physicians for Human Rights (2003) found that many minority groups receive lower quality evaluation and treatment than white Americans for a wide range of medical conditions, even when each has health insurance.

We are continually reminded that throughout the history of our great Nation, our people have been denied access to the best that medical science has had to offer—often relegated to hospitals with outdated equipment and served by African-American health care providers who, although as capable, intelligent, and gifted as their white counterparts, often could not obtain equivalent training because of racist practices such as segregation.

This segregated health system was largely responsible for the health inequities that existed during the early and middle part of this century. Indeed, in 1951 Dr. W. Montague Cobb, editor of the Journal of the National Medical Association, stated "For nearly fifty years the retarded health status of our Negro population has been common knowledge and the object of sporadic corrective effort". With the Civil Rights came an acknowledgment came greater equality in many aspects of life for African-Americans, including greater access to quality health care.

As an effort to extend such acknowledgment I am proud to introduce the Health Empowerment Zone Act of 2003. This act directs the Secretary of Health and Human Services with the Administrator of the Health Resources and Services administration and the Directors of the Office of Minority Health, of the Office of Community Services and National Center for Minority Health and Health Disparities to establish health empowerment zone programs in communities that disproportionately experience disparities in health status and health care, and for other purposes.

To be eligible the communities must demonstrate that they experience disproportionate disparities in health status and health care, set forth a strategic plan and create a partnership, with individuals, businesses, schools, minority health associations, nonprofit organizations, community-based organizations, hospitals, health care clinics, and foundations.

The health empowerment zone designation would provide communities the ability to effectively access Federal programs (namely in the Department of Health and Human Services, the Department of Agriculture, the Department of Education, the Department of Labor, the Department of Housing and Urban Development and the Small Business Administration) to improve the health or environment of minority individuals in the community and to coordinate the efforts regarding the elimination of racial and ethnic disparities in health status and health care. Special consideration is given to community that have demonstrated expertise in providing culturally appropriate and linguistically responsive services.

The bill directs communities to establish a health empowerment zone coordinating committee that will provide technical assistance and evidence-based strategies to the zone, including providing guidance on research, strategies, health outcomes, program goals, management, implementation, monitoring, assessment, and evaluation processes.

This bill recognizes that disparities in health and health care found among minority Americans have multiple causes. Lower socioeconomic status and a higher rate of uninsurance are major contributors to the health disparities experienced by minority Americans but non-health factors also play an important role.

The bill codifies legislatively the framework needed to implement sound public health practices such as:

Primary health promotion and disease prevention: Identifying and strengthening protective ecological conditions conducive to health; and identifying and reducing various health risks.

Secondary health promotion and disease prevention: Identifying, adopting, and reinforcing specific protective behaviors; and early detection and reduction of existing health problems.

Tertiary health promotion and disease prevention: Improving the quality of life of community members affected by health problems; and avoiding deterioration, reducing complications from specific disorders, and preventing relapse of risky behaviors.

This bill is a start to a new paradigm for health and I urge my colleagues to support this bill, so that we do what is so clearly needed to improve the health and health care for millions of minority Americans.

YOUTH ATTITUDES ABOUT CIVIC EDUCATION

HON. DIANA DeGETTE

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. DEGETTE. Mr. Speaker, at the First Annual Congressional Conference on Civic Education held recently in Washington, D.C., a new report was released that deserves our highest attention and concern. The report, "Citizenship: A Challenge for All Generations," showed that young people are disengaged from the political process and lack the knowledge necessary to be effective citizens. According to the public opinion survey described in the report, more young Americans know the name of the reigning American Idol than know the political party of their state's governor.

The survey did provide a source of good news, however. It reported that courses in civics and government make a significant difference in sparking young people's interest in government and increasing their understanding of the American system of government.

Both the landmark Congressional Conference on Civic Education and this new national survey of youth civic attitudes, knowledge, and participation were products of the Representative Democracy in America Project, a new congressional initiative designed to reinvigorate Americans and educate them about the critical relationship between government and the people it serves. This national project is a collaboration among the National Conference of State Legislature's Trust for Representative Democracy, the Center on Congress at Indiana University and the Center for Civic Education. The project, which is strictly nonpartisan, is funded by the U.S. Department of Education by act of Congress. I would like to submit for the record the executive summary of the report "Citizenship: A Challenge for All Generations."

EXECUTIVE SUMMARY

This public opinion survey shows that young people do not understand the ideals of citizenship, they are disengaged from the political process, they lack the knowledge necessary for effective self-government, and their appreciation and support of American democracy is limited. The older generations have failed to teach the ideals of citizenship to the next generation. But there is hope. The report provides new evidence that civic education makes a big difference in the attitudes toward citizenship, knowledge and civic engagement of young people.

The report is based on a national public opinion survey designed to tap how the civic attitudes, knowledge and participation of young people—the DotNet generation between 15 and 26 years of age—compare to those of older generations. The poll was conducted by Knowledge Networks, a research firm that conducts scientifically based Internet surveys. The sampling error for the two age groups—15 to 26 and over 26—is approximately ±4 percentage points each.

The survey results reveal a breakdown in how older generations pass on the values of democracy to younger Americans, especially in the area of what it means to be a good citizen.

Here are some key findings regarding the qualities of good citizens:

Seventy-eight percent of those in the older generations say we need to pay attention to government and politics compared with 54 percent of the younger generation.

Less than half of the DotNets think that communicating with elected officials or volunteering or donating money to help others are qualities of a good citizen.

Only 66 percent of the DotNets say that voting is a necessary quality for being a good citizen, compared with 83 percent of those over age 26.

Among the DotNet generation, 64 percent report that they have taken a high school course on civics or American government. Those who have done so are much more likely to believe they are personally responsible for making things better for society and have a more expansive concept of the qualities of a good citizen. On the importance of voting, for example, there is a 24 point spread between those who have taken a government class and those who haven't.

In the area of civic engagement—the act of governing ourselves:

Only half of the DotNets reported that they voted in the most recent elections or that they follow politics, compared to three-quarters of those over age 26.

In many areas of civic participation, two or three times more DotNets who have taken a civics class report that they have engaged in civic activities than those who have not.

On civic knowledge—the tool that enables us to govern ourselves:

Three-quarters of the older generations correctly identified the party of their state's governor and three out of five knew the Republicans control Congress. But only one-third could correctly identify the party in control of their state's legislature.

Among DotNets, eight out of 10 know that the cartoon Simpsons live in Springfield, and the great majority know that Ruben Studdard is the reigning American Idol. But less than half know the party of their state's governor, and only 40 percent can say which party controls Congress.

On attitudes toward representative democracy—our appreciation and understanding of the complexities of the legislative process:

The majority of Americans grasp the fact that people disagree on the issues and the system has to work to resolve such disagreements.

The public is cynical about the people and processes of government. They are about equally divided on whether legislators care what people in their districts think or don't care about the opinions of ordinary people. Two in five believe that those elected to public office are out to serve their own personal interests, while only one in three thinks they are trying to serve the public interest. A majority believes that the system is run by a few big interests rather than for the benefit of all.

Americans believe the country would be better off if the people decided issues directly by voting on them. Support for representative democracy is limited.

The gap between the civic attitudes, knowledge and participation of the new generation of DotNets and the older ones is substantially greater than the gaps between previous generations. It suggests that the DotNets will never be as engaged in democracy as their elders, even as they age.

Civic education makes a big difference in the attitudes, knowledge and engagement of young people. Thirty-nine states have civics or government class requirements for high school graduation. All states will want to review their civic education requirements, standards, assessments, teacher training and course content to determine if they are delivering effective civic education that produces informed citizens.

COMBATING THE SPREAD OF HIV/AIDS IN AFRICA

HON. SCOTT GARRETT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GARRETT. Mr. Speaker, I rise tonight to share with this body the extraordinary work being done by a constituent company of mine, BD, the Becton, Dickinson and Company of Franklin Lakes, NJ in combating the spread of HIV/AIDS in Africa.

First, I would like to applaud the Senate's efforts in passing the McConnell-Sessions-Leahy amendment, as part of the Foreign Operations Appropriations bill for fiscal year 2004 that will provide funding to combat unsafe medical practices in Africa as a means to preventing the spread of HIV/AIDS on that continent.

This bipartisan effort directs the Bush administration to spend at least $75 million on injection and blood safety programs in 12 African countries as part of the President's overall $15 billion HIV/AIDS initiative. This funding is an important first step in addressing the issue of disease spread through unsafe medical practices in Africa, and I urge my colleagues who will be participating in the conference committee to preserve this important amendment.

Which brings me to the work of BD. In business for over a century, BD, is a global medical technology company that serves healthcare institutions, life science researchers, clinical laboratories, industry and the general public. BD manufactures and sells a broad range of medical supplies, devices, laboratory equipment and diagnostic products and employs over 25,000 people in 18 states and around the world.

BD has a long, distinguished history not only in the development of medical technologies but also in partnering with global and domestic health entities and governments to tackle some of the major public health issues of our time. An example: BD pioneered the development of sterilization technology for medical devices and provided the first mass-produced sterile disposable syringes—at cost—to Dr. Jonas Salk for his nationwide polio vaccination efforts in 1954.

BD is currently working with the WHO, UNICEF, the International Red Cross and other organizations to provide low-cost "auto-disable" needles and syringes that are specifically designed to combat the spread of HIV/AIDS and other infectious diseases by preventing reuse in the developing world.

BD has devoted years of dedicated effort and innovation to this issue, even though BD does not manufacture the vast majority of injection devices utilized in the developing world. Still, the company's commitment to this issue has manifested in many ways, including development of low-cost technologies specifically designed to address this developing world need, collaboration with international

agencies in development of appropriate safe injection policies for mass immunization programs, and substantial philanthropic commitments in support of international vaccination efforts utilizing safe injection technology for deadly diseases such as maternal and neonatal tetanus and measles.

These commitments and investments occurred because BD believes their expertise and resources can have a very positive impact on these significant global health issues. In fact, their commitment to the global health arena is part of the company's overall mission: ''Helping all people live healthy lives.''

As a result of BD's efforts and the leadership of international agencies, U.S. government agencies and the work of some other medical equipment manufacturers of auto-disable syringes that prevent reuse are already in broad use for childhood immunization programs in Africa and some other developing countries.

Efforts were first focused on childhood immunization because these injections are generally administered simultaneously to large groups of children, increasing the potential for disease spread. And to date there has been significant progress. It is estimated that 75 percent of immunizations in Africa are administered safely with auto-disable devices. However, immunizations represent only approximately 10 percent of all injections given in Africa. The need exists to expand reuse prevention technologies to the larger number of injections given for therapeutic purposes.

To accomplish this, BD and other manufacturers are expanding the application of low-cost reuse prevention technologies to a broad array of injection devices. These devices are designed to physically disable after a single use, preventing spread of disease from reuse. And while effective technology is critical for success, it is not enough.

To get these devices into broad use, government and non-government agencies, international aid organizations, health ministries in developing countries, and manufacturers must collaborate to ensure that these reuse prevention devices are made broadly available in developing countries. Also, healthcare providers will need to be educated about the risks of injection device reuse, and trained on the proper use of reuse prevention technologies. This will require a larger investment compared with the successful effort to ensure safe immunization of children in Africa.

Injections administered in Africa and the developing world are often unsterile and may transmit infectious disease, due to either improper reuse of disposable syringes and needles designed for single use or to ineffective resterilization of reusable glass syringes. World Health Organization (WHO) and U.S. Centers for Disease Control and Prevention (CDC) estimates indicate that approximately 40% of injections in the developing world are administered with reused, unsterile medical devices. In the year 2000 alone, WHO estimates that 500,000 new HIV/AIDS infections, 2 million new hepatitis C infections, and 21 million new hepatitis B infections resulted from improper reuse of injection devices.

The global HIV/AIDS disease burden is staggering, growing exponentially, and can no longer be ignored. Last year alone, 3.5 million people in Sub-Saharan Africa were infected with the disease. Since 1981, an estimated 20 million people worldwide have died from the disease—and another 42 million around the globe may already be infected.

The passage of the McConnell-Sessions-Leahy amendment and its preservation by the conference committee will give a tremendous boost to global efforts to further prevent the spread of HIV/AIDS in Africa and the rest of the developing world due to this unsafe medical practice. But make no mistake about it; the McConnell-Sessions-Leahy amendment is only a first step in a long journey toward resolving this issue. We need to remain steadfast in our support to improve Privileged and Confidential-DRAFT ReRelease] 113103 medical conditions in Africa, and committed to working with all of the necessary parties to ensure the outcome that we know is possible.

I am proud of BD's involvement and commitment to this issue, and I commend them for their efforts and leadership. To me it is a glowing example of what a good global corporate citizen can and should be.

HONORING THE CONFEDERATED TRIBES OF THE GRAND RONDE ON THE 20TH ANNIVERSARY OF THEIR RESTORATION TO FEDERAL RECOGNITION

HON. DARLENE HOOLEY

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. HOOLEY of Oregon. Mr. Speaker, I rise to commemorate the 20th anniversary this November 22 of the restoration to federal recognition of the Confederated Tribes of the Grand Ronde Community of Oregon.

Twenty years ago, on November 22, 1983, President Ronald Reagan signed into law the Grand Ronde Restoration Act, Public Law 98–165, bringing to fruition a long and determined effort by the elders and leaders of the Grand Ronde Tribes to reverse their thirty years of termination.

The vision and perseverance that marked the Grand Ronde's triumph over that very difficult termination period has continued to guide them since restoration.

Since restoration, the Tribe has grown strong and prospered. The sense of Tribal community, severely tested but not broken during termination, has flourished among a membership that, while looking to the future, actively embraces its culture, traditions, and long history. The Tribe's home lands, once reduced to their cemetery, are now thriving with housing for elders and other Tribal members, a Tribal community center, a beautiful and modern health clinic, and new governmental offices. In the near-by hills, the Tribe sustainably manages its 9,800 acre forested reservation, secured with further legislation in 1988.

In the two decades since restoration, the Grand Ronde Tribal government has pursued its full measure of responsibility, representing and providing for the Tribal membership, and directly administering the full range of federal services. A key element is the Tribal government's efforts to provide for the economic security of its members and its own self-reliance. In twenty years, the Tribe has become a primary economic engine in the area, moving from its timber base into a gaming and hotel facility and today into more broadly diversified endeavors that keep an eye toward the future.

And throughout all of this, the Grand Ronde Tribe has sought to work cooperatively with its neighbors. This is a hallmark of the Confederated Tribes of Grand Ronde. Despite the understandable temptations to walk their own path, they have consistently reached out to their neighbors, seeking to foster understanding and cooperation. There is no better example of this in the Spirit Mountain Community Fund. This fund has given over 22 million dollars to community organizations since its creation in 1997.

For the Confederated Tribes of Grand Ronde, it has been a remarkable twenty years of progress and fulfillment. As for all the restored tribes of Oregon, restoration is a defining moment in their long history, and on the November 22, 2003 twentieth anniversary of the restoration of the Confederated Tribes of the Grand Ronde Community of Oregon, I wish to commemorate and salute their achievement.

HONORING LARRY A. MATOS

HON. DENNIS A. CARDOZA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CARDOZA. Mr. Speaker, I rise today to honor an ambitious and hard-working businessman, Mr. Larry A. Matos. Larry was born and raised in California's Central Valley, and was working hard on his parent's dairy at a young age. While growing up, Larry attended Turlock High School, and led his Future Farmers of America team to a 6th place finish at a national dairy competition. After graduating Turlock High School in 1992, he quickly received his Real Estate license at the age of 18.

In 1994, Larry was approached by Mr. John Melo to purchase a Century 21 Real Estate office. Always ready for a new challenge, Larry and Mr. Melo formed a business partnership, and turned a three-man office into eleven office locations in four counties, four businesses, and over three hundred employees and realtors. Currently, Larry is the President/Broker of Century 21 M&M and Associates. Not only is Larry dedicated to his business ventures, but to the Real Estate industry as well. He has served as a local Board of Director for the Central Valley Association of Realtors. This past year, Larry had the distinct opportunity to serve his fellow colleagues as President of the Central Valley Association of Realtors. He was one of the youngest to ever hold that position.

If not working hard with his business investments, Larry can be found spending time on his family's dairy, and being with his friends and relatives. He also dedicates his time to the community by serving on the Holiday Can Tree, and sponsoring a number of charitable events throughout the year. Mr. Speaker, Larry is a role model for our youth in the Central Valley. His positive attitude and work ethic

have helped him achieve the American Dream. It is my honor to recognize him for his achievements, and to call him my friend.

LIFE OF MAJ. GEN. GEORGE RUHLEN

HON. HENRY BONILLA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BONILLA. Mr. Speaker, I rise to honor the life of Maj. Gen. George Ruhlen. Maj. Gen. Ruhlen loved this country and lived a life of service protecting the freedoms we hold dear. Maj. Gen. Ruhlen was a graduate of the United States Military Academy and completed regular courses at the Field Artillery School, the Army War College and the National War College. He was a great patriot and served this country well, commanding the Third Armored Field Artillery Battalion, 9th Armored Division during World War II. His battalion participated in the defense of Luxembourg, Bastogne, and the capture of the Ludendorff Bridge over the Rhine River at Remagen. Maj. Gen. Ruhlen's actions in the capture of the Ludendorff Bridge were of extreme significance, helping to hasten the end of the war in Europe. This historic capture allowed over 25,000 American soldiers, tanks, artillery and trucks to cross the bridge safely. In addition, Maj. Gen. Ruhlen served with honor in overseas postings in Japan, Taiwan and Pakistan. He went on to serve as Commander of the 1st Armored Division, Deputy Commanding General, Fourth U.S. Army and Commanding General, Fort Sam Houston. Maj. Gen. Ruhlen received the Silver Star for Gallantry in Action during the Battle of the Bulge. He was also the recipient of the Distinguished Service Medal, the Bronze Star with Oak Leaf Cluster, the Legion of Merit and the Belgian, French and Luxembourg Croix de Guerre. His leadership and valor were an inspiration to those who knew him. He was truly a great American.

VETERAN TRIBUTE FOR SERGEANT PIERSON

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Sergeant Tom Pierson.

Sergeant Pierson served our country during the Vietnam War in the United States Marine Corps. He received the Vietnam Service Medal and the National Defense Service Medal. Sergeant Pierson is also a recipient of the Vietnam Campaign Medal and the Republic of Vietnam Cross of Gallantry.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Sergeant Pierson, for your service and sacrifice. You are a true hero.

RECOGNIZING THE OWEN J. ROBERTS HIGH SCHOOL GIRLS SOCCER TEAM

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GERLACH. Mr. Speaker, I rise today to recognize the Owen J. Roberts High School Girls Soccer Team on their victory in the 2003 Pennsylvania Interscholastic Athletic Association Class AAA State Championship game on November 15, 2003.

The Owen J. Roberts Wildcats set a school record for victories in a season on their way to capturing the school's first state championship. In the seven year history of the program, all under the guidance of Coach Joe Margusity, the Wildcats have compiled an amazing 138–31–6 record. The team allowed only 11 goals in 28 games this season, which was enough to earn them gold medals by shutting out Butler High School, 1–0, in the championship game at Hersheypark Stadium.

Led by Head Coach Joe Margusity, and assistant coaches Josh Hoyt, Joe Baccille, and Chris Strango; the members of this championship team include Laura Ginnona, Becky Lesh, Brittany Bench, Julia Cupp, Jen Michener, Jess Carbo, Anna Bevan, Brooke Dotterer, Kristen Kaufman, Kim Roncase, Beth Stephens, Heather Manorak, Kristi Moltz, Kate Moltz, Ashley Nespor, Amber Cumins, Gayle Exley, Amber Hawkins, Rachel Michener, Jillian Morgan, Kristine Preski and Megan Levengood.

Mr. Speaker, I ask that my colleagues join me today in congratulating the Owen J. Roberts High School Girls Soccer Team, the 2003 PIAA Class AAA State Champions.

TRIBUTE TO ST. MICHAEL'S ORTHODOX CHRISTIAN CHURCH

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCINNIS. Mr. Speaker, it is my honor to rise and pay tribute to Saint Michael's Orthodox Christian Church located in Pueblo, Colorado. St. Michael's recently celebrated its 100th anniversary and it is my honor to rise and recognize the contributions that this church has made to the Pueblo community.

St. Michael's was founded by a number of Pueblo's ethnic Greek families in the early 1900s. Over time, the church has been a wonderful place of worship for many Puebloans. The creation of a place of worship speaks to the very essence of what our country was founded on. As we celebrate St. Michael's 100 years of existence, it is important to call attention to the fact that the American Values which led to the church's existence continue to this day.

The 100th anniversary of St. Michael's falls at a time of great renewal and triumph for the church. Over the last five years, the church has been undergoing significant renovation under the guidance of its devoted pastor, The Reverend Chris Stanton. The small church is truly a beautiful place of worship.

Mr. Speaker, it is my honor to call the attention of this body of Congress and our nation to the St. Michael's Orthodox Christian Church. Over the last 100 years, the church has provided a great deal to its parishioners and the community of Pueblo, and it is my honor to call attention to its service here today.

SAFE HOMES: CHILD IDENTIFICATION PROGRAM

HON. ALAN B. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MOLLOHAN. Mr. Speaker, a child abduction is every parent's worst nightmare. Yet all too often, we hear chilling stories of boys and girls taken from their rightful guardians; stolen by strangers or even by members of their family. Today, I want to recognize a program in my district that is working to prevent these awful occurrences.

In Weirton, volunteers have organized an initiative that is called WINK: Watching Its Neighborhood Kids. This two-part program is bringing the community together to help keep children safe—and to help recover them if they should ever be lost or taken.

Under the WINK Program, safe houses are being established across the city. These are homes and businesses, screened by the Weirton police, that volunteer to open their doors to children who are lost, hurt or threatened. The goal is to eventually have one on every block.

The approved safe houses are given a logo sign to post in their windows. They also are given information on helping children in danger. Children are told about the program in school, and parents are encouraged to show them where safe houses can be found in the neighborhood.

Mr. Speaker, this kind of vigilance and communication is a good way to protect our children. But sometimes, no matter how careful the precautions, young people are lost or missing. That is why the second part of this program is vitally important as well.

In addition to the safe houses, WINK has established a child identification program. It sponsors free registration events across the community. Parents bring in their children for digital photos, for fingerprints or footprints, and for a DNA mouth swab. All of these items—these key identification tools—are given to parents to take home, and keep close at hand.

Experts tell us that when a child is missing, an immediate response is the best response. It helps to increase the odds of a successful recovery. Thanks to the child I.D. program, parents have up-to-date information ready to give to police should the unthinkable happen.

Mr. Speaker, the safety of children is a concern that we all share. Today, I am pleased to salute a special group of people who truly take this concern to heart, and have channeled it into real community action. I ask the House to join me in recognizing the caring volunteers who are behind Weirton's watching its neighborhood kids.

A BILL TO MAKE CHANGES TO THE MAGNUSON-STEVENS FISHERY CONSERVATION AND MANAGEMENT ACT AND TO MAKE ADJUSTMENTS TO THE BERING SEA CRAB RATIONALIZATION PROGRAM

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. YOUNG of Alaska. Mr. Speaker, today I am introducing a bill to make a number of changes to the Magnuson-Stevens Fishery Conservation and Management Act. I believe there are three areas of the current Act that need to be changed. While the language I am proposing may not be the best way to address these concerns, I would like these proposed changes to spark a debate in the coming months.

In addition, I am including language to amend the Bering Sea and Aleutian Islands crab rationalization program to address what I believe was an oversight in the plan. I believe this plan to rationalize the Bering Sea crab fishery is a living plan which will continue to be modified as changes are needed. I believe that the safety issues of this fishery necessitate some action, and I don't believe that no action is an option. Congress asked the North Pacific Fishery Management Council to give the Congress a proposal and they did so. We have studied this fishery for too long without doing something to make it safer. Having said that, I also believe that the plan to rationalize this important fishery needs to be dynamic and we need to be able to make adjustments as we see how the plan works. Everyone involved in this debate has good intentions, but we need to be mindful that good intentions sometimes cause unintended consequences. We need to watch the implementation of the plan very carefully.

Finally, I am asking the Secretary of State to determine whether the retired U.S. staff of two international fisheries commissions who worked in Canada were unduly harmed by exchange rates and to what extent their retirement packages have suffered as a result of the exchange rate.

THE AFRICAN GROWTH AND OPPORTUNITY ACT

HON. JIM McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. McDERMOTT. Mr. Speaker, partisan divisions are common in the Congress, but a few issues regularly escape those boundaries. International trade typically is one of them. Although the votes that gave President Bush Trade Promotion Authority confirm that even international trade can be an intensely polarizing issue, it frequently garners support across the political spectrum.

I first traveled to Africa in 1961 with Operation Crossroads to build a school in Ghana. Africa in the '60s underwent a vibrant surge of optimism as independence from colonial rule spread throughout the continent. My experience in Ghana changed my view of the world, and many Members of Congress have had experiences similar to mine. Many Members also believe, as I do, that when the United States opens its markets to poor countries, we extend an enormous opportunity to create jobs and raise living standards, and also provide greater value to American consumers. The African Growth and Opportunity Act (AGOA), signed into law by President Clinton in 2000, underscores the common goals that Republicans and Democrats can share.

By any measure, AGOA is a resounding success. It is spurring economic growth and bolstering economic reforms. It is fostering stronger ties between sub-Saharan Africa and the United States, and it is reaffirming Africans' conviction that they can compete in any market.

AGOA, which provides temporary benefits, requires periodic review by the Congress to assess its effectiveness. It was designed this way in part because policy makers, like myself, did not know the precise recipe to attract the type of investment in sub-Saharan Africa we were seeking. We made a few good guesses in this regard, but we probably missed the mark in other areas.

We guessed right when we decided that we should provide sub-Saharan Africa greater access to the U.S. textile and apparel market. Over the last three years, tens of thousands of jobs were created in this industry, thanks to AGOA benefits. Expiring next year, however, is the provision in AGOA that allows Africa's poorest countries to buy fabric outside the region—where it is inexpensive and high in quality—to create finished apparel products for export to the U.S.

Today, I join several of my colleagues, like Representatives ED ROYCE, AMO HOUGHTON and CHARLES RANGEL, to introduce legislation to extend AGOA and spread its benefits to other sectors of sub-Saharan Africa's economy. The AGOA III Act, H.R. 3572, marks the beginning of another bi-partisan effort to develop a plan to improve U.S.-Africa trade.

When my colleagues and I set out to write this bill, we saw the need to address four key issues. First, the third-country fabric provision available to Africa's poorest countries through AGOA expires at the end of next year, at the very same time as worldwide quotas on apparel disappear due to the WTO's Multi Fiber agreement. Third-country fabric must be extended to allow sub-Saharan Africa to participate in a market dominated by the Asian giants. There will be robust debate about how long Congress should extend this provision. We suggest in the AGOA III Act that these benefits should last as long as four years.

Second, the United States needs to provide technical assistance to African farmers to enable them to export their products to America. To do this, the AGOA III Act places dozens of American agricultural experts throughout sub-Saharan Africa to work with farmers and their governments.

Third, the biggest barrier to investment in sub-Saharan Africa is the lack of infrastructure. But building roads, ports, energy grids, telecommunication and water systems solely to increase trade flows is simply not feasible. It is the ''chicken or the egg'' dilemma. We cannot increase trade flows without adequate infrastructure, yet why build infrastructure if trade capacity is not at a level that requires it? We must find ways to develop and maintain new infrastructure in sub-Saharan Africa as trade capacity improves. One way we can do this is by fostering sustainable ecotourism in sub-Saharan Africa. This industry is expected to grow 30 percent over the next decade. We can help sub-Saharan Africa position itself to take advantage of this because the region enjoys an international comparative advantage with its extensive protected areas that host a variety of ecosystems and cultures. National parks and reserves in sub-Saharan Africa can become a basis for regional development, involving the communities living within and adjacent to them. The infrastructure used to support an ecotourism industry can also be used to increase trade flow. There are several initiatives in the AGOA III Act that seek to help sub-Saharan Africa develop its infrastructure, in part by helping build a viable ecotourism industry.

Fourth, we must address AIDS, which is not just a health crisis. AIDS is an economic catastrophe. In the 1990s, AIDS reduced Africa's per capita annual growth by nearly 1 percent. In the most heavily affected countries, 2 percentage points will be sliced off per capita growth in coming years. This means that after two decades, many economies in sub-Saharan Africa will be about 20–40 percent smaller than they would have been without AIDS. That is an enormous decline that no trade policy can overcome. In addition to fully funding international programs to combat the virus, we can provide tax incentives through AGOA to leverage private-sector contributions to the Global Fund to Fight HIV/AIDS, Tuberculosis, and Malaria. The AGOA III Act would provide a tax deduction to U.S. firms operating in AGOA-eligible countries when they make a cash donation to the Global Fund.

As I speak with African entrepreneurs, civil society, and the African diplomatic corps, the enthusiasm about AGOA and sub-Saharan Africa's economic possibilities remind me of the excitement of 1960s. But unless all of us work together as we did before—Democrats, Republicans, civil society, and the governments of sub-Saharan Africa—to build a consensus about extending and enhancing AGOA, I fear that this enthusiasm will go the way of our '60s optimism, as genocide, apartheid, civil war, and famine swept over Africa. We have a rare opportunity to ensure that Africa continues to share our markets. We must not let this moment pass us by. I hope that when the Congress convenes next year, addressing U.S.-African trade will be at the top of Congress's agenda.

TRIBUTE TO ROBINSON HIGH SCHOOL PRINCIPAL KEVIN McCARTHY

HON. JIM DAVIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DAVIS of Florida. Mr. Speaker, I rise in honor of Robinson High School Principal Kevin McCarthy, who tragically passed away this week at the age of 39. Kevin's dedication to excellence and passion for serving his students, faculty and Robinson High School family will be sorely missed.

After earning two masters degrees and a doctorate, Kevin chose to become a science teacher in 1989. In 1997, he came to Tampa to serve as the science department head at Blake High School.

Kevin's ambition, enthusiasm and record of success served him well in the Hillsborough County School District. He progressed from department head to assistant principal for student affairs at Wharton High School and assistant principal for curriculum at King High School before he became principal at Robinson.

Along the way, he touched the lives of countless students, faculty and parents and left his mark on the schools in which he served. At Robinson, with his love of science, he helped create the MacDill Aeronautical Academy, which gives students the chance to engage in hands-on aerospace training and offers internship opportunities at MacDill Air Force Base.

When gunshots at Rembrant Garden apartments, adjacent to Robinson's campus, threatened the safety of students, Kevin spearheaded community meetings including local law enforcement and Tampa housing officials to address the problem. Just three months later, a plan was in place to tear down Rembrant apartments to make way for a new, safer complex.

The Robinson family, however, will most likely remember Kevin's leadership in helping the campus come to grips with the death of Lance Cpl. Andrew Aviles, a Robinson High School graduate who was killed in Iraq.

Kevin McCarthy was what every school district in America needs—a rising star who sets high expectations for students and faculty and has the talent to help them to meet those goals. All of us who got to know him and work with him were and continue to be inspired by his integrity, energy and intense focus on his students. Kevin was one-of-a-kind and will undoubtably influence countless others to follow his example in serving the community in many ways.

On behalf of the Tampa Bay community, I would like to extend my deepest sympathies to his family.

IN MEMORY OF PFC. JONATHAN CHEATHAM

HON. MIKE ROSS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ROSS. Mr. Speaker, I rise today to honor Army Pfc. Jonathan Cheatham, of Camden, AR, who died on July 26, 2003, fighting for his country in Iraq. I am saddened by this tragedy. I wish to recognize his life and achievements.

Jonathan attended Camden Fairview High School where he played soccer and the trumpet in the band. Upon graduation in 2002, Jonathan immediately entered the military. Jonathan served in the 489th Engineer Battalion of U.S. Army Reserve.

Jonathan gave his life to serve our country and will forever be remembered as a hero, a terrific son, and a courageous brother. My deepest condolences go out to his mother, Barbara Porchia, his sister, Portia Cheatham, family, friends, and those in his hometown of Camden whose lives he touched. I am sure Jonathan was proud of his service to the U. S. Army and to our country. I know he will be missed by his fellow soldiers, and all those who knew him and counted him as a friend. Furthermore, his fellow soldiers also know how much he contributed to the accomplishment of his unit's mission and to the U.S. Army. I will continue to keep Jonathan and his family in my thoughts and prayers.

HONORING THE CONTRIBUTIONS OF VIRGINIA DEMMLER

HON. SHELLEY BERKLEY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. BERKLEY. Mr. Speaker, I rise to honor the memory of an outstanding Nevadan who dedicated her life to the highest ideals of civic life. Virginia Demmler, served the causes of justice and equality throughout her more than 20 years as a resident of Nevada, providing boundless energy, tireless work and inspiring leadership for Washoe County's Democratic Party and other civic organizations.

At the recent memorial service that celebrated Virginia's life, former United States Senator Richard Bryan described her as "the essence of a citizen activist, totally selfless and committed." Virginia was recognized at "the heart of the Democratic Party of Washoe County," by Mary Connelly, State Director for United States Senator HARRY REID.

Virginia Demmler's service as Chairman of the County Party as its Executive Director set the standard for principled, effective activism. Washoe County's Democrats have appropriately marked their respect for Virginia's legacy by naming their annual Honor Roll Dinner the Virginia Demmler Honor Roll Dinner, where hundreds of her fellow citizens will attend in tribute to her.

As a young woman I became involved in politics and public service in Las Vegas, hundreds of miles from Reno. But Virginia reached out to me to provide guidance and vision that helped chart my course to achieve elected office and to serve all Nevadans with the passion and principle epitomized. I hope my service measures up to her example.

Virginia never shied away from helping a good cause. From Common Cause, to Planned Parenthood, to the American Civil Liberties Union, she served with distinction and was always there for people in need, to right a wrong, and to help build a better state.

Nevada is a better place, and her citizens enriched, because of the life of Virginia Demmler.

VETERAN TRIBUTE FOR STAFF SERGEANT JOSEPH PENA

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Staff Sergeant Joseph Pena.

Staff Sergeant Pena served our country during the Korean War in the United States Air Force. He received the Korean Service Medal and the National Defense Service Medal. Staff Sergeant Pena is also a recipient of the Republic of Korea War Service Medal and the United Nations Service Medal.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Staff Sergeant Pena, for your service and sacrifice. You are a true hero.

TRIBUTE TO ZOELSMANN'S BAKERY

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to a remarkable business in my district. Zoelsmann's Bakery has been serving the community of Pueblo, Colorado for 105 years, and I am pleased to call the attention of this body of Congress to the many contributions the bakery has made to the Pueblo community.

Otto Zoelsmann and his wife immigrated to the United States from Germany in the late 1800's. In 1898, the couple moved to Pueblo, where they opened a bakery. The Zoelsmann's were expert bakers and their delicacies were immediately popular throughout the Pueblo community. Horse drawn wagons, and later Ford Model T trucks, initially delivered the baked goods to Zoelsmann's loyal customers.

Aside from technological advancements, little about Zoelsmann's Bakery has changed over the years. The bakery is still dedicated to creating and selling the best baked goods possible. The current co-owners, the Petkoseks and the Paradisos, along with their staff, always serve their customers with a kind word and a friendly smile.

The Petkoseks and Paradisos took over the store after its longtime owner Chuck Martinelli retired. Chuck was a beloved figure in Pueblo and a master chef. Chuck handpicked his successors and, before retiring, he taught them his trade and entrusted them with his famous recipes. Chuck's memory lives on with Zoelsmann's Bakery as it goes about its business each day.

Mr. Speaker, it is my honor to rise and pay tribute to Zoelsmann's Bakery. The bakery is entering its second century of dedicated service to the people of Colorado and I am pleased to call attention to Zoelsmann's contributions to the community of Pueblo.

H.R. 1813, THE TORTURE VICTIMS RELIEF REAUTHORIZATION ACT OF 2003

HON. JOSEPH CROWLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CROWLEY. Mr. Speaker, I rise in strong support of H.R. 1813, the Torture Victims Relief Reauthorization Act of 2003.

Torture is a horrible tool used in more than 150 countries to silence, intimidate and oppress people around the world. Many survivors of torture arrive in the United States every year. This legislation provides vital funding of support for victims of torture.

Mr. Speaker, more than 500,000 survivors of torture live in the United States today. A significant number of these survivors live in New York City. These survivors need vital support in terms of rehabilitation, medical care and psychological care. Fleeing from their persecutors, most often leaving their families behind, they arrive with no documentary evidence to prove their persecution. All they have are their scarred bodies and their stories of horror.

Once they arrive, the survivors are forced to face a culture and a system different from what they have known. They face numerous challenges in their effort to integrate into our society and become fully participating members. They have difficulty telling their stories to the immigration officers and even to their own attorneys because of the abuse they have endured by those in power in the past and thus are wary of authorities. Among the few they can turn to are the torture treatment programs. These programs, armed with experience and dedication, are instrumental in helping survivors document their stories of torture, providing them with clinical care and psychosocial support, and enabling them to embark on a new life.

The life-saving work done by these torture treatment programs should be commended and appreciated by all Americans, for they open their doors, extend their hands, and offer shoulders to the most severely wounded new Americans. It is my pleasure today to commend the indispensable work of the Safe Horizon/Solace Program for Survivors of Torture and Refugee Trauma in my district. Solace is a program of Safe Horizon, which is the nation's leading victim assistance and advocacy organization. Solace is a decentralized, citywide program, with its main offices in Jackson Heights, Queens. Since 1997, Solace has provided an array of services on behalf of torture survivors from over 70 different countries, including intensive case management, clinical, referral for medical and legal, social adjustment counseling, accompaniment, interpretation, information and referral, medical and psychological evaluations, expressive therapies such as visual and dramatic arts, dance, and somatic therapies such as massage, for survivors of torture seeking safe haven in the United States.

Furthermore, Solace has pioneered a community development approach that involves creating social healing interventions at the familial and communal levels, particularly important since torture seeks to destroy the fabric of communities, as much as it seeks to destroy individuals.

The Safe Horizon/Solace approach is also extremely cost effective, since Solace is the managing partner of the Metro Area Support for Survivors of Torture (MASST) Consortium, which includes Doctors of the World/USA, Refuge, Inc., and the International Institute of New Jersey as partners. This New York City and Northern New Jersey effort is all done on one grant from the Department of Health and Human Services, Office of Refugee Resettlement, and is the only such configuration in the United States. This past year, the MASST Consortium has reached thousands of people with a dizzying array of services.

The funds provided by the Torture Victims Relief Reauthorization Act of 2003 will enable torture treatment programs like Safe Horizon/Solace and its MASST partners to continue to provide the crucial services needed by those who have been subjected to cruel and inhuman treatment in their own countries.

Mr. Speaker, we may not have the opportunity to know when we meet the survivors of torture, to listen to first hand and understand their stories, or to appreciate the courage they exhibit in overcoming the consequences of the traumatic events they have experienced. But we do have the opportunity to assist them today. By supporting this important legislation, we can play an important part in providing care for this resilient group of people. We can give them hope for a better future. We will be instrumental in helping them break down the barriers that keep them from fully integrating into our society.

I strongly encourage all my colleagues to join me in supporting this important legislation.

PERSONAL EXPLANATION

HON. JOHN B. LARSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. LARSON of Connecticut. Mr. Speaker, I would like to submit this statement for the record and regret that I was unavoidably detained on my way to the floor on November 21, 2003 to vote on rollcall vote Number 636, on H.R. 3491, the National Museum of African American History and Culture Act. Had I been present, I would have voted "aye."

A BILL TO IMPROVE THE LIQUIDITY OF THE MARKET FOR INVESTMENTS IN LOW-INCOME HOUSING TAX CREDIT PROPERTIES

HON. AMO HOUGHTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOUGHTON. Mr. Speaker, today Representatives NANCY JOHNSON (R–CT), CHARLES RANGEL (D–NY) and RICHARD NEAL (D–MA) are joining me in introducing legislation to correct a problem that is impairing the liquidity of the market for investments in Low-Income Housing Tax Credit (housing credit) properties. The housing credit has been a remarkably successful incentive for encouraging investment in residential rental housing for low-income families. Under Section 42 of the Internal Revenue Code, a tax credit is available for investment in affordable housing. The credit is claimed annually over a period of ten years. Qualified residential rental projects must be rented to lower-income households at controlled rents and satisfy a number of other requirements throughout a prescribed compliance period (generally, 15 years from the first taxable year the credit is claimed).

Today, virtually all of the equity for housing credit investments comes from widely held corporations investing through housing credit funds. A significant number of corporate investors have transferred these fund interests in recent years, typically due to a change in their income tax status. An investor wishing to dispose of an interest in a Low-Income Housing Tax Credit ("housing credit") property during its 15-year compliance period is subject to a recapture of housing credits previously claimed unless a bond or U.S. Treasury securities are posted to the Internal Revenue Service (IRS). The amount of the bond to be posted is based on the amount of housing credits claimed and the duration remaining in the compliance period. The purpose of the bond is to guarantee to the IRS that it can collect the appropriate recapture amount in the event that the property is no longer in compliance with the requirements of the housing credit program.

At the time the housing credit program was enacted in 1986, the drafters of the statute were concerned that owners would claim the benefits of the tax credits and then avoid the continuing compliance requirements by transferring the credits to a straw party with minimal assets that the IRS could go after to collect recapture liability. This was a potential concern because housing credits are provided on an accelerated basis in the sense that they are claimed over a ten-year period, while the property must remain in compliance with the targeting rules over a minimum 15-year period.

However, the experience with the housing credit over the past 15 years demonstrates that this concern is no longer valid. When the housing credit program was enacted, policymakers thought in terms of previous affordable housing tax incentives that supported an aggressive tax shelter market dominated by individual investors. As it turns out, virtually all (99% today) investment capital in the housing credit program is from publicly traded corporations that pose none of the risks of noncompliance that motivated enactment of the recapture bond rules. Ironically, sales of individual partnership interests in public partnerships with more than 35 investors are exempt from the recapture rules.

There are also other provisions in Code section 42 that adequately address potential noncompliance. In 1989, Congress added the requirement that all state allocating agencies adopt "extended use agreements" to be recorded as restrictive covenants on housing credit properties, which require the property to remain in compliance. In addition, the state allocating agencies were given oversight responsibilities to ensure continued compliance through site inspections and property audits.

The requirement to purchase recapture bonds forces investors to incur unnecessary costs and has produced a complex administrative burden on the IRS. Since bond filings are done building by building, and since single sales transactions frequently involve hundreds of properties, each with dozens of buildings, bond filings may involve thousands of separate filings. Worse yet, the few remaining surety companies writing this type of business operate in an inefficient market. Recapture surety bonds are priced in a fashion that does not measure the true risk of non-compliance, but rather relies solely on the credit rating of the company requesting the bond. This is a function of the fact that surety underwriters do not understand the housing credit program in general or the risk of noncompliance in particular.

At the same time, the incidence of non-compliance with housing credit program rules is exceedingly rare. Meanwhile in the aftermath of the September 11th terrorist acts and the spate of corporate accounting scandals, the surety market is in turmoil. Recapture bond premiums, even for highly rated public companies, have more than tripled over the past two years. This has imposed dead weight costs on the housing credit program. By making it more difficult to transfer credit investments, the recapture bond rule impairs the liquidity of housing credit investments, reducing credit prices generally, and undermining the overall efficiency of the program.

The IRS recently responded to a series of questions we posed about the recapture bond requirement. According to the IRS, since just 1997, recapture bonds covering approximately $1.8 billion of tax credits have been posted—but in the 17 years since the requirement was enacted, the Service has never made a claim on a recapture bond. That works out to bond premium payments of about $150 million, to ensure against an event that has never occurred. These costs are unnecessary and are imposing a real drag on the market for investments in housing credit properties.

Our bill will solve this problem by repealing the recapture bond requirement effective for disposition of interests in LIHTC properties after the date of enactment. An owner of a building (or interest therein) (generally, a limited partnership) that has been the subject of a disposition and is still within the remaining 15-year compliance period with respect to such building would be required to submit a report to its former investors when a recapture event with respect to such building occurs. A copy of recapture event forms sent to investors would be required to be filed with the IRS in order to provide the Service with the information necessary to ensure that all recapture liabilities are timely paid. The general statute of limitations applicable to taxpayers would be modified so that investors who dispose of a building after the effective date of the legislation would remain liable for any potential recapture liability for a period extending through the compliance period for such building to provide the IRS with additional time to audit the partnership's return to ensure the building's continuing compliance with the credit's requirements. Taxpayers who disposed of a building (or interest therein) prior to the date of enactment would not be required to maintain existing recapture bonds (or other alternative security), but cancellation of existing bonds would trigger an extension of the statute of limitations provided for in the legislation.

We encourage you to join us in cosponsoring this important legislation.

A FINE SENSE OF IRONY

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SMITH of New Jersey. Mr. Speaker, Russian Foreign Minister Igor Ivanov demonstrated a fine sense of irony recently when he criticized the United States for an "excessive tendency to use force" in resolving international issues.

Let me state clearly that I do not believe my country should reach for its huge arsenal of weapons and troops every time we are faced with a difficult situation abroad. To everything there is a season.

Nevertheless, it is ironic that the Russian Government should accuse the United States of taking military action when back home in Chechnya the Russian Government has demonstrated not only an excessive tendency to use force, but also a tendency to use excessive force.

This is not meant to ignore or justify the human rights abuses of the Chechen separatist movement. The Russian Government is entitled to defend its territorial integrity and defend its citizens against civil disorder. But the fact remains that with its "anti-terrorist operation," Moscow has unleashed a massive and brutal military campaign that frequently makes no distinction between combatants and noncombatants. As Newsweek's distinguished commentator Fareed Zakaria wrote in August of this year, "Over the past ten years, Russia's military has had a scorched-earth policy toward Chechnya. The targets are not simply Chechen rebels but, through indiscriminate warfare, ordinary Chechens . . . Over time, the Chechen rebellion has become more desperate, more extreme and more Islamist."

Not only are such tactics inhumane and cynical, they lead not to peace in Chechnya, but to a more protracted conflict. In this week's National Interest online, Seva Gunitsky reports on how the tactics of the Russian military has radicalized a population that might otherwise have rejected the armed militants: "For by refusing to distinguish between fighters and civilians, the Russian army fused together the interests of previously disparate groups . . . [and] created a far more dangerous foe."

Besides the widespread civilian casualties and property destruction caused by the indiscriminate use of force by Russian military and security forces, the Chechen conflict has resulted in the displacement of hundreds of thousands of persons. Moreover, the recent presidential elections in Chechnya were so obviously flawed that they could hardly be said to reflect the will of the people.

I welcome an exchange of opinions with other government leaders and parliamentarians regarding U.S. foreign policy. Nevertheless, I hope that Moscow will reexamine its own excessive tendency to use force in Chechnya and make every effort to reach a legitimate political settlement there.

HONORING PORTUGUESE EDUCATION FOUNDATION OF CENTRAL CALIFORNIA

HON. DENNIS A. CARDOZA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CARDOZA. Mr. Speaker, I rise today to honor the continued efforts of the Portuguese Education Foundation of Central California and their numerous contributions to our community. The Foundation works tirelessly to educate the community and to recognize individuals for such efforts.

Tonight, the Foundation is honoring members of the community for their valued contributions and achievements. In addition, the Foundation is recognizing over 30 Foundation Scholarship recipients, lending these individuals strong support in their continuing pursuit of educational goals.

It is my distinct pleasure to pay tribute to the Foundation's 2003 community honorees.

Former Congressman Tony Coelho is being honored as the 2003 Citizen of the Year. Tony, my mentor and good friend, has been an exemplary member of the Portuguese community for many years. He served with distinction as Majority Whip in the United States House of Representatives and continues to think of our San Joaquin Valley as his home.

I am delighted to also recognize the achievements of Maria de Lourdes Silva. Maria has been selected as the 2003 Student of the Year by the Foundation. She is being honored for her outstanding academic achievement and research for the Portuguese Heritage Community of California. I commend her on her dedication to the community.

Finally, it is my honor to recognize Jose Luis da Silva, who has been selected as the

2003 Professor of the Year by the Foundation for his contributions and dedication to sharing the language and culture of the Portuguese community with the many students of the San Jose High Academy. Mr. da Silva is a tireless advocate and tremendous resource for his students and our community.

The Portuguese Education Foundation of Central California continues to be a strong asset to our community. The Foundation's efforts are immense and I am honored to recognize them and their awardees this evening.

THE POLITICIZATION OF THE JUDICIAL NOMINATION PROCESS

HON. MARK E. SOUDER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SOUDER. Mr. Speaker, I rise to address a matter of deep concern to every Member of Congress and to every American citizen—the judicial nomination process. I am chairman of the Government Reform Committee's Subcommittee on Criminal Justice, Drug Policy and Human Resources, which has responsibility for oversight of, among other things, our federal judicial system. I am deeply concerned by the growing politicization of the judicial nomination process by a handful of left-wing groups and their advocates in Congress.

Last week, the Wall Street Journal reported on a number of memos written by Congressional staff between 2001 and 2003. They illustrate the extreme political prejudice, crass maneuvering, and pandering to special interest groups that are bringing the judicial nomination process to a standstill. One memo actually claims that "most of [President] Bush's nominees are nazis". Another shows that action on nominees was delayed to allow "the groups"—i.e., left-wing special interest groups—"time to complete their research," i.e., to dig up as much dirt as they could on the President's nominees. And shockingly, a third memo shows that action was delayed on a nominee in order to affect the outcome of a case before the Sixth Circuit.

At present, no one can say for sure how the newspaper obtained the memos. Certainly illegal theft of any confidential materials should not be tolerated. I note, however, that given the large number of the memos, the fact that the source blacked out the names of the staff members who wrote and received the memos (presumably to save them from embarrassment), and the date of the documents (most are from 2001 and 2002) strongly suggest that the source was a member of the Democratic staff, and not someone illegally stealing the memos. In any case, now that these memos have been distributed to the press, I believe that it is important for the Members of Congress and the public to see them and judge their contents for themselves. I am therefore submitting the first installment of these memos for the RECORD, and intend to submit more of them in the days to come. I hope that a full and vigorous debate of this important issue will help the process to move forward, so that the President's nominees can quickly receive the yes or no vote that they deserve.

* * * * *

Big fight early next year. Three benefits: (1) Sends message on Supreme Court; (2) Forces WH to bargain; (3) encourages more moderate nominees.

To work, need all 10 Dems on board and need commitment not to go to the floor. Query: will it be possible to get all 10 Dems to commit before a hearing? Doubtful. There is a big risk. We must choose a nominee tailored to our weakest link. E.g., Pickering is bad but is he had enough? Probably not—finish him AFTER.

Who to fight? Not Estrada—hard to beat, and don't want him on the Supremes.

Groups have 3 names: Kuhl, Sutton, and Owens. Kuhl seems like a bad idea, b/c Boxer will never return the BS. Why waste that power, freeing up another nominee to go through? Similar with Sutton—he is being held up right now. Sutton will be hard to beat—very strong paper record, impressive credentials. GOP will carp about how only criteria should be excellence (''Should Ideology Matter?'' retread.) (Same problem with Estrada.) Sutton is personification of the threat the New Federalism poses to Civil Rights, but his defenders will muddle debate. Why not use someone else, show WH we mean business, then bargain to ''release'' hold on Sixth Circuit.

I say Owens. She is from Texas and appointed to SCT by Bush, so she will appear parochial and out of mainstream. She is definitively anti-abortion, in ways that make her look disingenuous. Pro-business. Questionable ethics. Plus can craft the message: concerted campaign to pack the Courts. Phase I: GOP blocks many well-qualified people—Johnson, Moreno, etc. Phase II: GOP picks extremists like Owen, and pushes hard. Court gets way out of wack. Focus not only on numbers, but tangible outcomes—rulings striking down VAWA, civil rights laws, environmental laws, etc.

No more hearings this year. Lay the foundations for next January/February. Schumer hearing on federalism, and the threat it poses. Coordinate media strategy, Drop hints. Schedule the hearing well in advance in January, so we don't face accusations of sandbagging,

Stress that we have cut the BS: no more anonymous holds, no more years without a hearing, no more ridiculous document requests, no more shutting down the Committee. Rather than hold a nominee up endlessly, and ruin their career, we will vote. There's a reason why they did that—most of Clinton's nominees were impeachable. There's a reason why we do what we do—most of Bush's nominees are Nazis. That doesn't mean we will roll over and play dead. Mainstream nominees will get quick turn around time. Controversial ones demand more careful scrutiny.

WHY HAVE A HEARING AT ALL?

Memorandum: June 21, 2002

To: Senators Kennedy, Schumer, Durbin, and Cantwell

From:———

Subject: Strategy on Judges

In advance of the Judiciary Democrats' meeting on Tuesday at 2:15, below is the strategy regarding judges that we recommend that you suggest to Senator Leahy.

1. Cancel or Reschedule Deborah Cook, 6th Circuit nominee. Senator Leahy is suggesting that a hearing for Deborah Cook be scheduled for August 1st, and, Senator Leahy may have promised Senator DeWine that he will hold a hearing for Cook this year. Cook is extremely controversial on labor, employee rights, and right to jury issues and should not have a hearing this year. If Senator Leahy has indeed promised DeWine a Cook hearing, we suggest that he schedule Cook for after the November elections. Given our schedule of controversial nominees (see below), it will be difficult to mount any effective challenge to Cook if she is scheduled for early August. We recommend that Reena Raggi (2nd Circuit) be scheduled for early August instead of Deborah Cook.

2. Limit the Number of Hearings. Senator Leahy has promised hearings for Priscilla Owen, Miguel Estrada, and Michael McConnell. Other than these nominees, and the two remaining noncontroversial nominees Reena Raggi (2nd Circuit) and Jay Bybee (9th Circuit), no additional judges should be scheduled.

3. Timing of Hearings:

Owen. The consensus is to make Priscilla Owen the big fight for July 18th, as Senator Leahy has suggested, with the hope that we will succeed in defeating her.

Estrada. Miguel Estrada will be more difficult to defeat given the sparseness of his record. We agree with Senator Leahy that Estrada should be scheduled for September 19th. This will give the groups time to complete their research and the Committee time to collect additional information, including Estrada's Solicitor General memos (see below).

McConnell. McConnell will also be difficult to defeat. While he has a clear anti-choice record, he has the strong support of some Democrats and progressives. McConnell's clear anti-choice record, however, makes him a good nominee to bring up before the November elections. While Senator Leahy has suggested that a hearing for McConnell be scheduled on October 3rd, we would suggest October 10th, to provide enough time for preparation after the difficult Estrada hearing.

Suggested Schedule, July 18th: Priscilla Owen—5th Circuit; August 1st: Reena Raggi—2nd Circuit (non-controversial)—instead of Cook; September 5th: Jay Bybee—9th Circuit (supported by Reid); September 19th: Miguel Estrada—D.C. Circuit; October 10th: Michael McConnell—10th Circuit.

4. Obtaining Estrada's Solicitor General's Memos. Senator Leahy took the important first step of asking for Memoranda that Estrada produced while working at the Solicitor General's Office. Unfortunately, the Department of Justice has refused to turn over the memos, and Senator Leahy has been harshly criticized for this in the Press (two pieces in the Washington Post alone). We expect the Administration will continue to fight any attempt to turn these over, but there is precedent for getting these Memos—it was done for the Bork nomination and three other lower court nominations. We suggest that you encourage Senator Leahy to continue fighting the Administration for these Memos and, if possible, that one of you help him in this fight.

U. MICHIGAN SCANDAL

Memorandum: April 17, 2002

To: Senator (Kennedy)

From: ———

Subject: Call from Elaine Jones re Scheduling of 6th Circuit Nominees

Elaine Jones of the NAACP Legal Defense Fund (LDF) tried to call you today to ask that the Judiciary Committee consider scheduling Julia Scott Gibbons, the

uncontroversial nominee to the 6th Circuit at a later date, rather than at a hearing next Thursday, April 25th. As you know, Chairman Leahy would like to schedule a hearing next Thursday on a 6th Circuit nominee because the Circuit has only 9 active judges, rather than the authorized 16. (These vacancies are, as you know, the result of Republican inaction on Clinton nominees). Senator Leahy would also like to move a Southern nominee, and wants to do a favor for Senator Thompson.

Elaine would like the Committee to hold off on any 6th Circuit nominees until the University of Michigan case regarding the constitutionality of affirmative action in higher education is decided by the en banc 6th Circuit. This case is considered the affirmative action case most likely to go to the Supreme Court. Rumors have been circulating that the case will be decided in the next few weeks. The thinking is that the current 6th Circuit will sustain the affirmative action program, but if a new judge with conservative views is confirmed before the case is decided, that new judge will be able, under 6th Circuit rules, to review the case and vote on it.

LDF asked Senator Leahy's staff yesterday to schedule Richard Clifton, an uncontroversial nominee to the 9th Circuit, before moving Gibbons, but they apparently refused. The decision has to be made today (or by early Thursday morning) since the hearing will be noticed on Thursday.

——— and I are a little concerned about the propriety of scheduling hearings based on the resolution of a particular case. We are also aware that the 6th Circuit is in dire need of additional judges. Nevertheless we recommend that Gibbons be scheduled for a later hearing: the Michigan case is important, and there is little damage that we can foresee in moving Clifton first. (It should be noted that Clifton was nominated three months before Gibbons and that Clifton's seat, and not Gibbons', has been designated a judicial emergency.) Elaine will ask that no 6th Circuit nominee be scheduled until after the Michigan case is decided. This may be too much to promise: we only have three uncontroversial circuit court nominees left and two of these are from the 6th Circuit.

Recommendation: Let Elaine know that we will ask Senator Leahy to schedule Gibbons after Clifton. Given the dearth of uncontroversial nominees, however, the Committee will probably have to hold a hearing for Gibbons on May 9th even if there's yet no decision in the Michigan case.

VETERAN TRIBUTE FOR COLONEL ANDREW C. OLIVO

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Colonel Andrew C. Olivo.

Colonel Andrew C. Olivo has served our country for many years in the United States Army Judge Advocate General Reserve. He was a part of the Desert Storm Conflict and Gulf War I. He has received numerous awards and medals for his services. These awards include two National Defense Service Medals and Army Commendation Medals. Colonel Olivo is also a recipient of four Meritorious Service Medals and the Humanitarian Service Medal with one service star.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Colonel Olivo, for your service and sacrifice. You are a true hero.

TRIBUTE TO DON VANDERHOOF

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. McINNIS. Mr. Speaker, it is my honor to rise and pay tribute to my friend Don Vanderhoof. Don has served the community of Glenwood Springs, Colorado for many years. Over the last eight years, Don has held a seat on the City Council, the last two of which he served as Mayor. Don is a tremendous public servant, and a wonderful person, and it is my honor to call his many contributions to Glenwood Springs to the attention of this body of Congress and our nation.

Over the last eight years, Don was instrumental in providing leadership and guidance for many important City projects. During Don's tenure in city government, there were major additions to the resources available to the Glenwood Spring's Police, Fire, and Public Works Departments. In addition, the City added a new Community Center and City Hall, repaired the City's water delivery system, improved public transportation, and worked to maintain the hiking trails and beautiful wilderness areas surrounding the City. These are just a few of the many accomplishments in which Don Vanderhoof was involved for the betterment of the City of Glenwood Springs. There is no question that Glenwood Springs has become a better place as the result of Don's tireless dedication to its citizens.

The people of my hometown will miss having Don as a devoted public servant. However, Don does not intend to remain idle in his retirement. I know that he will remain very active in the Glenwood Springs community. Don will now have more time for the many volunteer and community service activities that he eagerly undertakes. In addition, Don will have the opportunity to spend more time with his lovely wife Eddie, and his many friends, neighbors and family members throughout town.

Mr. Speaker, it is my privilege to rise and pay tribute to Don Vanderhoof. He has dedicated many years of his life to improving the quality of life for the citizens of Glenwood Springs and has accomplished an incredible amount to that end. In addition to his public service, Don is a great family man and a dear friend to many. He is one of Glenwood Springs' most beloved citizens. Don's life is the embodiment of all that makes this country great and I consider it an honor to call him a friend. Thank you Don, for your service.

THE NIGHTMARE IN TURKMENISTAN

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SMITH of New Jersey. Mr. Speaker, November 25 will mark the one-year anniversary of events in Turkmenistan that turned that already bizarre autocracy into an even more nightmarish kingdom. According to the official version, opposition groups led by former high-ranking officials tried to assassinate Saparmurat Niyazov, the country's President-for-Life. The attempt failed, the plotters were found, tried and imprisoned, and in the eyes of Niyazov's regime, justice has been done.

What actually happened that day is unclear. There may well have been a coup attempt against Niyazov, who has turned himself into virtually a living god. Or, as some opposition activists in exile maintain, the whole affair may have been staged by Niyazov to crack down even harder. Since no outsider has had access to those arrested in connection with the events, the truth may never be known.

Whatever happened, it is easy to understand the desperate frustration among Turkmen. Niyazov has made Turkmenistan the only one-party state in the former Soviet space, where one man decides everything, no opposition is permitted, all media are totally censored and the populace is forced to study the "rukhnama"—a dictator's rantings that purport to be a one-stop religion, national history and morality lesson.

What is clear is that Niyazov's response to November 25 has trampled on civilized norms, even if his allegations are true. In the wake of the arrests, all opposition—real or imagined—has been crushed. Quick show trials of the accused were broadcast on television, after which they received long prison sentences with no access to relatives or international organizations. Some of the opposition leaders have already died in prison. One individual who was arrested, an American citizen named Leonid Komarovsky of Massachusetts was eventually released, as a result of pressure from Washington. Upon gaining his freedom, he told the world of the horrible tortures people suffered at the hands of Turkmen security forces. The stories rival any we used to hear from the Soviet Union or Saddam Hussein's Iraq. In addition, relatives of those deemed "enemies of the people" have been targeted for persecution. The luckier ones merely are fired and thrown out of their apartments onto the streets; others have been arrested and tortured in prison or forced to watch their loved ones being tortured.

In response to this crisis, the OSCE invoked the Moscow Mechanism, a rarely-used tool to investigate particularly appalling human rights violations. But Niyazov refused to cooperate with the OSCE, whose officially designated rapporteur was denied a visa. Nevertheless, he was able to compile a comprehensive dossier of horror, which documents as well as possible without access to prisons, the mistreatment and abuse of those arrested and the persecution of their relatives. The rapporteur also forwarded to the Government of

Turkmenistan recommendations to move towards reform. Niyazov has dismissed them as "offensive" and "interference in internal affairs."

Niyazov has also refused U.S. officials entry to his jails. Recently, Ambassador Stephen Minikes, head of the U.S. Delegation to OSCE visited Ashgabat, but despite his explicit request, was not allowed to check on the health of one of those arrested: former Turkmen Foreign Minister and OSCE Ambassador Batyr Berdiev. There are persistent rumors he has died in prison.

One year after the events of November 25, Saparmurat Niyazov remains in power. He continues his crackdown, and the country's downward spiral accelerates. Niyazov has reintroduced exit visas, a legacy of the Soviet past we thought had been definitively overcome. Just last week, he instituted new laws harshly restricting freedom of religion, which is trampled upon daily in Turkmenistan; groups brave enough to meet risk home raids, imprisonment, deportation, internal exile, house eviction and even torture. The new provisions further empower regime agents to squash religious practice. Now, individuals caught more than once in a year acting on the behalf of an unregistered community can be fined between ten and thirty months of wages, or be sent to hard labor for up to one year. Of course, registration is in effect impossible to obtain, leaving religious communities and their members in a highly vulnerable position.

A recent Niyazov decree on NGO activity makes it punishable for most Turkmen to interact with foreigners. Representatives of non-Turkmen ethnic groups, such as Uzbeks or Russians, face discrimination in education and employment. Niyazov has not only reestablished and strengthened the environment of fear, he has deliberately isolated his country from outside influences. Under his rule, Turkmenistan has no chance of developing normally.

As November 25 approaches, we recall that when a political system centralizes all power in the hands one man, offering no possibilities for participation to anyone else, people may be tempted to change that system by any means. And we have occasion to consider the eternal validity of Lord Acton's dictum: "Power tends to corrupt; absolute power corrupts absolutely."

Unfortunately, the U.S. response to Turkmenistan's blatant disregard for human rights has been shamefully weak. In August, although Turkmenistan violates freedom of emigration by requiring exit visas, the Administration made the astonishing decision to exempt Turkmenistan from Jackson-Vanik requirements on the free movement of citizens.

Our leverage on this particular dictator may be weak but we have opportunities to express our outrage about these ongoing abuses and to align ourselves with the forces of freedom and democracy. In addition to ending the Jackson-Vanik waiver, the State Department should designate Turkmenistan a "Country of Particular Concern" under the International Religious Freedom Act of 1998. The regime's well-documented record of "particularly severe violations of religious freedom" unquestionably meets the statutory threshold envisioned when we passed the Act of "systematic, ongoing, egregious violations of religious freedom."

The United States and the international community must condemn the actions of Niyazov's regime and continue working to bring Turkmenistan back towards civilized and democratic norms. Any other approach betrays our own principles.

ON INTRODUCTION OF THE AFRICAN GROWTH AND OPPORUTNITY ACT III

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. RANGEL. Mr. Speaker, Today, I am proud to join with Congressman MCDERMOTT, Chairman ROYCE, Congressman JEFFERSON, Congressman PAYNE and Congressman NEAL in the House, and Senator LUGAR in the Senate, in introducing legislation to begin the third phase of the African Growth and Opportunity Act.

It has been almost ten years since a bipartisan group of Members came together to help create a trade and investment framework between our great country and the countries of sub-Saharan Africa.

It has been more than three years since the first phase of that effort became law.

In that short time, the results have been impressive:

In three years, AGOA textile and apparel exports to the United States have doubled, rising from $570 million in 1999 to $1.1 billion for 2002. This total comprises 9 percent of all AGOA exports.

AGOA exports now comprise approximately two percent of all U.S. textile and apparel imports—a 100 percent increase from 2000, when AGOA took effect.

Africa's 92 percent export growth rate in textile and apparel products is 10 times that for China, Latin America, Europe and other major textile and apparel exporters.

However, we cannot afford to sit back and admire what we have done. So much remains to be done to fulfill the promise of this important legislation and this important trade program—to fill in the gaps that still exist.

So, today, I join with my colleagues on both sides of the aisle to call upon the House, the Senate and the President to take the next important step to broaden and deepen the commercial and bilateral relationships between the United States and African countries.

We need to ensure that the benefits of AGOA

We need to do this for so many reasons—bringing Africa more and more into the mainstream of the world trading system, strengthening the bilateral ties between the United States and African countries, giving women and men in the poorest countries in the world the chance to earn a fair and decent living so that the seeds of growth and a better life and a middle class society are sewn, rather than the seeds of discontent that we see in some other regions of the world.

To do this, we need to push forward. Specifically, we need to extend the effective date of AGOA, extend the ability of AGOA least developed countries to use fabrics from third countries, and bring under the AGOA framework the important agricultural products that many countries in the region seek to produce and export.

In the agriculture area, Africa's exports have actually *decreased* by 4.5 percent (or $25 million) since 1999. While duty free treatment will not completely solve the problem caused in part by large domestic support programs in the EU and elsewhere, this step will certainly help.

In other areas, the bill encourages both responsible conservation and responsible development through a provision in support of ecotourism, an area where many African countries have an important natural and comparative advantage that they are seeking to use in a sustainable and responsible way.

I look forward to working with many others on both sides of the aisle who have been so supportive of AGOA I and AGOA II, particularly Chairman BILL THOMAS and Chairman PHIL CRANE of the Trade Subcommittee, Congressman AMO HOUGHTON in the House, and Senator BILL FRIST and others in the Senate, along with the distinguished African Diplomatic Corps, and so many in the business community to realize our goal.

Finally, we intend this bill to be a starting point, and that as we move forward, we can work with Ambassador Zoellick and his staff, and Secretary Evans and his staff, to improve the legislation to reflect best the development needs of sub-Saharan Africa.

Also hope we can work together on other initiatives to ensure that the poorest countries of the world—such as Haiti and Bangladesh and Cambodia—are not left behind after 2005.

INTRODUCTION OF A BILL TO ALLOW FOR PRIORITY IN THE ISSUANCE OF IMMIGRANT VISAS TO SONS AND DAUGHTERS OF FILIPINO WORLD WAR II VETERANS

HON. ED CASE

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CASE. Mr. Speaker, I rise today to introduce a bill that will provide for the expedited reunification of the families of our Filipino World War II veterans who have become citizens of the United States.

This body has many times over recognized the courage and commitment of the Filipino troops who fought alongside our armed forces in the Philippines during World War II. In 1990, we provided a waiver from certain naturalization requirements for these veterans, and many thereafter became proud citizens and residents of our country. And this year we appear poised to provide one further long-delayed and long-denied measure of justice by granting them veterans benefits which were unjustly denied to them in 1946.

But a huge gap still remains, for we did not also permit naturalization in 1990 to the children of these same veterans. What my bill does is allow for the sons and daughters of those veterans that became U.S. citizens through the process established in 1990 to

have priority in their respective immigration categories.

These are real-life issues, for the stories of families who have waited years to be reunited are heartbreaking. For example, a veteran and his wife living in Hawaii filed immigration petitions for two of their six adult children; they have waited over ten years for a visa to be issued to either. Another veteran petitioned successfully for his wife's immigration visa, but has not been as successful with the applications for their five adult children. Again, this family has been holding on for ten years with the hope that they will one day live in the U.S. as a complete family.

As we all know, our Filipino World War II veterans are entering the sunset years of their lives. We have done what we can to give adequate veterans benefits for their commendable service. I now urge my colleagues to recognize and provide for the reunification of these families of our Filipino World War II veterans by supporting this bill.

VETERAN TRIBUTE FOR LANCE CORPORAL CARR CAMPBELL

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BURGESS. Mr. Speaker, I rise today to recognize the contributions and sacrifices of Lance Corporal Carr Campbell.

Lance Corporal Campbell served in the liberation of Kuwait in Operation Desert Shield and Desert Storm. During the Gulf War he engaged in surveying borders, calling in artillery hits on scud missile sites, and gathering intelligence among Iraqi prisoners of war. Because of his stellar service in this conflict, Lance Corporal Campbell was awarded the Combat Action Ribbon, South West Asian Service Medal with three stars, Saudi Arabian Liberation of Kuwait Medal, and Kuwait Liberation of Kuwait Medal.

At a time when we are once again at war, it is necessary to recognize the achievements of these national heroes. Due to their dedication, service, and sacrifice, they deserve our unwavering admiration and our unending gratitude.

Our country often takes for granted the freedoms and liberties our service men and women risk their lives to protect; yet by continuing to honor our veterans we preserve our nation's future by commemorating their past.

Thank you, Lance Corporal Campbell, for your service and sacrifice. You are a true hero.

TRIBUTE TO DESTINAE RAE

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCINNIS. Mr. Speaker, I rise before you with a solemn heart to pay tribute to a remarkable young woman. Destinae Rae passed away recently after a long and courageous battle with cancer. I knew Dusty well, she was a tremendous young woman who spread happiness and faith to every person she met and it is my honor to call her compassion and kindheartedness to the attention of this body of Congress and this nation.

Dusty grew up in Colorado and had five wonderful children and five beautiful grandchildren. The week before Dusty passed away, she was blessed with another grandchild. Dusty was a tremendous mother, grandmother, daughter, sister and friend.

Dusty was a devoted Christian and a member of the Evergreen Baptist Church in her home of Evergreen, Colorado. Dusty was also involved in volunteer work. She was active in a number of cancer associations in Colorado and dedicated a great deal of her time to comforting the victims of cancer and raising funds for medical research. I know that many cancer victims had their lives bettered by Dusty's dedication and compassion for that cause.

Dusty will also be remembered for the many lives that she touched with her amazing singing voice. Dusty used her singing talents to spread her faith, happiness and joy for life to scores of people throughout Colorado. Dusty spent her last years recording and performing Christian music. She truly had the voice of an angel.

Mr. Speaker, it is my honor to rise before you to pay tribute to Destinae Rae. Dusty's parents, my longtime friends Dan and Marty Thompson, describe her best as a woman who was beautiful on the outside, and had an even more beautiful heart. We will all miss Dusty, and my heart goes out to her loved ones in this difficult time.

THE NATIONAL FILM PRESERVATION ACT OF 2003

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BERMAN. Mr. Speaker, today, the distinguished gentleman from Michigan, Representative JOHN CONYERS, and I introduce "the National Film Preservation Act of 2003." Senator PATRICK LEAHY joins us by introducing identical legislation in the Senate.

This legislation reauthorizes the National Film Preservation Board (NFPB) and the National Film Preservation Foundation (NFPF) for ten years. The NFPF is an independent, nonprofit organization established in 1996 with bipartisan Congresssional support to help save America's film heritage. The NFPF is the charitable affiliate of the NFPB of the Library of Congress, which was also established in 1996.

This legislation also increases the authorized appropriations for the NFPF from $500,000 in fiscal year 2004 and 2005 up to $1,000,000 in fiscal years 2006 through 2013. It authorizes additional appropriations not to exceed $1,000,000 for cooperative film preservation and access initiatives by the NFPF for each of the fiscal years 2006 through 2013. All authorized appropriations are only to be made available to match private contributions to the NFPF.

The excellent work and strong track record of the NFPB and NFPF justify both the reauthorization and increased authorization of appropriations provided by this bill. Working with archives and others in the film preservation community, the NFPF supports activities that save films for future generations, improve film access for education and exhibition, and increase public commitment to preserving film as a cultural resource, art form, and historical record. In essence, its mission is to save America's "orphan films"—newsreels, silent films, documentaries, avant-garde works, and other independent films that are not preserved by commercial interests.

Over the past seven years, the NFPF has done great work in furtherance of this goal. Working with more than 80 organizations, it has helped preserve approximately 600 films and collections. Through its preservation efforts, the NFPF has made it possible for organizations in 34 states and the District of Columbia to use these films in education and research. Many of the films preserved provide unique windows into American history and culture. For instance, films preserved through NFPF efforts include social dramas from Thomas Edison's studio, the earliest "talkie" of an American president, and home movies clandestinely shot by Japanese Americans in World War II detention camps.

As authorization for the NFPB and NFPF expired on September 30, 2003, Congress must act quickly on this legislation. We cannot allow the important work of these organizations to lapse. Over 50% of the films made before 1950 have disintegrated, and only 10% of the movies produced in the United States before 1929 still exist. We must act to stem further losses of this rich cultural heritage. No art form is more uniquely American than film, but unfortunately, few art forms are more susceptible to degradation through passage of time and poor preservation.

All parties interested in preservation and expansion of the public domain, whether for research, education, or further commercial exploitation, must join Representative Conyers, Senator Leahy, and myself in securing passage of this legislation. While it may be intellectually stimulating to debate radical copyright revisions as mechanisms to expand the public domain, these debates should not detract from the pursuit of proven methods, like NFPF projects, to preserve and expand the public domain. The tight fiscal picture for the U.S. government indicates that this legislation will be very difficult to pass, thus all public domain advocates should focus their full attention on this effort.

TRIBUTE TO CHARLES LEWIS, III

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MOORE. Mr. Speaker, I would like to take this opportunity to commend a remarkable man who lives in Leawood, Kansas, in the Third Congressional District. Charles Lewis, III, has served as the golf pro at Mission Hills Country Club for more than 25

years, in addition to his many other services to the Kansas City community. Unfortunately, for the people of Kansas City, Charles recently announced his plans to retire.

On September 14, 1960, Charles Lewis, who was competing in his first U.S. Amateur tournament, beat Jack Nicklaus at the St. Louis Country Club, a feat which some experts have called the greatest match-play upset of the 20th century.

Since he was a child, Charles Lewis has devoted much of his time and energy to golf. In addition to perfecting his own skill through practice, Charles has spent many years at the Mission Hills Country Club helping others do the same. He also serves on the advisory board of the Junior Golf Foundation of Greater Kansas City, an organization that has introduced more than 3,000 children to the game.

I commend Charles Lewis, III on this 20th day of November 2003 for his incredible skill and dedication to sharing his passion for this exciting game, and place into the RECORD an article from the Kansas City Star detailing his achievements.

[From the Kansas City Star, June 4, 2000]

LOCAL PRO ONCE BEAT NICKLAUS

(By Howard Richman)

On a wall in his Mission Hills Country Club pro-shop office, Charles Lewis III displays one of his most prized possessions, a portrait of Jack Nicklaus.

Forty years ago this summer, Lewis stunned the golf universe when he owned Nicklaus, the man who has been called the greatest golfer in history. Nicklaus will be in town Tuesday to play in the Children's Mercy Hospital Golf Classic at Blue Hills Country Club.

But one sultry, unforgettable afternoon, Lewis knocked off Nicklaus in what some experts have called the greatest match-play upset of the 20th century.

It was Sept. 14, 1960. The site: St. Louis Country Club. In anticipation of large galleries, ropes kept the spectators on the outside looking in, which was a good thing because this U.S. Amateur tournament had taken on the feel of a major professional championship.

Lewis, who was born in Miami, Okla., and raised in Little Rock, Ark., was participating in his first U.S. Amateur. A 19–year-old unknown, Lewis seemed to handle his first major event as if it were a scramble with some friends back home at The Country Club of Little Rock.

Lewis won his first three match-play matches, rarely in jeopardy through any of them. Although he had no real big-time-event background, Lewis knew he was prepared for this moment.

''As a kid, I'd go play on my dad's course (his father was the head pro at the country club),'' Lewis said. ''Sometimes there wouldn't be anybody out there. I'd play a variety of shots. I'd go around trees. Under them. Over them. I had no fear of hitting shots.''

Lewis had to face his fear, if he had any, in the fourth round at St. Louis Country Club. Lewis was about to go head to head with Nicklaus, the defending Amateur champion and runner-up to Arnold Palmer in the U.S. Open just a few months earlier. In the morning's third round, Nicklaus shot a 31 on the front side on the way to a 6 and 5 drubbing of Phil Rodgers. In his early match, Lewis beat Connecticut amateur champion Dick Sideowf 6 and 4.

Then it was time for Lewis to match his game against Nicklaus, who was receiving accolades in the same fashion that Tiger Woods would receive them more than 30 years later.

''He (Nicklaus) was the fair-haired boy,'' Lewis said. ''People talked about how he did things different than anybody else, how he could hit it straighter and farther, like the way they talk about Tiger.

''Me? I was the country boy. But I was never really scared. I had played a lot of golf.''

It was estimated that more than 5,000 spectators tailed Lewis and Nicklaus in their match, an impressive crowd for a non-title match. It turned out to be a match that Lewis dominated, due in part to Nicklaus' awful putting.

Lewis birdied the par-4 No. 1 and went 1-up. Nicklaus bogeyed the second hole, which Lewis won. When Lewis birdied the par-5 fifth, he went 3-up. Nicklaus 3-putted No. 6. And No. 7. By the time they made the turn, Lewis was a cozy 6-up. The upset was all but sealed.

''Jack and I didn't really talk during the match,'' Lewis recalled, ''but I do remember his dad say something to me as I was walking along. He said, 'You're thumping my little boy.' I'd met Jack's dad before. He was a class act. Like Jack.''

Nicklaus finally won his first hole at No. 10 but not because of anything spectacular on his part. Lewis 3-putted. Lewis, though, didn't swerve out of control. In fact, The New York Times reported that Lewis, ''under the pressure of a huge gallery, and meeting his first big test, was cool and poised.''

The match came to an early conclusion when Lewis hit his 4-wood approach at the par-5 15th onto the green. Nicklaus' second shot found the rough. Lewis birdied and closed the deal. His 5 and 3 win over Nicklaus shocked golf circles. Just last year, Golf World magazine ranked Lewis' win the greatest match-play upset of the 20th century.

Nicklaus, who won the Amateur in 1961, has the fourth-best winning percentage in U.S. Amateurs of players with at least 20 wins (24–5 record). Lewis, though, prevented him from possibly winning three in a row. The only one who has done that was Woods during 1994–96.

In his book, My Story, Nicklaus said this about his loss to Lewis: ''I 3-putted six times, once from near gimme range, and never had a hope against Charlie Lewis, a good golfer from Arkansas. I learned some more about controlling the psyche and about self-pacing from that experience.''

Lewis still remembers what Nicklaus said following their match.

''He said, 'Good luck. . . . I hope you win it all.' I think he meant it,'' Lewis said.

But Lewis couldn't win it all. He went on and won his next two matches. The sixth one was important because it earned him an invitation to the Masters. In the scheduled 36-hole semifinals, Lewis' streak was halted. He fell to Bob Gardner 2 and 1.

Lewis played in two more U.S. Amateurs. But none of them matched his achievement in 1960. After serving in Vietnam with the Marines, Lewis came back, won the 1967 Arkansas Amateur, then gave the PGA Tour a shot. He thinks his best finish was 14th place, which was worth $2,200. After two years, Lewis relinquished the idea of trying to make it out there.

''His personality wasn't made for the tour,'' said Lewis' wife, Marilyn, who plays more golf than her husband. She's on the golf course five times a week.

''He could play the game,'' Marilyn said. ''But he hated going from town to town. He wanted to be somewhere where he could put his feet up and relax.''

Lewis returned to Little Rock, where a friend told him about an assistant club-pro job in Kansas City. Lewis phoned Duke Gibson, the pro at Blue Hills Country Club, and Gibson hired Lewis over the phone. Twenty-eight years ago, Lewis moved on to Mission Hills.

On Tuesday, Lewis hopes to rekindle memories with Nicklaus.

''It's been years since I talked to Jack,'' Lewis said. ''We played a practice round together when I played in the Masters. I hope I get a chance to talk to him. As I said, he's a class act. But I'm sure he would have preferred to beat me.

''But that was a day I accomplished something. I saw more media than I had ever seen. I got telegrams from people I didn't even know. Next to my marriage, that (beating Nicklaus) is the greatest thrill of my life.''

INTRODUCTION OF RESOLUTION COMMENDING IRAQI WOMEN

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. MALONEY. Mr. Speaker, today, Representative BIGGERT, Representative HOOLEY, and I introduce legislation to commend Iraqi women for their participation in Iraqi government and civil society and to advocate for the inclusion of women's rights in the Iraqi constitution.

The women of Iraq should have a stake in the future of their country. We must support the efforts of the Iraqi women to require that the constitution of Iraq includes equal rights for women. Iraq has the opportunity to begin a new chapter by rejecting the ways of Saddam Hussein, and embracing democracy, including the right to vote for all its citizens. I believe that the United States should support these efforts in every possible way.

I look forward to working with Representative BIGGERT, Representative HOOLEY and my other colleagues to pass this resolution and to fight for the rights of women in Iraq.

TRIBUTE TO NORMAN N. BURG, MD

MAURICE HINCHEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HINCHEY. Mr. Speaker, I rise today to recognize the distinguished career of Dr. Norman N. Burg. Through more than 40 years of medical practice in Ulster County, New York, Dr. Burg has touched the lives of countless people and has improved the delivery of regional health care services immeasurably. I am pleased to join the health care community in Ulster County in congratulating Dr. Burg on his outstanding career.

During his four decades of service in Ulster County, Dr. Burg has operated a private practice, served on staff at two local hospitals,

having been president of the medical staff at both. He has also contributed his leadership skills to serving the Ulster County Infirmary, Ferncliff Nursing Home, St. Francis Hospital in Poughkeepsie and Northern Dutchess Hospital.

Throughout his career, Dr. Burg has taken great pride in sharing his accumulated knowledge of medicine and worked diligently to educate aspiring physicians. Among his many accomplishments, he was a founder and the first program director of the residency program at Family Medicine in Kingston. This program has trained more than 100 family physicians, the majority of whom continue to practice medicine in New York. It also paved the way for the creation of the Mid Hudson Family Health Institute that currently provides health care services to under-insured and uninsured residents of the Hudson Valley. The Institute stands as a testament to Dr. Burg's deeply held belief that all citizens should be afforded access to health care regardless of their economic situation.

Dr. Burg has also been extremely involved in his community since coming to Ulster County. His list of activities include serving as the school physician and football team physician for Onteora High School, president and coach of the Woodstock Little League, EMT instructor, board member of the Woodstock Volunteer Ambulance Squad and chairman of the Woodstock Narcotics Guidance Council.

Mr. Speaker, it is my privilege to recognize the outstanding accomplishments of Dr. Norman Burg. His deep commitment to improving the lives of people around him has yielded a distinguished record of service and has made Ulster County and much of New York, a better, healthier place to live.

RECOGNIZING PRESIDENT CHEN SHUI-BIAN OF TAIWAN UPON HIS RECEPTION OF THE INTERNATIONAL HUMAN RIGHTS AWARD

TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. LANTOS. Mr. Speaker, on November 4, 2003 I had the privilege of entering into the RECORD the prepared remarks of President Chen Shui-bian upon his acceptance of the International Human Rights Award on October 31, 2003. It is with great pleasure, Mr. Speaker, that today I am able to enter into the RECORD President Chen's remarks as delivered.

Mr. Speaker, I would also like to take this opportunity to once again commend President Chen for his decades-long struggle for human rights and democracy in Taiwan and congratulate him upon his acceptance of the International Human Rights Award. President Chen is a freedom fighter we can all look up to, and it is with great pleasure that I enter into the CONGRESSIONAL RECORD his remarks, as delivered.

President Horton, Congressman Lantos, Congressman Ackerman, Mr. Rabaut, Mr. Wu, Executive Director Dr. Kantrow, Board Member Dr. Chen, Distinguished Guests, Ladies and Gentlemen: Good evening!

On behalf of the government and people of Taiwan, I would like to pay special tribute to the International League for Human Rights (ILHR). Over the last 62 years since its establishment, the League has worked unrelentingly in carrying out its mission of defending human rights and rights advocates who have risked their lives to promote the ideals of a just and civil society.

The Human Rights Award conferred on me this evening is an honor bestowed upon the 23 million people of Taiwan. It signifies both affirmations and expectations. The award is representative of the international validation that the people of Taiwan have received for decades of effort in pursuit of democracy, freedom and human rights. It is also a reminder that we have assumed by destiny the duty of protecting human rights and of upholding international human rights principles.

The year 2000 marked Taiwan's first peaceful transfer of power and our country's first alternation of political parties, an accomplishment unprecedented in the history of all Chinese societies. In my inaugural speech, I proposed a goal of building our nation on the principles of human rights. We are committed to abide by the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Vienna Declaration and Program of Action. We also pledged to bring Taiwan on par with the international human rights system despite our authoritarian past.

Over the past three and a half years, concrete actions have been taken to fulfill our commitments. In step with the institutionalization of human rights protection mechanisms, comprehensive human rights policies and implementation measures have been carefully drafted, as outlined in our Human Rights Policy White Paper, and the Organic Law of the National Human Rights Commission is currently under review in our National Legislature.

My office has established a presidential Human Rights Advisory Committee and the Cabinet has also established an Inter-Ministerial Committee. Both have been collaborating with local and international human rights NGOs for the purpose of incorporating the International Bill of Rights into a ''Taiwan Bill of Rights.'' Furthermore, the ''National Human Rights Report'' will soon be published—another first for Taiwan—and work is in progress for a National Human Rights Memorial Museum responsible for social education and raising public awareness.

My friends, although our journey has not been easy, Taiwan has not stood alone. Support from the international community, particularly the United States, has played a critical role. I will never forget the watershed event—the Kaohsiung Incident—in Taiwan's democratization process. On December 10, 1979, a group of Taiwan citizens defiantly held a rally to commemorate International Human Rights Day. Because such activity was forbidden by the ruling regime of the time, rally leaders were charged with illegal assembly and conspiracy for sedition.

As a defense attorney in the Kaohsiung Incident, I personally witnessed the efforts of ILHR, who sent Professor John Kaplan to Taiwan to observe the trial at the military tribunal. The rest of the international human rights community also rendered assistance—and inspiration—to Taiwan's democratic movement.

My wife and I were both victims of human rights violation I was sentenced to prison for fighting for freedom of speech. My wife was seriously injured in what is believed to be a politically motivated accident and must spend the rest of her life in a wheelchair. However, like the brave sacrifices made by Taiwan's pioneers of democracy, our suffering only serves to strengthen the determination of the Taiwanese people in their pursuit of political and personal freedoms.

Today, there are no more blacklists, no more political prisoners, no more religious persecution. Citizens in Taiwan now enjoy full civil rights—freedom of speech, freedom of expression, freedom of assembly, freedom of press and other categories of rights. Despite our exclusion from the United Nations, Taiwan has never slowed its pace to push for human rights reform.

At a time when the international community is caught up in debates on ''clashes of civilization'' with regard to human rights protection, Taiwan's experience is proof that human rights are a universal value and humanity's common asset. All countries and individuals should have access to these universal rights; none should be subjected to a double-standard. As stated in the Universal Declaration of Human Rights, ''Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, color, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.''

I would like to take this opportunity to express appreciation to the government of the United States of America for its efforts to help promote human rights in Taiwan. Section II(C) of the ''Taiwan Relations Act'', which was passed by the U.S. Congress in 1979, stipulates that ''the preservation and enhancement of the human rights of all the people an Taiwan are hereby reaffirmed as objective of the United States.'' We appreciate, and are always mindful of the concern and support a more established democracy has given to a fledgling one.

Taiwan's achievement in human rights and democracy so far would not have been possible were it not for the generosity of those of the international community who have stood behind us. Likewise, we would not be able to receive the affirmation and commendation of the ILHR and other international human rights organizations.

Of course, a sound and solid institutionalized system is requisite for the effective protection of human rights. Taiwan has now established a fair electoral environment with an increasingly vigorous civil society. However, much remain to be further strengthened in terms of consolidating and deepening our democracy and human rights. Whether we succeed or not would rely on the collective and continuing efforts of the people, particularly on whether we can consolidate our democracy by rectifying the inadequacies in our constitutional framework.

More than two centuries ago, the founding fathers of the United States spurred in Constitutional debate, prompting a great New Yorker, Mr. Alexander Hamilton, to criticize ''the insufficiency of the present Confederation to preserve the Union.'' He argued in ''The Federalist Papers'' that the Articles of Confederation failed to address issues such as a checks-and-balances system of the government, separation of powers among agencies, fair representation of the States, and safeguarding freedom of the people. He concluded that the very design of the Articles of Confederation was insufficient to meet the needs of the American people.

As a result of extensive discussions and debates by America's founding fathers, the

Constitution of the United States of America was created and has been honored to this day. The U.S. Constitution became the pulse of American society, and allowed for amendments, including Bill of Rights, to be incorporated, thereby guaranteeing freedom and laying a strong foundation for sustainable development of the American democracy.

Taiwan now faces a similar ''insufficiency'' of the constitutional framework. As my country's leader, it is imperative that I shoulder responsibility for Taiwan's national development and set a clear vision for the future. I believe that a sound and sustainable constitutional framework can be created through rational debate and engendered by civic consciousness. This is the rationale upon which I have proposed the concept of ''hastening the birth of a new constitution for Taiwan.''

The ''hastening of a new Taiwan constitution'' will determine whether or not our democracy can come into full bloom. This, strengthened and supplemented by the institutions of direct democracy, such as referendums, would be a necessary step in advancing Taiwan's human rights and the deepening of its democracy. One must not be misled by the contention that holding referendums or re-engineering our constitutional framework, bears any relevance to the ''Four No's plus one'' pledge presented in my inaugural speech. Neither should matters concerning Taiwan's constitutional development be simplistically interpreted as a political debate of ''unification versus independence.'' I stand before you today, appealing to the collective conscience of the world community, asking that the voice of Taiwan be heard, for ours is the voice of democracy and progress. It is my job as President, to safeguard the security, democracy, freedom and human rights of the 23 million people of Taiwan, and, in so doing, build a solid foundation for the sustainable progress of Taiwan's continuing democratization.

The progression of democracy and human rights in Taiwan not only signifies a triumph of our people in the relentless pursuit for freedom, it is also a torch of democracy for all Chinese societies and has become an indispensable asset to the United States as well as the international society. I have great confidence that by advancing our democracy, we shall show where Taiwan stands in terms of values: A veritable part of the world's democratic community.

While furthering human rights in Taiwan, I call for a joint effort among Asian governments and regional NGOs for a regional framework for the advancement of human rights, including a state-sponsored regional charter, a regional commission, and a regional court of human rights. The newly founded Taiwan Foundation for Democracy can serve as one of the channels through which we shall endeavor to make our rightful contributions and share out experience in the protection and promotion of human rights. I want Taiwan to be a positive contributing force in the international human rights movement.

On the Green Island, situated off the south-east coast of Taiwan, there used to be a concentration camp and prison for the confinement and deprivation of countless human rights defenders. On this island, the Taiwanese equivalent to the infamous Robin Island of South Africa, there stands a monument on which names of victims of human rights abuse are inscribed. The epitaph reads: ''In those times, how mothers wept through long nights for their imprisoned children.''

I have kept that epitaph in my heart, and tonight, I would like to share it with you as a tribute to all who support, advocate, and have stood up in the name of human rights: Let there be no more fear, let there be no more tears. Let the world take Taiwan as an example. She is emerging from her democratic metamorphosis.

While I am standing on this stage, receiving this Human Rights Award and giving this speech, out there is a group of people protesting and shouting. I must tell them clearly: You are in a wrong place and protesting to the wrong person; for you should be happy for me to receive this Award. Human rights are universal. The path towards human rights is the right path and a road of no return. The democratic achievements of Taiwan and the deepening of human rights there can serve as a beacon for others. What you should ask yourselves is: Why can Taiwan do it and we cannot? Along with the 23 million people in Taiwan, I would like to invite the people protesting out there to share my joy and pride in receiving the Human Rights Award. Do believe in democracy, in freedom and in human rights. We will make it.

Thank you.

AMENDMENT TO SUPPORT CURRENT U.S. PATENT AND TRADEMARK OFFICE POLICY AGAINST PATENTING HUMAN ORGANISMS

HON. DAVE WELDON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. WELDON of Florida. Mr. Speaker, this summer I introduced an amendment that provides congressional support for the current U.S. Patent and Trademark Office policy against patenting human organisms, including human embryos and fetuses. This amendment was approved by the House of Representatives with bipartisan support on July 22, 2003, as Sec. 801 of the Commerce/Justice/State appropriations bill.

On November 5th of this year, I submitted to the CONGRESSIONAL RECORD an analysis of my amendment that offers a more complete elaboration of what I stated on July 22nd, namely, that this amendment ''has no bearing on stem cell research or patenting genes, it only affects patenting human organisms, human embryos, human fetuses or human beings.''

However, some have continued to misrepresent my amendment by claiming it would also prohibit patent claims directed to methods to produce human organisms. Moreover, some incorrectly claim that my amendment would prohibit patents on claims directed to subject matter other than human organisms. This is simply untrue.

What I want to point out is that the U.S. Patent Office has already issued patents on genes, stem cells, animals with human genes, and a host of non-biologic products used by humans, but it has not issued patents on claims directed to human organisms, including human embryos and fetuses. My amendment would not affect the former, but would simply affirm the latter. This position is reaffirmed in the following U.S. Patent Office letter of November 20, 2003.

I submit to the RECORD a letter from James Rogan, Undersecretary and Director of the U.S. Patent office, that supports the enactment of my amendment because it ''is fully consistent with our policy.''

U.S. PATENT AND TRADEMARK OFFICE,
November 20, 2003.

Hon. TED STEVENS,
Chairman, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for the opportunity to present the Administration's position on the Weldon amendment adopted by the House during consideration of H.R. 2799, the Commerce-Justice-State Appropriations bill FY 2004, and the effect it would have on the United States Patent and Trademark Office (USPTO) policy on patenting living subject matter. For the reasons outlined below, we view the Weldon amendment as fully consistent with USPTO's policy on the non-patentability of human life-forms.

The Weldon Amendment would prohibit the U.S. Patent and Trademark Office from issuing any patent ''on claims directed to or encompassing a human organism.'' The USPTO understands the Weldon Amendment to provide unequivocal congressional backing for the long-standing USPTO policy of refusing to grant any patent containing a claim that encompasses any member of the species Homo sapiens at any stage of development. It has long been USPTO practice to reject any claim in a patent application that encompasses a human life-form at any stage of development, including a human embryo or human fetus; hence claims directed to living ''organisms'' are to be rejected unless they include the adjective ''nonhuman.''

The USPTO's policy of rejecting patent application claims that encompass human lifeforms, which the Weldon Amendment elevates to an unequivocal congressional prohibition, applies regardless of the manner and mechanism used to bring a human organism into existence (e.g., somatic cell nuclear transfer, in vitro fertilization, parthenogenesis). If a patent examiner determines that a claim is directed to a human life-form at any stage of development, the claim is rejected as non-statutory subject matter and will not be issued in a patent as such.

As indicated in Representative Weldon's remarks in the Congressional Record of November 5, 2003. the referenced language precludes the patenting of human organisms, including human embryos. He further indicated that the amendment has ''exactly the same scope as the current USPTO policy,'' which assures that any claim that can be broadly construed as a human being, including a human embryo or fetus, is not patentable subject matter. Therefore, our understanding of the plain language of the Weldon Amendment is fully consistent with the detailed statements that the author of the amendment, Representative Weldon, has made in the Congressional Record regarding the meaning and intent of his amendment.

Given that the scope of Representative Weldon's amendment does not alter the USPTO policy on the non-patentability of human life-forms at any stage of development and is fully consistent with our policy, we support its enactment.

With best personal regards, I remain

Sincerely,

JAMES E. ROGAN,
Under Secretary and Director.

THE STUDENT AID STREAMLINED DISCLOSURE ACT OF 2003

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SAM JOHNSON of Texas. Mr. Speaker, today I am introducing the Student Aid Streamlined Disclosure Act, to enhance the privacy of individuals who apply for a federal student loan or Pell Grant and to ensure the integrity of student aid programs administered by the Secretary of Education.

This year, the Department of Education anticipates that more than 13 million people will apply for federal student aid. In order to verify income information, approximately 4 million of these applicants will be selected and required to hand over detailed tax information to school administrators with few controls in place to guard against redisclosure or misuse of this highly personal information. In addition, nearly 100,000 people will be required to waive their right to taxpayer privacy as a condition of applying for an income-contingent student loan.

The current process used by the Department of Education to verify the income information supplied by students is not only unnecessarily invasive of student privacy, but it also is ineffective. Numerous studies by the Department of Education and the Education Inspector General have concluded that income information supplied by students does not match information on file with the Internal Revenue Service. In fact, a recent study of applications filed during fiscal years 2001 and 2002 found that the Department of Education had paid $602 million in Pell Grants to individuals who were either ineligible or eligible for smaller awards.

The General Accounting Office has confirmed that this substantial misallocation of resources could be corrected if Congress would redesign the law that governs sharing of information between the Department of Education and the Internal Revenue Service. I am pleased to say that the bill I am introducing today would accomplish that task in a way that enhances taxpayer privacy.

This legislation would provide for income verification for every student loan application, but it would require disclosure of information on file with the IRS only in cases where there is a discrepancy that is large enough to impact the student grant or loan. Sensitive tax information from the IRS could not be disclosed directly to schools or contractors, but could only be disclosed to Department of Education officials or to the taxpayer who filed the return.

This tax legislation is a priority of the Bush Administration and the Education and Workforce Committee has endorsed data sharing as a means of reducing waste, fraud, and abuse in programs administered by the Secretary of Education. Congress has already authorized the Secretary of Education to match data with the IRS in the Higher Education Act of 1998, but, to date, the Internal Revenue Code has not been amended to allow this matching to take place. My staff has worked closely with the Treasury Department, the Office of Management and Budget, the Joint Committee on Taxation, and the Department of Education in developing this proposal.

This proposal is the right policy and, with all of our consultations, we believe that it is the correct technical solution. I am introducing it as we hopefully close out the first session of the 108th Congress in order that it can be reviewed over the next few months by all participants in the student loan community. I ask any stakeholders—students, parents, schools, lenders and loan processors—to review this legislation to be sure that there are no unintended consequences of the bill. I welcome constructive criticism of this bill and look forward to seeing it enacted next year.

H.R. 6—ENERGY POLICY ACT OF 2003

SPEECH OF

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. STENHOLM. Mr. Speaker, today, I rise in support of H.R. 6, the energy bill that America has waited so long for. Like the original House version of this legislation, I intend to support the conference report on the floor today, but not without some reservation.

Since being elected to Congress in 1978, I've carefully watched our federal spending and have advocated for a balanced budget. Under our current policies, America is facing a $400 billion budget shortfall, and we will continue to run deficits for the foreseeable future. This energy bill conference report continues on that path of fiscal irresponsibility. The Joint Committee on Taxation stated this bill will cost up to $23.5 billion dollars. I am very disappointed this conference report didn't include the offsets that the Senate version did.

However, I truly believe this legislation provides the proper framework to diversify America's fuel sources. As Ranking Member of the House Agriculture Committee, I'm glad there are greater incentives for increased production of ethanol. I'm glad to see production tax credits for wind, solar and biomass energy, as well as nuclear electricity generation. Diversification of our nation's energy sources will help us meet our goal of reducing our dependence on foreign sources of fuel.

More importantly, this energy bill provides the right tools for independent oil and gas producers to continue producing from our own fields, right here in this country. I've been fighting for these measures for years, and I'm glad Congress is finally going to implement them. The time is long overdue for Congress to recognize the importance for America to decrease our use of oil and gas from foreign countries and to capitalize on the resources beneath our own soil. And, contrary to what many groups will lead us to conclude, we can drill for oil and gas without doing damage to our environment. Former U.S. Senator Lloyd Bentsen of Texas once said that when America imported more than half of its crude and petroleum products, it would have reached a point of peril. Friends and colleagues, we have reached that point.

Although I intend to support this legislation, I must express my extreme disappointment of the process in which this bill was considered. I have worked for years in Congress to promote equality and bipartisanship in this great institution. However, this bill was written behind closed doors with no input from the public. Unfortunately, my Democratic colleagues were not given the opportunity to offer significant amendments to the legislation. This conference report isn't perfect, and it could have been improved significantly if my colleagues were allowed to bring their ideas to the negotiating table and if we were allowed to offset the cost of this legislation.

FREEDOM FOR MANUEL VÁZQUEZ PORTAL

HON. LINCOLN DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I rise to speak about Manuel Vázquez Portal, a prisoner of conscience in totalitarian Cuba.

Mr. Vázquez is a 52-year-old writer, poet and founder of the independent news agency Grupo de Trabajo Decoro. Originally, Mr. Vázquez was a high school teacher and a journalist for several state-owned media outlets. However, after years of observing the constant lies and incessant distortion mandated by Castro's totalitarian regime, Mr. Vázquez began working for an independent news agency in 1995. As an independent journalist, Mr. Vázquez relentlessly chronicled the atrocities committed by Castro's machinery of repression, even going so far as to have his articles published under the pseudonym Pablo Cedeño. Eventually, Mr. Vázquez founded the independent news agency Grupo de Trabajo Decoro in 1999.

In fact, because of his ability to find and write the truth as a journalist working under Castro's stifling repression, Mr. Vázquez will receive the 2003 International Press Freedom Award from the Committee to Protect Journalists on this coming Tuesday, November 25, 2003.

Mr. Speaker, when Mr. Vázquez's fellow recipients of the International Press Freedom Award accept this high honor, Mr. Vázquez will be languishing in the Cuban totalitarian gulag next to a toilet he describes as a "hole regurgitating its stench 24 hours a day." Mr. Vázquez was arrested in the reprehensible March crackdown on those many patriots who actively opposed Castro's tyranny. Subsequently, in a sham trial held in April, Mr. Vázquez was sentenced to 18 years in the Cuban gulag.

I remind my colleagues that, under Castro's totalitarian regime, any freedom of the press, any effort to display the atrocities of the regime under the spotlight of truth, is met with swift and violent repression. Mr. Vázquez described the punishing conditions of the Cuban gulag in a diary smuggled out of prison by his wife. He said "the cell is a space of 1.5 meters wide and 3 meters long." Inside his cell, he describes an interior comprised of insects, an unstable cot, a filthy mattress and a disgusting toilet.

Mr. Speaker, a man who is about to receive the International Press Freedom Award is suffering at this very moment in those abominable conditions. Mr. Vázquez had the courage to depict the reality of Cuba under Castro's totalitarian dictatorship, and now he is locked in the gulag for the next 18 years.

My Colleagues, we can not stand by in silence while those who pursue truth languish in the gulags of repressive dictators. We must stand together and loudly demand freedom for Manuel Vázquez Portal.

