Congressional Record

PROCEEDINGS AND DEBATES OF THE 108th CONGRESS, FIRST SESSION

SENATE—*Thursday, November 20, 2003*

The Senate met at 9:30 a.m. and was called to order by the President pro tempore (Mr. STEVENS).

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O Lord most holy, Who has found us wanting and yet has not forsaken us, deliver us from insincerity and thoughtlessness.

Help the leaders of this body to be strong and courageous. Keep them from deviating from the path of integrity and remind them of the importance of seeking Your wisdom. Give them an awareness of Your abiding presence and supply their needs. Help them never to fail to do what they can to establish peace and justice among nations.

Lord, make each of us instruments of Your peace, carving tunnels of hope through mountains of despair. May we remember that You have determined our path and You direct our steps. We pray this in Your powerful Name. Amen.

PLEDGE OF ALLEGIANCE

The PRESIDENT pro tempore led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. FRIST. Mr. President, this morning, the Senate will resume consideration of the Energy conference report. A number of Senators came to the floor to speak on the Energy conference report yesterday. We had a good debate, good discussion, and the Senate will continue this debate throughout today's session.

I do remind my colleagues that a cloture motion was filed on the conference report during yesterday's session, and that cloture vote will occur on Friday morning.

As we all know, we are scheduled to consider several major pieces of legislation over the next few days. In addition to the appropriations measures and the Medicare reform package, there will be other conference reports that will become available for Senate consideration, and we will attempt to clear those measures for Senate action as they arrive.

In addition to that, we will also continue to work through nominations on the Executive Calendar. There are some roadblocks right now, but we are doing our very best to address those. There are a number of important nominations that are ready for confirmation, including judicial nominees who should be cleared, the Department of Homeland Security positions, a number of ambassadors, Health and Human Services officials, and the list goes on and on. They are ready for confirmation.

I understand there are Members who are objecting to all of those nominations. I urge my colleagues to allow us to schedule votes on at least the noncontroversial nominations. Some of these nominations are being held up by colleagues who say nothing is going to go through. At least let the noncontroversial nominations proceed. It is clear we can't, in these final few days, be held hostage to unrelated matters on these important nominations.

I mentioned the Senate will need to work this weekend in order for us to finish all of our business. We will have a clearer picture as to what to expect over the course of the weekend as this day progresses. I do alert everyone that the likelihood of being in Saturday is very high and possibly for a period of time on Sunday as well.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. DASCHLE. Mr. President, the majority leader has been consulting with us with regard to the schedule. I share his view that there is an opportunity here for us to complete our work, if we can find a way to resolve the remaining issues before the Senate. We have a lot of work to do on conference reports, on the omnibus legislation, and on certain nominations.

I will say there are a number of holds on the nominations in part because of a misunderstanding perhaps with the White House on a particular nominee that has to be resolved if we are to move forward on these nominations. I am hopeful that can be done perhaps as early as today. That is one of the major obstacles to addressing successfully a number of other nominees.

This is going to be a busy week. I certainly urge our colleagues not to make plans for Saturday or Sunday until we know better what the scheduling entails. I think it would be important for us to give our Members adequate notice with regard to the schedule, perhaps once or twice a day updating people as to what the schedule may hold. We will certainly work with the majority leader in attempting to address the many challenges we face with regard to the legislative schedule yet before us.

I yield the floor.

The PRESIDENT pro tempore. The majority leader.

Mr. FRIST. Mr. President, the Democratic leader and I have been in consultation and will continue to be in consultation over the course of the day—as he suggested, pretty much every few hours—to facilitate what is going to be a challenge in moving in a reasonably orderly way all that we have on the table.

I do want to mention in my opening comments that we are very close to addressing Healthy Forests. I plead with everyone, hopefully over the course of this morning, to resolve whatever remaining issues there are in terms of holding up that legislation. If we go to conference quickly, that very important legislation will be addressed. I think we are just about there. We were just about there last night. If we can

● This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

get that over the goal line this morning, that would be helpful.

The PRESIDENT pro tempore. The minority leader.

Mr. DASCHLE. Mr. President, I am pleased the majority leader mentioned Healthy Forests. I would have done it if I had remembered. Of course, Senator COCHRAN and I had a very good conversation yesterday. Based on that conversation and his assurances that extraneous material would not be included in conference, we are prepared to go to conference now.

We have had good success in reaching agreement on the forest health provisions of the bill. There are other issues that still remain to be addressed. I share the view of the majority leader that we are now at a moment where I think we ought to try to complete our work. It would be great if at the end of the day we could set aside the pending legislation and pass that conference report. I think we are going to get a good broad bipartisan vote on the legislation. I applaud those who have taken us to this point. This is good legislation. It deserves support. I look forward to finishing work on that bill as well.

I yield the floor.

RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

ENERGY POLICY ACT OF 2003—CONFERENCE REPORT

The PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of the conference report accompanying H.R. 6, which the clerk will report.

The legislative clerk read as follows:

Conference report to accompany H.R. 6, an act to enhance energy conservation and research and development, to provide for security and diversity in the energy supply for the American people, and for other purposes.

Mrs. FEINSTEIN addressed the Chair.

The PRESIDENT pro tempore. The Chair is in doubt. Under the previous order, the Senator from New Mexico was to be recognized first.

Under the previous order, the Senator from California is now recognized for 60 minutes.

Mr. REID. Mr. President, we received word Senator DOMENICI would not be here this morning. Of course, he is managing this bill. Whenever he comes, we will work him into the order.

The PRESIDENT pro tempore. The Chair thanks the Senator from Nevada.

(Mr. SMITH assumed the chair.)

Mrs. FEINSTEIN. Mr. President, I have come to the floor as a Californian to say there is very little in this Energy bill for California. There is very little to prevent future blackouts. There is nothing to protect consumers from manipulation and gaming of the system that we experienced a few years ago.

There is nothing to improve our Nation's energy security by increasing fuel economy standards. In short, from a California perspective, I see this bill as one giant giveaway to special interests, particularly the ethanol, the MTBE, the oil, the gas, and the nuclear power industries of this country.

I had hoped that this Congress, and in particular the Energy Committee on which I serve, following the Western energy crisis and last summer's blackout in the Northeast, would pass a sensible bill that would improve our Nation's energy supply while protecting consumers, the environment, and the economy. But as I read this bill, that is not the case. This Energy bill was drafted behind closed doors, without any input from Democratic conferees or from those of us on my side of the aisle on the Energy Committee. Simply put, it is one of the worst pieces of legislation I have seen in my time in the Senate.

It is interesting that today on every Member's desk is a summary of editorials. There are over 100 editorials from newspapers, large and small, all across this great country saying "oppose this bill." In fact, 100 newspapers around the country have come out opposed to the bill and editorialized against it. I will quote from one of them. Let me begin with the newspaper whose editorial policy is generally very conservative, and that is the Wall Street Journal. Let me read what the Wall Street Journal says about this legislation:

We realize that making legislation is never pretty, but this exercise is uglier than most. The fact that it's being midwifed by Republicans, who claim to be free marketers, arguably makes it worse. By claiming credit for passing this comprehensive energy reform, Republicans are now taking political ownership of whatever blackouts and energy shortages ensue. Good luck.

Now I will go to yesterday's Denver Post. The editorial is entitled "Energy Bill Full of Pork."

The bill does include funds for energy conservation, including some incentives for "green" construction, but some sound suspicious. Some $180 million will pay for a development in Shreveport, LA. That project will use federal tax money to subsidize the city's first-ever Hooters restaurant. What a new Hooters has to do with America's energy situation may be best known to U.S. Rep. Bill Tauzin, a Louisiana Congressman and key player in the secret conference committee talks.

The bill provides no real vision, represents no real improvement in policies and laws. It is vexing that Congress did not seize an opportunity to improve the national energy picture. Congress should start over next year.

Let me now go to the Northeast, a large newspaper, the New York Times:

The oil and gas companies were particularly well rewarded—hardly surprising in a bill that had its genesis partly in Vice President Dick Cheney's secret task force. Though they did not win permission to drill in the Arctic National Wildlife Refuge, they got a lot of other things, not only tax breaks but also exemptions from the Clean Water Act, protection against lawsuits for fouling underground water and an accelerated process for leasing and drilling in sensitive areas at the expense of environmental reviews and public participation. Meanwhile, the bill imposes new reliability standards on major electricity producers, but it is not clear whether it would encourage new and badly needed investment in the power grid.

Now let me go to the Midwest to the Chicago area, the Chicago Tribune.

Despite all the years of partisan haggling that preceded it, the approximately 1,400-page energy bill that Republicans unveiled over the weekend, and which Congress is expected to vote on this week, is no masterpiece of compromise or even effective legislation.

It is more like a jigsaw puzzle with hundreds of unrelated pieces crammed together. A few initiatives are worthwhile, most look more like a laundry list of special-interest subsidies. Together, they don't add up to a policy that will promote energy self-sufficiency or stable prices.

Then let's go to one of the Chair's own newspapers, the Anchorage Daily News, which states:

What's left is a grab bag of lesser measures and pet projects patched together in hopes of gaining enough votes to pass in the House and Senate. The result is an energy bill that likely will pass—but not a coherent energy policy for a nation critically dependent on imported energy supplies.

Then let's go to the Houston Chronicle, and I will not read it all:

The most pressing problem facing the Nation is its increasing reliance on imported oil and gas. Yet the bill ignores several obvious avenues for progress.

The Republican draft of the bill set no standard for renewable sources of power, such as solar and wind. The latter will provide 2 percent of Texas' electricity supply and one day could spell the difference between air conditioning and brownout. There is no reason for Congress to ignore these pollution-free, alternative energy sources, and the conference committee should adopt a Senate amendment requiring expanded production of renewable energy.

Now, let me take a moment here to elaborate on this point. On Monday, during the Energy Conference, I was pleased an amendment requiring utilities to generate 10 percent of their energy from renewable sources was included in the bill. Unfortunately, this provision was stripped out of the conference report by the House just hours later. Although the bill does have requirements for renewable energy in government buildings, that is not enough. We need to encourage the use of this clean technology at a national level.

Finally, I would like to move to the west coast, to the largest newspaper, the Los Angeles Times. Their editorial is entitled "An Energy Throwback." They say:

It's clear why Republican leaders in Congress kept their national energy policy bill locked up in a conference committee room for the last month, safe from review by the public. Taxpayers, had they been given time to digest the not-so-fine print in the pork-laden legislation, would have revolted.

Let me begin my impression of the bill with its costs. The editorials from around the country show that this bill increases energy production at the expense of both the taxpayers and the environment. A group called the Taxpayers for Common Sense has estimated that this bill will cost $72 billion in authorized spending, and $23 billion in tax giveaways. That is $95 billion in spending over the next 10 years.

I ask unanimous consent to have that report printed in the RECORD following my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

Mrs. FEINSTEIN. Taxpayers for Common Sense points out that there is nearly $13 billion for the oil and gas industry, $5.4 billion for coal, $1.4 billion for the nuclear power industry, $4.16 billion for ethanol, $4.9 billion in energy efficiency, $1.7 billion for auto efficiency and fuels—that includes ethanol—$11 billion for LIHEAP and weatherization, $21 billion for science research and development, $2.15 billion for freedom car and hydrogen research, and $764 million for miscellaneous provisions.

Now, I am in favor of some of these programs, but the cost of this is enormous. The Senate should think twice about these massive spending increases, especially given our rising Federal deficit. I do not want to leave my children and my grandchildren saddled with these debts.

Let's also consider the fact that this bill does not deal with global warming, does not deal with fuel efficiency standards, does not deal with consumer protections, and does not deal with energy security.

From a western perspective, and particularly a California perspective, we have to look at the western energy crisis and ask the question: Will this bill help in the future? My analysis of the bill leaves me with the conclusion that the answer is no.

I have often pointed out in this Chamber that the cost of energy directly before the crisis was $7 billion. That was in 1999. It rose to $27 billion in 2000, and $26.7 billion in 2001. In 1 year, the cost went up 400 percent in California. There are Members of this body who said: Oh, California, it is your fault, you have a broken system, you don't have adequate supply to meet demand. A 400 percent increase is not the product of supply and demand, it is the product of gaming and manipulation.

Now, 3 years later and after $45 billion in costs, we have learned how the energy markets were gamed and abused. In March of 2003, the Federal Energy Regulatory Commission issued its final report on price manipulation in the western markets, and what did it find? It confirmed that there was widespread and pervasive fraud and manipulation during the western energy crisis.

The abuse in our energy markets was in fact pervasive and unlawful. So you would think an Energy bill coming out a few years after this crisis would take a look and say we ought to prevent this from ever happening again, we ought to put policies and those procedures in this bill to prevent it, we ought to strengthen the Federal Energy Regulatory Commission's ability to produce just and reasonable rates and ensure that rates remain just and reasonable across this Nation. But this bill does not do this. Rather, this bill actually impedes the ability of Federal and State agencies to investigate and prosecute fraud and price manipulation in energy markets. These provisions would make it easier to manipulate energy markets, not harder to manipulate energy markets.

This bill sends this country in the wrong direction. Rather than preventing Enron-type schemes, such as Fat Boy, Ricochet, Death Star, and Get Shorty, this bill weakens the oversight over energy markets. It guts the Federal Energy Regulatory Commission's ability to enforce just and reasonable rates.

Between now and 2007, the FERC will be in court, litigating the meaning of this electricity title rather than enforcing the State administration of just and reasonable rates to electricity customers. FERC will be powerless to respond to market crises like the one that occurred in the West between 2000 and 2001.

I am also particularly concerned about the provision in the bill which directly affects the so-called sanctity of contract provision. California was overcharged by as much as $9 billion for the cost of energy as a result of long-term electricity contracts that were entered into under desperate circumstances at the height of a gamed energy crisis. These contracts were not based on just and reasonable rates, they were based on rates that were inflated as a result of gaming and manipulation. California has filed at FERC for refunds.

This sanctity of contract provision, however, would mean FERC would never provide any further refund in the California case. So it shuts out California from any further recourse. No one from California should vote for this Energy bill. The provision places the importance of the physical contract above the importance of enforcing just and reasonable rates. In other words, it says even if you signed a contract in a situation that has been gamed and manipulated by fraud, you are still bound to that fraud-inspired contract. That is what we are doing in this bill.

In my view, this is simply absurd. We need to be strengthening FERC's ability to enforce just and reasonable rates, particularly in a deregulated market, not weakening it. And the irony is that FERC recently announced a settlement in which El Paso Corporation and its subsidiaries would pay $1.6 billion to resolve a complaint that the company withheld supplies of natural gas into California, driving up prices for gas and electricity during the State's energy crises in 2000 and 2001.

This was precisely the incident about which I tried to see the President—he wouldn't see me at that time—because we knew that the price from San Juan, NM, to southern California, which should have been $1 per dekatherm, was $60 per dekatherm, which was a manipulated price based on the withholding of space in the El Paso pipeline. We now know that that was correct because El Paso has paid $1.6 billion: Fact.

This bill does nothing to prevent gaming and manipulation in the natural gas market. The bill does increase penalties for electricity gaming and fraud, but does nothing to increase the low penalties for manipulation of the natural gas market. It is estimated that El Paso's price manipulation cost consumers and businesses $3.7 billion, yet this bill fails to give the FERC the power it needs to ensure that this kind of price manipulation does not happen again.

Now I would like to speak about what should be for the east coast and the west coast one of the most egregious provisions in the bill, and that is this ethanol mandate. This mandate is essentially a hidden gas tax. It will increase automobile emissions in the most polluted areas of the country and will not reduce our dependence on oil. Not only is this mandate unnecessary but it may have serious unintended environmental consequences because the environmental studies on ethanol have not been done. Yet this bill forces consumption of ethanol beyond that which is needed. So this bill is pushing an untested product that States such as mine don't need to meet clean air standards.

There are several reasons I am adamantly opposed to mandating the increase in ethanol consumption from 3.1 billion gallons a year to 5 billion gallons over the next 7 years. Not only do I believe the mandate is unnecessary but I am concerned about unintended environmental consequences. Let me tell you why. This is not just off the top of my head. This summer, for the first time, 70 percent of southern California's gasoline was blended with ethanol. Partially as a result, southern California endured its worst smog season since 1998. Why? Ethanol produces smog.

For the first time in 5 years, southern California experienced a stage 1 smog alert. As of September, the greater Los Angeles metropolitan area had experienced 63 days of unhealthy air quality, when ozone levels exceeded Federal standards. That number far exceeds the 49 days of unhealthy air quality during 2002 and the 36 days in 2001.

That is with 70 percent of its gasoline blended with ethanol. So the air got worse; it didn't get better.

The number of unhealthy days this year was almost more than twice that of two other of the smoggiest areas of the country, the San Joaquin Valley and Houston, TX, which exceeded the Federal health standards for 32 days and 25 days, respectively. What ethanol has done for southern California is make it more smoggy, not less smoggy. It is a culprit. It is worsening smog. I think we are mandating it in this bill willy-nilly because of greed.

The Secretary of the California EPA concluded, and this is his direct quote:

> Our best estimate is that the increase in the use of ethanol-blended gasoline has likely resulted in a 1-percent increase in emissions of volatile organic gases in the South Coast Air Quality Management District in the summer of 2003. Given the very poor air quality in the region, and the great difficulty of reaching the current Federal ozone standard by the required attainment date of 2010, an increase of this magnitude is of great concern. Clearly, these emission increases have resulted in higher ozone levels this year than what would have otherwise occurred and are responsible for at least some of the rise of ozone levels that have been observed.

Not only does this bill do harm to California, it increases the use of ethanol-blended gasoline, and that will threaten my State's long-term trend toward cleaner air. It will make it more difficult, and it may well make it impossible.

Without major emission reduction in the next several years, air quality officials warn that the region may miss a 2010 clean air deadline to virtually eliminate smoggy days. If the deadline isn't met, the Los Angeles region could face Federal sanctions amounting to billions of dollars.

That is why I oppose this ethanol mandate. That is why I say to those who are supporting it that you are doing us grievous injury.

Furthermore, the bill as written threatens the highway trust fund, the funding stream that allows States to construct and maintain our roads.

Let me tell you how. Gasoline taxes generate about $20 billion per year for the highway trust fund, and they comprise about 90 percent of the overall money for the fund. Because this bill subsidizes ethanol with transportation dollars, any increase in the use of ethanol will mean a decrease in the amount of money going into the highway trust fund. In fact, California will lose approximately $900 million over the next 7 years just because of this provision. The loss of highway funds for the entire country will amount to $10 billion over the next 7 years because of this ethanol mandate. It is egregious public policy.

I am also concerned about the price impact this mandate will have on the cost of gasoline at the pump.

Proponents of the ethanol mandate argue that gas price increases will be minimum, but the projections don't take into consideration the real world infrastructure constraints and concentration in the marketplace that can lead to high price hikes. We all know that when one entity controls most of the marketplace, that entity can move price as it sees fit. And that is the situation we have here.

Everyone outside of the Midwest will have to grapple with how to bring ethanol to their States in amounts prescribed and mandated since the Midwest controls most of the ethanol production. California has done more analysis than any other State on what it will take to get ethanol to our State. The bottom line is that it can't happen without raising gas prices. Our analysis shows that we can't bring ethanol to our State without increasing gas prices.

As I said, California has done more analysis on what it will take to bring the required amount of ethanol to our State than any other State, and has found that it will have cost consequences at the pump. Proponents of the ethanol mandate argue that gas price increases will be minimal. But the projections don't take into consideration the infrastructure and strength and the concentration in the marketplace that exists. Everyone outside of the Midwest will have to grapple with how to bring ethanol to their States since the Midwest controls most of the production.

I am also concerned about the limited number of ethanol suppliers in the market today. This high market concentration will leave consumers vulnerable to price hikes as it did when electricity and natural gas prices soared in the West because of a few out-of-State generating firms dominating the market.

As I have watched all of this, every time you have out-of-State companies dealing with an unregulated energy-related marketplace you have problems. I don't know why. But I suspect there really isn't the connection with the consumer. Many of the companies driving the energy crisis in California weren't in California. I wonder if they would do the same thing to their State that they did to our State. I am not a fan of the way the marketplace is structured today. And into this lack of structure and lack of price responsibility, we bring a whole new component. That component is that one company is the dominant producer in the highly concentrated ethanol market.

ADM today controls 46 percent of the ethanol market. That is only what is produced today. The company has an even greater control over how ethanol is distributed and marketed. ADM does not have a sterling record. It is an admitted price fixer and three of its executives have served prison time for colluding with competitors. I cannot look at ADM and say we have a pristine corporate citizen who controls this marketplace, its production, its distribution and will have any compassion for price responsibility. I do not believe giving firms such as this, this kind of control, is good public policy.

One could ask, Do I have any more grievous complaints? The answer is yes. The list goes on and on.

Let me take up MTBE. In this bill, there is a liability waiver so nobody can sue for the fact that MTBE has been found to be defective by a court of law. Not only that, it is a retroactive liability protection for MTBE producers. This provision offers them immunity from claims that the additive is defective in design or manufacture. It makes this liability protection retroactive to September 5 of this year thereby wiping out hundreds of lawsuits brought by local jurisdictions all across America. This retroactive immunity is a perverse incentive to those who pollute because it says to them, OK, you have done all of this damage; nonetheless, it does not really matter. You do not really have any liability. All these suits will be wiped out.

This bill does not ban MTBE nationwide despite what has happened in huge numbers of States, including my own. It gives MTBE producers $2 billion in what is called ''transition assistance'' to transition out of a product they are allowed to continue to produce and export. So they can accept $2 billion and continue to produce a flawed product that we know contaminates ground water, that we know leaches out of ground water wells, creates plumes of benzene, could possibly be carcinogenic, and pollutes drinking water so it is undrinkable and what do they get for doing this? $2 billion in this bill. Now I ask, is that good public policy? Remember, the courts have already found it to be a defective product. This is not me speaking; it is the courts.

I first learned about MTBE when the mayor of Santa Monica came to see me and told me that one-half of their entire water supply was contaminated with MTBE and could not be used. As I delved into it and investigated the claims further, I came to learn there were at least 10,000 sites contaminated in California. Since then, about a year ago, it is now 15,000 sites in California.

California is not alone. Last year the EPA estimated there are 15,051 sites in California. Nationally there are 153,000 contaminated ground water sites.

The States with the most pollution include California and Florida. Florida

has 20,273 contaminated ground water sites—more than California. Florida is heavily impacted with MTBE pollution. Illinois has 9,546 contaminated sites. Michigan has 9,087 sites. Texas has 5,678 sites. Wisconsin has 5,567 sites. New York has 3,290 polluted sites. Pennsylvania has 4,723. It is State after State after State. They total 153,000 polluted drinking water sites. This bill does not make MTBE illegal; this bill gives MTBE $2 billion, and they cut out the ability of local jurisdictions to sue to be able to clean up these sites with the money. If that is not perverse public policy, if that does not create an incentive to do bad things, I don't know what does.

As I said, the courts ruled that MTBE is a defective product. Actually, this relates to a case in my State so I think it is relevant to mention this case. It is a case brought by the South Lake Tahoe Public Utility District. The court held Shell, Texaco, Tosco, Lyondell Chemical, which is ARCO Chemical, and Equilon Enterprises liable for selling a defective product, gasoline with MTBE, while failing to warn of its pollution hazard. The court forced these MTBE producers to pay the water district of South Lake Tahoe $60 million to clean up the mess.

The industry, in fact, knew of the problems with MTBE yet decided to include it in gasoline. They deny all of this, but a court has found it to be the case. In fact, let me read a comment from Exxon employee Barbara Mickelson from 1984:

> Based on higher mobility and at the same time/odor characteristics of MTBE, Exxon's experience with contaminations in Maryland, and our knowledge of Shell's experience with MTBE contamination incidents, the number of well contamination incidents is estimated to increase three times following the widespread introduction of MTBE into Exxon gasoline.

This is 1984. The company went ahead and included it in their gasoline. Now, no one can sue them for a defective product in this bill.

Let me also give you an excerpt from a 1987 memorandum circulated within the Environmental Protection Agency:

> Concern about MTBE in drinking water surfaced after the Interagency Testing Committee report was published. Known cases of drinking water contamination have been reported in 4 states. These cases affect individual families as well as towns of up to 20,000 people. It is possible that this program could rapidly mushroom due to leaking underground storage tanks at service stations. The tendency for MTBE to separate from the gasoline mixture into ground water could lead to widespread drinking water contamination.

That is what indeed happened as illustrated by the fact that today we have 153,000 drinking water sites contaminated with MTBE across this Nation. This bill does not make its use illegal. It gives the companies $2 billion, and it prevents water districts from suing because the product was knowingly defective. There is no way you can look at a provision like this and not say this is a bad bill.

What adds insult to injury is this bill says they can continue to produce MTBE and export it to other countries so the drinking water of other countries can be polluted. How perverse can public policy be?

I am also disappointed that the conference report does nothing to increase fuel economy standards of our Nation's fleet of automobiles. We have an Energy bill. The largest contributor to global warming is carbon dioxide. The largest producer of carbon dioxide is the automobile. This bill does nothing to make automobiles more fuel efficient. What kind of an energy policy is that? In fact, the bill, again, perversely, makes it more difficult for the Department of Transportation to encourage fuel efficiency standards in the future by including a new list of criteria the Department must consider when revising standards.

I believe increasing the fuel economy of SUVs and light trucks is the single easiest step the Nation can take to reduce the emission of carbon dioxide into the atmosphere. It is the biggest single shot at reducing global warming. Yet we refuse to do it.

Earlier this year, Senator SNOWE and I introduced bipartisan legislation to close what is called the SUV loophole. We were unable to offer this legislation as an amendment to the Senate version of the Energy bill when it was on the floor.

But our bill had been evaluated by the National Academy of Sciences, that has released a study on this issue, and said it was technologically feasible to do this, and that over the next 10 years it would save the United States a million barrels of oil a day and reduce our dependence on foreign oil by 10 percent. It said it would prevent 240 million tons of carbon dioxide, the top greenhouse gas, as I have said, from entering the atmosphere each year, and it would save SUV and light-duty truck owners hundreds of dollars, ranging anywhere from $300 a year to $600 a year at the pump in the cost of gasoline.

CAFE standards were first established in 1975. They were fought by Detroit, just as seatbelts were fought by Detroit. At that time light trucks made up only a small percentage of the vehicles on the road. They were used mostly for agriculture and commerce. Today they are used mostly as passenger cars. Our roads look much different. SUVs and light-duty trucks comprise more than half of new car sales in the United States.

As a result, the overall fuel economy of our Nation's fleet is the lowest it has been in two decades, largely because fuel economy standards for SUVs and light trucks are so much lower than they are for other passenger vehicles. They are 22 miles per gallon. We could have them equal to sedans and have all the savings I have just cited.

Additionally, what is interesting is that others are moving rapidly to retrofit automobiles with new fuel savings technology that is available today for use by car manufacturers. Toyota recently announced improvements in its hybrid vehicle, the Prius, making it more powerful and more fuel efficient. Toyota has announced a hybrid version of its Lexus RX 330 SUV, which is scheduled to be released in early next year.

Meanwhile, instead of moving forward, some U.S. automakers are moving backward. I was very disappointed by the announcement made by the Ford Motor Company stating Ford would not be meeting its self-imposed goal of raising the fuel economy in its SUVs by 25 percent by 2005. Additionally, Ford announced it is delaying the sale of its hybrid SUV, the Escape, another year until 2004.

Yet China has announced it is going to move quickly on imposing fuel efficiency standards on its automobiles. Of course, any American companies that produce for Chinese consumption will have to conform.

I am so disappointed to see this Energy bill does not address global climate change. We are 5 percent of the world's population. We use 25 percent of its energy. We produce the world's most greenhouse gas emissions. We are the most significant culprit driving global warming.

Despite the fact that climate change threatens our environment and our economy, this bill does nothing to address it. I think that is a major mistake. Energy and climate are inextricably linked. A truly comprehensive energy policy cannot ignore that issue. As a nation, we ignore it at our peril.

The scientific evidence of global warming is real. The problem is getting worse. People are seeing mosquitos in areas of the Arctic for the first time. Glaciers are melting around the world, from Glacier National Park to the slopes of Mount Kilimanjaro. The largest ice shelf in the Arctic is disintegrating. This ice shelf covers 150 square miles. It is 100 feet thick.

The hole in the ozone layer, which decreased in size last year, grew to its largest level earlier this year.

Climate change is also affecting some of our most treasured places. Over a century ago, 150 magnificent glaciers could be seen on the high cliffs and jagged peaks of the surrounding mountains of Glacier National Park. Today, there are only 35. The 35 glaciers that remain today are disintegrating so quickly that scientists estimate the park will have no glaciers in 30 years.

Glaciers in the Sierra Nevada, in my State, are disappearing. Many of these have been there for the last thousand years.

We are seeing similar melting around the world, from Mount Kilimanjaro in Tanzania to the ice fields beneath Mount Everest in the Himalayas.

Dwindling glaciers offer a clear and visible sign of climate change in America and the rest of the world. We are seeing these changes. Scientists tell us to expect more. Yet this bill is silent.

We have reports from the National Academy of Sciences, the Intergovernmental Panel on Climate Change, and the Congressional Budget Office.

Let me quote the CBO report in May:

> Scientists generally agree that continued population growth and economic development . . . will result in substantially more greenhouse gas emissions and further warming unless actions are taken to control those emissions.

The place to take those actions is in an Energy bill, and yet this conference report is silent.

Let me tell you what the actual effect is in my State.

Sea level has risen 6 inches in San Francisco since 1850, with the greatest change happening since 1925. As sea level rises, the salt water permeates into the delta, contaminating drinking water and ground water further upstream.

Even without climate change, it would be a struggle to supply enough water for all of the people that live in California. But report, after report, after report indicates that climate change will further threaten a water supply that is already tight.

Models from NASA, the Lawrence Livermore National Laboratories, and the Union of Concerned Scientists all indicate that climate change is likely to increase winter rain and decrease snowfall in my State.

More winter rain means winter flooding. Less snow means less water for the rest of the year. California's water supply depends on gradual snow runoff. We have spent billions of dollars on water infrastructure that depends on this runoff, and yet we still have to struggle to provide enough water for our farms, our cities, our fish, and our wildlife. This bill does nothing to help California's situation.

In 1910, half of the Sacramento River's annual runoff took place between April and July. Today that number is 35 percent, and it is continuing to decline. We can't count on this runoff. It is clearly in our best interest to address climate change. Our environment is clearly at risk. Our relations with our allies are at risk because of our reluctance to address it.

The Foreign Relations Committee has recognized the need for the United States to act. We should do so in this bill. Yet we do not. How can I, representing the largest State in the Union, support a bill that does nothing for my State—nothing?

Let me now deal with the sensitive issue of coastal protection. On the positive side, the bill no longer includes another inventory of oil and gas resources on the Outer Continental Shelf. However, this conference report takes away the States' input into an important set of energy development projects, including liquefied natural gas facilities and other oil- and gas-related projects. These States need input into these decisions. For coastal States, this is a significant weakness in this bill, particularly States such as Florida and California and for your own State of Oregon, Mr. President. Time after time, we have said we do not want offshore energy development. This bill opens that door, and it reduces the States' input into decisions which directly affect our coastal zone waters.

The Energy bill also fails to include the renewable portfolio provision which was included in the Senate-passed bill. I heartened when the ranking member, the Senator from New Mexico, announced earlier this week that it was in. Apparently, it is now out. Solar, wind, geothermal, and biomass are generating electricity for homes and businesses nationwide. It is working in California. We need an energy policy that not only provides tax incentives for their continued development but also requires their use. I believe it is in the public interest for our Nation to require a greater development of renewable resources.

The tax provision of this bill implies that nuclear power is a form of renewable power, and it places this form of power on an equal footing in the Tax Code with traditional renewables. This production tax credit for nuclear power is the largest energy tax credit in the bill and would be the largest one in the code, equaling $6 billion. As a nation, we still can't properly dispose of nuclear waste. This waste has a half-life of an eternity, yet we are going to produce more of it. I strongly believe this is a mistake.

This bill also weakens the Clean Air Act. Upon reviewing the bill, I was most disappointed to learn that the legislation that has really cleaned up our air, the Clean Air Act, is weakened. The 1990 amendments to the Clean Air Act, signed by the first President Bush, implemented timelines for cities to clean their air. This bill undermines the intent of those amendments by no longer requiring communities to clean up their air if they can claim that part of its pollution is a result of transported air pollution.

Most of California—all the inland areas—is a product of transported, to some degree, air pollution. Seventy percent of our State does not meet national air quality standards. So California is probably more adversely impacted by this than any other State because of strong prevailing westerly winds which drive the pollution from the big coastal areas into the valley areas. This will result in a major weakening of the Clean Air Act. Huge areas of the State, such as the Central Valley and the Inland Empire, will have reduced cleanup requirements.

Our Nation needs an energy policy that will protect consumers, reduce our dependence on foreign oil, and produce new energy development while protecting our environment. This bill does not do that. This bill deserves to be defeated. This bill is a bad bill.

I strongly urge my colleagues to vote against this poorly crafted legislation.

EXHIBIT 1

TAXPAYERS FOR COMMON $ENSE

Type or industry	Authorized spending
Oil and Gas (including MTBE/LUST)	$12.971 billion (includes $414 million scoring of royalty provisions).
Coal	$5.434 billion.
Nuclear	$5.735 billion.
Utilities	$1.355 billion.
Renewables (including R&D)	$4.164 billion.
Energy Efficiency (including R&D)	$4.931 billion.
Auto Efficiency and fuels (including Ethanol)	$1.698 billion.
LIHEAP and Weatherization Assistance	$11.425 billion.
Science Research and Development	$21.850 billion.
Freedom CAR and Hydrogen Research	$2.149 billion.
Miscellaneous	$764 million.
Total Authorization	$72.476 billion.

BREAKDOWN OF COST ESTIMATES

Oil and Gas

Title III—$949 million (direct and royalty exemptions).

Title IX Research and Development—Fossil Fuel $1.997 billion.

Title XIV Miscellaneous, Subtitle B Coastal Programs— $5 billion.

Title XV Ethanol—MTBE and other provisions—$5.025 billion.

=$12.971 billion.

Coal

Title IV Coal—$3.925 billion.

Title IX Research and Development—Fossil fuels $1.509 billion (specifically allocated to coal).

=$5.434 billion.

Nuclear

Title VI Nuclear Matters—$1.186 billion.

HEALTHY FORESTS RESTORATION ACT OF 2003

Mr. FRIST. Mr. President, I ask the Chair lay before the Senate a message from the House of Representatives on the bill (H.R. 1904), to improve the capacity of the Secretary of Agriculture and the Secretary of the Interior to conduct hazardous fuels reduction projects on National Forest System lands and Bureau of Land Management lands aimed at protecting communities, watersheds, and certain other at-risk lands from catastrophic wildfire, to enhance efforts to protect watersheds and address threats to forest and rangeland health, including catastrophic wildfire, across the landscape, and for other purposes.

The Presiding Officer laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendments of the Senate to the bill (H.R.

1904) entitled ''An Act to improve the capacity of the Secretary of Agriculture and the Secretary of the Interior to plan and conduct hazardous fuels reduction projects on National Forest System lands and Bureau of Land Management lands aimed at protecting communities, watersheds, and certain other at-risk lands from catastrophic wildfire, to enhance efforts to protect watersheds and address threats to forest and rangeland health, including catastrophic wildfire, across the landscape, and for other purposes'', and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following Members be the managers of the conference on the part of the House:

From the Committee on Agriculture, for consideration of the House bill and the Senate amendments, and modifications committed to conference: Mr. Goodlatte, Mr. Boehner, Mr. Jenkins, Mr. Gutknecht, Mr. Hayes, Mr. Stenholm, Mr. Peterson of Minnesota, and Mr. Dooley of California.

From the Committee on Resources, for consideration of the House bill and the Senate amendments, and modifications committed to conference: Mr. Pombo, Mr. McInnis, Mr. Walden of Oregon, Mr. Renzi, Mr. George Miller of California, and Mr. Inslee.

From the Committee on the Judiciary, for consideration of sections 106 and 107 of the House bill, and sections 105, 106, 1115, and 1116 of the Senate amendment and modifications committed to conference: Mr. Sensenbrenner, Mr. Smith of Texas, and Mr. Conyers.

Mr. FRIST. Mr. President, I ask unanimous consent the Senate insist on its amendments and agree to the request of the House on a conference of the disagreeing votes of the two Houses thereon, and the Chair be authorized to appoint conferees on behalf of the Senate with a ratio of 4 to 3.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Presiding Officer (Mr. SMITH) appointed Mr. COCHRAN, Mr. MCCONNELL, Mr. CRAPO, Mr. DOMENICI, Mr. HARKIN, Mr. LEAHY and Mr. DASCHLE conferees on the part of the Senate.

The PRESIDING OFFICER. The Senator from California.

Mrs. FEINSTEIN. Mr. President, I thank the leader. It, indeed, is good news that this bill is coming over. It is my understanding that we have had successful negotiations. I am very hopeful there will be a bill before us shortly.

I yield the floor.

ENERGY POLICY ACT OF 2003—CONFERENCE REPORT—Continued

The PRESIDING OFFICER (Mr. ENSIGN). The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I see no other Senators seeking recognition so I will speak for a few moments about one aspect of this bill.

First, I thank my colleague from California for her statement. She has been extremely involved in these issues from the beginning as a member of the Energy Committee. She has taken a leadership role on many aspects of the legislation in trying to see that the provisions we came up with were good for her State and good for the country.

Let me try to talk about one part of the bill. There are 16 titles to the legislation. It does go on for 11 or 12 hundred pages. I want to talk about one of those 16 titles; that is, title XII, which relates to electricity generation and transmission and distribution.

That is a very important part of the bill and one that is complicated and difficult for us to understand but one we need to focus on because of the extreme importance it has to our economy. In my view, some of the biggest changes in law that are contained in the bill are located in the electricity title. I would also argue that the biggest retreats we are making from consumer protections are perhaps in this section as well.

During the last few years, there have been three very notable publicized developments or events in the electricity industry that have come to our attention as a nation. Not in chronological order, but first, at least in what is on the front page today and what is most immediately in mind when we think about electricity, is the blackout we experienced in the eastern part of the United States and some of the Midwest that shut down nearly a third of our Nation; the problems of how to have a reliable system for transmitting electricity and ensuring that if there is a failure somewhere, it does not cascade to the 18 States that were affected by this blackout, for example. So reliability is a serious issue, and we were made very aware of that. The President's phrase was that this was a wake-up call. I would suggest that this was a wake-up call we have not heeded adequately in the bill. I will go into why I believe that.

A second issue, of course, is what happened in California and the west coast, Oregon and Washington in particular, a couple of years ago when they had the market meltdown there and prices spiraled out of control and people saw their utility bills go up very substantially. Unfortunately, those bills have remained very high. It has had a significant impact on the economy of that part of our country. Some of that, of course, was due to manipulation of those markets, ineffective market rules. That is another area of concern that clearly should be addressed in this legislation.

The third area of concern that I cite is the financial collapse of many utilities, due in large part to the investments they have made in markets that are not central to the business of producing and selling electricity. That financial collapse has become a serious problem for many in our country as well.

This bill, in my opinion, fails to adequately address each of these problems, whether it is a liability or protection of the consumer. In the conference report before us, it blocks implementation of market rules that could prevent market manipulation. There, I am thinking about the provisions in the bill that delay FERC's ability to act not only to issue a standard market design rule, but to issue other orders of general applicability within the scope of that standard market.

It also addresses only one form of market manipulation—round-trip trading. I will get into more of a description about that, but there are other types of market manipulation we should be prohibiting in this bill. It fails to do so, and it repeals the Public Utility Holding Company Act, which was passed back in the 1930s, without providing the necessary level of protection for consumers, by strengthening the Federal Energy Regulatory Commission's authority to oversee mergers and acquisitions of other entities. It makes the likelihood of blackouts greater by stalling the Federal Energy Regulatory Commission's attempts to create regional transmission entities through the delay of this standard market design, or any other order of general applicability within the scope of that rule, it discourages the construction of needed transmission, and it discourages regional transmission organization formation by imposing an unwise pricing policy called participant funding. I will try to explain the effect of the language related to participant funding and why that has become such a central part of the concern about the bill.

First, let me talk a little about the effects the bill would have on reliability; that is, the blackout problem. The United States-Canada Power System Outage Task Force yesterday released its interim report. The report dealt with the causes of the August 14 blackout both in the United States and Canada. Secretary Abraham had a press conference. I saw him last night on Jim Lehrer's show explaining it again. He has been very aggressive in trying to explain what this report includes.

The report contains no recommendations at this point. It is the first of several reports. It is an interim report. It is primarily technical in nature. It tries to establish a timeline for the events that led up to the blackout and then during the blackout. The report tells the story of a day when the power system was not unusually overloaded, but on which a series of events that you could expect to be controllable led to an outage that cascaded through 18 States in the United States and a number of Canadian provinces. It shut down power to tens of millions of customers, paralyzed our major cities—New York, Cleveland, Detroit. Some areas were blacked out for as long as 3 days, and the economic cost of this was enormous, as we would expect it to be.

I could go into some detail about what the report found, but I am sure everybody can read that in their morning paper. The report doesn't draw many conclusions or make many recommendations. In my reading of it, it is clear that the lack of communication, the lack of coordination of response, the lack of consistency of rules and equipment were major causes of what occurred. If anything is clear, it is that the major transmission system that we depended upon is a large regional machine that is not bound by political borders but is only bound by physics and by commerce. What happens in one part of the country has far-reaching effects on areas that are very far from the initial occurrence. That fact leads to the inescapable conclusion that the control and management of that transmission system needs to be on a regional basis if it is going to respond to events that happen across these regions.

This event cascaded across two countries, 18 States, 4 transmission regions, 4 reliability councils, and it did all of that in 7 minutes. The FERC, which is the Federal agency that is authorized to oversee this enormously complex part of our economy, has been trying to encourage voluntary regional control and management of the transmission system for nearly 6 years now, since the issuance of order No. 888 in 1998. If the Midwest ISO—independent system operator—is the result of the voluntary process that has been going on over this period—and it is—then it is clear that voluntary process has not worked as it should.

The Midwest ISO is the best that could be negotiated in the voluntary program for this region. It still has 23 different control areas, inadequate communication, inadequate coordination to respond to a series of events such as those that occurred during a 7-minute period on August 14. The FERC has more recently tried to take some stronger steps to be sure that the regional transmission organizations, such as the Midwest ISO, are up to the task of ensuring the reliability of the system. The standard market and design rule that was proposed by the FERC proposed that we have mandatory regional transmission organizations; that is, that FERC could require utilities to join these regional transmission organizations. This bill stops that effort in its tracks. This bill doesn't have any suggestions as to what should be done to accomplish regional transmission control, except further encouragement of these utilities to do it on a voluntary basis. But it stops the effort that is underway today to require utilities to take these steps.

I think the report gives one more strong piece of evidence that the electricity title, as proposed, is unwise and inadequate. The participant funding provisions—let me talk about those because that is an abstruse but important part of this legislation. It is one about which there is substantial controversy. When we wrote the Energy bill in the last Congress, there was substantial controversy about it in the development of this conference report. It is an issue that we need to try to do right.

In my view, provisions in the bill related to participant funding will also have a negative impact on reliability. Let me explain how I conclude that.

This provision in the bill would require that the Commission, FERC, approve participant funding for the expansion of transmission by a regional transmission organization, or by any utility. Now, what participant funding means is that the participant in the market who wants the transmission constructed, or the expansion of transmission constructed, has to pay the full freight for getting it done. The Commission may not authorize the recovery of costs on a rolled-in basis, or it may not rule that the costs should be shared among those who will benefit from the upgrade in transmission, or the expansion of transmission. Unless the native load ratepayers have stated they require the transmission, they are not to be charged for it. This amendment takes the mantle of consumer protection by supposedly protecting retail ratepayers from bearing the costs of transmission system expansions that are built in order to ship power to a far distant region of the country. In reality, there are very few transmission system expansions that are for the benefit only of one user.

In a properly planned system, expansions that take place are ones that support the entire load in the region, including the need to export power from the region where that exists. This provision has three problems.

First, it would cause customers to have to pay for costs they did not cause and for benefits they are not receiving.

Second, it would deprive local customers of the rights to the lines that are built in their area.

Third, it is not always clear or true that only one participant is creating the need for new transmission and benefiting from that transmission.

The restriction on allocating costs to Native load ratepayers sounds good at first blush. The effect, however, is to shift the cost to other ratepayers for facilities that the Native load ratepayers in question are able to use and, in many cases, are benefiting from without having to pay.

One simple example, to try to bring this home to people, is each of us has a couple of filling stations we go to, to fill up our vehicles. If we were asked, Do you need another filling station in your part of the city, most of us would say: No, we don't; we found a way to do this. But if one is built that is convenient for our use, we will use it; we will benefit from it.

The question is, Does everyone hold back and say, I will not suggest the need for expansion of a transmission facility because I am going to be stuck with the whole bill; I will wait until someone else suggests the need and then, of course, I can get the benefit without having to pay my share?

This is supposed to be aimed at generators who want to sell into the competitive market. The real victims, in my view, are the consumers who buy electricity from municipal or cooperative utilities or from utilities other than the ones that are required to pay under this participant funding language.

The likely effect of this policy is that needed transmission would not get built. If customers who need transmission expansion have to pay for the full cost of the expansion, those who need the transmission expansion may not be able to finance either the purchase or the sale they are contemplating because it becomes prohibitively expensive.

The transmission either doesn't get built or, if it does, it is at a cost that gives the incumbent utility a competitive advantage.

The second effect is the utilities would be encouraged not to join regional transmission organizations or, if they are already members of regional transmission organizations, to leave those, and they are perfectly free to do so under the legislation. This is not my conclusion. This is the conclusion of many experts who have written to us in opposition to this participant funding language.

If the utilities gain this kind of competitive advantage and get their transmission built at no cost to themselves, why should they join a regional transmission organization and talk to others about the need to cooperate and share costs?

This proposal on participant funding is anticompetitive and it is antireliability, in my view. If transmission construction is needed to relieve bottlenecks to prevent blackouts, this provision discourages that.

Under current policy, which the Federal Energy Regulatory Commission issued in 1995, new transmission is paid for by those who benefit from the transmission. If there is a single entity or single group of ratepayers who benefit, then they are the ones who pay. If the system as a whole benefits, then everyone shares in the cost. Often, there is a combination of the two and there is a sharing of the cost. The single beneficiary pays for part of the cost; the rest is rolled into the rates for all of those who use the system.

This provision that is in the bill assumes there is always a single beneficiary rather than there is a benefit to many, as is the case in most circumstances. The provision requires

something FERC already has the authority to do. As I said, it can allocate the total cost to one participant. But we should not be legislating the way FERC has to deal with these issues. They should be able to deal with them on a case-by-case basis. The provision prevents them from doing that.

We have letters in opposition to this participation funding language from a great many people. I will cite a few: Public service commissions of Michigan, Minnesota, Wisconsin, Indiana, Pennsylvania, and many other States; utilities in California, Indiana, Ohio, Maryland, Pennsylvania, Delaware, West Virginia, New Jersey, Oregon, Utah, Arizona, Colorado, and many other areas of the country. We have many organizations that have come out in opposition to this provision—from APPA, NRECA, Elcon—Electric Consumers Resource Council, the large industrial customers group including General Motors, Dow Chemical, Air Products, steel companies, aluminum companies—Louisiana, Energy Users Group, the American Chemical Council, the American Forest and Paper Association, American Iron and Steel Institute, Council of Industrial Boiler Owners, Portland Cement Association, Electric Power Supply Association, Consumers for Fair Competition National Grid, American Transmission Company, International Transmission Company, Electric Power Supply Association, many individual municipal and cooperative utilities, and many others.

Congress, in my view, should not be meddling in this area. It is too complex. It is too dependent upon the facts of individual cases for us to try to be writing legislation directing how FERC allocates cost. We should not legislate what they do in this area. In my view, that is counterproductive.

The bill also contains a delay in the issuance of the standard market design rulemaking which I mentioned before. The delay is until January of 2007. That is a much longer delay than I think is wise. That is over 3 years from now. Clearly, in my view, the Federal Energy Regulatory Commission may well have circumstances to which they need to respond. They may well identify problems for which they need to issue rules of general applicability in that period, and we should not be tying their hands.

The bill would prohibit under its current language ''rule or general order of applicability on matters within the scope of the standard market design rule.''

The truth is, the standard market design rule covers everything but the kitchen sink. So if you are saying you cannot issue rules of general applicability on matters that are within the scope of that rule, you are basically saying you are blocked from issuing orders for the next 3 years.

What kind of actions could this prevent? It could prevent the Commission from doing its job in many respects. FERC currently has a rule in process on interconnections to the transmission grid. No matter what that rule said, the Federal Energy Regulatory Commission would be prohibited from issuing it.

Other matters that are dealt with in the rule that FERC would be prevented from dealing with in a generic manner are such things as market oversight, market mitigation, transmission pricing, scope of the regional transmission organizations, the adequacy of rules for transactions across regional transmission organization boundaries, and, in short, just about anything the Commission does about transmission or markets, because this standard market design rule, which we are blocking the implementation of, touches on all of those items. All of those subjects are within the scope of that rule, and we are legislating a prohibition not only against the rule but against any rule of general applicability within the scope of standard marketing.

I also believe some of the orders FERC issued in the western market crisis would be defined as orders of general applicability and would have been prohibited had this language been on the books at the time FERC was trying to deal with that crisis.

If another crisis occurs in the next 2 or 3 years, would we not want FERC to bring order to the market to deal with the crisis? Hopefully, we will not wind up legislating a prohibition on their doing that.

I offered amendments to try to correct this language on the Senate floor. They failed. I offered another amendment when we had our one meeting of the conference on Monday of this week.

That was agreed to by a majority of Senate conferees but was rejected by the House. Then, of course, the Senate conferees receded to that. So I think this is a serious problem that undermines our efforts as a nation to ensure reliability of the system.

Let me go on to this issue of the crisis in western markets, and any possible future market crises that we may face. It is surprising to me how soon we can forget. Just over a year ago, maybe 2 years ago now, we were in the middle of a daily diet of newspaper stories and headlines about the excesses of Enron and other power marketers and their manipulation of California and other western markets. Now it seems as though those shocking stories, that public outcry for Government to do something about that, is all gone, and we are on to other matters.

We have outlined many times before, and many of my colleagues in their statements have outlined, a parade of horrible schemes, deceitful schemes, that were put in place to defraud utilities and to ultimately defraud consumers. The names are well known to all of us: Get Shorty, DeathStar, Ricochet, Black Widow, wash trades. This conference report prohibits wash trades or roundtrip trades, and that is good. I favor that prohibition.

By doing so, the bill acknowledges that the Federal Power Act should protect consumers against fraudulent and deceptive practices, but we only mention one such practice: Roundtrip trading, these wash trades. That is a circumstance where two participants in the market sell to each other the same amount of electricity at the same price in order to make it appear they have more volume of transactions than they really have; there is more going on. This also creates a sales volume for both the sellers. This can be used to pad the reports of stockholders and analysts and make the company look as if it is a better place to invest. This practice should be prohibited.

The other practices involve creating artificial congestion on transmission lines so that one can claim to have relieved the congestion in order to collect a congestion rent. There were a number of colorfully named practices that were of this nature. Those clearly should be prohibited as well.

Some would argue that we do not need to prohibit those; they are prohibited elsewhere. I do not believe that. When FERC commissioners came before the committee last year, they told us these practices were not prohibited, that there was not much they could do to deal with them. When other Senators seemed not to be concerned about giving this authority, I could not really understand that point of view. Clearly, there can always be other prosecutions for fraud, general fraud and all, but FERC, the agency with responsibility for overseeing this sector of our industry, should have the authority to impose penalties and prohibit these practices. We need to give regulators who are charged with controlling these markets the tools they need to do the job that needs to be done.

Senator CANTWELL from Washington offered, and the Senate approved by a vote of 57 to 39, an amendment that bans all forms of manipulation. Unfortunately, the conference report does not contain that language now, language which was strongly supported in the Senate.

The other problem I mentioned when I started my comments, that I want to say a few more words about, is the problem of the financial meltdowns that we saw as a result of unwise investments by utilities in nonutility ventures and the risk that brings to ratepayers.

The conference report repeals the Public Utility Holding Company Act. I have supported repealing the Public Utility Holding Company Act, and I will explain why. But this conference

report repeals that act without providing adequate protection for consumers to replace the necessary protections that were in that act. I have always taken the position that we should repeal the Public Utility Holding Company Act because it is no longer a useful device, but at the same time we should add authority to the Federal Energy Regulatory Commission to review mergers and to review dispositions of property by utilities so we can be sure consumers and ratepayers are protected.

The conference report purports to contain such strengthening of authority, but I would argue that, in fact, it weakens the authority of FERC to review mergers.

There are three problem areas that I see with this language. One is, the jurisdiction over mergers; second, the failure to guard against cross-subsidies, which I think is very important and which was in the bill we passed through the Senate earlier; and third, the language which shifts the burden from the company to the Government if a merger that is occurring is going to be stopped. It automatically occurs if the Government does not act to keep it from occurring under this language, and I think that is bad public policy.

FERC's merger authority is essential in this industry, which has been based on a system of local and regional monopolies but which is moving toward depending almost entirely on a competitive wholesale market for electricity generation.

The industry is highly concentrated. Consolidation of generation and distribution of transmission can prevent the development of a competitive market. One of the key failures in the bill, as I see it, is that the bill does not make the generation of energy or power a subject that is under the jurisdiction of the Federal Energy Regulatory Commission. Without authority over this generation of power, FERC would have to stand by and watch while this industry or parts of it reconcentrate. A single company could acquire every generator in the United States and the Federal Energy Regulatory Commission would have no authority under this act to deal with that problem. Or a single company could acquire every generator in a particular region and the Federal Energy Regulatory Commission would be unable to deal with it. This is surely incompatible with the idea that we want to develop competitive markets.

Even when the transaction is only the sale of a facility, there are serious issues at stake. Many of the utilities that are in the headlines lately are there because they are facing deep financial problems that have come as a result of the utilities spinning off their generation capacity, their powerplants, to affiliates which then are in the unregulated electricity market. Companies such as Xcel and Allegheny are experiencing extreme financial distress because of the activities of their generation and marketing affiliates.

A second failure of the proposal is that it does not require FERC to create real protections against cross-subsidy and encumbrance of assets in the new merged company. In the bill that we passed in the Senate, we had protections against cross-subsidy. We said the Federal Energy Regulatory Commission must determine that if someone is going to buy something that is not part of their utility business, they are not going to be cross-subsidizing some kind of nonutility activity.

Now, that is an essential protection for ratepayers. Otherwise, the ratepayers find their electricity rates going up because the company is losing money in some unrelated business. Clearly, we should protect consumers against that.

The provisions we had in the Senate bill, the one we sent to conference, required that the transaction do no harm either to competition, consumers, or the capacity of regulators to regulate, and it required that the Federal Energy Regulatory Commission determine that there would not be a cross-subsidy to an affiliate company and there would not be an encumbrance of the assets of the utility for the benefit of some affiliate. That is a very important provision which, unfortunately, has been dropped from the bill.

In the past, all generation was owned by utility companies. Clearly, that was under the jurisdiction of the Federal Energy Regulatory Commission. If a utility merged with another utility, the merger was under the jurisdiction of the Federal Energy Regulatory Commission under the Federal Power Act.

But we are in a new world now, and generation can be separated from the utility company, either sold to a standalone generation company or spun off to an affiliate of a holding company that owns the utility, and such sales or spinoffs would not be under their jurisdiction either under the Federal Power Act, since the generation facilities are not under the jurisdiction of FERC, or of course under PUHCA, since we are going to repeal PUHCA, the Public Utility Holding Company Act. So mergers of stand-alone generation companies would not be something FERC could look at.

A third key weakness of the proposal is that it requires FERC to act on a merger within a certain timeframe. It says that within 180 days, FERC needs to act. If FERC determines that is not enough time, it can extend that for another 180 days. But if it does not rule against the merger at the end of the second 180 days, then the merger is approved. That is putting the burden on the wrong end, in my view. I favor requiring FERC to issue an order approving the merger, as is current law. This is a major weakening of current law we are being presented with here.

These are only some of the problems in the electricity title. I have also expressed concerns about the provisions that give the Commodity Futures Trading Commission a role in monitoring markets that cut the Federal Energy Regulatory Commission and States out of such activities; also, over a provision that raises the bar for the Federal Energy Regulatory Commission review on whether contracts are resulting in rates that are just and reasonable. I know others are going to address those problems in their comments.

We have tried, at every opportunity during the long course of this legislation, to correct these problems. We tried to offer amendments that would strengthen the Federal Energy Regulatory Commission's merger authority, amendments to ban all forms of market manipulation, amendments to clarify FERC's authority and to strike participant funding language. We have not succeeded in making those changes. As a consequence, we have a bill that in my view, I regret to conclude but I do conclude, weakens consumer protections and reliability protections with regard to electricity.

There are others here seeking the floor, wishing to speak. I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. THOMAS. Mr. President, I would like to take some time on this bill. I think we should perhaps divide the time up a little bit here.

Mr. JEFFORDS. Mr. President, if I may? I ask unanimous consent that I be allowed to follow the Senator from Wyoming.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, I think we need to take a little time to talk about the purpose of this bill. All we have heard, frankly, is criticism. All we have heard is people being negative about the things that are there. The fact is, what we need in this Congress, and in this country, is a policy. We had a policy last year, you will recall, that had almost all the things about which the Senator from New Mexico talked. It did not pass. We do not have an energy policy with all those things he insists upon getting in there.

We hear from the Senator from California about the problems that happened there. We need to go back and recollect some of the reasons they happened in California. That was because the State didn't allow for the development of energy, it didn't bring any transmission to get it into California, and they had some price controls on the retail but not on the wholesale.

We need to go back and focus a little bit on what our real opportunity and obligation is here, and that is to have

an energy policy, a policy that deals with conservation, that deals with alternative sources of energy, that deals with research, so we can continue to use the energy we have now, but which also focuses on domestic production.

We can talk all we want about where we are going to be in the future, and I hope we are with more alternatives and more renewables, but the fact is we will not have those for several years. The immediate need is to make sure we do not become even more dependent on imported oil and gas from places such as the Middle East and Iraq.

I want to take a minute and talk about some of the things that are very positive here because there are very positive aspects to this energy policy, keeping in mind it is an energy policy, keeping in mind, also, that most of us would like to recognize the differences between the regions in the country.

The idea of having FERC control all the details of operations doesn't work. It is not acceptable. That is why it has changed this year, so we can put emphasis on regional organizations so States can concentrate on having things work the way they work in one region that don't work in another region.

That is one of the reasons that standard market design was not acceptable to most people. It has been modified in this bill so it is not laid on the country originally. There are certainly opportunities for FERC to exercise their responsibilities, as they should, but after the States have had an opportunity to work as States and then to work as regions. This is the direction we are seeking to go.

Let me go back just a moment to some of the things we seldom hear people talking about in the Chamber about which, it seems to me, we should be talking. One is energy efficiency. We require a 20 percent reduction in Federal building energy use by 2013. There is an effort to do something about it in the conservation area. The bill authorizes $3.4 billion for low-income housing, to be able to assist that housing in being more energy efficient. Our demand for energy—the production of coal, for example, in the last 5 years has doubled our energy. We are continuing to increase our demand, yet we are becoming more restrictive on our production.

We have to balance these things. That is what is done here, is to seek to get more energy efficiency. We seek to establish new energy efficiency standards for commercial and consumer uses of products, such as stoves and refrigerators and those kinds of things. We need to do that.

We also emphasize renewables. The talk here is we don't give enough attention to renewables. As a matter of fact, we do. There are incentive programs authorizing $300 million for solar programs with the goal of installing 20,000 solar rooftop systems in Federal buildings.

It authorizes over a half billion dollars for biomass projects. These are things that have potential but have not been moved. This is designed to provide incentives so those things can move forward. It authorizes $100 million in increased hydropower production to increase efficiency of dams.

So we have goals of increasing renewables by 75 percent over just a few years.

Clean coal technology—coal is our largest resource of fossil fuel. It now produces nearly 60 percent of the electricity in this country. It ought to be used as opposed to gas, for example, because we are going to have more of that and gas is more flexible for other uses. But what we want to do is perfect and increase and make better the generation facilities so we can have clean air, so we can protect the environment at the same time that we use this fuel.

The Senator from New Mexico was talking about transmission. Certainly you are going to have to have more of that. You have to start where the fuel is and go to the marketplace. That takes transmission. That takes movement of that kind. So we need to prepare for that, and that is what regional transmission organizations are for, so you can move interstate as you move in regions.

The States can agree on what we do there.

We talk about vehicles and fuels. Advanced vehicle programs: $200 million for that; and clean schoolbus programs. We are putting a great deal of money into the development of hydrogen for use in automobiles and elsewhere.

This idea that all we are doing is giving credits for production of coal, oil, and gas is not true. That just isn't the case. There are lots of other things in here, as a matter of fact.

We continue to increase funding for the Department of Transportation to work on improving CAFE standards so we will get better mileage out of the cars. I mentioned hydrogen. It is one of the real opportunities.

As I said, this is a broad policy. It follows what the administration began several years ago to have a policy for the future of energy production for this country. We need to deal with it in a broad way. This bill does.

I understand the people who seem to be concerned about it pick out those little things, and that is all they talk about. But we need to take a look at the broad bill and what it does. One of them, of course, is it gives some incentives for increasing production. That is what we need to do if we are going to continue to have the lights on and continue to drive our cars in the years to come.

We have to have production. We have ways to do that. I happen to come from a production State. We can produce more. At the same time, we can protect the environment.

These are issues that we talk about here in terms of transporting. For instance, we can produce more natural gas in Wyoming, and we can have a pipeline to get it to the marketplace. We are in the process of doing that. This helps considerably. The same thing is true with electric transmission.

There are a great many details which we could go into here. A lot of people have talked about the cost. There is a cost.

Let me tell you very briefly, from a conservation standpoint, that there are tax credits for energy efficiency. That is a pretty good thing to be doing—tax credits for producing electricity from certain renewables. I believe that is the direction we want to move—and fuel-efficient vehicles. Some of these tax credits are going to create more conservation.

We have talked about reliability in relation to the California situation.

There are some incentives for accelerating depreciation; and natural gas-gathering lines so we continue to produce.

These are a great many things of that kind.

Production by marginal wells is one of the areas that needs to be visited. A lot of older wells only produce a few barrels a day. There has to be some incentive to continue to do that. But it is a very important production aspect so we are not totally reliable on imports.

I see others on the floor who are going to be more positive than we have heard for a while. So I will slow down here. But I do suggest that we take a look at our demand for energy and take a look at the growth of demand for energy. Look around in your own family, in your own business, and in your own place where you are sitting right now. How much increased demand do we have for energy? Then take a little look at where we are going to be in 10 or 15 years from now. How are we going to deal with that? That is really what policy is about.

Take a little look at this bill and you will find we are talking about conservation, renewables, and domestic production so we can meet the needs on which all of us would agree.

I yield the floor.

Mr. CRAIG. Mr. President, will the Senator yield for a unanimous consent request?

Mr. THOMAS. Yes.

Mr. CRAIG. Mr. President, I understand Senator JEFFORDS will follow the Senator from Wyoming.

The PRESIDING OFFICER. The Senator is correct.

Mr. CRAIG. The chairman of the full committee has just come to the floor. Senator CORNYN is on the floor ready to speak. Senator JEFFORDS has such time as he will consume. I was going to

offer a unanimous consent to allow Senator CORNYN to speak, to be followed by Senator DOMENICI. Is there any objection to that?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CRAIG. I thank the Chair.

Mr. THOMAS. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. JEFFORDS. Mr. President, on Monday, I addressed the Senate to share my concerns about the environmental impact of the Energy conference report. These provisions are a direct reflection of the manner in which this bill was developed and the flawed conference process used to produce it.

Nearly 100 sections of this bill are in the jurisdiction of the Environment and Public Works Committee. We were not consulted on any of these provisions—not on any of them.

In some cases, such as on the issue of nuclear security, the Environment and Public Works Committee reported legislation on a bipartisan basis. The Senate could have taken up the reported bill and passed it.

Instead, they stuck the provisions of the original introduced version of this bill in this report. Now my committee will likely have to go back and clean up this language if the bill becomes law. This could have been avoided, if the conferees had spoken to my committee in the first place.

I am deeply concerned that the conference report before us does not represent the kind of forward-looking, balanced energy policy that our Nation needs. As I mentioned earlier this week, it does not go far enough in reducing our reliance on imported oil. Further, the bill fails to provide appropriate and adequate remedies to prevent a recurrence of the electricity blackout the Northeast experienced this summer or the crisis that the West experienced 3 years ago.

The Energy legislation fails to address other important issues such as a renewable portfolio standard or climate change.

The bill contains waivers of environmental laws, and it provides for unjustified subsidies and porkbarrel programs. But, worst of all, this bill seriously harms our environment.

On November 7, 2003, I wrote all Members of the Senate listing seven of what I believe to be the most troubling environmental provisions of this conference report. The Environment and Public Works Committee has jurisdiction over all of these items. Six of the seven items outlined in my letter are now in the bill. The bill has not one but two provisions extending compliance deadlines for Federal ozone pollution standards.

I also mentioned in my letter that I was concerned the bill would delay our new Federal mercury emission standards for utilities. It doesn't do that. Instead, it authorizes $1.5 billion in compliance assistance grants for the utilities. Instead, the bill proposes to pay up to 50 percent of these compliance costs. This is poor policy.

I would like to review the status of some of the other provisions I described in my November 7 letter in more detail.

First, I would like to let colleagues know that the renewable fuels title in the conference report differs significantly from the language reported by the Environment and Public Works Committee in the 107th Congress. The provisions that my committee reported were ones contained in the energy legislation that the Senate passed this year and last year.

This conference report will shield companies that make, use, or market toxic gasoline additive MTBE from Federal and State product liability lawsuits.

Let me repeat that. It will shield companies that make, use, or market the toxic gasoline additive MTBE from Federal and State product liability lawsuits.

MTBE has contaminated ground water in every State of this Nation. This provision was not included in the Senate-passed bill. This provision shifts an estimated $29 billion in cleanup costs from oil and chemical companies to State and local American taxpayers.

The General Accounting Office estimates that there are at least 150,000 MTBE-contaminated sites nationwide.

Vermont has 851 of those sites. Public and private drinking water systems in my State have been polluted by MTBE. If the water right here in the Capitol building was contaminated with MTBE, we would ban this toxin today.

Even though we know MTBE is environmentally harmful, the conference report dramatically extends the time that this product can be added to our gasoline before we pull it off the market. In fact, it may be extended forever.

Besides the MTBE problem, the renewable fuels provisions in this conference report are deeply flawed.

The Senate's renewable fuels title was a carefully drafted package which balanced regional interests. Now, it is unbalanced in so many ways.

For instance, the Senate put positive environmental provisions into our renewable fuels package. One provision allowed Northeastern States to require reformulated gasoline statewide.

We also provided the Environmental Protection Agency with the authority to better regulate fuel additives to prevent future MTBE-like situations.

We provided States with authority to reduce the emissions from fuels if too much ethanol was being used. These are all gone.

Although I support renewable fuels and ethanol, this package has changed so dramatically that it is harmful to the air and water. I cannot support using the fuels provisions of the Clean Air Act to damage air quality.

A second item from my letter is the treatment of ozone pollution standards in the conference report.

The conferees have agreed to include an extraneous new provision amending the ozone nonattainment designation process in Title I of the Clean Air Act.

This is the part of the act that officially tells the public how dirty or clean the air is. It tells the public whether their area meets the health-based ozone standards and it determines what must be done to help clean up the air in that area and for its downwind areas.

This is an entirely new provision, it was not considered by either the Senate or the House of Representatives.

This provision, inserted in the secret conference, would allow polluted areas off the hook for controlling ozone pollution for years at a time. It would extend the deadline for compliance with the ozone standard almost indefinitely for many areas.

It would also reach back in time and declare some cities with serious air quality problems as ''clean.'' This whole provision is a direct attack on the Clean Air Act and bad for public health.

As a result, people downwind will suffer. The air of the communities downwind of these ''extended compliance'' or ''reclassified'' areas will get dirtier. There will be more asthma and more respiratory problems.

This provision is not the answer to transported pollution. The answer is for this administration to get cracking on protecting air quality.

Changing cities' ozone compliance deadlines under the Clean Air Act does not increase our Nation's alternative energy supplies.

This provision is not an energy policy measure. It does not offer an energy-related solution to compliance with ozone pollution standards, and does not belong in this bill.

The changes put in here by a Congressman from Texas are also unfair to States and cities that have already achieved compliance with the national ozone standards. These States and cities have worked hard and invested resources in controlling their pollution. All their work will have been for naught.

There are other cities that have been ''bumped up'' or classified as having more serious ozone problems. EPA has already asked them to undertake more stringent ozone control efforts.

These stronger measures are already required and being implemented in numerous cities throughout the Nation including: Chicago, Milwaukee, Baltimore, Philadelphia, New York, Wilmington, Trenton, Los Angeles, and Sacramento.

Mr. President, in addition to this general assault on public health, the conferees have included one other little gem. EPA is prohibited from imposing any requirements of the Clean Air Act on an area of Southwest Michigan for 2 years.

Obviously, this provision was also not contained in either the Senate or House bills. Nor is it good public health policy.

Not only is the Clean Air Act substantially amended in this bill, but the Clean Water Act is as as well. The conferees have included language similar to a provision in the House-passed bill that exempts oil and gas exploration and production activities from the Clean Water Act stormwater program.

The Clean Water Act requires permits for stormwater discharges associated with industrial activity. The conference report exempts oil and gas construction sites from stormwater pollution control requirements.

The scope of the provision is extremely broad. Stormwater runoff typically contains pollutants such as oil and grease, chemicals, nutrients, metals, bacteria, and particulates.

According to EPA estimates, this change would exempt at least 30,000 small oil and gas sites from clean water requirements. That is a terrible rollback of current law.

Another troubling section of this bill is the leaking underground storage tank provisions. This issue is also in the Environment and Public Works Committee jurisdiction.

This is another case where my committee unanimously passed a bill that is stronger than the provisions in this conference report.

The conference report's inspection provisions are so lax that a tank last inspected in 1999 may not be reinspected until 2009. The bill my committee passed, and that I supported, would require inspections of all tanks every 2 years.

While the underground tank program needs reform, the conference report takes a step backward. It allows leaking tanks to remain undetected for years. And, in many cases, it allows the polluter off the hook for cleaning up his own mess.

Let's review what we are debating today: An energy bill. Actually, it is an energy producers' bill; an energy polluters' bill; an energy profiteers' bill.

The three Ps: Producers, polluters, profiteers.

I would like to focus briefly on the polluters.

A senior member of the conference committee reported that, yes, this bill will not reduce our reliance on polluting sources of energy. But it will secure our energy independence.

I agree with the first statement, that with this bill our Nation becomes more addicted to energy sources that pollute. In fact, I would say that this energy bill equals pollution.

Four words and a numeric symbol say it all here on my chart.

Energy bill equals pollution.

This bill pollutes our surface and groundwater by exempting oil and gas development from provisions of the Clean Water Act.

This bill pollutes our drinking water by allowing MTBE, a toxic fuel additive, to seep into our public and private drinking water systems.

This bill pollutes our land by allowing unlimited development of energy installations on public lands, including parks, wildlife refuges, and sensitive areas.

And this bill pollutes our air in so many different ways; primarily by extending pollution compliance deadlines and continuing to avoid serious progress in cleaning up our air.

Pollution, that is what we are voting on in this legislation.

A vote for this bill is a vote for greater pollution.

This is wrong. The American people do not want energy security at the expense of the environment. The word ''conservation'' and the word ''conservative'' are closely related. I am an independent Senator, but I consider myself to be a careful legislator.

I seek to be conservative. I try not to support legislation that exploits our natural resources and pollutes our environment. This bill abandons that approach. It is an aggressive, overreaching measure. I oppose this bill, and all other Senators should as well.

Mr. President, one last thing I should note for interested Members is that this Barton ozone provision is not the same as the former Clinton ''bump-up'' policy. That policy was a case-by-case basis and it applied only to the outgoing 1-hour ozone standard.

Also, the areas receiving the benefit of not being ''bumped-up'' to a higher nonattainment status under the Clinton policy had to demonstrate that their emissions did not cause problems downwind. That protection appears nowhere in Barton.

This Barton provision completely disrupts the Clean Air Act's designation process and appears to do it indefinitely.

I hope the Congressman from Texas is willing to pay the hospital and doctor bills of all the children whose health he and his Congress will damage if this bad bill becomes law. Every person who votes for cloture and for this bill should also be held responsible.

I ask unanimous consent to have printed in the RECORD a one-page explanation of how the Barton provision is different from the former Clinton policy.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BARTON'S OZONE EXTENSION PROVISION IS FAR DIFFERENT THAN 1994 CLINTON ''BUMP-UP'' POLICY

The 1994 policy explicitly states that the policy should apply only where ''transport from an area with a later attainment date makes it practicably impossible to attain the standard by its own attainment date.''

The 1994 policy says that in this situation where it is ''impossible'' to meet clean air standards due to transport, the attainment date may be extended, but the new attainment date must be ''as soon as practicable based on the maximum acceleration practicable for emissions reductions in the downwind area and in the upwind area.''

Barton's provision (Section 1443 of H.R. 6) is not limited to situations where transport makes attainment of clean air ''impossible.'' It applies wherever there is a ''significant contribution'' due to transport.

What does ''significant contribution'' mean? It is undefined in Barton's provision, but typically significant means ''able to be detected or measured.'' That is a much, much less restrictive standard than the approach under the Clinton administration's 1994 policy.

And unlike the 1994 policy which discusses ''maximum acceleration practicable for emissions reductions'' in upwind areas, section 1443 does nothing to address upwind sources of air pollution.

Another big difference between the Clinton administration policy and Section 1443 is that Section 1443 is not limited to the one-hour ozone standard. Section 1443 also applies to the eight-hour ozone standard.

In 1998, when EPA revised their transport policy, they knew it would be short-lived. EPA had promulgated a new eight-hour standard in 1997. By applying this policy to the eight-hour ozone standard, Section 1443 will likely have adverse affects on air quality for years and years to come.

EPA has done no analysis regarding the public health impacts of expanding this policy from the one-hour standard to the eight-hour standard.

However, Abt Associates, a leading air pollution consulting firm, found that delaying action meet the 8-hour ozone standard for even one year would result in: Over 387,400 asthma attacks; almost 4,900 hospitalizations due to respiratory distress; and over 573,300 missed school days.

Rep. Barton has contended that this provision would just give EPA the discretion to grant a deadline extension if appropriate and that it would not require a deadline extension. However, the language is mandatory. If section 1443 is enacted, then it creates a new section 181(d)(2) of the Clean Air Act which says EPA ''shall extend the attainment date'' for downwind areas.

The PRESIDING OFFICER. The Senator from Texas.

Mr. CORNYN. Mr. President, I want to speak for a few minutes about the Energy bill conference report that is before this body, and specifically address some of the criticisms that have been made against a clean fuel additive that was mandated by Congress under the Clean Air Act, and which was specifically certified for use by the Environmental Protection Agency.

But, first, let me just speak more generally about the need for a national energy policy in this country. We are a country that likes to consume a lot of energy—whether it is gasoline, natural gas, coal—because it improves our quality of life and because it is key to growth in our economy and our prosperity, which, in turn, creates jobs so people can provide for their families.

At the same time, we are a country that loves and cherishes our environment, whether it is clean water or clean air. We know that by consuming energy we need to also take necessary steps to protect our air and our water and our environment at the same time. We do not want to be forced to choose one or the other. We want, and I believe we can have, both. We can have the energy we need in order to maintain our quality of life and our prosperity and to fuel our economy, and we can also have that energy supply produced and consumed in a way that protects the environment against unreasonable damage.

The reason I support this Energy bill is not because I believe it is perfect. I do not believe there is such a bill, unless the person talking happens to be the author of that bill. That is probably the only bill any of us would agree was perfect, the one that we were able to write by ourselves. But, of course, that is not the way it happens. That is not the way the Founding Fathers conceived of legislation passing.

So what we have is a bill that has some strengths and some weaknesses. But, on the whole, I support this bill because I believe, for the first time in at least 10 years, it means America has the hope for a national energy policy that not only serves our economic interests but serves our national security interests as well.

About 60 percent of the fuel we consume in this country is imported. Over the years, as we have consumed more and more energy, we have also become more and more dependent on imports from other parts of the world. We know one of those locations in the world is the Middle East, which is the subject, of course, of daily news reports. We know how troubled it is. We know how volatile that area of the world is. It means our energy supply is in jeopardy. Thank goodness we have been able to secure a steady supply of fuel, but it is at risk—as much at risk as the next headline, the next news flash, where we learn that some terrorist activity or some disruption of our energy supply is caused by other governments and other people beyond our control.

So I think what we need to do, and what this Energy bill does, is encourage innovation and increase productivity here in America so we are less dependent on imported energy. I think that is a good thing.

What we have right now is a schizophrenic energy policy in this country, one that squanders our strength in terms of our natural resources. It discourages innovation, and it leaves consumers too vulnerable.

There are specifically some interests that relate to my State of Texas in this bill that I want to talk about, but this is a bill that is not just good for Texas, this is a bill that is good for the entire Nation. It moves us one step forward, and it is one that I believe is in the best interests of the American people.

There has been some criticism of the provisions of this bill as they relate to a chemical called MTBE. The technical term is methyl tertiary-butyl ether.

Now, people may wonder why we are talking about MTBEs, and why it is so important. Well, the truth is, this was mandated, the use of reformulated gasoline, in the Clean Air Act about 20 years ago because what Congress recognized was that unless we could find ways to burn gasoline in a cleaner, more environmentally friendly way, then we were going to have dirtier air.

So Congress mandated the use of reformulated gasoline. American enterprise, as it does so well, innovated, created this product, which has then been used over the last 20 years and has enabled literally millions of people with lung disease, asthma, and the elderly to breathe easier. In other words, this oxygenate, as it is called, this chemical compound, has improved the public health in this country over the last 20 years. We are a better and healthier Nation for it.

As a result of this Federal mandate that reformulated gasoline be used, and that something be innovated and created to allow gasoline to burn cleaner so we may breathe easier, people in my State and around the country began to produce MTBE. And you do not do that overnight. It takes a lot of infrastructure. It takes a lot of investment to produce this particular product.

Indeed, 70 percent of MTBE is produced in the State of Texas and, not coincidentally, it creates a lot of jobs in our State. It is used in parts of the United States which are among the most polluted because we universally recognize that the use of reformulated gasoline and this particular oxygenate is important to reducing pollution and improving the public health.

Well, the problem is—that this Energy bill seeks to identify—in some places we have seen that people who store MTBE in storage tanks have not kept those tanks in good repair and they have leaked this oxygenate into the surrounding environment.

But rather than address their ire and their concern—a concern which I share—at those who maintain leaking tanks, we have people focusing on this chemical compound—which has not been shown to be harmful to public health but which, indeed, has improved the quality of the air we breath over these last 20 years—people who want to opportunistically claim that this chemical is somehow dangerous, when, in fact, the fault lies with those who do not maintain the tank in which this chemical is stored.

We realize—and common sense would tell us—that whether it is gasoline or whatever the product is, if it is in a leaky tank, once it gets out of that tank into the surrounding environment, it can cause some harm. Common sense tells us that. But rather than focus on the leaky tanks and the people who have negligently allowed those tanks to leak, we have people who want to aim their crosshairs at the people who produce MTBE, which has improved public health and air quality.

What this bill simply does is provide a safe harbor provision for those who have produced this product, which has improved the public health, and says: We are not going to stab you in the back for doing what the Federal Government asked you to do in the first place.

In other words, the Federal Government said: Please invest your money, Mr. Businessman. Please create this infrastructure to produce this reformulated gas additive that allows our air to be cleaner.

We are not going to let that happen and then years later, when perhaps memories dim and when someone has another idea, to say: Yes, we have you. Now you are going to be liable for money damages because you have done what Congress and the EPA asked you to do. We don't care about the benefit to the public health by producing clean air because now all we are concerned about is getting the people who have, perhaps, the deep pockets.

What we are discussing, in terms of the safe harbor, is a provision that ensures fairness, that preserves the trust that is so important to guaranteeing that we in this country have the benefits of the innovation that the free enterprise system provides and that improves all of our lives.

I hope we are not going to say to those who place their trust in Uncle Sam, when Uncle Sam says, please, Mr. Businessman, innovate and create a product that is going to improve public health, we are not going to allow that to be turned into a liability. There are some who want it to turn into a liability. In fundamental fairness, as well as our collective interest in the innovation that comes in the free enterprise system, when people step up and produce a product from which we all benefit, we should not let that innovation and we should not let that commitment and that trust suffer as a result of this legislation.

I congratulate Chairman DOMENICI and the conference committee for standing strong in the interest of fairness. It is true that over the next 15 years, MTBE will be phased out. There will be other products that will step in to provide cleaner burning gasoline, those that are based on ethanol. But, frankly, unless the safe harbor provision stays in this bill, if I were someone who was going to produce an ethanol-based gasoline additive to produce a cleaner burning fuel, I would be very skeptical about investing the money, about developing a product that will clean our air, because I would worry

that just as those who are targeting MTBE, we would be back here 10 or 15 years from now, saying: We caught you. And what are you guilty of? You are guilty of trusting Uncle Sam and Congress. Now we are going to let entrepreneurial lawyers and others make claims regarding the very product that you designed in order to meet the needs of the American people. They are going to sue you for it and try to take everything you have and more.

I don't think that would be fair. I don't think that would be right. Frankly, I wanted to come out here and talk a little bit about how we got to this place because I think anybody who understands the complete story would understand that while this bill phases out MTBE use over the next 15 years, it also, at the same time, preserves the trust that is so important to getting investment in innovative products that make the public health better.

Manufacturers will be extremely reluctant to invest in other additives without some confidence that the Federal Government will not allow those investments to become the basis of future liability.

In short, the bill Chairman DOMENICI and the conference committee have crafted ensures that clean alternative fuels will not be regarded as unreasonably dangerous simply because they comply with Federal mandates. It is important to say, though, that if someone is negligent, whether it is maintaining a leaky tank that contains MTBE or any other product, and it causes harm, they are not protected by the language in this bill in any way. There is no defense or immunity from a suit for negligent conduct.

I have heard some say that MTBE is a threat to public health. As I said, MTBE on the whole has benefited public health. The truth is, it is one of the most widely studied chemicals in commerce, including the pharmaceutical industry. The overwhelming majority of scientific evaluations to date have not identified a single health-related risk from the intended use of MTBE in gasoline. Numerous government and world-renowned independent health organizations to date have found no compelling reason to classify MTBE as even a possible cause of harm to human beings. Because MTBE manufacturers have complied with the requirements of the federally mandated program, MTBE should receive the equivalent legal treatment as ethanol for the reasons I have mentioned: for reasons of fairness and sound energy and consumer policy, and to encourage the kind of investment that ultimately will improve and maintain the public health.

The facts that demonstrate the need for a comprehensive energy policy that this bill represents are overwhelming. Gas prices are at $1.50 and above in most areas of the country. Natural gas prices at the burner tip are more than $9 per 1,000 cubic feet. This summer, as we will recall, 20 percent of the Nation faced a total blackout which lasted more than 8 hours. If now is not the time to pass comprehensive energy legislation, I ask my colleagues: When is? If now is not the time to pass comprehensive energy legislation where America can again have a coherent and comprehensive energy policy that protects our economy and our national security, when will we pass such a bill and embrace such a policy? We should do so without any hesitation and without any further delay.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I was going to go next, but I note the attendance of the distinguished Senator from Louisiana. He would like to speak, and I will yield to him.

Let me make one or two observations regarding the speech just delivered. First, I thank the Senator from Texas for the reasonableness, the rationality of his discussion. He would not believe, the people who have listened to the debate over the last couple of days would not believe the facts as you have described them, which are the facts, with reference to MTBE. This bill does not say if somebody misuses MTBE, negligently spills it, if they have tanks that leak, if they are not careful to keep it where it is supposed to be, it doesn't say those kinds of actions are rendered nonactionable in tort liability.

The safe harbor is very narrow. It says the producer of the product, which has been determined by the Government and to date determined by scientists to be totally safe and very effective, it says those who made the product are not liable for the mere fact of making it and selling it. They are not liable. If it causes harm because of other actions with reference to it, then the hold harmless does not apply. That is what the Senator has been telling us today; plus, he has enlightened us that, even as we speak today, contrary to the elaborate statements regarding people who have been damaged and hurt, the scientists in the Government still say, as a product, it is safe; as a product, it is tremendously effective; and as a product, the Government isn't even considering doing anything about it. They are not out there saying we want to stop it. I have not heard that from the EPA or anyone else—I think because they would have no evidence—that there is anything wrong with the product.

I say to everybody in this country who wants ethanol, ethanol may prove, as an additive, in 15 years to cause some damage. Are we going to go back 15 years and say to the farmers who grew the crops that went into ethanol: You are collectively, as the farmers of America, liable for producing the corn that produced ethanol that produced a problem 15 years later? I doubt it, because I don't think anybody would be down here saying we want to stick all these hundreds of thousands of farmers. But right now we are saying: Have at it, trial lawyers, we hope you can get after these guys because somebody got hurt. Sue the companies that produced it. People are saying: After all, they are rich companies.

That is not the American judicial system. Liability is not based on whether you have a successful company. As a matter of fact, one of the reasons some people are upset about this safe harbor is that they think the ones with money are the ones that are going to be in this safe harbor; namely, those that produced a product. They don't think there is going to be enough money for them out there in the marketplace where other things have gone wrong. They don't want to have to look for people who had leaky tanks and sue them and their insurance companies. They want to leave that to somebody else, right? They want to go after one of these companies—I don't know which one—and a number of them are in Texas. People will say: There is that old Texas again.

Well, Texas has about 13 companies that produce various products related to this whole area, not just this. Some of them produce this product. If I were the Senator from Texas, I would be right here doing what he is doing. The Senator is not opposed to those companies, right, or embarrassed by them? He is saying: Good luck. He is not embarrassed that they are making money. I assume they pay a salary to people in his State. I assume these towns like them. They are not doing anything to these towns. There is no pollution in the towns where it is being produced.

Those who would kill this bill over this issue have said to the farmers of the United States who want to use their crops to produce ethanol—if you vote this bill down based on this MTBE issue, you are saying to the farmers in your States—there are 12 or 15 of them—that have lots of corn and soybeans: We are taking the trial lawyers over you. You are saying: We have a choice to make and tomorrow morning we will make it, and we will choose the trial lawyers; we want to help them and forget about the farmers. That is the issue, as I see it. This will not end because we are going to go into MTBE today in a little more detail.

I yield to the Senator from Louisiana.

(Mr. GRAHAM from South Carolina assumed the chair.)

Mr. BREAUX. Mr. President, I thank the chairman for the work he has done on this legislation. It has been difficult and time-consuming, and it has occupied a great deal of his time. It seems to me that everything the Energy bill

does in terms of traditional oil and gas exploration and development, and what it does in geothermal, encouraging wind power and alternate fuels, has sort of become secondary to the question of MTBE.

I guess Americans who are watching this debate where we are talking about an Energy bill might say the whole thing will rise or fall on what Congress does with MTBE. They would say: What are you talking about? Energy security, energy efficiency, and lessening our dependence upon foreign imports; that is all part of this legislation. It does a good job in that area. Could it do more? Of course. But it does a good, solid job in working with the issues of electricity and traditional oil and gas development and alternative fuels.

So the question now comes down, for many on my side of the aisle, to what Congress is doing with MTBE. I thought I would try, in a limited way and in a limited amount of time, to explain what I think the issue is.

The legislation establishes for MTBE—which is a fuel additive, to make fuel burn cleaner, like ethanol—the same standards for liability for one who produces it and misuses it as it does for ethanol. What does it mean? The legislation simply says you cannot sue a manufacturer of this fuel additive because it is a defective product if it is made according to the standards to which the Government told them to make it. Congress mandated that people produce MTBE to be a fuel additive so that gasoline would burn cleaner. You can add ethanol or you can add MTBE, and the results are that you have a cleaner product.

Some in this country say: Well, if MTBE gets into the drinking water, the ground water, we ought to be able to sue the manufacturers because they have produced a defective product—even though they have nothing to do with the injuries or the damage that occurred.

What I mean by that is this. Here is an example. Suppose somebody goes down to the local Exxon station and they buy 100 gallons of gasoline, and then that person takes the 100 gallons of gasoline and dumps it into the drinking water system of their hometown. Should someone be able to sue Exxon because they have made a product that this person dumped into the river system or the drinking water system? Of course not. They would be laughed out of court. If the Exxon service station took the 100 gallons of their gasoline and dumped it into the river system, then Exxon, the seller and manufacturer of that product, would be negligent and would be responsible, and you could sue them.

But there are numerous lawsuits brought against the manufacturers of MTBE, not because they did anything wrong with the product they make; the product is made to be put into gasoline to make it burn cleaner. It is made according to the standards set up and required by the Federal Government.

So the legislation says: Wait a minute, you cannot sue the manufacturer for doing what Congress told them to do in making a product that, if used in a correct manner, is very efficient, effective, and helps clean up the environment.

Some say: No, we want to sue them because it is a defective product. The product is only defective if someone misuses it. Then they ought to be able to be sued. They should be responsible.

Somebody gave me the analogy of a company that makes baseball bats. If somebody buys a baseball bat and takes it home and beats up his wife or his children, or the wife beats up her husband, then someone should not be able to sue the manufacturer of the baseball bat. Of course not.

The bat, if used for its intended purpose to play the game of baseball, is not a defective product. That is the purpose for which it was manufactured. If someone uses it to cause harm, they should be responsible, not the manufacturer of the bat, not the manufacturer of the product.

If MTBE is used as it is supposed to be used and made according to the standards Congress told it to be made by, it is not a defective product; it is a very valuable product. The legislation simply says if the product is used according to how it should be used, you can't sue the manufacturer because someone else misuses it.

The important thing is that it does not deny an injured person redress or the opportunity to sue if damage is done. The proposed language in the chairman's bill makes it abundantly clear that any claims of negligence or spills or drinking water contamination can go forward in the judicial process. That is part of the chairman's legislation. The only claim that is restricted is suing someone who makes a product according to the formula they are supposed to make it; they cannot be sued for making something that we told them to make in the first place. Not only is that common sense, it is good judicial sense. That is what the bill says.