PHARMACY EDUCATION AID ACT OF 2003

HON. BARBARA CUBIN
OF WYOMING
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mrs. CUBIN. Mr. Speaker, pharmacists are a vital link in this nation's health care system. Across the nation, we are seeing a shortage of pharmacists and this shortage is taking hold in Wyoming as well.

Americans of all ages will continue to take advantage of the therapeutic benefits that come from prescription medications.

Without pharmacists to distribute those drugs and educate us about their effects, we would see the downfall of our health care system. We cannot allow that to happen, and must do what we can to ensure an adequate supply of pharmacists in Wyoming, and across the country.

In addition, as Congress prepares to pass a Medicare reform prescription drug bill, seniors will have greater access to medications at a lower cost and will need qualified pharmacists to help them understand and properly use their medications.

The Pharmacy Education Aid Act of 2003 authorizes two new student-loan programs for pharmacists. The first would repay the student loans of pharmacists who agree to practice for at least 2 years in areas with a critical shortage of pharmacists.

The second would repay the loans of students who agree to serve for a least 2 years as faculty members at accredited schools of pharmacy; one of which is at the University of Wyoming.

It makes sense that if we want an adequate supply of pharmacists in the workplace then we need to ensure adequate faculty to guide them through their education.

We are seeing more of a demand for pharmacists in Wyoming, whether it be in our local Walmart and Safeway stores, or in our hospitals.

Our faculty at UW's school of pharmacy is also stretched very thin, and I want to ensure that we continue to have excellent faculty there. After all, they are responsible for providing Wyoming with the best and brightest in the way of pharmacy graduates.

This legislation is designed to encourage students to enter the pharmacy profession, both in individual practice and as university educators. We all know how expensive it is to get an education these days, and pharmacy students can face loans of up to $90,000.

This bill will not only help students in Wyoming with the financial burdens associated with education, but help Wyoming obtain the qualified pharmacists it needs.

SAY NO TO INVOLUNTARY SERVITUDE

HON. RON PAUL
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. PAUL. Mr. Speaker, the ultimate cost of war is almost always the loss of liberty. True defensive wars and revolutionary wars against tyrants may preserve or establish a free society, as did our war against the British. But these wars are rare. Most wars are unnecessary, dangerous and cause senseless suffering with little being gained. Loss of liberty and life on both sides has been the result of most of the conflicts throughout the ages. The current war, in which we find ourselves, clearly qualifies as one of those unnecessary and dangerous wars. To get the people to support ill-conceived wars the nation's leaders employ grand schemes of deception.

Woodrow Wilson orchestrated our entry into World War I by first promising in the election of 1916 to keep us out of the European conflict, then a few months later pressured and maneuvered the Congress into declaring war against Germany. Whether it was the Spanish-American War before that or all the wars since, U.S. presidents have deceived the people to gain popular support for ill-conceived military ventures. Wilson wanted the war and immediately demanded conscription to fight it. He didn't have the guts to even name the program a military draft and instead in a speech before Congress calling for war advised the army should be "chosen upon the principle of universal liability to service." Most Americans at the time of the declaration didn't believe actual combat troops would be sent. What a dramatic change from this early perception when the people endorsed the war to the carnage that followed and the later disillusionment with Wilson and his grand scheme for world government under the League of Nations. The American people rejected this gross new entanglement reflecting a somewhat healthier age than the one in which we find ourselves today.

But when it comes to war, the principle of deception lives on and the plan for "universal liability to serve" once again is raising its ugly head. The dollar cost of the current war is already staggering yet plans are being made to drastically expand the human cost by forcing conscription on the young men (and maybe women) who have no ax to grind with the Iraqi people and want no part of this fight.

Hundreds of Americans have already been killed and thousands more wounded and crippled while thousands of others will suffer from new and deadly war-related illnesses not yet identified.

We were told we had to support this preemptive war against Iraq because Saddam Hussein had weapons of mass destruction and to confront the al Qaeda. It was said our national security depended on it. But all these dangers were found not to exist in Iraq. It was implied that those who did not support this Iraqi invasion were un-American and unpatriotic.

Since the original reasons for the war never existed, it is now claimed that we're there to make Iraq a western-style democracy and to spread western values. And besides, it's argued, that it's nice that Saddam Hussein has been removed from power. But does the mere existence of evil somewhere in the world justify preemptive war at the expense of the American people? Utopian dreams, fulfilled by autocratic means, hardly qualifies as being morally justifiable.

These after-the-fact excuses for invasion and occupation of a sovereign nation directs attention away from the charge that this war was encouraged by the military industrial complex, war profiteering, control of natural resources (oil) and a neo-con agenda of American hegemony with a desire to redraw the borders of the countries of Middle East.

The inevitable failure of such a seriously flawed foreign policy cannot be contemplated by those who have put so much energy into this occupation. The current quagmire prompts calls from many for escalation with more troops being sent to Iraq. Many of our reservists and National Guardsmen cannot wait to get out and have no plans to re-enlist. The odds of our policy of foreign intervention, which has been with us for many decades, are not likely to soon change. The dilemma of how to win an unwinnable war is the issue begging for an answer.

To get more troops, the draft will likely be re-instituted. The implicit prohibition of "involuntary servitude" by the 13th Amendment to the Constitution has already been ignored many times so few will challenge the constitutionality of the coming draft.

Unpopular wars invite conscription. Volunteers disappear, as well they should. A truly defensive just war prompts popular support.

A conscripted, unhappy soldier is better off on the long run than the slaves of old since the "enslavement" is only temporary. But on the short run, the draft may well turn out to be more deadly and degrading as one is forced to commit life and limb to a less than worthy cause—like teaching democracy to unwilling and angry Arabs. Slaves were safer in that their owners had an economic interest in protecting their lives. Life endangerment for a soldier is acceptable policy and that's why they are needed. Too often though, our men and women who are exposed to the hostilities of war and welcomed initially are easily forgotten after the fighting ends.

It is said we go about the world waging war to promote peace and yet the price paid is rarely weighed against the failed efforts to make the world a better place. But justifying conscription to promote the cause of liberty is one of the most bizarre notions ever conceived by man. Forced servitude with risk of death and serious injury as a price to live free makes no sense. By what right does anyone have to sacrifice the lives of others for some cause of questionable value? Even if well motivated it cannot justify using force on uninterested persons.

It's said that the 18-year-old owes it to his country. Hogwash. It could just as easily be argued that a 50-year-old chicken-hawk who promotes war and places the danger on the

innocent young, owe a heck of a lot more to the country than the 18-year-old being denied his liberty for a cause that has no justification.

All drafts are unfair. All 18- and 19-year-olds are never needed. By its very nature, a draft must be discriminatory. All drafts hit the most vulnerable as the elitists learn quickly how to avoid the risks of combat.

The dollar cost of war and the economic hardship is great in all wars and cannot be minimized. War is never economically beneficial except for those in position to profit from war expenditures. But the great tragedy of war is the careless disregard for civil liberties of our own people. Abuse of German and Japanese Americans in World War I and World War II is well known.

But the real sacrifice comes with conscription—forcing a small number of young vulnerable citizens to fight the wars that old men and women, who seek glory in military victory without themselves being exposed to danger, promote. These are wars with neither purpose nor moral justification and too often are not even declared by the Congress.

Without conscription, unpopular wars are much more difficult to fight. Once the draft was undermined in the 1960s and early 1970s, the Vietnam War came to an end.

But most importantly—liberty cannot be preserved by tyranny. A free society must always resort to volunteers. Tyrants think nothing of forcing men to fight and die in wrongheaded wars; a true fight for survival and defense of one's homeland I'm sure would elicit, the assistance of every able-bodied man and woman. This is not the case for wars of mischief far away from home in which we so often have found ourselves in the past century.

One of the worst votes that an elected official could ever cast would be to institute a military draft to fight an illegal war, if that individual himself maneuvered to avoid military service. But avoiding the draft on principle qualifies oneself to work hard to avoid all unnecessary war and oppose the draft for all others.

A government that's willing to enslave a portion of its people to fight an unjust war can never be trusted to protect the liberties of its own citizens. The end can never justify the means no matter what the Neo-cons say.

BEST WISHES TO THOMAS J. AIKEN

HON. JOHN T. DOOLITTLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DOOLITTLE. Mr. Speaker, today I wish to express warm thanks, congratulations, and best wishes to Thomas J. Aiken, upon his retirement as the Central California Area Manager of the Bureau of Reclamation (Bureau). Tom has done an outstanding job in a difficult position, and he deserves the appreciation of both his colleagues and the general public.

Born and raised in Colorado Springs, Colorado, Tom earned a Bachelor of Science degree in Business Administration from Colorado State University in 1964. At the same time, he was commissioned a Second Lieutenant in the Army. He served dutifully as a Unit Commander for the Military Advisory Corps in Vietnam.

Following his military service, Tom began his three-decade career with the Bureau. In 1974, he joined the Mid-Pacific Region as the Administrative Officer for the Auburn Dam Construction Office. After the Auburn Dam project was stalled shortly thereafter, he became the region's Budget Officer for six years. Subsequently, from 1984 to early 1993, Tom was the Assistant Regional Director for Administration, overseeing such functions as personnel, budget, finance, procurement, and computer processing.

In 1993, Tom received his final and perhaps most challenging position with the Bureau—that of Manager of the Central California Area office. The area includes the Folsom and Nimbus Dams and the Folsom South Canal on the American River, New Melones Dam on the Stanislaus River, and Lake Berryessa located between Napa and Winters.

Mr. Speaker, many of the issues relating to the facilities and watersheds in the Central California Area have been controversial, yet Tom has constantly sought to serve the public's best interest. As a veteran of California's renowned water wars, Tom has frequently had to be a facilitator amongst numerous competing interests. Despite the challenging and often unpleasant nature of this position, he has weathered it with patience and a continuing willingness to stand on principle.

One such example that has been of special importance to me has been Tom's unwavering support of the Auburn Dam. For three decades, Tom has helped promote the need to build the Auburn Dam by championing its unmatched ability to provide flood protection, water supply, hydroelectric power, recreational opportunities, and environmental benefits. Tom rightly recognizes that the Auburn Dam is the only solution to the Sacramento region's water management needs, and he has been one of the few who has stood steadfast in that position despite the misguided opposition of those in the environmental community and from within the Bureau itself. Tom's commitment to the Auburn Dam is nothing less than a testament to his dedication to faithfully uphold the Bureau's mission of providing a reliable water supply to the West in the most efficient and effective way possible.

Tom has received several honors for his good work, including the National Administrative Support Units' Annual Award for Executive Leadership in 1991, Who's Who in Government Service in 1990, and the Interior Department's Meritorious Service Award in 1984.

As he retires from public service, Tom will be free to spend more time with his family, including his wife, Linda, his children, Joe and Me'Shay, his step-daughters, Jennifer and Lisa, and his five grandchildren. Also, he will have more time to pursue his oil painting and show his 1934 Ford hot rod. His family's gain is the public's loss.

Mr. Speaker, one thing is certain—Tom Aiken's expertise, cooperative attitude, clear thinking, and toughness will certainly be missed in California's water community.

THE SPECIAL GOVERNMENT EMPLOYEES AMENDMENTS ACT OF 2003

SPEECH OF

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. CONYERS. Mr. Speaker, I would like to submit the Department of Defense Inspector General's public report on Richard Perle, an editorial from the Wall Street Journal, and a clip from The Washington Times.

[Editorial from the Wall Street Journal]

PERLE'S VINDICATION

One obligation of editors is to distinguish phony political scandal from the genuine article. On that standard, any number of writers and editors owe Richard Perle an apology.

The noted defense intellectual voluntarily resigned in March as chairman of the Pentagon's Defense Policy Board Advisory Committee after his enemies pumped up a few anecdotes into allegations about "conflicts of interest." The Pentagon's Inspector General has been investigating those charges and last week issued a report absolving Mr. Perle of even the "appearance" of impropriety.

The accusations, fanned by Michigan Democrat John Conyers, had received especially prominent coverage in the New Yorker magazine and the New York Times. They boiled down to the all-purpose Washington smear that Mr. Perle has exploited his position for personal financial gain. But Pentagon investigator Donald Horstman concluded in a letter to Mr. Perle that "all of your activities with respect to those private entities complied with statutory and regulatory standards." There were no "quid pro" offers or attempts to leverage his (unpaid) Pentagon access.

In Washington, of course, people are often run out of office merely for the "appearance" of a conflict of interest. But Mr. Horstman says he also examined that "more elusive issue" and concluded that Mr. Perle's "activities did not create such an appearance" under the "perspective of a reasonable person with knowledge of the relevant facts." Mr. Perle's accusers knew all the facts, so the only conclusion is that they are not "reasonable persons," which will not come as news to most of our readers.

Mr. Conyers is now trying to compound his political felony by proposing to close what he claims is a "loophole" that requires someone to work more than 60 days a year before certain, more stringent Pentagon ethics rules apply. But this would essentially bar anyone with private expertise from advising Defense officials even in a voluntary, unpaid capacity. How this would enhance U.S. national security is not obvious. Then again, U.S. security was the last thing on the mind of Mr. Perle's critics.

[From the Washington Times, Nov. 20, 2003]

WASHINGTON-STYLE POLITICS

I beg to differ with Greg Pierce's recent item "All-purpose smear" (Inside Politics, Nation, Tuesday), claiming that charges levied against former Defense Policy Board Advisory Committee Chairman Richard Perle were an "all-purpose Washington smear."

A close reading of the inspector general's report would indicate that Mr. Perle's conduct raises real conflict-of-interest issues.

There is no doubt that Mr. Perle had an important role in shaping our nation's defense policy and heavily influenced the mobilization of our war machine in Iraq, along with all the defense contracts and profits that follow. The IG's report confirmed that while guiding this effort, Mr. Perle benefited financially by working for firms with major business before the Department of Defense.

The report notes that Mr. Perle appears to have represented Global Crossing and Loral in matters pending before the Defense Department, but escaped violations of the conflict-of-interest laws by virtue of the fact that he was considered to be in the board's employ less than the required 60-day period. Mr. Perle went so far as to sign an affidavit claiming that his position as chairman of the Defense Policy Board gave him a "unique perspective on and intimate knowledge of national defense and security issues." The fact that the offending language subsequently was removed from the affidavit doesn't change the reality of the assertion or the awkwardness of the conflict.

My legislation responds to the loopholes highlighted by the IG's report by merely ensuring that persons such as the chairman of the Defense Policy Board are treated as if they worked for the government for 60 days.

This would ensure that persons awarded with the public trust through prominent public positions do not use that trust to feather their own nests financially. At a time when we are asking our soldiers to make so many sacrifices, I hardly think it is too much to ask the chairman of the Defense Policy Board to refrain from representing clients with financial interests before the Defense Department.

ALL-PURPOSE SMEAR

"One obligation of editors is to distinguish phony political scandal from the genuine article. On that standard, any number of writers and editors owe Richard Perle an apology," the Wall Street Journal says. "The noted defense intellectual voluntarily resigned in March as chairman of the Pentagon's Defense Policy Board Advisory Committee after his enemies pumped up a few anecdotes into allegations about 'conflicts of interest.' The Pentagon's inspector general has been investigating those charges and last week issued a report absolving Mr. Perle of even the 'appearance' of impropriety," the newspaper said in an editorial. "The accusations, fanned by Michigan Democrat John Conyers, had received especially prominent coverage in the New Yorker magazine and the New York Times. They boiled down to the all-purpose Washington smear that Mr. Perle has exploited his position for personal financial gain. But Pentagon investigator Donald Horstman concluded in a letter to Mr. Perle that 'all of your activities with respect to those private entities complied with statutory and regulatory standards.' There were no 'quid pro' offers or attempts to leverage his (unpaid) Pentagon access. "Mr. Horstman says he also examined that 'more elusive issue' and concluded that Mr. Perle's 'activities did not create such an appearance' under the 'perspective of a reasonable person with knowledge of the relevant facts.' Mr. Perle's accusers knew all the facts, so the only conclusion is that they are not 'reasonable persons,' which will not come as news to most of our readers."

RECOGNIZING NATIONAL DIABETES MONTH

HON. JEB HENSARLING

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HENSARLING. Mr. Speaker, this November, we recognize National Diabetes Month and renew our commitment to preventing and eradicating diabetes. Just last week, the Department of Health and Human Services announced that the number of Americans with diabetes rose to an all-time high. According to their report, an estimated 18.2 million Americans now have diabetes, more than 6 percent of the population.

Even more alarming is the fact that many Americans are unaware that they may be at risk or already have diabetes. Recent research suggests that more than five million people have the disease but have not been diagnosed.

Another major cause of concern is the number of serious diabetes related illnesses. Diabetes is the leading cause of blindness among adults between 20 and 74 years of age. People with diabetes are also at higher risk for heart disease, kidney failure, extremity amputations, and other chronic conditions.

To ensure the future health of our Nation, we can safeguard our children and our families from diabetes by encouraging good health and regular exercise. Following the guidelines for good nutrition, getting physical exercise, and maintaining proper weight can help prevent diabetes and reduce the chance of severe complications.

As the sixth leading cause of death in the United States, finding a cure for diabetes is a top priority for medical researches. As a member of Congress, this year I supported legislation that included funding for important diabetes research and clinical testing. This year the House voted to provide $1.6 billion for the National Institute of Diabetes and Digestive and Kidney Diseases, which is $47.2 million above fiscal year 2003. In addition, $150 million in mandatory funds will be made available for juvenile diabetes research.

Through increased prevention and research we will overcome this disease and free millions of Americans from the threat of diabetes and related illnesses.

ANACOSTIA WATERSHED INITIATIVE ACT OF 2003

HON. ELEANOR HOLMES NORTON

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. NORTON. Mr. Speaker, today I am introducing the Anacostia Watershed Initiative Act of 2003. I am very pleased to be joined on the bill by several of my colleagues from the Washington region—Mr. HOYER, Mr. WYNN, Mr. MORAN, and Mr. VAN HOLLEN.

Although the beautiful Potomac, a river we also love, gets most of the attention in this region, it is the Anacostia that flows closest to the Congress and to the neighborhoods of the city and region. The Anacostia flows just 2,000 yards from the majestic Capitol Dome. The wastewater from the Capitol complex flows into the river when the ancient D.C. sewer system—built over the last century and a half—overflows on rainy days. The polluted runoff from congressional and federal parking lots and the fertilizers and pesticides from our magnificent lawns and gardens go into the Anacostia on those days as well. Many Members of Congress maintain a home in the Anacostia watershed. It is a sad fact that more than 30 years after the passage of the Clean Water Act, the Anacostia, despite its proximity to the Congress, remains badly contaminated with fecal bacteria, toxic chemicals, heavy metals, and many other pollutants. Contact with the water of the Anacostia isn't safe for human beings, there are official warnings not to eat fish caught in the river, and according to the U.S. Fish and Wildlife Service, more than half of the bottom-feeding brown bullheads in the river have cancerous tumors caused by chemicals.

We're simply not doing a good job of taking care of our home river. The Anacostia has no treatment plants and very few small industrial sites. Federal agencies are the biggest polluters of the river. Nearly all of its pollution enters the river from public streets, storm drains, and sewers. These public systems—particularly the District's combined sewer—are old and inadequate and should have been upgraded years ago.

One of the many challenges in cleaning up the Anacostia is that five-sixths of the land area that contributes polluted water to it is within the state of Maryland, about a sixth of the total is owned and managed by the federal government. The residents of the District of Columbia especially feel the effects of the pollution. The result of that geography is that neither the District of Columbia nor any other single jurisdiction can achieve the cleanup of the river by itself. If we are to envision the day that the Anacostia can be a real asset for the entire Washington region extraordinary cooperation among the federal, state, and local governments will be required.

This is the purpose of the Anacostia Watershed Initiative Act of 2003. The bill that my colleagues and I are introducing today would bring together federal, state, District of Columbia and other local governments in a joint approach to cleaning up the river. It would set up a mechanism to develop, fund, and implement a 10-year Comprehensive Action Plan for the Anacostia watershed that would address both the District's outdated and inadequate combined sewer system and the runoff from federal facilities and other properties in Maryland. It would involve all the major players in a truly unified approach to cleaning up the home river of Congress.

This legislation has broad support, not only among members of congress, but from state and local officials, environmentalists, and the business community. With regional colleagues as original co-sponsors, I will work hard for the passage of the Anacostia Watershed Initiative Act of 2003 and know that our colleagues in the other body will work for it there, too. I urge all members of the House to join me in creating a Congressional home river that we can be truly proud of.

THE EMPLOYEE FREE CHOICE ACT

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GEORGE MILLER of California. Mr. Speaker, today I am joining with 81 of my colleagues to introduce the Employee Free Choice Act—legislation that will strengthen workers' rights in America.

Workers in America are demanding the same basic legal, labor and human rights by which we judge other nations around the world: the freedom of association and the right to collectively bargain.

These are the internationally-recognized standards our government says all workers deserve, whether in China or in Chattanooga, in Mexico or in Milwaukee, in South Africa or in South Carolina. We tell other nations that collective bargaining gives workers a voice in the workplace. It's time—in fact, it's way past time—for workers here in the United States to have the same rights and protections we demand of poorer, less developed and less democratic nations around the world.

Unfortunately, the basic labor law that Congress enacted in 1935 no longer works to protect the right of workers to form and join unions. Recent history is littered with the stories of companies that defeated their workers when they sought to exercise their legal right to organize for their mutual benefit.

Something is obviously very wrong with our nation's labor laws when one side in a dispute has so many weapons at its disposal to thwart the will of the majority.

We are all aware of the egregious record of Wal-Mart, whose vigorous anti-union activities include threats and firings to unlawful surveillance. In the last few years, Wal-Mart has been charged with well over 100 unfair labor practices and has faced at least 50 formal complaints from the NLRB. None of this has apparently deterred Wal-Mart. Current law simply does not discourage lawbreakers.

In August 2000, Human Rights Watch, which usually reviews conditions in developing nations, documented "a systemic failure to ensure the most basic right of workers [in the United States]: their freedom to choose to come together to negotiate the terms of their employment with their employers." No impartial observer of our law could reach any other conclusion.

Is this the image of democracy that we choose to show to the rest of the world?

It is no mystery why workers want unions. The wages of union workers are 26% higher than for nonunion workers. Union workers have better pensions, better health benefits, and better shortterm disability coverage. Union workers have contracts that prevent arbitrary firings.

So why do unions win only 50% of the elections? Because the deck is stacked against employees who want to form a union.

We propose a new deck. Not just a new deal.

The Employee Free Choice Act restores integrity to our labor law by ensuring that our own citizens have the same basic freedom we demand for others. The right to organize must mean more than the right to be fired for daring to propose a union, and the right to bargain collectively must mean more than the right to endlessly negotiate once a union has been selected.

Throughout my congressional career, I have fought to improve the rights of workers. With many of my colleagues I've fought for a larger minimum wage, protection for migrant workers, better education, and greater retirement security and health coverage. This fight is to enable workers to fight for themselves. It is an historic fight that I resolve to continue until the rights of working Americans are fully protected.

For the benefit of my colleagues, a short summary of the Employee Free Choice Act follows:

SUMMARY OF EMPLOYEE FREE CHOICE ACT

1. CERTIFICATION ON THE BASIS OF SIGNED AUTHORIZATIONS

Provides for certification of a union as the bargaining representative if the National Labor Relations Board finds that a majority of employees in an appropriate unit has signed authorizations designating the union as its bargaining representative. Requires the Board to develop model authorization language and procedures for establishing the authenticity of signed authorizations.

2. FIRST CONTRACT MEDIATION AND ARBITRATION

Provides that if an employer and a union are engaged in bargaining for their first contract and are unable to reach agreement within 90 days, either party may refer the dispute to the Federal Mediation and Conciliation Service (FMCS) for mediation. If the FMCS has been unable to bring the parties to agreement after 30 days of mediation the dispute will be referred to arbitration and the results of the arbitration shall be binding on the parties for two years. Time limits may be extended by mutual agreement of the parties.

3. STRONGER PENALTIES FOR VIOLATIONS WHILE EMPLOYEES ARE ATTEMPTING TO ORGANIZE OR OBTAIN A FIRST CONTRACT

Makes the following new provisions applicable to violations of the National Labor Relations Act committed by employers against employees during any period while employees are attempting to organize a union or negotiate a first contract with the employer:

a. Mandatory Applications for Injunctions: Provides that just as the NLRB is required to seek a federal court injunction against a union whenever there is reasonable cause to believe that the union has violated the secondary boycott prohibitions in the Act, the NLRB must seek a federal court injunction against an employer whenever there is reasonable cause to believe that the employer has discharged or discriminated against employees, threatened to discharge or discriminate against employees, or engaged in conduct that significantly interferes with employee rights during an organizing or first contract drive. Authorizes the courts to grant temporary restraining orders or other appropriate injunctive relief.

b. Treble Backpay: Increases the amount an employer is required to pay when an employee is discharged or discriminated against during an organizing campaign or first contract drive to three times back pay.

c. Civil Penalties: Provides for civil fines of up to $20,000 per violation against employers found to have willfully or repeatedly violated employees' rights during an organizing campaign or first contract drive.

SENATE—*Sunday, November 23, 2003*

The Senate met at 1 p.m. and was called to order by the President pro tempore [Mr. STEVENS].

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

O God, too near to be found and too good to make a mistake, help us to trust the fact that You know us better then we know ourselves and desire for us abundant living.

Give us strength sufficient for this day and blessing that will enable us to transform hurting lives. As we rely upon Your wisdom, guide our steps and bring us safely to our desired destination. Keep us from trouble and let Your faithfulness inspire us. Lead us beside peaceful streams and renew our strength.

Guide our Senators. And Lord, give them a faith that works by love and keep them strong and steadfast in their efforts to do Your will. We pray this in Your wonderful Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable TOM DASCHLE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. FRIST. Today, the Senate will resume debate on the Medicare prescription drug conference report. We had an extended and vigorous debate on this historic legislation yesterday. Again, it is unusual to have a Saturday session and even more unusual to have a Sunday session, but the historic level which this debate has reached demonstrates the importance of doing just that.

There are a number of Senators who will be on the Senate floor to discuss this matter during today's session, and in an effort to accommodate the number of Senators who are seeking floor time today, we would encourage Members to limit their statements to no more than 30 minutes. We hope to work out a schedule so that Members will have a better understanding of at what point in the day or the evening they will be able to speak. If we can lock in 30 minutes per Member, or possibly work out alternating hours, which we will do, hopefully, in a few minutes, we will then have an orderly way to move forward so that everybody will have an opportunity to address this important issue.

Yesterday, it became apparent that we would not be able to lock in a time certain for an up-or-down vote on this important legislation, and at least one Democratic Member said that a filibuster would be the road to pursue. Thus, I filed a cloture motion on the conference report. That vote on the motion to invoke cloture is expected to occur sometime around 12:30 on Monday. All Senators will be notified when that vote is set.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. DASCHLE. Mr. President, I share the view expressed by the majority leader about the need for us to accommodate as many Senators as possible. It is my understanding that there is no objection to actually locking in a 30-minute time limit. Senators are free, of course, to ask unanimous consent to extend if they wish. So at this time I propound that request.

I ask unanimous consent that Senators be limited to no more than 30 minutes during the debate today.

The PRESIDENT pro tempore. Is there objection?

The Senator from Oregon.

Mr. WYDEN. Mr. President, reserving the right to object, and I do not intend to object, I just want to clarify one matter. My understanding is, and it is printed in the calendar, that there is already an order of speakers that has been established. I want to make clear that that will be recognized as we go forward today. I certainly will not object to the request of the distinguished minority leader. I just want to be clear that that will be the order of the speakers.

The PRESIDENT pro tempore. Is there objection to the original request?

The Senator from Massachusetts.

Mr. KENNEDY. Reserving the right to object on the order, I was referred to by my good friend, the majority leader, last evening at about 6:15 in reference to this legislation. The time-honored tradition of this body is to notify an individual when there is going to be reference made to them. I was not notified, and I heard later last evening that I was referred to. I indicated that to the leader. I would like to be able to do this in a timely way. I was listed yesterday to be either third or fourth in order, but I am not prepared right now—if there is some other previous order that has been arranged, I want to be able to reserve my rights that have been respected in this institution for 220 years, and that is when a Senator is referred to in terms of legislation, a fair opportunity is given for them to respond.

The PRESIDENT pro tempore. Is there objection to the original request?

The Senator from Nevada.

Mr. REID. Mr. President, I hope that Senators would not ask to extend beyond half an hour because it is so difficult to object. We have a lot of people. We have 17 on this side. Multiply that by half an hour and one gets the figures. I hope everyone will stick by the half hour that will be entered into, hopefully, momentarily.

I say to my friend from Massachusetts, the way the order is now set on our side, the majority leader would speak first. I would speak second. I would be happy to change places with the Senator from Massachusetts so he can go second, and I will go sixth or seventh.

Mr. KENNEDY. The Senator from Nevada, as always, is more than kind and generous. I appreciate that very much. I have no objection.

The PRESIDENT pro tempore. Is there objection to changing the order as the Senator from Nevada requested? Without objection, it is so ordered. The Senator from Massachusetts will take the place of the Senator from Nevada, and the Senator from Nevada will have the place in the order of the Senator from Massachusetts.

Is there objection to the minority leader's time limit of 30 minutes per speaker?

The Senator from Kentucky.

Mr. BUNNING. Mr. President, the list that is published in the calendar only has Democratic Senators in it. Obviously, there is an alternative list that would allow for Republican Senators to have a 30-minute block in between the Democratic Senators who speak.

The PRESIDENT pro tempore. The Parliamentarian informs me the Senator is correct, that a Republican Senator will go after each Democratic speaker if someone is here to be recognized.

Mr. FRIST. Let me also clarify that on the Republican side we are not locked into any order. The opponents to the bill are locked into an order of speakers. Ours has been just an agreement, so we are not locked into any order, but there will be a 30-minute limit, and we will be alternating back and forth.

Mr. BUNNING. I thank the Chair.

The PRESIDENT pro tempore. Is there objection to the minority leader's request? Without objection, it is so ordered.

Who seeks time?

RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MEDICARE PRESCRIPTION DRUG, IMPROVEMENT, AND MODERNIZATION ACT OF 2003—CONFERENCE REPORT

The PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of the conference report to accompany H.R. 1, which the clerk will report.

The legislative clerk read as follows:

Conference report to accompany H.R. 1, an act to amend Title XVIII of the Social Security Act to provide for a voluntary prescription drug benefit under the Medicare Program and to strengthen and improve the Medicare Program, and for other purposes.

The PRESIDING OFFICER. The minority leader is first on the list.

Mr. DASCHLE. Mr. President, I will certainly not exceed 30 minutes. I hope I can speak using less time because we are getting a little bit of a late start.

Let me begin by saying what an important debate this is. This is a debate the consequences of which will last for generations. This debate in many respects will be every bit as important as the debate on Medicare in 1965. One really has to go back to that year, 1965, to fully appreciate what we are debating now.

There was a debate, of course, in that period of our history, in the mid-1960s, about whether it was possible for us to address what was a national embarrassment at the time. About half of all senior citizens in the early 1960s had no health insurance—none. They were left out. There were horror stories about what they had to do in order to accommodate the health problems they were facing. It was a painful chapter. In some cases, because seniors had no health insurance, they were not living as long, the quality of their lives could not have been worse, and they were the poorest of the poor. They often had no income other than Social Security, and Social Security took them nowhere in regard to paying for the costs of health care.

Thanks to President Kennedy and then-President Johnson, the recommendation was made that we provide a national health insurance plan for seniors. Republicans, at that time, argued that it was not the role of Government, that it ought to be the private sector that provides health insurance. Democrats argued, in response, that given the group of people we were talking about, providing health insurance for senior citizens in the private sector had about as much profit in it as providing insurance for a haircut. You are dealing with the sickest, most elderly in our population. So there is not much of a profit incentive for insurers; there is not an incentive in terms of the demographics and all of the actuarial circumstances. The private sector has virtually been loath to insure seniors because of that. It is like insuring a haircut. There is an inevitability, if you are a senior, to that moment in one's life when illness becomes a serious threat. And obviously, that is when the circumstances involving the end of life become all the more real.

Medicare stepped in. Now, over the last 40 years, it has been one of the most successful programs in all of American history. Forty years of success, 40 years of providing health care with a consistency and a confidence we have never had in all of our time in this country.

My mother has benefits from Medicare. My mother benefits from Social Security. I can only imagine what it would be like today if she did not have Medicare and Social Security upon which to depend.

So Republicans, over the last 40 years, have tried to find ways to go back to that debate of 1965 and say: We still believe in the private sector. We ought to be able to find a way to provide insurance for a haircut and incentivize the private sector.

I will never forget the extraordinary statement made by the Speaker of the House, I believe it was in 1994. He addressed that very issue all over again when he said: It is still our hope and still our design to see Medicare wither on the vine.

For 40 years they have attempted to bring about an end, if not to Medicare itself, certainly to the concept of universal coverage through Medicare for all senior citizens.

That is really the backdrop that today we must recognize as we begin the debate on this bill. How is it that those very colleagues who 40 years ago argued that we really should not have a Government program for universal coverage for health care, who just 10 years ago said we ought to see Medicare wither on the vine, now in the name of Medicare are arguing we need to reform it, we need to improve it? We are not improving it with this bill. We are not reforming it with this bill.

Does Medicare need to be changed? Of course. And providing a meaningful prescription drug benefit is probably the single best reform we could enact, because medicine itself has changed. But to those who say we want Medicare to look more like the private sector, I say you don't speak for me with that assertion.

Medicare has had about a 4 percent administrative cost over 40 years; 96 percent of the money that goes into Medicare goes to benefits. Do you know how that compares with the private sector? I am told the average administrative cost in the private sector for insurance plans is not 4 percent. It is not even 10 percent. I am told the administrative cost for a private sector plan today on the average is about 15 percent—almost four times the administrative costs of Medicare.

So if you want to see the Medicare plan become more like a private plan, then count on spending almost four times more for administrative costs. At most, 85 percent of premiums go to benefits in private sector plans.

How ironic that we find our colleagues saying: We want to make Medicare more like the private sector; we want more competition.

We don't mind competition. But the kind of competition they want doesn't make a lot of sense to me. Why would we provide, instead of 96 percent of the benefits to the beneficiary, only 85 percent, and call that progress?

To make Medicare more ''competitive,'' our colleagues want to give more than $14 billion of incentives to the private sector to get them to insure a haircut. Their notion is that somehow we can find a way to make the private sector more interested in providing meaningful health care to seniors, when Medicare is doing it so well already.

There are a lot of very grave concerns we have about this legislation. I brought some charts to the floor to talk about some of these concerns. I want to address them, if I can, in the time I have allotted to me.

I think one of the biggest concerns I have is that seniors today are very concerned about prices. They are concerned that their drug prices go up each and every year.

I will never forget talking to a woman in Sioux Falls whose name is Florence. She told me that, at 73 years old, she must work and she must use the supplemental pay she gets from her job—at 73—simply to pay for the drugs she needs. Her drug bill is about $400 a month. It goes up 10 to 15 percent every year.

She drives to Canada once every 3 months in order to save $100 a month. She figures every 3 months she saves enough to actually buy the drugs for a month with that trip to Canada. So, without question, I think most seniors are very concerned about what is going to happen to the costs of their drugs.

The answer, with all of the specific analysis done to date about the impact of this bill, the best analysis we can provide so far, is that up to 25 percent of all beneficiaries are actually going to pay more, not less, for the drugs they buy with the passage of this bill—25 percent. It could be more than that.

Many Medicaid beneficiaries are going to pay more than what they are paying right now.

And there are many in the private sector who are going to pay more. You are going to see several million Medicare beneficiarie who now have private coverage actually lose that coverage as a result of the passage of this bill. The estimate is now about 2.7 million senior citizens will lose their retiree coverage when this legislation is enacted into law.

There are a number of other concerns we have with regard to this particular bill, including the coercion of seniors into HMOs and increasing their Medicare premiums with the so-called premium support concept. Within 7 years, many seniors are going to be forced into a pilot project in at least six locations. In those locations at least, and maybe others, we are going to see not only increases in Medicare premiums, but also seniors coerced into HMOs. These are cases where seniors have never even thought about an HMO until now.

In addition, millions of seniors are going to go without drug coverage during part of the year. I will talk more about that later.

We also are going to keep drug prices high as a result of this legislation. There is very little this legislation does to reduce the cost of drugs at all, as I said just a moment ago.

And finally, we squander $6 billion needed for retiree coverage on tax shelters for the wealthy and the healthy.

For all of these reasons—the cost to beneficiaries, the coercion of seniors into HMOs, millions of seniors who are going to go part of the year without any coverage at all, the fact that drug prices don't come down but they go up, and that we squander $6 billion on tax shelters for the wealthy in the name of Medicare—it makes a mockery of the whole word ''reform.''

I said earlier that up to 25 percent of all beneficiaries will see more costs for drugs. There are two categories in particular. Studies have shown that 2.7 million retirees, including about 5,000 South Dakotans, will actually lose the coverage they have with the private sector when this legislation is enacted. And that 2.7 million number, I think, is actually going to be higher. For those millions of Americans and those thousands of South Dakotans, that would be the biggest blow of all. They have confidence now that they can go to the pharmacy, and they can buy their drugs. They do not have to worry about whether or not they are covered. They had better start worrying because the problems kick in just as soon as this legislation is enacted, if it is.

Up to 6.4 million low-income beneficiaries are going to pay more or lose access to drugs they are now provided. I think the 25 percent number may be a conservative figure.

When you take the number of retirees adversely affected, when you take the number of low-income beneficiaries who may be worse off under this plan, you begin to appreciate the magnitude of the problem this bill is going to create for millions of senior citizens today who are totally unaware of its negative implications.

The legislation creates a dilemma. The choice seniors will face is higher premiums on one side or an HMO on the other. How is that reform? How does that possibly relate to this widely stated goal we all have that we simply want to provide a meaningful drug benefit to senior citizens? This bill isn't a drug reform plan, this is a Trojan horse for the collapse of Medicare.

We are going to see the loss of Medicare as we know it today if this legislation passes. I think this chart describes it pretty well.

If you want to see increased premiums, support this bill. If you want to see seniors forced into an HMO, support this legislation. It leaves a question mark for a senior citizen right now: What do I do? How do I respond? How can I prepare myself for what is about to come?

What is about to come regarding drug coverage is described on this calendar. This calendar says more than any speech probably can. This calendar describes in essence the drug benefit structure. Of all the concerns I have, the benefit structure is one of the most troubling to me. I want to describe it, but then I want to use this calendar to talk about its implementation.

A senior will start paying $35 a month. We will come back to that figure in just a minute. A senior pays that $35 a month 12 months out of the year—January through December. Then the senior must pay 100 percent of all the benefits up to the deductible. That is depicted in red. Then the first dollar of protection under this plan for drug coverage would kick in, following the $250 deductible. Beneficiaries pay all of the $250. The drug coverage kicks in from $250 in spending up to $2,250. The Government pays 75 percent of the benefit. After the benefit has been paid—75 percent Government, 25 percent senior, up to $2,250—the Government says: Wait a minute. We paid all we can pay. You are on your own from $2,250 up to $5,100. You are going to pay all the costs during that period.

After the beneficiary pays $35 a month, 100 percent up to $250, and 25 percent up to $2,250, they have to pay the entire cost up to $5,100, even though they are still paying a premium, and then they have a 95 percent benefit that kicks in after that.

Basically, what this calendar depicts is the drug schedule for 2006 for beneficiaries with $400 per month in drug spending.

By the way, the benefit doesn't kick in until 2006. So there are premiums that kick in, and the benefit lasts for a period of time, during the months of February, March, April, and May. They benefit in June somewhat. But for the entire rest of the year they are on their own.

This convoluted benefit structure is scary, as I think of my own mother, and I think of all of those who are going to try to figure it out: How in the world do I know how much I owe? How much can I count on? How much of these benefits are really going to apply to me?

This period of no benefits is called a coverage gap. Some people call it a donut hole. Whatever you want to call it, it is a mistake.

Think of the myriad of administrative costs involved for every single senior citizen who is going to have to try to decide: Are they in the 25 percent category, the 100 percent category, or are they in the 95 percent category?

By the way, if you are a senior citizen with a lower income, you are entitled to a different schedule. First, they have to know what their income is. They are going to have to turn over their tax records to determine what kind of income they have and whether they are eligible or not. Once those tax records are determined, they then are presented with these different tables that they are going to have to try to figure out. Imagine a 90-year-old woman trying to figure out when she goes to the pharmacy what the coverage gap is: Do I pay the premium? Do I have to pay 100 percent? If I do, how do I pay for it? Am I breaking a law if I expect the pharmacy manager to give me the full benefit? How do I figure this out?

This convoluted, confusing, extraordinarily complex schedule is a disaster.

I will make a prediction. I will predict that within 12 months, we are going to be back fixing this so-called coverage gap. It is chasm, it is not a gap. It is a confusion chasm. It is a disaster. That, if nothing else, ought to warrant reconsideration of this legislation.

But as I say, the coverage gap widens over time. It is not just now. The premium, as I said, starts at $35. In 2013, the premium goes up to $58. The deductibles start at $250. But guess what? In 2013, the actual deductible is going to be almost $500. The coverage gap then goes from $2,850 in 2006 all the way up to $5,066 by 2013.

In other words, senior citizens are going to have to pay $5,000 even though they are paying $35, or in this case $58, a month for the benefit. Can you imagine a senior citizen coughing up these kinds of dollars in just a few short years?

It is absolutely the most reprehensible expectation for senior citizens. They can no more afford $5,000 in 2013 than they can afford it today. It is wrong. This, if nothing else, ought to be a reason we should send this legislation back to the conference to figure out a better way of doing it.

The bottom line is, when it comes to the coverage gap, seniors are going to have to pay $4,000 to be eligible for $5,000 worth of benefits. Can you imagine that in the name of reform?

First of all, we are coercing seniors into an HMO. We are telling retirees they may lose their own health benefits. Two to three million people are going to lose benefits, and the benefit they are going have instead is a $5,000 coverage gap and paying $58 a month in 2013. That, perhaps more than anything else, is disconcerting. As I talk to seniors, the concern they have the most is, of course, the high cost of drugs.

First of all, our conferees wasted no time in eliminating the reimportation of United States-made drugs from Canada. They will point to language in the bill, but the bottom line is we will not see any change in the current law with regard to reimportation of drugs from Canada. There is virtually a prohibition on drugs from Canada. South Dakotans, North Dakotans, Montanans, Minnesotans, Michigan residents have counted on Canadian relief. That has been a big part of what has been their strategy in coping with the high cost of drugs today. That is going to be gone. They will not be able to reimport unless they go to Canada themselves.

They also have a prohibition—and this is amazing to me as one of the things Medicare has been able to show is it can leverage better prices; because of the power of pooling, we can leverage, whether it is hospital prices, doctor prices, prescription drug prices—and there is actually a prohibition for Medicare in the negotiation of lower drug prices on behalf of senior citizens. Drug companies can do it, pharmacy benefit managers can do it, but there is a prohibition on the Federal Government involving itself in negotiating on behalf of senior citizens for lower drug prices today. I have never heard of such a thing. If we cannot bring about a better price, if we cannot leverage drug prices more effectively through Medicare, who in the world can do it more effectively than the Government itself and Medicare specifically?

The reason prices are going to remain high is, No. 1, there is going to be very little competition from those sources where competition is already shown to be very effective; No. 2, Medicare itself, the Government through Medicare, is actually prohibited from negotiating better prices on behalf of seniors. That is an amazing provision of law that is inexplicable.

It goes on. I said earlier one of the concerns I have is this provision that allows $6 billion to be squandered for those who are healthy, and in many cases wealthy today, money that could actually go for retiree coverage. It creates a new health savings account which is nothing more, of course, than a tax shelter for those who are wealthy and will draw off people who are healthy. Ordinary Americans cannot afford it and it undermines the employer-based coverage we already have. Six billion dollars is a tremendous pool of resources that could have gone to making this program far more cost effective and far more accessible for a lot of seniors.

Instead, even though we did not have it in the Senate bill, even though we had bipartisan support for this $6 billion going to those who need it the most, in keeping with the trend, in keeping with the philosophy of many on the other side, creating this tax shelter for the wealthy was a ‘‘must pass’’ piece of legislation.

The bottom line is we lost $6 billion over the next 10 years that could have gone a long way to reducing the cost of drugs to everyone else.

How is it that with all these warts, with all these problems, with all these deficiencies, with all these concerns, this legislation could be before the Senate today? This chart shows it pretty well.

The Pharmaceutical Manufacturers Association had their agenda as well. I must say, they got virtually every single thing they wanted.

They wanted an administered drug benefit in the private sector that diluted the purchasing power of Medicare. They got it.

They wanted financial incentives for HMOs, another step away from Medicare. They got it.

They wanted a prohibition on Medicare negotiating prices, as I just described a minute ago. Guess what. It is there.

They wanted a meaningless reimportation provision because they did not want the competition. Guess what. That is in the bill as well.

They wanted a watered-down generic access provision. Check that off the list.

They wanted no public scrutiny and secret kickback arrangement potential within the contracts they have with the benefit managers and the insurers. That is in there, too.

They wanted a huge windfall profit. They are going to make more money in the next 10 years than virtually any other sector within our economy. No wonder stock prices are soaring today—because they also see the writing on the wall.

PhRMA had a checklist. PhRMA got their list checked, every single item on the list.

The bottom line is, of course, Medicare beneficiaries lose, PhRMA wins, and the bill comes before the Senate with this realization. PhRMA got what it wanted. But organizations that represent seniors, organizations that represent working families, organizations that represent State governments and city governments, organizations of all kinds—liberal, conservative, name it—organizations of all kinds have come forward to say: Please do not pass this bill. Send it back to the drawing board. Recognize the damage you are going to do—not just to Medicare; recognize the damage you will do to the confidence and the security of senior citizens.

Now more than 200 organizations have said they oppose this legislation and they want the Senate to oppose it as well.

This legislation would have been killed in the House had they abided by the rules. One of the most flagrant demonstrations of abuse of the institution and rules I have seen: They took almost over 3 hours the other day to bring about the desired vote on the House floor in spite of the opposition of all these organizations.

You have all these organizations on one side. This picture depicts pretty well what is happening on the other. A meeting was called on November 13 to talk about the benefits of this plan, to convince seniors that somehow they are going to be better off. And all these empty chairs pretty well depict exactly what happened. Seniors know what is going on. They were not going to be part of a sham discussion. No one showed up.

No one ought to vote for this either. This legislation does not deserve our support. We can do better. This started out as a debate about providing meaningful help to seniors. It has turned into a debate to save Medicare.

We are going to do all we can to live up to the specific talks, to live up to the needs, the hopes and dreams of senior citizens today. We will do all we can to defeat this bill when those votes are taken.

I yield the floor.

The PRESIDING OFFICER. The Senator from California is recognized.

Mrs. FEINSTEIN. Mr. President, I listened to the distinguished Democratic leader and find that I agree with much of what he said. This may not be a perfect bill, but clearly there are positive and negative features to the bill.

I worked a year ago, and through an individual’s help, was able to run the numbers with respect to a prescription drug plan and tried to make them come in within $400 billion and found it to be extraordinarily difficult. In my view, the most positive feature of this bill is that it delivers voluntary prescription drug coverage to this Nation’s Medicare beneficiaries. I find the low-income benefits of this bill to be one of its biggest strengths. It is better than anything we ran that came in at $400 billion or below last year.

These benefits affect about 1.4 million Californians who have limited savings and low incomes and who will qualify for prescription drug benefits under this bill. Some of these are low-income seniors who do not qualify for Medicaid. Because of $3,000 in savings, they are ineligible to receive prescription drug coverage through the California Medicaid Program. They will

now have prescription drug coverage which is much better than I had hoped. So 351,000 low-income Californians who are not eligible for Medicaid and have no prescription drug benefits now will have them under this bill. This was important to me. It is one of the strengths of the bill.

Analysis shows that this bill will increase the percentage of Medicare beneficiaries with prescription drug coverage from 79 percent to approximately 95 percent.

To begin with, this bill, as I said, expands the drug coverage to the 351,000 Californians who are not eligible for Medicaid. The reason it does that is because it has a much more relaxed assets test. So where the assets tests were so stringent for Medicaid, they are more relaxed here; and, therefore, those 351,000 people who found themselves without Medicaid coverage will now have coverage under this bill.

Secondly, the bill provides a 16-percent increase in Medicaid disproportionate-share hospital payments in fiscal year 2004. This has always been important to me. Every year we have had to fight for it because these are the payments that go to our county hospitals. In California, the county hospitals receive most of the people who have no coverage who are bereft and who are extraordinarily low income. California hospitals who qualified to receive Medicaid DSH money lost $184 million this year due to cuts enacted in the Balanced Budget Act in 1997.

This bill restores $600 million to California's hospitals over the next 10 years. I must tell you, with about 25 hospitals that have closed in my State in the last few years, this is a major item for me. The DSH money in this bill will go a long way toward protecting California's fragile health care safety net, which is dependent on a complex combination of local, State, and Federal funding.

Thirdly, the bill improves payments for indirect medical education in fiscal year 2004 and beyond. Teaching hospitals will receive a 6-percent increase in payments in the second half of fiscal year 2004 and will have their payments spelled out in future years so they can begin to plan ahead. Now, they do go down in some years. So there will be advanced knowledge of that so hospitals can begin to plan for that.

This is money that reimburses teaching hospitals. My State has some of the greatest teaching hospitals in the Nation. This money would reimburse those hospitals for costs associated with educating our Nation's next generation of physicians. That is important to me. I think it is essential funding, and it will allow our major hospitals to continue training tomorrow's caregivers.

Fourthly, the hospitals and physicians in California will benefit from this bill. Hospitals will see a full market basket update for fiscal year 2004 and have the opportunity to receive a full market basket update for the 3 years that follow. With more than 58 percent of California's hospitals losing money treating Medicare beneficiaries, and all hospitals facing Federal and State unfunded mandates, the full market basket update is vital to my hospitals as they struggle to meet staffing, seismic, and privacy compliance requirements.

I have heard overwhelming opposition from doctors in my State to the projected 4.5-percent payment cut that physicians and other health care providers would have faced in fiscal year 2004. In other words, without this bill, doctors in my State—and I do not know about elsewhere—but doctors in my State were going to face a projected 4.5-percent payment cut.

This bill prevents that payment cut from happening, and it includes an increase in payments for fiscal years 2004 and 2005 of 1.5 percent each year. This means that doctors in my State will be paid more for their services. It may not sound like a lot, but we have doctors leaving California and going to other States because they cannot meet the high cost of living in the State of California and practicing medicine. So even a small amount helps them stay in business.

In my State, approximately 33 percent of all Medicare beneficiaries get their health care coverage from Medicare+Choice. Now, Medicare+Choice has not been a positive experience in every case. I think we all know this. This bill, though, strengthens the Medicare+Choice Program, renames it Medicare Advantage, and it provides payment increases to HMOs. Some find that objectionable. I, frankly, do not, because these increased payments to HMOs and preferred provider organizations should provide some premium stability throughout the State. I intend to watch and see if, in fact, it does happen.

Now, I have many concerns about this bill. The Democratic leader pointed out some of them. This is certainly not a perfect bill. I am not on the committee. I did not write the bill. I struggled to have a little bit of input into the bill, probably much less than I would have liked.

I am deeply concerned about the number of Californians, though, who have lost their retiree health benefits as a result of rising health care costs. This is happening right now without a bill. It is projected that 10 to 12 percent of retirees who have private health care plans are losing their benefits each year. That is happening without this bill. The reality is—and I know people do not like to look at this—if we do not pass this bill, employers in my State will continue to drop coverage for their retirees at this estimated rate of 10 to 12 percent a year. Many of these employers who have chosen to retain coverage for their retirees have required their retirees to pay higher copayments and premiums—not under this bill but today.

Through direct subsidies and tax provisions, this bill actually reduces the number of seniors in California who will lose their retiree health coverage from approximately 431,420 in the Medicare bill that passed the Senate, that a majority of us voted for, to approximately 198,000 in this bill. These are California numbers, true. I cannot speak to other States. But what I am saying is, because of this bill, the number of retirees in California who would lose their retirement benefits will drop from 431,420 to 198,000.

Now, I wish the number were zero, but the point is, the bill makes it better, not worse. I think that is a good thing.

Now, I find it very difficult that this bill does not restore access to Medicaid and SCHIP for legal immigrant children and pregnant women at the State's option. The Senator from Florida, Mr. GRAHAM, authored legislation which I voted for which did do this. I intend to introduce—and I hope with him—legislation to restore Medicaid and SCHIP benefits to California's legal immigrant children and pregnant women next year.

I find it, frankly, troubling that this bill actually provides $250 million per year for 4 years to reimburse hospitals for providing emergency care services for undocumented immigrants, and California's hospitals will receive approximately $72 million a year to reimburse them for their care to undocumented immigrants, but we take away the coverage for legal immigrants.

I expressed my concern to Senator BREAUX, to Senator BAUCUS, to Senator FRIST about this issue. I was told the House would not accept this language. I hope next year the Senate will once again pass a bill to restore these benefits. This is a big item in California, and I deeply believe people who come to this country legally should be entitled to these benefits.

My State spent $3.7 billion in 2002 in uncompensated care, so the additional money that California gets for the care of illegal immigrants of $72 million a year at least will go some distance in covering that deficit.

In my role as vice chair of the National Dialogue on Cancer and cochair of the Senate Cancer Coalition, I have a very serious concern about this bill's Medicare reimbursement cuts for cancer care, particularly oncology physicians. It is my strong view that every suffering cancer patient should be able to have a so-called quarterback physician, an oncologist, someone who is with them who can go through all of the terrible choices and decisions that have to be made by a cancer patient and stay with them through it all.

I have talked to both Senators BAUCUS and BREAUX and also to Senator FRIST. They have all said this bill will leave the oncology community better off. I don't see that, candidly. In looking at this complicated Average Sales Price versus Average Wholesale Price issue, I don't see where they will be better off. I want the RECORD to reflect that I have received those assurances. I don't know whether they are true or not, but I can promise my colleagues, I intend to follow very closely the impact this bill will have on cancer care up and down the State of California. My staff and I will be watching the cancer care situation, and I am certainly prepared to introduce legislation making technical corrections to Medicare reimbursement for cancer care if the bill has the impact the oncology community predicts it will.

It is my understanding that our leadership will appoint an independent commission to be headed by my good friend, former Senator Connie Mack. The commission will monitor the impact of this bill on cancer care throughout the country and will report and make policy recommendations to Congress.

I am also concerned about the impact this bill will have on 50,000 low-income Californians who are living with HIV/AIDS. We have heard a lot from the HIV/AIDS community. My concern is with their access to drug treatment therapy under the Medicare prescription drug benefit.

What happens in AIDS/HIV treatment is that very often a cocktail of drugs, three or four different drugs, proves to be the most beneficial. The type of drugs varies with the individual, just as any drug would with any of us.

I have shared this belief, and the concern is that the formularies would limit an individual to two drugs. I spoke at length with Health and Human Services Secretary Tommy Thompson Friday night about it and asked him to put in writing exactly what would happen. Directly following my remarks, I ask unanimous consent to print in the RECORD his Department's response to my concerns.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mrs. FEINSTEIN. I will read just a couple of key points made by the Secretary in response. Let me quote the Secretary:

> The Secretary may only approve a plan for participation in the Part D program if the Secretary does not find that the design of the plan and its benefits, including any formulary and any tiered formulary structure, will substantially discourage enrollment in the plan by certain classes of eligible Medicare beneficiaries. Thus, if a plan limits drugs for a group of patients (such as AIDS patients), it would not be permitted to participate in Part D.

I also note that upon completion of this bill, Senators GRASSLEY and BAUCUS and I will enter a colloquy into the RECORD to emphasize this point.

This bill says that if a plan doesn't carry or doesn't treat a drug that is needed by a person with AIDS as a preferred drug, a simple note from a doctor explaining the medical need for that particular drug would get that drug covered at the preferred price. It cannot take more than 72 hours for seniors to get a drug under this expedited appeals process. This is my understanding based on conversations with the Secretary. I am delighted this understanding is now in the CONGRESSIONAL RECORD so that we can all follow it.

I want to say a word about something that is very controversial in the bill that I happen to support and why I support it. That is income relating the Medicare Part B premium. Let me tell you why I support it. I have a great fear that as I watch entitlement spending grow, and I have watched that happen for a decade in the Senate, our children and our grandchildren will not have access to Social Security or Medicare. Let me tell you why I believe this.

Since 1993, at my constituent breakfasts we have been using charts to illustrate outlays, meaning the money the Federal Government spends every year. I believe they are the truest way to judge Federal spending. When I began this, in 1993, entitlement spending was $738 million. About 50 percent of the outlays in a given year were entitlement spending. That was welfare, veterans benefits, Social Security, Medicare, et cetera. Interest on the debt was 13 percent. So 63 percent of the outlays in a given year could not be controlled by our budget.

This year, entitlement spending is $1.174 billion. Entitlements have risen to 54.4 percent, a 4.4 percent increase. Interest has dropped some, to 7.5 percent.

Now, if we look at the projection—and this is with the $400 billion prescription drug plan—if you look at entitlement spending in 2013, 10 years from now, you see that it is $2.048 billion. So in 10 years it has gone from $738 billion to $2.48 billion. That is the problem. Entitlements will be 58 percent of the outlays, and interest on the debt, 11.6 percent. What does that mean? That means 70 percent of everything that is spent by the Federal Government in fiscal year 2013 cannot be controlled.

The other two pieces, of course, are defense, projected at about 16.9 percent, and discretionary spending, dropping from 20 percent this year down to 13.6 percent. Discretionary spending is everything else we have to do. It is everything in the Justice Department, the Education Department, the Park Service. All the rest of the Federal Government in 10 years will be about 13 percent of what is being spent. That is the enormity of the entitlement picture.

I know it is hard for people to look at this because those people who had the dream of Medicare decades ago looked at it as a program that everyone who paid in got out the same benefit. But what the income relating in this bill talks about is just the Part B Medicare premium, the cost of which today is $3,196.80. That is the full cost of the Medicare Part B premium in 2004.

Now, what is Part B? Part B is physician care, other medical services; it is outpatient hospital care, ambulatory surgical services, X-rays, durable medical equipment, physical occupational and speech therapy, clinical diagnostics, lab services, home health care, and outpatient mental health service.

The premium is $3,196.80. The income-relating provisions in this bill are very mild, much milder than what Senator NICKLES and I presented on the Senate floor.

In this bill, beginning in 2007, individuals with incomes of more than $80,000, or couples with incomes of more than $160,000, will have, instead of 75 percent of their Medicare Part B premium subsidized, 65 percent of it will be subsidized by the Federal Government.

This goes up four tiers so that individuals with incomes of more than $200,000 a year, or a couple with an income of more than $400,000 a year, will have just 20 percent of their Medicare Part B premium subsidized by the Federal Government. Why should hardworking taxpayers pay for a millionaire's health care? That is my view.

I don't see income relating as bringing about the downfall of Medicare. I see it as making the program more solvent.

There is one significant missed opportunity in this bill that concerns me deeply, and that is the whole area of the cost of prescription drugs. I am particularly concerned about the amount of money spent on prescription drug promotion by pharmaceutical companies. Perhaps I have reached the age where I remember when there was no advertising of prescription drugs. We were just as well off then as now, and without huge costs.

Let me give you some examples. Promotional spending by pharmaceutical manufacturers has more than doubled, from $9.2 billion in 1996 to $19.1 billion in 2001. That is an annual increase of 16 percent.

Most troubling to me is the rapid spending growth of direct-to-consumer advertising of prescription drugs, which has increased an average of 28 percent.

Bottom line, Mr. President: I intend to support this bill, and not because it is perfect, but because I believe it brings substantial help to people who need that help in my State of California.

I yield the floor.

EXHIBIT 1

ACCESS TO DRUGS FOR AIDS PATIENTS UNDER THE BIPARTISAN AGREEMENT

Question: Will AIDS patients have access to all drugs within a therapeutic class under the Bipartisan Agreement? Can a PDP limit the number of drugs that are covered within a therapeutic class? Are dual eligibles in a Medicare drug plans losing coverage available to them in Medicaid?

Answer. In the Bipartisan Agreement there are significant safeguards in the development of plan formularies that will ensure that a wide range of drugs will be available to Medicare beneficiaries.

Plans have the option to use formularies but they are not required to do so. If a plan uses a formulary, it must include ''drugs'' in each therapeutic category and class under section 1860D–4(b)(3)(C)(i). A formulary must include at least two drugs in each therapeutic category or class unless the category or class only has one drug.

The Secretary will request the U.S. Pharmacopoeia, a nationally recognized clinically based independent organization, to develop, in consultation with other interested parties, a model guideline list of therapeutic categories and classes. How categories and classes are designed is essential in determining which drugs are included on a plan's formulary. USP is clinically based and will be cognizant of the needs of patients. We expect they will design the categories and classes in a way that will meet the needs of patients.

In designing formularies, plans must use pharmacy and therapeutic committees that consist of practicing physicians and pharmacists who are independent and free of conflict with respect to the plan, and that have expertise in care of elderly and disabled. The committee has to use scientific evidence and a scientific basis for making its decisions relating to formularies.

Further, the Secretary may only approve a plan for participation in the Part D program if the Secretary does not find that the design of the plan and its benefits, including any formulary and any tiered formulary structure, will substantially discourage enrollment in the plan by certain classes of eligible Medicare beneficiaries. If a plan complies with the USP guidelines it will be considered to be in compliance with this requirement. Thus, if a plan limited drugs for a group of patients (such as AIDS patients) it would not be permitted to participate in Part D.

Under the Bipartisan Agreement, the beneficiary protections in the Medicare drug benefit are extremely comprehensive to ensure access to a wide range of drugs and are more comprehensive than the protections now required of state Medicaid programs.

For example, there are extensive information requirements in Part D so beneficiaries will know what drugs the plan covers before they enroll in the plan.

The plans must set up a process to respond to beneficiary questions on a timely basis.

Beneficiaries can also appeal to obtain coverage for a drug that is not on their plan's formulary if the prescribing physician determines that the formulary drug is not as effective for the individual or has adverse effects. As a result, there should be access to all drugs in a category or class when needed.

Because the Medicare drug benefit will be offered through private plans, plans will have an incentive to offer multiple drugs in a therapeutic class in order to attract Medicare beneficiaries to join their plans.

Becuase of the optional nature of the Medicaid drug benefit today, states can drop their coverage entirely. According to a recent Office of the Inspector General report, states have identified prescription drugs as the top Medicaid cost driver (FY 2002, Medicaid prescription drug expenditures totaled approximately $29 billion or 12% of the Medicaid budget). From 1997 to 2001, Medicaid expenditures for prescription drugs grew at more than twice the rate of total Medicaid spending.

Pressures on state budgets have led to Medicaid coverage restrictions for drugs and the use of cost control measures that will not be used in the Part D program.

Eighteen states contain Medicaid drug costs by limiting the number of prescriptions filled in a specified time period, limiting the maximum daily dosage or limiting the frequency of dispensing a drug. Some states also limit the number of refills.

Six states have pharmacy lock-in programs, which require beneficiaries to fill their prescriptions in one designated pharmacy.

States already have the authority to limit the number of drugs that may be provided in a therapeutic class, and nineteen states are using preferred drug lists in their Medicaid programs. Thus, dual eligible beneficiaries will have the same access in Part D that they have in Medicaid, with expanded beneficiary protections and appeal rights.

Concerns have been expressed that the Medicare benefit will result in a loss of coverage for dual eligibles. This is not the case for low-income beneficiaries, the Bipartisan Agreement provides generous coverage.

The Bipartisan Agreement preserves the universality of Medicare for all eligible beneficiaries including those now dually eligible for both Medicare and Medicaid. Unlike Medicaid, the new Medicare Part D benefit will provide a guaranteed benefit to all eligible seniors—a benefit they can count on without fear of loss of benefits when state budgets become tight.

Dual eligibles, who currently have full Medicaid benefits, will automatically be given generous subsidies and pay no premium, no deductible and minimal cost-sharing regardless of their actual income (which can be higher than 135% of poverty based on states' special income rules).

In addition, full dual eligibles with incomes under 100% of the Federal Poverty Level (FPL) will pay no premiums, no deductible sand only nominal copayments of $1 for generic and other multiple source preferred drugs and $3 for all other drugs. These copayments will increase only at the rate of inflation, the same rate as the Supplemental Security Income (SSI) payments on which many low-income individuals rely.

Dual eligible nursing home patients and other institutionalized persons who only have a small personal needs allowances will be exempt from copayments altogether.

The copayment levels in the Bipartisan Agreement are similar to what dual eligibles now pay in what is an optional Medicaid benefit in their states. In fact, because of the optional nature of the Medicaid drug benefit today, states can drop their coverage entirely. Current regulations permit states to increase coinsurance to 5%, which is more than what will be permitted for dual eligibles under the new Medicare benefit.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, will the Chair please advise me when I have 5 minutes remaining?

The PRESIDING OFFICER. The Chair will do so.

Mr. KENNEDY. Mr. President, during yesterday and early today, we have had characterizations and descriptions of this legislation, which is enormously important. We are doing these debates on Saturday and Sunday, and it is anticipated that we will have a vote tomorrow, Monday, on a bill that will not go into effect until 2006, and other provisions will take effect in 2010. I have right here next to me the bill, the legislation, which was put on everyone's desk. I am still waiting for a Member to come here and indicate that he or she has read it, and describe the details of it.

We are dealing with a matter of enormous importance and consequences, as we are dealing with issues of life and death for our seniors in this country—the men and women who have brought this Nation out of the Great Depression, the ones who fought in World War II, the greatest generation. They came back and faced challenging times. We went from a 12 million, mostly man military, down to an Army of just a couple of million, with massive unemployment, and they helped to get the country back on a peaceful road. We are talking about a generation that faced down the Soviet Union and communism, and they are now in their golden years.

As the great philosophers point out so well, civilization is measured by how it treats its elderly people, whether they will be able to live in the peace, dignity, and security for their contribution to the country. I believe in that. I believe in that very deeply.

We have to ask ourselves at the end of the day whether this legislation before us, which is being rushed through with effectively 2 or 3 days of debate, is worthy of our senior citizens. I mentioned the issue of time again because my good friend, the majority leader—and he is my good friend—made reference to the fact that I believe that this legislation needed more debate than a Saturday afternoon and evening. I watched the debate going on, and the chairman of the Finance Committee and the Senator from Alaska talked up until almost 10 o'clock last night, and now we are here on Sunday afternoon.

But I wonder whether it needs more than 2 days debate. I believe it does; I do believe so. I believe that particularly after we saw what happened in the House of Representatives.

This legislation makes an enormous difference to the well-being and the security of seniors in this country. And we saw the facade that took place in the House of Representatives where the vote was called at 2 or 3 o'clock in the morning, and the vote was kept open beyond the traditional time of 15 to 20 minutes, for nearly 3 hours, in order to try to effectively coerce Members to support the proposal.

We are doing that on a measure that is supposed to benefit our senior citizens, and a measure that passed the House of Representatives by only one vote in a purely partisan proposal. Then, it passed the House of Representatives by less than a handful the second time, again, on a purely partisan proposal. It seems to me that if the House of Representatives had a full opportunity to have an open discussion and debate, and then have a reasonable vote and call them as they see them, then this process would be worth supporting. We ought to have the same here in the Senate. But, on the one hand, when we have a Republican leadership, which is effectively jamming this legislation through the House of Representatives, and then effectively wants to use the closing off of debate and discussion in order to effectively jam it through here, the Senate of the United States, we ought to take a moment or two to ask why.

I note the references of my friend, the majority leader, about who was really representing the seniors of this country and whether some were delaying this legislation. Many of us have been fighting for a prescription drug program for years. I will not take the time today to discuss the time when it was bottled up in the Republican Finance Committee, and how it only emerged on the Senate floor when we had Democratic leadership here just over a year ago. It is not worth taking up the time because I don't have it.

But this is a Senator who fought for the Medicare Program, who knows the history of the program, and knows how important the Medicare Program is. I am also mindful—with all respect to those on the other side and in the House of Representatives—that they got 12 votes in support of the Medicare. I know that they are untrustworthy of the Medicare Program, that they have a disdain for the Medicare Program. That is a very important difference. They are obviously entitled to their view.

But what we have seen is the efforts that were made on the floor of the Senate earlier this year, where we had a truly bipartisan effort for a prescription drug program. In 1964, Medicare was defeated in the Senate. It was defeated by 12 or 14 votes. Seven months later, it passed by that number. The only intervening aspect was an election. And the important aspect of that election is that the seniors understood what the stakes were in that election.

I am saying here on the floor of the Senate that the seniors are going to understand, when they know what is in this bill, how much it risks their future and the future of the Medicare system, make no mistake about it.

Make no mistake about it, no matter the outcome of this bill in the Senate, this issue is going to continue to be debated as we go into 2004, the 2004 election, 2006, 2008—all the way down the line. This issue is not going to go away.

I was here when the Senate passed catastrophic coverage. I can remember the catastrophic Medicare changes which allegedly were supposed to be so helpful to the seniors. There was a flood of Senators who left this body and rushed down to the television and radio center to indicate how they supported it. And I remember how they all crept back into this body just a couple of months later to vote to rescind that change because they got it wrong, because they rushed it through the Senate. And that is just what we are in danger of doing with this bill.

The Medicare system is a tried and tested program. It is a beloved program. The reason we have a Medicare system is that the private insurance companies failed our elderly people. They continued to fail them. Finally, in the late 1950s, we began to have a debate about a Medicare system, and when we had the debate in the 1960 campaign and 1962 campaigns, we finally found we were able to pass Medicare legislation in 1965. It took 5 years to pass that program, and we want to risk that program in a 2-day debate in the Senate when this is a lifeline to so many of our seniors, when we are seeing an effort to undermine the Medicare Program. I will get into that in one moment.

We had a chance to do something we failed to do in 1965. We passed the Medicare Program that dealt with hospitalization. We passed the Medicare Program that dealt with physician fees. But we did not pass a Medicare Program that dealt with prescription drugs. Only 3 percent of the private sector programs had prescription drugs at that time. Can you imagine that we would pass a Medicare Program today without prescription drug coverage? Those prescription drugs are as important as physician services and hospitals today.

We are on the verge of the life science century. The breakthroughs we are going to see in the next months and years are going to be breathtaking, and our seniors ought to be entitled to those programs. That is why a prescription drug program is so necessary.

We passed a good program in a bipartisan way, but that is not the proposal that is before the Senate. The bill before us is not that proposal. The bill that passed the House of Representatives is not the proposal we passed.

We have a major undermining of the Medicare system. There are those who say: You are really overstating this, Senator KENNEDY. Where in the world are you getting this idea?

I understand, as others do, that the position of the President of the United States earlier in March was that no one who was in Medicare would be entitled to a prescription drug program. I want our seniors to listen to that. In the spring of this year, this President indicated he supported the program for prescription drugs only when it was delivered by the HMOs.

He gave up that position. He said: Oh, no, let's try and see if we can figure out something else that may be related to the Medicare system. That was his position. That is the position of the majority of the people who are supporting this program. Make no mistake about it, that is their position. They believe that is what ought to happen: that we ought to dismantle the Medicare system, undermine it, privatize it. That is what they want to do.

You say: Why in the world are you saying that? How can you possibly say that? Read the paper this past week. The Washington Post, Friday, November 21:

> Bid to Change Social Security is Back.

They are going to get Medicare first. Social Security is next. Here it is:

> President Bush's aide reviving long shelved plan on Social Security. A Presidential adviser said [Bush] is intent on being able to say that reworking Social Security "is part of my mandate."

There it is, my friends, Social Security is next; Medicare now. That is why I think we ought to have some debate because, I daresay, I don't believe the Members of this body understand what is going to be done with the proposals.

There are three major provisions in this proposal that will effectively undermine the Medicare system. The first is the premium support proposal. I have listened day after day, week after week, month after month: We have to give premium support a try. My answer is: Why? Why? We know what it means even before trying it. Committed as they are on the other side of the aisle to start off with hundreds of thousands or a few million and multiply that to millions and millions of people, we understand what the results are going to be before we even try the program. They said: Let's try it; let's understand what the outcome is going to be.

Currently, everyone in the United States pays into the Medicare system. No matter where you live, you get your range of benefits. You get to pay the same premium and you get the same range of benefits all over this country. It is uniform. Not under premium support. You are going to pay in and you are going to pay more. Even the administration has recognized that the minimum you are going to pay is 25 percent more. You are going to pay more. So that every elderly person who understands premium support, this administration understands you are going to pay more at the outset.

Secondly, you are never going to know what your premium is because it is going to depend on where you live. These are not my figures, these are the figures of the Medicare actuary. Here it is: Under the premium support program—this is the Medicare actuary—

the national average under current law will be $1,205 by 2013. It is about $700 now. Their estimate is $1,205. A year and a half ago they estimated the premium support would be $1,771. The Medicare actuary estimated that every senior citizen would be paying $500 more in premiums than they would be paying under Medicare.

This year they have gone down to $1,501. They have gone down nationwide as starters, and we have to learn something more. That is not good enough.

The difference with premium support is there is no security. It depends on where you live. Do you understand that? Your premiums are going to be based not on the national standard that we have at the present time but on where you live.

In my State of Massachusetts, under premium support, it will be $1,450 in Barnstable, MA, and $1,050 in Hamden, MA; $400 more. The difference is 100 miles. In Dade County, FL, it is $2,000 and, in Osceola, FL, it is $1,000; $1,000 more.

Explain that to some senior who lived there all their life, has a house and is proud to live there, and they find that their premiums are going to be $2,000 and their neighbors in another part of Florida are paying $1,000.

It is very interesting what my friends on the other side say: Senator KENNEDY, you don't understand what we are going to do in this bill. We are only going to let it go up 5 percent a year this year. That is what they say this year. Next year in the Budget Committee, or the year after, it won't be 5 percent. We will have to recalculate. It will be 10 percent or 15 percent, or let's have a free enterprise system and let it sail off. That is what is going to happen.

That is what has happened in the Metropolitan Statistical Areas (MSAs), and the list goes on: $1,700 in Los Angeles, $775 in Yolo, CA. Medicare actuaries—every senior citizen ought to understand that premium support is written in this legislation. One can say, well, it is written in such a way that we are not going to face it for several years. Several years? But it is still there. The only way to repeal it is to come back here to the Congress.

In Yamhill, OR, premiums would be $1,325, but only $675 in Columbia, OR. It is double the amount if one lives in a different part of the State.

Why do we have to experiment with premium support? We already know what the results are going to be. That is a key element in this legislation. It was not in the Senate bill. I did not hear our majority leader make much of a case for it. To be honest about it, I do not hear the President of the United States make much of a case for it.

Nonetheless, when one is talking about the House of Representatives, they understood what this was all about. They committed to it, alright.

Now one might say: Well, Senator, what about the health delivery system? We are going to have the health delivery system delivered through the HMOs. Let us have real competition.

How many times have I heard this from our Republican friends over there: Let us have competition? We are glad to have competition, but do not suggest that this bill is competition. It is not. I see the chairman of the Finance Committee. He can correct me if I am wrong about any of these figures.

We start off with every HMO getting a 109 percent increase in the cost of living over Medicare. Is that competition? Competition? Come on. Beyond that, CMS—the governmental agency that administers the Medicare program—pays an additional 16 percent in excess of Medicare's own costs to private insurance companies because seniors who join Medicare HMOs are healthier than seniors in the traditional Medicare system.

So, under this bill, Medicare is going to pay a 25 percent advantage or bonus for every senior citizen that goes into an HMO. Our Republican friends are talking about competition, the free enterprise system. Is there a business man or woman in this country who would not want a deal such as this? The tragic part is, who is paying for it? It is our seniors who are paying for it.

And you think Medicare is going to be able to hold on when they are effectively getting a $1,936 overpayment per senior? That is what they are getting now. This is not competition with Medicare. This is a rip-off. This is a scandal. This is a payout. And that is what is happening now under our overpayment to the HMOs.

As a matter of fact, you are overpaying them almost the amount that the average person does for the prescription drugs. You could almost make a deal and say, do not even bother with the prescription drug program. The HMOs are almost paying the whole amount. That is what the seniors pay, $2,300. We are paying close to a $2,000 overpayment.

On the one hand, you have the premium support that is going to undermine it. Secondly, you have this program on the overpayment of the HMOs. Given the dramatic overpayment on this, we can see what is going to happen with the HMOs.

Look at what is going to happen with the HMOs, according to the actuaries. This year, there is $31 billion that went through the HMOs in this country. The best estimate, given the arrangement that has been made now, will be $181 billion going through the HMOs. You call this private competition? Competition with Medicare? This is outrageous. Do my colleagues think we are having that debate here on the floor of the Senate? Do my colleagues think we have time to change that 109 percent down to 102 percent or 104 percent? Absolutely not. We do not have time to do that.

Do my colleagues think we have time to change this with regard to the 16 percent advantage? Do my colleagues think we have any time to do that? Oh, no, let's stamp it. Let's close the books. Let's say to those who would like to have that kind of debate and offer amendments, this is being delayed for our senior citizens.

This is absolutely outrageous. We know what is going on. These are the payoffs to the HMOs.

Beyond that, if that is not enough, listen to this: Not only do they have the additional 25 percent, which is almost $2,000, there is also a $12 billion slush fund. What did the Senator from Massachusetts say? A $12 billion slush fund.

Well, what can they do with the $12 billion? They can give it to the HMOs as well. This is running-around money, walking-around money, $12 billion more. Who pays for that? The seniors pay for that under the Medicare system.

Do we have an opportunity to offer an amendment to strike that? Oh, no. Do my colleagues think we have an opportunity to go back to the Senate position that said let's take half of that and use it for good preventive kinds of medicine for our seniors, such case management programs? No, no. That was what we passed in the Senate. Do my colleagues think we can go back? No, no. We have to rush this proposal in.

In the meantime, we are telling our seniors all across this country that $12 billion is needed to help the HMOs. Tell that to the 10 million seniors who need Celebrex to deal with arthritis, or the 12 million to deal with osteoporosis, or the 11 million with treatments for diabetes, high cholesterol, thyroid deficiency, and depression. These are millions of our fellow citizens who could benefit from that $12 billion. Oh, no. We have to give that as a supplement to the HMOs.

I have listened to those who say: Well, at least our senior citizens are going to be better off. Let us just look what is going to happen to our senior citizens. We have the 2 to 3 million retirees who are going to be dropped. They are certainly not going to be better off. There are 6 million people worse off. Who are these 6 million? These are the Medicaid beneficiaries who, the day this bill goes into effect, are going to be worse off. These are the people who are paying the $1 to $3 copays. The States are paying for it with the Medicaid. Know what? They will not be paying anymore. Why? Because this bill prohibits it.

So one might ask whether they are better off. We start right off with 9 million beneficiaries who are going to be worse off. People say: Well, Senator, what about all of those low-income

people we are all concerned about in this program? I am going to come back to that.

Let's take these 6 million people, who are the poorest of the poor, who are going to be worse off. Is that really going to make much difference, because it is only a couple of bucks a week, $3 to $5 a week, maybe $20, $25 a month? But when one is talking about the average income for seniors at about $12,000, it adds up. There are studies to show what happens to the poor when they do not pay the copays in terms of adverse health outcomes.

The PRESIDING OFFICER (Mr. ALLARD). The Senator from Massachusetts has 5 minutes remaining.

Mr. KENNEDY. Will the Chair tell me when I have 1 minute remaining, please.

This is what happens to those poorest of the poor when they do not have the copays—serious adverse events effectively double. The emergency rooms effectively double. These findings are demonstrated by research studies published in JAMA.

Of course, the sad fact is it ends up costing hundreds of millions and billions of dollars more to pay for in these circumstances. It is bad health policy and it is bad economics.

Finally, we had a good program that passed the Senate. We found our friends in the conference knocked out 3 million of the neediest elderly people in this country. We provided for up to 160 percent of poverty, they made it up to 150 percent of poverty. That is a million people. And they reimposed the asset test for those under 150 percent of poverty. As a result of reimposing it, that is a total of 2.8 million who were included for help and assistance under the Senate bill who were wiped out in this conference report. We had a good bill, but that is not the one that is before us.

Finally, the third part of the inclusions in this legislation, what they used to call Medical Savings Account, now referred to as Health Savings Accounts (HSAs), which have very high deductibles and low premiums. Who takes advantage of those programs? The most healthy people take advantage of those and the most wealthy people take advantage of those.

What is the problem with that? The problem with that is that if you are the working poor, working middle class, if you have some children, you can't afford to constantly pay the deductibles. So what happens to your premiums? Two studies—one study by the American Academy of Actuaries ''Medical Savings Accounts: Cost Implications and Design Issues,'' May 1995, and another by the Urban Institute, ''Tax-Preferred Medical Savings Accounts and Catastrophic Health Insurance Plans: A Numerical Analysis of Winners and Losers,'' April 1996)—indicate that premiums will rise at least 60 percent. That is not just talking about the elderly people, that is across the country. That is undermining the employer-based system.

We have enough problems in this country with the uninsured. Now we have an additional proposal that is going to raise the cost of premiums for working families in this country? That has been included. Was that in the Senate bill? Absolutely not. But it has been in the House. It has been a matter of faith in the House. There you have it: Premium support, not a level playing field, a new form of health insurance that is going to raise the premiums for workers. What in the world does that have to do with the prescription drug program? It has a lot to do with ideology. That is what this bill is about, to undermine, to privatize Medicare. After they do that, coming right behind it is the Social Security Program, make no mistake about it.

We can do better. We should do better. We ought to take the time to do better. There are enough Republicans and Democrats alike in this body who have demonstrated over the period of the last year and a half that we can get a good bill. There is no reason to be stampeded with a bad bill. Why are we being stampeded with a bad bill? We ought to take our time, get a good bill, make a difference for our seniors, make a difference for our country. That is what I believe.

I hope we will have the opportunity to take the time so all of our Members understand it, and not just these Members but so our seniors, whose lives are going to be affected, who are suffering every single day and making choices between putting food on the table and paying for their prescription drugs, so they understand it. Don't we have enough respect for our seniors so we can provide some opportunity for those individuals to understand it? Or are we going to be rushed into the situation with short debates on Saturday and Sunday and then have the gauntlet come down. We saw what happened over in the House of Representatives. It took them 3 hours in order to galvanize this. I think we should demonstrate in this institution too much respect for our seniors to be stampeded into a bad bill.

The PRESIDING OFFICER. The time of the Senator has expired. The Senator from Kentucky is recognized for 30 minutes.

Mr. REID. If I could offer a unanimous consent request?

The PRESIDING OFFICER. Does the Senator from Kentucky yield for a unanimous consent request?

Mr. BUNNING. I have a unanimous consent request first to propose. Then I will.

Mr. REID. That is fine.

Mr. BUNNING. I ask unanimous consent that with the previous order standing in place, the 30-minute time limit on each Senator be considered controlled time, so that any remaining time may be yielded to another Senator, and if not yielded, the time be automatically yielded back.

The PRESIDING OFFICER. Is there objection?

Mr. REID. In layman's terms, what this means is, if there are Senators on our side or the other side who want to use the 30 minutes in any way they want—10–10–10, 15–15—that is certainly permissible. The going back and forth would be unfair otherwise because someone here would use 30 minutes and only 10 there.

So what we are going to do—I think this is totally appropriate. I ask the distinguished Senator from Kentucky to allow a modification, simply a housekeeping matter over here. The Senator from Michigan, Mr. LEVIN, and the Senator from Florida, Mr. NELSON, are going to switch places, and also that Senator EDWARDS would be listed at the end of our list as the final Democratic speaker.

The PRESIDING OFFICER. Is there objection?

Mr. BUNNING. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Kentucky is recognized for 30 minutes.

Mr. BUNNING. Mr. President, today I rise to talk about the Medicare prescription drug bill. First, let me commend the members of the conference committee who worked day and night for many months to reach this agreement. I know it was not easy, but they have done a good job that will finally bring Medicare into the 21st century.

Second, let me say how disappointed I am that it appears some Members may try to filibuster this bill. In fact, it seems as though there are Members in this body who want to filibuster just about everything we try to do, whether it is stopping judicial nominations, the Energy bill, or this Medicare bill. Just a few weeks ago we spent several days in continuous debate on judicial nominations. On Friday, the Energy bill was blocked. Now it looks as though some are going to try to kill this bill. I call that obstructionism.

I want to show a chart because from the beginning there have been charts shown on both sides. These are 358 different groups—358 different groups that support this bill in its present form. It is headed by the American Association of Retired People—the AARP, which represents over 35 million seniors.

Seniors have been pleading for Congress to expand Medicare to include drug coverage, and this bill will do just that. It might not be all things to all people, and I am sure every Member in here would have written a different bill if it was completely up to him or her, but that is not the way we work around here and this bill is a very large compromise. Even the AARP, as I said before, has endorsed this bill and said

that, although the bill is imperfect, it is an historic breakthrough. I want to repeat that—an historic breakthrough; and that we should not let this opportunity pass us by.

Today, Medicare provides health insurance to about 40 million seniors and disabled individuals each year. The number is only expected to grow as the baby boomers begin retiring. Medicare provides important medical and health and hospital benefits for seniors. However, it is a program that is still trying to provide health care as if it were in 1965 instead of the year 2003.

When Medicare was created, prescription drugs played a small role, a very small role in medical care. Today, as we all know, that is much different. In fact, for many seniors and many Americans, prescription drugs have replaced expensive surgeries and extended their lives significantly. By tying a drug benefit to Medicare, this bill makes these lifesaving and life-enhancing drugs more available to millions of Americans.

This has been a very long process, and I kind of chuckle when I hear people say we are rushing into this. I can tell you as a member of the Finance Committee that we have been working on this bill for almost the entire year, working and crafting legislation to make the best drug bill possible for all Americans.

I was supportive of our bill as it moved through the Finance Committee and through the full Senate. Today I am supportive of the bill before us. It is time to add this benefit to Medicare. Seniors have waited too long for their benefit, and I urge my fellow colleagues in the Senate to support this bill. Talk is cheap, and it is time to act and it is time to act now.

We have $400 billion allocated for this benefit. It would be a shame if we let this opportunity pass us by. It might not come again.

This legislation provides a much needed prescription drug benefit to Medicare beneficiaries. It provides more options to seniors than just traditional fee-for-service Medicare, and it provides incentives to companies to continue offering medical benefits to their retirees.

Seniors will be able to receive prescription drug coverage under two options: Through the traditional fee-for-service Medicare and also through a new Medicare Advantage Program made up of private companies offering Medicare benefits.

Under the fee-for-service Medicare, beneficiaries will be able to enroll in Medicare drug plans. The standard drug benefit will require a $35 monthly premium and a $250-a-year deductible. Once seniors have met the deductible, they will pay 25 percent of the prescription drug cost up to $2,250. Once a beneficiary has received an out-of-pocket spending limit of $3,600, they will pay 5 percent for their prescription drugs.

I emphasize this because this is the key to the whole Medicare prescription drug benefit.

Low-income seniors will be provided with assistance paying for their drug costs depending on the level of their income. This means that seniors with the lowest income—those below 100 percent of poverty—will not pay a deductible or monthly premium and will pay either $1 or $3 per prescription drug up to the catastrophic limit. Once they reach the catastrophic limit, these seniors will have 100 percent of their drugs paid for.

These are the seniors who truly struggle to pay for their prescriptions. At 100 percent of poverty, a senior's income is $8,900 per year. Other low-income seniors below 150 percent of poverty will receive additional assistance depending upon their level of income. Personally, I believe our biggest responsibility is to low-income seniors. These are the ones who struggle the most to buy their prescriptions, and they deserve a very generous benefit.

Seniors will also be able to choose to receive their health care through a private company. I hope everybody heard that. They will be able to choose. This is a voluntary program. You can choose to stay in Medicare Part B and have no prescription drugs if you choose to do that. You can choose to take Medicare Part B and add a prescription drug benefit or you can choose to go into a private company's health care program.

Under Medicare Advantage, seniors will be able to choose whether they would like medical coverage from a preferred provider organization, known as a PPO, or a health maintenance organization, or HMO, operating in their regions.

These plans will provide beneficiaries with an integrated benefit, which means seniors will receive both medical and drug coverage under the plan. They would have a single deductible for medical benefits currently provided under Medicare Part A and B. They would also be able to receive preventive care, disease management, and chronic care under these programs.

These private plans will have much more flexibility in the type and scope of benefits they provide than traditional Medicare, and will provide many seniors with a valuable health care option.

Please notice—''option, voluntary.'' These are very key to this whole program.

I know some of my colleagues do not like these PPOs and HMOs because they say seniors will not be able to go to any doctor they choose. Hogwash. No one is going to force the seniors into these private plans, and they will be able to pick a plan in which their doctor participates.

Please understand that. We are not going to force any senior away from their given doctor. They will be able to choose their own doctor and stay with that doctor.

That is one of the key elements of the bill—giving seniors more choices instead of forcing them to use a health care plan created in 1965, which has changed very little since then. If these care advantage plans sound familiar, they should.

Finally, Medicare will provide seniors with a modern benefit similar to what is offered to most employees, including what the Federal Government offers to employees.

One of the biggest concerns with the legislation as it moved through the Finance Committee and the full Senate was what would happen to retirees who currently have drug coverage from their former employer. No one wants this new program to be an excuse for employers to drop their retirees' health coverage. That would be counterproductive and unfair to those seniors. To encourage companies to continue providing these benefits, this agreement sets aside almost $70 billion of our $400 billion for subsidies to help companies cover their prescription drug costs for their medical-eligible retirees. This is a substantial commitment by Congress to make sure companies do not have an excuse to drop their coverage.

The members of the conference committee have worked long and hard for many hours and in many meetings over the last year on this compromise. We have a real chance to pass this bill, and we shouldn't pass up this opportunity.

If we don't pass this bill now, it will be several years before we get another chance, and seniors have waited much too long already.

Again, I urge my fellow Senators to pass this bill and finally fulfill the promise that each and every one of us in the Senate has made either on the campaign trail or anywhere that we have spoken to senior groups. We have promised this benefit and we can deliver it.

I urge my fellow Senators, once again, to pass this bill providing prescription drug coverage to our seniors. We can talk about it for 2 or 4 more years or we can do it now.

I yield whatever time I have to the Senator from Iowa.

Mr. GRASSLEY. How much time remains?

The PRESIDING OFFICER (Mr. BUNNING). There are 14 minutes 50 seconds remaining.

Mr. GRASSLEY. Mr. President, we have heard in the Senate today and last night that the comparative cost adjustment demonstration project, which some of the Members refer to as premium support, would end Medicare as we know it. I want to be very clear, nothing could be further from the truth. I have 10 facts about this demonstration to explain why this is not the case. We are talking about the comparative cost adjustment.

Fact No. 1: It sunsets in 6 years. The demonstration will only be in existence for 6 years. It will not begin until the year 2010. During that time, there will be a 4-year phase-in period. Explicit authorization from Congress at the end of 6 years is necessary to extend the demonstration and/or expand it to other areas of the country. This proposal is significantly modified from the House of Representatives' original position. Congress weighs in before this becomes something other than a demonstration project and becomes policy for the entire country.

Fact No. 2: Very limited areas of the country will be affected in the demonstration. Under the agreement, the Health and Human Services Secretary may select no more than six metropolitan statistical areas to participate in the demonstration. It is not easy to be put in that list of six because in order to be selected, a metropolitan statistical area must have at least two local coordinated care plans offering services in the area and at least 25 percent of the Medicare beneficiaries must be enrolled in these plans. That means the private PPOs we are setting up beginning in 2006 must succeed. I hope they succeed. But we do not know if they will succeed, and if they do not succeed, at least to the tune of 25 percent in two local areas, there will not be one. If that does happen, according to the Congressional Budget Office, somewhere between 670,000 and 1 million beneficiaries will be included in this limited demonstration. It is a demonstration. It is not something that could ever, without an act of Congress, encompass all 40 million seniors.

Fact No. 3: Low-income beneficiaries are not affected at all. So if they are low-income, below 150 percent of poverty, none of them will see their Part B premiums increase.

Fact No. 4: Premium increases for beneficiaries above 150 percent of poverty will be limited to 5 percent. For everyone else, if premiums go up, there is a cap of 5 percent. As an example, if the national Part B premium was, say, $100 in 2010, the fee-for-service premiums in the demonstration areas could not exceed $105 a month. The increase, by the way, is not compounded over that 6-year period of time.

Fact No. 5: Other than the limited impact on the Part B premium calculation, the fee-for-service program is unchanged choice. Fee-for-service benefits, beneficiary cost sharings, payments to hospitals, and other health care providers are unaffected by the demonstration. The Medicare entitlement to benefits and payments to health care providers are unchanged in these same areas.

Fact No. 6: Beneficiaries are not required to enroll in these private plans. The right for a Medicare beneficiary to remain in fee-for-service programs is maintained in the demonstration areas. The fee-for-service program will remain affordable for all beneficiaries.

Fact No. 7: The prescription drug benefit is unaffected. The prescription drug benefit and the drug premiums are not changed. The demonstration only minimally affects the Part B premium, and that is the maximum of 5 percent increase.

Fact No. 8: Over the demonstration period, enhanced payments to private plans are phased out to ensure that their payments to private plans are on a level playing field with the fee-for-service program.

Fact No. 9: The preferred provider organization stabilization fund, referred to on the other side by my colleague as a "slush fund," has no relationship to this demonstration. So one cannot talk about the demonstration and talk about a stabilization fund in the same breath. If you do that, you do not know what the bill does; you have not read the bill.

Under the conference agreement, the stabilization fund may only be used to provide assistance to the newly regional PPO options. However, any enrollment in regional PPOs is not counted toward the 25 percent enrollment requirement in the metropolitan statistical areas. The extent to which beneficiaries enroll in the new regional PPO opposite will have no bearing on whether a metropolitan statistical area becomes a candidate for demonstration.

Last fact, No. 10: Strict quality monitoring is required. The Health and Human Services Secretary is required to closely monitor access to care and quality and submit a report to Congress upon completion of the demonstration to determine if the demonstration has reduced Medicare spending and/or increased cost to beneficiaries; second, access to physicians and other health care providers has declined; and lastly, whether beneficiaries remain satisfied with the program. The evaluation would be on the basis of any congressional decision to extend that demonstration.

Premium support, as has been described in the Senate numerous times in the last few days by the Senator from Massachusetts and by other Senators, is not in this bill. It is not included. This bill strengthens and improves fee-for-service Medicare.

How much time remains?

The PRESIDING OFFICER. Seven minutes.

Mr. GRASSLEY. It would be good at the start of the third day of debate on this bill to remind people of the political situation that has gotten us where we are today. That is a very positive political situation.

Last year, we were beginning to develop a bill in the Senate Finance Committee that would have had bipartisan support to get it out of the committee. Bipartisan support in the committee is a way to have a chance of success in the Senate where there can always be an extraordinary minority who can keep a bill from being passed because we protect minority interests in this body as no place else in our political system. So we must be bipartisan.

About the time that was going to happen, the majority leader—the Senator from South Dakota, last year—decided we needed to talk about this in the Senate. But the bill never came out of committee. It was brought right to the floor. When bills are brought to the floor, there is no chance of developing bipartisanship. We discussed it for 2 or 3 weeks and no one could get the bipartisan majority it takes to get pieces of legislation passed.

At that time, I surmised, and I think the outcome of the debate last year proves it, that the other side wanted more of an issue for the election rather than a product. They gambled and they lost because Republicans gained control of the Senate in that election and then we were right back to square 1 where we went to the Senate Finance Committee where there could be, even with a Republican majority, still a bipartisan working relationship that was able to report out a bill on 16-to-5 bipartisan vote. Then we brought that bill to the floor during the month of June. And it got through here 76 to 21.

We are as successful as we are because the people made a change in the Senate.

In the Senate, then, we adopted a bipartisan bill, and we were able to get through, for the first time on this issue in the history of the Senate, prescription drugs for seniors. We were able to match the House, where it had passed three times previously. We went to conference. We operated in the conference, at least from the Senate point of view, on a bipartisan basis, and we were able to produce a product where here we are doing the best improvement and the most sweeping improvement in Medicare in 38 years. We are able to do that because of bipartisanship.

Now, all of a sudden, people on the other side of the aisle, at this last minute, are filibustering. I hope they do not get away with that filibuster. But, again, they are trying to be very partisan, as they were a year ago. I hope they learned a lesson from a year ago and will not try to be partisan on this very important social issue for the seniors and the disabled of America, and that they will not repeat the mistakes of last year when they wanted an issue instead of a product.

We have a bipartisan product. I listed last night, in my closing remarks, all of the organizations that are supporting this bill. Other Senators have put charts up saying how many organizations are supporting this bill.

We have this opportunity. Let's hope partisanship—that is demonstrated by

the filibuster that was announced yesterday—does not keep this bill from passing. Democrats who want to filibuster ought to consider that is not the way to go. They should learn from the lesson of the past. That lesson is that last year when they wanted an issue instead of a product, they got a defeat at the polls.

I yield the floor.

The PRESIDING OFFICER (Ms. MURKOWSKI). The Senator from Florida.

Mr. GRAHAM of Florida. Madam President, since its creation in 1965, the Medicare Program has helped millions of our Nation's elderly and disabled when they desperately needed it, after they became ill.

It has been an extremely successful and popular program, and has improved the health of countless seniors.

Now that we are in the 21st century, it is time to reap the full benefits of the advances made over the years, and shift the focus of the Medicare Program from assistance after illness to one that promotes wellness.

To achieve that, a prescription drug benefit is mandatory. Ninety percent of seniors have at least one chronic condition; drugs are often the best way to manage those conditions.

The bill we are considering is frequently divided into two parts—one part is the prescription drug benefit, and the other part is Medicare reform.

Let me state what we all ought to know by now: A prescription drug benefit is the most fundamental reform that we can make to the Medicare Program.

If we want to truly reform Medicare, we must change the approach of the program from one of sickness to one focused on wellness. This prevention approach will require access to prescription drugs.

Modern medicine has been altered fundamentally by prescription drugs, notably by improving the quality of people's lives, ending the need for surgeries and long recovery periods.

A side benefit of this change would be that the cost to the Medicare Program could be lower by reducing these procedures.

I have introduced several prescription drug bills over the past few years because I believe a reorientation toward wellness is in the best interest of our seniors, as well as the Medicare Program.

However—and this is critical—not just any prescription drug bill will do. The bills I have authored have been constructed to provide an affordable, comprehensive, reliable prescription drug benefit to our seniors and Medicare beneficiaries with disabilities.

The bill I introduced in 2001, cosponsored by Senators ZELL MILLER and EDWARD KENNEDY, was voted on in July of that year. It received 52 votes.

That bill would have made a significant, and positive, difference in the lives of the nearly 41 million older Americans and disabled citizens who are covered by Medicare—more than 2,770,000 of whom live in Florida.

The conference agreement that we are now considering would also make a significant difference in the lives of our seniors. However, that difference will not be a positive one.

I have many grave concerns about this legislation. The drug portion of the bill is deeply flawed. It includes an enormous coverage gap. When a senior has reached $2,250 in total drug expenses, all drug coverage stops. The drug benefit doesn't begin again until total drug spending reaches $5,100. That is a gap of $2,850.

And during all of the months the senior is in that ''gap'', the senior is required to keep paying premiums.

The bill is projected to cause 2.6 million retirees nationwide, and over 160,000 in Florida, to lost their retiree prescription drug coverage.

It will cause 6 million low-income seniors nationwide, and over 360,000 in Florida, to pay more for their drugs, and to face more restrictions on the drugs they can get.

It relies on an untested delivery system which would either herd seniors into what we know they don't like, a managed care organization, or would turn them into guinea pigs for a never previously utilized drug-only insurance plan.

Millions and millions of seniors who will not have access to drugs through the traditional Medicare Program will suffer the fate I have just described.

In addition, the legislation that was supposed to be about adding a prescription drug benefit now includes provisions that will privatize the Medicare Program beginning in the first year of implementation fragmenting the health insurance group by subsidizing health savings and increase the costs of comprehensive health insurance for our non-Medicare citizens.

I am not alone in my concern about this legislation. In a recent survey conducted by Hart Research, of voters aged 55 and older, only 19 percent said we should pass this bill. Sixty-four percent said we should go back to the drawing board. This isn't the Medicare prescription drug benefit that they need.

And although the AARP has taken the inexplicable position of supporting this legislation, the national organization may want to listen to its members. Only 18 percent of AARP members want Congress to pass the bill. Sixty-five percent have instructed us to go back to the drawing board.

The percent of seniors in favor in my State is even lower. I have received over 1,000 calls from seniors opposed to this agreement, representing about 80 percent of all calls.

Listen to what some of my constituents are saying about the bill:

Earl Dangler of Beverly Hills, FL said:

> This prescription drug benefit is going to cost my wife and I an additional $750 to $1,000 per year whether we use it or not.

Many of my constituents have expressed outrage at AARP for endorsing this conference agreement.

One constituent said:

> I'm really mad at the AARP and I am going to cancel my subscription that I've had for 20 years.

Another constituent remarked:

> I've been a member of AARP for many, many years, and I can't believe that they have sold out to the pharmaceutical industry and the insurance companies.

The real test of the reaction to this legislation is a bit down the road—but it will come. The impact of the bill won't be felt until at least 18 months after enactment.

I would predict the vote we cast on this legislation will be politically inconsequential for those running in the year 2004. The stunning impact will be felt first in the fall of 2005, when Medicare beneficiaries get the notice that it is time to enroll in the drug benefit.

What choices would the senior face in 2005 when considering whether to enroll in the new, highly touted program?

Many Medicare beneficiaries will have to consider the following:

No. 1, sign up for a prescription drug plan, PDP—a private drug-only insurance plan with no limits on the premium that may be charged, or No. 2, enroll in a managed care plan.

Given that more than 85 percent of seniors today have rejected managed care, I anticipate a ''1980s''catastrophic outrage. But, that is not the end of the outrage. In fact, it may be just the beginning.

As the senior considers his choices, he will soon realize that the private plans hold all the cards. They have all the flexibility, all the options, and none of the commitments.

The plan defines the classes, or categories of drugs, then decides what drug is in the class or category, and how much the senior will be charged for the drug.

The plan doesn't even have to tell the senior prior to enrolling what the charge for the drug will be, and can change which drugs are in each category at any point in the year.

But the senior? The senior has to make an enrollment decision prior to the beginning of each calendar year, based on limited and subject-to-change information, and cannot change plans at any time during the year.

The private insurance plan can make changes during the year, but the senior cannot.

Once enrolled, in the first part of the year 2006, seniors will begin to feel the impact of the deck being stacked in favor of the private plans. They will discover that the plan can make changes to the drugs covered and the price of the drugs at any time.

They will discover that the drug prices aren't all that low, and they will discover that they have to pay the full cost for part or all of January as they struggle to meet the $250 deductible.

At this point, you may be thinking that things are bound to improve for the senior. But, hold on, because the summer of 2006 is coming. What happens then? That is when, for the first time, seniors—voters—will experience the infamous ''gap.'' Beginning sometime after Memorial Day 2006, many seniors will reach, and fall into, the gap.

At this point the senior has been going to the drugstore for about 6 months, each month filling prescriptions for treatment of any number of chronic illnesses.

The senior has met his or her deductible, has never missed a monthly premium payment, and dutifully has been paying 25 percent of the cost of each prescription.

But when the drugstore counter is reached in July, the senior finds he is now responsible for paying 100 percent of the cost of the prescription, and yet still is responsible for paying the monthly premium.

I predict that by Labor Day of 2006, seniors will have made loud and clear their opinions about this prescription drug benefit.

And yet, there is still more ahead. In the year 2010, a vast experiment called ''premium support'' will be imposed on millions of seniors in several parts of the country, including Florida.

Seniors in my State, as in others, will be forced to choose between enrolling in a health maintenance organization or paying a much higher premium to stay in the traditional fee-for-service Medicare Program.

Although we are beginning to hear the outrage now, it will be nothing compared to what we will hear in the summer of 2006.

The voters have been polled and my constituents have been calling, and they all cite many concerns with the bill—many of the same issues I mentioned a few moments ago. Each of these issues should be discussed in great detail, and I hope we have the time to do so.

Today, I am going to concentrate on one of the aspects of the bill that I find to be the most troubling, and one that is shared by 64 percent of those polled: the legislation does little to contain drug costs. The legislation actually forbids Medicare from negotiating with the drug companies to reduce costs.

It doesn't seem to make much sense. A Medicare prescription drug benefit should allow the Medicare Program to do whatever it can to get the best possible prices from the drug companies. Why? Because both seniors and taxpayers would benefit.