I read the legislation. I said: What is everybody talking about? Because it can't possibly be true. Guess what. It is not. The lawsuits that are still available to proceed against misuse of these areas are substantial. It specifically maintains claims for environmental remediation costs. You can still sue for drinking water contamination. You can still sue for negligence, for spills, or other reasonably foreseeable events. You can still sue for public or private nuisance. You can still sue for trespass. You can still sue for breach of warranty. You can still sue for breach of contract. And you can still sue for any other liability, other than a liability based on the claim that you made a bad product and, therefore, you ought to be liable for damages. I think that is something no reasonable person would say is needed or necessary.

I was reading the language. You can talk about papers and this group sent out this piece of paper and that group sent out this piece of paper, and we get all this material about ''vote against this'' and ''vote for it.'' Every now and then it becomes important, I say to the chairman, to actually read the legislation. You cannot put a spin on the words of the legislation. Legislation is not a political document from the Democratic Policy Committee nor a political document from the Republican Policy Committee. It is the language on which we are going to be voting.

The language says very clearly that ''nothing in this subsection''—in the bill—''shall be construed to affect the liability of any person for environmental remediation costs, for drinking water contamination, for negligence, for spills, or other reasonably foreseeable events, public or private nuisance, or trespass, or breach of warranty, or breach of contract, or any other liability other than the liability based on the fact that it is a defective product.''

MTBE is not a defective product. If you misuse it, it can cause problems. If you drink it, it could kill you. That is not its intended purpose. If you drink gasoline, it will kill you. That is not its intended purpose. Its intended purpose is to run engines for the economy of this country.

I am well satisfied that we have crafted a section on MTBE liability that is reasonable; it makes legal sense, and it just makes common sense. There may be other reasons not to be for the Energy bill, but it should not be on this particular issue which has been misconstrued by those who say they have concern.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I struck an agreement with a couple of Senators who have been waiting to speak. Senator NICKLES would like to follow me. I ask unanimous consent that he follow me. Secondly, the Senator from California, who was just here a bit ago, asked that she proceed next, and I ask unanimous consent she proceed next.

The PRESIDING OFFICER. Is there objection?

Mr. LEAHY. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Let me see what this means. Are we doing this under a particular time?

Mr. DOMENICI. No, we are not.

Mr. LEAHY. The Senator from Vermont would like to speak on two

different issues: the energy issue and wants his experiences here in Washington at the time of President Kennedy's assassination. I want to get some idea of time.

Mr. DOMENICI. The Senator can speak after the Senator from California. That is fine. She is right here.

Mr. LEAHY. Mr. President, Senator DOMENICI was saying the Senator from Oklahoma and then the Senator from California. Might I ask the Senator from Oklahoma—I am not going to object—how long will the Senator speak?

Mr. NICKLES. Twenty or thirty minutes.

Mr. LEAHY. The Senator from California?

Mrs. BOXER. Fifteen to twenty minutes.

Mr. DOMENICI. And I am going to speak for 20 minutes now.

Mr. LEAHY. I wonder if I might ask, to make sure in case Senators wish to speak longer, to amend the unanimous consent request so the senior Senator from Vermont could be recognized at a quarter of 2 for up to 20 minutes.

Mr. DOMENICI. I have no objection, but I would like to add, with that agreement, that the distinguished Senator from the State of Kentucky would like to speak, and he will either speak before the Senator from Vermont, if the quarter of 2 has not yet arrived, or after the Senator from Vermont speaks.

Mr. LEAHY. But at quarter of 2, the Senator from Vermont is to be recognized.

Mr. DOMENICI. That is the junior Senator from Kentucky who is asking for time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I sure hope the people in this country and those who have written about MTBE were privileged to hear the few remarks that took place this morning about the issue from the distinguished junior Senator from Texas and the Senator from Louisiana. I don't plan to speak anymore about MTBE now, but before the afternoon is finished, I will speak to it with a little more detail so people will understand that the House asked us to do this, and they didn't ask us for anything unreasonable. This is a very valid approach to a problem that cries out for a solution, other than to turn it loose and let anybody sue however they would like and see what happens.

Having said that, I wish to talk about this bill that is before us from the standpoint of what is going to happen if those who have come to the floor and been so critical of the bill prevail and we don't have this bill.

I don't want to go back and spend a lot of time duplicating the words that have been used about this bill. Suffice it to say, there have been enough negative words used about this bill that one might consider it is the worst thing that ever happened.

I would like to tell each and every one of the Senators and each and every American who is concerned what is going to happen if this bill doesn't pass.

The impression is this is just a big bill that somebody put together that has a lot of pieces to it. We don't like some of them and some of them we think are giveaways, so we ought to just kill it. I am going to use the word ''kill'' for a little while because I assume those people who have gotten up and talked that way would like to kill the bill.

First, if we kill this bill, fuel diversity efforts that will help reduce our dependency on foreign oil and gas will be killed along with it. In other words, this bill is a conscientious effort to help American industry, large and small, produce alternative sources of energy for America and, in many instances, to do that, they have been given a tax incentive. All of those alternatives will be dead when this bill is killed, if it is.

The ethanol program, which many have wanted for years—a few in this body don't like it, but let's just take it for what it is—everybody should know the ethanol program is dead, killed, gone, out the window.

Now, there are some who would applaud it, but the overwhelming number of people, and the entire agribelt of America, is cheering that we pass it, not that we defeat it. I, frankly, do not see any way, I say to all the farmers in this country, of ever getting an ethanol bill anywhere like this if this bill is killed.

So to repeat, for those who think we need ethanol to provide an alternative 5 billion gallons a year to the use of crude oil gasoline, and for farmers who want an alternative crop, kill the bill and you have killed that forever.

The renewable fuels provision would replace 5 billion gallons of oil with 5 billion of domestic-produced ethanol. I have alluded to it. It will die with the death of this bill.

Over 800,000 job opportunities for our citizens will go out the window, dead, killed, for those who relish speaking about killing this bill.

Clean coal initiatives, which for the first time say to America, America, you are king, K-I-N-G, King Coal, and we want to provide some incentives so you might use some of that coal. Well, for those who want to kill this bill, ''King Coal'' will remain a dead product. We can inventory it, we can take note of it, and we can brag that America has coal that will run the country for—I do not know how long. The last time I read something, it would run it for 500 or 600 years. Out the window, no chance to use it because we will be using every other fuel led by natural gas and we will soon be importing liquefied natural gas because there is no way we are going to use our coal.

So let me repeat in simple phrases, ''King Coal'' will remain dormant but for the small amount being used. Not a new powerplant will be built using coal. It is dead.

Yesterday there was a report by a commission. The commission worked since the Northeastern blackout. They issued a report, and the summary of the report is two or three pages long. What they have concluded, I say to my colleagues, is that the principal reason for the Northeast blackout is that some companies were not following the voluntary reliability standards. Then those who made the study conclude that if this bill is passed, there should not be another blackout because the reliability standards are made mandatory and they will be enforced by criminal penalties. So nobody is going to run around taking a chance with overloading and breaching the reliability standards. Reliability means that one is doing what is prudent and there is no more reference to the use of these lines.

So let us summarize that one. For the time being, and I think for some time to come, the blackouts in America will remain alive and possible because we will have thrown out the window the reliability standards that are in this bill because some want to make the case on an issue such as MTBE or the like which we are talking about today.

There is regulatory certainty required for the utility industry. If we fail to provide that, FERC, with congressional direction on issues such as standard market design and transmission pricing, will be gone. They will be dead. The repeal of the Public Utility Holding Company Act will be killed.

Some people have said if nothing else was in this bill, the repeal of PUHCA, a 1935 vestige that hangs around over the utility industry, prohibiting investment over some kind of fear that is no longer a reality—and look how long we have been waiting to get rid of PUHCA—I think it would be fair that I could say if this bill is killed, PUHCA is here forever. So industry that is waiting for an injection of money, they can sit by and eke out investment because the principal impediment will still be there. The repeal will have been killed.

There are some who say because their States have had some unlucky or unfortunate situations, such as Enron, that consumer protections are necessary and then, of course, they look at this bill and say, I know what protections I want and they are not exactly the way I want them in the bill, so they come to the floor and say there are no protections. But I say if this bill is killed, you kill the consumer protections in this bill which are against

fraud, manipulation, which force increased transparency, which increase penalties for violation of the Federal Power Act and Natural Gas Act, and they close the Enron fraud loophole.

Now, you can throw all of those out the window for people who want to find fault and want to talk about a turkey and want to talk about the goodies in this bill, but I am telling you what you lose when you lose this bill. I am ready for anybody to come and say it is not true.

How are we going to get these if this bill dies? Will the House come marching down the aisle, just having gone through this exercise, and say, oh, well, let's just start next week and do another one? Does the Chair think so? I think not. Do my colleagues think this Senator spent the better part of a year on it, and do they think I am going to march to my committee and start hearings and saying, oh, well, we did the best we could but we better just start over again because we heard so many speeches? Not on your life. The speeches had little to do with the important provisions in this legislation. They had to do with things that were put in the legislation, as everyone knows, when it is run through both the House and the Senate and individual bodies and then through a conference.

Tax credits—let me say I am aware of the tax credit game, and this bill is filled with tax credits that people wanted and needed and on which I am sure some of my good friends are quite certain we were too generous. I note the presence of my great friend Senator NICKLES and I am sure he is not going to get up and speak about MTBE and we ought to take it out, but he is going to wonder whether we put in too many tax credits.

For every newspaper article and editorial that said: let's kill this bill, it is no good, there are hundreds of letters of support from the people affected. They do not write editorials. They write and tell us their problem.

The people who build and sell windmills and have giant windmill projects going, they are very clear. This is the best thing that ever could have happened to them. We have made permanent the production tax credit that is sending windmills soaring in the United States, and I do not mean soaring in the air, I mean soaring in numbers.

Some ask: Do you really want those, Senator? And I sometimes chuckle. I drive around and see some of them, and I am not sure. But they will build them pretty before they are finished. They will even be good looking. Right now, some people write us letters and say: We don't want any more of those. Some people in Massachusetts wanted us to put something in this bill saying the local community could stop them if they didn't want them. We couldn't get that done if we tried. In any event, the credits for that are gone. If we pass the bill, we will see it soar.

Regarding solar, we received all kinds of congratulations and support from the solar industry, saying it will finally go now. It will go, but it is dead in its tracks when this bill dies, if it dies. I don't think it is going to. At least I hope not.

You can go right on through. Biomass and all the others are anxiously waiting so they can begin to produce alternatives, adding to the totality of what we will use for energy in America.

We have been so bold that we say the next generation, economically speaking, will be the hydrogen generation. I am not sure about that, but this bill starts us down that path. I don't know where we are going to pick up a bill that will put together the kinds of things that are involved, such as $1.6 billion to start joint ventures with the automobile companies to build this.

Then there is nuclear. France leads the world. While we tremble, they build. While we worry, they have 78 percent of their electricity from nuclear power. While we run around worrying where are we going to put this waste product, do you want to take a trip to France? They will show you where they put theirs. It is a building that looks just like a schoolhouse.

You walk into it and look around and you ask: Where is the spent fuel?

They say: You are standing on it.

What?

It is right there. It is encased and they put in solvent and put in water, glass put upon it, and they are smart enough to say that will be safe for 50 to 100 years. Guess what. They say: We will find a solution or a use for it in that period of time.

We stopped producing nuclear powerplants, one of the reasons being we don't know what to do with the waste. An engineering problem, and nothing more, has killed nuclear power in America. We have said maybe somebody would like to try it and we will give them some incentive to get around the difficulties involved. I hope we do it this way. Because if we don't, I think we can probably say, during my lifetime—I am not sure about the lifetime of the occupant of the chair, who is a very young Senator and very much waiting around to see this happen. You may see it, but I don't think I will, because you have to give some incentives to get started and then the public will see the new generation, something we ought to have going on in our country.

I could go on. Before I stop, though, I want to talk about Alaska and natural gas. First there was a program—it is not in this bill—to capture crude oil that is in ANWR. We were told: If you put it in the bill, it will be filibustered. Isn't that interesting, Senator NICKLES? You weren't for taking it out; you wanted it in. Now we have left it out and we have somebody filibustering because of the MTBE hold harmless clause.

I wish we had known we were going to have cloture votes down here. Maybe we should have put it in and had cloture on a lot of things, including ANWR. But we didn't put it in, in good faith, because the minority leader said he had enough votes to kill it. So we left it out.

Alaska is loaded with energy. What do we do in this bill if we can't utilize some of their energy? We tried very hard to assure the delivery of natural gas to the lower 48 because it will not be longer than 10 years until we will be short of natural gas and we will be using it from other countries. Won't it be interesting? With a State of ours loaded with natural gas, America, which is using natural gas like it went out of style, will be importing LNG from all over the world. We will say: Here we are again. Instead of getting independent, we are getting dependent.

But we did try our best. This bill says bring it down through a certain area and bring it to Chicago. We said we will help the companies that will build it. We did what we could by way of credits and accelerated depreciation, but as of today we have no assurance that it will be done. We have hope, and at least we have done what we could, and it may happen. If you throw this bill out, that is not going to happen either. I don't know how long before you get anything going in Alaska, with the kind of fear and trepidation that happens every time you mention capturing some of their resources.

There are many other provisions in this bill. There are all kinds of great research programs. They are misunderstood because they are not paid for; they are authorized. They are saying if, in the future, Congress wants to pay for some additional research in—let's just pick one—nanotechnology, this gives them authority but doesn't pay for it. That is one. If you add it up, you will say this bill costs all these things, but it doesn't cost those things, because those are part of—like when you fund an education bill, you fund it for a lot more than you need and later on you pay for what you can afford.

I could go through some more, but my good friend Senator NICKLES wants to speak. He will be to the point. He will cite some problems with the bill, I am sure, and will also tell us some of the things that are reasonably good about it.

I am glad people have not come down here and made a lot of noise about the whistleblower protection because we did continue protection of whistleblowers, contrary to what some of their main groups are saying. They just wanted more, not continued protection. But we have continued them.

There are at least 10 other major issues we have done that I truly don't

believe will get done in the near future. They are more or less moribund—that means dead—if we finish this bill by not voting for cloture and voting for the bill.

I thank the Senator for listening. To the extent there are programs in here that others have worked hard to get in here and are very proud of and I haven't mentioned, please understand I did not mention everything. I mentioned what I could. What I didn't, I am glad, in our spare time, to get on the phone and suggest to others the rest of the things that are here.

I close by saying there are a lot of ways we could have done this bill. We have been chastised, we have been ridiculed, we have been put upon because of the way we put the bill together. All I want to say to my fellow Senators is we got a bill. We tried this before. We have gone through a year, year and a half and got nothing. I started this with the idea we would get a bill and it would be reasonably close to what we would have gotten had we spent much more time collaboratively with many more scriveners, many more writers, than we had. I think that is the case. Most people who were interested saw the product long before it came to the floor.

You notice I did not mention electricity reform, other than indirectly. But I will say for those who want FERC to run the entire grid, they will have that if this bill fails. For States that think we ought to have FERC doing it, they can be gleeful.

We thought we ought to phase it in and we thought we ought to let some States provide differently for themselves, but we made sure they couldn't close out investors who wanted to come into their States and put in utilities. We didn't make it simple, but we let it happen and we let them get their money back, too.

Those are tough issues. You don't get the bill, and you might get what some people like, or you might get that chairman over there who thinks he knows how to run it all by himself. You might get that. I didn't think that is the right way to go. But I didn't have the luxury of writing four versions. We had to write one version the best we could for everybody. We did that.

I yield the floor. I thank the Senate.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I compliment Senator DOMENICI, the chairman of the committee. He stated at the beginning of the year that he was going to produce a very comprehensive Energy bill, and he has done it. I have been in the Senate for 23 years. I have been on the Energy Committee with Senator DOMENICI for 23 years. This is the most comprehensive piece of energy legislation we have had in that entire time. We have had a lot of people say we need a comprehensive bill, but until now, that hasn't happened.

A couple of years ago, there was an Energy bill on the Senate floor, but the Energy Committee didn't have a markup. Senator DOMENICI, as chairman, decided that wasn't the way to go. He rightly felt the entire Energy Committee should be involved in marking up this bill. We marked it up over a period of months, and took several weeks in committee to report it out. For this open and inclusive committee process I compliment Senator DOMENICI for his methodology in reporting out this legislation which helped insure a solid and bipartisan product. I know he has been criticized for the way the Conference process, but he did allow the committee to work its will, and now we have brought back a very comprehensive piece of legislation to the Senate floor.

I tell my very good friend from New Mexico that I agree with a lot that is in the bill. But I disagree with some of the things in the bill. I am going to support the bill on the whole because I think positive energy legislation is very critical if we want to have a growing economy. You cannot have a growing economy if you do not have viable, sustainable and reasonably priced sources of energy. It is very important that we pass a good bill.

I would like to share with my colleagues that I ran for the Senate back in 1980 because of misguided energy policy that passed the Congress during the Carter administration which I found personally infuriating. In the midst of an energy crisis, the Carter administration proposed and passed, under a Democratic controlled Congress, several energy measures at that time which only served to worsen the energy related problems afflicting our nation. As a business man living in Ponca City, OK, I thought: What in the world is Congress doing? Everything they were doing, in my opinion, was very shortsighted. Maybe they had good, laudable goals, but they were very shortsighted if you happen to believe in free market principles. The one bill they passed that probably had more to do with me running for the Senate than anything was the windfall profits tax, which Congress passed in 1980. I was a State senator who happened to believe in free markets. The knowledge that my government would pass a law which so disincentivised the production of the very commodity we were most in need of at that time led me to conclude these people were completely out of touch with reality.

Then Congress passed a bill that said we are going to tax domestic production, but we do not tax imports. The net impact of that is you discourage domestic production and you encourage imports. That was about as anti-free enterprise as any piece of legislation I could conceive.

I was so irritated that I ran for office, and ended up serving in the Senate.

I might mention that one of the highlights of my legislative career was when we repealed the windfall profits tax in 1988. Frankly, I was embarrassed it took so long to get it repealed. I introduced legislation every year I was in the Senate to repeal the windfall profits tax. We didn't get it repealed until after it robbed the taxpayers of $79 billion, but we got it repealed.

We repealed several other pieces of the mistaken energy policy of the Carter era.

In a short sighted attempt to artificially incentivise renewables while ignoring market principals the fuel use tax said you couldn't burn natural gas in utilities and big powerplants. It passed in 1978. We repealed it in 1987.

The Natural Gas Policy Act of 1978 had dozens of different class categories for natural gas. I was pleased to be the principal cosponsor of the 1987 legislation to basically deregulate natural gas. That was a very significant piece of legislation that some people had worked on for decades, and we were finally able to get it through.

I might mention that at that time Bennett Johnson was chairman of the committee. He and Wendell Ford worked in bipartisan ways to basically deregulate natural gas.

I also might tell my colleagues that many people on this floor and many people who have not retired from this Senate said if we do deregulate natural gas, terrible things will happen; natural gas prices will explode. They did just the opposite. Gas prices went down. Oil prices went down after we deregulated oil.

Also, during the Carter administration they passed the bill creating the Synthetic Fuels Corporation to subsidize the creation of synthetic fuel from coal and shale oil. That was passed in 1980, and it expired—thank goodness—I believe in the 1986, but not before it wasted billions of the taxpayers dollars.

It is important that we not pass bad legislation. But it is very important that we pass energy legislation. We are far too dependent on unreliable sources that can choke and strangle our economy. We have seen that happen in 1993. We have seen it happen in other years. We can't allow that to happen. We have become far too dependent on foreign oil. We import over 50 percent, and it is growing towards about two-thirds dependency on foreign oil. That is not acceptable. What can and could and should be done?

The bill that we have before us has a blend of a lot of things. It encourages production and it encourages conservation. It also does a couple of other things—talking about some fixes on the books that need to be replaced.

It reforms PURPA, the Public Utility Regulatory Policy Act. I believe that passed in 1978 as well. We are finally going to repeal it. That required utilities to pay for avoided costs for energy

and basically increased utility prices, in many cases by—I was going to say hundreds of millions of dollars. It might be hundreds of millions of dollars for one powerplant over the life of that powerplant or those contracts. I compliment Senator LANDRIEU who worked with me on that. If there is competition, we will repeal it. I appreciate her work.

We are also finally getting rid of PUHCA, the Public Utility Holding Company Act. This passed in the 1930s. Maybe it made sense in the 1930s. It makes no sense, and, frankly, it hasn't made sense for the last couple of decades. We are finally going to get rid of it. By getting rid of that, we will open up, frankly, investment for utilities and energy projects in the billions of dollars. It received almost no attention and no debate. But anybody who has looked at it—it has been mentioned by, I think, everybody from Alan Greenspan to many of the regulators—said get rid of PUHCA. We are finally going to get rid of that regulatory maze that is long overdue.

It is also notable to see what we didn't do in the bill that many of our friends, primarily on the other side of the aisle, wanted to put in this bill. We don't have renewable portfolio standards. If we did, the price of electricity would go up dramatically all across the country. They tried to do it even in the markup earlier this week. We were successful in defeating that. That is a real win for consumers. They forgot to tell you that if you had the renewable portfolio standards of 10 percent, if you do not meet the standard, there is tax. It says you have to pay a tax of 1.5 cents per kilowatt hour—about 50 percent of the wholesale price of electricity, if you do not meet this standard. That means if you don't make 10 percent, you could have your electricity prices go up by 5 or 10 percent. We defeated that.

We defeated a very onerous corporate average fuel economy standard that people wanted to enact. It would have mandated automobiles to average 40 miles per gallon. That would have eviscerated consumer choice and resulted in our citizens being forced to buy an economy-sized automobile which could prove very unsafe. It would have been a very expensive provision as well in terms of consumer costs and lost jobs in our auto industry. We didn't do that.

We didn't put in the global warming provision that would have greatly increased every person's utility costs, devastated our economy and would have made us uncompetitive internationally. We didn't do those things. I am pleased about that.

We did do some positive electricity provisions that will encourage regional transmission organizations, that will mandate reliability standards which will help us avoid curtailment in the future. It is not fail-safe, but it certainly is a positive step in the right direction.

Senator DOMENICI mentioned several other things in the nuclear field and other provisions in coal that should help us broaden and diversify our energy sources. He mentioned the tax provisions. I voted against the tax portion of this bill when it came out of the Finance Committee. If we were voting on the tax portion of this bill standing alone, I would vote against it now.

On the tax provisions, the administration requested $8 billion. The Senate Finance Committee reported out $15 billion, and this bill is $23.5 billion.

Mr. GREGG. Mr. President, will the Senator yield for a question on that point?

Mr. NICKLES. I would be glad to yield.

Mr. GREGG. I was wondering if the tax provisions as scored violate the budget on that point.

Mr. NICKLES. To answer my colleague's question, the budget points of order lie against the spending, and I expect the tax provisions as well.

Mr. GREGG. I thank the chairman of the committee.

Mr. NICKLES. Mr. President, we scored in the budget, I believe, $18 billion for this bill. This bill will score close to $30 billion, for the information of the Senator. It scores that way for a couple of reasons.

One, the tax provision. Also, there is a provision that says brownfield projects can be funded by bonds that cost about $2 billion, which I think is a terrible way to be financing projects. This is not an appropriations bill.

Senator DOMENICI also mentioned a lot of things are authorized. I hope and pray not everything will be spent that is authorized. I will tell my colleagues that is always the case. We authorize a lot more money than we appropriate, and thank goodness for that.

I'll mention just a couple of other things. There is also direct spending in this bill. I tell my friend from New Hampshire that this Senator, at least, questions the wisdom of doing it. By direct spending there are new entitlements for two or three items that are created. Coastal impact has an estimated cost of $1 billion. I predict it will cost a lot more than $1 billion over the next 10 years. I am sympathetic with those who live on the coast and they have drilling offshore and say they do not get anything. That money goes into general revenue. It should be subject to appropriation. The coastal State should receive some consideration, maybe some compensation. But to have it set up as an entitlement for 10 years and then subject to appropriation is a very poor manner of doing it.

There is deepwater research, $150 million that is direct entitlement spending for the next 10 years. Again, I don't think that is the way this committee should operate. This is not an Appropriations Committee. The same thing for Denali. They get about $500 million over the 10 years. That is $3 billion of direct or entitlement spending that, frankly, should not be in this bill.

Let me touch on a couple of other things that are in the bill that are critically important, and at least in my opinion, if you add this together, make the bill worthwhile. One is the Alaska natural gas pipeline. If you go back historically and read the debates that occurred in this Congress, this Senate, for the Alaska oil pipeline, it was one of the most contentious issues this body had seen in a long time. This Alaska gas pipeline could have been as contentious, but it is not. It is in this bill. It is a $20 billion project, maybe the largest project in the United States in our history, certainly one of the largest projects ever. It is in this bill with expedited procedures which make that pipeline viable, in my opinion.

We also have a provision that allows the pipeline to be amortized over a shorter period of time, 7 years. That will encourage the construction of the pipeline. That is jobs. That is energy. We have a very significant serious natural gas challenge or shortage or potential shortage and deliverability shortage, getting the product to the consumers in the next several years. Getting this gas that basically is stuck in the northern plains of Alaska to the lower 48 will help alleviate that shortage to the tune of trillions of cubic feet of gas. It is absurd to leave that gas in Alaska, in northern Alaska, untapped, unutilized. This bill will authorize and expedite the construction of that pipeline.

That, to me, is probably the best thing we have in this bill, the most pro-energy item in the bill. We also have some other things that make good sense, that do encourage production. I compliment our colleagues for putting those in the bill.

On balance, we need an energy package. The administration should be complimented for the fact that Vice President CHENEY led a task force and recommended many of these things. They are now in this bill. He has taken a lot of heat for it but, frankly, this country for decades has needed a comprehensive energy package. Vice President CHENEY and President Bush have led the effort to make that happen. Now we are within a day or so of actually passing a bill to do that.

While this bill is far from perfect, while this bill actually does cost too much, while the tax provisions in this bill are far too numerous, in this Senator's opinion, with way too many tax credits—I believe there are 19 new tax credits in the code, and I hate to see the Tax Code cluttered and confused and complicated, substituting the wisdom of tax writers over the free market—I still think on balance the country needs a bill, needs an energy package. I believe this is the best one that

this Congress can write, at least at this time. I encourage my colleagues to support this bill.

I yield the floor.

Mr. REID. Mr. President, it is my understanding that it works better if people know when they are supposed to come. The order locked in now is Senator LEAHY will be recognized at 1:45; is that right?

The PRESIDING OFFICER. Senator BOXER has 15 to 20 minutes by unanimous consent.

Mrs. BOXER. There is no particular time set.

The PRESIDING OFFICER. Senator BOXER, Senator LEAHY, 1:45, and Senator BUNNING, either before or after Senator LEAHY.

Mr. REID. That is now the order before the Senate.

The PRESIDING OFFICER (Mr. BUNNING). That is correct.

Mr. REID. The only other Senator I know, either Democrat or Republican, who wishes to speak is Senator DURBIN. I ask that he follow Senator BUNNING.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California.

Mrs. BOXER. Mr. President, there is so much to say about this Energy bill, I hope I am able to be coherent on why I think it ought to be defeated.

It is a bill, first of all, that is a tax giveaway to the biggest corporations in this country. Actually, the multinational corporations—$30 billion is the size of the giveaway; $30 billion of debt. When this administration came into power, we had a surplus. Now we are reaching a $500 billion deficit. This is adding $30 billion to it.

The attitude around here is, just let our kids and grandkids pick up that deficit. It is absolutely the wrong policy for right now.

This bill is an unfunded mandate because it gives a free ride to the makers of a poisonous chemical called MTBE that never was mandated by any government and was the oxygenate of choice of the oil companies. They knew it was poisonous and they kept on putting it into the gasoline. It has contaminated water systems all over this country. By walking away from this problem and giving a pass to the people who polluted our areas, in my opinion—and this is just my own words—I think it is immoral. That is why we have the cities of this country against this bill, the counties of this country against this bill, the water agencies of this country against this bill.

The more we let this bill hang out there, the more it smells. MTBE smells. This bill has a similar smell, a sour smell, a bad smell, a poison smell.

The chairman of the committee wrote this bill with one other person in a locked room. It is extraordinary. I thought when I went to school that I learned a bill becomes a law this way: They pass a bill in the House, they pass a bill in the Senate. If they are different, there is a conference committee. The conference committee is made up of people from both sides of the aisle, both bodies. They cannot add new and extraneous things into the bill that were not at least in one of the bodies—the Senate or the House. Then it goes back to each respective House of Congress. If it is passed, it goes on to the President's desk. We have a bill, therefore, that would be a compromise, that would be genuine, which would reflect the broad views of the conferees and, therefore, by extension, all sides of the debate reflected among the American people.

What did we have in this case? Two people of the same party from big oil States sitting in a room having a party. And what we are going to have if this bill passes is one huge party, with the biggest corporations in this country, the oil companies, nuclear—believe me, they will not be drinking water tainted with MTBE. They will be drinking the bubbly stuff, and it might even be imported. But it will be expensive. This bill is expensive. Thirty billion dollars is added on to our debt from the very people who say we have to be fiscally responsible.

Then the chairman of the committee says, in a most angry fashion, and it is his right—I am angry, a little bit different type of anger—says in his angry way: If you do not take this, you will never have another Energy bill because I am not going to do it.

This is a government of laws, not men. We can have a good Energy bill if we defeat this bill. We can have one that looks toward the future. We can have an Energy bill that is a 21st century Energy bill, not an Energy bill that is a 20th century Energy bill.

So the sky will not fall for my friends who want ethanol. And I understand they want that. By the way, there are some good provisions in there for my State regarding making ethanol out of rice straw. I worked for those provisions.

I am going to go through this bill: What is good in the bill, what is bad in it, and what is left out. I worked hard to examine this bill. But when all is said and done, it is an Energy bill that is a giveaway to the special interests of this country. It is an Energy bill which turns its back on people on the west coast who suffered from companies that ripped us off and owe us $9 billion just in California alone. It is an Energy bill that really just gives a wink and a nod to some of the possible ways that we can work ourselves out of dependence on foreign oil.

Now, again, the chairman of the committee is very ecstatic about this bill, and it is his right. Why wouldn't he be? He wrote it. He likes big oil. He is defending the makers of MTBE. He loves nuclear energy. The last I checked, we still do not have a safe way to dispose of the waste from nuclear powerplants. The last time I checked, in some places in Europe they are beginning to close down nuclear powerplants. Oh, but we are going to build a new one—we, the taxpayers, $1 billion, as I understand it—in Idaho.

Now we have reports—we were going to send all of our nuclear waste to Yucca Mountain—and now we hear, in Nevada, a new scientific report saying, watch out, that material can leak.

So this is not the time to be subsidizing the building of nuclear powerplants. My God, you would think this is the 1940s after World War II, ''Atoms for Peace.'' It does not work.

By the way, I hope taxpayers understand that what is also in this bill is a 20-year extension of the Price-Anderson Act. What is that, you ask? That takes the nuclear companies off the hook if there is a nuclear accident. They pay for some of the damage but the mammoth amount of damage, which could go escalating to God knows where, you taxpayers are picking up the tab. So first you are building them the nuclear powerplant. Then, if there is an accident, you have to pick up the tab.

This is some Energy bill. This is the worst bill. I cannot think of the names—let's hear what some of the editorials are saying from around the country for this great Energy bill.

USA Today: ''Congress forgets promises made in blackout's wake.'' The Brattleboro Reformer: ''It's time to shift gears.'' The Billings Gazette: ''Energy bill lacks critical balance.'' The Boston Globe: ''A polluted energy bill.'' The Brunswick Times Record: ''This energy bill is appalling.'' That was their word.

The Buffalo News: ''Oil and grease. Energy bill fails country as it dispenses favors to the industry.'' The Cape Cod Times: ''Misused energy.'' Des Moines Register—now imagine, this is in a place where they love the ethanol issue, and even with that, this is what they say: ''The MTBE outrage.'' And I will go into how the MTBE outrage impacts my State.

The Fort Worth Star Telegram: ''Coming up short.'' The Great Falls Tribune: ''Senate should stall Energy Policy Act of 2003.'' Absolutely they are right. Count me in. I am going to try to stall this bill. I am going to try to kill this bill. I am going to try to stop this bill in every single way I can because it is bad for the people I represent and it is not the kind of bill we want for this country at this time.

Jackson Clarion-Ledger: ''A 'P' Perfect Bill: Pork, Politics, Pollution.'' That is a good one. Lakeland Ledger: ''Senate, derail the energy bill.'' The Los Vegas Sun: ''Mixed bag on national energy plan.'' The Lewiston Sun: ''Proposed law is lousy legislation.'' Their words.

Memphis Commercial Appeal: ''Pork barrel bill, not worth the energy.'' Missoula Missoulian: ''Energy bill uses tax dollars for fuel. Legislation larded with massive subsidies is a parity of effective energy legislation.'' That is from the Deep South.

The Nashua Telegram: ''Rushing energy bill is a bad way to set policy.'' New Jersey Star Ledger: ''Defeat GOP energy bill.'' Orange County Register—and this is in a part of my State that is predominantly Republican—do you know what they write? ''Energy bill is a waste.''

Palm Beach Post: ''A powerless public.'' The Phoenix Arizona Republic: ''Energy overload. Overstuffed bill has it all, except coherent national policy.''

I just have to say, the more this bill is subjected to the light of day, out of that closed-door conference committee, with two people from the same party, from big oil States—the longer that bill sees the light of day, the more people will see it.

Now, yes, there are a few good things in this bill. I am going to tell you what they are. I am going to show you what they are. Then I am going to show you what was left out of it. And then I am going to talk about the bad things in the bill.

A good thing: Drilling in the Arctic Refuge in Alaska is not in this bill. As the person who wrote the amendment that stopped it before, I say thank you to all my colleagues on both sides of the aisle who stood tall and said: We will never allow this to be put in an Energy bill. Thank you. That is a good thing.

No offshore inventory of oil—I thank the House on that one. My friend LOIS CAPPS over there was fighting hard. You cannot go into a pristine coastline that is supposed to have a moratorium on it and then drill to see how much oil there is in it. Either it is pristine and it is left alone, and there is a moratorium to keep it left alone, or you might as well just go in and destroy it. The conferees said no to that because that would have been a poison pill, too. So thank you. It is not in there.

Something that is in there that I wrote has to do with incentives for making ethanol from agricultural waste. Now, this is something that is forward looking because we have rice straw and biowaste and sugar waste from beets and we know we can use that waste to compete with corn ethanol. We think it is exciting. If we can develop those industries in our State, then we do not have to ship that corn ethanol all the way across from the Midwest. That kind of shipping is going to add to the price of gasoline for my people who need to have their cars to go to work.

Energy efficiency by the Federal Government—I am very pleased we have that in this bill. That is an important thing to undertake.

Hybrid car tax credit—ditto. It is good.

Increased funding for energy assistance in LIHEAP—for the poorest of the poor. That is good.

I understand there are some solar tax credits in there, which I think are very important, to put solar energy on some kind of equilibrium. These provisions are very small.

Now, this is what is missing from this bill which would have made it at least relevant to what has happened in our country.

There are no refunds for the people of my State. We have been told by the Federal Energy Regulatory Commission that we have been ripped off, robbed. They have stolen our money with phony schemes to create artificial shortages. You all remember some of those schemes. The fact is, FERC, which can order these refunds, has refused to do so. This administration refuses to order FERC to get those refunds back to our people. Our new Governor has his hands full with tremendous deficits. That is our money, and we want it back. No, they would not go there.

No. 2, there are no long-term contract renegotiations for my State or other States on the west coast. What does that mean? These thieving companies, as they were robbing us blind, and had us over a barrel, negotiated long-term contracts for the future. They said: Oh, we are giving you a good deal. We are going to charge you a lot less than the spot price. Well, we were negotiating with them under duress. It was a phony price. A phony price was out there, and our Governor was trying to get the best deal.

Yes, he got a lot lower than the current price, but it was way over what the market is today. So we are asking for new long-term contracts. We want to do away with those. No, they didn't do that.

No end to electricity market manipulation schemes: Ron Wyden was very good on that point. We had schemes that had every name in the book. They made up names that you can't even believe. The one I hated the most was Get Shorty. Because I am a little person, I hated the name. But they were shorting us of electricity. They were doing all these things, and they were giving them all these names. By the way, why isn't someone in jail on all of that Enron stuff? No, we didn't go there.

No CAFE standards: Unbelievable. It has been pointed out that even China, that has a bad environmental record—I went there; they are building dams that are destroying mountains and homes and valleys,

I just got sick to see it—has set CAFE standards because they know pollution is bad for their people.

When cars pollute, kids get asthma, workers get sick. And if you can't work, that hurts productivity. It is just common sense. Forget the fact that it is the right thing to do to have CAFE standards and spare the air. No, they couldn't do this.

There is a huge SUV loophole. It was about $25,000, and in the last tax bill it went up to $100,000. The Senate tried to bring it back to $25,000 but the House rejected that effort.

No increased use of renewable sources for electricity: They walked away from the formula that Senator BINGAMAN had gotten into the Senate bill.

By the way, any resemblance between this Energy bill that is before us and the Energy bill the Senate wrote is purely coincidental. This is a completely different bill, written by two people from big oil States, who love nuclear energy and have walked away from fighting for the consumer. It is a sad thing. This is what is missing from the bill.

Now let me tell you what is bad about the bill. Unfortunately, it is a long list. We talked about giveaways to the oil industry. I want to give you a few examples of that: $10.5 billion in tax breaks would be provided to the oil and gas industries. The bill provides millions of dollars' worth of subsidies to the oil industry by reducing the amount of royalties—that is kind of like rent—that they have to pay to drill off our coasts and on our Federal lands. So they use our Federal land that all the American people own. They are supposed to pay royalties when they find oil there.

This bill provides royalty relief for marginal oil and gas wells or wells that are relatively less productive. They give this royalty relief to oil and gas development off the coast of Alaska as well as deep wells and deep water operations in the Gulf of Mexico.

Wake up, America. If you want to count, listen to these things. One of the things that I find happens, I went on TV and I did an interview on one of the issues we are going to be talking about, MTBE. The person interviewing me said: I know this is very complex but let's discuss it.

It isn't complex. It is pretty simple. This bill is a giveaway to the biggest companies. It walks away from the consumers. It lets the polluters go free. It is a 20th century Energy bill.

People say it is confusing; it is complicated. It is not so complicated. That is the way to say to people: You better tune out the argument; it is too complicated.

America, tune in. It is your future. It is your kids who are going to have to pay this $30 billion. It is your kids who are going to have to breathe the dirty air. It is your kids and your cities that are going to have to pick up the tab to clean up MTBE. So listen.

The bill would also reimburse energy companies for their costs to reclaim abandoned wells on Federal lands

under a new program forcing taxpayers to pay these costs rather than industry. It would provide a broad liability waiver to oil and gas operators reclaiming sites on Federal lands. So they go on the Federal lands. They mess them up. They pollute them. They walk away.

These are our lands. The bill will take $150 million from royalties and fund research on ultradeep wells, unconventional natural gas petroleum, and the Federal Government may well give $50 million extra to this fund. This research would be done to benefit the industry.

You know what, let them pay for their own R&D. They get a great tax break. I am all for it. I give big tax breaks for R&D. We don't have to give them cash on the barrel.

Giveaways to the nuclear industry: I mentioned before the Price Anderson Act. If there is a nuclear catastrophe, don't worry about it, we will pick up the tab. Your children will pick up the tab, my children, my grandchildren. Not the nuclear industry, a 20-year extension.

If it is so safe, why can't they get insurance in the private sector for the possible damage it would do? I believe in checks and balances. The insurance companies are checks and balances. If a nuclear person comes in to an insurance company and sits down and says: Well, I might have an accident.

What would it cost?

Oh, $100 billion.

Well, I won't cover you for more than $10 billion. It would just break our back.

Oh, OK.

Maybe that is a signal, Uncle Sam, that this isn't safe yet. No, we are going to back up the nuclear industry for another 20 years. It raises the cap, which is a good thing, but it is still a cap nonetheless. They don't have to pay full insurance premiums. Why should they? This bill is for them. It is not for us.

If there were an accident, nuclear companies don't have to pay the costs of the damages because the taxpayers are on the hook. That is a great idea.

A $6 billion production tax break is in here for utility companies that operate new nuclear reactors. So while they are closing down nuclear reactors in Europe and while we are reading reports that Yucca Mountain is not safe, we are going to give tax incentives for new nuclear reactors.

It goes on on the nuclear side, but I will move on to one more point here: public health and the environment.

The placing of these nuclear plants is just not going to live up to the highest level of protection. There is concern to me in terms of dumping the waste and the injuries that could occur due to the fact that we don't know what to do with the waste. These people want to give tax breaks for dirty industry—$29 billion in tax incentives for the energy industry, and more than 70 percent of the tax breaks go to polluting and mature industries, including coal, oil, gas, and nuclear.

Yes, we gave some tax benefits to some of the new and clean energy but very small in comparison. It is $1.8 billion for the clean technologies versus $28 billion; it is about 28 to 1. That is a 20th century Energy bill. Now, we repealed consumer protections in the electricity market. That is another thing that is bad. The most eloquent Senator I have heard on this of all time is Senator MARIA CANTWELL. I am sure if she hasn't spoken already, she will explain to you what this means. I have to say that the Senator from New Mexico, who wrote this bill, with the Congressman from Louisiana, a big oil, big nuclear power State—he said: This is your last chance. You will never get to repeal the Public Utility Holding Company Act if you don't do it today.

I have one word for that: Wrong. We are going to be here every day. If he doesn't like PUHCA, you can try to do it another day, just like he can try to get his nuclear money another day, just like he can do tax giveaways another day, just like he can give a liability waiver to his big oil friends another day. You don't have to pass this bill today. That is the biggest bunch of baloney I have ever heard. We are supposed to be working here all year. We don't have to pass this today or tomorrow or the next day. I hope we will not because this Public Utility Holding Company Act is the main law to protect consumers from market manipulation and fraud and abuse in the electricity sector.

It is unbelievable that we have uncovered evidence about what Enron did, and we are repealing the one law that could help us in the future. It is, to me, outrageous. Again, I will leave that for Senator MARIA CANTWELL to talk about.

We see drilling and development of our public lands. In my State, I have to tell you that this bill has a special interest provision to site a high voltage electricity transmission line through the Cleveland National Forest. The State of California, through the PUC, said, no, it is not needed and not wanted. I wonder why, in the midst of the terrible fire that we just had, we are now going to put a high voltage line through a national forest. Can someone tell me why? Can someone tell me why we would permit the siting of a high voltage electricity transmission line through a national forest?

I will tell you why. It is a special interest provision, and the State didn't want it and the local people didn't want it. The State said no, but somebody put that into the bill. The more you read the bill, the more you learn. The bill would also put the Department of Energy in charge of permitting rights of way across public lands for utility corridors.

The bill would require the Department of the Interior to process applications for permits to drill for oil and gas on Federal lands within 30 days, even though people said we need more time to look at the facts.

So the USGS would be required to identify restrictions and impediments to oil and gas development. They are allowed to look at fish and wildlife, cultural and historic values, and other public resources. In other words, they can call these things ''restrictions'' and ''impediments'' when, in fact, the law has always said they should be respected. Now they are impediments.

Diminished protection for our coasts: The first provision would grant the Secretary of the Interior broad new authority to permit energy development and support facilities anywhere on the Outer Continental Shelf. Authorized facilities would include those that support exploration, development, production, transportation, or storage of oil and gas. There are no standards for issuing or revoking easements, and the provision does not require consultation with the Secretary of Commerce.

There is no requirement that the Secretary of the Interior even consult with the States before making this decision on the Outer Continental Shelf.

I will explain the Outer Continental Shelf. The first 3 miles off of the coast are State waters. Where does the Outer Continental Shelf start? It starts after that. So you can, as a State, put all the restrictions on damaging projects that would occur because you believe your coastline is God-given. You believe your coastline is also an economic resource. You believe that your coastline and your ocean is important to protect the fish because, in fact, it is a big industry in my State. You do all these protective things.

Now they are going to say it is 4 miles out, or 3 miles plus an inch, and they are going to start looking on that Outer Continental Shelf and destroying it. This is what is in there.

They weaken the coastal zone, which is important to weigh in on what should be done.

Section 325 of the Energy bill erodes States' rights to review and respond to Federal decisions affecting coastal waters. Section 330 would also reduce States' rights to review and comment on pipelines and other energy-related projects off their coast by limiting appeals.

It is taking me a long time to tell you what is bad in this bill. There are more things, but I want to give you a sense of some of them.

Clean air rollbacks: Actually, they have amended the Clean Air Act. They have amended the Clean Air Act in this Energy bill. ''Great news'' for the American people. I am sure they are dancing in the streets that the Clean

Air Act has been rolled back in this bill that was written by two people of the same party from big oil States, behind closed doors, who are threatening that we will never see the light of day on any Energy bill if we don't pass their ''masterpiece.'' The last I heard, every Senator is equal to every other Senator.

There is a provision tucked into this conference report designed to delay cleaning ozone pollution in some of the most polluted areas of our country. Under the Clean Air Act, the schedule is established for areas to clean up their air. How much they have to do, and in what timeframe, depends on how dirty or clean their air is. If these deadlines are missed, an area is bumped up into the worst air quality category. When this happens, a greater amount of air pollution must be reduced and additional requirements are imposed, but on a longer timeframe.

This provision will allow areas to avoid the additional requirement if some of the air pollution comes from upwind areas. Why this provision and why now? Because the Republicans are trying to overturn several court decisions holding that this type of an extension is illegal under the Clean Air Act. Their argument says it is unfair for a community to be forced to clean up air pollution coming from somewhere else.

Unfortunately, it appears that every community with poor air quality can meet this test because ozone pollution travels in the air. Somebody is going to be able to say we don't have to clean up our air because it is coming from somewhere else. Who gets hurt? The people who breathe the air.

Why would we delay cleaning up the air as it gets worse and worse? Do you think a child who is in a hospital because of asthma—do you think the mom will say: Why does my kid have asthma?

And the doctor will say: Because the air is filthy dirty.

And she will say: Oh, my God. That is awful. I am going to write my Senator.

Then the Senator writes and says: Your kid has asthma from dirty air, but it wasn't coming from your community. It came from another community, so please forgive us.

Wrong. This is what is done in this bill. Remember, this was written by two people of the same party from big oil States.

(Mr. SUNUNU assumed the Chair.)

Mrs. BOXER. Mr. President, the net result of this could be that no one will ever have to clean up the air until someone else cleans it up. It is unacceptable. Ozone pollution must be cleaned up. There are 130 million Americans living in communities that violate ozone smog clean air safeguards. Inhalation of smog is linked to respiratory illness, such as asthma, especially for children.

There you have that mother, as a matter of fact, in the hospital with her child because hospital admissions for children due to asthma alone increased 30 percent between 1980 and 1999. Overall admissions for respiratory problems increased 20 percent in the same time period. We had a 30-percent increase in asthma admissions in hospitals, but only a 20-percent increase for other things.

Let me say to all my colleagues who might be listening, and even to those who might read my remarks, go to any school in your State—it could be a public school, it could be a private school, it matters not—ask the children to raise their hands if they have asthma. Ask them to keep their hands up or new hands for someone who knows someone who has asthma or someone in their family, and you will see almost 40 percent of the children in that classroom respond.

In California alone, there will be 42,000 additional asthma attacks, 499 additional hospital admissions, and 68,000 lost schools days. What are we doing in an Energy bill to help those children? Are we going to clean energy? Of course not. Are we even moving to increase the fuel economy of our cars by 2 miles per gallon or 3 or 4 or 5? Are we? No, of course not. This is a bill for big oil. We do a little bit for hybrid vehicles. I am glad. We do a little bit for solar. But $28 billion to $1 billion in favor of big oil, big nuclear—big, big, big, big, dirty.

Clean water rollbacks: This might surprise you. This is an Energy bill. We have clean water rollbacks in this bill. The oil and gas industry is exempted from storm water runoff cleanup. This conference report contains language exempting oil and gas construction activities, including roads, drill pads, pipelines, and refineries from obtaining a permit and controlling their pollution runoff as required under the Clean Water Act.

Explain to me why this is necessary. Are these some poor startup companies that need our help and, oh, for a while we will let them be free of these requirements? No, these are multinational big companies that have fought so hard that we no longer have a real, important Superfund Program anymore because they don't even want to be taxed a tiny bit to clean up the mess they made. This bill gives them more rollbacks. They don't have to worry about clean air and clean water.

What is going on here? Then the chairman of the committee says: Oh, there will never be another bill; kill this bill and you will never see another Energy bill. Forget about ethanol. Forget about tax breaks for the things you believe in that might work because you will never get them. You are going to have to swallow all this bad stuff to get a bill.

I want to talk about some more of the bad items, and I will close on the MTBE issue.

Here is a picture of our country. All the States in black—and, Mr. President, I know this is an issue that is near and dear to you—all the States in black are the States that have either ground water contamination from MTBE or drinking water contamination. The ones with the little orange stickers have drinking water contamination.

Sad to say, my State has an orange sticker. When this came to me, I was stunned to hear that my town of Santa Monica in southern California had lost one-half of its drinking water. When the town tried to figure out what to do about it, they found out it would cost millions of dollars—$200 million to $400 million to clean up. This is a small city, relatively speaking in terms of California. We are a big State, but it is a relatively small city—$200 million.

They said: Oh, my God, what are we going to do? They did what every other city, every other county, every other water agency is going to have to do, be they in New Hampshire, be they in Minnesota, be they in Iowa, be they in Nebraska, be they in Nevada. They went to court. They filed a lawsuit, and they made a claim and said: Please, to the people who put this in our gasoline and it got into our water, please, help us clean it up. That is Santa Monica.

Many of you know of Lake Tahoe. It is a magnificent lake and a beautiful lake. It was getting polluted with MTBE. MTBE was leaking from the boats that were on the water into the lake. They went to court. They tried to sue under three grounds—nuisance, negligence, defective product liability. The judge in that case said on the nuisance claim: You haven't proved nuisance because you have to prove who did what to whom, when, and what day. Negligence, same thing. You have to find the people, you have to track the people. But defective product liability, that makes sense because in discovery they learned—that is a legal term when they are getting ready for the court case—they learned that the makers of MTBE knew this product was bad. As a matter of fact, they joked about it. I forget what exactly they said. One of them said: Major threat to better earnings, MTBE, because they knew some day the truth would come out. They joked about it. We found that out.

Here is the jury verdict on the Lake Tahoe case. They found the makers of MTBE knew beforehand that this was bad. This is the verdict: MTBE was defective in design because they failed to warn of its environmental risks. Gasoline containing MTBE refined by the other defendants at trial was defective in design because the environmental risks from MTBE outweighed the benefits and refiners failed to warn of its known risks. The refiners failed to

warn, failure to warn. There is clear and convincing evidence that the companies acted with malice—acted with malice—as they developed, promoted, and distributed their defective MTBE product.

I say in the strongest of terms, when you are told and I am told that these companies acted with malice, why on God's green Earth would we give them a get-out-of-jail-free card in this bill? They acted with malice. They knew it was poison, and now this bill is saying, this bill that was written by two people of the same party behind closed doors from big oil States: You are off the hook.

I also want to tell you that the cost of MTBE contamination—this is a 2-year old estimate—is $29 billion. That is what this cost 2 years ago. We are looking at probably 50, 75, to 100 because all those States I showed you before are just now beginning to understand how dangerous this contamination is.

This bill is an unfunded mandate on New Hampshire. This bill is an unfunded mandate on California. This bill is an unfunded mandate on 43 out of our 50 States that have MTBE contamination.

Now, you can dress it up, you can make it look pretty, you can put lipstick on it and rouge, but the bottom line is, it is ugly. It is an ugly thing to do to the people.

I will show my colleagues our little ''get out of jail free card.'' Here it is: MTBE producers not responsible for pollution, get out of jail free.

Is this why I came to the Senate? No. It certainly is not why the Senator from New Hampshire came, and it should not be why any of us came—to give a ''get out of jail free card'' to the very polluters who have harmed our people.

Senator DOMENICI talks about how many people are for this bill. I understand that. But the fact is that the League of Cities are against this bill, the National Association of Counties are against this bill, the Water Agency is against this bill, the Association of Metropolitan Water Districts, the U.S. Conference of Mayors, and the list goes on.

This bill should not be passed. This bill should never be passed. This bill is a giveaway to the biggest multinational corporations, to encourage them to do things they should not be doing. This bill rolls back environmental laws.

In summation, there were jokes on the floor about those of us who want to stop this bill because of MTBE, that we are taking some small step here, that this is not important. Well, this is important. When people cannot drink the water coming out of their tap and they have to go buy bottled water, this is important. This is important when people are fearful that their kids are going to get cancer from MTBE.

Remember, no matter what they say, the Government never mandated MTBE. The Government mandated an oxygenate. The oil companies picked MTBE and they kept using it after they knew it was dangerous. By the way, they even used it before an oxygenate was mandated.

If we can just put up that map one more time, I would like the Senator from Vermont to see this because he has not seen it as clearly as this. His State of Vermont has MTBE, as he knows, in the ground water; luckily, we do not think in the drinking water yet, but who knows. The orange shows the States where it is actually in the drinking water. My friend from Vermont, who stands every day for justice, for the people of this country, understands why we have to stop this bill.

I thank the Chair for his hard work in representing his State so well on this really tough issue, and I hope we have a chance to stop this bill in its tracks, send it back and have it come back without some of these provisions that are so harmful to the very people we are supposed to help, the people of the United States of America.

I yield the floor.

The PRESIDING OFFICER. Under the previous order, the hour of 1:45 having arrived, the Senator from Vermont is recognized.

Mr. LEAHY. I thank the Chair, my neighbor across the Connecticut River in the great State of New Hampshire.

Those of us who have wiled away the time sometimes on long airplane trips reading a bad book, we know a lot of bad books have ghostwriters. Well, a lot of bad bills that come before the Congress also have ghost writers.

If one reads through this 1,100-page Energy bill, they can tell actually who the ghostwriters were: The oil, the gas, the coal, and the ethanol industries that—surprise, surprise—are going to get almost $200 billion in tax subsidies from this bill. The voices of those ghostwriters echo throughout the bill.

The cost to the taxpayers does not stop there. If taxpayers feel their wallets are getting lighter this week, it is because this bill will cost them another $70-plus billion in other subsidies over the next 10 years. Unfortunately, the 1,100 pages of this bill are full of special interest giveaways, but they are empty of innovative and sustainable energy policy, a policy that would ensure Americans a clean, reliable, and affordable policy in the future.

Some of our colleagues are trying to sell this bill to the American public as a balanced energy plan, something that would give our Nation energy security over the decades to come. It is not that. It only increases our reliance on unsustainable petroleum-based energy sources. It undercuts recent progress in developing renewable energy sources and technologies that reduce pollution. It undermines the reliability of our electricity markets by opening the door to more manipulation and mergers in stalling regional efforts to improve the transmission grid.

The Senate sent a decent Energy bill to conference. What did we get back? We got a frog. We went from the prince to the frog, not the other way around. The roster of squandered taxpayers' dollars and squandered opportunities in this bill is breathtaking to behold.

Now the American people might have expected us to learn from this summer's blackout. After all, it should be fresh in our experiences and our minds. It cost governments and businesses billions of dollars. We could have used this bill to address what went wrong. We could have used it to build upon what is right. Incredibly, the bill does the opposite.

New England, where we rely on energy—as all parts of the country do—is also a part of the country where we can get 10, 20, 30 below zero sometimes. We have already created a regional organization to increase reliability of our transmission lines. In fact, that was able to stop the blackout from cascading further into Vermont and other States. Instead of using an organization that we know works as a model, this bill actually discourages utilities in other regions of the country from joining regional organizations. It would also discourage badly needed new investment in the transmission grid.

Apparently, we can only invest in transmission grids if they are in Iraq. We cannot invest in them when they are in our own country.

There is also no prohibition on the price gouging schemes employed by companies such as Enron, even though the Senate, on a wide margin, voted for that.

The bill repeals a 70-year-old law to restrict mergers of utility companies with other companies where they have no expertise. In the past, that has caused financial troubles for utilities and consequently the ratepayers.

One might have hoped the bill could have done more to emphasize technological innovation, promote clean and sustainable energy, but it does not. Instead of working to advance technologies to create jobs and reduce pollution, we have a bill that gives oil, gas, ethanol, and nuclear companies enormous subsidies.

One of the things it does, in my own State of Vermont, is it hands Vermont drivers a double whammy by mandating the use of 5 billion gallons of ethanol by 2012 while threatening deep revenue losses in the highway trust fund. Under this bill, Vermonters and drivers in other States can expect higher prices at the pump due to this mandate and more potholes in the road due to the trust fund cuts.

We have heard talk about MTBE producers. We know this protects producers of the gasoline additive MTBE

from liability, but in Vermont and around the country States and communities face multimillion-dollar bills for cleaning up the MTBE that is already in the ground water. And, to stop the cases filed, the Energy bill makes the provision retroactive. It wipes out cases filed in September by several New York communities, cases filed by the State of the distinguished Presiding Officer, New Hampshire. The list goes on and on but so do the echoes of the ghostwriter's voice in this bill.

This turkey would waive environmental analyses for energy projects on public lands, exempt them from the Clean Water Act, Safe Drinking Water Act, open coastal areas to oil and gas development, reduce support for clean coal technology, and this bill will simply mean that more toxic pollutants like mercury will get dumped on Vermont's forests and our lakes and our rivers.

Shortly after the administration entered the White House, it closed the doors to the public and they started to put together the energy industry's wish list of subsidies—environmental and consumer protection rollbacks. If we pass this bill, we are going to say Christmas came before Thanksgiving for these special interests.

I don't see how, at a time when we are justifying drastic cuts to vital social programs, we can push through a $100 billion counterproductive budget buster for the energy industry.

As I said, many a bad book has a ghostwriter, and so do many bad bills. When you read through this 1,100-page energy bill, it is clear who the ghostwriter were: the oil, gas, coal and ethanol industries that—surprise, surprise—would reap almost $20 billion tax subsidies from this bill. The voices of these ghostwriters echo throughout this bill.

But the cost to taxpayers does not stop there. If taxpayers feel their wallets getting lighter this week it's because this bill will cost them another seventy-plus billion dollars in other subsidies over the next 10-years.

Unfortunately, the 1,100 pages are full of special interest giveaways but empty of innovative and sustainable energy policy that will ensure Americans clean, reliable and affordable power in the future.

Some of our Republican colleagues are trying to sell this bill to the American public as a balanced energy plan to give our Nation energy security over the decades to come. It is not.

It will only increase our reliance on unsustainable, petroleum-based energy sources. It undercuts recent progress in developing renewable energy sources and technologies that reduce pollution. It undermines the reliability of our electricity markets by opening the door to more manipulation and mergers and stalling regional efforts to improve the transmission grid.

The Senate sent a decent energy bill to conference, and we got back a frog. The roster of squandered taxpayers' dollars and squandered opportunities in this bill is breathtaking to behold.

The American people could have expected that we could have learned from this summer's blackout—still fresh in our experience and on our minds—and used this bill to address what went wrong and build upon what went right.

Incredibly, this bill does the opposite. In New England, we have already created a regional organization to increase reliability of our transmission liens. It was able to stop the blackout from cascading farther into Vermont and other States. Instead of using this organization as a model, this bill actually discourages utilities in other regions of the country from joining regional organizations. It could also discourage badly needed new investment in the transmission grid.

The bill also does not do enough to protect consumers and ratepayers from manipulation of energy markets. There is no prohibition on the price-gouging schemes employed by companies like Enron, even through the Senate supported such protections by a wide margin.

The bill repeals a 70-year-old law to restrict mergers of utility companies with other companies where they have no expertise. In the past, this practice has caused financial troubles for utilities and consequently, the ratepayers.

The American people could have hoped that this bill would do more to emphasize technological innovation that would promote clean and sustainable energy. Instead, it barely holds on to the status quo in incentives for renewable and energy efficiency. If we are going to avoid future blackouts, we have to decrease demand on the electricity grid as well as make improvements to it.

But instead of working to advance technologies to create jobs and reduce pollution, we have a bill that gives oil, gas, ethanol and nuclear companies enormous subsidies.

At the same time, this bill fails to address one of the biggest energy and environmental issues facing our country: how to improve fuel efficiency standards for cars and trucks. In fact, the bill actually would enlarge a loophole for huge SUVs that will actually encourage more people to buy these gas guzzlers. We all have heard of the SUV dealerships that actually use the existing tax loophole in their TV ads.

The bill also hands Vermont drivers a double whammy by mandating the use of 5 billion gallons of ethanol by 2012, while threatening deep revenue losses to the Highway Trust Fund. Under this bill, Vermonters and drivers in other States could expect higher prices at the pump due to this mandate, and more potholes in their roads due to the Trust Fund cuts.

While the bill fails to take any steps forward on energy policy, it takes a giant step backward on environmental protections. When the Clinton administration strengthened the requirements for reducing smog around cities, it was hailed as a major step toward reducing asthma and other chronic illnesses. Well, by postponing these ozone attainment targets, no one will be breathing easier after this bill except the special interests.

Although you won't be able to see much through the smog when you're looking up, you might see more when you're looking down, and what you see will be unwelcome.

This bill includes several new provisions that let polluters off the hook when it comes to reducing contaminates in groundwater and drinking water. It protects producers of the gasoline additive MTBE from liability if their product is found to be defective. In Vermont and around the country, States and communities face multimillion dollar bills for cleaning up the MTBE that already has leached into the groundwater.

At least one court has already found MTBE producers liable for these cleanup costs because of product defects, and several other cases are pending. To make sure these cases are stopped, the energy bill makes the provision retroactive, wiping out cases filed in September by several New York communities and New Hampshire.

The list goes on and on, and so do the echoes of the ghostwriters' voice in this bill. This turkey would waive environmental analysis for energy projects on public lands. It would exempt oil and gas drilling from requirements of the Clean Water Act and Safe Drinking Water Act. It would open coastal areas to oil and gas development. It also would reduce support for clean-coal technology in favor of the conventional dirty power plants.

This will simply mean that more toxic pollutants like mercury will get dumped on Vermont's forests, lakes and rivers.

Days after this administration entered the White House, they closed the doors to the public and started to put together the energy industry's wish list of subsidies and environmental and consumer protection rollbacks. Well, Christmas came early this year for the special interests.

The energy bill now before Congress is stuffed with everything on that wish list, plus just about everything else that these special interests could dream up when they were given the chance.

The bill before us now costs three times more than the proposal that the administration first put on the table 2 years ago.

When you look at the list of special-interest giveaways, it is no wonder the bill was written behind closed doors.

The President and the Congress had a real opportunity to produce a bill that would lead the Nation toward balanced, sustainable, clean energy production. This bill fails on all counts.

Instead, we have 1,100 pages worth of policies that will increase our dependence on fossil fuels, prop up wealthy energy corporations, repeal consumer protections and threaten environmental and public health. I do not see how my Republican colleagues can any longer justify their drastic cuts to vital social programs while pushing through this $100 billion, counterproductive budget-buster for the energy industry.

TRIBUTE TO JOHN FITZGERALD KENNEDY

I would like to talk for a moment about a more personal matter. Here we are today, November 20, 2003, just two days away from November 22. I think back to 40 years ago on November 22, 1963. I was living in Washington, D.C., at that time, as a young law student. My wife, Marcelle, and I were living in a small basement apartment. She was working as a nurse at the VA hospital, then called Mount Alto, up on Wisconsin Avenue, where the Russian Embassy is now. I was going to Georgetown Law School downtown here in Washington.

They say that anybody who was old enough to remember on that November 22 remembers exactly where they were when they heard the news about President Kennedy's assassination. That is true of anybody I have ever spoken with.

I was in the law school library and one of my classmates, who was not a supporter of President Kennedy, came in and told me the President had been shot. I told him this was really not funny, and then I realized he was crying. He was a person who had never voted for President Kennedy but realized the enormity of what had happened. When I saw his tears, I knew it had to be true.

My wife and I did not own a car at the time. I went outside and hailed a cab to head back to our apartment. My wife had worked the whole night before, and she was home asleep. I did not want to call her. I wanted to tell her in person what had happened.

I think I probably got in the only cab in all of Washington that did not have a radio. You can imagine my frustration as we started through the Washington traffic. As we drove down K Street, where many stockbrokers have their offices, we could see the screen that normally displayed stock prices was blank. That was an obvious signal that they had closed the markets in New York.

I saw Mrs. Kennedy's brother-in-law. As he would be chauffeured in a Rolls-Royce to his brokerage house each morning, I would watch with envy from the bus as I went to work. I saw him running into the street, frantic, trying to hail a cab. I saw a police officer directing traffic with tears coming down his face.

When I got to our apartment, I banged on the door and woke up my wife. We turned on the television to see the now famous announcement by Walter Cronkite—taking off his horn-rimmed glasses, announcing the President was dead.

Just a short time before, President Kennedy had given a speech at American University, a speech that I thought laid out his focus for that term and what most people believed would be a second term. That was the speech in which he said, ''We must make the world safe for diversity.'' I would like to include a copy of this speech with my statement.

We should think about this quote these days. President Kennedy said, ''make the world safe for diversity.'' He did not say we should make the world an exact copy of the United States. If everybody knew they could follow their beliefs and they could follow their system of government, it would be a safer world. But that was not to be.

I remember the next day when my wife and I stood on Pennsylvania Avenue with a half a million people watching as the cortege went from the White House up to the Capitol. It was silent. It was so silent that as we stood there, we could hear the traffic lights. Even though the street was blocked off, the traffic lights were still operating, and from eight lanes away, you could hear the click of the lights as they changed. This is with half a million or more people on that street.

Where we were standing, near the National Art Gallery, almost from the moment the cortege left the White House, we could hear the noise of the drums and the horses. I remember vividly the riderless horse, the boots turned backwards. It was a very spirited horse. I recall his name was Blackjack. He was skittering, his feet dancing on the pavement. I can still hear the click, click of his hooves. I remember a car going by with then-Attorney General Robert Kennedy in it, his chin on his hand, just staring straight ahead, not seeing any of the crowd. And, of course, I remember the coffin being brought here to lie in state in the Rotunda.

We heard the distinguished majority leader at that time, Mike Mansfield, a very close friend of John Kennedy, give a eulogy. He spoke of President Kennedy's and Jacqueline Kennedy's wedding rings. She took her husband's ring from his finger. It was 40 years ago, but I remember it so well.

I did not meet Senator Mansfield until more than 10 years later when I was the Senator-elect from Vermont. I got to know him well and realized the depth of his affection and his friendship for President Kennedy, with whom he had served in the Senate. It must have been so difficult for him to give that eulogy.

For two days, there were people—not just officials from Washington, D.C., but people from all over the country—who were stretched literally for miles, waiting to pay their respects. I can still see them huddled in their coats with frost from their breath in the air as they stood in line all night.

We stayed at our apartment to watch the funeral, because we were expecting our first child. We felt the crowd would have made it too difficult to go back downtown.

At the funeral, there were heads of state marching from 1600 Pennsylvania Avenue to St. Matthews. There were Prime Ministers, Presidents, Kings, Princes, and dictators. Someone came up with the idea of having the representatives march based on the name of their country. The head of France marched next to head of Ethiopia. Emperor Haile Selassie of Ethiopia marched next to Charles de Gaulle.

The interesting thing about this is the way the world came together. In fact, for a while there was a rumor that Premier Khrushchev might come. Remember, this was the height of the Cold War. This was when President Kennedy and Premier Khrushchev had stared across oceans at each other during the Cuban missile crisis. Khrushchev was dissuaded from coming by security considerations. Instead, he personally went to the American Embassy to sign the book of condolences. This was the kind of unity that was felt around the world.

Actually, I cannot think of any time when we felt that kind of unity and support for the United States, until the tragedy, 38 years later, of September 11.

Everybody watched the television, listened to the radio, or stood downtown to watch the funeral. We saw on television planes fly by in a missing man formation followed by Air Force One tipping its wing in salute. We ran outside just in time to see the planes which we had seen seconds before on television fly over our heads.

Looking around, everybody else had run outside too. We stood there, neighbors and strangers.

At that time, there was so much optimism, so much hope, even though it was at the height of the Cold War, and even though we had just experienced the Cuban missile crisis. After the death of President Kennedy, we felt so much of this optimism was lost.

I saw the unity come back after September 11. I don't know if the optimism will ever came back fully. We were optimistic of many things.

In my lifetime, we have seen so many wonderful advances in science. When I was young, we had to worry about polio. Our children and my two grandchildren will never have to worry about those kinds of things. Our country has

had many wonderful advances and much to be optimistic about. There was unity and support from around the world for the United States right after that event, as there was right after September 11. We are now in a time where that unity is missing. I hope it will come back.

I hope this weekend all Members of this body—most of us are old enough to remember that day—I hope we stop and think what is best for this country. It is time to start working together more closely, with more support for each other and the country, and it is time to help restore some of the optimism. We are a great country. We have survived world wars, civil wars, Presidential assassinations, and terrorist attacks. We can survive much more—if not for ourselves, for our children and for our grandchildren.

Mr. President, I ask unanimous consent to print President Kennedy's 1963 commencement address delivered at American University.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF PRESIDENT JOHN F. KENNEDY AT AMERICAN UNIVERSITY, WASHINGTON D.C., JUNE 10, 1963

President Anderson, members of the faculty, Board of Trustees, distinguished guests, my old colleague, Senator Bob Byrd, who has earned his degree through many years of attending night law school, while I am earning mine in the next 30 minutes, ladies and gentlemen:

It is with great pride that I participate in this ceremony of the American University, sponsored by the Methodist Church, founded by Bishop John Fletcher Hurst, and first opened by President Woodrow Wilson in 1914. This is a young and growing university, but it has already fulfilled Bishop Hurst's enlightened hope for the study of history and public affairs in a city devoted to the making of history and to the conduct of the public's business. By sponsoring this institution of higher learning for all who wish to learn whatever their color or their creed, the Methodists of this area and the nation deserve the nation's thanks, and I commend all those who are today graduating.

Professor Woodrow Wilson once said that every man sent out from a university should be a man of his nation as well as a man of his time, and I am confident that the men and women who carry the honor of graduating from this institution will continue to give from their lives, from their talents, a high measure of public service and public support.

"There are few earthly things more beautiful than a University," wrote John Masefield, in his tribute to the English Universities—and his words are equally true here. He did not refer to spires and towers, to campus greens and ivied walls. He admired the splendid beauty of the University, he said, because it was "a place where those who hate ignorance may strive to know, where those who perceive truth may strive to make others see."

I have, therefore, chose this time and this place to discuss a topic on which ignorance too often abounds and the truth is to rarely perceived—yet it is the most important topic on earth: world peace.

What kind of peace do I mean? What kind of peace do we seek? Not a Pax Americana enforced on the world by American weapons of war. Not the peace of the grave or the security of the slave. I am talking about genuine peace—the kind of peace that makes life on earth worth living—the kind that enables man and nations to grow and to hope and to build a better life for their children—not merely peace for Americans but peace for all men and women—not merely peace in our time but peace for all time.

I speak of peace because of the new face of war. Total war makes no sense in an age when great powers can maintain large and relatively invulnerable nuclear forces and refuse to surrender without resort to those forces. It makes no sense in an age when a single nuclear weapon contains almost ten times the explosive force delivered by all of the allied air forces in the Second World War. It makes no sense in an age when the deadly poisons produced by a nuclear exchange would be carried by the wind and water and soil and seed to the far corners of the globe and to generations unborn.

Today the expenditure of billions of dollars every year on weapons acquired for the purpose of making sure we never need to use them is essential to keeping the peace. But surely the acquisition of such idle stockpiles—which can only destroy and never create—is not the only, much less the most efficient, means of assuring peace.

I speak of peace, therefore, as the necessary rational end of rational men. I realize that the pursuit of peace is not as dramatic as the pursuit of war—and frequently the words of the pursuer fall on deaf ears. But we have no more urgent task.

Some say that it is useless to speak of world peace or world law or world disarmament—and that it will be useless until the leaders of the Soviet Union adopt a more enlightened attitude. I hope they do. I believe we can help them do it. But I also believe that we must re-examine our own attitude—as individuals and as a Nation—for our attitude is as essential as theirs. And every graduate of this school, every thoughtful citizen who despairs of war and wishes to bring peace, should begin by looking inward—by examining his own attitude toward the possibilities of peace, toward the Soviet Union, toward the course of the Cold War and toward freedom and peace here at home.

First: Let us examine our attitude toward peace itself. Too many of us think it is impossible. Too many of us think it is unreal. But that is dangerous, defeatist belief. It leads to the conclusion that war is inevitable—that mankind is doomed—that we are gripped by forces we cannot control.

We need not accept that view. Our problems are manmade—therefore, they can be solved by man. And man can be as big as he wants. No problem of human destiny is beyond human beings. Man's reason and spirit have often solved the seemingly unsolvable—and we believe they can do it again.

I am not referring to the absolute, infinite concept of universal peace and good will of which some fantasies and fanatics dream. I do not deny the values of hopes and dreams but we merely invite discouragement and incredulity by making that our only and immediate goal.

Let us focus instead on a more practical, more attainable peace—based not on a sudden revolution in human nature but on a gradual evolution in human institutions—on a series of concrete actions and effective agreements which are in the interest of all concerned. There is no single, simple key to this peace—no grand or magic formula to be adopted by one or two powers. Genuine peace must be the product of many nations, the sum of many acts. It must be dynamic, not static, changing to meet the challenge of each new generation. For peace is a process—a way of solving problems.

With such a peace, there will still be quarrels and conflicting interests, as there are within families and nations. World peace, like community peace, does not require that each man love his neighbor—it requires only that they live together in mutual tolerance, submitting their disputes to a just and peaceful settlement. And history teaches us that enmities between nations, as between individuals, do not last forever. However fixed our likes and dislikes may seem the tide of time and events will often bring surprising changes in the relations between nations and neighbors.

So let us persevere. Peace need not be impracticable—and war need not be inevitable. By defining our goal more clearly—by making it seem more manageable and less remote—we can help all peoples to see it, to draw hope from it, and to move irresistibly toward it.

Second: Let us re-examine our attitude toward the Soviet Union. It is discouraging to think that their leaders may actually believe what their propagandists write. It is discouraging to read a recent authoritative Soviet text on Military Strategy and find, on page after page, wholly baseless and incredible claims—such as the allegation that "American imperialist circles are preparing to unleash different types of wars . . . that there is a very real threat of a preventive war being unleashed by American imperialists against the Soviet Union . . . (and that) the political aims of the American imperialists are to enslave economically and politically the European and other capitalist countries . . . (and) to achieve world domination.

Truly, as it was written long ago: "The wicked flee when no man pursueth." Yet it is sad to read these Soviet statements—to realize the extent of the gulf between us. But it is also a warning—a warning to the American people not to fall into the same trap as the Soviets, not to see only a distorted and desperate view of the other side, not to see conflict as inevitable, accommodations as impossible and communication as nothing more than an exchange of threats.

No government or social system is so evil that its people must be considered as lacking in virtue. As Americans, we find communism profoundly repugnant as a negation of personal freedom and dignity. But we can still hail the Russian people for their many achievements—in science and space, in economic and industrial growth, in culture and in acts of courage.

Among the many traits the peoples of our two countries have in common, none is stronger than our mutual abhorrence of war. Almost unique, among the major world powers, we have never been at war with each other. And no nation in the history of battle ever suffered more than the Soviet Union suffered in the course of the Second World War. At least 20 million lost their lives. Countless millions of homes and farms were burned or sacked. A third of the nation's territory, including nearly two thirds of its industrial base, was turned into a wasteland—a loss equivalent to the devastation of this country east of Chicago.

Today, should total war ever break out again—no matter how—our two countries would become the primary targets. It is an ironical but accurate fact that the two strongest powers are the two in the most

danger of devastation. All we have built, all we have worked for, would be destroyed in the first 24 hours. And even in the Cold War, which brings burdens and dangers to so many countries, including this Nation's closest allies—our two countries bear the heaviest burdens. For we are both devoting massive sums of money to weapons that could be better devoted to combating ignorance, poverty and disease. We are both caught up in a vicious and dangerous cycle in which suspicion on the other, and new weapons beget counter-weapons.

In short, both the United States and its allies, and the Soviet Union and its allies, have a mutually deep interest in a just and genuine peace and in halting the arms race. Agreements to this end are in the interests of the Soviet Union as well as ours—and even the most hostile nations can be relied upon to accept and keep those treaty obligations, and only those treaty obligations, which are in their own interest.

So, let us not be blind to our differences—but let us also direct attention to our common interests and to means by which those differences can be resolved. And if we cannot end now our differences, at least we can help make the world safe for diversity. For, in the final analysis, our most basic common link is that we all inhabit this plant. We all breathe the same air. We all cherish our children's future. And we are all mortal.

Third: Let us re-examine our attitude toward the Cold War, remembering that we are not engaged in a debate, seeking to pile up debating points. We are not here distributing blame or pointing the finger of judgment. We must deal with the world as it is, and not as it might have been had history of the last eighteen years been different.

We must, therefore, preserve in the search for peace in the hope that constructive changes within the Communist bloc might bring within reach solutions which now seem beyond us. We must conduct our affairs in such a way that it becomes in the Communists' interest to agree on a genuine peace. Above all, while defending our vital interest, nuclear powers must avert those confrontations which bring an adversary to a choice of either a humiliating retreat or a nuclear war. To adopt that kind of course in the nuclear age would be evidence only of the bankruptcy of our policy—or of a collective death-wish for the world.

To secure these ends, America's weapons are non-provocative, carefully controlled, designed to deter and capable of selective use. Our military forces are committed to peace and disciplines in self-restraint. Our diplomats are instructed to avoid unnecessary irritants and purely rhetorical hostility.

For we can seek a relaxation of tensions without relaxing our guard. And, for our part, we do not need to use threats to prove that we are resolute. We do not need to jam foreign broadcasts out of fear our faith will be eroded. We are unwilling to impose our system on any unwilling people—but we are willing and able to engage in peaceful competition with any people on earth.

Meanwhile, we seek to strengthen the United Nations, to help solve its financial problems, to make it a more effective instrument of peace, to develop it into a genuine world security system—a system capable of resolving disputes on the basis of law, of insuring the security of the large and the small, and of creating conditions under which arms can finally be abolished.

At the same time we seek to keep peace inside the non-communist world, where many nations, all of them our friends, are divided over issues which weaken western unity, which invite communist intervention or which threaten to erupt into war. Our efforts in West New Guinea, in the Congo, in the Middle East and in the Indian subcontinent, I have been persistent and patient despite criticism from both sides. We have also tried to set an example for others—by seeking to adjust small but significant differences with our own closest neighbors in Mexico and in Canada.

Speaking of other nations, I wish to make one point clear. We are bound to many nations by alliances. These alliances exist because our concern and theirs substantially overlap. Our commitment to defend Western Europe and West Berlin for example, stands undiminished because of the identity of our vital interests. The United States will make no deal with the Soviet Union at the expense of other nations and other peoples, not merely because they are our partners, but also because their interests and ours converge.

Our interests converge, however, not only in defending the frontiers of freedom, but in pursuing the paths of peace. It is our hope—and the purpose of Allied policies—to convince the Soviet Union that she, too, should let each nation choose its own future, so long as that choice does not interfere with the choices of others. The communist drive to impose their political and economic system on others is the primary cause of world tension today. For there can be no doubt that if all nations could refrain from interfering in the self-determination of others, then peace would be much more assured.

This will require a new effort to achieve world law—a new context for world discussions. It will require increased understanding between the Soviets and ourselves. And increased understanding will require increased contact and communications. One step in this direction is the proposed arrangement for a direct line between Moscow and Washington, to avoid on each side the dangerous delays, misunderstandings, and misreadings of the other's actions which might occur at a time of crisis.

We have also been talking in Geneva about other first-step measures of arms control, designed to limit the intensity of the arms race and to reduce the risks of accidental war. Our primary long-range interest in Geneva, however, is general and complete disarmament—designed to take place by stages, permitting parallel political developments to build the new institutions of peace which would take the place of arms. The pursuit of disarmament has been an effort of this Government since the 1920's. It has been urgently sought by the past three Administrations. And however dim the prospects may be today, we intend to continue this effort—to continue it in order that all countries, including our own, can better grasp what the problems and possibilities of disarmament are.

The one major area of these negotiations where the end is in sight—yet where a fresh start is badly needed—is in a treaty to outlaw nuclear tests. The conclusion of such a treaty—so near and yet so far—would check the spiraling arms race in one of its most dangerous areas. It would place the nuclear powers in a position to deal more effectively with one of the greatest hazards which man faces in 1963, the further spread of nuclear arms. It would increase our security—it would decrease the prospects of war. Surely this goal is sufficiently important to require our steady pursuit, yielding neither to the temptation to give up the whole effort nor the temptation to give up our insistence on vital and responsible safeguards.

I am taking this opportunity, therefore, to announce two important decisions in this regard.

First: Chairman Khrushchev, Prime Minister Macmillan and I have agreed that high-level discussions will shortly begin in Moscow looking toward early agreement on a comprehensive test ban treaty. Our hopes must be tempered with the caution of history—but with our hopes go the hopes of all mankind.

Second: To make clear our good faith and solemn convictions on the matter, I now declare that the United States does not propose to conduct nuclear tests in the atmosphere so long as other states do not do so. We will not be the first to resume. Such a declaration is no substitute for a formal binding treaty—but I hope it will help us achieve one. Nor would such a treaty be a substitute for disarmament—but I hope it will help us achieve it.

Finally, my fellow Americans, let us examine our attitude toward peace and freedom here at home. The quality and spirit of our own society must justify and support our efforts abroad. We must show it in the dedication of our own lives—as many of you who are graduatng today will have a unique opportunity to do, by serving without pay in the Peace Corps abroad or in the proposed National Service Corps here at home.

But wherever we are, we must all, in our daily lives, live up to the age-old faith that peace and freedom walk together. In too many of our duties today, the peace is not secure because freedom is incomplete.

It is the responsibility of the Executive Branch at all levels of government—local, state and national—to provide and protect that freedom for all of our citizens by all means within their authority. It is the responsibility of the Legislative Branch at all levels, wherever that authority is not now adequate, to make it adequate. And it is the responsibility of all citizens in all sections of this country to respect the rights of all others and to respect the law of the land.

All this is not unrelated to world peace. ''When a man's ways please the Lord,'' the Scriptures tell us, ''he maketh even his enemies to be at peace with him.'' And is not peace, in the last analysis, basically a matter of human rights—the right to live out our lives without fear of devastation—the right to breathe air as nature provided it—the right of future generations to a healthy existence?

While we proceed to safeguard our national interests, let us also safeguard human interests. And the elimination of war and arms is clearly in the interest of both. No treaty, however much it may be to the advantage of all, however tightly it may be worded, can provide absolute security against the risks of deception and evasion. But it can—if it is sufficiently effective in its enforcement and if it is sufficiently in the interests of its signers—offer far more security and far fewer risks than an unabated, uncontrolled, unpredictable arms race.

The United States, as the world knows, will never start a war. We do not want a war. We do not now expect a war. This generation of Americans has already had enough—more than enough—of war and hate and oppression. We shall be prepared if others wish it. We shall be alert to try to stop it. But we shall also do our part to build a world of peace where the weak are safe and the strong are just. We are not helpless before that task or hopeless of its success. Confident and unafraid, we labor on—not toward a strategy of annihilation but toward a strategy of peace.

The PRESIDING OFFICER (Mr. ALEXANDER). The Senator from Kentucky is recognized.

Mr. BUNNING. Mr. President, I thank you.

I rise to talk about the Energy conference report and urge my fellow Senators to support this bill. We have waited for a comprehensive Energy bill for too long. I am pleased that we have before us a good energy policy bill which we can send to the President of the United States.

The conference bill is not perfect. I don't believe I have voted for a perfect bill in the last 17 years. But no bill we ever pass around here is perfect. But it is a good compromise that will help our country meet its future energy needs. This agreement will mean more jobs and more money in American's pocketbooks and create more than a million jobs across this country. We are already on the upturn of an economic recession. This bill will help kick our economy into high gear.

A good energy policy must strike a balance between energy production and conservation. This bill does just that by including increased energy production while also doing more to encourage conservation and smarter energy use.

I know this bill was difficult to get out of conference. I watched my chairman for almost 2 months suffer with this bill. Under his leadership and the leadership of Senator GRASSLEY, we have before the Senate a solid piece of legislation that provides energy policy and tax incentives to promote production and energy efficiencies throughout and the use of cleaner burning fuels.

In the wake of our ongoing problems in the Middle East, now more than ever a sound energy policy is a critical part of our national security. We must have a reliable source of energy and we must cut our reliance on foreign oil. Presently we depend on foreign nations, including the Middle East, for nearly 60 percent of our Nation's oil supply. While we appear to be moving away from combat in Iraq, we still have many problems there. There is still a lot of uncertainty in the Middle East. We need to increase our own production of energy because it is more important than ever right now. It is too important and there is too much instability in the world not to pass this bill. We do not want the United States of America at the mercy of other countries just to keep our engines running and our lights on. This Energy bill will help increase our energy independence by increasing domestic production of energy and reducing our reliance on foreign sources.

This bill allows for and encourages through tax credits more oil and more natural gas exploration. The bill also includes clean coal provisions that I helped write, to increase domestic production, while also improving environmental production soundness. In my home State this means jobs, a lot of jobs, and a cleaner place to live.

Clean coal technology will result in a significant reduction in emissions and a sharp increase in energy efficiency.

I am proud to be from a coal State. Generations of Kentuckians have made their living in the coal fields and coal mines of Kentucky. For the last decade, coal in Kentucky was on the downturn because of legislative and regulatory policies from the Federal Government which forced electricity generation to invest in natural gas-fired facilities instead of coal.

I am glad to see we have turned things around and are taking steps to make sure coal continues to play a vital role in meeting our future energy needs. This focus on clean coal is good for the environment. It is certainly good for the economy and for putting folks back to work.

The Energy bill encourages research and development of clean coal technology by authorizing nearly $2.6 billion in appropriations for the Department of Energy to conduct programs to advance new technologies. Almost $2 billion will be used for the clean coal power initiatives where the DOE will work with industry to advance efficiencies, environmental performance, and cost competitiveness of new clean coal technologies.

The energy tax package includes $2.5 billion for coal-fired companies to invest in clean coal technologies and pollution control equipment. I am pleased to see that the bill also authorized an additional $2 billion for clean air programs which will encourage the use of pollution control equipment and the next generation of clean coal generators.

The 21st century economy will require increased amounts of reliable, clean, and affordable electricity to keep our Nation running. This bill recognizes that coal must play an important role in our energy future.

Today, more than half our Nation's electricity is generated from an abundant low-cost domestic coal. We have over 275 billion tons of recoverable coal reserves. This is nearly 30 percent of the world's coal supply. That is enough coal to supply us with energy for more than 250 years.

This Energy bill also includes fuel provisions that I pushed hard for that will help make fuel burn cleaner. The bill requires the use of 5 billion gallons per year of renewable fuels such as ethanol and biodiesel in gasoline by the year 2012. The bill also provides tax credits to encourage the use of these fuels. Increasing the use of alternative fuels will help farmers while also increasing domestic energy production and lessening our dependence on foreign oil.

The bill also addresses electricity. Kentucky is the second lowest electric rate State in the Union. It just fell below Idaho. Much of Kentucky's low rates come as a result of our coal production. The low rates also come from Kentucky's decision to put Kentucky consumers first before consumers outside of the State.

I do not believe this bill goes far enough to prevent FERC from implementing SMD permanently or preventing mandatory RTOs. I do believe this bill is a good compromise. The bill delays until 2007 FERC's plan to create its SMD and allows companies to participate in RTOs voluntarily.

Some of the electric provisions are especially good for Kentucky. More than one-third of Kentucky's electricity comes from rural electric cooperative distributors. This bill will help the consumer-owners of Kentucky's 26 electric cooperatives to stay in business and maintain the State's status as having the lowest residential or second lowest residential rates in the country.

I worked hard in the Senate Energy Committee to ensure that the small rural electric cooperatives in Kentucky are not subject to expensive FERC jurisdiction that could raise consumers' rates without improving the reliability of the electric utility system. This is a big issue for our cooperatives in Kentucky that serve only a few thousand customers and do not have bulk transmission.

This bill specifically codifies RUS borrowers' existing exemption from FERC regulation and expands the exemption to include small electric cooperatives that sell less than 4 million megawatts of electricity per year. This is also called the small utility exemption.

The bill also minimizes other new regulatory burdens on cooperatives. I am pleased to see this bill does not include new regulatory programs such as environmental mandates that would have raised consumers' electric rates.

I hope the Senate passes the Energy bill this week so we can make our environment, economy, and national security stronger.

Thank you, Mr. President, for the time, and I yield the floor.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois is to be recognized.

Mr. DURBIN. Mr. President, I am happy to yield to the Senator from New Mexico, who has asked permission to speak for a few moments.

I say to the Senator, whatever time you would like, I would be happy to yield for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

Mr. DOMENICI. Thank you, Mr. President. I will not take too long.

I wish to speak a moment to the Senator from Kentucky.

First, I say to the Senator, I chair the Energy Committee, and I am very

pleased that Kentucky has contributed you to the committee. You bring to us an enthusiastic approach to America's self-sufficiency, not the gloom and doom of: We can't make it, we can't do it. You are always there saying: We ought to do it. Why don't we do it?

I am very pleased we were able to put in this new law a series of provisions that permit the Senator to come to the floor and speak with optimism about coal of the future, coal and America's future. Of course it is parochial but it is national.

The Senator's State is a coal producer but it is a part of America. Kentucky is a State in the Union. Your State does not want to go down in coal. As I understand it, you want coal to go up. You do not want ''King Coal'' dead. You want ''King Coal'' alive.

The first thing I want to do is say to the Senator, it is very interesting to see how you interpret this and how others interpret it—that all these coal provisions are a giveaway to big business. I did not hear the Senator mention big business once, not because they are not going to be involved, but I think it is because the Senator understands you are not going to produce new, clean coal generators with nonprofit organizations.

I guess the Senator assumes, as I do, that some coal company is going to apply to the Department of Energy to do this. Is that not right, I ask the Senator?

Mr. BUNNING. Absolutely. The Senator is absolutely right.

Mr. DOMENICI. So one can stand up and say: There must have been great lobbying from the coal companies.

Well, the coal companies did not have to lobby. All we had to do was have a brain and to know there is coal and say: Well, what are we going to do so somebody will invest money in coal, servicing our country in a bigger and better way?

If it turns out some choose to come to the floor and label that indecent lobbying by a big company, I am sorry, we could have done this if no coal company ever visited us, I assure you.

I say to the Senator, we have Senators like you who told us about it.

Mr. BUNNING. I assure the Senator from New Mexico that I was not lobbied by coal companies. But I sure was lobbied by the small electric producers in Kentucky.