Under this legislation, the majority of seniors would have to pay either 100 percent or 25 percent of the price of the drug—100 percent before the deductible is met, and during the time the senior is in the enormous ''gap'' in coverage, and 25 percent after the deductible and before reaching the ''gap.''

In 2001, the median income of a Medicare beneficiary was $19,688. After covering the cost of housing, food, and transportation, there isn't a lot left.

We need to make sure the prices are as low as possible so that our seniors are able to actually purchase the drugs they need to keep them well.

Of course, the taxpayers would also benefit from Medicare serving as a tough negotiator. The taxpayer is going to pay the portion not paid by the senior.

Both parties—the seniors and the taxpayers—have an interest in keeping drug prices as low as possible. The party that does not share that interest is the pharmaceutical industry.

The interests of that industry can be the only reason for a provision included at the top of page 54 of the conference report. The provision is designed to appear helpful by being called a ''noninterference'' clause.

What is a ''noninterference'' clause? According to the authors of this legislation, it is the following:

> NONINTERFERENCE.—In order to promote competition under this part and in carrying out this part, the Secretary—
>
> (1) may not interfere with the negotiations between drug manufacturers and pharmacies and PDP sponsors; and
>
> (2) may not require a particular formulary or institute a price structure for the reimbursement of covered part D drugs.

Let me get this straight. A provision that prohibits the Secretary of HHS from negotiating with drug manufacturers to lower the price of drugs—a provision that prohibits the Secretary from using the purchasing power of 41 million Medicare beneficiaries to lower the price of drugs—and thus lower costs to seniors and taxpayers alike—is ''noninterference''?

I put my money on this being a form of ''interference'' that senior wouldn't mind. Saying this provision is about not interfering, and about promoting competition, is akin to the fox putting on the San Diego chicken costume and heading into the chicken coop to ''protect'' the chickens.

This may sound like dry stuff. But it has very real life implications. Take the case of Patricia Kittredge, a 71-year-old woman who lives in Tamarac, FL.

She takes 6 different prescription drugs to stay healthy, which add up to $409 a month, or approximately $4,908 annually. Fortunately, her former employer picks up the majority of these costs so that she pays $65 a month, or $781 annually.

A former credit analysis for a major employer in South Florida, Mrs. Kittredge has good retiree health coverage. Yet she is far from wealthy. She makes about $18,000 a year when you combine her pension and Social Security income.

Because the conference bill does not allow the Medicare Program to negotiate on her behalf—should Ms. Kittredge find herself among the 4 million Americans who will lose their retiree coverage—her out-of-pocket costs, including her premium, will explode to $3,830.

That is nearly 5 times what she currently spends, nearly 5 times what she now pays, and nearly $4,000 in out-of-pocket drug costs on an income of $18,000 a year. What kind of benefit is that?

But don't take my word for it, this is what Patricia Kittredge has to say:

> That would really hurt me. The handwriting is on the wall. The companies that have retiree coverage will be walking away from it to save money and won't feel bad about it at all.

Were Medicare able to use its bargaining power to negotiate with the drug manufacturers, our seniors would likely see drug prices more in line with the VA drug prices. Mrs. Kittredge's drug costs under the proposed plan would decrease dramatically.

Yet the conference bill strictly forbids Medicare from using its bargaining power to negotiate lower drug prices for seniors.

How good are these VA prices? Let's compare the VA prices of Mrs. Kittredge's drugs to their retail prices.

Diazepam, which Mrs. Kittredge takes to help her sleep, costs the VA $0.84 for one hundred 5 milligram tablets, while the same pills cost $16.70 at the drug store.

In addition, a month's supply of pravachol which she takes to regulate her cholesterol, costs the VA $19.80 at 40 mg per pill for the clinical equivalent, while the drug store charges $116.75 for the same amount.

Mrs. Kittredge would face similarly high prices for her other prescriptions: a 20 mg dosage of accupril, a drug to treat her high blood pressure, costs the VA $7.69 for 30 pills goes for $32.00 at the drug store.

Diltiazem, which Mrs. Kittredge also takes for her blood pressure, costs $69.20 at the drug store but only $32 through the VA.

Metrocream, which she takes for a skin disorder, costs $69.99 at the drug store compared to $25.13 through the VA.

If the Medicare bill we are now considering actively negotiated on Mrs. Kittredge's behalf, she would likely pay prices more in line with the prices available to veterans. Her total bill would be $2,188 rather than the $3,830 as she will pay under the conference agreement.

Mrs. Kittredge's example is not unusual. Look at the price differentials between the VA price and the average retail price of some common drugs.

How is the VA able to secure such good prices for veterans?

In 1992, concerned about the prices veterans were paying for drugs, Congress passed the ''Veterans Health Care Act''—a Rockefeller, Simpson, Murkowski, Cranston amendment—by voice vote.

It is interesting that an issue that was and is so controversial could be passed by voice vote. We are only asking that Medicare not be prohibited from negotiating prices for seniors.

This legislation gave the VA the authority it needed to secure better drug prices for our veterans. What was the result of that legislation? In the first 5 years alone, the VA saved more than $1 billion.

VA's savings have continued to grow exponentially, as both the cost of pharmaceuticals and the number of veterans seeking prescription drugs have grown. The savings represent valuable Federal dollars that have been used to provide quality health care to our Nation's veterans.

In addition, the savings on pharmaceuticals have allowed VA to provide a long-term care benefit, including nursing home care, adult day care.

What are the implications of allowing Medicare to negotiate prices? In 1998, the Inspector General, IG, of HHS, studied 34 drugs currently covered by the Medicare program.

The IG found that Medicare and its beneficiaries could save more than $1 billion a year if the allowed amounts for just these 34 drugs were equal to the prices obtained by VA.

If the Medicare program were able to achieve similar savings on the outpatient drugs covered in this legislation, Congress would be able to provide a much richer prescription drug benefit for the same $400 billion we are proposing to spend now, reduce the costs to taxpayers, or both.

In terms of the drug benefit: we could give seniors a lower deductible and fill in the gap; we could remove the gimmicky definition of what counts toward reaching the catastrophic limit so that employers wouldn't drop their retiree drug coverage; we could remove the assets test; We could allow the Medicare Program to pay to the cost-sharing of our low-income seniors.

What would allowing Medicare to use its purchasing power do to the pharmaceutical industry?

Some would have us believe that only the proposal we are discussing today would allow the industry to thrive and continue to develop life-savings drugs.

But in June 1999, reaching to the prospect of a Medicare prescription drug benefit, Merrill Lynch advised investors that

> volume increases could overwhelm negative pricing impact. It is important to remember that a reduction in prescription drug prices, both with or without associated prescription benefit coverage, is likely to be associated with price elasticity and increased utilization.

The proposal before us fractures the Medicare market. One of the great strengths of the Medicare Program has been its universality. Seniors from Anchorage to Key West knew they would get the same benefits for the same premium.

The proposal before us also uses scarce Federal dollars in an attempt to force private insurers into a line of business they have repeatedly said they do not want to enter.

Instead, we should be using the purchasing power of the nearly 41 million Medicare beneficiaries waiting for a drug benefit to drive down prices—for their benefit, and for the taxpayers benefit.

I ask unanimous consent to print an editorial at the conclusion of my remarks.

The PRESIDENT OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRAHAM. I'd like to quote from the November 21st Miami Herald, which editorialized as follows:

> The problem: Instead of using the free market to drive down the costs of prescription drugs, the bill would protect pharmaceutical companies from competition and pay more than $100 billion in incentives to employers and insurers in an attempt to make its flawed logic work. The bill also threatens to cap future Medicare spending.
>
> True, the measure promises prescription-drug coverage for low-income seniors not already covered by Medicaid and would benefit seniors with extremely high prescription costs. But its coverage for middle-class seniors is modest at best.
>
> That's just not enough benefit for a 10-year price tag of $400 billion that will add to the skyrocketing Federal deficit, especially when it doesn't even contain the cost of prescription drugs.
>
> A better, more logical approach would be to harness the buying power of the 40 million Medicare seniors to drive down drug costs. But this bill actually would prohibit the government from doing so. Instead it would dissect the country into 10 regions and pay incentives to companies—$12 billion to private insurers and $1.6 billion to HMOs—so they'll offer prescription-drug coverage.

For the Record, I'd like to make one correction in the otherwise excellent editorial. Under the latest version of the bill, between 10 and 50 regions would be allowed—further dissecting the country.

The last drug benefit endorsed by the AARP was the Medicare Catastrophic Coverage Act. We all know how seniors felt about that drug benefit, and it was quickly repealed.

If we adopt the proposal before us, we will be turning a deaf ear to history, and to the seniors across the country today who are already telling us—through AARP card burnings, through the messages they are writing on the AARP ''message board'', and through the hundreds and hundreds of calls from seniors we've been receiving over the last week—that we need to get back to work.

This drug ''benefit'' is actually no such thing. It leaves millions of seniors worse off.

Along with many others, I have worked to provide an affordable, comprehensive, reliable prescription drug benefit for our seniors and citizens with disabilities for the last several years.

It is therefore with great regret that I have no choice but to vote against a conference report that does not provide the benefit seniors need, and have been promised.

If the proposal is adopted—and I sincerely hope it is not—it will not be the last chapter. Seniors won't stand for it.

I predict voters will put Congress on the hook in 2006, and we will spend many, many years attempting to fix this deeply flawed legislation—or will repeal it outright as we did with the catastrophic legislation.

Or we could have the worst of both worlds.

We could repeal the prescription drug benefit because the benefits are too meager, its subsidies of health maintenance organizations are too great, and its delivery system too confusing and disrespectful.

And what would be the price of repealing the drug benefit?

We would leave the privatization of Medicare in place and destroy one of the Federal Governments most effective, efficient and popular programs: traditional fee-for-service Medicare.

In the event the legislation before us does become law, I plan to use my last year in Congress working to fix it. Our seniors need better from us.

EXHIBIT 1

[From the Miami Herald, Nov. 21, 2003]

WHEN HALF A LOAF ISN'T NEARLY ENOUGH

OUR OPINION: REJECT THE FLAWED MEDICARE PRESCRIPTION BILL

With its $7 million ad campaign to win support for the Medicare prescription-drug bill, AARP says that the legislation ''isn't perfect. But millions of Americans can't afford to wait for perfect.'' We agree with AARP's assessment of the bill but not its conclusion.

The proposed bill is badly flawed. It delivers too few benefits to seniors at too big a cost. Americans don't need perfect, but for $400 billion they deserve a bill that helps more people and drives down the high costs of prescription drugs. The proposed bill does little of either. Congress should reject it and try again.

The problem: Instead of using the free market to drive down the costs of prescription drugs, the bill would protect pharmaceutical companies from competition and pay more than $100 billion in incentives to employers and insurers in an attempt to make its flawed logic work. The bill also threatens to cap future Medicare spending.

True, the measure promises prescription-drug coverage for low-income seniors not already covered by Medicaid and would benefit seniors with extremely high prescription costs. But its coverage for middle-class seniors is modest at best. That's just not enough for a 10-year price tag of $400 billion that will add to the skyrocketing federal deficit, especially when it doesn't even contain the cost of prescription drugs.

Don't repeat the past

A better, more logical approach would be to harness the buying power of the 40 million Medicare seniors to drive down drug costs. But this bill actually would prohibit the government from doing so. Instead it would dissect the country into 10 regions and pay incentives to companies—$12 billion to private insurers and $1.6 billion to HMOs—so they'll offer prescription-drug coverage.

We've tried such incentives before with HMOs, and experience shows that they didn't work. Half of the Medicare Plus Choice plans provided by HMOs have folded, even though taxpayers still pay more to subsidize a senior in a Medicare HMO than a senior in traditional Medicare.

The compromise measure also guts provisions that would have allowed seniors to legally buy prescription-drugs from Canada, another concession to pharmaceutical companies, some of which now are retaliating against Canadian wholesalers who sell to Americans.

The doughnut hole

The standard coverage that the bill offers would only benefit a senior who spends more than $835 a year, or some $70 a month, on drugs. Then there's the ''hole in the doughnut'' coverage gap in which the government's 75-percent subsidy stops after $2,200 in out-of-pocket cash has been spent. If out-of-pocket spending reaches $3,600, the subsidy kicks in again, this time at 95 percent of drug cost. Deductibles and co-payments are complicated enough without trying to explain the ''hole in the doughnut'' to elderly recipients.

AARP and other supporters say that even a flawed benefit is better than nothing. They reason that once passed, bad provisions could be changed before they go into effect. But why fix later what should be fixed now?

Seniors deserve affordable prescription-drug coverage. Congress should scrap this flawed approach and come up with a plan that delivers that coverage while driving costs down.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. JOHNSON. Madam President, I ask unanimous consent to speak for 5 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

HAPPY 90TH BIRTHDAY, DAD

Mr. JOHNSON. Madam President, today my father, Van Johnson, is celebrating his 90th birthday. He is joined by my mother Ruth, my brother and sister and their spouses, dad's sister Ardis, and a great many wonderful friends. I had long planned to be there to join in this celebration, but the Senate failed to adjourn on time, and now is staying in session through the weekend and into next week in an effort to conclude legislative business which should have been completed months ago.

The good people of South Dakota honored me by electing me to represent their interests and values in the Senate, and I simply cannot neglect those duties by leaving Washington today.

While I cannot be with dad on this very special day in his life, I rise to express my long appreciation for a father who has always been there for me. Dad taught me about the importance of family, of fatherhood, of faith, and of personal integrity. He taught me about the importance of public service—that life is more than about the collection of things, and that helping make the world a better place is, indeed, a central purpose to our lives.

Dad was there for me, whether it involved the countless family camping trips, athletic events, school work, or church activities—all at a time when he was intensely busy with his own career as a highly regarded teacher, coach, professor, and university administrator. He and mom were and are a great team, and my brother Tom and my sister Julie and I have benefited all our lives from their loving guidance and care.

As a father of three children, and now a new grandfather myself, I continue to draw from the values imparted to me from my father and find with each passing year how profoundly important they are.

But dad, although an educator all his adult life, did not teach exclusively in a pedagogical manner. Many of the greatest things I learned from dad came from observing his example—his commitment to our family, his love for mom, his dedication to professional excellence, and his willingness to assume leadership roles in the church and in our community.

Dad, it deeply disappoints me that I cannot be with you today, but know that I am with you in thought and spirit. Happy 90th birthday, dad.

I yield the floor.

Mr. REID. Madam President, Senator NICKLES is in the building. I do not know if he is going to speak.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NICKLES. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Madam President, I rise to speak on the Medicare bill that is before us. First, I compliment a couple colleagues with whom I have had the pleasure of working on this bill, particularly in the conference committee. First would certainly be Senator GRASSLEY who, in leading the Senate conferees, I think did an outstanding job. I also would echo that for the majority leader. The majority leader seldom gets involved in a conference. This majority leader, Dr. BILL FRIST, has an interest in Medicare and he was a very influential member of the conference. In addition, Senator KYL, Senator HATCH, Senator BAUCUS, and Senator BREAUX and, I would also include, Chairman THOMAS.

This was a very challenging conference between the House and the Senate. The bill that was reported out of the Senate—I did not vote for it. I thought it was very heavy on expense and very light on reforms. I did not really think it was a sustainable bill, one that we or our children could afford. So I worked very diligently, I guess, or very aggressively, trying to come up with a conference report that would meet the test, that would provide better benefits at a sustainable level.

I think the present Medicare system has crummy benefits. It does not cover a lot of things that should be covered. It is so far behind the times, I really did want to modernize it. I also wanted to add the new benefits in a way that would be affordable and sustainable.

Under the present situation in Medicare, just to give people a little thumbnail sketch—and this is without providing any new benefits—the total debt held by the public is $3.6 trillion. Social Security unfunded liabilities is about $4.6 trillion. Medicare is almost three times as much. It is $13.3 trillion, and that is without adding a new benefit, which most people would estimate to be $6 trillion or $7 trillion. So my colleagues can see we have an enormous challenge before us.

Then just look at Medicare today. There is a lot more money going out than coming in. Medicare is primarily financed by two things. One is payroll taxes; 2.9 percent of all payroll, not capped at the same amount that Social Security is up to the 80,000-something dollars. It is 2.9 percent of all payroll. That is the money going in. It is also financed by general revenue. We subsidize Part B.

If it is added all together and we take out the intergovernmental transfers, Medicare had net deficits last year—in 2002—of almost $70 billion. It gets a lot worse—by 2012 the deficit will be above $150 billion. That is present law. That is without adding a new benefit. So Medicare is in very difficult fiscal waters, a lot more challenging than even Social Security, a lot more challenging than any other program because demographically there are a lot of people who are living longer, health care expenses are exploding, and there are fewer people paying the payroll tax. So it is going to take a greater share of general revenue, money from taxpayers to pay for these obligations.

So I thought, let's provide better benefits. What do I mean by that? Medicare does not provide drug benefits. Everyone knows that. Medicare also has unaffordable deductibles. It has a deductible for the hospital of $840. I compare this to what the private sector offers. If a person buys Blue Cross or Aetna, any of the private plans, they do not have an $840 deductible to pay if they go in the hospital for one day, but Medicare does. All private

plans certainly should—I think most do—have catastrophic. Medicare does not have catastrophic.

If a person is really in trouble, if they are in the hospital more than 150 days, it is all on them; they do not get any help from Medicare. I think that is pathetic. That is not a very good benefit. As a matter of fact, if someone is in the hospital more than 60 days, they have to pay $210 a day. If they are in the hospital more than 90 days, they have to pay $420 a day. So if someone is really sick, if they are really in trouble, look out, Medicare does not come through. So it is a program that has, frankly, not been modernized since its creation in 1965.

Medicare does not do enough for preventive care. It does not offer prescription drugs. It does not have catastrophic. Its deductibles are way too high for hospitalization. So I think it needs significant improvement.

I want to pass a Medicare bill that will help solve all of these problems. I want to pass a bill that will provide drug benefits. I think we are way behind the times. We should be doing it. I also want to be cognizant of the fact that Medicare is in real financial trouble, that it is not sustainable in its present form. I do not want to be adding new benefits that will just accelerate the day where it collapses, where it is not sustainable, where our kids are going to be saying: What about this tax?

Some people say: Well, this is not a tax. And that is correct, we are not creating a direct tax to pay for the new benefits, but what we are doing is incurring enormous debt to pay for benefits. Frankly, our kids are either going to be paying for that in the form of taxation tomorrow or they are going to be paying for it in an increased interest rate because debts will increase substantially under this bill.

The budget resolution we passed last year said we should strengthen and enhance Medicare. That means make it more solvent, more sustainable, more affordable. Unfortunately, I am not sure we did that under this bill. In fact, we focused too many resources in this bill to cover the covered and not improve Medicare.

What do I mean by that? If we look at this chart, we find out that 76 percent of seniors now have prescription drug coverage, but we are going to spend billions, almost $100 billion, to provide assistance to those people who already have drug coverage. For employer-sponsored plans, for example, we are going to spend $89 billion to subsidize employers so they can continue providing health care benefits, drug benefits, for their employees. We are going to bribe them to keep covering the people they have already contractually obligated to cover. This is a big bailout, in my opinion, for employer plans, union plans. It is way too high of a subsidy. I know AARP wanted these subsidies and in fact wanted more money.

Now, some people were criticizing Senator BAUCUS. Mr. Hunt in the Wall Street Journal criticized him as a negotiator. I take issue with that. He was a very successful negotiator because in the last several days of negotiating the bill—we spent months negotiating—Senator BAUCUS was a very effective negotiator. He kept winning. I kept losing. We were on opposite sides in many battles. I complimented him. I said: You just keep winning.

He got more money for the employer and union subsidy, another $18 billion in the last few days to cover the covered. It went from $71 billion to $89 billion by making it tax free. He also got an additional $18.5 billion for low-income subsidies and more benefits. That makes the bill more expensive and I think will make utilization go way up. So I compliment Senator BAUCUS for his negotiations, but I also think it makes the bill less sustainable or less affordable for future generations.

So we spend a lot of money to take care of employer sponsored. I also have issues with covering the covered in the Medicaid program. We have low-income subsidies in this bill not just for those who are higher incomes than Medicaid but for the Medicaid population that is dually eligible. We have subsidies in this bill for low-income to the tune of $190-some billion. These are subsidies for seniors which many of whom already had drug coverage. So what is the total package? Everybody says this package is a $395 billion package. In reality it is much more than that. In reality, this bill is closer to $800 billion. It nets out about $400 billion. It is $800 billion because we have $507 billion in drug benefits, but we also have low-income subsidies of $192 billion, and we have employer subsidies of $89 billion. If you add that up, it is almost $800 billion of checks that are going to be written. The Federal Government is going to be writing those checks.

The Federal Government will be receiving money back in the form of premiums from seniors, $131 billion, and a reach-back or call-back from the States. Since we are assuming Medicaid, which in my opinion is a serious mistake, one that was opposed by the administration and certainly opposed by this Senator, but we were not successful. It was not the Senate position to assume federalization of Medicaid. Medicaid is a Federal-State program. It is now an all-Federal program when this bill becomes law. Again, we are covering the covered. We are going to subsidize Medicaid to the tune of $190-some billion in this bill. That is a lot.

We recoup some of the money we were paying. Now it is all Medicare, so the offset will say we will spend less in Medicaid because we are not going to do that. In the future we will make it all Medicare. The net is—we will spend $800 billion, recoup $400 billion—so the net cost to future generations is about $400 billion. Yes, that meets the so-called budget restraint we put in, in this year's budget. But we didn't finance that, we don't pay for it, so we have benefits, frankly, that are certainly overpromised and underfunded. They are not funded. The $400 billion is not funded. That is just additional debt.

I happen to think it will be a lot more than that. I happen to think once you end up paying some benefits you will find that utilization will skyrocket. This is just what CBO has told us. People without drug coverage in this age category spend about $732 on their drugs per year. If they have drug coverage, they spend about double that, $1,337.

I think this figure will skyrocket. I asked my mother: Do you have drug coverage? She said yes. She buys it with AARP. She pays $140 or $160 a month for drug coverage. I said: How much is your drug coverage?

It is 50 percent of whatever she spends up to $1,000. She gets $500 in drug benefits from AARP. She pays almost $1,000 for that $500. Maybe there are some other benefits in there I am not aware of. My point is, a lot of people have drug coverage, but they only have a little drug coverage. The reason I say this bill may not be sustainable or affordable is because 36 percent of all Medicare seniors are going to get an enormous benefit and they pay almost nothing. They will have only $1 and $3 copays, or $2 and $5 copays; in most cases they will have no premiums, deductibles or gap in coverage.

I have heard some colleagues say we should be doing that for everybody. Let me just give you an example of who is pushing that proposition. I saw that AARP ran an ad today and is asked: Why should you vote for this bill? They had three or four reasons. If you have income less than 100 percent of the federal poverty level—for an individual, that is $9,600; for a couple it would be $13,000, this is the best deal you have ever seen because all you have to pay is $1 if you are buying a generic, or $3 if you are buying a brand-name drug, and you have unlimited drugs—no limit, no deductible, no copay other than that $1 and $3; no premiums, and no donut hole. That is unlimited. All you have to pay is $1 to $3 and all your drugs—whether they are $5,000 or $10,000—are all covered.

It is almost the same if you have an income of less than 135 percent of poverty. That would be for individuals with $13,000 and a couple with $17,600 of income. If they have less, they have the same thing, except their copay is $2 and $5. There is no donut hole, no catastrophic, no limitation. They don't have to pay premiums, no $35 a month in premiums. They have a great benefit. They should be celebrating.

I am surprised to hear some of our colleagues on the other side say they can't support this bill because it is not a very good deal. If they are so-called champions of the poor, this is the most generous federalization of a government benefit in U.S. history. Maybe they are ignoring the low-income subsidies. It is not insignificant—$192 billion according to CBO. I think it is so much more than that. I think when people find out their only copay is $1 or $3 or even $2 and $5, utilization will skyrocket. This chart will be so inaccurate.

We will find out if we have underestimated the impact of providing a federal benefit upwards of a 90 percent subsidy. In a few years we will find out. People who don't have to pay much—in other words, if the Government is paying 90-some-odd percent of it, 95 or 97 percent, which would be the case in many of these income categories, utilization will skyrocket. At least that is my opinion. Maybe I am wrong. We will find out. I am making this statement for the record because I think this benefit is going to cost a lot more than people estimate. I think utilization will skyrocket.

For individuals who have incomes less than $14,500, or as a couple, $19,500, between that 135 percent and 150 percent of poverty, their copay is 15 percent. The Government is going to pay 85 percent. Again—no donut hole. They will have a reduced sliding scale premium and a reduced deductible of $50. This too is an enormous benefit that will skyrocket.

People who have incomes above 150 percent of poverty, they have a copay of 25 percent. Then you are getting into the area where it is not quite as good as what they had in the private sector. So my point is, for low income, for that 36 percent of Medicare seniors, for about 14 million seniors, this is one great package. My guess is, it will explode in cost.

Another reason I think it will explode in cost is because a lot of our colleagues will say whatever we pass, that is just the beginning. I think Senator KENNEDY alluded to that when this passed the Senate: This is a beginning and he wants to expand upon it. I believe that is what AARP says: We will take this and expand upon it.

How do you expand upon it? Well, let's just fill the donut hole. In other words, the basic benefit after you get past the low-income subsidies, the basic again goes up to $2,250. Then above that amount you have to basically self-insure or in other words you pay the next couple of thousand dollars on your own before the Federal Government catastrophic kicks in.

A lot of people would say: Let's just fill that donut hole up. We don't have that donut hole in the private sector, we should not have it in this. If you fill that up, in other words, if Government expands its liability, the cost of this program goes up by the hundreds of billions of dollars—hundreds of billions of dollars. In fact, one does not have to predict that this will happen, it actually already did. The Conference Committee negotiated an initial benefit level of $2,200. This was an agreement. Tuesday night, armed with a CBO score that was under $400 billion the negotiators closed the donut by $50. This cost $4 billion. I have no doubt in my mind that once this passes, future Congresses will be working to fill that donut hole, and my guess is they will be successful. My guess is they will be successful in increasing the number of people eligible for these enormous low-income subsidies. It doesn't have to be 150 percent. As a matter of fact, the Senate bill passed at 160 percent of poverty. So I am sure there will be amendments year by year to increase that level up for the super government benefit. Let's make that eligible up to $30,000 or $40,000 so that will be happening.

I also think areas in which there are significant savings in the bill—and I was involved in this—the reach-back, where we try to recapture a portion of the savings going to States we will see slowly undone. My guess after this becomes law, States will be lobbying us extensively: You are taking too much back. We want that reduced. In fact the reach-back provision was reduced just this past week at a cost to the taxpayers of $4 billion.

I am afraid in many cases States will continue to be successful. So that cost will explode. As a matter of fact, I will make a prediction. Within a few years, the donut hole will be eliminated, the reach-back by States will be reduced dramatically, and the expansion of low-income definition will be enlarged tremendously, so the cost of this bill will more than double, more than double. That is just my guesstimate. I may not be in the Senate when that happens, but my guess is it will happen.

What is my other complaint about the bill? Its explosive nature in cost. I knew it would cost a lot. I knew it would explode. One of the things I really wanted to do was come up with some reforms that would help make this program more sustainable, more affordable for the future.

Presently, we have a system that is bifurcated. We have Medicare hospitalization. That is called Part A. It has Part B for doctors. It will now have a new part D for prescription drugs. The benefits are not integrated.

A lot of people also buy Medigap. Under present law they buy A and B and they buy Medigap. So it is not a very good integrated system, unlike the private sector. The private sector offers the benefits that I said that Medicare lacks. I wanted to have an integrated private-sector alternative to the present Medicare system, one that people could look at and say: Wait a minute, this works better. I think I would rather be in the everyday private sector type system, the same one Federal employees have, the same one private sector employees have.

They have better plans. They have a better package. It is more modern. It is not tied to a government-controlled fee-for-service system that does not work. Do you want the private sector to become a 1965 Medicare fee for service model? This bill is spending billions and billions of dollars to make adjustments for doctors and hospitals and providers because government is underfunding them? That is not the private market and we should not tie them to Medicare's price controls.

Senator GRASSLEY has been a champion for increasing assistance to rural areas, and he is exactly right. The present system hasn't worked very well. I wanted to come up with a more modern system with integrated benefits that integrates Part A, Part B, and Part D—hospitals, doctors, and prescription drugs—and avoid the necessity of a Medigap plan. People had to have Medigap because Medicare alone didn't pay for a lot of benefits, and it had too high of a deductible. People had to buy Medigap. They shouldn't have to do that. I was hoping we could come up with a good, reasonable integrated system. I am afraid that maybe we haven't quite attained that. I am afraid our reforms are really not adequate for the explosiveness of the benefits we are looking at today.

Let me touch on the integrated benefit. I have heard some people say this is a ripoff because we are giving money to insurance companies; that it should be done by the Government. I have already mentioned that Government doesn't do a very good job in providing the benefits today. Now we are trying to have the private sector come in after Part D, the private sector for a prescription drug package. Nobody in the real market right now offers to Medicare beneficiaries or for that matter anyone a stand-alone drug benefit. We hope and pray they will in the future. But if they do, they will have to basically offer exactly what we told them to offer, and that is the benefit structure of 75–25 up to $2,250. We are limiting the private sector to only offering a government-designed benefit.

There is this big donut hole in the government standard benefit and we have a governmental catastrophic, some call it Government reinsurance—which ties the hands of the private sector and denies seniors the best the private sector has to offer. For example, After you spend $3,600 of your own money, then Government reinsurance will kick in, and individual beneficiary will be liable for 5 percent. The Government is responsible for 80 percent of all costs above the $3,600 ''true out of pocket'', the health plan is covering 15

percent and the individual 5%. The private sector is not able to assume full risk and offer the benefits they want. If the private health plans did offer increased benefits they would lose or delay government subsidies. This is crazy. All they are able to offer is basically the basic benefit up to the $2,250, or the actuarial equivalent, but they are not able to offer both. They are not able to say they will take all of Part D—that they will assume all of Part D and combine it with Part A and Part B and use efficiencies between the system having an integrated benefit and maybe doing something better in hospitalization and doctors, have some savings and offer a more generous drug benefit. They are not able to do that because under this bill, they are required to maintain this true out-of-pocket cost. This bill puts the private plans in straight jacket.

I think that is very unfortunate. It really kind of locks in an inflexible structure. We are telling the private sector, which have extensive experience in offering comprehensive benefits for all types of individuals including public and private sector employee and individuals, that they have to sell a government benefit. They can not offer a plan with prescription drugs for our seniors without having a donut hole. We are mandating that they have that before they can get into catastrophic. I find that to be very unfortunate and very shortsighted and maybe even unworkable. It doesn't really transcend the movement to private sector. It doesn't trust the private sector. By doing that, I am afraid we have put in a rigidity that won't allow it to work as we would like for it to.

We did not get cost containment. We tried. Maybe I should say we have minor cost containment. We did put in a provision that says if general revenue contributions exceed 45 percent, the President shall come up with a plan to fix it, and Congress has some procedures. Nothing mandates Congress do it. We tell the President he should. That is years away. I find that to be a little hollow. I wanted real cost containment. It was opposed by many—particularly on the Democrat side—and we weren't successful in getting that in. That is unfortunate.

There are several provisions in this bill that are good. I want to compliment again Senator GRASSLEY and Chairman THOMAS. We did get health savings accounts. It is not directly related to Medicare, but I think it would help reform health care as we know it. People would actually be spending their own money. I think that is a very positive and a good significant change, and it will change people's behavior. That is about $6 billion or $7 billion. That is very positive. I compliment Senator GRASSLEY and Chairman THOMAS especially for putting that in.

We did put in income-relating Part B premiums. Senator FEINSTEIN and I worked on that amendment on the Senate floor. We included a lot of that in the bill, not exactly as we put it in the bill on the Senate floor, but I think that is a positive change. But to my regret, it puts more money in the bill, and basically we spent that money.

We did get income-related Part B. Basically, that means we are going to have less subsidies for higher income people. Part B has always been paid for. When it was created, it was 50 percent for individuals. Over the years that has been declining. Now the individual only pays 25 percent, and the Federal Government pays 75 percent.

What we said is if you have income above $80,000 up to $100,000, eventually you have to pay 35 percent. If you have individual income above $100,000, eventually you have to go up to 50 percent where it used to be. If you have incomes much higher than that, you will have to pay 65 percent, or you will have to pay 80 percent. Even very wealthy people will still get a 20-percent subsidy under this provision. I think that is good reform.

We also index Part B deductibles. It has been $100 for a long time. Now we index that to the cost of the program. Those are good changes. They will help improve it. Unfortunately, the savings to the taxpayers as a result of these changes have already been spent in this bill. As a matter of fact, in the 2 or 3 days of negotiations, we amended the benefits and the subsidies in the bill by about $40 billion. Most of the good done by the income-relating of the Part B premiums and the indexing of the deductible were undone.

I have no doubt that in future Congresses that the current 75 percent up to that $2,250 subsidy will be changed and the $2,250 is going to be climbing up. I have no doubt that people will say we need the most generous subsidies and low-income subsidies which needs to apply to a lot of other people. It will increase spending dramatically.

My point is, Yes. We made some reforms, but this program may not be affordable or sustainable. Right now, it is estimated to cost $400 billion over the next 10 years. The program doesn't even start for a couple of years; that is, over the next 8 years. The Congressional Budget Office directive said that in the next 10 years they thought this program might cost up to $1.5 trillion to $1.7 trillion. That is with the benefits structure as we have outlined it today. As it expands, it will be much more than $1.7 trillion. When the donut hole is filled—and I predict it will be—when you have the number of eligibles increase dramatically to receive the low-income subsidies, when we reduce the reach-back or claw-back from States, this $1.7 billion in the next decade will probably be much more than that.

That brings me to my final comment. Can we sustain it? I am not sure. It looks to me like we are building a brand new deck on a house with a very unstable foundation. I think we are expanding this program like it is on a solid foundation, and it is not. We are not paying for these new benefits. We are saddling our future generations with enormous liability.

I conclude by saying I have the greatest respect for the chairman of the committee. I have the greatest respect for the majority leader. I want them to be successful. I want the President to be successful, and I want senior citizens to have prescription drugs. I want them to have a modern Medicare system. This bill takes some steps in those directions, but my conclusion is that the benefits greatly exceed the reforms. Without necessary reform, I am not sure this program will be sustainable in the future. So it is my intention not to support this bill.

Also, I want to compliment some people who have worked very energetically on this bill. One is my staff, Stacey Hughes, who has just worked unbelievable hours; on Senator GRASSLEY's staff, Linda Fishman and Mark Hayes, and the Senate legislative counsel. There are a lot of people who have put in more hours than you can imagine to put forth this bill. I compliment them for their efforts. They worked in a very positive way. It is a pleasure to work with them and to work with the chairman.

I yield the floor.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute five seconds.

Mr. NICKLES. I yield that time to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, I certainly think the cooperation we have had from the chairman of the Budget Committee, Senator NICKLES, helped to move this bill along. Even though he has not liked some parts of the bill, he has been cooperative all the way through the process and, more importantly, through the crucial time of conference.

There is a claim that pharmacies are concerned about beneficiary access to pharmacies, pricing transparency issues, and insurance risk.

I understand the concerns of pharmacists with regard to local access. This bill provides several provisions to ensure that Medicare beneficiaries are provided with adequate choice and easy accessibility to local pharmacies.

First, the conference report provides choice to beneficiaries by containing an ''any willing provider'' provision. This provision requires prescription drug plans to accept any and all pharmacies willing to agree to the terms and conditions of the plan. By adding this provision, we have given all pharmacies, big and small, the chance to

participate in the modernization of Medicare.

Second, the conference report provides beneficiaries with convenient access to pharmacies by adopting the TRICARE standard for prescription drug plans. In urban areas, 90 percent of beneficiaries would have a pharmacy within two miles of their residence; 90 percent of beneficiaries in suburban areas would have access to a pharmacy within five miles of their home; In rural areas, plans would be required to provide 70 percent of beneficiaries with a pharmacy 15 miles within their residence.

By adopting this standard, beneficiaries are ensured adequate convenient access to pharmacies of their choice.

The conference report also requires that plans permit beneficiaries the ability to fill their prescriptions at a community pharmacy rather than through the mail. Again, ensuring access to local pharmacies.

In addition to providing convenient, local access to pharmacies, the conference report provides safeguards to ensure fair drug pricing and protects pharmacies from insurance risk.

Under the report, pharmacy benefit manager's, PBMs, would be required to disclose all discounts, rebates, and charge backs given to them by drug manufacturers. This places local pharmacies on a fair playing field with PBMs.

The report also prevents insurance risk to pharmacies by clarifying that pharmacies could not accept insurance risk.

This conference report adequately addresses the concerns of pharmacies and pharmacists alike. It makes sure that beneficiaries have local and convenient access to pharmacies, provides transparency pricing, and protects pharmacies from insurance risk.

REVISIONS TO H. CON. RES. 95

Mr. NICKLES. Mr. President, section 401 of H. Con. Res. 95, the budget resolution, permits the chairman of the Senate Budget Committee to make adjustments to the allocation of budget authority and outlays to the Senate Committee on Finance, provided certain conditions are met pursuant to section 401.

I hereby submit the following revisions to H. Con. Res. 95, and I ask unanimous consent to have it printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

	($ in millions)
Current Allocation to Senate Finance Committee:	
FY 2004 Budget Authority	771,171
FY 2004 Outlays	773,820
FY 2004–2008 Budget Authority	4,618,622
FY 2004–2008 Outlays	4,627,988
FY 2004–2013 Budget Authority	10,991,722
FY 2004–2013 Outlays	11,007,116
Adjustments:	
FY 2004 Budget Authority	4,800
FY 2004 Outlays	3,800
FY 2004–2008 Budget Authority	11,725
FY 2004–2008 Outlays	11,576
FY 2004–2013 Budget Authority	−5,000
FY 2004–2013 Outlays	−5,200
Revised Allocation to Senate Finance Committee:	
FY 2004 Budget Authority	775,971
FY 2004 Outlays	777,620
FY 2004–2008 Budget Authority	4,630,347
FY 2004–2008 Outlays	4,639,564
FY 2004–2013 Budget Authority	10,986,722
FY 2004–2013 Outlays	11,001,916

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Parliamentary inquiry. This, of course, has nothing to do with the legislation. It is my understanding the action of the distinguished chairman of the Budget Committee would not be in derogation of the consent order before the Senate for debate today.

The PRESIDING OFFICER. The Chair's understanding is that changes in the allocation being submitted by the Senator are just being printed in the RECORD.

The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, I believe we ought to reject this Medicare bill. When I look at it carefully—which has been hard because there has not been a lot of time—it is clear it is a cruel hoax for seniors and a cynical giveaway to drug companies and to the insurance industry. Even as we speak, there are lobbyists scurrying around Capitol Hill working feverishly to pass a bill that has already driven up the stock of those corporations I have mentioned, the insurance industry and drug companies across the country. The rise in that stock tells the story about the windfall profits that come with this bill.

With the help of President Bush, they produced a Medicare bill that lines the pockets of the powerful moneyed interests and it leaves America's seniors out in the cold. This bill is less about prescription drug benefits and more about a prescription to benefit large drug companies. America's seniors deserve better.

As I have traveled around the country and heard from countless numbers of seniors about their health care needs, they repeat again and again how they need and they want more affordable prescription drugs. ''More affordable'' are key words when measured against this bill. They need and want a quality Medicare plan—I emphasize Medicare plan—that lets seniors choose their own doctors, their own hospitals, and provides prescription drug coverage.

I have met seniors across the country who have cut their medication, they have cut the dosage in half, because they cannot afford their prescription drugs. I met a woman the other day who could not even afford to start her prescription drugs because the initial bill was $100 and she did not have the cash. I met people in small businesses who have seen their health care premiums more than double because drug prices are rising so fast. And I met seniors in New Hampshire and elsewhere who have no idea how they are going to possibly pay their rent and cover the prescription drugs they need.

When we break past the advertising bought and paid for by the special interests to sell this bill as something it is not, we will notice that America's seniors are outraged by what they have seen already about this legislation. I was at a forum the other day sponsored by AARP, and when it was mentioned what was happening in the bill, seniors booed their own leadership in the AARP. It is no wonder AARP members are tearing up or burning their cards.

For Senators who are planning to vote for this bill, I ask a very straightforward question: How are you going to explain to seniors that Congress stuck them with a Medicare plan that forces those seniors into HMOs? How are you going to explain to seniors that this plan will stick them with a raw deal that raises premiums for those who do not want to go into an HMO by $56 to $200 a month? What do you say to the 2 or 3 million seniors who are actually going to lose quality retiree prescription drug coverage under this bill and they are going to get something much worse?

We have to, in future years, add a real prescription drug benefit to Medicare in order to make seniors' lives better. By now accepting a phony drug benefit, Congress literally risks making it worse for those seniors.

How do you explain to seniors that Congress was not willing to let them buy cheaper prescription drugs from Canada, but Congress was willing to hand the pharmaceutical companies new windfall profits of more than $139 billion?

How are you going to explain this bill could only be passed in the House under the cloak of darkness in the early morning hours, and only then by stretching the rules of the House beyond almost anything in history? And that the Senate then jammed through a 700-page bill with only 3 days of debate, giving seniors very little chance to understand what is involved in the biggest and most dangerous change ever made to Medicare?

I ask those Senators who are planning to support this bill why they

think it is worthy to hold a prescription drug benefit hostage to a backdoor deal to privatize Medicare, a deal that will help lobbyists, help powerful Washington interests and other interests around the country and help pharmaceutical companies but will literally make the lives of a lot of our seniors worse off than they are today?

Seniors need relief from inflated prescription drug prices, and they need it now. Nearly 40 percent of Medicare beneficiaries report having no prescription drug coverage. Yet the average amount they have to pay out of their own pocket for prescription drugs is going to more than double between the years 2000 and 2006. It is on track to be $1,400 the year this bill is scheduled to go into effect. If you deduct the amount of money given by this bill from the amount seniors will be paying on average out of pocket, the benefit to most seniors in this country for being pushed into an HMO will not be worth the cost.

Congress ought to be demanding more. We ought to be demanding a real deal for seniors, a Medicare bill that does what it says instead of this phony bait-and-switch legislation. We ought to go back to the drawing board and pass a real Medicare prescription drug benefit. This bill does more harm than it does good. Seniors are not guaranteed that the price of their plan is not going to skyrocket. This bill prohibits the Government from even negotiating discounts for Medicare prescription drugs. It prohibits the Government from doing that. It denies the opportunity for seniors to import reasonable drugs from Canada and other industrialized countries. How extraordinary that the acolytes of free trade are closing down the ability of Americans to exercise free trade and import a product from another country at a lower price.

This bill is really about President Bush passing the buck on prescription drug coverage and passing the bucks from seniors to the pharmaceutical industry. And this bill is being pushed through Congress without adequate debate and exposure to the public light, with too many backroom deals, and with blatant contempt for the public interest.

The Republicans could not win a legitimate victory in the House, so they held the vote open for an unprecedented 3 hours of special interest lobbying, of almost $900 million of giveaways in exchange for votes, so they could get enough people to switch over to their side.

President Bush twisted arms, twisted facts, until he finally managed to get the vote. Time and again, the President chooses to get cozy with the lobbyists. We saw it on the Energy bill. We have read it in the newspapers in the last weeks about who gained and who lost on any particular debate each day in the debate over this bill. This administration's motto ought to be: Leave no special interest behind. This Medicare bill lays that record bare for all Americans to see.

The President goes around the country at a furious pace, fundraising at record levels. He has a group of insiders who provide his campaign with a minimum of $100,000 of campaign cash. They have a name. They are called "rangers" and "pioneers." Well, it should come as no surprise to Americans, and particularly to seniors, that 24 "rangers" and "pioneers" are executives or lobbyists for the very companies that will benefit from this Medicare bill, and they are getting a good return on their money.

This bill makes it easier for the big drug companies to gouge seniors and jack up health care costs so that top executives can walk away with millions. I am all for people who work hard to make a living, and I want people to be able to get rich in America. But when the drug companies' CEOs are making $40 million a year while the seniors they sell to are choosing between their medicine and their mortgage, I do not consider that just plain old free enterprise; I consider that plain old greed.

This bill smoothes the way for even higher drug company profits. In the past 6 months, drug companies, HMOs, and other powerful industries have spent $139 million in lobbying Congress to give them what they want. Now they have gotten a bill that will give them an estimated $139 billion over the next 8 years. A thousandfold return on an investment is not bad. You can say what you want about President Bush, but it is clear that his powerful campaign contributors got what they paid for. And it is easy to see why they make so much profit, given this bill, which does nothing to control the rising prices of prescription drugs, nothing to control the rising prices.

Without an effective means to restrain double-digit price increases, this bill does nothing to protect seniors from ever-growing out-of-pocket costs. Someone needs to explain why we are in such a rush to do this. Is someone concerned that the more this cynical bill is exposed, the less likely seniors will be to accept it? What harm would be done if the Nation took some time to look carefully at what is in this bill?

This plan does not kick in until 2006 anyway. So it is not as if seniors are going to get the relief they deserve at the stroke of a Presidential signing ceremony—no indeed. For the next 2 years, seniors are going to get a discount drug card to give them a 15-percent discount. Well, it does not take an act of Congress to do that. Ask any senior today, and he or she will show you about three or five cards they already carry in their wallets to get a discount on drugs.

Seniors deserve and expect more than a discount card with $400 billion on the table. If we were really crafting a drug benefit and allowing the Government to institute cost-saving measures in order to tame out-of-control prices, we could deliver a benefit sooner than 2006. The Government ought to be ready to do this within a matter of months.

The entire Medicare plan was set up in 11 months. Now that it is already set up, in the age of computers, are we saying we could not deliver a prescription drug benefit in a matter of months?

Why are we waiting until 2006? I will tell you why. It is for the private, for-profit companies that need to lure people into the market. And it is going to take them time to warm up to the plan. We are waiting for 2006 for those companies.

This bill sets aside a $12 billion slush fund for the Secretary of Health and Human Services to entice private HMO-style plans to come into the market in order to offer prescription drug plans to seniors. Larded up financial inducements are needed to attract these plans to the market because the risk is so high.

Insuring seniors for drugs usually makes about as much sense as trying to sell a homeowner's policy to someone whose house is burning down. In other words, you are going to lose money. But in the name of "private competition," and to prevent the Federal Government from running this program, this is what they came up with: a great big cookie jar from which to dole out public dollars to private companies to get them to do what we could do less expensively and at less cost to seniors.

On top of giving them extra payments to participate, the bill does nothing to require that private plans actually operate efficiently. The Medicare Program, in its entirety, now spends only 2 percent of total expenditures on administration. By contrast, many health plans in the private market often commit as much as 15 to 20 percent of their expenditures to administration. So every dollar that goes to administrative costs is a dollar not available to improve benefits for Medicare beneficiaries.

I think smart stewards of taxpayer dollars ought to demand that private plans be more efficient if they want to participate. Instead, they are being rewarded from the slush fund and given advantages that only their lobbying influence could get written into law.

In addition, this bill squanders another $6 billion on tax breaks for wealthy Americans that is going to harm Medicare. The legislation would create a tax-free, high-deductible catastrophic health policy known as health savings accounts. That account will undermine the traditional Medicare Program because it will result in cherry-picking. The healthiest and the

wealthiest seniors will come out of the risk pool where they share the risk of coverage, and that will result in raising the premiums for everyone else—for the poorer and the sicker—and it will raise those premiums by as much as 60 percent.

The so-called cost containment provisions in the bill add insult to injury by essentially placing a cap on Medicare spending. This bill would attempt to force future Congresses to reconcile Medicare spending growth by cutting benefits, raising premiums, or increasing the payroll tax. I believe that is unacceptable.

So what do America's seniors get from this bill?

More than 2 million seniors who have good drug coverage now, through retiree health plans, are going to lose it. About 6½ million low-income seniors—the very people we need to help the most—could get less drug coverage than they have now. That is a raw deal for seniors.

Under this bill, 7 million seniors will be given this choice: Pay more for Medicare and get forced into an HMO, give up on choosing your own doctor and hospital, or watch your bills skyrocket. That is the choice for seniors.

The name of this provision in the bill is called premium support, but like Clear Skies, which means dirtier air, or Healthy Forests, which means cutting down the trees, it is an innocent-sounding name for a plan that could raise Medicare premiums from about $60 to thousands of dollars. It breaks the compact of Medicare.

In fact, what it really means is the beginning of the end of Medicare as we know it. Those are not my words, those are the proud boasts of the author of this bill, House Ways and Means chairman, BILL THOMAS. He said:

> To those who say that it would end Medicare as we know it, our answer is, we certainly hope so.

It is not surprising that Newt Gingrich is supporting this deal because he long wanted Medicare to ''wither on the vine.'' Most Americans and most Democrats have a different hope, that Medicare remain secure and strong. I intend to fight with everything I have to make that happen.

We need a real-world, affordable Medicare prescription drug benefit for seniors, a plan that won't force seniors into an HMO, that won't undermine the coverage for seniors who are already getting help today, that will be run by Medicare instead of an insurance company in search of a buck, and that will send a real benefit to every senior, no matter whether the costs are average or high. That is a real deal for America's seniors. But as I said before, right now this bill is a bad deal for seniors and they know it.

They know that this bill provides the skimpiest of benefits, with holes in coverage and complex rules. The coverage gaps remain too high, and seniors are still charged premiums even after their benefits shut down in the so-called donut hole. I think we ought to go back to the drawing board. They know this bill does not adequately protect them with a guaranteed government fallback with a national premium. Until this bill stops slanting all the advantages toward the HMOs and private companies, I believe we have to vote it down.

I believe seniors deserve a guaranteed Government fallback plan. Seniors know that this bill will jack up the out-of-pocket costs in order to visit doctors and hospitals. This is supposed to be a bill to add a prescription drug benefit, but along the way beneficiaries got stuck holding the bill for an additional $25 billion in increased out-of-pocket costs from means testing the Part B premium and increasing the deductible and indexing it to inflation.

This revenue raiser isn't done in order to improve Medicare but to give sweet deals, slush funds, and tax accounts to corporations and to the rich. It is wrong. We should vote it down.

I believe the proponents know that this bill fails to fix protections for low-income seniors—certainly low-income seniors know that across the country—and people with disabilities that currently rely on both Medicare and Medicaid for their coverage and should be defeated. They know it and you know it. This is not a good deal for seniors.

This week in November of 1945, Harry Truman sent to Congress a proposal for health care for Americans. He said:

> Millions of our citizens do not now have a full measure of opportunity to achieve and to enjoy good health. And the time has now arrived for action to help them attain that opportunity and to help them get that protection.

But powerful interests mobilized 1945 on Capitol Hill and defeated health care for Americans, Harry Truman's proposal, and especially for our seniors.

It was almost 20 years later that a young American President took up Harry Truman's cause and called for health care for America's seniors. This week in November of 1963, the House of Representatives was considering John Kennedy's Medicare proposal. The same powerful interests were swarming through this building, but there was a spirit of hope and possibility. Now those who support this bill are breaking the promise of Truman and Kennedy that was fulfilled under President Lyndon Johnson.

This has been tried before. This week in November of 1995, 30 years after Medicare became law, Speaker Newt Gingrich and his ideological allies shut our Government down for the first time ever in order to achieve their radical objective of tearing down Medicare. Millions of seniors would have been harmed by those cuts, but we stood up and we stopped Newt Gingrich because President Bill Clinton and others stood their ground and defended Medicare.

I believe we need to stand our ground today and stand on principle again. This bill will hurt seniors more than it will help them. We should pass a bill that offers a real prescription drug benefit under Medicare. We need to rebuild Medicare, not sell it out to the highest bidders. Medicare is one of the best Federal programs we have. I don't believe it is time to shred it. It is time to strengthen it. This Congress and President Bush will be held accountable by America's seniors and American history for the decision we make now. I believe we ought to give seniors a real deal, a prescription drug benefit under Medicare that works for them, and not a phony prescription drug benefit that provides benefits only for the most powerful special interests that stand in their way.

I yield the floor.

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair recognizes the Senator from Missouri.

Mr. TALENT. Mr. President, I appreciate the opportunity to speak about this landmark piece of legislation that is so necessary and has been so necessary for too long and of which we have deprived America's seniors for too long. If I may say with great respect, I had a chance to listen to the last two speakers, my friend from Oklahoma and my friend from Massachusetts. Listening to those speakers just summed up for me why we have not passed this bill in the years and years it has been necessary and that seniors have been demanding it. The last two speakers represented pretty well and eloquently, with their usual vigor, the opposite ends of the political spectrum on this bill.

For the first speaker, the bill represented too much government, too much money. For the second speaker, it represented too little government, too little money. Both speakers are terribly disappointed with President Bush. Both want more time to consider this bill and, if necessary, go back to the drawing board; if necessary, wait years more before we provide a prescription drug benefit that millions of seniors around the country need and have needed for many years.

I rise to speak in favor of the bipartisan Medicare conference agreement. I think it is necessary. Medicare is a great program. My dad passed away last October. He was 91 years old. My mom had passed away about 15 years before then in her early seventies. They both used Medicare and stayed alive as long as they did and as healthy and as happy as long as they did in part because of Medicare. It has covered tens and tens of millions of seniors, not only with good medical care but with the security of knowing that they had medical care if they got sick.

Medicare was a great program and is a great program in 1965 terms. That is when it was developed. It covers the kinds of things that good health care covered in 1965, and it doesn't cover the kinds of things that were not covered in 1965. It doesn't have very many preventive health care benefits, catastrophic coverage for long-term acute illnesses. And it does not have coverage for outpatient prescription drugs because in 1965 you didn't use prescription drugs very often, unless you had an infection or some kind of pain killer. Now they are a part of almost every ongoing medical care treatment plan. Everybody who has health insurance—and not enough do—just about everybody who does has some kind of prescription drug coverage because it helps keep you healthy.

In providing insurance to somebody, you want them to stay healthy because if they get sick, it ends up costing more money for everybody. That is the reason we haven't had this coverage in Medicare, and it has hurt people.

There was a parade I used to be in every year when I was in the House. I like parades. You get a lot of exercise, and they are fun. It is in Hazelwood, MO. I would go down the same street. I always walk parades. I remember running up this driveway and these two seniors would be sitting at the top of their driveway watching the parade every year. Every year I would stop there for 60 seconds, and they would ask me when we were going to cover prescription drugs in Medicare.

I would say: Well, we haven't done it yet.

And they would say: We know that.

Then the issue finally moved on the front burner here at the end of late 1990s and the House began passing bills, 3 or 4 years in a row. We never passed one until this year here. The sentiments we have heard today—I respect so much the Senators who uttered them—are the reasons why.

I just do not want to wait until we get a bill that satisfies every extreme in politics and the political exigencies for everybody because we will wait forever. We will never get a bill then. I would rather go ahead with this bill, which is a good bill, and take what is good about it and then see what is working and what isn't working and then go back and fix it.

That is the reason the AARP supports this. They are tired of waiting, too. I had a hearing on this. I have the honor of sitting on the Special Committee on Aging, a great committee, with a great chairman, Senator LARRY CRAIG. The hearing was in St. Louis. One of the witnesses was Audrey Vallely, a delightful lady, who attended the Route 66 Senior Center in Eureka, MO, regularly. I have been out there for lunch a couple of times. She testified about her experiences over the last 12 years. Audrey suffers from osteoarthritis, a degenerative bone disease, and she also has a sinus disease. She ought to be taking two different types of prescription drugs for these conditions, but it costs $100 a month for 15 pills. So she often cannot take the drugs. She gets some pain relief over-the-counter pills; sometimes it makes her feel better and sometimes it doesn't. She does the best she can. She has to choose between paying for those drugs or paying her rent. Having an air conditioner working in the summer is hard for her. All of these statements about the problems in this bill mean nothing to Audrey, who struggles month after month because of this gap in Medicare.

What would the bipartisan agreement mean for Missouri? We have over 888,000 beneficiaries in Missouri. They all have the opportunity to get a discount card—a 15- to 25-percent discount immediately. Better than that, low-income seniors get, in addition to that, $600 a month in annual assistance to help them afford their medicines, along with discount cards. That is a total of over $200 million in assistance for over 170,000 Missouri residents over the next 2 years, if we pass this bill—not otherwise.

Beginning in 2006, every Missouri senior in Missouri would be eligible for coverage in this bill for approximately $35 a month. They get at least 50 percent off—or approximately 50 percent off their prescription drug costs. Of the approximately 270,000 beneficiaries in Missouri who have limited savings and low income, they will qualify for even more generous coverage. Additionally, the Government will help the State pick up the cost of the Medicaid-eligible seniors. That will help Missouri, which is in a cash-strapped situation with regard to its budget.

This bill meets the conditions that I thought was important for a Medicare prescription drug bill. It has an immediate benefit, reasonable monthly premiums, strong catastrophic coverage, targeted help for low-income seniors, quality benefits for rural areas, protections for local pharmacies, choice and access to all medicine, and participation in it is voluntary. If you like what you have, you don't have to participate.

That is the reason I am supporting this. I will be pleased to vote for it on final passage. I hope a majority of the Senate does. I hope we are allowed to vote. You never know these days. This is the most important Medicare bill in a generation and maybe we will be able to vote on it and maybe we will not. I know most of the people want to have an opportunity to vote on this bill. I think most will vote for it if they get that opportunity.

I am going to close by saying what I have said on the fairly rare occasions when I have spoken on this issue on the Senate floor. In this body, everything always gets said but not everybody says it. Once in a while, I feel maybe I should deprive the Senate of my comments on something in the service of expedition. But I have said, look, if the bill is reasonable, I am going to move ahead with it. I am tired of waiting. I would like to help these people, such as the folks I saw in that parade, and like Audrey Valley, and others, get access to prescription drugs. I think most of the people who have worked on this on both sides have done their best. As far as I can tell, they are not motivated by all the lobbyists or the special interests. I have been in a lot of meetings on this, and that hasn't come up once. They are trying to do the best they can for seniors, in a way that will work and be affordable for everybody. That is what this bill does. I am going to vote for it on that basis. I hope it passes.

I congratulate the chairman, who is presiding now, for his fine work.

How much time remains?

The PRESIDING OFFICER. There are 21 minutes remaining.

Mr. TALENT. I am pleased to yield that time to my friend from Colorado.

The PRESIDING OFFICER. The Senator from Colorado is recognized for 21 minutes.

Mr. ALLARD. Mr. President, I thank the Senator for yielding the balance of his time.

Mr. President, first I want to compliment Majority Leader BILL FRIST, from Tennessee; Chairman of the Finance Committee, CHUCK GRASSLEY; and the Conference Committee on working diligently and in good faith toward a workable prescription drug program for elderly citizens. Some have come to this floor and proclaimed it is about politics. I couldn't disagree more. President George Bush, Majority Leader BILL FRIST, and Chairman GRASSLEY have not only talked about the need for a prescription drug program but have worked hard for several years toward a workable program.

It is the Democrats who have demagoged this issue. We just have to look at last year when the prescription bill was brought to the floor by the Democrat majority leader, without having it debated and reported out of committee. I believe that it was their hope that they could embarrass Republicans in an election year. Instead, it only helped point to the failures of a Democrat-led Senate that couldn't even pass a budget because they did not want to deal with the tough votes they would have to face on this floor.

I believe this Republican-led Senate is wrapping up one of the most successful sessions since 1994. There have been long hours and a lot of hard work that has paid off, despite filibusters on judges and attempts to slow down and kill many provisions, such as the budget. But Republicans passed a budget. Republicans are still working hard to pass an energy bill that was blocked

through the efforts of key Democrats, and the Republicans are now working hard to pass a description drug benefit that is facing a possible filibuster on the Senate floor by the Democrats.

Mr. President, I am very disappointed that we have had to face all this obstruction on the floor, despite the concerted effort to work responsibly and respectively through the Senate committee system, then bringing the prescription drug bill to the floor and passing it. Now, here we are again, facing a threatened filibuster by the Democrats. Mr. President, we need to have an up or down vote on this conference report. Again, I know that the conferees worked hard in a bipartisan way.

I plan on voting for cloture because I want to see the conference report on Medicare voted on the floor of the Senate. I have stated that I am undecided on final passage. That is because, as a general rule, in the process of negotiations, legislation doesn't get less expensive, it gets more expensive through spending to attract more support and votes. I hope to act as a counterbalance with the clear message that, if spending gets out of hand, I will not vote for the bill.

I am not happy with creating a new program that could lead to a monstrous program in the future. That is why I opposed the bill as it left the Senate, because it was not limited to just the most needy and I felt it broke the budget. It was later proved that I was right in the assessment that it would break the budget, and with more accurate budget figures the conference committee set to work to reduce the scope of the program to keep it below $400 billion for 10 years and within the parameters of the budget. This, in effect, forced the conference committee to means test the program and keep certain provisions that would hold the user accountable by forcing that patient to participate with a deductible and the so called ''donut hole.''

In my view, it is very difficult to have a third party pay system and yet maintain accountability. Users feel that they have already paid for the system and are going to utilize it to its maximum to get their just return, and providers feel that it has already been paid for and creates no particular hardship on the individual so they charge with little restraint the third party. So utilization is regulated. And we end up with regulations like we have now in the current Medicare system, which prevents a patient from paying for their own medical care if they want, and it prevents the physician from receiving cash outside the system that could reduce the burden on taxpayers. It ends up creating a system where the close patient-doctor relationship is disrupted to where the patient can't use whomever they desire to care for their medical needs. So what we have today is a Medicare system that is not actuarially sound and, if not reformed, will lead to much higher payroll taxes and huge demands on the general budget. That is why I was pleased to see some reform proposals on medicare emerge from the conference committee, such as health saving accounts.

When I served in the Colorado State Senate, I sponsored, with State Representative Phil Pankey, a bill to put in place an individual medical saving account; and Colorado became the first State to have such a program.

Unfortunately, in an effort to pass the bill, we allowed the program to become so limited that the risk pool became too small to function as insurance against future liabilities. Consequently, when Colorado moved to a modified flat tax, this program became a victim of tax reform.

This Congress puts forth a health savings account that will work. Individuals can put in $5,000 a year or a family can put up to $10,000 per year and save on their taxes. The income builds up within the health savings fund without tax liability and, finally, can be pulled out to pay for the family medical needs without paying additional taxes.

This is wonderful reform because it reestablishes the doctor-patient relationship and makes individuals responsible for their own health care with much fewer regulations, and it brings common sense to the decisionmaking process. It builds upon previously enacted medical savings accounts that have been limited to small business and the self-employed by Congress.

One other attractive feature in this bill is that the elderly are not forced to participate. It is voluntary. It also tries to prevent large businesses and local governments from dumping their current prescription programs into the Federal system to save themselves future liabilities and further burden the Federal prescription drug program.

The other side has repeatedly made the claim that this bill is full of giveaways to Republican contributors. This is simply not true. That is simply more absurd ''medi-scare'' tactics by the opponents of a bipartisan drug benefit for our Nation's seniors and the disabled.

The argument I find most amusing is the claim that this bill will lead to increased drug company profits. The reason this bill is so desperately needed is because our Nation's seniors and the disabled, particularly those with low incomes, are unable to afford their prescriptions today. Let me stress that again. The reason this bill is so desperately needed is that our Nation's seniors and the disabled, particularly those with lower income, are unable—unable—to afford their prescriptions today. Today they are forced to choose between food and rent and taking their medicine. We have all heard the stories of seniors cutting their pills in half to get by and in so doing taking a lower dose than their doctor prescribed.

When this Medicare prescription drug benefit goes into effect, they will be able to get their prescriptions filled. Of course, this is going to lead to increased drug sales. Surely, this is no surprise to anyone. With new technologies and new medications, invasive procedures become less likely. Any prescription drug bill that works is going to lead to increased drug sales. That is just common sense.

Where are the medicines supposed to come from except the manufacturers of those medicines? Every single medical prescription drug bill introduced by these naysayers would also increase drug sales and the bipartisan conference report has the same basic drug benefit structure that passed the Senate by a vote of 76 to 21.

The Congressional Budget Office has concluded that the competitive approach in this bipartisan drug benefit will do better at controlling drug costs than other proposals. To suggest that no one should support a Medicare drug benefit because it will lead to increased drug sales turns logic on its head. If this were our basic principle, then we should not have food stamps because this will lead to increased profits by grocery stores and farmers. How about housing subsidies? This might lead to profits by construction companies and utility companies and increased sales of lumber, bricks, and nails. This is just an absurd issue, and it is easy to see why.

I am here to tell you that this bill will strengthen and improve the Medicare Program. The spending on this bipartisan prescription drug bill goes to better benefits for America's seniors and the disabled.

As I draw to a conclusion, unfortunately, those who want universal health care and the big Government solution to drugs, making people more vulnerable to Government control, are vehemently opposed to this conference report.

The conference report lays out a plan for Medicare reform and a way to help the most needy. It is a balance that does not come easily and not without a lot of discussion on both sides of the aisle. We should at least have a vote on the bill. It is time to put partisan obstruction aside and think about what is good for America.

I ask my colleagues to join me in voting yes on cloture to stop the filibuster and to help hold down costs to within the budget limits.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. TALENT). The Senator from Oregon.

Mr. WYDEN. Mr. President, as Congress considers Medicare and prescription drugs, I keep remembering the older people whose stories spurred me to choose a career in public service. For 7 years, before I came to the Congress, I worked with seniors and spent

many hours visiting with them in their homes. During those visits, seniors would often bring out shoeboxes full of health insurance policies that were supposed to fill the gaps in their Medicare. It was common for a senior then to have seven or eight of these policies, and many of them were not worth the paper they were written on. Slick, fast-talking insurance hucksters kept coming around and scaring the older folks, and it was heartbreaking to see seniors ripped off this way.

After working all their lives, seniors would go without each month because they were paying for junk health insurance policies with the precious funds they needed to pay the heating bill or buy some groceries.

When I got elected to the Congress, I vowed to stop this fleecing of America's seniors. I helped to write the first and only tough law to stop the ripoffs of private health insurance sold to the elderly. This statute has worked to drain the swamp of fly-by-night Medigap policies that used to rob seniors blind.

The days of the shoebox full of health insurance policies are gone, but the skyrocketing drug costs and lack of access to medicine—two of the problems that plagued seniors even back then—are more of a problem today.

During those home visits I made with seniors, I saw firsthand the pain they felt when they couldn't afford life-saving medicine. Their anguish was physical, and it was emotional. They feared for their futures. They worried that the choices that financial constraints forced on them would not be the right ones.

We are very familiar with those stories today. Caseworkers in every office in the Senate hear them constantly. A senior is supposed to take four pills, but because they can't make ends meet, they take three or two. Eventually, that senior ends up in the hospital where the hospital portion of Medicare, known as Part A, covers drug treatment, but often it is too late.

I have tried to rewrite stories such as that since I came to the Congress. That is why I worked with Senator PRYOR's father so that States could bargain aggressively and get more for their Medicaid dollar when buying prescription drugs that would help the low-income elderly. I have tried to expand coverage for generic drugs. I have worked to supplement those efforts by creating new health care options for seniors, including in-home care and increased payments for providers in low-cost areas, funds that can be used to offer prescription drug benefits to some of the elderly. Because of my history, I am acutely aware that there is so much more to do. The reason the debate on this bill is so important is that Government has the obligation to do right by a generation that deserves our respect and care and not give those seniors the runaround.

My years working with the older people have governed the decision I have made on this bill. I have tried to keep the focus on determining whether this prescription drug benefit legislation would make a genuine positive difference for a significant number of older people or whether it falls short of that objective.

As part of the process, I have developed a set of criteria to evaluate this legislation. I would like to describe the questions I believed were key and the answers I have found.

The first question I asked was: Does this bill help a significant number of older people with low incomes or big prescription drug bills? In their editorial endorsing this legislation, the New York Times stated:

> The bill is strongest when it comes to the most important target groups: Elderly people with low incomes or very high drug bills.

It is not my job to take the word of editorial writers simply because they are just one voice in a chorus that comes from both sides. So I have gone to some length to examine the figures and data from all perspectives. I looked at the data that has been available from those strongly in favor of the legislation, such as the Federal Center for Medicare and Medicaid Services. I looked at the information from those strongly opposed to the bill, such as the nonprofit Center on Budget and Policy Priorities.

The critics say the legislation has significant gaps in coverage for seniors, especially those of modest income. Proponents of the bill claim that millions of seniors will have coverage they did not have before. There does seem to be truth on both counts. So I have tried to keep the focus on figures that were beyond any doubt. Using data from the 2000 Oregon census, my staff and I have determined that 78,829 older people in Oregon had prescription costs that exceeded $5,000, and under this bill these seniors would have their prescription drug costs reduced by one-half.

Using 2001 data from the nonprofit Kaiser Family Foundation, my staff determined that Oregon has 106,765 seniors on Medicare with incomes at or below $12,123 for an individual or $16,362 for a couple.

Under this legislation, this low-income group would pay no premium for their drug coverage and would be responsible for a copay of no more than $2 for generic drugs and no more than $5 for brand name drugs. The least fortunate would pay only $1 for generics and $3 for brand name drugs.

Most seniors with low incomes and high drug costs are likely to be eligible for both Medicaid and Medicare. These older people are known as dual eligibles. This legislation assures that they receive at least some measure of prescription drug coverage through Medicare so they are not left at the mercy of perennial State budget crises and so they will not have to compete against other vulnerable groups in State budget battles.

Another factor I considered was the expectations for this legislation. What I hear from seniors at senior centers and at meal sites is that expectations are very high. I know some seniors will find that this bill does not offer benefits that match their expectations. Some seniors fear this bill is going to fence them in and require that they participate in a program they do not support. So at the very least, because this program is voluntary, it strikes me as a plus that no senior will be forced to accept the terms of this legislation.

So on this particular issue, with respect to who benefits, what we found that seniors in my State with very high drug bills would have their costs reduced by half. We found a great many low-income people who would receive very significant benefits with no premium and a very modest copay for their drugs.

The second question we asked was: How does this bill affect seniors who currently get their prescription drug coverage through corporate retiree benefit packages? Almost every day now we pick up a newspaper and read about another employer dropping their retiree benefits or cutting them back significantly. There has been a dramatic reduction in corporate retiree health benefits, and it is taking place right now before the enactment or rejection of any legislation.

The percentage of large employers offering retiree health benefits over a relatively short period of time has dropped from 66 percent to 34 percent. Consistently, the employers who keep coverage have required the retirees to shell out for higher copayments and premiums. Employers say they have to make these cuts because of the rising costs of health care and the effects of a lousy economy. Now along comes the Congress with a bill that many believe will dramatically affect retiree plans in the future.

It seems to me that with legislation offering $71 billion to employers to keep their coverage, these funds can only be a plus in developing a strategy for getting more employers to retain existing coverage. This is a subsidy the companies are not going to see absent this legislation.

So I ask the Senate: Will companies not be less likely, not more likely, to drop coverage if they get the funds offered tax free under this legislation?

I would also note that corporate retiree provisions in the conference report are better than the provisions in the original Senate bill which was approved by more than 75 members of this body.

Bernstein Research says employers spend about $1,900 per year per senior on retiree drug benefits. Based on my

calculations, this bill gives corporations a significant tax-free incentive to cover not only retiree drug benefits but other senior health care costs as well.

The next question I asked was: Does this bill significantly undermine traditional Medicare? Critics of the bill have focused on this issue, and I share their view that seniors believe in Medicare, want to modernize it, and do not want it undermined.

The critics seem to believe that any effort, however, to create more choices outside the basic Medicare fee-for-service program is a mistake. I disagree. I believe seniors need good quality choices beyond fee for service. I simply believe those choices must be accompanied by strong consumer protections and that it is essential to strike a balance, making sure that the new choices never, ever cut off access to traditional Medicare that seniors know so well and a program with which they feel so comfortable.

I have never been opposed to private sector involvement with Medicare. In many Oregon communities, upwards of 40 percent of the elderly get their Medicare through private plans. The law I wrote stopped the rip-offs of private health supplements to Medicare, standardized 10 private sector policies to help seniors fill the holes in Medicare, and consumer advocates across the country believe that law is working.

The key to making the private sector choices work is a combination of strong consumer protections and a level playing field between the private sector choices and health services offered by the Government. I have considerable ambivalence about how this legislation will affect that balance.

In the bipartisan prescription drug legislation I drafted with Senator SNOWE, we offered private sector options for seniors that contain strong consumer safeguards. Our bill was known as SPICE, the Senior Prescription Insurance Coverage Equity Act. It did not tilt the playing field toward the private sector the way the legislation before Congress does today with its health savings accounts and premium support. Unfortunately, the health savings accounts in this bill, which are tax breaks for purchasing health care, are structured to disproportionately benefit the healthy and the wealthy. Seven billion dollars of tax subsidies are directed to these accounts. This has gone from a demonstration project to a major expense, one that siphons away funds that could go to beef up the drug benefits.

Another drawback of the legislation is the premium support provisions, which are designed to test competition between traditional Medicare and private plans. These could drive seniors out of the fee-for-service programs they want. Premium support demonstrations could allow insurance companies to cherry-pick the healthy seniors, leaving the truly ill to go to poorly funded Government programs that are sicker than they are. Even though premium support doesn't start until 2010, I don't believe it has a responsible role to play in this legislation.

I don't believe this legislation is going to wipe out traditional Medicare. I do believe that Congress is going to have to be extraordinarily vigilant with respect to ensuring that traditional Medicare can coexist and prosper along with the new choices. Without careful management, it is certainly possible that health savings accounts and premium support could tilt the Medicare Program away from providing traditional fee for service for all the seniors who want it. If this legislation passes, it will be the job of the Congress to make sure that does not happen.

The next question I asked is especially important. Virtually every senior in America wants to know: What will this legislation do to keep their prescription drug bills down? In my mind, the key to effective containing of prescription costs is to make sure older people have bargaining power in the health care marketplace. Today, when a senior gets his or her prescriptions through a health plan with many members, that plan has significantly more bargaining power than that same senior would have by walking into a Walgreen's, a Safeway, or a Fred Meyer to buy medicine. Getting seniors more purchasing power by getting them into large buying groups is an absolute prerequisite for a long-term strategy for keeping prescription costs down for older people.

That was the principle behind the Medicaid drug rebate law that I helped author with the first Senator Pryor. That is the principle that Senator SNOWE and I have proposed in our bipartisan legislation. We looked to a market-based proposal that was built around the Federal Employees Health Benefits Plan, a program that has been proven to contain costs because of the sheer size of the group of Federal employees for which it bargains.

I think it is very unfortunate that this legislation did not put in place a model like the Federal Employees Health Benefits Plan to contain costs. But I think it has to be noted that some baby steps in the right direction have been taken with respect to cost containment. The bill begins to leverage the potential bargaining power of 30 million seniors by giving older people the opportunity to join large managed care plans and big fee-for-service plans that can use their sheer numbers to negotiate discounts for older people on their medicine. The bill also removes some of the barriers to getting cheaper generics to market faster.

It also recognizes that there is great value in comparing the effectiveness of similar drugs so seniors, providers, and the Government can spend funds on the best medicines at the lowest cost. This is very much in keeping with the way my own State has approached cost containment.

I do wish this bill went further on cost containment. There should be a way to bargain for even bigger segments of the elderly, not just the fractions of the population who end up in HMOs or various private health plans.

I am concerned that while private plans have the power to bargain under this bill, the Medicare Program is barred from giving seniors the kind of bargaining power that Senator SNOWE and I wanted them to have in our model that looked to the Federal employee program for seniors.

I am also concerned that there is not ongoing monitoring to assure that drug prices are not increased unfairly before the bill takes effect, or in the first few months after it does.

So the legislation does not contain costs the way Senator SNOWE and I would have liked. It does take some modest steps in the right direction. It borrows from the principles of our legislation, but in the end I strongly believe that more and better cost containment measures with respect to prescriptions are going to be needed in the future.

Next, I asked: Does this legislation address Medicare's broader challenges, including the large number of retirees that will join in the near future? A demographic tsunami is about to occur in our country. As the baby boomers come of age, there are going to be extraordinary pressures on our health care system. Health care advances mean that seniors will live longer, and many of those advances will come in pill form. What is exciting is that the more researchers learn about the way medicines affect individuals, the more personalized treatments, emphasizing pharmaceuticals, will become. Drugs that work one way for Bob will work differently for Mary. In the years ahead, I believe a new field known as ''personalized medicine through pharmaceuticals'' is going to help to increase the quality of patient care and cut down on wasteful spending.

As of now, however, baby boomers face the prospect of joining a Medicare Program that is already short of funds. That is why the $400 billion authorized in this legislation is a lifeline for the baby boomers who are going to retire in just a few years. Those funds provide some measure of security for future retirees, and some tangible evidence that Congress is laying the groundwork to support the growing Medicare population which will need both prescription drugs and the broader program.

There are several modest benefits in this bill, in addition, that sounds exciting to me for Medicare's future. One would focus on an approach known as

disease management. This is going to be attractive in the years ahead because it will allow many of our country's future seniors to have better, more cost-effective care for chronic conditions. Medicare has lacked this benefit.

In addition to these direct benefits for seniors, the legislation helps gear up Medicare for the baby boomers with significant increases to many deserving health care providers. Over 10 years, hospitals in my State will receive almost $95 million. I am especially pleased that a number of medical providers, a number of our hospitals that now see a small number of patients and those that have a large share of patients who are too poor to pay for their care, would get help.

In addition, doctors across the country who are expecting decreases in Medicare reimbursements in 2004 and 2005 would find this reduction blocked in this legislation. In fact, the legislation increases Medicare provider payments in both of the years where otherwise there would be cutbacks. This is important because Government cost shifts have already cut reimbursement to doctors, many of whom have large numbers of low-income patients, to record lows.

I would also note that these benefits to providers will be especially useful in rural areas where we have the nationwide crisis with respect to declining access as a result of providers simply not being able to stay in business.

Finally, I ask one last question that looked beyond the issue of prescription drugs. I asked: Is there any way this legislation could provide a path to a health care system that works, not just for older people, but for all Americans? There is a provision in this bill that offers health care hope, not just to seniors, but for all Americans. It is a provision that I helped to write with Senator HATCH, based on our Health Care that Works for All Americans Act. This legislation would ensure that, for the very first time, the American people would be involved in the process of comprehensive health care reform. There would be a blueprint for making health care more accessible and more affordable, not just to seniors, but for all Americans.

Senator HATCH and I have been able to convince those on the Medicare conference committee that the key is to make sure that the public understands what the real choices are with respect to health care, how the health care dollar is used today, and how it might be used in the future.

In 1993, then-President Clinton announced his intention to create a health care system that worked for all Americans. But by the time that 1,390-page bill was written with no input from the public, sent to the Congress, and torn apart on the airwaves by special interest groups, the people couldn't distinguish the truth from the special interest spin, and the effort died. Without public support, the opportunity for change was lost.

The bipartisan leadership of the Senate at that time has told Senator HATCH and I that, had our bill been in effect in 1993, our country would be well on its way to implementing a system that ensured coverage for all our citizens. So I think it is of additional benefit that this legislation gives us a chance to restart the debate that died in 1994. Our legislation creates a Citizens Health Care Working Group that would take steps, through on-line opportunities, townhall meetings and other forms, to involve the public; and then there is a requirement, after that public involvement, that the Congress follow up on the views that come from the citizens' participation.

There are tough calls to be made in today's health care system, including in the Medicare Program. But it is time to make them together. I think if one lesson has been learned in the last few months of discussion about prescription drugs, it is that health care is like an ecosystem. When you make changes in one area, such as prescription drugs, it can affect many other areas, such as corporate retiree benefits, provider payments, and various other parts of the health care system.

The legislation Senator HATCH and I have put together and which is included in this conference report treats health care as an entire and a systemwide concern for the American people. Nothing is taken off the table. I believe there is in that legislation a path to making sure this Congress helps not just older people but sets out ways to ensure that all Americans have access to good quality and affordable health care.

Finally, let me note that collegiality hasn't exactly been one of the watchwords of the debate over this legislation. There have been some very cold considerations entering into this discussion. I know that some believe passage of this legislation will hand the President a great victory. Others on the other side of the aisle say Democrats who oppose this bill shouldn't dare raise questions. Those aren't the concerns that ought to drive the debate on Medicare at a time when the country has to get ready for a demographic phenomenon. Polarization and division do not do our country any good.

This legislation is a very tough call for me and I think for many others.

Congress could make a mistake by believing the $400 billion available in this legislation will still be there in February of 2005. As a member of the Budget Committee, I know how hard it has been to get funding for this benefit. When Senator SNOWE and I began in 1999 to work for funding for a drug benefit, the Senate thought we lassoed the Moon when we successfully got $40 billion in the budget. How then can you argue that Congress should walk away from $400 billion?

I wish there were a better bill. I wish it didn't include medical savings accounts and premium support and had done better in the area of cost containment.

There are going to be various procedural considerations that may come out, and I intend to weigh each of them before I vote on those procedural concerns. If it finally becomes clear that the bill, as is, represents the Senate's sole opportunity to inject $400 billion in long-sought prescription drug benefits in Medicare, I will vote yes.

At the end of the day, I will not vote to let the last train that leaves the Senate go out without $400 billion that can be used to help vulnerable seniors and those who are getting crushed by prescription drug costs. I will continue to fight to make this legislation better and for better health care for all Americans.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, the opponents of this bipartisan Medicare bill have made the claim that 6 million seniors are hurt by this bill. The other side has also claimed that 25 percent of seniors will be forced to pay more for their prescription drugs under this bill.

I want to be very clear that this is not accurate at all. I'm here to tell the American public the truth.

The truth is that 14 million lower income seniors and disabled Americans are benefited greatly by this bipartisan bill. These 14 million people will get very generous prescription drug coverage through Medicare in this bill.

First, as you can see on this chart, 7.8 million seniors and disabled Americans get full coverage with no deductible, no gap in coverage, and would pay only $2 for generic drugs and only $5 for brand name drugs. And if these seniors reach the catastrophic coverage limit, then they will get their prescriptions fully covered with no copays. That's right, no copays at all.

Next, as you can see on the chart, an additional 4.4 million lower income seniors will get even more generous coverage. These Seniors will pay only $1 for generic drugs and only $3 for brand name drugs. And if these seniors reach the catastrophic coverage limit, then they too will get their prescriptions fully covered with no copays.

In addition, some of these people are enrolled in both Medicare and Medicaid and are living in a nursing home—about 1.3 million of them. This bipartisan bill creates a special benefit for these people. For them, Medicare will cover 100 percent of the prescription costs. They pay nothing.

These groups of seniors in total represent 12.2 million seniors and disabled Americans.

The bill also provides coverage to about 2 million more lower income seniors and disabled Americans. These seniors have 85 percent of their drug costs covered after meeting a $50 deductible, and if they hit the catastrophic coverage limit, they would pay only $2 for generic drugs and $5 for brand-name drugs.

This is full coverage with no coverage gap and 85–98 percent of drug costs covered for about 14 million seniors and disabled Americans. That is about 36 percent of all Medicare beneficiaries.

That is what this bill does. It provides very generous prescription drug coverage through the Medicare program for about 14 million lower income seniors and disabled Americans. And it provides this full coverage to 8 million lower income seniors who have no coverage at all today.

On top of that, of course, this bill provides all beneficiaries with access to basic prescription drug coverage with protections against catastrophic drug costs. The average beneficiary who does not quality for the low income benefits I have just described will still have about half of their drug costs covered under this bill.

Finally, no one is forced into this drug benefit. It is a purely voluntary benefit. No one is forced to enroll and any senior or disabled American that does not see the drug coverage offered as a good deal for them does not have to enroll.

So this bipartisan bill before us does not harm seniors. That is an absurd charge to make by the opponents of this bill.

This bill provides an affordable, voluntary and universal drug benefit for all seniors and disabled Americans in this country. And it provides very generous coverage to those 14 million lower income beneficiaries.

It is time to put the partisan rhetoric aside and approve this bipartisan bill that the AARP calls ''an historic breakthrough and [an] important milestone in the nation's commitment to strengthen and expand health security for its citizens.

I yield the remainder of this half hour to Senator DOMENICI.

The PRESIDING OFFICER (Mr. ENSIGN). The Senator from New Mexico is recognized. He has 23 minute 20 seconds remaining.

Mr. DOMENICI. Mr. President, today I rise in support of the Medicare Prescription Drug and Modernization Act. I thank the Senate and the House conferees, as well as the leadership of both bodies, for their work over the past few months. Their perseverance has paid off. This bill represents a major step forward for this body on behalf of the seniors of this country.

Experts and fair-minded people have known for many years that the Medicare Program must be reformed. For more than 6 years, Republicans have led efforts to overhaul the Medicare system and ensure American seniors continue to have access to high-quality, comprehensive health care in the future. First, a little history. The Budget Act of 1997, when I was chairman of the Budget Committee, created the National Bipartisan Commission on the Future of Medicare. This Commission was created to address the issue of modernization. The Commission supported changes to the program that would have provided an additional prescription drug benefit as well as modernized the Medicare system—not one without the other, but both.

Unfortunately, that Commission failed in part because of lack of support from the previous administration's appointees to address the fundamental problem of the program's design. A majority of the Commission was for it, but we structured it where 60 percent was required, and the President withheld his support after all the work that was done. The point is, clearly even back then we were tying modernization to prescriptions.

In 2001, again as chairman of the Budget Committee, the budget resolution provided $300 billion, and we are now up to $400 billion. The budget resolution said $300 billion for prescription drug benefits and it required modernization of the program. It said $300 billion way back then. DON NICKLES, as chairman, took it up to $400 billion. It did not say for prescription drugs, it said for prescription drugs and modernization. Why? Because one without the other is never going to work. If you have a prescription drug benefit for the seniors and do nothing to the underlying Medicare Program, you have taken care of one of the problems for a couple of years but you will be back with a bigger problem. That bigger problem is the Medicare system itself. With the great change in demographics this country is going to be experiencing, we will be in big trouble.

Medicare beneficiaries have waited too long for prescription drug coverage. I am pleased this year appears to be a breakthrough year. Before we are finished, there will be many Senators we will be able to thank. This will be the year we finally help millions of Medicare beneficiaries obtain affordable prescription drugs. The bill will also provide substantial relief for those with the highest drug costs. It will also provide prescription drug coverage at little or no cost to those with low incomes.

When this bill passes, we will be providing seniors with prescription drug coverage for the first time since the program's creation in 1965. Across America, there are still millions of people who do not know that Medicare provides by law not one nickel's worth of prescription benefits. It is not that the benefit is inadequate or that it is written wrong, it just did not provide for a benefit; that need was not contemplated in 1965.

It has been hard to get a bill that really has a chance. This bill has a chance. It contains new accounting safeguards that put the program on a stronger financial foundation. The legislation contains preventive care measures, including screening for diabetes and cardiovascular disease. It provides benefits for coordinated care for people with chronic illnesses. None of these benefits was provided under the 1965 act because the need was not contemplated as part of the health delivery system. These benefits are needed today, but they are excluded from the current Medicare system.

This is by far the best opportunity, speaking on behalf of my constituents in my home State, that New Mexico has had to get doctors, hospitals, home health care providers, nursing homes, and Medicare beneficiaries fair and equal treatment. Before this bill, each of these groups had been shortchanged by the health care laws of our country.

I am particularly pleased this bill contains $25 billion in initiatives aimed at providing health care in rural areas. We can thank Senator GRASSLEY for being so steadfast on that provision. The Finance Committee estimates my home State of New Mexico can expect approximately $140 million over the next 10 years in increased doctor and hospital reimbursements. That is because we are so low. This brings us to parity and fairness.

This bill includes $50 million to equalize payments between large urban hospitals and rural and small hospitals, $15 million to increase payments to disproportionate share hospitals, $1 million in payments to critical access hospitals, $50 million in increased payments for doctors, and $3 million in incentive payments to encourage physicians to practice in areas where there are shortages.

Beginning in 2006, again for my State, all 250,000 Medicare beneficiaries living in New Mexico will be eligible to get prescription drug coverage through a Medicare-approved plan. This bipartisan agreement will give 55,000 Medicare beneficiaries in New Mexico access to drug coverage they would not otherwise have. Nearly 17,000 of those beneficiaries will qualify for reduced premiums, lower deductibles, coinsurance, and no gap coverage. Unquestionably, these provisions will help improve access to health care and treatment for seniors.

We have a great opportunity, fellow Senators, to fulfill our promise to the American people and provide our seniors with high-quality prescription drug benefits. I believe prescription costs will be manageable, even with the baby boom generation that will then be retiring. Some worry about the costs of this bill, but I am confident about the

future of American ingenuity and competition, America's science achievements, and America's wellness achievements.

As I said this spring when we were debating this bill, we are not living in a stagnant world. American scientists today are reaching for health care breakthroughs linked to the mapping of the human genome. Advances in nanoscience and microtechnology will change medicine and health care as we know it today. However, while that work continues, this long-awaited prescription drug plan is what we need now. I am suggesting when I talk about the future breakthroughs that we may be astonished at how much we are going to be able to do that we cannot do today that may save lives and save money.

I encourage my colleagues to put their differences aside today and, most of all, to put their politics aside, and do what is best for the American people. Overwhelmingly, my constituents have contacted me and asked that I support this legislation.

Seniors need affordable prescription drugs, and if Congress fails to act this year, it will likely be many more years before beneficiaries are able to access prescription drugs through Medicare.

It is for those reasons—all of them; the national reasons and the parochial New Mexico reasons—that I have indicated that lead me to saying I will support this bill. And I hope we do it quickly.

Now, we have an additional Senator. Mr. President, how much time do we have left in this block of time?

The PRESIDING OFFICER. Thirteen minutes fifty seconds.

Mr. DOMENICI. Mr. President, I understand we have a Senator who is coming over to use that time. Until they do, I will yield that time to Senator GRASSLEY.

Mr. REID. Mr. President, if I could just be heard briefly.

Mr. DOMENICI. Sure.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. We had a Senator who took an extra 5 minutes today because of various reasons, so it is my understanding that the distinguished Senator from Kentucky wants an extra 5 minutes. We would be happy to agree to that. So we would just add that on to what time he has.

Mr. DOMENICI. I say to the Senator, Senator GRASSLEY is in charge. I will just wait to see what he says.

Mr. REID. Is the Senator on his way down?

Mr. GRASSLEY. I say to the distinguished Democratic whip, it is my understanding the Senator is on his way to the Chamber from Senator FRIST's office right now.

Mr. REID. We would agree to give him that extra 5 minutes.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCONNELL. Mr. President, finally, after 38 years, Medicare will finally give our most frail citizens help in acquiring the miracle of modern medicine: prescription drugs. They save lives, but they are not cheap.

After decades of talking, while our seniors waited, tomorrow we vote yes or no on a Medicare prescription drug benefit. It is now or never for our seniors. And for their drug benefit, this is the bill and this is the time.

On one side stand 40 million seniors, the American Medical Association, the AARP, and hundreds of other citizen groups. On the other side stand some Senate Democrats itching to kill this bill. Do not be fooled by those who think we can do something better at some point later. We are already 38 years late, and this is as close as we will ever come.

So for our seniors to get a Medicare drug benefit, it is now or never. Incredibly, there are those in this Senate who say never. They plan to filibuster the Medicare drug benefit or use procedural measures designed to do the same thing as a filibuster—kill the bill.

Let me repeat that. Some of our Democratic colleagues are trying to kill this bill. For 38 years there has been no prescription drug benefit, none. Now, when it comes time to actually pass a drug benefit, some of our Democratic colleagues are filibustering. That is truly astonishing.

Now, we will hear a lot more debate about whether there is too much or too little Medicare prescription drugs. And we will hear a lot of talk that there is too much or too little reform to preserve Medicare.

Mr. President, I believe we do more for Medicare prescription drugs than most could have ever expected. We do more to preserve Medicare for the future than most presently expect.

Before I discuss the reforms to preserve Medicare, I would like to focus on the new Medicare prescription drug benefit. The facts are that we provide $400 billion for a Medicare prescription drug benefit over a decade, about a third more than our Senate colleagues proposed just 2 years ago—a third more than was proposed just 2 years ago—and one and a half times more than President Clinton proposed for a Medicare drug benefit.

This unprecedented investment in our seniors' health translates into an incredible amount of relief for our seniors.

Back home, in my State of Kentucky, for example, there are about 650,000 seniors who will share in that relief. So what does this relief mean to them? The first comfort is that all 650,000 Kentucky seniors—whether rich, poor, or in between—will never again face the fear of being wiped out—completely wiped out—by catastrophic drug costs.

Under this plan, Medicare will cover a minimum of 95 percent of all catastrophic prescription drug costs.

Next, all Kentucky seniors currently paying full retail drug prices will be able to cut their prescription drug costs by an estimated 50 percent or more once they enroll in this new plan.

For those 235,000 Kentucky seniors with low incomes—low-income seniors—they will never again have to choose between food on the table or medicine in the cabinet—never again. They will get 95 percent to 99 percent of their prescription drug costs fully covered. None of those 235,000 Kentuckians will pay more than $2 for generic drugs or $5 for brand-name drugs, and most will pay even less than that.

Another 56,000 Kentuckians, with moderate incomes, will get assistance with their premiums, deductibles, and coinsurance.

While the full drug plan will not start until 2006, all Kentuckians can benefit from an immediate helping hand thanks to the Medicare prescription drug discount card available as soon as April of next year. This prescription drug benefit card will be available by April of next year. Through group purchasing power and negotiated prices, this card can save seniors between 10 and 25 percent of their drug costs, starting, as I indicated, just next April—right around the corner.

Finally, also starting next April, about 123,000 low-income Kentucky seniors will be credited up to $600 on that same prescription drug card to help tide them over until the full plan takes effect.

So this is real relief, and it is just around the corner. But we did not just give Kentucky seniors that real relief, we also gave them real choices.

Today, Medicare offers no prescription drug benefit and few choices in health care. All that is offered is the traditional hospital and doctor benefit, with a limited managed care option called Medicare+Choice.

Tomorrow, Medicare also could provide seniors a prescription drug benefit and almost unlimited choices in health care. If we act now, every senior on Medicare will soon have the choice of two prescription drug benefit plans, along with a Federal backup.

But if not now, then when will seniors get that benefit? Or, if we act now, every Medicare senior can choose from a variety of Medicare+Choice plans, with a full drug benefit added. But if we do not offer that to them now, when will we offer it to them?

Another choice is every Medicare senior can choose from three or even more preferred provider organizations. But if we do not offer this choice now, when will we? Or, if we act now, every Medicare senior can get help to maintain their current employer-based drug plan. But if we do not offer that now, when are we going to offer it? When would be a better day than now? Or every Medicare senior can do nothing at all and keep exactly what they have today. Every senior, I repeat, can stay in exactly the same coverage they are in today, if they choose to.

That is a lot of freedom and a lot of choices—much like those which Federal employees and Members of Congress enjoy today. But if we do not offer these choices now, when are we going to offer them?

This bill provides an excellent prescription drug benefit, a great array of choices to get that drug benefit, and a host of new benefits, such as preventive care, disease management, and comprehensive chronic care.

But after all we did for prescription drugs, what did we do to secure Medicare's future, you might ask? The reforms may not have gone as far as some would have liked, but the good news—the paramount good news—is for our Medicare system, a little reform can go a long way.

So how far can it go?

When a scam artist can make $7 million by selling gauze pads that cost a penny but sell them to Medicare for as much as $7, a little reform can go a long way.

When a shakedown artist can bilk Medicare for as much as $300,000 by allegedly providing health care services to a deceased patient—I repeat, a deceased patient—a little reform can stop a real abuse. When two rented mailboxes and a beeper is all one fugitive needed to scam Medicare out of $2.1 million, a little reform can go a long way. When Medicare imposes 110,000 pages of regulations, a tower of paperwork 6 feet tall that requires a regiment of clerks to handle, a little reform can mean real savings. When estimates suggest that as much as $33 billion a year is wasted in Medicare and Medicaid—$33 billion a year in waste in Medicare and Medicaid—a little reform can do a lot of good.

When computational errors at Medicare cost $4.5 billion a year, when $2.2 billion is paid out annually to phony businesses, when $23 billion is annually overpaid to doctors, hospitals, and other health care providers, and when study after study shows not just poor business practices but rampant and outright fraud, waste, and abuse throughout Medicare, costing tens of billions of dollars a year, year after year, decade after decade, then a little reform can do enormous good.

The reform in this bill is real. We infuse real competition, market forces, and private sector dynamics to provide the best health care at the best price for our seniors. A wide array of health care providers, insurers, plans, and organizations will compete to offer the best health care at the best price, and seniors will be free to choose the best plan for themselves.

With all of these choices, with all of this competition, ordinary people providing health care across this land are soon going to do a very extraordinary thing. They are going to figure out how to provide seniors all the quality health care they want without all the waste, fraud, and abuse in Medicare that no one wants.

And who will benefit? Of course, our seniors will benefit. And so, too, will our children. When our seniors get a quadcane such as this one for $15, like the Veterans Administration pays—the VA pays $15 for this quadcane, but Medicare pays $44 for the very same cane—stopping this kind of abuse is going to save our parents and our children. When our seniors get a catheter for a dollar, as most Federal Employee Health Plans pay, instead of the $12 Medicare typically pays, our parents and children both win.

These potential savings are not conjecture. This is not guesswork. We know that under imperfect—if not hostile—rules and regulations, the health care providers in the Medicare+Choice Program were able to give our seniors all the services of traditional Medicare and wring out enough savings to provide seniors an average drug benefit of about $857 a year. With this bill, the power to convert Medicare waste into Medicare benefits, which we only saw a flash of in the Medicare+Choice plans, will now be fully unleashed.

There was always a riddle to the Medicare drug benefit. That riddle was: Could we help our parents without harming our children? Could we add a prescription drug benefit to Medicare today yet still preserve Medicare benefits tomorrow? The answer to the riddle was always reform. In this bill, we have done enough reform to rein in the waste I have touched upon earlier.

To my colleagues on this side, I would agree there could be more reform in Medicare than we have in this bill. But there can be no reform of Medicare without this bill. We could have more reform than we have in this bill, but we will have no reform without this bill. The reforms are more than a first step. They reflect a bold, new direction. That new direction for Medicare flows from the market-based incentives in this bill that I believe will do more good to reform Medicare than our colleagues can possibly imagine.

Our colleagues need to recall that every time we have placed our faith in the ability of free market forces to provide for our people, our Nation has been richly rewarded. When we infused our energy markets with market competition, the gas shortages and economic stagnation of the 1970s were replaced by energy stability and two decades of solid economic growth. When we reformed Welfare-to-Work, we relied on the private sector to provide the best welfare program man had ever devised—a job. And the welfare reform of 1996 has worked better than we could ever have imagined.

Today we tap those same forces that saved our economic security and improved the well-being of the neediest to save Medicare for our children and improve Medicare for our parents.

I believe this new drug benefit will meet the needs of our seniors. I believe the reforms will meet the needs of our children. Now is the time to act. Now is not the time to filibuster. Our seniors deserve better than that from us. Thirty-eight years of waiting is long enough. We must not filibuster and kill the bill providing a prescription drug benefit for 40 million seniors.

Doctors, hospitals, and seniors have all said this Medicare prescription drug plan is the right plan at the right time. They all strongly support this. We should support it, too. Our seniors, the greatest generation, have been there for us. Now we need to be there for them.

I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida. Mr. President, here it is, about 675 pages of a bill. I have spent the better part of this past week trying to comprehend all of the nuances in this legislation, and of course a lot of that was difficult since the conference committee was still negotiating up through Thursday night, and some of the final things that are in the legislation we didn't find out until late in the game.

But having spent a considerable bit of time, I believe I have a fairly comprehensive knowledge of it. I want to give my comments and conclusions as to why this legislation is not in the best interest of this country and is it not in the best interest of our seniors. Therefore, I am going to give my reasons why I am going to vote against this legislation.

At the end of the day, what we need in America is a health care delivery system that is organized in a logical manner. The way we organize health insurance, as it has grown up historically around employers, if the employer is large enough, then the group of people who are insured for their medical expenses, you can spread the health risk over that large group. That brings down the per-unit price or the costs, the premiums that people pay.

But all employers are not large. Indeed, in my experience for 6 years as Florida's elected insurance commissioner, what I found was that not only was it very difficult for individuals to

get health insurance and pay the prohibitive costs of the premiums but there was a gaming of the system that went on by some insurance companies. By having group coverage, a group was established, a rate was set for that group. Usually the rate was a very low rate or premium in order to entice people into that group to be insured for their health care. And then, as the group got older and it got sicker, they would not expand the group, so the size of the group began to contract. Yet people in the group are getting older and sicker, and you can guess what happens to the cost of that health care; and as those costs rise, so do the premiums and those people in that group had no other choice. They could not go out and get into another group, unless they happened to join an employer who had a large one.

That is the way the system in America is organized. That is not a logical system. What we ought to do is be creating the largest groups possible, the largest pools, so that you can take the health risk and spread it over that large number of people—young and old, sick and well, geographically disbursed—so that the cost of that health care is spread over the larger number and, therefore, the cost per person, the premiums, are much lower.

One of the reasons I oppose this legislation is that it is the beginning of the violation of that principle of insurance, for what this legislation is doing is beginning to fragment the seniors as a group and beginning to create groups where well senior citizens will be encouraged to join, leaving the sicker senior citizens for the traditional fee-for-service Medicare and for the prescription drugs that go along with that Medicare.

For example, what we have in this bill is that prescription drugs will be provided in an area. I think the country is divided into 10 areas. I heard it said earlier that it may be as many as 50. But whatever it is, the whole country is divided. In that particular area, there has to be a prescription drug plan for Medicare, as the basic underpinning of fee-for-service, and also the opportunity for managed care, either a PPO or an HMO.

Now, here is what is going to happen. First of all, the PPOs and the HMOs, under this bill, are heavily subsidized by the U.S. Government. There is $12 billion in this bill that is a subsidy to PPOs, money to be released at the discretion of the Secretary of HHS. This money would be to help the PPOs, managed care, to become more competitive. And guess what. It is going to help them go out and recruit senior citizens to come into the PPOs.

So, too, there is a subsidy here for HMOs. Medicare fee-for-service is reimbursed at 100 percent. In this bill, a kicker is given to HMOs of 109 percent; they are going to be reimbursed for those medical expenses.

So, by this legislation, we are setting a policy that says we are going to encourage seniors to go into those managed care plans—managed care plans that, in fact, will then take away a lot of the choice for seniors to select their own doctor.

What is that going to leave then? As they recruit the more well senior citizens, then Medicare, with its own prescription drug plan, is going to have all others. And guess what is going to happen to that $35 premium that has been promised. It hasn't been promised that it is going to stay the same. To the contrary, that $35 premium per month is going to start escalating. It is going to be hiked. Therefore, what is going to happen to the poor and the sick among our senior citizens? It is not going to be as it has been represented here.

So I see this as a giveaway to HMOs and PPOs. I see it as pushing seniors into managed care, where they will lose their choice of doctors. That is my first objection.

Of course, there is a lot in this bill that is salutary. I voted for the bill when it came through the Senate because I believed that it was a first step in what I thought was a very important policy goal—that we modernize Medicare with a prescription drug benefit.

But what has been added has made it too onerous for me to support. Let me tell you about the second reason I am not going to vote for this legislation.

It is widely acknowledged by several very respected studies that the private sector employers who are covering the prescription drugs for their retirees, from their private employment, are going to drop that drug coverage that is now coming from the private sector. It is estimated by several, including CBO, the Congressional Budget Office—an arm of the Congress of the United States—that some 2.7 million seniors in this country are going to be dropped, which means they will only have the choice of getting prescription drugs under the deficient plan that comes under this bill. So they are going to be getting less.

You talk about being mad. You talk about being upset. When they have a very robust plan and they could go to the pharmacy and have their former employer, under that retiree plan, pay for their drugs and suddenly they get dropped because now there is an inadequate prescription drug plan, well, in my State of Florida alone, it is going to be 166,000 people who are going to be dropped. There is going to be, indeed, some increase under the bill of those who are not covered now up to 150 percent of the poverty level of senior citizens, and I salute that.

You would think that in a State such as mine, which only covers poor seniors with Medicaid, a Federal and State health care program, you would think, since our State of Florida only covers up to 88 percent of poverty level, that would be a big benefit—to go from 88 to 150 percent of poverty level. Yet, in fact, there is some help there, but it is not much because this 675 pages includes a new assets test that is going to drop a lot of those people who are not covered by Medicaid in Florida, who would be covered under the bill—they are not going to be eligible because there is now a new assets test and there is a part in this 675-page bill that will not allow them to receive all of the brands of drugs that they want because there is a limitation in here on the class of drugs, and how it is defined.