Mr. DOMENICI. Absolutely. The truth is, whatever you lobbied for as a Senator, that is your privilege. Nobody could say you should not work for coal in this bill, that you ought to just abandon it, that you should not do that because that is representing an interest. Of course. Well, if there are no interests, there is nothing going on. Right? We just as well might go to sleep and forget about it.

Another thing that is interesting, we have had at least three Senators come to the floor, including my cohort from New Mexico, saying they are against electricity provisions because they wanted FERC to have more power.

Now, I did not have the luxury of making speeches about FERC. I had to write something. And here we have one Senator saying FERC should have run the whole electric system in the country. Right?

Then we have this Senator. He is over here saying: You almost went too far, where we skinnied back on FERC's power. We said it can phase in over time. Right?

You were not sure of that. If you had been writing it, and did not have anybody else pressuring you, you would have written it more in favor of your State. But, you see, I did not have the luxury of writing one for each State, one that affects you up the road.

Then there is another State—such as Pennsylvania—saying: We don't do business like they do. We want a whole different electricity provision. I heard that. I could not write one for them, too. Right?

Mr. BUNNING. Fifty different ones.

Mr. DOMENICI. The last time they used to write two was before the Civil War. They wrote one for the South and one for the North. But I told them: Why don't you cut it in four pieces and we will write four of them? Right? But there aren't four countries; there are just the States. So we did the best we could. I think it is a good provision.

Now, what else about it? I share with you, right now, on the electric provision that here is the study. So everybody can see it—it is the first time it has been on the floor of the Senate. It is entitled ''Interim Report: The Causes of the August 14th Blackout in the United States and Canada.'' I do not think I will ask that it be printed in the RECORD. I will refer to it. We have gone through it and we have looked at what they said.

Let me say to my friend, it says that the principal reason we had a blackout was that all of the States, with their various utility systems, had what are called reliability standards.

Now, I am not a technician, but reliability means something pretty common and ordinary. I can talk reliability at home in an evening with my wife. We talk a lot about this, and she should know what that is. Reliability standards means that you appropriately and prudently load your electric wires so they are not so overloaded that something happens, or that they are clean and they do not have things imposing upon their reliability.

This said it was nothing dramatic. It was not that we have an old, wornout system. Somebody said we had a Third World system. No, no, we do not. We have a first world system, not a third world system. When we have a blackout, it is big news. That is because we have a first-rate system. You know the third-rate systems nobody cares about because they are not working anyway.

So the truth is, this little report says the biggest reason it went out was reliability.

Well, guess what. For all the things we did so wrong in this bill, one of the principal things we provided was mandatory reliability standards. No more cheating, fudging, hiding a little, and overloading the lines during heavy use, and saying: Well, nobody will do anything—except when it blows out. Then we all find out.

So I say to everybody, we did the report. You wondered what happened. You got the study. You got a bill. The bill says, if you pass this bill, it is fixed. Right?

Mr. BUNNING. Right.

Mr. DOMENICI. Contrary-wise, do what some have suggested, throw the bill out, and you are right back where we were. You are right back where we were. You can sit around and wait for a blackout, just playing with your hands, worrying, sweating, saying: When will it occur?

At least this bill says we know why it occurred, and we are not going to let it occur again. The Feds are going to fine anybody who is lazy and loafs around and doesn't clean up the lines. In fact, the report is pretty good that they are going to be on them to get the trees off the lines. That would be good news; we don't have to go out there line by line. But that is part of the reliability.

The point I make is, for every issue people have raised on the floor that this bill doesn't do or fails to do, on the other hand it does and it doesn't fail to. Every time people say ''we don't like it because,'' there is something in it to say, ''but we do like it because.'' I regret that it can't be every single Senator taking the floor and saying: Everything in it is precisely what I want.

I am glad we have people such as the Senator from Kentucky who knows that can't happen.

Mr. BUNNING. I thank the Chair.

Mr. DOMENICI. I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois is recognized.

Mr. DURBIN. Mr. President, obviously, I am in opposition to this Energy bill. The Senator from New Mexico is my friend. We go nose to nose and toe to toe and fight on a lot of issues. We are in real disagreement over this bill. But I respect him and like him very much. When we do come together on issues such as mental health parity, it is a wonderful feeling for us to be on the same side fighting together. Unfortunately, today that may not be the case, but tomorrow I hope it is. I have a great deal of respect for him and for all the hard work he and his staff and so many others put into this legislation.

What I like about Senator DOMENICI—I guess most of all—is his candor.

He tends to play cards with the cards face up. You know what you are dealing with. He is very honest and plainspoken. That is a refreshing virtue and quality in this world of politics. He was quoted on the floor the other day, talking about this Energy bill:

We know that as soon as you start reading the language, we are duck soup.

That is what he said. I have to say to the Senator from New Mexico that I have read some of the language. It looks like a duck, it walks like a duck, and it sounds like a duck. It is a duck. And we are in the soup if we enact it.

There are provisions in this bill that are very good for America and very good for my home State, provisions which I have long fought for throughout my congressional career: Expanding the use of ethanol, expanding the use of biodiesel. These are positive steps to help farmers, rural communities, to clean up air pollution in a sensible way, to provide energy resources which are not being used as much as they should. You might not expect to hear that from a Senator from Illinois because we have the largest ethanol production in the Nation. I have been honored to represent a congressional district that includes Decatur, IL, home of Archer Daniels Midland, the largest single ethanol producer in the Nation.

I came to this issue with some knowledge and with an inclination to try my best to expand ethanol. Throughout my public career, I have done it. I have been chairman of the congressional alcohol fuels caucus. I have introduced legislation, sponsored it. I have led efforts with letters and speeches, just about all you can do to promote ethanol. If it is enacted, the ethanol provision in the bill will be the most dramatic expansion in the Nation's history. I certainly support it.

To all of my friends in the farm community back home who are disappointed because I oppose this bill, trust that my commitment to ethanol is not going to change. I am just going to hope that the next venue, the next opportunity to discuss ethanol, will be in a much different bill, a much better bill.

Sadly, what is included in this bill, beyond the ethanol provisions and the biodiesel provisions and efforts to look for new ways to burn coal in an environmentally safe way, many of the provisions are very bad, very troublesome.

Tomorrow we will have a vote. That vote will decide whether this bill goes forward to final passage. It really is the key vote. It is going to be close, probably within one or two Senators' votes. They will decide what happens to this Energy bill. It is my hope that the Senators who are on the fence now or worried about the vote will consider several things.

First, we can do better. If this is supposed to be an Energy bill for America's future, we can do so much better. Take any family in your State, wherever you are from—Tennessee, Illinois, New Mexico, or Delaware—sit down with them and say: When it comes to the energy future of America, what is the first thing we ought to look at? My guess is that most of those individuals, with no particular scientific or technical knowledge, will say: How about all the gasoline we are burning in our cars and trucks? That is the most obvious use of energy in America.

It is the No. 1 use of imported petroleum products, conversion into gasoline to fuel our cars and trucks. So you would assume that in this lengthy bill, the first chapter of the bill would relate to how we can burn this gasoline more efficiently, how we can reduce our consumption of gasoline, how we can make our cars and trucks more fuel efficient so there is less pollution and less dependence on foreign oil.

Most Americans would assume that.

Well, there is bad news. You can search this new law that is being proposed, page after page after page for 1,400 pages, and find precious little, if any, reference to fuel efficiency and fuel economy of America's cars and trucks. Why? How can we in good faith say to the American people that we are concerned about our energy security and energy independence without addressing the fuel efficiency of our cars and trucks?

There was a time, in 1975, when the average fuel efficiency was about 14 miles a gallon. Congress passed a law that almost doubled that fuel efficiency to 27.5 miles a gallon by 1985. That was 18 years ago. You ask yourself: How good are we today? Have we improved on that mark? Are we doing better than 27.5 miles a gallon on average? The answer, sadly, is no. We have gone in the opposite direction. We are closer now to 22 miles a gallon.

What has happened in 18 years? No leadership—not from Congress, not from the President—no leadership that leads us to more fuel efficiency. Instead, we have left it to the forces of the marketplace. There are many here who believe that is all we need to worry about; let the market work its will.

The market has worked its will and, as a result, we are selling cars that are less and less fuel efficient. We are importing more oil from overseas and burning it to fuel heavier, less fuel-efficient vehicles. In fact, this Congress, if it has shown any leadership, has gone in the opposite direction. We have created tax incentives for people to buy the most inefficient cars and SUVs in America, these monstrous Humvees that come rolling down the highway. We are going to give you a great big tax credit if you will buy those. Do you know why? Those big old monsters get between 9 and 15 miles a gallon. We will give you an incentive to buy those.

Yet when it comes to incentives to buy fuel-efficient cars, hybrid vehicles, we are going to have to phase that out. We do have a deficit.

Isn't that upside down? Shouldn't we be thinking about encouraging more fuel-efficient vehicles if we truly want to lessen our dependence on Saudi Arabia and Middle Eastern oil? That is obvious to most people in the State I represent. It is obvious to most Americans. It certainly was not obvious to the sponsors of this Energy bill. They wrote this bill listening to Detroit. The automobile manufacturers in Detroit—I have worked with them on a number of issues—are just plain wrong on this. They have fought tooth and nail every proposal to bring more fuel-efficient vehicles to America.

Do you want to hear the irony of this situation? The irony was brought out by a disclosure—quoting here from the Baltimore Sun of November 19, 2003. Listen to what they wrote:

Chinese leaders are worried about their nation's growing dependence on imported oil. What's more, pollution from such fossil fuels threatens to become a parallel concern as China's booming economy matures.

So they've hit upon an obvious energy strategy that somehow has eluded U.S. lawmakers: conservation.

In what should be an embarrassing juxtaposition for leaders here, China is moving to impose tighter fuel-efficiency rules on cars and SUVs than the U.S. requires, while Congress is adopting an opposite approach—boosting domestic production of fossil fuels to meet all-but-unchecked demand.

. . . adds insult to injury by subsidizing the purchase of monster gas-guzzlers, such as the Humvee.

They conclude:

The Senate still has a chance to stop this monstrosity [the Energy bill]. It should take a cue from China and prepare for the future, instead of squandering precious resources trying to maintain an unsustainable past.

Chinese thinking on energy is very clear, I might say. It is the thinking of American politicians that is inscrutable. How in the world can we be talking about energy independence and ignore fuel efficiency for the cars and trucks we drive? That, sadly, is the reality of this legislation. That is why it cannot be taken seriously. You cannot believe this is the best the Congress in America can produce to deal with energy, without addressing that issue.

There is another issue here which I think goes to questions of justice and fairness, maybe even morality. I hate to raise that question, but we hear a lot about morality and virtue and values on the floor of the Senate. Occasionally, we should apply those same words to the legislation we consider. That relates to section 1502 of this legislation.

Section 1502 of this legislation has created a ''get out of jail free card'' for the producers of MTBE. What is MTBE? It is a substance that has been added to gasoline for years in America to reduce the tailpipe emissions and to

make your engine run more smoothly. It is what is called an oxygenate. You probably didn't even know it was there. But it is blended with gasoline for those purposes, as an oxygenate. It is a product of waste products of the oil-processing procedure. So it is a pretty cheap commodity. It has been blended, for years, with gasoline in the United States. Other oxygenates include ethanol, which I referred to earlier, and, like alcohol, it is benign and doesn't really threaten the environment.

But MTBE—this additive—turns out to be extraordinarily dangerous. It is a poison, a toxic substance which, if it leeches into a water supply, can make it undrinkable, at best, and dangerous, at worst, leading those who consume it to a greater likelihood of serious illness and disease, even the potential of cancer.

So what has happened across the United States is that the oil companies that use MTBE as an additive learned that when the underground storage tank at your gas station started to leak—little drips day after day—ultimately, that MTBE-blended gasoline would reach the water table under the ground, and the water supply of the community where the gas station was located. As it reached the water supply, it didn't biodegrade but continued to be toxic and lethal. As a result, the consumers, the families, the children, and the schools that consume this water were at a public health risk.

Well, this contamination has now spread across the United States. It is in Illinois and in many other States. Let me show you how bad this is.

Here is a map showing States with MTBE contamination in ground drinking water. The Presiding Officer's State of Tennessee does not have contamination in drinking water but does have contamination sites. Tennessee has 1,394 MTBE contamination sites. Illinois, where I live, has 9,546 MTBE contamination sites. Look at this map of America. You can see that where MTBE has reached the ground water, and now the drinking water, we have the public health hazard that has swept across America. Only six States in the continental United States have not been touched by this. Hawaii has not but Alaska has. Alaska's drinking water has been contaminated as well.

Why is this important? Because, for the first time in my memory, and I have asked my legal staff to keep looking—I may be wrong—we have decided to put into legislation protection from liability for product liability cases that are filed against MTBE producers. If you are an oil company that had MTBE blended with your gasoline and it ended up contaminating drinking water, causing a public health hazard, this bill, in section 1502, says, for you, you are in luck, you get a ''get out of jail free card.''

How can we do this? How can we, in all fairness, say the corporations and businesses that made a conscious decision to use this additive, and because of the use of this dangerous substance are endangering the public health and lives of Americans, will somehow be free of liability?

One of the first things we decided in America—those who sat down and, in their wisdom, created our Constitution—was that we would do away with royalty; we weren't going to give people titles such as ''princes'' and ''viscounts'' and whatever it happened to be in the old country. No, in America it is different. There is no royalty. We are all the same. People are treated the same. The highest and the lowest in rank in America are held accountable.

But that is not the case when it comes to this Energy bill because if you happen to be an oil company with MTBE contamination, we are going to treat you like royalty with a ''get out of jail free card.'' We are going to say that you are not going to be held responsible as will the business next door selling another product. That is just plain wrong.

Senator DOMENICI came to the floor and said repeatedly—understand, he turns the cards over so there is no doubt what is going on. He says: Understand what this bargain was. If you want ethanol, you want to sell more ethanol—the oil companies hate ethanol; they don't make ethanol. In order for them to go along with this bill, in order for the oil company giants to agree to promoting ethanol in America, we had to give them this MTBE waiver of liability. Those are not my words. I think they are an accurate paraphrase of Senator DOMENICI's words, repeated many times on the floor of the Senate. He said: If you don't give the oil companies this protection from liability for their own wrongdoing, from product liability lawsuits, frankly, there is going to be no ethanol in your future.

Isn't it a sad outcome that we would turn our backs on 153,858 MTBE contamination sites in America and say to the communities, to the towns and cities, the subdivisions and the families, to the individuals who are harmed by this MTBE: We are sorry, you will not have a day in court. You will not be able to hold the people accountable who ended up endangering your family. Why? Because we had to strike a political deal. We had to say that when it came to using ethanol—which is a benign substance, environmentally acceptable—we had to swallow hard and say to the makers of MTBE and the oil producers that we are going to let them off the hook.

Do you know what else is in this bill? It is not just a protection from liability. Imagine this, if you will. We provided in this bill that you can continue to sell MTBE in the United States until 2014. Now, here is a substance that we know is damaging the environment in 153,858 contaminated sites, and this bill gives the companies the express permission to continue to sell it in America. It goes on to say that any Governor or the President can stop the MTBE ban for any State or region, which means 2014 is not a real deadline. Then, to add the ultimate insult, it gives to the industry $2 billion to transition away from MTBE.

My mind is spinning to think that Congressman DELAY of Texas, who supposedly is the author of this, was so audacious as to walk into the conference and say: Here is the deal, my friends. This lethal chemical in gasoline can continue to be sold in this country for 11 or 12 more years, and any Governor or President can extend the sale of that beyond that period; any company that wants to stop selling it is going to get a Federal subsidy to a total tune of $2 billion; and, furthermore, while this MTBE additive continues to contaminate water supplies and endanger public health, we are going to make sure that those who are injured, the innocent victims across America, cannot go to court and sue under a product liability claim.

How can we do this? How can we in good conscience do this? How can we ignore this section of the bill, this outrageous section of the bill?

Frankly, this is good reason to say to our friends who have worked long and hard on this conference report: Enough; send this bill back for more work. Remove this outrageous section about MTBE. Protect innocent American families and communities, and do it now.

There are those who argue, frankly, that there are other lawsuits that can be filed, that you don't have to use the product liability theory. Here is a lawsuit that was filed in Lake Tahoe, CA, South Tahoe Utility District v. ARCO, Atlantic Richfield Company. Here is what the jury verdict was in the case.

Lyondell—the maker of the MTBE additive—Lyondell's MTBE was defective in design because Lyondell failed to warn of the environmental risks.

They went on to say: Gasoline containing MTBE refined by the other defendants at trial was defective in design because the environmental risks of MTBE outweigh the benefits and the refiners failed to warn of its risks.

They went on to say: There is clear and convincing evidence that Lyondell and Shell acted with malice as they developed, promoted, and distributed their defective MTBE products.

What this tells us is that the companies which were sued knew they had a dangerous product, they continued to make it, continued to sell it, and continued to endanger people. Not only are they clearly guilty under a product liability standard, they are guilty, I think, in the worst scenario. As I recall from law school, it is whether they knew or should have known. This is not

a ''should have known'' situation. The wrongdoers with MTBE actually were found, in this case, to have known it was a dangerous product.

Yesterday, I came to the floor and talked about this MTBE issue. I no sooner left the floor than the oil industry decided to put out a rebuttal to the remarks I had made on the floor. It is a lengthy rebuttal, but I would like to address the elements in it.

Frankly, they were plain wrong and the record should be set straight. I stated in my floor statement yesterday and I repeat again today, there were alternatives to MTBEs in the 1990s. Some would have you believe we had no choice when it came to oxygenate; it was MTBE or nothing. But listen to this: The MTBE manufacturers knew conclusively by 1984 that MTBE was a dangerous product that could contaminate water wells throughout the United States. They misled the Environmental Protection Agency in direct responses to inquiries in 1986 when they claimed they were unaware of MTBE water contamination.

Because of this deception by the MTBE companies about the dangers of their product and their efforts to discredit anybody who said otherwise, the industry increased its production at the expense of the alternative oxygenate, ethanol.

It should be noted, MTBE, as I said earlier, is a waste product, cheaper than ethanol. Had the manufacturers of MTBE disclosed the truth about MTBE contamination, the ethanol industry would have done quite well, and Congress might or could have prohibited this product at a very early stage. But because of the active deception of the MTBE industry, starting with their knowledge in the 1980s of the danger of their product, this didn't happen.

I went on to say that MTBE was found to be a probable cause of cancer. I spent a lot of my years on Capitol Hill fighting the tobacco companies. I know how they work. The MTBE gang is up to the same bag of tricks. They are now starting to dispute medical evidence as to whether MTBE is dangerous.

The industry, in rebuttal to my remarks, said:

> MTBE is one of the most widely studied chemicals in commerce, including pharmaceuticals, and that the overwhelming majority of scientific evaluations to date have not identified any health-related risk to humans from the intended use of MTBE in gasoline.

Then they go on to cite ''numerous government'' and ''world-renowned independent health organizations'' having found no sufficiently compelling reason to classify MTBE as carcinogenic.

Let me tell you, the MTBE industry, like the tobacco industry, when it comes to playing games with medical evidence, is plain wrong. The University of California at Davis concluded that MTBE is a known animal carcinogen.

In addition, the director of the General Accounting Office's Office of Natural Resources and Environment testified before Congress in May 2002 and stated:

> An interagency assessment of potential health risks associated with fuel additives to gasoline, primarily MTBE, concluded that while available data did not fully determine risk, MTBE should be regarded as a potential carcinogenic risk to humans. . . . A primary rule in epidemiology is ''Absence of evidence of risk is not evidence of absence of risk.''

The data has been coming in leading community after community, jury after jury, to conclude that this dangerous product might or could have endangered the health of Americans.

The removal of MTBE, as I said yesterday, is a growing problem. Their industry spokesman said:

> It's more water soluble and can be transported more readily in soil and water than other gasoline constituents.

I will tell you this: The largest MTBE manufacturer in the United States, Lyondell, has already been forced to revise its product safety bulletin and state, in their own industry safety bulletin:

> A relatively small amount of MTBE, less than 1 part per billion, can impart a displeasing taste and odor to water.

The U.S. Geological Survey has determined MTBE is the second most frequently detected pollutant in the United States, second only to chlorine, which is intentionally added to water, to give you an idea of how pervasive this issue is.

I also stated that the defective product claim is the most effective to secure relief against MTBE. The industry denies it. Yet what we have found is this: We have had to, in most communities across America, dig up gasoline storage tanks because they leaked. It was through the Leaking Underground Storage Trust Fund—the LUST fund—that a lot of this was paid for. We did it because we found this leaking gasoline was contaminating underground wells and aquifers.

The point I make is this: Despite our best efforts to dig up these underground storage tanks, the problem across America has not abated. About half of the States have reported finding MTBE they can still attribute to leaking tanks and suspect it came from other sources, even above-ground tanks to store fuels.

The point I would like to make is this, for those who are attempting to rebut my remarks of yesterday: The problem with MTBE has not gone away and is not likely to go away soon. What this legislation is designed to do is to hold those wrongdoers, those producers of MTBE, harmless from liability in product liability lawsuits for selling an inherently dangerous and defective product, a product which the industry has known since 1984 would contaminate water supplies and endanger public health.

This, in my mind, is the ultimate in irresponsibility. Frankly, I would like to say to my friends in the farm community who have said to me, You have to look the other way; we have to allow ethanol to expand even if it means endangering the lives of people from contaminated water in public water supplies—I would like to say to them, remember what you said yourself.

The president of the Illinois Farm Bureau, Ron Warfield, a good friend of mine, called and spoke to me about this issue. He has testified before Congress, and he said:

> We recognize the urgency of ending MTBE use to protect drinking water supplies.

Mr. Warfield went on to state:

> MTBE has adverse human health and environmental impacts.

He went on to state:

> The farm bureau's belief—

This is the Illinois Farm Bureau—

> that any legislation that addresses MTBE must be national in scope. Allowing States that have different programs will not allow us to achieve our national energy goals.

This bill goes directly against the Illinois Farm Bureau's position. This bill says, when it comes to MTBE we are going to allow them to escape liability. We, who have said for years that MTBE was a dangerous contaminant, cannot forget our own word.

My colleague in the Senate, Senator FITZGERALD, I believe in 2002, introduced legislation to ban the use of MTBE and to move toward the use of a safer oxygenate, specifically the use of ethanol. My colleagues in the House of Representatives, Congressman SHIMKUS from Illinois, and Congressman Ganske, introduced similar legislation.

Senator FITZGERALD said in his press release, March 6, 2000: Despite relatively limited MTBE use in Illinois, the Illinois EPA reports that at least 25 communities across the State have detected the chemical in their water supply, and three towns have had to discontinue use of wells as a result of MTBE contamination.

That is a quote from Senator FITZGERALD's press release in March of 2000. He understood the seriousness of this risk. He understood the danger to Illinois and its communities. Frankly, the situation has not gotten better. It is worse.

Taking a look at this chart, we can see that in Illinois we have 9,546 contaminated MTBE sites, including drinking water sites. So for my colleagues, Senator FITZGERALD, Congressman SHIMKUS, my friends at the Illinois Farm Bureau, and other farm organizations, I hope they can understand how this bill, frankly, makes a mockery of what we have said in the past.

If we have said, under oath at times, that MTBE is dangerous to the public

health, how can we in good conscience now support this bill, which includes section 1502, which lets the producers of MTBE off the hook? How can we say to the communities and families of Illinois, or any other State affected, that we are going to limit their opportunity to come to court?

Yesterday, Senator DOMENICI likened lawsuits against MTBE producers to lawsuits against McDonald's because a woman was scalded when hot coffee was spilled on her lap. I might say to the Senator, there is all the difference in the world between the two of them. The lawsuit against the MTBE producers is a lawsuit based on the fact that this industry had knowledge, almost 20 years ago, that what they were selling was environmentally dangerous. They continued to sell it. They deceived the Government. They secreted information away from the public, and now they are trying to escape liability for their fraud and trickery.

Why should we be party to their fraud? Why should we say that they will not be held accountable for their wrongdoing? Is it not a premise of law and the rule of law in America that each and every individual and business will be held accountable for their wrongdoing? Why, then, do we cut this wide swath and say that these contaminants, the companies that made them, and the lawsuits that might come from them, should somehow be changed by this law? That is fundamentally unfair. Why would we do that at the same time that we offer $2 billion in taxpayer money to these companies as they phase out the use and production of that product?

I can think of plenty of businesses in my State of Illinois, or the States of New Mexico, West Virginia, and Texas, that are struggling to survive, that could use a Federal subsidy to get through a transition. We are not giving them a subsidy, but we are giving a subsidy to the oil and chemical companies that make MTBE a $2 billion subsidy. That, to me, is unconscionable, unreasonable, and indefensible. It is good reason for us to stand and oppose this bill.

When we look at the States that are affected by this—New Mexico, 1,126 contaminated sites; the State of West Virginia, 1,333 contaminated sites; Texas, 5,678 contaminated MTBE sites, and the list goes on and on—it says to each one of us that this crisis is not over. This crisis will continue. If we fail to hold the wrongdoers accountable, others will pay the price. There will be injured individuals and families who will have to bear the brunt of this environmental crime. There will be cities, towns, villages, and States which will have to pay to put infiltration systems in, new water systems and cleanup because of these polluters.

Why is it that this administration, and its friends in Congress, are dedicated to polluter protection instead of the basic principle that polluters should pay?

Polluters should pay for their own pollution. This is a classic example. Section 1502, which absolves in product liability lawsuits MTBE manufacturers from their responsibility and their liability, I think that is classic in terms of special interest legislation.

As I mentioned at the outset, Senator DOMENICI said there was a real danger—and let me quote him directly: We know as you start reading the language, we are duck soup. That is what Senator DOMENICI said on the Senate floor.

Well, we have read the language and, as we read it, we are saddened and troubled that in the Senate we would have such an egregious carve-out, such a blatant effort to reward one special interest group. I understand Congressman TOM DELAY's political strength, his persuasive ability, but to think that he could walk into a conference and force this provision into this conference committee is something that I do not think we should accept.

This is what we have to face. Those of us from States with MTBE contamination cannot walk away from our responsibility. We have to acknowledge that this bill, so long as it contains this provision, needs to be defeated. This bill must be stopped in its tracks. We must say to those who spent so much time on it, they need to go back and tell Congressman DELAY, the oil companies, and those who are pushing for this provision, that this is patently unacceptable and it is, frankly, unprecedented in American law that we would exempt one company from its own wrongdoing. But that is exactly what we are doing.

Once we have removed this offensive provision, we need to sit down and write a real Energy bill, an Energy bill which tries to encourage alternative fuels and renewable fuels, an Energy bill which focuses once and for all on ''conservation,'' which seems to be a blasphemous word in this administration, in this Congress, but one that most Americans understand. We need an Energy bill that deals with fuel efficiency and fuel economy. Sadly, this bill does not.

We need an Energy bill that looks to reducing our dependence on imported oil in the future. Maybe we should invite the Chinese to come over and give us some guidance on how we could move toward conservation and fuel economy and less dependence on foreign oil because, frankly, they understand it far better than we do. We need an Energy bill that does not have to get passed by being larded up with a gusher of giveaways. If one wants to talk about oil exploration, there is a gusher of giveaways in this bill, giveaways to cities, towns, States, Congressmen, and Senators. Is that what it takes to develop an energy policy in America? I hope it does not.

I am no newcomer to Capitol Hill, and I understand that sometimes one has to keep the process moving along and they have to help one State or this region or one industry or that industry, but when it goes to this extreme, when it goes to the extreme of absolving a polluting and contaminating industry from their legal liability in products liability lawsuits for contamination of 153,000 sites across America, then it has gone entirely too far.

I urge my colleagues to join me in opposing the motion for cloture. If that motion is stopped, this bill is stopped. When it is, it can go back to conference.

Let us hope that for the first time we will have an open process. This whole energy policy started when Vice President CHENEY created a secret task force with secret meetings, producing a secret bill, leading to the administration's energy policy. It continued apace through the congressional process and returned to secrecy when two individuals, my friend the Senator from New Mexico and the Congressman from Louisiana, Mr. TAUZIN, sat down in a room without other Members and without anyone from the minority party and wrote this bill.

The reason there is such resistance today is the fact that this was not an open process. It should have been more open. Had it been more open, I do not believe anyone could, in good conscience, have proposed this MTBE exclusion from liability. You could not have brought this out in public with a straight face. But in private you can, and that is what happened.

Now the bill is on the floor and America gets a chance to read it. Having read it, I urge those who happen to be from the States with contamination of MTBE—and I put this map up here for those who are following the debate, for my colleagues to note. If your State is in black on this map, you know you have MTBE contamination. If it has one of those gold circles as well, it is contamination of drinking water.

If you vote for this legislation, you are saying to the people living in your State and your communities: We are closing the opportunity for you to go and hold the people accountable who have created this environmental disaster in your State.

I wouldn't want to go home and try to explain that. And I am not, because, frankly, I am going to oppose this bill so long as it contains this provision.

I yield the floor.

The PRESIDING OFFICER (Mr. CRAPO). The Senator from New Mexico.

Mr. DOMENICI. Under the order, the distinguished Senator from Texas is next; is that correct?

The PRESIDING OFFICER. There is no order.

Mr. DOMENICI. She has been waiting. I assume she asks she be next. Will

the Senator let me use 5 minutes before she proceeds?

Mrs. HUTCHISON. Certainly.

Mr. DOMENICI. Mr. President, I want to take 5 minutes on the issue my good friend from Illinois raised here today. Has anybody thought how in the world there would be MTBE being used in all these different parts of the United States even today, even today? Has anybody wondered why it is still being used? Because it is still valid according to the laws of our land, and it is approved by the Environmental Protection Agency. This MTBE product was produced because the U.S. Government sought an additive to be applied to gasoline so it would be cleaner than gasoline without it.

I want to assure everybody in this country. The Senator makes it sound as if the product is an illegal product. If he doesn't, then I would sure say, if per se this product is this dangerous, it ought to be banned. But isn't it interesting?

He could say it should be, but the truth is, it is not. It has not been, and there has only been a little ripple of talking around here about perhaps shutting it down.

Why has there been none? Why is the Environmental Protection Agency, not just this one, the one in the Clinton and the one before that—why did they not do something about it? The reason is there is nothing wrong with the product. The product is being used. If it is used right, it is a good product. We are going to do better when we do ethanol.

But the good Senator from Illinois—I don't know how many times he will come back to the floor, how many times the Senator from Illinois will return to the floor to speak about MTBE. But his State is the second largest producer of corn in America, and the reason he is down here talking about MTBE is because he is scared of his farmers because he is not going to vote for the thing they want more than anything else—ethanol. That is what they want. He has been working on it. I have been working on it. Everybody has been working on it. And this Senator has decided, the Senator who just spoke, from Illinois, decided he would rather defend the trial lawyers who want to go after the companies that produce MTBE.

I also assure you that the language in this bill does not say that anybody is immune from liability. It merely says you can't sue the producer of the product just because they produced the product.

What is happening is it is being used improperly. When it is used improperly, it is producing all these ill effects across the country.

Does that mean we sue the people who produced it? I repeat, it is a legal product that has been approved by the Environmental Protection Agency. The United States of America approved it and now it is being used but people don't use it right. Underground tanks leak and it leaks into the water system. Does that mean the company 2,000 miles away that manufactured the product should be responsible to clean up those water systems? Of course not.

But I guarantee they are chomping at the bit to do it—do what? Not to sue the people whose tanks leaked because they are not fat enough. They are chomping to sue the big oil company that manufactured it for the last 20 years.

Now I want to read the statute. The statute says: No product shall be deemed defective—

if it does not violate a control or prohibition imposed by the Administrator of the Environmental Protection Agency (hereinafter referred to as the ''Administrator'') under section 211 of such Act, and the manufacturer is in compliance with all requests for information under subsection (b) of such section 211 of such Act. . . . If the safe harbor provided by this section does not apply, the existence of a claim of defective product shall be determined under otherwise applicable law. Nothing in this subsection shall be construed to affect the liability of any person for environmental remediation costs—

Clean up the water, sewer systems and water systems.

It says:

Nothing in this subsection shall be construed to affect the liability of any person for environmental remediation costs, drinking water contamination, negligence for spills or other reasonably foreseeable events, public or private nuisance, trespass, breach of warranty, breach of contract, or any other liability other than liability based upon a claim of defective product.

Frankly, there is no defective product. You can go on saying where it is all over America and that is because it is legal to use it. But it is not legal to abuse it. When people abuse it, should we really, as a nation, say the people who manufactured it are liable for all the consequences? I think not. That is all we did in this legislation.

If the distinguished Senator is so worried about this, I suggest he ought to vote for this bill and take care of the ethanol producers in his State and other States. He may be the deciding vote that decides we are not going to have ethanol. I wouldn't like to be in that position, I tell you, not on a weak proposition that the reason I did it was to protect the big lawyers who want to file these lawsuits. I say to all of them: File your lawsuits. When this thing is over with, file your lawsuits. It is just that you will not be able to sue the company that made the product which is legal and allowed. You can sue anybody else who caused the damage.

It is like somebody who drinks some soup in a restaurant and somebody in the restaurant, instead of putting soup in the bowl, they put some poison in it. You drank it and got sick.

Do you sue Campbell's Soup Company for producing the soup or do you go look for the people who put the poison in it?

The truth is, maybe we would all like to see MTBE go away. But that is not the issue. The issue is whether or not we should deny the passage of an Energy bill and ethanol for the farmers of this country, a great, giant substitute for the crude oil that we are going to use; whether we are going to do that or not.

If we are not, we surely ought not do it based upon the excuse that a valid product licensed by the United States improperly used is causing damage to people and we don't want to let them sue the people who produced the product but let them sue anybody else—the leaking tank owner, the distributor who distributed it wrongly, or anybody else who caused this—just because you made a legal product and somebody got hurt later on down the line, go back and sue the company that made it legally, validly, under what one might say is almost a license from the Federal Government.

I thank the Senator from Texas for yielding. I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mrs. HUTCHISON. Mr. President, I thank the Senator from New Mexico for shepherding this very important and very complicated bill to the floor.

I have to say I have been in the Senate for 10 years, and I have tried to get an Energy bill through the Senate during all of that time. We have never been able to do that until the Senator from New Mexico became chairman of the committee. What he has produced is a balanced bill. There are many things in it that I don't like. There are many things in it that I am sure every one of us in this Chamber would do a little differently. But we are a legislative body, and people have the right to have differing views and come together in compromises.

When we are making the decisions about how we are going to vote on legislation, we have to determine if the good outweighs the bad and if the bad is going to be unchangeable or more harmful than we should allow. I think the good definitely outweighs the bad in this bill.

I was going to talk about the MTBE issue. I couldn't talk about it any better than the Senator from New Mexico. People forget that MTBE was a mandate from the Federal Government. It came as a result of a mandate to produce oxygenated gasoline to try to reduce smog in our country and reduce pollution. The manufacturers came forward with MTBE. It is a perfectly safe product if used properly. In fact, it did have the intended consequences of reducing pollution.

The reason it is going to be phased out is that it has been misused, it has leaked into water supplies, all of which is very bad. But I don't think making

the manufacturers of a product that was produced at the insistence and mandate of the Federal Government is good public policy. I think the MTBE issue has been used as a stalking horse for people who do not like other parts of the bill.

In fact, I think this is a good Energy bill. We must have an energy policy that addresses the issue of self-sufficiency for our country.

Between 1950 and 2000—50 years—overall energy consumption in the United States increased three-fold. We currently account for 24 percent of consumption worldwide. Yet, while demand has drastically increased, domestic exploration and the development of renewable sources have not kept pace. What we are doing today and tomorrow and as long as it takes to pass this bill, I hope, is promoting conservation, promoting increased efficiency, promoting reduced consumption, and promoting increased production from traditional sources. Some forms of energy are limited. They will exhaust themselves over time. But others are replaceable.

In this bill, we encourage the replaceable sources. Geothermal technology offers a clean, sustainable energy created by the harnessing the Earth's heat. Geothermal resources can be found in shallow ground or in hot water and rock miles below the Earth's surface. Hydropower, currently the largest source of renewable power in the United States, yields electricity from flowing water. Solar energy harnesses sunlight to generate electricity, provide hot water to heat and cool, and light buildings. Wind energy is created by 16-ton turbine engines capturing the wind with two or three giant blades to generate electricity. These turbines can be seen on hilltops where there is strong wind and not too much turbulence.

These are becoming increasingly a common sight in my home State of Texas, one of the Nation's leaders in wind energy production.

All of these sources are clean, natural, and renewable, and they can play a greater role in our Nation's energy policy. This legislation provides incentives for nuclear power. This has been overlooked in recent decades.

Since 1978, no new nuclear plants have been built in our country. Fear of accident and extraordinary insurance costs have made nuclear energy a costly venture. While European nations have safely developed sophisticated nuclear capability, the United States has let development of this important source lag. By encouraging the development of nuclear energy, we will give American companies a kick start that will create the high-paying technology and construction jobs and provide probably the biggest source of clean energy to meet our high demand.

One of the parts of the bill that I wrote is tax credits for marginal wells. Marginal wells are the 10-barrel-a-day wells, or less. When there are wells that produce a million barrels, thousands of barrels, a 10-barrel-a-day well is a small well. It takes a lot of capital to go out and drill a well. If a producer believes it is going to be a very small well, that producer is going to be less likely to incur the costs of drilling. But in fact, these little bitty wells, if they are going at full capacity in our country, and if we encourage them, can bring up the same amount of oil and gas as we import from Saudi Arabia every day. These little wells can be drilled by small business people. They can create jobs in the oil fields, and they can become a significant source of oil and gas for our country.

We have tax credits for these small wells if the price goes below $18 a barrel. These people will go out of business at $18 a barrel. They cannot make it. They can't break even. They will have to close the well, which is also expensive, and let their people go. So you have a loss of jobs. With a credit for marginal wells, when the price goes below $18 a barrel, you can encourage these people to go ahead and drill the well, put people to work and keep producing oil and gas for our country. Hopefully, the price goes back up—and, of course, the price is up right now. So it wouldn't even take effect right now. But it gives that floor so that the little guys will take the chance to go ahead and drill that well.

This provision was modeled after a Texas law that has also been quite successful in waiving certain State taxes for the little guy to keep those wells going.

The other thing it does is allow expensing for delayed rental costs, and G and G—which is the geological and geothermal exploration. These are expenses that are incurred, and in any other business they are able to be written off. They would be able to in this bill as well.

It encourages deep drilling in the Gulf of Mexico, which is quite expensive. We have had incentives over the last few years for this deep drilling. It has become the largest source of oil and gas we have in our country except for Alaska. Of course, we are not able to drill in ANWR. So this is a very significant resource for us, the Gulf of Mexico.

All of these are provisions I put in the bill because I believe that keeping the small businesses in business is a very important part of energy self-sufficiency in our country and creating jobs.

There is a national security issue. When 60 percent of our oil is imported—and we know how volatile the largest sources of those imports are in the Middle East—we know our country is going to be in a very bad fix if we lose those resources because of volatility or the war on terrorism. Our economy will be affected adversely. That will affect our jobs. It will affect our factories. It will affect our small business costs if we don't have our own sources of energy. That is why the Senator from New Mexico and the people on the committee who worked to forge this bill were addressing our national security interests as much as those who work on the defense issues.

If we are energy self-sufficient, that means our economy will not be in upheaval if we have a huge loss in the ability to import foreign oil, and therefore the price goes up and it becomes prohibitively expensive. We need to have our own sources of energy. We need to be dependent on ourselves. We need to keep the jobs for energy in our own country. That is why this bill is a good bill. It is not a perfect bill. No one said it is. I would not have written it this exact way, but it is a good bill. It will make us more energy self-sufficient, which also means we will be more secure in our country, more secure in our economy, and we will keep the jobs coming which are so important to keeping our economy strong and to have the recovery we have all been looking for to occur in the next year.

I support this bill. I hope people will look at the big picture. I hope people will look at the rhetoric on MTBE and overlook some of the things they do not like in the bill by looking at the good things that will increase production, increase the renewable energy sources, increase the clean energy, and decrease our consumption all at the same time so we will have a better energy policy for our country.

We have been working on this for over 10 years. The time has come. We will be able to fix things that do not work. We always do that with major legislation that is passed. The time has come. We have the capability to act now. I hope we will not lose it.

I yield the floor.

The PRESIDING OFFICER (Ms. MURKOWSKI). The Senator from West Virginia.

Mr. BYRD. Madam President, we have before the Senate the long-awaited Energy bill. For the more than 3 years of its making, we have been led to believe this was to be the piece of legislation that would go a long way toward solving our Nation's energy problems. But instead of providing for our Nation's energy security and stability, this bill does little more than codify back-room bargaining, underwrite the administration's corporate contributions, and further deepen our deficit ditch.

This bill is a monstrosity of gifts for special interests. Its passage will mean another lost opportunity to shore up our Nation's energy security, provide for future economic growth, and protect consumer interests.

The White House and Republican advocates may argue that this bill is national, comprehensive, and strategic. It is not. Advocates argue that this is a premier jobs bill and that hundreds of thousands of new jobs will be magically created because of the Pixie dust that is sprinkled throughout the bill. But these are empty assertions. This Energy bill will be neither an economic shot in the arm nor a jobs booster.

The White House and its secretive energy task force have done their utmost to dictate the terms of energy legislation for more than 3 years now. This energy conference bill is that dismal result. The Republican energy bill negotiators took a page out of the Vice President's playbook by not undertaking their deliberations in an open, transparent, and bipartisan manner. When well-placed corporate heads have a greater voice at the conference table than the minority Members of Congress, then we have truly sold our Nation's energy policy to the highest bidder. This conference was a shameful example of how the big moneyed interests who are bosom pals of this administration, continue to elbow out the best interests of the American people.

The American people should also know that the White House and Republican proponents who have so often avowed the free market system and fiscal responsibility are essentially ignoring those policies in this bill today. During the deliberations on energy legislation, the White House raised concerns about unrealistic authorizations and indicated its support for only $8 billion in tax incentives. But now the Bush administration wholeheartedly welcomes and strongly supports this bill regardless of its budgetary impact.

The Congressional Budget Office estimates that the deficit will be deepened to the tune of $25.7 billion because of mandatory spending and unbalanced tax incentives. This Energy bill, like so many bills that Congress has passed, is another empty promise. The White House's only major goal is to tick off a campaign pledge, regardless of its contents or lack thereof.

Furthermore, this bill is replete with unrealistic new authorizations that go far beyond the reality of our limited and shrinking budgetary resources.

Passage of this bill is far from a guarantee that the money will flow. How many authorization bills have been passed during the tenure of the Bush administration pledging huge sums of moneys that never came into being? How easy it is to vote to authorize funding, to make a splash in the headlines, and raise hopes about the funds that will flow from Washington, but when it comes to actually putting money in the budget and supporting the promised funding levels in the appropriations bills, this administration jumps ship again and again and again. One need only look at the No Child Left Behind program to see how this game of bait and switch is practiced and played.

What complicates the matter further is the number of new programs that have been created in this bill. In a perfect world I would like nothing better than to be able to support a plethora of energy programs that truly advance our neighbor's ability to produce and use energy more cleanly and efficiently. But realistically, this legislation only creates more programs that will have to compete for the same pot of money, and that pot of money is ever dwindling. Instead of focusing on our Nation's highest energy priority needs, longstanding programs—programs that are working—could well be severely fractured and diluted for years to come. That is not progress. In the end, this bill will just be another empty soapbox for the President to stand upon even though the necessary resources to carry out our energy programs will never materialize.

I certainly recognize that there are several important and useful provisions that have been included in this legislation, including a number of specific clean coal programs which I have supported. These and several other provisions have had bipartisan support in the Senate in both the 107th and 108th Congresses. Yet, in the aggregate, this bill will not help us to achieve our energy, economic, and environmental goals and, in many cases, will create even bigger problems down the road.

I have long advocated developing a complimentary approach toward our energy and environmental policies. Yet I have serious concerns about this bill's liability waivers, exemptions, and alterations to longstanding environmental laws, and limited consumer protection provisions. Furthermore, like several major tax cut bills and the homeland security legislation, special deals have been stuffed into the nooks and crannies of this bill. Yet some of the matters that rightfully should have been dealt with in this legislation are glaringly absent.

I speak, for example, of the coal miners Combined Benefit Fund. Nearly 50,000 retired coal miners and their dependents are facing an imminent crisis. These miners, who live in every State, are in danger of having their health care benefits cut due to a financial emergency in the fund, created by law, to pay those benefits. These are elderly men and women—women for the most part. Most of these are elderly widows who are truly among America's most vulnerable citizens. Yet among all the billions of dollars to help oodles of special, corporate interests in this bill, I find not a penny—not one penny—to help these elderly Americans, most of whom, as I say, are widows.

For the past 2 years, as the ranking member of the Appropriations Committee, as the Senator who has been on that Appropriations Committee longer than any other Senator in history, I have come to the aid by providing relief to that fund through several appropriations transfers of funds.

The Appropriations Committee was not the committee of jurisdiction. Other committees in the Senate are the committees of jurisdiction, not the Appropriations Committee. But I have come to the aid, with the support of my friends on both sides of the aisle in that committee, and especially I remember the support that was rendered on my behalf and on behalf of the coal miners and retired miners by Senator TED STEVENS, my Republican friend.

These were transfers that did not cost any State any money to clean up its abandoned mine lands. Yet these retirees and their dependents, most of them probably in very ill health and frail health—I believe the average age of these retirees is in the high seventies, probably near eighty—are being held hostage in some cold-hearted game of chicken. There was a chance in this bill to help them. There was a chance to provide a fix for the program that Congress designed to fulfill our promise to them, but the conferees failed to make that fix. The effort was killed by too many greedy hands grabbing for their own piece of the pie.

I hope the Senate and House committees of jurisdiction—not the Appropriations Committee; the Appropriations Committee has helped time and again—I will act next year to ensure that our Government keeps its promise to these retired miners. Certainly, compassion for the old and the sick should prevail over greed.

It pains me to conclude that this energy conference report, in its totality does not fully integrate four fundamental principles of good energy policy; namely, energy security, fiscal soundness, consumer protection, and environmental balance.

Despite its rhetoric, this White House's lip service and corporate coddling have been the sum total of this White House's energy policy. It began with the Vice President's National Energy Policy plan and concluded with the exclusion of Democrats from the energy conference.

As the Sun begins to shine on this leviathan, I hope that Americans will understand that this Energy bill will do little to resolve our energy problems, and if it passes, it could very well turn out to be a Pandora's Box.

Madam President, this legislation comes to us at the end of a session, and the Republican majority is attempting to serve up this elaborate and expensive dessert. But these are just empty calories—a delicious photo opportunity for the President, rich filling for industry lobbyists, but, in the end, only empty calories and heartburn for the American taxpayers. Sadly, when all is said and done, the American people

will continue to stand in the bread line, hungry for a comprehensive national energy strategy.

Madam President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. INHOFE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INHOFE. Madam President, I have listened very carefully to the distinguished Senator from West Virginia and his characterization of this legislation. I have to come to a different conclusion because I believe this legislation before us today is a first giant step. We have been talking about this now for not months but years. I can tell you right now that the problem we are having with energy in America is a very serious problem.

I am from a State that is a production State. We have produced shallow and marginal wells for a long period of time. Sometimes people don't realize how significant this source of energy is. Statistically this is true: If we had all of the marginal wells that have been plugged in the last year flowing today, it would equal more than we are currently importing from Saudi Arabia. That is a huge amount.

I started out, before most of the people in this Chamber were born, in the industry, in the oil business. I was a tool dresser on a cable tool rig. That is the way we used to go after oil, particularly shallow oil, where you would have to take a bit out. You would stand with it, white hot, and sledgehammers on both sides, sharpen it, and then go back and pound. We pulled a lot of oil out of the ground at that time.

If you think about the economy that resulted from all that production, there were good jobs. In the Osage area of my State of Oklahoma, northeastern Oklahoma, we had a lot of shallow wells. I can remember going in to Pawhuska, OK, at noontime to eat lunch. You would have to wait in line 15 minutes to pay your bill. It was because this industry was so viable. Today it is almost a ghost town.

With the passage of this bill, there are incentives in here. Nobody talks about them. There are some things I wish were in this bill. No one is more familiar with the necessity to get into some of the drilling at ANWR, and certainly we need to be doing that. But just look at some of the opportunities that are in the bill.

This bill has an incentive to get back into marginal well production, and that could open up a huge domestic supply of oil and lessen our reliance upon foreign countries. That reminds me of something I often say: Our reliance upon foreign countries for our oil supply is not an energy issue. It is a national security issue.

I remember back many years ago, during the Reagan administration, when Don Hodel was Secretary of Energy and later Secretary of the Interior. He and I had a little dog and pony show. We would go around the country and talk to them about how the outcome of every conflict, every war back to and including the First World War was dependent on who was in control of the energy supply. We talked about the Malay Peninsula. We talked about the submarines coming into the Caribbean to knock down the ships so we could not get to our refineries.

This is something I thought surely people would understand. They didn't understand it. By the way, the fact that we are looking at an energy policy today, this should not really be a partisan issue. I kind of laugh when I hear some of my colleagues on the other side of the aisle saying we don't need an energy policy. I tried to get Ronald Reagan to have an energy policy. He didn't do it. I tried with the first President Bush. I said: Let's get an energy policy. Let's have, as a cornerstone of that policy, a maximum amount that we are willing to depend on foreign countries for our ability to fight a war. He didn't do it. We didn't do it during the Clinton administration. But this President is.

I talked to this President when he was running for office. I said: Will you commit to an energy policy so we can lessen our dependence on foreign countries for our ability to fight a war? Back when Don Hodel and I were going around, we were 38-percent dependent upon foreign countries. Now it is approaching 60 percent. So it is very serious.

Why is it people wouldn't realize that after the Persian Gulf War in 1991, why wouldn't it be indelibly imprinted upon the hearts of every American that we could no longer be dependent upon the Middle East for our ability to fight a war? Yet it didn't seem to help. We picked up a few extra votes but not enough to get a real policy.

I chair the Environment and Public Works Committee. There are a lot of issues that are within the jurisdiction of my committee that are very significant and that are in this bill. One is, it allows hydraulic fracturing to be used by not just Oklahoma but by all States. This is a way of extracting oil out of tight formations. It is something we need to be addressing. It is addressed in this bill.

This clarifies the exemption for oil and gas production from storm water discharge permits. Congress provided this exemption years ago, and a misinterpretation of the exemption had threatened to stop a lot of the small, local production. This clarifies that and will get us back into producing.

This provides a 5 billion gallon ethanol requirement for motor fuel. If anyone ever says there is is not enough renewable energy in this bill, they have not really read this title of the bill. I started working on this issue over 5 years ago, and I am glad to see that a compromise was developed to increase the amount of renewables while ensuring that our Nation's refineries are not adversely affected.

In my committee, we had the renewal of the Price-Anderson bill. We passed it. It is now a part of this bill. So a lot of the things that would otherwise have been on individual bills or have been on a comprehensive bill from my committee are in this bill.

It is necessary to have reauthorization of Price-Anderson in order to provide the protections so we can go after the other sources of oil such as nuclear sources. This establishes a nuclear security program. I think we all, after 9/11, recognize that.

In the committee I chair, we had all the security bills. We had a wastewater security bill. We had a nuclear security bill. We had a chemical security bill. They are all there for the purpose of protecting those vital elements of our economy from a potential terrorist attack. We went ahead and put the nuclear security bill in this. If we don't pass this, it is going to certainly heighten the risk that is out there on something happening to a nuclear plant. So after a lot of effort, we finally have that in here.

This bill provides $300 million for the EPA's clean schoolbus program, another one that came out of my committee.

I am saying there is a lot more to this bill. It doesn't go far enough. I can't look at the lovely acting President in the chair without thinking about ANWR and about going up there. I just wish people who are so concerned about disrupting the environment or something up there in those slopes would go up and look at it. It is not a pristine wilderness. It is a mud flat. All the local people want it.

Here we are down here—we are a lot smarter here in Washington—saying no, in spite of the fact it would alleviate some of our reliance upon foreign countries for our ability to fight a war. We are smarter than they are up in Alaska. We know what is good for them in spite of what they want.

I am very proud of both Senators from the State of Alaska for understanding this, for explaining it. I feel sorry for them that we have such arrogance in this body that we feel we know more about their business than they do.

Our Nation is at the point where access is prohibited to almost every major reserve of oil and gas on our Nation's shores. Furthermore, extremist environmentalists have declared war on oil and gas wells in the interior of our Nation.

I have had occasion, as I am sure the manager of this bill, Senator DOMENICI,

has had numerous occasions to debate people on the other side. We know we have a crisis in energy in this country. Yet there are those on the other side who say: We don't want nuclear energy. We don't want fossil fuels. We don't want oil. We don't want coal. Now they don't even want windmills because they will disturb some migratory bird path.

We have to have it. Look at the flight of industry and business that is going overseas. Right now we have chemical companies that fear they are going to end up not being able to use coal as a source of energy, one that we are depending upon for more than 50 percent of our energy in America today. They have gone over into other countries such as western Europe where they have nuclear energy, where some of the countries, 80 percent of their energy comes from nuclear sources.

This bill is a modest start. But if we don't do this, after being rejected since 1980 and before having an energy policy in America, this crisis we are facing right now is going to be even more serious. It is a modest beginning and one on which certainly, at the very least—I say this to the Republicans—we should at least have a chance procedurally to have an up-or-down vote.

Let's remember what we went through last week for some 39 hours. The big debate there was, let's just get to the point where we can have an up-or-down vote. That is all we want on this, an up-or-down vote. I would hope that some of those individuals who may not be in support of this legislation will at least vote to allow us to have that up-or-down vote.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GREGG. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GREGG. Madam President, I wish to continue what I think has been a fairly lively and informative discussion on the Energy bill which is before us. A lot of the time has been focused, of course, on the language which exempts the manufacturers of MTBEs from liability and which does it in a retroactive way which is extremely penal to those States that decided to use their rights to try to protect the ground water of the populace by bringing lawsuits and, as a result, will now be barred from those lawsuits, not only prospectively but actually ex post facto.

That seems to be an outrage in and of itself, of course, coupled with the fact an additional $2 billion is going to be spent to subsidize the companies that are producing the MTBE. That just adds insult to injury. The list of issues involving MTBE goes on and on, and they have been explored at considerable length on the floor.

I want to return to another element of this bill that concerns me, and that is the fact that it is extremely profligate in its use of Federal tax dollars and especially the manner in which those tax dollars are used.

It would be appropriate to have an energy policy in this country. That is absolutely necessary, in fact. If we are going to have an energy policy, it ought to be based on three basic purposes: One, it should be based on reducing consumption through, hopefully, conservation; two, it should be based on producing renewables that can be used over and over and, therefore, reduce our reliance on international oil; and, three, it should be based on the need to create more production of resources that can be used for energy.

All of those elements should have some sort of marketplace relevance. In other words, you can't suddenly go out and pervert the marketplace by essentially saying you are going to pick a winner and that winner, even though it may not be commercially viable and even though it may not be even environmentally viable, will be given a dramatic increase in support from the Federal Government simply because it happens to be the item of the day for those folks who happen to be writing this bill.

Unfortunately, that is the way this bill is put together. It is a hodgepodge of little interests—some of them rather large interests, some of them extremely large interests—that were able to get to the table and get their interests taken care of but not in an orderly way, not in a way that had an overarching theme, such as creating conservation, creating renewables, and creating production but, rather, in a manner that says we are going to pick winners and losers; certain segments are going to be the winners, and certain segments are going to be the losers; certain regions are going to be winners to the detriment of other regions; and essentially we are going to try to logroll this bill through the Senate even though on its face it has no relationship to national energy policy.

The list is quite long of items which you have to say, if you are going to try to be kind, are arbitrary—arbitrary at best—but they invade the taxpayers' wallet.

Let me read a few of them: $2 billion for companies in Texas and Louisiana to compensate for their phaseout of the gasoline additive MTBE. I find that to be one of the most outrageous since those companies are also, at the same time, demanding they be held basically free of any liability for having produced MTBE which is such a huge detriment to the country—$2 billion in tax deductions for oil and gas companies for purposes of geological and geophysical expenditures; $500 million for a new loan program for the oil and gas industry to demonstrate and encourage new technology. The program leaves it to the discretion of the Secretary and the loan recipients to establish interest rates and loan repayment schedules.

You have to admit, that is creative. The last time I went into a bank, I, as the borrower, did not get to pick my loan payment rate and my repayment schedule. These are very creative people who sat around this table taking care of your tax dollars.

There is $2 billion in taxpayers' money to be used for cleaning up gasoline and chemical spills from leaking underground storage tanks, a worthy goal, until one learns this fund will even fund cases where the polluter can be identified, letting the polluting individual or company off the hook and putting the hook into the American taxpayer.

There is $2.9 billion in corporate welfare for some of the wealthiest corporations in the fossil fuel industry; $800 million for a loan to build a coal gasification plant in Minnesota; $1.1 billion for the first-ever production tax credit for coal.

The bill expands the solar energy and geothermal investment tax credit to include clean coal investment. That is a unique view of renewables. That is creative use of the term ''renewables''—to throw solar and geothermal in with clean coal; $1.5 billion for loan guarantees for coal plants, more than $1.4 billion over the next 5 years.

The bill establishes a federally funded research and development program to ensure coal remains a cost-competitive source of electrical generation as a chemical feedstock and for transportation fuels. This is a classic example of trying to control the marketplace arbitrarily with tax dollars.

Basically, what we are saying is even if it doesn't work competitively, we are going to subsidize it, and we are going to force it to work in the marketplace to the tune of these billions and billions of dollars. That list goes on.

One of the most interesting ones is what they did with the abandoned mines land fund. This fund collects fees on all coal mines in the United States to clean up the dangerous mines abandoned before 1977. That is an extremely worthy goal. Obviously, we don't want the mines out there, and the damage they do to the environment is significant.

Over $6 billion is needed to mitigate the environmental damage from these abandoned mines, but there is only $1 billion in the fund today. This proposal would reauthorize the fund for another 15 years, reduce the fee to mining companies by 20 percent, and transfer $275 million from the fund to address the deficit in the United Mine Workers Combined Benefit Fund and direct 10

percent of the Federal mineral leasing moneys to address the money owed from the AMI fund to Wyoming and Montana.

Over the next 3 years, the proposal would cost approximately $1.4 billion, but the mines would not get cleaned up because the money would have been siphoned off for these special projects. That is what is called special interest governance. Two billion dollars in the provision could defray some of the costs incurred by utility companies in installing pollution control equipment in old coal-burning plants to comply with the clean air bill. That sounds reasonable except for the fact we have to realize that these plants have been exempt from the Clean Air Act now for over a decade and they were given the exemption so they could work their way into being clean.

Other plants have come online, with the consumer paying the costs of having those plants be clean-air-producing plants. So consumers are paying for new plants but now they are going to get to pay twice—not the local consumers but the region of the whole country is going to get to pay twice for the old plants that do not meet the responsibility and have refused to upgrade their responsibility. Picking winners and losers again in the marketplace in a way that is extremely arbitrary and simply reflects the fact that certain interests were at the table that had the ear of the people who were effective in developing the bill.

Ethanol is a program that has taken on a life of its own. Regrettably, that life is paid for by the whole country, especially by parts of the country which see no significant benefit from this product, at an extraordinarily high cost.

Since 1978, the U.S. Government has granted a multitude of tax incentives and subsidies to promote the growth of the domestic ethanol industry. The industry and its supporters, including suppliers of ethanol—the primary input, corn—maintain that ethanol is an effective and environmentally sound way to substitute for gasoline. However, the huge subsidies given out year after year have benefited few besides the corn growers and the ethanol producers, which are often very large companies.

Despite the claims, ethanol has neither reduced our dependence on foreign oil nor has it significantly reduced pollution. Taxpayers' repeated payments in the form of subsidies to corn growers and ethanol producers, and the opportunity it costs, serves no other purpose than to artificially prop up the price of corn and the ethanol industry.

The list of subsidies that have been developed over the years is rather staggering. In the last farm bill, we put $26 billion into that bill over a 6-year period to assist people who grow corn. This is independent of the ethanol issue. That is $4.3 billion a year. Maybe that is legitimate. The farm program has some serious problems, but maybe that $4.3 billion was legitimate.

It turns out that is just the beginning, because this bill doubles the mandate for the minimum use of ethanol to 5 billion per year, costing the American taxpayer, because ethanol is not an efficient way to produce energy, an extra $6 billion. That means that $6 billion comes from taxpayers across the country in the form of higher prices to pay for an ethanol product which was already subsidized under the farm bill to the tune of $26 billion. Then on top of that, we have to pay to create two new research programs in this bill for ethanol.

One would think, after we had put $26 billion in the farm bill and $6 billion out of the taxpayers' pockets through the direct subsidy of the gasoline, they would have at least had the courtesy to pay for their own research. That is what most market-oriented products do; they go out and they research and determine whether they can produce the product. And they do not charge that research to the Federal Government. They charge it to their end product users, which is us again and we have to pay for it. But, no, that is not the case. We have to pay $12 million in this bill to create two new research initiatives.

Then, on top of the $5.9 billion in subsidies, and the $26 billion in farm subsidies, we also have to give $750 million to the ethanol producers for the cost of building their production facilities.

This is the most incredible program. First, we underwrite the raw material with tax dollars, probably to a point where we actually see the net income of the people who are actually producing the raw materials. That otherwise would be described as a national socialist approach to an economy, certainly not a market economy. Then we have to get people to pay to subsidize the purchase of the product to the tune of $6 billion, and then we have to pay $750 million to build the facilities to produce the product. The list just goes on and on.

On top of all of this, there is another $2 billion of tax credit which goes to the producers of this product in this bill. They were not happy with the fact that the small producers were going to get this tax credit so they had to expand it, so they picked up a whole group of new producers which are much bigger people in the way of income. They essentially doubled the small producer language in this bill. So we now have fairly significant people getting this huge credit. On top of the farm subsidy, on top of the subsidy for purchasing the gas, on top of the subsidy for building the production facilities, on top of the subsidy for researching the production facilities, we have a tax credit.

It is truly an amazing act of largess on the part of the American taxpayer. We all feel very good about this, I am sure. We have been able to pursue a policy in this bill that is essentially spending these types of dollars on our friends who produce this product and manufacture this product. The problem is that by doing this type of a commitment to this product and the producers of the product and the manufacturers of the product, we have totally perverted the marketplace.

We have essentially picked a winner, ethanol, and we have said that winner is going to get so heavily subsidized, and then require that the product be used, plus used in a way that is extremely detrimental to an area such as New England because in New England ethanol cannot be shipped in. It does not transport through pipelines because it is too corrosive in the pipelines. It does not transport by truck or train because it is too explosive. So it has to be put on a ship in the gulf and taken around the Gulf of Mexico and brought up the coast into the ports in the Northeast. So on top of all of the other subsidy that is in this product, we pay a much higher price for this product which we are forced to buy under this bill. It is truly not energy policy. It is simply an initiative to take care of an interest group that may be very legitimate and they are very nice people, and they certainly have good representatives in the Senate and in the Congress generally, but they cannot defend this product as being a competitive product in the arena of what we should be looking at for various options for fuel with this type of subsidy level. There are no market forces at all involved in this product. It is totally a subsidized event, subsidized by all the taxpayers in the United States for the benefit of the few who produce the product. Truly, it is a classic example of how not to do an Energy bill because it totally takes the market out of the exercise.

Then you get into the special interest projects in this bill. We have heard a little discussion of those. We have these green bond proposals. I think the Senator from Arizona pointed out that one of them would build a Hooters restaurant somewhere in Louisiana. That is paid for in this bill with taxpayers' money. You have $1 billion for coastal impact, almost all of which flows to Louisiana. That is basically a special interest initiative. You have a hydrogen research project for a Freedom Car, which is $2.1 billion. The President asked for $1.2 billion, but the lobbyists and somebody decided that just wasn't enough to take care of this interest group.

That sort of reflects this whole bill. The President asked for $8 billion in tax credits, a reasonable number. It was within the budget. I want to come

back to that. Instead, we ended up with a $25 billion tax credit bill, three times the price the President asked, and we don't end up with a better energy policy. We didn't get three times better energy policy than what the President proposed because those tax credits are all being used basically to artificially manage the marketplace and to create events within the marketplace which were not able to stand on their own, and as soon as the tax credit goes away, you will not have that production capability because those products are not viable and they are not competitive for the most part.

In a speech I earlier gave on this bill, I pointed out I went through this once before. We all went through this in the 1980s. At the end of the oil crisis and an embargo in the 1970s, we tried subsidizing different forms of energy at extremely high levels to see if we could not bring them on line and make them competitive commercially. We did shale oil and solar and wind and geothermal. We even did something, I forget the name of it, where we put a ship out in the ocean and ran a pipe in the water and the pipe got cold and we piped it back around. There was some technical name for that. We were building ships to do that.

None of these technologies, except maybe solar and wind, survived, and solar and wind survived in a much different framework than the direction the initial tax incentives pushed them. That is because they were not competitive because, even with those subsidies, they could not compete in the marketplace with the products that were out there beside them.

So, once again, we are seeing that in this bill. It is not energy policy. It is picking winners and losers for the purpose of gaining economic advantage for one sector of the economy over another, one group of people over another, one manufacturing group over another. We have the $1.1 billion proposal to construct an advanced reactor hydrogen cogeneration project in Idaho—$500 million is for the construction, and then we pay $635 million, or as much as is necessary, in order to operate the plant. It is bad enough that we are going to pay to build the plant. But on the face of it, if you are going to have to spend $635 million to operate the plant, you have to conclude the plant isn't too viable as an exercise.

We went through this all, by the way. Idaho had another one of these projects which I suspect is interrelated to this, although I don't know it, which didn't fly because it was too heavily subsidized.

The window is open at the bank of the American taxpayer and their checkbook, with item after item of fairly questionable attempts to try to pick winners and losers in the nuclear industry and to do some things which are of questionable value. I could go through the list, but the list has become fairly public and it probably isn't necessary to review it.

There are a couple of other specific ones. It has been reported that the bill for some reason effectively mandates permanent use of the controversial Cross Sound Cable between Connecticut and Long Island. You tell me what that has to do with energy policy. That is an issue between Connecticut and Rhode Island, and Connecticut is a little upset that we are suddenly stepping into their jurisdiction and making that decision for them.

The Energy bill would build a project on the Iron Range, a $1 billion plus Excel Energy Powerplant for the Iron Range. Well, it is $800 million of loan guarantees for that project. It is probably a good project, but it is hard to understand why we should have picked that project, to put that level of tax dollars into this bill.

The list goes on and on, regrettably, to the point of excess in the area of picking winners and losers, and doing it in a way which has no comprehensible relationship to what one might consider to be producing an energy policy that had a rationale behind it, versus an exercise in simply going into a room and listening to the people who are whispering in your ear on the day when you are writing the bill.

That is a big problem, the fact that the bill is not structured very well as an energy policy bill and doesn't address in a thoughtful way or a comprehensive way consumption of renewables or production.

There are some production initiatives in this bill which do make sense. I think the Alaska pipeline initiative would probably be very good for this country. I wish they had included ANWR.

But overall this bill is just a hodgepodge, and it is excessive. The fact is that it exceeds the President's request by almost three times, which brings me to the next point. This bill is in violation of at least four budget points of order. That is how excessive it is. The bill violates a spending point of order, it violates a tax point of order, it violates a pay-go point of order, to say nothing of the fact that it violates rule XXVIII.

Why? Because it is totally out of touch with our own budget as a Federal Government. We put in place a Federal budget. We put in place a plan for how much we could spend in developing an energy policy, and then we ignore it in this bill. There is no fiscal responsibility at all reflected in this bill but just the opposite in the way it spends money and in the way it treats the budget which we have passed as a Congress. It is hard for me to understand how the administration could endorse a bill which exceeds their level of spending and tax policy by such a significant number.

We have heard numerous complaints about Congress overspending in a variety of areas. This bill just drives through that barrier as if it weren't even there and proceeds on down the road.

The bill has a lot of problems. It has the problem that it is an attack on a region, New England specifically, in the MTBE language. It has the problem that it is not comprehensive in its approach, or at least coordinated in its approach. It is a hodgepodge of various interest initiatives, some of which may score well, some of which may not, but there is certainly no coherence with them.

It is filled with initiatives which are clearly counterproductive to using a marketplace approach, which I think should be the approach we as Republicans would want to use, where we test the product and determine whether or not it can compete in the market, and then we give it support to draw it into the market. But we don't say you don't have to worry at all about the market, as we do in this bill, with a number of different initiatives and production capabilities.

It is expensive. It exceeds the budget by a significant number.

It is hard to defend a bill like this, it seems to me. So that is why I hope when we get around to the issue of cloture, or even the issue of points of order, people will take a very serious look at the failures of this bill on those various accounts.

Madam President, I yield the floor and make a point of order a quorum is not present.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. FEINGOLD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FEINGOLD. Madam President, I rise today to share my concerns about this Energy bill. An Energy bill is a serious matter. I strongly believe the country needs to achieve a balanced national energy policy.

I did not make my decision to oppose this bill lightly, but unfortunately this bill is even worse than the Senate version. I cannot support it.

Although my remarks will be very brief, my reservations about this bill run deep.

I oppose this bill for several reasons. For one thing, the price tag of this bill troubles me. According to the Congressional Budget Office, this bill will cost the taxpayers $31 billion and is not offset anywhere else in the budget. Our national deficit has ballooned over the past several years, so it is even more imperative that we be fiscally responsible with taxpayers dollars.

In addition to the bill's fiscal implications, I am deeply concerned that the

bill repeals the Public Utility Holding Company Act. This critical act protects consumers against abuses in the utility industry. Repeal of PUHCA would leave rate-payers vulnerable and spur further consolidation in an industry that has already seen a number of mergers. Two large holding companies have been created in Wisconsin alone in recent years. Furthermore, the bill does not protect consumers from Enron-style electricity trading practices and market manipulation. The Senate recently went on record in support of an amendment by Senator CANTWELL to bar such abusive practices and I am disappointed that the bill fails to include similar protections. I also doubt that the bill will prevent blackouts like that we experienced last August—this is one of the country's most pressing energy problems, yet the bill does little to address it.

In the area of boutique fuels, the bill also falls badly short. Everyone in my state of Wisconsin is familiar with price spikes during the shift from the spring to winter fuel supply. Wisconsin has pushed for national standards for federally mandated reformulated gasoline blends, or RFGs, to try to broaden the supply and reduce price hikes during RFG shortages. The current bill will just authorize a study about the problem, not solve it. We had a genuine bipartisan effort to try to do this. I cannot understand for the life of me why this was not included in the conference report.

Also, the bill has serious and unwelcome environmental impacts. For example, the bill undercuts the Clean Air Act by postponing ozone attainment standards across the country. This issue was never considered in the House or Senate bill, but it was inserted in the conference report. This rewrite of the Clean Air Act is not fair to cities like Milwaukee that have devoted significant resources to reducing ozone and cleaning up their air. And, as asthma rates across the country increase, this provision could severely undercut efforts to safeguard the air quality of our citizens.

In addition to undermining air quality protection, the bill allows for siting of transmission lines in national parks, grants exemptions from the Clean Water Act and Safe Drinking Water Act for oil and gas companies, and pays oil and gas companies for their costs of compliance with the National Environmental Policy Act. I am also concerned that the liability exemption for MTBE is retroactive to September 5, 2003, which will nullify about 100 ongoing lawsuits. MTBE is found in all 50 States, and high levels are affecting drinking water systems all over the Midwest, including 5,567 wells in 29 communities in Wisconsin, even though the state only used MTBE gasoline for the first few weeks of the phase I program that began in January 1995. As a result of this bill, taxpayers are going to have to foot the $29 billion bill for the national MTBE cleanup.

This bill fails to reduce our reliance on fossil fuels. The Senate energy bill contained a requirement that power companies provide at least 10 percent of their power from renewable energy sources like wind, water, and solar power. The technical term is a renewable portfolio standard. The current bill doesn't contain any renewable portfolio. standard. There's no doubt that we can and should do better on renewable energy to reduce our dependence on foreign fossil fuels.

Although, I support many of the renewable fuel provisions in the bill regarding ethanol, I am troubled by the fact that the bill also depletes vital highway funds for States by siphoning money from the volumetric ethanol excise tax credit.

The content of the bill is problematic, but so is the process of how it was written. My Democratic colleagues who served on the conference had only 48 hours to review the 1,700-page report before the Monday conference meeting. They were virtually shut out of the negotiation process. I regret that the manner in which the current bill was drafted—in secret, closed meetings, without adequate time to review it. This is no way to come up with a balanced national energy policy.

For these reasons, I oppose this bill and I will oppose cloture. I appreciate the need to develop a new energy strategy for this country. I disagree strongly, however, with the measures taken in this bill. This is a bad bill, it's bad for Wisconsin, and it's bad for the Nation's taxpayers.

I thank my colleagues from Oregon and my colleague from New Jersey for their courtesy in letting me give my remarks.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

UNANIMOUS CONSENT REQUEST

Mr. WYDEN. Madam President, on behalf of myself, Chairman GRASSLEY, Chairman LOTT, and Senator BYRD, I ask unanimous consent the Rules Committee be discharged from consideration of S. Res. 216; that the Senate proceed to its immediate consideration; the resolution be agreed to, and the motion to reconsider be laid upon the table, without any intervening action or debate.

Mr. BURNS. Madam President, reserving the right to object, and I will object, this is mistimed to be considering this rule change on this piece of legislation. On behalf of some Senators on this side of the aisle I will have to object to the Senator's request.

The PRESIDING OFFICER. The objection is heard.

Mr. WYDEN. Has the Senator objected? I was under the impression you reserved the right to object.

Mr. BURNS. I reserved the right to object, and I did object.

Mr. WYDEN. Madam President, in light of the objection, on behalf of myself, Chairman GRASSLEY, Chairman LOTT, and Senator BYRD, I ask unanimous consent that no later than March 1 of 2004 the Rules Committee be discharged from further consideration of S. Res. 216, if not reported, and that the Senate proceed to the consideration of S. Res. 216 at a time determined by the majority leader following consultation with the Democratic leader.

Mr. BURNS. I object.

The PRESIDING OFFICER. The objection is heard.

MORNING BUSINESS

Mr. WYDEN. Madam President, I ask unanimous consent there now be a period of up to 20 minutes of morning business under my control to discuss S. Res. 216.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENDING SECRET HOLDS

Mr. WYDEN. Madam President, my good friend from Montana and I have worked together on so many issues. He has objected to this bipartisan resolution which would give the Senate a chance to end one of the most pernicious practices in Washington, DC, and that is the practice of secret holds.

Walk down Main Street anywhere in the United States, and I bet you would not find one out of a million Americans who know what a secret hold is. The hold does not appear anywhere in the dictionary. It is not even in the Senate rules. Yet it is one of the most powerful weapons that any U.S. Senator has. It is, of course, a senatorial courtesy whereby one Senator can block action on a bill or nomination by telling the respective Democrat or Republican leader that he or she would object. The objection does not have to be written down, and it does not have to be made public.

It is a little bit like the seventh inning stretch in baseball. There is no official rule or regulation that talks about it, but it has been observed for so long that it has become a tradition.

Now, the capacity to use this hold, which is in secret—there is no transparency, no accountability—the prospect of using these secret holds is notorious and has given birth to several intriguing offspring: The hostage hold, the rolling hold, and the May West hold. Suffice it to say, at this time of the year secret holds are more common than acorns around an oak tree.

Senator GRASSLEY and I have been working on this for almost 7 years. I am extremely proud that the chairman of the Rules Committee, Senator LOTT, has joined us on this matter. Senator

BYRD is a cosponsor. There is no one in this body who has a better understanding of the rules than Senator BYRD, and Senator BYRD has made it clear this practice is out of hand. It is out of hand because the rules are designed to expedite the business of the Senate and not hold it up.

What we heard earlier in the objection to the effort to end secret holds is emblematic of what has happened. The objection was based on the idea that now was not a good time for the Senate to address this. It is never a good time to address it if you are in favor of doing business behind closed doors. If you are in favor of doing the public's business without accountability, it is never a good time. If you are in favor of doing business in secret, of course, we are never going to bring it up in the Senate.

The minority leader, Senator DASCHLE, has been supportive of this effort from the very beginning. From the very first day I went to him to discuss this, he said: You are right. The hold is an important power for a member of the Senate, but it ought to be exercised with some accountability.

So there was no objection from this side of the aisle. Unfortunately, we had an objection from the other side. I think it is unfortunate because I have sought throughout—throughout—to make this a bipartisan effort.

Chairman GRASSLEY and Chairman LOTT deserve an extraordinary amount of credit for the effort to work with me and with others on this issue. The fact is, during this time of the session, one Member of the Senate can spend days asking all 99 other Senators whether they have a secret hold, only to find that Senator does not even know about the secret hold because it was generated by staff.

The Senator who can successfully track down and lift the last secret hold almost feels around here as if they have won the national title.

Every Senator has a favorite example of torturous search for the sponsor of a secret hold. My favorite was during the Rules Committee hearing on holds, Senator DODD—by the way, who, is very supportive, like Chairman LOTT, of this proposal—we heard about the chairman trying to call Senators in airports around the country, trying to find out who had a hold on a bill. Senator DODD was concerned about this when he was faced with his election reform bill.

I went through the very same exercise on the spam bill where I had to literally go from desk to desk in the Senate to find out who was holding up a measure that everybody was for. Everybody said they were against spam but there were holds, and we had to try to figure out where they were.

The same thing happened on the Internet tax bill. At one time there were seven holds on the Internet tax bill. When I tried to find out which Senators had the holds, I was told that this information would not be shared with me.

Think about the consequences of not dealing with that issue. I say to my colleagues, we may have a virtual ''Grinch'' visiting the consumers of this country because the Senate has not dealt with the Internet tax issue. Come the holiday season, if some States and localities choose to do it, they can go out and tax e-mail, they can go out and tax Internet services that are delivered through wireless devices or DSL because the Senate has not updated the law. I believe it has not updated the law because there was not the opportunity to have a real debate, and we were held up because there were secret holds.

I am very pleased that the distinguished chairman of the Rules Committee has come to the Chamber to join me in this effort. Perhaps more than any other Member of this body, he understands the implications of this because of his service as chairman of the Rules Committee as well as having served as the distinguished majority leader of this body. He has held hearings on this issue. He reached out to Senator BYRD and Senator GRASSLEY.

We have been working on this issue for years and years. At this time of the session, the secret hold is all powerful. It is one of the most powerful weapons that a Member of Congress has. We do not seek to have it stripped from the Senate. We do not come together on a bipartisan basis to say, let us outlaw the holds. We come together—Chairman LOTT, Senator GRASSLEY, Senator BYRD, and myself—to say: There ought to be some sunshine.

Our proposal is for sunshine holds, for saying that the powers exercised by a Member of the Senate should be accompanied by some accountability. You ought to be straight with your constituents.

My good friend, the chairman of the committee, is here. I would like, without losing the remainder of our time, to yield to the distinguished chairman of the Rules Committee, who has been so supportive of the effort to end secret holds, so he could make his remarks, knowing he has a very busy schedule.

The PRESIDING OFFICER (Mr. CORNYN). Without objection, it is so ordered. The Senator from Mississippi.

Mr. LOTT. Mr. President, could I inquire about what time remains for Senator WYDEN?

The PRESIDING OFFICER. Twelve minutes twenty seconds are remaining.

Mr. LOTT. Thank you very much, Mr. President.

I believe this is an issue whose time has come in the Senate. It is an issue I am very familiar with because I have dealt with holds, both as a Senator as a leader. I have placed holds, and probably over the years some of them have been anonymous, not so much out of intent, just that is the way it was.

I remember talking to Senator WYDEN years ago, and Senator GRASSLEY, about what we could do to have a better understanding of what a hold is and how it works and what could we do to stop the anonymous holds. Senator DASCHLE and I even got together on a letter and tried to clarify how holds should be handled, and what they mean, and how Members should deal with them, by telling the committee chairman or the sponsor of legislation that they had a hold. But there was no enforcement mechanism, so it did not happen.

At this time of year, holds are particularly a problem for the leadership. Republican or Democrat, this is not a partisan issue because when they pop up right at the end of the session, it could be unrelated to the nominee, unrelated to the bill. They can be a part of a rolling hold. But with all the warts of the hold, it is something Senators prize, maybe even treasure. But I do not see how anybody can defend them being anonymous.

If there is a secret hold on a bill or a nominee, and it is just at this time of year, it is almost impossible for the leadership to deal with it. The leader, he tries to track down who has the hold, and sometimes the staff will not even tell you who has the hold because they have a problem.

I can remember tracking down Senators in their hideouts, finding Senators in airports, saying: Please, this is the Deputy Secretary of State or this is a Commissioner who needs to be confirmed.

It is not good for the institution. I think someday we should even look at the whole practice of holds. You have an institution where one Senator—one Senator alone—particularly at the end of a session, can defeat a nominee or a bill anonymously. There is something wrong with that. You are putting your constituency or the constituencies of others and 99 Senators at the mercy of one.

There is this feeling here in the institution that we cannot touch the traditions or the precedents or the rules of the Senate. They are sacrosanct. They are holy. How do you think they got there? Changes were made. Improvements were made. Or problems were created.

So that is why I do commend Senator WYDEN and Senator GRASSLEY for being doggedly persistent on this issue. I do not wish to be a part of a process or an effort that causes difficulty for the leaders. They have enough problems now. They are concerned with the Energy bill, the omnibus bill, the Medicare prescription drug bill, the FAA bill—you name it. So I do not want to contribute to their problems.

But I do think something needs to be done here. I think we need to address

the overall issue of holds, but at the very minimum we should have some way to deal with secret holds.

When we sent the letter, as I suggested earlier, we required Members to notify the sponsor of the legislation, the committee of jurisdiction, and the leaders of their hold. It had a little effect for a little while. Senators sort of said: Oh, yeah. OK.

By the way, what is a hold? A hold is a notice by the Senator—to the staff, usually—that before a nominee or bill is brought up, they want to be notified so they can debate it or so they can reserve all rights to amendments. That is all it really is.

Now, if it is anonymous, that makes it even more damaging. But it is a problem for the leader because you try to get the work completed, and the threat of a filibuster or endless amendments basically kills it. So since there was no enforcement mechanism, it just did not accomplish what we wanted it to accomplish.

This resolution would place a greater responsibility on Senators to make their holds public. It creates a standing order that would stay in effect until the end of this Congress. This is something that Senator BYRD had suggested, that maybe was the solution that would do the job. We can see how it works. Let's make it a standing order, not change the rules. Let's make it apply to the rest of this Congress, which would be next year. If it works, great, we might want to build on it. If it does not, it is dead.

The order requires that the majority and the minority leaders can only recognize a hold that is provided in writing. I put a hold on a nominee today. I said: Please put a hold on this nominee. Letter will follow. So I put it in writing and it is not a secret thing.

Moreover, for the hold to be honored, the Senator objecting would have to publish his objection in the CONGRESSIONAL RECORD three days after the notice is provided to the leader. That is critical: notice. That is all really we are looking for here: Understand what a hold is; put it in writing; and make it well known.

A hold should be left to the wrestling ring, not to the Senate, and it certainly should not be in secret.

I hope the leadership, Senator FRIST and Senator DASCHLE, will work with Senator WYDEN and Senator GRASSLEY to find a solution that will allow us to do this. The light of day always has a purifying effect. This is getting to be very moldy. We need to deal with it. Again, I emphasize, I am for this because I think it would be good for the institution. I am for it because I think it is the right thing to do. I am not for it because I am trying to cause problems with the leaders. Heaven forbid, I don't want to do that. Actually, we are trying to help them deal with a problem. They are hesitant to do it because I know Senators are going to slip up next to them and say: Wait a minute, you may not want to change anything here. This is the way it has been done.

I challenge the Senators to stand up here and say they should not at least make it public. We can't have cowardice on something that is affecting people's lives and on legislation that affects our country.

I guess I am getting a little carried away. I agree with the Senator. I am going to continue to work to try to find a way to be helpful in getting this issue addressed because I think it is time we do it.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. WYDEN. Mr. President, how much time remains under my control?

The PRESIDING OFFICER. Twelve minutes 20 seconds remain.

Mr. WYDEN. I thank the Chair.

Mr. KYL. Will the Senator yield for a question?

Mr. WYDEN. I am happy to yield without losing my time.

Mr. KYL. Mr. President, I ask unanimous consent that following the Senator from Oregon, at the conclusion of his remarks, the order of speaking be Senator SUNUNU for 15 minutes, Senator LAUTENBERG for 15 minutes, Senator MURKOWSKI for 15 minutes, Senator CANTWELL for 30 minutes, and Senator KYL for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon.

Mr. WYDEN. Mr. President, before he leaves the floor, I thank the distinguished chairman of the Rules Committee for his eloquent statement. He has been so supportive of this effort. Essentially what he and I and Senator GRASSLEY have been talking about is the quaint notion that the public's business ought to be done in public. This is not a complicated idea.

As I have mentioned earlier, I am sure the vast majority of Americans have no idea what a secret hold is. It is not written down anywhere. This is something you wouldn't find 1 of 1,000 people having any idea about. But this is, in fact, one of the most powerful weapons, one of the most significant tools a Member of this body could possibly have. It is utilized without any accountability whatsoever.

The distinguished chairman of the Rules Committee pointed out in hearings, and we heard it echoed by Senator DODD, the bizarre kind of process of trying to track down Senators who are thousands of miles away from Capitol Hill and still claiming to have an objection when, in a lot of instances, they may not even know about it; their staff will have objected to it.

So what we have sought to do in this effort is to not limit the powers of any Member of the Senate but simply to say that power ought to be accompanied by responsibility. Yes, there should be rights. There ought to be rights of every Member of the Senate to stand up and be heard on matters important to their constituents and to this country. But there also ought to be responsibilities.

Chairman LOTT has addressed this issue very eloquently by saying one of our most important responsibilities is to let the public see what we are up to. Yes, sunlight is the best disinfectant, but it is especially important, as Chairman LOTT has noted, at the end of a session.

If someone exercises a hold in the beginning of a session, there is an opportunity, as the distinguished chairman of the committee has noted, for the leaders to come together with the chairs and work out an effort to resolve a matter in a process that is fair to all sides.

When you are down to the last few days of a session and you are talking about a measure that may involve billions of dollars, the well-being of millions of our citizens, someone can exercise the power to hold up the public's business without any accountability whatsoever. What happens is then the leaders and the chairs traipse all over here, practically going almost the equivalent of door to door, desk to desk on the Senate floor. It got to a point, when I was trying to deal with one particularly exasperating hold, where a Senator came up to me and apologized because he was told there was a hold about which I was concerned. He said: I knew nothing about it. It was put on by a staff person. I asked for its removal.

There are a variety of technical issues on which Chairman LOTT and Chairman GRASSLEY and Senator BYRD and I have worked. There is a difference between a consult and a hold. A consult, in effect, is just a request to be informed when a measure is going to be brought up. A hold is something different. A hold is when you want to shut down the effort to go forward and examine an important issue altogether. It is all powerful in the last few days of a session, as the distinguished chairman of the Rules Committee, Senator LOTT, has noted.

There is something very wrong with the process when, in effect, you have to traipse all over the Senate trying to figure out whether or not your measure is going to see the light of day.

We have had an objection to our bipartisan effort today, but I think I speak for all of the sponsors when I say we are going to be back at it. Chairman LOTT has initiated a very important process in the Rules Committee to examine some of the antiquated practices of the Senate. The holds is one that we see working great injury in the last days of a session. But under the leadership of Chairman LOTT, we are going to be looking at other practices in the Rules Committee. I think that is long

overdue. I have great confidence that the chairs, Chairman LOTT, Chairman GRASSLEY, Senator BYRD, who knows more about the rules of the Senate than I could ever dream of knowing, are going to be able to work with us on a bipartisan basis to address this responsibly.

We have done that. We have asked only that this be done for the rest of this session. I personally do not believe Western civilization is going to come to an end because a Member of the Senate has to be clear about whether or not they are holding up the public's business. But to make it absolutely clear what would transpire, we have in effect a test period, as Chairman LOTT has described it, to examine the effect of our sunshine holds, a process that would end some of the stealth and secrecy that surround this issue.

I ask unanimous consent to add Senator DAYTON as a cosponsor of S. Res. 216.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WYDEN. I see Senator LOTT and other colleagues have other business to attend to. I will wrap up only by quoting the foremost authority on Senate rules who served as majority leader of the 95th, 96th and 100th Congresses; that is, our friend and colleague, Senator ROBERT C. BYRD. In chapter 28, ''Reflections of a Party Leader,'' volume 2 of his publication in the Senate, Senator BYRD wrote:

> To me, the Senate's rules were to be used when necessary to advance and to expedite the Senate's business.

Giving the sunshine hold a place in the Senate's rules, creating sunshine holds so as to ensure that there is new openness and new accountability in the way the Senate does its business, seems to me to be an ideal way for the Senate to honor those eloquent words of Senator BYRD.

We have not been successful today, despite the best effort of Chairman LOTT, Senator GRASSLEY, and others. But we will be back. This practice is continuing to increase. Even when I came to the Senate, I found it used frequently but not to the extent it is being used today. It is time to do the public's business in public. We will stay at this effort to accomplish just that.

I yield the floor.

Mr. GRASSLEY. Mr. President, I rise in support of the resolution to end secret holds in the Senate. Senator WYDEN and I have worked long and hard on this issue and it is time for the Senate to act decisively to reject the practice of placing anonymous holds.

A hold, which allows a single Senator to prevent a bill or nomination from coming to the floor, is a very powerful tool. Holds are a function of the rules and traditions of the Senate and they can be used for legitimate purposes. However, I believe in the principle of open government. Lack of transparency in the public policy process leads to cynicism and distrust of public officials. I would maintain that the use of secret holds damages public confidence in the institution of the Senate.

Our resolution would establish a standing order for the remainder of this Congress that holds must be disclosed publicly. For my colleagues who might be apprehensive of this change in doing business, I would point out that this measure would only be in effect for the current Congress and would not formally amend the Senate rules. Nevertheless, a standing order has essentially the same force and effect in practice as a Senate rule. I have no doubt that, once instituted, this reform will be found to be sound and no reason will be found why it shouldn't be renewed in subsequent Congresses.

For several years now, I have made it my practice to publicly disclose any hold I place in the CONGRESSIONAL RECORD, along with a short explanation. It's quick, easy and painless, I assure my colleagues. Our proposed standing order would provide for a simple form to fill out, like adding a cosponsor to a bill. The hold will then be published in the CONGRESSIONAL RECORD and the Senate calendar. It is as simple as that.

I am very pleased to have the support of Chairman LOTT and Senator BYRD on this initiative to require public disclosure of holds. Earlier this year, Chairman LOTT held a hearing in the Rules Committee on the Grassley-Wyden resolution to require disclosure of holds. Since that time, my staff has worked together with staff members for Senators WYDEN, LOTT, and BYRD to come up with what I think is a very well thought out proposal to require public disclosure of holds on legislation or nominations in the Senate. I think it says a lot that this proposal was written with the help and support of Senator LOTT and Senator BYRD. As the chairman of the Rules Committee and a former majority leader, Senator LOTT brings valuable perspective and experience. It is also a great honor to be able to work on this issue with Senator BYRD, who is also a former majority leader and an expert on Senate rules and procedure.

I am disappointed that we cannot move forward with this resolution now, but I would urge my colleagues to join the growing coalition of Senators who are working to shed some sunlight on some of the most shadowy parts of this body so that we can ensure open and honest debate on the issues before the American people. I believe that the more we talk about secret holds, the more the consensus grows that this is an issue that must ultimately be addressed by the full Senate. You can be assured that we will keep pushing forward until that happens.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 15 minutes.

ENERGY POLICY ACT OF 2003—CONFERENCE REPORT—Continued

Mr. SUNUNU. Mr. President, I rise to add my voice to the very spirited debate we have had about the Energy bill. A number of Members have come to the floor to talk about specific provisions—the concern for the liability waiver for MTBE, in particular.

I want to step back and talk about the bigger picture—about the financial health of our country and the impact that this Energy bill, given its enormous size, will have on the long-term health of our budget, as well as our economy.

During the budget debates, we hear a great deal about fiscal responsibility. People love to talk about fiscal responsibility in the abstract. When you are looking out 10 years and are talking about surpluses or deficits, or more broadly about revenues or spending, it is all about fiscal responsibility. But they don't like to talk about it as much when we have a specific piece of legislation on the Senate floor, as we have now, that will draw from the Federal Treasury and start spending that money in a way that I don't think is very well thought out. I certainly don't think it will have a very positive effect on our economy.

In particular, if we look at the Energy bill and its scope and size, it not only breaks the budget that was agreed to just 6 months ago, it not only violates the budget once or twice or three times, it is in violation of the Budget Act in four different ways. In fact, in one area in particular, on spending, it violates the Budget Act three different times. A point of order, as has been indicated by the budget chairman himself, lies against this bill. It violates the budget caps, busts the budget by over $800 million next year alone, by more than $3.4 billion over the next 5 years, and by $4.3 billion over a 10-year period. It breaks the budget cap, breaks the budget agreement, and violates the Budget Act. That is a lot of money—800 million dollars, $3.4 billion, and $4.3 billion over the next 10 years.

I think at a certain point we have to draw the line. We have to say energy is important to the country, markets are important to the country, competitiveness is important to the country, but we can achieve these things without violating the budget agreement that was just put into place several months ago.

The bill includes new mandatory spending, which is effectively on automatic pilot, where once the bill is signed into law, the spending will take place automatically, without appropriations and without any new legislation passed. So it is $3.7 billion in mandatory spending over the next 5 years,

$5.4 billion in new mandatory spending over the next 10 years. In addition to that, we have all the authorized spending in the bill—over $70 billion in spending is authorized over the next 10 years.

Looking at the authorization language, the different programs—dozens and dozens of different programs—total over $70 billion. These programs are effectively picking and choosing among different ideas and innovations and areas of the energy industry, picking winners and losers among the different competing forces. That is where we need to be very careful about the impact a bill like this would have. Why should any legislator, or bureaucrat, for that matter, be trying to pick the winning or the losing energy technology or innovation 5 or 10 years out into the future? We are not experts in this area. We are not scientists. We don't dedicate our lives to understanding the nuances of new energy technology. We certainly should not be writing legislation that picks those winners and losers in the marketplace.

If you read through—just to touch on a few to get a sense of what I am talking about—$250 million is in the bill for photovoltaic energy commercialization, the use of photovoltaic energy in public buildings. Photovoltaics is an interesting technology, perhaps a promising one. But to spend $250 million to try to commercialize this in public buildings suggests that we know, as Senators, that this is the right energy source to use in public buildings for the foreseeable future.

Why not let the market compete? Why not let investors step forward to build or renovate or improve public buildings, to use energy more efficiently in public buildings, pick the best contractor, the best product, the product which delivers the best value for the public? Why do we have to spend $250 million biasing the marketplace? There is $125 million for a coal technology loan. It turns out this particular one will actually go to convert a clean coal technology plant into a traditional coal-fired generation plant.

Elsewhere in the bill, we have a couple of billion dollars to subsidize the clean coal technology industry. So this is a case where maybe we are just not sure what the winner is going to be, and we are trying to hedge our bets. There is nearly $100 million in the bill for the reduction of enginizing heavy-duty vehicles; reduce the amount of heavy duty vehicles' idle—I suppose in traffic, or sitting at the truck stop, or wherever else it might be. Energy efficiency in heavy-duty trucks is a great idea. Somebody tells me that those who build, manufacture, and own and operate heavy-duty trucks have a financial incentive not to waste the diesel fuel they use to drive the trucks all over the country. I don't think they need a subsidy of $100 million for us to do the job that they ought to be doing to make themselves more competitive and ultimately earn more money in the marketplace.

Engine testing program, $25 million. Why should we be subsidizing the testing of commercial engines that companies or industries use to operate and earn a good living, as they should?

Here is another very interesting one. The next generation of lighting initiative; $250 million for the next generation of lighting. We have next generation Internet. I am still not sure why we put a billion dollars or $2 billion into that. The Internet is probably the one area of our economy that has attracted more capital faster than any other idea in our history. Why the Federal Government should be subsidizing that, I don't know. Why we should be subsidizing new lighting technologies, I certainly don't know. There are wonderful companies that make great lighting products, such as halogen lights, neon lights. I could name a few companies, but I am sure I will leave some out.

When we go to the Home Depot to buy lighting products or to the local hardware store or COSTCO and buy lighting products, we know who the competitors are. Why does the Federal Government need to spend $250 million to help develop better or newer lighting?

Somebody might say we are working on more efficient lighting. If you build a better light bulb that is less expensive to use and/or less expensive to sell, I bet customers will recognize that value. It is a mature industry, a well-understood industry. You don't need a Ph.D. to understand why you would use a light bulb, how you use one, how much it costs, and what the value is. That is the classic example of an industry that certainly doesn't need a taxpayer subsidy.

Let's recognize that all of this spending—$250 million for lighting, $125 million for a coal loan, $2 billion for MTBE producers—is not money just being printed out in a back room somewhere. These are dollars that we are collecting from working families, men and women who work very hard. We collect their Federal taxes and we have an obligation to be fiscally responsible and to do a thoughtful job in the way this money is spent in Washington.

We have new mandatory spending, we have authorized spending, and then we get to the tax subsidies, some $25 billion. The President recommended only $8 billion. The Senate recommended $18 billion. It comes out of conference with the House and Senate at nearly $25 billion in tax subsidies, loan guarantees for diesel fuel plants, loan guarantees for three new coal plants. A loan guarantee to build any of these new plants effectively puts the taxpayer on the hook for all, or a very significant part, of that facility.

Again, I think the coal industry is a terrific industry, and also the oil and gas industry, electricity generation, wind power, hydropower, solar power. What we ought to be working toward, however, is a level playing field where these competing ideas and competing technologies can provide electricity, can provide power, can provide energy so consumers and investors can make good decisions about where to put their money and which one of these competing technologies to buy.

There are certainly some good provisions in this legislation. I think the electricity title takes important steps. I support repeal of the Public Utility Holding Company Act. We have better reliability standards in this legislation for our electric grid. We have regulatory reform which I think is important for building out the electric infrastructure and avoiding future crises, shortages, or blackouts. But we can do all of these things without busting the budget. We can do all of these things without violating the Budget Act. We can do all of these things without coming back with a bill that has three times the tax subsidies the President proposed.

Like so many Energy bills I have seen in my short time working in Congress, this bill is full of some very grandiose pipedreams. One of my favorites is the hydrogen car—$2 billion for the hydrogen car. We are just coming off a $2 billion bender known as the Partnership for the Next Generation Vehicle. Mr. President, $2 billion of taxpayers' money was spent to try to develop an electric car that was going to be a hybrid electric car, a hybrid combustion engine and, at the end of the day, it was a failure—$2 billion later. It had no material impact on the delivery of more energy efficient vehicles into the marketplace.

Someone somewhere suddenly decided: It turns out the car of the future is not an electric car, the car of the future is really a hydrogen car. We must have gotten that whole electric car thing wrong. Forget about that Partnership for the Next Generation Vehicle; it is really the hydrogen car, and we only need $2 billion to do it.

I don't know if hydrogen is going to propel vehicles in the future. It would be terrific if it did. I think the right way to get the answer is to let the marketplace decide, to let competing technologies and ideas in the marketplace decide; put those ideas out, attract capital, attract investment, do the research and development, and, believe me, if somebody develops a cost-competitive electric car, let alone a hydrogen car, they are going to make a lot of money because there is a demand for that in the marketplace.

People are willing to pay for a cheaper vehicle. People are willing to support initiatives that not only fulfill the needs in their daily lives traveling

around but also help keep our environment a little cleaner by reducing emissions.

We have coal gasification, at $1 billion or so—nearly $1 billion for a coal gasification initiative. Twenty years ago, it was all about synthetic oil. That was clearly going to be the energy of the future—the fossil fuel energy at least. I guess we must have gotten that one wrong because we spent $4 billion, $5 billion on that, and it turns out it is really not cost competitive. So we are going to go with coal gasification. Maybe that is what we meant to say or we learned a little bit since then.

Now we can see the future much more clearly, and we are going to start out with a little bit less than $1 billion, but you can be assured that over time it is going to be a lot more than that.

These are pipedreams. These are important visions for scientists or technologists to have, and we want them to put some funding or risk some capital for these ideas. The question isn't whether they are interesting ideas or whether they are even worthy of investment but whether they are worthy of taking Federal money, taxpayer money, and putting that money at risk in a marketplace that should be able to stand on its own, compete on a level playing field, and continue to deliver the innovation and technology of which I think most Americans would and should be very proud.

We can do a lot better than this bill. We can do better than a bill that busts the budget. We can do better than a bill that has a $25 billion grab bag of tax subsidies that distort the marketplace of ideas and the marketplace of capital. We can do better in terms of legislation that should be promoting a very competitive environment and, therefore, a stronger, more robust economy, but instead, in distorting the marketplace, I think we will do great damage to our economy.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SUNUNU. I ask unanimous consent for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SUNUNU. Mr. President, we can do better than this legislation. Frankly, we need to do better than this legislation because if we don't, I am afraid if we adopt this conference report, this will become the standard method of operation, the standard way we approach science, technology, and energy: That we get together in a room in a conference or in a committee, and we sit down as Senators and we try to pick the winners and the losers; that we distribute subsidies in the way of spending or we distribute—in some ways this is even worse—subsidies in the way of added complexity to the Tax Code. Instead of ending up with an economy that is robust, an economy that is the envy of the world, an economy that encourages new ideas and innovation, we end up with some sort of variant of what has already been defeated in the Eastern European countries and in the former Soviet Union—a manipulated government-subsidized enterprise or government-run economy where bureaucrats or elected officials try to pull the strings, but to no avail, degrading the economy, making it less efficient, making it less robust, and not discovering those very entrepreneurs we know are the heart and soul of the prosperity we enjoy.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that following the statement of Senator KYL, Senator GRAHAM of Florida be recognized for 20 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I rise to join many of my colleagues in strongly opposing this Energy bill. The opposition is not reserved to only Democrats; the opposition is for those people who think about the implications of this bill and the serious concerns it raises.

For one thing, it is terribly lopsided. It is out of balance. It is heavily weighted toward the industry because it was written by just a few select individuals with almost no conference input by Democrats.

The bill is an embarrassing example of the public's worst fears about Washington power politics, and those power sources are the oil and gas lobbyists downtown. Though it is called the Energy Policy Act of 2003, this bill promotes the outdated policies of a generation ago. It should be called actually the Energy Policy Act of 1903. The policy here is simple: Drill for oil, drill for natural gas, dig for coal.

While the country needs oil, natural gas, and coal, we also need leaders with a vision to promote clean sources of energy that won't harm the health of our children, our grandchildren, and future generations. It is the 21st century, and we have the technology to do better.

According to the Congressional Research Service, between 1948 and 1998 the Federal Government subsidized the energy industry by well over $100 billion. Unfortunately, less than $1 in $10 was used to promote renewable energy, that which you can find relatively easily and without the pollution that our present energy sources convey to the public.

Now, in this single bill, we are being asked to spend another $50 billion to $100 billion on tax credits and loan guarantees to the oil, gas, and nuclear industries. How will all of those taxpayer dollars be spent? They will be spent on a long list of brazen giveaways to polluting uranium companies, Archer Daniels Midland, to MTBE producers, and for a smattering of goodies and pet projects.

Taking care of special interests has become a hallmark of this Congress. Peter Jennings highlighted it in a perfect example on the evening news the other night. He reported that taxpayers have so far contributed $1.3 billion to subsidize wealthy individuals who buy the biggest gas guzzlers sold in America. As he pointed out, one couple received $17,000 in tax breaks on their new SUV and boast: ''We have decided to take two extra vacations this year with the money we saved.'' But for the energy they used, they pose a whole different kind of issue.

Why is the answer around here always to hand over cash to rich people and successful companies? Can we really justify turning over the hard-earned tax dollars of Americans, who do not earn enough to benefit much from the Bush tax cuts, to companies flush with cash?

Here is an issue that was announced August 1, 2003: ''Chevron Quadruples Profits.'' It goes on to say:

> Oil giant Chevron Texaco increased quarterly profits four times to $1.6 billion.

Their revenues soared to $29 billion in the quarter. Do these companies really sound as if they need Government subsidies to do their job? Not to me.

We have the perfect opportunity to guide the country toward clean, renewable energy. Yet most of the bill's tax credits for efficiency and renewables last only 2 or 3 years. Any business person knows this is not a sufficient time period to encourage significant investments and technology development.

We Americans have always set ourselves apart by our ingenuity and creativity. Today, amid an avalanche of promising scientific discoveries in the field of energy, the majority can see no further than the lobbyists' interests which this bill follows to the letter.

Recently, I read that in Amsterdam, a major European chip manufacturer has discovered a new way to produce solar cells that will generate electricity 20 times cheaper than today's solar panels. ST-Microelectronics, Europe's largest semiconductor maker, says that by the end of next year it expects to have the first stable prototypes ready. If a decade ago we had been serious about promoting renewable energy, that discovery could have been made by an American company, but such breakthroughs are unlikely with the minimal incentives offered in this bill for development of better ways to be less dependent on the energy sources we have now.

It is also disheartening that this bill grants exemption after exemption to the Clean Water Act, the Clean Air Act, and other protective laws. I do not

really understand it. Is boosting the profits of giant companies really more important to the bill's authors than the health of the American people?

Let us talk about just one of the riders slipped in by House Republicans without a vote from either the House or the Senate. This was snuck in during conference. This rider amends the Clean Air Act, gives cities an easy out if they find meeting the new ozone standard is difficult due to transboundary pollution. It requires EPA to grant them an automatic extension. It does not say for how long. It fails to define the conditions that would precipitate such an extension.

The result of this rider, of delaying implementation of the ozone standard for just 1 year, is severe. That rider is estimated to cause 390,000 more asthma attacks, 44,000 of those in my State, 5,000 more hospitalizations, and 570,000 more missed schooldays. That is the result of just one of the many exceptions carved out of our environmental laws by this bill.

Among my nine grandchildren, I have two who are asthmatic. The rate of asthma among juveniles is growing substantially. I lost my sister to an asthma attack. It was obviously a devastating event in our family's history. To those who see kids with asthma get fatigued after participating in sports or otherwise, it is the kind of anguish that drives parents to all kinds of anxieties.

The bill fails the American people on every level. It fails to boost our energy security, it fails to safeguard electricity consumers, and it fails to protect the environment.

It is astounding to look at what this bill does not do. While automobiles account for a whopping 40 percent of our Nation's growing oil addiction, the bill does not address fuel economy at all. The bill comes at the very time when fuel efficiency has arguably never been more important. America's fuel economy is at a 22-year low. Today, the United States spends $200,000 every minute on foreign oil. But the economic costs of weak fuel efficiency requirements go far beyond just the cost of oil. If we include the major oil price shocks of the last 30 years and the resulting economic recessions, the cost goes up at least $7 trillion.

Given these hard facts, one would naturally expect a national energy policy to aggressively pursue decreases in oil. It does not. Just the opposite. It generously promotes increases in oil use while tossing what I would call petty cash toward energy conservation, energy efficiency, and renewable energy.

We never hear a word—and this has happened in Democratic as well as Republican administrations—about sacrifice, conserve, think about what happens when more fuel is ground into toxic emissions. It is terrible that we cannot understand there is a mission attached to saving oil and gasoline use.

It is amazing what this bill fails to do on electric policy. This bill contains only one of three provisions the country must enact to prevent another massive blackout such as the Northeast experienced last August. We are being asked to support a dirty Energy bill in order to get one of the fundamental regulatory reforms to our electric grid system. I say the bad outweighs the good, and I cannot support it.

Around here, it is often said that the perfect is the enemy of the good, but I say the bad far outweighs the good as an alternative.

The administration's energy and environmental policies reflected in this bill are so utterly transparent in their goal of more corporate welfare that the consultant, Frank Luntz, warned the party:

> Watch your language—

And here he is, the fat cat—

> A caricature has taken hold in the public imagination: Republicans seemingly in the pockets of corporate fat cats who rub their hands together and chuckle maniacally as they plot to pollute corporate America for fun and profit.

Unfortunately for many, that is no caricature. From where I am standing, that picture is pretty accurate. If one wants proof, look at this bill. It is filled with little but big breaks for those who need them the least. Yet rather than change their policies, Luntz offers them protecting language. He wrote a memo to Republicans instructing them on how to use the language tested on focus groups to hide their deplorable environmental record.

This Energy bill is a great disappointment. It might have been acceptable at the beginning of the 20th century, but it is indefensible at the beginning of the 21st century.

Mr. President, you know true patriotism is more than waving flags. It means putting the interests of the American people before the powerful special interests, the very thing this Energy bill fails to do. I urge my colleagues to oppose this bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Ms. MURKOWSKI. Mr. President, I rise today to speak also to the Energy conference report. Unlike some of the previous speakers I listened to in the past 2 hours that I have been in the Chamber, I stand in support of the agreement that was reached in conference. It has been pointed out that this is not a perfect bill. I would be the first to chime in and say I agree with that. But in an effort to achieve the perfect, I don't think we should overlook the good in the conference report.

Because of the hard work of Chairman DOMENICI and his staff, working with the others on the conference agreement, and spending many, many hours to reach the consensus we have before us, I think we can truly say this is a good bill and a bill that should be signed into law. There has been a great deal of talk, not just during this legislative session but in years previous: We need to have an energy policy for this country. We need to have the framework for an energy policy.

It seems to me that so often what we do is react to situations, whether it is the blackout we experienced in August, or when the price of gasoline increases to a level where it gets our attention. We only respond when there is something that gets our attention and focuses the Nation on energy.

Quite honestly, most Americans don't pay attention to energy. They don't pay attention to how they get their lights to turn on, or how we keep the temperature cool or warm. I have said many times as I talk about energy, most Americans ascribe to the immaculate conception theory of energy: It just happens. We know that is not the case. It doesn't just happen. It takes innovation. It takes incentives. It takes capital. It takes the desire to do something.

But without the energy we have in this country, we would not have the freedoms or the liberties we take for granted—the ability to do what we want, to go where we want to go. We need to recognize that energy is something that has built our country and made us strong. We need to continue with that sound policy. I believe the conference report we have in front of us is a good first step toward that sound policy.

As I say that in very general terms, I have to start off that this is not my perfect bill. At the top of my list for an energy policy for this country would be the opening of ANWR. We don't see that coming out of the conference report. Congress had the opportunity to include language that would have generated over 1 million jobs for American workers by allowing for oil and gas exploration on just 2,000 acres of Alaska's North Slope.

I know we tried to keep ANWR in the conference report. The chairman was working hard. But we were threatened with that constant threat of a filibuster. You can't put ANWR in the Energy bill or it will be filibustered. It seems a little ironic to be standing here tonight. ANWR is not in the Energy bill yet we are still slowed in the task of getting to a vote on the Energy bill.

The House adopted ANWR and wanted it in the conference report but there were continued objections, primarily from the environmental groups, that have kept us and will keep us this year from moving forward with jobs that truly could have been promised with the opening of ANWR.

I have made the invitation to the Senators here on the floor and I know

my counterpart, Senator STEVENS, has made the effort to invite all Senators to visit ANWR and see what this dispute over opening the Coastal Plain of ANWR to oil and gas exploration is all about. We want you to see Prudhoe Bay. We want you to see the developments in Alpine and the technology we have utilized to provide for the exploration and development of oil up on the North Slope. We want you to see the minimal impact to the environment, and how technology has helped us to advance.

I get a few takers, primarily in the summertime. But I encourage you to come up in the wintertime. This is when we do the production up there. I know that is kind of a chilly invitation to some, but I think it would help to understand what we are dealing with in Alaska, how vast our spaces are, and just how small of an area the Coastal Plain of ANWR, the 1002 area, really is, in comparison.

I agree with those of my colleagues who would argue we cannot drill our way to independence from foreign oil. They are absolutely right. We have to have the incentives for renewable energy sources. We have to have greater technological efficiency. We have to decrease our energy consumption. Those efforts need to be part of this comprehensive energy package. But we must also have increased domestic production. I suggest to you again, if you are going to argue that we need to have energy security, if we want to reduce our reliance on foreign oil, the first place we should be looking is ANWR.

But I am not going to go into any further discussion about ANWR at this time. You have certainly heard the debate before. It will be an issue that we will revisit. We will continue to push for opening ANWR.

I want to take one more second to remind folks that we had an opportunity here for over one million jobs across the Nation, at a time when millions are unemployed in our country. But some Members have declined to accept that offer. Instead, we are talking about extending unemployment benefits.

I suggest to you that the unemployed people in my State, if given a choice, would certainly prefer to have a job than more unemployment benefits.

But when we speak about jobs, I should not be talking exclusively in the negative here because all is not lost. We have an incredible opportunity in Alaska with our natural gas. Several very important provisions are included in this bill that will promote the construction of a natural gas pipeline to transport the vast quantities of natural gas that we have up on our North Slope, to bring it to market in the lower 48, be it down the Alaska Canadian Highway or through LNG tankers to the west coast. We have 35 trillion cubic feet of gas up there now.

You have heard Members in the Chamber talking about the fact that right now that gas is stranded up there. Right now that gas is being reinjected instead of being shipped down here to the lower 48, where we need it. We have provisions in the Energy bill to get that gas where it is needed: We have guaranteed loans, expedited judicial and environmental reviews, and a program to train pipeline workers—again, talking about the jobs aspect. The pipeline, if constructed, could provide over one million jobs, direct and indirect jobs, through the construction of this pipeline alone.

But the key here is, if this pipeline is constructed, there are no guarantees. We have done a great deal in this legislation to encourage the construction of the line.

There is one provision that generated a great deal of attention and focus but is not included. There would have been a production credit to ensure the economic viability and provide a safety net in the event the price of gas drops to very low levels. That is not included in the legislation.

This is a huge project. People need to understand how huge. This is a $20 billion project, 3,500 miles in length, 5 million tons of steel, delivering billions of cubic feet of gas per day to a nation that is starved right now for natural gas. And the situation is just getting worse.

It would be the biggest construction project of its kind in the country. It is something that we can only imagine. When we imagine huge projects like this, every now and again they take a little bit of a boost to get going. What we have done in the Energy bill is to provide that boost, to provide the incentives to encourage the construction.

Again, what we are providing is grants to authorize training of the crews and workers who will construct and operate the pipeline.

We limit the period of time to bring a claim, if a claim should arrive, and we expedite the claim so the project doesn't get bogged down in the courts.

We authorize the construction of the pipeline. We have loan guarantees of up to 80 percent of the cost of the project. It would be an $18 billion Federal loan guarantee—probably the largest loan guarantee we have ever seen given to a project here in the United States.

We have also included a 15-percent enhanced oil recovery credit for the $2.6 billion gas handling plant that will be required on the North Slope.

We have provided for accelerated depreciation on the project, again helping to provide that incentive which we need to encourage construction of this line.

This only happens, the jobs only come, if the construction happens, if we can get moving with the line, if we convince the producers that it is timely, it is necessary, and that the demand is there. I think we have established that the demand is clearly there.

I am going to be working with the State of Alaska and the industry to examine the options and to pursue those possibilities as we push this project to completion. It is imperative that we in Congress, through the passage of this bill, make our intent known that this is a priority for the country. It is a priority for Alaska. But it must be a priority for this Nation as well.

I have been talking about the Alaska component in the bill. We are pleased with what I have spoken to so far. But we should be reminded about the other good things in the Energy bill that apply throughout the country.

Authorized annual funding for the Low-Income Home Energy Assistance Program, LIHEAP, is increased from $2 billion to $3.4 billion.

There is $550 million in grants for biomass production, and it provides money for communities under 50,000 in population to improve the commercial value of their biomass.

A couple of weeks ago, I stood on the floor during the debate on the Healthy Forests legislation and I showed a picture of Alaska Chugach Forest on the Kenai Peninsula where as far as the eye can see the standing trees are dead, killed by the spruce bark beetle. With the help of grants that we are seeing in the Energy bill, those trees can be converted into a biomass fuel providing a new source of energy for low-income communities.

There is money for clean coal power energy for those projects that demonstrate the advanced technology that achieves significant emission reductions.

I need to point out that there has been discussion on this floor that through the Energy bill perhaps we are not putting enough focus on clean air, clean water, and concern for the environment. We need to understand that our environment is only going to be helped. We are only going to get cleaner air and cleaner water when we have the advanced technology instead of the old stuff we had in the past. Those technologies might take some upfront money.

I know there are programs that have already been spoken about—such as the clean schoolbuses—$100 million to retrofit existing diesel buses with new pollution control technology, $200 million in grants to replace older schoolbuses with clean alternative fuels and ultra-low sulfur fuel buses.

Also, as has been referenced, there is funding for hydropowered automobiles that the President has made such a big push for.

I might remind the body, though, that in order for us to make headway on this particular initiative, it will increase the demand for our natural gas. Again, the imperative is to move forward with a natural gas pipeline.

The bill contains language to make permanent the United States' commitment to the energy security of Israel

ensuring, if Israel is unable to independently secure its own supply of oil, that the United States will procure the necessary oil to meet Israel's needs.

There is much in this Energy bill that provides the incentives and the technology to move forward. We have language that will help in the rural areas of the nation—certainly those in my State. Not only do we not have affordable energy in parts of rural Alaska, we don't have any energy to speak of. We have a long way to go, but it is only with the assistance we are seeing through the Energy bill that we will get there.

While I may suggest that Congress has missed an opportunity on certain topics, such as ANWR, this bill does offer new programs to improve our energy efficiency, increase the development and use of renewable energy resources, and promote domestic production.

It doesn't go as far as it could in reducing America's dependence on unstable foreign sources of oil, but it is the beginning of a comprehensive energy policy for this country. It is a policy that has been lacking for many, many years, and one that I feel is badly needed.

I would like to take this opportunity to thank Chairman DOMENICI and his counterpart in the House, Chairman TAUZIN. I appreciate their hard work and their leadership. Again, this is not a perfect bill, but it is a good bill. I urge my colleagues to support its adoption so we can move forward with a sound energy policy for the country.

Thank you, Mr. President. I yield the floor.

The PRESIDING OFFICER (Mr. CHAMBLISS). The Senator from Washington.

Ms. CANTWELL. Mr. President, I commend the Senator from Alaska for bringing up an important issue of jobs in this bill, because clearly one of the key components that we in the Northwest are interested in is that this bill might move us forward on an energy policy that would create jobs and diversify Northwest power.

When we ran into a drought in 2000 and ended up having to go out on the spot market and buy electricity, we certainly were gouged by some manipulated contracts. But one of the things that could provide us some long-term relief in the near term from future droughts and overreliance on the hydrosystem would be a natural gas pipeline from Alaska down to the continental United States which would help us in diversifying and protecting against such incidents in the future.

But let us be clear. This bill doesn't get the job done. The Alaska pipeline that we have all talked about as it relates to natural gas doesn't have the framework within this legislation to move forward.

I commend the Senator from Alaska for focusing on job issues. I agree with her that an energy policy must accomplish two things. It must set a policy for us to get off our dependence on foreign oil and again for America to have an advantage in job creation as we move on a 21st century energy policy. But this bill does nothing to help us diversify in the short term on natural gas that is available to us in Canada and Alaska. It does very little to help us in the future with the hydrogen fuel economy which, it is estimated, could create 750,000 jobs over the next 10 years. That is not just the kind of activity that would make us a leader in the United States; it is the kind of activity that would make us a global leader in the energy system of the future.

I will take a few minutes to talk about where we are with the Energy bill and where we have been because yesterday I spent quite a bit of time talking about the overall aspects of the bill. Something of great concern to me, being a member of the Energy and Natural Resources Committee, I wanted to make sure, given the fact this bill has been drafted mostly in secret, starting with the Vice President's energy task force. That left many Americans out of the process of understanding what the administration's energy proposal would be, which led to a conference report that was done in secret by the Republican Party. Yesterday I needed to spend my time talking about the various aspects of this bill in a comprehensive way that would give my colleagues a perspective of someone from the Energy and Natural Resources Committee who has dealt with some of the challenges and problems.

Clearly, this 2003 Energy bill is becoming known as the bill about Hooters, polluters, and about the looting of America that has happened, particularly on the west coast, particularly in my State.

Americans are trying to understand this. I have had phone calls to my office: I don't understand. I understand conservation, I understand renewable energy, I understand incentivizing. What does Hooters have to do with an energy policy?

In this legislation we have included green bond projects; that is, we would help in the public financing of proposals to various developers in Colorado, New York, Iowa, and Louisiana, with $2 billion in private bonds to build energy-efficient developments. I am for energy efficiency, but last I heard Hooters had its own airline, was doing quite well and probably could borrow any money it needed to invest in energy efficiency.

I have small businesses all over the State of Washington that got smacked with the energy crisis. They had to conserve; they had to shut down. Employees were coming up with all sorts of creativity: nobody got to borrow money from the Federal Government that would allow them to have a line item in a bill that said specifically, this project is for you.

Broad tax credits for conservation programs in which all companies can apply for some of the incentives to get America to conserve—because conservation is a great program, particularly in times of less supply—is a very good idea. But that is not what Hooters got. This particular project, and the three others mentioned in this legislation, specifically include a line item for particular projects. What qualifies them? I find it very hard to explain to my constituents. I know there is a daiquiri bar in and an energy efficient bowling alley and a movie theater and everything else as part of this Hooters restaurant development. But I don't understand why they should get some sort of line item for bonds, for money that needs to be borrowed for fuel efficiency when everyone else in the country has had to do their own jobs, to turn out the lights and conserve. What is so special about this particular restaurant?

As far as the polluters, obviously, my colleagues have done a great job talking about the MTBE provision and the fact that people who have been involved with that product are seeking relief from being liable for cleanup. I have heard from elected officials all over the State of Washington that they do not want to be the deep pocket. Cities have asked: Why is it that you are going to let these particular polluters in this bill off the hook and stick us with the cleanup cost of this particular product? It is very unfair that that is the approach we would take. My colleague, the Senator from Illinois, and everyone else has been very articulate on that issue.

I am also amazed, as we look at the other aspects of the bill, particularly relating to clean water and the Clean Water Act. Why would my colleagues would want to say, under the Clean Water Act, this is legislation that would somehow say to any coal-producing, oil, or gas company producer in the future under this bill, the 2003 Energy bill, that you do not have to comply with clean water runoff standards. Why should they be exempt? I cannot understand that. You build a shopping center. Guess what. You have to comply with runoff standards from the Clean Water Act. If you build a hotel, you have to comply with getting a runoff permit and saying how you are going to deal with runoff. Why? Because there are two sources of pollution. We have the source point pollution and then we have pollution that occurs from the runoff. We want to control that.

We are demanding every other business in America has to get a permit when they go through development to deal with runoff, to make sure we have clean water. But somehow we are going

to allow certain types of industries in the Energy bill, particularly oil, gas, and coal, to be exempt? What kind of policy is that?

The most famous person on this chart is Ken Lay. Why is he the most famous person on this chart to people in Washington State? My constituents want to know why, when they have been gouged with higher energy prices, why this man is not in jail. I don't have a very good answer.

This bill is about pollution. It is about special deals. It is about allowing a part of our country to be looted, to allow special interests to stick their hands in the pockets of ratepayers. That is what I will focus on tonight. This bill takes a drastic step backward. While complex to understand, it is critically important for my colleagues to know they cannot take the drastic steps in this measure that will overturn 70 years of case law, protecting consumers with just and reasonable rates.

I talked a little bit about the Clean Water Act. I don't know that I have to go over that again, but I ask my colleagues, why make every other business in America comply with the Clean Water Act? There are probably lots of other industries in the country; yet they have to comply—if they want to develop—with runoff standards. Yet we will let oil, gas, and coal companies off the hook. They do not have to get a permit anymore.

What is the price gouging that has gone on in this legislation? It is significant, and I will talk about that price gouging because it is very important to understand.

I see my colleague from Florida, and I agreed to yield him some time. Would the Senator like that time now?

Mr. NELSON of Florida. If the Senator from the State of Washington would yield.

Ms. CANTWELL. How much time does the Senator from Florida need?

Mr. NELSON of Florida. Five minutes.

Ms. CANTWELL. I yield, from my half hour, 5 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized for 5 minutes.

Mr. NELSON of Florida. I rise in the Senate to tell the Senate that I have concluded after studying this matter considerably that I will vote against this Energy bill, and I will vote against the motion for cloture because I have concluded that it is clearly against the interests of the State of Florida.

I am going to try to point out two particular areas of the bill that violate what everyone should consider in supporting the interests of the people of the State of Florida. This is a map of Florida with stars on it in dark colors. Each one of the dark-colored stars represents a hazardous material spill and an MTBE spill. There are 30,000 hazardous material spills in our State. There are over 20,000 MTBE spills.

In the dark of night, in a conference committee that was closely controlled, a provision was inserted in this conference report that has come back to us for consideration, that all liability of the oil companies would be removed forever on any of the contamination that came as a result of those MTBE spills.

That simply is not right. It is not right to wipe out the ability of 18 counties and cities in Florida that are presently contemplating suit to sue for those oil spills with MTBE, nor is it right that you would wipe out Escambia County's present suit—Escambia County, up here on the map, the cradle of naval aviation, Pensacola—that you would wipe out their present suit against the oil companies because of the damage that has been done to the water supply from the MTBE leeching.

There is a lot in this Energy bill that I would like to support. There is a lot in this Energy bill that I have helped put in and that I will continue to support, such as the incentives for wind energy. That is certainly desirable. There is a major Florida investor-owned utility that has wind energy in other parts of the country. I want to help encourage that renewable source of energy.

But I cannot take the good parts of this bill and overlook the kinds of things such as this: wiping out any liability of oil companies for the harm they have caused to the environment.

Now, there is another major part I have considerable objection to, and that is the coastal parts of this bill. Under section 321, the Secretary of the Interior will be given broad new authority to grant leases, easements, or rights-of-way on the Outer Continental Shelf in areas where there is a moratorium against oil and gas exploration.

It is the ''Holy Grail'' of Florida that we do not want oil and gas drilling off of our shores, not only for environmental reasons but for an economic reason. We have a $50 billion a year tourism industry, a lot of which depends on the pristine, sugary white beaches that we have in Florida.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. NELSON of Florida. Mr. President, may I ask the Senator for 2 additional minutes just to complete my statement?

Ms. CANTWELL. Mr. President, I yield the Senator 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. NELSON of Florida. I thank the Senator from Washington.

Mr. President, I simply cannot support an Energy bill that suddenly eases the process of permitting or weakens the Coastal Zone Management Act, weakens the process of a State to object to the Federal Government doing anything having to do with oil and gas leasing off of the coast or with regard to the permitting process with regard to oil and gas pipelines.

That is inimical to the interests of Florida and causes me to come down on the side that even though there are lots of meritorious parts of this bill, which I will continue to work for, at the bottom line, this is clearly not in the interest of my constituency.

So I thank the Senator for yielding so that I could state my position, after a very deliberate consideration of this complicated legislation. That is the way I will vote when these issues are brought up tomorrow.

I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Washington.

Ms. CANTWELL. Mr. President, I thank the Senator from Florida for his solid statement about the challenges facing us in drafting an Energy bill. The Outer Continental Shelf areas are somehow thrown up in the open as to whether they are going to be part of the policy discussion, whether States have rights, whether the development along those coastal areas is going to go through the normal process or whether industry is going to be able to just run roughshod over that.

So I appreciate the Senator's statement.

Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 12½ minutes remaining.

Ms. CANTWELL. Mr. President, I will try to be brief to explain why I have a major objection to this legislation as it relates to what we are doing or failing, I should say, to do to protect consumers from the Enron price gouging that has happened. I think it is an amazing story.

Some of my colleagues were on the Senate floor earlier today talking about how part of the California crisis was that in California they did not pass on the cost of electricity to the retail side and somehow artificially suppressed demand. They asserted maybe that would have worked everything out.

Well, let me tell you, in Washington State we paid the cost at the retail level because we have a lot of public power in Washington State. And we had a drought. It was the second worst drought in the history of our State. It just so happened when that drought occurred it was the same time that California had deregulated, and the spot market was going crazy, and the Federal Energy Regulatory Commission, which has oversight of these issues, was failing to do anything about it.

But public power has a requirement that they have an obligation to serve. So that obligation to serve meant they

had to go find power somewhere. Now, they had reserves. They had alternative plans. But they went to the marketplace to buy power and found out the power was selling at exorbitant rates because of the deregulation that happened in California and the fact that the Federal Energy Regulatory Commission was failing to take action.

In fact, it got so bad in our State because of the high rates that we had, in the county I live in, 14,000 people basically lost their electricity that year. We had a 44-percent increase in the disconnect rate in Snohomish County, my home county, that year because of the high cost of energy. People could not pay their bills.

Now, I know some people think: Well, bad decisions were made by a company, and that may not happen again, or somebody did not plan for enough power in the future. But we all know now that Enron manipulated these rates. They have admitted to manipulating the rates. The Federal Energy Regulatory Commission has said they manipulated those rates. So we all know what has gone on in those situations. But I don't think America knows that people in my State are still paying on those manipulated rates.

And my consumers are mad. They are furious. They are furious that this Energy bill not only fails to recognize we need stricter guidelines against market manipulation to prevent that from occurring in the future, but somehow this bill actually goes further in condoning those acts by saying it is going to try to preserve those Enron contracts resulting from manipulation.

Let me give you an idea of what consumers have said to me.

One of my constituents writes:

> We are writing to express our extreme concern regarding our latest electricity bill. We have done everything in our power to conserve, and that is reflected in our usage, which has been down to a very minimal level. We have lived at this address since 1979, and we cannot continue to live in Snohomish County because the electricity bills are almost greater than our mortgage payments. We are currently considering moving.

Another constituent writes:

> I just received my bill today. I tried to prepare myself before opening the envelope, but, guess what, I didn't prepare myself 6,000 times enough because my bill was $800. That's absolutely crazy. We have lived at this address for 23 years, and we have tried our best at conserving. Where is it going to end?

So my constituents—and I could read many more. I could tell you how the Everett School District in Snohomish County ended up having a million-dollar increase in their energy budget, how small businesses have had huge increases in their energy budgets.

It includes the grocery industry in the State of Washington—everybody knows that grocery stores operate on slim margins and use a lot of electricity. Do you know what they have said to me? ''We are not going to build another grocery store in Snohomish County because your rates are too high.''

And our rates are too high because we continue to have to pay on Enron contracts that Enron admitted they manipulated. Why is it that we have to continue to pay on these contracts?

You would think that at least at a minimum the Energy bill would take a step forward and say: Let's prevent the kind of Enron manipulation from happening again. But we are not doing that.

In this bill, originally Senator DOMENICI's proposal, roundtrip trading is prohibited. But there are other things we proposed: basically making sure people don't dodge price caps; making sure people don't falsify demand schedules, like the load shifting that happened in California; people who would go out of the region and then sell power back into the region; obviously, under the scheme Fat Boy, people were hiding some of the energy supply that they had—all those things are still allowed under this Energy bill.

As much as my colleagues have tried to articulate this on the floor, somehow the other side of the aisle wants to ignore the reality: This bill is not dealing with the Enron manipulation schemes and blocking them from happening again. I don't see, just on this issue alone—if there was nothing else in the Energy bill—why people would support this Energy bill because of this policy.

I ask my colleagues, I know it may not seem to you like an issue because it didn't happen to your State, but find me a Member on the other side of the aisle who would accept having a 50 percent rate increase for their consumers, not just for 1 year but for the next 5 years because that is what we are paying. And we are paying on those contracts to Enron. I have a letter from a woman. I will not go into the details, but she basically ended up losing her job and having to move to a different area because of this.

What is the real issue? These contracts have been manipulated. These rate are the increases. These are the numbers from 2002, but as I said, almost a 50 percent rate increase in Snohomish County where I live. Seattle City Light had a 60 percent increase. So we are talking about real dollars that my constituents are paying on these Enron contracts.

Enron admitted they manipulated contracts. They admitted that they weren't just and reasonable rates and that they used all these schemes. You would think my utilities could get out of those contracts. You would think my utilities could reform those contracts. In fact, I am amazed; the Department of Justice actually went after Enron and got them to reform a contract as it related to a Federal entity, the Bonneville Power Administration, because they had the power of the DOJ behind them. But when my little utilities, which don't have the Department of Justice working on their side, tried to go to court and get those contracts reformed—no luck. They were sent to the Federal Energy Regulatory Commission, which got on a conference call with Wall Street investors, told the Enron company and their interests, don't do anything to negotiate and reform those contracts because basically we are going to rule in your favor.

That is in a Wall Street Journal article. I ask unanimous consent to have it printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Mar. 31, 2003]

POWER POINTS: SECOND THOUGHTS ON FERC'S CALIFORNIA D-DAY

(By Mark Golden)

NEW YORK.—Even though the Federal Energy Regulatory Commission's big day on California began Wednesday with a 400-page catalog of bad behavior by energy companies, the second look by Wall Street was that things weren't so bad.

FERC staff reported to Congress that Reliant Resources (RRI) was significantly responsible for the high prices for natural gas in southern California in the winter of 2000–2001, which may have cost consumers billions of dollars.

Reliant and BP PLC (BP) did sham electricity trades, the staff alleged, and dozens of companies used trading strategies like the infamous ''Get Shorty'' stuff that Enron Corp. (ENRNQ) used in California's power market. That was illegal, staff said, and all those companies should be forced to cough up any related profits. Refunds due California for overpriced crisis-era power sales could be increased.

But the ''D'' in what one Wall Street analyst has been calling ''D-Day'' turned out to stand for ''dirt'': A lot of ugly stuff that will make it hard for energy companies to continue claiming as they have that there wasn't much funny business during the crisis, but which isn't that horrible from a financial or legal perspective for most of the companies involved.

Reliant's ''churning'' of the gas market, for example, wasn't illegal, FERC staff said, and the conclusion that the practice caused prices to rise required a leap of faith. The Reliant-BP trades may cause BP to wonder if its trader rigged a higher bonus, but they had nothing to do with the soaring prices that prevailed during the crisis.

FERC staff exonerated Williams Cos. (WMB) from claims it manipulated the California gas market. And FERC commissioners said they were going to take some time to decide whether their staff was right about the Enron-like trades being illegal.

During the public meeting, the stock prices of several companies named in the investigation fell hard. Most recovered Thursday and again Friday as the smoke cleared.

MIXED MESSAGES

FERC's Donald Gelinas, who headed the investigation into market manipulation for the past year, presented his findings in the well-attended public meeting.

After the meeting and a press conference, FERC Chairman Pat Wood and Commissioner Nora Mead Brownell, the commission's two Republicans, held a password-protected conference call with a select group of

Wall Street analysts. According to several of those present, the commissioners conveyed the message that the staff findings weren't that bad.

According to one analyst on the call, the split approach makes sense, FERC wants to present a public image as a tough cop on the beat so that states and the U.S. Congress support its push for advancing electricity deregulation. On the other hand, FERC doesn't want to scare away more investment from the decapitalized electricity sector, which is in desperate need of new transmission lines and will need more power plants soon in some regions of the country.

''It was the typical thing they've been doing—trying to please Wall Street at the same time they are trying to please California, and they end up not pleasing anybody,'' that analyst said.

Brownell discussed the prospects for the commission's decision—expected but postponed on Wednesday—on whether to abrogate long-term power contracts signed during the crisis. She said there are likely two votes against abrogation on the three-member commission, and that the commission will hopefully issue an order in the next couple of weeks, according to one analyst on the call, who took notes.

Brownell's comments on the contracts were similar to what was said in the public meeting, even if the latter tone was more assuring to investors.

Schwab Capital Markets energy stock analyst Christine Tezak didn't agree that the commission has presented different messages to different audiences. Instead, their discussion with the analysts reflected the audience's primarily financial concerns.

''For Wall Street, the whole blame game thing isn't that interesting to us,'' she said. ''We want to know what actions they took and what it's going to cost and when.''

FERC APPROACH DEFENDED

Observers shouldn't necessarily expect the messages of the staff report and the commissioner's discussion with analysts to be consistent, a FERC spokesman said.

''The intent was to get an independent fact-finding analysis about whether Enron or any other company had the ability to manipulate the markets for power and gas in the western states in 2000 and 2001,'' spokesman Bryan Lee said.

Chairman Wood wouldn't try to influence the outcome of that investigation, nor does the investigation reflect his opinion on the matters, Lee said.

Still, a press release issued at the time of the report promised ''tough action'' from commissioners based on the report. Wood said that any doubts about FERC's role as effective ''cop on the beat'' should be dispelled.

Ms. CANTWELL. Enron is actually suing consumers across America. They are suing consumers in my State, in Washington, in Oregon, California, Nevada, Idaho, in the Midwest, in the East. The States on this map, those are States in which Enron is saying to utilities and to consumers and ratepayers: I am taking you to court to make sure you continue to pay on manipulated contracts because really you are going to be the deep pocket for these energy prices.

It is just plain wrong. It is plain wrong that that is what America is dealing with and that this particular bill does nothing about it.

Since the beginning of these contracts in my area, I have probably paid $700 on my own energy bill—$700 more than I would have paid if we would have had normal rates. Here is a check from me. It is not really my bank. It obviously doesn't have my bank number on there. But that is what I am going to next pay to Enron because of the fact that my utility can't get out of those manipulated contracts. My utility can't get out of those contracts. That is what everyone in Snohomish is going to have to pay, $370 more, even though we have already paid $796 more since the crisis began.

There is another example of a woman in Snohomish County, where I live, who was trying to take care of her mother. Basically, she got laid off from Boeing. She got a utility bill for $605, nearly double the last bill she had. Her mother got a bill for $747. Her mother is on a fixed income. She only has $1,500 a month from Social Security, and she is supposed to pay 747 of those dollars out to Enron to foot the bill for manipulated contracts. And this body can't do any better than to condone those contracts and further protect them under this bill? It is amazing. It is truly amazing.

So where are we on this problem and this issue? Just look at what ratepayers in my region have had to pay since 2001. The total my ratepayers have had to pay is $1.5 billion, over and above the amount they otherwise would have had to pay in the Northwest, all because they are stuck with long-term Enron contracts. It is unfair. It is unjust. It certainly isn't reasonable.

What is the problem with this legislation in front of us? Again, you would say: That is an issue of manipulated contracts. You ought to go to court. You should figure out what the court has to say about those contracts.

Actually, many of my constituents did go to court. Snohomish County PUD went to court. Enron turned around and countersued. Basically, the court said: You don't have standing here because this isn't a decision before our courts. You have to go to the Federal Energy Regulatory Commission. They are the people who oversee these issues.

So when they went to the Federal Energy Regulatory Commission, they said: There is market manipulation, but we are not going to do anything about it. And, frankly, it is a problem, but our report only is going to demonstrate that there was manipulation and we are not going to do anything.

So what we have had to do is really push on the fact that the Federal Power Act says there should be just and reasonable rates.

This bill further amends the Power Act, and it basically says that these contracts should stand. It basically gives the contracts sanctity. It goes one step further than 70 years of case law and says: Even though the Power Act requires just and reasonable rates, we are going to guarantee these contracts. And FERC and the courts don't have to reform them ever, unless somehow someone can prove that a failure to do so is somehow contrary to the public interest.

We are setting a whole new legal standard in this bill. We are failing to correct the Enron manipulations. We are failing to give direction in a key area of consumer protection. Not only that, we are changing 70 years of case law and saying it is OK to manipulate contracts.

It is time to defeat this bill which supports Hooters, polluters, and the Enron looters that are gouging American ratepayers.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, I congratulate Chairman PETE DOMENICI and his staff for bringing a comprehensive Energy bill to the Senate floor. It has many positive features. Unfortunately, on balance, the provisions he was not primarily responsible for, those that came out of the Finance Committee, are far too heavily weighted towards subsidies and mandates and require that I respectfully oppose the bill.

Let me first mention some of the good in the bill. This is the part that came out of the Energy Committee. First, on the subject of reliability, since the year 2000, Congress has attempted to pass mandatory reliability standards. For some time it has been known that the voluntary reliability standards that currently exist were not adequate. This point was brought home in August with the blackout that hit New England and the Midwest.

We know from the United States-Canada Power Outage System Task Force interim report on the causes of the blackout that First Energy failed to follow at least six voluntary reliability standards. The mandatory reliability standards in this bill will ensure that utilities cannot ignore the responsibility they each owe to maintaining the grid. It will go a long way toward keeping the lights on for millions of Americans.

SMD delay, standard market design, the Government knows best, a one-size-fits-all prescription for Federal domination at the expense of States and the market: This had to be stopped in its tracks before it cost consumers billions of dollars.

The same bureaucrats who approved the plan that brought blackouts and skyrocketing prices to California, obviously, didn't learn their lesson.

So we included a strong SMD delay provision in the bill. The message to the Federal Energy Regulatory Commission, FERC, is very plain: When Congress says no, it means no; and it says no rule before 2007. By that, we mean you cannot just slap another

label on SMD, such as WMP, or use a different legal basis, such as ''just and reasonable rates,'' rather than discrimination, and then send the same straitjacket kind of a rule out the door. The same goes for standards of conduct rulemaking, a supply margin assessment test, or some other Federal Government regulatory scheme.

Native load: The current stormy debates over how wholesale electricity should move and be traded in this country will mean nothing if we cannot guarantee retail customers, the families and businesses that pay their electricity bills every month, that when they flip the switch the lights will go on. The native load provision that I worked on with Senator DOMENICI guarantees Arizona's transmission lines will first be used to serve Arizonans and not just sold to the highest bidder. These are some of the good things in the bill. They are all in the electric portion of the bill that Senator DOMENICI presented.

The bad comes from the Finance Committee on which I also sit, primarily in the form of tax subsidies. The conference agreement includes nearly $24 billion in tax incentives; most are tax credits. I advise my colleagues that the negotiating compromise process here was a curious one. The energy tax provisions in the Finance Committee this year totaled $15 billion over 10 years. The House tax incentives total $17 billion over 10 years.

Mr. President, you would think that, between $15 billion and $17 billion, there is a fairly obvious number there—$16 billion might have been the compromise between the House and Senate. That is not the way it works. The compromise between $15 billion and $17 billion was $24 billion. Guess who lost in the compromise? The American taxpayers. How did you get to $24 billion? Well, obviously, there were a lot of votes that needed to be gained and that is how we got to $24 billion.

Maybe there is another formula. The administration only asked for $8 billion in energy tax incentives. This is three times that amount. Maybe that is the new formula for compromise in a conference committee. So that is not an appropriate number. It is way out of bounds. It is too much of a burden on American taxpayers for benefits that are dubious at best.

Tax credits are not the most efficient way to set policy. They can be inefficient and wasteful. We should use them very sparingly. Tax credits distort the market and cause individuals or businesses to undertake unproductive economic activity that they probably would not do absent the inducement. They are, in effect, appropriations through the Tax Code; they are a way to give Federal subsidies, disguised as tax cuts, to favored constituencies.

Here are some examples of tax subsidies in this agreement:

Section 45, renewable energy tax credit: Cost, $3 billion over 10 years. The conference agreement extends and expands the production tax credit for energy from wind and closed-loop biomass. It also extends credit to new forms of energy, such as solar, open-loop biomass, geothermal, small irrigation, and municipal solid waste. This provision includes energy produced from livestock waste and animal carcasses—so save your Thanksgiving turkey.

Energy-efficient improvements to existing homes, $352 million, for 10 years.

Energy-efficient new homes, $409 million, for 10 years.

Credit for energy-efficient appliances, $255 million, for 10 years. That is for washing machines, refrigerators, and the like.

Extend and modify the section 29 credit for producing fuel from nonconventional energy sources, $3.1 billion, 10 years. Often, companies that claim this credit are not even energy companies. There is one I have familiarity with because Arizona tried something similar.

Alternative motor vehicles incentives: Cost, $2.5 billion, 10 years.

This agreement deletes a requirement that was in the Senate bill I got in for a study. Why did I do that? We found that the Arizona experience could have cost the State of Arizona hundreds of millions of dollars. I wanted to prevent that from happening here. We had a disastrous experience with alternative fuel vehicle incentives. This is a quote from the Arizona Republic when the Arizona Legislature repealed its alternative fuel program:

> Lawmakers gutted the disastrous alternative fuel vehicle program . . . in a volatile and dramatic House vote, ending a debacle that outraged taxpayers, panicked buyers, and brought down one of the State's most powerful politicians.

The repealed law, incidentally, paid for up to 50 percent of the cost of a car equipped to burn alternative fuels. The program could have cost Arizona $½ billion if it hadn't been repealed—11 percent of the State's budget. When proposed, the cost of the program was projected to be between $3 million and $10 million—less than 10 percent of its true cost. So the question I wanted to study was, are we confident about the revenue estimates for our congressional provision?

I have talked a little about some of the good and a little about some of the bad. Let me conclude by talking about the truly ugly.

Ethanol: The ethanol provisions of the conference report are truly remarkable. They mandate that Americans use 5 billion gallons of ethanol annually by the year 2012. We use 1.7 million gallons now. For what purpose, I ask, does Congress so egregiously manipulate the national market for vehicle fuel? No proof exists that the ethanol mandate will make our air cleaner. In fact, in Arizona—and this is a critical point—the State Department of Environmental Quality found that more ethanol use will degrade air quality, which will probably force areas in Arizona out of attainment under the Clean Air Act. Arizonans will suffer as a result.

Furthermore, according to the Energy Information Administration, this mandate, costing between $6.7 billion and $8 billion a year, will force Americans to pay more for gasoline. Nor is an ethanol mandate needed to keep the ethanol industry alive. That industry already receives a hefty amount of the Federal largess. CRS estimates that the ethanol and corn industries have gotten more than $29 billion in subsidies since 1996. Yet this bill not only mandates that we more than double our ethanol use, it provides even more subsidies for the industry—as much as $26 billion over the next 5 years.

Professor David Pimental, of the College of Agriculture and Life Sciences at Cornell, has studied ethanol. He is a true expert on the ''corn-to-car'' fuel process. His verdict, in a recent study: ''Abusing our precious croplands to grow corn for an energy-inefficient process that yields low-grade automobile fuel amounts to unsustainable, subsidized food burning.'' It isn't efficient. The fuel is low-grade. And what is more, Congress, by going in for ''unsustainable, subsidized food burning,'' will impede the natural innovation in clean fuels that would occur with a competitive market, free of the Government's manipulation. These ethanol provisions, alone, dictate that I vote against the bill.

So, Mr. President, in conclusion, while this bill includes several meritorious provisions, especially those negotiated by Chairman DOMENICI, I must vote against it because of the $24 billion in tax subsidies and the bill's irresponsible manipulation of the energy markets through the Tax Code and the ethanol mandate.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. REID. Mr. President, it is my understanding that we are expecting Senator GRAHAM as part of an order.

The PRESIDING OFFICER. Senator GRAHAM has 20 minutes under that agreement.

Mr. REID. I will speak for a few minutes until he comes.

Mr. SCHUMER. Mr. President, will the Senator yield?

Mr. REID. I am happy to yield.

Mr. SCHUMER. May I be put in line after Senator GRAHAM?

Mr. REID. Will the Chair announce the schedule before the Senate as to what speakers will appear.

The PRESIDING OFFICER. Senator GRAHAM is the last speaker under the agreement, with 20 minutes.

Mr. REID. I ask unanimous consent that following Senator GRAHAM, the

majority be recognized if they desire, and then following that, Senator SCHUMER have an opportunity to speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, as we look around the world today, we see blackouts and we see wild price spikes in electricity markets. We see turmoil in the Middle East. We see global warming caused by fossil fuel emissions. We see air pollution that contributes to asthma attacks among our smallest citizens—our children. We see our parks that are smog-ridden. We see all these things, and we realize the United States needs a national energy policy with a purpose and a vision.

We don't need more of the same old thing—more drilling, more burning, more shortages, more blackouts, more price spikes, and ever larger vehicles with inefficient engines. We need a national energy strategy that will protect our environment, provide a reliable supply of electricity for our consumers, and bolster our national security.

Instead, we get a $75 billion grab bag that I believe has serious problems with the three P's—process, pork, and policy.

The process of this bill was fatally flawed. The genesis of the bill, I believe, was hatched in secret almost 3 years ago by the Cheney task force and completed in secret just a few days ago.

The usual policy—and we have tried to live up to that—is the Senate does a bill, the House does a bill, and both parties—that is the Senators from the Senate and Congressmen from the House, Democrats and Republicans—sit down together to try to work out an arrangement. In this instance, the ranking member of the committee, Senator BINGAMAN, who was also the former chairman of the committee, was not consulted. The first he saw the bill was when it was printed. The distinguished Senator from Vermont, the ranking member and former chairman of the Environment and Public Works Committee, Senator JEFFORDS, was not consulted, even though 100 titles of this legislation that is now before the Senate were under the jurisdiction of the Environment and Public Works Committee.

The pork was best summed up by Senator MCCAIN's description of this bill: Leave no lobbyist behind. It is shameful that two-thirds of the tax incentives in this bill go to oil, gas, coal, and nuclear energy. This is an investment in the past, not an investment in the future.

This bill will lavish more than $55 billion of taxpayer money on some of the wealthiest corporations in the world; namely, oil, gas, and coal companies. It would be better if the companies were all U.S. companies, but some of them are not even U.S. companies getting these benefits.

The most disappointing aspect about this bill is its failure to enact a policy with vision. After pouring billions of dollars into oil and natural gas, we need to invest in clean technology, in a clean energy future. Sadly, this bill is more of the same old, same old. It endangers the environment; it does nothing to help consumers; and it will not break our dependence on foreign oil, a dependence that jeopardizes our national security.

Let's start with the assaults on the environment that are included in this bill.

There have been hours of speeches given in the last 2 days of how it endangers our water supply by granting MTBE producers immunity from claims that the additive is defective in design or manufacture and by weakening the leaking underground storage tank regulations.

It allows large metropolitan areas to extend deadlines for ozone nonattainment areas to comply with the Clean Air Act, and it relaxes regulatory requirements for energy production on Indian reservations and public lands.

It is beyond my ability to comprehend how anyone who is supportive of tribal sovereignty, reservations, and economic development with our Indian tribes could support this legislation.

This bill also falls short of the real steps needed to guide America toward energy independence.

For example, it is a great disappointment to me that higher fuel efficiency standards have not been included in this bill. If all cars, trucks and sport utility vehicles had a CAFE standard of 27.5 miles per gallon, the country would save more oil in 3 years than could be recovered economically from the entire Arctic National Wildlife Refuge. A comprehensive energy strategy must include conservation, efficiency, and expand generating capacity.

Certainly our Nation must promote the responsible production of oil and gas, but that doesn't mean we should sacrifice the environmental protections of our public lands.

We can't drill our way to energy independence. America only has 3 percent of the world's oil reserved, but we use 25 percent of the world's supply.

This bill also fails to protect consumers.

In the past few years, people in my home State and other Western States have experienced severe spikes in the price of electricity. The policies of the past are not the answer. Like Dorothy in the Wizard of Oz, the solution is literally right at our feet—under the ground, in the wind around us, and emanating from the Sun. In Nevada and other Western States, we have the potential to generate enormous amounts of electricity with geothermal, wind, and solar power. That is why I am disappointed this energy bill does not contain a renewable portfolio standard requiring that a growing percentage of the Nation's power supply come from renewable energy resources.

I am proud that my home State of Nevada has adopted one of the most aggressive renewable portfolio standards of any State. It requires us to produce 5 percent of our electricity with renewable sources, not counting hydropower, by the end of this year. In 10 years, the goal jumps to 15 percent. We already have developed 200 megawatts of geothermal power, with a long-term potential of more than 2,500 megawatts.

Utilities in Nevada have also signed contracts to provide 205 megawatts of wind power in 2 years, and an additional 90 megawatts is proposed. By some estimates, we could potentially produce more than 5,700 megawatts from wind power—meaning we could meet our entire electricity needs with geothermal and wind. So I wish this bill included a Renewable Portfolio Standard.

Thankfully, it does extend and expand the production tax credit on renewable energy resources from wind and poultry waste to include geothermal, solar, and open-loop biomass. I have spent years fighting for this tax credit, because it will give businesses the certainty they need to invest in geothermal and solar generating facilities. We know the production tax credit will work because it already has. With the benefit of the existing production tax credit, wind energy is the fastest growing renewable energy source. In 1990, the cost of wind energy was 22.5 cents per kilowatt hour. Today, with new technology and the help of a modest production tax credit, wind is a competitive energy source at 3 to 4 cents per kilowatt hour. I applaud the fact that wind, geothermal, and solar energy will receive a production tax credit of 1.8 cents per kilowatt hour.

I had hoped the bill would provide geothermal and solar energy the same 10-year tax credit that wind energy enjoys, but a 5-year credit is a good start. The facilities to develop these energy resources are very capital intensive, and a 10-year tax incentive is needed to fully realize our renewable energy potential.

Developing these renewable resources will not only help consumers, it will create thousands of jobs. And many of these jobs will be in rural areas that are desperate for economic growth. A report from the Tellus Institute, ''Clean Energy: Jobs for America's Future,'' found that investment in renewable energy could lead to a net annual employment increase of more than 700,000 jobs in 2010, rising to approximately 1.3 billion by 2020, and that each State would experience a positive net job impact. This is why we must be bold. We must not cling to the fossil fuel technology of the past. We must explore and seize the potential of the future.

I opened my remarks a few minutes ago by talking about all of the problems we see if we look around the world today. But I also see much that could be positive. I see renewable energy resources—the brilliance of the sun, the power of the wind, the eternal heat within the Earth. And I see the good old American ingenuity to unlock that enormous potential.

With a little bit of incentive and investment, we can develop the technologies to efficiently develop our renewable resources. And as fantastic as it sounds, with the use of hydrogen fuel cells, oil will eventually be phased out as the primary transportation fuel.

If we choose to invest in energy efficient and renewable technologies, we will create thousands of new jobs, we will protect our environment, we will provide consumers with reliable sources of energy, and we will bolster our national security. That is the vision our Nation needs. That is the leadership we must provide.

The PRESIDING OFFICER. The Senator from Florida is recognized for 20 minutes.

Mr. GRAHAM of Florida. I thank the Chair. Mr. President, the Energy bill before the Senate today is the newest chapter in the book that we have been writing throughout this year. The title of that book is ''At War With Our Children.'' This legislation would represent another example of this generation taking the benefits of our profligate behavior and then asking our children and grandchildren to pay the cost.

This chapter begins with the addition of over $30 billion in sanctioned appropriations and some $70 billion in authorized appropriations. This will be added to an already gigantic deficit. If it had been added to this year's deficit, it would have increased it by approximately 7 to 8 percent. This cost will be paid by our children. But this goes beyond just adding to the financial burdens of our future. It adds to the vulnerability of our children and grandchildren—a vulnerability that will be occasioned by the fundamental philosophy of this legislation, which is to drain America first.

There are some small vows to conservation and alternative sources of energy, but the principle that lies behind this bill is to extract as much of our national treasure as quickly as possible and to accelerate the date when we will have depleted our domestic source of petroleum and other critical natural resources.

Our generation gets whatever short-term benefits—physical maintenance of low prices of gasoline, the benefits to the oil and gas industry—that will come from this bill. But we again declare war on our children because they will end up paying for it.

The great philosopher Yogi Berra once said:

> If you don't know where you are going, you will wind up somewhere else.

He can very well have been defining this energy legislation. For nearly three years Congress has been laboring to write a comprehensive energy bill and to deliver on our promise to give Americans certainty and security related to our energy future. Certainly none of us ever thought it would be an easy task, even under the best conditions, but I do not believe that we have made it any easier to achieve our goal because we have ignored what should be the guiding principles of this or any comprehensive public policy.

We must start with a clear idea of where we are going, a map to guide us to that destination, and standards by which to measure our success. I would submit that if you look through the almost 12,000 pages of this bill to try to find what is our goal, where is the map that will guide us and by what standards you will measure our success towards that goal, you would find it an unrewarding effort. There are no such statements of vision, of means of achieving that vision, or of measurements of achieving that vision.

At the beginnings of the hearings of the State Energy hearing, I advocated that we develop such a set of visions, maps, and measurements as we commenced our work on a comprehensive energy bill. There is simply no other way to draft a bill of such magnitude, importance, and promise. Without a specific purpose, this energy bill is lost in the wilderness.

We can say that we have provided America with energy security, but what does that mean? Is energy security drilling America first and conserving fuel last? Is energy security ignoring the need for fuel efficiency while espousing the idea of decreasing dependence on foreign oil? Is energy security investing in targeted alternative technologies without setting timetables and goals and, at the same time, ignoring other promising technologies?

Let me suggest what I think should be some goals of a reasonable, comprehensive energy policy. These would be illustrative of the kind of long-term goals that should be but, regrettably, are not the focus of this Energy bill. As an example, my goal No. 1 was that we must take a long-term approach to energy policy, establishing goals to reach for the next 50 years with milestones for each decade to guide our progress. We cannot be the generation that sets our national energy policy on a course which will inevitably result in totally depleting our domestic energy reserves by the time our grandchildren are adults.

The United States is the model to the rest of the world. We should lead by example, using energy conservation and efficiency measures. We should husband our domestic reserves, particularly of petroleum, for times of international turmoil.

Goal No. 2: We must wean ourselves from our unhealthy dependence on petroleum, both foreign and domestic. Current estimates show that the United States is consuming between 19 and 20 million barrels of oil each day. From the mid-1970s into the 1980s, use of petroleum sharply dropped in the United States. I propose we return to that path and aim to decrease the use of petroleum by approximately 10 percent over the next decade, with the ultimate goal of finding a cleaner and more efficient way of operating automobiles and expanding our transportation options such as high-speed rail.

Goal No. 3: We must reduce our importation of foreign oil, which currently accounts for about 65 percent of the oil we consume. We must conserve our current use of domestic oil and gas in order to stretch their availability as far as possible.

Under current levels of extraction and projected levels of use, in approximately 50 to 75 years, about the time our grandchildren will be our age, we will have exhausted our domestic petroleum reserves at current economic and technological levels of extraction.

This is not a new problem, it is one that has been pointed out to us for more than half a century. In 1946, James Forrestal, then-Secretary of the Navy, said this:

> If we ever go into another world war, it is quite possible that we would not have access to reserves held in the Middle East. But in the meantime, the use of those reserves would prevent depletion of our own, a depletion which may be serious within the next 15 years.

Secretary Forrestal's statement is remarkable for a couple of reasons. First, he was looking far over the horizon, beyond the short term, and trying to see what would be happening over the next 50 years. Second, he did not succumb to the mantra of independence from foreign oil through draining America first. Rather, he viewed use of foreign oil as a method of husbanding our domestic reserves.

This Energy bill, with its drain-America-first policy, is a step backward from Forrestal's policy. It will assure that we deplete our own resources in the near future. Forrestal sets the examples of the kind of policy we should be making in this energy Bill today.

Goal No. 4: We must increase the amount of renewable and alternative energy we use. This would include wind, solar, hydro, geothermal power, and municipal solid waste. It should also include clean coal and nuclear as alternatives to current fossil fuel use.

Goal No. 5: We must eliminate our overreliance on a single source of power for electric energy generation. I am becoming increasingly concerned about our tendency to turn to natural gas to solve all of our energy woes. Clearly, natural gas has some significant advantages in terms of emission reduction, but we as a nation, in my

judgment, would be foolish to have only a single or even a single dominant source of fuels for our electric supply.

The National Association of State Energy Officials estimates that natural gas used for electricity generation will increase by 54 percent between 2000 and 2015 as new powerplants are built and older plants are converted to natural gas.

In contrast, our friends in Europe are making great strides in expanding their energy portfolios to include renewables. Denmark, for example, has a plan to eventually generate about 20 percent of its energy needs from wind power. The United States should take serious steps to include all available energy sources. One way to accomplish this would be to establish a national renewable portfolio standard. This simple measure would go a long way in putting us on the path to a sustainable energy future, by encouraging innovation in renewable energy technologies and by increasing the demand which would have the result of more efficient production. It would create jobs in America for Americans.

Unfortunately, the Energy bill we are considering today ignores the renewable portfolio outright, even though Senator BINGAMAN's amendment to this effect was accepted by a strong bipartisan vote by the Senate conferees.

Goal No. 6: We must provide Americans with a reliable electricity system. We all know that millions of people were affected by the blackouts of this past summer. What we do not know is how to prevent it from happening again. I am pleased that this bill begins the process, although distressed that this bill does not go as far as the Federal Energy Regulatory Commission has recommended to give us greater reassurance about the avoidance of August 14 calamities in the future.

But there is even a more basic step we should be taking, and that is to accomplish the goal of a reliable electric grid, we must gather data about the current state of reliability.

It is shocking to realize there is presently no national reporting of outages, which makes it difficult to determine the scope of the problem and the range of solutions. Electricity customers have the means to find information about the price of their electricity should we have such national data. They do not have such an opportunity today.

I propose that consumers should also have the means to judge the reliability of the system that provides them their electricity.

Goal No. 7: We should reduce the impacts of the use of energy on our environment. In the 1990s we proved that the American economy could grow while making meaningful progress to improve our environment. This means we should not drill America first without considering real conservation and real efficiency standards, as well as the effects of such drilling on the depletion of our domestic energy reserves. It also means striving to reduce carbon emissions.

This bill does neither. It focuses, with laser-like precision, at giving big oil every item on its wish list while running roughshod over the rights of the States that depend on, for instance, healthy coasts for their economic security. Section 325 weakens the consistency guidelines of the Coastal Zone Management Act.

Currently, States have the right to review proposed offshore projects and object if they find that these projects are inconsistent with the State's plans or policy. This Energy bill would impose severely restrictive guidelines and deadlines for decisions appealing States' consistency determinations. The practical effect of this would be to limit opportunities for States to comment and provide important information on issues which directly affect their coastal zones.

Coastal States deserve to have a say in the fates of their shores. This is the basis upon which the Coastal Zone Management Act became law. This Energy bill includes provisions to get every drop of oil out of domestic reserves while refusing to improve CAFE standards for SUVs. With advances in technology, it is not difficult to improve the efficiency of vehicles while providing the other features that drivers want. Yet this bill creates the likelihood that fuel efficiency standards will continue to lag. We should resolve to move to at least the 35 miles per gallon level for new cars within this decade.

The National Academy of Sciences says this is a reasonable goal. If we pursued this goal, we would lessen the impact of any oil interruption, we would sharply reduce the amount of money going to areas of the world where the cash might support undesirable activity, and, in addition, we would also make a significant dent in reducing greenhouse gases, an issue which is also ignored by this Energy bill. Any comprehensive Energy bill that doesn't commit to at least some reductions in the emission of greenhouse gases is not worthy of passage.

Furthermore, this Energy bill goes one step further and actually rolls back important environmental standards. One example of this is the exemption of the hydraulic fracturing process from the Safe Drinking Water Act protection for drinking water sources. I have grave concerns about this action from public health, environmental, and legal perspectives.

Hydraulic fracturing is a means by which certain energy sources are retrieved through the use of a heavy hydraulic process. The consequence of this is that after the useful materials have been recovered, there is a significant amount of water laden with materials which contain potentially serious carcinogenic and toxic substances. There are potential serious consequences for drinking water quality in areas where this hydraulic fracturing occurs. In many cases, the fracturing fluids being pumped from ground water contain toxins and carcinogenic chemicals. Diesel fuel is a common component of fractured fluids.

The Energy bill before this conference permanently exempts the oil and gas industry from storm water pollution activities at construction sites. Since 1990, large construction sites have been required to control storm water runoff in order to prevent pollution from entering adjacent waterways, harming wildlife and impairing water quality.

The irony of this is that the Senate will soon consider the transportation bill, the Surface Transportation Act. This act was amended in the Environment and Public Works Committee to mandate that States earmark at least 2 percent of their highway funds to deal with storm water runoff. While we are doing this to our public agencies, requiring them to devote substantial funds and attention to storm water runoff, we are permanently exempting the oil and gas industry at its construction sites from doing so.

Mr. President, I ask unanimous consent for an additional 3 minutes to complete my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAHAM of Florida. Mr. President, in the year 2003—this year—smaller sites were to have been required to adopt the same pollution controls which, since 1990, have applied to large projects. Under industry pressure, the EPA issued a 2-year extension for the oil and gas industry. All other sectors, including small municipalities, still have to comply. This section of the Energy bill adopts a permanent exemption for all construction at oil and gas sites, including those sites that held permits for over 10 years.

These are only some of the examples of environmental rollbacks in this Energy bill related to clean water, clean air, the National Environmental Protection Act, and other important enactments designed to protect the environment and the public health.

The Energy bill we have before us today cannot guarantee Americans that their energy future is secure. Returning to the illuminating remark of Yogi Berra, if we look at this legislation, we begin to get some sense of where we are headed.

With this Energy bill, we have written the next chapter in the book ''War On Our Children,'' and it describes the next battle: Drain America First, overlook conservation measures, ignore strategies to reduce depletion of domestic reserves.

The residue of these outdated ideas will undoubtedly stain the future. Our children and grandchildren will live in an America where water is more contaminated, where air is further clogged with pollution, where access to clean rivers and streams for drinking, swimming, and fishing will be diminished.

The cost of this destruction is not only economic or environmental, it is societal. Future generations will be forced to fix our mistakes instead of focusing on a better tomorrow for their children and grandchildren.

For these reasons, I strongly oppose this legislation and will vote no.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. VOINOVICH. Mr. President, I rise today in support of the conference report accompanying the Energy bill. As I have often stated, we sorely need to develop a long overdue comprehensive energy policy for our Nation. The United States has a responsibility to develop a policy that harmonizes the needs of our economy and our environment.

These are not competing needs. A sustainable environment is critical to a strong economy and a sustainable economy is critical to providing the funding necessary to improve our environment. We need to enact a policy that broadens our base of energy resources to create stability, guarantee reasonable prices, and protect America's security. It has to be a policy that will keep energy affordable. Finally, it has to be a policy that will not cripple the engines of commerce that fund the research that will yield environmental protection technologies for the future.

The legislation we are discussing today is the key element in our effort to construct a viable energy policy. It will provide a tremendous boost to our economy, protect our environment, and create hundreds of thousands of jobs. Let me say this again. Passage of this bill will provide a tremendous boost to our economy, protect our environment, and create hundreds of thousands of jobs.

There are four huge reasons that my constituents in Ohio need this bill: Ethanol, natural gas, electricity and jobs.

The fuel title in this bill will triple the use of renewable fuels over the next decade, up to 5 billion gallons by 2012. It will also reduce our national trade deficit by more than $34 billion, increase the U.S. gross domestic product by $156 billion by 2012, create more than 214,000 new jobs, expand household incomes by an additional $51.7 billion, and save taxpayers $2 billion annually in reduced Government subsidies due to the creation of new markets for corn. In other words, we will not have to use the subsidies to farms to the tune of $2 billion with this 5 billion gallons of ethanol.

The benefits to the farm economy are even more pronounced. Ohio is sixth in the Nation in terms of corn production and is among the highest in the Nation in putting ethanol into gas tanks. Over 40 percent of all gasoline sold in Ohio contains ethanol.

An increase in the use of ethanol across the Nation means an economic boost to thousands of farm families across my State.

Currently, ethanol production provides 192,000 jobs and $4.5 billion to net farm income nationwide. Passage of this bill will increase net farm income by nearly $6 billion. Passage of this bill will create $5.3 billion of new private sector investment in renewable fuel production capacity, and expanding the use of ethanol will also protect our environment by reducing auto emissions which will mean cleaner air and improved public health.

The use of ethanol reduces emissions of carbon monoxide and hydrocarbons by 20 percent. The use of ethanol also reduces emissions of particulates by 40 percent. The use of ethanol helped move Chicago into attainment of their Federal ozone standard, the only RFG area to see such an improvement.

In 2002, ethanol use in the United States reduced greenhouse gas emissions by 4.3 million tons. That is the equivalent of removing more than 630,000 vehicles from the roads.

Simply stated, this legislation is critical to our farm economy, especially in agricultural States such as Ohio. We need to get this bill finished.

We are in the midst of a natural gas crisis in the United States. Over the last decade, use of natural gas in electricity generation has risen significantly while domestic supplies of natural gas have fallen. The result is predictable: tightening supplies of natural gas, higher natural gas prices, and higher electricity prices.

Home heating prices are up dramatically, forcing folks on low incomes to choose between heating their homes and paying for other necessities such as food or medicine.

Donald Mason, a commissioner of the Ohio Public Utilities Commission, testified earlier here in Congress:

> In real terms, the home heating cost this winter will increase by at least $220 per household. That might sound not significant, but during the winter season of 2002 to 2001, one gas company in Ohio saw residential nonpayments jump from $10 million a year to $26 million a year.

As a result of these heating cost increases, 50 percent more residential customers were disconnected from gas service last year than in 2001.

I have personally seen my own natural gas costs go from $4 an mcf to over $8 an mcf. Projections indicate that this winter could be devastating on the elderly and low-income families who are already struggling to survive.

At a hearing last year, Thomas Mullen of Catholic Charities and Health and Human Services of Cleveland, OH, described the impact of significant increases of energy prices on those who are less fortunate.

He said:

> In Cleveland, over one-fourth of all children live in poverty and are in a family of a single female head of household. These children suffer further loss of basic needs as their moms are forced to make a choice of whether to pay the rent, or live in a shelter; pay the heating bill, or see their child freeze; buy food, or risk the availability of a hunger center. These are not choices that any senior citizen, child, or for that matter, person in America should make.

Manufacturers that use natural gas as a feedstock are getting hammered due to the doubling and even tripling of their natural gas costs and are either leaving the country or closing their doors.

Lubrizol, a chemical company located in Wickliffe, OH, which was at a manufacturers' listening session that I conducted a couple of weeks ago, is moving part of its workforce to France due to the tripling of natural gas prices in Ohio.

The president of Zaclon, Inc., a chemical manufacturer based in Cleveland, testified earlier this year that increased natural gas costs have resulted in loss of sales revenues and increased total energy costs.

The president of one major international pharmaceutical company stopped by my office—a company that has 22,000 employees in the U.S.—and basically said: Unless you do something about natural gas prices, we are moving most of these jobs to Europe.

Due to the natural gas crisis, the Dow Chemical Company, which is headquartered in Michigan, will be forced to shut down several plants, and they are going to eliminate 3,000 to 4,000 jobs.

The American Iron Steel Institute reported that an integrated steel mill could pay as much as $73 million for natural gas this year, up from $37 million last year.

An east Texas poultry producer reported that his poultry house heating bill jumped from $3,900 to $12,000 in 1 month, forcing him to decide between paying the bank or the gas company.

High natural gas prices have resulted in the permanent closure of almost 20 percent of the U.S. nitrogen fertilizer production capacity and the idling of an additional 25 percent.

The Potash Corporation, one of the world's largest fertilizer producers, has announced layoffs at its Louisiana and Tennessee plants due to high natural gas prices.

The company spends $2 million per day on natural gas.

I could go on and on and on about the natural gas prices. This bill is going to provide more opportunity to increase the supply of natural gas and help limit the exacerbating needs for natural gas in this country because of the fuel switching that is going on. The end result is a drag on our economy.

Don't take my word for it. Federal Reserve Chairman Alan Greenspan has testified before the Senate Energy Committee, the House Energy Committee, the Commerce Committee, and the Congressional Joint Economic Committee on the supply and price of natural gas. He did it this year. He stated:

I am quite surprised at how little attention the natural gas problem has been getting because it is a very serious problem.

This Energy bill includes several provisions to increase domestic production of natural gas and to ensure that we have a healthy, vital fuel mix for electric generation.

It is vitally important for us to finish this debate and pass this bill in order to relieve the pressure on our natural gas supply.

This bill helps provide money for clean coal technology and use a 250-year supply of coal. There are some people in this country who want to shut down coal and force our utilities to use more natural gas. This bill will increase the use of coal using clean coal technology and take the pressure off of energy companies fuel switching to natural gas.

Electricity is another issue for the people of Ohio. There has been a lot of conversation here on the floor over the last couple of days about the electricity title of the bill. Several of my colleagues have talked about the need to prevent blackouts such as the one we experienced in August. Let me say that as a Senator from Ohio where the blackout was triggered, I know about the need to prevent more blackouts. In fact, I held a hearing on this exact topic this morning in the Oversight of Government Management Subcommittee. The electricity title in this bill explicitly provides the Federal Energy Regulatory Commission with the authority to establish and enforce with penalties new national reliability standards that will be critical in helping to prevent future blackouts.

For my colleagues who are having a problem with this bill, I remind them that this title is so needed if we are going to prevent future blackouts.

It also provides the Federal Energy Regulatory Commission with new authority to site transmission lines, encourages utilities to invest in increased transmission capacity, and encourages utilities to invest in new clean coal technologies that will allow more electricity to be put into the grid without increasing the pollution put into the air.

At the oversight hearing that I held this morning, I asked the panel of electricity experts from the Federal Energy Regulatory Commission, the Department of Energy, and the North American Electric Reliability Council what we need in order to prevent future blackouts. Their response was overwhelming: Enact the provisions in the Energy bill, especially the reliability standards.

Finally, I want to talk about jobs created by this legislation. The Energy bill saves jobs. It will create nearly 1 million new jobs. The Energy bill will prevent the loss of hundreds of thousands of jobs, like the jobs lost in the manufacturing sector in the past 3 years, in part due to high energy costs, which I have discussed, and the devastating impact it has in my State, particularly manufacturing jobs, but jobs in all sectors, including manufacturing, construction, and technology.

Where are these other jobs going to come from? Natural gas and coal, more than 400,000 direct and indirect new jobs will be created through the construction of the Alaska national gas pipeline, while at the same time bringing an affordable energy supply to the lower 48 States. America's substantial investment in clean coal technology creates 62,000 jobs and ensures Americans new electricity that is abundant, reliable, affordable, and cleaner than ever before; 40,000 new construction jobs created by the construction of approximately 27 large clean coal plants; 12,000 full time permit jobs related to plant operation; 10,000 research jobs in the fields of math, engineering, physics, and science, with an estimated annual salary of $125,000. A lot of the research jobs will be created right in my State of Ohio.

The renewable fuel standard in the bill will create more than 214,000 new jobs and expand household income by an additional $51.7 billion over the next decade.

Building a first of its kind nuclear reactor to cogenerate hydrogen will create 3,000 construction jobs and 500 long-term high-paying, high-tech jobs.

A nuclear production tax credit will spur the construction of approximately four light-water nuclear reactors for a total of 6,000 megawatts of clean and affordable energy. This construction will create between 8,000 and 12,000 jobs. Running the plants will create 6,000 high-paying, high-tech jobs. The Price-Anderson renewal in this bill will protect 61,800 jobs and 103 plants nationwide.

Again, renewables, incentives for geothermal energy will bring between 300 and 500 megawatts of clean and renewable geothermal energy on line over the next 3 years that will create between 750 and 1,000 direct jobs and between 7,500 and 10,000 indirect jobs.

The fact is, this is a jobs bill. It will also do something else: It will prevent the loss of jobs. Mississippi Chemical and Yazoo City, MS, filed for chapter 11 bankruptcy protection in May due to financial losses attributed to the combination of depression in the agricultural sector and extreme volatility in the domestic natural gas area. In other words, plants are shutting down because of the high cost of natural gas. This will produce more natural gas in this country and take the heat off the rising cost of electricity in our country.

I have heard a number of my colleagues during the debate savage this bill, claiming it will devastate the environment, that it gives oil companies a free pass for MTBE contamination, and that it contains porkbarrel funding for energy companies. Unfortunately, this rhetoric is just another example of the old adage, you cannot let the facts get in the way of good judgment or a good argument. I will address a few of those most outrageous claims we have heard.

The first complaint raised by many of my friends is that the bill is bad for the environment. What are the facts? Here are the environmental benefits to this bill. By promoting greater efficiency and cleaner energy technology, the Energy bill will improve air quality, reduce greenhouse gasses, protect our natural resources, and provide a cleaner, healthier environment for the American people. The Energy bill will reduce environmental impacts by improving energy efficiency, conserving energy, and improving air quality to renew energy efficiency standards for energy-efficient products such as consumer electronics and commercial appliances.

It will provide tax incentives for energy-efficient appliances, hybrid and fuel cell vehicles, and combine heat and power products. It will authorize $1.2 billion over the next 3 years for weatherization assistance programs to help low-income families to make their homes more energy efficient and permanently reduce their energy bills. And it will increase dramatically the LIHEAP money that we will need during the next couple of years for the poor and the elderly so that they are not literally out in the cold.

It expands the use of renewable energy, requiring the Federal Government to purchase up to 5 percent of its electricity from renewable sources and encouraging the installation of solar panels on public buildings. It increases production of renewable energy resources, such as geothermal on Federal and tribal lands. It provides tax incentives for production of electricity from renewable energy such as wind, solar, biomass, and landfill.

Under this bill, the tax credits include $5.6 billion of tax incentives for thermal and for solar energy. We are going to see, as many of my colleagues have asked for the last couple of years, a lot more windmills and a lot more solar panels built as a result of this legislation.

It reduces the use of oil for transportation. It authorizes over $2.1 billion for the President's Freedom Car and hydrogen fuel initiatives to help reduce the use of oil for transportation needs.

This is a big issue in this piece of legislation. I have heard some of my colleagues say it will not do anything to reduce their reliance on oil. I have already talked about the contribution of reducing reliance on oil in terms of renewable fuels such as ethanol, but what it also does is invests substantial money in fuel cells that need to be moved along in this country.

As a Senator and as cochairman of the auto caucus, I have been in automobiles powered by hydrogen and that use fuel cells. This bill will start us on the way to a situation where my children, and for sure my grandchildren, will not be using oil to power their motor vehicles. We have to get on with it and get serious.

It creates new markets for renewable fuels for transportation such as ethanol and biodiesel to reduce the dependence on foreign oil. Expanding use of cleaner energy technologies is another issue in this bill, and modernizing our electricity grid with policies that promote the use of efficient distribution generation combined with heat and power and renewable energy technology. It authorizes a 10-year clean coal power initiative to enable the use of plentiful domestic coal resources with fewer environmental impacts.

It also improves the hydroelectric relicensing process to help maintain this nonemitting source of energy while preserving environmental goals.

The second complaint we have heard about is it contains provisions that give MTBE a free pass from any liability. Now, what are the facts? First of all, Congress has considered liability protections in a variety of settings, including medical care and educational institutions. This provision recognizes that when Congress mandates the use of fuel components and when those components have been studied and approved by the EPA, it is reasonable to disallow a case where the mere presence of a removable system fuel makes it a defective product. The safe harbor provision is intended to offer some protection to refiners that have been required to use oxygenated fuels under the Clean Air Act. They are being required to do it. We told them to do it. The safe harbor provision will not affect cleanup costs; it will not affect claims based on the wrongful release of renewable fuel into the environment such as a spill.

The suggestion is with the spills that are going on, we will not be able to sue those people responsible. Anyone harmed by a wrongful release would retain all rights under current law and would be able to recover cleanup costs just as they do now. Those responsible for releasing oxygenated fuels will be responsible for cleaning them up.

Federal and State environmental statutes such as underground storage tank laws will still apply if gasoline is released and gets into a well or contaminates a drinking water supply.

Critics have charged that this bill will throw all MTBE lawsuits out of court. They could not be more wrong. The safe harbor only applies to product liability claims and does not affect any claims that have been filed prior to September 5, 2003. In fact, at a hearing that I chaired on this topic in March of this year, we spent a significant amount of time discussing current litigation going on in Santa Monica, CA. The facts in this case are pretty clear. MTBE has contaminated the city's water, and the city has had to undergo costly remediation to clean up the contamination.

In that litigation it is worth noting that the oil companies have paid millions and millions of dollars for the cost of remediation and to bring in uncontaminated water to that community. I understand Santa Monica litigation is moving forward. Most importantly, this legislation will not change any aspect of that case. It will not cause any claims to be kicked out and will most certainly not cause the case to be dismissed.

Let me state this again: The safe harbor does not apply in cases such as this. It does not let the oil companies off the hook. It does not throw any litigation out of court. And it does not give anyone a free pass.

Now, a number of my colleagues have come to the floor during this debate and announced they will vote no on this bill because this safe harbor provision is contained in the fuels title. These Members are announcing they oppose the ethanol package purely for this reason. Cynically, I would like to say that, in my opinion, such an announcement is a statement that some of these Members have picked trial lawyers over farmers.

The third complaint that critics of this bill have lodged against it is that it contains unreasonable handouts for big energy and oil companies. What were the facts?

The authorizations and tax incentives contained in the bill are geared to promote the kinds of energy that our friends across the aisle and on this side of the aisle are calling for.

The bill includes incentives for renewable energy—$5.6 billion worth—such as wind energy, solar energy, and the use of biomass. As I mentioned, over 26 percent of all the tax incentives in this bill go to renewable energy.

The bill includes incentives for clean-burning natural gas production.

The bill includes incentives for clean coal technologies. These are the technologies that will allow utilities to continue to use coal without continuing to emit pollution into the air.

The bill includes incentives for increased energy efficiency and conservation.

I would like to read a letter that was sent to Senator DOMENICI. It is from the American Wind Energy Association, the Geothermal Energy Association, the National Hydropower Association, and the Solar Industries Association:

> Dear Senator, on behalf of the leading renewable energy trade associations, we are writing to urge your support for passage of H.R. 6. H.R. 6 contains several important provisions vital to the future of our industries. Its passage will help expand renewable energy production and spur job growth in the United States in the immediate future. We ask that you support the bill and vote in favor of any cloture motion filed on the conference report.