Let me tell you, Mr. President, there are going to be some upset seniors who think they are in the range of 150 percent of the poverty level and below, and they are going to get covered and then they are going to suddenly realize they are not. That is going to happen a lot in my State of Florida. This is another reason I am not going to vote for the bill.

A third reason is that there is no competition for the prescription drug plan. I happen to think if we want to have a comprehensive, overall health insurance plan in this country, it ought to be as wide as possible with the biggest possible pools, and there ought to be private sector competition so we get the efficiencies and economies through competition.

That is not what happens in this bill. What happens in this bill is if you don't have two prescription drug plans attached to Medicare in that particular region of the country, there is no competition between the two. You can't say there is just going to be competition with the PDP and the PPO or the HMO. No, they are going to siphon off the more well seniors so if you don't have two prescription drug plans competing in price and there is only one, what do you think is going to happen to the cost? What do you think is going to happen to the monthly premium that was set initially at $35 a month? It is going to go one way. It is going to go up because the cost of those drugs is going to go up.

This bill is not pro-competition. This bill is pro private plans.

Another reason 35 bucks is going to go up is the fact that right now under the Medicare system, Medicare Part B, seniors pay the same premium throughout the country, but we know in some parts of the country health care costs are higher than in other parts. The costs in South Florida are higher than the costs in Iowa. But now the country is going to be divided up, in how many regions? I thought it was 10. I heard earlier in the debate it is 50. However many regions, it is going to be divided up, it is going to more reflect the cost in that region.

You might say that is a good thing unless you come from a State such as mine which has a higher percentage of

the population of seniors than any other State because, why? When they retire they want to come to the land of sunshine and enjoy the benefits of our environment.

So because there is no competition and because the universality of the Medicare premium that has been in effect since 1965 is going to be abolished for prescription drugs, what is going to happen? The prescription drug premium is going to get hiked all the way to the Moon.

A fourth reason for opposing this legislation is that $400 billion is a lot of money, indeed, and if we were getting a true comprehensive drug benefit for $400 billion, it would well be worth it because Medicare needs to be modernized. If we were doing Medicare again in 1965, would we include a prescription drug benefit? Of course we would, because of all the wonders of these miracle drugs.

So $400 billion is a lot of money, but it is not being efficiently spent in this bill. Why? Aside from all of these provisions I talked about—about splitting up all of the groups and making them inefficient and siphoning off well seniors and leaving the sick seniors for the remainder—we cannot do anything in this bill about the prices of drugs.

In this bill, there are two little paragraphs that do not allow Medicare to negotiate the price. I always thought the free market was about economies of scale, of being able to get better prices. That is the whole theory of Wal-Mart. In bulk purchasing, they bring down the price. This is an anti-Wal-Mart policy bill because it does not allow bulk buying, as has been stated many times before, which has been done with other agencies of Government, particularly the Veterans Administration.

Mr. President, I supported the bipartisan bill we crafted in the Senate earlier this year. Unfortunately, this agreement does not adequately protect seniors' retire coverage, moves too many seniors into private plans, and fails to do anything about the escalating costs of prescription drugs.

When Medicare was passed 40 years ago, we promised our seniors they would have access to medical care as they grew older. As a matter of fact, since the passage of Medicare, seniors' life expectancy has increased about 25 percent.

The agreement that we will be voting on has little to do with providing a prescription drug benefit to seniors and a lot more about enticing private insurance companies to take over for the Government.

The financial incentives to private companies and creative trappings inserted in the bill will do nothing less than limit seniors' choices—mostly because of cost. Seniors may be forced into HMOs or PPOs because it may be the only affordable way to at least have access to a prescription drug benefit. Affordable, because the bill provides a $12 billion subsidy for PPOs and a reimbursement rate of 9 percent above Medicare for HMOs.

Since 1999, in Florida alone over 260,000 seniors and people with disabilities were abandoned by their private Medicare HMOs. As Florida's former insurance commissioner, I recall having to beg these plans to stay in our State and continue providing care to our seniors.

This conference agreement, with its various incentives—from a $12 billion slush fund, to its risk buyout, is nothing more than a give-away to insurance companies.

Private health plans are in the business of making money, and have routinely blamed low profit margins as their reason to drop seniors. In comparison to Medicare, they have failed to be as effective in controlling their own costs.

HMOs have managed to lure the healthiest of our seniors in order to maximize their reimbursement from the government. Currently, they receive about 16 percent more per beneficiary than is paid out through the traditional Medicare program. If these savings aren't enough to feed their profit margins, then the increased payments included in the bill will.

The agreement proposes payments to HMOs of 109 percent of the fee-for-service rate. This cumulative effect results in our government paying private plans 25 percent more than what it would cost Medicare to provide that same care. How can that be considered competition?

I am also concerned that the agreement before us could create premium variations across the country, and even within my own State of Florida.

While we all keep hearing about this $35 monthly premium, there is nothing written in the law that limits the premium to that amount. That number is simply an average which between now and 2006 could certainly increase just as the rest of the costs of health care are.

In addition, I am envisioning a scenario where seniors who do not have access to a fallback because there is one HMO or PPO plan and one prescription drug plan are left without any real choice. Then, if the drug plan, PDP, has no competition, it can raise the annual premium at will.

Since there are no limits and the premium from a private drug plan could be hiked to the moon, they could essentially create a situation where a senior has no other choice—based on costs—but to join an HMO or PPO and give up their choice of doctors.

Again, we see an example of this bill's failure to allow true competition to take place.

Under the fallback plan included in the Senate bill there would be at least two of the same kinds of plans competing in each region. This would have created an incentive for the drug plans to keep their premiums competitive.

During a careful examination of this agreement, I also became aware that the private drug plans are allowed the greatest flexibility possible. Little consideration is given to the particular needs of the beneficiary.

For example, each Medicare drug plan could have its own list of covered drugs, or formulary. The only requirement is that the private drug plan covers at least one drug in each ''therapeutic class.'' The definition of a therapeutic class; however, is left up to the plan itself. A plan might choose to exclude certain high-cost drugs for financial reasons, leaving seniors who depend on those drugs without coverage for them.

I am also very disappointed that this agreement prohibits Medicare from negotiating better prices from drug manufacturers.

In 2001, the cost of prescription drugs rose more than 15 percent—the seventh straight year of double-digit increases.

When we consider the fact that drug prices have been increasing by double digits in recent years, it does not make any sense to let these prices go unchecked.

In light of our limited resources, wouldn't our seniors have been better served if we had addressed the issue of drug costs? We even have a proven model for success in the Veterans Administration, which has used its bulk purchasing power to negotiate with the drug companies for dramatically reduced prices. Medicare could do the same, saving our seniors and the taxpayers billions of dollars.

Our Nation's seniors, when unable to afford their own drugs, turned to Canada for relief. This bill continues the stalemate between supporters of importation and the FDA by including the poison pill provision requiring a certification from the Secretary of Health and Human Services before medications can be legally imported.

At a Commerce Committee hearing last week on this exact issue, supporters of importation argued that in the absence of trying to control the increasing prices of drugs, importation should be at least an option to provide short-term price relief.

In making my decision to oppose this legislation, I considered who would be better off versus who would be worse off.

One-third of Medicare beneficiaries have no drug coverage at all, another one-third of them have access to prescription drugs through their retiree health care plans.

The legislation before us will cause private employers to drop 25 percent of their retirees. In the State of Florida, that could mean over 166,000 retired seniors would lose the coverage they worked all of their lives to earn.

Another group that fares worse under this agreement are those seniors who are over 65 and also eligible for Medicaid. We fought long and hard to have these duel-eligible seniors covered under Medicare. However, provisions in the agreement raise the asset tests and restrict the Medicaid program from paying the senior's copayment, and that leaves seniors worse off.

Medicaid beneficiaries in Florida have access to all classes of drugs and all drugs within those classes. Should patients have trouble getting their medications, their physicians are allowed to appeal directly to Medicaid. The limited formularies allowed under the agreement for Medicare could jeopardize a senior's access to the drugs they need.

Despite our best efforts in trying to minimize cuts to cancer care in this legislation, the agreement will result in an $11.5 billion cut. The ripple effect of these cuts and the reaction of private sector insurers will threaten community cancer centers' ability to continue treating patients.

I reiterate my support for the providers of care to America's seniors. To our doctors, our hospitals, and nursing homes—I support the provisions in this bill that will allow them to continue to serve our seniors.

For Florida's hospitals alone, this bill means almost $740 million in improved Medicare reimbursement over the next 10 years, and I am pleased about that. But these reimbursements to health care providers should not be held hostage in a 675-page bill that has many defects.

In the final analysis, this agreement fails to fulfill my promise to provide comprehensive prescription drug benefit to seniors. We can do better. Regardless of whether this bill passes or fails, I intend to keep working to provide that comprehensive benefit. Our seniors deserve nothing less.

I want to yield the rest of my time to one of my colleagues who needs some time. I wanted to state at least these reasons and try to give the comprehensive overview of the health insurance marketplace, where we need to go eventually to straighten out the mess so that all people can be insured and not just the ones who have it and the 42 million people in this country who don't have it. Indeed, this bill is not the first step toward that kind of health care reform.

I yield to the Senator from North Carolina the remaining time that I have, which should be about 13 minutes.

The PRESIDING OFFICER. It is about 10 minutes. The Senator from North Carolina is recognized.

Mr. EDWARDS. Mr. President, may I inquire how much time the Senator from Florida has remaining?

The PRESIDING OFFICER. About 10 minutes.

Mr. EDWARDS. Mr. President, I thank the Senator from Florida very much for yielding time and allowing me to speak tonight.

Medicare was created 40 years ago with the idea of giving seniors health care to allow them to live out their lives in dignity and self-respect. It was a promise that they could choose their own doctor and afford their health care.

We clearly need a real prescription drug benefit under Medicare, there is no question about that. The problem is that this bill does a great deal more harm than good. It is very good for the drug companies, it is very good for the HMOs, but it is very bad for seniors and very bad for America as a result.

Here are some of the reasons: First, it has billions of dollars in giveaways to HMOs and insurance companies, money that could be and should be used to provide a better benefit to seniors who desperately need prescription drugs.

Second, it does almost nothing to control the skyrocketing costs of prescription drugs which seniors all over America face every single day when they go to the pharmacy.

Third, it contains billions of dollars in tax breaks for millionaires, for the wealthy, which is part of a long pattern by this President of trying to shift the tax burden. The President is in the middle, as I speak, of shifting the tax burden in America from wealth to work. He wants to get rid of the dividends tax, capital gains tax, taxation of the largest estates, and shift that tax burden right on the backs of middle-class working Americans who are already struggling, already having a difficult time saving, putting money aside, having any level of financial security. And here we go again, the President of the United States is in the process of putting an additional burden on the very people who are struggling and who are so critical to getting this economy moving again.

This is just another in a long series of efforts by this President and this administration to shift the tax burden. There is no question the lobbyists all over Washington are popping the champagne corks as we speak. The drug company stocks are going up. The HMO stocks are going up. Do not the drug companies and HMOs make enough already? For all the seniors who go to the pharmacy to try to buy medicine and cannot afford it, is the really nice thing for us to do right now to help the HMOs and drug companies? Are they not doing all right?

The truth is we ought to forget the drug companies, forget about the HMOs. They are doing a terrific job of taking care of themselves. We in the Senate ought to be focused on trying to help seniors who are struggling.

Let me say a word about the giveaways to the HMOs. This bill contains something that is called a stabilization fund of $12 billion, which is nothing but a giveaway to HMOs. The idea is we have been hearing all along that it is important to have competition and the HMOs can be more cost-effective than Medicare. I am missing something. If they can be more cost effective than Medicare, why in creation are we giving them $12 billion of taxpayer money? At least where I come from, you do not have to give somebody $12 billion to be more cost effective. That is taxpayer money that could be used to help seniors who desperately need prescription drugs. But, oh, no, we are going to give them $12 billion, money that could go to the seniors, money that could give them a decent benefit. Instead, we are going to give it to HMOs. I guess they are struggling so much, they need our help.

Then on top of that, we see that the justification for this is that they need money so they can ''compete''? What in the world is that all about?

On top of what is being done for the HMOs, we have the drug companies. This bill does almost nothing to control costs. We have been fighting in the Senate to bring down the cost of prescription drugs for months and years now. The battle is always uphill because the drug companies have more lobbyists in this town than people who live in my hometown where I grew up. They are all over the place.

So we are trying to bring down the cost of prescription drugs. The Wall Street Journal itself calls this a big win for the drug companies. Their stock is going up.

Why have we not been able to do the things that need to be done to bring the cost of this program under control and, more importantly, to bring the cost of prescription drugs under control? I will tell my colleagues why. Because the drug companies are against it. It is just that simple. It is the answer to everything we try to do on the Senate floor to bring down the cost of prescription drugs.

We try to do something about misleading drug company advertising on television. No, no, we cannot do it. The drug companies are against it.

We try to allow the reimportation of prescription drugs from Canada to bring down costs for everybody, but we cannot get it passed. Why? The drug companies are against it.

We try to do all of this, to allow the market power of the Government to be used to negotiate a better price to bring down the cost of prescription drugs. We cannot get it done. Why? The drug companies are against it.

We are never going to get health care costs under control in this country until we stand up to these people, stand up to the drug companies, stand up to the HMOs.

I know in Washington, DC, they are powerful, but out across America, the

American people have a great deal more power in this democracy than these lobbyists in Washington. We need to stand up to drug companies and HMOs and stand up for the American people.

In the middle of not controlling costs, billions of dollars of taxpayer money going to HMOs and drug companies, we have another effort to shift the tax burden in this country. It is not as if working, middle-class families are not struggling enough. It is not as if over the last 20 years we have not gone from them saving money, having financial security, to today not being able to save, having negative savings as a matter of fact, with one medical emergency or one layoff keeping them from going under.

Here is a good idea: Why do we not take another step to shift the tax burden away from the wealthy and to the middle class and working people? That is exactly what is happening with these medical savings accounts. The only people who are going to be able to afford to take advantage of it are the wealthy. Regular folks cannot save anyway. They are not going to be able to put money away in one of these accounts.

The bottom line is, this is a bad bill. It is not a first step; it is a misstep. It takes this country in exactly the wrong direction. We need to stand up and say so. The American people need to hear our voices loudly and clearly. They also need to know what it is we actually need to do to provide a prescription drug benefit because they deserve one.

I will tell my colleagues what we need to do—put controls on the cost of prescription drugs by allowing reimportation from Canada, by doing something about misleading advertising on television, by cracking down on some of the price gouging that is going on. We ought to provide this prescription drug benefit under Medicare. We can give people choices and still stand by the very program that has provided seniors with health care for 40 years now, that so many seniors have depended on for four decades now.

At the end of the day, the American people, seniors, want us to do something about prescription drugs. We ought to do it. We ought to give them a real benefit. We ought to bring down the costs. We ought to make it cost efficient in terms of taxpayer dollars. In order to do it, we are going to actually have to have the backbone to stand up to these drug companies and these HMOs and their armies of lobbyists all over Washington.

I, for one—and I believe some of my colleagues will join me in this—intend to stand up to these people, and I intend to stand up for the American people and fight with everything I have for a real prescription drug benefit under Medicare that does not give billions of dollars to HMOs and drug companies.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Senator BAUCUS is the next scheduled speaker. I will ask for a quorum call, but I also ask unanimous consent that the time be taken off his time. It is not fair to wait because we have 4½ hours' worth of speakers.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Over the last couple of days there have been many assertions from my colleagues on the other side of the isle that this bill does nothing to lower the cost of prescription drugs.

I would like to take this opportunity to set the record straight.

The conference report contains a number of significant reforms to lower the cost of prescription drugs for not just Medicare beneficiaries, but for all Americans.

This bill provides immediate relief to 40 million Medicare beneficiaries by providing a discount drug card starting in April 2004.

The voluntary drug card program will save beneficiaries an average of 10 to 25 percent on the cost of their prescription drugs. Beneficiaries will have the choice of at least two Medicare-endorsed drug discount cards.

The drug discount program included in the Medicare Prescription Drug and Modernization Act also provides low-income beneficiaries with an additional subsidy of $600 to help with the costs of their prescription drugs.

This program provides immediate relief to Medicare beneficiaries now paying extremely high prices for their prescription drugs.

This bill also lowers the price of prescription drugs for Medicare beneficiaries, by eliminating the Average Wholesale Price, AWP, paid for prescription drugs.

This provision significantly reduces the prices that Medicare and many private insurers pay for physicians-administered drugs.

Under this agreement, Medicare reimbursements will now be based on actual prices paid by physicians, rather than fictitious numbers reported by manufacturers, providing a ripple effect lowering the cost of prescription drugs for not just Medicare beneficiaries but individuals in the private market.

The conference report also contains a ''non-interference'' provision that will protect patients and deliver lower prices through market competition.

The conference bill specifies that the Government ''may not interfere with the negotiations between drug manufacturers and pharmacies and PDP sponsors'' and ''may not require a particular formulary or institute a price structure.'' It is right here on page 53.

Opponents claim that this provision, which originated with Democratic proposals, is a concession to the pharmaceutical industry. That is plain wrong.

The noninterference provision is at the heart of the bill's structure for delivering prescription drug coverage through market competition that gets a good deal for consumers, rather than through price fixing by the CMS bureaucracy. As CMS Administrator Tom Scully explained in the November 21, 2003 issue of the Washington Post, if Medicare negotiated prices, ''I wouldn't be negotiating; I'd just be fixing the price. Let's get seniors organized into big purchasing pools that get bulk discounts and see how they fare.''

Ironically, this provision was created by the Democrats and first appeared in May 2000 in a bill sponsored by Senator DASCHLE and 33 Democratic cosponsors. In June 2000, Mr. STARK included the same language in his motion to recommit H.R. 4680. That motion received the support of 203 Democrats and Mr. SANDERS.

The provision protects patients by keeping the Government out of decisions about which medicines they will be able to receive. Under this section, CMS will not be able to dictate that drugs must be excluded from a PDP formulary or subjected to reimbursement limits that effectively deny access.

The bill relies on market competition, not price fixing by CMS, to deliver the drug benefit. The bill's entire approach is to get seniors the best deal through vigorous market competition, not price controls.

CBO scores the bill's approach of relying on at-risk private sector plans to deliver the prescription drug benefit as getting a higher cost management factor for Medicare than bills where private sector competition is handicapped by Government. The noninterference provision protects this approach, by preventing politicians and bureaucrats from getting into the middle of the very negotiations that drive these savings.

Private plans have strong incentives under the bill to negotiate the best possible deals on drug prices, because they are at risk for a large part of the cost of the benefit. They also will have the market clout to obtain large discounts. By driving hard bargains, they will be able to offer lower premiums and attract more enrollees.

The alternative is a command-and-control system that would not be responsive to consumer desires or marketplace realities. Bureaucrats would

swing between adding benefit requirements without a means of paying for them and restricting choices and access in an effort to contain costs. This bill wisely rejects that approach. The noninterference provision is the fundamental protection against it.

Finally, the conference report lowers the cost of drugs for all Americans by reforming the Hatch-Waxman drug pricing laws.

The agreement will speed the process of allowing generic drugs to come to market, which will significantly reduce drug prices.

The agreement will provide brand drug companies only one 30-month stay on the approval or a generic competitor.

Generics would be forced to forego their 180-day generic exclusivity if they do not bring a product to market within a specified time period.

These reforms are the most aggressive since Hatch-Waxman laws took effect in 1984.

These reforms have also earned the strong endorsement of the Generic Pharmaceutical Association and dozens of allied groups who are advocates of increased generic usage and low drug prices.

So to my colleagues who say there is nothing in this bill to lower drug prices, they are not talking about this bill.

My friend and colleague on the Finance Committee, Senator BAUCUS, has come to the floor. He is primarily responsible for the legislation that is before us because he has been very willing to work in a bipartisan way to get things done. We would not be here today if it was not for the hard work of Senator BAUCUS, the ranking Democrat on the Finance Committee, and a person with whom I can work very well.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, first I deeply thank my good friend from Iowa, Senator GRASSLEY. I know people in his home State greatly respect him. I read somewhere that he has the highest approval rating of any politician in the State of Iowa. I am sure that is true and I can understand why. It is because he is straight, down to Earth, and honest. He tells it like he sees it, no guile. I want Senators to know that this is my impression, as well. I say this because when he explains the provisions of this bill, I hope people listen. Senator GRASSLEY is not one to gild the lily, not one to indulge in inflammatory rhetoric, not one to exaggerate. He is someone who tells it like it is. This is a very important personal quality of his, and one that I revere deeply.

I thank the Senator for allowing me to work with him as the chairman of the Senate Finance Committee.

I would like to take a few minutes to discuss the Medicare conference report before us. I am sure a lot of people across the country have heard statements by many Senators and House Members and are wondering who is telling the truth. They hear a set of allegations from one side and lots of responses from the other side. It must be incredibly difficult to determine the truth.

A few days ago, Senator BREAUX and I met with 20 or 25 House Democrats. The group is known as the New Democrats. Senator BREAUX and I explained to them what was in the bill.

Over and over again, the New Democrats asked: What is going on here? Our leadership tells us one thing and you are telling us something else. Whom are we to believe?

Senator BREAUX and I explained the bill to the best of our ability. We tried to be honest and straight with the facts. It is my belief that the facts are usually controlling. Once people understand the facts of a bill or legislation, they can make up their own minds. It was our intention to just give the facts so these House Members could make up their own minds.

I suspect that a lot of them were in a difficult place: stuck between their leadership, which was pressuring them to do one thing, and the facts which were inclining them in the other direction.

I further suspect that many people watching across the country tonight are wondering the same thing. There are compelling speeches on both sides of this debate. Who is telling the truth? After all, that is what it is all about.

I am going to do the best I can to explain why I am supporting this Medicare legislation, why I personally think it is a good bill. I am going to use the facts, as opposed to rhetoric. I am not a great rhetorical speaker. As with the Senator from Iowa, I tend not to embellish. Maybe it is because we are from agricultural states. We have learned to accept that we cannot control everything—we cannot control the weather for the crops and the livestock; we cannot control the market price. We accept reality for what it is and tell it like it is because that is the way we have grown up. I will do my very best to give a fair take on facts of this bill.

Why do I support this bill? For many years, Congress has been trying to pass legislation that gives prescription drug benefits to seniors. For many years we have been talking about it. Some years we have come pretty close. Last year, for example, we were very close. I can remember a meeting I had convened in my office with the key Senators: OLYMPIA SNOWE, TED KENNEDY, CHUCK GRASSLEY, Senator GRAHAM, and four or five or six other Senators from both sides of the aisle—liberals and conservatives. We came very close.

But in the end, partisan politics dominated—I think because some wanted an issue, not a solution. We were pulled apart, and in the last moments, we were unable to pass a prescription drug bill.

Here we are again today. We are even closer this year because we have actual legislation that has passed both bodies of the Congress, and a conference report before us. It is not possible to get any closer. If we do not pass legislation this time, I do not know if we ever will. And this would be a tragedy. This bill provides $400 billion over 10 years to create a prescription drug benefits for seniors. This is what the debate comes down to.

We know the importance of this bill because drug prices are increasing rapidly, while at the same time, drugs are becoming ever-more important. They oftentimes replace expensive hospital procedures. And new medications are constantly being developed. New, so-called miracle drugs are being developed today that will help treat many different illnesses in the future.

Many of our seniors with low incomes and fixed incomes simply cannot afford the drugs they depend on. It is critical that we pass this legislation. Every other country in the industrialized world provides prescription drug benefits for their seniors. We are the United States of America. Why in the world do we not provide prescription drug benefits for our seniors?

We should.

And we now have the opportunity before us. I do not know when we are going to get this opportunity again. If we do not act now, the chances of passing prescription drug benefits for seniors in the next several years is very slim. Next year we will be faced with higher budget pressures: The national debt is increasing; our deficits are rising due primarily to uncertainties overseas—Iraq and Iran; due to terrorism; and due to greater domestic needs. If we do not pass prescription drug benefits now, we are unlikely to have another opportunity again. If we do not act today, the $400 billion will not be there next year.

I also support this legislation because of its very generous low-income subsidies for one-third of all senior citizens. These senior citizens, one-third of all senior citizens, will have 90 percent of their drug costs paid for. Under this legislation, 90 percent of their drug costs are going to be paid for by the federal government.

This is a very important measure in this bill. It provides very strong low-income protections. I do not know if we are going to have these protections again in future Medicare legislation, if we even have future Medicare bills. When are we going to again have such generous assistance for our low-income seniors?

An additional reason I support this legislation is that it contains a strong government fall-back plan. This is a

technical term which means that when there are not two private drug plans available in any region, a senior is able to access a guaranteed government fall-back plan for their drug benefits.

The only question is: Are there two private plans in any given region of the country? If there are, your prescription drug benefits are covered through the private plan with all of the guarantees that are written in the legislation to ensure that seniors are not taken advantage of. If there are not two private plans in the area, then the Government fall-back plan goes into effect.

The bottom line is that all seniors in America will get a prescription drug benefit. All seniors in America are covered by this bill, whether it is in a private drug plan or through the government fall-back plan. This is what we mean by a strong Government fallback—all seniors will get the prescription drug benefit.

It is true that the House bill did not include a strong government fallback. But we are talking about the Conference report. And in this legislation, all seniors will have access to the drug benefit.

The fourth reason I support this legislation is rural payment equalization, as well as other strong provider provisions.

During the many years I have been in this body, I have worked hard to make sure that Montana and other rural States get the same payments for hospitals and doctors as urban States, as the big States.

We have been fighting for this for years. Finally this legislation addresses this inequity. If this bill does not pass, I do not know when we are going to be able to address this issue. Nothing is guaranteed in the future. Times change. Congresses changes. It is difficult to predict the future. A bird in the hand is worth two in the bush. We have a bird in the hand now.

We have strong rural provisions in this legislation. If it does not pass now, the chances of rural areas getting a square deal and a level playing field are going to be in serious jeopardy.

I say to those Senators from rural states, how can you vote against a bill and deny increased payments to your home states when you are probably not going to get them again, when you have been fighting so hard to get them for so many years?

I would now like to turn to another issue that has been discussed frequently and which is of great concern to many Senators, and well it should be.

As indicated on this chart, employer-sponsored retiree coverage is declining.

Eighty percent of companies offered retiree health care coverage in 1991. In 1996, it fell to 71 percent. In 1999, it fell to 66 percent. In 2001, it fell to 62 percent, and 2003, 61 percent. There is a steady decline of companies dropping or reducing their retiree coverage.

You might ask, Why is that happening? It is happening because of competitive pressures. Companies want to cut back on costs wherever they can to maximize their profits. Retiree health benefits is one area where they are cutting down their costs. They are reducing coverage for their retirees. It is inevitable and it is happening.

Why do I mention this? What does this bill do to address this phenomenon? This is an extremely important point, and I hope Senators and staff are listening. This bill discourages employer retiree droppage; discourages, not encourages, it. It provides tax-free subsidies for companies to discourage them from dropping their retiree benefits.

This bill provides $88 billion—$88 billion—to companies for their retiree plans. Eighty-eight billion dollars is going to companies to discourage them from dropping their retiree plans.

The Congressional Budget Office said under the Senate bill that there would be about a 37-percent droppage rate; in the House bill, about 32 percent.

But in this Conference report, we have provided additional funding. The rate is now down to about 22 percent. But that 22 percent would be higher if this additional money was not provided.

The actual number in the conference report is 17 percent. This number reflects a more accurate calculation. 22 percent is apples to apples to the 37 and 32 percent in the Senate and House bills. The 17 percent is a more accurate figure.

The net effect is the droppage rate is about 50 percent less as a consequence of the provisions in the conference report. Companies are getting $88 billion to maintain their retiree coverage.

I ask my colleagues, if you vote against this bill, what are you going to say to those employees who lose their retiree coverage when you had the opportunity to vote for a bill that would have provided funding to address this problem? What are you going to say to those retirees when you tell them you voted against a bill which would have discouraged retiree droppage? What are you going say to them? I don't know; it wasn't perfect.

This bill has the effect of discouraging—not encouraging—retiree droppage. I hope Senators pay very close attention to this point. This issue concerns many Senators.

I would like to address another issue—the impact of this bill on dual eligibles.

We have heard criticism that the effect of this bill is to make drugs more expensive than current law for dual eligible senior citizens.

This is completely inaccurate. The assumption behind this argument is that this bill has a $1 and $3 copay for drugs for dual eligibles. For seniors who are under 100 percent of poverty, this bill has a $1 copay for generic drugs, and a $3 copay for brand-name prescription drugs.

The assumption behind the argument that the 6 or 7 million dual eligibles will be worse off is that these seniors do not currently have copays under Medicaid. That is not true. Most States, at least 38 States, already have Medicaid copays. The 6 or 7 million worse off is simply a false figure.

In fact, most States are under tremendous pressure to reduce the costs of their Medicaid programs. One of the ways they decrease costs is through increasing copays.

For those Senators who have been claiming that 6 or 7 million will be worse off, please look at the Medicaid copays in many States and anticipate what will be the situation in the year 2006. It will be worse; 38 States have copays. Not all are greater than $1 in $3 now, but if States continue to cut back on Medicaid to balance their budgets, then the copays will rise.

Today, Illinois already has $1 and $3 copay. The bill does not hurt low-income seniors in Illinois. In Maryland, there is a $2 co-pay for brand-name prescription drugs. In Massachusetts, it is for all drugs. The same is true for Nevada. I see my good friend Senator REID is here. He knows more about Nevada than I hope to know. North Dakota is $3 for a prescription. South Dakota, about the same. And these are just some examples.

If you look at the facts, the 7 million figure is closer to about 1 million.

Another inaccurate criticism is premium support. There has been a lot of talk that premium support will undermine Medicare as we know it. I would never vote for a bill that I thought would undermine fee-for-service Medicare. I would not do that because I know how important it is to seniors, certainly in my State of Montana.

In the year 2010 there will be six demonstration projects. That is far better than the House bill which wanted a full-blown nationwide premium support. We have heard a lot of horror stories about premium support, but that is based upon the House bill, which had full-blown, nationwide premium support. This is not a fair criticism. People are talking about another bill, not the Conference report before the Senate.

What is before the Senate is a bill which says in the year 2010 there will be up to six MSAs, metropolitan statistical areas, that could test this concept of premium support. I might add, as I have said before, that Medicare fee for service is held harmless. People in these areas who want to stay in fee for service can. There is no requirement they get out of fee for service.

Remember, the President earlier proposed legislation that would have required people to join private plans to get a drug benefit. That was then. This

is now. This bill does not say that. This bill says, if you want to stay in fee for service, that is fine. You do not have to join a private plans.

Some Senators also worry that Part B premiums might rise because the private plans will take the healthiest seniors, forcing up the fee-for-service Part B premium.

This argument is not true.

All low-income people are held harmless in Medicare fee for service. Their Part B premium cannot go up. They are held totally harmless. As I mentioned earlier, a third of America is classified as low income in this bill.

What about those who are not low income? This bill limits any premium increase to 5 percent. This is significant.

Part B premiums for next year, 2004, are going up about 13 percent for all senior citizens. Why is that? Because this Congress, using its best judgment, has decided to increase dollars to doctors. Seniors pay for 25 percent of this increase through higher Part B premiums.

In this bill, the premiums cannot go up by more than 5 percent in the premium support areas.

Another point: A maximum of 1 million beneficiaries may be affected. I mention this number because there are a lot of other figures being discussed, including that 10 million senior citizens will be affected by premium support. Ten million is not an accurate figure. It is not true. We went to an objective source to find out what is true and accurate. We went to the CBO. CBO told us that between 670,000 and 1 million people could be affected by this bill in the six areas. Even so, these people can stay in standard fee for service. They are not required to go into private plans. There is no incentive, unless a premium support plan does offer a much better package, much more in benefits, much lower in costs. That is possible. I don't think it is likely, but it is possible.

The main point is that very few people could be affected by premium support. It is not the 10 million figure we have heard. Take the figure of 10 million, cross out the zero, and you get the real figure of 1 million or fewer.

Next, this legislation limits the number of sites to six. There can be no more than six MSAs in the Nation. The Secretary has no discretion to add more.

In addition, this legislation says these demonstrations are limited to 6 years. That is in statute. That is not regulation. The Secretary cannot change that at his discretion.

It takes an act of Congress to extend or expand these six. After 6 years, the issue will be before Congress to decide what to do: Do we want to extend the premium support areas? Do we want to eliminate them? Do we want to change them? This cannot, by regulation or the Secretary's decision or by the President's decision, be changed; it takes an act of Congress to change.

I might add, as well, that there are payments in this legislation that go to preferred provider organizations to see if they can work.

But preferred provider organizations have to be regionwide. They have to serve the whole region. They cannot pick and choose individual MSAs. As we know of today, HMOs pick and choose. They go to the counties they like and avoid the counties they do not like. They cherry-pick the healthiest people. They do not go to the counties they don't like, those with the less healthy people. This is not the American way.

This legislation provides for additional funding for the regionwide PPOs which go into existence in the year 2006. There is a $12 billion fund which helps get these plans up and started. But again——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BAUCUS. Mr. President, may I ask for a few more minutes?

Mr. REID. Mr. President, we have 4½ hours of speeches still tonight, and that is why we have limited it to half an hour each.

Mr. BAUCUS. If I could just have 1 minute?

Mr. REID. Sure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Montana.

Mr. BAUCUS. Mr. President, I will just sum up by saying, I have spent a lot of time on this legislation. I am not going to do anything to hurt senior citizens. It would be foolhardy, foolish, stupid. And this bill does not hurt senior citizens, it helps them.

There have been a lot of charges against this bill. It is very easy to be negative. It is very easy to find fault with anything.

This bill is not perfect, but it is very good.

I urge all of us to remember, this is a very good bill. It gives great assistance to our seniors. We have subsequent years to work on it, build upon it, and to make changes. But if we do not pass it now, the chances are very slim we will be able to pass prescription drug benefits for seniors again.

So I strongly urge my colleagues to support this bill and oppose procedural motions which will impede passage of this bill.

The PRESIDING OFFICER. The assistant Democratic leader.

Mr. REID. Mr. President, first of all, I want to underscore the comments about the Senator from Iowa, Mr. GRASSLEY, which were made by the senior Senator from Montana.

Senator GRASSLEY is a dedicated Senator, a gentleman, and I have great respect for him. So I appreciate the Senator from Montana saying those nice things about the senior Senator from Iowa, Mr. GRASSLEY.

But I also want to say that on our side we have two people who have been so heavily involved in getting a bill here. One is the ranking member of the Finance Committee, Senator BAUCUS, who, as he said, is my friend. I have the deepest respect for him, and I know how hard he has worked on this legislation. He has kept me apprised of his progress and slippage on occasion.

Senator BREAUX and I, of course, came to the Senate together. There is a bond of friendship between us that will last forever.

So even though I do not agree with my two friends, Senators BAUCUS and BREAUX, on this legislation, no one can take away how hard they have worked on it and how they believe they are doing the right thing.

Mr. President, the Presiding Officer knows that my father was a hard rock miner. As I look back, the best times we spent together were when I was a little boy.

My dad worked in a number of mines, but the mine that I remember is a mine called The Elvira. My dad worked underground alone, which was, of course, against the law. No one ever prevented him from doing that. The mining inspectors rarely came to Searchlight.

It was during the summertime, when I was out of school, the first summer I can remember going down with him, keeping him company.

As I look back on my father, those were times we had together underground. I had my own little hat, with a carbide lamp. I was not much help to him, but I kept him company.

My dad was a very quiet man, but he would talk to me. We had wonderful times. I would have my own lunch. My mom would pack my lunch.

But my dad taught me a lot of things. As I indicated, the finest memories of my dad are from those days we spent together underground.

As I got older and stronger there were things I did later, as I became a teenager, that I could do to help him physically other than just keep him company. But those days were not like the days I spent alone underground with my dad.

He taught me a lot of things. But one of the things he taught me how to do was to pan for gold. Of course, we never had much. He never found much for what he did. There was not much gold there.

But I knew how to pan for gold. You would take the rock and grind it up real fine into a little metal bowl. Then you would put it in like a frying pan, a pan that was made just for that, and shake it with water coming down. And gold, of course, is very heavy, and the gold would be at the bottom. You could see if there was any gold there.

The other way, of course, you could find if there was gold is you could send it to an assayer and find out. But the first preliminary thing you did was pan for gold.

Mr. President, one of the things I learned as a boy in Searchlight is there was a lot of something called iron pyrites. It is fool's gold.

I have this little rock in my hand. It is the same kind of rock I have pictured on the right side of this chart. If you were up close, you could see this glittery, gold stuff on the rock. It is all over the rock, and it looks like gold. It glistens like gold. The only way that you can find out if it is real gold is if you either pan it or assay it.

What I have shown on the left side of this chart is gold. And what is shown on the right side of the chart looks like gold, but it is fool's gold.

I say to my friends within the sound of my voice, even though this product looks like gold, I think if you examine it, if you assay it, you will find it is not gold. It is like the iron pyrites in the mines of Searchlight. It is something we call fool's gold.

This legislation started as a Medicare prescription drug benefit for seniors. Now, this large bill we have here, of approximately 700 pages—approximately 700 pages—about 150 pages of it deal with prescription drugs for Medicare. The rest of it is something that I never thought was to be part of the legislation; it is to reform Medicare.

Now, my friend, JOHN BREAUX, has spent a lot of his legislative life talking about the need to reform Medicare. And I have not talked in detail with Senator BREAUX, but I am confident he was much more involved in and concerned about reforming Medicare than the prescription drug aspect. That is not necessarily bad, but that is what he was focused on.

Senator BREAUX believes that Medicare needs reform. During the Clinton years, he was the chairman of a committee to come up with some Medicare reform. And he came up with it. He was the chairman of that committee. More than 50 percent of the people who served on that panel believed that his program was good that they had come up with. But under the rules of engagement, it took a supermajority to do that, and he could not get that.

So Senator BREAUX, as I have already said about my friend—Senator BAUCUS and Senator BREAUX, fine people, wonderful Senators, but I think this legislation, which started out as a prescription drug benefit for seniors, has gone way beyond that and is now a bill mostly dealing with Medicare reform.

This legislation is OK at first glance, but if you look at it closely, I believe, as I have indicated on this chart, it is really not the gold, shown on the left, but it is the fool's gold, the iron pyrites, shown on the right.

This summer, we passed a bipartisan prescription drug bill, which was not perfect. As it returned from the House, though, the prescription drug bill that passed the Senate has taken a step backward. It is not imperfect; it is bad.

I think there are millions of people worse off. It gnaws away at the foundations of Medicare.

Seniors have trusted this program for 40 years. My position has been that we should make health care available to every American, we should cut costs, we should improve quality, and we should expand access. Upon review of this legislation, we don't have that. We have what I believe is an image, an image that looks like gold, but it isn't, it is fool's gold.

All you have to do is look at the facts. In Nevada, 20,000 low-income seniors will have to pay more when this legislation goes into effect. This bill contains an unfair and confusing assets test. Why would we charge someone negatively because they have planned ahead and have a burial plot, maybe a car, maybe some furniture? This bill contains an unfair and confusing assets test. More affluent seniors are going to be punished. That is not right.

I have been through this once before as a Member of Congress. On catastrophic, I introduced legislation in the Senate that the chairman of the Finance Committee, Lloyd Bentsen, personally criticized me for introducing. That legislation was to repeal catastrophic. I did it because the seniors of America were up in arms. I was a relatively new Senator, and I won't say my colleagues shunned me, but they weren't happy for a while. But that legislation passed. It repealed catastrophic.

Catastrophic was directed toward people who had taken care of themselves, had provided for the future. They were being punished for having done a good job, taking care of the future. They rebelled. And that is what we are going to find here.

Clearly, they will pay more in Medicare premiums. The costs of Medicare will go up for them. They already pay more than their share of payroll and income taxes. They already pay the greater share of Medicare costs.

I have received some letters from people in Nevada, constituents of the Presiding Officer and me. Let's note what some of them say.

Mrs. Betty Sweet of Las Vegas: Don't sell the seniors out to big business HMOs. The HMO plan will be a step down in our care.

Martha Pruter of Reno: This plan is only going to benefit the pharmaceutical companies. It will not benefit consumers.

Mary Ann Brim of Henderson: I oppose the Medicare bill. Has anyone done the math? I can't believe they would support this bill if they had. Certainly you can come up with something better than this.

Now, these people, Mrs. Brim in particular, actually did their homework on the math. The actual drug benefit created by this bill is confusing and offers seniors only a meager drug benefit. Someone who spends approximately $5,000 a year on drugs will be stuck with almost 80 percent of the bill.

People have come to me and said: Vote for this. Nothing is going to kick in for a couple of years. You are protected. You can talk about the benefits of this bill. Maybe they are right. But in a couple years I would look back on this vote saying, I didn't do the right thing because thousands of retirees in Nevada will lose their coverage as a result of this bill.

In Nevada, tens of thousands of seniors stand to lose their current retiree drug benefits. The Nevada senior prescription program that Governor Guinn of Nevada tried, it was one program, and nobody even signed up for it. He has one now that is good, people like it, and we don't know what is going to happen. We don't know what is going to happen to this program.

We heard the distinguished ranking member of the Finance Committee, Senator BAUCUS, talk about demonstration projects, six of them. We could get as many as three of them in Nevada. I don't think we should be used as guinea pigs in an ideological experiment that would force them to give up their doctor and join an HMO or pay higher premiums to remain in traditional Medicare. Those who opt for private plans would have to use a doctor approved by the insurance company in these areas. Over time the seniors who remained in the traditional fee-for-service Medicare would likely be the oldest, the sickest, and the poorest. They would have to pay an ever-increasing premium to maintain their coverage.

This bill would make a wide range of seniors worse off than they are today, from seniors who are eligible for Medicaid, seniors who have coverage through former employers, seniors enrolled in State pharmacy programs, to seniors who will be forced to pay higher premiums to stay in traditional Medicare. That is not the type of prescription drug coverage our seniors deserve. It is fool's gold.

Many of my colleagues support this bill because they like the concept of competition. I like competition, too. But I am in favor of competition where there is a level playing field. This bill does not provide for fair competition.

This rigs the rules in favor of private insurance companies by paying them off to serve a patient whom Medicare would also take care of without the additional incentive that these companies get. It siphons off $12 billion that should be used to help our seniors. It pushes it off into a fund for private insurance companies. That is why we have read in all of the papers around the country that the insurance industry is wild about this legislation. The pharmaceutical companies are wild about this legislation. They wiped out the reimportation we had in our bill,

something that went to the House, where we could reimport drugs which are much cheaper in Canada. That is eliminated, and that is too bad. It was a concept that both the House and the Senate approved. This is something that is hard to comprehend.

This bill even says that when Medicare becomes the largest purchaser of prescription drugs, it is expressly forbidden to negotiate prices with the drug companies. That is why we want these large purchasers of pharmaceuticals, so they can go to the drug companies and get lower prices. In this legislation, they are forbidden from doing this. If we really believe in a free market, why shouldn't Medicare also be able to bargain for good prices? It is no wonder big insurance companies and big drug companies are spending millions of dollars on lobbyists and ads to support this bill.

I have to say they have done a good job. I want everyone to know that the drug companies and the insurance companies have spent their money well. Because the lobbyists have really done well by them, this bill is a dream for the insurance industry and the big drug companies. It tilts the playing field in their favor at the expense of senior citizens. That is not competition, it is corporate welfare.

This bill is not what it claims to be, and seniors are smart enough to see this bill for what it really is, fool's gold. Betty Sweet, Martha Pruter, Mary Ann Brim, they all did their homework and understand that this legislation is not good.

As I have indicated, the actual drug benefit created by this bill is confusing and offers seniors only a meager drug benefit. It is a poor trade when you spend approximately $5,000 a year on drugs and you will be stuck with 80 percent of the bill. When we talk about a pharmaceutical benefit for Medicare, people think they are going to get the drugs at a reasonable price.

The Medicare conference agreement would make fundamental changes to Medicare as we know it, changes that have nothing to do with a prescription drug benefit or building a stronger foundation for the program. It would use our senior citizens as guinea pigs to test the theories of Newt Gingrich and other ideologues.

Am I off base on this? I carry this with me because I have used it on a number of occasions, and now it is kind of withered and dilapidated. I have seen Newt Gingrich, with whom I served in the Congress—a fine person. I like him. I think he has a great mind. And he has been able, with his great mind, to do some things with which I don't agree. But I have here some statements made by leaders. I believe their whole concept is what is behind this legislation.

First of all, this is Senator Bob Dole's direct quote:

> I was there fighting the fight—

He was 1 of 12 against Medicare—

> because we knew it would not work in 1965.

He and many colleagues believed it would never work. Senator Dole was 1 of 12 who voted against it then.

Former House Speaker Newt Gingrich, said:

> Now, we didn't get rid of it in round one because we didn't think it was politically smart, but we believe Medicare is going to wither on the vine.

Former House Member Dick Armey said this:

> Medicare has no place in a free world. Social Security is a rotten trick.

He goes on to say:

> I think we are going to have to bite the bullet and phase it out over time.

Those are direct quotes. I think part of what we have behind this legislation is an effort to have Medicare wither on the vine, and it will be withering on the vine. I think we should understand that this legislation is not what it purports to be; it is not. As a result of that, I believe we should vote against this legislation.

Mr. President, how much time do I have left?

The PRESIDING OFFICER (Mr. ENZI). The Senator has 11 minutes.

Mr. REID. Mr. President, I yield that time to my colleague from Nevada, Senator ENSIGN.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. ENSIGN. Mr. President, I want to talk about one Senator's journey through this bill, trying to make a decision based on the facts and trying to get through the rhetoric, because there is a lot of that going on in any piece of legislation. So I am trying to write down the pros and the cons of this legislation and go through them in a systematic fashion and try to make a decision based on policy and not based on politics, a decision based on what is in the bill, not on what people are saying is in the bill.

As I have gone through this, I have a whole list of general principles that I believe are good. I have still not made up my mind on this final piece of legislation because it is really a balancing act. There are good things and there are things that are not so good. Just to mention a few of the things that I believe are good in this bill, probably the best thing is something called the health savings account, which has nothing to do with Medicare today. It has to do with reforming the overall insurance system in our country for health care. It is something I have been fighting for, for many years and introduced legislation on when I was in the House of Representatives on the Ways and Means Committee.

We passed it several times, but unfortunately, when we passed the final version, we had to water it down so much that we enacted a piece of legislation that did not work. So the health savings accounts in this piece of legislation, I believe, are going to be one of the most significant reforms we can possibly enact for the future of bringing the patient back into the accountability loop. When you have a third-party payer system—what I mean by that is the person receiving the care doesn't directly pay for the care; it is a third-party payer system.

So when you walk into a doctor and the doctor says we need to run this test and that test, the person doesn't even say how much do those tests cost or is there a cheaper place to go get an MRI, for instance, or is one place better or cheaper or is a certain specialist better than others or is one cheaper than others, and maybe of the same quality—none of those kinds of discussions happens because they are not paying the bill. The health savings account allows them to put money into an account tax free. It builds up in the account tax free, and when it is taken out for health care expenses, it is taken out tax free. Then that person directly pays the doctor.

Now, why is that significant? It is significant because in our current system, whether it is traditional Medicare fee for service, or even the HMOs or the PPOs, all the payments go through some kind of bureaucracy, whether it is a Government bureaucracy or a private one. Anybody that has experienced our health care system today knows that maybe companies are not trying to deny payment but it certainly seems like that in a lot of cases.

My in-laws are dealing with this right now. My father-in-law had cancer last year. They have been battling for almost a year now on whether the insurance company should pay for a large part of their coverage or not. That takes a lot of time for people to process, to answer phones, go through the whole process. If somebody is paying out of their own pocket to the doctor, none of these conversations has to take place, and that money that is saved through the bureaucratic process can go directly to health care. I believe health savings accounts are one of the most positive things in this bill.

Mr. President, will the Chair please notify me when there is 1 minute remaining?

The PRESIDING OFFICER. The Chair will do so.

Mr. ENSIGN. Second is the means testing idea of Part B, the affluence testing, as it is being called. I think it is wrong. This is not a part of Medicare where people are paid in their taxes over the year. Part B is something that younger generations—such as the pages we have here—people paying taxes out there are paying for seniors, and we should, at least for those wealthy seniors, have them pay for that benefit they are getting, instead of shifting the benefit on to middle-class taxpayers. That is also very good.

Another part that is good in the bill is this idea of a disease management pilot project. Right now in Medicare, you go to one doctor and Medicare pays, and maybe you have diabetes and you have to go to several specialists, internists, or whatever; there is nothing really coordinating care. So you get different prescriptions and different doctors. There is no real coordination of care and also not a lot is being done preventively. So we end up with poor-quality care, poor outcomes, and we spend more money.

We have a great demonstration project, a pilot project that Republicans and Democrats actually should like in this bill on the disease management part of it. In the future, I believe it will improve outcomes for seniors healthwise, and it will also save costs.

As to some of the negative parts of the bill, first of all, it does not kick in right away. A bill that I introduced would have kicked in as soon as the drug discount card kicks in. That is the only thing that really kicks in, in the next 5 or 6 months—the drug discount card. The legislation I had introduced actually would have fully kicked in. The Democrat bill and Republican bill we had debated, none of those kicked in right away, and neither does this bill.

The other problem with this bill is there is a cliff at 150 percent of poverty. After that, you kind of drop right off the cliff. So for those below 150 percent of poverty, this is too generous. With a $1 and $3 copay, we are going to incentivize people to overutilize drugs, pure and simple. You are going to see overutilization of drugs. We see it in Medicaid today because of the low copays and we are going to see it here. That was a huge mistake that we didn't once again have people receiving the drugs having anything financial at stake. And $1 and $3 copays will not change behavior in any way whatsoever.

The other thing that actually we have to consider—and we should at least go into this with open eyes—this is the largest wealth transfer since Medicare was first put into effect. We just have to know that. The $400 billion is being taken from younger people and given to older people. The older people didn't pay for it. We are giving that. So we have to go into this with open eyes.

The other thing I believe is a problem with the drug benefit we have in Medicare is that it is giving it to the wealthy. I don't believe we should be. We should be helping and putting almost all the benefit into the people who are literally having to choose between prescription drugs and rent and maybe whether they are going to eat that month or what kind of food they are going to eat that month.

Instead, this bill gives coverage for everybody on Medicare. I don't believe that is right. When Bill Gates turns 65, I don't believe he should be getting a prescription drug benefit that is paid for by some union worker who worked hard all of their life and paid taxes. I don't believe that is right. So I believe the prescription drug benefit should be means tested. That is another negative in this particular piece of legislation.

Just mentioning a couple of the things, there are some really good pieces of this bill, but there are some major negatives in this bill.

When we are going through all of the rhetoric, I think all of us have to be honest. The supporters of the bill should be honest that there are some problems with it, but the people who are against the bill should also be honest. This does not end Medicare as we know it. This is a bill incredibly generous to low-income seniors. Even if I vote against this bill, I have to say this is incredibly generous to low-income seniors. That is just being honest. All seniors pay out of pocket is a $1 copay for generics and a $3 copay for brand name prescription drugs. That is an incredibly generous benefit.

In conclusion, as I go through this next 24 to 48 hours—whenever we are going to vote on final passage of the bill—it is a 700-page document we got a couple of days ago. I think we have to take our time to go through the bill.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ENSIGN. Taking our time to go through the bill is very wise to do because my biggest fear—and we see this happen with legislation all the time—when we have this kind of complexity in a document is the law of unintended consequences.

We enact bills all the time. When we enacted HIPAA—and the majority leader is on the floor and he knows better than anybody—the HIPAA law is a terrible piece of legislation, and we are suffering consequences today. We are driving up health care costs unnecessarily because of that legislation. That is why I am still trying to go through this legislation to make up my mind.

I thank my colleague, the senior Senator from Nevada, Mr. REID, for yielding me the time to speak tonight. I look forward to hearing the majority leader's comments on this legislation as I am still battling through what I am going to do on it.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. FRIST. Mr. President, I will be speaking for about 30 minutes. I ask that the Chair notify me when I have used 25 minutes.

The PRESIDING OFFICER. The Senator will be notified.

Mr. FRIST. Mr. President, we are at a truly historic time. A lot of times we exaggerate a bit to make a point. It seems as if on every bill somebody says: This is a historic bill.

As a physician, as someone who has had a great privilege in life, a blessing in life to have served as a physician and to have taken an oath to serve humankind in such an intimate and personal way, I truly believe it is an historic time because with the action we are almost certainly going to take tomorrow night, we are going to change the lives of 40 million seniors and also 77 million baby boomers who will be seniors over the coming years by this single piece of legislation.

It is rare we can say that. It is so rare. Everybody gets sick at some point later in life—everybody. If it reaches a certain threshold, you seek medical care. This bill will affect the type of care you receive, whether or not you have appropriate access, the quality of that care, and the response of the type of care that is given to you. That is why I say it is a historic bill.

I am confident we will pass this bill tomorrow night. I know there are a lot of statements that have been made: We are going to obstruct; we are going to filibuster; we are going to use procedural moves. But at the end of the day, nobody from this body, I believe, can go home and say—when we are an eyelash away, after 6 years of hard work of trying to put together the very best bill possible—that we would go home having denied the President, with the leadership he has shown, and the House of Representatives, with the leadership they have shown, and the hard bipartisan work on this floor, and then tell seniors: It is not going to happen. Once again the promises that have been made have been denied you.

Why do I say that? That is the question I wish to answer over the next few minutes.

I want to start from afar and then come down to some of the specifics of the bill and paint a picture, paint a portrait that I think helps, at least in my own thinking, to explain to the American people why this is a pivotal time, why we have to act now, why we can't wait another year or 3 years or 5 years, why at this moment in history events have come together in conversion. There is a reason, and when we act, we will have a much more dramatic impact in improving health care and improving health care security than if we were to wait.

In 1965, Medicare began. I didn't start practicing medicine until the eighties, but through that period of time, it is just amazing. We have seen health care advances that are remarkable in terms of medicine, science, and technology. The half-life of medicine—that is a statistical way of looking at medicine and advances. It got smaller and smaller and smaller and smaller because of our knowledge and understanding. Advances have been made in both health services delivery—that is how health care is delivered and how it is organized—as well as scientific and technological advances.

I am going to show three graphs using this same format. On this Y axis

is change. It is fairly arbitrary in describing change, but it is improvements, it is how things change over time. Along this X axis, it starts in 1965 when Medicare started and ending in the year 2005, as we project ahead.

We can see this change came along pretty steadily, and all of a sudden it started to go up, up, up, and I would put it way up off the chart. That is where this change is going.

The first successful heart and liver transplant was in 1965. That is a fascinating history. That is the field I ended up going into, heart transplant surgery.

Coronary angioplasty, when people have drug-eluting stents, and we hear about it all the time. It wasn't that long ago. That was just in 1977. We had the first open heart surgery cases in the 1960s.

In 1974, the HMO Act was passed in this body. Prozac, a drug many people are on today, was first used in 1988. It is interesting, when the PPOs—and I will talk more about PPOs shortly—began in 1985, 1 million people were enrolled. Within 13 years, 90 million people are enrolled in these PPOs.

We had the human genome project, a fantastic project which just finished this year. It was a successful public-private partnership. This chart shows all the advances. The point is, these advances are getting faster and faster.

The next chart uses the same format, but it shows what Medicare has done. Has it changed as well? Medicare has not changed very much. It started in 1965. It was enacted into law in 1965. It is a great program, a fantastic program. I had the opportunity to treat thousands of patients in Medicare. It has given them health care security.

But, contrast Medicare to all the health care advances, and we can see it hasn't changed much over time.

In 1972, it was expanded to include end-stage renal disease and dialysis. That was a a good advance.

There was a good advance in 1985 with prospective payments for patients who are actually in hospitals. It was pretty revolutionary at the time.

We have had people refer to catastrophic coverage. Notice line went up and went down because catastrophic coverage was repealed. A lot of people said: Is this bill going to be repealed? If I have time, I will comment on that because there is a clear answer to why that is different.

There were prospective payments for physicians 1990. In 1997, we added the Medicare+Choice Program and other prospective payments.

Now we are in 2003. And tomorrow night are we going to improve and change Medicare in a positive way. People say you can change Medicare and that is bad. That is not bad; that is good.

We are going to strengthen and improve Medicare, and that is the whole purpose. The next chart shows very clearly the advances in technology go on up, but Medicare is too rigid. It does not change. We are not capable of changing the structure of Medicare fast enough in this body and therefore that rigid structure cannot adapt to new drugs, new pharmaceutical agents, new ways to deliver health care, new types of PPOs. We just do not change.

So the gap, is what we are addressing. If we do not pass this bill tomorrow night or tomorrow afternoon—the sooner the better on my part—I think we are not going to fill this gap, and we are going to be stuck down here when all of these advances are up here and these advances are being denied seniors.

That is why when people say ''filibuster,'' use procedural moves to stop this, do they mean they want to stay down here when we have the opportunity, to catch up and let these health advances be delivered to our seniors? So that is the way I think about things—in terms of what is at stake.

I do not think anybody can defeat this bill and go home from here. They cannot face 40 million seniors and say we are not going to give them the advances that are available to the rest of the world. It is not right, if that is the case.

Now, why today? I have heard from the other side of the aisle again and again: Let's do it next year, 2 years from now, 3 years from now.

It is because we have this earthquake, or this mountain, moving towards us, defined in 1945 by the baby boomers. This is a fertility curve. We know after the war, fertility went up 3.5 births per woman. Then it fell back down. This is moving through the system to the point that in about 2008 or 2010, this curve will begin to move through the Medicare program as these baby boomers age, beginning in about 4 to 5 years.

When they hit the system, what happens is potentially catastrophic if we have not prepared the system for that.

To explain that, I will use the following several charts. No. 1, let's say I am the Medicare system right here. I have seniors who are taken care of over here, and I have people who are paying—that is all the working people today—to support the Medicare system which takes care of these seniors. Well, what is happening is we are having a doubling of the number of seniors because of the baby boom. So the population is getting bigger because of the baby boom demographic shift. It is this point in history that it occurs. It was not 10 years ago, and it is not 30 or 40 years from now. It is beginning right now. We have a doubling of the number of seniors.

At the same time, because there is a big curve moving through, we have fewer people working to pay. So we have fewer and fewer people paying the health care of more and more people over time because it is a pay-as-you-go system. The people supporting the system today are the people working today.

I will show my colleagues graphically exactly what I said. Medicare enrollment—that is the number of seniors over 65 years of age—in 1970 it was only 20 million. What is important is that there are 40 million people today, but because of the baby boom—look at this curve going up—we are going to have twice that in 2030, right at 77 million, this chart says, but it will be right at 80 million. So we have a doubling of the number of people we are going to be taking care of over the next 30 years.

What about the people who are actually taking care of each one of those? In 1970, there were seven people over here working to take care of every senior, but because the fertility curve is moving through in the year 2000, it was about four people working. So for every person working to support one, they are having to work a lot harder. There are fewer people. Instead of seven working, four are working for each one.

What is even worse is that over the next 30 years, instead of four people, it goes to two people. So they are going to have to be working twice as hard for every one person that is benefiting. Yet we have twice as many people who are benefiting. That is the challenge that we have and that is the reason for ''why now.'' That answers the question as to why we should do it in this Congress. We should have done it 2, 4, even 6 years ago. If we do not do it now, it is too late.

That is the reality of Medicare. So people say, why do we not give a drug card and leave it at that, take care of a group of people and give them 50 or 70 percent on the card? The point is, that does not address everything that I have said to date. It does not address the challenge of having a rigid, inflexible, outdated, antiquated Medicare Program, and that is why not just a drug card, though a drug card is important, and I will come back to that. But that is why that is not the answer.

A lot of people say we should not be spending $400 billion. They say we should spend $100 billion and take care of the people who need it the very most. But, that approach does not address the fact that we have an outdated system.

I have said on this Senate floor many times the most important tool a physician or a nurse has today to treat a patient is not the surgeon's knife that I used every day. It is not the hospital bed. It is not even the hospital. It is pills. It is medicines. It is prescription drugs.

Why today? Why are we acting today? That was not true 10 years ago. It was not true 20 years ago. But today it is the most important tool a physician has. Yet it is denied seniors in the

Medicare Program. Seniors cannot get outpatient prescription drugs through Medicare today. It is the most important part of health care. Yet we deny it to our seniors. That is why nobody can filibuster this bill in good conscience because we are denying our seniors the most important tool in medicine today.

Tomorrow, after we pass this bill, since it has been passed by the House, and the President is going to sign it, for the first time in the history of this Medicare Program we are going to have the most important part of health care as a tool. The most important tool in a physician's armamentarian is prescription drugs. It is being denied seniors today.

Now, just an example: Cancer, diabetes, rheumatoid arthritis, osteoporosis—there are drugs for all of these diseases. There are 402 drugs right now in clinical development for cancer. So whatever we do, we do not want to destroy the research that is going on in this country. If drugs are the most important part of health care today, we want to make sure that we promote research and development. That is why we do not engage in governmental price fixing, setting prices by Government, because it destroys all of this in terms of research.

NIH does a good job, and we can fund it. We fund several billion dollars through our NIH, but the private sector's contribution to research is many fold what the government provides. So we have to continue to support that private sector research.

So what do we do? Where are we today? Here we go in terms of how we modernize this system, and at the same time address the issue of prescription drugs. How do we marry it? This bill does it in a bipartisan way.

I predict this bill will pass tomorrow with a bipartisan vote. I know a lot of people are bringing partisan issues to the floor and saying we are going to stop it with such things as procedural votes, but this bill is going to pass with a strong bipartisan vote tomorrow.

Again, what are we going to do? Today, a senior right now has a choice. They can stay in traditional Medicare, just like 35 million have, with good care and a strong system. It is antiquated, it is out of date, and it is inadequate compared to other options that people have today. It does not include prescription drugs, for example. Or a senior can go into Medicare+Choice. Five million seniors have chosen to go into Medicare+Choice. They do get some prescription drugs. Prescription drugs are in green on these charts. For my colleagues who are in the Chamber tonight, they can see the green.

So seniors can get some prescription drugs, but there are no prescription drugs in traditional Medicare today.

No. 1, I mentioned the drug discount card. In this legislation, maybe 6 or 8 months from now, after we pass this bill and the President signs it, seniors will have access to a drug discount card. It will last for a 2-year period. What it says is while we are developing this system, they can get immediate relief through a card. This card will allow a senior to go to the local pharmacy and get an additional 20-percent discount. Maybe it is a 10 or 25-percent discount, but however a senior gets the drugs they might get today, they will have an additional discount.

It is voluntary. This word ''voluntary'' is key because everything that we put into this program today in terms of prescription drugs or giving a choice of a health care plan that might better suit a senior's needs is voluntary. They can keep exactly what they have today—and this is important for people who are listening. They can keep exactly what they have today, with no change in their benefits. They might already have prescription drugs so they would not want prescription drugs. All of this is voluntary. It is not mandatory. Nobody is making any senior even make a decision to do anything. They can keep exactly what they have if they are satisfied.

In addition to this discount, there is a $600 value if a senior is low income, less than 135 percent of poverty. The chart I just showed my colleagues was Medicare today. Remember, the senior could choose either traditional Medicare, which 35 million people have, or Medicare+Choice. After this bill passes, we are going to expand the opportunity to choose, so seniors for the first time can choose the health care plan that best suits their individual needs. If you have Alzheimer's you might choose a plan that specializes in Alzheimer's. If you have Parkinson's disease or coronary artery disease or you have had a stroke or you have seizures, there may be plans out there that can best suit your needs that for the first time you will have access to. That is not available in traditional Medicare.

So a senior can choose under new Medicare. Either the traditional Medicare, keep what you have, don't change anything. If you stay in traditional Medicare, for the first time, if you want it—you don't have to take it—you can choose from one of two and maybe three or four drug plans. They will have equal value, but you can have that choice.

People say what if the drug plans don't show up? If they don't show up, there is a fall-back Government plan there. Everybody can have this new choice, but if you don't want to, keep what you have.

In addition, you can choose Medicare+Choice, which are primarily HMOs. HMOs are maligned on the Senate floor a lot. You talk to these 5 million people who are in them, they really like them. But if you want to, you are also going to be able to choose, from a preferred provides organization or PPO or C. There may be five, there may be three, there may be two, there may be one PPO. These PPOs are integrated health care plans. They have disease management. They have this little green down there showing all of them will have access to prescription drugs.

People say sick people may stay here or they may go into here or they may go into here. You don't really know. My heart transplant patients, who are among the sickest patients going in—before they get their transplant they are all going to die. Coming out, they require a lot of medicines. I would encourage a lot of those who are among the most challenging to take care of, I would encourage them to go into these PPOs. Why? Because they can have a health care plan that is tailored to their needs, that is able to respond to infectious disease, acute care, chronic care, disease management, coordinated care, none of which is available under traditional Medicare. So this is the design. Opportunity to choose all of this. Nobody is forced to choose at any point in time.

Transformational: I won't go through all of this, but I wanted to show this because it is hard as you listen to everybody. Everybody is talking about little pieces. Using the same format, let me show some of the things we do.

In the PPOs, in the choice over here that we are going to give for the first time—I say it is FEHBP-like. What that simply means is we in the Senate have a choice among a group of plans. I happen to take the Blue Cross/Blue Shield plan. That might be one of these plans. But seniors will be able to choose, just like we choose, a plan that might best suit their needs.

These are integrated plans; that is, acute care, chronic care, preventive medicine, coordinated care. You have a choice. You can choose among these plans. There is competition in that these plans will compete one versus the other based on quality, access, and cost. They give the same benefits as traditional Medicare, but there will be competition among those plans based on any of the issues that I just mentioned.

The flexibility: What that really says is that this PPO may be different than this PPO, different than this PPO. It may give a different range of benefits, although all of them will give at least the benefits given in traditional Medicare.

If you look at the drug plans, I have down that they are risk bearing. Risk bearing means the Government itself shares the risk with the plan. That plays into the marketplace. That is the way the private sector works. It captures the dynamism of the marketplace and, over time, and with the element of competition, that can bring the cost of drugs and Medicare down. These are competitively bid. Again, they have the flexibility.

Traditional Medicare: You have heard people talking about income relating, means testing. For the first time, the very rich, the Ross Perots of the world, will no longer have their assistants or their secretaries subsidizing their Part B premiums, their health care. For the very rich, they are going to have to be responsible for more of the subsidy—not all of the Government subsidy for them but more. There is cost containment built in. There are disease management programs that are going to be part of the traditional Medicare.

Quality is going to be rewarded. This is fantastic. I will come back to this if I have time. For the first time, the hospitals, for example, if they report the quality data, they will get their full, what is called, market basket update. The important thing is if they don't report that quality data over time, they are not going to get paid as much. Quality is being rewarded.

It is amazing; as a heart specialist, 50 percent of people in this body are going to die of heart disease, probably. It is higher for women than it is for men. A lot of people don't realize that, in terms of morbidity. More women will die of heart disease than men this year.

Right now there is no screening test reimbursed. Your cholesterol level right now, as a screening test, in Medicare is not reimbursed. Once we pass this bill tomorrow, and it is implemented, cholesterol screening and lipid profiles, preventive tests will be reimbursed for the first time. People say, come on; it has got to be reimbursed today. It is not reimbursed today. That is just an example—prevention.

As to physical exams, people know that is important as a screening measure. A lot of people get to 65 years of age and have never had a physical exam. For the first time in Medicare, everybody is going to have available to them, under Medicare, an entry level physical exam. Before, it wasn't there. It is not there today, but it is going to be there under the bill.

Information technology, I mention that because it has to do with medical errors. Right now we know there are too many medical errors that are being made. We need to facilitate, and adapt information to come into the system and be handled in a way that is consistent, in which the data can be assimilated and reported back. There will be e-prescribing for prescriptions with incentives—not mandatory, but incentives to encourage physicians to be able, instead of writing each prescription and have it go through 10 or 15 different hands and come back where mistakes can be made, by computer it can go all the way through the system where the mistakes are less likely to be made.

It is a complicated chart, but it gives my colleagues the feel for everything that we are accomplishing in this bill—not everything, but how important the various elements of this bill are.

Senator KENT CONRAD in this body is the person who is probably as focused as anybody on this particular issue. I agree with him 100 percent.

How much time do I have?

The PRESIDING OFFICER. The leader has 5½ minutes.

Mr. FRIST. Five and a half. OK. I will move fairly quickly.

The issue is that most people in Medicare today are not very expensive, in terms of their health care. But 6 percent are.

In this body there are 100 people. Not everybody is here right now, but 6 of the 100 people in this body would account for 50 percent of all expenditures in Medicare. That is amazing.

Wouldn't it be great if you could identify which 6 it is, and if you identified them you could focus resources, coordinate their care, get preventive medicine, give them disease management, and that would take care of 50 percent of the cost? In this bill we establish data collection to identify and begin that disease management.

This bill is good for doctors and hospitals. Physicians right now, if we don't do anything today, are going to be cut by 4.5 percent, under current law, as to what they are reimbursed. When we pass this bill, it will increase, instead of being cut, by 1.5 percent.

Hospitals, if they give us the quality data—which they should give do—will get full market basket.

Paperwork: You hear physicians all the time, and hospitals, complain about the regulations and the paperwork. We have significant paperwork reduction in this bill.

Back in Tennessee, the most common request is: What is this bill to me? What does it mean to me?

To seniors, it means a lot. To individuals with disabilities, it means a lot. But in addition, the State of Tennessee, above current law, is going to receive for hospitals, $655 million more; for doctors, $240 million more; and for our Medicaid Program, almost $700 million more, because of this bill.

We hear regarding prescription drug costs that there is nothing in this bill to control prescription drug costs. That is not true. It is simply not true. I encourage my colleagues to read that bill and continue to read it tonight.

We speed generic drugs to the market. All of us know brand-name drugs are expensive. Generic drugs are not very expensive. What we do through this bill and the work of Senator SCHUMER and the work of Senator JUDD GREGG is speed generics to the market in this bill.

We have competition. All the competition, the marketplace dynamics—competition is the only thing we know that over time can slow the growth of, whether it is drug prices or any prices. Price fixing simply does not work. It hasn't worked in Germany, it hasn't worked in England, and it hasn't worked in this country when we tried it in health care. I am going to keep moving here.

Are we helping the people who need it the most, poor people? The answer is yes. Below 100 percent of the poverty level: If you have $100 in monthly drug spending, 95 percent of the cost of drugs is paid for through this plan.

Let's take another example. If you are below the poverty level and you have $500 a month in drug spending, you have 97 percent of all of the costs taken care of by this plan; $1,000, you have 98 percent.

These are the people who need it the most. This plan is generous to the people who need it the most.

In closing, again, I will keep it very short. Hopefully, I can speak for a couple of minutes tomorrow morning.

We are providing access to prescription drugs, the most important tool in medicine today. Seniors don't have it today. They are going to have it after we pass this bill.

This program is voluntary. If you do not want to change anything, if you like what you have today, then keep what you have. Nobody is forcing you to choose. All of this is voluntary.

Private health plan choices: Why? Because private health plans today capture the advances I showed you earlier—coordinated care, disease management, and integrated care. That is what it is in private plans today that is being denied to our seniors. Seniors don't have access to them.

Appropriate reimbursement and regulatory relief to providers, to doctors, to hospitals, to nurses—I just mentioned what the impact is for a State such as Tennessee. Payment linked to quality is not done today. It is not done today in Medicare. For the first time, reimbursement is being linked to quality care.

Lastly, preventive care, physical exam for the first time, if we pass this bill; lipid profile; improvement in mammography screening; chronic care management and disease management.

I know my time is up. Let me close by saying this bill does four things. It strengthens and improves Medicare; it offers prescription drugs for the first time in the history of our Medicare Program; it does it on a voluntary basis; and for the first time in the history of this program it gives seniors access to plans that better suit their needs.

I encourage every Member in this body to vote for this bill.

Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, would you notify me when I have 5 minutes remaining?

The PRESIDING OFFICER. The Senator will be notified.

Mrs. MURRAY. Mr. President, I have been fighting for a real prescription drug benefit for years. In the 106th Congress, I helped draft the MEND Act, and year after year I have used my seat on the Budget Committee to set aside money for a good drug benefit. I voted for several Medicare prescription drug bills, including S. 1 last June and the Graham-Miller-Kennedy bill in the last Congress. I have written and I have introduced legislation to make Medicare more fair to the people of my home State of Washington. I have worked to improve health care for seniors on the HELP Committee, on the Labor-HHS appropriations subcommittee, and here on the Senate floor.

After all of these years of work, no one wants prescription drug benefits more than I do. But I am very troubled by the proposal that is now before us.

I am unhappy at the prospect that this plan could force seniors and the disabled into an overly restrictive health care rationing regime in which they could lose their choice of doctors just to get a pretty meager drug benefit.

I am unhappy at the prospect that this plan could tell our seniors they must give up the good retirement health plan they have worked all of their lives to earn.

I am unhappy at the prospect that this plan could leave our seniors and disabled at the mercy of ever-increasing premiums.

I am unhappy at the prospect that this plan could tell patients who have complex medical conditions they cannot get direct access to specialists they need to see.

I am unhappy at the prospect that this plan could tell patients with MS, or Parkinson's disease, or ALS they can't get the drugs they need because their plan will not cover them.

I am unhappy at the prospect that this plan could tell our rural seniors they will have to roll the dice on how they receive health care coverage because this is not a real choice in their communities.

I am unhappy at the prospect that this plan would tell disabled Americans who are fighting poverty that the drugs they get today can be off limits tomorrow.

I am unhappy at the prospect that this plan would tell seniors if their drugs cost more than $2,300, they won't get a dime of help until they pay $3,600 out of their own pockets.

I am unhappy at the prospect that this plan could break the promise that Medicare has had for our seniors and our disabled since 1965.

This isn't just about plans and formularies and medical services areas; this is about people. It is about our parents and our grandparents and generations of Americans coming behind us.

I have sat down with seniors in my State, and I have heard how badly they need a real drug benefit. Just last August, I met with more than 200 seniors in Edmonds, WA, at the South County Senior Center. They told me in their own words just how important the drug benefit is.

During this debate, I have listened to my colleagues. I have listened to seniors and the disabled in Washington State. I have heard from doctors and hospitals at home. I have read the key provisions in the package, and I have reviewed the Congressional Budget Office estimates. Without a doubt, this is one of the most complex and controversial proposals this Congress has considered.

One needs only to review what happened in the House a few days ago to see how controversial and political the vote was. What occurred during that vote speaks volumes about the failures of this bill and the lengths the majority will go to in order to pass this flawed measure.

At the end of the allocated time for that vote in the House, the bill had been rejected. But the majority leadership refused to close that vote. They held it open for many more minutes, and those minutes turned into hours, and finally at about 6 o'clock in the morning, after holding that vote open for 3 hours, the majority managed to pressure a few Members to switch their votes.

An issue this important deserves a thorough debate. I am troubled that it appears as though this bill is being railroaded through Congress on twisted arms and backroom pressure.

When I look at Social Security and Medicare, I don't just see a program, I see a promise. It is a promise from one generation to the next. It is a promise from our Government to our seniors. And it is a promise that reflects our values.

Coupled with Social Security, Medicare is the most important antipoverty program ever. In fact, before Medicare, in 1963, 44 percent of our seniors were uninsured. Today, it is just 1 percent. In 1966, 29 percent of seniors lived in poverty. Today, it is down to about 10 percent. Since 1960, life expectancy for those over 65 has increased by 25 percent.

Medicare is a success story. It promised our seniors that they will have health care security, regardless of their ability to pay, regardless of where they live, and regardless of their medical condition.

Not only has Medicare helped seniors, but it forms the foundation of all of our health care. Medicare helps train our doctors. Medicare payments help keep our rural hospitals open. And Medicare helps keep emergency rooms and neonatal units operating. Medicare is open to every doctor and every hospital. It doesn't force providers into restricted networks. It lets doctors make decisions based on what their patients need—not on some mandate from some accountant.

It is troubling to think of what rural America would be today and whether inner-city trauma centers would even be in existence today without Medicare.

Let us not forget the reason we created Medicare in the first place. The market failed our seniors.

I approach this debate with a clear understanding of the importance of Medicare to our seniors and to our entire health care system. When I look at this bill, I want to know what it means to the seniors I represent. So far, I have found five big dangers for Washington State seniors.

First, this plan jeopardizes the health benefits retirees have earned during their working years. In Washington State, 47,250 seniors could lose their retiree health benefits. In return, they get much less coverage and they will pay for more than they had planned.

This plan is an unpredictable benefit that requires huge out-of-pocket costs and has massive gaps in coverage. This bill changes the ground rules on seniors in the middle of their golden years, and that is just not right.

Second, seniors could be forced into an overly restrictive health care rationing regime if they want a drug benefit. On paper, it looks as if seniors have a choice. That is what the proponents keep repeating. When we take a closer look, we see what is going on. Supporters claim that seniors can stay in traditional Medicare, but that is only if insurance companies decide to offer drug-only plans. They could offer drug-only plans, but the affordability of those plans is unknown and unknowable. That is because there is no limit on how much a plan can charge, so seniors will not be protected from price gouging.

On paper it may look as if seniors get a choice, but in reality many will face a new system that rations their health care in exchange for a very small drug benefit. Seniors could get fewer choices and less coverage than they have today. They will face fewer choices because of an imposed system of rationing that may not let them pick their own doctor, and they will have less coverage because the plans they will be forced into do not need to cover every drug that is medically necessary.

Third, if you get a chronic, life-threatening disease such as cancer or AIDS, you are not guaranteed the drugs you need. Here is what one client of The Lifelong AIDS Alliance in Washington State had to say:

> The current bill as it is written will affect me personally as it limits the drugs I can have access to because it only allows for up to two drugs under the prescription part of the bill. Since I am on a multiple-drug regimen, I will not have access to the other life-saving drugs that I will have to take to stay HIV healthy.

Those are the chilling words of one of my constituents who is HIV positive and understands what this bill will mean for him. That is why AIDS service providers in my State oppose this bill.

In addition, if you need access to a clinical trial, forget it. This bill does not require any plan to give you access to experimental treatments.

This plan will mean fewer choices and less coverage for millions of seniors.

Fourth, this bill is especially bad for seniors and disabled Americans who are fighting poverty. Today, about 6 million Americans are eligible for both Medicare and Medicaid. Through these two programs, they get the coverage for the drugs they need. But this new bill we are looking at strips away what is known as wraparound coverage. In Washington State, that means about 92,000 people will get less coverage than they have today. That is just in my State. Those are the most vulnerable among us, the very people Medicare and Medicaid were designed to protect.

Fifth, there is a huge gap in coverage. Many seniors will see a big hole in their coverage. Payments will not stop. What you have to pay will not stop, but your coverage will. If your drugs cost you more than $2,250 a year, you will get zero help until you spend a total of $3,600 out of your own pocket. You get no coverage, but you still have to pay the premium.

When you look at what the average Medicare beneficiary spends for drugs, this coverage gap gets even worse. According to the Kaiser Family Foundation, in 2003, the average Medicare beneficiary paid $2,322 for prescription drugs. If you spend the average, you are already in the coverage gap. Those figures were included in the Los Angeles Times article that appeared in the Seattle Times on November 21. They show that the average senior will end up with a gap in coverage from which few seniors will ever emerge.

When I ask, what does this bill mean for the seniors I represent, I am pretty troubled by the answers. I am troubled this could force 47,000 seniors in Washington State to give up the retiree health benefits they have worked for their entire lives. I am troubled this could force seniors in Washington State into overly restrictive health care rationing, to get a limited drug benefit and to lose their choice of doctor. I am troubled this could force patients with cancer, AIDS, and other life-threatening diseases into a system that will deny them the drugs they need. I am troubled this could force 92,000 low-income seniors or disabled Washingtonians out of Medicaid into a market where they lose access to the drugs they get today. I am troubled this could force millions of seniors into a coverage gap where they have to spend more than $3,600 out of their own pocket without getting coverage or benefits.

This bill is also bad for Washington State in seven ways:

It could result in unequal benefits throughout Washington.

It could force providers and seniors to reevaluate their participation every single year, and they will get very little in return for that added unpredictability.

It could encourage seniors who are healthier and financially secure to leave traditional Medicare.

It could undermine Medicaid in Washington State.

It could require my State to send to the Federal Government a very large chunk of the savings it realizes.

It could force Washington State to manage new bureaucracies to test the assets of seniors in my home State.

And it could put Washington State even further down the list in Medicare reimbursements per beneficiary.

Let me walk through how this program would work to show how it is bad for my home State. Under this plan, the country will be divided into as many as 50 regions. States such as Washington could be divided into as many as three regions. Within these new, undefined regions, private insurance plans would be able to run the Medicare Program—not just the drug benefit, but Part A and Part B of the Medicare Program as well.

Washington State will be an attractive market for the PPOs and HMOs because we have areas that are healthier and wealthier and a tradition of health care delivery.

Currently, Washington State has one of the highest Medicare+Choice participation rates in the country with 18 percent of Medicare beneficiaries receiving Medicare through a Medicare+Choice plan.

Washington State also has a long tradition of managed and efficient care, so we will be a prime target for the new PPOs and HMOs. That means Medicare benefits in my State, just within my State, will vary from region to region and county to county depending on where you live. In theory, seniors in my home State may have more choices, but they give up a guarantee of a defined benefit.

Providers in Washington State could also face the same changes and uncertainty. Every year, seniors in Washington State would have to evaluate each insurance plan to find the one that best meets their needs.

Here are some of the things seniors every year in my State will have to figure out. While not knowing what medical conditions they may confront, they will have to figure out how much they have to pay out of pocket. Without knowing what their future holds, they will have to predict what providers they will be able to see. Without knowing, they will have to figure out what doctors have dropped out of their plan or may drop out, what restrictions will be on drug coverage, what their copayments will be, what plan formulary includes expensive new drugs, what hospitals are in their network.

That is an awful lot to figure out, especially since health plans, as we all know, are never written in plain English and no one knows what medical conditions they may confront in their future.

Today, Medicare provides predictability. An 85-year-old woman in her home knows what Medicare provides. Under the Medicare+Choice plan, seniors got more than they gave up.

I do want to state there have been some managed care success stories in my home State. We have some great providers in Washington State that led the way in providing innovative, comprehensive care that puts the focus on patients, not profits. But overall, we need to think how this plan would expand the Medicare+Choice model.

Medicare+Choice has worked only in limited parts of Washington State. A total of 131,391 seniors in Washington State participate in these plans. But they are not open to all seniors and they are limited to a very few select regions. Even in this limited program, we have seen significant changes and instability just within Washington State. I am not at all convinced this is a model we should now expand for all seniors and disabled.

If these new plans that are coming in attract higher income, healthier seniors, we need to ask, what will be left of traditional Medicare? I am afraid traditional Medicare will begin to look more and more like Medicaid.

The prospects for this plan are deeply troubling. They could have a massive financial impact on Washington State.

I will turn to how this plan will affect Washington State and its Medicaid Program.

I received a letter from the Democratic Governors' Association. It is signed by three Governors, including Governor Locke of Washington.

Mr. President, I ask unanimous consent that letter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mrs. MURRAY. Mr. President, the Governors' letter urges Congress to give the States time to determine the impact on their Medicaid programs before enacting sweeping changes in how we treat Medicaid beneficiaries and how States pay for coverage for low-income seniors and the disabled.

So under this plan, if States save money by shifting drug costs from Medicaid to Medicare, States have to give a portion of those savings that they get back to the Federal Government every year.

Many States, such as Washington, have stepped up to the plate and have tried to fill the gap in Medicare by providing affordable, comprehensive prescription drug coverage through Medicaid for people who are eligible for both programs.

Over the past 10 years, as drug costs have rapidly increased, this burden has become overwhelming. Many States are now being forced to scale back their coverage in access.

In 2002, Washington State spent an estimated $212.8 million on drug costs for people who are eligible for both Medicare and Medicaid. That was a huge strain on my State.

Under this plan we are considering, the States will see some relief by shifting Medicaid beneficiaries to Medicare for drug coverage. But, unfortunately, the plan gives with one hand and takes back with the other.

Washington State, under this plan, will be forced to surrender much of the savings it sees back to the Federal Government. That could reduce Washington State's Federal Medicaid dollars by almost $2 billion from 2006 to 2013. That could devastate the entire program and result in further Medicaid reductions for low-income children and families. It could force the State to again implement reductions in provider payments for doctors, hospitals, and nursing homes.

A $2 billion give-back, just for my State, will mean more uninsured, lower provider payments, and more children losing any health care safety net they have today.

Let's not forget that States will be handed a massive new administration burden under this plan. Washington State will now have to administer new asset tests to determine who qualifies under Medicare for low-income assistance. These tests are extremely restrictive and will result in many low-income seniors being pushed into higher income categories.

Under the conference agreement, assets will be limited to $6,000 for a single person and $9,000 for a married couple.

In order to get any additional financial assistance under this plan, many seniors and the disabled will be forced to impoverish themselves and give up almost everything they have worked so hard to earn. Even if the States want to provide a more humane benefit or assistance, they will not be allowed to do so.

Now, many of us fought to provide relief to States just this year by temporarily increasing the Federal Medicaid match. This was a critically important fight to save Medicaid and prevent massive Medicaid cuts on doctors and hospitals. Our success in achieving a small measure of relief is now being undone by imposing an even greater burden on the States.

Finally, Mr. President, this bill will punish Washington State even further in Medicare payments. For several years, I have been working to address the geographic disparities that punish providers and seniors in my State of Washington. For years, Washington State has received unfair treatment.

Today, Washington State ranks 41st in the Nation in Medicare payments per beneficiary. We are being penalized because we have a tradition of low-cost, efficient health care, and healthy seniors. Medicare should reward that. Instead, its outdated reimbursement formulas are causing doctors to leave my State or close their practices to new Medicare patients.

I have spoken at great length on the Senate floor before about this, and I have introduced legislation to correct that inequity. But under this bill, the situation would be even worse.

Washington State would fall from 41st in the Nation to 45th in the Nation. Even though there will be a slight increase in payments to Washington, because of what happens to other States, we end up falling even further behind. This is a fundamental shift in the Medicare entitlement, in exchange for a very weak benefit.

Philosophically, this plan goes in the wrong direction. We should be strengthening the foundation of Medicare, not experimenting with imposing a new health care system on seniors.

This plan undermines the role of the Federal Government in ensuring that every senior can live with the dignity and respect and stability they deserve. It could force seniors into an overly restrictive, ever-changing health system.

Let's not forget why Medicare was enacted in the first place. It was created because the private insurance market failed seniors and the disabled. Coverage was sporadic, expensive, and unpredictable. Medicare, when it was enacted, changed all of that for our Nation's seniors. Now I am afraid we are flirting with that original failed model. I believe we can do better.

During my time in the Senate, I have been proud to work on prescription drug coverage—from helping to draft the MEND Act in the 106th Congress to working on the Budget Committee over the past 4 years to fund prescription drugs.

I was proud to support the Graham-Miller-Kennedy bill in the 107th Congress that would have provided an affordable, reliable, comprehensive prescription drug benefit as part of Medicare. We had a chance to do much better.

I believe a prescription drug benefit ought to be a seamless part of Medicare. It should be treated just like a doctor's office visit or an outpatient surgical procedure.

By implementing a seamless, affordable benefit as part of Medicare, as we did when we added the Part B benefit, we would guarantee that all seniors have access to the same level of care, regardless of their health status or their age or their income or their assets or where they live. That access would be stable, and it would be predictable.

I know we can do this. Many of us in this Chamber, on both sides of the aisle, have worked to significantly boost our investment in NIH funding. We have fought to reform and modernize the FDA to ensure timely approval of new, lifesaving drugs. I want all of my seniors and disabled constituents to benefit from those kinds of investments.

Under the plan before us today, I cannot be sure they will reap the rewards of this Federal investment.

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair is responding to the request that the Senator be notified when she has 5 minutes left.

Mrs. MURRAY. Thank you, Mr. President.

Mr. President, we should be on the floor today debating a prescription drug benefit package, not a proposal to radically alter Medicare. This should be a fight about providing good, affordable, stable coverage, not about experimenting with Medicare.

I do want to thank my friend and colleague, Senator BAUCUS, for his efforts. I know he worked hard to do the best he could. Senator BAUCUS understands the importance of Medicare for seniors and the disabled, and I know he fought against incredible odds. He was sitting across the table from Members of Congress who tried before to privatize Medicare, and many who still hope to turn Social Security over to Wall Street. He faced an impossible task.

I know he did all he could, and I thank him for his fight.

Mr. President, I do want to note there are some things in this bill that I fought for that are important.

It does prevent additional cuts in payments to doctors who are scheduled to take effect early next year. The scheduled reduction of 4.5 percent, as we all know, is unacceptable. I worked hard to prevent that scheduled reduction of 4 percent in 2003, and I do applaud the conferees for meeting our demands on this issue.

The package also provides additional relief for rural hospitals, home health care agencies, and rural health care providers. This relief is truly a life line for saving rural health care. I have always supported these provisions, and I will continue to fight for fair and equitable rural payments.

I can promise health care providers and patients in my home State that regardless of the outcome of this legislation, I remain committed to stabilizing Medicare payments.

Now, Mr. President, I know many organizations representing doctors and hospitals think we can come back in 2006 and correct the mechanisms in this bill that undermine Medicare.

That is a pretty dangerous gamble. Not only that, but we don't know what the people who put this bill together will demand down the road in exchange for changes—premiums support or vouchers for States; larger gaps in coverage; more copayments; more restrictions on access; more deals on the House floor in the middle of the night?

We do not know what the pricetag will be to undo the damage that this bill will impose. I assure everyone, it will not be easy.

I had looked forward to the day when the Senate would pass a Medicare prescription drug benefit. That day is upon us, but I believe that the price of this benefit is far too high.

In the coming months and years we will see the theory behind this bill put to practice. As more and more people discover what this bill and this President have done to their health care, I am confident we will hear from seniors as we have never heard before.

This is a difficult decision. The $400 billion in this bill does represent a step forward. The provider payments contained in this bill are needed in my State, and seniors deserve the prescription drug coverage they have been asking for. Passage of this bill and being signed into law is not the end of the story. A tremendous amount of work will be required to fix the deficiencies in this bill. I will be there, as I have been all these years, working the best I can to do the right thing for the people I represent in my State and the people across this country.

I yield the floor.

EXHIBIT 1

DEMOCRATIC GOVERNORS' ASSOCIATION,
Washington, DC, November 21, 2003.

MEMBERS OF THE U.S. SENATE,
U.S. Capitol,
Washington, DC.

DEAR SENATOR: As you know, the near 700-page Medicare reform bill was unveiled yesterday. As a consequence, states have not thoroughly reviewed the language or seen individual cost estimates needed to make an accurate determination of its benefits and/or costs. Late yesterday, the Congressional Budget Office (CBO) released numbers portraying a net savings to states of $17 billion over ten years. Notwithstanding this projected rosy scenario, neither CBO, nor any other independent entity has completed a state-by-state impact analysis of this legislation. Even CBO is projecting that states will be $900 million in the red in the first year of the Medicare's program implementation in 2006. States need to ensure that their reading of the legislation confirms that the projected new state costs have not been underestimated by CBO.

With this in mind, we urge you to reject any effort to vote on this legislation before you know its full content and cost impact on your state and the people we both serve. To this end, CBO estimates on Medicare reform impact and expedited state reviews of the direct and indirect cost/savings impact from this legislation must be done and fully disseminated. Any rush to judgment, without this information, may have both short and long-term consequences that could prove to be irrevocably severe.

Early in the deliberations of the Medicare reform conference, governors were advised that at a minimum, the conferees were committed to ensuring that states would face no new costs as a consequence of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. This commitment was made for each and every state, for each and every year, of the ten-year budget. For this reason, we are writing to urge you to not vote on this legislation until it is absolutely clear that this assurance has been upheld.

In recent days, there have been reports that the new administrative and other indirect state costs of this program—combined with the bill's exceedingly high ''claw-back'' of state savings—would more than exceed any Medicare savings for many states. Such an unacceptable outcome would be in addition to another misguided policy, reportedly seeking to mandate states and the territories to permanently pay 75 percent of the current Federal prescription drug cost-shift to states. In 2006, the first year of the bill's enactment, states would have to pay 90 percent of these costs.

Some have already suggested that this is a poorly crafted bill and in the long run it would do more harm than good to the very population it was intended to benefit. Although some states are witnessing a small increase in revenues, most states will continue to experience budget shortfalls for the current fiscal year. Some analysts believe that the overall shortfall will likely be $25 to $40 billion. With the continued sluggish growth in state revenues, any increases in state costs imposed by this legislation would be yet another unfunded federal mandate, creating additional pressure on states to cut essential programs and/or raise taxes.

Similarly, any permanent continuation of the Federal government's prescription drug cost-shift to states runs counter to existing National Governors Association (NGA) policy that, ''if Congress decides to expand prescription drug coverage to seniors, it should not shift that responsibility or its costs to the states and territories'' and establishes a damaging precedent.

Sincerely,

GOV. GARY LOCKE,
Washington, DGA Chair.
GOV. TOM VILSACK,
Iowa, DGA Vice-Chair.
GOV. BILL RICHARDSON,
New Mexico, DGA Federal Liaison.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wyoming.

Mr. ENZI. Mr. President, as we all know by now, the Medicare conferees have reached agreement on the most significant changes to the Medicare Program in history. I thank the Presiding Officer for the hours he has spent working on this, the agony he has gone through at understanding and reaching agreement with this diverse body of Senators. There are 100 of us. We usually amount to probably 150 opinions on anything. The Chair has had to put all of that together into a bill that not only the 100 Senators agree with—and not all 100 Senators do—as many of the Senators as possible, and as many of the House as possible, because a bill to go through to the President has to pass both the House and the Senate. When it gets this complicated, it is an extremely talented person who is able to put together the kind of legislation that reaches a compromise that will be able to pass.

This is a copy of the bill. If anybody thinks it is simple, they haven't looked at it. It takes a long time to wander through this. We have been working on it for a few days and now have the finalized copy, the copy that has passed the House. It is the most significant change in the history of Medicare. It may be the most significant change in medical delivery in the history of the world.

I congratulate the Presiding Officer, the Senator from Iowa, Mr. GRASSLEY, for all the hard work he put in on this bill. We will soon be voting on it.

This bill will add a prescription drug benefit to Medicare, it will offer new Medicare coverage options to seniors, and it will expand tax incentives for people who save money to pay for their own health care needs. That is quite a package.

I want to strengthen Medicare. Seniors and disabled people in Wyoming depend upon Medicare to pay for their health care needs. We have relatively few major employers in Wyoming so most of our retired seniors don't have access to health care coverage through their former employers. Medicare is critical to the health and well-being of 66,000 elderly and disabled citizens in my home State. That may not sound like a lot of people, but it is over 13 percent of Wyoming's population.

Adding a prescription drug benefit to Medicare makes sense. Medicare is the only traditional insurance plan in the United States that does not cover outpatient prescription drugs. The reason Medicare does not cover prescription medications is that pharmaceuticals were not a major part of medical care in the 1960s, when Medicare was founded. It is a different story today. Today, prescription drugs are absolutely integral to providing quality health care. All of us rely on them. It makes sense for Medicare to keep up with the times by offering voluntary prescription drug coverage to seniors.

Let me emphasize the voluntary nature of this program some more. We have heard that the AARP is going to regret supporting this Medicare bill just as they regretted supporting the catastrophic coverage bill of the 1980s. I will come back to that a little bit later. The reason seniors revolted against the catastrophic coverage bill back then was that it was mandatory. They didn't have a choice. They had to pay for the coverage even if they didn't want it.

This bill does not make that mistake. This bill is different. If seniors don't want Medicare drug coverage, they don't have to pay for it. If they have coverage through their former employer, they can keep that. Plus we provide a lot of support in this bill for

employers to continue providing their retirees with drug coverage so that seniors won't be forced to buy a Medicare drug plan because they lost their retiree coverage. So this is indeed a voluntary program.

It gives seniors a chance to sign up for Medicare drug coverage or stay in the traditional Medicare and keep what they have. Choice is a great concept. America was built on the idea that people should have the freedom to choose how to live their lives, as long as their choices don't infringe on the freedom of others.

When it comes to health care, choice is also important. Today seniors don't have choices. Medicare is a one-size-fits-all program, take it or leave it. But we all know that most seniors cannot afford to leave it. So right now they are stuck with Medicare, warts and all. The fact that Congress has to pass a law to add a prescription drug benefit is part of the problem with the Medicare system. Medicare is not flexible enough to adjust and adapt to the complex nature of health care today.

As I have noted, prescription drugs play a much greater role in treating disease today than they did when Medicare was created nearly four decades ago. But unlike private health plans, Medicare has not changed with the times. Under this Medicare agreement, seniors will have the option to choose drug coverage through Medicare. They will also have options that go beyond voluntary drug coverage.

The conference agreement would allow a variety of private health plans to offer coverage of Medicare beneficiaries. I am not talking about HMOs. Despite what I have heard here on the Senate floor, this bill does not force seniors and disabled into HMOs. Medicare HMOs exist today, and no one is being forced into them. What this bill does is allow preferred provider organizations, or PPOs, to offer Medicare plans.

Most of us are familiar with PPOs. They are the type of health plans to which more Americans belong than any other type. HMOs give you a list of doctors. If your doctor is not on the list, you can't visit him. The great thing about PPOs is, you can use any doctor you choose. And if the doctor is part of the plan's network, you get a discount on the cost of his or her services. These private PPO plans will compete to serve seniors by offering new choices and benefits, choices that are currently unavailable under Medicare's one-size-fits-all structure.

To be blunt, I believe the legislation could be bolder in stimulating competition. But it represents a good step in the direction of flexibility, innovation, and here is that word again—choice.

Let's be clear on what the Medicare bill would do. It would offer security to seniors who are without drug coverage. It would provide incentives to employers to encourage them to maintain the coverage they provide to their retirees. At the same time, the bill would create new Medicare options for seniors. It also would create incentives for private health plans to innovate and compete for the businesses of today's seniors and invigorate the Medicare Program for future generations.

Let's also be clear on what the bill won't do. It won't force seniors and the disabled to pay for a Medicare drug benefit if they don't want it. It won't encourage employers to drop drug coverage for their retirees. It won't force seniors and the disabled into HMOs.

I should also point out that the Medicare bill won't pay for every dollar of a senior's prescription drug costs. A drug benefit for needy seniors is important, but it is also important that we preserve Medicare for future generations. Already 30 percent of Medicare funding comes from the general government revenues. Projected expenditures are expected to exceed projected tax and premium revenues after 2015. I will be keeping a careful eye on Medicare spending, especially now that we have passed this drug benefit. If we are going to add anything new to Medicare beyond a basic and sensible drug benefit, we need to pay for it directly.

This drug benefit isn't free, but it is responsible. We set aside $400 billion of the Federal budget over the next 10 years to pay for this benefit. That is how much the agreement is projected to cost. Actually, it comes in slightly under that. But last year when we were doing the appropriations, we set aside the $400 billion. Some people say $400 billion is not enough. They point out that seniors are expected to spend $1.8 trillion on prescription drugs over the next 10 years.

Well, nothing in life is truly free, and prescription drugs will not be an exception. We need to remember that every new Federal program comes at a price. We need to be aware of just what that price is when we ask for a new program. It is not always the people receiving the benefit that are paying the benefit. The $400 billion is the equivalent of $1,600 from every taxpayer over that 10-year period. What would taxpayers say about the need for any program if we put it into that kind of a form for them? There would be increased concern just like there is increased concern when people have to pay their own costs of medical treatment.

That is how the competition comes into the market. I suppose we could have passed a $1.8 trillion drug benefit. Of course, we would have had to raise taxes by $1.4 trillion to do it. I cannot speak for the rest of my colleagues, but I just became a grandfather this year and I am not willing to put that kind of a tax burden on my grandson.

Even the critics of this agreement acknowledge that low-income seniors would be eligible for substantial subsidies for their prescription drugs. Even the critics admit that seniors with catastrophic drug expenditures get measurable relief under this bill. There is a generous 95 percent coverage of a seniors' drug cost over $5,000.

This bill also includes important projections for which I fought on the Senate floor this summer, which protect every senior's right to visit their community pharmacy and receive the high level of service they are accustomed to receiving from them. We have put a huge burden on our pharmacists in this country, the local ones that are right there to answer your questions face to face. There is a provision in the bill that will help to keep that local pharmacist in place and operating. It gives them an equal chance under the bill to be providing prescription drugs for seniors on Medicare. It is important that we keep those small businesses and pharmacists—local people that you can talk to—in place.

This bill doesn't cover every dollar of every prescription for every senior. But that is not a reasonable expectation. What this bill does is provide help and protection for the two groups that need it the most—those who can least afford prescription drugs, and those who otherwise would be bankrupted by a serious illness that requires expensive drug therapies. These are worthy objectives and this agreement accomplishes those goals.

I want to discuss a couple of other aspects of this agreement. First, the bipartisan Medicare agreement would establish health savings accounts, HSAs. These HSAs are tax advantaged savings accounts that all people could use to pay for medical expenses. This is a huge advancement in taking care of the uninsured. Health savings accounts would be open to everybody with a high deductible health insurance plan. The higher the deductible, the less the cost to the insurance plan. The higher the deductible, the more a person is allowed to put into a HSA. Employers would also be able to contribute to the employee's health savings account, and neither the employer's nor the employee's contribution would be taxable. Tax free, you can set up this account.

If you have an HSA, your total yearly contributions to it would be as large as your health insurance plan deductible. Just like an individual retirement account, the interest and investment earnings your health savings account would generate are not taxable. Furthermore, the money you take out of HSAs to pay for medical costs are not taxable, as long as the money is used to pay for health care expenses. Let's see, you don't pay taxes on it when you put it in, you don't pay taxes on the earnings, and you don't pay taxes when you take it out. It is a little incentive to put away money to cover deductibles, or anything to do with

health care later on. I hope that every young person in this country will establish a health savings account. No matter what their income level is, no matter how good their health is, it is an opportunity to put away money for when the health is not as good, and to take care of any deductibles that are necessary at any point in life with an insurance plan. It is an opportunity to be insured from the time you enter the job market, and to put a little away and perhaps have a lot for the years when 50 to 80 percent of the health care costs come up.

One of the best features of health savings accounts is they would be portable. That means that if you change jobs, the health savings account goes with you, you still have it. It is yours. Health savings accounts are a great innovation. Health savings accounts create a tax incentive for everybody—not just seniors—to save for health care expenses, plus it doesn't matter whether your employer offers health insurance or not; you can still save money in a health savings account and receive the tax benefit. This provides some tax fairness for those of you who don't have access to tax advantages of the employer-sponsored health insurance. Let me say that again. This provides some tax fairness to those who don't have access to the tax advantage of employer-sponsored health insurance. Employer-sponsored health insurance is tax free. It doesn't even show up on anything that you have to file. This would give the average person the same opportunity to have tax-free health coverage.

Health savings accounts are an idea whose time has come. Giving people more flexibility and responsibility in their health care spending will result in healthier and wiser consumers. I wholeheartedly support this part of the Medicare agreement. It is long overdue. It needs to be advertised. Young people of this country need to understand that that is their part of Medicare, that they can get into this now and it will save them costs later. It will be a part that will shore up the system.

I also want to speak to the provisions that would address a very sore subject on the frontier, the inequity in Medicare reimbursement between urban and rural areas. I am pleased that the conference agreement ensures reimbursement equity to doctors, hospitals, and other providers of health care in Wyoming and other rural States.

Right now, Medicare underpays rural hospitals, home health alleges, and other providers, as compared to urban counterparts. This limits the ability of these providers to maintain their services and their infrastructures and to recruit qualified personnel.

Some people do not understand the challenges that rural health care providers face in providing quality care to seniors and the disabled. For instance, I read a column in the Washington Post last Friday by a gentleman named Steven Pearlstein. I think it was supposed to be a semi-humorous column—I hope so—although it was in the business section. Well, to those of us in rural areas, it wasn't even semi-humorous, and it wasn't accurate either. I suppose I could ask that this column be printed in the CONGRESSIONAL RECORD, but I would not want to waste the space. I will, however, cite a paragraph from the column in which this gentleman called politicians from rural States ''nothing more than welfare queens in overalls.'' At this point, I'll state that I still believe Senators ought to be able to bring laptops onto the floor. But I assure my colleagues I will not be petitioning them to wear overalls on the Senate floor.

Let me read one of the paragraphs that Mr. Pearlstein wrote:

> Then there is Medicare bill, which was supposed to be about providing drug benefits to seniors, but wound up being yet another chance to whine about the plight of country doctors and hospitals. Although the cost to providing medical service is actually lower out there in God's country [the God's country is true] that hasn't stopped your guys from squeezing $25 billion more from the Federal Treasury over the next decade to pad Medicare payments to rural providers.

I don't know if this gentleman has ever been to God's country or not. Maybe he has flown over God's country, Mr. President. I doubt he has ever visited the Niobrara Health and Life Center, a very small hospital in Lusk, WY. Lusk has a population of 1,500. Lusk is the county seat Niobrara County, population 2,500. That is Wyoming's least populated county. Incidentally, it is a little bigger than the State of Delaware. It has one person for every 524 acres of land.

The hospital in Lusk has been closed since May of 2000. Since then, folks in Niobrara have had to travel to Douglas and Torrington for surgery or other hospital care. Douglas and Torrington are in different directions from Lusk. They are both about 55 miles from Lusk. That is a long drive any time, but in winter—and we are having winter there now. I don't know if you saw pictures of the Bronco football game where they were scraping snow off of the field; but yesterday there was a blizzard in Colorado and in Wyoming, and the temperatures were about 16 degrees, and it gets a little tough to get around, if you can at all.

Fifty-five miles is a long drive in winter when the winds are howling and the snow blows across two-lane roads. That is an important hospital for the people of Niobrara County, and they are getting ready to reopen it. They are hoping to be able to afford it. It is also important for the State of Wyoming because there is a State prison for women in Lusk. The State tried to keep the hospital open in the 1990s, but the financial pressures were simply too great.

Hospitals across rural America are struggling, particularly the smallest hospitals, such as the one in Lusk. If it were really true that the ''cost of providing medical service was actually lower out there in God's country'' then why are the rural hospitals struggling to stay open?

Our Federal Government's own Medicare Payment Advisory Commission published a report in 2001 on Medicare in rural America. That report found that the Medicare ''payment system does not recognize factors that have a greater effect on the cost of rural hospitals.'' The study also found that there are aspects of Medicare's prospective payment system for inpatient hospital care that tend to work against rural hospitals.

Every hospital has to buy a certain amount of medical equipment from hospital beds to x-ray machines. If rural hospitals get a rural discount on this equipment, it is news to me. In fact, I think there are probably some quantity discounts on which they lose out.

Rural hospitals also have to hire nurses and technicians, just as urban hospitals. It is hard enough to recruit nurses because we have a nationwide shortage. Trying to recruit nurses to come to the Wyoming frontier is even harder. So our rural hospitals have to offer a competitive wage.

Most rural hospitals also have a low patient volume compared to their urban counterparts, and this contributes to a higher cost of rural hospital care. There is a certain amount of staff and everything that has to be on hand ready for patients if they show up.

As the Medicare Payment Advisory Commission rightly points out in its study, hospitals in small and isolated communities ''cannot achieve the economies of scale and service scope of their larger counterparts and thus have higher per-case costs.'' The current Medicare rates do not directly account for the relationship between cost and volume, potentially placing smaller providers at a financial disadvantage relative to the other facilities.

I am pleased to note that the Lusk hospital is scheduled to reopen in October 2004 after completing some important upgrades and renovations. I am confident the hospital will be able to survive this time because Congress passed a law in 1997 to allow for special payments to hospitals in rural areas that are too sparsely populated to support a full-service facility.

The Medicare conference agreement would increase payments over the 1997 law to critical access hospitals, such as the one in Lusk. Despite Mr. Pearlstein's criticisms, he ignored the fact that urban hospitals have higher Medicare margins than rural hospitals.

The additional support for rural health care providers in this bill will

help close the gap between higher Medicare margins of urban hospitals and the lower Medicare margins of the rural hospitals. This additional help will not come a moment too soon for the people of Niobrara County, WY, and other counties in Wyoming and other counties throughout the United States. I hope Mr. Pearlstein will visit Lusk if he ever visits Wyoming. I have been there, and I can tell you that the Medicare payments he considers ''padding'' are critical to the hospital in Lusk and to the seniors who depend on it.

It is a long drive to Lusk from Yellowstone National Park or skiing in Jackson Hole, but I think it would be quite educational for him or anyone else who makes the journey.

There are a lot of good aspects about this Medicare agreement. Adding a prescription drug benefit to the program is good. Providing seniors and the disabled with new Medicare options is good. Offering all Americans new ways to save money for their health care expenses is good. Providing fair Medicare payments to rural doctors and hospitals is good. Having health savings accounts is outstanding.

For these reasons, I am going to vote for this bipartisan Medicare agreement, and I am going to work in the future to ensure that Medicare continues to offer a reasonable drug benefit for many of America's seniors, but one that does not place a huge financial burden on future generations.

Earlier the majority leader, Senator FRIST from Tennessee, the only doctor in this body, gave an outstanding speech outlining the reasons that in a bipartisan way he and others have worked on this for 6 years to bring this to fruition. A person from the other side of the aisle who has worked on that for 6 years has been Senator BREAUX from Louisiana. They served on a special task force to come up with a way to make Medicare be solvent for generations to come. This will be the first significant piece of legislation to address what they have talked about for 6 years.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Wyoming has 4 minutes 15 seconds remaining.

Mr. ENZI. I thank the Chair.

Mr. President, in the Senator's remarks he did point out there have been a lot of health care advances. Science has played a great part in health from genetically engineered vaccines, to coronary angioplasties, to heart transplants, to the human genome project that is coming up with a lot of new medicines that will take care of us. That project, incidentally, came in 2 years ahead of time, in 2003, and has led to a massive increase in the number of projects that are being done to come up with new drugs that will help us.

This is the way Medicare has advanced. It is pretty inflexible. There has not been much advancement. We have an opportunity to correct that right now. We need to get the flexibility of Medicare to increase the same way that medical advances are increasing, and those are mostly in the area of prescription drugs. So it is time we added a prescription drug benefit.

The bill also takes care of some problems we have with Medicare. I mentioned this task force that Senator BREAUX and Senator FRIST were on. The task force recognized the problem that when Medicare got underway, there were 20.4 million people under Medicare. Today there are 40.8 million people under Medicare. That is a doubling. By 2030, 77.6 million people will be under Medicare. That is another doubling. That is a huge increase in the number of people who will come under Medicare.

How is it paid for? It is paid for by people who are in the workforce, not the people who are retired—the people in the workforce.

In 1973, there were 7.3 people. That tenth of a person probably didn't feel too well. But 7.3 people were paying for every person under Medicare. In the year 2000, there were 3.9 people paying the bill for those in Medicare. By the year 2030, 2.4 people per person will be paying the bill for those on Medicare. These people have to pick up the costs of all of Medicare for those people. So it is important we have some cost containment, that we put in some reforms to make sure the system is available for those 77 million people in the year 2030.

Prescription drugs are the most important treatment factor now. They were not in 1965. We have come a long way on the issue of prescription drugs. This is where we are headed. These are the number of drugs in clinical development: Cancer, 402 different kinds in clinical development. The percentage of drugs that actual make it is very small. Is there a high cost to develop a drug? Yes. Diabetes, there are 30 different kinds of medicines; rheumatoid arthritis, 24; osteoporosis, 20; obesity, overweight, 29; depression 19; congestive heart failure, 18; Alzheimer's disease, 17; schizophrenia, 16; hypertension, 11; hyperlipidemia, 10; migraine headaches, 20, and so on.

There are a lot of drugs that are being worked on. That is a new treatment. That is a tool that has to be put in the hands of doctors.

Now, we have heard some comments, as well as different versions, about surprise that AARP has backed this bill. It is not a perfect bill. We never pass a perfect bill out of the Senate.

AARP has had some comments on it. I hope my colleagues all pay attention to them. AARP believes that millions of older Americans and their families will be helped by this legislation. AARP also endorses the Medicare bill. On November 17, they stated, ''The integrity of Medicare will be protected.''

These are the most significant reforms. It provides access to medical prescription drugs. It dramatically expands voluntary, private health plan choices. I hope my colleagues will look at the comments the leader made and read them in full.

I thank the President for the time, and I yield the floor.

The PRESIDING OFFICER. The Chair now recognizes the Senator from New Jersey.

Mr. CORZINE. Mr. President, I rise today to join this historical debate on health care for America's seniors. I also rise so that I can provide a perspective to the people of New Jersey on why I will regrettably be voting against this Medicare conference report.

I particularly find it unfortunate and disappointing because there are 300,000 seniors in New Jersey, out of about 1.2 million, who lack any prescription drug coverage. Those seniors make tough choices between medicine and other of life's expenses, as we have heard talked about in political debate for years.

I truly want to be a positive participant in assuring access to quality drug coverage at an affordable price for all of America's seniors. I think all of us do. That is why I voted affirmatively on a bipartisan Senate bill. I worked very closely with the senior Senator from Iowa to put together what I thought was an outstanding bill, one I would have been proud to support.

Those 300,000 seniors badly need and deserve affordable, quality coverage. But just as badly as they need it, we need to make sure their gain does not come at the expense of harming others. If the left-out seniors were the only ones impacted by this bill, I would vote for this plan we now are debating. I would vote for it because I thought it was going to provide access to those 300,000 folks and that would happen regardless of all the ideological or political arguments that have been made over the last several days.

Sadly, hundreds of thousands of other seniors in my State will be seriously and negatively impacted by this bill. The fact is, this plan harms more New Jersey seniors than it helps. I calculate that, at a minimum, 500,000 seniors will be harmed, breaking the first rule of medicine: ''Do no harm.''

The negative impact comes at a very high financial cost not only to my State but to the Nation at large. I believe the scarce resources we are using would be better used to make the limited and complex benefit more substantial and to reduce the harm to those who already have benefits that they will lose.

This Senator can only wonder in that context that we feel compelled to lavish $14 billion of subsidies on HMOs and

other insurers to provide them profit incentives to compete with traditional Medicare as opposed to improving the benefits to uninsured seniors who are constructively a part of this bill. We could close that so-called donut hole, that gap.

With all due respect to the Herculean efforts of those on both sides of the aisle who cobbled together this compromise—and I really do want to congratulate and thank those who worked so hard. Ranking Member BAUCUS, and Senator BREAUX, the senior Senator from Louisiana, as well the senior Senator from Iowa, have done a great job of trying to get to a conclusion on which we could all agree. In my case, the cost/benefit for New Jersey seniors just does not work. It just flat out does not work.

My staff and I have done the numbers. We have worked very hard, to the best of our ability, to really scrub down these numbers and to come up with a conclusion on whether this works for our folks. Considering we are in a mad dash to absorb and analyze this 1,100-page bill, I will bet there is not a single Senator who has read it. I could be wrong. Maybe there are one or two who just did not have anything to do in the last 24, 36, 48 hours, but I doubt if there is anyone who has read this. The result is that the only certainty about this bill is that in addition to its unintended consequences, even from the well-intended, it is certain to have unfortunate consequences for many American seniors, as well as all of us who might hope to be seniors one of these days.

So my reason for opposing this legislation is that this body should be thoughtful and careful when we are spending $400 billion for a good cause, but we ought to make sure we are not doing more harm than good. That is objection 1. Objection 2 is if we do not plan to implement this bill in its broad form before 2006, I do not understand why we need to cram all of this analysis into 48 hours or 72 hours over a 3- or 4-day period.

Why before Thanksgiving? What is the hurry when we have a bill this complex, this big, and we only have 3 or 4 days to look at it? I think there are a lot of problems stuck right in here.

So let me repeat what I do know. For roughly $4,000 of out-of-pocket payments, a senior will get $5,000 worth of return, plus a catastrophic coverage for everything above $5,000 of drug spending.

Let me repeat: A $4,000 payment for $5,000 worth of coverage will come with a complex concoction of HMOs, PPOs, PDPs, premiums, deductibles, copays, formularies, annual price increases, shifts of providers, and a bevy of choices that are more to the confusion of seniors than they are to the security of seniors. In fact, the complexity of navigating this proposal for an individual senior is almost enough of a reason for me to vote no on the bill to start with.

I have stood in all kinds of townhall meetings with seniors just trying to explain the simple first steps of this bill. I think we are going to be creating a tremendous industry of opportunity out there informing seniors about what is going to be borne from this 1,100 pages, 1,200 pages of work. Somebody is going to have to tell folks how they get through this.

That said, this bill does provide favorable relief to doctors, as I have heard some talk about, serving Medicare patients. It gives some needed aid to hospitals, particularly America's rural hospitals, as the Senator from Wyoming adequately presented. Of course, in a thousand pages plus, there have to be some good things, and there are. We are spending $400 billion.

A few of the benefits I have talked about are good but, in my view, they come at too high a price, and that is before one weighs in on the serious push in this bill to get Medicare on a pathway to privatization and the dismantling of the social safety net and coverage of our seniors' health which has been so fundamental to the success of moving so many of our seniors out of poverty into longer, healthier lives.

While this bill fundamentally being debated is in the context of prescription drugs in general, spending $400 billion, one would think that might have some positive implications for the broader health care system. To that end, I believe this bill falls far short of the mark. Once again, at least from my perspective, it does more harm than good.

Cost containment through Medicare negotiating the cost of drugs with the drug industry could have led to lower prices for everybody in America. You have unbelievably strong buying power out of Medicare—if they were negotiating those prices. We are talking about reimportation? We could do a heck of a lot better if we just had Medicare go out and negotiate those prices. That would help all Americans: Children, generation Xers, juniors, seniors, corporate America. That is not happening.

Other missed opportunities? Cost containment is omitted in this bill. The only containment of costs that I see falls on the shoulders of beneficiaries with escalating copays and premium hikes.

Equally troubling, reforming reimbursement rates for cancer treatment by doctors would have strengthened Medicare, as opposed to limiting oncological drug payments that undermines cancer care. For my State, this is really a troubling and unacceptable aspect. The fact is, we have the third highest incidence of cancer in our State. I think we are putting at risk the treatment of that not only for our seniors but for the whole of the community.

Egregiously—and this is where I strongly disagree with those who would make this case—the diversion of $6 billion into these health savings accounts in this bill I think is a big mistake. It encourages the healthy and the wealthy out of the employer-based health care system, leaving the older and sicker and more poor in the system that remains or until employers drop coverage altogether. Frankly, I think this appears to be a handout to insurers. Several credible studies, including the Rand Corporation's, suggest a major reduction in employer health care coverage will follow as the likely outcome of this tax cut proposal because of adverse selection.

I don't understand this. This doesn't seem to be relevant to the purpose we are about in a $400 billion prescription drug benefit for seniors. Once again, I think this legislation in this area does more harm than good. It certainly does with respect to the U.S. Treasury because I think it has the capacity to go well beyond the $6 billion in cost over a period of time, particularly as it is more of a savings program than it is one that is going to help on health care.

That is the big picture for me. As you can tell, I don't think it is so good. But let me now illustrate the specifics, as least as I see them, in a cost-benefit analysis for New Jersey's seniors because that is what I care about. It is clear to me this is the analysis that is the most important from my perspective. It is the primary driver for how I came to my conclusion with respect to this bill.

This is not about insurers and HMOs. It is not about what the Democratic caucus would argue. It is not about what political scorekeepers think. It is not even about the pharmaceutical industry, which, by the way, in our country is most heavily concentrated in my State. It generates about 65,000 jobs and produces about $30 billion worth of business and revenues. It is really important to our State. But simply my analysis is about New Jersey's seniors and their role and participation in this program across this Nation. On that basis, I would like to talk about some of what we see.

First of all, I think from all of the independent analyses we see, approximately 94,000 New Jersey retirees will lose their employer-based prescription drug benefits. There are estimates of 2.1 to 2.7, whether it is CBO or some private estimates. The middle of the range number for New Jersey is about 94,000.

We have, in New Jersey, a substantial number of seniors, what people call dual eligible, who would receive this wraparound of their Medicaid benefits, various low-income folks, 152,000 of

those who receive their benefits through Medicaid and, as we all know, will be paying copays and potentially have an accelerated rise in health costs. They certainly will be on formularies that may limit their choices of drugs. Those 152,000 seniors I think will find this difficult.

We also have 220,000 seniors who are currently enrolled in our State pharmaceutical plan. I first want to congratulate the conferees because they did provide for a wrap here around State programs. It is going to be cumbersome and anything but seamless to move from the program that has been in place for 25 years, created by a bipartisan set of Governors and legislators over that period of time, that have provided the State program. We are going to have to change it. We are going to have to have our seniors go into private programs, and then the State is going to have to fill in those gaps, to be able to make sure that our low-income seniors, who have terrific programs, probably the best in the country, are able to maintain the same coverage.

As I say, I think the facilitating language with regard to financial obligations has been very good. I am very grateful for the work of the conferees with regard to this estimate. But the seamless element, the quality of coverage with regard to this element, this particular program, is going to be very hard to implement. Each of these seniors, the lowest income seniors in our State, is going to end up being faced with formularies and be experiencing changes each year with regard to who has maximum coverage, and it will be a major impact on how they look at it. Plus they are going to end up potentially paying copays and premiums that are slightly more than what they have in current benefits. So there is another 220,000.

Finally, there are about 52,000 seniors in New Jersey's program who pay more for Part 3 premiums due to the premium test—the means testing—that is coming out. Some can argue means testing is good. That is said where you have already very high income seniors.

Now $80,000 in New Jersey, which is where this means testing begins, is not exactly superrich. We happen to have the most wealthy average population in the country. We also have the most expensive cost of living of any place in the country. We pay more in taxes; we send more to Washington than anyplace else in the country. This means testing, which is going to affect about 52,000 of our seniors, is not going to Bill Gates-like folks or Warren Buffett; it is going to middle class New Jerseyans and I think is going to have a lot more bite. I would have liked to have seen it set higher. It was cut back. I frankly wonder if this is going to be good for the overall Medicare Program because we are ultimately going to start pulling out a lot of these high-income seniors. As people know, Part B is voluntary, and we could end up again providing another adverse selection element to the overall underlying traditional Medicare Program.

We will come back to some other perspectives with regard to New Jersey. But by my calculations, it is 94,000 retirees with employer-based coverage. They are going to lose that coverage, at least that quality coverage relative to what they will get in a new prescription drug program in Medicare. There are 152,000 dual eligibles who will end up with payments that are different than what they would have had under the old program; 220,000 of our State beneficiaries will end up with a lower quality, less seamless program than what they have today, and 40,000—I talked about this earlier in my remarks—40,000 diagnosed with cancer every year are going to have a much harder time getting drug treatments that they previously had. It is going to cost about $50 million to the State over the 10-year period in payments with respect to these drugs. Those folks are going to be impacted.

Then there are the 52,000 subject to means testing. That is 558,000. I am not going to be so certain there are not some overlaps here, but we are talking in the neighborhood of about 500,000 folks who are going to be hurt. There are now only 300,000 New Jerseyans who are without drug coverage. I think that speaks for itself. There is a tough tally when you look at those who are harmed and those who are benefited. That, to me, is an important consideration.

That is an important consideration. Those are not the only considerations. With regard to New Jersey, we have certainly one that already meets the Medicare privatization approach that falls under the premium support program demonstration projects. Actually, it looks as if there will probably be two. I don't think our seniors are going to say they want that in their backyard. They like prescription drugs, but they also like traditional Medicare.

I think it is hard for me to go back to them and argue when they have had a chance—by the way, we have seen a lot of people dropping out of Medicare+Plus Choice because they haven't felt like the program is good. Plus a number of insurers dropped people who signed up for it. They thought it was going to be a good deal and it didn't turn out to be so. That is another one that a lot of folks talked about. There are approximately 1 million New Jersey Medicare beneficiaries who are going to see their Part B deductible rise at a faster rate than their Social Security benefit.

Some people will say that is not a part of this bill, that it is something else. But the fact is, we are building an escalator on Part B. It doesn't compare with what I think is going on with Social Security. At least when I go to townhall meetings, that is a real problem for me to try to deal with and explain to folks. That is the challenge.

Roughly 100,000 seniors will be negatively impacted and a lot of others will feel as if they were somehow not properly protected in it. Again, 300,000 don't now have drug coverage.

That system doesn't work. It is arithmetic. It is very straightforward. It seems to me that there is more harm than benefits. For me, the case is closed.

It would be remiss of me not to say that I have another objection that I believe is built into this package. If I could convince myself that New Jersey seniors were going to be benefitted, I would come around on this issue. But I think this package puts America on a pathway to privatization of Medicare. I suggest that is not the right direction. I think we ought to be enhancing and extending the traditional Medicare Program and have a prescription drug benefit. We ought to be using that $12 billion to $14 billion that is going to benefit the managed care industry and the insurance industry to cover up one of those donut holes that we are talking about. We ought to be putting that money to work to enhance traditional Medicare.

While others have spoken eloquently and extensively, maybe even politically about this, I think it is a very serious consideration for those of us who believe that traditional Medicare should be enhanced.

I looked at three steps that will put it on that pathway.

Fourteen-billion dollars in subsidies and protection against skyrocketing health care costs provided to health insurers in this bill doesn't seem to me to be the right place to put us into a comparative cost-benefit analysis with the private providers who I think have many incentives to cherry-pick the healthiest, the wealthiest, and the most able versus what is going to be left in the traditional Medicare program, which raises costs. I think that is step 1.

Step No. 2, this series of demonstration projects which is hardly a level playing field by comparison—and I think it is actually going to be difficult for us to make a real assessment if it—I have heard actually limits this program under 600,000 folks. I think it is also possible that it will be cherry-picked in the areas as opposed to the difficulty of looking at the wide diversity of populations that we have in the country. I am particularly troubled when I look at what I see with regard to what fits into New Jersey with regard to this program. It could be very difficult.

Then the third step is this 45-percent trigger on general fund expenditures

that will cause an overall review of traditional Medicare when the breach occurs. I think all of us realize with the changing demographics and the baby boomers going into retirement, and with 40 million seniors growing to 75 million or 77 million seniors over the next 10 to 15 years, we are going to have that happen. I think that is going to lead to pretty hard choices without the kind of triggers we have here.

I think that it is just one more step, one more nail in the box that is trying to change us and move us away from traditional Government-supported and underwritten Medicare to privatization. In my view, after an inadequate analysis of this 1,100-page bill, I really think that may be the most troubling piece.

I think it is very difficult to be certain about any of the conclusions that any of us are drawing with regard to this bill. The one thing that I do know for certain as it shows up both in the marketplace and in the phone calls that we are receiving is that there are great benefits for the insurance industry and the pharmaceutical industry built into this.

By the way, as I said, the pharmaceutical industry is right smack dab in the middle of my State. I like to see them do well. I like to see them press forward in their research. But I don't think that should come at the serious expense of many of America's seniors. I can say, at least based on what I understand by my analysis, that is not the case with regard to New Jersey seniors.

Frankly, I just do not understand this mad dash to get this done before Thanksgiving. It obviously must reflect some other agenda than what seems sensible. I think we ought to slow down. We ought to be careful. We ought to be thoughtful. I know there are a lot of people who have spent a lot of time. We have heard about the 6 years of debate and discussion. But to come to a conclusion where we have to make a decision about something that is extraordinarily important to the lives of the people across this country—not only to our seniors but to the families, and the impact it has on the markets that we deal with with regard to prescription drugs—investing $400 billion is a very important issue. It ought to help our seniors as much as possible. It is a good thing. I think all of us want to be supportive. We should do our best with what we have to invest in this project. You have to think about it in the context of a very limited amount relative to how much seniors are going to spend over the next decade. I hear estimates that it may be as much as $1.8 trillion. What we are talking about here is about 20 percent of that.

We have to make tough choices. I appreciate the difficulty with which the Senator from Iowa had to work his way through these difficult areas. I think he made a lot of good choices, but there are some in here that are very difficult. I think we ought to be wise and reflect on this 1,100-page report.

I am convinced we can do better, at least in the cost-benefit analysis that I put together for my State.

As a consequence, I have to oppose this report. I hope we can slow it down and make some revisions and bring it to a positive conclusion which is not ideological and which is not political; that is, believing we are searching for the best interests of all of our seniors in America.

I yield the floor.

The PRESIDING OFFICER (Mr. ENZI). The Senator from Iowa.

Mr. GRASSLEY. Mr. President, before the Senator from New Jersey leaves, I want to speak about a couple of words which he mentioned. And I don't say it to take exception with what he said or to quibble with his description of the legislation before us. But if the President of the United States saw Senator GRASSLEY speaking right after some words that the Senator from New Jersey used about legislation, the President would be offended because I found fault with the President using those very same words back on December 10 last year when I had my first meeting with the President on the Medicare issue.

The words that the Senator from New Jersey used about the legislation before the Senate is that it is cobbled up. As everyone in this body knows, for about a year and a half I worked with five Members of this body on what was then called the tripartisan plan. The President started his lecture to me last December, something along this line: We have to have a dramatic change of Medicare. We have to provide prescription drugs for the seniors. We have to change Medicare for the future. He says: We do not want something like that cobbled-up tripartisan plan.

Obviously, the President cannot know everything that goes on in the Congress of the United States about forming legislation, but if he knew the hours and hours, not only at the staff level but at the Member level, that went into the tripartisan plan that we unfolded here a year ago in July, the President would not use the words ''cobbled up.'' I never heard the President use the words ''cobble up'' after that because I tried to impress upon him there was a great deal of thought, a great deal of hard work, and most importantly, time, plus bill compromise that the word ''tripartisan'' implies to bring together where we were at that time.

If he had appreciated it, he would see we have to have the same sort of thought and hard work go into what he was thinking about. I never heard him say that again. I am reminded of that story now that the Senator from New Jersey said this legislation is cobbled together.

To some extent, I suppose every political compromise, for every piece of legislation, one could use those words to describe it. I know the Senator from New Jersey participates in a lot of very difficult legislation in the committees he serves on and knows what it takes to put a bill together. However, I look at this piece of legislation, the compromise it takes, the hard work it takes, all the long hours it takes, as not a perfect piece of legislation but surely not a cobbled-together piece of legislation.

From that point of view I will respond not to the Senator from New Jersey any further but to speak about some of the aspects of this legislation as we get ready to vote on it tomorrow.

Mr. CORZINE. Will the Senator from Iowa yield for just a question and a comment?

Mr. GRASSLEY. I would be glad to yield for a short question or short comment and reserve my right to the floor.

Mr. CORZINE. I appreciate the comment with regard to cobbling. It is great to be put in the same company of criticism with regard to the use of the term. I do not want to leave the impression that I don't think there was great thought and effort in putting together this extraordinary piece of legislation. It is actually a tremendous tribute to the Senator from Iowa for the ability to put together all the various interests in common and come up with something that is pretty doggone close for all Members to be able to consider.

My concern is that it is very hard to know from this Senator's point of view all the details. I wish I could say I was absolutely certain that I had analyzed this exactly the right way for those seniors in my State. But this is an incredibly complex issue, not only for the seniors themselves to be facing but also for those who are trying to decide how we are investing $400 billion.

I congratulate the Senator for his efforts. Unfortunately, as I look at it, I come out with a different perspective, but I don't think it is for lack of good intentions, hard work, and great compromise on the Senator's part.

Mr. GRASSLEY. I surely appreciate the good nature in which the Senator from New Jersey just stated his feelings about this legislation. I wanted to give equal treatment to the President, as I did the Senator from New Jersey and vice versa.

One of the aspects of this legislation that is misunderstood is the issue of health savings accounts, which is a new name for what people hear Congressmen talk about as medical savings accounts, only different in name, particularly, as it relates to people in my State, the benefit to farmers and small business people.

This bipartisan agreement includes these provisions establishing health savings accounts. I will refer to them as HSAs.

HSAs are tax-advantaged savings accounts that can be used to pay for medical expenses incurred by individuals, their spouse, or dependents. HSAs are similar to medical savings accounts. However, medical savings account eligibility has been restricted to employees of small businesses and the self-employed. HSAs are open to everyone with a high deductible health insurance plan. The only limitation on the health plan is that the annual deductible must be at least $1,000 for individual coverage, and $2,000 for family coverage. Contributions to the HSA by an employer are not included in the individual's taxable income. Contributions to an individual are tax deductible.

Total yearly contributions to an HSA can be as large as the individual's health insurance plan deductible, between $1,000 and $5,000 for self-coverage, and $2,000 and $10,000 for family coverage.

The interest in investment earnings generated by this account is also not taxable while in the health savings account. Amounts distributed are not taxable as long as they are used to pay for qualified medical expenses such as prescriptions, over-the-counter drugs, and long-term care services, as well as the purchase of continued health care coverage for the unemployed individual. That is legislation we passed a long time ago called COBRA.

Amounts distributed which are not used to pay for qualified medical expenses will be taxable, plus an additional 10-percent tax being applied in order to prevent the use of HSAs for nonmedical purposes. These accounts are portable, so an individual is not dependent on a particular employer to enjoy the advantages of having an HSA, low-income individual retirement account. The HSA is owned by the individual, not by the employer, and if the individual changes jobs, the HSA goes with the individual.

In addition, individuals over age 55 may contribute extra contributions to their accounts and still enjoy the same tax advantage.

In 2004, an additional $500 can be added to the HSA. By the year 2009, an additional $1,000 can be added to the HSA.

In regard to this legislation before the Senate beyond the health savings accounts, I point out what a great prescription drug benefit structure we have. First and foremost, it is important to point out that this is a voluntary program. If you currently have drug coverage and you like it, you can keep it or, if you do not have drug coverage and do not want it, you do not have to take it. If you are covered by Medicare fee for service today, and you are satisfied with it, you can stay right where you are.

This drug benefit also offered through Medicare will be a comprehensive benefit that will provide real relief for our seniors. Seniors that now pay full retail price could see a 25-percent reduction in their prescription spending. Additionally, these seniors' overall out-of-pocket drug spending could fall by as much as 77 percent. This is real relief for real people, not some hypothetical.

To provide relief to all seniors, the drug benefit is based upon income level. It is quite simple. Those who need more help because they are low income will receive more help under this program.

We divide this up according to the levels of poverty under the official poverty indexes of the Federal Government.

For those individuals and couples who are above 150 percent of the Federal poverty level, they can expect to see a monthly premium of $35, an annual deductible amounting to $250, a 75–25 percent cost-sharing up to a payment of $2,250, and a true out-of-pocket catastrophic cap at $3,600.

Additional benefits, including help with both the premium and initial cost-sharing, are targeted to seniors with income levels below 150 percent of the Federal poverty level. These subsidies will be available at increasing levels for those between 135 and 150 percent of the poverty index, and those between 100 and 135 percent. And then there is still another category of greater help for those below 100 percent of poverty.

I will explain how this differs for each of these categories. First, for individuals who are 135 to 150 percent of poverty, this group would have a $50 deductible, sliding-scale premium assistance, and 15 percent cost-sharing up to the benefit limit of $2,250, and $2 or $5 cost-sharing above the catastrophic level—$2 meaning for generic, $5 for brand-name drugs.

For individuals who are below 135 percent of the poverty index, they would have no deductibles, no premiums, $2 and $5 cost-sharing up to the catastrophic limit, and no cost-sharing after the catastrophic level has been reached.

Now, we go to the neediest of our seniors, the dual eligibles, those who are presently low income and getting help not only from Medicare but from the State Medicaid Program. They currently have their drug costs paid for by the Medicare Program that differs a little bit from State to State based upon the laws of those States.

Our conference report calls for Medicare to pick up the cost of their prescription drugs. Most of this population will have a $1 and $3 cost-sharing up to the cost-sharing limit, and then, after that, no cost-sharing on the catastrophic. Now, that $1 and $3, again, is generic for the $1, and $3 for the brand-name drugs.

By providing coverage to all seniors based on income levels, you can see that the number of individuals with no prescription drug coverage will fall from 24 percent in the year 2002 to 2 percent in the year 2009.

Now let's make it clear. About over half of individuals today have some prescription drug coverage—some very good, some not so good—and then 25 percent, maybe 30 percent have nothing. Now, we expect this to go down under this program to just 2 percent of our population, after 3 years of phase in.

Mr. President, 98 percent of the seniors receiving prescription drug coverage in 2009 will receive it from privately insured plans. Moreover, 33 percent of the beneficiaries will get their prescription drug coverage from integrated private plans, three times the rate in 2002.

Additionally, seniors will see immediate benefits with discount drug cards. These are going to be available in the middle of next year, and through all of the year 2005. Then, after the year 2005, the new program, in its entirety, kicks in. So the discount drug card is for an interim period of time while it takes the Department of HHS a period of time to set up what we are going to pass tomorrow. These discount drug cards will pass on between 15 and 25 percent of savings on seniors' current drug prices.

It is clear to see that the conference agreement has come a long way since we passed this bill in this body the first time in June. Many of my colleagues wanted a lower deductible. We have a lower deductible. Other colleagues were more concerned with getting the dual eligibles' drug costs out of the Medicaid Program and covering everybody by Medicare. We have done that as well.

So this is a good, solid drug benefit that will provide real relief to all seniors. Not only is this a good bill, with a good benefit, this bill provides an incentive for employers not to drop their retiree coverage.

Because there has been so much misinformation about corporations dropping employees, and since we have gone to such great strides in the conference report to overcome that problem and reduce that possibility, I want to spend some time on that and make clear that what we did in this respect—I think it is fair for me to say that the conference report, the compromise between the House bill and the Senate bill, is very much better than either the Senate bill, when it passed in June, or the House bill, when it passed the other body in June. So I would make these comments about whether or not employers are going to drop coverage of their retirees.

Now, we have heard a lot from opponents of this historic bipartisan effort alleging that this bill will cause employers to drop their retiree health

coverage. But one thing these opponents do not do is tell the people the whole story.

So as Paul Harvey says, the rest of the story and the reality is that employers have been dropping retiree coverage for years.

As you can see from this chart, there has been a gradual decline in the number of corporations providing coverage for their retirees. Since 1991, the number of larger employers offering health coverage to their retirees has dropped by nearly 20 percent, from 80 percent down to 61 percent.

This chart shows what we have been seeing in our States and hearing from our constituents. So employers have been dropping coverage for their retirees, and this has already been going on for more than a decade.

We know these days employers are finding it harder and harder to continue voluntarily providing health insurance coverage for their retirees.

That is why we in the Medicare conference worked diligently—put resources behind it—to help employers continue providing coverage for retirees, not just to be nice to the retirees but to be nice to the taxpayers because it is a heck of a lot cheaper to keep these retirees in their corporate plans than have them go on our plan.

That is our goal. Let me make it very clear; we have done a very good job of accomplishing that goal.

So let me tell you the three important ways we have done it.

First, the bill provides a 28-percent subsidy for the prescription drug costs for retirees so they will continue providing this coverage. That is about $750 per retiree, but that is just on average because every corporation has a different plan.

Second, we exclude this retiree subsidy from the Federal corporate tax. This dramatically increases the value of this subsidy for retiree coverage and helps the employer continue offering this coverage.

Third, the bill provides additional flexibility for employers to structure plans that complement Medicare's new drug benefit.

Overall, the conferees agreed to put $89 billion in this bill to protect retiree health coverage.

This funding makes it more likely—obviously not less likely—that employers will continue their retiree benefits. I think I ought to emphasize what $89 billion happens to be. That is 20 percent of all the money we are putting in this bill for prescription drugs for seniors. Now the Congressional Budget Office estimates that 17 percent of the retirees will not receive supplemental drug coverage from their employers beyond what is offered by Medicare in this bill. We have a different estimate from the Employee Benefits Research Institute that is outside of our government. It is a nationally respected organization that studies retiree benefits. They estimate that that number is going to be much smaller: 2 to 9 percent of the retirees might not receive supplemental coverage from their employer in the future if Congress passes the Medicare benefit.

According to the Employee Benefits Research Institute, if Congress creates a Medicare drug benefit of any kind, some employers will want their retirees to take advantage of that new benefit. This is an important part of the rest of the story. The only way to prevent employers from putting their retirees in the Medicare drug program is if we don't pass legislation such as this, if we say we don't give a darn about the 25 to 30 percent of the people who don't now have prescription drugs and we don't care if they ever have it. That is not the attitude of Congress. That is why this legislation is before us, because we do care about people who can't afford or don't have available a plan for prescription drugs.

For those people, particularly on this side of the aisle, who have been complaining about not doing enough or that passing this bill might cause some corporations to change their health benefits and prescription drugs for their seniors, do they think we should do nothing? No, they don't think so. They are crying because we aren't doing enough. I tell you honestly, we could put $400 billion, all of this bill, into just those 30 percent of the people in this country who retire from corporations that have a pretty good prescription drug program, probably better than most people have, and I couldn't guarantee anybody in this country that some corporation, big or little, wouldn't dump their programs, just dump them, as they have been doing for 20 years.

Let me be clear, these retirees will not be left without drug coverage. Retirees are not going to lose drug coverage. Why? Because of this bipartisan bill before us. These retirees will still be better off than today, because today when their employer drops coverage, they are left with nothing—no coverage whatsoever. Because of this bill, these retirees will be getting drug coverage from Medicare, and their former employer will likely pay the monthly premium for them. They will still be better off than they would be today where there is no Medicare drug benefit to back them up.

It is also important to recognize that keeping employers in the game lowers the Federal cost of the drug benefit. That is why we are concerned about the taxpayer as well as the corporate retiree. Obviously, if it is dumped, it is going to cost the plan more than if they stay on the corporate plan. So providing this 28 percent subsidy actually lowers the cost of the Medicare benefit. This generous 28 percent subsidy for retiree coverage is good policy. And because it is good policy, it is good politics. This bipartisan bill protects retiree benefits. That has been our goal, and we have accomplished it.

Mr. GRASSLEY. Mr. President, Medicare contractor reform will not succeed if contractors are subject to unlimited civil liability in carrying out the payments, provider services, and beneficiary services functions expected of them. The conference agreement would therefore continue the past policy of limiting the liability of certifying and disbursing officers, and the Medicare administrative contractors for whom those officers serve, with respect to certain payments.

In addition, the language contained in section 911 of the conference agreement clarifies that Medicare administrative contractors are not liable for inadvertent billing errors but, as in the past, are liable for all damages resulting from reckless disregard or intent to defraud the United States. Importantly, the reckless disregard standard is the same as the standard the standard under the False Claims Act. This standard balances the practical need to shelter Medicare administrative contractors from frivolous civil litigation by disgruntled providers or beneficiaries with the Medicare program's interest in protecting itself from contractor fraud.

The False Claims Act, 31 U.S.C. §§3729–3733, applies to Medicare fiscal intermediaries and carriers under current law. This legislation makes it clear that the False Claims Act continues, as in the past, to remain available as a remedy for fraud against Medicare by certifying officers, disbursing officers, and Medicare administrative contractors alike and that, among other things, the remedy subjects Medicare contractors to administrative, as well as trust fund, damages.

ORDERS FOR MONDAY, NOVEMBER 24, 2003

Mr. GRASSLEY. Mr. President, for the leader, I would like to give what is referred to daily as the closing script, if I may.

I ask unanimous consent that when the Senate completes its business today, it adjourn until 9 a.m., Monday, November 24. I further ask that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, the time for the two leaders be reserved for their use later in the day, and the Senate then resume consideration of the conference report to accompany H.R. 1, the Medicare modernization bill, provided that the time until 12:30 p.m. be equally divided between the chairman of the Finance Committee or his designee and the minority leader or his designee. I further ask unanimous consent that the cloture vote on the conference report

begin at 12:30 p.m. Finally, I ask that the last 10 minutes prior to the vote be allocated to the Democratic leader for 5 minutes, to be followed by the majority leader for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. GRASSLEY. Mr. President, tomorrow morning we will resume debate on the Medicare modernization conference report. Under the previous order, there will be approximately 3½ hours of debate prior to the cloture vote on the conference report which is locked in to occur at 12:30 p.m. The cloture vote on the conference report will be the first vote of the day. It is my hope and expectation that cloture will be successful. This issue deserves an up-or-down vote. I urge my colleagues on the other side of the aisle to allow this process to move forward.

MORNING BUSINESS

THE FLORIDA CITRUS INDUSTRY

Mr. NELSON of Florida. Mr. President, this week, leaders from thirty-four countries around the Western Hemisphere gathered in Miami for the Free Trade Area of the Americas (FTAA) Ministerial and Americas Business Forum for the purposes of expanding free trade within the Western Hemisphere.

The negotiations at this and future Ministerial meetings will greatly impact my State of Florida.

This event drew large headlines in the papers across the hemisphere as leaders converged upon Miami and anti-globalization protesters gathered outside to voice opposition. In this context, I feel it appropriate to commend Miami-Dade County, the City of Miami, and all the local and Federal law enforcement officers who helped keep the peace during a tense week of negotiations, and everyone who made it a success.

But in light of these talks, I want to share my own concerns regarding the FTAA negotiations, and the path ahead.

These talks did generate positive movement forward, towards greater economic integration in the hemisphere. Trade Ministers agreed to a baseline of minimum standards for a full and comprehensive agreement that takes into account differing levels of development among nations. This framework is a step forward that gives nations flexibility.

A carefully negotiated Free Trade Area of the Americas could generate new economic opportunities for Florida, our country, and the entire Western Hemisphere.

Yet, the FTAA poses opportunities and challenges for Florida as we work to make Miami the premier U.S. candidate city for the location of the permanent FTAA Secretariat, while at the same time protecting the viability of a key part of our way of life in Florida—the domestic citrus industry.

We must be cautious about the scope of the final FTAA and consider how it affects our domestic industries. I urge U.S. negotiators to take some important concerns into account as an agreement is shaped in the months ahead. The different parties, alliances, and groups involved in the negotiations have gone back and forth on which goods and products to include in a final agreement, and the flexibility provided for in the final Miami Declaration reflects this fact.

Citrus is one product that must not be included in these negotiations. I again call upon the Administration, as I have done in the past, to give citrus special consideration; given the unique nature of the citrus fruit and juice trade.

The administration should state unambiguously that it will not agree to any reduction of the current tariff on imported orange juice in the context of the FTAA or any other trade negotiation, until Brazil ceases its monopolistic, anticompetitive trade practices. Let me explain why this is so important to the State of Florida.

This tariff is a lifeline for Florida's citrus industry and the State's economy because it helps to promote competition—and it enables us to compete in the global marketplace.

It is very clear that any reduction in the tariff would destroy Florida's citrus industry and devastate the State's economy. The citrus industry is the State's second largest, contributing over $9 billion to our economy. And the citrus industry accounts for nearly 90,000 direct and indirect jobs throughout Florida and the country.

A collapse of this industry would not only cost tens of thousands of jobs, it would also cost the State and county governments of Florida up to $1 billion in lost tax revenues.

This would mean less money for other vital public services, such as police and firefighters.

This spring, I arranged for Andrew LaVigne, Executive Vice President and CEO of Florida Citrus Mutual to testify before the Senate Foreign Relations Committee and share these arguments, for the benefit of my colleagues in the U.S. Senate so that they could be made a permanent part of the record, because they are so strong.

Orange juice consumption is concentrated chiefly in two places: the United States and the European Union. Unlike other agricultural products, production is also limited chiefly to two places: the United States and Brazil. Florida's growers provide the vast majority of U.S. citrus that is used for orange juice.

Florida's citrus industry is efficient, competitive, and environmentally responsible; it is also one of only a handful of U.S. agricultural commodities that receives no federal or state subsidies. Let me say it another way: American taxpayers do not subsidize the citrus industry, unlike many other sectors that reaped benefits in last year's farm bill.

Florida's citrus industry is composed of 12,000 growers, many of them small family-owned operations, in addition to the many tens of thousands of others around the state and country who contribute to this $9 billion industry. But, this is more than just an economic engine to Florida. It is an American way of life.

Brazil's citrus industry, in contrast, is dominated by four large producers who form large export cartels to maximize their advantage and squeeze small producers. The industry also benefits from advantages brought by years of past subsidization and dumping, lax environmental laws, weak and largely unenforced labor laws, and price manipulation. And, Brazilian orange juice already has access to U.S. markets. Their government's pronouncements to the contrary are counterproductive to advancing greater hemispheric economic cooperation.

Brazil's citrus industry also continues to rely heavily on child labor and the low wages associated with using children.

In Florida, we do not allow children to work in our orange groves.

Until Brazil whole-heartedly enforces its labor laws, putting an end to child labor and paying workers a decent living wage, there will not be a level playing field for competition.

Florida's citrus industry can compete with Brazil, or anyone else, as long as there is a fair playing field. WTO negotiations should deal with these problems. But in the meantime, the tariff on frozen concentrated orange juice imports acts to balance the anti-competitive practices of Brazil. It also acts to prevent the large Brazilian producers from overwhelming the U.S. market and driving Florida's 12,000 growers out of business.

During the Trade Promotion Authority debate in 2001, Senator GRAHAM and I offered an amendment that would have prevented tariffs from being reduced on commodities imported from other countries in violation of trade laws, such as Brazilian orange juice.

Although this amendment was defeated, we were successful in including language that required the Administration to study and report to the Congress on the economic effects that a tariff removal would have on import-sensitive commodities like frozen concentrated orange juice and citrus. I look forward to reviewing the results of these studies as the debate progresses.

Without this tariff, the Florida citrus industry could collapse, and Brazil would have a monopoly over the global market. Already, Brazil produces 53 percent of the world's orange juice and has a virtual monopoly over the European market.

Removal of this tariff would not enhance free trade—it would, rather, giver Brazil a total world monopoly and make that country the world's dominant citrus and citrus juice producer and enable them to control market supply, access and prices with no competition.

This would not only devastate Florida's citrus industry, it would also be bad for all consumers. Absent competition from Florida's growers, the large Brazilian cartels would have all consumers at their mercy.

I have worked to bring these issues to the attention of the Administration and to ensure that one of Florida's primary industries is not traded away at the negotiating table, and I will continue to do so. In fact, I plan to travel to Brazil in the coming weeks and have asked to meet with President Lula da Silva so that I can carry the message of the Florida citrus growers: free trade can only benefit American consumers if it offers free and fair competition and is not monopolistic—so Brazil must reform its monopolistic citrus industry.

It is past time for this administration to acknowledge the inequalities between the U.S. and Brazilian citrus industries, and recognizing these inequities, to treat citrus accordingly.

I would like to conclude by again urging the administration not to agree to any reduction of the current tariff on imported orange juice, because if they do, an American industry and American consumers will pay a steep price. These issues are too important to the people of Florida to be ignored, and we will all be watching closely in the months ahead.

I ask unanimous consent to have printed in the RECORD conclusions in the testimony from Andrew LaVigne, Executive Vice President and CEO of Florida Citrus Mutual, from a hearing before the House Agriculture Committee on June 18, 2003, and Squire Smith, President of Florida Citrus Mutual, before the House Agriculture Committee, Subcommittee on Livestock and Horticulture on November 5, 2003, and an Op-Ed that appeared in the Miami Herald on November 19, 2003.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONCLUSION

The U.S. market is by far the most significant market we have. Unlike dairy and crop commodities, which are consumed throughout the world, orange juice is consumed primarily in the highly developed market economies of the United States and Europe. With Brazilian juice firmly entrenched in Europe at rock bottom prices, it only makes sense for Florida producers to concentrate on sales at home. Our growth in exports of specialty products, such as NFC, must necessarily be incremental and secondary to the domestic market for FCOJ. While the Florida industry will continue to seek out new export markets, both for fresh and processed products, it is myopic to think that we are likely to be as large a factor in foreign markets as Brazil. We simply do not have the domestic subsidies we would need to compete with the Brazilians and Europeans in Europe. Furthermore, we cannot be there to develop those new foreign markets slowly over the many years it will take them to achieve higher disposable incomes, if the Florida industry is forced out of existence by the elimination of the tariff. We want to serve the U.S. market and we can do so without the huge government payments that other agricultural sectors receive. However, the U.S. orange juice tariff is necessary to offset the unfair or artificial advantages that lower the price of Brazilian juice.

Florida Citrus Mutual understands that free trade in many industries, including many agricultural industries, leads to increased competition, eventual price benefits to consumers, and overall global economic growth. Unfortunately, free trade cannot deliver these rewards to such a concentrated and polarized global industry, especially one in which the developing country's industry is, in fact, already the most highly developed in the world. Florida Citrus Mutual appreciated the opportunity to explain to the Committee the unique global structure of the orange juice industry and the negative economic effects that would occur as a result of U.S. tariff reduction or elimination.

DOMESTIC POLICIES AFFECTING THE SPECIALTY CROP INDUSTRY

CONCLUSION

The U.S. Government's approach to domestic policy that impacts the fruit and vegetable industry, including the citrus industry, is to a large extent driven by the U.S. trade policy as it affects the industry. Our ability to properly address issues of pest and disease interdiction and eradication, labor law reform, agricultural research and export market growth depend almost entirely upon the balancing impact of the tariff, which assures that the industry can continue to exist in an unsubsidized domestic environment alongside otherwise artificially manipulated global competition.

[From the Miami Herald, Nov. 19, 2003]

TARIFFS WOULD CONTROL OVERSUPPLY

(By Mark Ritchie)

Last September in Cancún, the Bush administration's promises of free trade's benefits ran headlong into the reality of the last ten years under the World Trade Organization and the U.S.-Canada-Mexico arrangement known as NAFTA—the North American Free Trade Agreement.

Governments from Latin America, Africa and Asia decried the loss of millions of farm jobs, and denounced a system that promotes the continued export of agricultural commodities below their cost of production price (dumping) by U.S. and European agribusiness corporations. That's why the WTO talks in Cancún collapsed.

Fortunately, a close look at the underlying conflicts at the WTO reveals the potential for a new approach that negotiators trying to create a Free Trade Area of the Americans should use as a blueprint. It would create a win-win solution to the chronic low prices that plague farmers in the United States, Brazil and elsewhere.

International trade negotiations used to be about finding solutions that were aimed at benefiting societies as a whole. In 1947, just a few miles from Miami, governments met in Havana to discuss the creation of the International Trade Organization (ITO). The stared goal for the organization was full employment and the need to global monopolies and predatory trade practices. At that time, the nations gathered knew well the ravages of war and the role that brutal trade conflicts played in creating the economic Depression of the 1930s, the breeding ground for fascism.

BALANCING NEEDS

At the talks in Havana, the U.S. Department of Agriculture brought forward a special set of agricultural trade rules that would help balance the needs of producers and consumers with an emphasis on protecting food security over the long term. In essence, U.S. negotiators, with the Great Depression still very much on their minds, developed rules that helped nations balance supply and demand.

The ITO never got off the ground, but these agricultural rules were included in the original general Agreement on Tariffs and Trade, precursor to the WTO. The rules allowed nations to use quantitative import controls as long as they were imposing supply controls. This spurred countries to address domestic oversupply, helping to bring global supply and demand into balance. This plan was key to the ''golden era'' for U.S. and global agriculture in the 1950s and 60s.

The WTO Agreement on Agriculture undid this important work, but now the ministers gathering in Miami have an opportunity to make improvements by returning to the work done by the pioneers back in Havana in 1947. They have to tackle global over-supply in ways that can help producers in Florida and Brazil earn a profit by restoring the balance between supply and demand that has been damaged by the ''race to the bottom'' results of free trade.

Negotiators must address monopoly-style business practices that dominate global trade in highly competitive products when global prices fall too far.

TARIFFS BENEFICIAL

The solution to low commodity prices in general, be it orange juice or coffee, is not that complicated. Every business knows that when supply and demand are out of balance, there is going to be trouble. In agriculture, when there is not enough supply, some people go hungry. When there is too much supply, prices drop, farmers suffer and many go out of business.

We need modern trade agreements that enable countries to restore the balancing mechanisms for supply and demand. To take that step, the Bush administration needs to unlock the ''free trade'' straitjacket of eliminating tariffs at all costs, and start focusing on agricultural market fundamentals.

ADDITIONAL STATEMENTS

DANIEL AND JO ANN PLATT

• Mr. BOND. Mr. President, today I rise to honor two outstanding Missourians, Daniel and Jo Ann Platt. The occasion is a special one, as they celebrate their 50th wedding anniversary.

Only a year after Jo Ann, a native of Indiana, and Dan, a New Yorker, were

married on December 5, 1953, they came to the Midwest from Manhattan, where Dan—an anesthesiologist—had been asked to become chief of the Anesthesia Department at Knickerbocker Hospital and the New York Eye and Ear Infirmary.

Instead, Dan practiced at Alton Memorial Hospital, a place where the Platts believed that he could engage in a personal, patient-centered style of medicine that was impossible in a larger, more urban hospital setting. And there, he opened the first recovery room in the St. Louis metropolitan area, and established one of the first coronary care units and intensive care units in the St. Louis area, along with Barnes Hospital. Upon Dan's retirement in 2002, Alton Memorial Hospital dedicated its surgical and emergency building in his name, to commemorate his 48 years of service to the community, complete with a bust and a plaque paying tribute to Dan as ''the consummate physician.''

As Dan worked long hours at the hospital, Jo Ann was busy, as well. Over the years, she has served the community in many capacities, including as a member of the board of trustees of St. Louis Country Day School, on the vestry of The Church of Saint Michael and Saint George, on the board of governors of the Saint Louis Woman's Club, on the board of the St. Louis Charitable Foundation, and as a board member for both the Jennie D. Hayner Library Association and the Alton Museum of History.

Yet the bulk of Jo Ann's time was spent in supporting Dan's practice of medicine—which she considered a ministry—and being a devoted and fun-loving mother to their three children: Drew, now a commercial realtor and developer in Evansville, IN; Brett, who runs his own currency hedge fund in London, England, and recently became engaged to Mariela Ferro; and Carol, an attorney, political analyst and commentator, who lives in San Marino, CA, with her husband Jack Liebau, a portfolio manager who recently opened his own investment management firm. Carol, after surviving Harvard Law School as an overt Republican, worked faithfully on my staff in Washington for 2 years before realizing that her colleagues simply could not listen fast enough. All three children remember lives filled with the love, support and encouragement of their parents—and many, many good times.

Truly, Dan and Jo Ann's life together has been full of accomplishments and blessings—most notably, the heartfelt love and respect of their children and children-in-law. We wish them every happiness in the years to come, together with our warmest congratulations and best wishes.●

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. NICKLES (for himself, Ms. LANDRIEU, Mr. CRAIG, Mr. BINGAMAN, Mr. INHOFE, and Mr. SMITH):

S. 1934. A bill to establish an Office of Intercountry Adoptions within the Department of State, and to reform United States laws governing intercountry adoptions; to the Committee on the Judiciary.

By Mr. CORZINE:

S. 1935. A bill to amend the Public Health Service Act to require employers to offer health care coverage for all employees, to amend the Social Security Act to guarantee comprehensive health care coverage for all children born after 2001, and for other purposes; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NICKLES (for himself, Ms. LANDRIEU, Mr. CRAIG, Mr. BINGAMAN, Mr. INHOFE, and Mr. SMITH):

S. 1934. A bill to establish an Office of Intercountry Adoptions within the Department of State, and to reform United States laws governing intercountry adoptions; to the Committee on the Judiciary.

Mr. NICKLES. Mr. President, today on National Adoption Day, I rise to introduce the Intercountry Adoption Reform Act along with my colleagues Senators LANDRIEU, CRAIG, BINGAMAN, INHOFE and SMITH. The primary focus of this bill is to streamline, simplify and improve the foreign adoption process for families, adoption agencies and more importantly for the foreign adopted children of American citizens.

In the last decade, there has been a significant growth in intercountry adoption. In 1990, Americans adopted more than 7,000 children from abroad. In 2002, Americans adopted almost 20,000 children from abroad. Families are increasingly seeking to create or enlarge their families through intercountry adoptions. There are many children worldwide who are without permanent homes. It is the intent of this bill to make much-needed reforms to the intercountry adoption process used by U.S. citizens and therefore help more homeless children worldwide find a permanent home here in the United States.

There are two main goals of this legislation. First, and more importantly, this bill acknowledges and affirms that foreign adopted children of American citizens are to be treated in all respects the same as children born abroad to an American citizen. Under existing law, foreign adopted children are treated as immigrants to the United States. They have to apply for, and be granted immigrant visas to enter the United States. Once they enter the United States, citizenship is acquired automatically. Had these children been born abroad to American citizens, they would have traveled back to the United States with a U.S. passport and entered as citizens. This bill provides for equal treatment for foreign adopted children.

Furthermore, these children are not immigrating to the United States in the traditional sense of the word. They are not choosing to come to our country, but rather American citizens are choosing to bring them here as part of their families. Once a full and final adoption has occurred, then the adopted child is a full-fledged member of the family and under adoption law is considered as if ''natural born.'' As a child of an American citizen, the foreign adopted child should be treated as such, not as an immigrant.

The second goal is to consolidate the existing functions of the Federal Government relating to foreign adoption into one centralized office located within the Department of State. Currently, these functions are performed by offices within the Department of Homeland Security and the Department of State. Consolidation of these functions into one office will result in focused attention on the needs of families seeking to adopt overseas and on the children they are hoping to make part of their families.

Today, when a family seeks to adopt overseas, it has to first be approved to adopt by the Department of Homeland Security. Then, after a child has been chosen, the Department of Homeland Security has to determine if the child is adoptable under Federal adoption law. After this determination is made, the Department of State has to determine whether the child qualifies for a visa as an immediate relative of an American citizen. This bill seeks to minimize the paperwork involved and streamline the process by having these functions all performed in one, centralized office, the Office of Intercountry Adoptions, staffed by expert personnel trained in adoption practices.

The focus of this office will be on foreign adoptions and only on foreign adoptions. Officials in the Department of Homeland Security and the Department of State that currently perform the functions being transferred to this new office have many other duties, such as screening for terrorists or dealing with illegal immigrants. Adoption is frequently a low priority on the desk of such officers. By consolidating these functions into one office, with its sole focus being foreign adoption, these issues can be handled more promptly and given the priority they deserve.

Another aspect of the Office of Intercountry Adoptions that I consider extremely important is the proactive role that we intend for it to take in assisting other countries in establishing fraud-free, transparent adoption practices and interceding on behalf of

American citizens when foreign adoption issues occur. By establishing an Ambassador at Large for Intercountry Adoption, this legislation will provide a point of contact for foreign governments when issues involving foreign adoptions arise.

In the last few years there have been many examples of instances where our government has had to intercede on behalf of Americans seeking to adopt a foreign child. For example, Romania has been closed to foreign adoption for more than 2 years now. When Romania issued its moratorium on foreign adoption, hundreds of American families who were in the process of adopting Romanian orphans were unable to complete their adoptions. Fortunately, the Department of State was able to work successfully with the Romanian government to have these adoptions processed and persuaded Romania to grant exceptions to the moratorium for these American families and their adopted. Unfortunately, the moratorium is still in place leaving many orphans stuck in orphanages across Romania.

There also have been major adoption issues involving Cambodia, Vietnam, and Guatemala in the last 2 years. These issues are still being addressed by various officials within the Department of State and the Department of Homeland Security. It will be greatly beneficial to have a point person within the Federal Government to work on these issues, facilitate resolutions, and intercede on behalf of American families.

There also are some very significant procedural changes in the foreign adoption process included in this bill. Under the Child Citizenship Act of 2000, a foreign child adopted by a U.S. citizen acquires automatic citizenship upon entry into the United States to reside permanently. This bill proposes to change the point of acquisition of citizenship from entry into the United States to the time when a full and final adoption decree is entered by a foreign government or a court in the United States. Prior to citizenship attaching, the child must be determined to be an ''adoption child'' under U.S. law as defined in this bill. This provision is made retroactive to January 1, 1950, the year Americans began to adopt from abroad. This date also addresses the issue of children adopted during this time period whose parents failed to naturalize them under previous law.

Additionally, the Secretary of State shall issue a U.S. passport and a Consular Report of Birth for a child who satisfies the requirements of the Child Citizenship Act as amended by this Act. No visa will be required for such a child; instead it will be admitted to the United States upon presentation of a valid U.S. passport. No affidavit of support under 213A of the Immigration and Nationality Act will be required nor will the child be required to undergo a medical exam. These changes are again made to more closely equate the process of bringing a foreign adopted child home to the process of documenting and bringing home a biological child born abroad to a U.S. citizen.

When a U.S. citizen gives birth abroad, the parents simply go to the U.S. Embassy, present the child's birth certificate, their marriage license and proof of U.S. citizenship. Upon receiving this documentation, the embassy provides the parents with a U.S. passport for the child and a Consular Report of Birth that serves as proof of their child's citizenship as well as the child's birth certificate. This process takes little to no time to complete.

The process for foreign adopted children, however, is anything but quick and easy. Currently, an adoptive family may have to travel from the country where it adopts a child to another country in order to get the child's immigrant visa. Only certain embassies are able to grant such visas. On the other hand, most embassies are equipped to provide passports and Consular Reports of Birth. This will eliminate the need and expense associated with families having to travel with their newly adopted children to another U.S. Embassy in a different location prior to bringing the children home.

This bill also provides that the adoptive parents do not have to prove twice that they are financially capable of providing for their child and eliminates the immigration requirement of having the child undergo a medical exam. Before a family is approved to adopt a foreign child, the Federal Government has to be satisfied that the family is financially able to care for the child. This is part of the approval process. They should not have to repeat this process once they have fully and finally adopted a child.

In addition, prior to a family choosing to adopt a child, they should acquire and be provided as much medical information as is available on the health of the child so that it can make an informed decision on its ability to care for the child. Once that information has been provided and the child has been adopted, the child is now a member of the family. No biological child is denied entry because of medical reasons, nor should an adopted child be denied.

Another section of this bill provides for a new type of visa for children traveling to the United States for the purpose of being adopted by an American citizen who has been approved to adopt. Currently children who are not adopted overseas prior to their entry into the United States are allowed entry using an immigrant visa. As I have stated earlier, these children are not immigrants. They are being brought to the United States, at the request of a U.S. citizen, to become a member of that family. This new visa is a non-immigrant visa which authorizes admission of the child for the purposes of adoption. The authorized admission under this section terminates on the date the adoption is finalized, or 2 years after the date of admission if the adoption has not been finalized. Until the child is adopted, the child will receive temporary treatment as a legal permanent resident.

This bill also redefines the criteria used to determine a child's eligibility for adoption This is a critical piece of this legislation. The existing statutory language has not been revised since it was first written over 50 years ago. When it was written it was intended to deal primarily with war orphans and it does not permit voluntary relinquishment of children who have two living parents. The provision in this bill has been written to more fully comport with the language as agreed to in the Intercountry Adoption Act of 2000 which does permit the adoption of children whose parents have irrevocably relinquished them.

The bill also includes many safeguards such as: requirements that the Secretary of State is satisfied that the proper care will be furnished the child; that the purpose of the adoption is to form a bona fide parent-child relationship; that the biological parent-child relationships have been terminated; that the Secretary of State, in consultation with the Secretary of Homeland Security, is satisfied that the child is not a security risk; and that whose adoption and emigration to the United States has been approved by the competent authority of the country of the child's place of birth or residence.

Now that I have covered some of the significant aspects of this bill, let me tell you what this bill does not do. It does not create more bureaucracy or additional regulation. It does not increase fees for adoption. It does not slow down the adoption process. It does not add more red tape or additional paperwork. In fact, it does just the opposite.

It consolidates existing Federal processes for foreign adoptions into what is intended to be a ''one stop shop''—the Office of Intercountry Adoptions. It eliminates paperwork involved in getting an immigrant visa and provides citizenship documentation up front for the child, saving the adoptive family from having to deal with this upon its return home. Instead the fully and finally adopted child enters the United States on a U.S. passport as a U.S. citizen and child of a U.S. citizen.

This bill is intended to ease the paperwork burden on adoptive parents who have already gone through extensive paperwork and documentation production to accomplish their adoption. It is intended to recognize that children adopted by American citizens are the children of American citizens and

entitled to all the same rights, duties and responsibilities of biological children of U.S. citizens born abroad.

I introduce this bill with the hope that its passage will significantly improve the foreign adoption process so that more children worldwide can find loving, permanent homes. It is my prayer that someday, adoption will not be needed. That all children will be born into stable, loving homes to parents who want them and are able to care for them. However, until that day comes the foreign adoption process can be improved and should be improved. Foreign adopted children should be treated as children of U.S. citizens, not as immigrants, and should be accorded all the same rights as biological children of U.S. citizens. To that end, I introduce this bill.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Intercountry Adoption Reform Act of 2003'' or the ''ICARE Act''.

SEC. 2. FINDINGS; PURPOSES.

(a) FINDINGS.—Congress finds the following:

(1) That a child, for the full and harmonious development of his or her personality, should grow up in a family environment, in an atmosphere of happiness, love, and understanding.

(2) That intercountry adoption may offer the advantage of a permanent family to a child for whom a suitable family cannot be found in his or her country of origin.

(3) There has been a significant growth in intercountry adoptions. In 1990, Americans adopted 7,093 children from abroad. In 2001, they adopted 19,237 children from abroad.

(4) Americans increasingly seek to create or enlarge their families through intercountry adoptions.

(5) There are many children worldwide that are without permanent homes.

(6) In the interest of United States citizens and homeless children, reforms are needed in the intercountry adoption process used by United States citizens.

(7) In addition, Congress recognizes that foreign born adopted children do not make the decision whether to immigrate to the United States. They are being chosen by Americans to become part of their immediate families.

(8) As such these children should not be classified as immigrants in the traditional sense. Once fully and finally adopted, they should be treated as children of United States citizens.

(9) Since a child who is fully and finally adopted is entitled to the same rights, duties, and responsibilities as a biological child, the law should reflect such equality.

(10) Therefore, foreign born adopted children of United States citizens should be accorded the same procedural treatment as biological children born abroad to a United States citizen.

(11) If a United States citizen can confer citizenship to a biological child born abroad, then the same citizen is entitled to confer such citizenship to their legally and fully adopted foreign born children immediately upon final adoption.

(12) If a United States citizen cannot confer citizenship to a biological child born abroad, then such citizen cannot confer citizenship to their legally and fully adopted foreign born child, except through the naturalization process.

(b) PURPOSES.—The purposes of this Act are—

(1) to ensure that foreign born children adopted by United States citizens will be treated identically to a biological child born abroad to the same citizen parent;

(2) to improve the intercountry adoption process to make it more citizen friendly and child oriented; and

(3) to foster best practices.

SEC. 3. DEFINITIONS.

In this Act:

(1) ADOPTABLE CHILD.—The term ''adoptable child'' has the same meaning given such term in section 101(c)(3) of the Immigration and Nationality Act (8 U.S.C. 1101(c)(3)), as added by section 204(a) of this Act.

(2) AMBASSADOR AT LARGE.—The term ''Ambassador at Large'' means the Ambassador at Large for Intercountry Adoptions appointed to head the Office pursuant to section 101(b).

(3) FULL AND FINAL ADOPTION.—The term ''full and final adoption'' means an adoption—

(A) that is completed according to the laws of the child's country of origin or the State law of the parent's residence;

(B) under which a person is granted full and legal custody of the adopted child;

(C) that has the force and effect of severing the child's legal ties to the child's biological parents;

(D) under which the adoptive parents meet the requirements of section 205; and

(E) under which the child has been adjudicated to be an adoptable child in accordance with section 206.

(4) OFFICE.—The term ''Office'' means the Office of Intercountry Adoptions established under section 101(a).

(5) READILY APPROVABLE.—A petition or certification is considered ''readily approvable'' if the documentary support provided demonstrates that the petitioner satisfies the eligibility requirements and no additional information or investigation is necessary.

TITLE I—ADMINISTRATION OF INTERCOUNTRY ADOPTIONS

Subtitle A—In General

SEC. 101. OFFICE OF INTERCOUNTRY ADOPTIONS.

(a) ESTABLISHMENT.—There is established within the Department of State, an Office of Intercountry Adoptions which shall be headed by the Ambassador at Large for Intercountry Adoptions who shall be appointed pursuant to subsection (b).

(b) AMBASSADOR AT LARGE.—

(1) APPOINTMENT.—The Ambassador at Large shall be appointed by the President, by and with the advice and consent of the Senate, from among individuals who have background, experience, and training in intercountry adoptions.

(2) AUTHORITY.—The Ambassador at Large shall report directly to the Secretary of State, in consultation with the Assistant Secretary for Consular Affairs.

(3) DUTIES OF THE AMBASSADOR AT LARGE.—In carrying out the functions of the Office, the Ambassador at Large shall have the following responsibilities:

(A) IN GENERAL.—The primary responsibilities of the Ambassador at Large shall be—

(i) to ensure that intercountry adoptions take place in the best interests of the child; and

(ii) to assist the Secretary of State in fulfilling the responsibilities designated to the central authority under title I of the Intercountry Adoption Act of 2000 (42 U.S.C. 14911 et seq.).

(B) ADVISORY ROLE.—The Ambassador at Large shall be a principal advisor to the President and the Secretary of State regarding matters affecting intercountry adoption and the general welfare of children abroad and shall make recommendations regarding—

(i) the policies of the United States with respect to the establishment of a system of cooperation among the parties to The Hague Convention;

(ii) the policies to prevent abandonment, strengthen families, and to advance the placement of children in permanent families; and

(iii) policies that promote the well-being of children.

(C) DIPLOMATIC REPRESENTATION.—Subject to the direction of the President and the Secretary of State, the Ambassador at Large may represent the United States in matters and cases relevant to international adoption in—

(i) fulfillment of the responsibilities designated to the central authority under title I of the Intercountry Adoption Act of 2000 (42 U.S.C. 14911 et seq.);

(ii) contacts with foreign governments, intergovernmental organizations, and specialized agencies of the United Nations and other international organizations of which the United States is a member; and

(iii) multilateral conferences and meetings relevant to international adoption.

(D) INTERNATIONAL POLICY DEVELOPMENT.—To advise and support the Secretary of State and other relevant Bureaus in the development of sound policy regarding child protection and intercountry adoption.

(E) REPORTING RESPONSIBILITIES.—The Ambassador at Large shall have the following reporting responsibilities:

(i) IN GENERAL.—The Ambassador at Large shall assist the Secretary of State and other relevant Bureaus in preparing those portions of the Human Rights Reports that relate to the abduction, sale, and trafficking of children.

(ii) ANNUAL REPORT ON INTERCOUNTRY ADOPTION.—On September 1 of each year, the Secretary of State, with the assistance of the Ambassador at Large, shall prepare and transmit to Congress an annual report on intercountry adoption. Each annual report shall include—

(I) a description of the status of child protection and adoption in each foreign country, including—

(aa) trends toward improvement in the welfare and protection of children and families;

(bb) trends in family reunification, domestic adoption, and intercountry adoption;

(cc) movement toward ratification and implementation of The Hague Convention; and

(dd) census information on the number of children in orphanages, foster homes, and other types of nonpermanent residential care;

(II) the number of intercountry adoptions by United States citizens, regardless of whether the adoption occurred under The

Hague Convention, including the country from which each child emigrated, the State in which each child resides, and the country in which the adoption was finalized;

(III) the number of intercountry adoptions involving emigration from the United States, regardless of whether the adoption occurred under The Hague Convention, including the country where each child now resides and the State from which each child emigrated;

(IV) the number of Hague Convention placements for adoption in the United States that were disrupted, including the country from which the child emigrated, the age of the child, the date of the placement for adoption, the reasons for the disruption, the resolution of the disruption, the agencies that handled the placement for adoption, and the plans for the child, and in addition, any information regarding disruption or dissolution of adoptions of children from other countries received pursuant to section 422(b)(4) of the Social Security Act;

(V) the average time required for completion of an adoption, set forth by the country from which the child emigrated;

(VI) the current list of agencies accredited and persons approved under the Intercountry Adoption Act of 2000 (42 U.S.C. 14901 et seq.) to provide adoption services;

(VII) the names of the agencies and persons temporarily or permanently debarred under the Intercountry Adoption Act of 2000 (42 U.S.C. 14901 et seq.), and the reasons for the debarment;

(VIII) the range of adoption fees charged in connection with Hague Convention adoptions involving adoptions by United States citizens and the median of such fees set forth by the country of origin;

(IX) the range of fees charged for accreditation of agencies and the approval of persons in the United States engaged in providing adoption services under The Hague Convention; and

(X) recommendations of ways the United States might act to improve the welfare and protection of children and families in each foreign country.

(c) FUNCTIONS OF OFFICE.—The Office shall have the following 6 functions:

(1) APPROVAL OF A FAMILY TO ADOPT.—To approve or disapprove the eligibility of United States citizens to adopt foreign born children.

(2) CHILD ADJUDICATION.—To adjudicate the status of a child born abroad as an adoptable child.

(3) FAMILY SERVICES.—To provide assistance to United States citizens engaged in the intercountry adoption process in resolving problems with respect to that process and to track intercountry adoption cases so as to ensure that all such adoptions are processed in a timely manner.

(4) INTERNATIONAL POLICY DEVELOPMENT.—To advise and support the Ambassador at Large and other relevant Bureaus in the development of sound policy regarding child protection and intercountry adoption.

(5) CENTRAL AUTHORITY.—To assist the Secretary of State in carrying out duties of the central authority as defined in section 3 of the Intercountry Adoption Act of 2000 (42 U.S.C. 14902).

(6) ADMINISTRATION.—To perform administrative functions related to the functions performed under paragraphs (1) through (5), including legal functions and congressional liaison and public affairs functions.

(d) ORGANIZATION.—

(1) IN GENERAL.—All functions of the Office shall be performed by officers housed in a centralized office located in Washington, D.C. Within the Washington, D.C., office, there shall be 6 divisions corresponding to the 6 functions of the Office. All 6 divisions and their respective directors shall report directly to the Ambassador at Large.

(2) APPROVAL TO ADOPT.—The division responsible for approving parents to adopt shall be divided into regions of the United States as follows:

(A) Northwest.

(B) Northeast.

(C) Southwest.

(D) Southeast.

(E) Midwest.

(F) West.

(3) CHILD ADJUDICATION.—To the extent practicable, the division responsible for the adjudication of foreign born children as adoptable shall be divided by world regions which correspond to those currently used by other divisions within the Department of State.

(4) USE OF INTERNATIONAL FIELD OFFICERS.—Nothing in this section shall be construed to prohibit the use of international field officers posted abroad, as necessary, to fulfill the requirements of this Act.

(e) QUALIFICATIONS AND TRAINING.—In addition to meeting the employment requirements of the Department of State, officers employed in any of the 6 divisions of the Office shall undergo extensive and specialized training in the laws and processes of intercountry adoption as well as understanding the cultural, medical, emotional, and social issues surrounding intercountry adoption and adoptive families. The Ambassador at Large shall, whenever possible, recruit and hire individuals with background and experience in intercountry adoptions.

(f) USE OF ELECTRONIC DATABASES AND FILING.—To the extent possible, the Office shall make use of centralized, electronic databases and electronic form filing.

SEC. 102. RECOGNITION OF CONVENTION ADOPTIONS IN THE UNITED STATES.

Section 505(a)(1) of the Intercountry Adoption Act of 2000 (42 U.S.C. 14901 note) is amended by inserting ''301, 302,'' after ''205,''.

SEC. 103. TECHNICAL AND CONFORMING AMENDMENT.

Section 104 of the Intercountry Adoption Act of 2000 (42 U.S.C. 14914) is repealed.

Subtitle B—Transition Provisions

SEC. 111. TRANSFER OF FUNCTIONS.

(a) IN GENERAL.—All functions under the immigration laws of the United States with respect to the adoption of foreign born children by United States citizens and their admission to the United States that have been vested by statute in, or exercised by, the Commissioner of Immigration and Naturalization, the Immigration and Naturalization Service (or any officer, employee, or component thereof), of the Department of Homeland Security (or any officer, employee, or component thereof) immediately prior to the effective date of this title, are transferred to the Office on such effective date for exercise by the Ambassador at Large in accordance with applicable laws and title II of this Act.

(b) EXERCISE OF AUTHORITIES.—Except as otherwise provided by law, the Ambassador at Large may, for purposes of performing any function transferred to the Ambassador at Large under subsection (a), exercise all authorities under any other provision of law that were available with respect to the performance of that function to the official responsible for the performance of the function immediately before the effective date of the transfer of the function pursuant to this title.

SEC. 112. TRANSFER OF RESOURCES.

Subject to section 1531 of title 31, United States Code, upon the effective date of this title, there are transferred to the Ambassador at Large for appropriate allocation in accordance with section 115, the assets, liabilities, contracts, property, records, and unexpended balance of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available to, or to be made available to the Immigration and Naturalization Service or the Department of Homeland Security in connection with the functions transferred pursuant to this title.

SEC. 113. INCIDENTAL TRANSFERS.

The Ambassador at Large may make such additional incidental dispositions of personnel, assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with such functions, as may be necessary to carry out this title. The Ambassador at Large shall provide for such further measures and dispositions as may be necessary to effectuate the purposes of this title.

SEC. 114. SAVINGS PROVISIONS.

(a) LEGAL DOCUMENTS.—All orders, determinations, rules, regulations, permits, grants, loans, contracts, agreements, including collective bargaining agreements, certificates, licenses, and privileges—

(1) that have been issued, made, granted, or allowed to become effective by the President, the Ambassador at Large, the former Commissioner of the Immigration and Naturalization Service, their delegates, or any other Government official, or by a court of competent jurisdiction, in the performance of any function that is transferred pursuant to this title; and

(2) that are in effect on the effective date of such transfer (or become effective after such date pursuant to their terms as in effect on such effective date);

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked in accordance with law by the President, any other authorized official, a court of competent jurisdiction, or operation of law, except that any collective bargaining agreement shall remain in effect until the date of termination specified in the agreement.

(b) PROCEEDINGS.—

(1) PENDING.—The transfer of functions under section 111 shall not affect any proceeding or any application for any benefit, service, license, permit, certificate, or financial assistance pending on the effective date of this title before an office whose functions are transferred pursuant to this title, but such proceedings and applications shall be continued.

(2) ORDERS.—Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted, and orders issued in any such proceeding shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law.

(3) DISCONTINUANCE OR MODIFICATION.—Nothing in this section shall be considered to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if this section had not been enacted.

(c) SUITS.—This title shall not affect suits commenced before the effective date of this title, and in all such suits, proceeding shall be had, appeals taken, and judgments rendered in the same manner and with the same effect as if this title had not been enacted.

(d) NONABATEMENT OF ACTIONS.—No suit, action, or other proceeding commenced by or against the Department of State, the Immigration and Naturalization Service, or the Department of Homeland Security, or by or against any individual in the official capacity of such individual as an officer or employee in connection with a function transferred pursuant to this section, shall abate by reason of the enactment of this Act.

(e) CONTINUANCE OF SUIT WITH SUBSTITUTION OF PARTIES.—If any Government officer in the official capacity of such officer is party to a suit with respect to a function of the officer, and pursuant to this title such function is transferred to any other officer or office, then such suit shall be continued with the other officer or the head of such other office, as applicable, substituted or added as a party.

(f) ADMINISTRATIVE PROCEDURE AND JUDICIAL REVIEW.—Except as otherwise provided by this title, any statutory requirements relating to notice, hearings, action upon the record, or administrative or judicial review that apply to any function transferred pursuant to any provision of this title shall apply to the exercise of such function by the head of the office, and other officers of the office, to which such function is transferred pursuant to such provision.

Subtitle C—Effective Date

SEC. 121. EFFECTIVE DATE.

This title shall take effect 180 days after the date of enactment of this Act.

TITLE II—REFORM OF UNITED STATES LAWS GOVERNING INTERCOUNTRY ADOPTIONS

SEC. 201. AUTOMATIC ACQUISITION OF CITIZENSHIP FOR ADOPTED CHILDREN BORN OUTSIDE THE UNITED STATES.

(a) AMENDMENTS OF AUTOMATIC CITIZENSHIP PROVISIONS.—Section 320 of the Immigration and Nationality Act (8 U.S.C. 1431) is amended—

(1) by amending the section heading to read as follows: ''CHILDREN BORN OUTSIDE THE UNITED STATES; CONDITIONS UNDER WHICH CITIZENSHIP AUTOMATICALLY ACQUIRED''; and

(2) in subsection (a), by striking paragraphs (1) through (3) and inserting the following:

''(1) Upon the date the adoption becomes full and final, at least 1 parent of the child is a citizen of the United States, whether by birth or naturalization, who has been physically present in the United States or its outlying possessions for a period or periods totaling not less than 5 years, at least 2 of which were after attaining the age of 14 years. Any periods of honorable service in the Armed Forces of the United States, or periods of employment with the United States Government or with an international organization as that term is defined in section 1 of the International Organizations Immunities Act (22 U.S.C. 288) by such citizen parent, or any periods during which such citizen parent is physically present abroad as the dependent unmarried son or daughter and a member of the household of a person—

''(A) honorably serving with the Armed Forces of the United States; or

''(B) employed by the United States Government or an international organization as defined in section 1 of the International Organizations Immunities Act (22 U.S.C. 288); may be included in order to satisfy the physical presence requirement of this paragraph.

''(2) The child is an adoptable child described in section 101(c)(3).

''(3) The child is the beneficiary of a full and final adoption decree entered by a foreign government or a court in the United States.

''(4) For purposes of this subsection, the term ''full and final adoption'' means an adoption—

''(A) that is completed under the laws of the child's country of origin or the State law of the parent's residence;

''(B) under which a person is granted full and legal custody of the adopted child;

''(C) that has the force and effect of severing the child's legal ties to the child's biological parents;

''(D) under which the adoptive parents meet the requirements of section 205 of the Intercountry Adoption Reform Act; and

''(E) under which the child has been adjudicated to be an adoptable child in accordance with section 206 of the Intercountry Adoption Reform Act.''.

(b) EFFECTIVE DATE.—This section shall take effect as if enacted on January 1, 1950.

SEC. 202. REVISED PROCEDURES.

(a) IN GENERAL.—Notwithstanding any other provision of law, the following requirements shall apply with respect to the adoption of foreign born children by United States citizens:

(1) Upon completion of a full and final adoption, the Secretary of State shall issue a United States passport and a Consular Report of Birth for a child who satisfies the requirements of section 320 of the Immigration and Nationality Act (8 U.S.C. 1431), as amended by section 201 of this Act, upon application by a United States citizen parent.

(2) An adopted child described in paragraph (1) shall not require the issuance of a visa for travel and admission to the United States but shall be admitted to the United States upon presentation of a valid, unexpired United States passport.

(3) No affidavit of support under section 213A of the Immigration and Nationality Act (8 U.S.C. 1183a) shall be required in the case of any adoptable child.

(4) The Secretary of State shall not require an adopted child described in paragraph (1) to undergo a medical exam.

(b) REGULATIONS.—Not later than 90 days after the date of enactment of this Act, the Secretary of State shall prescribe such regulations as may be necessary to carry out this section.

SEC. 203. NONIMMIGRANT VISAS FOR CHILDREN TRAVELING TO THE UNITED STATES TO BE ADOPTED BY A UNITED STATES CITIZEN.

(a) IN GENERAL.—Section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)) is amended—

(1) by striking ''or'' at the end of subparagraph (U);

(2) by striking the period at the end of subparagraph (V) and inserting ''; or''; and

(3) by adding at the end the following:

''(W) an adoptable child who is coming into the United States for adoption by a United States citizen and a spouse jointly or by an unmarried United States citizen at least 25 years of age, who has been approved to adopt by the Ambassador at Large, acting through the Office of Intercountry Adoptions established under section 101(a) of the Intercountry Adoption Reform Act.''.

(b) TERMINATION OF PERIOD OF AUTHORIZED ADMISSION.—Section 214 of the Immigration and Nationality Act (8 U.S.C. 1184) is amended by adding at the end the following:

''(q) In the case of a nonimmigrant described in section 101(a)(15)(W), the period of authorized admission shall terminate on the earlier of—

''(1) the date on which the adoption of the nonimmigrant is completed by the courts of the State where the parents reside; or

''(2) the date that is 2 years after the date of admission of the nonimmigrant into the United States.''.

(c) TEMPORARY TREATMENT AS LEGAL PERMANENT RESIDENT.—Notwithstanding any other law, all benefits and protections that apply to a legal permanent resident shall apply to a nonimmigrant described in section 101(a)(15)(W) of the Immigration and Nationality Act, as added by subsection (a), pending a full and final adoption.

(d) EXCEPTION FROM IMMUNIZATION REQUIREMENT FOR CERTAIN ADOPTED CHILDREN.—Section 212(a)(1)(C) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(1)(C)) is amended—

(1) in the heading by striking ''10 YEARS'' and inserting ''18 YEARS''; and

(2) in clause (i), by striking ''10 years'' and inserting ''18 years''.

(e) REGULATIONS.—Not later than 90 days after the date of enactment of this Act, the Secretary of State shall prescribe such regulations as may be necessary to carry out this section.

SEC. 204. DEFINITION OF "ADOPTABLE CHILD".

(a) IN GENERAL.—Section 101(c) of the Immigration and Nationality Act (8 U.S.C. 1101(c)) is amended by adding at the end the following:

''(3) The term ''adoptable child'' means an unmarried person under the age of 18—

''(A) whose biological parents (or parent, in the case of a child who has one sole or surviving parent) or other persons or institutions that retain legal custody of the child—

''(i) have freely given their written irrevocable consent to the termination of their legal relationship with the child, and to the child's emigration and adoption;

''(ii) are unable to provide proper care for the child, as determined by the appropriate governmental authority of the child's residence; or

''(iii) have voluntarily relinquished the child to governmental authorities pursuant to the law of the child's residence;

''(B) with respect to whom the Secretary of State is satisfied that the proper care will be furnished the child if admitted to the United States;

''(C) with respect to whom the Secretary of State is satisfied that the purpose of the adoption is to form a bona fide parent-child relationship and that the parent-child relationship of the child and the biological parents has been terminated (and in carrying out both obligations under this subparagraph the Secretary of State, in consultation with the Secretary of Homeland Security, may consider whether there is a petition pending to confer immigrant status on one or both of the biological parents);

''(D) with respect to whom the Secretary of State, in consultation with the Secretary of Homeland Security, is satisfied that the person is not a security risk; and

''(E) whose adoption and emigration to the United States has been approved by the competent authority of the country of the child's place of birth or residence.''.

(b) CONFORMING AMENDMENT.—Section 204(d) of the Immigration and Nationality Act (8 U.S.C. 1154(d)) is amended by inserting ''and an adoptable child as defined in section 101(c)(3)'' before ''unless a valid homestudy''.

SEC. 205. APPROVAL TO ADOPT.

(a) IN GENERAL.—Prior to the issuance of a visa under section 101(a)(15)(W) of the Immigration and Nationality Act, as added by section 203(a) of this Act, or the issuance of a full and final adoption decree, the United States citizen adoptive parent shall have approved by the Office a petition to adopt. Such petition shall be subject to the same terms and conditions as are applicable to petitions for classification under section 204.3 of title 8 of the Code of Federal Regulations, as in effect on the day before the date of enactment of this Act.

(b) EXPIRATION OF APPROVAL.—Approval to adopt under this Act is valid for 24 months from the date of approval.

(c) EXPEDITED REAPPROVAL PROCESS OF FAMILIES PREVIOUSLY APPROVED TO ADOPT.—The Ambassador at Large shall prescribe such regulations as may be necessary to provide for an expedited and streamlined process for families who have been previously approved to adopt and whose approval has expired, so long as not more than 3 years have lapsed since the original application.

(d) DENIAL OF PETITION.—

(1) NOTICE OF INTENT.—If the officer adjudicating the petition to adopt finds that it is not readily approvable, the officer shall notify the petitioner, in writing, of the officer's intent to deny the petition. Such notice shall include the specific reasons why the petition is not readily approvable.

(2) PETITIONERS RIGHT TO RESPOND.—Upon receiving a notice of intent to deny, the petitioner has 30 days to respond to such notice.

(3) DECISION.—Within 30 days of receipt of the petitioner's response the Office must reach a final decision regarding the eligibility of the petitioner to adopt. Notice of a formal decision must be delivered in writing.

(4) RIGHT TO AN APPEAL.—Unfavorable decisions may be appealed to the appropriate appellate jurisdiction of the Department of State, and if necessary, Federal court.

(5) REGULATIONS REGARDING APPEALS.—Not later than 6 months after the date of enactment of this Act, the Ambassador at Large shall promulgate formal regulations regarding the process for appealing the denial of a petition.

SEC. 206. ADJUDICATION OF CHILD STATUS.

(a) IN GENERAL.—Prior to the issuance of a full and final adoption decree or a visa under section 101(a)(15)(W) of the Immigration and Nationality Act, as added by section 203(a) of this Act—

(1) the Office shall obtain from the competent authority of the country of the child's residence a certification, together with documentary support, that the child sought to be adopted meets the description of an adoptable child; and

(2) within 30 days of receipt of the certification referred to in paragraph (1), the Office shall make a final determination on whether the certification and the documentary support are sufficient to meet the requirements of this section.

(b) PROCESS FOR DETERMINATION.—

(1) IN GENERAL.—The Ambassador at Large shall work with the competent authorities of the child's country of residence to establish a uniform, transparent, and efficient process for the exchange and approval of the certification and documentary support required under subsection (a).

(2) NOTICE OF INTENT.—If the Office finds that the certification submitted by the competent authority of the child's country of origin is not readily approvable, the Office shall—

(A) notify the competent authority and the prospective adoptive parents, in writing, of the specific reasons why the certification is not sufficient; and

(B) provide the competent authority and the prospective adoptive parents the opportunity to address the stated insufficiencies.

TITLE III—FUNDING

SEC. 301. FUNDS.

The Secretary of State shall provide the Ambassador at Large with such funds as may be necessary for—

(1) the hiring of staff for the Office;

(2) investigations conducted by the Office; and

(3) travel and other expenses necessary to carry out this Act.

Ms. LANDRIEU. Mr. President, two years ago, I had the distinct pleasure of spending an hour with the President of China, Jiang Jiamin. As you know, President Jiamin is tremendously busy and has numerous requests for personal meetings, but he agreed to meet with this particular U.S. delegation because of the importance of the subject we were there to discuss, international adoption. During this meeting, he shared with us that the Chinese believe every child born is born with a red string attached to their heart, the other end of which is tied to the ankle of their soul mate. It is because of this string, they believe, that soul mates eventually find each other and spend the rest of their lives together. It is his belief, that perhaps the same is true of children who are adopted. That when they are born, their hearts have a string that is tied to the ankle of their forever family, and it is because of that heartstring that they eventually find one another.

I will treasure the memory of this meeting forever. Not only because it was an extreme honor to meet with such a learned and distinguished leader, but because it reminds me of how profound adoption is. 19,237 children were adopted by American citizens last year. 18,477 children the year before that, 16,363 in 1999 and 15,744 children in 1998. That is almost 100,000 children in four years. I think it is easy for us to understand the impact that these adoptions have had on the adoptive families and the orphan children, but what I would like to focus on this morning is the impact that this has for the diplomatic relations between the United States and countries throughout the world.

In sheer numbers alone, the impact is evident. In real terms, these children are ''mini-ambassadors'' to 200,000 American citizen parents, 400,000 grandparents, conservatively 800,000 aunts and uncles, and 300,000 siblings. According to a recent report by the U.S. Census Bureau, 1.6 million people in the United States were adopted, fifteen percent of them from abroad. Because of this magnificent process, communities all over the U.S. are deepening this understanding and affinity for the people of the world. September 11 reminded us of the importance of continuing to build bridges with the nations of the world. International adoption is one very effective and lasting way to build these bridges.

Over this past year, I have also had the privilege of meeting with the Presidents of Kazakstan, Romania and Russia and high-ranking government officials from Cambodia, Vietnam, Guatemala, Africa, and the Ukraine. Each time the message is the same. They want to do what they can to make the Hague more than just a piece of paper with 59 signatures on it. They are looking to the U.S. to lead the way toward a system of international adoption and child welfare that is based on best practices. A system comprised of meaningful protections for the adoptive parents, the birth parents, and perhaps most importantly the children; a system that universally recognizes that a government institution is not and cannot be an adequate replacement for a family and works toward the shared mission of finding every child in this world a loving and nurturing, permanent family.

I am proud to be here today, along with my colleague, the Senior Senator from Oklahoma, to introduce legislation that will take us in that direction. What it proposes to do is simple, but what it might help us to achieve is limitless. Simply put, this bill hopes to streamline the existing international adoption process, consolidate its federal functions into one agency and to empower that agency with the staff and resources it needs to represent the United States, the largest beneficiary from international adoption. With this office in place, the United States can begin to lead the world community in forging an international system of adoption that protects the interests of all those involved.

Under current law the federal responsibility for international adoption lies with the Department of State and the U.S. Citizenship and Immigration Services. This dual jurisdiction gives rise to several problems including: lack of coordination, lack of accountability, duplication of efforts and unnecessary paperwork and fees for prospective adoptive families. It also impedes the State Departments ability to fulfill its responsibilities as the central authority under the Hague Treaty on Cooperation in International Adoption.

Now, you may be asking yourself, as I have many times, what does adoption have to do with immigration? You see, under current law children adopted by United States citizens abroad are treated as immigrants, forced to apply for an immigrant visa to enter the United States. This process is not only impractical, since these children obtain automatic citizenship upon entry into the United States, it is inequitable. Children born to U.S. citizens abroad are conferred automatic citizenship upon their birth and are therefore permitted to travel to the United

States on a U.S. passport. Children adopted by United States citizens should be afforded this same protection. This bill affords them that protection.

This bill also proposes that we update the current law definitions of an ''adoptable child'' to reflect the types of children in need of homes throughout the world. The current law definition of ''orphan'' reflects the reality for which it was created; to help U.S. citizens adopt children orphaned by the wars in Korea and Vietnam. As such, it is an extremely narrow definition that in many cases prohibits a family from bringing their newly adopted child to the United States.

In creating an Ambassador at Large for international adoption, this bill hopes to provide the leadership and high level diplomatic representation so desperately needed in international adoption. Under his or her leadership, the Office of International Adoptions will be able to take the proactive measures necessary to limit corruption and ensure that adoptions are performed in the most efficient, transparent manner possible. The Hague Treaty already gives the State Department this responsibility; this bill is designed to help them fulfill it.

Let me tell you why we need to act now to pass this legislation. Because of the lack of consistent leadership by the United States in this area, many countries around the world are in ''crisis mode'' and have been forced to take unilateral actions to solve perceived problems in the system. For two years, there has been a moratorium on international adoption in Romania. The second anniversary of the INS issued suspension in Cambodia is fast approaching. The governments of Guatemala and Vietnam have taken actions to limit the number of international adoptions. In each and every one of these cases, the foreign governments have expressed frustration with the lack of action on the part of the U.S. to limit corruption or close potential loopholes in the system. The end result, hundreds and thousands of children are left in orphanages. This cannot be.

I have spent the past two years talking to foreign governments, agencies, and most importantly, adoptive parents and they tell me that this legislation is needed. I urge my colleagues to join me in supporting this legislation and I look forward to seeing it passed as soon as possible.

Mr. INHOFE. Mr. President, I rise today, National Adoption Day, to join my colleagues in introducing this bill to give children everyhwere around the world a greater chance to find a loving, permanent home.

This bill, the Intercountry Adoption Reform Act (ICARE), will automatically make a child who is adopted from another country a citizen the minute the adoption is finalized.

This legislation has a personal impact for me. My granddaughter was adopted from Ethiopia a few years ago. Even though she is a vital part of our family, she was not a citizen when she arrived. We now have to do work to make the law recognize her in the same light we do—as a legal member of our family and a lawful citizen of this country—entitled to the same rights and privileges as all my other biological grandchildren.

ICARE will ensure that foreign-born children, such as my granddaughter, will be treated the same as biological children born abroad to the same parent who is an American citizen. It will help streamline international adoptions and implement best practices for all adoptions.

Situations such as one that happened in my State of Oklahoma would not have happened under this legislation. Anna Lynn Fincher was born in the Philippines and adopted by a U.S. military couple in the Philippines. Even though they adopted Anna Lynn in the Philippines, they never brought her to the United States. Sadly, both of Anna Lynn's American parents died while in the Philippines—before Anna Lynn was able to set foot on American soil and become a U.S. citizen. As a result, she had to be granted Humanitarian Parole, which is granted to people in extreme circumstances, so that she could come to the United States and be adopted by her adoptive sister.

Under ICARE, Anna Lynn would have become a citizen as soon as her adoption was finalized—eliminating the need for Humanitarian Parole and another adoption.

Providing children, such as my granddaughter and Anna Lynn, with a permanent, stable family is the most precious gift we can give a child. I am proud to lend my support to this important legislation that will help give these young people a home.

By Mr. CORZINE:

S. 1935. A bill to amend the Public Health Service Act to require employers to offer health care coverage for all employees, to amend the Social Security Act to guarantee comprehensive health care coverage for all children born after 2001, and for other purposes; to the Committee on Finance.

Mr. CORZINE. Mr. President, I rise today to introduce legislation on an issue that is of utmost importance to me, to the State of New Jersey, and to our Nation: providing universal access to health insurance.

This is an issue I talked about incessantly during my campaign, because I strongly believe it is a national outrage that we are the only industrial society on earth that does not insure the health of all its people.

I begin with a basic premise. Health care is a basic right, and neither the government nor the private sector is doing enough to secure that right for everyone.

Unfortunately, as I have traveled across the State of New Jersey, I have talked to many men and women who lay awake nights trying to figure out how to care for loved ones. I've met people who work two jobs to support their family, and end up taking their kids to the emergency room when they're sick because they are unable to afford preventive care and timely treatment for their children.

In 2002, more than 43 million Americans—or a staggering 17 percent of the total nonelderly population—were uninsured. In my State of New Jersey, 1.1 million citizens lack health insurance.

The number of uninsured grew steadily throughout the 1990's until 1999, when modest increases in employer coverage due to the robust economy, coupled with expansion and improved enrollment in the State Children's Health Insurance Program (CHIP), led to the first decline in the number of uninsured in over a decade. Unfortunately, the number of uninsured is on the rise again, as State budget deficits have forced deep cuts in public health programs and as unemployment has risen.

Unemployment, however, is not the leading cause of being uninsured. In fact, more than eighty percent of the uninsured—four out of five Americans—are in working families. Seventy-two percent live in households with a full-time worker, and 11 percent live with a part-time worker. Low-wage workers are at greater risk of being uninsured, as are unskilled laborers, service workers, and those employed in small businesses.

The consequences of our Nation's significant uninsured population are devastating for our health and our economy.

The uninsured are significantly more likely to delay or forego needed care and are less likely to receive preventive care.

Delaying or not receiving treatment can lead to more serious illness and avoidable health problems, which in turn results in unnecessary and costly hospitalizations. For example, the uninsured are more likely than those with insurance to be hospitalized for conditions that could have been avoided, such as pneumonia and uncontrolled diabetes. In addition, the uninsured with various forms of cancer are more likely to be diagnosed with late stage cancer.

Indeed, my own State of New Jersey struggles to deal with the costs of charity care provided to the uninsured. In 2002, New Jersey hospitals provided $624 million in charity care to the uninsured and underinsured, but were only reimbursed for $381 million of these costs.

In sum, health insurance coverage matters. It matters to families who

don't receive adequate care, and it matters to communities. We ignore the issue of the uninsured at our peril and at a great cost to the quality of life—and to the very life—of our citizens. That is why today I am introducing legislation that will provide universal access to health care for all Americans. My legislation, the Universal Secure Access to (USA) Health Care Act has several components:

First, we must cover all children. Despite the success of the CHIP program, over nine million children are still uninsured. These children are less likely to have immunizations and receive less preventive care, which often results in health problems later in life and also leads to poor school performance. The millions of uninsured children cannot control whether they have health care coverage, and it is a measure of the failure of our politics that we do not take care of our children.

My proposal, modeled on legislation introduced by Senator ROCKEFELLER, would create a MediKids program that would provide universal health insurance for children up to age 23 through a new federal program modeled after Medicare, but with benefits tailored toward the needs of children.

Maintaining the health of our children is critical to the future of our country. Indeed, it is clear that providing health care coverage to children impacts more than just their health—it impacts their ability to learn, their ability to thrive, and their ability to become productive members of society. MediKids simplifies the confusing array of health insurance assistance programs for children today and guarantees them coverage until adulthood.

The next step is to demand that the private sector do its part. Under my bill, large employers would be required to provide health coverage for all their workers. A minimum wage in America should include with it minimum benefits, among them health insurance. But unfortunately, the current system puts the responsible employer who provides health insurance at a disadvantage relative to the employers who do not. When employers fail to cover employees, society pays their share of the bill at the emergency room. In fact, the universal health care delivered in the emergency rooms of our community hospitals is the most expensive and short-sighted approach to address the problem of the uninsured Americans.

Under my bill, small businesses, the self-employed and unemployed would be able to buy coverage in the Federal Employee Health Benefit Program. If it is good enough for Senators, it is good enough for America. Those who are between the ages of 55 and 64 would be able to buy-in to the Medicare program. My legislation would provide tax credits to the self-employed to assist them in purchasing health insurance and would allow them to buy into the FEHBP program. But although I am passionate about universal access to health care, I realize we can't get there yet. Not because the popular will is not there, but because the political will isn't.

Therefore I believe we can and should be doing all that we can to make incremental progress. So I support incremental changes, starting with the most vulnerable populations, and building on Medicaid and CHIP, success public programs. That is why I am a strong supporter of the Family Care proposal, which would cover the parents of children already enrolled in the CHIP program.

I was also pleased to be an original cosponsor of Senator BINGAMAN's bipartisan legislation, the Start Healthy, Stay Healthy Act, which would expand coverage for children and pregnant women. It is based on the common sense principle that children deserve to start life healthy and stay healthy.

Health professionals agree that one of the best ways to ensure the birth of a healthy baby is to ensure adequate prenatal care. Yet as a Nation, we do far too little to provide this type of care. This is evident by the stark statistics on the subject: the United States ranks 27th in infant mortality and 21st in material mortality—the worst among developed nations. The statistics in New Jersey are equally stark: New Jersey ranks an abysmal 44th among the States in the percentage of mothers receiving adequate prenatal care, 34th in low birth weights, and 12th in infant mortality rates.

Specifically, this important legislation would allow States to cover prenatal care services for women up to 185 percent of the Federal poverty level through the Children's Health Insurance (CHIP) Program. It would also allow States to extend coverage to children under the CHIP program through age 20, and would increase CHIP funding by $2.65 billion over four years.

I often say that we are not a Nation of equal outcomes, but we should be a Nation of equal beginnings.

Until we give all Americans access to health care, however, we cannot live up to that promise.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1935

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This Act may be cited as the ''Universal Secure Access to Health Care Act of 2003''.

(b) FINDINGS.—

(1) In 2002, 43,600,000 Americans, nearly 17.2 percent of the total nonelderly population, were uninsured.

(2) The number of uninsured has grown by nearly 10,000,000 over the past decade.

(3) While 61 percent of Americans receive health insurance coverage through their employers, millions of Americans lack access to such coverage either because their employer does not offer such coverage or the employer cannot afford to pay for such coverage.

(4) Today, fewer Americans have health insurance through their employment to cover themselves and their dependents than 10 years ago.

(5) Eighty-two percent of the individuals that are uninsured in the United States are in working families.

(6) Low-wage workers have more difficulty obtaining affordable health care coverage since such workers are less likely than high-wage workers to have such coverage offered as a benefit by an employer, and prohibitive premiums for individually purchased coverage often prevents such workers from purchasing such coverage independently.

(7) The consequences of our nation's significant uninsured population are devastating.

(8) The uninsured are significantly more likely to delay or forego needed health care.

(9) The uninsured are less likely to receive preventive health care.

(10) Delaying or foregoing health care treatment when such treatment is needed can produce unnecessarily dire and expensive results. More severe health care conditions may arise and more expensive health care treatments, such as costly hospitalizations, may be necessary even though such conditions or treatments could have been avoided by the initial provision of adequate and timely health care. The uninsured, for example, are more likely to be hospitalized for conditions that could have been avoided, such as pneumonia and uncontrolled diabetes, than the insured. The uninsured with various forms of cancer are also more likely to be diagnosed with late stage cancer than the insured.

SEC. 2. AMENDMENT TO THE PUBLIC HEALTH SERVICE ACT.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by adding at the end the following:

''TITLE XXVIII—UNIVERSAL HEALTH INSURANCE COVERAGE

''Subtitle A—Employer Mandated Health Insurance Coverage

''SEC. 2801. EMPLOYER MANDATED HEALTH INSURANCE COVERAGE.

''(a) IN GENERAL.—Each employer shall offer to enroll each of its employees and their families in a standard health benefit plan.

''(b) STANDARD HEALTH BENEFIT PLAN.—For purposes of this title, the term 'standard health benefit plan' means a plan that provides benefits for health care items and services that are actuarily equivalent or greater in value than the benefits offered as of January 1, 2000, under the Blue Cross/Blue Shield Standard Option Plan provided under the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code.