What is the downside of promoting clean-burning and renewable energy? Aren't these the same things that many have been attacking us for not including in the bill? This criticism is one more example of overheated rhetoric that, frankly, does not stand up to scrutiny.

If we do not pass this legislation, we will continue to see the hemorrhaging of jobs in America, especially in States such as mine, and we will lose all of the potential jobs that I have just outlined.

This is the largest jobs bill we have seen on the Senate floor in decades. It is my hope and expectation that the Senate will pass it. These issues have been in front of us for far too long—far too long.

Last year, when this was brought up, I spent 6 weeks on the floor of the Senate debating the Energy bill. We finally passed it in the Senate, and it died.

This year, we started out for 2 or 3 weeks and finally were able to enter into a compromise with the other side of the aisle and pass the bill that we passed last year so it could go into conference.

We have worked very hard on this piece of legislation. It is not perfect. There are people who have problems with it. But, overall, it is a very good piece of legislation. The result of not passing it—God only knows what would happen.

For example, this morning, when I had the hearing with the folks who are trying to do something about the blackout problem in this country, they indicated the only salvation for them is this Energy bill. They said: Please pass it, we need it now.

If we do not pass it now, then when are we going to get to mandatory renewable standards, with penalties, and get on with making sure we do not have more blackouts in the United States of America?

As I said, these issues have been in front of us for too long. Now that we are so close to the finish line, I ask my colleagues to vote for cloture on this bill, prevent a filibuster that will hurt our economy, cost us jobs, and hurt our environment. Most importantly—most importantly—we have never had an energy policy in this country. It is long overdue. It is long overdue. We need to

move on with this for the future of our economy, for our environment, and for our national security.

Mr. President, I suggest the absence of a quorum.

Mr. SCHUMER addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. SCHUMER. Thank you, Mr. President.

Mr. President, I appreciate that this debate is now coming to a close, and we will, evidently, vote on cloture tomorrow morning at about 10:30. It has been a long debate. It has been a good debate. I think it has been an elucidating debate. I think the longer we debate this bill, the more unfavorably it is looked upon by the American people.

I would like to make one general comment about the process before getting into the substance of the bill. I have tremendous respect for my friend from New Mexico, Senator DOMENICI. He is a fine man. We have worked together on legislation. I think he works hard. I think he is dedicated.

I have a very fond relationship with my former colleague from the House of Representatives, Congressman TAUZIN, head of the House Energy Committee. We came into the Congress together in 1980.

But no matter who it is, you cannot negotiate a bill with only two people in the room. Our ranking member from New Mexico, Senator BINGAMAN, was excluded. The Democratic side in the House was excluded. But it was not just the Democrats who were excluded; too, too many of the Members were excluded.

Why is it that those of us in the Northeast, Democrats and Republicans, think this bill is so bad for our region and our communities? Well, maybe it is because when you have a Senator from New Mexico and a Congressman from Louisiana negotiating the whole bill, there is not enough input from other parts of the country.

The beauty of the system that the Founding Fathers created—and that we have carried forward in our own fashion 215 years later—is that it understood those things, and it understood that we should not have a major bill negotiated by two people behind closed doors.

The fact that this bill is teetering on the edge of survival right now, I think, in part, is because of the process by which it was constructed. I hope we will not do it again.

If we should win our vote tomorrow, those of us who are arguing against cloture, I hope that the lesson will be learned. I hope we will have real debate and real conference committees.

I also hope that, even here, we do not make the same mistake of passing last year's bill and then just saying, ''Let it go to conference,'' which was a mistake, I think, made on our side as well.

The process works. It is long and slow and laborious, but it works.

Again, a bill that has so many goodies for so many people—that such a bill should be teetering on the edge of extinction, I think shows we ought to go back to the process, the open process, the process that has Members of various parts of the country represented, the process of debate and refinement, because that ends up making better legislation.

Now, I have a whole lot to say about this bill, but the hour is late. So I will just put my comments into two categories: one, what the bill contains; and, two, what the bill does not contain—neither of which makes me happy.

What the bill contains: There are some good provisions in this bill. I am not going to get up here and do a diatribe against these little narrow things that are there for everybody. There are a few in there for my State, too. I think those sometimes are the grease that makes good legislation move forward, but alone they are not enough to carry a bill, alone they are not enough to justify a bill.

Some of the bad things contained in this bill, as well as some of the things that are so missing from this bill, make a complete case against the bill.

To me, the two things that are in the bill that should not be, more than anything else, are the ethanol provisions and the MTBE provisions.

On the ethanol provisions, I would say this to my colleagues: We do have to find a substitute for MTBE. We do have to keep our air clean. And ethanol is a good way to do it. I am not against ethanol per se. What I am against is mandating ethanol for every region in the country whether it fits or not. Ethanol would be a good standard to meet the oxygenate requirements in areas where there is abundant corn and abundant ethanol manufacturing facilities. But in many regions of the country, particularly on the coasts, there is not. And there are better ways to meet the clean air standards.

Refiners in my area say that by changing the blend and changing the method of refining, they can do just that without ethanol. And they will do that to meet the oxygenate clean air standards. But this bill has the nerve—that is the only way you can put it—to require them to buy ethanol anyway or at least buy ethanol credits. I have never quite seen anything like it.

Ethanol is a very subsidized product with many different types of advantages. Corn growers get all sorts of subsidies. I am not against those subsidies. I think we need to have a farming community. And just as we need dairy farmers in New York, we need corn growers in the Midwest and other places. But I wouldn't dare require people in the Midwest to buy some kind of dairy product made in New York for some other purpose. I might subsidize the product and say: Go out in the free market and make it work. But I wouldn't force them to do it. This goes a step beyond anything we have ever done in this Chamber.

If we wanted to help the corn growers and we are not helping them enough through the Agriculture bill, then let the Government do it. But the ethanol bill says to the traveling salesmen in upstate New York: You are going to do it. It will raise the price of gasoline 4 to 10 cents a gallon in my area.

How can anyone in this Chamber ask those of us from the Northeast and the West to impose that kind of gas tax on our constituents? It is just unfair. It is just wrong. I, for one, resent it. Again, if you want to subsidize the corn growers, do it. But not in this inefficient, unfair, regionally slanted way. Therefore, I very much oppose the ethanol provision.

My folks can't afford another 4 to 10 cents a gallon, likely to be 7 or 8 cents a gallon. Gasoline is high enough. We should be doing things to lower the price of gasoline. In that one fell swoop, all the good in terms of trying to produce alternative fuels will be undone.

Probably even worse in terms of its egregiousness, in terms of its arrogance, in terms of its nerve, its gall, is the MTBE provision. Parenthetically, I say to my friend from Ohio who said it doesn't stop lawsuits, it certainly does. It doesn't stop lawsuits if the little gas station on the corner was negligent. But if you have lost your home to MTBEs, you are not going to get anything out of that little gas station.

We know the only way that homeowners are going to get recompense here. It is through the oil companies, the producers of MTBEs. And those suits are prohibited.

So it is small comfort to the thousands of citizens in Fort Montgomery or in Hyde Park or in Plainview, NY, different communities in different parts of our State who have lost use of water in their home.

This is not just some environmental fetish. I have visited these homes. I feel for these people. Every time your child wants a bath or shower, you have to get in the car and drive a mile. You must use bottled water. For most of the people I know—these are middle class people, not rich people—the value of their home has been it. All they have been able to do is save for their home, and it is gone.

Now you say: Well, we are just going after the oil companies because they have deep pockets. Bunk. The bottom line is, the oil companies knew, the producers knew this was harmful. And here is the rub: They didn't tell a soul. It is not simply that they didn't produce it, but they didn't tell a soul. When they sold the gasoline with MTBE to the gas station down the street, they didn't say: Be careful. They didn't say: If you sit on top of an

aquifer or a well, maybe you shouldn't use it. They didn't say: Make sure your tanks don't have leaks because this is dangerous stuff if it leaks into the water. They didn't say any of that.

Had the oil companies, the MTBE producers, come clean and let people know that this might be harmful and that they ought to take remediation the minute there is a spill and deal with prevention so there wouldn't be spills, we would not be asking that they be sued.

The analogy is to the cigarette industry in the sense not that the product was harmful, not even that people might have known it was harmful—that is probably true in each case—but, rather, that it was kept secret. It was concealed. People didn't have the ability, the choice, to prevent the harm from occurring.

The suits have been successful. My friend from Ohio just mentioned the suit in Santa Monica. Hundreds and hundreds of suits like that will be stopped if we pass this legislation.

I wish every one of my colleagues had come with me to Fort Montgomery, a little community in the hills overlooking the Hudson, a few miles south of West Point. The people there are mostly retired soldiers, not generals, rather, they are captains and majors and sergeants. It is a modest community. They worked hard for their country and they served their country. All they have is these little homes. And look at their faces. They all gathered one fall afternoon on someone's front lawn and talked to me. They are lovely people. They said: We don't want any money; we are not suing for money.

This isn't one of these lawsuits where they say, ''Give us millions of dollars,'' and claim some alleged damage. I don't like those lawsuits. In fact, right now we are trying to put together a class action bill that would make the lawsuits fairer. But the lawsuits were their recourse. The oil companies were beginning to negotiate with them, either to put filters on their water or to help build a new system.

If this bill passes, these people will have two terrible choices: Sell their home at maybe the half the value it was a few years back before MTBE leached into their water supply, or spend thousands and thousands and thousands of dollars each year, each taxpayer, to build a whole water system.

Who is more to blame? The company that produced the MTBE and didn't tell people it was harmful, although they knew it, or these majors and sergeants and captains who served their country for years and have lost just about everything they have had?

That story can be repeated in many parts of New York and many parts of California and many parts of New Hampshire and many parts of Iowa and many parts of America. We should not allow it to happen.

As I said, I am not the leading advocate on our side of the aisle of lawsuits as a solution to everything. I would much rather see government regulation than lawsuits. But if there was ever a situation where lawsuits are justified, it is here.

What is infuriating is we are giving the MTBE industry $2 billion for closing. My friend talked about the money for LIHEAP. It is good that it is in the bill, but it is an authorization. Every time we do the appropriations bill, we don't come close to the authorization level. That is not real money. Put that $2 billion into LIHEAP, real money. But here we are, instead, giving it to the MTBE producers for closing down.

Do we give money to the little drycleaner shop that has to close down even though the blood and sweat and tears of the person who ran it are real? Do we give money to other businesses that have closed down, the thousands in my State, because maybe our country has not done enough to defend them from unfair trade practices? No. But not only do we give this industry $2 billion as recompense for closing down, but then we protect them from liability. This bill chooses those companies over tens of thousands of innocent homeowners. It is an egregious decision, and it shall not pass—if we have anything to do with it.

Those two provisions are at the top of my list as the most egregious in the bill. I will tell you what bothers me just about as much. It is not just what is in the bill, it is what is not in the bill. As everybody who has come to the floor to speak has said, we need an energy policy in America. This bill is a hodgepodge of little things, without much of an energy policy. It is a stitching together of a coalition of individual ideas. I like the tax deductions for the renewables. The reliability provisions don't go far enough, as far as I am concerned, but at least there is a step forward there. But there is no real energy policy.

Mr. President, 9/11 showed us many things, and one thing it showed us is that we have to be independent of Middle Eastern oil. The best and quickest way to do that is by some measure of conservation, and it is MIA in this bill. When China can pass CAFE standards more significant, more stringent than our own, this country is headed for a fall. If we cannot tighten our belts now, before there is a crisis, then something is wrong with the way our country is governing itself. Yet there is virtually nothing in terms of oil independence and conservation. Even the rather modest provisions that the Senator from Louisiana put in the Senate bill are gone. Again, on issue after issue, that occurred—issue after issue after issue.

There is no real conservation measures, at a time when we cry out. If you ask experts what is most needed in terms of our energy policy, it is conservation. We can increase production, and we can try to do experiments with coal or nuclear or hydrogen or whatever you want, but those are 10, 15 years down the road. We can talk about the timetables. I disagree with my friend from Ohio on that. The quickest way to do it is by conservation. We are not doing it.

Then we have the blackout in the Northeast. It cried out for a national grid to make our electricity system like our highway system, where the Government has direct and fairly strict oversight of the means of transportation—in one case of cars, and in another of electricity. And we do the most modest of steps—after we got a huge warning.

The report yesterday showed how little oversight there is, how little coordination there is. One energy company in Ohio and one voluntary organization in part of Ohio dropped the ball. My view is simple. This ought to all be done not by the electricity companies, which have a dramatic interest against spending the money to make the transmission wires work because that is not where they want to make money. It is not a cost that brings them a big rate of return. We should turn that over to FERC and let them set the standards and require the companies to meet it.

This bill doesn't come close to that. Once again, a shot across the bow, so close to us, and we do virtually nothing. The special interests—the Southeast doesn't want to be part of a national grid. Fine. They don't want to give up any rights or be governed by rules that might be good for the common good. Fine. The grid provisions here, better than much of the bill, leave so much to be desired and are emblematic of this bill. The special interests say jump and the bill says, How high? No energy policy. And the same with the problems we have had with deregulation and the sale of electricity out in California and in the West. I am not an expert on that, but my colleagues from California and Washington State have talked about that. We are MIA.

So instead of a coherent energy policy, which the times cry out for, we have a mishmash of goodies, of nods in the direction of the best parts of the bill, and away from some very bad things that hurt many parts of our country.

It is no wonder, Mr. President, that editorial pages across the country have condemned this bill in a way we have not seen in a long time. There is virtually no division. Frankly, I have not seen one article, one editorial—I have probably missed it—that defends this bill. The New York Times—probably the leading liberal editorial page—and the Wall Street Journal—the leading conservative editorial page—I think on the same day said, ''Don't vote for this

bill.'' And they are joined by about everybody in between. That is not just the media ranting and raving and not understanding the realities, or being too much in their ivory tower, or on their high horse, which I will be the first to admit happens all the time. That is because there is something wrong with this bill.

So it is my view that we are better off going back to the drawing board, open up the process, include the ranking member from New Mexico of the committee, and include the members of the committee, debate the bill even if it takes a few weeks. I guarantee you that we will get a much better bill.

This bill is an overall negative for what it contains and for what it doesn't. We can and must do a lot better. If we defeat cloture tomorrow, we will.

I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FRIST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. FRIST. Mr. President, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

REGARDING SOUTH AFRICA'S NEW HIV/AIDS POLICY

Mr. DASCHLE. Mr. President. I rise to express my strong support for a decision taken over the last several days in South Africa.

On Wednesday, South Africa's cabinet approved a plan for government-sponsored HIV/AIDS treatment programs. Though late in coming, the decision had to be received as good news by South Africa's five million people infected with HIV. In a country where 600 people a day die of complications from AIDS, this is a life-saving announcement.

Many of us feared we might not ever see this day. In August 2002, I sat with President Mbeki in Pretoria. His response to the AIDS crisis in his country was disheartening, even disconcerting. But he and his government have come a long way.

We must be sure that we do our part now, Mr. President. I gather that the Foreign Operations and Labor-HHS conferences have agreed to provide $2.4 billion in global AIDS funding for FY 04. That is welcome and positive news. But it is still less than we promised the world, and given that 16,000 people a day contract this deadly virus we cannot afford to break that promise again next year.

We will also have to take a look at the assumptions that are underlying our current AIDS policy. The President laid out an ambitious emergency AIDS program for the 14 countries hit hardest by this virus. With a robust prevention and treatment program coupled with aggressive recruitment, training and retention of qualified medical personnel, we will make a difference in those countries.

But this pandemic is moving. While we act aggressively in these 14 countries, we cannot afford to maintain just the status quo in the countries who are threatened with the next wave of this crisis. Recent studies in India suggest that the epidemic in that one country could match if not overwhelm the suffering we have already seen in Africa. In China, government mismanagement and poverty are contributing to an acceleration of the pandemic, and eastern Europe and Russia are seeing alarming rates of infection that threaten to overwhelm the weak health care infrastructures in those tenuous democracies.

This is a huge challenge. We have begun to take some important steps to address it, but we are a long way from done.

TRIBUTE TO UNIVERSITY OF LOUISVILLE ATHLETIC DIRECTOR TOM JURICH

Mr. McCONNELL. Mr. President, November 5, 2003, brought many reasons for celebration in Kentucky. First, my friend, Ernie Fletcher was celebrating his victory in the gubernatorial election, making him the first Republican to hold that office in 32 years. The same day, the University of Louisville, my alma mater, was celebrating its acceptance into the Big East Conference. On that day, my local paper, The Courier-Journal, highlighted both of these achievements on the front page—a great day to be a Republican and a Cardinal.

The man who orchestrated U of L's rise to the Big East is my friend, Tom Jurich, the university's athletic director. Since his arrival in 1997, Tom has worked diligently to improve Louisville's athletic department. In recent years, he has hired two outstanding coaches, football coach Bobby Petrino and basketball coach Rick Pitino. He also has secured U of L's place as one of the top athletic programs in the country. Tom's hard work and dedication should be commended.

I close by quoting Tom from the November 5, 2003 edition of The Courier-Journal. He said:

> It's a wonderful day to be a U of L fan. And it's a wonderful day to be a Cardinal student-athlete. But it's a hell of a great day to be the athletic director at the University of Louisville. This has been a six-year work in progress This puts us on a level playing field.

This U of L alum is one happy fan, and I thank my friend for all he has done for the University of Louisville Athletic Department. I ask unanimous consent that the following article from The Courier-Journal be printed in the CONGRESSIONAL RECORD to document this historic day: ''Under Tom Jurich, Louisville's star has risen in the East.''

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Courier-Journal, Nov. 5, 2003]

UNDER TOM JURICH, LOUISVILLE'S STAR HAS RISEN IN THE EAST

(By Pat Forde)

At 10 o'clock yesterday morning, a wrinkled Big East Conference banner was stretched across a table in Kenny Klein's office at the University of Louisville.

The worst-kept secret in college athletics was literally—and finally—on the table. Welcome to a banner day on Planet Red.

Klein, the associate athletic director for media relations, is in his 21st year at U of L. He has been a loyal soldier through the glory and the gory—from an NCAA championship to NCAA probation, from the Fiesta Bowl to 1–10. He ranks yesterday among his very proudest days on the job.

''For the whole, encompassing factor of the athletic department and university, it's as big as anything we've done,'' Klein said. ''We're poised to make an absolute leap, I think.

''It's really neat because you work so hard to build something, a total department, and to see it come to fruition is just a great feeling. Until now you've had that little stigma, even though we knew we can compete. The stigma's gone.''

After six years of unwavering effort by athletic director Tom Jurich, the stigma is gone. After some of the most skillful, steely and inspired personnel moves in recent college sports history reinvigorated football and men's basketball, the stigma is gone. After a committed campaign to improve U of L's shady NCAA-compliance image, low-budget facilities and neglected non-revenue sports, the stigma is gone.

The news that U of L will leave Conference USA in 2005 (at the latest) for the Big East did not pack the focused emotional wallop of beating UCLA in Indianapolis in 1980, Kentucky in Knoxville in '83, Duke in Dallas in '86 or Alabama in Tempe in '91. But those were ephemeral moments, followed (eventually) by hard times. This victory could have a permanent effect on exposure, recruiting, finances and winning—if the Bowl Championship Series situation works itself out.

That's a significant ''if,'' but Jurich expressed confidence that the new Big East won't lose its place at the big table. And if there is one thing Cards fans have learned to do, it's to trust Jurich's vision.

''He really had to change the culture for six years to make this happen,'' said senior associate athletic director Julie Hermann. ''This is a benchmark, a defining moment.''

The defining moments keep piling up for Jurich. The man who hired John L. Smith, Rick Pitino and Bobby Petrino now has brought the entire athletic department up to a level it has strived to reach forever.

Jurich took over on Oct. 21, 1997. Yesterday he jokingly said his first call to Big East headquarters came the following day. In reality he took a few months getting a grip on

the U of L program, then put in a call to see where the Cardinals stood.

''It fell on deaf ears,'' he said.

There is a cure for deafness: persistence, a plan and the power of Pitino.

''We just kept at it and kept at it,'' Jurich said. ''And when we got Rick, I think the possibilities became a lot clearer.''

The possibilities could become crystal-clear probabilities by 2005. Pitino is pointing for a Final Four-level season in 2004–05 and could move the Cards immediately to the top of a 16-team Big East megaheap. Football coach Bobby Petrino will be in his third year, with a number of today's young talents in starring roles. If the non-revenue sports step up—most notably women's basketball—U of L could enter the Big East on a serious roll.

The trajectory of Louisville's climb grew steeper in recent years, but the gradual ascent began decades before. This is a school that once was a member of the Ohio Valley Conference, just another regional athletic program in a state owned by Big Blue. This is a school that once gave away football tickets with a tank of gas at convenience stores, a school that once had non-revenue facilities that would embarrass some high schools.

''It's been a slow progression, but this is a great day for the athletic department,'' U of L trustee and 1970s basketball hero Junior Bridgeman said. ''It's not a culmination, just the next step. But it's a great time, and everyone should share in the joy.''

Said Charlie Tyra, a basketball star from the 1950s: ''This is another step in the direction they want to get. Hopefully, this is the big step.''

It's big enough to say that Louisville is now officially Big. Big enough for the Big East. Big enough for the big boys of college athletics. Big enough to have something Big Brother in Lexington lacks: membership in what will be the best basketball conference going.

This is a league big enough to find on every map. Trips to Hattiesburg, Birmingham and Greenville are out. Philadelphia, Washington and the Big Apple are in.

It's big enough to find every March. As recently as 1994, Louisville was playing in the Metro Conference Tournament in the Mississippi Coast Coliseum in Biloxi. Now it has signed on to play its league tourney on the most famous hardwood in the world at Madison Square Garden.

It's big enough to keep a football coach happy. U of L lost the two best it ever had—Howard Schnellenberger and John L. Smith—because of conference affiliation. Today Petrino, a star-in-the-making, believes he has everything he needs to chase what had been unattainable: a national championship.

Schnellenberger, Denny Crum and Bill Olsen vaulted Louisville athletics forward dramatically in the 1980s and early '90s. That shouldn't be forgotten today when measuring how far the Cards have come. But by the time Jurich arrived, the school's isolationist athletic stance had outlived its usefulness.

As the conference landscape had begun to change, U of L hadn't changed with it. Hogging TV and postseason revenue and pipe-dreaming of football independent status wasn't helping make the Cards an attractive modern program. In fact, it nearly cost them membership in C–USA at a time when, as Jurich pointed out, ''Louisville needed Conference USA much more than Conference USA needed Louisville.''

Today Louisville is easily the most vibrant, viable and attractive school in the league. And in 2005 it will commence aiming even higher.

You want billboard material? You've got it. Louisville might not be the Best College Sports Town in America, but it's a better one today than it ever has been.

Before the official announcement yesterday, Klein stood at a podium in the U of L football complex, preparing to make introductions. Someone flipped a switch, and behind him a projection screen rolled up.

Behind the screen was the Big East banner that had been sitting on the table in his office earlier in the day. The symbolic wrinkles had been ironed out. And as the screen rolled up, Klein couldn't help but smile.

TRIBUTE TO MONA VANNATTER

Mr. MCCONNELL. Mr. President, I rise today to honor Mona Vannatter. On December 31, 2003, Mona will be retiring after 20 years of service at the Kentucky Rural Development State Office.

Raised in Anderson, IN, Mona graduated from Ball State University with an associate's degree. However, in 1978, she moved to the Bluegrass State with her husband, Steve, and their two daughters, Kristi and Sheri. Though a Hoosier by birth, Mona is a Wildcat at heart.

In 1983, Mona became the secretary to the State director of the Kentucky Rural Development State Office. Since that time, she has proven to be a dedicated and talented employee. Her colleagues praise her as a wonderful representative of the office who genuinely cares about the Kentuckians with whom she interacts. In 2003, Mona was recognized for exemplary performance as secretary to the State director. For the past several years, she has also donated her time and energy to coordinating the United Way Combined Federal Campaign for the agency and successfully reaching the Rural Department goals.

Mona brings the same enthusiasm and energy to her life outside of work. An active member of Broadway Christian Church, Mona served as secretary for her Sunday school class and co-coordinator for God's Pantry. She taught a self-improvement class at the Women's Federal Prison Camp, bringing a positive influence and an optimistic outlook to those who need it most.

For two decades, she has been a dedicated employee of the Kentucky Rural Development State Office. Mona continually proves to be a positive influence in both her workplace and her community. I ask each of my colleagues to join me in thanking Mona Vannatter for all that she has done for her community, the commonwealth of Kentucky, and this great Nation.

HONORING OUR ARMED FORCES

Mr. GRASSLEY. Mr. President, I rise today in honor of a fellow Iowan and a great American, CWO4 Bruce A. Smith, who recently gave his life in service to his country as a pilot in Operation Iraqi Freedom. Chief Warrant Officer Smith was killed on November 2, 2003, after his helicopter was attacked by a surface-to-air missile 40 miles west of Baghdad in central Iraq. He is survived by his wife Oliva, his 15-year-old daughter Savannah, his 12-year-old son Nathan, his sisters Carol and Brenda, and his brother Brian, as well as numerous other family members, friends, and loved ones. Our deepest sympathies go out to the members of Chief Warrant Officer Smith's family and to all those who have been touched by his untimely passing.

Our Nation's strength resides in the hearts of the men and the women who serve in its defense. The liberties we prize and the freedoms we cherish would not exist if it were not for those who courageously risk their lives while serving in our Nation's Armed Forces. Although our history books are filled with the names of those great patriots whose actions defined our Nation's founding, and although we stand in awe of our fathers and our grandfathers for the heroism they displayed during the great wars of the 20th century, from time to time we are reminded that men and women of such stature can still be found defending our Nation and our way of life.

Today, we pay tribute to one such man, CWO4 Bruce A. Smith. Chief Warrant Officer Smith enlisted in the Iowa Army National Guard as a senior in high school, serving his Nation with distinction for more than 23 years, first as a medic and then as a pilot, before losing his life in Iraq. Chief Warrant Officer Smith's exemplary career in the National Guard, his commitment to his family, and his sense of duty attest to his character as an outstanding American.

As I stand before you today to honor a fallen patriot, I would also like to use this opportunity to extend my deepest sympathies to Chief Warrant Officer Smith's loved ones. While we share their grief, we cannot possibly fully understand their sense of loss. We owe them a debt that can never be repaid and I know they will be in the thoughts and prayers of many Americans

CWO4 Bruce A. Smith has entered the ranks of our Nation's great patriots, and his courage, his dedication to duty, and his sacrifice are all testaments to his status as a true American hero. Let us always remember Chief Warrant Officer Smith's service to our Nation.

I also speak today in honor of a fellow Iowan and a great American, SGT Paul F. ''Ringo'' Fisher, who recently gave his life in service to his country as part of Operation Iraqi Freedom. On November 2, 2003, the helicopter in which Sergeant Fisher was riding was forced to make a crash landing about

40 miles west of Baghdad after being struck by a shoulder-fired missile. Sergeant Fisher sustained multiple injuries in the crash, which ultimately led to his death 4 days later on November 6, 2003, at the Homburg University Klinikum in Homburg, Germany. Sergeant Fisher is survived by his wife Karen, his stepson Jason, his mother Mary, his sister Brenda, and his brother David, as well as numerous other family members, friends, and loved ones.

I ask my colleagues in the Senate and my fellow citizens across our great Nation to join me today in paying tribute to Sergeant Fisher for his bravery, for his dedication to the cause of freedom, and for his sacrifice in defense of the liberties we all so dearly prize. The selflessness of a soldier is unmatched in the history of human endeavors, and mankind knows no greater act of courage than that displayed by the individual upon sacrificing his life for his countrymen, their liberty, and their way of life.

Although we honor Sergeant Fisher as a fallen patriot, we must also pay special tribute to his loved ones whose grief we share, but whose sense of loss we cannot possibly fully understand. My deepest sympathy goes out to the members of Sergeant Fisher's family, to his friends, and to all those who have been touched by his untimely passing. Although there is nothing I can offer that will ever compensate for their loss, I hope they will find some comfort in the thoughts and prayers of a grateful Nation who will be forever in their debt.

Our national history is filled with ordinary men and women who sacrificed their lives in service to our country. An avid student of history, Sergeant Fisher enjoyed learning about the heroes who preceded him, especially those who brought our Nation through the great wars of the 20th century. It is thus with great solemnity that we today pay tribute to SGT Paul F. ''Ringo'' Fisher, who has himself attained heroic status, having joined the ranks of our Nation's greatest patriots and history's most courageous souls.

SENATOR ROBERT C. BYRD, FDR, FREEDOM FROM FEAR, AND COURTING YOUR GIRL WITH ANOTHER BOY'S BUBBLE GUM

Mr. KENNEDY. Mr. President, it is an honor to take the floor now to join all Senators on both sides of the aisle in extending our warmest birthday wishes to the Senator who in so many ways is respected as Mr. United States Senate by us all, our friend and eminent colleague from the State of West Virginia, Senator ROBERT C. BYRD.

Senator BYRD is 86 years young today, with the emphasis on ''young,'' because he truly is young in the same best sense we regard our Nation itself as young, inspiring each new generation to uphold its fundamental ideals of freedom and opportunities and justice for all.

Senator BYRD's personal story is the very essence of the American dream, born to a hard life in the coal mines of West Virginia, rising to the high position of majority leader, a copy of the Constitution in his pocket and in his heart, insisting with great eloquence and equally great determination, day in and day out, year in and year out, that the Senate, our Senate, live up to the ideals and responsibilities that those who created the Senate gave us. Washington, Adams, Jefferson, Madison, Franklin, Webster, Clay, Calhoun—they each live on today in Senator ROBERT BYRD, and they would be proud of all he has done in our day and generation to make the Senate the Senate it is intended to be.

On a personal note, I am always very touched on this day in remembering the unusual coincidence that Senator BYRD was born on the same day as my brother Robert Kennedy and in the same year as my brother, President Kennedy, and was married on President Kennedy's birthday.

In the many years we have served together, he has taught me many things about the Senate, especially how to count votes. He did me one of the biggest favors of my life, although I did not feel that way at the time. On that occasion over 30 years ago, we were each certain we had a majority of democratic votes. We couldn't both be right, and Senator BYRD was right. All these years later, like so many others among us, I still learn from his eloquence whenever he takes the floor and reminds the Senate to be more vigilant about living up to our constitutional trust.

Senator BYRD has received many honors in his brilliant career, and the honor he received last Saturday in Hyde Park in New York was among the highest. He was honored with The Freedom from Fear Award by The Franklin and Eleanor Roosevelt Institute. The award is named for one of the Four Freedoms—freedom of speech, freedom of worship, freedom from want, and freedom from fear—in President Roosevelt's famous State of the Union Address to Congress in 1942, a few weeks after the Second World War began. The award also harks back to FDR's First Inaugural Address in 1933, in which he rallied the Nation from the depths of the Great Depression with the famous words, ''The only thing we have to fear is fear itself.''

In his address accepting the award, Senator BYRD emphasized the importance of renewing our dedication to the Nation's ideals in the very difficult times we face today, when the temptations are so great once again to put aside our freedoms in order to safeguard our security. As Senator Byrd said so eloquently, in a lesson each of us should hear and heed:

> Carry high the banner of this Republic, else we fall into the traps of censorship and repression. The darkness of fear must never be allowed to extinguish the precious light of liberty.

Senator BYRD's address in Hyde Park also contains a very beautiful and moving passage about the person who has been his lifelong best friend and strongest supporter all through these years, the coal miner's daughter he married 66 years ago, his wife Erma.

I wish them both many, many happy returns on this special day, and I ask unanimous consent that Senator BYRD's extraordinary address on receiving the Roosevelt ''Freedom from Fear'' Award be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COURAGE FROM CONVICTION

I thank Ann Roosevelt and William ''Bill'' vanden Heuvel (the Great!) and the Board of the Roosevelt Institute for this distinct, unique honor. I also thank my colleague, a colleague sui generis. Yes, Senator Hillary Clinton came to my office and she said that she wanted to be a good senator. And she said, ''How shall I do it? How shall I go about it? I want to work for the people of New York. I want to be a good senator.'' And I did say, ''Be a work horse, not a show horse.'' She took that to heart, and she has been a fine senator. She has never forgotten that admonition. She has been a good senator and I am delighted to be here in her state this morning. This is an extraordinary award, for which she recommended me so graciously.

I am humbled to be deemed a practitioner of President Roosevelt's great vision. I am proud to be associated once again with my friend and quondam colleague, former Senator and Senate Majority Leader George Mitchell. Ah, what a shame, as we have witnessed the lowering of the Senate's standards. And how proud I would be to be able to vote for a great federal judge to grace the Supreme Court of the United States, George Mitchell. I would have no doubt that he would honor this Constitution of the United States of America. And I hope that, I trust that, the Great Physician, the Great Lawgiver, might bless me so that I might live to see that day.

I congratulate the other exceptional laureates, and I am proud to be their colleague. I am proud to be numbered with the previous Four Freedom recipients.

Franklin Delano Roosevelt—ah, the voice! I can hear it. I can hear it yet as it wafted its way through the valleys, up the creeks and down the hollows in the coal camps of Southern West Virginia. That voice—there was nothing like it. Franklin Roosevelt was a man of tremendous courage. A leader of uncommon vision and optimism. An orator of compelling passion. He looms large, oh so large, in my boyhood memory. I grew up in the home a of coal miner. I married a coal miner's daughter. I thank her today for her guidance, her advice, her constant confidence in me that she has always shown.

Studs (Terkel), I tell you how I won the hand of that coal miner's daughter some 66 years ago. We had in my high school class a lad named Julius Takach. He was of a Hungarian family. His father owned a little store down in Cooktown, about 4 miles from

Stotesbury, where I grew up. And each morning, Julius Takach would come to school with his pockets full of candy and chewing gum from his father's store's shelves. I always made it my business to greet Julius Takach at the schoolhouse door upon his arrival! And he would give me some of that candy and chewing gum. I never ate the candy. I never chewed the chewing gum. I proudly walked the halls of Mark Twain High School to see my sweetheart as the classes changed, and I gave her that candy and chewing gum. Now do you think I told her that Julius Takach gave me that candy and that chewing gum? Why, no! Studs, that's how you court your girl with another boy's bubble gum!

The stock market crashed in October 1929. I was 12 years old. I had $7 that I had saved up selling the Cincinnati Post. I had that $7 in the bank at Matoaka, West Virginia. The bank went under, and I haven't seen my $7 since. I struggled to find my first job working at a gas station during the Great Depression. I was 24 when the Japanese bombed Pearl Harbor.

I can remember the voice of President Roosevelt on the radio in those days. His voice carried over the crackle and static of my family's old Philco set. President Roosevelt understood the nation. He understood its history. He understood its character, its ethos. He understood the Constitution. He respected the Constitution.

In Marietta, Ohio, in 1938, President Franklin Delano Roosevelt said: ''Let us not be afraid to help each other—let us never forget that government is ourselves and not an alien power over us. The ultimate rulers of our democracy are not a President and senators and congressmen and government officials, but the voters of this country.'' President Roosevelt was right.

Especially in these days, when we find ourselves in dangerous waters, I remind the nation of President's Roosevelt's charge: the government is ourselves. I have called on my colleagues in Congress to stand as the Framers intended.

I saw them tearing a building down
A group of men in a busy town
With a ''Ho, Heave, Ho'' and a lusty yell
They swung a beam and the sidewall fell.

I said to the foreman, ''Are these men skilled?
The type you would hire if you had to build?''
He laughed, and then he said, ''No indeed,
Just common labor is all I need;
I can easily wreck in a day or two,
That which takes builders years to do.''

I said to myself as I walked away,
''Which of these roles am I trying to play?
Am I a builder who works with care,
Building my life by the rule and square?
Am I shaping my deeds by a well-laid plan,
Patiently building the best I can?
Or am I a wrecker who walks the town
Content with the labor of tearing down?''

That's what we see today. I call on my colleagues to stand as the Framers intended, as a check against an overreaching executive. I have urged the people of America to awaken to what is happening and to speak out against those who would tear down the fabric of Constitutional liberty. To speak out, for it is the duty of each citizen to be vigilant to what his or her government is doing, and to be critical, if need be. It is not unpatriotic to speak out. It is not unpatriotic to ask questions. It is not unpatriotic to disagree. Speak out, lest the right of dissent, the right to disagree, be trampled underfoot by misguided zealotry and extreme partisanship.

I have been in Congress now close to 51 years, longer than any other person—out of 11,707 individual persons who have served in the House or Senate or both—with the exception of two. And I have never seen such extreme partisanship; such bitter partisanship; such forgetfulness of the faith of our fathers, and of the Constitution. Never have I seen the equal of what I have seen in these last three years.

But let us not fear. The individual mind remains an unassailable force. The individual voice can inspire other to act. A single act of bravery can lead an army against great odds. At a time when dissent is labeled unpatriotic, the strength of a single individual can give hope to the hopeless, voice to the voiceless, power to the powerless.

''The iron will of one stout heart shall make a thousand quail. A feeble dwarf, dauntlessly resolved, will return the tide of battle, and rally to nobler strife the giants that had fled (Martin F. Tupper, 1810–1889).''

During these troubled times, the legacy of Franklin Eleanor Roosevelt is not forgotten. Again, I thank Ann Roosevelt and the inimitable William vanden Heuvel (the Great!), and the Board of the Roosevelt Institute for this great honor. I thank again my protege in whom I have great pride, Senator Hillary Clinton. And I thank each of you here this morning. This day has inspired me to carry on with new energy.

I close with words from President Roosevelt's first inaugural address: ''[T]he only thing we have to fear is fear itself—nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance.''

If I may be so bold as to add, let us take courage from conviction. Carry high the banner of this Republic, else we fall into the trap of censorship and repression. The darkness of fear must never be allowed to extinguish the precious light of liberty.

May we remember the words of the Scripture (Proverbs 22:28): ''Remove not the ancient landmark, which thy fathers have set.''

EXPANSION OF NATIONAL SECURITY LETTER AUTHORITY IN INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2004

Mr. LEAHY. Mr. President, yesterday saw passage of yet another example of this Administration's secret efforts to further expand secret powers of the FBI. The FBI can now use National Security Letters, NSLs, which do not require approval by a court, grand jury, or prosecuting attorney, to demand confidential financial records from car dealers, pawn brokers, travel and real estate agents, and other businesses, and to prohibit the business from disclosing that the records have been sought or obtained.

There is no requirement that the FBI demonstrate a need for such records. It need only assert that the records are ''sought for'' an intelligence or terrorism investigation. Nor are there sufficient limits on what the FBI may do with the records or how it must store them. For example, information obtained through NSLs may be stored electronically and used for large-scale data mining operations.

Congress last expanded the FBI's NSL authority in October 2001, as part of the comprehensive antiterrorism package known as the USA PATRIOT Act. Incredibly, the Intelligence Committee forced passage of this latest expansion without consulting the Judiciary Committee, which oversees both the FBI and the implementation of the PATRIOT Act. Indeed, the Committee is in the midst of holding a series of oversight hearings on the PATRIOT Act, including the very provision that has now been significantly modified.

What is even more incredible is the fact that this very provision is the target of sunset legislation that I and other members of the Judiciary Committee, both Democratic and Republican, have introduced. There is no doubt that we would have meaningfully and thoroughly explored further expansion of the NSL authority had we been given the opportunity to do so.

This is what the new law has done. Under the PATRIOT Act, the FBI was permitted to use NSLs to obtain records from banks and other similar financial institutions if they were ''sought for'' an intelligence or terrorism investigation. Now the term ''financial institution'' has been expanded to include a host of other businesses that have nothing to do with the business of banking, and the term ''financial record'' has been expanded to include any record held by any such business that pertains to a customer.

The FBI has long had the power to obtain this sort of information, whether through a judicial subpoena or a search warrant. But with the stealth amendment of the NSL authority, the FBI can now obtain a vast amount of personal and highly confidential information without obtaining court approval, and without any other independent check on the validity or scope of the inquiry. The privacy rights of all Americans have been compromised as a result.

LOCAL LAW ENFORCEMENT ACT OF 2003

Mr. SMITH. Mr. President, I rise today to speak about the need for hate crimes legislation. On May 1, 2003, Senator KENNEDY and I introduced the Local Law Enforcement Enhancement Act, a bill that would add new categories to current hate crimes law, sending a signal that violence of any kind is unacceptable in our society.

Today marks the fifth annual Transgender Day of Remembrance and this year, we mourn with 37 families who lost their loved ones to antitransgender violence. My home State of Oregon has also lost a citizen to this form of hatred. In August 2001, Lorenzo ''Loni'' Okaruru died after being savagely beaten about the head and face with a blunt instrument. Detectives believe that the crime was

most likely committed by a man who picked up Okaruru, who he thought was a women, and was angered to find out Okaruru was a biological male. Law enforcement officials believe that Okaruru was killed because of his sexual orientation and gender identity and have classified the crime as a hate crime. The Portland community and civil rights groups rallied together to denounce this horrible crime.

I believe that Government's first duty to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act is a symbol that can become substance. I believe that by passing this legislation and changing current law, we can change hearts and minds as well.

CONSEQUENCES OF THE NO CHILD LEFT BEHIND ACT FOCUS ON STUDENT TESTING

Mr. FEINGOLD. Mr. President, this month public school students around Wisconsin are sharpening their No. 2 pencils and settling in to take a series of annual tests called the Wisconsin Knowledge and Concepts Examinations. These exams, given to students in grades four, eight, and ten, test students' knowledge of reading, language arts, math, science, and social studies.

These tests—and their results—have taken on new meaning for schools around my State as students and teachers in Wisconsin settle into their second school year under the No Child Left Behind Act. This law, the centerpiece of the President's domestic agenda, requires that students in grades three through eight and in one high school grade be tested annually in reading and math beginning in the 2005–2006 school year, with annual science tests to be added 2 years later. Thus, Wisconsin will be required to expand the WKCEs, and the already-existing annual third grade Wisconsin Reading Comprehension Test, to include new reading tests for students in grades five, six and seven; and new math tests for students in grades three, five, six, and seven.

As I travel around Wisconsin, I hear time and again from frustrated parents, teachers, administrators, and school board members about their concerns with the ongoing implementation of the NCLB. I began to hear such comments more than 2 years ago when the President first proposed his education initiative, and this drumbeat of concern has increased as my constituents continue to learn first-hand what this new law means for them and for their students and children. While Wisconsinites support holding schools accountable for results, they are concerned about the focus on standardized testing included in the President's approach.

I opposed the President's education bill in large part because of this new annual testing mandate. The comments I have heard from people across Wisconsin about this new program have been almost universally negative. Parents, teachers, administrators, and others in the education community have told me that they are concerned about the effect that over-testing will have on Wisconsin's public school students. They oppose another layer of federally mandated testing for many reasons, including the cost of developing and implementing the additional tests, the loss of teaching time every year to prepare for and take the tests, and the unnecessary pressure that these additional tests will place on students, teachers, schools, and school districts.

The pressure to do well on annual tests is already weighing on the teachers and schools in Wisconsin, even with 2 years to go before the additional tests are required. The stakes are very high for schools and school districts. The results on these annual tests are a central part of the complicated formula that determines whether a school is meeting or exceeding its ''adequate yearly progress'' goals. Failure to meet AYP goals in two or more consecutive years will lead to sanctions for the schools and districts in question. I have heard from many constituents about the complex AYP system, and what being determined to be a ''school in need of improvement'' or a school that ''has not met AYP'' will mean for—and how these designations will be interpreted by—parents, students, school personnel, and the general public.

In order to measure AYP, Wisconsin and other States are required under NCLB to look at four indicators for each school and district: test participation, graduation and attendance criteria, reading achievement, and math achievement. Three of these four criteria are based on the annual standardized tests. This is troubling because the future of individual schools and school districts is riding on student participation in and success on just two exams—reading and math. These core subjects are important, to be sure, but I am concerned that this exclusive focus on testing—which is a top-down mandate from the Federal Government—may be detrimental to the successful education of our children, who could benefit from a more flexible approach.

As a recent editorial in the La Crosse Tribune points out, ''the stakes on the schools are high. Buy what about students? The test result doesn't appear on their transcript and it doesn't count toward a grade or graduation.'' And what if a student had a bad day? Or what if the required amount of students don't take the tests, and the school fails to meet the 95 percent participation rate required by the NCLB? A missed participation rate 2 years in a row would mean that the school is ''in need of improvement,'' even if the students who took the tests did well on them.

In addition, some of my constituents are concerned about the value of these tests to students, parents, and teachers. According to one teacher, the existing tests don't have any meaning to students and have little meaning to classroom teachers. And the Federal Government has mandated that students take even more tests without developing a system that makes these new tests, or the existing ones for that matter, meaningful to students.

The impact of these standardized tests on students varies. Some students already have test anxiety and that anxiety may well increase unnecessarily. As the stakes increase for schools, the increased stress level is sure to filter down from administrators to teachers to students. For example, members of the Wisconsin School Counselors Association told me that they have been handing out apple-shaped ''stress balls'' for anxious third graders to squeeze while taking their reading tests.

While some students experience stress out about tests, others simply do not care about the tests at all, and fill in random answers or turn in blank test sheets—after all, there's no penalty if they do so. For students who are struggling, however, a low test score on a standardized test can be demoralizing. According to one Wisconsin teacher, ''Students are being evaluated on one single test. What if the student has a bad day? . . . [T]he truly scary part is that standardized tests ensure that half of our students will always be 'below average.' How can we meet the benchmark that everyone will score proficient and advanced when the tests are designed to never let that happen? . . . Taking more tests is not going to improve learning.''

Most students, of course, try their best. But they are confused about why they are taking tests that do not count toward their grades, and many students and parents are confused by the results of these tests.

With the stakes rising for schools and districts, some schools in Wisconsin have resorted to offering what amounts to bribes to encourage the students to participate in the WKCEs and to do well on them. Since the tests have little consequences for individual students, but very serious consequences for schools and districts, some schools are pulling out all of the stops to get students to take these tests seriously.

According to a recent article in the Milwaukee Journal Sentinel, some schools are offering prizes to students who show up and complete their exams. These prizes range from movie tickets to gift certificates for a local mall to big ticket items such as a television

and a DVD player. Some schools are offering exemptions from end-of-semester exams for students who do well on the WKCEs. One elementary school is promising students additional recess periods, snacks, and movies. One teacher told my staff that her school is allowing students to engage in one of the ultimate school no-nos chewing gum in the classroom in order to help to relieve the stress of taking the tests.

I will ask that the complete text of the two articles that I have referenced be printed in the RECORD.

Mr. President, schools in my State are already feeling the pressure to compel students to participate in and succeed on annual tests 2 years before the additional, federally mandated tests are added to the mix. I am concerned about the implications that this pressure, and the resulting scramble to get students to take these tests seriously, will have on public education in my State. I am not saying that schools should not be required to be successful or to show improvement in student performance. Of course, all schools should strive to ensure that they are successful and that their students show improvement.

But these examples from my State are clear evidence of one of the basic problems with the NCLB—its exclusive focus on test scores as the main measure of student achievement. When schools feel compelled to hand out goodies to get students to take tests seriously, those tests are not serving their intended purpose. Certainly, tests have their place in education. But tests should be used as one of multiple measures of student achievement, not as the sole means of determining the success or failure of a school.

I am extremely concerned that the new Federal testing mandate will not achieve the desired result of better schools with qualified teachers and successful students. I fear that this new mandate will curtail actual teaching time and real learning in favor of an environment where teaching to the test becomes the norm. The unfortunate result of this would be to show our children that education is not about preparing for their futures, but rather about preparing for tests—that education is really about sharp No. 2 pencils and test sheets, about making sure that little round bubbles are filled in completely, and, if their school districts and States have enough money, maybe about exam booklets for short answer and essay questions. I am also deeply concerned that this focus on testing will rob teachers of valuable teaching time and will squelch efforts to be innovative and creative, both with lesson plans and with ways of measuring student performance.

For these reasons, earlier this year I introduced the Student Testing Flexibility Act, a bill that would return a measure of the local control that was taken from States and local school districts with the enactment of the NCLB. This bill would allow States and school districts that have demonstrated academic success for 2 consecutive years the flexibility to apply to waive the new annual testing requirements in the NCLB. States and school districts with waivers would still be required to administer high-quality tests to students in, at a minimum, reading or language arts and mathematics at least once in grades 3–5, 6–9, and 10–12 as required under the law.

This bill is cosponsored by Senators JEFFORDS, DAYTON, and LEAHY. I am pleased that this legislation is supported by the American Association of School Administrators; the National Education Association; National PTA; the National Association of Elementary School Principals; the National Association of Secondary School Principals; the School Social Work Association of America; the National Council of Teachers of English; the Wisconsin Department of Public Instruction; the Wisconsin Education Association Council; the Wisconsin Association of School Boards; the Milwaukee Teachers' Education Association; the Wisconsin School Social Workers Association; and the Wisconsin School Administrators Alliance, which includes the Association of Wisconsin School Administrators, the Wisconsin Association of School District Administrators, the Wisconsin Association of School Business Officials, and the Wisconsin Council for Administrators of Special Services.

I would also like to take a moment to discuss the recently released National Assessment on Educational Progress scores. In addition to a massive new annual testing requirement, the NCLB also requires States to participate in the previously voluntary NAEP tests for fourth grade reading and math, which are given every 2 years. Proponents of high-stakes testing argue that NAEP participation will help to ensure that the results of State-administered tests are valid, and that States are not ''dumbing down'' their tests in order to avoid Federal sanctions.

The NAEP scores that were released last week are the results of the first round of required testing under the NCLB, and, for the first time, include scores from all 50 States, the District of Columbia, and 2 schools run by the Department of Defense. While the nation-wide test results are an improvement over the NAEP administered 2 years ago, I am deeply concerned about the lingering racial disparities in the test results.

I am particularly concerned that the test scores for the approximately 25,000 Wisconsin eighth graders who took this test lead the Nation in the gap between White and African-American students on both the reading and the math tests. While the NAEP was taken by only a small percentage of students in my State and around the country, we cannot ignore the racial disparities in the test scores and the need to do more to ensure that all students have an equal opportunity for a quality education.

The Secretary of Education heralded the NAEP results, saying, ''These results show that the education revolution that No Child Left Behind promised has begun.'' If these test scores prove anything, it is that too many children are being left behind. Study after study has shown that disadvantaged students lag behind their peers on standardized tests.

I regret that the President and the Congress have not done more to ensure that schools have the resources to help these students catch up with their peers before students are required to take additional annual tests that will have serious consequences for their schools. If we fail to provide adequate resources to these schools and these students, we run the risk of setting disadvantaged children up for failure on these tests—failure which could damage the self-esteem of our most vulnerable students.

Instead of focusing resources on those students and schools needing the most help, I am afraid that the testing provisions in the President's bill will punish those very schools with sanctions that will actually take badly needed funding away from them.

I would like to note that my constituents have raised a number of other concerns about the NCLB that I hope will be addressed by Congress. I continue to hear about complex guidelines and a lack of flexibility from the Department of Education. I hear about the unique challenges that the new tutoring, public school transfer, and other requirements pose for rural districts. My constituents often ask when the Federal Government is going to provide the funding it promised for education programs. I share my constituents' concern about imposing new sanctions on schools that do not meet yearly goals even though the programs that would help students and schools to meet those goals are not fully funded.

I will continue to monitor closely the implementation of the NCLB and its effect on public school students in Wisconsin.

I ask unanimous consent the articles to which I referred be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Milwaukee Journal Sentinel, Nov. 9, 2003]

TAKE A TEST, GET A PRIZE

(By Amy Hetzner)

Some day soon, teams of Case High School sophomores could be sitting in a Racine movie theater and thanking President Bush.

In an attempt to boost the number of students taking the State's standardized test

this week, Case High School will be handing out movie passes to every 10th-grader who completes the battery of exams.

It's just one of many efforts, which include a TV giveaway at another school, to improve student performance and participation on the Wisconsin Knowledge and Concepts Examinations, or WKCEs.

In many Wisconsin schools, the testing began for fourth-, eighth- and 10th-graders last week and will continue until Nov. 21. The tests cover reading, language arts, mathematics, science and social studies.

If nothing else, the new incentives show the growing importance that President Bush's No Child Left Behind Act has placed on annual state testing.

If students slip up, they could cause their school to be labeled as needing improvement and sent on a path to escalating sanctions imposed by the Federal law. If, for example, less than 95% of students take the tests two years in a row, a school may have to allow students to transfer elsewhere.

But the students themselves have little incentive to put forward an effort. The exam doesn't count toward a grade or graduation and won't appear on any transcript.

As Larry Black, principal of Big Foot High School in Walworth, puts it: ''For schools, they're high-stakes tests. For students, they're low stakes. . . . And that's a bad match.''

ROLLING OUT THE REWARDS

To help surmount that obstacle and hopefully avoid being labeled for improvement, two Racine high schools are rolling out the rewards just to get students to take the tests.

In addition to free movie passes, Case students can qualify for $10 cash awards, Regency Mall gift certificates, school-spirit wear and other prizes—simply by showing up this week and answering the exam's questions.

At Racine's Horlick High School, the goodies are even bigger. The school is planning several raffles for each of the two days of testing this week, at which students can win a television set, DVD player and CDs, Principal Nola Starling-Ratliff said.

The incentives are geared to increase both schools' test participation rates, which last year fell below the required 95% of students.

Miss that goal for a second year and both schools would have to allow students to transfer to other district schools under the federal law. A third year of missing their target would force the schools to offer extra tutoring in math and reading.

The high schools facing the threat of sanctions aren't the only ones proffering perks this year, however.

Gifford Elementary School in Racine also dangled the prospect of an extra recess, movie privileges and anonymous treats before any fourth-grade class that had perfect attendance during the week of testing.

''It's made a huge difference,'' Gifford Principal Steve Russo said. ''Every morning we talk about testing with the kids. We encourage them to do the best job, to take pride in their work.''

CRITIC PANS REWARD SYSTEM

But Alfie Kohn, a national opponent of high-stakes testing, called such rewards ''coercive'' and ''disrespectful'' toward students. ''Even if higher test scores were a good idea, you don't treat children like pets by dangling the equivalent of doggie biscuits before them when they perform to your liking,'' said Kohn, a Massachusetts-based author of the book, ''Punished by Rewards.''

School officials, however, say there's nothing wrong with giving students a little push.

Five years ago at Arrowhead High School in Waukesha County, test scores took a serious dip when about 80 sophomores refused to complete the exams, instead turning in blank forms in protest of a test they felt was meaningless. If a school's students were to do the same today, their action could have more serious consequences for their school in addition to giving it a public black eye.

''We never want to fall into the category where the school's 'in need of improvement' just because students didn't take the test seriously,'' said Arrowhead Superintendent David Lodes.

A REASON TO TRY

So this year, Arrowhead will give its students a reason not only to take the test but also to try.

The school is offering its students a chance to skip final semester examinations in their regular classes if they do well on their WKCEs—scoring at least at the proficient or advanced level in the subject area that corresponds with the class exam they want to avoid.

It's the first year Arrowhead High School has made such an offer, which has been announced to students but is still waiting for formal approval from the School Board.

Arrowhead students who do exceptionally well on the WKCE—scoring at the advanced level on all the tests—also will be allowed to spend their junior-year study hall classes in the senior commons in the pilot effort.

Other schools in the state offering exam exemptions include Big Foot High School, Hartford Union High School and Pulaski High School near Green Bay. Bay Port High School in the Howard-Suamico School District gives students a chance to drop a low-scoring test with a proficient score in the subject area.

''I think we should be able to come up with a way where we can get our students to give their best effort,'' Lodes said. ''Everybody needs to do as best as they possibly can. Yet everybody wants to be rewarded.''

Arrowhead students say they can see a difference.

''I'm actually trying a little harder now,'' said Zack Olson, a 15-year-old sophomore at Arrowhead, where testing began last week.

Previously, Olson said he might not have studied for the test at all. But with the lure of getting out of final exams and a nicer study hall environment, he said he's been doing the practice work that teachers have offered.

Another Arrowhead sophomore, Adam Moir, said he was even a little nervous the night before testing began because he wasn't sure what to expect.

He said a lot of students will be motivated to try to get out of their final exams. ''But, in the same way, there are some students that could care less about school,'' Moir said. ''I'm not one of them.''

[From the La Crosse Tribune]

OUR VIEW: MAKE FEDERAL TESTING FIT WITH CURRICULUM

(By Tribune editorial staff)

Why are some school districts offering movie tickets and other prizes as an inducement to take the tests required under President Bush's ''No Child Left Behind'' law?

They are doing it because students have little incentive to participate in the testing, even though a bad result can result in a Federal Government listing as a failed school.

Under the Federal legislation, schools are required to subject students to testing once a year. If students do not participate, the school could face sanctions. For instance, if less than 95 percent of the students show up for testing two years in a row, the school could have to allow students to transfer elsewhere.

So, the stakes on the schools are high. But what about students? The test result doesn't appear on their transcript and it doesn't count toward a grade or graduation.

A story in Sunday's Milwaukee Journal Sentinel said that the Racine, Wis., School District gives away movie tickets to get kids to show up. Another, unnamed, district is giving away a television set. Still another district—Arrowhead schools in Hartland, Wis., is letting students who take the test opt out of some final exams.

None of this sounds like it is educationally sound, but school administrators say they have little other incentive to get students to take the test. Isn't there a better way to judge school performance than using a test that has no other meaning than providing a potential for Federal punishment? Are there no other valid measurements of student performance?

Giving prizes as an inducement to take a test seems of dubious value. But maybe we ought to be looking for ways to reconcile the federal government's need for performance data with schools' existing curriculum and practices.

SYRIA ACCOUNTABILITY ACT

Mr. GRAHAM of Florida. Mr. President, the Syria Accountability and Lebanese Sovereignty Restoration Act takes important and valuable steps, and I would have voted for it had I been present, but I am concerned that it may not go far enough.

Syria has long been recognized as a state sponsor of terrorism. In fact, the Syrians themselves openly speak of their support for terrorist organizations such as Hezbollah, Hamas, and the Palestinian Islamic Jihad. Intelligence reports and terrorism experts tell us that the next generation of terrorists is being trained in a network of training facilities that exist in Syria and the Syrian-controlled parts of Lebanon. These international terrorist organizations that run these camps already have the capacity to kill Americans, and they have state sponsors with access to weapons of mass destruction. Prior to 9/11, Hezbollah was responsible for the deaths of more Americans than any other terrorist group.

On September 18, 2001, the Senate passed S.J. Res 23, which authorized the President to use ''all necessary and appropriate force'' against those responsible for the attacks of 9/11. This authorization for the use of force is therefore limited to al-Qaeda. We ignore other terrorist networks at our peril—and at one point, President Bush recognized that. Nine days after the terrorist attack of September 11, the President declared:

''Our war on terror begins with al-Qaeda but it does not end there. It will not end until every terrorist group of global reach has been found, stopped and defeated.''

In his State of the Union speech on January 29, 2002, President bush restated our priorities:

Our nation will continue to be steadfast and patient and persistent in the pursuit of two great objectives. First, we will shut down terrorist camps, disrupt terrorist plans, and bring terrorists to justice. And, second, we must prevent the terrorists and regimes who seek chemical, biological or nuclear weapons from threatening the United States and the world.

I supported those statements and hoped to help the President carry out his pledge. Last October, Congress authorized the use of force against Iraq. I voted against this authorization because I believed it was a distraction from the war on terrorism. At that time, I attempted to amend the resolution to provide the president the authorization to use force against other terrorist organizations that met the following criteria: they have a state sponsor with access to weapons of mass destruction; they have a history of killing Americans; and they have the ability to strike inside the United States.

I remain concerned that the President does not have the necessary authorization to use force against these additional terrorist organizations. Without such authorization, he cannot fulfill the commitment he made in his January 2002 State of the Union speech.

I hope the administration will take this occasion to review its existing authorities and report back to Congress on where there may be deficiencies in its authorities to carry out the war on terrorism. Only then will we be able to hold Syria and similar states that sponsor or harbor terrorists truly accountable.

BUSINESS CLIMATE IN UKRAINE

Mr. CAMPBELL. Mr. President, as Co-Chairman of the Commission on Security and Cooperation in Europe, I have closely followed developments in Ukraine including aspects of the human, security and economic dimensions. My desire is that Ukraine consolidate its independence by strengthening democratic institutions, including the judiciary, and undertaking reforms to improve the business climate essential to attracting much-needed foreign investment. Twelve years after independence, the people of Ukraine deserve to enjoy the fruits of freedom and prosperity, but obstacles remain. Bringing Ukraine more fully into Europe is both essential to the country's long-term economic success and important for European security. Accelerating Ukraine's movement toward Europe is timely and needed. While high-ranking Ukrainian officials pay lipservice to such integration, the jury is still out as to whether they are prepared to take the bold steps that will be required to advance such integration. An important barometer for the future will be the extent to which the country's moves to confront the corruption and crime that retard the process of democratization and economic liberalization and erode Ukraine's security and independence.

While those at the top say the right things, there is justified skepticism as to their sincerity. This is certainly the case concerning Ukraine's current President, Leonid Kuchma. The controversies surrounding Kuchma undercut his credibility with respect to the issue of combating corruption. Nevertheless, this should not detract from the urgency of tackling corruption in the lead up to critical parliamentary elections slated for next year, and presidential elections to select Kuchma's successor in 2004.

Meanwhile, those serious about rooting out corruption and corrupt officials should take a hard look at the handling—or more accurately, mishandling—of Ukrainian and foreign owned businesses. For example, United States-owned businesses have been victimized through expropriations, asset thefts, extortion and the like perpetrated or abetted by corrupt officials and courts in Ukraine. While new cases continue to occur, longstanding cases remain unresolved with investors unable to obtain the relief to which they are entitled under Ukrainian and international law.

Although the State Department has made repeated representations about these cases at senior levels of the Kuchma administration, Kyiv rebuffed repeated requests to resolve them in accordance with the law. At the same time it refuses to punish the perpetrators of the criminal acts or take corrective measures to prevent similar cases from arising.

If the victims are to ever achieve a measure of justice, it is essential that U.S. officials raise these cases at every appropriate opportunity.

In one especially egregious and illustrative case, well-connected individuals in Ukraine were able to orchestrate the seizure of all the assets of a successful pharmaceutical joint venture which was half owned by United States investors. When, 6 years after the theft the Ukrainian appeals courts finally dismissed the spurious claims to the assets on grounds that they were based entirely on forged and falsely fabricated documents, senior Ukrainian officials launched into action. Within weeks of these judicial decisions, the Ukrainian President reportedly convened a meeting of senior officials, including the cognizant senior judges and his own senior law enforcement and national security cabinet level officers, at which he made clear that he did not want the stolen assets restored to their rightful American owners.

The courts quickly complied, without explanation, and in disregard of the copious evidence before them, the judges reversed the decisions taken just two months earlier and held in favor of the claimants. Several months later longstanding criminal charges against the same individuals were dropped.

The circumstances surrounding this case and others involving United States investors are indicative of the far reaching scope of corruption and the rule of law deficit in Ukraine today. While the matter was repeatedly raised by the State Department several years ago, I am concerned that the Ukrainian side might assume that the matter is a closed case. I urge officials at the Departments of State and Commerce to disabuse Ukrainian Government officials of such an impression.

If the Kuchma administration is serious about rooting out corruption and advancing democracy and the rule of law, these cases provide a good starting point. Only time will tell if they are up to the challenge.

CONGRATULATING THE PEOPLE OF GUATEMALA ON THEIR RECENT ELECTIONS

Mr. COLEMAN. Mr. President, the people of Guatemala went to the polls on November 9 to elect a new President, Members of the Guatemalan Parliament, local officials, and representatives to the Central American Parliament.

These elections attracted attention, in large part, due to the candidacy of Efrain Rios Montt, a former coup leader who under the Guatemalan constitution should have been banned from running for the Presidency all together. Rios Montt presided over a troubled part of Guatemala's history, during which time too many innocent lives were lost.

Now these elections were not perfect. Long lines and confusion over where to vote made it difficult for many Guatemalans to express their political views. Some polling stations stayed open for as long as 5 hours after they were scheduled to close; other did not. The time period leading up to the elections was marked by violence and intimidation linked to some Rios Montt supporters.

But in the end, these were important and hopeful elections for a number of reasons. Rios Montt was defeated in the ballot box—and he accepted defeat. The willingness of losers to accept defeat is one sign of a maturing democracy. And the result of this defeat for Rios Montt should not be overlooked; he will lose his immunity from prosecution for crimes committed under his watch.

There is much more to the story than Rios Montt's candidacy, however. Approximately 60 percent of Guatemala's 5 million voters went to the polls on

Sunday—the largest turnout since 1985. By turning out in such numbers, Guatemalans showed they understand the power of the ballot box. As one woman put it, ''You have to vote if you want things to change.''

Overall, these elections were fair and open. Ballots were not rigged, and vehicles carrying them were monitored by satellite.

Violence on election day was isolated. In spite of an insecure climate during the campaign season, threats of violence were not carried out on a large scale over the weekend. The violence many had feared—and some observers have come to expect from elections of this sort—did not take place. In the words of Guatemalan Nobel Prize winner Rigoberta Menchu: ''This first round was about saying no to violence.''

These elections also marked the first time a nation-wide network of over 3,000 independent election observers, Mirador Electoral, monitored Guatemalan elections—no easy feat in a country ravaged by 40 years of civil war. The group was so highly regarded, they were asked by the Guatemalan election commission to release their ''quick count'' projections of the winners. And the results of Mirador Electoral matched those reached by the election commission.

Guatemalans will go to the polls again on December 28, and will choose between top vote-getters Oscar Berger and Alvaro Colon to be the next President. I would call upon the Guatemalan Government to maintain their commitment to fairness, and to make adjustments to better prepare for a high turn-out of Guatemalans.

While Guatemala still has many problems, these elections give me hope for the future. I congratulate the Guatemalan people for their commitment to democracy.

ADDITIONAL STATEMENTS

CONGRATULATING EDITH MILLER

• Mr. JEFFORDS. Mr. President, today I recognize the outstanding contributions made by Edith Miller, outgoing Executive Director for the Vermont School Boards Association, VSBA.

Edie, as she is known to her colleagues, friends, and family, joined the Vermont School Boards Association in December 1997 after previously serving for many years as the director of the University of Vermont's Continuing Education Program.

Edie also served with great distinction on numerous boards dedicated to the arts and community welfare. Her participation in local government is noteworthy. She has worn many hats, from holding positions on the town zoning and planning commissions to her current role as Chair of the East Montpelier Select Board.

I also had the pleasure and benefit of having her husband, Martin Miller, on staff during my tenure as Vermont Attorney General from 1969 through 1972.

Over the years, various individuals have described Edie Miller as a strong and articulate voice in support of public education. She possesses a tireless work ethic and an ability to identify critical issues, analyze the information, and communicate that information not only to the VSBA members, but also to local State and Federal officials.

Edie was a driving force in the creation and implementation of the Vermont Education Leadership Alliance Project, VELA. She worked diligently with her colleagues in the Vermont Superintendents Association and the Vermont Principals' Association to address the critical shortage of principals, superintendents and school board members in Vermont. The program was designed to train and certify school leaders, thereby increasing their effectiveness and reducing turnover. Although VELA is now under the capable leadership of David Ford, Edie still remains very active on its Board of Directors.

Her remarkable skill at working with a broad constituency has earned Edie enormous respect within Vermont's education community. Edie is not afraid to pursue any idea that she believes will improve outcomes for Vermont's children.

To underscore my efforts to increase funding of special education, Edie met with members of every school board throughout Vermont, convincing them to sign a petition asking the federal government to fully fund the Individuals with Disabilities Education Act. This was not an easy task, but she persevered. These petitions were presented to me in Vermont, bound in a red ribbon. During Senate debate of the various special education funding proposals I have sponsored, I take these petitions with me to the chamber. I can tell you that those petitions have made a deep impression on my colleagues.

I have been very fortunate to work closely with Edie on a number of education issues. I have always appreciated her keen insight and her insistence on carefully weighing all aspects of proposals before making a policy decision.

For Edie, it is important to increase educational opportunities for all students. For Edie, first and foremost, it is and always will be about the kids.

Edie has left an indelible mark on Vermont's education landscape. Though she may be stepping away from her responsibilities at VSBA, I know she will not be stepping away from education.

So, it is with great pleasure that I offer my congratulations to Edie Miller on her stellar accomplishments as executive director for the Vermont School Boards Association and her unyielding commitment to the education of Vermont's children.•

CHARLES D. ''CHUCK'' ANDERSON

• Mr. KYL. Mr. President, I was recently advised of the upcoming retirement of Mr. Charles D. ''Chuck'' Anderson after a long and faithful career in the defense industry. Mr. Anderson is retiring from Raytheon as the company's vice president of the Air-to-Air Missiles Division in Tucson, AZ.

Chuck began his career in the 1950s as a paratrooper with the California National Guard, then earned his bachelor of science degree in mathematics and physics from California State Polytechnic University. He went on to earn a master of science degree in Systems Engineering from the University of Southern California in 1972.

For the last 10 years, Mr. Anderson has been with Raytheon, and it is my understanding that he has been responsible for all AMRAAM, Sparrow AIM–9M, AIM–9X, and ASRAAM efforts, including development, testing, and production. He also played key roles in the design and manufacture of the Standard Missile, Standard Arm, DIVAD, Stinger, Advanced Cruise Missile, and Phalanx.

Prior to his years at Raytheon, Chuck served in a variety of capacities with General Dynamics, and over the years he has earned a number of awards: the Winner of the 1998 Department of Defense Logistics Life Cycle Cost Reduction Award; the 1999 Outstanding Contracting Team Award; and the 2000 Secretary of the Air Force Lightening Bolt Award, to name just a few.

Chuck Anderson has spent a career dedicated to keeping America strong. I wish him and his wife, Carolyn, best wishes as they venture into the next chapter of their lives.•

TRIBUTE TO PAUL UNGER

• Mr. DEWINE. Mr. President, today I pay tribute to a remarkable Ohioan—a man of great vision and great compassion. Paul Unger is the founder of the Unger Croatia Institute for Public Administration, an organization that provides professional training, education, and technical assistance to Croatian Government administrators and university officials. On January 23, 2004, he will receive the Outstanding Citizen Achievement Award from the U.S. Agency for International Development for his tireless dedication to fostering democracy and freedom in Croatia.

Paul Unger, a fellow Ohioan who is a native of Cleveland, first arrived in Zagreb for a Christmas party one wintry December night in 1945. He was en route from his post as commandant of

a United Nations refugee camp for Croatians in Egypt to his new assignment as administrator for the United Nations relief program in Yugoslavia. That evening, he met Sonja Franz, a Croatian architect-engineer, who became his wife by the next holiday season. Soon after they married, the Ungers left Croatia for the United States.

As the decades passed, the Ungers kept close contact with their family, friends, and colleagues who had remained overseas, committed to a free, democratic Croatia. In 1997, Paul Unger assembled an advisory group of 45 American and Croatian banking, education, and government leaders to found the Unger Croatia Institute for Public Administration to help reform-minded leaders ease Croatia's transition from the devastating war to a more efficient, democratic government.

As a first step, Mr. Unger created a fellowship program to assist senior Croatian officials in the development of improved practices in government. This program was to be administered by his alma mater, Harvard University. The Unger Croatia Program was created within the John F. Kennedy School of Government, and the Institute Advisory Group was charged with nominating and selecting candidates. Between 1998–2001, the Ungers personally sponsored 22 Fellows at the Kennedy School, including deputy prime ministers, cabinet ministers and deputies, national bank governors, parliamentary committee chairs, ambassadors, and a Presidential candidate.

To build a program that could provide similar services for locally elected officials, Mr. Unger turned to the Maxine Goodman Levin College of Urban Affairs at Cleveland State University, CSU. In 2001, the Unger Croatia Center for Local Government Leadership was established within CSU's Levin College.

The success of the Cleveland seminars inspired Mr. Unger to create an educational alliance between CSU and the University of Rijeka, which was formalized in 2002. This collaboration continues to blossom. Over the past 2 years, the Unger Croatia Center at CSU has worked closely with the Economics faculty in Rijeka to develop their professional courses. Last summer, the University of Rijeka hosted the first seminar for public officials in Croatia, and this spring, the University will introduce its first programs in public administration and public health administration—an important step toward the eventual realization of the first-ever Croatian Graduate School of Public Administration.

As Mr. Unger continues to work toward a vision for a prosperous Croatia, government is being transformed. Program participants have returned home and implemented the techniques learned through their studies, creating an environment where Croatians have become increasingly involved in local government and have taken an active role in setting budget priorities and guiding community development.

Beyond his extraordinary efforts abroad, Mr. Unger also has contributed much to our home State of Ohio. It is here that he and Sonja raised a family and achieved prominence through a successful business, volunteer service, and community activism. Among his many accomplishments, Mr. Unger served as president/CEO of the Unger Company, a national food packaging company headquartered in Cleveland; chairman of the Urban Renewal Task Force for the Mayor of Cleveland; president of the Cleveland chapter of the American Civil Liberties Union; and chairman of the Ohio's International Trade Council. He has been widely-recognized, notably by the Cleveland Heights High School Hall of Fame, the Cleveland Blue Book, and the City Club of Cleveland Hall of Fame.

Finally, Paul Unger has remained steadfast in moving Cleveland into the international arena. He has helped lead the Cleveland-Miskole Sister City Committee and the Cleveland Council on World Affairs. He also has sponsored the ''Cleveland in the World'' lecture series at the City Club of Cleveland. Sonja has been a local civic and political leader in her own right and was the first woman to be honored with a Golden Door Award by Cleveland's Nationality Services Center for her dedication as a social worker and interpreter.

In January 2004, the USAID's Bureau for Europe and Eurasia will honor Paul Unger with the Outstanding Citizen Achievement Award, which recognizes Americans who have made exceptional contributions to international development through volunteerism. I congratulate Mr. Unger for all his work at home and abroad and express my thanks to him and to his wife Sonja for their leadership, dedication, and commitment to democracy in Croatia.●

HONORING DR. DONALD PINKEL AND PROFESSOR DR. HANSJÖRG RIEHM

● Mrs. BOXER. Mr. President, I rise to pay homage to the remarkable contributions of Dr. Donald Pinkel and Professor Dr. Hansjörg Riehm to the cure of childhood acute lymphoblastic leukemia, or ALL, once an invariably lethal disease. On December 4, 2003, distinguished colleagues from 12 nations will honor these outstanding physicians in San Diego, CA.

ALL is the most common cancer in children. Forty years ago, very few children were cured. Since that time, the cure rate has improved dramatically. I am informed that thanks in part to the leadership and vision of Dr. Pinkel and Professor Dr. Hansjörg Riehm, about 80 percent of ALL patients are now cured in developed nations. Dr. Pinkel's development of effective presymptomatic central nervous system therapy and Professor Dr. Hansjörg Riehm's development of effective post induction intensification halved the number of relapses and deaths. Tens of thousands of children, their families, friends and neighbors in many countries have benefitted. Dr. Pinkel and Professor Dr. Riehm stand united in their desire that effective therapy be available to children with ALL, both in the developed world and in the developing world.

I am informed that during his years at St. Jude Children's Research Hospital in the 1960s, Dr. Pinkel introduced the concept of presymptomatic central nervous system therapy and cured one-half of children with ALL. Previously, many children had achieved temporary remission from leukemia, only to suffer return of leukemia or relapse in the central nervous system, subsequent bone marrow relapse, and death. Presymptomatic central nervous system therapy remains a cornerstone of ALL therapy throughout the world.

Professor Dr. Hansjörg Riehm and his colleagues in the Berlin Frankfurt Münster Group introduced effective postinduction intensification in the late 1970s. This concept involves implementing stronger therapy after the patient is in remission. Previously, patients received brief intensive induction therapy followed by presymptomatic central nervous system therapy and prolonged mild maintenance therapy. Most patients achieved remission, but many suffered leukemic relapse and death. With application of effective post induction intensification, the number of relapses fell and the chance for cure increased. Professor Riehm's strategy of post induction intensification has been applied throughout the world with similar success.

We know how tragic it is when children and their families struggle with life-threatening disease. The dramatic improvement in the cure rate of ALL gives children and those who cherish them just cause for greater hope. Literally tens of thousands of children in many nations have survived and grown up to realize their hopes and dreams due to the remarkable contributions of Dr. Pinkel and Professor Dr. Riehm. I am certain that children's lives are ample thanks, but I would like to add California's thanks for these physicians' lifetimes of accomplishments. Our Nation and world are fortunate to have benefitted from their work.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to

the Senate by Mr. Thomas, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 2:27 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bills, without amendment:

S. 117. An act to authorize the Secretary of Agriculture to sell or exchange certain land in the State of Florida, and for other purposes;

S. 286. An act to revise and extend the Birth Defects Prevention Act of 1998;

S. 650. An act to amend the Federal Food, Drug, and Cosmetic Act to authorize the Food and Drug Administration to require certain research into drugs used in pediatric patients;

S. 1685. An act to extend and expand the basic pilot program for employment eligibility verification, and for other purposes; and

S. 1720. An act to provide for Federal court proceedings in Plano, Texas.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 48. Concurrent resolution supporting the goals and idelas of ''National Epilepsy Awareness Month'' and urging support for epilepsy research and service programs.

The message further announced that the House passed the following bills and joint resolution in which it requests the concurrence of the Senate:

H.R. 421. An act to reauthorize the United States Institute for Environmental Conflict Resolution, and for other purposes;

H.R. 1006. An act to amend the Lacey Act Amendments of 1981 to further the conservation of certain wildlife species;

H.R. 2218. An act to amend the Federal Food, Drug, and Cosmetic Act to provide for the regulation of all contact lenses as medical devices, and for other purposes;

H.R. 2420. An act to improve transparency relating to the fees and costs that mutual fund investors incur and to improve corporate governance of mutual funds;

H.R. 3140. An act to provide for availability of contact lens prescriptions to patients, and for other purposes;

H.R. 3491. An act to establish within the Smithsonian Institution the National Museum of African American History and Culture, and for other purposes; and

H.J. Res. 78. An act making further continuing appropriations for the fiscal year 2004, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolutions in which it requests the concurrence of the Senate:

H. Con. Res. 83. Concurrent resolution honoring the victims of the Cambodian genocide that took place from April 1975 to January 1979;

H. Con. Res. 288. Concurrent resolution honoring Seeds of Peace for its promotion of understanding, reconciliation, acceptance, coexistence, and peace among youth from the Middle East and other regions of conflict; and

H. Con. Res. 320. Concurrent resolution expressing the sense of the Congress regarding the importance of motorsports.

The message further announced that the House agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2417) to authorize appropriations for fiscal year 2004 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes.

At 6:51 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House agree to the amendment of the Senate to the bill (H.R. 2297) to amend title 38, United States Code, to improve benefits under laws administered by the Secretary of Veterans Affairs, and for other purposes.

The message also announced that the House agree to the amendments of the Senate to the resolution (H.J. Res. 63) to approve the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Federated States of Micronesia'', and the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Republic of the Marshall Islands'', and otherwise to amend Public Law 99–239, and to appropriate for the purposes of amended Public Law 99–239 for fiscal years ending on or before September 30, 2023, and for other purposes.

ENROLLED BILLS SIGNED

The following enrolled bills, previously signed by the Speaker, were signed on today, November 20, 2003, by the President pro tempore (Mr. STEVENS):

S. 254. An act to revise the boundary of the Kaloko-Honokohau National Historical Park in the State of Hawaii, and for other purposes;

S. 864. An act to designate the facility of the United States Postal Service located at 710 Wick Lane in Billings, Montana, as the ''Ronald Reagan Post Office Building''; and

S. 1718. An act to designate the facility of the United States Postal Service located at 3710 West 73rd Terrace in Prairie Village, Kansas, as the ''Senator James B. Pearson Post Office''.

H.R. 23. An act to amend the Housing and Community Development Act of 1974 to authorize communities to use community development block grant funds for construction of tornado-safe shelters in manufactured home parks.

H.R. 1588. An act to authorize appropriations for fiscal year 2004 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes.

H.R. 2744. An act to designate the facility of the United States Postal Service located at 514 17th Street in Moline, Illinois, as the ''David Bybee Post Office Building''.

H.R. 2754. An act making appropriations for energy and water development for the fiscal year ending September 30, 2004, and for other purposes.

H.R. 3175. An act to designate the facility of the United States Postal Service located at 2650 Cleveland Avenue, NW in Canton, Ohio, as the ''Richard D. Watkins Post Office Building''.

H.R. 3379. An act to designate the facility of the United States Postal Service located at 3210 East 10th Street in Bloomington, Indiana, as the ''Francis X. McCloskey Post Office Building''.

MEASURES REFERRED

The following bill was read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2420. An act to improve transparency relating to the fees and costs that mutual fund investors incur and to improve corporate governance of mutual funds; to the Committee on Banking, Housing, and Urban Affairs.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 83. Concurrent resolution honoring the victims of the Cambodian genocide that took place from April 1975 to January 1979; to the Committee on Foreign Relations.

H. Con. Res. 288. Concurrent resolution honoring Seeds of Peace for its promotion of understanding, reconciliation, acceptance, coexistence, and peace among youth from the Middle East and other regions of conflict; to the Committee on the Judiciary.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on November 20, 2003, she had presented to the President of the United States the following enrolled bills:

S. 254. An act to revise the boundary of the Kaloko-Honokohau National Historical Park Addition Act of 2003;

S. 867. An act to designate the facility of the United States Postal Service located at 710 Wicks Lane in Billings, Montana, as the ''Ronald Reagan Post Office Building''; and

S. 1718. An act to designate the facility of the United States Postal Service located at 3710 West 73rd Terrace in Prairie Village, Kansas, as the ''Senator James B. Pearson Post Office.''

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with

accompanying papers, reports, and documents, and were referred as indicated:

EC–5325. A communication from the Secretary of Transportation, transmitting, a report relative to the Convention on International Interests in Mobile Equipment and the Protocol on Matters Specific to Aircraft Equipment; to the Committee on Commerce, Science, and Transportation.

EC–5326. A communication from the Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service, transmitting, pursuant to law, the report of a rule entitled ''Fisheries Off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Whiting Closure for the Catcher/Processor Sector'' (ID101003F) received on November 20, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5327. A communication from the Chief, Regulations and Administrative Law, Coast Guard, transmitting, pursuant to law, the report of a rule entitled ''Drawbridge Regulations: [CGD07–02–160], Canaveral Barge Canal, Cape Canaveral, Brevard County, FL'' (RIN1625–AA00) received on November 19, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5328. A communication from the Chief, Regulations and Administrative Law, Coast Guard, transmitting, pursuant to law, the report of a rule entitled ''Drawbridge Regulations: [CGD08–03–042], Mississippi River, Iowa, and Illinois'' (RIN1625–AA09) received on November 19, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5329. A communication from the Chief, Regulations and Administrative Law, Coast Guard, transmitting, pursuant to law, the report of a rule entitled ''Drawbridge Regulations: [CGD08–03–045], St. Croix River, Prescott, WI'' (RIN1625–AA09) received on November 19, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5330. A communication from the Chief, Regulations and Administrative Law, Coast Guard, transmitting, pursuant to law, the report of a rule entitled ''Safety/Security Zone Regulations: (Including 2 Regulations), [CGD07–03–144], [COTP San Diego 03–033]'' (RIN1625–AA09) received on November 19, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5331. A communication from the Chief, Regulations and Administrative Law, Coast Guard, transmitting, pursuant to law, the report of a rule entitled ''Regulated Navigation Area: (Including 2 Regulations), [CGD07–03–069], [CGD09–03–214]'' (RIN1625–AA11) received on November 19, 2003; to the Committee on Commerce, Science, and Transportation.

EC–5332. A communication from the Director, Executive Office of the President, Office of Management and Budget, transmitting, pursuant to law, a report on direct spending or receipts legislation dated October 24, 2001; to the Committee on Appropriations.

EC–5333. A communication from the Acting Under Secretary of Defense for Acquisition, Technology, and Logistics, transmitting, pursuant to law, a report relative to the EA–18G; to the Committee on Armed Services.

EC–5334. A communication from the Under Secretary of Agriculture for Natural Resources and Environment, transmitting, pursuant to law, a report relative to contracts involving the National Recreation Reservation System; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5335. A communication from the Director, Regulatory Review Group, Commodity Credit Corporation, transmitting, pursuant to law, the report of a rule entitled ''Removal of Obsolete Regulations'' (RIN0560–AH04) received on November 20, 2003; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5336. A communication from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled ''National Poultry Improvement Plan and Auxiliary Provisions'' (Doc. No. 03–017–2) received on November 19, 2003; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5337. A communication from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled ''Veterinary Services User Fees; Pet Food Facility Inspection and Approval Fees'' (Doc. No. 03–036–2) received on November 19, 2003; to the Committee on Agriculture, Nutrition, and Forestry.

EC–5338. A communication from the Deputy Secretary, Division of Market Regulation, Securities and Exchange Commission, transmitting, pursuant to law, the report of a rule entitled ''Interpretation of Rule 3b–3'' (Release No. 34–48795) received on November 19, 2003; to the Committee on Banking, Housing, and Urban Affairs.

EC–5339. A communication from the Chief Counsel, Office of Foreign Assets Control, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled ''31 CFR Part 575—Authorization for U.S. Financial Institutions to Transfer Certain Claims Against the Government of Iraq'' received on November 20, 2003; to the Committee on Banking, Housing, and Urban Affairs.

EC–5340. A communication from the Director, Executive Office of the President, Office of Management and Budget, transmitting, pursuant to law, a report on direct spending or receipts legislation dated October 24, 2001; to the Committee on the Budget.

EC–5341. A communication from the Assistant Secretary for Civil Works, Department of the Army, transmitting, pursuant to law, a report relative to the Port of Los Angeles Channel Deepening Project, California; to the Committee on Environment and Public Works.

EC–5342. A communication from the Director, Office of Congressional Affairs, Office of Nuclear Reactor Regulation, transmitting, pursuant to law, the report of a rule entitled ''Direct Final Rule on Decommissioning Trust Provisions'' (RIN3150–AH32) received on November 19, 2003; to the Committee on Environment and Public Works.

EC–5343. A communication from the Assistant Secretary, Legislative Affairs, Department of State, transmitting, pursuant to the Arms Export Control Act, the report of a proposed license for the export of defense articles or defense services sold commercially under a contract in the amount of $100,000,000 or more to Australia; to the Committee on Foreign Relations.

EC–5344. A communication from the Assistant Secretary, Legislative Affairs, Department of State, transmitting, pursuant to the Arms Export Control Act, the report of a proposed manufacturing agreement of the manufacture of significant military equipment abroad and the license for the export of defense articles or defense services sold commercially under a contract in the amount of $50,000,000 or more to the Republic of Korea; to the Committee on Foreign Relations.

EC–5345. A communication from the Director, Executive Office of the President, Office of Management and Budget, transmitting, pursuant to law, a report on direct spending or receipts legislation dated October 24, 2001; to the Committee on Foreign Relations.

EC–5346. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''Appeals Settlement Guidelines: Forest Products—Losses of Timber for Epidemic for Southern Pine Beetles'' (UIL165.19–00) received on November 20, 2003; to the Committee on Finance.

EC–5347. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''October–December 2003 Bond Fund Amounts'' (Rev. Rul. 2003–117) received on November 20, 2003; to the Committee on Finance.

EC–5348. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''Transfers to Provide for Satisfaction of Contested Liabilities'' (RIN1545–BA91) received on November 20, 2003; to the Committee on Finance.

EC–5349. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''Transfers to Provide for Satisfaction of Contested Liabilities'' (RIN1545–BA91) received on November 20, 2003; to the Committee on Finance.

EC–5350. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''Applicable Federal Rates—December 2003'' (Rev. Rul. 2003–122) received on November 20, 2003; to the Committee on Finance.

EC–5351. A communication from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting, pursuant to law, the report of a rule entitled ''Transfers to Trusts to Provide for the Satisfaction of Contested Liabilities'' (Notice 2003–77) received on November 20, 2003; to the Committee on Finance.

EC–5352. A communication from the Procurement Executive, Department of State, transmitting, pursuant to law, the report of a rule entitled ''Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace'' (RIN1400–AB83) received on November 19, 2003; to the Committee on Governmental Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–326. A resolution adopted by the General Assembly of the State of New Jersey relative to the federal tax code; to the Committee on Armed Services.

ASSEMBLY RESOLUTION NO. 292

Whereas, The President of the United States has authorized the Secretary of Defense to mobilize select members of the National Guard to active duty in response to the continuing global war on terrorism, armed conflict with Iraq, and heightened tensions with North Korea, additionally, state governors have mobilized National Guard members for state active duty to protect airports, nuclear power plants and interstate bridges and tunnels; and

Whereas, Members of the National Guard activated by the President of the United States are entitled to certain exemptions from income taxation that members of the National Guard activated by a Governor are not; and

Whereas, Members of the National Guard activated during the current crises, whether activated by the President of the United States or a Governor, are serving vital interests for which they deserve the full support of our government; and

Whereas, Many of the National Guard members and their families will suffer short and long-term hardships due to their state activation during the crises; and

Whereas, It is fitting and proper that the United States government recognize the sacrifice that these mobilized National Guard members and their families are making; and

Whereas, Part of this recognition should consist of the enactment of federal legislation establishing the same tax treatment for allowances received by members of the National Guard on state active duty as exists for allowances received by such members on federal active duty: Now, therefore, be it

Resolved by the General Assembly of the State of New Jersey:

1. The President of the United States and the Congress of the United States are respectfully urged to enact legislation to amend the provisions of the federal tax code to exempt from taxable income of National Guard members on state active duty allowances received for housing and subsistence.

2. Duly authenticated copies of this resolution, signed by the Speaker of the General Assembly and attested by the Clerk thereof, shall be transmitted to the President of the United States, the Majority and Minority Leaders of the United States Senate, the Speaker and Minority Leader or the United States House of Representatives, and each member of Congress elected from the State of New Jersey.

———

POM–327. A resolution adopted by the General Assembly of the State of New Jersey relative to trade relations with Taiwan; to the Committee on Finance.

ASSEMBLY RESOLUTION NO. 228

Whereas, The United States and the Republic of China, commonly known as Taiwan, maintain an important trade relationship, with Taiwan being among the largest trading partners of the United States and the United States being one of the largest exporters to Taiwan; and

Whereas, Taiwan, the fourteenth largest trading nation in the world, is a center for international trade which is vital to the economic prosperity of this State and the United States in general; and

Whereas, The State of New Jersey and Taiwan established a sister-state relationship in 1989 symbolizing the close friendship between the people of New Jersey and the people of Taiwan; and

Whereas, This State seeks to encourage and expand mutually beneficial commercial relationships with Taiwan; and

Whereas, Taiwan is a modern democracy that routinely holds free and fair elections and has dramatically improved its record on human rights; and

Whereas, Taiwan's 23,000,000 people are not represented in the United Nations; and

Whereas, Taiwan has in recent years repeatedly expressed its strong desire to participate in the United Nations and has much to contribute to the work and funding of the United Nations; and

Whereas, Taiwan's participation in the United Nations will help maintain peace and stability in Asia and the Pacific: Now, therefore, be it

Resolved by the General Assembly of the State of New Jersey:

1. The Congress and the President of the United States are respectfully memorialized to strengthen trade relations with the Republic of China (Taiwan) and to support the participation of the Republic of China (Taiwan) in the United Nations.