''(c) PART-TIME EMPLOYEES.—Subsection (a) shall apply to part-time employees.

''SEC. 2802. TYPE OF COVERAGE.

''(a) IN GENERAL.—Each standard health benefit plan offered by an employer under section 2801(a) shall conform to the requirements of this section.

''(b) PROHIBITION AGAINST DISCRIMINATION.—A standard health benefit plan offered by an employer under section 2801(a) shall not establish rules for eligibility of any individual

to enroll under the plan or exclude or otherwise limit any individual from coverage under the plan based on—

''(1) medical history;

''(2) health status;

''(3) a preexisting medical condition, disease, or disorder; or

''(4) genetic information.

''(c) OPEN ENROLLMENT.—A standard health benefit plan offered by an employer under section 2801(a) shall offer an annual open enrollment period during which an individual may change enrollment from such plan to another standard health benefit plan offered by such employer.

''(d) MEDICALLY NECESSARY SERVICES.—A standard health benefit plan offered by an employer under section 2801(a) shall, if such plan provides coverage for a certain health care item or service, provide coverage for such item or service if a doctor determines that such item or service is medically necessary.

''(e) DATE OF INITIAL COVERAGE.—In the case of an employee enrolled in a standard health benefit plan provided by an employer under section 2801(a), the coverage under such plan shall commence not later than 5 days after the day on which the employee first performs an hour of service as an employee of that employer. No waiting period beyond this initial 5-day period may be imposed regarding such coverage.

''SEC. 2803. PREMIUMS.

''(a) IN GENERAL.—Each employer shall—

''(1) contribute to the cost of any standard health benefit plan that an employee has enrolled in in accordance with this section; and

''(2) withhold from wages of an employee, the employee share of the premium assessed for coverage under the standard health benefit plan.

''(b) CONTRIBUTION.—

''(1) EMPLOYER SHARE.—

''(A) FULL-TIME EMPLOYEES.—Each employer who has enrolled an employee in a standard health benefit plan shall contribute not less than 72 percent of the monthly premium for such employee.

''(B) PART-TIME EMPLOYEES.—

''(i) PRO-RATED PORTION PAID.—Each employer who has enrolled a part-time employee in a standard health benefit plan shall pay a portion of the monthly premium for such employee that is pro-rated to correspond with the number of hours of work that such employee has provided during the past month.

''(ii) EXCEPTION.—No employer contribution is required under this section with respect to an employee who works less than 10 hours per week.

''(2) EMPLOYEE SHARE.—

''(A) IN GENERAL.—Each employee enrolled in a standard health benefit plan under section 2801(a) shall pay the remaining portion of the monthly premium after payment by the employer as required under subsection (a).

''(B) PART-TIME EMPLOYEES.—An employee who is enrolled in a standard health benefit plan under section 2801(a) and works for such employer for not more than 30 hours and not less than 10 hours per week shall be eligible for a subsidy to aid such employee in paying his or her portion of the monthly premium.

''(3) LOW-INCOME EMPLOYEES.—An employee who is enrolled in a standard health benefit plan under section 2801(a) whose family income does not exceed 250 percent of the poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)) as applicable to a family of the size involved, shall be eligible to receive a subsidy from the State as described in subtitle B to aid in payment of premiums.

''SEC. 2804. ENFORCEMENT.

''(a) STATE INELIGIBILITY FOR PUBLIC HEALTH SERVICE ACT FUNDS.—An employer that is a State or political subdivision of a State or an agency or instrumentality of a State or political subdivision that does not comply with the requirements of this title shall not be eligible to receive a grant, contract, cooperative agreement, loan, or loan guarantee under this Act.

''(b) CIVIL PENALTY FOR PRIVATE EMPLOYERS.—

''(1) IN GENERAL.—Any nongovernmental employer that does not comply with this title shall be subject to a civil penalty of not more than 10 percent of the total amount of the employer's expenditures for wages for employees in that year.

''(2) ASSESSMENT PROCEDURE.—A civil money penalty under this section shall be assessed by the Secretary and collected in a civil action brought by the United States in a United States district court. The Secretary shall not assess such a penalty on an employer until the employer has been given notice and an opportunity to present its views on such charge.

''(3) AMOUNT OF PENALTY.—In determining the amount of the penalty, or the amount agreed to in compromise, the Secretary shall consider the gravity of the noncompliance and the demonstrated good faith of the employer charged in attempting to achieve rapid compliance after notification of a violation of this title.

''SEC. 2805. DEFINITIONS.

''In this title:

''(1) EMPLOYER.—The term 'employer' means, with respect to a calendar year and plan year, an employer that employed an average of at least 50 full-time employees on business days during the preceding calendar year and employs not less than 50 employees on the first day of the plan year.

''(2) PART-TIME EMPLOYEE.—The term 'part-time employee' means any individual employed by an employer who works less than 40 hours a week.

''(3) WAITING PERIOD.—The term 'waiting period' means, with respect to a plan and an individual who is a potential beneficiary or participant in the plan, the period that must pass with respect to the individual before the individual is eligible to be covered for benefits under the terms of the plan.noncompliance by the Secretary.

''SEC. 2806. EFFECTIVE DATE.

''This title shall take effect 2 years after the date of enactment of the Universal Secure Access to Health Care Act of 2003.

''Subtitle B—Individual and Employer Subsidies

''SEC. 2811. SUBSIDY PROGRAM.

''(a) IN GENERAL.—The Secretary shall establish a Federal program to award grants to States for State premium assistance programs.

''(b) FEDERAL PROGRAM.—

''(1) IN GENERAL.—The Secretary shall establish a Federal program that shall set all standards for administration of State programs, receive applications from States for the establishment of such programs, and receive reports from States regarding the developments of such programs.

''(2) REGULATIONS.—The Secretary shall promulgate regulations specifying requirements for State programs under this subtitle, including—

''(A) standards for determining eligibility for premium assistance;

''(B) standards for States operating programs under this subtitle which ensure that such programs are operated in a uniform manner with respect to application procedures, data processing systems, and such other administrative activities as the Secretary determines to be necessary; and

''(C) standards for accepting reports regarding developments of such programs.

''(3) CONTENT.—The regulations described in paragraph (2) shall require that a State program—

''(A) enable an individual to file an application for assistance with an agency designated by the State at any time, in person, by mail, or online;

''(B) provide for the use of an application form developed by the Secretary;

''(C) make applications accessible at locations where individuals are most likely to obtain the applications;

''(D) require individuals to submit revised applications to reflect changes in estimated family incomes, including changes in employment status of family members, during the year, and the State shall revise the amount of any premium assistance based on such a revised application; and

''(E) provide for verification of the information supplied in applications under this subtitle, including examining return information disclosed to the State.

''(4) APPLICATION.—The Secretary shall develop an application form for assistance to be used by a State which shall—

''(A) be simple in form and understandable to the average individual;

''(B) require the provision of information necessary to make a determination as to whether an individual is eligible for assistance, including a declaration of estimated income by the individual based, at the election of the individual—

''(I) on multiplying by a factor of 4 the individual's family income for the 3-month period immediately preceding the month in which the application is made; or

''(II) on estimated income for the entire year for which the application is submitted; and

''(C) require attachment of such documentation as deemed necessary by the Secretary in order to ensure eligibility for assistance.

''(c) STATE ADMINISTRATION.—

''(1) IN GENERAL.—A State shall have in effect a program for furnishing premium assistance in accordance with this subtitle.

''(2) DESIGNATION OF STATE AGENCY.—A State may designate any appropriate State agency to administer the program under this subtitle.

''(3) EFFECTIVENESS OF ELIGIBILITY.—A determination by a State that an individual is eligible for premium assistance shall be effective for the calendar year for which such determination is made unless a revised application indicates that an individual is no longer eligible for assistance.

''SEC. 2812. SUBSIDIES FOR LOW-INCOME WORKERS.

''(a) IN GENERAL.—A low-income worker shall be eligible for premium assistance if such worker is eligible under subsection (b).

''(b) ELIGIBILITY.—A low-income worker is eligible for premium assistance under subsection (a) if the State determines that such worker has a family income which does not exceed 250 percent of the poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Community Services

Block Grant Act (42 U.S.C. 9902(2)) as applicable to a family of the size involved.

''(c) AMOUNT OF ASSISTANCE.—The amount of premium assistance for a month for a low-income worker determined to be eligible under subsection (b) shall be determined by the Secretary.

''(d) PAYMENTS.—The amount of the premium assistance available to a low-income worker shall be paid by the State in which the individual resides directly to the standard health plan in which the individual is enrolled. Payments under the preceding sentence shall commence in the first month during which the individual is enrolled in a standard health benefit plan and determined to be eligible for premium assistance under this subtitle.

''SEC. 2813. SUBSIDIES FOR SMALL BUSINESS EMPLOYERS.

''(a) IN GENERAL.—A small business employer that offers to enroll its employees and their families in a standard health benefit plan shall be eligible for premium assistance if the State determines that such employer qualifies for such assistance under subsection (b).

''(b) ELIGIBILITY.—A small business employer is eligible for premium assistance if such employer employs an average of not more than 75 full-time employees on business days during the preceding calendar year and employs not more than 75 employees on the first day of the plan year.

''(c) AMOUNT OF ASSISTANCE.—The amount of premium assistance for a small business employer for a month shall be determined by the Secretary.

''(d) PAYMENTS.—The amount of the premium assistance available to a small business employer shall be paid by the State in which the business is located directly to the standard health benefit plan in which the employee of such business is enrolled. Payments under the preceding sentence shall commence in the first month during which the employee is enrolled in a standard health benefit plan and the employer is determined to be eligible for premium assistance under this subtitle.

''Subtitle C—Election of Coverage

''SEC. 2815. ELECTION OF COVERAGE.

''(a) IN GENERAL.—A small business employer as described in subsection (b) may elect to enroll its employees in—

''(1) a plan provided under the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code; or

''(2) the medicare program under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.), if such employees are not less than 50 years of age.

''(b) SMALL BUSINESS EMPLOYER.—In this section, the term 'small business employer' means an employer that employs an average of not more than 75 full-time employees on business days during the preceding calendar year and employs not more than 75 employees on the first day of the plan year.

''Subtitle D—Community Rating

''SEC. 2821. COMMUNITY RATING.

''(a) IN GENERAL.—Each State shall establish community rating areas in which standard health benefit plans shall offer a standard premium in accordance with this subtitle for enrollment for all eligible individuals.

''(b) COMMUNITY RATING AREAS.—

''(1) IN GENERAL.—In accordance with this subtitle, each State shall, subject to approval of the Secretary, provide for the division of the State into 1 or more community rating areas.

''(2) REVISION OF AREAS.—Each State may, subject to approval of the Secretary, redraw the boundaries of such community rating areas as described in paragraph (1) if such revision is reasonable or necessary.

''(3) MULTIPLE AREAS.—With respect to a community rating area—

''(A) no metropolitan statistical area in a State may be incorporated into more than 1 such area in the State;

''(B) the number of individuals residing within such an area may not be less than 250,000; and

''(C) no area incorporated in a community rating area may be incorporated into another such area.

''(4) NONDISCRIMINATION.—In establishing boundaries for community rating areas, a State shall not directly or through contractual arrangements—

''(A) deny or limit access to or the availability of health care services, or otherwise discriminate in connection with the provision of health care services; or

''(B) limit, segregate, or classify an individual in any way which would deprive or tend to deprive such individual of health care services, or otherwise adversely affect his or her access to health care services;

on the basis of race, national origin, sex, religion, language, income, age, sexual orientation, disability, health status, or anticipated need for health services.

''(5) COORDINATING MULTIPLE COMMUNITY RATING AREAS.—Nothing in this section shall be construed as preventing a State from coordinating the activities of 1 or more community rating areas in the State.

''(6) INTERSTATE COMMUNITY RATING AREAS.—Community rating areas with respect to interstate areas shall be established in accordance with rules established by the Secretary.

''(7) COORDINATION IN MULTI-STATE AREAS.—One or more States may coordinate their operations in contiguous community rating areas. Such coordination may include, the adoption of joint operating rules, contracting with standard health benefit plans, enforcement activities, and establishment of fee schedules for health providers.

''(c) OPEN ENROLLMENT.—Each State, based on rules and procedures established by the Secretary, shall specify a uniform annual open enrollment period for each community rating area during which all eligible individuals are permitted the opportunity to change enrollment among the standard health benefit plans offered to such individuals in such area under this Act. The initial annual open enrollment period shall be for a period of 90 days.

''(d) STANDARD PREMIUM.—Each standard health benefit plan shall establish within each community rating area in which the plan is to be offered a standard premium for enrollment of eligible individuals who seek enrollment in such plan.

''(e) UNIFORM PREMIUMS WITHIN COMMUNITY RATING AREAS.—

''(1) IN GENERAL.—Subject to paragraphs (2) and (3), the standard premium for each group health plan to which this section applies shall be the same, but shall not include the costs of premium processing and enrollment.

''(2) APPLICATION TO ENROLLEES.—

''(A) IN GENERAL.—The premium charged for coverage in a group health plan which covers eligible employees and eligible individuals shall be the product of—

''(i) the standard premium (established under paragraph (1));

''(ii) in the case of enrollment other than individual enrollment, the family adjustment factor specified under subparagraph (B); and

''(iii) the age adjustment factor (specified under subparagraph (C)).

''(B) FAMILY ADJUSTMENT FACTOR.—

''(i) IN GENERAL.—The Secretary shall specify family adjustment factors that reflect the relative actuarial costs of benefit packages based on family classes of enrollment (as compared with such costs for individual enrollment).

''(ii) CLASSES OF ENROLLMENT.—For purposes of this subtitle, there are 4 classes of enrollment:

''(I) Coverage only of an individual (referred to in this subtitle as the 'individual' enrollment or class of enrollment).

''(II) Coverage of a married couple without children (referred to in this subtitle as the 'couple-only' enrollment or class of enrollment).

''(III) Coverage of an individual and one or more children (referred to in this subtitle as the 'single parent' enrollment or class of enrollment).

''(IV) Coverage of a married couple and one or more children (referred to in this subtitle as the 'dual parent' enrollment or class of enrollment).

''(iii) REFERENCES TO FAMILY AND COUPLE CLASSES OF ENROLLMENT.—In this subtitle:

''(I) FAMILY.—The terms 'family enrollment' and 'family class of enrollment' refer to enrollment in a class of enrollment described in any subclause of clause (ii) (other than subclause (I)).

''(II) COUPLE.—The term 'couple class of enrollment' refers to enrollment in a class of enrollment described in subclause (II) or (IV) of clause (ii).

''(iv) SPOUSE; MARRIED; COUPLE.—

''(I) IN GENERAL.—In this subtitle, the terms 'spouse' and 'married' mean, with respect to an individual, another individual who is the spouse of, or is married to, the individual, as determined under applicable State law.

''(II) COUPLE.—The term 'couple' means an individual and the individual's spouse.

''(C) AGE ADJUSTMENT FACTOR.—The Secretary shall specify uniform age categories and maximum rating increments for age adjustment factors that reflect the relative actuarial costs of benefit packages among enrollees. For individuals who have attained age 18 but not age 65, the highest age adjustment factor may not exceed 3 times the lowest age adjustment factor.''.

SEC. 3. TAX DEDUCTION FOR SELF-EMPLOYED.

(a) IN GENERAL.—Paragraph (1) of section 162(l) of the Internal Revenue Code of 1986 is amended to read as follows:

''(l) ALLOWANCE OF DEDUCTION.—In the case of an individual who is an employee within the meaning of section 401(c)(1), there shall be allowed as a deduction under this section an amount equal to 100 percent of the amount paid during the taxable year for insurance which constitutes medical care for the taxpayer, the taxpayer's spouse, and taxpayer's dependents.''.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 2004.

SEC. 4. ACCESS TO MEDICARE BENEFITS FOR INDIVIDUALS 62-TO-65 YEARS OF AGE.

(a) IN GENERAL.—Title XVIII of the Social Security Act is amended—

(1) by redesignating section 1859 and part D as section 1858 and part E, respectively; and

(2) by inserting after such section the following new part:

"PART D—PURCHASE OF MEDICARE BENEFITS BY CERTAIN INDIVIDUALS AGE 62-TO-65 YEARS OF AGE

"SEC. 1859. PROGRAM BENEFITS; ELIGIBILITY.

"(a) ENTITLEMENT TO MEDICARE BENEFITS FOR ENROLLED INDIVIDUALS.—

"(1) IN GENERAL.—An individual enrolled under this part is entitled to the same benefits under this title as an individual entitled to benefits under part A and enrolled under part B.

"(2) DEFINITIONS.—For purposes of this part:

"(A) FEDERAL OR STATE COBRA CONTINUATION PROVISION.—The term 'Federal or State COBRA continuation provision' has the meaning given the term 'COBRA continuation provision' in section 2791(d)(4) of the Public Health Service Act and includes a comparable State program, as determined by the Secretary.

"(B) FEDERAL HEALTH INSURANCE PROGRAM DEFINED.—The term 'Federal health insurance program' means any of the following:

"(i) MEDICARE.—Part A or part B of this title (other than by reason of this part).

"(ii) MEDICAID.—A State plan under title XIX.

"(iii) FEHBP.—The Federal employees health benefit program under chapter 89 of title 5, United States Code.

"(iv) TRICARE.—The TRICARE program (as defined in section 1072(7) of title 10, United States Code).

"(v) ACTIVE DUTY MILITARY.—Health benefits under title 10, United States Code, to an individual as a member of the uniformed services of the United States.

"(C) GROUP HEALTH PLAN.—The term 'group health plan' has the meaning given such term in section 2791(a)(1) of the Public Health Service Act.

"(b) ELIGIBILITY OF INDIVIDUALS AGE 62-TO-65 YEARS OF AGE.—

"(1) IN GENERAL.—Subject to paragraph (2), an individual who meets the following requirements with respect to a month is eligible to enroll under this part with respect to such month:

"(A) AGE.—As of the last day of the month, the individual has attained 62 years of age, but has not attained 65 years of age.

"(B) MEDICARE ELIGIBILITY (BUT FOR AGE).—The individual would be eligible for benefits under part A or part B for the month if the individual were 65 years of age.

"(C) NOT ELIGIBLE FOR COVERAGE UNDER GROUP HEALTH PLANS OR FEDERAL HEALTH INSURANCE PROGRAMS.—The individual is not eligible for benefits or coverage under a Federal health insurance program (as defined in subsection (a)(2)(B)) or under a group health plan (other than such eligibility merely through a Federal or State COBRA continuation provision) as of the last day of the month involved.

"(2) LIMITATION ON ELIGIBILITY IF TERMINATED ENROLLMENT.—If an individual described in paragraph (1) enrolls under this part and coverage of the individual is terminated under section 1859A(d) (other than because of age), the individual is not again eligible to enroll under this subsection unless the following requirements are met:

"(A) NEW COVERAGE UNDER GROUP HEALTH PLAN OR FEDERAL HEALTH INSURANCE PROGRAM.—After the date of termination of coverage under such section, the individual obtains coverage under a group health plan or under a Federal health insurance program.

"(B) SUBSEQUENT LOSS OF NEW COVERAGE.—The individual subsequently loses eligibility for the coverage described in subparagraph (A) and exhausts any eligibility the individual may subsequently have for coverage under a Federal or State COBRA continuation provision.

"(3) CHANGE IN HEALTH PLAN ELIGIBILITY DOES NOT AFFECT COVERAGE.—In the case of an individual who is eligible for and enrolls under this part under this subsection, the individual's continued entitlement to benefits under this part shall not be affected by the individual's subsequent eligibility for benefits or coverage described in paragraph (1)(C), or entitlement to such benefits or coverage.

"SEC. 1859A. ENROLLMENT PROCESS; COVERAGE.

"(a) IN GENERAL.—An individual may enroll in the program established under this part only in such manner and form as may be prescribed by regulations, and only during an enrollment period prescribed by the Secretary consistent with the provisions of this section. Such regulations shall provide a process under which—

"(1) individuals eligible to enroll as of a month are permitted to pre-enroll during a prior month within an enrollment period described in subsection (b); and

"(2) each individual seeking to enroll under section 1859(b) is notified, before enrolling, of the deferred monthly premium amount the individual will be liable for under section 1859C(b) upon attaining 65 years of age as determined under section 1859B(c)(3).

"(b) ENROLLMENT PERIODS.—

"(1) INDIVIDUALS 62-TO-65 YEARS OF AGE.—In the case of individuals eligible to enroll under this part under section 1859(b)—

"(A) INITIAL ENROLLMENT PERIOD.—If the individual is eligible to enroll under such section for July 2002, the enrollment period shall begin on May 1, 2002, and shall end on August 31, 2002. Any such enrollment before July 1, 2002, is conditioned upon compliance with the conditions of eligibility for July 2002.

"(B) SUBSEQUENT PERIODS.—If the individual is eligible to enroll under such section for a month after July 2002, the enrollment period shall begin on the first day of the second month before the month in which the individual first is eligible to so enroll and shall end 4 months later. Any such enrollment before the first day of the third month of such enrollment period is conditioned upon compliance with the conditions of eligibility for such third month.

"(2) AUTHORITY TO CORRECT FOR GOVERNMENT ERRORS.—The provisions of section 1837(h) apply with respect to enrollment under this part in the same manner as they apply to enrollment under part B.

"(c) DATE COVERAGE BEGINS.—

"(1) IN GENERAL.—The period during which an individual is entitled to benefits under this part shall begin as follows, but in no case earlier than July 1, 2002:

"(A) In the case of an individual who enrolls (including pre-enrolls) before the month in which the individual satisfies eligibility for enrollment under section 1859, the first day of such month of eligibility.

"(B) In the case of an individual who enrolls during or after the month in which the individual first satisfies eligibility for enrollment under such section, the first day of the following month.

"(2) AUTHORITY TO PROVIDE FOR PARTIAL MONTHS OF COVERAGE.—Under regulations, the Secretary may, in the Secretary's discretion, provide for coverage periods that include portions of a month in order to avoid lapses of coverage.

"(3) LIMITATION ON PAYMENTS.—No payments may be made under this title with respect to the expenses of an individual enrolled under this part unless such expenses were incurred by such individual during a period which, with respect to the individual, is a coverage period under this section.

"(d) TERMINATION OF COVERAGE.—

"(1) IN GENERAL.—An individual's coverage period under this part shall continue until the individual's enrollment has been terminated at the earliest of the following:

"(A) GENERAL PROVISIONS.—

"(i) NOTICE.—The individual files notice (in a form and manner prescribed by the Secretary) that the individual no longer wishes to participate in the insurance program under this part.

"(ii) NONPAYMENT OF PREMIUMS.—The individual fails to make payment of premiums required for enrollment under this part.

"(iii) MEDICARE ELIGIBILITY.—The individual becomes entitled to benefits under part A or enrolled under part B (other than by reason of this part).

"(B) TERMINATION BASED ON AGE.—The individual attains 65 years of age.

"(2) EFFECTIVE DATE OF TERMINATION.—

"(A) NOTICE.—The termination of a coverage period under paragraph (1)(A)(i) shall take effect at the close of the month following for which the notice is filed.

"(B) NONPAYMENT OF PREMIUM.—The termination of a coverage period under paragraph (1)(A)(ii) shall take effect on a date determined under regulations, which may be determined so as to provide a grace period in which overdue premiums may be paid and coverage continued. The grace period determined under the preceding sentence shall not exceed 60 days; except that it may be extended for an additional 30 days in any case where the Secretary determines that there was good cause for failure to pay the overdue premiums within such 60-day period.

"(C) AGE OR MEDICARE ELIGIBILITY.—The termination of a coverage period under paragraph (1)(A)(iii) or (1)(B) shall take effect as of the first day of the month in which the individual attains 65 years of age or becomes entitled to benefits under part A or enrolled for benefits under part B (other than by reason of this part).

"SEC. 1859B. PREMIUMS.

"(a) AMOUNT OF MONTHLY PREMIUMS.—

"(1) BASE MONTHLY PREMIUMS.—The Secretary shall, during September of each year (beginning with 2001), determine the following premium rates which shall apply with respect to coverage provided under this title for any month in the succeeding year:

"(A) BASE MONTHLY PREMIUM FOR INDIVIDUALS 62 YEARS OF AGE OR OLDER.—A base monthly premium for individuals 62 years of age or older is equal to 1/12 of the base annual premium rate computed under subsection (b) for each premium area.

"(B) DEFERRED MONTHLY PREMIUMS FOR INDIVIDUALS 62 YEARS OF AGE OR OLDER.—The Secretary shall, during September of each year (beginning with 2001), determine under subsection (c) the amount of deferred monthly premiums that shall apply with respect to individuals who first obtain coverage under this part under section 1859(b) in the succeeding year.

"(3) ESTABLISHMENT OF PREMIUM AREAS.—For purposes of this part, the term 'premium area' means such an area as the Secretary shall specify to carry out this part. The Secretary from time to time may change the boundaries of such premium areas. The Secretary shall seek to minimize the number of such areas specified under this paragraph.

"(b) BASE ANNUAL PREMIUM FOR INDIVIDUALS 62 YEARS OF AGE OR OLDER.—

''(1) NATIONAL, PER CAPITA AVERAGE.—The Secretary shall estimate the average, annual per capita amount that would be payable under this title with respect to individuals residing in the United States who meet the requirement of section 1859(b)(1)(A) as if all such individuals were eligible for (and enrolled) under this title during the entire year (and assuming that section 1862(b)(2)(A)(i) did not apply).

''(2) GEOGRAPHIC ADJUSTMENT.—The Secretary shall reduce, as determined appropriate, the amount determined under paragraph (1) for a premium area (specified under subsection (a)(3)) that has costs below the national average, in order to assure participation in all areas throughout the United States.

''(3) BASE ANNUAL PREMIUM.—The base annual premium under this subsection for months in a year for individuals 62 years of age or older residing in a premium area is equal to the average, annual per capita amount estimated under paragraph (1) for the year, adjusted for such area under paragraph (2).

''(c) DEFERRED PREMIUM RATE FOR INDIVIDUALS 62 YEARS OF AGE OR OLDER.—The deferred premium rate for individuals with a group of individuals who obtain coverage under section 1859(b) in a year shall be computed by the Secretary as follows:

''(1) ESTIMATION OF NATIONAL, PER CAPITA ANNUAL AVERAGE EXPENDITURES FOR ENROLLMENT GROUP.—The Secretary shall estimate the average, per capita annual amount that will be paid under this part for individuals in such group during the period of enrollment under section 1859(b). In making such estimate for coverage beginning in a year before 2006, the Secretary may base such estimate on the average, per capita amount that would be payable if the program had been in operation over a previous period of at least 4 years.

''(2) DIFFERENCE BETWEEN ESTIMATED EXPENDITURES AND ESTIMATED PREMIUMS.—Based on the characteristics of individuals in such group, the Secretary shall estimate during the period of coverage of the group under this part under section 1859(b) the amount by which—

''(A) the amount estimated under paragraph (1); exceeds

''(B) the average, annual per capita amount of premiums that will be payable for months during the year under section 1859C(a) for individuals in such group (including premiums that would be payable if there were no terminations in enrollment under clause (i) or (ii) of section 1859A(d)(1)(A)).

''(3) ACTUARIAL COMPUTATION OF DEFERRED MONTHLY PREMIUM RATES.—The Secretary shall determine deferred monthly premium rates for individuals in such group in a manner so that—

''(A) the estimated actuarial value of such premiums payable under section 1859C(b), is equal to

''(B) the estimated actuarial present value of the differences described in paragraph (2). Such rate shall be computed for each individual in the group in a manner so that the rate is based on the number of months between the first month of coverage based on enrollment under section 1859(b) and the month in which the individual attains 65 years of age.

''(4) DETERMINANTS OF ACTUARIAL PRESENT VALUES.—The actuarial present values described in paragraph (3) shall reflect—

''(A) the estimated probabilities of survival at ages 62 through 84 for individuals enrolled during the year; and

''(B) the estimated effective average interest rates that would be earned on investments held in the trust funds under this title during the period in question.

''SEC. 1859C. PAYMENT OF PREMIUMS.

''(a) PAYMENT OF BASE MONTHLY PREMIUM.—

''(1) IN GENERAL.—The Secretary shall provide for payment and collection of the base monthly premium, determined under section 1859B(a)(1) for the age (and age cohort, if applicable) of the individual involved and the premium area in which the individual principally resides, in the same manner as for payment of monthly premiums under section 1840, except that, for purposes of applying this section, any reference in such section to the Federal Supplementary Medical Insurance Trust Fund is deemed a reference to the Trust Fund established under section 1859D.

''(2) PERIOD OF PAYMENT.—In the case of an individual who participates in the program established by this title, the base monthly premium shall be payable for the period commencing with the first month of the individual's coverage period and ending with the month in which the individual's coverage under this title terminates.

''(b) PAYMENT OF DEFERRED PREMIUM FOR INDIVIDUALS COVERED AFTER ATTAINING AGE 62.—

''(1) RATE OF PAYMENT.—

''(A) IN GENERAL.—In the case of an individual who is covered under this part for a month pursuant to an enrollment under section 1859(b), subject to subparagraph (B), the individual is liable for payment of a deferred premium in each month during the period described in paragraph (2) in an amount equal to the full deferred monthly premium rate determined for the individual under section 1859B(c).

''(B) SPECIAL RULES FOR THOSE WHO DISENROLL EARLY.—

''(i) IN GENERAL.—If such an individual's enrollment under such section is terminated under clause (i) or (ii) of section 1859A(d)(1)(A), subject to clause (ii), the amount of the deferred premium otherwise established under this paragraph shall be pro-rated to reflect the number of months of coverage under this part under such enrollment compared to the maximum number of months of coverage that the individual would have had if the enrollment were not so terminated.

''(ii) ROUNDING TO 12-MONTH MINIMUM COVERAGE PERIODS.—In applying clause (i), the number of months of coverage (if not a multiple of 12) shall be rounded to the next highest multiple of 12 months, except that in no case shall this clause result in a number of months of coverage exceeding the maximum number of months of coverage that the individual would have had if the enrollment were not so terminated.

''(2) PERIOD OF PAYMENT.—The period described in this paragraph for an individual is the period beginning with the first month in which the individual has attained 65 years of age and ending with the month before the month in which the individual attains 85 years of age.

''(3) COLLECTION.—In the case of an individual who is liable for a premium under this subsection, the amount of the premium shall be collected in the same manner as the premium for enrollment under such part is collected under section 1840, except that any reference in such section to the Federal Supplementary Medical Insurance Trust Fund is deemed to be a reference to the Medicare Early Access Trust Fund established under section 1859D.

''(c) APPLICATION OF CERTAIN PROVISIONS.—The provisions of section 1840 (other than subsection (h)) shall apply to premiums collected under this section in the same manner as they apply to premiums collected under part B, except that any reference in such section to the Federal Supplementary Medical Insurance Trust Fund is deemed a reference to the Trust Fund established under section 1859D.

''SEC. 1859D. MEDICARE EARLY ACCESS TRUST FUND.

''(a) ESTABLISHMENT OF TRUST FUND.—

''(1) IN GENERAL.—There is hereby created on the books of the Treasury of the United States a trust fund to be known as the 'Medicare Early Access Trust Fund' (in this section referred to as the 'Trust Fund'). The Trust Fund shall consist of such gifts and bequests as may be made as provided in section 201(i)(1) and such amounts as may be deposited in, or appropriated to, such fund as provided in this title.

''(2) PREMIUMS.—Premiums collected under section 1859B shall be transferred to the Trust Fund.

''(b) INCORPORATION OF PROVISIONS.—

''(1) IN GENERAL.—Subject to paragraph (2), subsections (b) through (i) of section 1841 shall apply with respect to the Trust Fund and this title in the same manner as they apply with respect to the Federal Supplementary Medical Insurance Trust Fund and part B, respectively.

''(2) MISCELLANEOUS REFERENCES.—In applying provisions of section 1841 under paragraph (1)—

''(A) any reference in such section to 'this part' is construed to refer to this part D;

''(B) any reference in section 1841(h) to section 1840(d) and in section 1841(i) to sections 1840(b)(1) and 1842(g) are deemed references to comparable authority exercised under this part; and

''(C) payments may be made under section 1841(g) to the trust funds under sections 1817 and 1841 as reimbursement to such funds for payments they made for benefits provided under this part.

''SEC. 1859E. OVERSIGHT AND ACCOUNTABILITY.

''(a) THROUGH ANNUAL REPORTS OF TRUSTEES.—The Board of Trustees of the Medicare Early Access Trust Fund under section 1859D(b)(1) shall report on an annual basis to Congress concerning the status of the Trust Fund and the need for adjustments in the program under this part to maintain financial solvency of the program under this part.

''(b) PERIODIC GAO REPORTS.—The Comptroller General of the United States shall periodically submit to Congress reports on the adequacy of the financing of coverage provided under this part. The Comptroller General shall include in such report such recommendations for adjustments in such financing and coverage as the Comptroller General deems appropriate in order to maintain financial solvency of the program under this part.

''SEC. 1859F. ADMINISTRATION AND MISCELLANEOUS.

''(a) TREATMENT FOR PURPOSES OF THIS TITLE.—Except as otherwise provided in this part—

''(1) an individual enrolled under this part shall be treated for purposes of this title as though the individual was entitled to benefits under part A and enrolled under part B; and

''(2) benefits described in section 1859 shall be payable under this title to such an individual in the same manner as if such individual was so entitled and enrolled.

''(b) NOT TREATED AS MEDICARE PROGRAM FOR PURPOSES OF MEDICAID PROGRAM.—For

purposes of applying title XIX (including the provision of medicare cost-sharing assistance under such title), an individual who is enrolled under this part shall not be treated as being entitled to benefits under this title.

''(c) NOT TREATED AS MEDICARE PROGRAM FOR PURPOSES OF COBRA CONTINUATION PROVISIONS.—In applying a COBRA continuation provision (as defined in section 2791(d)(4) of the Public Health Service Act), any reference to an entitlement to benefits under this title shall not be construed to include entitlement to benefits under this title pursuant to the operation of this part.''.

(b) CONFORMING AMENDMENTS TO SOCIAL SECURITY ACT PROVISIONS.—

(1) Section 201(i)(1) of the Social Security Act (42 U.S.C. 401(i)(1)) is amended by striking ''or the Federal Supplementary Medical Insurance Trust Fund'' and inserting ''the Federal Supplementary Medical Insurance Trust Fund, and the Medicare Early Access Trust Fund''.

(2) Section 201(g)(1)(A) of such Act (42 U.S.C. 401(g)(1)(A)) is amended by striking ''and the Federal Supplementary Medical Insurance Trust Fund established by title XVIII'' and inserting '', the Federal Supplementary Medical Insurance Trust Fund, and the Medicare Early Access Trust Fund established by title XVIII''.

(3) Section 1820(i) of such Act (42 U.S.C. 1395i–4(i)) is amended by striking ''part D'' and inserting ''part E''.

(4) Part C of title XVIII of such Act is amended—

(A) in section 1851(a)(2)(B) (42 U.S.C. 1395w–21(a)(2)(B)), by striking ''1859(b)(3)'' and inserting ''1858(b)(3)'';

(B) in section 1851(a)(2)(C) (42 U.S.C. 1395w–21(a)(2)(C)), by striking ''1859(b)(2)'' and inserting ''1858(b)(2)'';

(C) in section 1852(a)(1) (42 U.S.C. 1395w–22(a)(1)), by striking ''1859(b)(3)'' and inserting ''1858(b)(3)'';

(D) in section 1852(a)(3)(B)(ii) (42 U.S.C. 1395w–22(a)(3)(B)(ii)), by striking ''1859(b)(2)(B)'' and inserting ''1858(b)(2)(B)'';

(E) in section 1853(a)(1)(A) (42 U.S.C. 1395w–23(a)(1)(A)), by striking ''1859(e)(4)'' and inserting ''1858(e)(4)''; and

(F) in section 1853(a)(3)(D) (42 U.S.C. 1395w–23(a)(3)(D)), by striking ''1859(e)(4)'' and inserting ''1858(e)(4)''.

(5) Section 1853(c) of such Act (42 U.S.C. 1395w–23(c)) is amended—

(A) in paragraph (1), by striking ''and (7)'' and inserting '', (7), and (8)'', and

(B) by adding at the end the following:

''(8) ADJUSTMENT FOR EARLY ACCESS.—In applying this subsection with respect to individuals entitled to benefits under part D, the Secretary shall provide for an appropriate adjustment in the Medicare+Choice capitation rate as may be appropriate to reflect differences between the population served under such part and the population under parts A and B.''.

(c) OTHER CONFORMING AMENDMENTS.—

(1) Section 138(b)(4) of the Internal Revenue Code of 1986 is amended by striking ''1859(b)(3)'' and inserting ''1858(b)(3)''.

(2)(A) Section 602(2)(D)(ii) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1162(2)) is amended by inserting ''(not including an individual who is so entitled pursuant to enrollment under section 1859A)'' after ''Social Security Act''.

(B) Section 2202(2)(D)(ii) of the Public Health Service Act (42 U.S.C. 300bb–2(2)(D)(ii)) is amended by inserting ''(not including an individual who is so entitled pursuant to enrollment under section 1859A)'' after ''Social Security Act''.

(C) Section 4980B(f)(2)(B)(i)(V) of the Internal Revenue Code of 1986 is amended by inserting ''(not including an individual who is so entitled pursuant to enrollment under section 1859A)'' after ''Social Security Act''.

SEC. 5. ACCESS TO MEDICARE BENEFITS FOR DISPLACED WORKERS 55-TO-62 YEARS OF AGE.

(a) ELIGIBILITY.—Section 1859 of the Social Security Act, as inserted by section 4(a)(2), is amended by adding at the end the following new subsection:

''(c) DISPLACED WORKERS AND SPOUSES.—

''(1) DISPLACED WORKERS.—Subject to paragraph (3), an individual who meets the following requirements with respect to a month is eligible to enroll under this part with respect to such month:

''(A) AGE.—As of the last day of the month, the individual has attained 55 years of age, but has not attained 62 years of age.

''(B) MEDICARE ELIGIBILITY (BUT FOR AGE).—The individual would be eligible for benefits under part A or B for the month if the individual were 65 years of age.

''(C) LOSS OF EMPLOYMENT-BASED COVERAGE.—

''(i) ELIGIBLE FOR UNEMPLOYMENT COMPENSATION.—The individual meets the requirements relating to period of covered employment and conditions of separation from employment to be eligible for unemployment compensation (as defined in section 85(b) of the Internal Revenue Code of 1986), based on a separation from employment occurring on or after January 1, 2001. The previous sentence shall not be construed as requiring the individual to be receiving such unemployment compensation.

''(ii) LOSS OF EMPLOYMENT-BASED COVERAGE.—Immediately before the time of such separation of employment, the individual was covered under a group health plan on the basis of such employment, and, because of such loss, is no longer eligible for coverage under such plan (including such eligibility based on the application of a Federal or State COBRA continuation provision) as of the last day of the month involved.

''(iii) PREVIOUS CREDITABLE COVERAGE FOR AT LEAST 1 YEAR.—As of the date on which the individual loses coverage described in clause (ii), the aggregate of the periods of creditable coverage (as determined under section 2701(c) of the Public Health Service Act) is 12 months or longer.

''(D) EXHAUSTION OF AVAILABLE COBRA CONTINUATION BENEFITS.—

''(i) IN GENERAL.—In the case of an individual described in clause (ii) for a month described in clause (iii)—

''(I) the individual (or spouse) elected coverage described in clause (ii); and

''(II) the individual (or spouse) has continued such coverage for all months described in clause (iii) in which the individual (or spouse) is eligible for such coverage.

''(ii) INDIVIDUALS TO WHOM COBRA CONTINUATION COVERAGE MADE AVAILABLE.—An individual described in this clause is an individual—

''(I) who was offered coverage under a Federal or State COBRA continuation provision at the time of loss of coverage eligibility described in subparagraph (C)(ii); or

''(II) whose spouse was offered such coverage in a manner that permitted coverage of the individual at such time.

''(iii) MONTHS OF POSSIBLE COBRA CONTINUATION COVERAGE.—A month described in this clause is a month for which an individual described in clause (ii) could have had coverage described in such clause as of the last day of the month if the individual (or the spouse of the individual, as the case may be) had elected such coverage on a timely basis.

''(E) NOT ELIGIBLE FOR COVERAGE UNDER FEDERAL HEALTH INSURANCE PROGRAM OR GROUP HEALTH PLANS.—The individual is not eligible for benefits or coverage under a Federal health insurance program or under a group health plan (whether on the basis of the individual's employment or employment of the individual's spouse) as of the last day of the month involved.

''(2) SPOUSE OF DISPLACED WORKER.—Subject to paragraph (3), an individual who meets the following requirements with respect to a month is eligible to enroll under this part with respect to such month:

''(A) AGE.—As of the last day of the month, the individual has not attained 62 years of age.

''(B) MARRIED TO DISPLACED WORKER.—The individual is the spouse of an individual at the time the individual enrolls under this part under paragraph (1) and loses coverage described in paragraph (1)(C)(ii) because the individual's spouse lost such coverage.

''(C) MEDICARE ELIGIBILITY (BUT FOR AGE); EXHAUSTION OF ANY COBRA CONTINUATION COVERAGE; AND NOT ELIGIBLE FOR COVERAGE UNDER FEDERAL HEALTH INSURANCE PROGRAM OR GROUP HEALTH PLAN.—The individual meets the requirements of subparagraphs (B), (D), and (E) of paragraph (1).

''(3) CHANGE IN HEALTH PLAN ELIGIBILITY AFFECTS CONTINUED ELIGIBILITY.—For provision that terminates enrollment under this section in the case of an individual who becomes eligible for coverage under a group health plan or under a Federal health insurance program, see section 1859A(d)(1)(C).

''(4) REENROLLMENT PERMITTED.—Nothing in this subsection shall be construed as preventing an individual who, after enrolling under this subsection, terminates such enrollment from subsequently reenrolling under this subsection if the individual is eligible to enroll under this subsection at that time.''.

(b) ENROLLMENT.—Section 1859A of such Act, as so inserted, is amended—

(1) in subsection (a), by striking ''and'' at the end of paragraph (1), by striking the period at the end of paragraph (2) and inserting ''; and'', and by adding at the end the following new paragraph:

''(3) individuals whose coverage under this part would terminate because of subsection (d)(1)(B)(ii) are provided notice and an opportunity to continue enrollment in accordance with section 1859E(c)(1).'';

(2) in subsection (b), by inserting after Notwithstanding any other provision of law, (1) the following:

''(2) DISPLACED WORKERS AND SPOUSES.—In the case of individuals eligible to enroll under this part under section 1859(c), the following rules apply:

''(A) INITIAL ENROLLMENT PERIOD.—If the individual is first eligible to enroll under such section for July 2005, the enrollment period shall begin on May 1, 2002, and shall end on August 31, 2002. Any such enrollment before July 1, 2002, is conditioned upon compliance with the conditions of eligibility for July 2002.

''(B) SUBSEQUENT PERIODS.—If the individual is eligible to enroll under such section for a month after July 2002, the enrollment period based on such eligibility shall begin on the first day of the second month before the month in which the individual first is eligible to so enroll (or reenroll) and shall end 4 months later.'';

(3) in subsection (d)(1), by amending subparagraph (B) to read as follows:

''(B) TERMINATION BASED ON AGE.—

''(i) AT AGE 65.—Subject to clause (ii), the individual attains 65 years of age.

''(ii) AT AGE 62 FOR DISPLACED WORKERS AND SPOUSES.—In the case of an individual enrolled under this part pursuant to section 1859(c), subject to subsection (a)(1), the individual attains 62 years of age.'';

(4) in subsection (d)(1), by adding at the end the following new subparagraph:

''(C) OBTAINING ACCESS TO EMPLOYMENT-BASED COVERAGE OR FEDERAL HEALTH INSURANCE PROGRAM FOR INDIVIDUALS UNDER 62 YEARS OF AGE.—In the case of an individual who has not attained 62 years of age, the individual is covered (or eligible for coverage) as a participant or beneficiary under a group health plan or under a Federal health insurance program.'';

(5) in subsection (d)(2), by amending subparagraph (C) to read as follows:

''(C) AGE OR MEDICARE ELIGIBILITY.—

''(i) IN GENERAL.—The termination of a coverage period under paragraph (1)(A)(iii) or (1)(B)(i) shall take effect as of the first day of the month in which the individual attains 65 years of age or becomes entitled to benefits under part A or enrolled for benefits under part B.

''(ii) DISPLACED WORKERS.—The termination of a coverage period under paragraph (1)(B)(ii) shall take effect as of the first day of the month in which the individual attains 62 years of age, unless the individual has enrolled under this part pursuant to section 1859(b) and section 1859E(c)(1).''; and

(6) in subsection (d)(2), by adding at the end the following new subparagraph:

''(D) ACCESS TO COVERAGE.—The termination of a coverage period under paragraph (1)(C) shall take effect on the date on which the individual is eligible to begin a period of creditable coverage (as defined in section 2701(c) of the Public Health Service Act) under a group health plan or under a Federal health insurance program.''.

(c) PREMIUMS.—Section 1859B of such Act, as so inserted, is amended—

(1) in subsection (a)(1), by adding at the end the following:

''(B) BASE MONTHLY PREMIUM FOR INDIVIDUALS UNDER 62 YEARS OF AGE.—A base monthly premium for individuals under 62 years of age, equal to 1/12 of the base annual premium rate computed under subsection (d)(3) for each premium area and age cohort.''; and

(2) by adding at the end the following new subsection:

''(d) BASE MONTHLY PREMIUM FOR INDIVIDUALS UNDER 62 YEARS OF AGE.—

''(1) NATIONAL, PER CAPITA AVERAGE FOR AGE GROUPS.—

''(A) ESTIMATE OF AMOUNT.—The Secretary shall estimate the average, annual per capita amount that would be payable under this title with respect to individuals residing in the United States who meet the requirement of section 1859(c)(1)(A) within each of the age cohorts established under subparagraph (B) as if all such individuals within such cohort were eligible for (and enrolled) under this title during the entire year (and assuming that section 1862(b)(2)(A)(i) did not apply).

''(B) AGE COHORTS.—For purposes of subparagraph (A), the Secretary shall establish separate age cohorts in 5-year age increments for individuals who have not attained 60 years of age and a separate cohort for individuals who have attained 60 years of age.

''(2) GEOGRAPHIC ADJUSTMENT.—The Secretary shall adjust the amount determined under paragraph (1)(A) for each premium area (specified under subsection (a)(3)) in the same manner and to the same extent as the Secretary provides for adjustments under subsection (b)(2).

''(3) BASE ANNUAL PREMIUM.—The base annual premium under this subsection for months in a year for individuals in an age cohort under paragraph (1)(B) in a premium area is equal to 165 percent of the average, annual per capita amount estimated under paragraph (1) for the age cohort and year, adjusted for such area under paragraph (2).

''(4) PRO-RATION OF PREMIUMS TO REFLECT COVERAGE DURING A PART OF A MONTH.—If the Secretary provides for coverage of portions of a month under section 1859A(c)(2), the Secretary shall pro-rate the premiums attributable to such coverage under this section to reflect the portion of the month so covered.''.

(d) ADMINISTRATIVE PROVISIONS.—Section 1859F of such Act, as so inserted, is amended by adding at the end the following:

''(d) ADDITIONAL ADMINISTRATIVE PROVISIONS.—

''(1) PROCESS FOR CONTINUED ENROLLMENT OF DISPLACED WORKERS WHO ATTAIN 62 YEARS OF AGE.—The Secretary shall provide a process for the continuation of enrollment of individuals whose enrollment under section 1859(c) would be terminated upon attaining 62 years of age. Under such process such individuals shall be provided appropriate and timely notice before the date of such termination and of the requirement to enroll under this part pursuant to section 1859(b) in order to continue entitlement to benefits under this title after attaining 62 years of age.

''(2) ARRANGEMENTS WITH STATES FOR DETERMINATIONS RELATING TO UNEMPLOYMENT COMPENSATION ELIGIBILITY.—The Secretary may provide for appropriate arrangements with States for the determination of whether individuals in the State meet or would meet the requirements of section 1859(c)(1)(C)(i).''.

(e) CONFORMING AMENDMENT TO HEADING TO PART.—The heading of part D of title XVIII of the Social Security Act, as so inserted, is amended by striking ''62'' and inserting ''55''.

SEC. 6. PROVISIONS TO MAKE FEHBP COVERAGE AVAILABLE FOR THE SELF-EMPLOYED.

Chapter 89 of title 5, United States Code, is amended by adding at the end the following:

''§ 8915. Expanded access to coverage for the self-employed

''(a) The Office of Personnel Management (referred to in this section as the 'Office') shall administer a health insurance program for eligible individuals who are non-Federal employees in accordance with this section.

''(b) The term 'eligible individual' means a self-employed individual as defined in section 401(c)(1) of the Internal Revenue Code of 1986.

''(c) The Office shall prescribe regulations to apply the provisions of this chapter to the greatest extent practicable to eligible individuals covered under this section.

''(c) In no event shall the enactment of this section result in—

''(1) any increase in the level of individual or Government contributions required under this chapter, including copayments or deductibles;

''(2) any decrease in the types of benefits offered under this chapter; or

''(3) any other change that would adversely affect the coverage afforded under this chapter to employees and annuitants and members of family under this chapter.

''(d) The Office shall develop methods to facilitate enrollment under this section, including the use of the Internet.

''(e) The Office may enter into contracts for the performance of appropriate administrative functions under this chapter.

''(f) Each contract entered into under section 8902 shall require a carrier to offer to eligible individuals under this chapter, throughout each term for which the contract remains effective, the same benefits (subject to the same maximums, limitations, exclusions, and other similar terms or conditions) as would be offered under such contract or applicable health benefits plan to employees, annuitants, and members of family.

''(g)(1) The Office may waive the requirements of this section, if the Office determines, based on a petition submitted by a carrier that—

''(A) the carrier is unable to offer the applicable health benefits plan because of a limitation in the capacity of the plan to deliver services or assure financial solvency;

''(B) the applicable health benefits plan is not sponsored by a carrier licensed under applicable State law; or

''(C) bona fide enrollment restrictions make the application of this chapter inappropriate, including restrictions common to plans which are limited to individuals having a past or current employment relationship with a particular agency or other authority of the Government.

''(2) The Office may require a petition under this subsection to include—

''(A) a description of the efforts the carrier proposes to take in order to offer the applicable health benefits plan under this chapter; and

''(B) the proposed date for offering such a health benefits plan.

''(3) A waiver under this section may be for any period determined by the Office. The Office may grant subsequent waivers under this section.

''(h) The Office shall provide for the implementation of procedures to provide for an annual open enrollment period during which eligible individuals may enroll with a plan or contract for coverage under this section.

''(i) Except as the Office may by regulation prescribe, any reference to this chapter (or any requirement of this chapter), made in any provision of law, shall not be considered to include this section (or any requirement of this section).

''(j) This section shall take effect on the date of enactment of this section and shall apply to contracts that take effect with respect to calendar year 2002 and each calendar year thereafter.''.

SEC. 7. MEDIKIDS HEALTH INSURANCE.

(a) BENEFITS FOR ALL CHILDREN BORN AFTER 2002.—

(1) IN GENERAL.—The Social Security Act is amended by adding at the end the following:

''TITLE XXII—MEDIKIDS PROGRAM

''SEC. 2201. ELIGIBILITY.

''(a) ELIGIBILITY OF INDIVIDUALS BORN AFTER DECEMBER 31, 2002; ALL CHILDREN UNDER 23 YEARS OF AGE IN SIXTH YEAR.—An individual who meets the following requirements with respect to a month is eligible to enroll under this title with respect to such month:

''(1) AGE.—

''(A) FIRST YEAR.—During the first year in which this title is effective, the individual has not attained 6 years of age.

''(B) SECOND YEAR.—During the second year in which this title is effective, the individual has not attained 11 years of age.

''(C) THIRD YEAR.—During the third year in which this title is effective, the individual has not attained 16 years of age.

''(D) FOURTH YEAR.—During the fourth year in which this title is effective, the individual has not attained 21 years of age.

''(E) FIFTH AND SUBSEQUENT YEARS.—During the fifth year in which this title is effective and each subsequent year, the individual has not attained 23 years of age.

''(2) CITIZENSHIP.—The individual is a citizen or national of the United States or is permanently residing in the United States under color of law.

''(b) ENROLLMENT PROCESS.—An individual may enroll in the program established under this title only in such manner and form as may be prescribed by regulations, and only during an enrollment period prescribed by the Secretary consistent with the provisions of this section. Such regulations shall provide a process under which—

''(1) individuals who are born in the United States after December 31, 2002, are deemed to be enrolled at the time of birth and a parent or guardian of such an individual is permitted to pre-enroll in the month prior to the expected month of birth;

''(2) individuals who are born outside the United States after such date and who become eligible to enroll by virtue of immigration into (or an adjustment of immigration status in) the United States are deemed enrolled at the time of entry or adjustment of status;

''(3) eligible individuals may otherwise be enrolled at such other times and manner as the Secretary shall specify, including the use of outstationed eligibility sites as described in section 1902(a)(55)(A) and the use of presumptive eligibility provisions like those described in section 1920A; and

''(4) at the time of automatic enrollment of a child, the Secretary provides for issuance to a parent or custodian of the individual a card evidencing coverage under this title and for a description of such coverage.

The provisions of section 1837(h) apply with respect to enrollment under this title in the same manner as they apply to enrollment under part B of title XVIII.

''(c) DATE COVERAGE BEGINS.—

''(1) IN GENERAL.—The period during which an individual is entitled to benefits under this title shall begin as follows, but in no case earlier than January 1, 2003:

''(A) In the case of an individual who is enrolled under paragraph (1) or (2) of subsection (b), the date of birth or date of obtaining appropriate citizenship or immigration status, as the case may be.

''(B) In the case of an another individual who enrolls (including pre-enrolls) before the month in which the individual satisfies eligibility for enrollment under subsection (a), the first day of such month of eligibility.

''(C) In the case of an another individual who enrolls during or after the month in which the individual first satisfies eligibility for enrollment under such subsection, the first day of the following month.

''(2) AUTHORITY TO PROVIDE FOR PARTIAL MONTHS OF COVERAGE.—Under regulations, the Secretary may, in the Secretary's discretion, provide for coverage periods that include portions of a month in order to avoid lapses of coverage.

''(3) LIMITATION ON PAYMENTS.—No payments may be made under this title with respect to the expenses of an individual enrolled under this title unless such expenses were incurred by such individual during a period which, with respect to the individual, is a coverage period under this section.

''(d) EXPIRATION OF ELIGIBILITY.—An individual's coverage period under this part shall continue until the individual's enrollment has been terminated because the individual no longer meets the requirements of subsection (a) (whether because of age or change in immigration status).

''(e) ENTITLEMENT TO MEDIKIDS BENEFITS FOR ENROLLED INDIVIDUALS.—An individual enrolled under this section is entitled to the benefits described in section 2202.

''(f) LOW-INCOME INFORMATION.—At the time of enrollment of a child under this title, the Secretary shall make an inquiry as to whether or not the family income of the family that includes the child is less than 150 percent of the poverty line for a family of the size involved. If the family income is below such level, the Secretary shall encode in the identification card issued in connection with eligibility under this title a code indicating such fact. The Secretary also shall provide for a toll-free telephone line at which providers can verify whether or not such a child is in a family the income of which is below such level.

''(g) CONSTRUCTION.—Nothing in this title shall be construed as requiring (or preventing) an individual who is enrolled under this section from seeking medical assistance under a State medicaid plan under title XIX or child health assistance under a State child health plan under title XXI.

''SEC. 2202. BENEFITS.

''(a) SECRETARIAL SPECIFICATION OF BENEFIT PACKAGE.—

''(1) IN GENERAL.—The Secretary shall specify the benefits to be made available under this title consistent with the provisions of this section and in a manner designed to meet the health needs of enrollees.

''(2) UPDATING.—The Secretary shall update the specification of benefits over time to ensure the inclusion of age-appropriate benefits to reflect the enrollee population.

''(3) ANNUAL UPDATING.—The Secretary shall establish procedures for the annual review and updating of such benefits to account for changes in medical practice, new information from medical research, and other relevant developments in health science.

''(4) INPUT.—The Secretary shall seek the input of the pediatric community in specifying and updating such benefits.

''(5) LIMITATION ON UPDATING.—In no case shall updating of benefits under this subsection result in a failure to provide benefits required under subsection (b).

''(b) INCLUSION OF CERTAIN BENEFITS.—

''(1) MEDICARE CORE BENEFITS.—Such benefits shall include (to the extent consistent with other provisions of this section) at least the same benefits (including coverage, access, availability, duration, and beneficiary rights) that are available under parts A and B of title XVIII.

''(2) ALL REQUIRED MEDICAID BENEFITS.—Such benefits shall also include all items and services for which medical assistance is required to be provided under section 1902(a)(10)(A) to individuals described in such section, including early and periodic screening, diagnostic services, and treatment services.

''(3) INCLUSION OF PRESCRIPTION DRUGS.—Such benefits also shall include (as specified by the Secretary) prescription drugs and biologicals.

''(4) COST-SHARING.—

''(A) IN GENERAL.—Subject to subparagraph (B), such benefits also shall include the cost-sharing (in the form of deductibles, coinsurance, and copayments) applicable under title XVIII with respect to comparable items and services, except that no cost-sharing shall be imposed with respect to early and periodic screening and diagnostic services included under paragraph (2).

''(B) NO COST-SHARING FOR LOWEST INCOME CHILDREN.—Such benefits shall not include any cost-sharing for children in families the income of which (as determined for purposes of section 1905(p)) does not exceed 150 percent of the official income poverty line (referred to in such section) applicable to a family of the size involved.

''(C) REFUNDABLE CREDIT FOR COST-SHARING FOR OTHER LOW-INCOME CHILDREN.—For a refundable credit for cost-sharing in the case of children in certain families, see section 35 of the Internal Revenue Code of 1986.

''(c) PAYMENT SCHEDULE.—The Secretary, with the assistance of the Medicare Payment Advisory Commission, shall develop and implement a payment schedule for benefits covered under this title. To the extent feasible, such payment schedule shall be consistent with comparable payment schedules and reimbursement methodologies applied under parts A and B of title XVIII.

''(d) INPUT.—The Secretary shall specify such benefits and payment schedules only after obtaining input from appropriate child health providers and experts.

''(e) ENROLLMENT IN HEALTH PLANS.—The Secretary shall provide for the offering of benefits under this title through enrollment in a health benefit plan that meets the same (or similar) requirements as the requirements that apply to Medicare+Choice plans under part C of title XVIII. In the case of individuals enrolled under this title in such a plan, the Medicare+Choice capitation rate described in section 1853(c) shall be adjusted in an appropriate manner to reflect differences between the population served under this title and the population under title XVIII.

''SEC. 2203. PREMIUMS.

''(a) AMOUNT OF MONTHLY PREMIUMS.—

''(1) IN GENERAL.—The Secretary shall, during September of each year (beginning with 2002), establish a monthly MediKids premium. Subject to paragraph (2), the monthly MediKids premium for a year is equal to $\frac{1}{12}$ of the annual premium rate computed under subsection (b).

''(2) ELIMINATION OF MONTHLY PREMIUM FOR DEMONSTRATION OF EQUIVALENT COVERAGE (INCLUDING COVERAGE UNDER LOW-INCOME PROGRAMS).—The amount of the monthly premium imposed under this section for an individual for a month shall be zero in the case of an individual who demonstrates to the satisfaction of the Secretary that the individual has basic health insurance coverage for that month. For purposes of the previous sentence enrollment in a medicaid plan under title XIX, a State child health insurance plan under title XXI, or under the medicare program under title XVIII is deemed to constitute basic health insurance coverage described in such sentence.

''(b) ANNUAL PREMIUM.—

''(1) NATIONAL, PER CAPITA AVERAGE.—The Secretary shall estimate the average, annual per capita amount that would be payable under this title with respect to individuals residing in the United States who meet the requirement of section 2201(a)(1) as if all such individuals were eligible for (and enrolled) under this title during the entire year (and assuming that section 1862(b)(2)(A)(i) did not apply).

''(2) ANNUAL PREMIUM.—Subject to subsection (d), the annual premium under this subsection for months in a year is equal to 25 percent of the average, annual per capita amount estimated under paragraph (1) for the year.

''(c) PAYMENT OF MONTHLY PREMIUM.—

''(1) PERIOD OF PAYMENT.—In the case of an individual who participates in the program established by this title, subject to subsection (d), the monthly premium shall be payable for the period commencing with the first month of the individual's coverage period and ending with the month in which the individual's coverage under this title terminates.

''(2) COLLECTION THROUGH TAX RETURN.—For provisions providing for the payment of monthly premiums under this subsection, see section 59B of the Internal Revenue Code of 1986.

''(3) PROTECTIONS AGAINST FRAUD AND ABUSE.—The Secretary shall develop, in coordination with States and other health insurance issuers, administrative systems to ensure that claims which are submitted to more than one payor are coordinated and duplicate payments are not made.

''(d) REDUCTION IN PREMIUM FOR CERTAIN LOW-INCOME FAMILIES.—For provisions reducing the premium under this section for certain low-income families, see section 59B(c) of the Internal Revenue Code of 1986.

''SEC. 2204. MEDIKIDS TRUST FUND.

''(a) ESTABLISHMENT OF TRUST FUND.—

''(1) IN GENERAL.—There is hereby created on the books of the Treasury of the United States a trust fund to be known as the 'MediKids Trust Fund' (in this section referred to as the 'Trust Fund'). The Trust Fund shall consist of such gifts and bequests as may be made as provided in section 201(i)(1) and such amounts as may be deposited in, or appropriated to, such fund as provided in this title.

''(2) PREMIUMS.—Premiums collected under section 2203 shall be transferred to the Trust Fund.

''(b) INCORPORATION OF PROVISIONS.—

''(1) IN GENERAL.—Subject to paragraph (2), subsections (b) through (i) of section 1841 shall apply with respect to the Trust Fund and this title in the same manner as they apply with respect to the Federal Supplementary Medical Insurance Trust Fund and part B, respectively.

''(2) MISCELLANEOUS REFERENCES.—In applying provisions of section 1841 under paragraph (1)—

''(A) any reference in such section to 'this part' is construed to refer to title XXII;

''(B) any reference in section 1841(h) to section 1840(d) and in section 1841(i) to sections 1840(b)(1) and 1842(g) are deemed references to comparable authority exercised under this title;

''(C) payments may be made under section 1841(g) to the Trust Funds under sections 1817 and 1841 as reimbursement to such funds for payments they made for benefits provided under this title; and

''(D) the Board of Trustees of the MediKids Trust Fund shall be the same as the Board of Trustees of the Federal Supplementary Medical Insurance Trust Fund.

''SEC. 2205. OVERSIGHT AND ACCOUNTABILITY.

''(a) THROUGH ANNUAL REPORTS OF TRUSTEES.—The Board of Trustees of the MediKids Trust Fund under section 2204(b)(1) shall report on an annual basis to Congress concerning the status of the Trust Fund and the need for adjustments in the program under this title to maintain financial solvency of the program under this title.

''(b) PERIODIC GAO REPORTS.—The Comptroller General of the United States shall periodically submit to Congress reports on the adequacy of the financing of coverage provided under this title. The Comptroller General shall include in such report such recommendations for adjustments in such financing and coverage as the Comptroller General deems appropriate in order to maintain financial solvency of the program under this title.

''SEC. 2206. INCLUSION OF CARE COORDINATION SERVICES.

''(a) IN GENERAL.—

''(1) PROGRAM AUTHORITY.—The Secretary, beginning in 2003, may implement a care coordination services program in accordance with the provisions of this section under which, in appropriate circumstances, eligible individuals may elect to have health care services covered under this title managed and coordinated by a designated care coordinator.

''(2) ADMINISTRATION BY CONTRACT.—The Secretary may administer the program under this section through a contract with an appropriate program administrator.

''(3) COVERAGE.—Care coordination services furnished in accordance with this section shall be treated under this title as if they were included in the definition of medical and other health services under section 1861(s) and benefits shall be available under this title with respect to such services without the application of any deductible or coinsurance.

''(b) ELIGIBILITY CRITERIA; IDENTIFICATION AND NOTIFICATION OF ELIGIBLE INDIVIDUALS.—

''(1) INDIVIDUAL ELIGIBILITY CRITERIA.—The Secretary shall specify criteria to be used in making a determination as to whether an individual may appropriately be enrolled in the care coordination services program under this section, which shall include at least a finding by the Secretary that for cohorts of individuals with characteristics identified by the Secretary, professional management and coordination of care can reasonably be expected to improve processes or outcomes of health care and to reduce aggregate costs to the programs under this title.

''(2) PROCEDURES TO FACILITATE ENROLLMENT.—The Secretary shall develop and implement procedures designed to facilitate enrollment of eligible individuals in the program under this section.

''(c) ENROLLMENT OF INDIVIDUALS.—

''(1) SECRETARY'S DETERMINATION OF ELIGIBILITY.—The Secretary shall determine the eligibility for services under this section of individuals who are enrolled in the program under this section and who make application for such services in such form and manner as the Secretary may prescribe.

''(2) ENROLLMENT PERIOD.—

''(A) EFFECTIVE DATE AND DURATION.—Enrollment of an individual in the program under this section shall be effective as of the first day of the month following the month in which the Secretary approves the individual's application under paragraph (1), shall remain in effect for one month (or such longer period as the Secretary may specify), and shall be automatically renewed for additional periods, unless terminated in accordance with such procedures as the Secretary shall establish by regulation. Such procedures shall permit an individual to disenroll for cause at any time and without cause at re-enrollment intervals.

''(B) LIMITATION ON REENROLLMENT.—The Secretary may establish limits on an individual's eligibility to reenroll in the program under this section if the individual has disenrolled from the program more than once during a specified time period.

''(d) PROGRAM.—The care coordination services program under this section shall include the following elements:

''(1) BASIC CARE COORDINATION SERVICES.—

''(A) IN GENERAL.—Subject to the cost-effectiveness criteria specified in subsection (b)(1), except as otherwise provided in this section, enrolled individuals shall receive services described in section 1905(t)(1) and may receive additional items and services as described in subparagraph (B).

''(B) ADDITIONAL BENEFITS.—The Secretary may specify additional benefits for which payment would not otherwise be made under this title that may be available to individuals enrolled in the program under this section (subject to an assessment by the care coordinator of an individual's circumstance and need for such benefits) in order to encourage enrollment in, or to improve the effectiveness of, such program.

''(2) CARE COORDINATION REQUIREMENT.—Notwithstanding any other provision of this title, the Secretary may provide that an individual enrolled in the program under this section may be entitled to payment under this title for any specified health care items or services only if the items or services have been furnished by the care coordinator, or coordinated through the care coordination services program. Under such provision, the Secretary shall prescribe exceptions for emergency medical services as described in section 1852(d)(3), and other exceptions determined by the Secretary for the delivery of timely and needed care.

''(e) CARE COORDINATORS.—

''(1) CONDITIONS OF PARTICIPATION.—In order to be qualified to furnish care coordination services under this section, an individual or entity shall—

''(A) be a health care professional or entity (which may include physicians, physician group practices, or other health care professionals or entities the Secretary may find appropriate) meeting such conditions as the Secretary may specify;

''(B) have entered into a care coordination agreement; and

''(C) meet such criteria as the Secretary may establish (which may include experience in the provision of care coordination or primary care physician's services).

''(2) AGREEMENT TERM; PAYMENT.—

''(A) DURATION AND RENEWAL.—A care coordination agreement under this subsection shall be for one year and may be renewed if the Secretary is satisfied that the care coordinator continues to meet the conditions of participation specified in paragraph (1).

''(B) PAYMENT FOR SERVICES.—The Secretary may negotiate or otherwise establish payment terms and rates for services described in subsection (d)(1).

''(C) LIABILITY.—Case coordinators shall be subject to liability for actual health damages which may be suffered by recipients as a result of the care coordinator's decisions, failure or delay in making decisions, or other actions as a care coordinator.

''(D) TERMS.—In addition to such other terms as the Secretary may require, an agreement under this section shall include the terms specified in subparagraphs (A) through (C) of section 1905(t)(3).

''SEC. 2207. ADMINISTRATION AND MISCELLANEOUS.

''(a) IN GENERAL.—Except as otherwise provided in this title—

''(1) the Secretary shall enter into appropriate contracts with providers of services, other health care providers, carriers, and fiscal intermediaries, taking into account the types of contracts used under title XVIII with respect to such entities, to administer the program under this title;

''(2) individuals enrolled under this title shall be treated for purposes of title XVIII as

though the individual were entitled to benefits under part A and enrolled under part B of such title;

''(3) benefits described in section 2202 that are payable under this title to such individuals shall be paid in a manner specified by the Secretary (taking into account, and based to the greatest extent practicable upon, the manner in which they are provided under title XVIII);

''(4) provider participation agreements under title XVIII shall apply to enrollees and benefits under this title in the same manner as they apply to enrollees and benefits under title XVIII; and

''(5) individuals entitled to benefits under this title may elect to receive such benefits under health plans in a manner, specified by the Secretary, similar to the manner provided under part C of title XVIII.

''(b) COORDINATION WITH MEDICAID AND SCHIP.—Notwithstanding any other provision of law, individuals entitled to benefits for items and services under this title who also qualify for benefits under title XIX or XXI or any other Federally funded program may continue to qualify and obtain benefits under such other title or program, and in such case such an individual shall elect either—

''(1) such other title or program to be primary payor to benefits under this title, in which case no benefits shall be payable under this title and the monthly premium under section 2203 shall be zero; or

''(2) benefits under this title shall be primary payor to benefits provided under such program or title, in which case the Secretary shall enter into agreements with States as may be appropriate to provide that, in the case of such individuals, the benefits under titles XIX and XXI or such other program (including reduction of cost-sharing) are provided on a 'wrap-around' basis to the benefits under this title.''.

(2) CONFORMING AMENDMENTS TO SOCIAL SECURITY ACT PROVISIONS.—

(A) Section 201(i)(1) of the Social Security Act (42 U.S.C. 401(i)(1)) is amended by striking ''or the Federal Supplementary Medical Insurance Trust Fund'' and inserting ''the Federal Supplementary Medical Insurance Trust Fund, and the MediKids Trust Fund''.

(B) Section 201(g)(1)(A) of such Act (42 U.S.C. 401(g)(1)(A)) is amended by striking '' and the Federal Supplementary Medical Insurance Trust Fund established by title XVIII'' and inserting '', the Federal Supplementary Medical Insurance Trust Fund, and the MediKids Trust Fund established by title XVIII''.

(C) Section 1853(c) of such Act (42 U.S.C. 1395w–23(c)) is amended—

(i) in paragraph (1), by striking ''or (7)'' and inserting '', (7), or (8)'', and

(ii) by adding at the end the following:

''(8) ADJUSTMENT FOR MEDIKIDS.—In applying this subsection with respect to individuals entitled to benefits under title XXII, the Secretary shall provide for an appropriate adjustment in the Medicare+Choice capitation rate as may be appropriate to reflect differences between the population served under such title and the population under parts A and B.''.

(3) MAINTENANCE OF MEDICAID ELIGIBILITY AND BENEFITS FOR CHILDREN.—

(A) IN GENERAL.—In order for a State to continue to be eligible for payments under section 1903(a) of the Social Security Act (42 U.S.C. 1396b(a))—

(i) the State may not reduce standards of eligibility, or benefits, provided under its State medicaid plan under title XIX of the Social Security Act or under its State child health plan under title XXI of such Act for individuals under 23 years of age below such standards of eligibility, and benefits, in effect on the date of the enactment of this Act; and

(ii) the State shall demonstrate to the satisfaction of the Secretary of Health and Human Services that any savings in State expenditures under title XIX or XXI of the Social Security Act that results from children from enrolling under title XXII of such Act shall be used in a manner that improves services to beneficiaries under title XIX of such Act, such as through increases in provider payment rates, expansion of eligibility, improved nurse and nurse aide staffing and improved inspections of nursing facilities, and coverage of additional services.

(B) MEDIKIDS AS PRIMARY PAYOR.—In applying title XIX of the Social Security Act, the MediKids program under title XXII of such Act shall be treated as a primary payor in cases in which the election described in section 2207(b)(2) of such Act, as added by subsection (a), has been made.

(4) EXPANSION OF MEDPAC MEMBERSHIP TO 19.—

(A) IN GENERAL.—Section 1805(c) of the Social Security Act (42 U.S.C. 1395b–6(c)) is amended—

(i) in paragraph (1), by striking ''17'' and inserting ''19''; and

(ii) in paragraph (2)(B), by inserting ''experts in children's health,'' after ''other health professionals,''.

(B) INITIAL TERMS OF ADDITIONAL MEMBERS.—

(i) IN GENERAL.—For purposes of staggering the initial terms of members of the Medicare Payment Advisory Commission under section 1805(c)(3) of the Social Security Act (42 U.S.C. 1395b–6(c)(3)), the initial terms of the 2 additional members of the Commission provided for by the amendment under subsection (a)(1) are as follows:

(I) One member shall be appointed for 1 year.

(II) One member shall be appointed for 2 years.

(ii) COMMENCEMENT OF TERMS.—Such terms shall begin on January 1, 2002.

(b) MEDIKIDS PREMIUM.—

(1) IN GENERAL.—Subchapter A of chapter 1 of the Internal Revenue Code of 1986 (relating to determination of tax liability) is amended by adding at the end the following new part:

''PART VIII—MEDIKIDS PREMIUM

''Sec. 59B. MediKids premium.

''SEC. 59B. MEDIKIDS PREMIUM.

''(a) IMPOSITION OF TAX.—In the case of an individual to whom this section applies, there is hereby imposed (in addition to any other tax imposed by this subtitle) a MediKids premium for the taxable year.

''(b) INDIVIDUALS SUBJECT TO PREMIUM.—

''(1) IN GENERAL.—This section shall apply to an individual if the taxpayer has a MediKid at any time during the taxable year.

''(2) MEDIKID.—For purposes of this section, the term 'MediKid' means, with respect to a taxpayer, any individual with respect to whom the taxpayer is required to pay a premium under section 2203(c) of the Social Security Act for any month of the taxable year.

''(c) AMOUNT OF PREMIUM.—For purposes of this section, the MediKids premium for a taxable year is the sum of the monthly premiums under section 2203 of the Social Security Act for months in the taxable year.

''(d) EXCEPTIONS BASED ON ADJUSTED GROSS INCOME.—

''(1) EXEMPTION FOR VERY LOW-INCOME TAXPAYERS.—

''(A) IN GENERAL.—No premium shall be imposed by this section on any taxpayer having an adjusted gross income not in excess of the exemption amount.

''(B) EXEMPTION AMOUNT.—For purposes of this paragraph, the exemption amount is—

''(i) $17,415 in the case of a taxpayer having 1 MediKid,

''(ii) $21,945 in the case of a taxpayer having 2 MediKids,

''(iii) $26,475 in the case of a taxpayer having 3 MediKids, and

''(iv) $31,005 in the case of a taxpayer having 4 or more MediKids.

''(C) PHASEOUT OF EXEMPTION.—In the case of a taxpayer having an adjusted gross income which exceeds the exemption amount but does not exceed twice the exemption amount, the premium shall be the amount which bears the same ratio to the premium which would (but for this subparagraph) apply to the taxpayer as such excess bears to the exemption amount.

''(D) INFLATION ADJUSTMENT OF EXEMPTION AMOUNTS.—In the case of any taxable year beginning in a calendar year after 2001, each dollar amount contained in subparagraph (C) shall be increased by an amount equal to the product of—

''(i) such dollar amount, and

''(ii) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting 'calendar year 2000' for 'calendar year 1992' in subparagraph (B) thereof.

If any increase determined under the preceding sentence is not a multiple of $50, such increase shall be rounded to the nearest multiple of $50.

''(2) PREMIUM LIMITED TO 5 PERCENT OF ADJUSTED GROSS INCOME.—In no event shall any taxpayer be required to pay a premium under this section in excess of an amount equal to 5 percent of the taxpayer's adjusted gross income.

''(e) COORDINATION WITH OTHER PROVISIONS.—

''(1) NOT TREATED AS MEDICAL EXPENSE.—For purposes of this chapter, any premium paid under this section shall not be treated as expense for medical care.

''(2) NOT TREATED AS TAX FOR CERTAIN PURPOSES.—The premium paid under this section shall not be treated as a tax imposed by this chapter for purposes of determining—

''(A) the amount of any credit allowable under this chapter, or

''(B) the amount of the minimum tax imposed by section 55.

''(3) TREATMENT UNDER SUBTITLE F.—For purposes of subtitle F, the premium paid under this section shall be treated as if it were a tax imposed by section 1.''.

(2) TECHNICAL AMENDMENTS.—

(A) Subsection (a) of section 6012 of such Code is amended by inserting after paragraph (9) the following new paragraph:

''(10) Every individual liable for a premium under section 59B.''.

(B) The table of parts for subchapter A of chapter 1 of such Code is amended by adding at the end the following new item:

''Part VIII. MediKids premium.''.

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to months beginning after December 2002, in taxable years ending after such date.

(c) REFUNDABLE CREDIT FOR COST-SHARING EXPENSES UNDER MEDIKIDS PROGRAM.—

(1) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal

Revenue Code of 1986 (relating to refundable credits) is amended by redesignating section 35 as section 36 and by inserting after section 34 the following new section:

"SEC. 35. COST-SHARING EXPENSES UNDER MEDIKIDS PROGRAM.

"(a) ALLOWANCE OF CREDIT.—In the case of an individual who has a MediKid (as defined in section 59B) at any time during the taxable year, there shall be allowed as a credit against the tax imposed by this subtitle an amount equal to 50 percent of the amount paid by the taxpayer during the taxable year as cost-sharing under section 2202(b)(4) of the Social Security Act.

"(b) LIMITATION BASED ON ADJUSTED GROSS INCOME.—The amount of the credit which would (but for this subsection) be allowed under this section for the taxable year shall be reduced (but not below zero) by an amount which bears the same ratio to such amount of credit as the excess of the taxpayer's adjusted gross income for such taxable year over the exemption amount (as defined in section 59B(d)) bears to such exemption amount.".

(2) TECHNICAL AMENDMENTS.—

(A) Paragraph (2) of section 1324(b) of title 31, United States Code, is amended by inserting before the period "or from section 35 of such Code".

(B) The table of sections for subpart C of part IV of subchapter A of chapter 1 of such Code is amended by striking the last item and inserting the following new items:

"Sec. 35. Cost-sharing expenses under MediKids program.

"Sec. 36. Overpayments of tax.".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to taxable years beginning after December 31, 2002.

(d) REPORT ON LONG-TERM REVENUES.—Within 1 year after the date of enactment of this Act, the Secretary of the Treasury shall propose a gradual schedule of progressive tax changes to fund the program under title XXII of the Social Security Act, as the number of enrollees grows in the out-years.

ORDER FOR ADJOURNMENT

Mr. GRASSLEY. Mr. President, we want to make sure there is time this evening for Senators BINGAMAN and LEVIN to give their remarks. If there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order, following the remarks of Senator BINGAMAN and Senator LEVIN.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I thank the chairman of the committee. I appreciate the chance to speak briefly on this bill. It is a very important piece of legislation. I congratulate the Senator from Iowa on the hard work he has put into this legislation. I do not share his conclusion about it at this stage, but I certainly admire the work he has put in and admire the good job he does as chairman of the committee on which I serve.

When the 2000 Presidential campaign was underway, I saw one of the debates between then-Governor Bush and then-Vice President Gore. Both of them in that debate endorsed the enactment of a prescription drug benefit for seniors for Medicare beneficiaries. I remember thinking when I saw that, this is one good thing that will come out of this campaign in the next few years, no matter who wins. But what I had in mind as a prescription drug benefit was a very different animal than what we have in these 1,100 pages that have been referred to repeatedly.

What I had in mind was a benefit where Medicare beneficiaries would be able to sign up for a prescription drug benefit. It would be voluntary. They could sign up or not. They could then pay a monthly premium. They would get a card. They could take that card, go to the pharmacy and get their prescription drugs. They might have to pay a copay. They might have to pay some deductible. But it was basically the adding of a prescription drug benefit to Medicare. That is what I thought both candidates were talking about.

That is not what we have in these 1,100 pages. Had we decided to enact that, it could have been done in a much smaller document.

I regretfully have to oppose the conference report for H.R. 1 as it comes before us tonight and tomorrow.

I will cite six reasons I have come to that conclusion. The first reason is that the bill, in my view, over time, will undermine traditional Medicare.

The second reason is that the bill requires the Government to overpay private health plans by tens of billions of dollars.

The third reason is that the bill actually will harm many senior citizens who are intended to benefit.

Fourth, the bill will increase drug costs rather than reducing them.

Fifth, the bill will dramatically increase the complexity and volatility of the Medicare system for many of our seniors.

Finally, the sixth point is that the bill will increase the financial burden on States and make it more difficult for each of our States to maintain the benefits they provide through their Medicaid programs to low-income patients.

Let me start with the problem that I see of this bill undermining traditional Medicare. Today, 88 percent of all of those 41 million people who are served by Medicare are enrolled in traditional Medicare. The major thrust of this bill is not to add a prescription drug benefit but instead to do what is euphemistically referred to as "modernize" Medicare.

Now, there are definitely some things we should do to modernize Medicare. I would agree with that. But as that term is used in this discussion, most of the time it is a code word, meaning that we should move people—seniors and disabled individuals—out of traditional Medicare into the private health care system. That is what is meant by a lot of our colleagues when they talk about modernizing Medicare.

There are two good reasons for moving people out of traditional Medicare into the private health care system, as I see it. I could certainly favor doing that if we could accomplish these purposes. The first, obviously, would be to make the program more efficient and save money—save some taxpayer dollars by moving these people out of the Government plan into a private plan.

The second, of course, would be if we could improve services, increase the satisfaction of Medicare beneficiaries by moving them into the private plan.

Let me just show this chart. Medicare cost growth: This relates to the first of those two points. Medicare has historically controlled costs far better than either private health care plans have, or even better than the Federal Employees Health Benefits Program, FEHBP. We all take great pride in the FEHBP program and talk about how this is a great benefit and we should extend it to others.

Between 1969 and now, Medicare's costs have increased at an annual rate of 8.9 percent a year, which stands in contrast to the 11 percent growth rate in the private health insurance arena and 10.6 percent growth rate in FEHBP. So the ideology of this drive to modernize Medicare or move people out of traditional Medicare into the private system does not match the evidence. In fact, the recent record is even more dramatic. Between 1996 and 2003, Medicare's per capita growth was 4.2 percent compared to 5.9 percent for private health plans and 5.3 percent for FEHBP.

Medicare wins the contest going away. But maybe some are willing to pay higher costs, so this chart should make that point. The red line shows the increase in costs from 1970 to the end of the century in private insurance. The blue line shows the increase in the cost of Medicare. They have both gone up, but Medicare has gone up less rapidly. We might still be willing to pay more—pay the amount required to put people on this red line if, in fact, we had greater patient satisfaction by doing so.

There is a recent study by the Commonwealth Fund, published in Health Affairs, and it is reflected on this chart. It is hard to read because the colors are too similar. What is reflected is that of those with private health insurance, there were 51 percent of those who were satisfied, and 62 percent of those in traditional Medicare were satisfied with their coverage. That is the case, despite the fact that Medicare benefits are less generous and its beneficiaries are more elderly and disabled and have higher health needs than individuals in the private health care system.

So the bill seeks to move people out of traditional Medicare into private health plans. It does so by dramatically overpaying the private health plans.

Let me move to my second point. Since managed care is not more efficient than traditional Medicare, the conference report concludes that the way to get people into these private health plans is to spend billions of dollars in overpayment to those plans.

The legislation begins by setting its benchmark for payments to private plans at 109 percent of what Medicare fee for service would have to spend for those beneficiaries. It does so in other ways as well, including giving health plans money that Medicare otherwise would pay to a disproportionate share of hospitals, to graduate medical education, and the cost of veterans retiree health care.

It makes no sense to me to subsidize and pay health plan payments that Medicare intends, or could have, for safety net hospitals or teaching hospitals or veterans retirees. These HMOs do not provide unpaid services to the poor. They do not educate our Nation's medical students. They do not provide health care to our veterans. Yet the conference report provides payment for such services.

It makes no sense, but it is intended to camouflage the fact that private health plans cannot compete with traditional Medicare if they merely receive the amount traditional Medicare spends to provide these services to beneficiaries. So that is not enough.

The other thing that is done is that we, in this bill, provide a $10 billion to $12 billion stabilization fund. That stabilization fund essentially is money that the Secretary of Health and Human Services has available to add to what private plans are receiving and further advantage them over the traditional Medicare system if he or she determines that that is necessary in order to keep them providing services to this portion of our population.

Of course, the other issue that I think is extremely important is that these private health plans, under the legislation, are fully free to engage in practices that allow them to enroll healthy Medicare beneficiaries and shift the sicker and the more costly or elderly beneficiaries into the Medicare system. They do this by adjusting their benefits. They do this by designing their benefit packages and marketing them to the healthy segments of the society.

Some might ask how do they do this. I will give you an example. Some private plans impose a higher cost share for services such as chemotherapy or renal dialysis than traditional Medicare in order to encourage those who have contracted cancer or renal failure to enroll, to leave the private plan and to go back into traditional Medicare.

Proponents of the bill say what they are trying to do by getting these private plans involved is to foster competition. Obviously, we all favor competition, but I do not see that it is particularly competitive for us to provide this kind of very major subsidy.

When you add together the 109 percent payment to the private plans and the risk selection in which they are permitted to engage, private plans will be paid an estimated 25 percent more than the cost of traditional Medicare for each enrollee, for each beneficiary. This amounts to $1,920 more per enrollee in the year 2006.

A third problem is the bill actually does harm. I mentioned what many of my colleagues have already mentioned, and that is the 2.7 million retirees who are expected to lose their prescription drug coverage once we enact this legislation.

Also, the Congressional Budget Office analysis says as to low-income beneficiaries, there are 3.4 million low-income beneficiaries who will benefit from this; there are 6.4 million low-income beneficiaries currently enrolled in Medicaid who will be worse off. It is hard for me to see how that adds up to a major benefit for a lot of those people who are expecting a benefit under this legislation.

Let me talk a minute about drug costs. What will this bill do for drug costs? When I talk with seniors in my State, the No. 1 problem they cite to me when it comes to prescription drugs is the enormous growth in the cost of those drugs.

I have concluded, reluctantly, that not only will this legislation not bring down drug costs but it will actually cause them to go up. Surveys indicate that Medicare beneficiaries cite this as their No. 1 problem. The Congressional Budget Office has concluded the conference report will actually raise the price of drugs by 3.5 percent overall.

The legislation that is before us, this 1,100 pages, delivers to hundreds of private drug companies and HMOs an insurance-administered drug benefit that vastly dilutes the purchasing power of Medicare. Rather than Medicare purchasing the drugs in bulk to achieve significant savings, the medication splits Medicare's purchasing power into hundreds of purchasing pools and eliminates the significant leverage that Medicare could have in controlled costs.

This bill expressly prohibits Medicare from negotiating for prices. People need to focus on that. Here we are setting up a program where Medicare is going to pay for prescription drugs, and we are prohibiting Medicare from negotiating as to the price it is going to pay.

Consumers Union came out with a report last week saying the proposal's modest benefits, coupled with an expected high growth of prescription drug prices, could result in major disappointments for many of these Medicare beneficiaries. Medicare beneficiaries at most prescription drug expenditure levels will actually face higher out-of-pocket costs when they have coverage in 2007—that is one year after the bill is implemented—than they do in 2003 when they have no coverage.

That is an incredible finding, in my view. For example, it only provides people with a benefit of around $1,000 for the first $5,000 in prescription drug spending. When you couple that with weak cost containment provisions, the Consumer Union finds that the average out-of-pocket spending for beneficiaries rises to $2,900 in 2000 compared to $2,300 in 2003 for beneficiaries with absolutely no prescription drug coverage.

Let me also move to this final chart to talk about the problem of complexity and volatility. I heard some of the majority leader's comments earlier this evening. He indicated that one of the great advantages of this bill is that it would reduce paperwork. I would love to understand that. How we can enact this enormous piece of legislation and see it reduce paperwork is a mystery to me.

This is a chart that was put together by the Medicare Rights Center. It tries to set out some depiction of how this is all going to work. I can't begin to explain it to you at this point, but I can tell you that you can study it for a great length of time and still not understand how it is going to work.

Most people receiving benefits through Medicare choose traditional Medicare. They like the stability of traditional Medicare.

The Washington Post today had a story about the problems beneficiaries who have enrolled in Medicare+Choice have encountered: the changing benefits that health plans offer on an annual basis; the changes in premiums and copayments; the problem of health plans coming in and out of the marketplace. We have had that problem in my State of New Mexico. Health plans come in, advertise, sign up a lot of people, and 6 months or a year later they announce they are not making money and they pull out. They send a letter to everybody and say: Sorry, we decided not to provide your benefits. Those people come to my office and say: What are we going to do?

This is a volatility in the system that most people on Medicare do not appreciate. I see that increasing dramatically under this legislation. How in the world we can see less paperwork, how in the world we can see less complexity and less volatility as a result of this bill escapes me.

A final point I want to make is the impact on States, expanding on this concept of ''do no harm.'' This legislation has potentially major negative

consequences for our States. In the first 3 years of the bill, the Congressional Budget Office estimates that the costs, or the unfunded liability of the bill to the States in their Medicaid programs, will be $1.2 billion.

We are, in effect, adding $1.2 billion in costs to the Medicaid Program at a time when States have been begging for relief from the Federal Government due to the growing Medicaid costs that States have experienced because of the slow economy and the growing beneficiary roles.

States have had to make rather dramatic cuts in their Medicaid programs because of these changes, and this $1.2 billion in additional costs to them will result in additional cuts in Medicaid.

There is a misconception, I believe, about this legislation, and that is, people think that because Medicare is taking over the payment for dual-eligibles—that is low-income individuals who are eligible for Medicaid but also old enough to be eligible for Medicare—since Medicare is going to take over that expense, people think this is going to save the States money.

First of all, until the year 2008 under this legislation, States do not receive any benefit from the Federal assumption of drug costs for dual-eligibles or low-income beneficiaries who currently get their prescription drugs from Medicaid. That is 5 years from now before they receive any benefit. States expecting to get savings from this bill, in the words of the National Conference of State Legislatures, will be ''deeply disappointed.''

In addition, this report contains what is called the clawback or the reverse block grant. This is a new concept to me, but it is a fascinating one. Instead of the Federal Government giving a block grant to the States, the Federal Government legislates a requirement on the States to give the Federal Government a block grant.

It is through this clawback or reverse block grant the Federal Government demands that States pay the Federal Government for any savings the Federal Government estimates the States might gain from the new Medicare Program.

When we take the period between 2004 and 2013, the amount the States will have to pay back to the Federal Government is $88.5 billion. Now, that is a big number, $88.5 billion. The conference report requires States to write checks to the Federal Government in the amount of $5.7 billion in 2006. This goes up to $14.9 billion in 2013. Over that 7-year period, that is a 261 percent increase in the amount the States have to pay the Federal Government.

One may ask how they go up that much. It goes up that much because the Federal Government has built into this a 15 percent compounded inflation rate, and that is being imposed on the States. The States have nothing to say about it. If the States want to participate in Medicaid, they will pay that amount back to the Federal Government.

State general revenues, tax revenues, will not go up 15 percent annually during those 7 years. So States are rightfully upset by this clawback. They rightfully point out that they are being required to now pay an inflation rate for something they do not control. The clawback, or the reverse block grant, is increasing by 261 percent over 7 years.

What this is going to do is to put increased pressure on State budgets which will result in cuts in Medicaid, cuts in education, cuts in transportation. This should not be an acceptable outcome for those of us in the Senate. The bill we sent to the conference from the Senate loaded a $10 billion burden on the States. Now that it has come back to us, it has an $88 billion burden that we are loading on the States as part of this legislation.

I would add one other point about this burden. There is a group of 20 States that have a cap that is imposed upon them through Medicaid's disproportionate share hospital program. That cap says they can receive no more than 1 percent of the total Medicaid spending in their State. That compares to 8 percent, which is the national average.

The 20 States I am talking about are called low-DSH States. New Mexico is one of those States. I authored legislation to increase that 1 percent to 3 percent, not to get it up to the national average, which would have been 8 percent, but to get it up to 3 percent. That would have allowed the disproportionate share hospitals in my State, instead of receiving $9 million a year, to receive a total of $45 million a year.

Unfortunately, the conference report cut the amount my State would receive from $45 million down to $10 million. Current law is $9 million. Under this bill, we would go to $10 million instead of going from $9 million to $45 million.

In sharp contrast, Louisiana's share of the Medicaid DSH funding goes from $500 million to $600 million next year. This is an unacceptable disparity, in my view. Louisiana's $100 million increase is more than the $43 million increase that is provided to all of the 20 low-DSH States combined. This precludes States such as mine from protecting their safety net hospitals and dealing with the fact that the uninsured rate in our States has increased by 4 million people over the last 2 years.

In conclusion, it is my view that Congress does its worst work under the circumstances we are being presented with tonight and tomorrow. It is late in the session. There is no time for adequate review of the 1,100 pages that have been put on each of our desks. We are being pushed up against a totally artificial deadline. This is not the end of the Congress. It is barely the middle of the Congress. There is no reason this bill has to be passed before we leave for Thanksgiving. We could either come back after Thanksgiving or we could take it up in January.

I have a letter from the Democratic Governors Association which says: We urge you to reject any efforts to vote on this legislation before you know its full content and cost impact on your State and the people we both serve.

This is to all Members of the Senate from the Democratic Governors Association. They go on to say: Any rush to judgment without the necessary information may have both short- and long-term consequences that could prove to be irrevocably severe.

We do not know the consequences of this legislation that we are being urged to pass tomorrow. We owe it to senior citizens in this country to understand what we are doing. We owe it to the taxpayers of the country to buy health care services for seniors without overpaying for those health care services. We owe it to the public to do all we can to reduce health care costs. Unfortunately, we are doing none of these things if we take up this bill and pass it tomorrow.

I hope Senators will join me in voting not to send this bill to the President in its present form.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, first, I commend the Senator from New Mexico for his analysis of this bill. I listened to the last part of it and I thought it was exactly on point. I particularly would like to emphasize his last point, which is that this is not the end of the Congress, this is just the end of a session, or nearing the end of a session.

With 4 days' notice of a bill of this complexity—now, I think the bill itself is about 700 pages and there are hundreds of pages of commentary that go with it, but the idea that we should take up a bill of this complexity, when seniors are just having the first opportunity after 4 days to try to fathom what is in it, is a terrible mistake.

The Senator from New Mexico was exactly right in urging that we not rush to consider this bill tomorrow and to adopt this bill. It took a great deal of effort to create Medicare. It was not until 20 years after Harry Truman first proposed the idea of a guaranteed health benefit for seniors that President Lyndon Johnson signed the Medicare Program into law. It was fitting that Harry Truman was the program's first beneficiary. He paid his $3 premium and he enrolled in Medicare in 1965.

We are confronting in this bill a turning away from Medicare's noble purpose. That purpose was to create an insurance pool for all seniors, where

the risks and financial burdens are shared—not for the profit of insurance companies or pharmaceutical companies but for the common good. The legislation before us is a fundamental and ill-advised restructuring of Medicare under the guise of adding a prescription drug benefit to the program.

Many Members of Congress have worked for years to bring a Medicare prescription drug benefit to fruition. While the Senate-passed version of this bill had enough flaws to cause me, along with a number of colleagues, to vote against it, at least I was hopeful that some of these flaws would be corrected in the conference committee. Unfortunately, the prescription drug plan before us not only worsens the prescription drug program as adopted by the Senate, it has become a millstone dragging Medicare down with it.

The promise of a prescription drug plan is being used to begin the unraveling of Medicare. First, there are the dangers for seniors created by the prescription drug provisions themselves. The Congressional Budget Office estimates that up to 25 percent of retirees, with existing prescription drug coverage through a former employer, would lose that coverage under this bill's plan. That is about 2.7 million senior citizens who currently have good private insurance and are paying less now than they would have to under a Medicare prescription drug plan. That is 2.7 million retirees who will lose benefits, above and beyond the number of retirees who are projected to lose their benefits under the current trend of employers reducing prescription drug coverage for their retirees. The tax subsidies for employers included in this conference report are not enough to entice employers to keep their drug coverage for those 2.7 million retirees.

Another fundamental flaw with the prescription drug benefit in this legislation is the lack of a guaranteed Medicare prescription drug plan. In the Senate bill, in the absence of two competing private plans offering a senior a prescription drug benefit, Medicare was the fallback. This approach was gutted in conference. Here is what the conference report provides. If one insurance company in a region offers a prescription drug benefit, regardless of how unattractive it is to seniors in terms of its premiums and copayments, both of which are left up to the insurance company, and if an HMO offers coverage in that region as a substitute to Medicare, no matter how unattractive that HMO is to seniors, and assuming that HMO also offers a prescription drug benefit, the senior will not be offered the fallback Medicare prescription drug benefit.

Let me put that another way. We begin with the fact that private insurance companies offering a prescription drug policy under this bill could charge whatever premiums and copayments they want. If only one private prescription drug plan exists in a region, regardless of how unappealing it is, and one HMO offering a prescription drug plan also exists in that region, a senior has the choice of purchasing the bad prescription drug plan or leaving Medicare to join an HMO that he or she does not want to join, in order to get that prescription drug benefit. Forcing seniors to make the choice between staying in traditional Medicare or leaving Medicare and joining an HMO they otherwise would not join in order to get a prescription drug benefit is a thinly disguised attempt to unravel and privatize Medicare. That is a choice no senior citizen in America should have to make.

Also troubling is the fact that the private company which offers the prescription drug benefit, and the company which offers the managed care alternative to Medicare, can be one and the same under the provisions of this bill. In addition, the prescription drug benefit in the legislation before us has a large gap in the prescription drug coverage. Once a senior's total drug spending reaches about $2,500 for the year, he or she will have to pay 100 percent of the cost of their prescriptions until their total drug spending reaches $3,600. This has come to be called the donut hole. This coverage gap will leave many seniors to pay the full cost of prescriptions at a time when they most need assistance. I know of no other insurance program that is so unfairly structured in that way.

Adding insult to injury, while there is a gaping hole in coverage, there is no gap in the requirement to pay premiums. That obligation continues, even during the period that benefits are halted.

One of the most disturbing aspects of this legislation is the fact that private insurance companies can use the purchasing power of their large number of beneficiaries to negotiate lower prescription drug prices, but Medicare is prohibited from doing so. This is one of the most unacceptable ways this bill protects private insurance companies and prescription drug companies from fair competition from Medicare, all at the expense of seniors and American taxpayers.

Ask veterans how much prescription drugs cost at VA hospitals compared to their local pharmacy. Many of the drugs the VA offers are as little as half the price. The reason is the VA buys drugs in large quantities from drug manufacturers and has leverage in negotiating the prices. Instead of buying the 30-day supply of pills for someone on Medicare, why not allow Medicare to buy thousands of 30-day supplies at once for a fraction of the cost? That makes a lot of sense, but it is prohibited under this bill.

The conferees left out some other real solutions to address the high cost of prescription drugs. Both the House- and Senate-passed versions included a provision to allow seniors to buy drugs in other countries at lower prices, so-called reimportation provision. However, these provisions have been stripped from the final bill. Even though the House and Senate have voted to allow reimportation with strong bipartisan votes, the conferees ignored these votes. More important, they ignored the problem of high prescription drug costs. Americans pay more for prescription drugs than any people in the world. U.S. taxpayers' dollars help to subsidize the research and development of many prescription drugs. Yet drug companies then sell them abroad for less. Because this bill does not address the high cost of prescription drugs, needed medicine will still be inaccessible for millions of our citizens.

Unfortunately, the prescription drug benefit in this bill is what Newt Gingrich envisioned for the future of the entire Medicare Program. The former House Speaker said that he wanted Medicare to wither on a vine. To slowly chip away at the foundation of Medicare until it crumbles with a private network of managed care and drug companies eventually replacing Medicare is what he envisioned.

Apparently AARP, which once stood for preserving social insurance for America's seniors, agrees with Mr. Gingrich. The AARP executive director and CEO wrote the forward to the former Speaker's book entitled ''Saving Lives and Saving Money,'' and later commented that ''Newt's ideas are influencing how we at AARP are thinking about our national role and in our advocating for system change.''

With this bill, the chief cooks of the Republican Party are following Newt Gingrich's ''wither on a vine'' recipe for the future of Medicare.

The six so-called premium support demonstration projects created by this bill are the opening act for the privatization of Medicare. Proponents argue that Medicare's costs won't come down without a private sector competitor. But this bill, while purporting to promote competition between Medicare and private insurers, tilts the playing field against Medicare. First, there is a $12 billion so-called stabilization fund, which is in reality a slush fund. It is a slush fund for insurance companies to subsidize their policies. The $12 billion in slush money is not available to traditional Medicare, only to the private insurance companies.

Second, the claims of the insurance industry that they will and must accept every senior who applies are disingenuous. Here is why. Private insurers will have the flexibility to alter and change their plans, to be able to cherry-pick the healthy senior. For example, if an insurance company designed a program with a very low monthly premium but with high copayments and

high deductibles, this would be an incentive for a healthy senior to enroll, someone who could risk having to pay high copayments and deductibles because he or she has relatively infrequent medical treatment. Less healthy seniors, whose frequent medical treatments make it difficult or impossible for them to pay high copayments and high deductibles, would be left for the Medicare program to cover. This is privatization plus. It simply cannibalizes Medicare. Subsidizing insurance companies and allowing them to cherry-pick the beneficiary population means that insurance companies will be profiting mightily, while leaving the U.S. taxpayer to pick up the tab of insuring the less profitable population.

How did we arrive at this ill-conceived legislation? Democrats were all but shut out of the conference committee which wrote this bill. Only two Democrats were allowed to participate in the conference negotiations. This massive shift in Medicare's approach and purpose was delivered publicly to us about 4 days ago. In this bill's 700 pages are provisions to dismantle Medicare as we know it, replacing it with a network of private insurers and drug companies whose goal is making a profit.

There is a fundamental difference between private industry and government: Private companies fail if they do not make money, while government fails if we do not help citizens—especially those that cannot help themselves.

I have heard from many of my constituents in the State of Michigan who need help in getting affordable prescription drugs. Let me read you a few excerpts from letters that I have received on this issue. One constituent writes:

> I am writing for your support for the Medicare Program. Please provide a Medicare drug benefit that is comprehensive, affordable and secure. Do not undermine Medicare as a defined benefit program through privatizing it.

Another constituent writes:

> We do not want a drug bill that eliminates or reduces our current prescription plan that we now have . . . When I retired . . . this plan was part of my benefit package and we felt that it is their obligation to continue it, and the cost of our drugs should not be passed on to the tax payers.

I get hundreds of messages a week like that from constituents with concerns over the privatizing of Medicare and the possible loss of existing prescription drug benefits. It is estimated that this bill, if it becomes law, would cause 138,000 seniors in Michigan currently receiving prescription drug benefits to lose some or all of those benefits. And 90,000 seniors in my State who are Medicaid beneficiaries with a current prescription drug coverage will be worse off if this bill becomes law than they are under current law.

A fundamental restructuring of Medicare of this magnitude demands careful and thoughtful deliberation. The conference report contains a large amount of new material not included in either the House-passed or Senate-passed bills. Hastily acting on this legislation is fundamentally unfair to millions of seniors who want and deserve to be treated fairly. I predict that when seniors become familiar with this bill's details, there will be a crescendo of opposition.

The siren song you hear now principally from our Republican colleagues is that competition is necessary to drive the cost of health care down. The reality of this bill is not competition but government subsidies for insurance companies while allowing them to carve out the most profitable segment in the business—caring for the healthiest—leaving the seniors with greatest need as the responsibility of the Federal government. Privatizing the most profitable part with a subsidy is not competition; it is a huge gift to private companies at the expense of the U.S. Treasury.

Supporters of this legislation say they are harnessing the power of the marketplace to drive down prices. The reality is just the opposite. They are hobbling the Medicare program in the prescription drug program by letting the private provider use its purchasing power to drive down its drug prices, but not letting Medicare do the same; and in the dismantling of Medicare, by pushing people out of Medicare into private HMOs in order to obtain a prescription drug benefit.

The bill before us will begin undoing 37 years of progress in Medicare. It is an ill-advised assault on the one program that guarantees medical care to our most vulnerable population, our senior citizens. An historic opportunity is being squandered if we adopt this bill. Our Nation's seniors deserve better. I yield the floor.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 9 a.m. tomorrow morning.

There being no objection, the Senate, at 10:45 p.m., adjourned until Monday, November 24, 2003, a 9 a.m.

EXTENSIONS OF REMARKS

H.R. 2417, THE FISCAL YEAR 2004 INTELLIGENCE AUTHORIZATION CONFERENCE REPORT

SPEECH OF

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Ms. McCOLLUM. Mr. Speaker, it is with great dismay that I rise to oppose H.R. 2417, the Fiscal Year 2004 Intelligence Authorization Report.

The Republican Leadership inserted a controversial provision in the FY04 Intelligence Authorization Report that will expand the already far-reaching USA Patriot Act, threatening to further erode our cherished civil liberties. This provision gives the FBI power to demand financial and other records, without a judge's approval, from post offices, real estate agents, car dealers, travel agents, pawnbrokers and many other businesses. This provision was included with little or no public debate, including no consideration by the House Judiciary Committee, which is the committee of jurisdiction. It came as a surprise to most Members of this body.

It is of great concern that the Republican Leadership, along with the Administration and Attorney General Ashcroft, would seek to include such a non-germane, controversial provision into what should otherwise be a nonpartisan bill. Furthermore, the Republican Leadership, in the Senate defeated an attempt to "sunset" this provision when they considered it. It is clear the Republican Leadership and the Administration would rather expand on the USA Patriot Act through deception and secrecy than debate such provisions in an open forum. The freedoms and civil liberties of the American people are too important to allow such an irresponsible, abusive power play by the Majority.

The importance of our intelligence community has grown significantly in the wake of the September 11th terrorist attacks and the subsequent, continuing campaign against terrorism. The FY04 Intelligence Authorization Report includes a number of positive, beneficial provisions designed to improve our counterintelligence capabilities, strengthen our ability to share information between the federal government, local and state officials, and provide for our intelligence officers and their families. It is unfortunate that such a controversial provision had to be included.

MATT KENSETH

HON. TAMMY BALDWIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. BALDWIN. Mr. Speaker, I rise today to recognize Matt Kenseth, a native of Cambridge, Wisconsin, for clinching the NASCAR Winston Cup Championship after placing fourth at the Pop Secret 400 at North Carolina Speedway on November 9, 2003.

Matt began working on his father's racecar when he was thirteen years old, and then he got the chance to start racing at the young age of sixteen. As a sign of his early talent for the sport, Matt was racing competitively by the age of nineteen. He moved up quickly to the ultra-competitive Wisconsin Late Model ranks, and he became the youngest winner ever in ARTGO Challenge Series history.

After driving the American Speed Association's ACDelco Challenge Series, Matt received a call from Robbie Reiser to drive his Busch Series car. In the NASCAR Busch Grand National Series, Matt excelled in his first full year by finishing second in the points battle. As a tribute to his success, he was called to substitute for Bill Elliott in the elite NASCAR Winston Cup Series at Dover Downs in September of 1998. This was his first start against the biggest names and greatest stock car drivers around, and Matt finished an impressive sixth place. The motorsports world certainly took notice of Matt in 2000, when he took the Winston Cup scene by storm winning the Raybestos Rookie of the Year Award.

This year, in his fourth season in NASCAR's top stock car series, Matt's commitment and consistency paid off because with one win, eleven top-five finishes, and twenty-five top ten finishes, he was able to take the Winston Cup title. Matt's achievements certainly have brought out the community pride and hometown spirit in Cambridge and across Wisconsin. He is a hero to countless young aspiring drivers, and he has shown why with his dedication through this long and challenging season. This December, he and his team will deservingly sit at head of the head table at the Waldorf-Astoria.

Mr. Speaker, I am proud to rise today to honor Cambridge Native Matt Kenseth for his accomplished racing career and his recent NASCAR Winston Cup Championship title.

INTRODUCTION—OFFICE OF OCEAN AND COASTAL POLICY CREATION ACT OF 2003

HON. JIM SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SAXTON. Mr. Speaker, I am pleased to be here today to introduce an important piece of conservation legislation, the Office of Ocean and Coastal Policy Creation Act of 2003. This bill establishes in the Executive Office of the President, an Office of Ocean and Coastal Policy. I believe this Office will serve as a valuable complement to the environmental offices and agencies that currently exist, and will provide a unique perspective on the direction we ought to be moving in with regard to comprehensive ocean policy.

An issue to which I have devoted a great deal of time and one that I feel is very important is the protection of the diverse range of fish stocks that inhabit our world's oceans, many of which are very close to disappearing forever. Given the recent release of two studies essentially stating that what I have been talking about is likely to happen, I am more convinced than ever that we need to take aggressive action immediately. Many of our oceans' fish stocks are now reportedly 90 percent depleted, meaning only 10 percent of the stocks that once existed remain. And many of these stocks are in grave danger of extinction if we proceed down the same path we are on now—that is, continue to study these stocks and do little to mitigate the damage that has already been done.

One of these two studies recently published was conducted by Dalhousie University, in Halifax, Canada, stating that the global ocean has lost over 90 percent of its large predatory fishes, such as tuna, swordfish and marlin. I have long known that the use of pelagic longline gear is one of the most, if not the most destructive, indiscriminate way to fish. A direct result of the use of this geartype, starting in the early 1960s, has provided for the almost complete disappearance of white marlin. Though not the target species of longline gear, marlin are a bycatch species, meaning that this geartype catches whatever eats the bait, and as the lines are left in the water overnight, any fish that bites onto a hook is more likely than not dead by the time the lines are pulled in, killing not only the target species, which is primarily swordfish, but also marlin or turtles or sharks or even small whales that happen to take the bait.

The U.S. Commission on Ocean Policy, created from my Oceans Act of 2000, has it's own report forthcoming on the status of our oceans, it will be interesting to see what conclusions they put forward.

The National Marine Fisheries Service, the agency tasked with the protection of these

species has failed to do so. The United States is a world leader on so many important and complex issues; it is hard to understand why the issue of fisheries management, and enforcement of the regulations currently in place both domestically and internationally, seems impossible to accomplish.

We need to take immediate aggressive steps to prevent the disappearance of these fish species, before it's too late. These studies should be a wake-up call that the process through which our world's fisheries is managed is broken and needs to be fixed.

This is an issue that resonates with anyone who has ever been to the beach in states like New Jersey, or watched a television program involving the deep blue sea. And given that 50 percent of the population of the United States lives within 100 miles of a coast, there are many who are personally affected by this issue. We have a unique opportunity to do something amazing and I think we owe it these wonderful resources that are our oceans to do all we can to bring them back to a healthy and sustainable level, for future generations. I look forward to working with this unique Office on Ocean Policy to preserve these magnificent resources.

HONORING THE ST. LOUIS GATEWAY CLASSIC SPORTS FOUNDATION

HON. WM. LACY CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CLAY. Mr. Speaker, I rise today to pay tribute to the St. Louis Gateway Classic Sports Foundation for its commitment to providing academically average youth in St. Louis with the opportunity to attain a valuable college education. Since 1998, the St. Louis Gateway Classic Sports Foundation has striven to even the educational playing field by giving generously to hard-working students.

The Foundation is sending a clear, unmistakable message to urban youth that someone does care about them by believing in them and financially supporting their goals of attaining a valuable college degree.

Mr. Speaker, it is with great privilege that I recognize the St. Louis Gateway Classic Sports Foundation today before Congress. The Foundation was recently honored in an article published in the Baltimore Sun. I would like to share this article with my colleagues which further details its dedication to providing a vital contribution to our youth by helping to produce an educated society.

[From the Baltimore Sun, Nov. 9, 2003]

BLACK SCHOLARSHIP PROGRAM HELPS ''PEOPLE IN THE MIDDLE''; MO. FOUNDATION REWARDS THE ACADEMICALLY AVERAGE

(By Mike Bowler)

Don't even dare dream about college, a guidance counselor warned Leonard Woodson. With your mediocre academic record, you'll be lucky to survive high school.

The counselor was wrong. It took Woodson an extra semester, but next month he'll graduate from Lincoln University in Jefferson City, Mo., with a B average—and no college debt. All his costs were covered by a St. Louis foundation that rewards academically average students in financial need.

''It took me two hours to do what my fellow students could do in an hour, but I learned to survive in the world,'' says Woodson, 22. Unable to keep up taking notes, he recorded lectures and played them back in his dorm room.

Woodson is one of about 50 graduates of St. Louis-area high schools who have received full scholarships to historically black colleges and universities since 1998. The foundation raises the money, in part, by sponsoring an annual football ''classic'' between black college teams, devoting the proceeds to scholarships and other charities.

''Average kids don't get a chance because everybody gives to the cream of the crop,'' says Earl Wilson Jr., a retired IBM executive who established the foundation a decade ago. ''It's our way of giving back to the community.''

Wilson, 71, began his IBM career as one of the company's first black salesmen. He says he understands students in the middle. ''Myself and many of my colleagues were average students or worse,'' he says. ''People at the extremes get help. People in the middle don't.''

Lawrence A. Davis Jr., chancellor of the University of Arkansas at Pine Bluff, whose Golden Lions play in the annual fall classic, agrees. ''The world is run by average people,'' he says. ''We reward people who can run fast, jump high and throw balls through holes. The least we can do is help those who might not be academic stars but who are willing to work hard.''

''It's the trickle-up theory,'' says Sylvester Brown Jr., a columnist for the St. Louis PostDispatch. Brown defends Wilson against charges from another St. Louis writer that he's ''creating dumbness'' by so generously supporting less-than-stellar scholars.

''I'd much rather see Earl spend $10,000 on one scholarship than give $1,000 scholarships to 10 students,'' says Brown. ''What he's saying by doing it this way is that we have enough faith in you to support you for four years. You have no financial worries. All you have to do is focus on being great.''

The foundation distributes application forms to high school guidance counselors, and uses radio and print advertising to get the word out. Winners are chosen by a committee of educators and others who review the applications and interview applicants. ''I stay completely out of the selection process,'' says Wilson. Sixteen recipients are currently attending college through the program.

Since the foundation began giving scholarships 5 years ago, the champion recipient is Dedree Smart, 23, who went to Howard University in Washington. ''I have been so blessed,'' she says. ''There's no way I could have afforded Howard. I didn't have to worry about anything financially, so I could concentrate on my grades. I went from a low B average in high school to graduating magna cum laude.''

Smart earned her degree last year and is back in Missouri, working as special events coordinator for the State's public university system. ''I am so elated, so grateful and so proud of my baby,'' says her mother, Delores Smart.

Wilson says the foundation carefully monitors the scholarship program. ''The ones who finish college almost always get better grades'' than they did in high school, he says.

''These are the late bloomers,'' says Irving Clay, 78, a former city alderman who sits on the foundation's board. ''I and Earl, we grew up in tenements about 10 blocks from here. We all know what it's like to struggle. We know late bloomers.''

But the scholarship program has had its failures and setbacks. About 40 percent of recipients have washed out, and since Smart's graduation, the foundation has dropped Howard and Virginia's Hampton University because of their high, private-college tuition.

Then, too, some scholarship recipients ''haven't so much as said thank you,'' Wilson says. ''That's a real disappointment.'' He expects them to send him an invitation when they graduate, and he wants all recipients—and their parents—to sell tickets to the annual classic.

In addition to the football game, which Wilson estimates has generated $3.5 million in 10 years, the foundation raises money through charity golf and high school basketball events. Last year, it opened a $2.8 million sports complex near downtown St. Louis that includes a computer laboratory for after-school tutoring and a ''Walk of Fame'' featuring prominent local African-Americans.

About 20 percent of foundation revenue comes from corporate sponsors such as Anheuser-Busch Inc., whose brand name Budweiser is attached to the football game.

''We raise 80 percent ourselves,'' Wilson says. ''That's extremely high for a foundation like this. We are all about self-help. We don't want anyone interfering with our independence.''

That attitude has rankled some in the St. Louis business community, says Brown, the newspaper columnist.

''Earl doesn't go begging in the business community, and that rubs some people the wrong way. He says [racial] integration is a wonderful thing, but we have to take care of our own. That's his integrity. Every year, he beats his head against the wall trying to fill the [Edward Jones] dome, every year he doesn't do it, and every year he smiles and says we'll do it next year.''

St. Louis' only historically black institution, Harris-Stowe State College, doesn't have a football program, so the Gateway Classic turns to regional schools for the annual competition. In recent years, Arkansas-Pine Bluff, about seven hours away by car, has become a permanent contestant, its opponents rotating among Kentucky State University and others. The Classic weekend features band competitions, street parties and lunches with African-American sports figures.

''It's all generated by Earl,'' says Julius Dix, 74, a retired St. Louis school administrator who sits on the selection committee. ''He's a born salesman. He could sell you anything.''

Davis, the UAPB chancellor, says the annual event is ''really great for our university. We bring in hundreds for the game. It's great visibility for us and our students. It's like a second homecoming.''

Several Gateway scholarship students have enrolled at Pine Bluff, including two with the title Miss Gateway Classic. These are young women who prevail in a pageant after their junior year in high school and preside as Miss Gateway Classic as seniors, making appearances around St. Louis at foundation-sponsored events.

The pageant is partly a beauty contest [with evening gowns but not bathing suits] and partly a contest of brains and poise, says Janell Wallace, the 2002 winner, who is attending Pine Bluff on a $40,000 Gateway Classic scholarship.

"I had to write an essay and answer questions on current events. I had to learn etiquette and how to walk and speak publicly and keep calm. That's helped a lot here," she says.

For Wallace, 18, who had never been away from St. Louis for more than two weeks, college has been "awesome and at times scary," she says. "Everything seems a lot bigger. Even the bugs are bigger. I never killed bugs; that's what you have a daddy for."

But classes at UAPB are smaller, she says, than they were at Hazelwood Central High. In the first couple of months of school she has become active in student government. She plays softball, and she has joined the modeling squad, a group that puts on fashion shows.

"There were a couple of times I wanted to give up and go home," she says. "But I'm beginning to feel complete now. I never felt that way in high school."

THANKS DIANA "TOODLES" HAUF

HON. JOHN T. DOOLITTLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DOOLITTLE. Mr. Speaker, today my colleagues Mr. POMBO, Mr. OSE, and Mr. MATSUI and I wish to express warm thanks, congratulations, and best wishes to Diana "Toodles" Hauf upon her retirement as Executive Services Director and Concierge for United Airlines, at the Sacramento International Airport. With an always helpful and pleasant demeanor, Toodles went above and beyond, ensuring the utmost in customer service for those passengers so fortunate to be assisted by her.

Toodles began her 34-year career with United Airlines in Buffalo, New York, on April 28, 1969, where she began as the Station Manager Secretary. In a few short years, Toodles was given the opportunity to relocate to Sacramento, California to assist in the opening of the Red Carpet Club where she continued to serve until it closed ten years later. In 1984, Toodles was named Executive Services Director for Premium Travelers. Noted for her outstanding organization and leadership, Toodles has provided exemplary service to numerous Federal and State Representatives, State and Local Officials and Dignitaries. In addition to these responsibilities, Toodles directed the advance travel preparations for Former Governor Deukmejian, Former Governor Wilson, and Former Governor Davis. Toodles continued to facilitate superior customer service as the Executive Services Director and as a Concierge until her retirement.

Throughout her outstanding career with United Airlines, Toodles has received numerous accolades for exceptional service. Most notable, in 1988, she received the Airport Services Award, the Most Valuable Players Exemplary Service Award, and the Regional Award. In 1997, her hard work and dedication were again recognized with the Division Award. Furthermore, in addition to the above mentioned acknowledgements, Toodles received two gold medal medallions for safety and customer service.

Although Toodles' tenure with United Airlines has come to a close, her professional endeavors will continue to thrive as she embarks on a new career with Lyon Realtors in Roseville, California. We are certain that the talents and skills that allowed her to excel while at United Airlines will serve her just as well in her new career.

Toodles' vivacious and dynamic personality will truly be missed. We thank Diana "Toodles" Hauf for her outstanding service and wish her well in the future.

HONORING DOC STEWART

HON. TOM UDALL

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. UDALL of New Mexico. Mr. Speaker, I am honored to have the opportunity to express my heartfelt appreciation and congratulations to Doc Stewart, one of the treasures of Eastern New Mexico. Considering all that Doc has done for Clovis and the surrounding communities, how very appropriate it is that November 21, 2003, has been designated "Doc Stewart Day." I salute Doc with great honor and respect.

It would be very difficult to mention all that Doc Stewart has done to further the success of Clovis and the smaller communities that depend on the services this eastside hub provides. In addition to the vital importance of such as the excellent public schools, the business community and the agriculture industry, of great significance is Cannon Air Force Base. Doc has worked tirelessly for many, many years to ensure the continuation of this military presence on the eastside of New Mexico. In addition, he has always been extremely aware of how critical a congenial and productive relationship is between the air base personnel and the local residents. Doc's business acumen, keen insight, delightful personality and affable manner always served the community well in this effort.

Doc knew early on that Cannon was a key player in the economic health of Clovis. His exceptional efforts as a member of the Committee of Fifty have clearly demonstrated Doc's sincere interest and concern for the betterment of his fellow residents. Even though managing his own successful business required much of his time, he always made himself available to be involved in activities that were critical in retaining the presence of Cannon Air Force Base, whether those be local, state or national.

Doc Stewart is an outstanding member of his community and our state. Not only has he been dedicated to the efforts of the Committee of Fifty, his additional involvement in community service has been invaluable. I invite my colleagues to join me in extending best wishes for a job well done and continued success in all Doc's future endeavors.

HONORING GUY D. BRIGGS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. KILDEE. Mr. Speaker, I rise before you today to honor one of General Motors Corporation's (GM) finest, Mr. Guy D. Briggs, who is retiring as GM's Vice President of Manufacturing after 43 years of distinguished service on December 31, 2003. To recognize his accomplishments, Guy will be honored during a plant wide celebration to be held in his honor at the Truck and Bus Plant located in Flint, Michigan on December 1, 2003.

Guy D. Briggs received a bachelor's degree in economics and an M.B.A. from the University of Michigan in 1960 and 1961, respectively. Upon graduating he hired in at General Motors Corporation (GM) as a college graduate in training, and was assigned to the Chevrolet Manufacturing Plant located in Flint, Michigan. While working at the Chevrolet Plant, Guy held several supervisory positions. In 1969 he was selected for the Chevrolet Executive Development Training program. Once he completed the program he returned to his plant as the superintendent of manufacturing. In 1973 GM assigned Guy to the former Chevrolet Parts Plant, located in Saginaw, Michigan to assume the role of general superintendent of production, and a year later he transferred to the Saginaw Manufacturing Plant holding the same position. In September of 1975, Guy was appointed to the position of superintendent of production at the Saginaw Grey Iron Casting Plant, a position he maintained until 1976 when he was promoted to manager of the Chevrolet's Pressed Metal Plant located in Parma, Ohio. After his stint away from home, Guy returned to Flint, Michigan in 1978 to become manager of the Chevrolet Engine Plant and to complete the Dartmouth College Executive Development Program, which subsequently led to his promotion in May of 1983 to regional manufacturing manager, and then to acting general manufacturing manager for Chevrolet. In February of 1984, he became the manufacturing manager at the former Chevrolet-Pontiac-GM of Canada Group. From 1985 to 1991, he was vice president in charge of manufacturing operations for GM's Saturn Corp. subsidiary. In 1991, Guy was elected vice president of GM and appointed group director of operations for the truck group. In 1996 he was named vice president and general manager of the GM truck group until 2001 when he became vice president and general manager of vehicle manufacturing. Effective May 1, 2003 Guy was appointed GM vice president of manufacturing, his new role will allow him to continue to work with the manufacturing leadership team to provide support during the 2004 model-year product launches and the 2003 Labor negotiations. Guy is currently the Chairman of the board for the Oakland County (Michigan) Traffic Improvement Assoc., and a member of the Bishop International Airport Authority board of directors, Executive Board member for the Detroit Area Council of Boy Scouts and GM's key executive for the University of Wisconsin.

Guy Briggs has spent his entire career ensuring that GM remains the best in the world.

His loyalty to GM is evident by the number of moves he and his family have made. Aside from being an automotive enthusiast, Guy is a humble family man. He is a devoted husband to his lovely wife Karen and a devoted father to his five children. During his tenure Guy has earned the respect of his Company and its employees. He has a strong love for the Automotive Industry and Flint, Michigan.

Mr. Speaker, as a member of Congress, I ask my colleagues in the 108th Congress to please join me in congratulating my constituent and my dear friend, Guy Briggs, on his retirement, and wishing him and his family the best in future endeavors.

IN RECOGNITION OF L. JOEL MARTINEZ

HON. CHRIS BELL
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. BELL. Mr. Speaker, I rise to honor the life of L. Joel Martinez, a nationally known AIDS activist who died Wednesday, November 12, 2003. Mr. Martinez was the founding director of the Center for AIDS, a Houston-based clearinghouse for treatment and research information. The center was founded in 1995 to address the lack of treatment and research information available to the public.

Joel Martinez had a profound effect on the way pharmaceutical companies developed their drugs and the way they looked at issues relating to people with HIV and AIDS. He met with companies to help change the guidelines for clinical trials and encouraged them to do research and testing in Houston. He urged companies to test drugs not just on gay, white males, but also on minorities, women and children.

He was an excellent and articulate spokesperson for people with HIV and AIDS and a true leader in treatment advocacy issues. Mr. Martinez was a community representative for amFAR and the AIDS Clinical Trials Group. He also was a voting member of a U.S. Food and Drug Administration advisory committee that influenced the way the agency reviews drugs during the approval process.

Most recently, he was involved in the AIDS Treatment Activists Coalition, a national coalition of activists working to end HIV and AIDS by advancing research.

Mr. Martinez was born in Harlingen, Texas in 1953 to Luis and Teresa Martinez. He was salutatorian of the class of 1970 at Brownsville High School. A Rice University graduate, he earned a law degree from the Columbia University School of Law in New York in 1977.

He was an associate at Vinson & Elkins for six years before going into private practice in 1983. He re-evaluated his life after he was diagnosed with HIV in 1987. In the early 1990s, the focus of public information on HIV and AIDS was on prevention and not on treatment and research. Mr. Martinez set about to improve public information by making numerous presentations on HIV and AIDS and by writing many articles in English and Spanish on research and treatment of the disease. His significant influence on HIV and AIDS research and treatment helped so many people affected by the disease.

I know my colleagues join me in honoring Joel Martinez for his exceptional life and passionate activism. I extend my heartfelt condolences to his family and friends especially to Vann Vaughan, his life partner of twenty-two years, his mother Teresa, his sisters Rebecca and Zoe, and his brother Harry. Joel Martinez was a great American who fought tirelessly for those in need. His important work must continue until a cure for HIV and AIDS is found.

CHIEF FINANCIAL OFFICER FOR THE GOVERNMENT OF THE VIRGIN ISLANDS

HON. DONNA M. CHRISTENSEN
OF THE VIRGIN ISLANDS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mrs. CHRISTENSEN. Mr. Speaker, I rise today to introduce legislation to create the position of Chief Financial Officer for the Government of the Virgin Islands. It is my hope and intention that by temporarily placing the reins of fiscal management of the Virgin Islands government outside of the political arena we will be able to end years of crisis management and place the islands on sound financial footing for the long term.

Mr. Speaker, my beloved community, has been plagued over the years and several administrations, by one economic or fiscal crisis after another. If allowed to continue or recur, they have the potential of forcing us into total fiscal collapse.

The factors which have caused these crises are numerous and include among other things: the decline in our tourism sector due to the demographic shift from cities of the Eastern Seaboard to areas in the West and Midwest; being hit by as many as 6 catastrophic hurricanes since 1989; and the fact that the territory's geography mandates a large government workforce and necessitates the replication of many basic services.

When the current administration of Governor Charles W. Turnbull took office in January of 1999, the territory was in a fiscal state of enormous and alarming proportions.

While Governor Turnbull is to be commended for his response to that crisis and the succeeding ones he has faced, because of the special and unique burdens we face, history informs that the necessary political resolve to put measures in place to address these problems, some of which will call for public sacrifice, is best found and sustained outside of the political process.

It is for this reason that I am introducing the Virgin Islands CFO Act today. The CFO will be empowered to oversee and approve all spending of the government of the Virgin Islands and be authorized by law to disapprove items of spending which would send the government into financial deficit. The CFO position would sunset after five years and while he or she would be appointed by the Governor of the Virgin Islands from a list of names selected by a search commission, and confirmed by the Legislature, he or she will not be an "at-will" employee of the government and could only be removed for cause.

Mr. Speaker, this is not an easy bill for me to introduce, but it is a necessary one at this time. It is an action that I feel is in the best interest of all of my constituents and the responsible course of action for me to take. I ask for my colleagues support.

CONGRATULATING EDWARD ROBINSON

HON. PETER J. VISCLOSKY
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. VISCLOSKY. Mr. Speaker, it is with great sincerity and enthusiasm that I rise to congratulate Mr. Edward Robinson on his retirement from The Community Hospital in Munster Indiana, where he served as the Hospital Administrator for 37 years. Mr. Robinson has been a substantial fixture of the health care community in Northwest Indiana and he will be greatly missed.

Ed Robinson attended the University of Pittsburgh after receiving a highly competitive four-year scholarship from the American Legion. After the completion of his undergraduate college degree he was designated as a Distinguished Military Graduate by the United States Air Force in 1950, when he received his commission.

With his commission, Ed served as a Captain in the United States Air Force for three years and was stationed in Korea with the Fifth Air Force and was also a staff officer for the personnel at the headquarters of the Eighth Air Force, Strategic Air Command.

Knowledge has always been something valued by Ed. He holds a Master's Degree in Hospital Administration from the Graduate School of Public Health of the University of Pittsburgh, as well as a Master of Business Administration and a Bachelor of Arts Degree from the same institution. Mr. Robinson was awarded on Honorary Doctor of Laws Degree from Calumet College in May 1997.

Ed's career as a health care professional has been multifaceted and world-renowned. He has been published in numerous professional journals and received first prize in the "Hospital Topics" editorial National-wide competition for his thesis on "Nursing Staffing Pattern in an Intensive Care Unit." Ed is also a Fellow of the Royal Society of Health in London, England. As a member of the program committee of the Atlantic Economic Conference, an international group, he has presented papers in Paris, Rome, Puerto Rico, Scotland, and Munich on various hospital economic topics. He has been a presenter at numerous seminars with John Goodman and Associates regarding Hospital Based Heart Centers.

Nobly, Ed has committed a life of service to Northwest Indiana through his work in the health care community. He has received the Meritorious Service Award from the Munster Board of Trustees and a Special Award for Outstanding Leadership from the Munster Medical Research Foundation. He is also a founding member of the Board of Directors of Community Foundation, Inc. and the President of the Board of Directors of Hospice of the

Calumet Area. He has also shared his time with Board of the Northwest Indiana Symphony, as well as serving as Co-Chairman of the Community Veterans Memorial Park in Munster.

Mr. Speaker, Ed Robinson will be greatly missed at The Community Hospital by all of those who have served with this caring and compassionate man. At this time I ask that you and my other distinguished colleagues join me in honoring and congratulating Mr. Robinson for an outstanding career, not only in health care, but also in service to his community. Ed's leadership and passion for his career are to be commended, and his professional absence from the Northwest Indiana community will surely be missed.

TRIBUTE TO WILLIAM (BILL) LYONS, JR.

HON. DENNIS A. CARDOZA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CARDOZA. Mr. Speaker, I rise today to pay tribute to Secretary William (Bill) Edward James Lyons, the V for his service to our Nation and to his community. Bill was born in Modesto, California to William, the IV, and Mary Lyons on July 4, 1950. He attended school at Modesto High School in Modesto, California. Bill then attended college at California State University, Chico where he received his bachelor's degree and secondary teaching credential.

Throughout his career Bill has become a well-respected leader in the field of agriculture and is consistently sought out for his expertise. Appointed by Governor Gray Davis and confirmed by the California State Senate, Bill Lyons, Jr. served as the Secretary of the California Department of Food and Agriculture, from January 1999 to November 2003. As a rancher and businessman, Bill brought nearly three decades of leadership and business expertise to the department. As Secretary, Bill was responsible for a Department of 2,300 employees, and a budget of $250 million. Secretary Lyons' key responsibilities included policy development and implementation of programs that support California's $27 billion agricultural industry. He was responsible and successful in implementing the marketing campaign of the ''Buy California'' program in the state. While Secretary, Bill served as president of the Western Association of State Departments of Agriculture, chair of the Specialty Crop Task Force for the National Association of State Departments of Agriculture, and chairman of the Agricultural Worktable for the U.S.-Mexico Border Governors' Conference.

In California's great Central Valley, the Lyons family has been engaged in production agriculture for more than 75 years. Secretary Lyons managed the 6,000-acre ranch located in the Modesto area from 1976 to 1999. The ranch produces a number of crop and livestock commodities.

Bill currently serves as a member of the California Water Commission and on the Board of the California Department of Food and Agriculture. From 1993 to 1999, Bill served as chairman of the USDA's Farm Service Agency state committee. Bill was also appointed by the Stanislaus County Board of Supervisors to serve from 1996 to 1998 as founding director of the East Stanislaus and Toulmne County USDA Agriculture Stabilization and Conservation Service Committee, and the Stanisulaus/San Joaquin Counties' Cattlemen's Association.

Bill is a widely respected member of his community and has greatly contributed to his state and nation. The USDA has honored Secretary Lyons on three occasions: in 1998 with a certificate of appreciation; in 1997 with an award for excellence; and in 1996 with a national environmental award. In 1995, the California Farm Bureau Federation recognized him with a service award. The United States Jaycees named him the Outstanding Young Man of American in 1984 and both the City of Modesto and Stanislaus County has awarded him with various service commendations. In addition, California State University at Chico awarded Bill in 2000 with a Distinguished Alumni Award.

Secretary Lyon's illustrious career also includes various elected office positions in Stanislaus County such as: Member of the Central Catholic High School Board of Directors, Chairman, Doctors Medical Center, and Director, Modesto Irrigation District. Bill also worked as a Religion teacher at Saint Stanislaus elementary school, in Modesto California.

Throughout his lifetime, Secretary Lyons has demonstrated a deep commitment to community service. Throughout the years, he has worked with countless community organizations such as the Salvation Army, United Way, American Cancer Society, the Modesto Chamber of Commerce, and Camp Sylvester, a local youth camp. Additionally, he has coached sports teams for nearly two decades.

It is my pleasure to join the Stanislaus community in recognizing Secretary Bill Lyons, Jr. for his commitment to his community, state and nation. I have personally known the Lyons family for over two decades. Bill Lyons, Jr. and the entire Lyons family have a passion for California agriculture and for the values of hard work and community service in the San Joaquin Valley. Bill is a trusted and dear friend. I look forward to our continued friendship and to his wise counsel, and know that Bill's future path will continue to benefit California agriculture and all of us in the San Joaquin Valley. It is a pleasure to represent Bill and the entire Lyons family in the 18th Congressional District of California.

FLAWED ELECTIONS IN THE CAUCASUS

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SMITH of New Jersey. Mr. Speaker, as we approach the end of session, I would like to take note as Helsinki Commission Chairman of a very disturbing trend in the Caucasus republics of Armenia, Azerbaijan and Georgia. At this very moment, thousands of Georgians are engaging in a campaign of civil disobedience in the wake of the November 2 parliamentary elections. Georgian and international monitors registered large-scale falsification and ballot stuffing, not to mention the exclusion of many thousands of eligible voters. When the Central Election Commission gave the largest tallies to President Shevardnadze's party and the nominally-opposition but Shevardnadze-allied Revival Party, opposition leaders organized large demonstrations in Tbilisi's main street. There, in the rain and cold, protesters spent days demanding the President's resignation and new elections.

Their efforts, born of rage and despair, have been peaceful and the authorities have so far acted with restraint. But Georgia faces a genuine crisis, make no mistake. After ten years of growing frustration at official incompetence and corruption, the country's impoverished public has begun to resist business as usual. Eduard Shevardnadze, still lionized in the West for helping to end the Cold War as Soviet Foreign Minister, has long been deeply unpopular at home. Demands by successive U.S. administrations and international financial institutions to curb pervasive corruption have gone unheeded. And the November 2 election was a harbinger of the presidential race in 2005, when Shevardnadze will not be eligible to run. All participants and analysts agree that the outcome of this year's parliamentary contest will influence the coming succession.

How the Georgian drama will play itself out is hard to predict. But it is clear that Georgia is not alone in suffering through a crisis of trust and legitimacy. On October 17, Azerbaijan held presidential elections that, according to OSCE observers, did not meet international norms. Serious clashes between opposition backers and the authorities erupted in which at least one person was killed and hundreds were injured. Law enforcement agencies arrested hundreds of opposition activists; though most have since been released, according to human rights groups, many were beaten in detention. The Azerbaijani election, moreover, marked the transfer of power from President Heydar Aliev to his son, establishing the first family dynasty in the former Soviet Union. But Ilham Aliev has begun his term under a shadow, tainted by an election seen as unfair inside and outside the country and marred by the accompanying violence.

Earlier this year, Armenia held presidential elections in February and parliamentary elections in May that also fell short of OSCE standards. In February, thousands of protesters marched in the snowy streets of Yerevan; perhaps their numbers kept President Robert Kocharian from claiming a first round victory and forced him into a runoff—a first for a sitting president in the Caucasus. Between the two rounds, however, the authorities detained some 200 opposition campaign workers and supporters. On election day, they did whatever was necessary to win in a landslide. The final judgement of the OSCE election observation mission was that ''the overall process failed to provide equal conditions for the candidates. Voting, counting and tabulation showed serious irregularities, including widespread ballot box stuffing.'' The Armenian Assembly of America on March 18 noted that ''the people of Armenia deserved nothing less

than the declared aim of their government for free, fair and transparent presidential elections. As reported in depth by the OSCE, this achievable standard was not met.''

There was some improvement in the May parliamentary contest, concluded the OSCE, especially in the campaign and media coverage. Nevertheless, the election ''fell short of international standards . . . in a number of key respects, in particular the counting and tabulation of votes.''

In sum, Mr. Speaker, a discouraging and disturbing record for all three countries, marked by a consistent pattern of election rigging by entrenched elites who have learned that they can ''get away with it.'' The international community is prepared to register disapproval, by proclaiming these elections—in diplomatic language, to be sure—short of OSCE norms. But there have never been any other consequences for subverting the democratic process. Nor have opposition parties anywhere been able to annul or change the official results of a falsified electoral process, or even compel governments to negotiate with them.

Perhaps Georgia, where the state is relatively weak and discontent widespread, will prove the exception—although it is alarming that President Shevardnadze has sent his sometime rival Aslan Abashidze, who runs the region of Ajaria like a Central Asian potentate, north to gain Moscow's support. The prospect of Russia propping up a shaky, illegitimate Georgian Government should send shivers down the spine of any American. But until and unless an opposition movement registers some tangible success, the men in charge of the destinies of Armenia, Azerbaijan and Georgia have no reason to change course. What they are doing works and it benefits them, even if it harms their countries' chances of developing democracy.

Even worse, there is little reason to expect changes for the better. For years, optimists maintained that however discouraging things were, time and constant pressure from Washington and the international community would bring gradual change. As we approach 2004, the 13th year of independence for the former Soviet republics, that prognosis seems increasingly pollyanish. The consolidation of ruling groups, determined to remain in power, in control of the state's law enforcement and judicial agencies, and disposing of significant wealth, makes gradual evolution towards a genuinely democratic mentality and practices ever less plausible. Instead, we see evolution towards what some analysts call ''semi-authoritarian'' states and others, with reference to the Middle East, term ''liberal autocracies.''

Mr. Speaker, this admittedly depressing analysis leads to several worrisome conclusions. First, political opposition and publics in the Caucasus have concluded that electoral processes are hopelessly corrupted and offer no prospect of fairly competing for power or even trying to influence policymaking. Accordingly, they are increasingly inclined to mobilize against their leaders and governments. Even though victories have thus far eluded them, this turn to the ''street'' bespeaks a perennial politics of resentment instead of compromise and consensus-building. Second, the gulf between rulers and ruled has obvious implications for stability and democracy. Ruling elites will try to tamp down actual protest and curb society's organizing capability, infringing on their basic liberties; this, in turn, will upset the delicate balance between state and society. Change, when it comes, may be violent.

Steadily losing hope, many Armenians, Azerbaijanis and Georgians will likely opt out of politics altogether. Many others will emigrate if they can. This trend has been marked for years in all three countries; Armenians often try to come to the United States; while Azerbaijanis and Georgians find it easier to move to Russia. But the departure of these highly motivated individuals and their families, who often find ways to prosper in their adopted homes, weakens their homelands.

Washington has observed these tendencies with concern but little action. Democracy-building programs may help develop civil society but have little impact on leaders who pursue their own interests and are quite prepared to dismiss the State Department's criticism of yet another rigged election—even if, as happened yesterday, the Department, in unprecedentedly strong language, said the Georgian election ''results do not accurately reflect the will of the Georgian people, but instead reflect massive vote fraud in Ajara and other Georgian regions.'' And while we are preoccupied with Iraq and the war on terrorism, Moscow has been steadily rebuilding its assets in these countries, buying up infrastructure in equity-for-debt deals and offering all possible support to those in power.

Under these circumstances, Mr. Speaker, our chances of influencing political evolution in Armenia, Azerbaijan and Georgia may not be very great. But they will diminish to zero unless we recognize the problem, and soon.

HONORING MR. FRANK M. LAMPKIN, JR.

HON. JIM McCRERY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCCRERY. Mr. Speaker, October 24th of this year, Louisiana and the United States lost a fine American and a good friend. Frank Lampkin, Jr. of Bossier City passed away at the age of 79. Though he has passed away, he leaves behind a rich legacy and a community made better by his good work.

Mr. Lampkin was a giver in every sense of the word. He gave to his country as a Sergeant in the Marines. He gave his time and energy, inspiring the children of Northwest Louisiana as a teacher, a coach, and a principal for more than three decades. He raised a family. And he continued to find ways to give back even more to his community.

Over the years Mr. Lampkin was an integral member of campaigns like the Clean City Committee, the Salvation Army Food Drive and Bell Ringing, Shots for Tots, and awards programs to inspire learning in elementary school children.

His list of awards and achievements is remarkable. He was a Kiwanian of the Year and had 50 years of perfect attendance at the Kiwanis Club of Bossier. He was inducted into the Louisiana High School Athletic Hall of Fame and the Northwestern Educators' Hall of Fame. He was a recipient of the Air Force R.O.T.C. Outstanding Service Award.

Despite all of these achievements, Mr. Lampkin will best be remembered as a husband, a father, a mentor, a neighbor, and a friend.

Frank Lampkin was an inspiring member of his community and I am pleased to have had a chance today to share some of the highlights of his life with those who never had the chance to meet him.

COMMENDING BARBARA REYNOLDS FOR HER YEARS OF SERVICE ON CAPITOL HILL

HON. DAVE WELDON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. WELDON of Florida. Mr. Speaker, I come to the floor today to pay tribute to a long-time member of my staff who is retiring this December. Barbara Reynolds has worked for me as my scheduler and executive assistant since I was elected in 1994. Barbara's career on Capitol Hill preceded mine by 13 years. This experience, along with her talent and willingness to accommodate the busy schedule of a Congressman, was invaluable.

Before coming to work on the Hill, Barbara had been a stay-at-home mom, taking care of her two children. She had never really given much thought to getting involved in the political world, but, in 1979, at the suggestion of her father-in-law, she handed a resume to a friend at the Republican Policy Committee and, in about a week, landed a job with then-Representative Carlos Moorehead from California. This, however, was not her only job at the time. Barbara often spent her weekends as a professional model—many say she looked just like Jackie Kennedy Onassis. Her modeling took her all over the world as well as provided her with many commercial advertising opportunities. As a result of this, some current House maintenance workers who were around at the time still refer to Barbara as ''Jackie'' when they see her in the halls.

In 1985 Barbara began working for then-Representative and eventual presidential candidate Jack Kemp. In addition to working in his personal office she also worked on his campaign in New Hampshire.

After working with Jack Kemp, Barbara moved on to work for my Florida colleague, Representative CLIFF STEARNS in 1988. Barbara spent six years working for Representative STEARNS where she established her Florida roots.

In 1995 Barbara came to work for me and has worked in my Washington office since my first day in office. I am incredibly grateful for her loyalty to my staff and me. It will be nearly impossible to replace her uplifting spirit. Her presence in my office added a touch of class and style, which are sometimes hard to find in the world of politics.

I, along with her coworkers and others outside my office whose lives she has touched, will miss her presence on Capitol Hill. Barbara

Reynolds's retirement is well earned. She plans to pursue her hobby of boating on the Chesapeake with her husband, Bob, as well as continue to be a loving mother and grandmother to her two grown children and to her grandchildren. We all wish her many blessings and much happiness in the years to come.

Thank you Barbara, for your service to my office, the people of Florida, and the many others with whom you have worked on Capitol Hill.

CONFERENCE REPORT ON H.R. 2417, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2004

SPEECH OF

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. PAUL. Mr. Speaker, I rise with great concerns over the Intelligence Authorization Conference Report. I do not agree that Members of Congress should vote in favor of an authorization that most know almost nothing about—including the most basic issue of the level of funding.

What most concerns me about this conference report, though, is something that should outrage every single American citizen. I am referring to the stealth addition of language drastically expanding FBI powers to secretly and without court order snoop into the business and financial transactions of American citizens. These expanded internal police powers will enable the FBI to demand transaction records from businesses, including auto dealers, travel agents, pawnbrokers and more, without the approval or knowledge of a judge or grand jury. This was written into the bill at the 11th hour over the objections of members of the Senate Judiciary Committee, which would normally have jurisdiction over the FBI. The Judiciary Committee was frozen out of the process. It appears we are witnessing a stealth enactment of the enormously unpopular "Patriot II" legislation that was first leaked several months ago. Perhaps the national outcry when a draft of the Patriot II act was leaked has led its supporters to enact it one piece at a time in secret. Whatever the case, this is outrageous and unacceptable. I urge each of my colleagues to join me in rejecting this bill and its incredibly dangerous expansion of Federal police powers.

I also have concerns about the rest of the bill. One of the few things we do know about this final version is that we are authorizing even more than the president has requested for the intelligence community. The intelligence budget seems to grow every year, but we must ask what we are getting for our money. It is notoriously difficult to assess the successes of our intelligence apparatus, and perhaps it is unfair that we only hear about its failures and shortcomings. However, we cannot help but be concerned over several such failures in recent years. Despite the tens of billions we spend on these myriad intelligence agencies, it is impossible to ignore the failure of our federal intelligence community to detect and prevent the September 11 attacks. Additionally, it is becoming increasingly obvious that our intelligence community failed completely to accurately assess the nature of the Iraqi threat. These are by any measure grave failures, costing us incalculably in human lives and treasure. Yet from what little we can know about this bill, the solution is to fund more of the same. I would hope that we might begin coming up with new approaches to our intelligence needs, perhaps returning to an emphasis on the proven value of human intelligence and expanded linguistic capabilities for our intelligence personnel.

I am also concerned that our scarce resources are again being squandered pursuing a failed drug war in Colombia, as this bill continues to fund our disastrous Colombia policy. Billions of dollars have been spent in Colombia to fight this drug war, yet more drugs than ever are being produced abroad and shipped into the United States—including a bumper crop of opium sent by our new allies in Afghanistan. Evidence in South America suggests that any decrease in Colombian production of drugs for the US market has only resulted in increased production in neighboring countries. As I have stated repeatedly, the solution to the drug problem lies not in attacking the producers abroad or in creating a militarized police state to go after the consumers at home, but rather in taking a close look at our seemingly insatiable desire for these substances. Until that issue is addressed we will continue wasting billions of dollars in a losing battle.

In conclusion, I strongly urge my colleagues to join me in rejecting this dangerous and expensive bill.

THE ALDER CREEK DROUGHT PROTECTION PROJECT

HON. JOHN T. DOOLITTLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DOOLITTLE. Mr. Speaker, I rise today to introduce The Alder Creek Water Storage and Conservation Project Act. This legislation will authorize The U.S. Bureau of Reclamation, in cooperation with the El Dorado County Irrigation District, to conduct a study to determine the feasibility of constructing a water storage project on Alder Creek in El Dorado County, California.

The Alder Creek Water Storage and Conservation Project would include the construction of a dam and 31,700 acre foot reservoir that would yield approximately 11,500 acre feet of additional water supply per year. A major advantage of this location is the ability to deliver this water by gravity into El Dorado Irrigation District's existing water delivery system and to the American River to increase instream flows for the propagation of fallrun Chinook salmon and Steelhead trout.

Like many communities in the arid West, El Dorado County faces water supply shortages that threaten people, cities, farms and the environment. The El Dorado Irrigation District, which serves over 100,000 of my constituents, is charged with the difficult task of providing a safe and reliable water supply throughout the region for all of these competing interests. Severe drought periods, like we are experiencing now, and explosive growth rates that are occurring in portions of El Dorado County, have made this task even more arduous. EID deserves great credit for developing alternative sources of water, such as recycled water, to ease the burden of inadequate supplies. In fact, all new developments within The El Dorado Irrigation District's service area are hooked up to recycled water lines that run in the front and back of the properties which conserves precious drinking water. However, if current trends continue, which all indications say they will, other alternative sources of water will be required in order to keep up with demand. To avoid a crisis, the District is in the process of developing a comprehensive plan to protect against multiple-year drought events. The Alder project would be a key component in the Districts overall drought protection strategy that would also include water banking and intergovernmental agreements.

Mr. Speaker, I would ask that this legislation be given prompt consideration so that the benefits of this important project can be realized in a timely manner.

INTRODUCTION OF THE "NATIONAL FILM PRESERVATION ACT OF 2003"

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CONYERS. Mr. Speaker, I am pleased to announce the introduction of the National Film Preservation Act of 2003, which reauthorizes the National Film Preservation Act of 1996.

We all know that motion pictures are amongst this nation's cultural treasures, going beyond entertainment to represent American ideals and values to people across the world. Unfortunately, the films on which many motion pictures are created are easily susceptible to physical deterioration; in fact, over fifty percent of movies made before 1950 have deteriorated and over ninety percent of movies from before 1929 have disintegrated.

The 1996 Act was designed to ensure that we could protect the treasures we still have. It created the National Film Preservation Board and the National Film Preservation Foundation. The NFPB generates public awareness of a national film registry and reviews initiatives to ensure the preservation valued films. The NFPF issues grants to libraries and other institutions that can save films from degradation.

The program has received accolades from organizations such as the Directors Guild of America and the Academy of Motion Picture Arts and Sciences. Noted filmmakers Martin Scorsese and Ken Burns also have praised the NFPB and the NFPF.

Unfortunately, the program officially expired October 11, 2003, and was not reauthorized. The legislation being introduced today would remedy that oversight by reauthorizing both the NFPB and the NFPF. I hope my colleagues will join me in supporting this valuable effort as we move it through the House.

CONFERENCE REPORT H.R. 6

SPEECH OF

HON. W.J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. TAUZIN. Mr. Speaker, the Energy Policy Act of 2003, among other things, would authorize the promulgation of mandatory and enforceable standards for the North American transmission system by an Electric Reliability Organization subject to FERC oversight in the U.S. Having been so recently reminded that transmission system failures and system reliability do not respect state or international boundaries, it is essential that this legislation protect consumers in one state from actions or events in another. Under the plain language of new FPA section 215 (i)(3), no state may take any action with respect to the safety, adequacy and reliability of electric service within that State if that action is determined by the Electric Reliability Organization or by the Federal Energy Regulatory Commission to be inconsistent with any reliability standard. A regional entity that satisfies the requirements of new section 215 (e)(4) may propose to the Electric Reliability Organization reliability standards that reflect regional differences, and the Electric Reliability Organization may approve such proposed standards when justified.

TRIBUTE TO PASTOR EPHRAIM AND MRS. CARRIE SUE WILLIAMS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MATSUI. Mr. Speaker, I rise in tribute to Pastor Ephraim and Mrs. Carrie Sue Williams as they celebrate a personal milestone. On November 22, 2003, Pastor Williams and his beloved wife will celebrate their 50th wedding anniversary. As their friends and family gather to commemorate this momentous occasion, I ask all my colleagues to join me in wishing one of Sacramento's most revered couples a happy anniversary and continued happiness in the future.

For the past 32 years, Mr. and Mrs. Williams have served with great class, dignity, and distinction as the Pastor and First Lady of the St. Paul Baptist Church in Sacramento California. As Pastor, Mr. Williams has played an instrumental role in directing and coordinating all aspects of the St. Paul Missionary Baptist Church. Pastor Williams made vital decisions related to staffing, church organization structure, finances, and the modification of facilities. Pastor Williams was the driving force behind the construction of a seventy-nine square foot edifice, which includes an administration wing, sanctuary, fellowship hall and classroom wing. Pastor Williams spearheaded a 7-year effort that liquidated a $4 million debt for the church so that it could cover the $7.7 million that was required for the construction project. Pastor Williams is currently leading the church in the building of a multi million-dollar Family Life Center that will include a gymnasium, classrooms, computer lab, dance rooms, nursery, office space, library, weight room and conference room. Pastor Williams' commitment to improve the church is great proof of his willingness to work hard to improve the lives of other people.

Mrs. Carrie Sue Williams is a former business owner and she has brought her trademark grace and dignity to her role as the First Lady of St. Paul Baptist Church. As the First Lady, Mrs. Williams regularly visits the sick and the confined. She also counsels women and couples. Mrs. Williams helped to design the St. Paul Children and Youth Reading Ministry, a program that is designed to motivate and reward children for their reading efforts.

Pastor Williams is undoubtedly one of the strongest civic leaders in the Capital Region. Pastor Williams' leadership capacities have included: President of United Pastors of Sacramento, Vice President of the National Baptist Convention, U.S.A., Inc, President of the California State Baptist Convention and President of the Northern District Baptist Association. Pastor Williams is the current President of the Oak Park and St. Paul Community Outreach Program.

Pastor and First Lady Williams are the proud parents of Gwen and Ephraim Jr., although he has since passed on. They also enjoy the love and companionship of their four grandchildren and three great grandchildren.

Mr. Speaker, I am honored to congratulate Pastor Williams and First Lady Williams on their 50th wedding anniversary. As the family and friends of the Williams family gather to celebrate this terrific milestone, I would like to especially thank Pastor Williams and First Lady Williams for all their great service to their community. I ask all my colleagues to join with me in wishing Pastor Ephraim Williams and First Lady Carrie Sue Williams continued success in all their future endeavors.

PERSONAL EXPLANATION

HON. XAVIER BECERRA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BECERRA. Mr. Speaker, on Monday, November 17, 2003, I was unable to cast my floor vote on rollcall numbers 620, 621, 622, and 623. The votes I missed include rollcall vote 620 on the Motion to Suspend the Rules and Pass S.J. Res. 22, Recognizing the Agricultural Research Service; rollcall vote 621 on the Motion to Suspend the Rules and Pass S.J. Res. 18, Commending the Inspectors General; roll call vote 622 on the Motion to Suspend the Rules and Agree to H. Con. Res. 299, Honoring Sargent Shriver; and rollcall vote 623, on the Hour of Meeting.

Had I been present for the votes, I would have voted "aye" on roll call votes 620, 621, 622, and 623.

HONORING MR. DANIEL MILLER OF ARLINGTON, TEXAS, TO RECOGNIZE HIS DESIGN OF THE TEXAS STATE QUARTER

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. FROST. Mr. Speaker, I rise today to honor Daniel Miller of Arlington, Texas. Daniel is the artist who designed the Texas State quarter, which will debut in 2004 and will be the 28th in the series of state commemorative quarters from the U.S. Mint. His design was picked from over 3000 entries.

Daniel has gracefully and accurately captured the spirit of our great State. The Texas State quarter will feature a Lone Star springing from the outline of a map of Texas, with a lariat featured prominently. When asked about what inspired him with the coin's design, Daniel simply said, "I toyed around with putting the Alamo in, but Texas is so much more than just the Alamo."

Indeed, Texas is much more than the Alamo. Its rich history and people can hardly be summed up in a coin, but Mr. Miller has gamely risen to the task. Although a native Minnesotan, having come to Texas only 15 years ago, Daniel's design tells me that the blood of a true Texan runs through his veins.

Daniel's inspired work will soon be familiar to millions of people across this great nation. Whether they collect or spend the Texas quarter, I believe that a little bit of the Texas spirit will rub off on everyone who encounters Daniel's work of art.

Mr. Speaker, I am proud of Daniel and his work to recognize Texas's great history. I know my colleagues will join me in congratulating Daniel Miller as we celebrate his design for the Texas State quarter. We salute him today.

INTRODUCTION OF THE MEDICARE CHRONIC KIDNEY DISEASE MANAGEMENT ACT OF 2003

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. STARK. Mr. Speaker, I rise today to introduce the Medicare Chronic Kidney Disease Management Act of 2003. My bill would expand Medicare eligibility for uninsured patients with advanced chronic kidney disease before their condition progresses to end-stage renal disease (ESRD) status. The bill would provide access to healthcare and most importantly disease management and pre-ESRD educational and counseling services. It would improve the health and quality of life for those suffering from kidney disease and could provide real savings for the Medicare program by helping chronic kidney disease patients delay costly dialysis treatments and kidney transplants associated with the end stage status of the disease.

ESRD patients are the only group of patients eligible for Medicare enrollment solely

due to their medical diagnosis. ESRD is characterized by a permanent loss of kidney function, which results in the need for dialysis treatments or kidney transplantation in order to sustain life. Under current law, a physician must certify that an individual's kidney functions have deteriorated to end-stage status for a patient to be eligible for the Medicare ESRD program. Subsequently, there may be an additional waiting period of up to 3 months depending on the type of dialysis procedure chosen by the patient before the individual becomes eligible for benefits. Thus, benefits are only received after the cessation of adequate kidney functioning.

The cost to the Federal Government for providing care to an ESRD patient is very high. The average per capita expense for all ESRD patients was $33,282 in 2000, approximately 8 times the annual cost of care for the average Medicare beneficiary. The annual cost for in-center hemodialysis, the most frequent form of dialysis used, approaches $55,000.

There has been a substantial amount of research within the past several years indicating that the provision of improved medical care and disease-related pre-ESRD educational and counseling services to advanced chronic kidney disease patients prior to their progressing to end-stage renal status has multiple positive effects. The provision of these pre-ESRD services slows down the progression toward ESRD status, decreases the occurrence and intensity of related diseases and decreases overall mortality rates. By allowing uninsured patients with advanced kidney disease to access care prior to qualifying for Medicare due to an End Stage Renal Disease diagnosis, this bill wisely and appropriately addresses a critical unmet health need.

Under the Medicare Chronic Kidney Disease Management Act, uninsured, pre-ESRD chronic kidney disease patients would be eligible for full Medicare coverage and pre-ESRD counseling and educational services. To be eligible, a physician would need to certify that a chronic kidney disease patient has reached a level of kidney functioning deterioration predictive of a need for dialysis or a transplant in the next 1½ years under a widely accepted clinical standard. Individuals eligible under the bill would pay Medicare Part B premiums. Pre-ESRD educational and counseling services provided by this legislation address treatment options, disease management, and nutrition. These new services would also be available to current Medicare enrollees who become diagnosed with chronic kidney disease.

This bill also requests that the Secretary of Health and Human Services establish at least 2 demonstration projects in cooperation with recognized kidney patient organizations, to devise ways, or demonstrate means through which peer education procedures can slow progress to ESRD and improve outcomes for patients with this disease.

Today, more than 300,000 individuals are covered under the Medicare ESRD program. By 2010, it is expected that this number will more than double. This bill, which is supported by the National Kidney Association and the American Association of Kidney Patients, will help minimize the damaging impact of this chronic illness and slow the growth of individuals suffering from ESRD. By delaying the need for either dialysis or transplantation, one can also anticipate substantial cost savings to the government. I urge my colleagues to join me in supporting the Medicare Chronic Kidney Disease Management Act so we can make these vital improvements to the Medicare program for those who suffer from chronic kidney disease.

TRIBUTE TO JENNIFER DOWNEY OF CLINTON TOWNSHIP, MICHIGAN

HON. SANDER M. LEVIN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. LEVIN. Mr. Speaker, it is with genuine pleasure that I rise to recognize one of my constituents, Jennifer Downey of Clinton Township, Michigan, for her recent promotion to Chief Petty Officer in the U.S. Naval Sea Cadet Corps.

The U.S. Naval Sea Cadet Corps was established in 1958 to develop an appreciation for the United States' naval history, customs, traditions, and its significant role in national defense. The goal of the Cadet Corps is to encourage young people to develop an interest in basic seamanship and teach cadets patriotism, courage, confidence and self reliance.

Cadet CPO Downey has been a member of the Naval Sea Cadet Corps Program's Tomcat Squadron for over 5 years. She has completed a large number of advanced training courses over her tenure in the program, including seamanship training aboard the USNSCS *Grayfox*, Coast Guard training, Master at Arms School, and Petty Officer Leadership Academy. In addition, she has completed sixty-four hours of community service and won numerous citations and ribbons.

Cadet CPO Downey's promotion to Chief Petty Officer was brought to my attention in a letter from her Commanding Officer, LTJG Lisa Stoyanovich, who writes me to say that CPO Downey "is a very personable young woman who takes pride in herself and her unit. CPO Downey's performance of her duties is always top-notch, her leadership abilities are exceptional, and her ability to motivate other cadets is finely tuned. Through her years of Navy League Cadet and Naval Sea Cadet training, she has earned the respect of her peers, and the officers in the unit."

The letter from Lieutenant Stoyanovich goes on to say that "Chief Petty Officer Downey has developed into a mature, solid leader and is a fine example of what the Sea Cadet Corps hopes to develop in young people."

I ask all my colleagues to join me in congratulating Chief Petty Officer Jennifer Downey for her achievements as a member of the U.S. Naval Sea Cadet Corps.

OPPOSING THE SYRIA ACCOUNTABILITY ACT

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. STARK. Mr. Speaker, I rise in opposition to this bill despite being one of its cosponsors and having voted for it when it came before the House on October 15th.

I strongly believe Syria's actions ought to be called into question. To say this regime is a bad actor is putting it mildly. Their actions are rightly condemned, especially when it comes to their tacit support for terrorism and ongoing occupation of Lebanon. The United States ought to use the tools at our disposal—both political and economic—to demand an end to their egregious policies.

There is, however, a reason why I am voting against this resolution. It is based on my long held reservations about the President's intentions on foreign policy. Given his belligerent declarations yesterday, I have genuine concerns that he may seek authority in this resolution to pursue aggressive military action against Syria.

After all, Mr. Speaker, this President did not need much to march to war against Iraq. At best, the evidence was soft, the intelligence was trumped up and now not a grain of proof can be found showing Iraq had any weapons of mass destruction. But, ultimately, President Bush used past declarations of Congress meant merely to reprimand Iraq for its policies to justify full-blown war against that regime.

This resolution today contains provisions that rightly admonish Syria, but do so on the basis of reasonable beliefs and assumptions, not proven facts. Most notably, there is reference to Syria's "hostile actions" in regard to the United States and our troops in Iraq. Although our suspicions are well founded, there is as yet no proven connection between the government of Syria and terrorism in Iraq.

I have concerns the President may not draw this distinction and take these words as grounds for pursuing preemptive military action.

Frankly, Mr. Speaker, I don't trust this President. His actions toward Iraq have clearly demonstrated his willingness to lie to the American people. But, they also underscore his willingness to use force indiscriminately without the burden of proof.

I cannot support a resolution that might be used as a vehicle for the President to act counter to the interest of the American people. I vote "no" on this resolution.

HONORING THE BASIC HIGH SCHOOL MJROTC UNIT

HON. JON C. PORTER
OF NEVADA
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. PORTER. Mr. Speaker, I rise today to honor the Basic High School Marine Corps JROTC unit. I am proud to represent this outstanding group of young men and women and urge the entire House to join me in commending them today.

The MJROTC unit at Basic High, in Henderson, Nevada is one of the top JROTC units in the country, having been recognized as a Naval Honor School for the 2002–2003 school year. In addition, the Basic High MJROTC unit is the National Champion of the unarmed competition at the United States Air Force Academy National Invitational Drill Meet

Championship, and has won seven times in the last 9 years. The Basic High armed competition unit has won the National Championship every time it has competed.

Basic High MJROTC is not only a champion on the drill field; it is also a champion in producing young men and women of character. Basic High MJROTC has been an active part of honoring Veterans Day in Henderson, with the whole battalion presenting the colors for the City of Henderson ceremony. The unit also led the local celebrations of the 228th anniversary of the founding of the U.S. Marine Corps. I want to thank the members of the unit, and instructors Lieutenant Colonel Montgomery, Master Gunnery Sergeant Ignatz, and First Sergeant Rael for standing always faithful, "Semper Fidelis," to the best traditions of Nevada, America, and the U.S. Marine Corps.

HONORING SISTER JEANNE O'LAUGHLIN

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SHAW. Mr. Speaker, I rise today in recognition of the amazing life and contributions of Sister Jeanne O'Laughlin, OP, Ph.D., as she prepares to retire from service to the Barry University community this December. Sister Jeanne is the president of Barry University, which is located in Miami Shores, Florida. Since becoming president in 1981, Sister Jeanne has worked endlessly to increase the reputation and endowment of Barry University, raise hundreds of millions of dollars for her student's aid, and create a student body and alumni that stretches 70 countries, ranking number one in diversity among southern regional universities.

Sister Jeanne O'Laughlin was born and raised in Detroit, Michigan where she first learned what it meant to love and educate. As a little girl, she realized that in order to stop hatred, crime, and injustice, education must be the first priority on any agenda. Sister recalls the story when she was a 13-year old girl riding a streetcar in Detroit, she noticed a black woman enter the car with four small children. As the streetcar lurched forward, one of the children fell into her lap. Without hesitating, young Jeanne gladly held the young child for the remainder of the ride. Later, as a man departed the streetcar, he walked by and spit on young Jeanne.

Startled by what occurred, Jeanne asked her father later that evening why the man spit on her. Jeanne's father replied, "prejudice". Innocently, Jeanne asked, "how do you stop that?" "Education" was her father's answer. This simple response began a vision. A vision we honor today.

The Adrian Dominican Sisters founded Barry University in 1940, as a university dedicated to educating women. Since then, the University has continued to be administered by women, including the last 22–years with Sister Jeanne at the helm. My first year in the people's House, was also Sister's first year as Barry president. The year was 1981, and for Sister Jeanne it was the beginning of an educational revolution. In 22 tremendous years, Barry has changed from a predominantly women's university of 2,000, into a diverse campus of 8,500. She has raised nearly $170 million for the university since she took office and has seen the university contribute nearly $200 million to South Florida's economy last year.

Under the supervision of Sister Jeanne, Barry has been able to sustain in excess of 1,000 employees, up from 340 when Sister Jeanne started in 1981. Barry's budget has also increased dramatically rising from $8.3 million to a staggering $100 million. Barry's endowment has also risen more than 2,000 percent to $22 million during the past 22 years. The university now offers seven doctoral degrees, including the only Doctor of Podiatric Medicine in the Southeast, and only seven universities in the country to offer such a degree. During her term as president, Sister Jeanne has inspired those around her to give more and more of themselves to better the lives of the students of Barry University. A tireless educator, Sister Jeanne has not only contributed greatly to Barry University, but also to many other institutions around Florida and the nation.

Sister Jeanne has served as chair of the Council of Independent Colleges from 1994–1996, the chair of the Association of Catholic Colleges and Universities also from 1994–1996, and as an Executive Council member of the Southern Association of Colleges and Schools' Commission on Colleges from 1991–1996. Just in Florida alone, Sister Jeanne has served as president of the Florida Association of Colleges and Universities and chairman of the Independent Colleges and Universities. As a testament to her dedication to education, four Florida universities: Holy Cross College, University of Miami, Rollins College, and Lynn University, have conferred honorary degrees on Sister Jeanne, making her one of the most respected and loved educators in Florida's history.

Sister Jeanne has also been an advocate of revitalizing South Florida's economy. South Florida's power elite noticed her qualities and dedication and named Sister the first female member of two exclusive groups: The Orange Bowl Committee and the Non-Group. The Orange Bowl Committee is a group of dedicated, South Florida volunteers, who are committed to bringing tourism to South Florida through the annual college football game. Now, one of the four most prestigious college football bowl games in America, the Orange Bowl festivities bring in an excess of 150,000 visitors every year, which contribute to a thriving South Florida economy.

Despite all her dedication and hard work, even Sister Jeanne is susceptible to illness and in 1996, Sister was diagnosed with lung cancer. However, even this disease could not stop her determination. Following disclosing publicly her illness, Sister helped raise awareness and funds for the American Cancer Society.

Mr. Speaker, as a fellow lung cancer survivor, I know how difficult life seems after being diagnosed with such a terrible illness. For Sister Jeanne to continue her work like this is an inspiration to every cancer patient and survivor in America. I am also grateful to Sister for her thoughts and prayers during my illness earlier this year.

Sister Jeanne is a dear friend, and someone I am truly proud to know and love. Sister Jeanne's vision continues. Her love for Barry and South Florida is evident evermore. Under Sister Jeanne's supervision, Barry University is attempting the largest construction project in Miami Shores history. Nearly $18 million will bring a new student center and residence hall to accommodate the growing student population, which Sister Jeanne has pushed to grow and expand ever since she took office.

Mr. Speaker, as Chairman of Florida's Congressional Delegation, I salute Sister Jeanne O'Laughlin for her 22 years as President of Barry University. May God bless Sister Jeanne O'Laughlin.

H.R. 2297, VETERANS BENEFITS ACT OF 2003

SPEECH OF

HON. TOM UDALL

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. UDALL of New Mexico. Mr. Speaker, H.R. 2297, the Veterans Benefits Act of 2003, contains myriad benefits for our nation's veterans, many of which are long overdue. The bill builds on education benefits by expanding the Montgomery GI Bill program, a successful program that will now include educational assistance for on the job training in certain self-employment programs. It also increases monthly educational benefits for spouses and dependent children of veterans with permanent total disabilities, or who have died as a result of combat.

Among the housing benefits in the bill is a provision allowing remarried surviving spouses of veterans to be buried next to the veteran in a national cemetery, based on the original marriage. A prohibition on remarried spouses burial eligibility is unfair to many of the dedicated spouses who have faithfully supported their veterans for years. I was a cosponsor of the original bill for this measure and support its passage.

The section of the bill relating to benefits for former Prisoners of War contains a provision that will add cirrhosis of the liver to the list of presumed service-connected disabilities for former POWs. It also eliminates the unfair requirement that a POW must be held for at least 30 days to qualify for presumption of service-connection for certain disabilities, such as psychoses and states of anxiety. We owe it to our former POWs to repay them for what they have been through as much as we possibly can, and this provision is a step in that direction.

Yet another beneficial provision in this bill is the extension for six years of the Advisory Committee on Minority Veterans. As a representative in a state with over 9,000 Native American veterans, and with over 17,200 Hispanic veterans in my district alone, I fully support this provision and believe it is a necessary step to the continued service to all minority veterans.

Another provision in the bill provides federal contracting officials the discretionary authority

to award sole source contracts to small businesses owned by service-disabled veterans. I am pleased that the Senate took out the ''notwithstanding any other provision of law'' phrase that was in the original version of H.R. 1460, from which the language for this provision of H.R. 2297 was taken. The language included in the original version of H.R. 1460 was very harmful to the 8(a) small business contract program, a program that benefits minority-owned small businesses all across this country. As a member of both the House Veterans' Affairs Committee and House Small Business Committee I worked to forge a suitable compromise that would ensure increased contracting opportunities for veteran-owned small businesses, while not harming the 8(a) program that has helped provide economic opportunity for minority entrepreneurs. With the help of the Chairmen and Ranking Members of both committees, we were able to unanimously pass an amended version of H.R. 1460.

Unfortunately the unanimously passed version of H.R. 1460 is not what is included in H.R. 2297 today, but neither is the originally damaging language of H.R. 1460 included in this bill. I do have remaining concerns about the effect of the included contracting provision on the 8(a) and other small business programs, but considering the numerous important provisions for our nation's veterans contained in this bill, I will vote in favor.

In closing, Mr. Speaker, let me say that I strongly support increased opportunities for veteran entrepreneurs. In fact, with the support of Congresswoman SUE KELLY, I recently introduced H.R. 3483, the Seeds for Soldiers Act, to establish a loan program and a vocational rehabilitation program for veterans. As a member of the House Veterans' Affairs Committee, I strongly support strengthening benefits for our Nation's veterans, who have fought so bravely to protect our country. I support the passage of H.R. 2297 and look forward to continuing work in the House Veterans' Affairs Committee to support our Nation's heroes.

LET'S GO LANCERS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MARKEY. Mr. Speaker, while the Boston Red Sox failed to finally capture a World Series victory that has eluded them since 1918, another group of Hardball Heroes from Red Sox Nation did achieve their ultimate goal. The Malden Catholic Lancers defied all expectations, overcame every obstacle, and defeated every opponent to finish the year as Massachusetts Division One State Champions.

While Red Sox fans will have to wait until next year yet again, the Lancers fans can rejoice and celebrate the success of this young team of schoolyard superstars.

Mr. Speaker, today I join with faculty, students, my fellow alumni, and all members of the Malden Catholic community who are saying congratulations!

It was Coach Stephen Freker's guidance and leadership that fueled these young men as they drove to the championship. The National High School Baseball Coach's Association affirmed what we knew all along by naming Coach Freker New England's Coach of the Year.

These Lancers worked hard, practiced long, and gave their hearts and souls for the blue and gold all year long. While they are great individual players, their true greatness lies in their ability to play as team.

Mr. Speaker, this was our year.

Let's Go Lancers!

IN RECOGNITION OF THE GLENDALE GENERAL RICHARD GRIDLEY CHAPTER OF THE DAUGHTERS OF THE AMERICAN REVOLUTION

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SCHIFF. Mr. Speaker, I rise today to congratulate the General Gridley Chapter of the Daughters of the American Revolution on their 90th anniversary celebration.

Mrs. Mary Howard Gridley Braly founded the chapter on December 19, 1913. Mrs. Braly served as an organizing regent, and was later named Regent-For-Life by Chapter members. Mrs. Braly and her daughter first became members of the National Society of D.A.R. in 1983 in Highland Park, Illinois. Then recording Secretary General Miss Eugenia Washington, one of the D.A.R. founders, signed their applications.

The chapter is named for General Richard Gridley, ancestor of Mary's first husband James Conger Gridley. General Gridley was born in Boston in 1711. In 1745 he was commissioned Lieutenant Colonel of the Artillery in the expedition against the French fortress of Louisbourg of Cape Breton Island. At the outbreak of the Revolutionary War in April 1775, he was commissioned chief engineer and Colonel of Artillery and was wounded in the battle of Bunker Hill. He married Hannah Deming and had nine children. He served with General George Washington throughout the Revolutionary War. In 1798 General Gridley died in Staughton, Massachusetts at the age of 87.

Today the chapter is extremely involved in the community. It is active in veterans' services, ROTC programs, and scholarship programs with our local high schools. The chapter also presented the City of Glendale with the Department of Defense's 50th Anniversary of the Korean War flag. This flag currently flies over the Glendale War Memorial at City Hall.

I ask all Members of Congress to join me today in congratulating the General Gridley Chapter of the Daughters of the American Revolution on 90 exemplary years of service to the City of Glendale and surrounding communities.

A HERO LEAVES BEHIND A LASTING LEGACY—GOD'S LOVE: REMARKS ON BEHALF OF ROBERT HODGES

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. JONES of North Carolina. Mr. Speaker, last Monday was a sad day for Eastern North Carolinians and America as a whole. On November 10, 2003, North Carolina lost her oldest living Veteran, Robert Hodges. When Mr. Hodges passed away, he was 115.

I had the privilege of meeting Mr. Hodges at an event in his hometown just a few years ago. Even in the brief interaction I shared with this living legend, I was struck by his sharp mind and vitality. I can still remember Mr. Hodges singing ''Over There'' so beautifully . . . he was so lucid, his voice so clear, you would never have believed he was celebrating his 114th birthday.

Born June 18, 1888, Mr. Hodges was not only North Carolina's oldest living veteran, he was one of America's longest living war heroes as well.

Mr. Hodges had a phenomenal story. He was born in North Carolina's first official town, Bath. The grandson of slaves, Mr. Hodges shared a three-room house with his parents and 9 siblings.

He worked the fields in rural Eastern North Carolina until 1918. At the age of 20, Mr. Hodges enlisted in the Army and went on to serve in France during World War I.

After World War I, Hodges returned to North Carolina and married Malinda. The couple enjoyed 70 years together until her death at the age of 92.

Mr. Hodges and his wife raised 7 children on their farm in Pamlico County, where Mr. Hodges worked until his poor eyesight forced him into retirement. The Hodges family still calls the Pamlico area home, with his surviving children living in Stonewall and New Bern.

He was honored in 2002 with North Carolina's Order of the Longleaf Pine, the state's highest civilian order.

While Mr. Hodges most certainly leaves behind an amazing personal and military history, I must say that in my opinion, the most significant legacy this hero left behind is a pure and stalwart love of Jesus Christ. Last year Mr. Hodges was quoted as saying, ''What I figure on is anything you can do for the Lord is all right.''

Despite all his honors and all the attention he had showered on him through the years, Mr. Hodges always kept his heart in check. He knew that in the end, he would take nothing with him when he left this world.

More important than all the military medals and awards was the love of Jesus.

I believe wholeheartedly that the secret of Mr. Hodges long life was love of family and love of the Lord.

That is why I'm confident that when Mr. Hodges closed his eyes to this world, he opened them in Heaven. And that, Mr. Speaker, is a reward well earned by Mr. Hodges' life lived by faith. From battlefield to his front

porch, Mr. Hodges did it all for the glory of the Lord.

I stand today in remembrance of this military hero and godly man. May God bless his soul, and the family he left behind.

SIERRA NATIONAL FOREST LAND EXCHANGE ACT OF 2003

SPEECH OF

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. RADANOVICH. Mr. Speaker, I am pleased the House is considering H.R. 1651–The Sierra National Forest Land Exchange Act of 2003 on suspension today. I thank my colleagues, Mr. NUNES and Mr. DOOLEY, in addition to Resources Committee Chairman POMBO, for their support and assistance on this measure.

H.R. 1651 completes a land exchange between the Forest Service and a constituent of mine, Mr. Bob Glassman. Under the exchange, the Forest Service will obtain an 80 acre parcel within the Sierra National Forest from my constituent, who will in turn receive a 160 acre parcel located on Shaver Lake and also within the Sierra National Forest.

Upon completion of the land exchange with the Forest Service, my bill states that my constituent will convey the newly acquired 160 parcel on Shaver Lake to the Sequoia Council of the Boy Scouts. The Boy Scouts have operated a recreational camp on a portion of this land for over five decades. Thousands of Scouts use the camp each year to experience outdoor activities and gain leadership skills. Owning the property will allow the Sequoia Council of the Boy Scouts to make improvements to the facilities located on the land. This bill, therefore, allows the Scouts to provide continued opportunities for young men to learn the importance of and actively participate in serving their community.

Given that there is a hydroelectric facility at Shaver Lake, I have worked with the operator of that facility, Southern California Edison, to ensure it can maintain and operate its hydro project once the land exchange is completed. As a strong supporter of hydroelectric power, I am pleased to say that under my legislation—this hydro facility can continue to operate unencumbered.

Mr. Speaker, H.R. 1651 is a non-controversial piece of legislation that will benefit the lives of Boy Scouts for years to come. As such, I encourage my colleagues to support its passage.

CONFERENCE REPORT ON H.R. 2754, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT 2004

SPEECH OF

HON. MAURICE D. HINCHEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. HINCHEY. Mr. Speaker, I want to commend the Chairman of the Energy and Water Subcommittee, Mr. Hobson and the ranking member, Mr. Visclosky for their good work on this bill. This conference report deserves the overwhelming support it is about to receive.

I do want to bring attention to one provision in this bill that has not received the scrutiny it deserves. Section 115 is an affront to our nation's environmental laws. It was not included in either the House or Senate bills and was added in conference. The provision waives all environmental laws and directs the construction of a road from the village of King Cove, Alaska through the sensitive Izembek National Wildlife Refuge and right to the boundary of the fragile and internationally significant Izembek Wilderness Area.

Specifically, Section 115 directs the Corps of Engineers to build a road proposed in one Alternative from a draft Environmental Impact Statement prepared to evaluate several modes of transportation between the villages of King Cove and Cold Bay, Alaska. The Environmental Protection Agency has raised significant concerns with the alternative mandated by Section 115. The Corps of Engineers is still reviewing public comment on the draft EIS.

The King Cove Access Project first surfaced as legislation in 1998. Proponents attempted to add the provision to an appropriations bill that year but were not successful. A compromise was reached later that year with the King Cove Health and Safety Act which was included as Section 353 of Public Law 105–277, the Department of Transportation and Related Agencies Appropriations Act. The measure appropriated $40 million to address the access needs of the communities of King Cove and Cold Bay; however, the Act did not approve a road through the Izembek refuge or the Izembek Wilderness. In fact, the legislation specifically required that expenditure of the funds allocated in the bill "must be in accordance with all other applicable laws."

Five years after a satisfactory compromise was agreed upon, this rider inappropriately short-circuits the public process. An administrative decision on a project to enhance marine-road access for the community of King Cove is proceeding in a timely manner and does not require intervention by Congress. However, the King Cove Access Project mandates one alternative in the EIS, thereby effectively ignoring the advice of the U.S. Fish & Wildlife Service, other federal agencies and the American public.

Section 115 is an affront not only to public process, but also to our nation's environmental laws. Unlike the King Cove Health & Safety Act, which is subject to national environmental laws, the King Cove Access Project is "notwithstanding any other provision of law." It is inappropriate to exempt the Izembek refuge from federal environmental laws in this manner.

The Izembek National Wildlife Refuge, on the Alaska Peninsula, is internationally recognized as one of the most important wetland reserves in the Northern Hemisphere. Home to threatened and endangered species, as well as millions of migratory birds, the Izembek National Wildlife Refuge and Izembek Wilderness are keys in the fight to conserve the natural diversity of wildlife populations and habitats. A road through the refuge will inevitable damage the refuge's critically important habitat.

The King Cove Access Project ignores environmental laws, threatens important wildlife habitat and sets a dangerous anti-wilderness precedent. The 17-mile road proposal is not compatible with the purposes of the refuge, as established by ANILCA, or with the Wilderness Act. The King Cove Access Project rider is terrible policy and terrible process.

FAIRNESS TO CONTACT LENS CONSUMERS ACT

SPEECH OF

HON. F. JAMES SENSENBRENNER, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 19, 2003

Mr. SENSENBRENNER. Mr. Speaker, I rise today in support of H.R. 3140, "The Fairness to Contact Lens Consumers Act of 2003," which provides contact lens wearers with important new rights. This bill ensures that unscrupulous eye doctors will no longer be able hold consumers' contact lens prescriptions hostage, forcing them to purchase lenses solely from their doctor's office. In addition, this legislation will make shopping for lenses simpler and cheaper.

Currently, eye doctors are only required to give patients their prescriptions for eyeglasses. Eyeglass wearers have had this right since 1978, when the Federal Trade Commission issued a regulation granting eyeglass wearers the right to automatically receive a copy of their prescription following an exam. Contact lenses were understandably not included in this regulation because, at the time, most contacts were hard lenses, which were custom-made to fit each patient. Today, most contact lenses are mass produced, soft lenses that do not require manipulation by eye doctors. As a result of this improvement, today's contact lens wearers should have the same right as eyeglass wearers to obtain their prescription, at no additional charge. That is why I am proud to be an original cosponsor of the Fairness to Contact Lens Consumers Act.

Approximately 36 million Americans wear contact lenses. Each year, these Americans spend an estimated $3.5 billion on contact lenses. Providing consumers with an automatic right to their prescriptions will allow them to shop around for contact lenses based on price, service, and convenience. It is estimated that H.R. 3140 could save consumers approximately $350 million annually, thanks in large part to increased competition. Competition among contact lens companies will result in lower prices, a greater choice of lens providers, and more convenient ways to fill contact lens prescriptions.

H.R. 3140 is bipartisan legislation supported by both optometrists and retailers. I have been working on this issue for a number of years, and am pleased to "see" it pass the House in a bipartisan manner. I encourage the Senate to take up this bill and help contact lens wearers receive this right.

HONORING MR. SARGENT SHRIVER

SPEECH OF

HON. PATRICK J. KENNEDY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, November 17, 2003

Mr. KENNEDY of Rhode Island. Mr. Speaker, I am proud to join my colleagues in support of H. Con. Res. 299, a resolution honoring Mr. Sargent Shriver for his dedication and service to the United States of America, for his service in the United States Navy, and for his lifetime of work as an ambassador for the poor and powerless citizens of the United States of America. Growing up with a role model like my uncle, Sargent Shriver, doesn't allow much room for failure. He has served our nation in countless ways and on multiple fronts. When he retired from the Navy as a Lieutenant Commander, he could have ended his public service career then, and been proud of his accomplishments. But he chose to continue to serve our nation when President Kennedy appointed him the first Director of the Peace Corps. Sargent Shriver exceeded expectations for the initiative by developing volunteer programs in more than 50 countries around the world.

Sargent Shriver and his wife, Eunice Kennedy Shriver, went on to establish the Special Olympics during the 1960's, when those with mental retardation were often institutionalized because of a lack of understanding of their needs and abilities. The Shrivers recognized the importance of challenging these individuals with physical activities, when others simply cast them aside. The Special Olympics brought courage to their lives and taught them the value of teamwork, and proved that people with mental retardation were strong and caring individuals who could be successful and independent. The Special Olympics has grown exponentially under the Shrivers direction. When given the position of president of the Board of Directors of the Special Olympics, Sargent Shriver, again, reached out to other nations to bring together people of all nationalities to compete in the games. In 1985, athletes from 14 countries were represented at the Special Olympics Winter Games in Utah, and today, more than 1 million athletes participate in the Special Olympics in over 150 countries.

I hesitate to end my remarks with this short list of what Sargent Shriver has accomplished in his life. Unfortunately, I am not sure if there is anyway to accurately reflect the number of lives he has touched as our nation's ambassador, through Head Start and the Special Olympics, to name a few. But I am sure that even at the age of 88, he will continue to add accomplishments to this list of public service, and he will continue to touch the lives of people around the world.

OXYCONTIN CONTINUES TO DESTROY LIVES

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. WOLF. Mr. Speaker, over the past year I have been writing to Health and Human Services Secretary Tommy Thompson and Food and Drug Commissioner Mark McClellan urging their action to curb the continuing abuse of the powerful prescription painkiller, OxyContin. In many of those letters I have enclosed newspaper articles about another life destroyed by this drug.

Their inaction is perplexing. The death toll continues to rise and thousands of lives continue to be ruined because of the abuse of this drug. When will they do something to stop this tragedy?

I want to submit the letters I have been sending to Secretary Thompson and Commissioner McClellan over the past six months.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON APPROPRIATIONS,
Washington, DC, March 28, 2003.

Hon. TOMMY THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave, SW., Washington, DC.

DEAR SECRETARY THOMPSON: In December 2001, the Commerce-Justice-State and the Judiciary appropriations subcommittee held a hearing on the illegal diversion of the prescription drug OxyContin, a pain-killing Schedule II narcotic manufactured by Purdue Pharma L.P. One of the witnesses, the father of recovering OxyContin addict, told a gripping story of the devastating impact the drug has had on his family and his son, who was in his early 20s. He proudly told the committee how his son had just finished rehab and had kicked his addiction. Sadly, a few months after appearing before the subcommittee, the son died as a result of abusing the drug.

When used properly, OxyContin is considered a wonder drug, especially for the terminally ill cancer patients. I know what it is like to see people suffer from cancer. Both my mother and father died of cancer. I can remember my mother constantly asking the nurses for more morphine but being told she couldn't have any more. My mother was in a great deal of pain. OxyContin, if it had been available when she was dying, probably would have made her a lot more comfortable at the end.

When used illegally, however, OxyContin destroys families and communities. It also can lead to death. This powerful painkiller has increasingly become a drug of choice for people who choose to abuse it by chewing it or grinding it up. By disabling the time release mechanism in OxyContin, abusers get a heroin-like high.

Initially, cases of abuse and illegal diversion occurred primarily in poor, rural communities in Virginia, Kentucky, West Virginia and Ohio. Abuse is no longer limited to Appalachia. The drug has found its way to urban areas and there are now reports of widespread abuse as far away as Arizona. Florida, I am told, has been hit extremely hard.

Several pharmacies in my congressional District have been robbed at gun point in recent months for OxyContin. No money was taken; the robbers only demanded the drug. Earlier this month, a prominent defense lawyer in northern Virginia who twice served as a local prosecutor in Prince William County pleaded guilty to Federal drug charges linked to a large-scale investigation into the illegal distribution of OxyContin and other painkillers.

Communities where the illegal drug has taken hold are being completely destroyed. I am told there is one county in southwest Virginia where no one isn't either using the drug, knows someone using the drug or been the victim of a crime by someone needing the drug.

When a professional baseball player recently died after taking the dietary supplement ephedra, your agency immediately issued fact sheets regarding potential serious risks of dietary supplements containing ephedra. You were even quoted as cautioning all Americans about using dietary supplements that contain ephedra.

According to fact sheets produced by the FDA, two deaths, four heart attacks nine strokes and five psychiatric cases involving ephedra have been reported. More than 240 people have died from the abuse of OxyContin and countless numbers of families and communities have been torn apart by this drug.

Your agency has done a good job educating the public about the dangers of ephedra and other dietary supplements. I urge you to initiate a similar public information campaign about the dangers of abusing OxyContin.

I have previously written to your department asking for a review of the marketing of OxyContin and its classification for treatment of moderate to severe pain. The Food and Drug Administration did change the warning label on OxyContin but more needs to be done. The drug should not be marketed to treat moderate pain. I urge you to no longer allow OxyContin to be prescribed for moderate pain.

Too many people have died, too many families have suffered and too many communities have been devastated by the improper use of this drug.

Sincerely,

FRANK R. WOLF,
Chairman, Subcommittee on Commerce-Justice-State and the Judiciary.

HOUSE OF REPRESENTATIVES,
Washington, DC, April 7, 2003.

Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: I want to share two newspaper articles about OxyContin that I came across since our meeting Thursday. One is from a paper in my District; the other is from a paper in Florida. Both are very troubling.

I trust you will give this issue the attention it deserves.

Sincerely,

FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, April 11, 2003.

Hon. TOMMY G. THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave., SW., Washington, DC.

DEAR SECRETARY THOMPSON:

As a follow up to my March 28 letter on OxyContin, I want to share with two recent newspaper articles that I recently came across. One is from a paper in my District; the other is from a paper in Florida. Both are extremely troubling.

OxyContin, when used properly, is a wonder drug. When abused, it is destroying families and communities.

Please look at this issue.

Sincerely,

FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, May 16, 2003.
Hon. TOMMY G. THOMPSON
Secretary, Department of Health and Human Services, Independence Ave., SW., Washington, DC.

DEAR MR. THOMPSON: Here's another news article from my District and another death.

I am waiting to hear what you are going to do.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, April 29, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: I want to share with you two news articles I recently came across concerning the marketing of OxyContin. The articles stem from the investigation undertaken in 2001 by the Florida Attorney General. Several sensitive company documents were initially sealed but two Florida papers have successfully sued to make the information public. I have highlighted some extremely troubling sections in the articles.

Please take action.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC., April 30, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: I wanted to be sure you saw this letter by Pennsylvania State Senator LISA BOSCOLA. This is tragic.

The FDA needs to address this issue.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC., May 13, 2003.
Hon. TOMMY G. THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave., SW., Washington, DC.

DEAR MR. THOMPSON: The attached article ran in a newspaper in my District on Monday. Please step in and do something to prevent OxyContin from being allowed to be prescribed for moderate pain. The drug is destroying communities, families and careers.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC., May 13, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: The attached article ran in a newspaper in my District on Monday.

The FDA needs to step in and do something OxyContin should not be allowed to be prescribed for moderate pain. Too many families, communities and careers are being destroyed.

Please take some action.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC., May 21, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: Enclosed is another news story from my District and another death.

I am waiting to hear what FDA is going to do.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, June 5, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: The enclosed article is from today's Washington Post. When are you going to take some action? Please do something.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, June 25, 2003.
Hon. TOMMY G. THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave., SW., Washington, DC.

DEAR MR. THOMPSON: See the enclosed article from today's Post.

You have to do something before things get worse.

When a professional baseball player died after taking the dietary supplement ephedra, your agency took immediate action to warn the public about the dangers of taking such supplements. Sadly, the same cannot be said when it comes to your agency's efforts on OxyContin.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, June 25, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: The enclosed article from today's Post speaks for itself.

Please take some action. What are you waiting for.

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, July 10, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: The enclosed brief was in today's Post. You have to do something. What more evidence do you need that there is a problem?

Sincerely,
FRANK R. WOLF,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, July 10, 2003.
Hon. TOMMY G. THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave. SW., Washington, DC.

DEAR MR. THOMPSON: I wanted you to see this brief in today's Post. As you can see the OxyContin problem has no boundaries.

Thank you for your response to my earlier letters. I hope we can come up with some solutions.

Best wishes.

Sincerely,
FRANK R. WOLF.
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 28, 2003.
Hon. TOMMY G. THOMPSON,
Secretary, Department of Health and Human Services, Independence Ave. SW., Washington, DC.

DEAR MR. THOMPSON: The enclosed article describes another tragic account of OxyContin abuse.

How many more stories do we have to read about this problem before you take more action?

Sincerely,
FRANK R. WOLF.
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 28, 2003.
Dr. MARK MCCLELLAN,
Commissioner, Food and Drug Administration, Fishers Ln., Rockville, MD.

DEAR DR. MCCLELLAN: The enclosed article describes another tragic account of OxyContin abuse.

How many more stories do we have to read about this problem before action is taken?

Sincerely,
FRANK R. WOLF.
Member of Congress.

HONORING THE CIVIC LEADERSHIP OF ROBERT SIDNEY AND GAIL PHELAN

HON. JOHN S. TANNER
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. TANNER. Mr. Speaker, today I rise in honor of Robert Sidney and Gail Phelan, fine public servants who have dedicated themselves throughout their lives as loyal citizens to our community.

The couple married in 1958, months after Gail had been crowned Miss Trenton. They are members of the 1st United Methodist Church of Trenton and the proud parents of Robert Sidney Phelan, Jr., Paul Edmund Phelan, and Mary LeAnn Phelan. Robert and Gail also have three grandchildren and two step-grandchildren.

Robert operated the family business, a Ford automobile dealership, for 50 years, before selling it. He has since started a smaller independent dealership. In 1963, Robert became the acting Postmaster while continuing to run his auto dealership. He also served in the Tennessee National Guard, from which he retired as a First Lieutenant. With the help of U.S. Senator Jim Sasser, Robert was instrumental in establishing a new National Guard Armory in 1991.

He has served as Exalted Ruler of the Trenton Elks Lodge and President of the Trenton Chamber of Commerce. Robert also served on the Trenton Rotary Club, the Gibson County Election Commission, the Trenton Housing Authority Board and the Trenton Industrial Board. He served on the board of Citizen

State Bank, spending some of that tenure as Chairman. Robert worked diligently to form Citizen City and County Bank, where he now serves as Chairman of the Board.

The Phelans have always been devoted to the Democratic Party on local, state and national levels, including involvement with generations of Tennessee governors, Members of Congress and Vice President Al Gore. Their son Paul served for 10 years as a State Representative.

The family was instrumental in the formation of the Trenton Special School District and years later helped replace the aging school building with a new high school. Believing that Gibson County could support a satellite community college, Robert and Gail also helped raise money to fund Dyersburg State Community College in Trenton.

Gail has dedicated much of her life to the education of her children and others in our community. She has always been very involved in school parent organizations and takes an active role in making our schools better, including beautiful murals in school hallways.

Gail has not limited her helpful involvement to working with children, however. A cancer survivor, she has been an active participant in Relay for Life efforts of the American Cancer Society and has helped counsel others who are also battling cancer, using her own experiences to help comfort those around her.

Mr. Speaker, please join Robert and Gail's friends and family as we recognize their dedication and service to our community.

IN HONOR OF MAYOR DAVID PENDERGRASS OF SAND CITY, CALIFORNIA

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. FARR. Mr. Speaker, it is with great honor and pleasure that I am able to rise today to recognize Mayor David Pendergrass, a dedicated public servant of Sand City, California. Mayor Pendergrass has served Sand City for 25 years, where throughout his tenure as a Mayor-Councilmember, Mayor Pendergrass has distinguished himself as a strong leader.

Under Mayor Pendergrass' leadership, the City of Sand City has been enhanced in many different ways. He has overseen the establishment of an active redevelopment program and agency, the organization of a modern city government with a City Administrator-Council administrative structure, and maintained an ongoing forum to receive and respond to citizens' concerns. Furthermore, Mayor Pendergrass has been able to keep Sand City's focus on its primary goals with diplomacy, patience, and consideration.

Mayor Pendergrass' committed public service has improved the quality of life at Sand City, California. He has made great contributions, and his lifelong dedication to public service is commendable. His achievements are truly honorable, and I along with the City of Sand City, honor this great man.

WRITING BY VICKI WILSON

HON. ZOE LOFGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. LOFGREN. Mr. Speaker, I am honored to share with my colleagues this editorial written by my courageous friend Vicki Wilson. In it she describes her very personal story about her pregnancy and a procedure that was required to save her life. As Vicki rightly points out, the ban on so-called "partial birth abortion" prevents women—along with their families and doctors—from making private decisions about saving their own lives and protecting their right to future pregnancies.

A short while ago, the House debated the so-called "Partial Birth Abortion" ban. Several members who supported the ban tried to deny Vick's story.

Those Members didn't know what they were talking about. Here is the truth as printed in the San Jose Mercury News.

[From the San Jose Mercury News]

HEARTBREAK AND A CHOICE: I HAD AN ABORTION AT EIGHT MONTHS

(By Vicki Wilson)

The right to end a pregnancy is frighteningly precarious, something I didn't understand until I had an abortion at eight months. The new abortion ban covers what is not actually a recognized medical procedure; ''partial birth'' was coined by the anti-choice lobby to rile public sensibilities and distort the truth.

At 36 weeks of pregnancy, an ultra-sound showed what all my previous prenatal testing failed to detect—an encephalocoele. Two-thirds of my daughter's brain had formed outside her skull. What felt to be strong, big, healthy baby movements were in fact seizures.

My doctor sent me to several specialists in a desperate attempt to find a way to save her. Everyone agreed she would not survive outside my body. As the pregnancy progressed before I went into labor, she would probably die from the increased compression of her brain.

Our doctors explained our options. Let ''nature take its course.'' But how could I let my daughter suffer the ongoing seizures? Second: Abortion. My God! I thought. Here I am at the end of a planned and very much wanted pregnancy: Her name is Abigail. How can one even utter the word ''abortion'' now? Despite being a nurse, I'd never heard of any abortion in the eighth month. I asked about a Caesarean section. Doctors perform C-sections only to save babies lives. Mine couldn't be saved so they didn't want to risk the possibility of hurting my future fertility. It was a risk I wasn't willing to take either.

We agonized over our options, which doesn't convey the heartbreak and rage we felt. It was hard even to think of these ''choices.'' I wanted my daughter to be born with a brain—period. We decided to make our choice based on what was best for Abigail.

As health-care professionals, my husband and I understood the medical risks of each alternative. We understood that it wasn't ''is she going to die''—a higher power had decided that—but ''how?'' To this day, I thank God that this decision, at least, was ours.

I continue to battle the anti-choice hardliner machine from banning the very procedure that saved my health and ended Abigail's suffering. When will politicians understand: The decision about terminating a pregnancy should be between women, their family and their doctors—not politicians. While I was struggling with the most wrenching choice I have ever made, it never occurred to me to confer with a lawyer or a judge or a politician.

Those opposed to abortion for any reason declare that women are selfishly choosing to end their pregnancies late. They deny medical necessity; they'd rather see Abigail suffer and me lose my fertility than allow us to choose the most decent path for our family.

They state that Americans are opposed to their politically motivated ''partial birth'' abortions. They don't acknowledge that Americans believe the choice should remain with my family.

Almost nine years have passed since we lost Abigail, and not a day passes that I don't think of her. In my heart I know I did the right thing for me and my family.

EXPLANATION OF VOTE ON CONFERENCE REPORT ON FY 2004 DEFENSE AUTHORIZATION BILL

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, the final version of this legislation continues our shared bipartisan commitment to boost the income for all of our military personnel with a 4.15-percent average increase in base pay. This is an important testament to the brave men and women who risk their lives to defend America's freedom.

In addition, this conference report extends several special pay provisions and bonuses for active duty personnel through December 31, 2004. It reduces the average amount of housing expenses paid by service members from 7.5 percent to 3.5 percent in FY 2004 and eliminates the out-of-pocket expense completely by FY 2005. It increases the family separation allowance for service members with dependents, worldwide, from $100 per month to $250 per month for the period beginning October 1, 2003 and ending December 31, 2004. Finally, it increases the rate of special pay for those subject to hostile fire and imminent danger, worldwide from $150 per month to $225 per month for the period beginning October 1, 2003 to December 31, 2004.

While I am not satisfied with the provisions in this conference report regarding concurrent receipt for military retirees, it does provide some, overdue redress for this out-of-date policy.

But on balance, I am opposing this final conference report because I fundamentally disagree with key aspects of its policy presumptions and prescriptions. On balance, it will make America less safe in an increasingly unstable world.

First and most importantly, the growing reliance upon nuclear weapons that this legislation encourages makes our nation and the world less safe, not more so. Accordingly, I strongly disagree with the funding in this bill to continue work on high yield, burrowing nuclear "bunker-busters" that target underground military facilities or arsenals. I am equally opposed to the language in this bill that lifts the

ban on research leading to low yield "mini-nuclear weapons" of 5 kilotons or less.

Last April, I sent a letter to President Bush that was co-signed by 34 of my colleagues to convey our grave concern that he is weakening long-standing U.S. policy governing the use of nuclear as opposed to conventional weapons. I regret that we have never received a substantive reply from the President. That congressional action coupled with the examples I've cited and other provisions in this conference report further undermine the U.S. nonproliferation efforts of Republican and Democratic Presidents alike and heighten growing international fear that Bush Administration's policies are fueling a new nuclear arms race.

Second, I am opposed to the blanket exemptions from our nation's environmental protection laws for the Pentagon in this bill. There is no convincing evidence that environmental laws like the Clean Air Act and the Endangered Species Act hinder our military's capacity to defend our nation.

But you don't have to take my word for it. Former EPA Administrator, Christine Whitman, testified to the Congress that she does not "believe that there is a training mission anywhere in the country that is being held up or not taking place because of environmental protection." Furthermore, the U.S. General Accounting Office (GAO) has reported to the Congress that the Pentagon has failed to produce any evidence that environmental laws have significantly affected our military readiness.

I do not think the Pentagon or any other federal agency should be above the law. Moreover, current law already allows case-by-case environmental exemptions for the Pentagon, when they are determined to be in the national interest.

Finally, this conference report also contains provisions that will be very harmful to hundreds of thousands of dedicated civilian men and women who make our Defense Department work.

Last year saw the largest government reorganization in more than 3 decades with the creation of the U.S. Department of Homeland Security, affecting 170,000 federal employees. Following extensive congressional debate, Secretary Ridge was granted authority to establish a more flexible that attempted to protect basic worker rights.

But this legislation will give Defense Secretary Rumsfeld broad authority to rollback worker protections for hundreds of thousands of Pentagon employees. There will be nothing to prevent agency managers from abusing their power for political advancement or engaging in discriminatory practices. Allowing managers the ability to waive such protections under the guise of national security and the need for greater flexibility is wrong. It will not make us safer.

Thanks to this legislation, Secretary Rumsfeld will be able to do away with the current personnel system in the Pentagon. I am unwilling to give the Bush Administration a blank check to undo, in whole or in part, many of the civil service laws and protections that have been in place for nearly a century to safeguard against the return of an unfair patronage system.

I want to be very clear. I support a strong national defense. I support modernizing our military. I support giving our troops the resources and training they need to keep our nation secure. But I cannot support this conference report which contains provisions that will take our military backwards, rather than forwards. I cannot support legislation that will re-ignite a global nuclear arms race, even as our troops in Iraq and elsewhere risk their lives every day to stop the spread of nuclear weapons. I cannot support legislation that takes away the rights of hundreds of thousands of hard-working Pentagon employees Finally, I cannot support legislation that disingenuously claims that stripping away important environmental protections here at home will somehow bolster our national security.

IN MEMORY OF KESH

HON. JIM McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. MCDERMOTT. Mr. Speaker, his full name was Nayaran Dilip Keshavan Ayyangar, but everyone simply knew him as Kesh. Kesh was a journalist, a Hill staffer, a community activist and a friend to anyone who cared passionately about the political, economic and cultural relationship between his adopted country, the United States, and his native country, India.

Last Thursday, November 13th, Kesh was doing what he had done for the past 2 decades. He was advocating that India's interests were in confluence with the United States'. He had just finished taping an appearance on Lou Dobbs's Moneyline on CNN. Ten minutes after leaving the studio, Kesh was dead of a massive heart attack at the young age of 53.

Mr. Speaker, as a former Chairman of the Congressional Caucus on India and Indian Americans, I know first hand the gravity of the loss both countries have suffered. Not only was Kesh's knowledge of U.S. India relations comprehensive, the breadth and depth of his contacts, here in Washington and back in Delhi, was truly amazing.

A review of Kesh's career will give our colleagues an idea of why Kesh was such a critical player in the U.S India dialogue. For the past 2 years Kesh served as President of the New York City Chapter of the Indian American Forum for Political Education. Prior to that he was the Executive Director of the India Caucus here in this body. And for more than 15 years before coming to Capitol Hill, Kesh was a distinguished journalist, serving as Editor in Chief of the India Post, as the Washington Bureau Chief of the Indian American, as a reporter for the Washington Times and as the Chief Diplomatic Correspondent for the New York City Tribune. Kesh was educated here in the U.S. at the School of Journalism at Syracuse University and also in India at Osmanis University in Hyderabad, where he obtained a journalism degree, and at Andhra University, where he was awarded a degree in pharmacy.

Mr. Speaker, I am certain all members of this body join me in expressing our condolences to his father, a former head of the Indian Geological Survey, his sister, and his many friends, both here in the United States and back in India. We have all lost a devoted public advocate. Kesh's loss will be felt for many years.

HONORING SARGENT SHRIVER

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. FARR. Mr. Speaker, I rise today to honor the dedication, spirit, and accomplishments of my good friend Sargent Shriver who celebrated his 88th birthday last week. I met Sarge while I was in Peace Corps Training in Questa, New Mexico in 1963. He was a hero figure: handsome, smart, engaging, and the President's brother-in-law. We were all so proud of being chosen to be in one of the early waves of the Peace Corps. President John F. Kennedy asked our nation's citizens to "ask not what this country could do for you, but what you can do for your country." Sargent Shriver was a living demonstration of the way to serve and the spirit it took to launch the new and bold idea of the Peace Corps.

Peace Corps began under Sargent Shriver's directorship on March 1, 1961. Today, over 170,000 Americans, including six members of Congress, have served in 136 countries. Many volunteers who served under Sargent Shriver have become Ambassadors, Presidents of Universities, and Chairmen of major corporations.

Sargent Shriver began his public service in the United States Navy where he earned the rank of Lieutenant Commander. Following his naval career, Sargent Shriver dedicated himself to the societal problems facing the youth of the country—organizing the National Conference on Prevention and Control of Juvenile Delinquency in Washington and serving as the President of the Chicago Board of Education. He continued to foster quality social programming through the creation of VISTA, Head Start, Community Action, Foster Grandparents, Job Corps, Legal Services, Indian and Migrant Opportunities and Neighborhood Health Services. In addition, Sargent Shriver has served on the Board of many humanitarian organizations, including as President of the Special Olympics

Sargent Shriver's dedication to living his ideals, and making them a reality has inspired subsequent generations to do the same. His invaluable contributions to the formation and longevity of the Peace Corps has brought hope to people around the world and has educated generations of Returned Peace Corps Volunteers, such as myself, in the necessity and value of public service. The Peace Corps continues to be a means for understanding the cultures, and languages of the world while recognizing the differences between different countries.