2. Duly authenticated copies of this resolution, signed by the Speaker of the General Assembly and attested by the Clerk thereof, shall be transmitted to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, the United States Trade Representative, and every member of the New Jersey Congressional delegation.

———

POM–328. A resolution adopted by the General Assembly of the State of New Jersey relative to a Medicare prescription drug benefit; to the Committee on Finance.

ASSEMBLY RESOLUTION NO. 318

Whereas, Some senior citizens in New Jersey have prescription drug coverage through the ''Pharmaceutical Assistance to the Aged and Disabled'' and Medicaid programs, Medicare supplemental insurance policies or retirement benefit plans; however, according to the federal government, approximately one-third of senior citizens in the nation do not have any insurance coverage for prescription drugs; and

Whereas, Prescription drugs and medication therapy management services are essential components of medical treatment, yet the Medicare program does not offer a comprehensive prescription drug and service benefit to senior citizens who need prescription drug and service coverage in order to be able to afford their medications and comply with prescription medication regimes; and

Whereas, Proper utilization of prescriptions drugs can be one of the most cost-effective medical interventions available in the health care system and medication therapy management services would assist senior citizens in proper medication utilization, which can help reduce adverse medication events that oftentimes result in increased spending of Medicare funds for nursing home stays and hospital, physician and emergency room visits; and

Whereas, Proper utilization of prescription drugs can meet the needs of special populations with chronic diseases and those with co-morbidities through coordinating care with disease management, drug utilization review and patient education program, all of which aid in ameliorating medical errors; and

Whereas, Promoting greater access to prescription drugs through the inclusion of a prescription benefit in the Medicare program would reduce the incidence of senior citizens employing unsafe cost-saving methods, such as splitting pills and staggering the days on which medications are taken; and

Whereas, Comprehensive reform of the Medicare program would coordinate care for this population and offer more choices of quality coverage for senior citizens, while maintaining the financial sustainability of the program; and

Whereas, A voluntary, comprehensive Medicare prescription drug benefit program, which provides eligible enrollees with covered outpatient prescription drugs, medication preparation services and medication therapy management services, would ensure senior citizens access to necessary prescription drugs and services: Now, therefore, be it

Resolved by the Assembly of the State of New Jersey:

1. This House respectfully memorializes Congress to enact, and the President of the United States to sign into law, a financially sustainable, voluntary, universal and comprehensive prescription drug benefit in the Medicare program, which would ensure senior citizens access to necessary prescription drugs and services.

2. Duly authenticated copies of this resolution, signed by the Speaker of the General Assembly and attested by the Clerk of the General Assembly, shall be forwarded to the President of the United States, the Secretary of Health and Human Services of the United States, the presiding officers of the United States Senate and the House of Representatives, and each of the members of the Congress of the United States elected from the State of New Jersey.

———

POM–329. A resolution adopted by the Commission of the City of Miami of the State of Florida relative to tax-exempt governmental facilities; to the Committee on Finance.

———

POM–330. A resolution adopted by the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania relative to steel tariffs; to the Committee on Finance.

HOUSE RESOLUTION NO. 348

Whereas, The Commonwealth of Pennsylvania is the birthplace of the American steel industry and home to the country's largest steel producer, United States Steel Corporation, and to the United Steelworkers of America; and

Whereas, The House of Representatives of the Commonwealth of Pennsylvania unanimously passed House Resolution 429 on February 12, 2002, calling upon the President to maintain the Section 201 steel tariffs; and

Whereas, The Senate of the Commonwealth of Pennsylvania adopted Senate Resolution 165 on February 12, 2002, calling upon the President to maintain the Section 201 steel tariffs; and

Whereas, As set forth in House Resolution 429 and Senate Resolution 165, the domestic steel industry and the United Steelworkers of America have worked cooperatively and made difficult decisions to ensure that the steel industry's restructuring occur in order to advance a globally competitive United States steel industry; and

Whereas, The President of the United States imposed steel tariffs on March 5, 2003, which have been vitally important to allow for the restructuring of the steel industry; and

Whereas, Since the imposition of the Section 201 tariffs, imports and domestic production of steel have increased; and

Whereas, Steel prices in the United States are still lower than in most other major steel-consuming markets around the world, and any inquiry suffered by steel-consuming industries is unrelated to the President's steel program; and

Whereas, The overall competitiveness of the United States manufacturing industries relies on the ability to maintain a steady domestic steel supply; and

Whereas, Maintaining a steady domestic steel supply is critical to the overall competitiveness of the United States manufacturing industries in the global marketplace; and

Whereas, Steel is essential to the manufacturing and infrastructure sectors, the mainstays of every advanced economy, and no

major industrialized nation has been able to function without the ability to produce steel; and

Whereas, The steel tariffs the President imposed in 2002 have provided relief for the domestic steel industry; the tariffs have stopped the hemorrhaging and the steel industry is seeing signs of real recovery; the industry has begun the process of significant restructuring to adjust to the current import competition situation; and continued relief for the full three-year term is necessary so that the industry can undertake vital capital investments that it was forced to postpone due to the import crisis; therefore be it

Resolved (the Senate concurring), That the General Assembly urge the President to maintain the Section 201 steel tariffs for the three-year duration and provide all available assistance to ease the hardship which was resulted for thousands of retired steelworkers as a result of bankruptcies and restructuring; and be it further

Resolved, That a copy of this resolution be transmitted to the President of the United States, to Vice President Dick Cheney, to the members of Congress and to Pennsylvania Governor Edward G. Rendell.

POM–331. A resolution adopted by the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania relative to the Medicare program; to the Committee on Finance.

HOUSE RESOLUTION NO. 255

Whereas, The mammogram is the medical standard in early breast cancer detection, reducing mortality due to breast cancer by at least 30%; and

Whereas, In the past year and a half, low Medicare and private insurance reimbursement rates for mammograms have contributed to a crisis in mammography; and

Whereas, The average cost of a mammogram is between $90 and $100 and Medicare only reimburses $69 for the procedure; and

Whereas, The private insurance reimbursement is between $50 and $60; and

Whereas, As payments from the Medicare program have not kept pace with rising health care costs, hundreds of radiology clinics have been forced to close their doors and radiologists have been unable to provide mammography services because health care providers are not adequately reimbursed; and

Whereas, The current mammography crisis is causing an increasing shortage of qualified radiologists to administer mammograms; and

Whereas, United States Senators Tom Harkin and Olympia Snowe introduced Senate Bill No. 548, which would be known as the Assure Access to Mammography Act; and

Whereas, Senate Bill No. 548 would increase:

(1) The reimbursement rate of mammography services under the Medicare program to $90.

(2) The Medicare graduate medical education funding for added radiology residency slots, some of which are required to specialize in mammography.

(3) The funding for allied health profession loan programs in order to increase the supply of qualified radiological technicians available to conduct mammograms; therefore be it

Resolved, That the House of Representatives of the Commonwealth of Pennsylvania memorialize the Congress of the United States to pass Senate Bill No. 548 to provide enhanced reimbursements for and expanded capacity to mammography services under the Medicare program; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States, the Secretary of Health and Human Services, the presiding officers of each house of Congress and to each member of Congress from Pennsylvania.

POM–332. A resolution adopted by the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania relative to the Federal Unemployment Tax Act; to the Committee on Finance.

HOUSE RESOLUTION NO. 53

Whereas, the Federal Unemployment Tax Act (FUTA) requires that every employer pay an excise tax of 6.2% on the first $7,000 of total wages paid to each employee; and

Whereas, FUTA includes corporate officers within the scope of covered employment by defining these persons as ''employees'' of a corporation (26 U.S.C. §3121(d)(1)); and

Whereas, Pennsylvania employers, including corporate officers, can, to the extent provided by law, take a tax credit against the FUTA tax of the unemployment contributions that were paid into Pennsylvania's unemployment compensation fund; and

Whereas, FUTA establishes that employers may take a maximum credit of 5.4% against the FUTA tax; and

Whereas, after the offset credit is applied, Pennsylvania employers who pay into the State unemployment system are left to pay 0.8% FUTA tax on the first $7,000 in wages paid to each employee; and

Whereas, Pennsylvania's Unemployment Compensation Law requires that corporate officers pay unemployment compensation taxes, although they generally are not eligible to collect unemployment compensation benefits should they become unemployed; and

Whereas, Pennsylvania corporate officers have expressed frustration because they are required to pay into the State's unemployment compensation sysetm but are subsequently denied unemployment benefits when they become unemployed; and

Whereas, the payment of unemployment compensation taxes is especially burdensome for small, incorporated businesses; and

Whereas, exempting Pennsylvania corporate officers from State unemployment contribution liability would be futile because such officers would then be required to pay the full 6.2% FUTA tax on their wages instead of the net 0.8% rate normally paid with the 5.4% offset credit permitted for State unemployment taxes paid; and

Whereas, such an exemption would not provide any real tax relief to corporate officers, but would merely result in the Federal Government benefiting from additional tax revenue at the expense of Pennsylvania's unemployment compensation fund: Therefore be it

Resolved (the senate concurring) That the General Assembly of the Commonwealth of Pennsylvania urge the Congress to reexamine the FUTA tax as it relates to corporate officers and reevaluate the need for such a tax; and be it further

Resolved, That copies of this resolution be transmitted to the presiding officers of each house of Congress and to each member of Congress from Pennsylvania.

POM–333. A resolution adopted by the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania relative to the war against terrorism; to the Committee on Foreign Relations.

HOUSE RESOLUTION NO. 373

Whereas, nineteen terrorists hijacked four commercial airplanes on September 11, 2001, crashing two planes into the twin towers of the World Trade Center in New York City, one into the Pentagon, in Washington, D.C., and one in Pennsylvania, resulting in the loss of life of thousands of innocent people; and

Whereas, the events of September 11 led President George W. Bush to initiate a war against terrorism that is being fought at home and abroad through multiple operations including diplomatic, military, financial, investigative, homeland security and humanitarian actions; and

Whereas, the United States is enforcing a doctrine which makes plain that terrorists will be held responsible for their actions and governments which harbor, feed, house and hide terrorists will be held accountable for these acts; and

Whereas, the United States has moved to block the assets of 62 organizations and individuals associated with two investment and money-moving networks of terror; and

Whereas, the coalition of countries supporting the financial war against terrorism now stands at 195 countries; and

Whereas, the United States has issued orders blocking the access of 150 known terrorists, terrorist organizations and terrorist financial centers to United States financial systems; and

Whereas, the United States Department of Defense has airdropped 1,725,840 Humanitarian Daily Rations totaling approximately $120 million into Afghanistan; and

Whereas, the United Nations reports that since November 1, 2001, nearly 12,000 refugees have spontaneously returned to Afghanistan from refugee camps in Iran, representing only a small portion of the estimated number of Afghan refugees in Pakistan and Iran, and it is apparent that humanitarian efforts must continue and be encouraged; and

Whereas, the people of Afghanistan have suffered extensively under the rule of the repressive Taliban regime, with girls denied access to schooling; women prohibited from working, accessing medical care and leaving their home unescorted; women required to wear the enveloping burqa; and other restrictive measures imposed on all Afghan people, including restrictions on smiling, laughing, listening to music and other normal activities of daily living; and

Whereas, talks are under way in Bonn, Germany, among various parties in Afghanistan to establish an agreement leading to a stable, cohesive and broad-based government which is loyal to the people of Afghanistan and respects its international obligations: Therefore be it

Resolved, That the House of Representatives of the Commonwealth of Pennsylvania support and encourage the continued efforts of the President and Congress of the United States to bring those responsible for the September 11, 2001, attack on America to justice; and be it further

Resolved, That the House of Representatives of the Commonwealth of Pennsylvania support and encourage efforts currently under way to establish a stable government in Afghanistan and enable Afghanistan to become a peaceful participant in world nations; and be it further

Resolved, That the House of Representatives of the Commonwealth of Pennsylvania encourage national and international efforts to bring humanitarian aid and relief to the people of Afghanistan; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States, to the presiding officers of each house of Congress and to each member of Congress from Pennsylvania.

POM–334. A resolution adopted by the General Assembly of the State of New Jersey relative to funding for the Head Start program; to the Committee on Health, Education, Labor, and Pensions.

ASSEMBLY RESOLUTION NO. 307

Whereas, the Federal Head Start project in the Department of Health and Human Services has been one of the most successful of the Great Society anti-poverty programs; and

Whereas, New Jersey's Head Start programs have played a highly successful and valuable multi-faceted role in fighting poverty, creating economic opportunity and educating low-income children in New Jersey since 1965; and

Whereas, New Jersey's Head Start programs have graduated over 1.5 million children and made them education-ready for kindergarten; and

Whereas, New Jersey Head Start programs currently educate over 16,000 children in New Jersey and build the capacity of thousands of parents and staff; and

Whereas, Head Start programs nationwide and in New Jersey are under attack with a threatened loss of funding and virtual elimination of Federal performance standards that include social services benefits to families; and

Whereas, the Federal Government is proposing to move funding that goes to Head Start programs from the Department of Health and Human Services to the Department of Education; and

Whereas, the Federal Government is also proposing to block grant the Federal funding that goes to Head Start programs to the individual states; and

Whereas, the Department of Education has no experience in supervising comprehensive anti-poverty, social service and education programs for preschoolers and families; and

Whereas, evidence makes clear that block granting to the states the funds that now go directly from Federal to local Head Start programs would undermine the consistent quality of Head Start nationwide; and

Whereas, studies show that Federal funds are 8 times more likely than State funds to reach the neediest children, including the General Accounting Office 1998 Report ''State and Federal Efforts to Target Poor Children''; and

Whereas, it is inconsistent for the Federal Government to push for national outcomes for Head Start children and simultaneously erase the mechanisms to help achieve them; and

Whereas, currently, Head Start funds only 6 slots out of every 10 for eligible children and Early Head start has only enough funding to serve 3% of all eligible children; and

Whereas, the New Jersey Supreme Court has already accepted the argument that expanded preschool for low-income children in poor school districts is essential to help combat the disadvantages they experience relative to children living in wealthier school districts; and

Whereas, New Jersey has this nation's most segregated housing system and school districts, and loss of Head Start means low-income and black and Latino children would be disappropriately affected; and

Whereas, over $131 million in Head Start funds comes to local programs in New Jersey, which leverages those funds and invests in local businesses within the local Head Start community; and

Whereas, many community-based Head Start programs in New Jersey are able to build preschool facilities more economically and efficiently within the community than the State and public schools; and

Whereas, over 1,060 of Head Start's 3,400 employees in New Jersey are former Head Start parents and from the local community; and

Whereas, Head Start's mission includes a commitment to help parents become economically viable and better advocates for children and also to strengthen the community and engage in economic development activities; and

Whereas, block granting would undermine the New Jersey Supreme Court's Abbott v. Burk decision and allow the State to use the Federal funds to pay for its expenses rather than provide the supplemental funds that the Head Start programs need to meet the Supreme Court mandates: Now, therefore, be it

Resolved by the General Assembly of the State of New Jersey:

1. This House expresses its opposition to the move of Head Start funding by the Federal Government from the Department of Health and Human Services to the Department of Education and also expresses its opposition to provide Head Start funding on a block grant basis.

2. Duly authenticated copies of this resolution, signed by the Speaker of the General Assembly and attested by the Clerk, shall be transmitted to the President and Vice-President of the United States, the Speaker of the House of Representatives, the Secretaries of Education and Health and Human Services, and every member of Congress elected from this State.

POM–335. A resolution adopted by the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania relative to consolidation loans; to the Committee on Health, Education, Labor, and Pensions.

HOUSE RESOLUTION NO. 388

Whereas, the 1998 Amendments to the Higher Education Act of 1965 (Public Law 105–244) provided for Federal consolidation loans to help students and graduates by reducing the cost of repaying the money that they borrowed to finance their higher education; and

Whereas, the law provides that a borrower who has a Federal consolidation loan is not eligible for a subsequent Federal consolidation loan except in the narrower circumstances in which he or she has obtained another eligible loan that is to be consolidated with the existing consolidation loan; and

Whereas, many students and graduates would benefit from the ability to refinance their student loans more than once in order to secure a lower rate of interest: Therefore, be it

Resolved, That the House of Representatives of the Commonwealth of Pennsylvania memorialize the Congress to amend the 1998 Amendments to the Higher Education Act of 1965 to allow for subsequent Federal consolidation loans regardless of whether the borrower has obtained a new eligible loan; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States, to the presiding officers of each house of Congress and to each member of Congress from Pennsylvania.

POM–336. A resolution adopted by the House of Representatives of the Legislature of the State of Michigan relative to confirmation hearings on the Michigan nominees to the United States 6th Circuit Court of Appeals; to the Committee on the Judiciary.

SENATE RESOLUTION NO. 127

Whereas, the Senate of the United States is perpetuating a grave injustice and endangering the well-being of countless Americans, putting our system of justice in jeopardy in Michigan and the states of the Sixth Circuit of the federal court system; and

Whereas, the Senate of the United States is allowing the continued, intentional obstruction of the judicial nominations of four fine Michigan jurists: Judges Henry W. Saad, Susan B. Neilson, David W. McKeague, and Richard A. Griffin, all nominated by the President of the United States to serve on the United States 6th Circuit Court of Appeals; and

Whereas, this obstruction is not only harming the lives and careers of good, qualified judicial nominees, but it is also prolonging a dire emergency in the administration of justice. This emergency has brought home to numerous Americans the truth of the phrase ''justice delayed is justice denied''; and

Whereas, both of Michigan's Senators continue to block the Judiciary Committee of the United States from holding hearings regarding these nominees. This refusal to allow the United States to complete its constitutional duty of advice and consent is denying the nominees the opportunity to address any honest objections to their records or qualifications. It is also denying other Senators the right to air the relevant issues and vote according to their consciences. This is taking place during an emergency in the United States 6th Circuit Court of Appeals with the backlog of cases; and

Whereas, we join with the members of Michigan's congressional delegation who wrote Chairman Orrin Hatch on February 26, 2003, to express their concern that ''if the President's nominations are permitted to be held hostage, for reasons not personal to any nominee, then these judicial seats traditionally held by judges representing the citizens of Michigan may be filled with nominees from other states within the Sixth Circuit. This would be an injustice to the many citizens who support these judges and who have given much to their professions and government in Michigan''; and

Whereas, we are concerned about the Sixth Circuit as a whole, a circuit understaffed, with 4 of its 16 seats vacant, knowing that the Sixth Circuit ranks next to last out of the 12 circuit courts in the time it takes to complete its cases. Since 1996, each active judge has had to increase his or her number of decisions by 46%—more than three times the national average. In the recent past, the Sixth Circuit has taken as long as 15.3 months to reach a final disposition of an appeal. With the national average at only 10.9 months, this means the Sixth Circuit takes over 40% longer than the national average to process a case; and

Whereas, the last time the Sixth Circuit was this understaffed, former Chief Judge Gilbert S. Merritt said that it was handling ''a caseload that is excessive by any standard.'' Judge Merritt also wrote that the court was ''rapidly deteriorating, understaffed and unable to properly carry out their responsibilities''; and

Whereas, decisions from the Sixth Circuit are slower in coming, based on less careful deliberation, and, as a result, are less likely to be just and predictable. The effects on our people, our society, and our economy are far-reaching, including transaction costs. Litigation increases as people strive to continue

doing business when the lines of swift justice and clear precedent are being blurred; and

Whereas, President Bush has done his part to alleviate this judicial crisis. Over the past two years, he has nominated eight qualified people to the Sixth Circuit Court of Appeals, with three of them designated to address judicial emergencies. Four of these nominees continue to languish without hearings because of the obstruction of the two Michigan Senators: Now, therefore, be it

Resolved by the senate, That we memorialize the United States Senate and Michigan's United States Senators to act to continue the confirmation hearings and to have a vote by the full Senate on the Michigan nominees to the United States 6th Circuit Court of Appeals; and be it further

Resolved, That copies of this resolution be transmitted to Michigan's United States Senators and to the President of the United States Senate.

POM–337. A resolution adopted by the Senate of the Legislature of the State of Michigan relative to confirmation hearings on the Michigan nominees to the United States 6th Circuit Court of Appeals; to the Committee on the Judiciary.

HOUSE RESOLUTION NO. 108

Whereas, the Senate of the United States is perpetuating a grave injustice and endangering the well-being of countless Americans, putting our system of justice in jeopardy in Michigan and the states of the Sixth Circuit of the federal court system; and

Whereas, the Senate of the United States is allowing the continued, intentional obstruction of the judicial nominations of four fine Michigan jurists: Judges Henry W. Saad, Susan B. Neilson, David W. McKeague, and Richard A. Griffin, all nominated by the President of the United States to serve on the United States 6th Circuit Court of Appeals; and

Whereas, this obstruction is not only harming the lives and careers of good, qualified judicial nominees, but it is also prolonging a dire emergency in the administration of justice. This emergency has brought home to numerous Americans the truth of the phrase ''justice delayed is justice denied''; and

Whereas, both of Michigan's Senators continue to block the Judiciary Committee of the United States Senate from holding hearings regarding these nominees. This refusal to allow the United States Senate to complete its constitutional duty of advice and consent is denying the nominees the opportunity to address any honest objections to their records or qualifications. It is also denying other Senators the right to air the relevant issues and vote according to their consciences. This is taking place during an emergency in the United States 6th Circuit Court of Appeals with the backlog of cases; and

Whereas, we join with the members of Michigan's congressional delegation who wrote Chairman Orrin Hatch on February 26, 2003, to express their concern that ''if the President's nominations are permitted to be held hostage, for reasons not personal to any nominee, then these judicial seats traditionally held by judges representing the citizens of Michigan may be filled with nominees from other states within the Sixth Circuit. Whereas, President Bush has done his part to alleviate this judicial crisis. Over the past two years, he has nominated eight qualified people to the Sixth Circuit Court of Appeals, with three of them designated to address judicial emergencies. Four of these nominees continue to languish without hearings because of the obstruction of the two Michigan Senators: Now, therefore, be it

Resolved by the house of representatives, That we memorialize the United States Senate and Michigan's United States Senators to act to begin the confirmation hearings on the Michigan nominees to the United States 6th Circuit Court of Appeals; and be it further

Resolved, That copies of this resolution be transmitted to Michigan's United States Senators and to the President of the United States Senate.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Ms. COLLINS, from the Committee on Governmental Affairs, without amendment:

S. 1741. A bill to provide a site for the National Women's History Museum in the District of Columbia (Rept. No. 108–204).

By Mr. INHOFE, from the Committee on Environment and Public Works, with an amendment:

S. 1425. A bill to amend the Safe Drinking Water Act to reauthorize the New York City Watershed Protection Program (Rept. No. 108–205).

By Ms. COLLINS, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 1567. A bill to amend title 31, United States Code, to improve the financial accountability requirements applicable to the Department of Homeland Security, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Ms. SNOWE:

S. 1897. A bill to amend title XVIII of the Social Security Act to provide a clarification of congressional intent regarding the counting of residents in a nonprovider setting for purposes making payment for medical education under the medicare program; to the Committee on Finance.

By Mr. COLEMAN:

S. 1898. A bill to amend the Internal Revenue Code of 1986 to allow tax-payers to designate part or all of any income tax refund to support reservists and National Guard members; to the Committee on Finance.

By Mr. BROWNBACK (for himself and Mr. GREGG):

S. 1899. A bill to improve data collection and dissemination, treatment, and research relating to cancer, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. LUGAR:

S. 1900. A bill to amend the African Growth and Opportunity Act to expand certain trade benefits to eligible sub-Saharan African countries, and for other purposes; to the Committee on Finance.

By Mr. BAYH:

S. 1901. A bill to amend the Internal Revenue Code of 1986 to provide for tax credit for offering employer-based health insurance coverage and to provide for the establishment of health insurance purchasing pools; to the Committee on Finance.

By Mr. REED (for himself, Mr. SPECTER, Mr. DURBIN, and Mr. ALLEN):

S. 1902. A bill to establish a National Commission on Digestive Diseases; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BROWNBACK (for himself and Mr. BAYH):

S. 1903. A bill to promote human rights, democracy, and development in North Korea, to promote overall security on the Korean Peninsula and establish a more peaceful world environment, and for other purposes; to the Committee on the Judiciary.

By Mr. GRAHAM of Florida (for himself and Mr. NELSON of Florida):

S. 1904. A bill to designate the United States courthouse located at 400 North Miami Avenue in Miami, Florida, as the ''Wilkie D. Ferguson, Jr. United States Courthouse''; to the Committee on Environment and Public Works.

By Ms. MURKOWSKI (for herself and Mr. CAMPBELL):

S. 1905. A bill to provide habitable living quarters for teachers, administrators, other school staff, and their households in rural areas of Alaska located in or near Alaska Native Villages; to the Committee on Indian Affairs.

By Mr. SESSIONS (for himself and Mr. MILLER):

S. 1906. A bill to provide for enhanced Federal, State, and local enforcement of the immigration laws, and for other purposes; to the Committee on the Judiciary.

By Mr. DASCHLE (for himself, Mr. JOHNSON, Mr. LEAHY, Mr. NELSON of Nebraska, Mr. PRYOR, Mr. BAUCUS, Mr. DAYTON, Mr. HARKIN, Mr. FEINGOLD, Mr. BINGAMAN, Mr. JEFFORDS, Mr. EDWARDS, and Mr. SCHUMER):

S. 1907. A bill to promote rural safety and improve rural law enforcement; to the Committee on the Judiciary.

By Mr. CORNYN:

S. 1908. A bill to allow certain Mexican nationals to be admitted as nonimmigrant visitors for a period of 6 months; to the Committee on the Judiciary.

By Mr. COCHRAN (for himself and Mr. KENNEDY):

S. 1909. A bill to amend the Public Health Service Act to improve stroke prevention, diagnosis, treatment, and rehabilitation; to the Committee on Health, Education, Labor, and Pensions.

By Mr. WYDEN:

S. 1910. A bill to direct the Secretary of Agriculture to carry out an inventory and management program for forests derived from public domain land; to the Committee on Energy and Natural Resources.

By Mr. HATCH (for himself and Mr. LEAHY):

S. 1911. A bill to amend the provisions of title III of the Trade Act of 1974 relating to violations of the TRIPS Agreement, and for other purposes; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. LEVIN (for himself, Ms. COLLINS, Mr. LIEBERMAN, Mr. REED, Mr. LAUTENBERG, Mr. DODD, Mr. WYDEN, Mr. JEFFORDS, and Mr. KENNEDY):

S. Res. 269. A resolution urging the Government of Canada to end the commercial seal hunt that opened on November 15, 2003; to the Committee on Foreign Relations.

By Mr. COLEMAN (for himself and Mr. DAYTON):

S. Res. 270. A resolution congratulating John Gagliardi, football coach of St. John's University, on the occasion of his becoming the all-time winningest coach in collegiate history; considered and agreed to.

ADDITIONAL COSPONSORS

S. 560

At the request of Mr. CRAIG, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 560, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

S. 595

At the request of Mr. HATCH, the name of the Senator from Texas (Mrs. HUTCHISON) was added as a cosponsor of S. 595, a bill to amend the Internal Revenue Code of 1986 to repeal the required use of certain principal repayments on mortgage subsidy bond financings to redeem bonds, to modify the purchase price limitation under mortgage subsidy bond rules based on median family income, and for other purposes.

S. 674

At the request of Ms. COLLINS, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 674, a bill to amend the National Maritime Heritage Act of 1994 to reaffirm and revise the designation of America's National Maritime Museum, and for other purposes.

S. 811

At the request of Mr. ALLARD, the name of the Senator from Alaska (Ms. MURKOWSKI) was added as a cosponsor of S. 811, a bill to support certain housing proposals in the fiscal year 2003 budget for the Federal Government, including the downpayment assistance initiative under the HOME Investment Partnership Act, and for other purposes.

S. 1006

At the request of Mr. BURNS, the name of the Senator from Vermont (Mr. JEFFORDS) was added as a cosponsor of S. 1006, a bill to reduce temporarily the duty on certain articles of natural cork.

S. 1177

At the request of Mr. JOHNSON, his name was withdrawn as a cosponsor of S. 1177, a bill to ensure the collection of all cigarette taxes, and for other purposes.

S. 1266

At the request of Mrs. CLINTON, the names of the Senator from Illinois (Mr. FITZGERALD), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Colorado (Mr. CAMPBELL) and the Senator from Wyoming (Mr. ENZI) were added as cosponsors of S. 1266, a bill to award a congressional gold medal to Dr. Dorothy Height, in recognition of her many contributions to the Nation.

S. 1298

At the request of Mr. AKAKA, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 1298, a bill to amend the Farm Security and Rural Investment Act of 2002 to ensure the humane slaughter of non-ambulatory livestock, and for other purposes.

S. 1354

At the request of Ms. MURKOWSKI, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 1354, a bill to resolve certain conveyances and provide for alternative land selections under the Alaska Native Claims Settlement Act related to Cape Fox Corporation and Sealaska Corporation, and for other purposes.

S. 1411

At the request of Mr. KERRY, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 1411, a bill to establish a National Housing Trust Fund in the Treasury of the United States to provide for the development of decent, safe, and affordable housing for low-income families, and for other purposes.

S. 1500

At the request of Mr. CONRAD, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1500, a bill to amend the Internal Revenue Code of 1986 to modify the tax credit for holders of qualified zone academy bonds.

S. 1619

At the request of Mrs. MURRAY, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 1619, a bill to amend the Individuals with Disabilities Education Act to ensure that children with disabilities who are homeless or are wards of the State have access to special education services, and for other purposes.

S. 1758

At the request of Mr. VOINOVICH, the name of the Senator from South Carolina (Mr. GRAHAM) was added as a cosponsor of S. 1758, a bill to require the Secretary of the Treasury to analyze and report on the exchange rate policies of the People's Republic of China, and to require that additional tariffs be imposed on products of that country on the basis of the rate of manipulation by that country of the rate of exchange between the currency of that country and the United States dollar.

S. 1781

At the request of Mr. DORGAN, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 1781, a bill to authorize the Secretary of Health and Human Services to promulgate regulations for the reimportation of prescription drugs, and for other purposes.

S. 1879

At the request of Ms. MIKULSKI, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 1879, a bill to amend the Public Health Service Act to revise and extend provisions relating to mammography quality standards.

S. 1890

At the request of Mr. ENZI, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of S. 1890, a bill to require the mandatory expensing of stock options granted to executive officers, and for other purposes.

S. CON. RES. 81

At the request of Mrs. FEINSTEIN, the name of the Senator from Georgia (Mr. MILLER) was added as a cosponsor of S. Con. Res. 81, a concurrent resolution expressing the deep concern of Congress regarding the failure of the Islamic Republic of Iran to adhere to its obligations under a safeguards agreement with the International Atomic Energy Agency and the engagement by Iran in activities that appear to be designed to develop nuclear weapons.

S. RES. 202

At the request of Mr. CAMPBELL, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of S. Res. 202, a resolution expressing the sense of the Senate regarding the genocidal Ukraine Famine of 1932–33.

S. RES. 216

At the request of Mr. LOTT, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. Res. 216, a resolution establishing as a standing order of the Senate a requirement that a Senator publicly discloses a notice of intent to object to proceeding to any measure or matter.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COLEMAN:

S. 1898. A bill to amend the Internal Revenue Code of 1986 to allow tax-payers to designate part or all of any income tax refund to support reservists and National Guard members; to the Committee on Finance.

Mr. COLEMAN. Mr. President, I ask unanimous consent that the bill I introduce today—the Voluntary Support for Reservists and National Guard Members Act, which creates a voluntary check-off on tax returns to support the income lost to reservists who are called to active duty—be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1898

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Voluntary Support for Reservists and National Guard Members Act''.

SEC. 2. DESIGNATION OF OVERPAYMENTS TO SUPPORT RESERVISTS.

(a) DESIGNATION.—

(1) IN GENERAL.—Subchapter A of chapter 61 of the Internal Revenue Code of 1986 is amended by adding at the end the following new part:

''PART IX—DESIGNATION OF OVERPAYMENTS TO SUPPORT RESERVISTS

''Sec. 6097. Designation.

''SEC. 6097. DESIGNATION.

''(a) IN GENERAL.—In the case of an individual, with respect to each taxpayer's return for the taxable year of the tax imposed by chapter 1, such taxpayer may designate that a specified portion (not less than $1) of any overpayment of tax for such taxable year be paid over to the Reservist Income Differential Trust Fund.

''(b) MANNER AND TIME OF DESIGNATION.—A designation under subsection (a) may be made with respect to any taxable year only at the time of filing the return of the tax imposed by chapter 1 for such taxable year. Such designation shall be made in such manner as the Secretary prescribes by regulations except that such designation shall be made either on the first page of the return or on the page bearing the taxpayer's signature.

''(c) OVERPAYMENTS TREATED AS REFUNDED.—For purposes of this title, any portion of an overpayment of tax designated under subsection (a) shall be treated as—

''(1) being refunded to the taxpayer as of the last date prescribed for filing the return of tax imposed by chapter 1 (determined without regard to extensions) or, if later, the date the return is filed, and

''(2) a contribution made by such taxpayer on such date to the United States.''.

(2) TRANSFERS TO RESERVIST INCOME DIFFERENTIAL TRUST FUND.—The Secretary of the Treasury shall, from time to time, transfer to the Reservist Income Differential Trust Fund the amounts designated under section 6097 of the Internal Revenue Code of 1986.

(3) CLERICAL AMENDMENT.—The table of parts for subchapter A of chapter 61 of the Internal Revenue Code of 1986 is amended by adding at the end the following new item:

''Part IX. Designation of overpayments to support reservists.''.

(b) RESERVIST INCOME DIFFERENTIAL TRUST FUND.—

(1) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1986 (relating to trust fund code) is amended by adding at the end the following new section:

''SEC. 9511. RESERVIST INCOME DIFFERENTIAL TRUST FUND.

''(a) ESTABLISHMENT.—There is established in the Treasury of the United States a trust fund to be known as the 'Reservist Income Differential Trust Fund', consisting of such amounts as may be appropriated or credited to such Trust Fund as provided in this section or section 9602(b).

''(b) TRANSFERS TO TRUST FUND.—There are hereby appropriated to the Reservist Income Differential Trust Fund amounts equivalent to the amounts designated under section 6097 (relating to designation of overpayments to support reservists).

''(c) EXPENDITURES.—Amounts in the Reservist Income Differential Trust Fund shall be available for making distributions to eligible members of reserve components in accordance with section 212 of title 37, United States Code.''.

(2) CLERICAL AMENDMENT.—The table of sections for such subchapter is amended by adding at the end the following new item:

''Sec. 9511. Reservist Income Differential Trust Fund.''.

(c) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 2003.

(2) SUBSECTION (b).—The amendments made by subsection (b) shall take effect on the date of the enactment of this Act.

SEC. 3. PAY DIFFERENTIAL FOR MOBILIZED RESERVES.

(a) AUTHORITY.—

(1) IN GENERAL.—Chapter 3 of title 37, United States Code, is amended by adding at the end the following new section:

''§ 212. Reserves on active duty: pay differential for service in support of a contingency operation

''(a) AUTHORITY.—To the extent provided in appropriations Acts, the Secretary of a military department shall pay an eligible member of a reserve component of the armed forces a pay differential computed under subsection (c).

''(b) ELIGIBLE MEMBER.—A member of a reserve component is eligible for a pay differential for each month during which the member is serving on active duty for a period of more than 30 days pursuant to a call or order to active duty under a provision of law referred to in section 101(a)(13)(B) of title 10.

''(c) AMOUNT.—(1) Subject to paragraphs (2) and (3), the amount of a pay differential paid under this section for a month to a member called or ordered to active duty as described in subsection (b) shall be equal to the excess of—

''(A) the monthly rate of the salary, wage, or similar form of compensation that applied to the member in the member's position of employment (if any) for the last full month before the month in which the member either commenced the period of active duty to which called or ordered or commenced the performance of duties for the armed forces in another duty status in preparation for the performance of the active duty to which called or ordered, over

''(B) the monthly rate of basic pay payable to the member under section 204 of this title for such month of active-duty service.

''(2) The Secretary concerned may pay a member a pay differential under this section for a month in an amount less than the amount computed under paragraph (1) if the Secretary concerned determines that it is necessary to do so on the basis of the availability of funds for such purpose.

''(3) A member may not be paid more than a total of $25,000 under this section.

''(d) FUNDING.—(1) Pay differentials under this section shall be paid out of funds that are transferred from the Reservist Income Differential Trust Fund to military personnel accounts for the purposes of this section.

''(2) The Secretary of Defense and the Secretary of the Treasury shall jointly prescribe regulations providing for transfers of funds in the Reservist Income Differential Trust Fund to the appropriate military personnel accounts to make payments under this section.

''(3) In this section, the term 'Reservist Income Differential Trust Fund' means the Reservist Income Differential Trust Fund referred to in section 6097 of the Internal Revenue Code.''.

(2) CLERICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

''212. Reserves on active duty: pay differential for service in support of a contingency operation.''.

(b) EFFECTIVE DATE.—Section 212 of title 37, United States Code, shall take effect on October 1, 2004, and shall apply with respect to months that begin on or after that date.

By Mr. BROWNBACK (for himself and Mr. GREGG):

S. 1899. A bill to improve data collection and dissemination, treatment, and research relating to cancer, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. BROWNBACK. Mr. President, ours is a remarkable Nation.

America is the home to 90 of the top 100 universities. Americans work an average of 300 hours more per year than our friends in Europe. More patents are applied for in this Nation each year than in all of the EU member states combined. We lead the world in research and development. Perhaps the area in which our labor and investment will have the most profound impact, is in field of the life sciences.

This year our Nation met a remarkable goal. In the span of the last 5 years we have doubled our financial commitment to basic health research funding. Those funds will go toward saving and extending the lives of, and improving the quality of life for, people around the world.

Our history has proven that when this Nation is resolute and determined, we can achieve remarkable things.

In 1939, the United States was producing 800 military airplanes per year. At the onset of World War II, President Roosevelt challenged the Nation to increase manufacturing to 4,000 planes per month. By the end of 1943, in perhaps the greatest industrial feat in history, the United States was producing 8,000 military aircraft per month.

On May 5, 1961, the United States launched Mercury 3 and Alan Shepard became the first American in space, spending a total of 15 minutes and 28 seconds in sub-orbit. Twenty days later President Kennedy addressed a joint session of Congress and proposed that our Nation land a man on the moon before the end of the decade. Only July 29, 1969, four days after leaving the launch pad, Neil Armstrong stepped from the lunar module to the surface of the moon in perhaps the greatest engineering and technological feat in history.

Between 1996 and 1997, for the first time, the total number of cancer deaths in the United States did not rise. That trend has continued to this very day. Today, there are at least 50 compounds under investigation for efficacy as cancer preventives and untold research is being performed in search of new cures and treatments for cancer. This is the time for our Nation to become resolute and determined to achieve what may be the greatest scientific feat in history—to win the war on cancer.

Our Nation began its commitment to the War on Cancer with the passage of the National Cancer Institute Act of 1937. In 1971, Congress committed itself to win the war with the passage of the National Cancer Act. Today, I am joined by the Chairman of the Health, Education, Labor, and Pensions Committee JUDD GREGG in beginning the next campaign of this war, with the introduction of the National Cancer Act of 2003. With this bill we renew our commitment to the fight, and join NCI Director Dr. Andrew Von Eshenbach in his commitment to make cancer survivorship the rule and cancer deaths rare by 2015.

Major provisions within the legislation include: Enhancing our current cancer registry system; enhancing our existing screening mechanisms; creating a new Patient Education Program; enhancing NCI Designated Comprehensive Cancer Centers; elevating the importance of pain management and survivorship throughout the nation's cancer programs; authorizing the Office of Survivorship within NCI; freeing the NCI to engage private entities to further cancer research; and providing patients with greater access to experimental therapies.

In the coming months, I look forward to working with the Chairman, the Administration and other members interested committed to winning the War on Cancer, to get this bill to markup, to the floor and to the President's desk.

By Mr. LUGAR:

S. 1900. A bill to amend the African Growth and Opportunity Act to expand certain trade benefits to eligible sub-Saharan African countries, and for other purposes; to the Committee on Finance.

Mr. LUGAR. Mr. President, I rise today to introduce the ''United States-Africa Partnership Act.'' This bill builds on the important trade and investment initiatives that were contained in the African Growth and Opportunity Act (AGOA) passed in 2000.

The original African Growth and Opportunity Act and the expansion of AGOA that I am introducing today emphasize the need to elevate the African private sector. The AGOA legislation offers enhanced trade benefits, more U.S. private sector investment, and a higher level dialogue with African governments. It envisions a new economic partnership between the United States and African nations.

To gain these benefits, African countries are expected to undertake sustained economic reform, abide by international human rights practices, and strengthen good goverance. These standards have been used by the U.S. to stimulate reforms in Asia, Latin America, Eastern Europe and elsewhere. There is no reason to expect that they will not be successful in Africa as well.

Private investment tends to follow good governance and economic reform, but the private sector takes cues from government policies and involvement. It is very much in our interest to play a constructive role in the evolving political and economic transition in Africa. A stable and prosperous Africa will be better equipped to cooperate on a range of shared global problems such as weapons proliferation, terrorism, narcotics, the environment and contagious diseases. African economic success also can create new markets for American exports. If jobs are created and foreign exchange is earned through enhanced exports, Africa will have greater capacity to buy goods and services from abroad. They will likely purchase machinery, electronics, financial services, agricultural products, and many other goods and services from U.S. suppliers.

If we had ignored Taiwan and Korea in the 1960s when they were at stages of economic development comparable to many African societies today, we would have missed out on enormous opportunities in East Asia. Years from now, I hope we can look back and say that we were present at a crucial juncture in Africa's growth and development and that we played a constructive role in that change.

In an effort to reverse the persistent under-performance by African economies and to stimulate American involvement in Africa, I introduced the African Growth and Opportunity Act in the United States Senate in 1999. Since its enactment in 2000, AGOA has been a positive economic force in Africa. In 2002, 94 percent of U.S. imports from AGOA-eligible countries entered duty-free. The United States imported $9 billion in merchandise duty-free under AGOA in 2002, a 10 percent increase from 2001.

Imports from African countries, not counting oil, jumped 50 percent last year. In South Africa, sub-Sahara's most important economy, exports of automobiles have increased sixteenfold in the past two years. The tiny country of Lesotho, population 2.2 million, generated $318 million in AGOA exports in 2002. New export-oriented garment factories have created 25,000 jobs. For the first time in its history, private sector manufacturing employment—thanks to trade—exceeds government employment.

Performances like this, which occurred despite the recent slowdown in world trade, are the direct result of AGOA. The legislation lets African countries export some 1,800 products duty-free, without quotas, to the United States. It is a direct response to developing countries' long-time plea; trade, not aid, is the real key to ending poverty and bringing about sustainable, long term economic growth.

Despite these signs of progress, many Africa economies remain in bad shape. Of the 64 least developed countries in the world, 38 are in Africa. Per capita output of goods and services actually dropped during the 1990s, according to the World Bank, and with only 1.4 percent of world trade in 2001, sub-Saharan Africa has been falling behind the rest of the world. During the 1990s, global gross domestic product grew a robust 44 percent; the figure for Africa was only 8.5 percent. From 1990 to 2001, gross national income per capita in sub-Saharan Africa actually declined by .2 percent.

Africa is in need of help, and expanding AGOA should be a part of the development strategy for the continent. The experience of AGOA has taught us valuable lessons about the path to enhanced investment and economic development and has confirmed some of the key principles that proponents of market-based development have used to guide policy. First, AGOA has demonstrated that a commitment to good governance and a positive investment climate is important to economic growth. Countries such as Lesotho, which has made significant efforts in recent years to promote economic reform and stable democracy, have derived the most benefit from the AGOA provisions. Second, the experience of AGOA has demonstrated that regional integration is as essential to development as access to the U.S. and other foreign markets. Using the infrastructure and economic stability of South Africa as a base, neighboring southern African countries have worked together to take advantage of the benefits under AGOA.

AGOA should not be seen as an end in itself. Rather, it is an initial step designed to expand development and decrease poverty by promoting greater integration of Africa into the global trading community. Achieving these

goals will require both enhancements to the AGOA framework and additional steps to address the compelling problems facing Africa. Our trade efforts must be part of a broader American partnership with the often-neglected countries of Africa.

This partnership starts with three issues. First, we must help address the HIV/AIDS crisis in Africa. In addition to the human tragedy that HIV/AIDS has created in Africa, the epidemic severely limits the economic growth that would reduce Africa's poverty. When workers are forced to call in sick more days than they are able to work, when government positions are experiencing regular turnover, and when scarce capital must be diverted from investment to dealing with the AIDS crisis, it is nearly impossible to build a stable economy.

Earlier this year, Congress passed legislation establishing a program under which the United States will contribute $15 billion over the next 5 years to address the HIV/AIDS crisis in Africa. The President signed this bill into law and has placed his prestige behind its effective implementation. It is my hope that this leadership and much needed funding will start to turn the tide in the fight against the HIV/AIDS epidemic.

Second, we have begun an effort to rethink the way that aid is delivered to the world's poorest countries, most of which are in Africa. Earlier this year, the Senate Foreign Relations Committee took action on the President's Millennium Challenge Corporation initiative. This initiative would deliver up to $8 billion over the next three years to the world's poorest countries, and it would condition that aid on the development of policies by the recipient countries that will make that aid more effective. These policies include a commitment to just and democratic governance and economic freedom. The Millennium Challenge Corporation would build on the lessons of AGOA, which has demonstrated that private investment will flow to countries that build a stable, predictable investment climate. The incentives provided by Millennium Challenge Corporation dollars would help to establish conditions that will cause private investment dollars to flow to the poorest countries.

Third, we need to move forward with enhancements to AGOA itself. That is my purpose in introducing the United States Africa Partnership Act (USAPA)—also known as ''AGAO III.'' The current AGOA expires in 2008. My bill would extend AGOA benefits until 2015. This coincides with the goal of the World Trade Organizations to have a ''tariff free world'' by 2015. We should take action on this extension soon so that investors will have the certainty they need when making investment decisions involving Africa.

AGOA contains a provision that allows least developed countries (LDCs) to export capped quantities of apparel made from third country fabric to the U.S. duty free. All other countries must use U.S. or African fabric inputs in order to receive duty-free treatment. This ''special rule'' for LDCs expires on September 30, 2004. USAPA would extend this provision for four additional years until September 30, 2008.

It also would eliminate the import sensitivity test with respect to African products and nuisance provisions in the rule of origin for apparel. The AGOA rule of origin is modified so that it applies only to the essential components of apparel. USAPA also clarifies the definitions of certain fabrics for customs purposes, including hand-loomed folklore articles.

USAPA would develop initiatives to provide technical and capacity building experience. In the area of agriculture, it directs the Secretary of Agriculture to develop a comprehensive plan to increase import and export abilities in agricultural trade. It also provides that 20 full-time personnel of the Animal and Plant Health Inspection Service be stationed in at least 10 AGOA eligible countries to provide technical assistance in meeting U.S. import requirements and trade capacity building.

In an effort to stimulate business partnerships, the bill I introduce today also addresses investment incentives and encourages the Overseas Private Investment Corporation, the Export-Import Bank, and the Foreign Agricultural Service to facilitate investment in AGOA eligible countries. It directs the Secretary of the Treasury to seek negotiations regarding tax treaties with eligible countries.

In addition, it encourages U.S. private investment in African transportation, energy and telecommunications and increases coordination between U.S. and African transportation entities to reduce transit times and costs between the United States and Africa.

Finally, the bill grants funding for the continuation of the AGOA forums and establishes an AGOA task force to facilitate the goals of the Act.

The original African Growth and Opportunity Act launched an effort to formulate a new American strategy towards Africa. It sought to establish the foundation for a more mature economic relationship with those countries in Africa that undertake serious economic and political reforms. That effort was supported by virtually all sub-Saharan African nations, and it had wide support among American businesses and non-governmental organizations. We should now seize the opportunity to further integrate African countries into the world economy.

The United States-Africa Partnership Act that I introduce today recognizes the enormous potential for economic growth and development in sub-Saharan Africa. It embraces the vast diversity of people, cultures, economies, and potential among forty-eight countries and nearly 700 million people. A stable and economically prosperous Africa can provide new partnerships that will contribute greatly to our commercial and security interests. I urge all members to support the United States-Africa Partnership Act so that we can achieve the mutual long-term benefits that it would bring to Africa and to our country.

By Mr. REED (for himself, Mr. SPECTER, Mr. DURBIN, and Mr. ALLEN):

S. 1902. A bill to establish a National Commission on Digestive Diseases; to the Committee on Health, Education, Labor, and Pensions.

Mr. REED. Mr. President, I rise today, along with my colleague, Senator SPECTER of Pennsylvania, to introduce the National Commission on Digestive Diseases Act.

It is estimated that over 62 million Americans presently suffer from a range of painful, debilitating and in some cases, fatal digestive diseases. Conditions such as inflammatory bowel disease (IBD), irritable bowel syndrome (IBS), colorectal cancer, gastroesophageal reflux disease impact the lives of our friends, loved ones and neighbors. These diseases produce total estimated direct and indirect costs in excess of $40 billion annually. Of course, these figures do not take into account the serious physical and emotional toll digestive diseases have on those afflicted.

Thanks to significant advances in medical science, we are now on the brink of some major scientific breakthroughs in the area of digestive disease research. However, in other areas of this diverse field, we still lack even a basic understanding of the condition itself, let alone effective methods of treatment and prevention.

The bill I am proposing today would call upon the Secretary of the Department of Health and Human Services (HHS) to establish a Commission of scientific and health care providers with expertise in the field, as well as persons suffering from digestive ailments, to assess the state of digestive disease research and develop a long range plan to direct our scientific research agenda with regard to digestive disease. The Commission would submit their report to Congress in 18 months.

This legislation would build upon the successes of a digestive disease commission that was assembled roughly 25 years ago with a similar goal. The 1976 Commission's findings directed significant progress in the area of digestive disease research.

While the plan set forth by the first Commission has certainly accomplished a great deal, the burden of digestive diseases in this country remains substantial and advancements in genetics and medical technology compel the assembly of a new commission

to guide our research efforts well into the 21st century.

I look forward to working with my colleagues towards expeditious passage of this important, bipartisan legislation.

Mr. SPECTER. Mr. President, I have sought recognition today to join my colleague Senator REED of Rhode Island to introduce the National Commission on Digestive Diseases Act.

Each year, more than 62 million Americans are diagnosed with digestive diseases and disorders. These conditions, such as colorectal, liver and pancreatic cancers, inflammatory bowel disease, irritable bowel syndrome, gastroesophageal reflux disease (GERD) and chronic hepatitis C require patients to undergo rigorous courses of medical therapies and treatment. As Chairman of the Labor, Health and Human Services, and Education Appropriations Subcommittee, I am acutely aware that while promising research developments have been made in these areas, the causes of many of these diseases are unknown and their incidence is on the rise.

In 2001, the Lewin Group conducted a study of the economic burden to our society resulting from the direct and indirect costs associated with just 17 of the over several hundred digestive diseases. The results of this study revealed that the total costs associated with physician care, inpatient and outpatient hospital care as well as loss of work for patients with digestive disorders was $42 billion in the year 2000. It is clear from this study and the findings of digestive disease specialists around the country that these disorders represent enormous health and economic consequences for the nation.

The National Commission on Digestive Diseases Act would address the burden of digestive diseases in a comprehensive and coordinated manner. This legislation would create a panel of scientists in the relevant disciplines, patient representatives, employers and other appropriate experts to conduct a comprehensive study on the current state of scientific and clinical knowledge in digestive diseases. The commission would then be charged with evaluating the resources necessary to expedite the discovery of treatments and cures for patients with these diseases and develop a 5–10 year long-range plan for effectively addressing these needs.

In 1976, Congress created a Commission on Digestive Diseases Research which serves as the successful model for this new initiative. Following 18 months of deliberations, the 1970s commission created a long-range plan and recommendations that laid the groundwork for significant progress in the area of digestive diseases research. The state of scientific knowledge has changed substantially since the late 1970s, however, and the advent of genetics and genomics research, as well as the discovery of additional digestive diseases, compels us to look anew at the challenges that digestive diseases present to patients and those who care for them.

It is my hope that this legislation will advance our understanding of the causes, effective treatments, possible prevention, and cures for digestive diseases. I look forward to working with my colleagues to enact this important bipartisan legislation.

By Ms. MURKOWSKI (for herself and Mr. CAMPBELL):

S. 1905. A bill to provide habitable living quarters for teachers, administrators, other school staff, and their households in the rural areas of Alaska located in or near Alaska Native Villages; to the Committee on Indian Affairs.

Ms. MURKOWSKI. Mr. President, I rise to introduce a bill that will have a profound effect on the retention of teachers, administrators, and other school staff in remote and rural areas of Alaska. I am pleased to have Mr. CAMPBELL join me in introducing this bill.

In rural areas of Alaska, school districts face the challenge of recruiting and retaining teachers, administrators and other school staff due to the lack of housing. In the Lower Kuskokwim School District in western Alaska, they hire one teacher for every six who decide not to accept job offers. Half of the applicants not accepting a teaching position in that district indicated that their decision as related to the lack of housing.

Earlier this year, I traveled through rural Alaska with Education Secretary Rod Paige. I wanted him to see the challenges of educating children in such a remote and rural environment. At the village school in Savoonga, the principal slept in a broom closet in the school due to the lack of housing in that village. The special education teacher slept in her classroom, bringing a mattress out each evening to sleep on the floor. The other teachers shared housing in a single home. Needless to say, there is not enough room for the teachers' spouses. Unfortunately, Savoonga is not an isolated example of the teacher housing situation in rural Alaska.

Rural Alaskan school districts experience a high rate of teacher turnover due to the lack of housing. Turnover is as high as 30 percent each year in some rural areas with housing issues being a major factor. How can we expect our children to receive a quality education when the good teachers don't stay? How can we meet the mandates of No Child Left Behind in such an educational environment? Clearly, the lack of teacher housing in rural Alaska is an issue that must be addressed in order to ensure that children in rural Alaska receive the same level of education as their peers in more urban settings.

My bill authorizes the Department of Housing and Urban Development to provide teacher housing funds to the Alaska Housing Finance Corporation, which is a State agency. In turn, the corporation is authorized to provide grant and loan funds to rural school districts in Alaska for teacher housing projects.

This legislation will allow school districts in rural Alaska to address the housing shortage in the following ways: construct housing units; purchase housing units; lease housing units; rehabilitate housing units; purchase or lease property on which housing units will be constructed, purchased or rehabilitated; repay loans secured for teacher housing projects; provide funding to fill any gaps not previously funded by loans or other forms of financing; and conduct any other activities normally related to the construction, purchase, or rehabilitation of teacher housing projects.

Eligible school districts that accept funds under this legislation will be required to provide the housing to teachers, administrators, other school staff, and members of their households.

It is imperative that we address this important issue immediately and allow the flexibility for the disbursement of funds to be handled at the local level. The quality of education of our rural students is at stake.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1905

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Rural Teacher Housing Act of 2003''.

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) housing for teachers, administrators, other school staff, and their households in remote and rural areas of Alaska is often substandard, if available at all;

(2) as a consequence, teachers, administrators, other school staff, and their households are often forced to find alternate shelter, sometimes even in school buildings; and

(3) rural school districts in Alaska are facing increased challenges, including meeting the mandates of the No Child Left Behind Act, in recruiting employees due to the lack of affordable, quality housing.

(b) PURPOSE.—The purpose of this Act is to provide habitable living quarters for teachers, administrators, other school staff, and their households in rural areas of Alaska located in or near Alaska Native Villages.

SEC. 3. DEFINITIONS.

In this Act, the following definitions shall apply:

(1) ALASKA HOUSING FINANCE CORPORATION.—The term ''Alaska Housing Finance Corporation'' means the State housing authority for the State of Alaska, created

under the laws of the State of Alaska, or any successor thereto.

(2) ELEMENTARY SCHOOL.—The term ''elementary school'' has the meaning given that term in section 9101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(3) ELIGIBLE SCHOOL DISTRICT.—The term ''eligible school district'' means a public school district (as defined under the laws of the State of Alaska) located in the State of Alaska that operates one or more schools in a qualified community.

(4) NATIVE VILLAGE.—The term ''Native Village''—

(A) has the meaning given that term in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C 1602); and

(B) includes the Metlakatla Indian Community of the Annette Islands Reserve.

(5) OTHER SCHOOL STAFF.—The term ''other school staff'' means pupil services personnel, librarians, career guidance and counseling personnel, education aides, and other instructional and administrative school personnel.

(6) QUALIFIED COMMUNITY.—

(A) IN GENERAL.—The term ''qualified community'' means a home rule or general law city incorporated under the laws of the State of Alaska, or an unincorporated community (as defined under the laws of the State of Alaska) in the State of Alaska situated outside the limits of such a city, with respect to which, the Alaska Housing Finance Corporation has determined that the city or unincorporated community—

(i) has a population of 6,500 or fewer individuals;

(ii) is situated within or near a Native Village, as determined by the Alaska Housing Finance Corporation; and

(iii) is not connected by road or railroad to the municipality of Anchorage, Alaska.

(B) CONNECTED BY ROAD.—In this paragraph, the term ''connected by road'' does not include a connection by way of the Alaska Marine Highway System, created under the laws of the State of Alaska, or a connection that requires travel by road through Canada.

(7) SECONDARY SCHOOL.—The term ''secondary school'' has the meaning given that term in section 9101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(8) SECRETARY.—The term ''Secretary'' means the Secretary of Housing and Urban Development.

(9) TEACHER.—The term ''teacher'' means an individual who is employed as a teacher in a public elementary or secondary school, and meets the teaching certification or licensure requirements of the State of Alaska.

(10) TRIBALLY DESIGNATED HOUSING ENTITY.—The term ''tribally designated housing entity'' has the meaning given that term in section 4 of the Native American Housing Assistance and Self-Determination Act of 1996 (25 U.S.C. 4103).

(11) VILLAGE CORPORATION.—The term ''Village Corporation'' has the meaning given that term in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602), and includes urban and group corporations, as defined in that section.

SEC. 4. RURAL TEACHER HOUSING PROGRAM.

(a) GRANTS AND LOANS AUTHORIZED.—The Secretary shall provide funds to the Alaska Housing Finance Corporation in accordance with the regulations promulgated under section 5, to be used as provided under subsection (b).

(b) USE OF FUNDS.—

(1) IN GENERAL.—Funds received pursuant to subsection (a) shall be used by the Alaska Housing Finance Corporation to make grants or loans to eligible school districts, to be used as provided in paragraph (2).

(2) USE OF FUNDS BY ELIGIBLE SCHOOL DISTRICTS.—Grants or loans received by an eligible school district pursuant to paragraph (1) shall be used for—

(A) the construction of new housing units within a qualified community;

(B) the purchase and rehabilitation of existing structures to be used as housing units within a qualified community;

(C) the rehabilitation of housing units within a qualified community;

(D) the leasing of housing units within a qualified community;

(E) purchasing or leasing real property on which housing units will be constructed, purchased, or rehabilitated within a qualified community;

(F) the repayment of a loan used for the purposes of constructing, purchasing, or rehabilitating housing units, or for purchasing real property on which housing units will be constructed, purchased, or rehabilitated, within a qualified community, or any activity under subparagraph (G);

(G) any other activities normally associated with the construction, purchase, or rehabilitation of housing units within a qualified community, including—

(i) connecting housing units to various utilities;

(ii) preparation of construction sites;

(iii) transporting all equipment and materials necessary for the construction or rehabilitation of housing units to and from the site on which such housing units exist or will be constructed; and

(iv) environmental assessment and remediation of construction sites or sites where housing units exist; and

(H) the funding of any remaining costs for the construction, purchase, or rehabilitation of housing units within a qualified community, the purchase of real property within a qualified community, or any activity listed under subparagraph (G) that is not financed by loans or other sources of funding.

(c) OWNERSHIP OF HOUSING AND LAND.—

(1) IN GENERAL.—All housing units constructed, purchased, or rehabilitated, or real property purchased, with grant or loan funds provided under this Act, or with respect to which funds under this Act have been expended, shall be owned by the relevant eligible school district, municipality (as defined under the laws of the State of Alaska), Village Corporation, the Metlakatla Indian Community of the Annette Islands Reserve, or a tribally designated housing entity. Ownership of housing units and real property may be transferred between such entities.

(d) OCCUPANCY OF HOUSING UNITS.—

(1) IN GENERAL.—Except as provided under paragraphs (2) and (3), each housing unit constructed, purchased, rehabilitated, or leased with grant or loan funds under this Act, or with respect to which funds awarded under this Act have been expended, shall be provided to teachers, administrators, other school staff, and members of their households.

(2) NON-SESSION MONTHS.—A housing unit constructed, purchased, rehabilitated, or leased with grant or loan funds under this Act, or with respect to which funds awarded under this Act have been expended, may be occupied by individuals other than teachers, administrators, other school staff, or members of their household, only during those times in which school is not in session.

(3) TEMPORARY OCCUPANTS.—A vacant housing unit constructed, purchased, rehabilitated, or leased with grant or loan funds under this Act, or with respect to which funds awarded under this Act have been expended, may be occupied by a contractor or guest of an eligible school district for a maximum period of time, to be determined by the Alaska Housing Finance Corporation.

(e) COMPLIANCE WITH LAW.—Each eligible school district receiving a grant or loan under this Act shall ensure that all housing units constructed, purchased, rehabilitated, or leased with such grant or loan funds, or with respect to which funds awarded under this Act have been expended, meet all applicable laws, regulations, and ordinances.

(f) PROGRAM POLICIES.—

(1) IN GENERAL.—The Alaska Housing Finance Corporation, after consulting with eligible school districts, shall establish policies governing the administration of grant and loan funds made available under this Act. Such policies shall include a methodology for ensuring that funds provided under this Act are made available on an equitable basis to eligible school districts.

(2) REVISIONS.—Not less than every 3 years, the Alaska Housing Finance Corporation shall, in consultation with eligible school districts, consider revisions to the policies established under paragraph (1).

SEC. 5. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Secretary shall promulgate such regulations as are necessary to carry out this Act.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to the Department of Housing and Urban Development such sums as are necessary for each of the fiscal years 2005 through 2014, to carry out this Act.

(b) LIMITATION.—The Secretary and the Alaska Housing Finance Corporation shall each use not more than 5 percent of the funds appropriated in any fiscal year to carry out this Act for administrative expenses associated with the implementation of this Act.

By Mr. SESSIONS (for himself and Mr. MILLER):

S. 1906. A bill to provide for enhanced Federal, State, and local enforcement of the immigration laws, and for other purposes; to the Committee on the Judiciary.

Mr. SESSIONS. Mr. President, I rise today to introduce the Homeland Security Enhancement Act of 1003. Senator MILLER and I have taken the lead in encouraging a culture of cooperation of all levels of immigration law enforcement—Federal, State, and local—and seek to build an immigration law enforcement system that uses unified databases for information sharing from one level to another.

The subject matter of the bill introduced today is one I care very deeply about—the ability of State and local law enforcement to voluntarily aid the Federal Government in the Enforcement of immigration law. Let me be clear, this bill is not about the commandeering of State and local police forces or about forcing them to dedicate resources toward immigration law enforcement, it is simply about their

authority to participate in immigration law enforcement if they so choose.

I am convinced that our ability to successfully enforce our immigration laws is a test of whether we will be a Nation governed by laws.

Many of the immigration reforms enacted by this Congress since 9/11 have been aimed at fixing the first half of our broken immigration system, the visa issuance process that allowed terrorists to enter our country under the guise of legality.

It is now time to look at the second half of our broken immigration system—the half that allows people to remain here illegally for indefinite time periods, regardless of how they came here.

We know that Americans strongly value our heritage as a Nation of immigrants. Americans openly welcome legal immigrants and new citizens with character, ability, decency, and a strong work ethic. However, it is also clear Americans do not feel the same way about illegal immigration. The fact is that a large majority of Americans feel that State and local governments should be aiding the Federal Government in stopping illegal immigration.

A RoperASW poll published in March of this year titled ''Americans Talk About Illegal Immigration'' found that 88 percent of Americans agree, and 68 percent ''strongly'' agree, that Congress should require State and local government agencies to notify the INS, now ICE, and their local law enforcement when they determine that a person is here illegally or has presented fraudulent documentation. Additionally, 85 percent of Americans agree, and 62 percent ''strongly'' agree that Congress should pass a law requiring State and local governments and law enforcement agencies, to apprehend and turn over to the INS, now ICE, illegal immigrants with whom they come in contact.

Those numbers speak volumes about the desires of the American population. It is important to note that those numbers were collected on requiring state and local action. It is very likely that a poll on this bill, a bill that is about volunteer State and local action would yield even stronger support.

America's strength is based on its commitment to the rule of law. Inscribed on the front of the Supreme Court Building just down the street are the words, ''Equal Justice Under Law.''

In the world of immigration laws, a facade of enforcement that holds no real consequences for law breakers is both dangerous and irresponsible. If the only real consequence of coming to this country illegally is a social label, then our immigration laws are but a brightly painted sepulcher full of dead bones, for it is impossible to be a Nation governed by the rule of law, if our laws have no real effect on the lives of the people they govern.

Our illegal alien population is at a record high. The lack of immigration enforcement in our country's interior has resulted in 8–10 million illegal aliens living in the U.S. with another estimated 800,000 illegal aliens joining them every year—that is on top of the more than 1 million that legally immigrate each year. These numbers make it easy for criminal aliens to disappear inside our borders.

Of the 8–10 million illegal aliens present today, the Department of Homeland Security has estimated that 450,000 are ''alien absconders''—people that have been issued final deportation orders but have not shown up for their hearings.

An estimated 86,000 of them are criminal illegal aliens—people convicted of crimes they committed in the U.S. who should have been deported, but have slipped through the cracks and are still here.

The next number is perhaps the most concerning—3,000 of the ''alien absconders'' within our borders are from one of the countries that the State Department has designated to be a ''state sponsor of terrorism.''

The number of illegal aliens outweighs the number of federal agents whose job it is to find them within our borders by 5,000 to 1. The enforcement arm of the old INS, now called The Bureau of Immigration and Customs Enforcement (ICE) has a mere 2,000 interior agents inside the borders. Leaving the job of interior immigration enforcement solely to them will guarantee failure.

State and local police, a force 650,000 strong, are the eyes and ears of our communities. They are sworn to uphold the law. They police our streets and neighborhoods every day. Their role is critical to the success of our immigration system.

For that critical role to be effective, a few very important things need to happen: 1. State and local law enforcement need clear authority to voluntarily act; 2. the NCIC needs to contain critical immigration related information that can be accessed on the roadside; 3. Federal immigration officials have to take custody of illegal aliens apprehended by State officers, they can not continue to tell them to just let them go; 4. the Institutional Removal Program has to be expanded so that criminal aliens are detained after their State sentences until deportation, they can't be released back into the community just to be searched for by federal officials at a later date; and 5. critically needed federal bedspace has to be given to DHS for they can not guarantee effective removal without adequate detention space.

The Homeland Security Enhancement Act that Senator MILLER and I are introducing today will do all of those things.

Let me tell you about a few of the problems in immigration enforcement that started my interest in this area and prompted me to author this bill.

A few years ago, police chiefs and sheriffs in Alabama began to tell me that they had been shut out of the system and felt powerless to do anything about Alabama's growing illegal immigrant population.

As I went to town hall meetings and conferences with police, I heard the same story—''we have given up calling the INS because INS tells us we have to have 15 or more illegal aliens in custody or they will not even come pick them up.''

Even worse is that Alabama police were told that the aliens could not be detained until the INS could manage to send someone. They were told they had to just let them go! They were being told this, even though I thought the legal authority of State and local officers to voluntarily act on violations of immigration law was clear. If there is any doubt that State and local officers have this authority, Congress needs to fix that, which is what this bill will do.

Only two circuits have expressly ruled on State and local law enforcement authority to make an arrest on an immigration law violation. In 1983, the Ninth Circuit, while not mentioning a preexisting general authority, held that nothing in federal law precludes the police from enforcing the criminal provisions of the Immigration and Naturalization Act. See *Gonzales* v. *City of Peoria*, 722 F.2d 468 (9th Cir. 1983).

The Tenth Circuit has reviewed this question on several occasions, concluding squarely that a ''State trooper has general investigatory authority to inquire into possible immigration violations.'' *United States* v. *Salinas-Calderon*, 728 f.2d 1298, 1301 n.3 (10th Cir. 1984).

As the Tenth Circuit has described it, there is a ''preexisting general authority of State or local police officers to investigate and make arrests for violations of federal law, including immigration laws.,'' *United States* v. *Vasquez-Alvares*, 176 F.3d 1294, 1295 (10th Cir. 1999). And again, in 2001, the Tenth Circuit reiterated that ''State and local police officers [have] implicit authority within their respective jurisdictions 'to investigate and make arrests for violations of federal law, including immigration laws.' '' *United States* v. *Santana-Garcia*, 264 F.3d 1188, 1194 (citing *United States* v. *Vasquez-Alvarez*, 176 F.3d 1294, 1295).

None of these Tenth Circuit holdings drew any distinction between criminal violations of the INA and civil provisions that render an alien deportable. It appears that the Ninth Circuit started the confusion regarding the distinction between civil and criminal violations in Gonzales v. City of Peoria by asserting in dicta that the civil provisions of the INA are a persuasive regulatory scheme, and therefore only the

federal government has the power to enforce civil violations. See *Gonzales* v. *City of Peoria*, 722 F.2d 468 (9th Cir. 1983).

This confusion was, to some extent, fostered by an erroneous 1996 opinion of the Office of Legal Counsel (OLC) of the department of Justice, the relevant part of which has since been withdrawn by OLC.

Why was the Federal agency responsible for immigration enforcement telling my police chiefs in Alabama to just let illegal aliens go?

To be fair, ICE probably does not have the manpower or detention space to take custody and detain all illegal aliens. With less than 20,000 appropriated detention beds, ICE tells my office that they do not have the bed space to detain all the illegal aliens that they apprehend; instead, they have to give first priority to detaining the worst of the worst—individuals such as convicted felon aliens.

It is shocking to me that even though we know that detention is a key element of effective removal, we do not even detail all illegal aliens that have been convicted of crimes, even convicted of felonies, before removal. Last February, in a report titled ''the Immigration and Naturalization Service's Removal of Aliens Issued Final Orders'' the Department of Justice Inspector General found that 87 percent of those not detained before removal never get deported. Even in high risk categories, the IG found that only fractions of non-detained violators are ever removed—35 percent of those with criminal records and 6 percent of those from ''state sponsors of terrorism.''

These percentages have not changed substantially since 1996, when the last IG report issued on the ability to remove aliens found that 89 percent of aliens with final deportation orders that are not detained are never removed.

But we cannot lay all the blame on DHS—they can only detain illegal aliens that they have space to detain. They are using all of the bedspace that they have and are releasing people that should be detained because there is no more room. The Homeland Security Enhancement Act would add the critical bedspace DHS needs to fulfill its mission of interior enforcement.

The third problem that has been brought to my attention is the inadequate way we share immigration information with State and local police. We have databases full or information on criminal aliens and aliens with final deportation orders, but that information is not directly available to state and local police. They have to make a special second inquiry to the immigration center in Vermont just to see if an illegal alien is a wanted by DHS.

Without easy access to immigration database information, and with ICE unwilling to come and identify every suspected illegal alien, State and local police cannot quickly and accurately identify who they have detained and who they will be releasing back into the community if they follow ICE's instruction to ''just let them go.''

State and local police are accustomed to checking for criminal information in the NCIC (National Crime Information Center) database, which is maintained by the FBI. They can and routinely do access the NCIC on the roadside when they pull over a car or stop a suspect.

An NCIC check, which takes just minutes, includes information about individuals with outstanding warrants. Even fugitives that use false identification can be identified on the roadside through use of the NCIC when, as is often the case, a police officer has access to an instant fingerprint scanner in his car.

Separately, ICE operates the Law Enforcement Support Center, which makes immigration information available to State and local police, but requires a second additional check after NCIC that most State and local police either don't know about or don't have the time to perform.

The Hart Rudman Report, ''America Still Unprepared—America Still In Danger,'' found that one problem America still confronts is ''650,000 local and State police officials continue to operate in a virtual intelligence vacuum, without access to terrorist watchlists.'' The first recommendation of the report was to ''tap the eyes and ears of local and State law enforcement officers in preventing attacks.'' On page 19, the report specifically cited the burden of finding hundreds of thousands of fugitive aliens living among the population of more than 8.5 million illegal aliens living in the U.S. and suggested that the burden could and should be shared with 650,000 local, county, and State law enforcement officers if they could be brought out of the information void.

If State and local police are not accessing the immigration information we have worked hard to make available, we must find a way to get the information to them, through systems that are used to using. Our bill will get information to them through the system that are already using—the NCIC.

As part of its Alien Absconder Initiative, ICE tells us that it is in the process of entering information on the estimated 450,000 alien absconders into NCIC. As of October 31, only information on 15,200 alien absconders had been entered into NCIC. That number is totally unacceptable and is shocking to me.

This should only be the beginning. At the least, the NCIC should contain information on all illegal aliens who have received final orders of departure and all illegal aliens who have signed voluntary departure agreements. In truth, the NCIC should contain information on all violations of law.

Our bill will ensure that when a NCIC roadside check is done on an individual pulled over for speeding, police will know immediately if the individual has already been ordered to leave the country, has signed a legal document promising to leave, or has overstayed their visa.

Understanding the value of getting immigration information to State and local police comes from understanding that they are the ones who will come into contact with the dangerous illegal aliens on a day-to-day basis.

Three 9/11 hijackers were stopped by State and local police in the weeks proceeding 9/11. Hijacker Mohammad Atta, believed to have piloted American Airlines Flight 77 into the World Trade Center's north tower, was stopped twice by police in Florida, Hijacker Ziad S. Jarrah was stopped for speeding by Maryland State Police two days before 9/11. And, Hani Hanjour, who was on the flight that crashed into the Pentagon, was stopped for speeding by police in Arlington, VA. Local police can be our most powerful tool in the war against terrorism.

The D.C. Snipers were caught because of the fingerprint collected by local police. John Lee Malvo was identified when the fingerprint collected from a magazine at the scene of the liquor store murder and robbery in Montgomery, Alabama matched with the fingerprints collected by INS agents in Washington State. Had both law enforcement entities not done their job by taking prints, it is possible that the identity of John Lee Malvo could have been a mystery for weeks longer.

In February, a 42-year-old woman sitting on a park bench in New York with her boyfriend was dragged away and gang-raped by five deportable illegal immigrants. Although 4 of the 5 had State criminal convictions and 2 had served jail time, the INS claims they were never told about them—thus, they were not deported as the law requires.

Fifty-six illegal aliens were caught by State and local police, and convicted of molestation and child abuse, long before ICE's ''Operation Predator'' found them a few weeks ago living in New York and Northern New Jersey after they should have been deported. Of the 56 arrested, one had raped his 10-year-old niece; another has sexually assaulted a 6-year-old boy; one had raped his 7-year-old niece; and another has sexually assaulted a 2-year-old.

The 9/11 hijacker cases, the D.C. sniper cases, and a multitude of criminal alien cases clearly illustrate that our State and local police are on the front lines in combating alien crime. To cut them out of the system, as we do now, whether intentionally or unintentionally, is to eliminate our most effective weapon against criminal and terrorist aliens.

The opponents of this bill will say that we don't want immigrants to succeed and that we don't want people to come here. That is absolutely not true. We believe in the rule of law. We believe that people should come here to be citizens of this country under the color of law. We want people to come here and reach their fullest potential. But, we believe that a Nation has the right to set the standards by which it accepts people, and if it sets those standards it ought to create a legal system to enforce those standards. This bill will work to enforce the immigration standards our Nation has created.

The opposition will say that State and local police can not adequately respect the civil rights of illegal aliens, and that enforcement will cost too much and will discourage the reporting of crimes. It is curious logic to say that we trust our police to enforce laws against citizens but not against noncitizens here illegally.

I know that State and local police are trained to protect the civil rights of all types of suspects and defendants and that they do so every day in this country. In Alabama, State troopers receive annual training on racial profiling. In New York, the NYC Police Department operations order #11 strictly prohibits racial profiling in law enforcement actions. If Alabama and New York are consistent in how they instruct and train their State and local police with regards to racial profiling, it is safe to assume that the rest of the Nation does as well.

Under this bill, State and local police will have to respect the civil rights of illegal aliens the same way they respect the civil rights of all people against whom they enforce the law. State and local police will continue to be held responsible for violations of civil rights; this bill does not change that fact.

The opposition will say that this bill is expensive; that it costs too much. It is always expensive to enforce the law. I do not think this bill is overly expensive. We have made it as cost affordable as we can by electing to efficiently use resources already available to us. Law enforcement is not an area where it pays to pinch pennies. In immigration enforcement, I believe that it costs us too much not to enforce the law. I believe it is time that Congress take responsibility for providing DHS with the resources they need to do the job we have given them.

When it comes to immigration enforcement in America, the rule of law is not prevailing. If we are serious about securing the homeland, we simply must get serious about immigration enforcement.

It is time to talk about the big picture—time to be honest about what it will really take to fix our broken immigration system. In most cases, we don't need tougher immigration laws, we just need to utilize our existing resources and use some new resources to enforce the laws we already have.

If State and local police are confused about their authority to enforce immigration laws, that authority needs to be clarified. This bill will do that. If State and local police can not access immigration background information on individuals quickly enough, we should change that. This bill makes that information more accessible. If DHS is not taking custody of the illegal aliens being apprehended by State and local police, we need to make it possible for them to do so. This bill will address the practice of ''catching and releasing'' illegal aliens. If we do not have enough detection space to hold people that break the law, then we need more detention space. This bill gives DHS 50 percent more bedspace to use in immigration enforcement. If illegal aliens are being released back into the community after their prison sentences instead of being deported, we need to fix the system that releases them. This bill will extend the Institutional Removal Program to ensure that custody is transferred from the state prison to federal officials at the end of the alien's prison sentence.

Once again I would like to thank Senator MILLER for joining with me to introduce this legislation. It is imperative that we take critical steps toward regaining control of our out-of-control immigration system. This bill is a critical step in the right direction. I encourage my colleagues to study this bill and to join Senator MILLER and I as we work to pass the Homeland Security Act of 2003.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1906

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Homeland Security Enhancement Act of 2003''.

TITLE I—ENHANCING FEDERAL, STATE, AND LOCAL ENFORCEMENT OF THE IMMIGRATION LAWS

SEC. 101. FEDERAL AFFIRMATION OF IMMIGRATION LAW ENFORCEMENT BY STATES AND POLITICAL SUBDIVISIONS OF STATES.

Notwithstanding any other provision of law and reaffirming the existing inherent authority of States, law enforcement personnel of a State or a political subdivision of a State have the inherent authority of a sovereign entity to apprehend, arrest, detain, or transfer to Federal custody aliens in the United States (including the transportation of such aliens across State lines to detention centers), in the enforcement of the immigration laws of the United States. This State authority has never been displaced or preempted by Congress.

SEC. 102. STATE AUTHORIZATION FOR ENFORCEMENT OF FEDERAL IMMIGRATION LAWS ENCOURAGED.

(a) IN GENERAL.—Effective 2 years after the date of enactment of this Act, a State (or political subdivision of a State) that has in effect a statute, policy, or practice that prohibits law enforcement officers of the State, or of a political subdivision within the State, from enforcing Federal immigration laws or from assisting or cooperating with Federal immigration law enforcement in the course of carrying out the officers' law enforcement duties shall not receive any of the funds that would otherwise be allocated to the State under section 241(i) of the Immigration and Nationality Act (8 U.S.C. 1231(i)).

(b) REALLOCATION OF FUNDS.—Any funds that are not allocated to a State due to the failure of the State to comply with this section shall be reallocated to States that comply with this section.

SEC. 103. CIVIL AND CRIMINAL PENALTIES FOR ALIENS UNLAWFULLY PRESENT IN THE UNITED STATES.

(a) ALIENS UNLAWFULLY PRESENT.—Title II of the Immigration and Nationality Act (8 U.S.C. 1151 et seq.) is amended by adding after section 275 the following:

''CRIMINAL PENALTIES AND FORFEITURE FOR UNLAWFUL PRESENCE IN THE UNITED STATES

''SEC. 275A. (a) In addition to any other violation, an alien present in the United States in violation of this Act shall be guilty of a misdemeanor and shall be fined under title 18, United States Code, imprisoned not more than 1 year, or both. The assets of any alien present in the United States in violation of this Act shall be subject to forfeiture under title 18, United States Code.

''(b) It shall be an affirmative defense to a violation of subsection (a) that the alien overstayed the time allotted under the visa due to an exceptional and extremely unusual hardship or physical illness that prevented the alien from leaving the United States by the required date.''.

(b) INCREASE IN CRIMINAL PENALTIES FOR ILLEGAL ENTRY.—Section 275(a) of the Immigration and Nationality Act (8 U.S.C. 1325(a)) is amended by striking ''6 months,'' and inserting ''1 year,''.

(c) PERMISSION TO DEPART VOLUNTARILY.—Section 240B of the Immigration and Nationality Act (8 U.S.C. 1229c) is amended—

(1) by striking ''Attorney General'' each place that term appears and inserting ''Secretary of Homeland Security''; and

(2) in subsection (a)(2)(A), by striking ''120'' and inserting ''30''.

SEC. 104. LISTING OF IMMIGRATION VIOLATORS IN THE NATIONAL CRIME INFORMATION CENTER DATABASE.

(a) PROVISION OF INFORMATION TO THE NCIC.—Not later than 180 days after the date of enactment of this Act, the Under Secretary for Border and Transportation Security of the Department of Homeland Security shall provide the National Crime Information Center of the Department of Justice with such information as the Director may have on any and all aliens against whom a final order of removal has been issued, any and all aliens who have signed a voluntary departure agreement, and any and all aliens who have overstayed their visa. Such information shall be provided to the National Crime Information Center regardless of whether or not the alien received notice of a final order of removal and even if the alien has already been removed.

(b) INCLUSION OF INFORMATION IN THE NCIC DATABASE.—Section 534(a) of title 28, United States Code, is amended—

(1) in paragraph (3), by striking ''and'' at the end;

(2) by redesignating paragraph (4) as paragraph (5); and

(3) by inserting after paragraph (3) the following:

''(4) acquire, collect, classify, and preserve records of violations of the immigration laws of the United States, regardless of whether or not the alien has received notice of the violation and even if the alien has already been removed; and''.

SEC. 105. STATE AND LOCAL LAW ENFORCEMENT PROVISION OF INFORMATION ABOUT APPREHENDED ILLEGAL ALIENS.

(a) PROVISION OF INFORMATION.—

(1) IN GENERAL.—In order to receive funds under the State Criminal Alien Assistance Program described in section 241(i) of the Immigration and Nationality Act (8 U.S.C. 1231(i)), States and localities shall provide to the Department of Homeland Security the information listed in subsection (b) on each alien apprehended in the jurisdiction of the State or locality who is believed to be in violation of an immigration law of the United States.

(2) TIME LIMITATION.—Not later than 10 days after an alien described in paragraph (1) is apprehended, information required to be provided under paragraph (1) must be provided in such form and in such manner as the Secretary of Homeland Security may, by regulation or guideline, require.

(b) INFORMATION REQUIRED.—The information listed in this subsection is as follows:

(1) The alien's name.

(2) The alien's address or place of residence.

(3) A physical description of the alien.

(4) The date, time, and location of the encounter with the alien and reason for stopping, detaining, apprehending, or arresting the alien.

(5) If applicable, the alien's driver's license number and the State of issuance of such license.

(6) If applicable, the type of any other identification document issued to the alien, any designation number contained on the identification document, and the issuing entity for the identification document.

(7) If applicable, the license plate number, make, and model of any automobile registered to, or driven by, the alien.

(8) A photo of the alien, if available or readily obtainable.

(9) The alien's fingerprints, if available or readily obtainable.

(c) REIMBURSEMENT.—The Department of Homeland Security shall reimburse States and localities for all reasonable costs, as determined by the Secretary of Homeland Security, incurred by that State or locality as a result of providing information required by this section.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated such sums as necessary to carry out this Act.

SEC. 106. INCREASED FEDERAL DETENTION SPACE.

(a) CONSTRUCTION OR ACQUISITION OF DETENTION FACILITIES.—

(1) IN GENERAL.—The Secretary of Homeland Security shall construct or acquire, in addition to existing facilities for the detention of aliens, 20 detention facilities in the United States, with 500 beds per facility, for aliens detained pending removal or a decision on removal of such alien from the United States.

(2) ADDITIONAL FACILITIES.—Whenever the capacity of any detention facility remains within a 1 percent range of full capacity for longer than 1 year, the Secretary of Homeland Security shall construct or acquire additional detention facilities beyond the number authorized in paragraph (1) as are appropriate to eliminate that condition.

(3) DETERMINATIONS.—The need for, or location of, any detention facility built or acquired in accordance with this subsection shall be determined by the detention trustee within the Bureau of Immigration and Customs Enforcement.

(4) USE OF INSTALLATIONS UNDER BASE CLOSURE LAWS.—In acquiring detention facilities under this subsection, the Secretary of Homeland Security shall consider the transfer of appropriate portions of military installations approved for closure or realignment under the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510; 10 U.S.C. 2687 note) for use in accordance with subsection (a)(1).

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as necessary to carry out this section.

(c) TECHNICAL AND CONFORMING AMENDMENT.—Section 241(g)(1) of the Immigration and Nationality Act (8 U.S.C. 1231(g)(1)) shall be amended by striking ''may expend'' and inserting ''shall expend''.

SEC. 107. FEDERAL CUSTODY OF ILLEGAL ALIENS APPREHENDED BY STATE OR LOCAL LAW ENFORCEMENT.

(a) IN GENERAL.—Title II of the Immigration and Nationality Act (8 U.S.C. 1151 et seq.) is amended by adding after section 240C the following:

''CUSTODY OF ILLEGAL ALIENS

''SEC. 240D.

''(a) If the chief executive officer of a State (or, if appropriate, a political subdivision of the State) exercising authority with respect to the apprehension of an illegal alien submits a request to the Secretary of Homeland Security that the alien be taken into Federal custody, the Secretary of Homeland Security—

''(1) shall—

''(A) not later than 48 hours after the conclusion of the State charging process or dismissal process, or if no State charging or dismissal process is required, not later than 48 hours after the illegal alien is apprehended, take the illegal alien into the custody of the Federal Government and incarcerate the alien; or

''(B) request that the relevant State or local law enforcement agency temporarily incarcerate or transport the illegal alien for transfer to Federal custody; and

''(2) shall designate a Federal, State, or local prison or jail or a private contracted prison or detention facility within each State as the central facility for that State to transfer custody of the criminal or illegal aliens to the Department of Homeland Security.''.

''(b) The Department of Homeland Security shall reimburse States and localities for all reasonable expenses, as determined by the Secretary of Homeland Security, incurred by a State or locality in the incarceration and transportation of an illegal alien as described in subparagraphs (A) and (B) of subsection (a)(1). Compensation provided for costs incurred under subparagraphs (A) and (B) of subsection (a)(1) shall be the average cost of incarceration of a prisoner in the relevant State, as determined by the chief executive officer of a State (or, as appropriate, a political subdivision of the State) plus the cost of transporting the criminal or illegal alien from the point of apprehension, to the place of detention, and to the custody transfer point if the place of detention and place of custody are different.

''(c) The Secretary of Homeland Security shall ensure that illegal aliens incarcerated in Federal facilities pursuant to this subsection are held in facilities which provide an appropriate level of security.

''(d)(1) In carrying out this section, the Secretary of Homeland Security may establish a regular circuit and schedule for the prompt transfer of apprehended illegal aliens from the custody of States and political subdivisions of States to Federal custody.

''(2) The Secretary of Homeland Security may enter into contracts with appropriate State and local law enforcement and detention officials to implement this subsection.

''(e) For purposes of this section, the term 'illegal alien' means an alien who—

''(1) entered the United States without inspection or at any time or place other than that designated by the Secretary of Homeland Security;

''(2) was admitted as a nonimmigrant and who, at the time the alien was taken into custody by the State or a political subdivision of the State, had failed to—

''(A) maintain the nonimmigrant status in which the alien was admitted or to which it was changed under section 248; or

''(B) comply with the conditions of any such status;

''(3) was admitted as an immigrant and has subsequently failed to comply with the requirements of that status; or

''(4) failed to depart the United States under a voluntary departure agreement or under a final order of removal.''.

(b) AUTHORIZATION OF APPROPRIATIONS FOR THE DETENTION AND TRANSPORTATION TO FEDERAL CUSTODY OF ALIENS NOT LAWFULLY PRESENT.—There is authorized to be appropriated $500,000,000 for the detention and removal of aliens not lawfully present in the United States under the Immigration and Nationality Act (8 U.S.C. 1101 et seq.) for fiscal year 2004 and each subsequent fiscal year.

SEC. 108. TRAINING OF STATE AND LOCAL LAW ENFORCEMENT PERSONNEL RELATING TO THE ENFORCEMENT OF IMMIGRATION LAWS.

(a) TRAINING MANUAL AND POCKET GUIDE.—

(1) ESTABLISHMENT.—Not later than 180 days after the date of enactment of this Act, the Secretary of Homeland Security shall establish—

(A) a training manual for law enforcement personnel of a State or political subdivision of a State to train such personnel in the investigation, identification, apprehension, arrest, detention, and transfer to Federal custody of aliens in the United States (including the transportation of such aliens across State lines to detention centers and identification of fraudulent documents); and

(B) an immigration enforcement pocket guide for law enforcement personnel of a State or political subdivision of a State to provide a quick reference for such personnel in the course of duty.

(2) AVAILABILITY.—The training manual and pocket guide established in accordance with paragraph (1) shall be made available to all State and local law enforcement personnel.

(3) APPLICABILITY.—Nothing in this subsection shall be construed to require State or local law enforcement personnel to carry the training manual or pocket guide established in accordance with paragraph (1) with them while on duty.

(4) COSTS.—The Department of Homeland Security shall be responsible for any costs incurred in establishing the training manual and pocket guide under this subsection.

(b) TRAINING FLEXIBILITY.—

(1) IN GENERAL.—The Department of Homeland Security shall make training of State and local law enforcement officers available through as many means as possible, including residential training at Federal facilities, onsite training held at State or local police agencies or facilities, online training courses by computer, teleconferencing, and videotape, or the digital video display (DVD) of a training course or courses.