The vision of peace that Director Shriver has committed so much time and energy to has only become more important during this time of war. Director Shriver once wisely said, "I say what our nation needs now is a call to peace and service—peace and service on a scale we have scarcely begun to imagine." Mr. Speaker, today I honor Sargent Shriver

and wish him the very best in the coming year.

RECOGNIZING THE CONTRIBUTIONS OF BOB SINCLAIR TO SAVING LIVES IN TENNESSEE

HON. JOHN S. TANNER
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. TANNER. Mr. Speaker, I rise today to recognize the accomplishments of a tireless public servant, Mr. Bob Sinclair. The service he has provided over the years through the Henry County Ambulance Service has touched—and saved—many lives in our community.

Mr. Sinclair is a decorated veteran of World War II and a former employee of the Tennessee Valley Authority, but it is his dedicated work for the Henry County Ambulance Service that makes him stand out among the rest.

He started his service on January 1, 1969, the first day of operation for the ambulance service, which was one of the first countywide ambulance services in Tennessee to also offer an emergency medical technician training program. Sinclair volunteered for rotating shifts so his workers could get the training they needed to become paramedics. The service was originally based in the Paris Fire Department, and hearses purchased from the Ridgeway Morticians were used as ambulances.

Mr. Sinclair remained diligent, however, and helped the ambulance service grow, becoming director in 1970 and remaining there until 1985, when the service was assigned to the Henry County Medical Center. Mr. Sinclair is now a member the HCMC Board of Trustees and has also been a longtime member of the Henry County Commission.

Mr. Sinclair continued to give his time and devotion to the Henry County Ambulance Service and overcame many obstacles, such as funding and vehicle replacement issues. He helped make the ambulance service what it is today.

Time and time again, Mr. Sinclair has given his time and dedication to his community, and this will continue to be appreciated. Mr. Speaker, please join me in honoring the accomplishments and dedication of a fine leader, Mr. Bob Sinclair.

PERSONAL EXPLANATION

HON. LUIS V. GUTIERREZ
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Mr. GUTIERREZ. Mr. Speaker, I was unavoidably absent from this chamber on September 3, 2003. I would like the record to show that, had I been present, I would have voted "yea" on rollcall votes 460, 461 and 462. On September 4, 2003, I missed rollcall vote 467 and would like the record to show that, had I been present, I would have voted "nay."

INTRODUCTION OF THE "METROPOLITAN CONGESTION RELIEF ACT"

HON. EDDIE BERNICE JOHNSON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, November 21, 2003

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I am pleased to introduce legislation that strengthens our commitments to the public and their local decision-makers in both urbanized and rural areas of this nation.

The "Metropolitan Congestion Relief Act" proposes a number of simple adjustments to the TEA–21 law, which as you know is now under discussion in the House Transportation Infrastructure Committee. Two days ago, the leaders of the Committee introduced legislation setting forth a six-year reauthorization plan for TEA–21, legislation that I am proud to cosponsor.

My legislation compliments the Committee legislation and proposes key adjustments to current congestion-related programs. This legislation would ensure that our national policy more fully engages and supports local elected leaders and the communities they represent. We need to engage the public and local decision-makers to address the nation's many transportation challenges.

The proposals in this legislation include two initiatives that follow the basic thrust of the Committee's TEA–21 renewal package.

First, this legislation invests more in our local decision-makers, those who now lead our nation's very important metropolitan economies and those in non-urbanized areas. Secondly, it further strengthens the partnership set forth in the 1991 ISTEA law that began devolving resources and decision-making to the nation's larger metropolitan areas. Finally, this legislation continues to place more responsibility where it belongs, with local community leaders and metropolitan planning organizations. These are the entities most challenged by pressing transportation needs, be it traffic congestion, air quality degradation or the rising demands of global competition.

These selected reforms and adjustments will yield results for all areas of our states. In those provisions targeted to metropolitan areas, all taxpayers and areas will benefit as these additional commitments will improve the performance of our existing assets and help us use available transportation dollars more efficiently.

Mr. Speaker, let me talk for a minute about the key features of this legislation and what it does and does not do.

First, it does not affect the allocation of resources from any of TEA–21's formula highway programs to the states, which is to say that it is policy neutral on the donor/donee issue. For the record, I am one member who has an interest in seeing more equity among the states, and this legislation does not disrupt any of these important efforts.

Second, the law this legislation amends is the Transportation Equity Act for the 21st Century. As we make progress on equity among the states, we should also make some greater strides in providing some modest assurances of equity to local areas and local taxpayers within our states. Here in this chamber and in the Transportation Committee we talk often about "fair share" among the states, and yet there is nothing in current law that addresses how equity is assured at the sub-state level.

Let me illustrate this point further from the perspective of my district and the Dallas-Fort Worth region. As each new fiscal year arrived under TEA–21, local decision-makers in my region were certain that they would determine the fate of about 2½ cents of every highway formula dollar coming to the State of Texas. This is an inadequate commitment to a region that accounts for nearly one out of every five Texans and, in recent years, more than one out of every three new jobs in the State. By the donor/donee yardstick, this amounts to my local decision-makers having the certainty and direct control over about 10–12 cents on every federal highway dollar that is generated from local taxpayers and returned to the state. This is simply inequitable and can no longer be justified.

My legislation proposes to deliver more certainty to all areas of the state, both large and small, helping make some modest gains in ensuring more funding equity for the public in their local areas.

The legislation directs that Surface Transportation Funds provided to each of the states, either through the STP or indirectly through the unprogrammed share of the Minimum Guarantee program, be directed to local areas, following existing law using the fair share distribution to urbanized and non-urbanized areas. All areas within the states will have more funding certainty as a result.

Third, the Metropolitan Congestion Relief Act enhances our federal surface transportation policies by enlisting local decision-makers and their substantial transportation assets under their control more fully into the TEA–21 partnership.

In addition to directing more STP and Minimum Guarantee resources to metropolitan planning organizations and other local areas under ongoing state-directed programs, the legislation specifically directs states to work more directly with local decision-makers, particularly in the larger urban areas, in deciding on investments in the National Highway System. This is a critical asset for all of us and one where local governments either own a share of these facilities or where locally-owned facilities are substantially affected by NHS facility investments.

Let me provide some additional background on this and related points. One of the weaknesses of the current Federal policy is that it relies too heavily on overburdened State transportation agencies. Overall, States own the smallest share of the Nation's transportation facilities relative to local governments and yet are given direct control over an overwhelming share of Federal transportation dollars. On average, for each highway dollar that a State receives, only six percent is guaranteed to reach local decision-makers, those in metropolitan areas of 200,000 or more where more than one out of every two Americans live.

Let me explain further. Presently, local governments—cities, towns and counties—directly or indirectly through regional agencies own and/or operate more than three-quarters of the

Nation's roads and streets, about one-half of the Nation's bridges, more than ninety percent of all transit systems and about the same share of the Nation's airports, most of the train stations, port facilities, traffic signals, public parking structures, sidewalks and trails, and so on. Let us not forget that 63 percent of urban area highways in the Federal Aid System, which includes those facilities generally eligible under Federal TEA–21 programs, are owned by local governments. Yet, existing policy directs virtually all of the resources to State highway and transportation departments.

In aviation, Congress rightly directs resources to the agencies, be it the State, region or local government who own and operate airports. In transit, Congress rightly directs resources to the level of government who delivers these services. In flood control, the State, region, or local agency responsible for the improvements receives the funding. And so on.

As this Congress seeks to address the burdens of congestion the need for smarter and more balanced transportation investments to give taxpayers more for their dollars, we must recognize that we have reached the point where it is impossible to achieve these outcomes without more fully involving our local transportation partners. This means bringing local elected officials—mayors, city council members, county executives and commissions, and others—more fully into this partnership. This legislation makes some modest adjustments and empowers these critical officials in the transportation partnership.

Finally, this legislation specifically addresses the needs of local areas with the most air quality and congestion problems. It does so by directing States to allocate Congestion Mitigation and Air Quality Improvement program (CMAQ funds to local areas that are in nonattainment or maintenance of applicable national ambient air quality standards. Specifically, it requires States to pass these funds to local areas on a fair share basis where metropolitan planning organizations are in place. Simply put, States earn CMAQ funds based on local air problems and the legislation makes sure that funds are passed through to these areas. Recently, this chamber debated the extension of the compliance deadlines in some Texas cities and other places, all the while my own State of Texas had piled up more than $270 million in unspent CMAQ funds that could have helped improve air quality in my area and others in the State. This provision will make sure that the local areas that carry these-requirements under Federal law are certain to receive their fair share of the resources that are provided.

There are also two new initiatives in the legislation that address congestion. One is a new $2 billion annual formula program aimed at the Nation's most congested metropolitan markets, as analyzed by the Texas Transportation Institute. This program will target resources to areas of the Nation with clear congestion needs. The other program will provide modest resources of $500 million annually to local governments to support incident management programs.

Let me speak to the need for these targeted programs. Every taxpayer and every community in our States benefits if we make some selected investments that improve the performance of our Nation's most productive economic centers. All of our economic data shows that our metropolitan areas are truly the economic engines of our State economies and help drive overall U.S. economic growth. They now account for the overwhelming and disproportionate share of the Nation's new jobs, personal income and total economic output. This legislation speaks directly to the pressing needs of these city and county metropolitan areas by investing immediately in congestion relief strategies and programs that will pay substantial dividends to the economic bottom lines of our State and the Federal Government. These initiatives, coupled with other provisions in this legislation, will help us extract more economic output from these areas.

This investment in our regional economic engines will also position our Nation more favorably in the global competition of world trade. For instance, consider my own district, the Dallas Metro area, not including the adjoining Fort Worth Metro area. The Dallas Metro area produced more goods and services—about $170 billion in 2001—than 29 States. This output exceeded that of many countries, such as Denmark or Hong Kong. This legislation is about recognizing the importance of the role local decision-makers play in steering these vital economic units and the value of tapping the vast range of our Nation's broadest asset base. In the end, our Federal policy needs to go beyond the Federal/State partnership of the 1950s that was built around the Interstate era. The 1991 ISTEA made some strides to update our institutional arrangements, and this legislation builds on those improvements.

Mr. Speaker, this legislation is nonpartisan. It represents an effort to establish a fair and equitable distribution of our Federal transportation dollars.

HONORING C.K. WILLIAMS

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, this week C.K. Williams was honored with the National Book Award in Poetry for his book "The Singing: Poems".

The National Book Award, established in 1950, has become one of the most significant literary prizes in the country and comes with a $10,000 cash award. A creative writing professor at Princeton University since 1995, C.K. Williams has authored 14 books of poetry over his long and distinguished career and in 2000 he received the Pulitzer Prize in poetry for his work "Repair".

Charles Kenneth Williams was born in Newark, New Jersey in 1936. He started writing poetry at the age of 19 and has said that "Poetry didn't find me, in the cradle or anywhere else near it: I found it. I realized at some point—very late, it's always seemed—that I needed it, that it served a function for me—or someday would—however unclear that function may have been at first."

Mr. Speaker we all are very lucky that C.K. Williams found poetry and its clear to me that he has served a function to those of us who have had the pleasure to read his wonderful poetry. At times his poetry delves in to the dark areas of despair and our eventual mortality. As such his poetry is thought provoking, deeply moving, and at times extremely personal.

Again, I congratulate Mr. Williams on his award, and I deeply thank him for the contributions he has made through his poetry to enrich our society. C.K. Williams continues in the long great tradition of other New Jersey poets such as Walt Whitman, William Carlos Williams, Alan Ginsburg, and Robert Pinsky, and he is certainly one of the best poets that New Jersey has to offer today. And as the National Book Selection Committee, The Pulitzer Committee, and other juries make clear, C.K. Williams is one of the best. I am so pleased to have a poet of such talent and mettle both writing and teaching in my district.

Mr. Speaker I would like to include in the RECORD a copy of the title poem of C.K. Williams's award winning book, which is entitled The Singing.

THE SINGING

I was walking home down a hill near our house on a balmy afternoon under the blossoms

Of the pear trees that go flamboyantly mad here every spring with their burgeoning forth

When a young man turned in from a corner singing no it was more of a cadenced shouting

Most of which I couldn't catch I thought because the young man was black speaking black

It didn't matter I could tell he was making his song up which pleased me he was nice-looking

Husky dressed in some style of big pants obviously full of himself hence his lyrical flowing over

We went along in the same direction then he noticed me there almost beside him and "Big"

He shouted-sang "Big" and I thought how droll to have my height incorporated in his song

So I smiled but the face of the young man showed nothing he looked in fact pointedly away

And his song changed "I'm not a nice person" he chanted "I'm not I'm not a nice person"

No menace was meant I gathered no particular threat but he did want to be certain I knew

That if my smile implied I conceived of anything like concord between us I should forget it

That's all nothing else happened his song became indecipherable to me again he arrived

Where he was going to a house where a girl in braids waited for him on the porch that was all

No one saw no one heard all the unasked and unanswered questions were left where they were

It occurred to me to sing back "I'm not a nice person either" but I couldn't come up with a tune

Besides I wouldn't have meant it nor he have believed it both of us knew just where we were

In the duet we composed the equation we made the conventions to which we were condemned

Sometimes it feels even when no one is there that someone something is watching and listening

Someone to rectify redo remake this time again though no one saw nor heard no one was there

INTRODUCTION OF BIPARTISAN RESOLUTION ON JUÁREZ

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. SOLIS. Mr. Speaker, I rise today to introduce this bipartisan resolution with my colleagues Ms. SLAUGHTER, Mr. REYES, Mr. RAMSTAD, Mr. RODRIGUEZ, and Ms. CAPITO. We are deeply concerned about the murders and violence against women that has occurred in the state of Chihuahua, Mexico. Since 1993 over 300 women have disappeared from this area. Oftentimes their mutilated bodies are found in the abandoned or desert areas. This resolution expresses our sincerest condolences and deepest sympathy to the families of the victims, and encourages increased U.S. involvement in bringing an end to these heinous crimes that for the most part have gone unsolved.

SMALL BUSINESS BANKRUPTCY VENUE RELIEF ACT

HON. RICHARD H. BAKER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BAKER. Mr. Speaker, the recent bankruptcy of a large chemical company in Louisiana has alerted me to the difficulties that small businesses can face in bankruptcy proceedings. In the wake of this chemical company's bankruptcy, a number of small businesses in Louisiana found themselves defendants in preferential payment lawsuits brought by the bankruptcy trustee. Many of these companies were shocked that they would be accused of receiving preferential payments when they had had a long history of consistent business dealings with the chemical company. Not only were these businesses surprised by the lawsuits, but they were dismayed that they were forced to defend these lawsuits in Delaware. The burden of hiring an attorney in Louisiana and Delaware was significant and a number of these small businesses were forced to settle these meritless lawsuits to avoid the costs associated with a legal defense.

I believe that we are placing these small businesses in an unacceptable position. Asking small businesses to pay several thousand dollars in legal fees or settlement fees is a significant burden for many of these businesses. It appears that in a number of cases, bankruptcy trustees realize the leverage they have on these small businesses and exploit this leverage. It costs little for the trustees to file suit against these small businesses and then the trustees have the luxury of adjudicating the lawsuits in the State they are working in. Authorizing penalties for frivolous lawsuits and changing the venue for preferential payments cases that fall below a meager $5,000 threshold has done little to improve the situation for small businesses. I believe that we must force bankruptcy trustees to take a harder look at the merits of these preferential payments cases and we need to allow small businesses the courtesy of defending these lawsuits in the State in which they reside.

For this reason, I have introduced the "Small Business Bankruptcy Venue Relief Act." This legislation will allow small businesses of under 25 full-time employees to defend preferential payments claims in the State where they reside. In addition to lowering legal costs for these small businesses, this legislation will force bankruptcy trustees to give greater consideration to the merits of preferential payment claims against small businesses.

Mr. Speaker, I hope that members will consider the plight of small businesses and cosponsor the "Small Business Bankruptcy Venue Relief Act."

PERSONAL EXPLANATION

HON. LUIS V. GUTIERREZ

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GUTIERREZ. Mr. Speaker, I was unavoidably absent from this Chamber on July 8, 2003. I would like the RECORD to show that, had I been present, I would have voted "nay" on rollcall vote No. 334 and "yea" on rollcall votes Nos. 335 and 336. On July 10, 2003, I was absent from this Chamber for a journal vote No. and I would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall vote No. 346.

On July 14, 2003, I was absent from this Chamber and I would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall votes Nos. 354, 355, 358 and 359 and "nay" on rollcall vote No. 356. I was also absent from this Chamber on July 17, 2003, and would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall vote No. 387. Furthermore, on July 18, 2003, I was unavoidably absent from this Chamber and I would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall vote No. 396 and "nay" on rollcall vote No. 397.

On July 21, 2003, I was absent from this Chamber and I would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall votes Nos. 398, 399 and 400. I was unavoidably absent from this Chamber on July 24, 2003 and would like the RECORD to show that, had I been present, I would have voted "yea" on rollcall vote No. 441. I missed rollcall vote No. 452 on July 25, 2003, and would like the RECORD to show that, had I been present, I would have voted "nay."

IN RECOGNITION OF BANQUET HONORING THE HEROES OF THE MONTGOMERY, ALABAMA BUS BOYCOTT

HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ROGERS of Alabama. Mr. Speaker, I rise today to join the Montgomery, Alabama Transportation Coalition in recognizing the heroes of the 1955 Montgomery Bus Boycott.

On December 4, 2003, the Coalition will hold its annual awards dinner, and the theme for this year's banquet is "Reclaiming the Dream." They have chosen this occasion to honor the heroes of the Montgomery Bus Boycott. These heroes are former Pastor Robert Graetz, Mrs. Inez Jessie Baskin, Mrs. Johnnie Carr, Mrs. Daisy Childrey, Mrs. Thelma Glass, Mrs. Hazel Gregory, Mrs. Vera Harris, Mr. Bobby Jackson, Mrs. Zecozy Williams, and posthumously, Mrs. Aurelia Browder, Mrs. Virginia Durr and Mr. Eddie Posey.

INTRODUCING THE AUDITOR INDEPENDENCE AND TAX SHELTERS ACT

HON. RAHM EMANUEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. EMANUEL. Mr. Speaker, today, I am proud to introduce bipartisan legislation to stop the unethical, and in certain cases, criminal conduct by some of our Nation's most respected accounting firms that market abusive tax shelters under the guise of "non-audit services" to the public companies whose books they audit—in effect auditing their own work. The Auditor Independence and Tax Shelters Act, cosponsored by Representatives MARK FOLEY, BART STUPAK, DAVE CAMP, and TOM LANTOS, will eliminate this irreconcilable conflict of interest that fuels the engine of an ever-expanding tax shelter industry.

Ongoing Senate hearings and the General Accounting Office investigations reveal that tax revenue lost from known shelters totaled $33 billion over the past decade, and that losses from undetected shelters could total another $52 billion. Last year, for example, an abusive tax shelter known as "Slapshot" was expected to produce tax breaks exceeding $120 million for Enron. It was based on a $1 billion loan and concealed by a highly intricate combination of loans and stock transactions occurring within minutes of each other that were designed to prevent tax regulators and authorities from discovering what really happened.

As William McDonough, Chairman of the Public Company Accounting Oversight Board recently said, major accounting firms have suffered a "complete ethical collapse." Chairman McDonough added during recent testimony before Congress that the willingness to sell faulty tax shelters and hide them from the IRS is "immensely and immorally repugnant." Moreover, David Clay Johnston of the New York Times and author of Perfectly Legal, reports that tax avoidance among corporations

and upper-income individuals is far outrunning the audit capacity of the IRS. He estimates that a $113 billion gap exists between what corporations should be paying and what they actually pay. Clearly, the burden of this gap in tax receipts is being shouldered by middle-class families.

In response to this costly and unethical practice, our legislation prohibits auditors from providing those tax shelter services for which a significant purpose is the avoidance or evasion of federal income tax to the publicly traded corporations they audit. The bill also prohibits auditors from offering tax shelter services to the corporation's officers and directors. Additionally, guiding principles under this bill will clarify how audit committees decide whether the corporation's auditor may provide certain non-audit services to the corporation. If the audit committee finds that a proposed service would reasonably result in an impairment of the auditor's independence by violating one of these principles, the audit committee would be unable to approve the proposed service.

Under our legislation, auditors would still be able to market tax reduction strategies to other companies and individuals, but not to the companies that they are responsible for auditing. This is a common sense approach to protecting our investors and American middle-class families from the increasing cost and the expanding prevalence of tax shelters, which should be exposed for what they really are—unfair and unpatriotic corporate behavior, and which should be stopped once and for all.

COMMENDING LAFARGE CONSTRUCTION MATERIALS

SPEECH OF

HON. BOB BEAUPREZ

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BEAUPREZ. Mr. Speaker, I would like to take this opportunity to commend Lafarge Construction Materials on their exceptional contribution as a corporate member of the Golden community.

Lafarge West operates the Specification Aggregates Quarry on Colfax Avenue in Golden, Colorado. I am proud to serve Golden as their Congressman, especially after watching this tremendous effort put forth by all parties involved to create a win-win situation for Lafarge, the city of Golden, concerned environmental groups and, of course, the citizens of Jefferson County.

In fact, I recently received a letter from the mayor of Golden, Charles Baroch where he said, "Lafarge has for many years been a good neighbor, being very concerned about the impact of the mine and crushing plant on the neighborhood. Lafarge listens to citizens concerns and takes action to correct the problem. Most everyone in Golden is proud to have this business a part of Golden."

The partnership began when Lafarge realized it's basic need to increase the reserves of the quarry to serve the growing Denver market. A market, I hope, that will be even stronger soon with the passage of a new transportation re-authorization bill.

So, in the spirit of cooperation, Lafarge began a 2-year process of meeting with local citizens, businesses, community leaders and environmental groups to learn what concerns may be out there regarding a quarry expansion. In the end, after many presentations, many meetings and many late nights, they did find that win-win solution. Scott Gudahl put it simply when he said, "We kept addressing expectations and concerns until there were none left—and that's what you basically have in the final proposal."

That final proposal was an innovative land swap. The quarry will be able to expand by 60 acres and Jefferson County will receive more than 500 acres of added scenic open space. Even the quarry itself, once reclaimed, will be donated as additional open space for the enjoyment of Jefferson County citizens.

Mr. Speaker, you know as well as I that all too often, good honest businesses are painted with unfair labels by those who do not understand the process of making the roads and highways that keep our economy moving. I applaud the people at Lafarge for putting forth the extra effort not only to create a better company, but also create a better community. I am proud of their efforts and I am proud to represent their employees in this Congress.

IN RECOGNITION OF THE 125TH ANNIVERSARY OF THE CITY OF HURTSBORO, ALABAMA

HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ROGERS of Alabama. Mr. Speaker, I rise today to pay tribute to the City of Hurtsboro, Alabama, on its 125th anniversary of its incorporation on December 4, 2003.

Hurtsboro, Alabama, located in Russell County, Alabama, was originally station Number 4 on the Mobile and Girard Railroad. In 1857, Joel Hurt, Sr. came to the site of Hurtsboro and with a partner, William Marshall, bought land and established a sawmill by a creek now called Hurtsboro Creek. Mr. Hurt had moved from Eatonton, Georgia, to Olivet, Alabama, a thriving farm community about 3 miles from Hurtsboro. However, when Olivet was bypassed in the survey to the Mobile and Girard Railroad, Mr. Hurt moved to the railroad site. In 1858, when the railroad reached the place, the mill company laid out the town, with the mill in the center. It was called Hurtsville for the principal founder.

On November 8, 1878, a petition was filed with the Russell County Judge of Probate Simeon O'Neal by more than 20 of the male inhabitants of the town laying out the boundaries of the town and the name to be given if incorporated and requesting that an election be held for incorporation. Judge O'Neal then set the election for December 3, 1878, and on that day, no votes were cast against incorporation. Therefore, on December 4, 1878, Judge O'Neal made entry in the record that inhabitants of the town of Hurtsville were incorporated under the name of "Hurtsville" with such boundaries to extend one half mile in every direction from the present public crossing at the depot of the Mobile and Girard Railroad. On March 24, 1883, a petition was filed by more than 10 of the male inhabitants of Hurtsville that the name of the town be changed to "Hurtsboro" (to avoid confusion with the town of Huntsville, Alabama). An election was held on April 11, 1883, and based on the results, Russell County Judge of Probate Simeon O'Neal entered into the record that the town's name be changed to "Hurtsboro."

I congratulate Hurtsboro, Alabama, on its 125th anniversary of incorporation and join its residents in recognizing their proud history.

COMMENDING PENNINGTON ELEMENTARY IN WHEAT RIDGE

HON. BOB BEAUPREZ

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. BEAUPREZ. Mr. Speaker, I rise today to add to the RECORD a story of true leadership and determination occurring in the very place that it should, our school system.

I recently had the honor of visiting Pennington Elementary, a small school located back home in my great Colorado district. Not only was I impressed by the moral this house of education puts forth to its visitors, I was amazed at the progress I learned of that these young minds are making and the dedication of their instructors and administrators.

Four years ago Pennington Elementary was considered to be the school to which no one wanted to send their children. The children in the community were known to be impolite and irresponsible. Now if you ask neighbors of this accomplished school about the little ones' demeanor in and out of the school setting, they will tell you the children are intelligent, delightful and always polite and courteous to those around them.

This school of only 248 students has risen to the top of the pile and now begins their day with a "Pennington Pledge" as a daily reminder of what they stand for; a good motto for any upcoming citizen. It reads:

> We the students of Pennington agree to have a drug free school, a safe and orderly learning environment, to be big brothers and big sisters to any little student. As a responsible citizen I will follow the rules of Pennington.

Because the school has changed the outlook of the staff, community and parents, success is a regularly heard word within the walls of Pennington Elementary. The school's standardized state test scores have risen from 28 percent proficient or better in 1998–1999 to 56.7 percent during the 2002–2003 school year and continue to rise. Their fourth grade reading scores alone have gone from 35 percent proficient or greater to 82 percent during the same span of time, gaining them the recognition for the largest improvement in reading scores for the state of Colorado.

I would also like to make mention that Pennington has achieved these great strides by adopting a "no excuses attitude." The students and faculty of Pennington believe that there is no reason that their school should not be a school of excellence, and that very attitude is what has placed them as such in my eyes.

Pennington illustrates pride in education and excitement for the learning process. Mr. Speaker, I am proud to have such a school of excellence back home in my district. Pennington has truly shown that they are an excellent educational institution that strives daily to deliver on their goals and dedication to their children and the futures that await them. I am truly proud of the students, staff and community surrounding and supporting Pennington Elementary.

COMMEMORATING FIRST ANNIVERSARY OF TERROR ATTACK ON MOUNT SCOPUS

HON. ERIC CANTOR

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. CANTOR. Mr. Speaker, I had the great opportunity to return to Israel during this past August. Every visit to Israel brings forth so many emotions, some happy, some sad, but always inspirational. My visit was approximately a year after one of the most senseless and brutal attacks that has taken place since the beginning of the so-called second Intifada. On July 31, 2002, a terrorist placed a bomb in the cafeteria at Hebrew University. Nine young people were killed and many more wounded. Of the nine, five were Americans. I mourn the loss of all innocent lives, but this particular attack stands out for two main reasons.

First, of course, the attack underscores the close relationship of Hebrew University to the United States. This goes beyond the tragic deaths of the five Americans. The fact that so many Americans were there and that so many are still going there to study underscores the close relationship between this university and the people of the United States. Thousands of Americans have studied at Hebrew University, particularly in their exceptional "year-abroad" program and in their graduate schools. Many are there still and many more will follow. Many scientists from Hebrew University are also recipients of research grants from the American government and American institutions. Their work has been and continues to be of the highest quality. Second, targeting Hebrew University for such an attack was truly heinous. Throughout its long and distinguished history, Hebrew University has reached out to students and scholars of all religions and races.

The Hebrew University of Jerusalem, the "flagship" of Israeli universities, was first conceived in the 19th century against the background of discrimination and persecution in Europe. Jews were barred from higher education in Russia and Romania, and there were similar restrictions in many other countries. Also, there was an increasing demand from high school graduates in pre-state Israel for higher education.

The idea of a university in the Holy Land was proposed by Chaim Weizmann, Israel's first president. Among those backing the idea and assisting in raising financial support for the future university was Albert Einstein. The university's foundation stones were dedicated on Mount Scopus overlooking Jerusalem in 1918. Even before the university officially opened its doors in 1925, there was an inaugural lecture given by Einstein in 1923.

From its core of three institutes in the exact sciences and Jewish studies, the university expanded rapidly to eventually include all areas of higher education—the social sciences, law, medicine, dental medicine, agriculture, social work and education. The War of Independence, with its division of Jerusalem, caused the loss of the Mt. Scopus campus to the university in 1948 and its subsequent dispersal to various sites in West Jerusalem.

After the Six-Day War of 1967 and the reunification of Jerusalem, the university returned to Mt. Scopus, which again became the main campus. Today the university operates from four campuses—three in Jerusalem and one in Rehovot and has a total enrollment of some 23,000 students and an academic staff of about 1,200.

The Hebrew University of Jerusalem is an institution of international renown and is a beacon of open inquiry and academic freedom in the Middle East. The key point is that the university is open to all, regardless of nationality, ethnic origin, religion or race. Its Rothberg International School hosts students from dozens of countries, and its Jewish National and University Library is an unparalleled research source used by scholars from around the world.

The following is a copy of a speech delivered by Menachem Magidor, President of the Hebrew University, on the occasion of the first anniversary of the attack on the school.

PRESIDENT MAGIDOR'S SPEECH AT THE CEREMONY COMMEMORATING THE FIRST ANNIVERSARY OF THE TERROR ATTACK ON MOUNT SCOPUS

Just one year ago.at exactly this moment, this was the scene of a ghastly event, a scene of broken glass, overturned tables, blood and the cries of the injured and dying.

''Desolation, devastation and destruction!''

One year has passed—the murdered have been laid to rest, and among the injured, there are those who have recovered fully, and there are those who will never return to their former selves. The blood has been washed away, the blackened walls have been repainted, students rush to classes, and young people gather at the new tables in the cafeteria, engaged in lively and friendly conversations.

Has life simply returned to the way it was before? Of course not, because of those who are no longer with us.

Because Marla Bennett and Benjamin Blutstein will never continue on their marvelous journey of discovery of their roots and traditions;

Because David Gritz will never continue with his unique combination of philosophy, Jewish Studies and music;

Because David Diego Ladowski will never serve society and the country as he had aspired to, and to promote the peace in which he believed despite the forces of darkness exemplified by those who murdered him;

Because Revital Barashi will no longer share her pleasant manner with her colleagues in the corridors of the Faculty of Law;

Because Dina Carter will never continue with her dedicated work in the Library and Janis Ruth Coulter will never continue to devote herself to the University in America.

Because we will never again see the wonderful smile that lit up the face of Levina Shapira,

Because the intelligence and the wisdom which Daphna Spruch personified has gone and will never return.

And even those amongst us who were not here last year, or who arrived after the dreadful explosion, cannot return to being how they were before. Because we all understand that this University, which is so dear to us all, is hated by the forces of darkness, and that it was not by chance that the University was chosen as a target because we are Israeli or Jewish, but dafka because we are dedicated to openness and tolerance, because we are part of the free and enlightened world and the wicked spared no effort to strike at the University, dafka because our Campuses are oases of wisdom, of dialogue between people of different faiths and backgrounds, of different beliefs and religions.

And then, you realize that this Campus is part of the war zone in the war for the rebirth of the Jewish people in its land, part of the war zone in the war of the free world against the forces of hate, intolerance and tyranny.

The year that has passed has not been an easy one. Those who lost their dear ones have found it difficult to accept their loss; the wounded have fought to rebuild their lives again, but the emotional and physical scars will forever be with them.

The Hebrew University family gritted their teeth, and returned to the sacred work of research and teaching. We were faced with almost impossible decisions. The threats against this University, its principles and all that it represents haven't disappeared.

We have had to make painful compromises between security considerations and maintaining a free and dynamic Campus. The economic situation and the budgetary burdens have not made it any easier, but the year that has passed has proved to us all, as has happened so many times during the 78 years of the existence of the Hebrew University, that this living and growing tree, called the Hebrew University, is difficult to uproot.

Because the University's existence draws its life's breath from the never-ending struggle for truth; because it aspires to help the advancement of humanity; because it is rooted deep in the essence of our traditions while its branches stretch forth to the winds of tolerance, openness and respect for one another; because despite the forces of darkness that tried to destroy it, it has not lost its aspirations for peace.

May the memory of the nine be blessed.

CONFERENCE REPORT ON ENERGY POLICY ACT OF 2003

SPEECH OF

HON. W.J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 20, 2003

Mr. TAUZIN. Mr. Speaker, I rise to explain for the record the role of the FERC in regulating public utility holding companies following repeal of the Public Utility Holding Company Act. The repeal contains several savings clauses. In essence, the savings clauses state that none of them give the FERC any new authority. They confirm that once PUHCA repeal takes effect, the FERC will continue to apply existing utility rate regulation to public utilities within formerly registered holding companies under PUHCA of 1935.

Particularly, Section 1275(a) states if a state commission disagrees with the allocation of costs of non-power goods or services provided by an affiliate organized specifically for that purpose, typically a service company, either the state commission or the holding company system may ask the FERC to resolve the allocation issue. The FERC will then make a determination of the proper allocation of such costs under the standards contained in the section, but only at the request of a State commission or a holding company system. The FERC has no authority to review or approve such cost allocations absent such a request. Section 1275(b) merely states that both the FERC and the State commissions retain whatever rights they now have to review cost allocations from service companies among public utilities for rate-making purposes.

H.R. 1964 THE HIGHLANDS CONSERVATION ACT

HON. STEVEN R. ROTHMAN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ROTHMAN. Mr. Speaker, I rise today in strong support of H.R. 1964, the Highlands Conservation Act, introduced by my colleague, Mr. RODNEY FRELINGHUYSEN.

I am very pleased to be an original cosponsor of the Highlands Conservation Act, which is an important step forward in our ongoing effort to save New Jersey's precious open space and enhance the quality of life for residents. New Jersey is the most densely populated State in the Nation, which is why it is so important that we think ahead and recognize the importance of preserving our remaining acres of open space. By protecting the 2 million acres of the Highlands, which extend through our neighboring states as well, we are creating an environmental legacy for future generations, safeguarding our area's drinking water, and ensuring that our children and our children's children have places to explore and opportunities to enjoy the great outdoors.

The Highlands Conservation Act is a testament to the foresight of the bill's author, Congressman RODNEY FRELINGHUYSEN, who recognizes the importance of saving New Jersey's open space. I have seen Congressman FRELINGHUYSEN's commitment to the preservation of undeveloped acres firsthand as a colleague of his on the House Appropriations Committee. He worked in a bipartisan fashion to garner support for his measure. Congressman FRELINGHUYSEN's leadership to protect the Highlands will truly help New Jersey live up to its namesake as the Garden State.

Getting Congress to authorize $100 million for the preservation of the Highlands would be a victory for our quality of life and the environment, but also a victory for New Jersey's taxpayers who will be spared from having to pay for the full cost of these preservation efforts. I am pleased that I was able to help get this bill onto the floor today and I look forward to working with Congressman FRELINGHUYSEN on the Appropriations Committee to preserve New Jersey's open space.

HALF A LOAF FOR AMERICA'S DISABLED VETERANS IN ELIMINATING DISABILITY TAX

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOLT. Mr. Speaker, earlier this session I signed the discharge petition to force a vote on legislation that I co-sponsored (H.R. 303) which would have repealed altogether an antiquated law from the 1890s that prevents disabled veterans from receiving concurrently both military retirement and veterans' disability benefits. In response to that parliamentary procedure, the Republican Leadership finally relented and included a plan in the FY 2004 Defense Authorization Conference Report that will be phased in over ten years and would provide greater benefits for approximately 245,000 disabled veterans—only half of those who see their retirement benefits reduced or eliminated under current law.

This is a good step forward and I surely would have voted in favor of this plan had it been brought to the House floor as a freestanding bill. Unfortunately, the Republican Leadership folded it into the $400 billion Defense Authorization Conference Report, which I voted against for several other reasons. Now that this legislation has been enacted, it is incumbent upon this Congress to do more than provide half a loaf. We need to pass additional legislation in the next session of Congress to cover the remainder of our nation's disabled veterans who are unfairly left in the predicament of having to pay this de facto "disability tax".

On January 21, 2001, President Bush said, "America's veterans ask only that government honor its commitments as they honored theirs. . . . In all matters of concern to veterans—from health care to program funding —- you have my pledge that those commitments will be kept. My Administration will do all it can to assist our veterans and to correct oversights of the past."

I couldn't agree more. I will actively support additional legislation in the next session of this Congress to ensure that none of the 4,263 veterans in New Jersey who currently receive military retirement benefits will have their disability payments reduced commensurately because they remain subject to the so-called concurrent receipt prohibition.

ON THE OCCASION OF THE RETIREMENT OF NAVAL CRIMINAL INVESTIGATIVE SERVICE SPECIAL AGENT ROD MILLER

HON. JOHN N. HOSTETTLER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. HOSTETTLER. Mr. Speaker, I rise to express my appreciation to Special Agent Rodney Miller of the Naval Criminal Investigative Service for his 32 years of service to his country, and to salute him on the occasion of his retirement from the ranks of federal law enforcement.

Special Agent Rod Miller was born and raised in Linton, Indiana, which is in the heart of Indiana's 8th Congressional District. The son of an Army veteran who was awarded the Purple Heart during World War II and who himself worked as a Navy employee for some 30 years thereafter, Rod spent time as a lifeguard and paperboy in Linton before graduating from Linton High School in 1966. He enrolled at Indiana State University in Terre Haute, and completed two years of study before enlisting in the U.S. Air Force in 1969. After a four-year stint in the Air Force, including over a year spent in Vietnam, Rod returned to Terre Haute and completed his undergraduate studies, earning a Bachelor of Science degree in Criminology in 1974. Shortly thereafter, he began coursework at the same school to obtain a Master of Science degree, also in Criminology.

In May 1975, Rod commenced what would become a long and illustrious career as a Special Agent with the Naval Investigative Service (NIS)—the predecessor of today's Naval Criminal Investigative Service—at NIS Resident Agency Great Lakes. There he learned the basics of criminal investigation, and proved himself to be a talented and driven law enforcement professional.

In 1978, Rod opened a new NIS office in Crane, Indiana, where the Navy conducts some of its most important research, development, and engineering of surface ship combat systems. He also took this opportunity to conclude his studies at Indiana State University, finishing his thesis and earning his Master's degree in 1979.

Following his NIS service in his home state of Indiana, Rod was assigned to the NIS Resident Agency in Guam from 1980 to 1982. He demonstrated continued leadership and investigative acumen in Guam, where he received a meritorious award from the Drug Enforcement Administration for his role in a significant international drug smuggling investigation, and was made an honorary Police Officer with the Guam Department of Public Safety for the support he provided to that department. He was rewarded with a supervisory role at the NIS Resident Agency in Portsmouth, Virginia, where he was appointed to the position of Assistant Special Agent in Charge in 1982.

For the next 21 years, Rod served with distinction in supervisory roles at a host of critical Navy locations—from 1984 to 1985, as the Special Assistant to the NIS Regional Director in Norfolk; from 1985 to 1986, as the Assistant Special Agent in Charge of the fraud unit at NIS Resident Agency Norfolk; and from 1987 to 1988, as the first Special Agent in Charge of the new NIS Mid-Atlantic Regional Fraud Unit.

In 1988, Rod was appointed to be the first Special Agent in Charge of Operation Ill Wind, one of the most significant defense procurement fraud investigations in our nation's history. This joint investigation ultimately resulted in the conviction of 46 individuals and six defense corporations, and yielded fines and penalties in the amount of some $190 million.

Rod's professional success continued in the wake of his involvement in Operation Ill Wind. In 1989, he was appointed the Special Agent in Charge of the new NIS Regional Fraud Unit based in Los Angeles, California. And, when

the decision was made to open a new NIS Field Office in Los Angeles in 1992, Rod was the natural choice to be the first Special Agent in Charge there, as well.

In 1993, in the aftermath of the Tailhook investigation, the then-acting Secretary of the Navy disestablished the Naval Investigative Service and established the Naval Criminal Investigative Service (NCIS) in its stead. This change, and the reforms associated with it, had profound and dramatic effects across the organization.

Among other developments, in 1997 NCIS created a new Office of Special Projects, or OSP, representing the vanguard of the agency's counterespionage efforts. The following year, Rod was named the Special Agent in Charge of OSP, and set about to make his impact felt. He applied his vision and leadership to the OSP mission, ultimately evolving the unit far beyond original expectations. In addition to enjoying success in several significant espionage cases, Rod's unit applied its specialized training to a broad range of other investigative and operational activities, including counterterrorism operations, counternarcotics initiatives, and "cold case" homicide efforts. The successes achieved in these endeavors have earned OSP accolades from across the law enforcement and counterintelligence communities.

Mr. Speaker, Rod Miller has served our nation with distinction for 32 years—first in the uniform of an Air Force airman, and then in the ranks of federal law enforcement with NCIS. His is a record to be admired. I hope that the occasion of Rod's retirement from NCIS this November will give all of us pause to consider the many contributions and sacrifices of our nation's law enforcement professionals. On behalf of all Americans, I wish him "fair winds and following seas" as he pursues the next stage in his life—returning to Linton with his wife of 34 years, to join his three children and three grandchildren there—after a long, successful, and distinguished career in service to the United States of America.

THE MANUFACTURING TECHNOLOGY COMPETITIVENESS ACT OF 2003

HON. VERNON J. EHLERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. EHLERS. Mr. Speaker, I rise today to introduce "The Manufacturing Technology Competitiveness Act of 2003."

While Congress, the Administration and the American people have discussed the many challenges facing our nation's manufacturers, such as international trade, China policy, tax policy and health care costs, I believe that a fundamental issue has been generally left out of the debate—innovation. For decades innovation has underpinned American's dominance in the world economy. If our manufacturing sector is to remain competitive in the global marketplace, we must foster innovation within this sector.

As Chairman of the House Science Subcommittee on Environment, Technology and Standards, I oversee many of the federal government's manufacturing-focused research and development programs. I have met with manufacturers from around the country and specifically spoken to manufacturers both large and small about their problems. They all agree that innovation is one of the keys to ensuring our manufacturers remain competitive and it is crucial to the development of new industries. Funding research and development underpins innovation.

Based on these discussions and a hearing I held earlier this year, I am proud to introduce the Manufacturing Technology and Competitiveness Act of 2003. This bill will help our nation's manufacturers maintain and improve their technological edge. This legislation will stimulate innovation through collaborative research and development, and broaden and strengthen the Manufacturing Extension Partnership (MEP) program, which provides small- and medium-sized manufacturers with the tools to compete better. More importantly, it will bring together a variety of partners in the public and private sectors, building relationships that encourage and foster technological development and the ability to bring these developments to the marketplace.

Our global competitors are eagerly supporting investments in manufacturing research and development because they know it is the key to sustained economic development. If we are to continue to be the world's technological leader, we need to rise to this new global challenge and make the investments envisioned by this legislation.

More specifically, the bill:

Ensures that all federal manufacturing programs and related funding are coordinated and focused on solving these important problems. The bill requires a strategic plan and improved budget process to ensure these programs work together efficiently;

Designates the current Under Secretary for Technology within the Department of Commerce, as the Under Secretary for Manufacturing and Technology, to be the federal government's point person on manufacturing R&D policy, and outlines new duties focused on fostering innovation within the manufacturing sector for this position;

Establishes a new collaborative research and development program for manufacturing technology to build partnerships among higher education institutions, businesses, states and other partners. This program will provide $184 million over four years;

Helps to develop future leaders in manufacturing technology through a fellowship program in applied manufacturing research. Fellows will get to work with world-class leaders in technology and engineering at the National Institute of Standards and Technology (KIST). The fellowship program will provide $7.5 million over four years;

Reauthorizes and reforms the Manufacturing Extension Partnership (MEP) program by increasing competition among the centers. MEP is funded at $120 million for the first year, increasing to $137 million by year four; and,

Creates a new competitive, peer-reviewed grant program within the Manufacturing Extension Partnership (MEP) program to develop new tools to help small businesses innovate and compete. Funding for this program will come from the total MEP funding.

Mr. Speaker, while I am pleased that we are on the road to economic recovery, we must still address underlying concerns about the future of U.S. manufacturing. This bill will help address some of those concerns and put our Nation's manufacturers in a better position to compete today and in the future.

I look forward to working with my colleagues in the House and Senate, and with the manufacturing and research communities, to pass this important legislation.

IN RECOGNITION OF OUTSTANDING CONTRIBUTIONS OF AUBURN, ALABAMA CITY MANAGER DOUG WATSON TO THE AUBURN COMMUNITY

HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ROGERS of Alabama. Mr. Speaker, I rise today to join the residents of Auburn, Alabama, in recognizing the contributions of Doug Watson to the City of Auburn, Alabama.

Doug Watson has been City Manager for Auburn for 21 years. During this time, he has gained the respect of the entire community for his loyal and dedicated service. To demonstrate their appreciation, the City of Auburn, Auburn University and the Auburn Chamber of Commerce are hosting a community-wide reception on December 10, 2003. The reception will immediately follow the dedication ceremony of the Douglas J. Watson Municipal Complex, consisting of the Development Services building, the Public Safety Administration building, and the Municipal Court. The naming of this complex after Doug Watson is an indication of the high esteem in which he is held.

I salute Doug Watson for his service to the Auburn community and wish him well as he takes on the new position of tenured professor at the University of Texas at Dallas.

CONFERENCE REPORT ON H.R. 6, ENERGY POLICY ACT OF 2003

SPEECH OF

HON. W.J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. TAUZIN. Mr. Speaker, offshore oil and gas production in the Gulf of Mexico provided nearly $6.6 billion in royalty, bonus and rent revenues to the federal government in 2001. The coastal states which supported this production received approximately $130 million combined—a royalty sharing rate of less than two percent. Yet onshore oil and gas production revenues on federal lands is shared 50/50 between the federal government and the state in which the production occurs. In the case of Alaska, the state gets 90 percent of these onshore revenues produced on federal lands.

The disparity between the onshore and offshore royalty sharing programs and their contribution to our domestic energy security is striking. Federal lands within the United States generated an estimated $2 billion in royalties from the production of oil, gas and coal in

2001 with about $1 billion of these revenues going to the states for ''hosting'' these energy production activities. In contrast, offshore production in Louisiana's waters of oil and gas contributed over $5 billion in royalties to the U.S. Treasury in 2001 yet Louisiana received royalties of less than $30 million, a 0.6% return. The Gulf of Mexico produces more energy and associated revenues to the U.S. Treasury than any other area of the federal domain. Nearly $130 billion has been provided to the federal government as a result of oil and gas production in the Gulf of Mexico.

States receive 100 percent of the royalties they charge and collect in state waters. Louisiana's waters extend to only three nautical miles, compared to 9 miles for Texas and Florida. Therefore, if Louisiana had waters equal to these states, the significant revenues produced in these waters would have been wholly received by the state, not the US Treasury.

Section 1412 of the Energy Policy Act of 2003, the Secure Energy Reinvestment Fund (SERF), recognizes the significant contribution coastal states provide by supporting offshore development to decrease our nation's dependence on foreign oil and gas. The SERF program shares a small portion of Outer Continental Shelf (OCS) revenues with states that host offshore oil and gas production. As included in the conference report, section 32(a) of the Outer Continental Shelf Lands Act defines the terms used in the section, including 'coastal energy state'. It is the intention of the conferees that the Secretary of Interior (Secretary) reevaluate the eligibility of each coastal energy state's participation in the SERF program annually.

Section 32(b) provides $35 million annually, as well as OCS royalties and bonuses above the CBO baseline (in some cases, royalties and bonuses will have to reach levels hundreds of millions or over a billion dollars above the baseline before additional revenues will be shared with coastal energy states). This subsection authorizes up to $500 million for each Fiscal Year through 2013, and after 2013, 25 percent of qualified OCS revenues are to be shared with coastal energy states. Section 32(b) also includes a provision to protect deposits into the Land and Water Conservation Fund and Historic Preservation Fund.

Section 32(c) establishes a distribution formula comparable to those used in other federal royalty sharing programs. It also recognizes the historical contribution that some states provided by hosting offshore oil and gas production for decades, despite unfulfilled promises of royalty sharing by the federal government. The conferees have confirmed the document referred to in subsection 32(c)(2)(A)(iii). This section also provides 35 percent of a state's share directly to the political subdivisions that are within the state's coastal zone. When determining criteria for the ''relative level of OCS oil and gas activities'' in a state, the Secretary shall seek to direct the majority of this portion to the most impacted, or two most impacted, political subdivisions. In the case of Louisiana, the conferees have determined activities in Port Fourchon/LA1 should be recognized as OCS oil and gas activities and the conferees direct the Secretary to provide funds from the relevant portion of the formula in subsection 32(c)(2)(B)(iii) to address these impacts before any other activities in the state.

Section 32(c) specifies that only coastal energy states that have an approved plan as described under section 32(d) are eligible to receive funds. Section 32(c) also gives the Secretary authority to hold a state's funds in escrow (within the fund) if necessary and establishes a reallocation provision if states fail to have an approved plan. Finally, the section ensures coastal energy states will receive a minimum share of revenues.

Section 32(d) requires states to submit plans to the Secretary for approval. The Governor of each eligible state must include the plans prepared by the political subdivisions in the state plan. It is not the intention of this section to allow the Governor of a state to disapprove the plans of a political subdivision. In preparation of the plans, the conferees strongly urge the Secretary to ensure that states and political subdivisions carefully evaluate and coordinate with other regions. Further, states and political subdivisions should seek to use existing federal and state programs that advance the goals of the state plans. States and political subdivisions should leverage SERF resources to other federal programs to the maximum extent practicable.

Subsection 32(d)(2)(A)(v) is designed to ensure that any state with significant offshore oil and gas operations will address impacts that are ''significant'' or ''progressive''. This subsection requires that any state producing more than 25 percent of qualified OCS revenues spend not less than 30 percent of funding received annually from the SERF program (together with appropriate political subdivisions) to address ''significant'' or ''progressive'' impacts identified in the most recent EIS. For the first ten Fiscal Years of this program, the term ''significant'' means only infrastructure supporting ''focal points of impact'' (LAI) as identified in a relevant EIS. The term ''progressive'' means only coastal wetlands restoration. It is the conferees intent that greater than 15 percent of the funding received by the state and appropriate political subdivisions be used equally for each of these items. Further, it is the conferees intent that these monies shall be in addition to those provided to a political subdivision under subsection 32(c)(2)(B)(iii) (25 percent discretionary portion).

Section 32(e) specifies that the funds should be used in a manner that is consistent with federal environmental laws and all relevant state laws. Additionally, this section provides the eligible use of funds by states and political subdivisions. The SERF program is designed to ensure that mitigation and natural resource protection are top priorities of the eligible states. The Secretary should work with states and political subdivisions to establish reasonable administrative costs and keep these costs to a minimum. It is not the intent of this program to fund any otherwise required function of local or state government unless that function was designed to mitigate OCS activities or improve the coastal environment. Should any state propose a program or expenditure that would be authorized under subsection 32(e)(5), the Secretary shall not approve this use of funds unless there is a clear and direct link to OCS activities.

Section 32(f) requires the Secretary to withhold funding to any state or political subdivision that spent funds provided under this section in a manner inconsistent with the approved plan of such state or political subdivision.

Section 32(g) allows the Secretary to require arbitration to resolve disputes among any combination of coastal political subdivisions, states and the Secretary.

Section 32(h) provides for an administrative cost to be retained by the Minerals Management Service to implement this program. It is the intent of the conferees the Secretary will designate only the Minerals Management Service as the agency to administer and provide oversight to the SERF program. Since the majority of the coastal energy states and nearly all the federal offshore production is located in the Gulf of Mexico, the conferees expect the current Gulf of Mexico OCS Region office to play a significant role in the administration of this program.

Section 32(i) directs that two percent of the SERF fund be provided to the CREST program which has an existing relationship with the National Oceanographic and Atmospheric Administration. This payment shall be without limit and consist of two percent of all revenues available in the fund annually. It is the intent of the conferees that the funds provided under this section be used in a manner that is largely consistent with the goals of the existing CREST MOU and the current relationship with NOAA. In addition, the consortium may perform any activity authorized in section 1412(c) of this act. It is the intent of the conferees that Nicholls State University act as the fiscal agent for this section. The conferees expect CREST to retain its primary facilities at their existing location at CCEER.

Section 32(j) requires that any expenditure by a state or political subdivision using funds provided under section 32 must be in compliance with authorized uses specified in subsection 32(e). Section 32(j) also provides that these funds may be used for any payment that is eligible under section 35 of the Mineral Leasing Act. So as to create parity with other federal revenue sharing programs, it is the intent of the conferees that any funds provided under section 32 may be used for any purpose that is in an approved plan. The conferees expect the Secretary to work with other federal agencies, if appropriate, to ensure that states and coastal political subdivisions be permitted to use SERF monies in accordance with this section.

Section 32(k) requires states and political subdivisions to submit an annual joint report to the Secretary describing the expenditure of funds for the preceding fiscal year.

Section 32(l) requires that the otherwise established signs at projects or programs receiving funds under this section identify the source of revenue as being from the ''Secure Energy Reinvestment Fund (SERF) program'' or other common name established by the Secretary. The signage should also identify the source of funding as being from revenues generated from offshore oil and gas production.

Section 1412(b) amends section 31 of the OCSLA to reauthorize the program.

Section 1412(c) authorizes the CREST consortium through the Secretaries of Interior and

Commerce. It is the intent of the conferees that the consortium will focus their work on coastal wetlands loss in the lower Mississippi River delta and adjacent estuaries. Further, as a condition of funding, the conferees expect the Secretaries to require the consortium to establish an online library of existing information and findings on coastal wetlands restoration, the interaction between the Mississippi River and Gulf of Mexico, and other similar information. The agencies should use CREST as a tool to coordinate the various coastal activities, research and development, and programs of the various federal agencies that have existing authority over coastal activities or programs that affect coastal use. It is not the intent of the conferees that, as a condition of funding, the Secretary or Secretaries require the consortium to conduct operations outside the region in which it currently operates.

CONFERENCE REPORT ON H.R. 6, ENERGY POLICY ACT OF 2003

SPEECH OF

HON. MAX SANDLIN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. SANDLIN. Mr. Speaker, I rise to express my support for the long-overdue energy conference report, while at the same time sharing my disappointment with the process by which the House leadership has brought this legislation to the floor.

As we all know, one of the greatest problems facing the United States today is our lack of national energy independence. The United States' dependence upon foreign sources of oil is simply unacceptable for a country rich in natural resources and equipped with the capability to develop these resources as a means of increasing our national security. At the height of the energy crisis during the 1970s, the United States imported 46 percent of our oil supply. Today, it is estimated that we import approximately 55 percent of all energy used in this country. As America's energy consumption increases, our need to produce more energy rises as well. Unfortunately, supply is not meeting demand, and our increased reliance on foreign sources of energy has potentially disastrous consequences for our economy and national security. The energy conference report contains significant incentives for the exploration and production of oil and gas and represents an important step toward increasing our national energy independence.

At the same time, energy independence cannot be attained through production alone. Though Congress should strongly encourage the production of energy sources such as oil, gas, and nuclear power, Congress should also incentivize businesses and consumers to produce energy with wind and solar power and conserve energy through innovative technologies.

When used effectively, the Internal Revenue Code ["the Code"] can help to stimulate both the production and conservation of energy. Provisions in the Code such as section 29 and section 45 have stimulated the production of nonconventional fuels and wind energy, respectively, and the tax title of the energy conference report will extend these credits and encourage continued production from these sources for years to come.

Further, the report's funding authorizations and tax incentives for investment in clean coal technology will benefit both consumers and the environment in the state of Texas. Texas consumes more coal for electricity generation than any other state in the country, with a significant amount of that coal mined in Texas. Unfortunately, while generation facilities must burn coal to provide the electricity that so many people take for granted, burning coal inevitably releases some pollutants into our atmosphere. Together with private industry, the Department of Energy's clean coal technology program is working to develop cleaner-burning technologies that will decrease emissions of nitrogen dioxide, sulfur dioxide, and other airborne pollutants.

Additionally, I am pleased that the conference report seeks to decrease our over-reliance on foreign sources of oil by repealing the current sunsets for the qualified electric vehicle credit and clean fuel vehicles deductions. Further, I appreciate the inclusion of a credit for the purchase of hydrogen fuel cell motor vehicles. I included a similar provision in my energy tax legislation, H.R. 1436, the Energy Independence and Security Act, and believe strongly that fuel cell technology holds enormous potential for the future. The federal government has an important role to play in the development and use of this clean, renewable energy source.

Any balanced energy plan must acknowledge that Americans need to increase our conservation efforts in an attempt to move closer to energy independence. To that end, I appreciate the inclusion of incentives to homeowners to make energy efficient home improvements that decrease their consumption of energy.

As well, the energy conference report's increased funding authorization for the Low Income Home Energy Assistance Program [LIHEAP] will directly benefit low-income Texans in my district who rely on LIHEAP aid to pay their utility bills. Last yeas, Texans received $50.1 million through this federal grant program, and this legislation should increase the amount of federal aid that Texas receives in the future.

Further, I believe that the electricity provisions contained within the conference report will encourage the improvement of our country's transmission infrastructure by reducing the depreciable lives for transmission assets from twenty to fifteen years. Accelerating the depreciation period will provide additional resources for electric utilities to modernize their transmission systems, which should increase the reliability, safety, arid security of the national grid system.

I am, however, extremely disappointed with the process by which the Republican leadership has brought this measure to the floor. It is well known by now that the Republican leadership and energy conferees in both Houses drafted the conference report without Democratic participation. Democratic legislators who, in some cases, have been involved in drafting complex energy legislation for several decades were prohibited from taking part in this process. Mr. Speaker, the Republicans' behavior throughout this process has been outrageous and inexcusable, and their actions demonstrate a contempt both for the democratic process and the constituents of the legislators who have been denied a voice over the past several months.

SUPPORTING POISON PREVENTION AND CONTROL CENTERS

HON. RAHM EMANUEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. EMANUEL. Mr. Speaker, I rise today in strong support of S. 686, which strengthens poison prevention in America and guarantees funding for our nation's 74 poison control, information and treatment centers. Each year these centers save countless lives, and it is critical that we ensure the financial stability and public awareness they need to best serve the American people.

As our nation's primary line of defense against poison-related injuries and deaths, these centers provide physicians and the general public with direct access to life-saving information. Health care professionals rely on these centers for immediate, around-the-clock assessments and treatment recommendations for many types of poisonings, overdoses and drug interactions affecting people of all ages. Parents who find their child has consumed a toxic substance can receive immediate professional help with one phone call, any time, day or night.

Over 90 percent of all accidental poisonings take place in the home. More than 50 percent of these accidents involve children under the age of six, with more than one million young children exposed to toxins annually. When a child's life is potentially in danger, parents need to know immediately where to go for help. Too often parents are unaware of the services provided by poison control centers and turn to costly and time-consuming options such as rushing to emergency rooms at distant hospitals. In response to this situation, this bill provides for both a nationwide toll free number connected to local poison control centers, and a new media campaign to call the public's attention to services available through this number.

My home state of Illinois is served by the nation's oldest poison control, information and treatment center, the Illinois Poison Center. The IPC has expertly served the needs of metropolitan Chicago since 1953, and handles approximately 100,000 cases throughout the state of Illinois each year. In 1985, my state was served by five regional poison control centers, but only IPC remains after deep budget cuts over the years. We must ensure that our nation's remaining centers receive the support they need to continue serving the public.

Our nation's Poison Control and Information Centers also play a vital role in managing public health crises, environmental disasters, and the threat of weapons of mass destruction. In July of 2000, the Illinois Poison Center was

the first to respond to a nitric acid leak at a Chicago factory. In December of that same year, the IPC was again the first to respond, this time to an anthrax threat at the British-American Chamber of Commerce in Chicago. And, in August of 2001, the IPC responded to a toxic chemical spill on the Dan Ryan Expressway.

The Illinois Poison Center has developed protocols for response and notification of proper governmental agencies when these events occur, and it is also a participant in regional disaster drills throughout the metropolitan Chicago area. Poison control and information centers like the IPC are a critical part of our nation's emergency response and disaster preparedness systems.

Poison centers represent a cost effective investment that benefits the public health. In 1998, the U.S. Department of Health and Human Services estimated that every dollar spent on a poison center saves seven dollars in unnecessary medical costs.

Mr. Speaker, I commend our colleagues on both sides of the aisle for their hard work on this legislation. This bill is good for the health, safety and security of the American people. I strongly encourage my colleagues to vote for S. 686.

CONFERENCE REPORT ON H.R. 6, ENERGY POLICY ACT OF 2003 REGARDING TITLE VIII—HYDROGEN

SPEECH OF

HON. W.J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 18, 2003

Mr. TAUZIN. Mr. Speaker, as Co-Chairman of Conference Committee on H.R. 6, the Energy Policy Act of 2003, as well as Chairman of House Energy and Commerce Committee which has jurisdiction over national energy policy as well as the production, storage, supply, marketing, pricing and regulation of energy resources, including unconventional energy resources, I am taking this opportunity to elaborate on and clarify both the legislative provisions and Statement of Managers that is contained in the conference report on H.R. 6 regarding Title VIII, Hydrogen.

On April 1, 2003 and April 2, 2003, the Energy and Commerce Committee met in mark up session to consider a committee print, the Energy Policy Act of 2003. On April 2, 2003, the Energy and Commerce Committee voted to approve the committee print and report this legislation to the full House of Representatives. This committee print contained, among other provisions, Title V, Vehicle and Fuels, Subtitle B, FreedomCar and Hydrogen Fuel Program.

H.R. 6, the Energy Policy Act of 2003, was subsequently introduced in the House of Representatives on April 7, 2003. H.R. 6 contained the legislative work product of the Committee on Energy and Commerce as well as other committees. Hydrogen provisions in H.R. 6 concerning the "FreedomCar" and hydrogen fuel and infrastructure program were consolidated in Division F—Hydrogen. The conference report on H.R. 6 contains Title VIII, Hydrogen, which is based on Division F of H.R. 6, incorporating several elements of S. 14.

The program established under Title VIII of the committee print provides for the production of hydrogen from diverse energy sources, including conventional and renewable energy sources. It also provides for the use of hydrogen in electric power generation and the safe delivery of hydrogen and hydrogen-carrier fuels. The program additionally encompasses advanced vehicle technologies, including automobile materials, energy storage, propulsion and hybrid systems.

Although Title VIII contains necessary appropriations to the Secretary of Energy to fund the activities authorized by the Title, central to the operation of this federal program is the public/private partnership required under Section 803(a). This partnership is reflected within the section 803(b)(1)(A) programmatic goal, specifically the directive to "enable a commitment by automakers no later than year 2015 to offer for sale" hydrogen fuel vehicles. Section 803(b)(2) contains a corresponding programmatic goal of obtaining a private sector commitment, not later than 2015, for necessary hydrogen infrastructure. Under sections 803(b)(1)(A) and 803(b)(2), both the vehicle and infrastructure commitments are followed, by five years, with availability, in the mass consumer market, of vehicles and safe and convenient refueling capacity.

Title VIII, therefore, incorporates the public/private partnership regarding the production of hydrogen fuels, associated hydrogen vehicles and necessary support infrastructure at a basic structural level. Section 803(a)(7), in particular, indicates that the development of necessary codes and standards needed to implement the program take place "after consultation with the private sector." This statutory directive applies to the production, distribution, storage and use of hydrogen, hydrogen-carrier fuels, and related products. Statutory authority conveyed to the Secretary of Energy for the promulgation of "necessary codes and standards" is to be interpreted by the Department of Energy in conformance with the ordinary and regular practice concerning these legislative terms.

The concept of public/private partnership in implementation of the program established through Title VIII is additionally reflected in section 803(d) requiring the conduct of activities to deploy hydrogen energy and energy infrastructure, fuel cells and advanced vehicle technologies. It should be noted that this deployment activity is separate and apart from section 803(c) which requires the Secretary of energy to fund a limited number of demonstration projects. This separation of demonstration and deployment activities is intentional and reflects the fact that such required elements of the hydrogen program are distinct entities.

IN REMEMBRANCE OF GUSTAVO MONTEJANO

HON. GENE GREEN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GREEN of Texas. Mr. Speaker, I rise today to extend my deepest sympathies to the family and friends of my constituent Gustavo Montejano (Mon-tay-HAH-no) and his two daughters, Katia and Esmerelda.

Gustavo Montejano is a true hero. When his family's home caught fire early on Monday morning, Gustavo rushed his wife and 2-year-old son out of the house. He then went back to rescue his two daughters, who were still asleep inside. Unfortunately, the second story collapsed, and the smoke and flames overtook him before he could get his girls to safety. As the headline from the Houston Chronicle reads, "He died hugging his two girls."

While we are all deeply saddened for the Montejano family's loss, I know that those girls were comforted by their father's presence, and that they died together knowing that he loved them so much that he was willing to sacrifice his own life trying to save them.

Gustavo's family remembers him as a kind and generous man, who took in his sister and her eight children when they needed a home.

Despite the fact that he had been laid off from his job, he helped support his sister's family as well as his own, helping to pay bills and care for the children.

I know his wife, Maribel, and 2-year-old son are devastated by this loss, but they should be proud of the great man Gustavo was, and that he died a hero's death.

His loss will be felt by all of Galena Park, and I ask that you remember the Montejano family in your thoughts and prayers.

TRIBUTE TO SPC JEREMY DiGIOVANNI

HON. CHARLES W. "CHIP" PICKERING

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. PICKERING. Mr. Speaker, I rise this evening to pay tribute to Specialist Jeremy DiGiovanni who was killed in action Saturday, November 15, in Iraq. Along with seventeen other American soldiers, including another Mississippian, PFC Damien Heidelberg, Jeremy was killed in the collision of two Black Hawk helicopters.

Jeremy was a member of the A Company, 4th Battalion, 101st Airborne based in Fort Campbell, Kentucky, and he served as crew chief on one of the Black Hawks. Jeremy hailed from Pike County, Mississippi, and he served his country proudly and with honor.

Specialist DiGiovanni made the ultimate sacrifice defending our Nation and helped free millions of men, women, and children from the tyrannical grasp of an evil and brutal dictator. We Mississippians are so proud of the men and women we have serving in Iraq and appreciate their dedication to defending freedom and democracy.

I ask my fellow Members of the U.S. House of Representatives to remember Jeremy and his family during this difficult time. To his family, our prayers are with you, and we are grateful for Jeremy's courage and service to the United States of America.

PROTECTING THE VULNERABLE, ENSURING FOOD SAFETY

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

MS. SCHAKOWSKY. Mr. Speaker, I rise today to address a danger that threatens every one of us—food-borne illnesses. Each year, 76 million people suffer from food-borne illness. Of those individuals, approximately 325,000 will be hospitalized and more than 5,000 will die. Our children, the elderly, and those with weakened immunity systems face an even greater danger. Of the deaths caused by food-borne illness nearly every year, children comprise nearly 40 percent of the victims. I know parents who have lost their children to this threat.

Today, I am introducing legislation, the National Food Safety Database Act, that will give officials charged with caring for our children and our other vulnerable loved ones the information they need to make safe food purchasing choices. My bill will create a national database containing information that documents whether a company has a history of providing safe food—food that has been produced and packaged under sanitary conditions and is properly branded. It will also document any outbreaks of food-borne illness that have originated from the provider and any enforcement actions that have been taken against the provider. Officials at hospitals, nursing homes, schools, and child care facilities can access this database from a secure website and use that information to ensure that they are serving those in their care the safest food possible. The final authority over the information included in this database will be granted to the Secretary of Health and Human Services who will work in consultation with the Secretary of Agriculture. A task force consisting of anticipated users, representatives of food manufacturers, processors, packers, transporters, and representatives of consumer groups will also advise the Secretary as to what information needs to be included to ensure our loved ones' safety. The Secretary will also have the authority to make grants to states to help them access and use the database.

The information that will be provided by the database is critical to public health. We need to prevent outbreaks of food-borne illness in our schools. Earlier this year a school in Illinois received ammonia-tainted food and did not receive adequate notification that the product had been contaminated. Luckily, no one died, but a number of teachers and students suffered. Currently the ability of hospitals, nursing homes, schools, and child care providers to provide quality care is compromised by their inability to get adequate and timely food safety information. Safety histories of the companies are not shared with the officials who purchase the food. Due to a complex web of food manufacturers, distributors and brokers, if the USDA or FDA announces that a manufacturer has produced tainted food, officials often have no way to determine if affected foods are in their kitchens and being served to our loved ones.

A person fed tainted food can experience diarrhea, nausea, vomiting, and abdominal pain. Those in hospitals, nursing homes, schools, and child care centers are by far the most vulnerable among us. Their immune systems are not as strong; their bodies are just not as sturdy. They can become very ill and can even die from food-borne illness, as far too many already have.

Food manufacturers also stand to gain from this bill. Companies that have a history of providing safe food will have that fact known. Should an accident occur and there is an outbreak, it will be much easier for companies to know where the tainted food has gone. The company will be able to stop the outbreak faster and reduce their liability.

I urge my colleagues to cosponsor this legislation that will increase the safety of the most vulnerable in our society. Our loved ones deserve to know that someone is looking out for their safety while they can't do it themselves. Without this bill, we can't make that guarantee.

EDUCATION FUNDING

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. SCHIFF. Mr. Speaker, I rise today to express concern over the failure to fund and adequately implement the No Child Left Behind Act (NCLB).

This bipartisan legislation attempted a comprehensive approach to reforming our schools by refocusing our national education policy on helping states and local school districts raise academic achievement for all children, while providing more funding and flexibility to states and local districts.

The legislation passed with overwhelming support because it included tough accountability requirements aimed at closing the achievement gap between students of different economic backgrounds; stronger professional development standards and training for teachers; additional resources do turn around low performing schools; allowances for an unprecedented level of flexibility for local school districts; and rewards and sanctions for States based on the academic performance of students.

Despite the bill's good intentions and tremendous support in Congress, the legislation has become largely a hollow promise to our children because of inadequate funding. The Administration's budget request this year provided only $22.7 billion for these important education efforts—$9.7 billion less than what Congress agreed was necessary.

The commitment of significant federal funding to assist local schools in meeting the new testing, achievement and training requirements was a solemn promise made to all the children of our nation. NCLB imposes strict standards on our school districts with considerable penalties if they do not comply. But how can our schools be expected to meet these new standards without adequate federal funding to meet these challenging mandates?

For this reason, I have cosponsored legislation, the Keeping Our Promises to America's Children Act of 2003, to suspend application of NCLB until the funding that was promised to our schools is actually delivered to our schools. The alternative merely sets up our schools for failure.

Implementation of this important law has also been unduly harsh. Award-winning science teachers who have excelled at teaching for decades are deemed unqualified because their bachelor's degree was in a different subject. As someone who supported passage of NCLB, I am alarmed by its poor funding and implementation.

Passing the NCLB was only one step in the lawmaking process. To enact real education reform and to implement the new education standards within NCLB, we must appropriate the full funding required, and not blind ourselves in its application. We must not shortchange our children's education.

I ask my colleagues today to reaffirm the Congress's commitment to the No Child Left Behind Act and support full funding authorized by the legislation.

CONGRATULATING BROWNSVILLE PORTER COWBOYS FOOTBALL TEAM

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. ORTIZ. Mr. Speaker, I rise today to congratulate the Porter Cowboys on their incredible season, as they just completed their first-ever winning record and were one win away from a perfect regular season record.

In the almost 30 years of the school's history, the Cowboys football team has endured many tough seasons and constant criticism to their program.

However, last week they won their first-ever playoff game beating PSJA 45–8 and advanced to the second round of the Texas high school playoffs where they now face Gregory Portland. I wish them the best as they continue their amazing playoff run and season.

The Porter Cowboy story is one that has everyone in the community and in the Rio Grande Valley extremely excited and energized. Guided by Coach Jim Helms and his exceptional staff, this talented group of players exceeded virtually all expectations that many had for them coming into the season. Of course, the players and coaches had something else in mind when they were preparing in the off-season and now they are in the middle of a dream season; a season that the faculty, students and families, along with the players, will never forget.

As these Porter players make history on the football field they are now only opening the doors to the future in which they will be part of a generation that will make positive changes to the lives of many living in the community. The same determination and commitment they possess on the football field every Friday night will prepare them to respond accordingly when faced with life's challenges and obstacles.

The Porter Nation as they have come to be known were led by their star quarterback and he was surrounded by a cast of gifted athletes

that contributed to the success of the stellar season. The arsenal in the passing game, complemented with a tremendous defense and an excellent kicking game enabled them to truly dominate their opponents.

I am so proud of these guys and wish them the best as they continue to achieve their goals both on the field and in the classroom.

Mr. Speaker, I respectfully ask that the roster with the names of each player, coach, and trainer be inserted in the CONGRESSIONAL RECORD of the United States House of Representatives.

2003 PORTER COWBOYS FOOTBALL VARSITY ROSTER

Chris Walker, Evy Chavez, Emmanuel Gutierrez, Rick Monsivais, Jason Bernard, Chris Vasquez, Billy Garza, Ivan Villarreal, Michael Verduzco, Mike Salazar, Manuel Hernandez, Steve Garcia, Jimmy Gutierrez, Benny Salazar, Moises Salinas, Ivan Iglesias, and Louie Pineda.

Rogelio Camarillo, Ben Gomez, Jesus Chapa, Carlos Lozano, Angel Ramirez, Jesus Ferrer, Luis Cruz, Jose Izaguirre, Thomas J. Rios, Joe Espinoza, Juan Leal, Javier Ruiz, Josh Burguete, Eli Perez, Ernesto Olivarez, Isaac Almaguer, and Omar Avila.

David Pallares, Emmanuel Lopez, Eliseo Balderas, Christian Lara, Stephen Cisneros, Eber Flores, David Diaz, Julian Mendez, Oscar De Los Santos, Juan Peña, Julius Williams, Frankie Ramirez, Danny Palacios, Juan Perez, Jose Guerra, Will Jaramillo, and Gilbert Flores.

Athletic Director: Joe A. Rodriguez.

Athletic Coordinator: Jim Helms.

Football Assistants: Art Cantu, Ruben Cortez, Bill Deen, Luis Garza, Benny Gonzalez, James Kizer, Abel Moreno, Danny Pardo, Armando Rangel, Tom Rios, Jeffrey Rodriguez, and Jose Luis Zarate.

Trainers: John Prosek and Jerry San Pedro.

HONORING WILLIAM THOMAS (BILL) POWERS

HON. MARY BONO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mrs. BONO. Mr. Speaker, I rise to honor one of the most distinguished and remarkable individuals in the Coachella Valley, a region of southern California which I have the privilege of representing.

Mr. William Thomas (Bill) Powers has established an impressive record of achievement and service, both in his professional career and charitable activities. Since moving to the Palm Springs region in 1986, after a long and successful career in banking in Los Angeles, Bill Powers dedicated himself to enhancing our community's economy and improving the lives of its residents.

Now, our community joins to honor this most deserving individual with the Desert Samaritans for the Elderly naming Bill Powers Good Samaritan of the Year 2003.

A native Californian, Bill is renowned in our community for his many good works and strong stewardship of numerous worthwhile causes. At the same time, Bill has used his keen judgment and extensive professional experience to establish one of the leading financial institutions in California's Inland Empire, Pacific Western Bank.

In Bill's own words he "believes in the community and the people who live here. The best way I know how to give back to the community is through excellent service; I extend that philosophy in both my professional and personal life" and our community is better for his commitment to this code.

Bill and his wife, Anita, have raised a wonderful family. Their children, David and Christie, and their grandchildren, Jessica, Teddy, Tommy, and Hunter are a great source of pride to both Bill and Anita.

Bill has distinguished himself in our area through his ability to combine his love of family with his desire to work tirelessly in both business and community causes. The list of charitable and civic causes that Bill has participated in over the years is literally to vast to list in total, however, it is worth noting that he has served as both President and Tournament Chairman of the Bob Hope Chrysler Classic, a professional golf tournament that has provided immense financial support to those in need in this region. In addition, Bill has served as President or board member for the United Way of the Desert, the American Cancer Society, the John F. Kennedy Memorial Foundation, the Coachella Valley Economic Partnership, Desert Samaritans for the Elderly Board of Governors, the John F. Kennedy Memorial Hospital, College of the Desert Foundation, Yucca Valley Economic Partnership, founding director of the Desert Town Hall Speakers Forum, and as a member of the McCallum Theatre's Board of Trustees, to name a few.

Mr. Speaker, I consider it a privilege to call Bill Powers my friend, and ask that this brief tribute to this accomplished individual be placed permanently in the RECORD. I yield back the balance of my time.

IN HONOR OF GARY SCHLANSKER, CEO OF THE GREENVILLE YMCA

HON. JIM DeMINT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. DEMINT. Mr. Speaker, today I take privilege in honoring Gary Schlansker's 11 years as the President of the Greenville YMCA. Gary has recently accepted the position as the President of the Greater St. Louis YMCA, the 8th largest YMCA system in the country. Gary started his relationship with the YMCA back in 1956 when he was first enrolled in a YMCA program in St. Louis. Gary has indicated that the St. Louis position is the only job that would take him out of Greenville, as Gary grew up in St. Louis and has family in the Show Me State.

The Greenville YMCA has been a model of stability and success for the YMCA system. Since the founding of the Greenville YMCA in 1876, only six people have served as President of the Greenville YMCA.

During Gary's 11 years at the Greenville YMCA, the annual operating budget increased from $4 million annually to in excess of $10 million annually. The Greenville YMCA grew from five branches serving 35,000 community members annually to seven branches with three additional outreach centers serving a total of 55,000 people annually. The annual scholarships campaign increased by over 200 percent and collaborations with the greater community now number in excess of 85 annually. Program highlights for the Greenville YMCA include Camp Greenville, Youth in Government, and outreach services through schools and churches. The Youth in Government program of South Carolina is sponsored exclusively through the Greenville YMCA, and is one of the most successful Youth in Government state programs in the country.

Gary's stewardship of the Greenville YMCA is accurately reflected by the tremendous growth and success of the Greenville YMCA. Not only is the growth of the Greenville YMCA impressive, but very importantly the kind and caring manner that Gary has conducted himself on a daily basis will be greatly missed by those who he has served in the Greenville area.

I sincerely wish Gary all the best for a nice start to his new job leading the St. Louis YMCA, as they are getting a wonderful workhorse of a leader to guide their YMCA. Thank you Gary for your 11 great years in Greenville, and we will miss you.

TEMPORARY AGRICULTURAL LABOR REFORM ACT OF 2003

HON. BOB GOODLATTE

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. GOODLATTE. Mr. Speaker, I rise today to introduce the Temporary Agricultural Labor Reform Act of 2003, a bi-partisan bill to reform the H–2A guest worker program. As Chairman of the House Agriculture Committee, I have traveled across the Nation and seen first-hand that the H–2A temporary visa process is not working. I have talked face to face with producers who have to deal with participating in a costly, time-consuming and flawed program. Employers have to comply with a lengthy labor certification process that is slow, bureaucratic and frustrating. In addition, they are forced to pay an artificially inflated wage rate. My bill will streamline the labor certification process while also creating a wage standard that is more fair and realistic.

Likewise, as a long-time Member of the House Judiciary Committee, I understand the immigration problems that currently face our country. Illegal immigration penalizes those legal immigrants and citizens who play by the rules. It is estimated that there are between 8 and 11 million illegal aliens currently living in the United States. This population grows by over 350,000 each year. Clearly, this situation has reached crisis proportions and cannot be allowed to continue.

Some believe that the only way to reform the guest worker program is by including amnesty provisions and allowing illegal aliens to adjust to Legal Permanent Resident (LPR) status. However, this would create the wrong incentive by encouraging foreign nationals to come into the country illegally in the hopes that they, too, will be rewarded for their illegal

actions. Amnesty is not the answer to our Nation's illegal immigration problem.

My bill would not grant blanket amnesty. Instead, it would allow the large population of illegal farm workers one chance to come out of hiding and participate legally in the guest worker program. Potential workers would be required to return to their home countries and apply for the program legally from there.

In addition, this legislation would address a troublesome wage issue. Employers are required to pay an inflated wage called the Adverse Effect Wage Rate or AEWR. The AEWR was designed to protect similarly situated domestic workers from being adversely affected by guest workers coming into the country on a seasonal basis and being paid lower wages. However, the shortage of domestic workers in the farm workforce forces employers to hire foreign workers, and thus, is also forcing them to pay an inflated wage. My bill abolishes this unfair wage and creates a prevailing wage standard, under which, all workers are paid the same wage as workers doing similar work in that region.

The facts are simple. Agriculture needs a reliable guest worker program. Workers need access to stable, legal, temporary employment. It is in our national security interest to create a sensible way for workers to come in on a temporary basis, work, and go back to their home countries. My bill addresses the problems in the current guest worker program, and I look forward to working with all of the Members in this body to reform this program and make it a more viable process for everyone involved.

ARSENIC-TREATED WOOD PROHIBITION ACT

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Ms. SCHAKOWSKY. Mr. Speaker, I rise today to address the dangers posed to the public health by arsenic-treated wood. Most of the lumber sold for outdoor use in our schools' playgrounds and in our own private backyard decks is pressure-treated and injected with toxins to preserve the wood and prevent insect infestation. The most common wood preservative and pesticide used is chromated copper arsenate (CCA), which is 22 percent pure arsenic. The inorganic arsenic used in CCA-treated wood is a known carcinogen and has been linked to skin, bladder, liver and lung cancers. The arsenic in CCA-treated wood has been shown to leach out, ending up in the soil in our back yards and playgrounds, rubbing off onto our clothing, and wiping off onto our hands.

Today, I am re-introducing a bill to begin to remove this threat, the Arsenic-Treated Wood Prohibition Act. This bill will prohibit the use of CCA treated lumber once and for all. This legislation will protect children and families by mandating the phase out of arsenic in pressure treated lumber and will ensure that arsenic treated lumber is disposed of safely. Specifically, my bill will: phase-out the use of arsenic-treated wood in residential settings; require the disposal of arsenic-treated wood in lined landfills to prevent contamination of groundwater; require the Environmental Protection Agency (EPA) to finally complete its risk assessment regarding arsenic-treated wood; provide monetary assistance to schools and local communities to remove arsenic-treated wood from their playgrounds; and direct the Consumer Product Safety Commission (CPSC) to complete its mitigation studies to determine the effect of sealants in preventing exposure to residues of CCA on treated wood. This bill would save lives and protect our environment.

Recent actions by the CPSC and preliminary findings released by the EPA make it even more important that we in Congress pass this legislation. Despite their own findings found that of every 1 million children exposed to the treated wood three times every week for five years, two to 100 of them might develop lung or bladder cancer later in life, the CPSC recently decided to deny a petition to ban the use of arsenic-treated wood in playground equipment and to recall existing playground structures using CCA-treated wood (HP–01–3). In their statements denying the petition, the CPSC Commissioners cited that a voluntary agreement between the EPA and CCA-treated wood manufacturer's to voluntarily phase-out the production of the product. The Commissioners reasoned that rulemaking on the subject would be both unnecessary and redundant. They further cited that the CPSC did not have the authority to initiate a recall before the risk assumptions made in the Commission's staff study could be verified.

On November 13, a draft probabilistic exposure assessment released by the EPA confirmed the CPSC's earlier findings. The study concluded that the cancer risk for children who repeatedly come in contact with commonly found playground equipment and decks made of arsenic-treated wood is considerably greater than EPA officials indicated last year. The agency's preliminary findings show that 90 percent of children repeatedly exposed to arsenic-treated wood face a greater than one-in-1 million risk of cancer. The risk associated with exposure to arsenic-treated wood appears to be up to 100 times greater in the warmer climates of southern States than in the general population since children tend to spend more time playing outdoors. This risk passes the EPA's historic threshold of concern about the effects of toxic chemicals.

In light of these facts, I believe that we must take immediate action. I believe that a voluntary phase-out of this potentially harmful product is not adequate. Initiating a ban on CCA-treated wood would greatly increase public awareness of the dangers that existing arsenic-treated wood presents. By failing to ban CCA-treated wood, we are ignoring the responsibility to protect and promote the best interests of consumers. I strongly believe that a legislative mandate permanently banning its use and providing for its safe removal is critical to ensuring the safety of children and their families.

The effect of arsenic in our environment is undeniable: it kills. Arsenic-treated wood is a danger to the future health of America's families. I encourage my colleagues to join me in this very important effort to remove this threat.

TRIBUTE TO PFC DAMIEN L. HEIDELBERG

HON. CHARLES W. "CHIP" PICKERING

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. PICKERING. Mr. Speaker, I rise this evening to pay tribute to Private First Class Damien Heidelberg who was killed in action Saturday, November 15, in Iraq. Along with seventeen other American soldiers, including another Mississippian, Specialist Jeremy DiGiovanni, Damien was killed in the collision of two Black Hawk helicopters.

Damien was a member of the First Battalion, 187th Infantry Regiment, 101st Airborne based in Fort Campbell, Kentucky. The little town of Shubuta, Mississippi was home to Damien. He was the ninth Mississippian to die in Iraq since the war began, and he served his country proudly and with honor.

PFC Heidelberg made the ultimate sacrifice defending our Nation and helped free millions of men, women, and children from the tyrannical grasp of an evil and brutal dictator. We Mississippians are so proud of the men and women we have serving in Iraq and appreciate their dedication to defending freedom and democracy.

I ask my fellow Members of the U.S. House of Representatives to remember Damien and his family during this difficult time. To his family, our prayers are with you, and we are grateful for Damien's courage and service to the United States of America.

THE LIMITS AND LIABILITY OF POWER: LESSONS OF IRAQ

HON. JAMES A. LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 21, 2003

Mr. LEACH. Mr. Speaker, the issue of our engagement in Iraq demands that we as a society probe the question of the limits of a superpower's power and the possible anomaly that there are severe liabilities to power, particularly for a superpower.

Does, for instance, overwhelming military might protect us from terrorism or, if used unwisely, increase our vulnerability to terrorism?

Likewise, does overwhelming economic power ensure loyalty or buy friendship even from the countries most indebted to the U.S.?

In other words, can military and economic might ever become a substitute for sensible and sensitive foreign policy?

And given the dilemma of Iraq, could it indeed be that the most important "multibillion" problem America faces is not deficits measured in dollars, fiscal or trade, but the antagonism of billions of people around the world who object to our current foreign policy?

Here, let me say that I strongly believe in the need for clarification of thought as it applies to policy, and anyone who wishes to review the reasoning I have applied to the Iraq issue, ranging from a floor explanation of a "no" vote on the Congressional resolution authorizing war last year to calls for internationalizing the civil governance in Iraq last month, to

a vote in favor of generosity in reconstruction efforts last week, can find the explanatory statements on my Congressional web site: www.house.gov/leach.

What I would like to do today is summarize the dilemma we face and make the following points about where we might go from here:

(1) There are no certitudes. Anyone who was not conflicted on the original decision to approve intervention or who does not see a downside to all courses of action today is not approaching the problem with an open mind. America and the world are in a strategic pickle. In an era of anger, of divisions in the world based on economics, on color of skin, on ethnicity, on religious belief, on happenstance of family and place of birth; in a world made smaller by technological revolutions in communications and transportation, those who have causes—good or bad—have possibilities of being heard and felt around the globe that never existed before. Great leaders like Gandhi and Martin Luther King appealed to the higher angels of our nature and achieved revolutionary change with non-violence. Mendacious leaders like Hitler, Saddam Hussein and Osama bin Laden have sought to impose their wills on others through appeals to hate and reliance on increasingly wanton instruments of oppression.

As the world's only superpower, the U.S. has no choice but to display firmness of purpose and resolve in deterring inhumane breaches of order. Yet, firmness and resolve must be matched by compassionate understanding of the reasons people of the world lash out. We have the world's greatest armed forces. But these forces cannot successfully be deployed to counter international misconduct if we don't also seek to undercut the causes of such conduct.

Reviewing the causes of World War I, historians quickly concluded that there was not enough flexibility in the European alliance system and that this allowed a rather minor event, the assassination of an Austrian archduke, to precipitate a cataclysmic war. With this example in mind, political leaders in the 1930s erred on the side of irresolution, which led them to Munich and the partition of Czechoslovakia. Too much inflexibility caused one war; too little spine a greater one.

The problem today is not whether we should meet problems with firmness or compassion. We need both. The problem is determining when and how to respond with firmness, when and how to express compassion. As in all human conduct, the challenge is wisdom.

(2) We must listen as well as assert. Four decades ago the British author Lawrence Durrell wrote a series of novels called the Alexandria Quartet, in which he describes a set of events in Alexandria, Egypt, preceding World War II. An experiment in the relativity of human perception, each of the four books views the same events through the eyes of a different participant. While the events described are the same in each book, the stories as told by each of the participants are surprisingly different. The reader comes to the realization that a broad understanding about events that transpire can only be developed by synthesizing the singularly different perceptions of various protagonists.

To understand the Middle East today, we need to listen to everyone's story.

(3) To shape or deter an opponents' actions, we need to understand how they think. American policy makers, at their best, reason in a pragmatic, future-oriented manner. In much of the rest of the world, on the other hand, people reason by historical analogy. Events dating centuries back, especially umbrages, dominate thinking about today. People in the Middle East, like the Balkans, are oriented to the past and are driven by ideas of honor of a different shape and emphasis than those we derive from American culture.

(4) No country can go it alone for long and expect to be respected as an international leader. Doctrines of American exceptionalism—the precept that we should not be bound by legal or procedural norms that bind others—which are now fashionable in certain Washington ideological circles have led to intervention in Iraq without full UN sanction. Ironically, prior to 9/11 these same notions led to rejection of a Comprehensive Test Ban Treaty and of upgraded verification provisions for the 1972 Biological Weapons Convention—agreements that would have stood in the way of WMD production in Iraq and provided a legal basis for possible armed intervention if violations occurred. The world is crying out for leadership in restraining weapons development. We are not providing it because Washington policy makers prefer that restraint on others not apply to ourselves.

(5) When Washington policy makers speak on foreign policy they must understand that their audience is more than one party's political base. While Saddam Hussein is widely perceived to be the worst sort of tyrant, many people around the world view us as bullies for attacking a sovereign country without prior armed provocation. That is why it is so critical that a case for intervention should be based on concern for the well-being of others as well as the U.S. national interest.

For foreign policy to be effective, it must be clearly articulated and convincing in those parts of the world most affected by it.

(6) We must rededicate ourselves to building up an intelligence capacity that better understands the Middle East and the Islamic world and is less susceptible to being politicized. Our inability to understand Islamic culture resulted in the greatest intelligence failure of our era. It is, however, not the sole intelligence failure. In one of the greatest judgmental errors of our time we appear to have attempted to combat the ideological posturing of others by slanting our own intelligence. Based on what is known today, policy makers not only erred in assessing Saddam Hussein's WMD capacities, but put too much faith in a narrow cadre of ideologues who suggested the U.S. would be welcomed as a liberating rather than conquering or, worse yet, colonizing force in Iraq. Estimates of the costs of war, of the ramifications of involvement, of the expected reaction of the population and of the likelihood of foreign support were dead wrong.

(7) It is the responsibility of public officials to ensure that no American soldier is deployed as a defenseless magnet for terrorist attack—or in such a way as to incite foreign radicals to commit terrorist acts in America itself.

American soldiers have been trained to withstand the heat of battle in defense of America and American values. For two and a quarter centuries no country has been more effectively or more courageously served by a citizen soldiery than the United States. In Iraq, our armed forces could not have performed more professionally or valiantly than in the initial engagement. But the difference between service in combat and service in occupation of a foreign land, especially an Islamic society, is profound. In Iraq, which is fast becoming for us much like Algeria was for the French in the 1950s, our men and women in uniform are increasingly facing hit-and-run terrorist assaults, which are much more difficult to defend against than traditional military confrontations.

The challenge of policy makers is to recognize that there is a distinction between three endeavors: warfare, reconstruction and occupation. Our armed forces are trained to prevail in the first; they can be helpful in the second; but in the Islamic world no outside power is ever going to be well received as an occupying force. Hence, strategies that emphasize the first two endeavors and don't lead to long-term reliance on the third should be the goal of U.S. policy makers.

(8) Responses to terrorism often lead to escalating action/reaction cycles. When our forces become subject to terrorist assaults and the perpetrators disappear into their neighborhoods, we, like Israel, will inevitably be tempted to retaliate in ways that may intensify rather than restrain future violence.

Calls will be made not only to use air power in urban areas but to double or triple troop deployments, perhaps without adequate assessment of what such troops will be assigned to do. In conventional warfare, the case for overwhelming superiority (sometimes referred to as the Powell Doctrine) is compelling. In a terrorist setting, as in modernist design, less can often be more. There may be cases where deploying a large force to combat terrorism is appropriate. There may also be cases—and I believe Iraq is one—where additional soldiers simply become additional targets, and a different mix of strategies is both preferable and more effective.

(9) To defend against terrorism, especially when it is fueled by an explosive mixture of religious and nationalist sentiments, requires frank acknowledgment of the nature and depth of the problem.

For months, the administration has suggested the problem in Iraq is limited to 5,000 dissidents. This is a 5-digit miscalculation. At least half the Muslim world—over 500,000,000 people—are outraged by the U. S. government's attitudes and action. Long simmering resentment of American policies in Muslim countries like Indonesia has in recent months metastasized into hatred. And in Europe, including what the defense secretary called the ''new Europe,'' as well as in South and East Asia, respect for American policy is in steep decline.

In the Vietnam War we gave a great deal of attention to the notion of ''winning the hearts and minds'' of the people. We didn't succeed in convincing the Vietnamese or world opinion of our good intentions despite the horrendous tactics of the Vietcong and the Communist North. Today, Americans must understand that in the battle for the minds of men, particularly in the Moslem world, we are doing less well

than even in the most difficult days of the Vietnam War. In this context, we would be well-advised to remember America's original revolutionary commitment to a decent respect for the opinions of mankind.

(10) While, for the time being, security in Iraq must remain the responsibility of U.S. military commanders in the field, we would be wise to put an international face on civil governance in the country and ask Secretary General Kofi Annan to immediately appoint a top civilian administrator to whom Ambassador Bremer and his staff would report.

Transfer of interim civil authority to the UN would provide greater legitimacy to the formation of a new Iraqi government and encourage other countries to help with economic reconstruction and security requirements. We should also work to transfer, as soon as practicable, responsibility for internal security to troops of other nations or the Iraqis themselves. Transferring the police function to others is a way to build up Iraqi's own postwar internal security infrastructure and make evident that the U.S. does not desire long term control.

(11) We should also move forthwith to transfer more political control to the Iraqi Governing Council and press for immediate elections and constitution writing. Some argue that stability is more likely to be achieved with a long U.S. occupation. I believe the reverse is true. The longer we are in Iraq, the greater the instability there and the greater the likelihood that terrorism will spread to other countries, including the United States.

(12) America cannot cut and run politically, economically or militarily, but we would be wise to announce a timetable for troop withdrawal, by the end of next year at the latest. Some experts in and out of government believe that American troops should stay in and control Iraq at least as long as we did in Japan and Germany after World War II. Such a time table (a minimum of 5 years) is out of sync with the times and the mood in the Islamic world.

The world is more impatient today and Muslims in particular are more history sensitive than ever before. While we assume the Iraqi populace should accept the American presence because of our good will, the Muslim world sees our forces as a compounding of grievances dating back to the crusades and, more recently, to American support of Israel. The imagery AlJazeera projects of Baghdad is that of another West Bank. In this context, American commitments to ''slog on'' interminably play into the hands of extremists. All extremists have to do is continue blowing up a vehicle or two every day, thereby eliciting a military reaction that we might view as reasonable but that the Islamic world is likely to see as heavy-handed, angering the populace and emboldening further dissent.

The longer we stay, the greater the opportunity for al Qaeda and radical Baath party supporters to claim that the war is continuing and that they are prevailing. To prevent this and to keep control of events we would be wise to announce a withdrawal timetable that we, not they, control. Setting such a timetable has the effect of asserting that the war itself is over and we prevailed, and that Iraqis cannot dither in establishing a legitimate, elected government.

A drawn out occupation plays into the hand of radicals. It gives them a rallying cry to keep up resistance in Iraq and expand terrorist assaults around the world. It gives them the chance to suggest that America is bent on continuing the crusades and, when we eventually withdraw, the prospect of claiming that they won the war. On the other hand, if we set a firm schedule for drawing down our troops, we define the war as being over in its 3rd week, not in its 6th year. An announced time table can later be modified to allow, for instance, a small force to remain briefly in northern Iraq to maintain sovereign cohesion. Timetables can also be abbreviated. But the point is that they underscore our reluctance to become an imperial power and, perhaps more importantly, our determination to control our own destiny.

(13) It is critical to the security of our troops, as well as Iraqi security, that we create an Iraqi police force as soon as possible. Responsibility for domestic security is an internal not external matter. We can't be their policemen and if we persist in trying, we will make it harder for stability to be established and maintained.

Students of international politics have for the past generation questioned the capacity and moral authority of any country to be policeman for the world. But little academic attention was devoted to the challenge of being policeman within a country after the conclusion of a conflict. We have little experience with such a responsibility. In Japan, MacArthur relied on indigenous Japanese police; in Germany, we quickly reconstituted a German constabulary at most local levels.

Common sense would indicate that trying to police a country the size of France with soldiers unfamiliar with the language and culture of the society, untrained in the art of policing, and unwelcome and resented in critical cities and towns must be a nearly impossible task. Hence the need to expedite the training of an indigenous Iraqi police force.

(14) We should announce that we have no intention of establishing permanent military bases in Iraq. Some Washington policy makers want such bases but they would be a political burden for any new government in Baghdad and a constant struggle for the U.S. to defend. Defense of American bases in Iraq from terrorism in the 21st century is likely to be far more difficult than the challenge we foresaw of maintaining U.S. sovereignty over the Panama Canal in the 20th century. The reason the Department of Defense concluded in the Carter administration that it was wise to transfer control over the Panama Canal to Panamanians was the estimation that the Canal could be defended against traditional aggression but not sabotage or acts of terrorism. It seemed wiser to respect nationalist sentiment and provide for a gradual transfer of the canal to local control than to insist on quasi-colonial assertions of power.

There are many reasons why Europeans are so smugly opposed to our policy in Iraq. One is historical experience with colonialism. The French were chased out of Algeria, the Russians, and earlier the British, out of Afghanistan. U.S. intervention in Iraq is seen in Europe as not too dissimilar to the British and French effort to re-establish control over the Suez Canal in 1956. It is noteworthy that the Islamic world deeply appreciated President Eisenhower's refusal to back the British and French intervention in Egypt. Europeans now think that the shoe is on the other foot. We appear insensitive to history.

(15) Credit will remain the dominant economic issue until Iraq's foreign debt is reduced or canceled. Neither significant private nor large scale public credit will be made available to Iraqis until the burden of old debt is lifted. Accordingly, we should press vigorously for Saddam-era debt—which went largely to build palaces for Saddam's family and to buy weapons of aggression—to be written off. We should also press to establish community-centered banks and credit unions where micro credit can be offered. Oil wealth has its advantages only if revenues are used for the benefit of society rather than political insiders. Increasing petroleum production is not enough. Oil is not a labor intensive industry. Jobs matter, and Iraq needs bankers and small business entrepreneurs far more than oil barons. We have no choice except to help rebuild Iraq's oil infrastructure, but we must make clear that we have no intention of controlling Iraq's oil reserves. The natural resources of Iraq must be treated as the patrimony of the Iraqi people.

(16) Economic assistance to Iraq should be front-loaded and generous. War has been a constant of history, but the concept of reconstruction is relatively new. The 20th century gave us two vastly different models. At the end of World War 1, the victors imposed retributive terms on Germany, which so angered German society that it turned to fascism. World War II was the result.

The allies took a different approach at the end of World War II. Generosity was the watchword. The Marshall Plan was adopted to rebuild Europe and Gen. MacArthur directed the reform and modernization of Japan. Model democracies emerged. The world was made more secure. The economic plan for Iraq should be two-pronged: debt forgiveness coupled with institution building. A better world is more likely to emerge if the American agenda places its emphasis on construction rather than destruction.

Here a note about the other reconstruction model in American history is relevant. With his call for malice toward none, Lincoln's second inaugural address set the most conciliatory tone in the history of war. His successor once removed, U.S. Grant, proved to be a more proficient soldier than President and countenanced carpet bagging conflicts of interest. Our government today would be well advised to recognize that neither history nor the American public approves of war or post-war profiteering. Great care has to be taken to ensure transparency and integrity in government contracts and common sense would indicate that the more Iraqis are involved in rebuilding their own society, the more lasting such efforts are likely to be.

(17) Terrorism affects world economics as well as politics. Markets depend on confidence and nothing undercuts confidence more than anarchist acts. Policies designed to deter terrorism can be counter-productive. International disapproval of our actions may jeopardize our

economy and diminish the credibility of our political leadership in the world. Increased terrorism could well have the dual effect of precipitating new U.S. military engagements and, ironically, strengthening isolationist sentiment—which, in turn could degenerate into a disastrous spiral of protectionism.

(18) The measure of success in reconstruction is not the sum of accomplishments. In the Vietnam War the Pentagon gave progress reports that came to be symbolized by its body counts. One of the most liberal critics of that war, I.F. Stone, once commented that he accepted the validity of the body counts but thought that they did not reveal the big picture. It would be as if, Stone suggested, he were to be walking down the street and bump into a man running out of a bank waving a gun and carrying a satchel full of money, and were to ask the man, ''What are you doing?'' If the man responded, ''I'm waiting for a car,'' the man would be telling the truth but not revealing the big picture.

Good things are being accomplished in Iraq, particularly in the North where an American general has won a measure of popularity through progressive stabilization initiatives. Yet terrorism cannot credibly be contained in the arms-infested Iraqi environment. American civilians as well as armed services personnel who have been posted to Iraq deserve to be commended for their commitment and sacrifices, but prudence suggests that brevity of service is preferable to a long standing presence. Otherwise, in a world where terrorism is a growth industry even extraordinary sacrifice and significant accomplishments could be for naught.

(19) We must respect Iraqi culture and work to ensure that the art and artifacts of this cradle of civilization are preserved for the Iraqi people. There are few umbrages more long lasting than cultural theft. Cultural looting must be stopped and the market for stolen antiquities squelched. For our part we should ensure that Iraqi cultural sites are protected and that our laws are upgraded. Any stolen antiquities brought to America must be returned.

(20) The war in Iraq should not cause us to forget Afghanistan. While the center of our military attention may at the moment be Baghdad, we must remember that no Iraqi was involved in hijacking the planes that struck the World Trade Center and Pentagon on 9/11. Few countries are more distant physically or culturally from the United States than Afghanistan, yet it is there where the plotting for that terrorist act began. The Taliban have been removed and a new, more tolerant government has been established, but the world community has not fulfilled its commitments to raise that country out of poverty and warlordism. The U.S. cannot continue to be complacent about economic and social development in that country, where foreigners have never been welcome. Failure of the Karzai government and a return of the Taliban would be a major setback in the battle with terrorism.

(21) Lastly, and most importantly, U.S. policy makers should never lose sight of the fact that events in Israel and Iraq are intertwined and that no challenge is more important for regional and global security than resolution of the Israeli-Palestinian dilemma.

Extraordinarily, administration after administration in Washington seems to pay only intermittent attention to this issue. There should be no higher priority in our foreign policy than a resolution of the Arab-Israeli conflict. Attention in Washington should be riveted at all times on this singular issue. The current status quo is good neither for Israel nor for the Palestinians. Now, for the first time lack of progress in establishing a mutually acceptable modus vivendi between the parties may be even more damaging to countries not directly involved in the conflict. The need for U.S. leadership in pressing for peace has never been more urgent. It would be a tragedy if, focussed on making war in one part of the Middle East, we neglected to promote peace in another.

In conclusion, the world is noting what we are saying and what we are doing. Many are not convinced by our words; many are appalled by our actions. Yet nothing would be worse for the world than for us to fail. We must not. The key at this point is to recognize the limits as well as magnitude of our power and emphasize the most uplifting aspects of our heritage: democracy, opportunity, freedom of thought and worship. Differences we must respect; intolerance we must reject. But America does better as a mediator and multi-party peace maker than as a unilateral interventionist. This is the great lesson of the past year.