(2) FEDERAL PERSONNEL TRAINING.—The training of State and local law enforcement personnel under this section shall not displace or otherwise adversely affect the training of Federal personnel.

(c) ADMINISTRATION FEES.—The Secretary of Homeland Security may charge a fee for training under subsection (b) that shall be an amount equal to not more than half the actual costs of providing such training.

(d) CLARIFICATION.—Nothing in this Act or any other provision of law shall be construed as making any immigration-related training a requirement for, or prerequisite to, any State or local law enforcement officer exercising that officer's inherent authority to apprehend, arrest, detain, or transfer to Federal custody illegal aliens during the normal course of carrying out their law enforcement duties.

(e) TRAINING LIMITATION.—Section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) is amended—

(1) by striking ''Attorney General'' each place that term appears and inserting ''Secretary of Homeland Security''; and

(2) in paragraph (2), by adding at the end the following: ''Such training shall not exceed 14 days or 80 hours, whichever is longer.''.

[S20NO3-497]{S15297}SEC. 109.

SEC. 109. IMMUNITY.

(a) PERSONAL IMMUNITY.—Notwithstanding any other provision of law, a law enforcement officer of a State or local law enforcement agency shall be immune, to the same extent as a Federal law enforcement officer, from personal liability arising out of the enforcement of any immigration law, provided the officer is acting within the scope of the officer's official duties.

(b) AGENCY IMMUNITY.—Notwithstanding any other provision of law, a State or local law enforcement agency shall be immune from any claim for money damages based on Federal, State, or local civil rights law for an incident arising out of the enforcement of any immigration law, except to the extent that the law enforcement officer of that agency, whose action the claim involves, committed a violation of Federal, State, or local criminal law in the course of enforcing such immigration law.

SEC. 110. PLACES OF DETENTION FOR ALIENS ARRESTED PENDING EXAMINATION AND DECISION ON REMOVAL.

(a) IN GENERAL.—Section 241(g) of the Immigration and Nationality Act (8 U.S.C. 1231(g)) is amended by adding at the end the following:

''(3) POLICY ON DETENTION IN STATE AND LOCAL DETENTION FACILITIES.—In carrying out paragraph (1), the Secretary of Homeland Security shall ensure that an alien arrested under section 287(a) is detained, pending the alien's being taken for the examination described in that section, in a State or local prison, jail, detention center, or other comparable facility, if—

''(A) such a facility is the most suitably located Federal, State, or local facility available for such purpose under the circumstances;

''(B) an appropriate arrangement for such use of the facility can be made; and

''(C) such facility satisfies the standards for the housing, care, and security of persons held in custody of a United States marshal.''.

(b) DETENTION FACILITY SUITABILITY.—Notwithstanding any other provision of law, a facility described in section 241(g)(3)(C) of the Immigration and Nationality Act, as added by subsection (a), is adequate for detention of persons being held for immigration related violations.

(c) TECHNICAL AND CONFORMING AMENDMENT.—Section 241 of the Immigration and Nationality Act (8 U.S.C. 1231) is amended by striking ''Attorney General'' each place that term appears and inserting ''Secretary of Homeland Security''.

SEC. 111. INSTITUTIONAL REMOVAL PROGRAM.

(a) CONTINUATION.—

(1) IN GENERAL.—The Department of Homeland Security shall continue to operate and implement the program known as the Institutional Removal Program (IRP) which—

(A) identifies removable criminal aliens in Federal and State correctional facilities;

(B) ensures such aliens are not released into the community; and

(C) removes such aliens from the United States after the completion of their sentences.

(2) EXPANSION.—The Institutional Removal Program shall be extended to all States. Any State that receives Federal funds for the incarceration of criminal aliens shall—

(A) cooperate with Federal Institutional Removal Program officials;

(B) expeditiously and systematically identify criminal aliens in its prison and jail populations; and

(C) promptly convey such information to Federal IRP authorities as a condition for receiving such funds.

(b) AUTHORIZATION FOR DETENTION AFTER COMPLETION OF STATE OR LOCAL PRISON SENTENCE.—Law enforcement officers of a State or political subdivision of a State have the authority to—

(1) hold an illegal alien for a period of up to 14 days after the alien has completed the alien's State prison sentence in order to effectuate the transfer of the alien to Federal custody when the alien is removable or not lawfully present in the United States; or

(2) issue a detainer that would allow aliens who have served a State prison sentence to be detained by the State prison until personnel from the Bureau of Immigration and Customs Enforcement can take the alien into custody.

(c) TECHNOLOGY USAGE.—Technology such as videoconferencing shall be used to the maximum extent possible in order to make the Institutional Removal Program (IRP) available in remote locations. Mobile access to Federal databases of aliens, such as IDENT, and live scan technology shall be used to the maximum extent practicable in order to make these resources available to State and local law enforcement agencies in remote locations.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out the Institutional Removal Program—

(1) $10,000,000 for fiscal year 2004;

(2) $20,000,000 for fiscal year 2005;

(3) $30,000,000 for fiscal year 2006;

(4) $40,000,000 for fiscal year 2007;

(5) $50,000,000 for fiscal year 2008;

(6) $60,000,000 for fiscal year 2009;

(7) $70,000,000 for fiscal year 2010; and

(8) $80,000,000 for fiscal year 2011.

TITLE II—ENHANCING ENFORCEMENT OF THE IMMIGRATION AND NATIONALITY ACT IN THE INTERIOR THROUGH IMPROVED DOCUMENT SECURITY

SEC. 201. DRIVERS LICENSES.

(a) EXPIRATION DATE FOR CERTAIN ALIENS.—

(1) IN GENERAL.—Section 656 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (5 U.S.C. 301 note) is amended by inserting after subsection (a) the following:

''(b) STATE-ISSUED DRIVER'S LICENSES EXPIRATION DATE.—A Federal agency may not accept for any identification-related purpose a driver's license issued by a State unless, if the driver's license is issued to an alien who is in lawful status but who is not an alien lawfully admitted for permanent residence, the period of validity of the license expires on the date on which the alien's authorization to remain in the United States expires.''.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect beginning on October 1, 2007, but shall apply only to licenses issued to an individual for the first time and to replacement or renewal licenses issued according to State law.

(b) CONDITION OF FUNDS.—Section 402(b)(1) of title 23, United States Code, is amended—

(1) in subparagraph (C), by striking ''and'' at the end;

(2) in subparagraph (D), by striking the period at the end and inserting ''; and''; and

(3) by adding at the end the following:

''(E) prohibit aliens who are not in lawful status, as determined under the Immigration and Nationality Act (8 U.S.C. 1101 et seq.), from being issued a driver's license in that State.''.

SEC. 202. SECURE AND VERIFIABLE IDENTIFICATION REQUIRED FOR FEDERAL PUBLIC BENEFITS.

(a) IN GENERAL.—In the provision in the United States of a Federal public benefit or service that requires the recipient to produce identification, no Federal agency, commission, or other entity within the executive, legislative, or judicial branch of the Federal Government may accept, recognize, or rely on (or authorize the acceptance or recognition of, or the reliance on) any identification document, unless—

(1) the document was issued by a United States Federal or State authority and is subject to verification by a United States Federal law enforcement, intelligence, or homeland security agency; or

(2) the recipient—

(A) is lawfully present in the United States;

(B) is in possession of a passport; and

(C) is a citizen of a country for which the visa requirement for entry into the United States is waived if the alien possesses a passport from such country.

(b) IMMUNITY.—An elected or appointed official, employee, or other contractor or agent of the Federal Government who takes an action inconsistent with subsection (a) is deemed to be acting beyond the scope of authority granted by law and shall not be immune from liability for such action, unless such immunity is conferred by the Constitution and cannot be waived.

By Mr. DASCHLE (for himself, Mr. JOHNSON, Mr. LEAHY, Mr. NELSON of Nebraska, Mr. PRYOR, Mr. BAUCUS, Mr. DAYTON, Mr. HARKIN, Mr. FEINGOLD, Mr. BINGAMAN, Mr. JEFFORDS,

Mr. EDWARDS, and Mr. SCHUMER):

S. 1907. A bill to promote rural safety and improve rural law enforcement; to the Committee on the Judiciary.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Rural Safety Act of 2003''.

TITLE I—SMALL COMMUNITY LAW ENFORCEMENT IMPROVEMENT GRANTS

SEC. 101. SMALL COMMUNITY GRANT PROGRAM.

Section 1703 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796dd–2) is amended by adding at the end the following:

''(d) RETENTION GRANTS.—

''(1) IN GENERAL.—The Attorney General may make grants to units of local government and tribal governments located outside a Standard Metropolitan Statistical Area, which grants shall be targeted specifically for the retention for 1 additional year of police officers funded through the COPS Universal Hiring Program, the COPS FAST Program, the Tribal Resources Grant Program-Hiring, or the COPS in Schools Program.

''(2) PREFERENCE.—In making grants under this subsection, the Attorney General shall give preference to grantees that demonstrate financial hardship or severe budget constraint that impacts the entire local budget and may result in the termination of employment for police officers described in paragraph (1).

''(3) LIMIT ON GRANT AMOUNTS.—The total amount of a grant made under this subsection shall not exceed 20 percent of the original grant to the grantee.

''(4) AUTHORIZATION OF APPROPRIATIONS.—

''(A) IN GENERAL.—There are authorized to be appropriated to carry out this subsection $15,000,000 for each of fiscal years 2005 through 2009.

''(B) SET-ASIDE.—Of the amount made available for grants under this subsection for each fiscal year, 10 percent shall be awarded to tribal governments.''.

SEC. 102. SMALL COMMUNITY TECHNOLOGY GRANT PROGRAM.

Section 1701 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796dd) is amended by striking subsection (k) and inserting the following:

''(k) LAW ENFORCEMENT TECHNOLOGY PROGRAM.—

''(1) IN GENERAL.—Grants made under subsection (a) may be used to assist the police departments of units of local government and tribal governments located outside a Standard Metropolitan Statistical Area, in employing professional, scientific, and technological advancements that will help those police departments to—

''(A) improve police communications through the use of wireless communications, computers, software, videocams, databases, and other hardware and software that allow law enforcement agencies to communicate and operate more effectively; and

''(B) develop and improve access to crime solving technologies, including DNA analysis, photo enhancement, voice recognition, and other forensic capabilities.

''(2) COST SHARE REQUIREMENT.—A recipient of a grant made under subsection (a) and used in accordance with this subsection shall provide matching funds from non-Federal sources in an amount equal to not less than 10 percent of the total amount of the grant made under this subsection, subject to a waiver by the Attorney General for extreme hardship.

''(3) ADMINISTRATION.—The COPS Office shall administer the grant program under this subsection.

''(4) NO SUPPLANTING.—Federal funds provided under this subsection shall be used to supplement and not to supplant local funds allocated to technology.

''(5) AUTHORIZATION OF APPROPRIATIONS.—

''(A) IN GENERAL.—There are authorized to be appropriated $40,000,000 for each of fiscal years 2005 through 2009 to carry out this subsection.

''(B) SET-ASIDE.—Of the amount made available for grants under this subsection for each fiscal year, 10 percent shall be awarded to tribal governments.''.

SEC. 103. RURAL 9-1-1 SERVICE.

(a) PURPOSE.—The purpose of this section is to provide access to, and improve a communications infrastructure that will ensure a reliable and seamless communication between, law enforcement, fire, and emergency medical service providers in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area and in States.

(b) AUTHORITY TO MAKE GRANTS.—The Office of Justice Programs of the Department of Justice shall make grants, in accordance with such regulations as the Attorney General may prescribe, to units of local government and tribal governments located outside a Standard Metropolitan Statistical Area for the purpose of establishing or improving 9-1-1 service in those communities. Priority in making grants under this section shall be given to communities that do not have 9-1-1 service.

(c) DEFINITION.—In this section, the term ''9-1-1 service'' refers to telephone service that has designated 9-1-1 as a universal emergency telephone number in the community served for reporting an emergency to appropriate authorities and requesting assistance.

(d) LIMIT ON GRANT AMOUNT.—The total amount of a grant made under this section shall not exceed $250,000.

(e) FUNDING.—

(1) IN GENERAL.—There are authorized to be appropriated to carry out this section $25,000,000 for fiscal year 2005, to remain available until expended.

(2) SET-ASIDE.—Of the amount made available for grants under this section, 10 percent shall be awarded to tribal governments.

SEC. 104. JUVENILE OFFENDER ACCOUNTABILITY.

(a) PURPOSES.—The purposes of this section are to—

(1) hold juvenile offenders accountable for their offenses;

(2) involve victims and the community in the juvenile justice process;

(3) obligate the offender to pay restitution to the victim and to the community through community service or through financial or other forms of restitution; and

(4) equip juvenile offenders with the skills needed to live responsibly and productively.

(b) AUTHORITY TO MAKE GRANTS.—The Office of Justice Programs of the Department of Justice shall make grants, in accordance with such regulations as the Attorney General may prescribe, to units of rural local governments and tribal governments located outside a Standard Metropolitan Statistical Area to establish restorative justice programs, such as victim and offender mediation, family and community conferences, family and group conferences, sentencing circles, restorative panels, and reparative boards, as an alternative to, or in addition to, incarceration.

(c) PROGRAM CRITERIA.—A program funded by a grant made under this section shall—

(1) be fully voluntary by both the victim and the offender (who must admit responsibility), once the prosecuting agency has determined that the case is appropriate for this program;

(2) include as a critical component accountability conferences, at which the victim will have the opportunity to address the offender directly, to describe the impact of the offense against the victim, and the opportunity to suggest possible forms of restitution;

(3) require that conferences be attended by the victim, the offender and, when possible, the parents or guardians of the offender, and the arresting officer; and

(4) provide an early, individualized assessment and action plan to each juvenile offender in order to prevent further criminal behavior through the development of appropriate skills in the juvenile offender so that the juvenile is more capable of living productively and responsibly in the community.

(d) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated to carry out this section—

(A) $10,000,000 for fiscal year 2005 for grants to establish programs; and

(B) $5,000,000 for each of fiscal years 2006 and 2007 to continue programs established in fiscal year 2005.

(2) SET-ASIDE.—Of the amount made available for grants under this section for each fiscal year, 10 percent shall be awarded to tribal governments.

TITLE II—CRACKING DOWN ON METHAMPHETAMINE

SEC. 201. METHAMPHETAMINE TREATMENT PROGRAMS IN RURAL AREAS.

Subpart I of part B of title V of the Public Health Service Act (42 U.S.C. 290bb et seq.) is amended by inserting after section 509 the following:

''SEC. 510. METHAMPHETAMINE TREATMENT PROGRAMS IN RURAL AREAS.

''(a) IN GENERAL.—The Secretary, acting through the Director of the Center for Substance Abuse Treatment, shall make grants to community-based public and nonprofit private entities for the establishment of substance abuse (particularly methamphetamine) prevention and treatment pilot programs in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area.

''(b) ADMINISTRATION.—Grants made in accordance with this section shall be administered by a single State agency designated by a State to ensure a coordinated effort within that State.

''(c) APPLICATION.—To be eligible to receive a grant under subsection (a), a public or nonprofit private entity shall prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.

''(d) USE OF FUNDS.—A recipient of a grant under this section shall use amounts received under the grant to establish a methamphetamine abuse prevention and treatment pilot program that serves one or more rural areas. Such a pilot program shall—

''(1) have the ability to care for individuals on an in-patient basis;

''(2) have a social detoxification capability, with direct access to medical services within 50 miles;

''(3) provide neuro-cognitive skill development services to address brain damage caused by methamphetamine use;

''(4) provide after-care services, whether as a single-source provider or in conjunction with community-based services designed to continue neuro-cognitive skill development to address brain damage caused by methamphetamine use;

''(5) provide appropriate training for the staff employed in the program; and

''(6) use scientifically-based best practices in substance abuse treatment, particularly in methamphetamine treatment.

''(e) AMOUNT OF GRANTS.—The amount of a grant under this section shall be at least $19,000 but not greater than $100,000.

''(f) AUTHORIZATION OF APPROPRIATIONS.—

''(1) IN GENERAL.—There is authorized to be appropriated $2,000,000 to carry out this section.

''(2) SET-ASIDE.—Of the amount made available for grants under this section, 10 percent shall be awarded to tribal governments to ensure the provision of services under this section.''.

SEC. 202. METHAMPHETAMINE PREVENTION EDUCATION.

Section 519E of the Public Health Service Act (42 U.S.C. 290bb–25e) is amended—

(1) in subsection (c)(1)—

(A) in subparagraph (F), by striking ''and'' at the end;

(B) in subparagraph (G), by striking the period and inserting ''; and''; and

(C) by adding at the end the following:

''(H) to fund programs that educate rural communities, particularly parents, teachers, and others who work with youth, concerning the early signs and effects of methamphetamine use, however, as a prerequisite to receiving funding, these programs shall—

''(i) prioritize methamphetamine prevention and education;

''(ii) have past experience in community coalition building and be part of an existing coalition that includes medical and public health officials, educators, youth-serving community organizations, and members of law enforcement;

''(iii) utilize professional prevention staff to develop research and science-based prevention strategies for the community to be served;

''(iv) demonstrate the ability to operate a community-based methamphetamine prevention and education program;

''(v) establish prevalence of use through a community needs assessment;

''(vi) establish goals and objectives based on a needs assessment; and

''(vii) demonstrate measurable outcomes on a yearly basis.'';

(2) in subsection (e)—

(A) by striking ''subsection (a), $10,000,000'' and inserting ''subsection (a)—

''(1) $10,000,000'';

(B) by striking the period at the end and inserting ''; and''; and

(C) by adding at the end the following:

''(2) $5,000,000 for each of fiscal years 2005 through 2009 to carry out the programs referred to in subsection (c)(1)(H).''; and

(3) by adding at the end the following:

''(f) SET-ASIDE.—Of the amount made available for grants under this section, 10 percent shall be used to assist tribal governments.

''(g) AMOUNT OF GRANTS.—The amount of a grant under this section, with respect to each rural community involved, shall be at least $19,000 but not greater than $100,000.''.

SEC. 203. METHAMPHETAMINE CLEANUP.

(a) IN GENERAL.—The Attorney General shall, through the Department of Justice or through grants to States or units of local government and tribal governments located outside a Standard Metropolitan Statistical Area, in accordance with such regulations as the Attorney General may prescribe, provide for—

(1) the cleanup of methamphetamine laboratories and related hazardous waste in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area; and

(2) the improvement of contract-related response time for cleanup of methamphetamine laboratories and related hazardous waste in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area by providing additional contract personnel, equipment, and facilities.

(b) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There is authorized to be appropriated $20,000,000 for fiscal year 2005 to carry out this section.

(2) FUNDING ADDITIONAL.—Amounts authorized by this section are in addition to amounts otherwise authorized by law.

(3) SET-ASIDE.—Of the amount made available for grants under this section, 10 percent shall be awarded to tribal governments.

TITLE III—LAW ENFORCEMENT TRAINING

SEC. 301. SMALL TOWN AND RURAL TRAINING PROGRAM.

(a) IN GENERAL.—There is established a Rural Policing Institute, which shall be administered by the National Center for State and Local Law Enforcement Training of the Federal Law Enforcement Training Center (FLETC) as part of the Small Town and Rural Training (STAR) Program to—

(1) assess the needs of law enforcement in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area;

(2) develop and deliver expert training programs regarding topics such as drug enforcement, airborne counterdrug operations, domestic violence, hate and bias crimes, computer crimes, law enforcement critical incident planning related to school shootings, and other topics identified in the training needs assessment to law enforcement officers in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area; and

(3) conduct outreach efforts to ensure that training programs under the Rural Policing Institute reach law enforcement officers in units of local government and tribal governments located outside a Standard Metropolitan Statistical Area.

(b) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated $10,000,000 for fiscal year 2005, and $5,000,000 for each of fiscal years 2006 through 2009 to carry out this section, including contracts, staff, and equipment.

(2) SET-ASIDE.—Of the amount made available for grants under this section for each fiscal year, 10 percent shall be awarded to tribal governments.

By Mr. COCHRAN (for himself and Mr. KENNEDY):

S. 1909. A bill to amend the Public Health Service Act to improve stroke prevention, diagnosis, treatment, and rehabilitation; to the Committee on Health, Education, Labor, and Pensions.

Mr. KENNEDY. Mr. President, it is a privilege to join with Senator COCHRAN in supporting the Stroke Treatment and Ongoing Prevention Act of 2003. The STOP Stroke Act is a vital first step in building a national network of effective care to diagnose and quickly treat victims of stroke.

For over 20 years, stroke has consistently been the third leading cause of death in our country. Every 45 seconds, another American suffers a stroke. Every 3 minutes, another American dies. Few families today are untouched by this cruel, debilitating, and often fatal disease that strikes indiscriminately, robbing us of our loved ones.

More than ever today, help is available. Modern medicine is generating new scientific advances that increase the chance of survival and partial or even full recovery following a stroke. We are learning how to manage this disease more effectively, and we are also learning how to prevent it from happening in the first place.

But science doesn't save lives and protect health by itself. We have to put new discoveries into action. We need to educate as many people as possible about the warning signs of stroke, so that they know enough to seek medical attention. We need to train doctors and nurses in the best techniques of care. We need better ways to treat victims as quickly and as effectively as possible—so that they have the best chance of full recovery.

Our bill provides grants to States to develop statewide programs for stroke care, so that the most effective care will be available to patients as quickly and efficiently as possible to reduce the level of disability caused by stroke.

Stroke systems will rely on information sharing among agencies and individuals involved in the study and provision of care, in addition to training for health professionals on the signs of stroke and guidelines on best practices.

The bill also authorizes the Secretary of HHS, acting through CDC, to operate the Paul Coverdell National Acute Stroke Registry to develop and collect data and analyze the care of acute stroke patients. Funds were appropriated for the registry at the end of the last Congress, but the registry has not yet been authorized. In fact, the Senate passed the act unanimously last year, and it came very close to House passage. Literally millions of our fellow citizens will benefit from the lives saved and the better care they will receive as a result of this legislation. It's long past time for Congress to act.

By Mr. HATCH (for himself and Mr. LEAHY):

S. 1911. A bill to amend the provisions of title III of the Trade Act of 1974 relating to violations of the TRIPS Agreement, and for other purposes; to the Committee on Finance.

Mr. LEAHY. Mr. President, today I introduce an important, bipartisan

piece of legislation that will amend the Trade Act of 1974 to help ensure that America's intellectual property rights are properly protected by our trading partners and that disputes between America and other governments can be investigated and resolved in a quick and sensible manner.

This bill makes commonsense changes to three important aspects of the Trade Act of 1974. First, this bill makes certain that our partners who benefit from trade with the United States adequately protect American intellectual property. The TRIPS standards (Trade Related Aspects of Intellectual Property) that the World Trade Organization uses today in order to determine if a country is protecting intellectual property laws were written in the early 1990s—before digital piracy had become widespread. Our legislation will codify the necessity on the part of other nations to keep intellectual property protections current with technology.

In addition, this measure will establish a petition process for bringing intellectual property claims against trade partners in the Caribbean Basin who fail to enforce intellectual property rights while benefiting from profitable trading programs. Under current law, there is no provision for parties to petition the United States Trade Representative to investigate whether or not one of our Caribbean partners is meeting the criterion of ''fair and effective'' enforcement of intellectual property rights in order to benefit from special trade programs. This legislation invests the USTR with the power to ensure that beneficiaries of favorable trading programs will not be rewarded for failing to protect intellectual property in a meaningful way.

Finally, this bill will correct an undesirable and unintended technical deficiency of the Trade Act of 1974 when applied to the dispute mechanisms of the World Trade Organization. Current timelines for investigating intellectual property violations under the Trade Act force the USTR to designate certain countries as failing to protect intellectual property before a complete investigation can be completed and make it virtually impossible to negotiate with that country or bring a WTO dispute settlement case in order to resolve a dispute. This bill amends Section 301 of the Trade Act to make sure that investigations can proceed before policy is made.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 269—URGING THE GOVERNMENT OF CANADA TO END THE COMMERCIAL SEAL HUNT THAT OPENED ON NOVEMBER 15, 2003

Mr. LEVIN (for himself, Ms. COLLINS, Mr. LIEBERMAN, Mr. REED, Mr. LAUTENBERG, Mr. DODD, Mr. WYDEN, Mr. JEFFORDS, and Mr. KENNEDY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 269

Whereas on November 15, 2003, the Government of Canada opened a commercial hunt on seals in the waters off the east coast of Canada;

Whereas an international outcry regarding the plight of the seals hunted in Canada resulted in the 1983 ban by the European Union of whitecoat and blueback seal skins, and the subsequent collapse of the commercial seal hunt in Canada;

Whereas the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) bars the import into the United States of any seal products;

Whereas in February 2003, the Ministry of Fisheries and Oceans in Canada authorized the highest quota for harp seals in Canadian history, allowing nearly 1,000,000 seals to be killed over a 3–year period;

Whereas harp seal pups can be legally hunted in Canada as soon as they have begun to molt their white coats at approximately 12 days of age;

Whereas 97 percent of the seals culled in the 2003 slaughter were pups between just 12 days and 12 weeks of age, most of which had not yet eaten their first solid meal or learned to swim;

Whereas a 2001 report by an independent team of veterinarians invited to observe the hunt by the International Fund for Animal Welfare concluded that the seal hunt failed to comply with basic animal welfare regulations in Canada and that governmental regulations regarding humane killing were not being respected or enforced;

Whereas the 2001 veterinary report concluded that as many as 42 percent of the seals studied were likely skinned while alive and conscious;

Whereas the commercial slaughter of seals in the Northwest Atlantic is inherently cruel, whether the killing is conducted by clubbing or by shooting;

Whereas many seals are shot in the course of the hunt, but escape beneath the ice where they die slowly and are never recovered, and these seals are not counted in official kill statistics, making the actual kill level far higher than the level that is reported;

Whereas the commercial hunt for harp and hooded seals is not conducted by indigenous peoples of Canada, but is a commercial slaughter carried out by nonnative people from the East Coast of Canada for seal fur, oil, and penises (used as aphrodisiacs in some Asian markets);

Whereas the fishing and sealing industries in Canada continue to justify the expanded seal hunt on the grounds that the seals in the Northwest Atlantic are preventing the recovery of cod stocks, despite the lack of any credible scientific evidence to support this claim;

Whereas 2 Canadian Government marine scientists reported in 1994 that the true cause of cod depletion in the North Atlantic was over-fishing, and the consensus among the international scientific community is that seals are not responsible for the collapse of cod stocks;

Whereas harp and hooded seals are a vital part of the complex ecosystem of the Northwest Atlantic, and because the seals consume predators of commercial cod stocks, removing the seals might actually inhibit recovery of cod stocks;

Whereas certain ministries of the Government of Canada have stated clearly that there is no evidence that killing seals will help groundfish stocks to recover; and

Whereas the persistence of this cruel and needless commercial hunt is inconsistent with the well-earned international reputation of Canada: Now, therefore, be it

Resolved, That the Senate urges the Government of Canada to end the commercial hunt on seals that opened in the waters off the east coast of Canada on November 15, 2003.

Mr. LEVIN. Mr. President, today I am joined by a number of my colleagues in submitting a resolution in the hope that the Canadian government will cease its support of the slaughter of seals. The images from this senseless slaughter are difficult to view but even harder to accept: skinning of live animals, some no older than 12 days, and the dragging of live seals across the ice using steel hooks.

On November 15, 2003, the Government of Canada opened a commercial hunt on seals in the waters off the east coast of Canada. This hunt is supported by millions of dollars of subsidies to the sealing industry every year from the Canadian Government. These subsidies facilitate the slaughter of innocent animals and artificially extend the life of an industry that has ceased to exist in most developed countries. These subsides can not be justified and should be ended.

Few would argue that this industry still serves a legitimate purpose. Two years ago, an economic analysis of the Canadian sealing industry concluded that it provided the equivalent on only 100 to 150 full-time jobs each year. In addition, the analysis found that these jobs cost Canadian taxpayers nearly $30,000 each. The report concluded that when the cost of government subsidies provided to the industry was weighed against the landed value of the seals each year, the net value of the sealing industry was close to zero.

There is little about the Canadian sealing industry that is self-sustaining. The operating budget of the Canadian Sealers Association continues to be paid by the Canadian government; their rent each month is paid by the provincial government of Newfoundland and Labrador; seal processing companies continue to receive subsidies through the Atlantic Canada Opportunities Agency; Human Resources Development Canada, and other federal funding programs for staffing and capital costs. The sealing industry, through the Sealing Industry Development Council and other bodies, receives assistance for product research and development, and for product marketing initiatives, both overseas and domestically. All the costs of the seal hunt for ice breaking services and for search and rescue, provided by the Canadian Coast Guard, are underwritten by Canadian taxpayers.

Many believe that subsidizing an industry that only operates for a few

weeks a year and employs only a few hundred people on a seasonal, part-time basis is simply a bad investment on the part of the Canadian government. The HSUS has already called upon the Canadian government to end these archaic subsidies and instead work to diversify the economy in the Atlantic region by facilitating long-term jobs and livelihoods.

The clubbing of baby seals can't be defended or justified, and Canada should end it just as we ended the Alaska baby seal massacre 20 years ago. I urge my colleagues to support this resolution.

SENATE RESOLUTION 270—CONGRATULATING JOHN GAGLIARDI, FOOTBALL COACH OF ST. JOHN'S UNIVERSITY, ON THE OCCASION OF HIS BECOMING THE ALL-TIME WINNINGEST COACH IN COLLEGIATE HISTORY

Mr. COLEMAN (for himself and Mr. DAYTON) submitted the following resolution; which was considered and agreed to:

S. RES. 270

Whereas John Gagliardi began his coaching career in 1943 at the age of 16 when his high school football coach was drafted and John Gagliardi was asked to take over the position;

Whereas John Gagliardi won 4 conference titles during the 6 years he coached high school football;

Whereas John Gagliardi graduated from Colorado College in 1949 and began coaching football, basketball, and baseball at Carroll College in Helena, Montana, winning titles in all 3 sports;

Whereas John Gagliardi took over the football program at St. John's University in Collegeville, Minnesota, in 1953 and the football team won the Minnesota Intercollegiate Athletic Conference title in his first year as coach;

Whereas by the end of the 2002 season, John Gagliardi had won 3 national championships, coached 22 conference title teams, appeared in 45 post-season games and compiled a 376–108–10 record during his 50 years at St. John's University;

Whereas under the leadership of John Gagliardi, St. John's University has been nationally ranked 37 times in the past 39 years, and the university set a record with a 61.5 points per game average in 1993;

Whereas over 150 students participate in the St. John's University football program each year and every player dresses for home games;

Whereas John Gagliardi's coaching methods follow the ''Winning with No's'' theory: no blocking sleds or dummies, no whistles, no tackling in practices, no athletic scholarships, and no long practices;

Whereas John Gagliardi has coached over 5,000 players during his 50 years at St. John's University, and no player has failed to graduate and most have graduated in 4 years;

Whereas, in 1993, the John Gagliardi trophy was unveiled, and it is given each year to the most outstanding Division III football player;

Whereas on November 1, 2003, John Gagliardi tied Grambling University coach Eddie Robinson's record of 408 wins with a 15 to 12 victory over the University of St. Thomas;

Whereas on November 8, 2003, John Gagliardi broke Eddie Robinson's record with a 29 to 26 victory over Bethel College;

Whereas John Gagliardi is admired by his players, as well as by the students, faculty, and fans of St. John's University for his ability to motivate and inspire;

Whereas students who take his course, Theory of Football, credit John Gagliardi for teaching them more about life than about football;

Whereas those closest to John Gagliardi will tell you that football is only part of his life—he values the time he spends with Peg, his wife of 47 years, and their 4 children; and

Whereas the on- and off-the-field accomplishments of John Gagliardi have placed him in an elite club that includes the best coaches in history: Now, therefore, be it

Resolved, That the Senate—

(1) congratulates John Gagliardi, football coach of St. John's University in Collegeville, Minnesota, on becoming the all-time winningest coach in collegiate football history; and

(2) directs the Secretary of the Senate to transmit an enrolled copy of this resolution to John Gagliardi and St. John's University.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2207. Mr. FRIST (for Mr. MCCAIN) proposed an amendment to the bill S. 1152, to reauthorize the United States Fire Administration, and for other purposes.

SA 2208. Mr. FRIST proposed an amendment to the joint resolution H.J. Res. 78, making further continuing appropriations for the fiscal year 2004, and for other purposes.

TEXT OF AMENDMENTS

SA 2207. Mr. FRIST (for Mr. MCCAIN) proposed an amendment to the bill S. 1152, to reauthorize the United States Fire Administration, and for other purposes; as follows:

TITLE I—UNITED STATES FIRE ADMINISTRATION REAUTHORIZATION

SEC. 101. SHORT TITLE.

This title may be cited as the ''United States Fire Administration Reauthorization Act of 2003''.

SEC. 102. RE-ESTABLISHMENT OF POSITION OF UNITED STATES FIRE ADMINISTRATOR.

Section 1513 of the Homeland Security Act of 2002 (6 U.S.C. 553) does not apply to the position or office of Administrator of the United States Fire Administration, who shall continue to be appointed and compensated as provided by section 5(b) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2204(b)).

SEC. 103. AUTHORIZATION OF APPROPRIATIONS.

Section 17(g)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2216(g)) is amended by striking subparagraphs (A) through (K) and inserting the following:

''(A) $63,000,000 for fiscal year 2005, of which $2,266,000 shall be used to carry out section 8(f);

''(B) $64,850,000 for fiscal year 2006, of which $2,334,000 shall be used to carry out section 8(f);

''(C) $66,796,000 for fiscal year 2007, of which $2,404,000 shall be used to carry out section 8(f); and

''(D) $68,800,000 for fiscal year 2008, of which $2,476,000 shall be used to carry out section 8(f).''.

TITLE II—FIREFIGHTING RESEARCH AND COORDINATION

SEC. 201. SHORT TITLE.

This title may be cited as the ''Firefighting Research and Coordination Act''.

SEC. 202. NEW FIREFIGHTING TECHNOLOGY.

Section 8 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2207) is amended—

(1) by redesignating subsection (e) as subsection (g); and

(2) by inserting after subsection (d) the following:

''(e) ASSISTANCE TO OTHER FEDERAL AGENCIES.—At the request of other Federal agencies, including the Department of Agriculture and the Department of the Interior, the Administrator may provide assistance in fire prevention and control technologies, including methods of containing insect-infested forest fires and limiting dispersal of resultant fire particle smoke, and methods of measuring and tracking the dispersal of fine particle smoke resulting from fires of insect-infested fuel.

''(f) TECHNOLOGY EVALUATION AND STANDARDS DEVELOPMENT.—

''(1) IN GENERAL.—In addition to, or as part of, the program conducted under subsection (a), the Administrator, in conjunction with the National Institute of Standards and Technology, the InterAgency Board for Equipment Standardization and Inter-Operability, the National Institute for Occupational Safety and Health, the Directorate of Science and Technology of the Department of Homeland Security, national voluntary consensus standards development organizations, interested Federal, State, and local agencies, and other interested parties, shall—

''(A) develop new, and utilize existing, measurement techniques and testing methodologies for evaluating new firefighting technologies, including—

''(i) personal protection equipment;

''(ii) devices for advance warning of extreme hazard;

''(iii) equipment for enhanced vision;

''(iv) devices to locate victims, firefighters, and other rescue personnel in above-ground and below-ground structures;

''(v) equipment and methods to provide information for incident command, including the monitoring and reporting of individual personnel welfare;

''(vi) equipment and methods for training, especially for virtual reality training; and

''(vii) robotics and other remote-controlled devices;

''(B) evaluate the compatibility of new equipment and technology with existing firefighting technology; and

''(C) support the development of new voluntary consensus standards through national voluntary consensus standards organizations for new firefighting technologies based on techniques and methodologies described in subparagraph (A).

''(2) STANDARDS FOR NEW EQUIPMENT.

(A) The Administrator shall, by regulation, require that new equipment or systems purchased through the assistance program established by the first section 3 3 meet or exceed applicable voluntary consensus standards for such equipment or systems for which applicable voluntary consensus standards have been established. The Administrator may waive the requirement under this subparagraph with respect to specific standards.

''(B) If an applicant for a grant under the first section 33 proposes to purchase, with assistance provided under the grant, new equipment or systems that do not meet or exceed applicable voluntary consensus standards, the applicant shall include in the application an explanation of why such equipment or systems will serve the needs of the applicant better than equipment or systems that do meet or exceed such standards.

''(C) In making a determination whether or not to waive the requirement under subparagraph (A) with respect to a specific standard, the Administrator shall, to the greatest extent practicable—

''(i) consult with grant applicants and other members of the fire services regarding the impact on fire departments of the requirement to meet or exceed the specific standard;

''(ii) take into consideration the explanation provided by the applicant under subparagraph (B); and

''(iii) seek to minimize the impact of the requirement to meet or exceed the specific standard on the applicant, particularly if meeting the standard would impose additional costs.

''(D) Applicants that apply for a grant under the terms of subparagraph (B) may include a second grant request in the application to be considered by the Administrator in the event that the Administrator does not approve the primary grant request on the grounds of the equipment not meeting applicable voluntary consensus standards.''.

SEC. 203. COORDINATION OF RESPONSE TO NATIONAL EMERGENCY.

(a) IN GENERAL.—Section 10 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2209) is amended—

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) the following:

''(b) MUTUAL AID SYSTEMS.

''(1) IN GENERAL.—The Administrator shall provide technical assistance and training to State and local fire service officials to establish nationwide and State mutual aid systems for dealing with national emergencies that—

''(A) include threat assessment and equipment deployment strategies;

''(B) include means of collecting asset and resource information to provide accurate and timely data for regional deployment; and

''(C) are consistent with the Federal Response Plan.

''(2) MODEL MUTUAL AID PLANS.—The Administrator shall develop and make available to State and local fire service officials model mutual aid plans for both intrastate and interstate assistance.''.

(b) REPORT ON STRATEGIC NEEDS.—Within 90 days after the date of enactment of this Act, the Administrator of the United States Fire Administration shall report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science on the need for a strategy concerning deployment of volunteers and emergency response personnel (as defined in section 6 of the Firefighters' Safety Study Act 15 U.S.C. 2223e)), including a national credentialing system, in the event of a national emergency.

(c) REPORT ON FEDERAL RESPONSE PLAN.—Within 30 days after the date of enactment of this Act, the Department of Homeland Security shall transmit a report to the Senate Committee on Commerce, Science, and Transportation, the Senate Committee on Governmental Affairs, and the House of Representatives Committee on Science describing plans for revisions to the Federal Response Plan and its integration into the National Response Plan, including how the revised plan will address response to terrorist attacks, particularly in urban areas, including fire detection and suppression and related emergency services.

SEC. 204. TRAINING.

(a) IN GENERAL.—Section 7(d)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206(d)(1)) is amended—

(1) by striking ''and'' after the semicolon in subparagraph (E);

(2) by redesignating subparagraph (F) as subparagraph (N); and

(3) by inserting after subparagraph (E) the following:

''(F) strategies for building collapse rescue;

''(G) the use of technology in response to fires, including terrorist incidents and other national emergencies;

''(H) response, tactics, and strategies for dealing with terrorist-caused national catastrophes;

''(I) use of and familiarity with the Federal Response Plan;

''(J) leadership and strategic skills, including integrated management systems operations and integrated response;

''(K) applying new technology and developing strategies and tactics for fighting forest fires;

''(L) integrating the activities of terrorism response agencies into national terrorism incident response systems;

''(M) response tactics and strategies for fighting fires at United States ports, including fires on the water and aboard vessels; and''.

(b) CONSULTATION ON FIRE ACADEMY CLASSES.—The Superintendent of the National Fire Academy may consult with other Federal, State, and local agency officials in developing curricula for classes offered by the Academy.

(c) COORDINATION WITH OTHER PROGRAMS TO AVOID DUPLICATION.—The Administrator of the United States Fire Administration shall coordinate training provided under section 7(d)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206(d)(1)) with the Attorney General, the Secretary of Health and Human Services, and the heads of other Federal agencies

(1) to ensure that such training does not duplicate existing courses available to fire service personnel; and

(2) to establish a mechanism for eliminating duplicative training programs.

(d) COURSES AND TRAINING ASSISTANCE.—Section 7(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206(1)) is amended by adding at the end the following: ''The Superintendent shall offer, at the Academy and at other sites, courses and training assistance as necessary to accommodate all geographic regions and needs of career and volunteer firefighters.''.

SEC. 205. FIREFIGHTER ASSISTANCE GRANTS PROGRAM.

(a) ADMINISTRATION.—The first section 33 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229) is amended—

(1) by striking subsection (b)(2) and inserting the following:

''(2) ADMINISTRATIVE ASSISTANCE.—The Director shall establish specific criteria for the selection of recipients of assistance under this section and shall provide grant-writing assistance to applicants.''; and

(2) by striking ''operate the office established under subsection (b)(2) and'' in subsection (e)(2).

(b) Maritime Firefighting.—Subsection (b)(3)(B) of the first section 33 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229(b)(3)(B)) is amended by inserting ''maritime firefighting,'' after ''arson prevention and detection,''.

(c) FIREFIGHTING IN REMOTE AREAS.—The first section 33 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229) is amended—

(1) by inserting ''equipment for fighting fires with foam in remote areas without access to water, and'' after ''including'' in subsection (b)(3)(H); and

(2) by inserting ''Of the amounts authorized in this paragraph, $3,000,000 shall be made available each year through fiscal year 2008 for foam firefighting equipment.'' at the end of subsection (e)(1).

SEC. 206. NATIONAL FALLEN FIREFIGHTERS FOUNDATION.

(a) MEMBERS.—Section 151303(b) of title 36, United States Code, is amended—

(1) by striking ''9'' in paragraph (2) and inserting ''12'';

(2) by striking ''six'' in subparagraph (D) of paragraph (2) and inserting ''nine''; and

(3) by striking ''3 members'' in paragraph (3) and inserting ''4 members''.

(b) COMPENSATION.—Section 151304(b)(3) of title 36, United States Code, is amended by inserting ''15 percent above'' after ''more than''.

(c) PERIOD OF AUTHORIZED ASSISTANCE.—Section 151307 of title 36, United States Code, is amended in subsection (a)(1), by striking ''During the 10-year period beginning on the date of the enactment of the Fire Administration Authorization Act of 2000, the'' and inserting ''The''.

SA 2208. Mr. FRIST proposed an amendment to the joint resolution H.J. Res. 78, making further continuing appropriations for the fiscal year 2004, and for other purposes; as follows:

On page 2, line 7, strike ''23'' and insert ''24''.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, November 20, 2003, at 3 p.m., in closed session, to receive a briefing on assessment of the current situation in Iraq.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on November 20, 2003, at 10 a.m., to conduct a vote on the nomination of Ms. Alicia R. Castaneda, of the District of Columbia, to be a member of the Board of Directors of the Federal Housing Finance Board; the nomination of Mr. Thomas J. Curry, of Massachusetts, to be a member of the Board of Directors of the Federal Deposit Insurance Corporation; and S. 1531, the ''Chief Justice

John Marshall Commemorative Coin Act.''

Following the votes, the committee will conduct a hearing on ''Improving the Corporate Governance of the New York Stock Exchange.''

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Thursday, November 20, 2003, at 2 p.m., to conduct a hearing on the ''Review of Current Investigations and Regulatory Actions Regarding the Mutual Fund Industry.''

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet on Thursday, November 20, 2003, at 9:30 a.m., on Drug Importation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Thursday, November 20, 2003 at a time and location to be determined to hold a business meeting to consider the nominations of James M. Loy to be Deputy Secretary of Homeland Security, Department of Homeland Security; and Scott J. Bloch to be Special Counsel, Office of Special Counsel.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT, THE FEDERAL WORKFORCE AND THE DISTRICT OF COLUMBIA

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs Subcommittee on Oversight of Government Management, the Federal Workforce and the District of Columbia, be authorized to meet on Thursday, November 20, 2003 at 10 a.m. for a hearing entitled, ''Keeping the Lights on: The Federal Role in Managing the Nation's Electricity, Part Two.''

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet on Thursday, November 20, 2003, at 9 a.m., for a hearing entitled ''U.S. Tax Shelter Industry: The Role of Accountants, Lawyers and Financial Professionals.''

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE READ THE FIRST TIME—H.R. 1274

Mr. FRIST. I understand that H.R. 1274, which was just received from the House, is at the desk and I now ask for its first reading.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1274) to direct the Administrator of General Services to convey to Fresno County, California, the existing Federal courthouse in that county.

Mr. FRIST. I now ask for its second reading and object to my own request.

The PRESIDING OFFICER. The bill will receive its second reading on the next legislative day.

HUGH GREGG POST OFFICE BUILDING

Mr. FRIST. I ask unanimous consent that the Senate now proceed to consideration of Calendar No. 397, H.R. 3185.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3185) to designate the facility of the United States Postal Service located at 38 Spring Street in Nashua, New Hampshire, as the Hugh Gregg Post Office Building.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3185) was read the third time and passed.

JOHN G. DOW POST OFFICE BUILDING

Mr. FRIST. I ask unanimous consent that the Senate now proceed to consideration of Calendar No. 367, H.R. 3166.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3166) to designate the facility of the United States Postal Service located at 57 Old Tappan Road in Tappan, New York, as the John G. Dow Post Office Building.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3166) was read the third time and passed.

CORRECTION OF HEALTH CARE SAFETY NET AMENDMENTS ACT OF 2003

Mr. FRIST. I ask unanimous consent that the HELP Committee be discharged from further consideration of H.R. 3038 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3038) to make certain technical and conforming amendments to correct the Health Care Safety Net Amendments Act of 2002.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3038) was read the third time and passed.

EXPRESSING THE SENSE OF THE SENATE WITH RESPECT TO POLIO

Mr. FRIST. I ask unanimous consent that the HELP Committee be discharged from further consideration of S. Res. 266 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 266) expressing the sense of the Senate with respect to Polio.

There being no objection, the Senate proceeded to consider the resolution.

Mr. FRIST. I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 266) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 266

Whereas polio has caused millions of casualties through history, paralyzing millions and killing untold numbers of others;

Whereas polio remains a public health threat in today's world, despite being easily preventable by vaccination;

Whereas polio is now limited to 10 countries, with the distinct possibility that it can be once and forever extinguished as an affliction on mankind by ensuring the vaccination of all children in these countries under the age of 5;

Whereas a Global Polio Eradication Initiative exists that seeks to once and forever end polio as an illness, which includes efforts underway by the Centers for Disease Control and Prevention; and

Whereas the United States has the capacity to act to speed the eradication of polio by

assisting in the targeting of its few remaining reservoirs: Now, therefore, be it

Resolved, That the Senate—

(1) expresses serious concern about the continuing threat posed by polio;

(2) encourages the United Nations and its component agencies, the private sector, private voluntary organizations and non-governmental organizations, concerned States, and international financial institutions to act with haste and manifold dedication to eradicate polio as soon as possible; and

(3) calls upon the United States government to continue its contribution to the multilateral effort to eradicate polio, including closely monitoring laboratory stocks of the polio virus.

ESTABLISHING THE NATIONAL MUSEUM OF AFRICAN AMERICAN HISTORY AND CULTURE

Mr. FRIST. I ask unanimous consent that the Senate now proceed to the immediate consideration of H.R. 3491, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3491) to establish within the Smithsonian Institution the National Museum of African American History and Culture, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. BROWNBACK. Mr. President, over 200 years ago, there was a dream that was America for a group of individuals who were brought to our shores in shackles. A dream so powerful that compelled a race of people to fight for the liberty of others when they were in bondage themselves. A dream that not only served as a catalyst for physical liberation in the African-American community but removed societal shackles from our culture and enabled us to realize the ideals set before us in the Constitution—that all men are created equal under God.

Today, I am proud to stand here with my colleagues, from both the House and the Senate, and announce the passage of the National Museum of African-American History and Culture Act. After over 70 years, we have finally created a museum to honor—nationally—the contributions and sacrifice of African Americans in this country.

I would specifically like to thank Senator DODD, who was committed to honoring this history and has worked hard to get us to this point today.

I would also like to thank Senator TRENT LOTT for his unwavering support to move this bill through the Committee of Jurisdiction. As well as Senator TED STEVENS for his leadership and commitment to this project.

Additionally, I would like to recognize Senator SANTORUM for his continued unwavering commitment to this bill as well as the majority leader of the Senate, Senator BILL FRIST. It means a great deal to have such widespread support and I am grateful.

Perhaps most important, I would like to thank Representative JOHN LEWIS for championing this bill for over 15 years. It has been a pleasure for me to work with you, JOHN, on this bill.

With the creation of this museum, we will celebrate a rich and magnificent history. A history of a people's quest for freedom that shaped this Nation into a symbol of freedom and democracy around the world. I am proud to stand here today with my colleagues and celebrate the passage of this wonderful bill.

Perhaps most important, I believe that this museum will be a catalyst for needed racial reconciliation in this country. There will be many tears shed at this museum—tears that cleanse the soul and that transcend race, creed, and color.

I remember when I met with the dean of the Afro-American Studies at Howard University. He told me of a story about his grandfather who finished a bowl the day the Emancipation Proclamation was authorized.

His grandfather decided to keep the bowl because it no longer was the property of a slave master but the man who made it—his grandfather. The dean has this bowl in his home—an incredible piece of history and I am sure there are many more pieces out there waiting for a home—a national home and today we have ensured that there will indeed be a home for such artifacts.

Specifically, this bill creates this museum within the Smithsonian Institution—America's premier museum complex. We have worked very hard with the Smithsonian Institution to craft a bill that will compliment their programs—and indeed we have done just that.

The legislation outlines a museum that is very similar to the American Indian Museum, slated to open next year. And I know that the Smithsonian Institution will create another national treasure, one that tells the story of African Americans in this country—a proud history, a rich history.

This bill charges the Board of Regents of the Smithsonian Institution along with the Council of the National Museum to plan, build and construct a museum dedicated to celebrating nationally African-American history—which is American history.

In addition, this bill charges the board of regents with choosing a site on or adjacent to the National Mall for the location of the museum.

Additionally, the bill instructs the director of the museum to create and oversee an education and program liaison section designed to work with educational institutions and museums across the country in order to promote African-American history.

Finally, the bill sets fourth a federal-private partnership for funding the museum and creates a council for the museum, which will be comprised from a mixture of leading African Americans from the museum, historical, and business communities.

I do not pretend that this museum is a panacea for racial reconciliation. It is, however, a productive step in recognizing the important contributions African Americans have made to this country.

Dr. Martin Luther King, Jr. once expressed his desire for this Nation, "That the dark clouds of [misconceptions] will soon pass away and the deep fog of misunderstanding will be lifted from our fear-drenched communities and in some not too distant tomorrow the radiant stars of love and brotherhood will shine over our great Nation with all their scintillating beauty." We are one step closer today—God bless.

Mr. DODD. Mr. President, today is a truly historic day. After nearly three-quarters of a century of trying, a national museum dedicated to telling the story of the African American struggle and contribution to the founding and development of this country is about to be realized with passage of H.R. 3491, legislation to create a National Museum of African American History and Culture.

Many individuals are to be congratulated and thanked for their efforts to bring this dream to fruition. In the Senate, my distinguished colleague and author of legislation this Congress to authorize the African American Museum, Senator SAM BROWNBACK, has been a champion of this effort for the past two Congresses. I was pleased to be his coauthor on this measure.

As chairman of the Senate Rules Committee last Congress, it was my great honor to work with him to produce legislation to create the Presidential Commission, whose report underpinned the legislation we introduced earlier this year. We would not be voting on this matter today but for the continuing efforts of Senator BROWNBACK.

In the House, my good friend, Congressman BOB NEY, and my friend and colleague from Connecticut, Congressman JOHN LARSON, worked with us to find a compromise that could be supported in the House and shepherded this legislation to passage on the House suspension calendar on Wednesday by an overwhelming vote of 409 to 9. Their diligence and dedication to this effort was tireless.

But no one deserves more credit for helping to realize this dream than does my dear friend from Georgia, Congressman JOHN LEWIS. This bill is truly his dream, his inspiration, his vision, his mission.

For nearly 12 years JOHN LEWIS has made creation of this museum his personal crusade. It has been a labor of love and while the road has been long and filled with bumps, the victory today is his victory. I salute JOHN LEWIS for his courage and tireless dedication to this cause.

But the ultimate winner today is not just a handful of Members, it is our Nation as a whole. For today, Congress

has acted to heal old wounds of the past and formally acknowledge that the stories and contributions of African Americans to the birth and growth of this great Nation must be told to complete our history.

Since 1929, efforts have been made to recognize the contributions and unique history of Americans of African descent. It is past time that we publicly acknowledge and incorporate the African American experience into our collective identity.

This legislation will help ensure that the compelling stories and invaluable contributions of African Americans to our national fabric will no longer be ignored, but shared with all Americans, indeed, all peoples of the world.

With the creation of the National Museum of African American History and Culture, Americans of all races, ethnic backgrounds, and personal histories can come together to celebrate the contributions of all Americans to the rich heritage and culture that is the American melting pot.

That is the essence of this legislation—the completion of the American story of our quest for freedom and truth through the public incorporation of the experiences and contributions of African Americans to that struggle. This Museum offers the promise and hope that all Americans can come to understand the full story of how this nation was formed.

The House bill before us is virtually identical to the bill Senator BROWNBACK and I introduced in May of this year, S. 1157, which the Senate passed on June 23rd.

This legislation directs the Smithsonian Institution to establish a museum known as the National Museum of African American History and Culture. Within 12 months of enactment, the Smithsonian Board of Regents will choose a site for this Museum from among four sites listed in the bill.

With regard to the sites available for selection, the House bill deletes the Capitol grounds site contained in the Senate-passed bill and substitutes a fourth site, known as the ‘‘Banneker Overlook site’’ located on 10th Street Southwest at the foot of the L’Enfant Plaza promenade on axis with the Smithsonian Castle.

The bill directs that, prior to the selection of the site, the Board of Regents will consult with the chair of the National Capital Planning Commission and the chair of the Commission on Fine Arts, as well as the chairman of the Presidential Commission, Congressional oversight committees and others.

In the meantime, the Smithsonian Board of Regents will appoint a 19 member council, comprised of leaders within the African American community and others, to advise the Regents on the development, design and construction of the Museum.

With regard to the selection of these council members, I was disappointed that the House deleted a provision in the Senate-passed bill which would have required that at least 9 members of the council be of African American descent.

This important provision in the Senate-passed bill was modeled on provisions of the act which created the National Museum of the American Indian. As in the case of that Museum, this language was intended to ensure that the sensitivities and perspectives of those individuals whose stories this Museum will tell are properly considered and portrayed.

Although I regret that the House deleted this provision, the bill still requires that, in appointing 17 of the 19 members of the council, the Board of Regents take into consideration individuals recommended by organizations and entities that are committed to the advancement of knowledge of African American life, art, history, and culture.

Although this change weakens the Senate version of this bill some, the Smithsonian Institution can still ensure the integrity of the content of this museum by appointing members to the council in keeping with the Senate’s original intent. As the ranking member of the Rules Committee which has oversight jurisdiction over the Smithsonian, I look forward to working with the Smithsonian to see that this happens.

This Museum will include exhibits and programs relating to all aspects of African American life, art, history, and culture from the time of slavery through present day and will provide leadership to other museums and will collaborate with historically Black colleges and universities and educational organizations to ensure the integrity of the exhibits and programming and to broaden the reach of its story and mission.

The House compromise also retains provisions of the Senate-passed bill which authorizes a grant program within the National Institute of Museum and Library Services. This program is intended to support organizations dedicated to expanding the knowledge of the African American experience and slavery by providing support for improving operations, care of collections, and intern and scholarship programs.

Equally important is a provision which will provide grants to nonprofit organizations whose primary purpose is to promote the study of the African American diaspora. Such grants can be used to increase existing endowment funds for the purpose of enhancing education programs and maintaining and operating traveling exhibits.

In Connecticut, we are fortunate to have such an organization in Amistad America, Inc. Amistad America is a national, non-profit educational organization dedicated to promoting the legacies of the Amistad incident of 1839 through the traveling exhibit of the freedom schooner *Amistad*.

The *Amistad* is literally a floating classroom which celebrates and teaches the historic lessons of perseverance, leadership, cooperation, justice, and freedom inherent in the Amistad Incident. Although its home port is New Haven, CT, the freedom schooner *Amistad* travels to both national and international ports to bring the story of our collective history and the continuing struggle for equality and human rights to school children and adults around the globe.

It is through the efforts of such organizations as Amistad America, with the support of the new Museum of African American History and Culture and the National Institute of Museum and Library Services, that we can ensure that the lessons of the past are not lost on current or future generations.

In short, this legislation offers the hope that through knowledge and education, the history of the struggles for freedom and equality of some Americans becomes the interwoven history of all Americans and ensures that future generations will not have to repeat such struggles.

I was honored to be the lead Democratic sponsor of this legislation in the Senate, and I am honored to stand before the Senate today to urge my colleagues to adopt this compromise which the House has passed and send this measure to the President for his signature.

We would not be at this point today without the dedication and assistance of many people, including the staff who labor many hours and late into the night to facilitate the legislative process. At the risk of leaving someone off the list, I want to recognize those staff for their considerable contributions to this measure, including LaRochelle Young of Senator BROWNBACK’s staff; Michael Collins and Tammy Boyd of Congressman JOHN LEWIS’s staff; Paul Vinovich and George Hagijski of Congressman BOB NEY’s House Administration Committee staff; George Shevlin and Matt Pinkus of Congressman JOHN LARSON’s House Administration Committee staff; Susan Brita of Congressman JAMES OBERSTAR’s House Transportation and Infrastructure Committee staff; Dan Mathews of Congressman STEVEN LATOURETTE’s Transportation and Infrastructure Committee staff; Bill Johnson of Congressman JACK KINGSTON’s staff; and Kennie Gill of my Rules Committee staff.

The action we take today is historic not only in its ability to unify this nation, but in its message to the world that we recognize and cherish the contributions of all Americans to the creation of this great democracy.

Mr. FRIST. I ask unanimous consent that the bill be read the third time and

passed, the motion to reconsider be laid upon the table, and any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3491) was read the third time and passed.

Mr. FRIST. I want to take just one moment and comment on the unanimous consent agreement and the establishment within the Smithsonian Institution of the National Museum of African American History and Culture, which we just approved.

This has been a fairly long journey, to come to the point of the establishment of this African American History and Culture Museum. It really goes back to the time of African-American history, when it began in 1619 in Jamestown, VA. It was there a Dutch slave trader exchanged his cargo of Africans for food. Over the next 400 years, the descendants of men and women brought to America in chains would seek and find freedom. They would transform the American consciousness. They would permanently revolutionize American culture, American music, American art, and American literature.

We are on the cusp of really a momentous event, and that is the enshrining of these events in a national museum devoted to African-American history and culture. With this, visitors from around the world will learn about 400 years of struggle and progress.

The museum will house priceless artifacts, it will house documents, it will house recordings—all commemorating that 400-year history. It will serve as a wellspring of inspiration and scholarship. With the action of just a few moments ago, we will be sending the President a bill to fulfill this vision.

What the African American Museum of History and Culture Act does is establish this museum within the Smithsonian. It is a Federal-private partnership. It authorizes $17 million for the first year in order to launch this museum.

The Board of Regents will have 12 months to designate a site and the legislation lays out four possibilities for that site. Once that site is selected, the Board will set to work raising up this new national institution. America will finally have a museum worthy of the generations of men and women who have sacrificed so much and given so deeply to the cause of freedom.

I do commend my colleagues, Senator BROWNBACK, Senator DODD, Senator LOTT, Senator SANTORUM, Senator STEVENS, and on the House side especially Representative JOHN LEWIS of Georgia and Representative J.C. Watts for their hard work and their leadership in coming to this point.

Indeed, the African-American journey is America's journey and tonight we take another major step forward.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. If the Senator has finished his comment on the passage of this important legislation, I would like to briefly say JOHN LEWIS's name was mentioned, and rightfully so. Everyone the distinguished majority leader mentioned has played a significant role in this legislation before us, but when JOHN LEWIS came to Washington, this became a personal crusade of his.

JOHN LEWIS is one of my heroes. I have such great admiration and respect for him. I think this is the culmination of a dream he started many years ago. I want the record to be clear as to how much this means to him, the people of Georgia, and this country.

The PRESIDING OFFICER. The majority leader.

Mr. FRIST. I, again, want to second that. When this bill passed the House of Representatives—I think it was 2 nights ago—I immediately called Representative LEWIS the next morning for exactly the same reason.

I have not been around Washington quite as long to be able to build upon the shoulders of somebody like Representative LEWIS, who had this vision of a museum, but we are now taking that major step forward. As museums are approved and money is put forward, it takes a while, but to see that dream really becoming concrete, I want to tell him thank you for me, for this body, for America, and for all the millions of people who will benefit from that vision he had.

CONGRATULATING COACH JOHN GAGLIARDI

Mr. FRIST. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 270, submitted by Senators COLEMAN and DAYTON earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 270) congratulating John Gagliardi, football coach of St. Johns University, on the occasion of his becoming the all-time winningest coach in collegiate football history.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DASCHLE. Mr. President, I rise in strong support of S. Res. 270, congratulating John Gagliardi on becoming the winningest college football coach in history. He is a truly remarkable coach and an even better man.

While thousands of his players have known this for years, the rest of the country has come to learn over the last several weeks that it not just John's 410 wins which make him special. In an era when collegiate student athletes are pressured to avoid academics, John Gagliardi consistently coaches teams with graduation rates at or close to 100 percent. He values sportsmanship, hard work and humility. And he treats his players and opponents with respect.

I am proud that several South Dakotans have contributed to John's success over the years. This year's conference championship team includes three fine student athletes from South Dakota: Aaron Babb, of Sioux Falls; Jason Hardie, of Beresford; and Dana Kinsella, also of Sioux Falls.

There have been other fine South Dakotans before them. While there are dozens, I will name just a couple. Sean Dailey, an all-conference defensive end, is now an accomplished chemist. And Jay Conzemius, an All-American running back was until recently the Chancellor of the Catholic Diocese of Sioux Falls.

It is right and fitting for the Senate to honor John Gagliardi for his historic accomplishments. It is unlikely that anyone will ever win as many games as he has, and maybe even more unlikely that any coach will so positively impact the lives of so many young men. I yield the floor.

Mr. FRIST. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 270) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 270

Whereas John Gagliardi began his coaching career in 1943 at the age of 16 when his high school football coach was drafted and John Gagliardi was asked to take over the position;

Whereas John Gagliardi won 4 conference titles during the 6 years he coached high school football;

Whereas John Gagliardi graduated from Colorado College in 1949 and began coaching football, basketball, and baseball at Carroll College in Helena, Montana, winning titles in all 3 sports;

Whereas John Gagliardi took over the football program at St. John's University in Collegeville, Minnesota, in 1953 and the football team won the Minnesota Intercollegiate Athletic Conference title in his first year as coach;

Whereas by the end of the 2002 season, John Gagliardi had won 3 national championships, coached 22 conference title teams, appeared in 45 post-season games and compiled a 376–108–10 record during his 50 years at St. John's University;

Whereas under the leadership of John Gagliardi, St. John's University has been nationally ranked 37 times in the past 39 years, and the university set a record with a 61.5 points per game average in 1993;

Whereas over 150 students participate in the St. John's University football program each year and every player dresses for home games;

Whereas John Gagliardi's coaching methods follow the ''Winning with No's'' theory: no blocking sleds or dummies, no whistles, no tackling in practices, no athletic scholarships, and no long practices;

Whereas John Gagliardi has coached over 5,000 players during his 50 years at St. John's University, and no player has failed to graduate and most have graduated in 4 years;

Whereas, in 1993, the John Gagliardi trophy was unveiled, and it is given each year to the most outstanding Division III football player;

Whereas on November 1, 2003, John Gagliardi tied Grambling University coach Eddie Robinson's record of 408 wins with a 15 to 12 victory over the University of St. Thomas;

Whereas on November 8, 2003, John Gagliardi broke Eddie Robinson's record with a 29 to 26 victory over Bethel College;

Whereas John Gagliardi is admired by his players, as well as by the students, faculty, and fans of St. John's University for his ability to motivate and inspire;

Whereas students who take his course, Theory of Football, credit John Gagliardi for teaching them more about life than about football;

Whereas those closest to John Gagliardi will tell you that football is only part of his life—he values the time he spends with Peg, his wife of 47 years, and their 4 children; and

Whereas the on- and off-the-field accomplishments of John Gagliardi have placed him in an elite club that includes the best coaches in history: Now, therefore, be it

Resolved, That the Senate—

(1) congratulates John Gagliardi, football coach of St. John's University in Collegeville, Minnesota, on becoming the all-time winningest coach in collegiate football history; and

(2) directs the Secretary of the Senate to transmit an enrolled copy of this resolution to John Gagliardi and St. John's University.

RECOGNITION OF THE EVOLUTION AND IMPORTANCE OF MOTORSPORTS

Mr. FRIST. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 395, S. Res. 253.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 253) to recognize the evolution and importance of motorsports.

There being no objection, the Senate proceeded to consider the resolution.

Mr. FRIST. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table with no intervening action or debate, and that any statements relating to this resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 253) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 253

Whereas on March 26, 1903, an automotive race was held on a beach in Volusia County, Florida, inaugurating 100 years of motorsports;

Whereas 100 years later, motorsports are the fastest growing sports in the country;

Whereas races occur at hundreds of motorsport facilities in all 50 States;

Whereas racing fans can enjoy a wide variety of motorsports sanctioned by organizations that include Championship Auto Racing Teams (CART), Grand American Road Racing (Grand Am), Indy Racing League (IRL), International Motorsports Association (IMSA), National Association for Stock Car Automobile Racing (NASCAR), National Hot Rod Association (NHRA), Sports Car Club of America (SCCA), and United States Auto Club (USAC);

Whereas the research and development of vehicles used in motorsports have directly contributed to improvements in safety and technology for the automobiles and motor vehicles used by hundreds of millions of Americans;

Whereas 13,000,000 fans will attend NASCAR races alone in 2003;

Whereas fans of all ages spend days at motorsport facilities participating in a variety of interactive theme and amusement activities surrounding races;

Whereas motorsport facilities that provide these theme and amusement activities contribute millions of dollars into local economies;

Whereas motorsports make a significant contribution to the national economy; and

Whereas tens of millions of people in the United States enjoy the excitement and speed of motorsports every week: Now, therefore, be it

Resolved, That the Senate recognizes the evolution of motorsports and honors those who have helped create and build this great American pastime.

EXPRESSING THE IMPORTANCE OF MOTORSPORTS

Mr. FRIST. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of H. Con. Res. 320, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 320) expressing the sense of the Congress regarding the importance of motorsports.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. FRIST. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating to the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 320) was agreed to.

The preamble was agreed to.

UNITED STATES FIRE ADMINISTRATION REAUTHORIZATION ACT OF 2003

Mr. FRIST. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 250, S. 1152.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1152) to reauthorize the United States Fire Administration, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which has been reported from the Committee on Commerce, Science, and Transportation, with amendments, as follows:

[Strike the part shown in black brackets and insert the part shown in italic.]

S. 1152

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

[SECTION 1. SHORT TITLE.

[This Act may be cited as the ''United States Fire Administration Reauthorization Act of 2003''.

[SEC. 2. RE-ESTABLISHMENT OF POSITION OF UNITED STATES FIRE ADMINISTRATOR.

[Section 1513 of the Homeland Security Act of 2002 does not apply to the position or office of Administrator of the United States Fire Administration, who shall continue to be appointed and compensated as provided by section 5(b) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2204(b)) after the functions vested by law in the Federal Emergency Management Agency have been transferred to the Directorate of Emergency Preparedness and Response in accordance with section 503 of the Homeland Security Act of 2002.

[SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

[Section 17(g)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2216(g)(1)) is amended to read as follows: ''(1) Except as otherwise specifically provided with respect to the payment of claims under section 11 of this Act, there are authorized to be appropriated to carry out the purposes of this Act—

[''(A) $52,000,000 for fiscal year 2004;

[''(B) $53,560,000 for fiscal year 2005; and

[''(C) $55,166,800 for fiscal year 2006.''.]

TITLE I—UNITED STATES FIRE ADMINISTRATION REAUTHORIZATION

SECTION 101. SHORT TITLE.

This title may be cited as the ''United States Fire Administration Reauthorization Act of 2003''.

SEC. 102. RE-ESTABLISHMENT OF POSITION OF UNITED STATES FIRE ADMINISTRATOR.

Section 1513 of the Homeland Security Act of 2002 does not apply to the position or office of Administrator of the United States Fire Administration, who shall continue to be appointed and compensated as provided by section 5(b) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2204(b)) after the functions vested by law in the Federal Emergency Management Agency have been transferred to the Directorate of Emergency Preparedness and Response in accordance with section 503 of the Homeland Security Act of 2002.

SEC. 103. AUTHORIZATION OF APPROPRIATIONS.

Section 17(g) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2216(g)) is amended—

(1) by striking subparagraphs (A) through (K) of paragraph (1) and inserting the following:

''(A) $63,200,000 for fiscal year 2004, of which $2,200,000 shall be used to carry out section 8(e);

''(B) $65,096,000 for fiscal year 2005, of which $2,266,000 shall be used to carry out section 8(e);

''(C) $67,049,000 for fiscal year 2006, of which $2,334,000 shall be used to carry out section 8(e);

''(D) $69,060,000 for fiscal year 2007, of which $2,404,000 shall be used to carry out section 8(e); and

''(E) $71,132,000 for fiscal year 2008, of which $2,476,000 shall be used to carry out section 8(e).''; and

(2) by adding at the end the following:

''(3) Of the funds authorized by paragraph (1) for fiscal years 2004 through 2006, $3,000,000 annually shall be made available for grants for fire fighting equipment necessary to fight fires using foam in remote areas without access to water.''

TITLE II—FIREFIGHTING RESEARCH AND COORDINATION

SECTION 201. SHORT TITLE.

This title may be cited as the ''Firefighting Research and Coordination Act''.

SEC. 202. NEW FIREFIGHTING TECHNOLOGY.

IN GENERAL.—Section 8 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2207) is amended—

(1) by striking ''and'' after the semicolon in paragraph (9) of subsection (a);

(2) by striking ''section.'' in paragraph (9) of subsection (a) and inserting ''section;'';

(3) by adding at the end of subsection (a) the following:

''(9) methods of containing insect infested forest fires and limiting disbursal of resultant fine particle smoke; and

''(10) methods of measuring and tracking the disbursal of fine particle smoke resulting from fires of insect infested fuel.'';

(4) by redesignating subsection (e) as subsection (f); and

(5) by inserting after subsection (d) the following:

''(e) DEVELOPMENT OF NEW TECHNOLOGY.—

''(1) IN GENERAL.—In addition to, or as part of, the program conducted under subsection (a), the Administrator, in consultation with the National Institute of Standards and Technology, the Inter-Agency Board for Equipment Standardization and Inter-Operability, the National Institute for Occupational Safety and Health, the Directorate of Science and Technology of the Department of Homeland Security, national voluntary consensus standards development organizations, interested Federal, State, and local agencies, and other interested parties, shall—

''(A) develop new, and utilize existing, measurement techniques and testing methodologies for evaluating new firefighting technologies, including—

''(i) personal protection equipment;

''(ii) devices for advance warning of extreme hazard;

''(iii) equipment for enhanced vision;

''(iv) devices to locate victims, firefighters, and other rescue personnel in above-ground and below-ground structures;

''(v) equipment and methods to provide information for incident command, including the monitoring and reporting of individual personnel welfare;

''(vi) equipment and methods for training, especially for virtual reality training; and

''(vii) robotics and other remote-controlled devices;

''(B) evaluate the compatibility of new equipment and technology with existing firefighting technology; and

''(C) support the development of new voluntary consensus standards through national voluntary consensus standards organizations for new firefighting technologies based on techniques and methodologies described in subparagraph (A).

''(2) NEW EQUIPMENT MUST MEET STANDARDS.—For equipment for which applicable voluntary consensus standards have been established, the Administrator shall, by regulation, require that equipment or systems purchased through the assistance program established by section 33 meet or exceed applicable voluntary consensus standards.''.

SEC. 203. COORDINATION OF RESPONSE TO NATIONAL EMERGENCY.

(a) IN GENERAL.—Section 10 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2209) is amended—

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) the following:

''(b) MUTUAL AID SYSTEMS.—

''(1) IN GENERAL.—The Administrator, after consultation with the Under Secretary for Emergency Preparedness and Response, shall provide technical assistance and training to State and local fire service officials to establish nationwide and State mutual aid systems for dealing with national emergencies that—

''(A) include threat assessment and equipment deployment strategies;

''(B) include means of collecting asset and resource information to provide accurate and timely data for regional deployment; and

''(C) are consistent with the Federal Response Plan.

''(2) MODEL MUTUAL AID PLANS.—The Administrator, in consultation with the Under Secretary for Emergency Preparedness and Response, shall develop and make available to State and local fire service officials model mutual aid plans for both intrastate and interstate assistance.''.

(b) REPORT ON STRATEGIC NEEDS.—Within 90 days after the date of enactment of this Act, the Administrator of the United States Fire Administration shall report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science on the need for a strategy concerning deployment of volunteers and emergency response personnel (as defined in section 6 of the Firefighters' Safety Study Act (15 U.S.C. 2223e), including a national credentialing system, in the event of a national emergency.

(c) UPDATE OF FEDERAL RESPONSE PLAN.—Within 180 days after the date of enactment of this Act, the Under Secretary of Emergency Preparedness and Response shall—

(1) revise the Federal Response Plan to incorporate plans for responding to terrorist attacks, particularly in urban areas, including fire detection and suppression and related emergency services; and

(2) transmit a report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science describing the action taken to comply with paragraph (1).

SEC. 204. TRAINING.

(a) IN GENERAL.—Section 8(d)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206(d)(1)) is amended—

(1) by striking ''and'' after the semicolon in subparagraph (E);

(2) by redesignating subparagraph (F) as subparagraph (N); and

(3) by inserting after subparagraph (E) the following:

''(F) strategies for building collapse rescue;

''(G) the use of technology in response to fires, including terrorist incidents and other national emergencies;

''(H) response, tactics, and strategies for dealing with terrorist-caused national catastrophes;

''(I) use of and familiarity with the Federal Response Plan;

''(J) leadership and strategic skills, including integrated management systems operations and integrated response;

''(K) applying new technology and developing strategies and tactics for fighting forest fires;

''(L) integrating terrorism response agencies into the national terrorism incident response system;

''(M) response tactics and strategies for fighting fires at United States ports, including fires on the water and aboard vessels; and''.

(b) CONSULTATION ON FIRE ACADEMY CLASSES.—The Superintendent of the National Fire Academy may consult with other Federal, State, and local agency officials in developing curricula for classes offered by the Academy.

(c) COORDINATION WITH OTHER PROGRAMS TO AVOID DUPLICATION.—The Administrator of the United States Fire Administration shall coordinate training provided under section 8(d)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206(d)(1)) with the Attorney General, the Secretary of Health and Human Services, and the heads of other Federal agencies—

(1) to ensure that such training does not duplicate existing courses available to fire service personnel; and

(2) to establish a mechanism for eliminating duplicative training programs.

Mr. MCCAIN. Mr. President, I am pleased the Senate will now consider S. 1152, the United States Fire Administration Act of 2003. I am pleased to offer a substitute amendment which includes the provisions of S. 321, the Firefighting Research and Coordination Act.

I thank Senators HOLLINGS, BROWNBACK, BREAUX, BIDEN, DEWINE, CANTWELL, LINDSEY GRAHAM, CARPER, and SNOWE for their support of these two bills. I also thank Representative CAMP for his leadership in the House on the companion bill to S. 321. In addition, I thank Chairman BOEHLERT and ranking member HALL of the House Science Committee, and Chairman NICK SMITH of the Research Subcommittee for their work on this legislation.

The purpose of this legislation is to address many of the pressing needs of our fire services. As we face a war against terrorism, we must remember that firefighters are among the first to respond to any domestic terrorist event. In addition, today's firefighters must be prepared to deal with a host of other hazards caused by urban and wild land fires, natural disasters, hazardous materials spills, and other accidents. This legislation is designed to ensure that our Nation's first-responders are adequately prepared and trained to take action against these myriad threats.

This legislation will reauthorize funding for the U.S. Fire Administration, USFA, for fiscal year 2005 through fiscal year 2008. The USFA's important mission is to reduce the loss of life and property due to fire and related emergencies. The agency utilizes a number of tools to fulfill its mission. The National Fire Academy, NFA, is the premiere training academy of the fire services, and has trained over 1.4 million firefighters and other first-responders in emergency management, fire prevention, and anti-terrorism. In addition, the USFA engages in research, testing, and evaluation activities with public and private entities to

promote and improve fire and life safety.

This legislation also would reestablish the position of U.S. Fire Administrator at USFA. The U.S. Fire Administrator plays a critical role in our Nation's fire control policy and homeland security initiatives by serving as the point-of-contact for the fire services. This position was eliminated in last year's legislation that established the Department of Homeland Security. On April 30, 2003, the Senate Committee on Commerce, Science, and Transportation heard testimony from many of the major fire service organizations regarding the importance of the U.S. Fire Administrator, and the need for the administrator to serve as a representative of the fire services within the new Department of Homeland Security.

The legislation would address a major issue that fire departments face in equipping themselves. Today's firefighters use a variety of technologies including thermal imaging equipment; devices for locating firefighters and victims; and state-of-art protective suits to fight fires, clean up chemical and hazardous waste spills, and contend with potential terrorist devices. Unfortunately, there are no uniform technical standards for new equipment used in combating fires. Without such standards, local fire companies may purchase equipment that is faulty or that does not satisfy their needs. A January 2003, Consumer Reports article reported that much of the emergency equipment sold today is not tested or certified by the government or independent labs. The article states that ''the confusion will get worse, emergency departments say, as new equipment floods the market in response to increased government funding.''

The legislation would help to resolve this problem by authorizing the U.S. Fire Administrator to work with other Federal agencies and interested parties to support the development of voluntary consensus standards for new firefighting technology. Fire departments would use these standards when buying equipment through the federal Assistance to Firefighters Grant Program. In the rare case where a standard is out of date, the U.S. Fire Administrator would be allowed to grant a waiver.

The legislation also would address many of the coordination challenges that firefighters face during national emergencies. It would direct the U.S. Fire Administrator to provide assistance to State and local fire services in developing mutual aid plans, and report on a strategy for deployment of volunteers and other emergency response personnel.

Additionally, the legislation would authorize the National Fire Academy to train firefighters on technologies and strategies to respond to future terrorist attacks. It also would authorize the U.S. Fire Administrator to work with other federal agencies to coordinate training programs to prevent duplication.

The bill also would authorize the U.S. Fire Administrator to work with the Department of Agriculture and Department of the Interior to provide assistance in fire prevention and control technologies, including methods of containing insect-infested forest fires as well as measuring, tracking, and limiting the dispersal of the resulting smoke. In addition, the legislation would expand the Board of Directors of the National Fallen Firefighters Foundation from nine members to 12. And, it would allow local fire departments to purchase equipment for fighting fires with foam in remote areas without access to water under the Assistance to Firefighters Grant Program.

This legislation is supported by the National Volunteer Fire Council; the Congressional Fire Services Institute; the National Fire Protection Association; the International Association of Fire Chiefs; the International Association of Fire Fighters; the International Association of Arson Investigators; International Society of Fire Service Instructors; North American Fire Training Directors and the International Fire Service Training Association.

I urge my colleagues to support swift passage of this important legislation.

I ask unanimous consent to print the letter of endorsement in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOVEMBER 6, 2003.

Hon. JOHN MCCAIN,
Chairman, Senate Committee, Science and Transportation Committee, Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR MCCAIN: We are writing in strong support of S. 1151/H.R. 2692, the United States Fire Administration Reauthorization Act of 2003. Through a cooperative effort between both the leaders of the authorizing committees and our organizations, this legislation charts a course for the United States Fire Administration to prepare our nation's fire service for the many challenges it faces in a post 9–11 world.

Of particular importance to the fire service is the reinstatement of the United States Fire Administrator position as a Senate-confirmed position. As you are aware, the Homeland Security Act of 2002 (Public Law 107–296) inadvertently eliminated the position of U.S. Fire Administrator. The Fire Administrator is the lead advocate for the fire service within a presidential administration. In a display of nonpartisanship, the nation's fire service, several members of Congress, and Secretary Tom Ridge agreed that the position needed to be reinstated.

Like you, we have taken a keen interest in the development of new technologies for first responders. While the emergence of new technologies will certainly benefit the readiness of local first responders, attention must be given to its performance capabilities. Otherwise we could jeopardize the safety of our first responders. For this reason, we support the Firefighter Research and Coordination Act (S. 321/H.R. 545) as an amendment to the reauthorization measure. Many new technologies have the potential to improve the capabilities of our first responders; however we must ensure that these technologies serve their intended purpose and protect our firefighters and emergency medical personnel through the requirement that equipment purchased with the FIRE Grant program must meet voluntary consensus standards.

We also support the other sections of the legislation calling for coordination of response to national emergencies and for increased training. These are critical to the effective deployment and safety of first responders at major incidents.

Lastly, there is one issue not included in your legislation that we encourage both the Congress and the U.S. Fire Administration to help us advance: the installation of automatic fire sprinklers in both homes and the workplace. We can significantly reduce the number of deaths caused by fire by providing incentives and encouragement to the public to stall automatic sprinkler systems in their homes and businesses. Until the 108th session adjourns, we will continue to call on Congress to support the Fire Sprinkler Incentives Act, sponsored by Congressman Curt Weldon and Senator Jon Corzine and any other measures that promote the use of sprinklers.

We look forward to working with you in advancing this legislation through Congress quickly. Again, we thank you for your continued support.

Sincerely,

Congressional Fire Service Institute, International Association of Arson Investigators, International Association of Fire Chiefs, International Association of Fire Fighters, International Fire Service Training Association, International Society of Fire Service Instructors, National Fire Protection Association, National Volunteer Fire Council, North American Fire Training Directors.

Ms. SNOWE. Mr. President, I rise today in support of S. 1152, the U.S. Fire Administration Reauthorization Act of 2003 that reestablishes the position of U.S. Fire Administrator and incorporates the provisions of S. 321, the Firefighting and Research Coordination Act which I cosponsored.

As we prepare to reauthorize the U.S. Fire Administration for the first time since fiscal year 2000, we do so in a vastly changed environment. In that time, the term ''first responder'' has entered the lexicon and is now a part of our national consciousness. Americans have always understood and were assured that in the event of an emergency, units of the U.S. Fire Service would respond, render aid to the suffering, and protect our property and resources. However, we had gotten to the point that we were taking the Fire Service for granted.

All of that changed, as did many things in America, on September 11, 2001. On that day, we watched in horror as those tragic events unfolded in New York, Pennsylvania and at the Pentagon, and we saw over and over the bravery and sacrifice of those proud men and women of the United States Fire Service as they worked tirelessly

and without regard for their personal safety to help their fellow Americans. On that day, all of America once again became aware of those who live in our midst—our neighbors, our friends, and our relatives—who daily stand on the front lines to protect us from harm.

Since that time we embarked on an immense reorganization of the Government as we stood up the Department of Homeland Security. There were many views about the relative pros and cons of such a Department and which Federal agencies should be included in the Department and which were better left outside. This proposal will reauthorize just one agency within that organization, the United States Fire Administration. Most importantly, it will reestablish the U.S. Fire Administrator position as a separate entity appointed by the President and ensure that it is not subsumed as the Director of the Preparedness Division within the Department of Homeland Security.

In testimony earlier this year before the Commerce Committee, we heard from representatives from the International Association of Fire Chiefs, the National Fire Protection Association and the National Volunteer Fire Council who were united in their call to reestablish the position of United States Fire Administrator because of the importance of having an independent voice within the administration. As one example, they cited the need to have the Fire Administrator oversee the Firefighter Investment and Response Enhancement, FIRE, Act grants program to ensure funds were properly focused on the entirety of the fire service mission and not expended on strictly counterterrorism efforts.

I have always believed the FIRE grant program was one of the most successful competitive grant programs run by the Federal Government. In fiscal year 2002, my home State of Maine received a little over $4.3 million in grants, most of which went to the smallest communities in the State. In fact, the largest single recipient was the smaller South Berwick Fire Department, not the larger Portland or Bangor departments.

I have the honor and privilege of representing the Great State of Maine which has 5,300 miles of coastline and a long and proud maritime tradition. I am particularly pleased that this measure amends the FIRE grant process to include maritime firefighting so that those responsible for the protection of our ports and vessels at sea have the opportunity to acquire the tools and equipment they need to accomplish that mission.

Beyond simply directing the FIRE Act program, the bill also authorizes the U.S. Fire Administrator, in consultation with the National Institute of Standards and Technology, the Inter-Agency Board for Equipment Standardization and Interoperability, the Directorate of the Science and Technology at the Department of Homeland Security, national voluntary consensus standards development organizations and other interested parties, to develop the measurement techniques and testing methodologies to assess new firefighting technologies.

Such standards would support the development of voluntary consensus standards for evaluating the performance and compatibility of new firefighting technology, including thermal imaging equipment; early warning fire detection devices; personal protection equipment for firefighting; victim detection equipment; and devices to locate firefighters in buildings.

The U.S. Fire Administration Reauthorization Act also ensures that equipment purchased under the FIRE grant program will be required to meet or exceed those applicable voluntary consensus standards unless waived by the Fire Administrator in accordance with very specific guidelines.

Furthermore, under this legislation, the Fire Administrator is tasked with acting as a resource for State and local governments in developing mutual aid plans, updating the Federal Response Plan, and reporting on the need for a strategy for deploying volunteers, including a national credentialing system. New training programs at the National Fire Academy to improve tactics for using new firefighting technology and responding to terrorist attacks will be authorized under this measure.

I want to stress that the report on our strategic needs for the deployment of volunteers and emergency response personnel would be required within 90 days of enactment and a report describing plans to revise the Federal Response Plan to address responses to terrorism attacks would be due 180 days after enactment. These times are critical because it is imperative we complete the planning our national response so the Fire Service can more effectively protect our fellow citizens.

Successful implementation of those plans require that our firefighters undergo comprehensive training to understand and use the Federal Response Plan, to use new technologies and to develop the strategies and tactics to fight fires wherever they occur—in buildings, in forests or on the water. This legislation also encourages the Superintendent of the National Fire Academy to coordinate with Federal, State and local agencies to develop the curricula to accomplish that training and ensure that it is available in all geographic regions to both career and volunteer firefighters.

In conclusion, I would just say that this reauthorization of the Fire Administration is vital to those who risk their own lives every day in this nation to protect our citizens and our resources. It provides them with the leadership, the tools, the planning and the training they need to effectively accomplish that mission and I urge my colleagues to support passage of this measure.

Mr. FRIST. Mr. President, I ask unanimous consent that the McCain substitute at the desk be agreed to, the committee substitute, as amended, be agreed to, the bill, as amended, be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2207) was agreed to.

(The amendment is printed in today's RECORD under ''Text of Amendments.'')

The committee amendment in the nature of a substitute, as amended, was agreed to.

The bill (S. 1152), as amended, was read the third time and passed.

PRESERVATION OF EXISTING JUDGESHIPS ON THE SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

Mr. FRIST. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 399, S. 1561.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1561) to preserve existing judgeships on the Superior Court of the District of Columbia.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent that the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1561) was read the third time and passed, as follows:

S. 1561

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. COMPOSITION OF SUPERIOR COURT.

Section 903 of title 11 of the District of Columbia Code is amended by striking ''fifty-eight'' and inserting ''61''.

FAIRNESS TO CONTACT LENS CONSUMERS ACT

Mr. FRIST. I ask unanimous consent the Senate proceed to consideration of H.R. 3140, which is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3140) to provide for availability of contact lens prescriptions to patients, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent the bill be read the third time and passed, the motion to reconsider be laid upon the table, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3140) was read the third time and passed.

MAKING FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 2004

Mr. FRIST. I ask unanimous consent the Senate proceed to the consideration of H.J. Res. 78, which is at the desk.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 78) making further continuing appropriations for the fiscal year 2004, and for other purposes.

There being no objection, the Senate proceeded to consider the resolution.

Mr. FRIST. I ask the amendment at the desk be agreed to, the joint resolution, as amended, be read the third time and passed, the motion to reconsider be laid upon the table, and any statements relating to the joint resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2208) was agreed to, as follows:

On page 2, line 7, strike ''23'' and insert ''24''.

The joint resolution (H.J. Res. 78), as amended, was read the third time and passed.

ORDERS FOR FRIDAY, NOVEMBER 21, 2003

Mr. FRIST. I ask unanimous consent when the Senate completes its business today, it adjourn until 9:30 a.m. Friday, November 21. I further ask that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, the time for the two leaders be reserved for their use later in the day, and the Senate then resume consideration of the conference report to accompany H.R. 6, the Energy Policy Act, and that there then be 60 minutes equally divided between the chairman and ranking member of the Energy and Natural Resources Committee; provided that the final 10 minutes be divided between Senator BINGAMAN or his designee in control of the first 5 minutes, and the chairman or his designee in control of the final 5 minutes on the motion to invoke cloture on the conference report.

Mr. REID. Reserving the right to object, I appreciate the majority leader allowing the full 60 minutes after the prayer and pledge.

I ask, so there is no confusion on this side—this has been cleared with Senator BINGAMAN—the time on our side be allotted as follows: Senator LIEBERMAN, 4 minutes; Senator MCCAIN, 4 minutes; Senator CANTWELL, 3 minutes; Senator SCHUMER, 4 minutes; Senator JEFFORDS, 4 minutes; Senator COLLINS, 4 minutes; and the final 5 minutes, as pursuant to the intended order be Senator BINGAMAN.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. FRIST. Tomorrow morning there will be 1 hour of debate prior to a cloture vote on the energy conference report. I hope the Senate will be able to invoke cloture on this long overdue issue. It is important that the Senate invoke cloture to allow the Senate to have an up-or-down vote on the bill that will strengthen the Nation's energy security by establishing a national energy policy.

I would also announce that the conference committee on the Medicare reform legislation has finished its work. That conference report will be filed in the House. We hope to consider and complete that measure just as soon as possible.

In addition, we have the Appropriations Committee which is completing its work on the appropriations process. And we will shortly consider that conference report as well.

Having said that, we will have rollcall votes tomorrow. A number of people have asked about the weekend schedule, and we have been very clear over the last week and a half that we will be in session this weekend. But the specifics of the weekend schedule, hopefully, we will be able to announce sometime midday tomorrow.

ORDER FOR ADJOURNMENT

Mr. FRIST. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order, following the remarks of Senator GRASSLEY and Senator DODD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Iowa.

ENERGY POLICY ACT OF 2003

Mr. GRASSLEY. Mr. President, I am going to discuss the legislation before the Senate, the Energy bill. In order to secure our country's economic and national security, we need to have a balanced energy plan that protects the environment, supports the needs of our growing economy, and reduces our dependence on foreign sources of energy.

Balance has been my guiding light as I worked legislation through the Finance Committee, which I chair, for tax incentives for energy. I wanted to make sure we had a very balanced piece of legislation. By balanced, I mean balanced between fossil fuels, conservation, and renewable fuels.

We do have in the finance provisions of this Energy bill very balanced provisions for fossil fuels, for near-term energy needs, but we also legislate for the future as we have emphasis upon renewable fuels, wind energy, biomass, biodiesel, ethanol, and things of that nature. We have tax incentives for that.

Then we also have tax incentives for conservation. It is my belief that a well-balanced piece of energy legislation, with tax incentives for fossil fuels, for renewable fuels, and for conservation, is not only good for such policy, but I have come to the conclusion that is the sort of legislation we have to have to get the bipartisanship it takes to get a bill through the Senate.

Now, the other body, in writing similar legislation out of their finance committee—over there it is called the Ways and Means Committee—it seemed to me it was very tilted toward fossil fuels. It was my job, representing the Senate, to make sure from the conference with the House of Representatives we came out with a balance. I think we did come out with that balance.

I commend that balance to this body, to think about that as you vote on cloture tomorrow. Give us an opportunity to vote this bill up or down, and consider that my committee, in bringing this balance—for conservation, for renewable fuels, and for fossil fuels—tried to do what we could to get a majority vote in this body.

Now, of course, we need a supermajority vote, and that supermajority vote is to stop a Democrat filibuster against this bill. In a time like this, when the energy needs of our country are so great, and we are in a crisis situation, we should not tolerate a filibuster against this bill.

Every man, woman, and child in the United States is a stakeholder when it comes to developing a responsible, balanced, stable, and long-term energy policy.

The events of September 11 have made very clear to Americans how important it is to enhance our energy independence. We can no longer afford to allow our dangerous reliance on foreign sources of oil to continue.

But somehow we can wait; and we do wait. We should not wait, but we seem to wait in a way that causes that wait to make ''too good of an impact.'' It has been over 10 years since we passed energy legislation in this body. But if we wait until we get that perfect piece of legislation, we may be waiting forever. And by waiting forever, we will

suffer the consequences of less supply and higher prices.

I do not know about folks in all parts of the country, but I know I was brought up in the State of Iowa just to have dependence upon our sources of energy. When you go to the gas pump, you put the hose in your car, you move the lever, you expect to get gasoline. When you flip the light switch, you expect the lights to come on.

In order for that to happen, and for the price to be stable, just a small percentage at the margins of supply is necessary in order for us to have that stability and that certainty.

Some people in this country believe that one way to change American lifestyle is to force down the supply of energy. I happen to believe that Americans ought to have a massive amount of choice; that we do not need a bunch of bureaucrats or interest groups in Washington dictating to us that somehow, through an energy policy, by cutting back on the amounts of energy, they are going to bring about their ''perfect'' society.

This bill is obviously not perfect. And to those who complain about various provisions, I just remind them, if they drafted a ''perfect'' bill—and there probably would never be one—it would not pass the House or the Senate.

Some say the process has not been perfect. But if the process had been perfect for some, it would not have been perfect in the view of others. And that is fairly common in any legislating process.

While we are talking about process, I would like to clarify the role the Senate Finance Committee, which I chair, played in this bill. We have heard a lot about Republicans shutting Democrats out of the conference process. Well, that is not the way I operate as chairman. That is not the way my Democrat counterpart, Senator BAUCUS, operated when he was chairman of this committee when the Democrats were in the majority in the last Congress.

With respect to the tax provisions of the bill, the process was open. Senator BAUCUS attended conference committee meetings. Finance Committee Democratic staff worked side by side with my Republican staff in the conference negotiations.

I might add, they were a key asset for us in the protracted negotiations with the House Ways and Means Committee. Conferee staff on both sides of the aisle was informed as the process moved forward.

If it is ''perfection'' you are insisting upon, then you are in the wrong business. Legislating is neither a perfect process nor does it produce perfect products.

The Energy Security Act of 1992—the last one that Congress passed—was not perfect. That quickly became clear.

In 1995, after extensive interagency review and analysis, under provisions of section 232 of the Trade Expansion Act of 1962, the Clinton administration concluded that oil imports threatened our national security.

Such a finding, under this law, gave him the authority to impose quotas and import fees on oil. But he chose to do nothing because he believed that import adjustments would be too harmful to the economy.

Within 3 years of passing what was called an Energy Security Act, the fact is, our national security only worsened. When national security is not in good shape, it is probably because our economic security has worsened.

So what do we do? Do we do nothing? Do we wait for a perfect piece of legislation? Do we wait for market forces to save us? We heard earlier today criticism of this Energy bill because it fails, in so many words, to allow the free market to work its magic. The bill is not perfect, it has been argued, because it favors one energy source over another. You can go on and on and on. I would like to talk about that favoritism, and I would like to talk about the marketplace.

During the debate on the 1992 Energy Security Act, the chairman of the Energy Committee at that time, former Senator Bennett Johnston of Louisiana, stated that each barrel of imported oil was subsidized by the taxpayers to the tune of $200 per barrel. That is outrageous. Anybody listening to that says I had to misquote something.

But again, let me explain from this leading Senate expert on energy, as Senator Johnston was, he is telling us that imported oil is subsidized $200 for each and every barrel. Is that favoritism, when we subsidize imported oil at $200 a barrel? Are we picking winners and losers? What does that tell us about the so-called free market system? How can our domestic energy producers compete with that? It makes a mockery of the argument that we must sit idly by and let the marketplace control our energy policy.

How absurd can we be? On one hand, we subsidize imported oil, and we do that through the military expense it takes to protect the trail of oil from the Middle East to our shore or what we are doing in the Middle East now to preserve peace over there, cutting down on terrorism as part of that. But on the one hand we subsidize imported oil, and then we wonder why we become dangerously dependent upon that foreign oil. The Government, through a massive interagency review, declares that our national security is at risk because of imported oil but then declines to do anything about it because we might disrupt our domestic economy. So any way you look at it, we are in a box that we need not be in, if we can get this legislation passed.

The marketplace won't save us because we stacked the deck in favor of foreign oil. Again, I ask: What do we do in response to this imperfect world in which we find ourselves? Pass a bill that picks winners and losers? The answer is a definite yes. The winners we pick in this bill are all Americans, all of whom have a stake in reducing our dependence upon foreign sources of oil. We do this by favoring domestic producers over foreign producers. That is true of oil and natural gas, but it is also true of our supply of renewable fuels.

It is well past time that we get serious about implementing energy efficiency and conservation efforts, investing in alternative renewable fuels, and improving domestic production of traditional resources. I support a comprehensive energy policy consisting of conservation efforts on the one hand, the development of renewable and alternative energy sources on the other hand, and on the third hand, domestic production of traditional sources of energy.

As my colleagues well know, I have long been a supporter of alternative and renewable sources of energy as a way of protecting our environment, increasing our energy independence. That started with my work with former Senator Robert Dole on legislation for tax incentives for ethanol. It was my own work in 1992, developing the wind energy tax credit, that has increased our production of electricity by wind. My State of Iowa, for instance, is third of the 50 States in the production of wind energy, as an example. So obviously, you know I strongly support the production of renewable domestic fuels. I particularly emphasize, in addition to ethanol, biodiesel made from soybeans. As domestic renewable sources of energy, ethanol and biodiesel can increase fuel supplies, reduce our dependence upon foreign oil, and increase our national economic security.

For the first time we have a tax incentive in this legislation for production of virgin and recycled biodiesel. This is a new market for soybean farmers and yet another source of renewable energy. The renewable fuels standard, supported by a broad coalition, is good for America's farmers, obviously good for the environment, good for our consumers, good for creating jobs in our cities in the production of this fuel, and good for our national security, as we are less dependent upon foreign sources of oil.

A key reform in this Senate bill deals with the treatment of ethanol-blended fuels for highway trust fund purposes. Tax incentives for ethanol are unique in terms of their treatment in the Tax Code. Unlike incentives for other energy sources such as oil and gas, the revenue for ethanol incentives comes out of the highway trust fund because it simply is not paid into the trust fund in the first place. This bill makes it

clear that those incentives will be treated like all other energy incentives: The revenue will be made up to the highway fund from the general fund.

We didn't get all of the Senate reform in this conference agreement. A gesture to the House was that we would defer repealing the partial tax exemption these fuels get until the next highway bill, which is early next year. The same is true with respect to the transfer of the 2.5 cents fuel tax that ethanol-blended fuels do pay. That highway bill will be before us early next year. The current highway trust fund spending authority runs out on February 29 next. So we have to get it passed early.

My friend Senator BAUCUS has made this highway trust fund reform a priority of his. Together, he and I will ensure that the highway trust fund is made whole for the gap between now and February 29. I have the assurance of the leadership of both bodies that our deferral will not prejudice the highway community.

As chairman of the Senate Finance Committee, I worked closely with ranking member Senator BAUCUS to develop a tax title that strikes a good balance between conventional energy sources, alternative and renewable energy, and conservation. Among other things, it includes provisions for the development of renewable sources of energy such as wind and biomass, incentives for energy-efficient appliances in homes, and incentives as well for the production of nonconventional sources of traditional oil and gas.

This bill reflects the broad diversity of energy resources in the United States. There are new benefits for clean coal technology. Our colleagues from the Rocky Mountains and the Ohio Valley produce and use this abundant source for the generation of electricity.

Burning coal for electricity can lead to environmental problems. This bill goes a long way toward remedying the pollution problems associated with coal use. In the heartland, agriculture is a key part of our economy. Agricultural activities result in food that our people in the cities eat. There is also waste that results from farming. New technology has given us a twofer in the farm community. I am talking about equipment and processes that convert animal waste to energy. This technology needs a bit of a lift to get off the ground, so we have tax benefits to get these new technologies started.

Now we have heard some big city folks and big city papers ridicule some of the tax benefits for this new technology. I guess I would ask these folks from the big cities just a couple questions: Do you think it is wise to address these environmental problems? Do you think it is wise to ignore a new source of energy?

I believe the Senate Finance Committee did a good job in addressing our Nation's energy security in a balanced and comprehensive way. I believe the Congress has finally gotten to the point of addressing an issue with such a direct impact on our national economic security. For the sake of our children and grandchildren, we must implement conservation efforts, invest in alternative and renewable energy, and improve the development and production of domestic oil and natural gas resources. We must do it now. That is what this legislation does.

Before we get to an up-or-down vote on this legislation, we have to face the issue of a Democrat filibuster against this legislation, and that filibuster is going to keep us from voting, if we don't get 60 votes tomorrow. We have to have those Senators of both parties that represent primarily the grain-growing regions of the country, from Ohio west to Nebraska, and from Arkansas north to the Canadian border, stick together tomorrow on what we call the cloture vote, to get 60 votes. We are going to lose six Republicans from the Northeast. We have to pick up about 15 Democrats to get this job done. I expect that we can, because most of the bulwark of support of the last 20 years for renewable fuels—meaning ethanol, biodiesel but also including wind energy, geothermal, things such as that—have come from people within the Democrat Party, but particularly from what I call the upper Midwest of the United States, the grain-producing regions of the country. If we all stick together, I think we can produce these votes.

There is tremendous leadership from that part of the country. Senate Democratic Leader TOM DASCHLE, from South Dakota, has always been a leader in the production of renewable fuels, and particularly ethanol. He can claim a lot of credit for what we have done in that area over the past. I know he is not supporting cloture, but I also know, as Democrat leader, he has an opportunity to use a lot of muscle in his efforts as leader to produce the votes we need.

We cannot afford to lose votes on this issue if we are going to get the job done. I think there are a lot of other people who ought to be concerned about it. Senators on the other side of the aisle are concerned about conservation of energy, and rightly so. I pointed out how I felt, that we need a balanced bill between fossil fuel, renewables, and conservation.

There are a lot of conservation provisions in the tax provisions of my legislation that ought to get support from the other side. There has been some talk, particularly from the other side, that some people have tried to twist the arms of our colleagues to be against cloture, which means to keep the bill from coming to a final vote, arguing that we can refer this back to conference and get certain provisions taken out. That is not going to work under the Senate rules. This cannot be referred back to conference. Once it passed the other body, conference doesn't exist.

There has been some talk, when it comes to the important provisions I have talked about and have been a part of—I even complimented Senator DASCHLE for being a proponent of these for a long period of time—what we call the renewable portions of it, or this part of our legislation that makes up for the road fund. The money lost to the road fund can be made up from the general fund. That is all in this bill.

We have tax incentives for ethanol until the year 2010. We have an ethanol-like tax incentive for biodiesel. We have the renewable fuels standard, which mandates 5 billion gallons of ethanol to be used every year, phased in over a few years. That is 20 percent of our corn crop. Just think how that will benefit agriculture, cut down on taxpayers' subsidies to farmers over the long haul, and clean up the environment at the same time.

But all of these provisions are in this bill. It was not something that was easy for me to get through conference. If it had not been for the intervention of the Vice President in offering a compromise that the House of Representatives did not want to accept, we would not have such a perfect piece of legislation for renewable fuels in this bill.

As I started to say, there has been talk on the other side that somehow we can get this all done in a conference on transportation next year when the highway bill comes up. Well, all you have to do is sit in conference with members of the Ways and Means Committee and find out how they love fossil fuels. God only made so much fossil fuel; it is a finite quantity. But on the other side of this Capitol Building, the idea is there is no end to it. You don't need to worry about renewable fuels.

So they come to conference with heavy emphasis upon fossil fuels, not wanting to give tax credits to biodiesel, and to wind and ethanol, and they don't like the renewable fuels standard mandate of 5 billion gallons. Some people are being told it is just a simple process of getting this done next February, so you can vote against cloture and kill this bill.

If you knew how hard it is to negotiate this, this is the last train to leave town. If you want good provisions for biodiesel, good provisions for ethanol, good tax incentives for conservation, that is the wave of the future for energy. But if this bill is filibustered to death, don't count on me bringing back ideal provisions on renewables. I cannot guarantee that. Nobody else can guarantee it. We don't know what next January and February is going to be like.

When we have a bird in the hand, it is worth two in the bush. I hope my colleagues, particularly the Democrats who are filibustering this, and particularly anybody from the grain-producing parts of the United States, where they benefit from renewable fuels, will work hard to produce the votes and help us to get the 60 votes so we can pass this bill in an overwhelming way.

Don't tell me you are for ethanol, don't tell me you are for biodiesel, don't tell me you are for putting general fund money into the road fund to make up for lost revenue from ethanol—and this bill does that.

Don't tell me those things if you are not going to help us fight hard to get the 60 votes necessary to break the filibuster.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I know the hour is late, and I appreciate the indulgence of the staff on the floor of the Senate. It has been a long day for them in the Senate to listen to a lot of speeches predominantly about the Energy bill, although I gather there has been some discussion about the Medicare prescription drug bill as well. I apologize to those who have been around here a long time today to have to listen to yet one more Member of this institution express his views on the matter we will be voting on tomorrow morning at around 10:30 a.m.—and that is the Energy bill.

I listened with great interest to my good friend from Iowa, with whom I have served now in the institutions of the Senate and the House of Representatives for about 30 years. We have been through a lot of battles, both together and on opposite sides. I always find his remarks compelling, interesting, and admire him immensely. He has been a very effective Member of this body for a long time. I appreciate his work.

He has been through a lot in the last couple of years. He is chairman of the Finance Committee, and he has an awful lot of matters with which to deal. I appreciate his service. I regret on the matter before us we have a different point of view on the Energy bill. I care deeply about the subject matter. I know my colleague from Iowa does. Certainly, he raises some very significant issues as they pertain to renewable energy resources. Were this a bill about just that question, he would have my unyielding support.

Unfortunately, there is more to this bill—it is more than 1,100 pages. My Governor—a Republican Governor—of the State of Connecticut and most of the membership of the State legislature have taken a different view because of the adverse impacts on my State, just as it has positive impacts on the State of Iowa and the grain-producing States. That is a major reason many of our colleagues, both Democrats and Republicans, are opposed to the bill.

They must understand, for those of us who come from other parts of the country, we have to evaluate a bill such as this and take a look at what it does to our economy, our environment, our energy needs, as well as the health of our people. For those reasons, on a bipartisan basis in my State, there have been strong expressions of opposition to this bill. I wish to take a few minutes to outline those reasons.

Tomorrow morning at 10:30 o'clock, there will be bipartisan opposition to invoking cloture. This is not a question where, on many issues, Democrats and Republicans line up very neatly on one side of the aisle or the other. There will be Democrats who will oppose cloture; there will be Democrats who will support cloture; there will be Republicans who oppose cloture; there will be Republicans who support cloture. This is a matter of people looking at legislation that evolved in the conference committee.

My respect for the Senator from New Mexico, Mr. PETE DOMENICI, as he knows, is tremendous. I have great regard for him. I admire his leadership in the Senate. I have enjoyed working with him on numerous occasions. He has been a very fine Senator for many years. I know he put a lot of work into this bill. If I were to vote on this measure exclusively on the basis of friendship, I would be a strong supporter of this bill because I happen to like PETE DOMENICI a great deal. But I cannot, in all good conscience, vote for something that does such damage to my State, to my region, to my country.

This legislation would have been better crafted at the end of the 19th century and the beginning of the 20th century than the beginning of the 21st century. This is a 20th century Energy bill, not a 21st century Energy bill. It is important, with the few hours remaining between tonight and tomorrow morning, to know what this bill may do to the country and the people of this country might express to their elected representatives their strong feelings about what is in this bill.

Like any other legislation in my 24 years here, there are good pieces to this. I am not going to stand here and suggest everything in this bill is wrong. It is not. The Senator from Iowa has already mentioned the idea of using some of our natural resources to provide a renewable source of energy.

As a Senator from Connecticut, I tried to be very sympathetic and supportive of those kinds of issues. If this bill were exclusively about that, I would not have any real difficulties with it. But no Member ought to vote for a bill such as this for the simple reason that one provision of this bill is good for their State. You must take into consideration all the damage that can be done to the very people of that State if we adopt the measures included in this bill.

This is not, as I say, a 21st century energy policy. Let me quote the Orlando Sentinel of November 18. This is not a Connecticut newspaper, it is a Florida newspaper. Listen to what they say:

> Start Over: The Energy bill before Congress is worse than what exists.

They continue:

> Two-thirds of the tax breaks would go to the oil, natural-gas and coal industries, helping to perpetuate the country's dependence on fossil fuels. Less than a quarter of the breaks would promote the use and development of renewable energy sources, and less than a tenth would reward energy efficiency or conservation.

Tonight there are literally thousands of young Americans who are stationed in a place called Iraq. I don't believe they are there exclusively, as some do, because of the oil issue, because of the dependency that this Nation and the Western alliance has on the Middle East for its energy supplies. I also don't think it is not a reason. It is certainly part of the reason. I know there are others who believe it is the whole reason. I don't subscribe to that. If I did, I would never have supported the authorization of use of force by the President to go into Iraq, for which I voted. I believe it is part of the reason. I believe we are over there trying to protect the economic and energy interests of the United States in part because of our dependency on that part of the world.

Why at a moment such as this, when our country is at such risk, particularly over its future economic policy, would we pass an Energy bill such as this? Now more than ever, this bill ought to be doing everything in its power to support energy resources that are truly renewable, such as the Senator from Iowa suggested, balanced with other resources that have been supported by other Members of this Chamber. And it certainly should do more on conservation and efficiency.

As the Orlando Sentinel pointed out, as I mentioned a moment ago, less than a tenth of this bill would reward energy efficiency or conservation—less than one-tenth of this bill. Here we are in 2003, with all of the problems we face in the Middle East and elsewhere, and one-tenth of this bill is dedicated to energy conservation and efficiencies, and only a quarter of the tax breaks would be to promote the use and development of renewable energy sources. On that basis alone, this bill ought to be reconsidered before we go forward.

The Governor of my State, John Rowland, has served as the president of the Republican Governors Association during his tenure as Governor. John Rowland and I have significant differences on a lot of issues. But on this issue, he has written to all members of

our delegation in response to what is in this bill. I want to read into the RECORD some of the comments of the Republican Governor of Connecticut, shared, I might add, by many Governors all across this country.

This is a bipartisan notion of caution about what we are about to do. He mentions five or six reasons why this bill ought to be reconsidered. I ask unanimous consent that the full text of this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATE OF CONNECTICUT,
EXECUTIVE CHAMBERS,
Hartford, CT, November 18, 2003.

Hon. CHRISTOPHER J. DODD,
U.S. Senate, Russell Senate Office Building, Washington, DC.

Hon. JOSEPH I. LIEBERMAN,
U.S. Senate, Hart Office Building, Washington, DC.

GENTLEMEN: Yesterday, the House and Senate energy conferees approved of a multibillion dollar omnibus energy bill. The energy bill passed the House just moments ago and, as such, the Senate may hold a vote on the bill as early as tomorrow.

While this office is presently engaged in reviewing the finer details of this legislation, a couple of noteworthy items have already come to light that are especially disconcerting.

First, this bill undermines the delicate balance of federal and state rights. It gives unprecedented authority and standards of review exclusively to the federal appeals court in the District of Columbia to review actions required for the construction of a natural gas pipeline. State environmental and siting laws would essentially be reduced to a process of rubber stamping Federal Energy Regulatory Commission (''FERC'') certificates of public convenience and necessity. In addition, any delay, however well founded it may be, such as considering ways to protect the state's natural resources, may be grounds for an appeal and federal override of a state's ruling. State courts would be stripped of jurisdiction over matters arising in the state that not only affect the state, but also relate to the interpretation of state statutes and regulations.

Second, this proposed legislation would codify a Department of Energy Order that resulted in the operation of the Cross Sound Cable that runs from New Haven to Brookhaven. You may recall that the Cross Sound Cable was not operational before the August 14, 2003, blackout because the cable failed to meet federal and state permitting requirements concerning its depth. Section 1441 of the bill states that ''Department of Energy Order No. 202–03–2, issued by the Secretary of Energy on August 28, 2003, shall remain in effect unless rescinded by Federal statute.'' This sets a bad precedent.

Third, the bill generally limits the time frame for development of Coastal Zone Management consistency appeal records, constraining the states and the Secretary of Commerce in making informed decisions. In the same vein, this legislation limits the record on consistency appeals addressing pipelines to the record developed by the FERC. Historically, FERC's record has been inadequate to evaluate and protect the state's natural resources. The legislation deprives Connecticut and other coastal states of the tools they need to manage their coastal resources.

Fourth, this legislation authorizes the postponement of ozone attainment standards across the country when the problems are shown to have originated outside the state. This not only hinders Connecticut's progress toward improving air quality, but also likely has significant health ramifications for Connecticut's residents. Contrary to general practice, this language was added behind closed doors, without meaningful opportunity for public debate.

Fifth, the bill contains language that would preempt a state's siting process in areas of interstate congestion, if the FERC were to find that the state delayed or denied a project. State siting authorities may very well be justified, however, in delaying approval or imposing condition for reasons such as public safety or environmental protection. It may also be that the more complex the project, the more time that may be needed to review its complexities. In addition, the applicant may need an extension of time in which to compile additional information for submittal to the siting authority or to negotiate with adverse parties. The existing language fails to take these reasons into account.

Finally, the proposed legislation provides immunity, retroactive to September 5, 2003, to MTBE producers from defective product liability arising from groundwater contamination by MTBE. It also provides $2 billion in transition assistance to producers, in preparation for an MTBE ban effective in 2014. It is precisely because of groundwater contamination caused by MTBE that Connecticut has banned its use as a gasoline additive effective January 1, 2004. MTBE has been proven to be especially harmful; we likely do not yet know how much damage it has done and perhaps will do. It may be premature at this time to provide such immunity.

While improvements are clearly needed to spur investment in energy-related projects to enhance reliability in the power grid, I would urge you to reject this proposed legislation and return it to the House and Senate energy conferees for further deliberation. I would be happy to assist Congress in any way possible to further address these items of particular concern. Thank you for your consideration.

Sincerely,

JOHN G. ROWLAND,
Governor.

Mr. DODD. I also ask unanimous consent that a letter from the attorney general of the State of Connecticut expressing other reasons to oppose this legislation also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATE OF CONNECTICUT,
Hartford, CT, November 18, 2003.

Hon. CHRISTOPHER J. DODD,
U.S. Senator, Russell Senate Office Bldg., Washington, DC.

DEAR SENATOR DODD: Yesterday I wrote to you about some pressing concerns about outrageous provisions of the Administration's Energy Bill, and urged you to filibuster it. I write again today to inform you of another assault on well-accepted state powers to protect our citizens—a provision buried in this Bill, discovered during my review.

This provision, Subtitle D, new Section 1442, gives the Federal Energy Regulatory Commission dictatorial power to preempt and override all other federal agencies and all state laws and officials in approving natural gas pipelines. It would have the clear effect of forcing approval of construction of the disastrous Islander East gas pipeline project through the middle of the pristine Thimble Islands area of Long Island Sound.

The Islander East pipeline is, as I have said, the worst case in the worst possible place—an absolute environmental disaster. Every state and federal regulatory agency responsible for reviewing this proposal—the Connecticut Department of Environmental Protection (DEP), the United States Environmental Protection Agency (EPA), and the National Marine Fisheries Service—has found that this project will cause pervasive, enduring harm to the marine environment in this uniquely valuable part of the Sound. Even the Federal Energy Regulatory Commission's (FERC) own staff concluded that there was a clearly environmentally preferable alternative route, if any pipeline should be built across the Sound.

While FERC ignored the facts and voted to approve the proposal anyway, the facts arrayed against this proposal are so compelling that we are strongly positioned to stop it in court, because it is insupportable environmentally. Section 1442 is plainly intended to strangle our challenge to this project in court, no doubt because we were likely to succeed. Section 1442 drastically changes current law by providing that the courts must accept FERC's determination, although every other state and federal agency disapproves of the project.

The breathtaking sweep and far reaching ramifications of Section 1442 would extend well beyond Connecticut. This provision completely and permanently dismembers a carefully crafted system of state and federal checks and balances for all major gas pipeline projects. Under existing law, pipelines require not only the approval of FERC, but state approval for water quality issues, and for effects on the coastal zone environment. State disapprovals on these important environmental grounds are now generally sufficient to bar the proposals. Under this amendment, FERC approval of a project would effectively eliminate all state environmental oversight. One of the other projects that will apparently be rushed to final construction under this bill is the Millenium Pipeline project in Westchester County, New York, which is proposed to run through various minority neighborhoods and under a section of the Hudson River. Senators SCHUMER and CLINTON, among many other New York state officials, have expressed grave concerns about the millenium proposal.

This Bill contains many inexcusable giveaways to the energy industry. Even among those giveaways, this one is especially abhorrent, since it grants one federal agency supreme dictatorial power to preempt enforcement of environmental and consumer protection by all other state and federal authorities. It would cause wanton lasting destruction of Long Island Sound. If this Bill is passed, our environment will suffer severe permanent damage, which is absolutely and indisputably unnecessary to any legitimate public interest. Once again, I urge to take a stand against this injustice.

Very truly yours,

RICHARD BLUMENTHAL.

Mr. DODD. I will not get into the introduction of the letter and so forth, but I will quote from the Governor of a New England State. First, the Governor says the bill undermines the delicate balance of Federal and States

rights. Under this legislation, this bill gives unprecedented authority and standards of review exclusively to the Federal appeals court in the District of Columbia to review actions required for the construction of a natural gas pipeline. State environmental and siting laws would essentially be reduced to a process of rubberstamping the Federal Energy Regulatory Commission certificates of public convenience and necessity.

The letter goes on:

In addition, any delay, however well founded it may be, such as considering ways to protect the State's natural resources, may be grounds for an appeal and Federal override of a State's ruling. State courts would be stripped of jurisdiction over matters arising in the State that not only affect the State, but also relate to the interpretation of State statutes and regulations.

Now, I have historically opposed a State's right to veto important national efforts, and I include energy as one of them. So I know there have been efforts in the past to say States ought to be able to veto matters that come before them affecting energy policy, but as strongly as I have felt that States ought not to have exclusive veto power, I do not think the Federal Government ought to also have veto power when it comes to States needs and necessities.

I do not care where one lives in America, but they should pay attention to this provision. This is an incredible overreaching by the Federal Government. To come in and strip a State's ability to protect its own citizens when it comes to natural resources and the energy needs they may have, or a variety of other issues, and to shove those matters up to an appeals court in the District of Columbia, whether one is from Georgia, Connecticut, or anywhere else, I think would be highly offensive to most people in this country.

That is not to say we have it all right. We do not. Lord knows our States can make very parochial decisions, particularly when it comes to energy policy, but the idea that the Federal Government could go into any State in this country, regardless of our needs, our concerns, our well-being, and say, I am sorry, you lose, you have no rights at all in these matters. My Governor is right on that issue alone. This bill ought to be sent back to the conference.

We are about to adopt something that overreaches beyond what I think most of my colleagues would support in any other area of law, and yet they are going to do it here. If a precedent is set here, it will happen in other areas as well?

My Governor goes on to explain that there are other reasons:

The bill generally limits the time frame for development of Coastal Zone Management consistency appeal records, constraining the States and the Secretary of Commerce in making informed decisions. In the same vein, this legislation limits the record on consistency appeals addressing pipelines to the record developed by the FERC. Historically, FERC's record has been inadequate to evaluate and protect the State's natural resources. The legislation deprives Connecticut and other coastal States of the tools they need to manage their coastal resources.

I mention this because the Presiding Officer—we share a lot of things in common, not the least of which we share is having an Atlantic coastline. All of the States on the eastern seaboard, the gulf, the west coast, if they care about coastal zone management—and I know how important that is all along the Atlantic coast—and wanting a say in determining how those very delicate and fragile resources will be managed, this bill makes it more difficult for our States to continue in that vein.

Reading from the letter:

The legislation authorizes the postponement of ozone attainment standards across the country when the problems are shown to have originated outside of the State. This not only hinders Connecticut's progress towards improving our air quality, but also likely has significant health ramifications for Connecticut's residents. Contrary to general practice, this language was added behind closed doors, without meaningful opportunity for public debate.

It would be one thing if this bill were just about energy policy. To be able to now postpone the ozone attainment requirements written in law, there are literally hundreds of thousands of people in this country who suffer from significant ailments affecting their respiratory functions. I know of what I speak. I have family members who suffer from asthma. To roll back the provisions of the ozone attainment standards in States such as mine and elsewhere is a major health setback for people.

I suspect that various health organizations around the country will have strong feelings about this. If no other provision to this bill moves one to reconsider whether or not we ought to be moving forward, the idea that we could do such great damage to the health of American citizens is enough. We know what causes these problems—and in my State of Connecticut we suffer because of the prevailing southwesterly winds for most of the year. So we get a lot of the poor air quality coming out of other States. So we have to live with the pollution that exists elsewhere. We are trying to stop that on a national level. This legislation will make it very difficult for that to happen in the future.

My Governor goes on and says:

The bill contains language that would permit a State's siting process in areas of interstate congestion, if the FERC were to find that the State delayed or denied a project. State siting authorities may very well be justified, however, in delaying approval or imposing condition for reasons such as public safety or environmental protection. It may also be that the more complex the project, the more time that may be needed to review its complexities. In addition, the applicant may need an extension of time in which to compile additional information for submittal to the siting authority or to negotiate with adverse parties. The existing language [in this bill] fails to take those reasons into account.

Again, this goes right back to the first point I made earlier, where one can come in and basically shove these matters up to the Federal appeals court in Washington. Again, I am not suggesting that States ought to have outright veto power. But the idea that this legislation would say, as categorically as it does, that the FERC could come in if they find that a State denied a project or delayed a project to gather more information, and just roll right over you.

Listen to this. The Governor goes on to say:

The proposed legislation provides immunity, retroactive to September 5, 2003, to the MTBE producers from defective product liability arising from groundwater contamination of MTBE. It also provides $2 billion in transition assistance to producers, in preparation for an MTBE ban effective in 2014. It is precisely because of groundwater contamination caused by MTBE that Connecticut has banned its use as a gasoline additive effective January 1, 2004. MTBE has been proven to be especially harmful; we likely do not yet know how much damage it has done or perhaps will do [to people]. It may be premature at this time to provide such immunity.

There is a growing body of evidence that this gasoline additive could have caused great damage to people and now we are going to reach back to September 5 of this year and provide immunity to the producers of this product to the great detriment of maybe millions of people in this country. What is that doing in this bill? We talk about tort reform, and here we are providing immunity.

The idea in this bill that we would provide immunity from recovery for people who get sick and suffer as a result of being exposed to MTBE, I think is outrageous.

I am confident my colleague from New York, Senator SCHUMER, has spoken eloquently on this subject matter. I heard him address the matter the other day in a closed meeting of Senators, and I was moved by the evidence that he provided to us. I am confident he has or will lay it out again here. So I will not dwell on it.

It's bad enough we provide immunity, but now we are going to provide MTBE producers with $2 billion in assistance, in preparation for a ban effective 11 years from now.

Lastly, I mention a rather parochial matter and I don't want to make my opposition to this bill based on parochial issues. But my constituents are very concerned about a provision in this bill that was written into the bill

in conference—never in the House bill, never in the Senate bill—and really tramples all over States rights. It would codify a Department of Energy order that resulted in the operation of the Cross Long Island Sound Cable that runs from New Haven, CT to Brookhaven.

This Cross Sound Cable was not operational before the August 14 blackout because the cable failed to meet the Federal and State permitting requirements concerning its depth. Section 1441 of the bill states:

The Department of Energy order No. 202–03–2, issued by the Secretary of Energy on August 28, shall remain in effect unless rescinded by Federal statute.

You may say, ''I am sorry that has happened to your State, Senator,'' but it could be yours next.

We didn't argue during the blackout about allowing that cable to be used, but its continued operation violates state and federal permitting requirements. But that emergency is over. Yet, written into statutory law, now it says, whether we like it or not, this temporary order is now permanent and it will require a Federal statute to overturn it. Not even FERC can overturn it. I have to pass a bill in the Senate to overturn it.

I grant you it is a local issue, but you ought to be worried about it. That is what happens around here: The precedent gets set.

These are several of the reasons why I believe this bill deserves to be sent back.

It is November. We have another session of Congress coming up. Why can't we go back and do some work on this? I have to believe that most Members think that this bill is just too tilted in one direction. It is not in the best interest of our country to be adopting this type of energy policy.

As I mentioned earlier, knowing how important it is for our economy, for our energy self-sufficiency, for our environment, and for health reasons, this legislation deserves reconsideration. It is not balanced.

So I hope when the hour arrives tomorrow morning, our colleagues respond. This is the kind of bill we will spend a good part of the next decade undoing. When people discover what is really in this bill, they will want to make changes. I think a wiser course of action would be to go back and correct the legislation now and have a bill that would enjoy broad bipartisan support. Instead, there will be broad bipartisan opposition to invoking cloture tomorrow.

These new provisions giving extraordinary power to the Federal Energy Regulatory Commission are really stunning in their scope and breadth. I am rather amazed that there has not been more outspoken opposition to this, in more predictable quarters, when States rights are involved.

I mentioned earlier the issue of health. I pointed out that dirty air from outside our State impacts our air quality. It is a major cause of asthma and may play a role in the development of that disease.

An estimated 86,000 of Connecticut children have asthma that's 10.4 percent of the children in my state. And 7.3 percent of the adult population, approximately 180,000, have it as well. I represent a small State, about 3.5 million people. These are significant numbers.

The fact that this bill rolls back the provisions on air quality is going to mean that people in Connecticut are going to suffer. If for no other reason, this bill ought to be sent back.

We are going to debate Medicare in a few days and talk about how to keep down costs. Asthma doesn't go away. In fact, there is nothing worse than an adult onset of asthma. I know because my wife has it and she didn't have it as a kid. It is crippling. Anybody who has it or has a family member with it knows what I am talking about.

There is time left to do this bill right. I hope this institution would take a moment to do so.

I yield the floor.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

The PRESIDING OFFICER. The Senate stands in adjournment until 9:30 a.m. tomorrow.

Whereupon, the Senate, at 9:38 p.m., adjourned until Friday, November 21, 2003, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 20, 2003:

DEPARTMENT OF STATE

STUART W. HOLLIDAY, OF TEXAS, TO BE AN ALTERNATE REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE SESSIONS OF THE GENERAL ASSEMBLY OF THE UNITED NATIONS DURING HIS TENURE OF SERVICE AS ALTERNATE REPRESENTATIVE OF THE UNITED STATES OF AMERICA FOR SPECIAL POLITICAL AFFAIRS IN THE UNITED NATIONS.

DEPARTMENT OF EDUCATION

JONATHAN BARON, OF MARYLAND, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF THREE YEARS. (NEW POSITION)

ELIZABETH ANN BRYAN, OF TEXAS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF FOUR YEARS. (NEW POSITION)

JAMES R. DAVIS, OF MISSISSIPPI, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF TWO YEARS. (NEW POSITION)

ROBERT C. GRANGER, OF NEW JERSEY, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF FOUR YEARS. (NEW POSITION)

FRANK PHILIP HANDY, OF FLORIDA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF THREE YEARS. (NEW POSITION)

ERIC ALAN HANUSHEK, OF CALIFORNIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF TWO YEARS. (NEW POSITION)

CAROLINE M. HOXBY, OF MASSACHUSETTS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF FOUR YEARS. (NEW POSITION)

GERALD LEE, OF PENNSYLVANIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF FOUR YEARS. (NEW POSITION)

ROBERTO IBARRA LOPEZ, OF TEXAS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF TWO YEARS. (NEW POSITION)

RICHARD JAMES MILGRAM, OF NEW MEXICO, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF THREE YEARS. (NEW POSITION)

SALLY EPSTEIN SHAYWITZ, OF CONNECTICUT, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF THREE YEARS. (NEW POSITION)

JOSEPH K. TORGESEN, OF FLORIDA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF FOUR YEARS. (NEW POSITION)

HERBERT JOHN WALBERG, OF ILLINOIS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE NATIONAL BOARD FOR EDUCATION SCIENCES FOR A TERM OF THREE YEARS. (NEW POSITION)

NATIONAL LABOR RELATIONS BOARD

RONALD E. MEISBURG, OF VIRGINIA, TO BE A MEMBER OF THE NATIONAL LABOR RELATIONS BOARD FOR THE TERM OF FIVE YEARS EXPIRING AUGUST 27, 2008, VICE RENE ACOSTA, RESIGNED.

IN THE AIR FORCE

THE FOLLOWING AIR NATIONAL GUARD OF THE UNITED STATES OFFICERS FOR APPOINTMENT IN THE RESERVE OF THE AIR FORCE TO THE GRADES INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be major general

BRIGADIER GENERAL ROGER P LEMPKE
BRIGADIER GENERAL ALBERT P RICHARDS JR.
BRIGADIER GENERAL ALBERT H WILKENING

To be brigadier general

COLONEL TERRY L BUTLER
COLONEL JOHN A CAPUTO
COLONEL RICHARD H CLEVENGER
COLONEL MICHAEL D DUBIE
COLONEL JERALD L ENGELMAN
COLONEL WILLIAM H ETTER
COLONEL EDWARD R FLORA
COLONEL RUFUS L FORREST JR.
COLONEL RICHARD M GREEN
COLONEL TERRY P HEGGEMEIER
COLONEL ROBERT A KNAUFF
COLONEL VERGEL L LATTIMORE
COLONEL DUANE J LODRIGE
COLONEL MARIA A MORGAN
COLONEL JAMES K ROBINSON
COLONEL MICHAEL J SHIRA
COLONEL JAMES P TOSCANO
COLONEL JAMES T WILLIAMS

THE FOLLOWING AIR NATIONAL GUARD OF THE UNITED STATES OFFICER FOR APPOINTMENT IN THE RESERVE OF THE AIR FORCE TO THE GRADE INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be brigadier general

COL. JAMES E. HEARON

IN THE ARMY

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT IN THE RESERVE OF THE ARMY TO THE GRADES INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be major general

BRIG. GEN. GREGORY J. HUNT

To be brigadier general

COL. JOSE M. VALLEJO

THE FOLLOWING NAMED ARMY NATIONAL GUARD OF THE UNITED STATES OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE RESERVE OF THE ARMY UNDER TITLE 10, U.S.C., SECTIONS 12203 AND 12211:

To be colonel

JOHN R. ANGELLOZ JR.
MICHAEL C. MCDANIEL

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES ARMY AND FOR REGULAR APPOINTMENT UNDER TITLE 10, U.S.C., SECTIONS 624 AND 531:

To be major

JAMES R. WARD

IN THE NAVY

HOUSE OF REPRESENTATIVES—*Thursday, November 20, 2003*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. BASS).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
November 20, 2003.

I hereby appoint the Honorable CHARLES F. BASS to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Reverend Monsignor Barry Knestout, Archdiocese of Washington, D.C., offered the following prayer:

Lord God, we bless You and praise You for Your generous gifts of life and love. Lead us to love one another in humility.

O Lord our God, we beseech You and ask for the gifts we need. Help this Congress in its deliberations and decisions. Renew us in the spirit of cooperation. Show us the course we are to take.

Let Your Spirit guide and strengthen us to always perform what is for the true and lasting good of this great Nation. Help us to find ways, in word and deed, to defend the innocent, to deliver the oppressed, to pity the insignificant, and show generosity to the needy. Help us this day and each day to keep Your commands and to ever rejoice in Your glorious and life-giving presence. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Oregon (Mr. DEFAZIO) come forward and lead the House in the Pledge of Allegiance.

Mr. DEFAZIO led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 313. Concurrent resolution to urge the President, on behalf of the United States, to present the Presidential Medal of Freedom to His Holiness, Pope John Paul II, in recognition of his significant, enduring, and historic contributions to the causes of freedom, human dignity, and peace and to commemorate the Silver Jubilee of His Holiness' inauguration of his ministry as Bishop of Rome and Supreme Pastor of the Catholic Church.

The message also announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 1895. An act to temporarily extend the programs under the Small Business Act and the Small Business Investment Act of 1958 through March 15, 2004, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain 10 one-minutes from each side.

IN SUPPORT OF MEDICARE REFORM BILL

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I learned in the real estate business, you never leave the negotiations for fear they may fail and you do not get your commission. Today, I understand the Democrats are planning a walkout from this floor to protest Medicare legislation. Yesterday, uniquely, the Democrats were burning their AARP cards down the street. The only thing missing from that scene was Jane Fonda.

Mr. Speaker, the seniors of our country deserve a Medicare program that is updated for the 21st century, including prescription drugs. It is an opportunity to help our seniors with new technology, diagnostic tests for osteoporosis, cardiovascular disease, diabetes. But no. If the Democrats do not get their way, they take the highway. That is discouraging for American seniors. And for them to ridicule and criticize AARP that just last week was the gold standard for senior lobbying organizations is somewhat a tremendous stain on the Democratic Party. Where are the leaders like Claude Pepper and Franklin Roosevelt?

I urge them to come to the floor today and work on Medicare legislation. Let us pass a bill for all seniors.

A RUBE GOLDBERG MEDICARE REFORM BILL

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DEFAZIO. Mr. Speaker, the gentleman before me waxed eloquent about a $400 billion Rube Goldberg complete with subsidies for the pharmaceutical industry, the insurance industry and price fixing. It is going to guarantee that there will be no reduction in the extortionate price of prescription drugs. Americans will still continue to pay the highest prices in the developed world despite the fact that the drugs are manufactured here by American companies who often receive the benefit of taxpayer-funded research.

We could provide a much more meaningful benefit for substantially less and that would be if we did two simple things: Negotiate lower prices like every other nation in the world has done, but this bill prohibits the government from negotiating lower prices on behalf of Americans or Medicare beneficiaries. And, secondly, we could just engage in free trade, allow the reimportation of U.S.-manufactured, FDA-approved drugs. That would substantially lower the price. Many American seniors have already resorted to that, but this bill will prohibit the reimportation of drugs but instead it will engage in subsidizing private insurance, subsidizing the pharmaceutical industry, price fixing and protectionism. They are violating every principle they say they believe in.

IN SUPPORT OF MEDICARE PRESCRIPTION DRUG BILL

(Ms. DUNN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DUNN. Mr. Speaker, later this week we will have an opportunity to keep our promises to seniors. For too long our parents and our grandparents have been paying too much for prescription drugs. This problem is much more acute for low-income seniors, especially women. Women represent more than half the seniors with incomes that are less than 135 percent of

the poverty level. They live longer than men, they spend more on health care, and they are more likely to suffer from chronic medical conditions. In essence, women need more drugs for a longer period of time but are least likely to be able to afford them.

This prescription drug bill will help those on fixed incomes. A woman with an income of less than $13,000 today will receive full assistance. No premiums, no deductibles, no gap in coverage. Furthermore, disease management programs will help women who are suffering from multiple chronic diseases. It will help them receive better care from health professionals who can coordinate their medical needs.

Mr. Speaker, it is time to end the rhetoric and deliver on a promise.

CONGRESS PUNTS ON PRESCRIPTION DRUG BILL

(Mr. EMANUEL asked and was given permission to address the House for 1 minute.)

Mr. EMANUEL. Mr. Speaker, as we address the issue of prescription drugs and as speaker after speaker is speaking about prescription drugs, there are three attempts to deal with out-of-control prices of prescription drugs that are going up on average 20 percent a year:

One is through the free market principle of reimportation, allowing Americans to buy drugs in either Europe or Canada. Second, bulk negotiation, creating a Sam's Club using the power of 40 million seniors to purchase drugs at reduced prices like they do in Europe and in Canada. And, third, through speedy introduction of generic medications to market to bring competition to price.

In all three areas, the pharmaceutical industry got what they want, and this Congress punted on getting the price reduction as it relates to pharmaceutical prices. We need to offer the taxpayers who are about to be asked to spend $400 billion of their money, $400 billion of taxpayer money, we owe them the common decency and courtesy to get them the best price, either through the free market principle, through creating negotiation bulk prices to get prices reduced, or generics. In each area, this Congress punted on behalf of the pharmaceutical industry.

PEER-TO-PEER SOFTWARE IS A REAL DANGER TO OUR KIDS

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, the British newspaper The Guardian has found that demand for child pornography through the use of file-sharing programs, like Kazaa, is leading to more abuse of children. The sale of peer-to-peer traffic in illegal images of children now dwarfs any other pedophile network they have found.

David Wilson, professor of criminology at Central England, said, ''Peer-to-peer facilitates the most extreme, aggressive and reprehensible types of behavior that the Internet will allow.'' Programs that are used by kids to find songs or pictures of cartoons are delivering our children right into the clutches of these predators.

And what are we doing about it? Nothing. Every day innocent kids are victimized on peer-to-peer file-trading software and our inaction allows them to walk right into the trap set by sexual predators. The time to act has come.

I urge my colleagues to cosponsor my bill, H.R. 2885, so that we can move forward in protecting our kids online.

AWARDING CONGRESSIONAL GOLD MEDAL TO PRESIDENT JOSE MARIA AZNAR

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, I rise today to again encourage my colleagues to cosponsor H.R. 2131, a resolution that will bestow President of the Government of Spain, Jose Maria Aznar, with the Congressional Gold Medal.

Shortly after the September 11 attacks on the United States, President Aznar made the following comment: ''Our battle is a battle for the same ideas, for the same freedoms, for the same society and civilizations, and we will share all those efforts as long as it is necessary.''

President Aznar of Spain has stood by the United States and, despite heavy political pressure, has never wavered from his staunch commitment to the ideals of freedom, liberty and democracy.

I urge my fellow Members to join me and over 100 cosponsors of H.R. 2131, a bill to award the Congressional Gold Medal to President Aznar. Join us in honoring a man who is a great leader in global democracy, a great leader in the war on terrorism, a notable ally of the United States, and a champion of freedom.

IN OPPOSITION TO LATEST NEW GOVERNMENT ENTITLEMENT

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, earlier this week I came to the House floor to announce my opposition to the largest new entitlement since 1965, the Medicare prescription drug bill that we will consider this week. As my voice has weakened, strong voices in opposition have emerged, including the venerable Heritage Foundation which has been a beacon of limited government for over three decades. And today, the editorial page of the Wall Street Journal in a piece entitled ''Entitlements Are Forever'' makes a powerful case that Congress should reconsider before we create this massive new government entitlement. The Wall Street Journal says the GOP's Medicare bill trades certain spending for speculative reform. The bottom line is that the bill would add a universal drug entitlement to a largely unreformed Medicare program and warns of fiscal disaster. They conclude that Republicans are offering the certainty of trillions in new entitlements in return for a mere promise of future reform and that is too expensive a gamble for principled conservatives to support.

With my very last breath, I would say, ''I agree.'' Oppose the Medicare prescription drug entitlement.

HEALTH SAVINGS ACCOUNTS

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, I rise today in support of the conference report for H.R. 1, an historic bill that will include the creation of health savings accounts, a breakthrough program that gives control back to patients. The voluntary health savings accounts provide care that is affordable, flexible and portable. They restore the doctor-patient relationship, allowing Americans the freedom to choose their own doctor and their own care. Also, contributions, earnings and medical payments from these accounts are all tax-free.

Health savings accounts will lower health insurance costs for millions of Americans and allow for price competition of doctor and hospital services. Moreover, these accounts stay with a person throughout their lives as they are portable from one job to the other. They also can be used during retirement to pay for retiree health care, Medicare expenses and prescription drugs.

I strongly encourage my colleagues to support health savings accounts by voting in favor of H.R. 1 and give health care freedom to millions of Americans.

In conclusion, God bless our troops. We will not forget September 11.

IN HONOR OF RECENT BRONZE STAR RECIPIENTS

(Mr. BOOZMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOOZMAN. Mr. Speaker, I recently had the honor of handing out Bronze Star Medals to 58 World War II veterans from the Third District of Arkansas. These veterans did not previously receive their medals because of an oversight when they returned home after the war.

The Bronze Star is awarded to World War II veterans who earned the Combat Infantry Badge or the Combat Medical Badge. The award of these badges is considered as a citation in orders of exemplary conduct in ground combat against an armed enemy.

The hard work of the Northwest Arkansas Veterans Task Force who brought this oversight to my attention made this ceremony a reality. They are constantly looking out for veterans in our community, and their commitment to our veterans ought to be commended.

Mr. Speaker, each one of these veterans has a story to tell. Theirs is a special generation, the greatest generation, and we all owe them a debt of gratitude.

IN SUPPORT OF CONFERENCE REPORT ON MEDICARE MODERNIZATION BILL

(Mr. SULLIVAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SULLIVAN. Mr. Speaker, I rise today in support of the conference committee report on the Medicare prescription drug coverage bill. This long-awaited legislation will provide a tangible, real and meaningful benefit to American seniors.

□ 1015

Senior Americans are tired of the talk. It is time for action. This bill will put a drug discount card in their hands in May, 2004; and it will help them save between 15 and 25 percent right off the bat. It also provides structure for Medicare. It includes an affordable deductible and catastrophic coverage, in responsible manner, to help the neediest seniors. Those who currently have prescription drug coverage can keep their coverage because this plan is voluntary. This is reasonable legislation that will not only improve and prolong lives of our seniors but will do the same for the Medicare program.

Provisions for reimportation are in this legislation, ensuring safety and accountability. And it also includes an update for oncology drugs that is critical to cancer patients nationwide.

In conclusion, I would remind my colleagues that this bill provides structure; helps seniors get the prescription drugs they need when they need them by putting a discount card in their hands; is voluntary; and is tangible. It ensures accountability for reimportation and, more importantly, makes Members accountable to their constituents. I urge my colleagues to vote for H.R. 1.

PEACE IN THE MIDDLE EAST

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, the President gave an amazing speech yesterday in England, and everyone should read it. Consistent with that speech, I would now ask the administration to appoint a special envoy to the Middle East to focus like a laser beam on bringing peace to the Middle East.

Envoys for peace have succeeded in the past. Senator Mitchell succeeded in Ireland. Senator Danforth has helped push the peace in Sudan. Three people that come to mind immediately for the Middle East are the President's father, George H.W. Bush or Secretary James A. Baker III or former Secretary George Shultz. Each would bring a unique ability to sharply focus, using the administration's road map for peace, on bringing peace to the Middle East.

PROVIDING FOR CONSIDERATION OF MOTIONS TO SUSPEND THE RULES.

Mr. SESSIONS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 449 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 449

Resolved, That it shall be in order at any time on the legislative day of Thursday, November 20, 2003, for the Speaker to entertain motions that the House suspend the rules. The Speaker or his designee shall consult with the Minority Leader or her designee on the designation of any matter for consideration pursuant to this resolution.

The SPEAKER pro tempore (Mr. BASS). The gentleman from Texas (Mr. SESSIONS) is recognized for 1 hour.

Mr. SESSIONS. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentlewoman from New York (Ms. SLAUGHTER), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

This rule provides that suspensions will be in order at any time on the legislative day of Thursday, November 20, 2003. It also provides that the Speaker, or his designee, will consult with the minority leader, or her designee, on any suspension considered under the rule.

Mr. Speaker, the Republican leadership of this House has set out an aggressive legislative plan for this week on behalf of the American people. The goal of this plan is to pass a number of bills over the next few days that will dramatically improve the quality of life for all Americans. This week we have already succeeded in passing an energy conference report that will bring our Nation's outdated energy policy into the 21st century through comprehensive legislation that promotes conservation, reduces America's growing dependence on foreign oil, and creates new jobs.

For the balance of the week we are slated to consider legislation among the following things: number one, to authorize spending levels for intelligence activities needed to win the war on terrorism; number two, to reform Medicare to make sure that more of our seniors have prescription drug coverage that they need while also giving them more and better choices for their health care coverage, also to allow all Americans to begin planning for their health needs through savings accounts that can be purchased, can grow, and can be used on a tax-free basis; and, number three, to provide for a uniform national credit recording system that ensures that consumers are protected from identity theft while giving them access to the fast and reliable credit that makes our economy the envy of the rest of the world.

I understand that Members on both sides of the aisle may have different views about how to address these issues, and we will have the opportunity to hear a great deal of debate from both sides over the next few days on each of these issues and many others. However, a great deal of legislation that the Republican House leadership has also scheduled for consideration on behalf of all Americans has broad support from both the majority and the minority. And in an attempt to make sure that this important work is finished by the end of this legislative week as well, we are here to pass a rule to provide for consideration of these bills.

This balanced rule provides the minority with an ability to consult with the Speaker on any suspension that is offered, ensuring that their input and views are duly considered before any legislation is considered under this rule brought to the floor.

Mr. Speaker, I encourage my colleagues on both sides of the aisle to support this noncontroversial, balanced rule.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield myself such time as I may consume, and I thank the gentleman from Texas for yielding me 30 minutes.

Mr. Speaker, this unusual move to allow for consideration of motions to suspend the rules provides this body with a great opportunity. Many pieces of legislation important to our constituents are awaiting consideration. With this rule we have a wonderful

chance to address some of these significant issues. We should consider legislation to extend Federal unemployment benefits for an additional 6 months; I believe that would pass unanimously. Currently unemployment benefits are set to expire on December 31. We should not allow the millions of Americans still desperately looking for work to begin the next year in the lurch.

I am particularly concerned about the loss of 44,000 manufacturing jobs in Upstate New York since 2002. In Rochester alone, manufacturing employment is down 20 percent. In these tough economic times, it is our duty to help; and since we are rushing to adjournment this week, this is our last opportunity.

Mr. Speaker, I would also like to use this golden opportunity to pass the genetic nondiscrimination legislation. Since 1995 I have led the fight to pass this nonpartisan, noncontroversial, and widely supported legislation. The bill currently has 236 cosponsors from both sides of the aisle, the support of over 200 outside organizations, and the support of the President of the United States. Last month the other body unanimously passed the legislation which prohibits genetic discrimination. This is critical to the health of the country, something we have talked about all week. If we do not pass this legislation to prohibit genetic discrimination, we are in danger of bringing much of the research that we are so proud of in the United States to a halt.

Discrimination is already taking place. We have lots of evidence of it both in employment and insurance. If we want to continue to be on the forefront of science and to be able to make our residents and citizens the healthiest in the world, this bill should be passed. I want to urge the Speaker of the House today to put this bill on the suspension calendar, let us pass it, let the President sign it, and let us all move toward better health.

Mr. Speaker, I yield 2 minutes to the gentlewoman from Florida (Ms. CORRINE BROWN).

Ms. CORRINE BROWN of Florida. Mr. Speaker, I thank the gentlewoman for yielding me this time.

I had not planned to come to the floor this morning, but I was sitting in my office and I heard my colleague from Florida mention Claude Pepper's name in relationship to this Medicare bill. Claude Pepper would be turning over in his grave by this bill. It was an insult to all of the fine work that Claude Pepper did in this House, and he would be on this floor speaking against this horrible bill.

This Republican Medicare bill is a slap in the face for every senior struggling to pay for needed medicine. The leadership of this House is not pushing this bill because they care about seniors. In fact, they would end the program altogether. In 1995 the majority leader called Medicare ''a program I would have no part of.'' Another leader said ''a program that I hope will wither on the vine.'' Now they want us to believe the spin that they really care about Medicare.

A zebra cannot change its stripes, Mr. Speaker, and the American people are not buying this sham. America's seniors are happy with the Medicare program, and we should provide for a prescription drug benefit the same way we provide for doctor visits through Medicare and not through a private program that even the insurance industry says will not work. This is a life-and-death issue for many of our seniors, and this hollow bill does nothing for that.

And I want to close quoting the only black Supreme Court Justice we ever had, Thurgood Marshall. He said: ''A snake is a snake. It does not matter whether it is black or white; if it bites you, it is the same.'' And I can say that for the Republicans on this bill, and I can also say that for AARP, who has left the people.

Mr. SESSIONS. Mr. Speaker, I yield myself such time as I may consume.

It is early in the morning in Washington, and we are back at it again talking about this wonderful opportunity that we have to come down to the floor of the House of Representatives and speak our minds. And it is no surprise to the American public that the Democrat Party and its Members oppose reform in Medicare. It is no surprise to the American public that we recognize that the Democrat Party is not only opposed to reform but also to competition, which is what is in this bill; and it is no surprise to the American public that what will happen in the next day or two as the debate gets closer is that the American public will hear and find out about how the market reforms and things and ideas that will come from this bill will make life better for millions of Americans.

What is surprising is to hear the Democrat Party lambast AARP. The AARP is that organization for senior citizens all across this country who I think has made a very wise and careful decision to look at this prescription drug plan, and they have very clearly said that the Republican Party is right on the policy and they are right on what will give long-term success to this great Nation.

But we have heard very clearly this morning what the Democrat Party intends to do. They intend to keep Medicare exactly the way it is, in trouble financially and will very soon go bankrupt.

Reform is necessary if we are going to save this system, but reform is also necessary for the millions of Americans who today are without the ability to purchase health care solely because of money. What we are going to do is make it easier for Americans, not just people who go to work but some of them who are just now entering the marketplace, to be able to save money for health care on a pretax and tax-free basis, an opportunity for them to save this money and, when they are younger, to put that money away and to grow it tax free to be able to use it for health care, to make sure that they will be able to make wiser decisions in their future, that they will be able to make the wise decisions for their family at a time when they need that money most of all.

So what Republicans really stand for once again is reform and making sure that the most critical systems that are in place in our country are not only strengthened, but we make sure that they will survive the onslaught as times change and we have so many people retiring, but we need to make sure that our children and grandchildren have that same opportunity that we have had to have a system, an underpinning in this country that takes care of people.

So I am very pleased today, as we begin our work and debate in Washington. It is no surprise that here we are on this beautiful day in Washington, D.C., we begin with the debate on the floor to talk about the activities for the week, and I am so proud that not only what the Republican majority stands for but that the reform and the things we are going to bring to the American public will include opportunities for them to save for their own health care, because the most important part is, just like my family, I have a chance then to make a decision, to be a decision-maker in the health care needs of my family.

□ 1030

I have a beautiful wife of 19 years. I have a son who is 14 years old and a Down's Syndrome son who is 9. If there is one thing that I am passionate about, it is that I want a system in this country where families have an opportunity to make their decisions about health care, and we can do that when we have money in our own pockets. And that is what this reform is about, to make sure not just my family, but millions of other families across this great Nation have that same opportunity. That is what this health care savings account is going to be about. That is what Medicare reform is all about. I am proud of what we are doing.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, had the gentleman from Texas (Mr. SESSIONS), my good friend, yielded to me, I simply wanted to ask him if he is aware that the administration has just given AARP a $20 million grant and ask if he wondered if that had anything to do with their decision.

Mr. Speaker, I yield back the balance of my time.

Mr. SESSIONS. Mr. Speaker, at this time I would like to thank the gentlewoman from New York for engaging us this morning on this very important rule which will allow us to continue our work. I urge my colleagues to join me in supporting this rule as I am sure they do.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 2417, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2004

Mr. GOSS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 451 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 451

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 2417) to authorize appropriations for fiscal year 2004 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

The SPEAKER pro tempore. The gentleman from Florida (Mr. GOSS) is recognized for 1 hour.

Mr. GOSS. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. HASTINGS), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only on this matter.

Mr. Speaker, the Committee on Rules has granted the customary rule for consideration of conference reports to H.R. 2417, the Intelligence Authorization Act of Fiscal Year 2004. This is standard procedure. The rule is fair and without controversy as far as I know, and it does allow ample time for consideration of conference matters that have come up.

Mr. Speaker, as in past years, we thought it best to allow Members ample opportunity to review the bill and debate the issues they feel are important to our Nation's security. This was certainly exhibited earlier this summer when we passed, with overwhelming bipartisan support, the Intelligence Authorization Act in the House. Our classified annex and staff have been made available to any Member of Congress interested in reviewing the underlying bill and the reports thereto.

Today we are at the culmination of this process. The conference report on H.R. 2417 is critical, it is must-do legislation.

The bill authorizes appropriations for fiscal year 2004 intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement Account and Disability system.

In the past 2 years, our country has made very strong steps to improve our Nation's intelligence-gathering capabilities, as well as the analysis of the results of those intelligence-gathering capabilities. With that said, the attacks this morning in Istanbul are yet again a painful reminder that every day, we must not let down our guard. Rather, it emphasizes work that remains to be accomplished. We need to strengthen our intelligence capabilities and align them to deal with the threats that we face today.

This legislation convincingly moves us in the right direction by enhancing the depth and the capacity of all facets of our intelligence community. The bill provides for improved intelligence analysis and coordination. It continues the effort to increase our human intelligence resources, an area vital to the security of our Nation during the war on terrorism, as we have seen discussed virtually every day.

In addition, H.R. 2417 augments the information shared between Federal, State, and local governments and encourages strong cooperation in the pursuit of joint counterterrorism activities to keep our homeland safe.

Mr. Speaker, this bill makes possible the important work performed by dedicated intelligence professionals, people who are out and about right now taking very high risks to get us vital information so the right decisions can be made to nip terrorism in the bud before it strikes us again. It is the product of a bipartisan agreement that we deal with today and, as I stated previously, another prudent step in the right direction for developing our capabilities in the intelligence community.

For these reasons, I urge my colleagues to vote in support of this rule that will provide them with a fair forum for debate on this matter.

Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first, let me thank my good friend, the gentleman from Sanibel, Florida (Mr. GOSS) for yielding me this time. It is a pleasure to serve with the gentleman on both the Committee on Rules and the Permanent Select Committee on Intelligence and, as I said last night, not in a self-serving way, I do not know of any two committees which work harder or more diligently than the two on which the gentleman and I serve. It turns out that we are the only two Members on both of those committees, and what I said last night is we must be gluttons for punishment.

Mr. Speaker, I rise in support of this rule, providing for the consideration of the conference report to accompany H.R. 2417, the Intelligence Authorization Act for Fiscal Year 2004. This bill authorizes classified amounts in fiscal year 2004 for 14 United States intelligence agencies and intelligence-related activities of the United States Government, including the Central Intelligence Agency and the National Security Agency, as well as foreign intelligence activities of the Defense Department, FBI, State Department, Homeland Security Department, and other agencies.

Members who wish to do so, and I urge Members to do this if they have concerns, can go to the Permanent Select Committee on Intelligence office to examine the classified schedule of authorizations for the programs and activities of the intelligence and intelligence-related activities of the national intelligence program. As I said, this includes authorizations for the CIA, as well as the foreign intelligence and counterintelligence programs within, among others, the Department of Defense, NSA, Department of State, Treasury and Energy, and the FBI. Also included in the classified documents are the authorizations for the tactical intelligence and related activities and joint military intelligence program of the Department of Defense.

The measure covers specific and general intelligence operations including all of our operations that we put forward in any manner. Today, more than ever, we must make the creation of a strong and flexible intelligence apparatus one of the highest priorities of this body. The terrorist attacks of September 11, combined with the continuing threat of further attacks, underscore the importance of this legislation. I am pleased that it has been brought to the floor in a truly bipartisan manner. Thanks to the gentlewoman from California (Ms. HARMAN), the ranking member, and the gentleman from Florida (Chairman GOSS) and all of the members of the Permanent Select Committee on Intelligence and the specific subcommittees, a good job has been done on behalf of this country.

Let me say though, Mr. Speaker, that just because this is brought here in a bipartisan manner does not mean that it is a perfect bill; far from it. There are several areas that many of us would have liked to have seen improved. One of them that we have an exacting concern about is the expansion of the executive authorities under

section 374, the amendment of the National Financial Services Act. We feel that that bears further scrutiny and certainly, without judicial review in that section, could pose problems at some point in our future. It is something that many of us will continue to review.

We also felt very strongly, and I thank my colleague, the gentleman from New Jersey (Mr. HOLT) who will speak specifically to it, that we should emphasize the area of language ability in a more dramatic fashion.

Mr. Speaker, this bill provides authorizations and appropriations for some of the most important national security programs in this great country. Any hesitation by this body in passing it would be a disservice to the American people. I urge my colleagues to support this rule and the underlying conference report.

Mr. HASTINGS of Florida. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from New Jersey (Mr. HOLT), my good friend.

Mr. HOLT. Mr. Speaker, I thank my friend, the gentleman from Florida for yielding me this time, and I thank him for his good work not only on the Committee on Rules, but also on the Permanent Select Committee on Intelligence.

As he said, I would welcome the opportunity later to speak about the need to have better training in critical languages here in the United States, but at the moment, I would like to talk about something that is relevant to the rule and to the Committee on Rules.

Here in Congress we have a responsibility, not only to appropriate funds, to authorize those funds, but also to oversee their expenditure. It is a sacred responsibility to deal with other people's money. It is a difficult job.

Now, in the areas of transportation and the Department of the Interior and other areas, we are assisted by millions of engaged citizens who keep an eye out for waste or misguided programs or programs that are less than well-thought-out. We do not, in classified programs, have that advantage, so it falls to us and our staff. We have an excellent staff that keeps tabs on the multifarious programs of the intelligence community. We are blessed with a chairman who has an agreeable personality and demeanor and wields his gavel with equanimity, and an excellent ranking member who keeps us on track. But we have a difficult job under the best of circumstances to oversee the intelligence programs.

It is made almost impossible when large fractions of the intelligence budget come through special appropriations, not through the normal course, not through the normal authorization and appropriation process, when in emergency allocations, money is put in without any previous oversight.

So as I speak in favor of the authorization bill that we are considering today and hope that we approve the rule so that we can get to the debate and approval of this authorization bill, I would ask the Committee on Rules to use its considerable influence in the future to see that we do not appropriate large sums of money for intelligence and other operations without going through the customary and necessary authorization process. We have done that over and over again in recent years, and it is a disservice to the intelligence community and a disservice to the American people. So again, I ask the Committee on Rules to use its considerable influence to see that we not fall into that problem.

Mr. GOSS. Mr. Speaker, I am pleased to yield such time as he may consume to the gentleman from Nevada (Mr. GIBBONS), the distinguished chairman of our Subcommittee on Human Intelligence, Analysis and Counterintelligence.

Mr. GIBBONS. Mr. Speaker, I thank my colleague for yielding me this time.

I want to rise in strong support of the rule for the authorization of the intelligence bill, H.R. 2417. I want to take just a moment to explain the issue of compensation reform which I think is important and critical to the future of the intelligence community.

Over the years we have had a system of pay for the men and women who are doing the hard work of gathering intelligence for the people of this country.

□ 1045

And yet we have not been able to find a way to adequately compensate them. These are individuals who are dedicated to this mission. They are not there because they want more money. They are there because they like what they do. They feel it is important for the future of this country and for the security of the American people. We have opportunities now to make sure that when we pay these individuals, we pay them correctly, we pay them adequately for their services. It is important that Congress continue this oversight.

We have an important part of this bill that addresses the issue of compensation reform. I am hoping that all our colleagues will rise and support this bill because of the important aspect of compensation reform for the men and women who are doing the valiant job of representing this country in faraway places in the dark of night, doing things that most other people would not do. These are true heroes in the American legend. We should all stand up and thank them for the work they have done. And I thank the gentleman from Florida (Chairman GOSS) for the opportunity to speak out on this rule and hope that everyone will support the rule.

Mr. HASTINGS of Florida. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Texas (Mr. REYES), my good friend.

Mr. REYES. Mr. Speaker, I thank the gentleman from Florida (Mr. HASTINGS) for yielding, and I also want to commend our chairmen and ranking members for the great job that they do under what, I think, are very difficult circumstances. And I would also associate myself with the comments of my colleague, the gentleman from Nevada (Mr. GIBBONS), about giving good compensation for great work that is being done around the world for our national security by the intelligence community employees.

Having said that, I also want to state that I rise in strong support of this rule for H.R. 2417, but I also want to note that there are many of us that have concerns about issues that are vitally important to our national security, the lack of diversity in the intelligence community, and certainly the lack of a good solid plan to diversify and understand and recruit people that know and understand and speak different languages and come from different cultures. Those are critical and important in light of the attacks of September 11.

I would urge everyone to support this rule, but at the same time I also think it is vitally important that we continue to focus. And as my colleague, the gentleman from New Jersey (Mr. HOLT), made mention, it is difficult in this environment because we operate in a closed oversight manner and we do not have the benefit of outside input and scrutiny. So it is critical.

And I know that our chairman, the gentleman from Florida (Mr. GOSS), and the ranking member are committed to continue to work in these two critical areas, diversity and language proficiency. So with that, Mr. Speaker, I appreciate the opportunity to share my thoughts.

Mr. HASTINGS of Florida. Mr. Speaker, I have no further speakers, and I yield back the balance of my time.

Mr. GOSS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I certainly want to associate myself with the remarks of the gentleman from New Jersey (Mr. HOLT), his remarks about a concern about disenfranchising authorizing committees by the use of supplemental appropriations and other such matters as has sometimes happened. I do believe that the authorizing committees provide a critical contribution, a valuable contribution to the legislation of this institution. And I think it is unfortunate that sometimes in the press of business that we sometimes bypass that wisdom and that contribution because of urgency or other matters, which are understandable, but which should be an aberration rather than the practice.

And I can assure the gentleman from New Jersey (Mr. HOLT) and others who

are interested that I am going to be spending some time and, hopefully, get a point or two across on the Committee on Rules that our view is that regular order is a whole lot better than supplemental appropriations.

The second thing I wanted to point out, very briefly, I am well aware this is not a perfect bill. The gentlewoman from California (Ms. HARMAN) and I and the members of the committee have worked very hard. We have excellent staff. This is not a perfect bill. It is a very, very good bill. It deserves the attention of the Members on the floor today. Certainly the rule is appropriate to bring it forward.

I think I can promise on behalf of the gentlewoman from California (Ms. HARMAN) and all the Members that the minute this authorization bill passes we start on the next authorization bill. And there is plenty to be done.

There are a number of things we will hear about in the debate later today. These are things that we already have taken aboard, and we will be pushing hard on. So I am convinced that from the legislative perspective we are doing the job that the people of this country have asked us to take on in the oversight, and I am very proud to be part of that effort.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.J. RES. 78, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

Mr. LINDER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 450 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 450

Resolved, That upon the adoption of this resolution it shall be in order without intervention of any point of order to consider in the House the joint resolution (H.J. Res. 78) making further continuing appropriations for the fiscal year 2004, and for other purposes. The joint resolution shall be considered as read for amendment. The previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except: (1) one hour of debate on the joint resolution equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations; and (2) one motion to recommit.

The SPEAKER pro tempore (Mr. BASS). The gentleman from Georgia (Mr. LINDER) is recognized for 1 hour.

Mr. LINDER. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Texas (Mr. FROST), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, H. Res. 450 is a closed rule that provides for the consideration of H.J. Res. 78, a continuing resolution that will ensure further appropriations for fiscal year 2004.

The rule provides for 1 hour of debate in the House equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. The rule waives all points of order against consideration of the joint resolution and provides for one motion to recommit.

Mr. Speaker, the provisions of the most recent continuing resolution, H.J. Res. 75, are scheduled to expire this Friday, November 21. The House Committee on Appropriations continues to work hard to complete the unfinished appropriations business of Congress, and we are hopeful that this work can be completed in the coming days. The resolution before us today, H.J. Res. 78, ensures funding through this weekend until November 23.

The House of Representatives passed all of its fiscal year 2004 appropriations bills long ago. We should complete Foreign Operations, Transportation-Treasury appropriate bills in the very near future. In addition, negotiations are under way to complete Agriculture, VA–HUD, Commerce-Justice-State, Labor-HHS, and the District of Columbia appropriations bills as well. However, to ensure that essential government services continue to operate while the omnibus appropriations bill is completed, this rule makes in order another continuing resolution to give us the additional time to complete the appropriations process in an orderly manner.

Mr. Speaker, under the joint resolution that H.J. Res. 450 makes in order, the provisions of the most recent continuing resolution will be extended for 2 more days. The Committee on Rules approved this rule last night. I urge my colleagues to join me in supporting its passage.

Mr. Speaker, I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, here we go again. Another month has passed and this Republican government still refuses to do its most basic job, funding the Federal Government that they control. That is why we are here, once again, to pass yet another short-term continuing resolution to keep Republican incompetence from shutting down the Federal Government.

Mr. Speaker, I do not know why Republicans refuse to do the job taxpayers pay them for, especially while millions of those same taxpayers cannot find jobs on their own. Perhaps they are so busy twisting arms to dismantle Medicare and force seniors into HMOs that they cannot be bothered with deciding how badly to shortchange education in this year's spending bills. Or maybe the White House has been consumed with spending their expensive efforts to rebuild Iraq that they do not have time to worry about America. Who knows. But it is clear that this Republican government has stopped working for the American people.

Mr. Speaker, I do not know if you watched ''West Wing'' last night on television, but actually the subject of the ''West Wing'' program was this exact issue, a continuing resolution. And at that point you had a Republican Congress trying to blame a Democratic President for closing down the government. But here, of course, we have a Republican Congress and a Republican President. So what is going on here? Republican President, Republican Congress, and we still have to have a short-term continuing resolution because those folks cannot do their job.

Just take a look at the record. Today, millions of hard-working Americans no longer share in the prosperity that they enjoyed during the Democratic-led economic boon of the 1990s. In fact, since the Republican Party took over the government nearly 3 years ago, more than 3 million American jobs have been lost in the private sector. Or to put it another way, since George W. Bush got his job, millions of Americans have lost their jobs. That is the worst jobs record of any President since Herbert Hoover in the Great Depression.

Over the same period, Republican fiscal irresponsibility has turned record surpluses into astronomical and out-of-control deficits, increasing the death tax on all Americans and threatening the future of Medicare and Social Security. In the private sector, Mr. Speaker, that kind of failure would get you fired. But Republicans are counting on their special interest friends to save their political skins. And they have spared no taxpayer expense to do their work.

Take, for example, the small elite group of big contributors who fund Republican campaigns like the Bush campaign Pioneers and now the Bush campaign Rangers. They are undoubtedly happy because this Republican government has drained the U.S. Treasury by repeatedly passing expensive tax breaks for the wealthiest few. And earlier this week Republicans gave big polluters a pass to keep fouling the air of some of America's major metropolitan areas, including my home in north Texas.

Now, Mr. Speaker, Republicans are desperately trying to pull the wool over the eyes of America's seniors so that they can shower billions of dollars on HMOs, insurance companies, and

the big drug companies. Under the Republican plan, millions of senior citizens would pay more and get less for Medicare. Up to one in four Medicare beneficiaries would actually pay more for prescription drugs than they do right now. Up to 7 million seniors would be forced to join an HMO and give up their choice of doctor or pay higher Medicare premiums. Between 2 and 3 million retirees would lose the drug coverage they now get from their former employers. And millions of seniors would go without drug coverage for months each year and be forced to pay premiums year round even when they are not getting any drug benefits.

While seniors lose under the Republican plan, drug companies and HMOs win big. Republicans are giving insurance companies a $12 billion slush fund. They are giving big drug companies $139 billion in windfall profits because they are actually making it illegal for Medicare to negotiate lower prescription prices for seniors. That is right, Mr. Speaker, Republicans can find billions of dollars for HMOs and drug companies, but they cannot afford year-round drug coverage for senior citizens. No wonder Republicans do not want their plan to take effect until after the 2004 elections. They are afraid that once seniors sit down and do the math they will see the Republicans have sold them a bill of goods.

This kind of outrage, Mr. Speaker, is simply business as usual under this Republican government. Nothing gets done for the American people, but Republicans and their allies do plenty of harm to the American people. It is a shameless abuse of power, Mr. Speaker; and the American public are the victims.

Meanwhile, we have before us another 2-day continuing resolution, which is the subject of this rule today.

Mr. Speaker, I reserve the balance of my time.

□ 1100

Mr. LINDER. Mr. Speaker, I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. OBEY), the ranking member of the Committee on Appropriations.

Mr. OBEY. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, I simply take the time to indicate that the House has no choice but to proceed to pass the short-term CR in hopes that the House will come closer to finishing its work by the time we have to pass another one. But let me also say that I would hope that we would use the time constructively so that Members still can get out of here for the year on a reasonable schedule.

I note last night, for instance, that we are within a hair's breadth of having total agreement on the VA-HUD appropriations and on the CJ bill. The transportation bill has already been filed, and it is hoped that the foreign ops bill will be filed and acted upon also. That would mean that we could reduce considerably the number of bills that would have to go into the omnibus. I have no particular ax to grind about whether they do or they do not, but it would seem to me that it would be one way to at least assist on unsnarling what remains to be done before we finish.

With that, I would simply say when the CR comes, I hope that we could dispose of it in a favorable fashion so we can get on with the remainder of our work for this week.

Mr. LINDER. Mr. Speaker, I have no further speakers. I reserve the balance of my time.

Mr. FROST. Mr. Speaker, I yield myself such time as I may consume.

Let us be very clear about what is going on here. The current continuing resolution runs out tomorrow. The Republican leadership is giving itself another 2 days. So by passing this next CR, that takes us through Sunday. They will not tell us when the next CR, how far it will go, whether we will be here Saturday, Sunday, Monday, Tuesday, Wednesday of next week doing the people's business. They will not tell us when the omnibus bill is going to come to the floor or whether it will come to the floor. They will not tell us how long the next CR will run, whether it will run to December 8 or whether it will run until some time in February. Either they simply do not know, or they will not tell. Either way, they make it very difficult to legislate in an orderly fashion.

We would all like to wind up the business for this year. I would hope that the Republican leadership can finally get their act together, bring the remaining appropriations bills or an omnibus bill to the floor in an orderly way, so that we can conclude the people's business this year and not continue to operate on a 2- or 3-day CR while the Republicans try and figure out what their next step is.

Mr. Speaker, I yield back the balance of my time.

Mr. LINDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just say to the gentleman from Texas (Mr. FROST) that it is not that we do not want to inform them. It is that we do not know.

We are dealing with people in the other body who have not given us any indication of when they are prepared to move. But I will say that I agree 100 percent with the gentleman from Wisconsin (Mr. OBEY). We are moving piece by piece on these. And our side would like very much to pass them one at a time and get out of here Friday night or Saturday. I do not think it will be that soon on Friday night, but we are very close to getting our work done on the appropriations process so we would like to do that one at a time.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. BASS). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FROST. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 of rule XX, this 15-minute vote on House Resolution 450 will be followed by 5-minute votes on the following motions to suspend the rules:

S. 286, by the yeas and nays;

S. 686, by the yeas and nays.

The vote was taken by electronic device, and there were—yeas 406, nays 2, not voting 26, as follows:

Ms. JACKSON-LEE of Texas changed her vote from ''yea'' to ''nay.''

Mr. MORAN of Virginia changed his vote from ''nay'' to ''yea.''

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. FOSSELLA. Mr. Speaker, on rollcall No. 645 I was unavoidably detained. Had I been present, I would have voted ''yea.''

BIRTH DEFECTS AND DEVELOPMENTAL DISABILITIES PREVENTION ACT OF 2003

The SPEAKER pro tempore (Mr. BASS). The unfinished business is the question of suspending the rules and passing the Senate bill, S. 286.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the Senate bill, S. 286, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 415, nays 1, not voting 18, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BASS) (during the vote). Members are advised that 2 minutes remain in this vote.

□ 1135

Mr. SMITH of Michigan changed his vote from ‘‘nay’’ to ‘‘yea.’’

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

POISON CONTROL CENTER ENHANCEMENT AND AWARENESS ACT AMENDMENTS OF 2003

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill, S. 686, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the Senate bill, S. 686, as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 420, nays 1, not voting 13, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised that 2 minutes remain in this vote.

□ 1146

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and that I may include tabular and extraneous material on H.J. Res. 78.

The SPEAKER pro tempore (Mr. BASS). Is there objection to the request of the gentleman from Florida?

There was no objection.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

Mr. YOUNG of Florida. Mr. Speaker, pursuant to House Resolution 450, I call up the joint resolution (H.J. Res. 78) making further continuing appropriations for the fiscal year 2004, and for other purposes, and ask for its consideration.

The Clerk read the title of the joint resolution.

The text of House Joint Resolution 78 is as follows:

H.J. RES. 78

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 108–84 is amended by striking the date specified in section 107(c) and inserting ‘‘November 23, 2003’’.

SEC. 2. Section 8144(b) of the Department of Defense Appropriations Act, 2003 (Public Law 107–248), as amended by Public Law 108–84, is further amended by striking ‘‘November 21, 2003’’ and inserting ‘‘November 23, 2003’’.

The SPEAKER pro tempore. Pursuant to House Resolution 450, the gentleman from Florida (Mr. YOUNG) and

the gentleman from Wisconsin (Mr. OBEY) each will control 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, I yield myself such time as I may consume.

And I will not consume very much time because this continuing resolution simply extends the existing CR until midnight Sunday, this weekend. All conditions, by the way, of the original CR would still exist on this CR. We are reaching the point where we can conclude the appropriations process. Most of the appropriations issues have already been solved and are prepared to be written into a final bill. There are some outstanding issues at a level higher than the Committee on Appropriations that we are trying to apply a little pressure to get settled. Other than that, Mr. Speaker, I would give the House the word that I think we can get this done by Sunday evening, but maybe not. We will do the very best that we can.

As one can imagine, there are an awful lot of issues that we have resolved and are continuing to resolve. We are working steadily. We had a good conference last night. We cleared up a lot of the issues. So, Mr. Speaker, not much more can be said about this.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I simply urge a ''yes'' vote, and I yield back the balance of my time.

Mr. YOUNG of Florida. Mr. Speaker, I ask for a ''yes'' vote, and I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

The joint resolution is considered read for amendment.

Pursuant to House Resolution 450, the previous question is ordered.

The question is on engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. OBEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

GENERAL LEAVE

Mr. GOSS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report on H.R. 2471.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

CONFERENCE REPORT ON H.R. 2417, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2004

Mr. GOSS. Mr. Speaker pursuant, to House Resolution 451, I call up the conference report on the bill (H.R. 2417) to authorize appropriations for fiscal year 2004 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolutions 451, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 19, 2003, at page H 11605.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. GOSS) and the gentlewoman from California (Ms. HARMAN) each will control 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. GOSS).

Mr. GOSS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring before the House the conference report for H.R. 2417, the Intelligence Authorization Act for Fiscal Year 2004. And I want to personally thank members and staff of the committee for their industry, their skill, their professionalism, and their dedication in crafting what I believe is a strong nonpartisan bill which will see us well through the year.

Perhaps the job was made a bit more difficult this year given the attempts by some in the media and elsewhere to throw American intelligence capabilities into the meatgrinder of partisan Presidential politics, but I am confident that a review of this legislation will show just how successful the members of the House Permanent Select Committee on Intelligence have been in putting the Nation's security needs first, rejecting the divisiveness, the partisan trickery and treachery that has been elsewhere.

H.R. 2417 authorizes funding for all intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement Disability System. Generally speaking, we have authorized funding for the National Foreign Intelligence Program in fiscal year 2004 at a level slightly above the President's request and substantially equal to that provided in the appropriations process.

There is much in the bill to recommend it to Members of the House. I would like to mention just a few of the important provisions and highlights.

First and foremost, this conference report supports the men and women in the intelligence community who are dedicated to protecting our Nation's citizens and their freedom, many of whom do this work under a shroud of secrecy, carrying out very tough tasks and, in fact, heroic deeds with little, if any, recognition.

Intelligence is the fundamental element of the global war on terrorism. It is crucial to America's efforts in the hot parts of the war such as Afghanistan and Iraq, just as it is essential to protecting Americans overseas and at home, that is, offense and defense. This conference report funds many important counterterrorism programs.

Also of note in the fight against terrorism, we are witnessing history being made this day. This is the first intelligence bill to authorize funds for the intelligence functions of the new Department of Homeland Security. We on the committee are acutely aware of the vital need for intelligence community resources to be effectively marshaled in protecting the homeland. In the past year, the Federal Government has moved to realign national resources to better leverage capabilities in the war on terrorism. We have been hard at work on that. In addition to the establishment of the Information Analysis and Infrastructure Protection Directorate over at the Homeland Security, the Terrorist Threat Integration Center was created and is under the control of the Director of Central Intelligence, and a new Terrorist Screening Center is being established and put to work at the FBI.

These resources, among others that we have been working on previously, will require continued investment and strong leadership to overcome a number of challenges including, by the way, the challenge of being the first of their kind. Our committee will continue to be actively engaged in defining how the intelligence community is evolving to meet the challenges of homeland security. We actually have no greater obligation.

Counterterrorism and counterintelligence are the driving forces behind section 374 of the conference report. This provision brings the definition of ''financial institution'' up to date with the reality of the financial industry. The current definition in the Right to Financial Privacy Act was crafted back in 1978. That was a quarter of a century ago. This provision will allow those tracking terrorists and spies to ''follow the money'' more effectively and thereby protect the people of the United States more effectively.

This conference report contains a provision that has received some degree of attention, section 405 dealing

with the Central Intelligence Agency's compensation reform proposal. The conferees support the idea that improvements can be made, should be made, in the old GS system of pay and promotion. I certainly feel we can do better by the officers at CIA. However, it is important to replace the outdated system with a better one, not just a new one. So section 405 will assist CIA management in finding the right system by allowing important fine-tuning and workforce buy-in.

The conferees were concerned that CIA managers were rushing a bit into the implementation of an undertested and unevaluated compensation system. To address this concern, section 405 delays slightly the implementation of CIA's compensation reform plan to allow time for the review, evaluation, and for adjustment, where needed, of the compensation program currently being tested in a congressionally mandated pilot program which we have all been very interested in and are following very closely. I think the final result will be a better system for managers and employees alike and a significant improvement for the institution. If it takes a month longer to get there, I think it is going to be well worth the investment.

I could go on for some time detailing many other worthy provisions, but I will conclude my opening remarks here with the observation that this conference report reflects the committee's view that the U.S. intelligence community is making progress in many areas. In the past 3 years, it has recovered to a degree from the devastating cutbacks and budget personnel capabilities and frankly flagging political support that occurred during the mid-1990s. But as I have said, it will be a long road to recovery, and it takes time to build intelligence capability. It will take years of sustained effort and attention and reinvigorated political backing to rebuild a fully capable intelligence community that does all the things we need it to do for us. We are on the road to recovery. I am proud of that. Investment in timely intelligence is the best investment for our homeland and national security, and I hope most Members agree with that.

This conference report represents progress on that road, and I urge the House to adopt it.

Mr. Speaker, I reserve the balance of my time.

Ms. HARMAN. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 2417. Earlier today, several large truck bombs exploded in Istanbul killing the British Consul General and dozens of others, wounding at least 450, and causing substantial property damage. The attacks appear to have the earmarks of al Qaeda, and they make today's action even more pressing.

This bill is not perfect, but it represents a lot of hard work to come to bipartisan agreement on tough issues. In the past 2 years, the Permanent Select Committee on Intelligence has completed a joint 9–11 inquiry and is currently reviewing prewar Iraq intelligence. These two reviews, among other activities we have undertaken, have pinpointed deficiencies in collection, analysis, and dissemination of intelligence that cannot be fixed one brick at a time; nor can meaningful intelligence improvements be made simply in response to the latest crisis. This bill represents progress; but, Mr. Speaker, systemic transformation is needed, and it hopefully will be the committee's primary focus in the coming year.

I am particularly satisfied that this bill requires a lessons learned study on Iraq intelligence as soon as possible and no later than a year from now. This House, just 2 days ago on a virtually unanimous basis, instructed the conferees to include this language, and we did. In the course of 6 months of review, the House Permanent Select Committee on Intelligence on a bipartisan basis has identified serious shortcomings in the prewar intelligence on Iraq's weapons of mass destruction and ties to terrorism. A bipartisan letter earlier this fall details the preliminary view that the gentleman from Florida (Chairman GOSS) and I hold. My own view is that estimates were substantially wrong and at a minimum the intelligence community overstated the strength of underlying data supporting its conclusions. Asking the intelligence community to do an introspective study is not an unreasonable request to ensure the credibility of our national security strategies. It will also ensure our troops and our leaders are served by the best intelligence.

In intelligence collection, the bill funds initiatives to improve technical and human collection. It pushes the intelligence community to hire and develop officers who speak foreign languages and who have deep experience in other countries and cultures, important issues raised in an unprecedented public hearing a few weeks ago.

□ 1200

In intelligence analysis and dissemination, the bill provides a new infusion of resources to modernize analyst infrastructure, including new information technology tools, training, and hiring new analytic expertise. There is also strong support for improving information-sharing across the IC and with State and local law enforcement partners.

The bill provides funds to support integration of watch list efforts across the Terrorist Threat Information Center, the Department of Homeland Security, the Terrorist Screening Center, and other relevant players. The bill also authorizes the Secretary of Homeland Security, working with the Director of Central Intelligence and the Attorney General, to establish a training program to help local and private sector officials identify threats and report information to Federal partners. Information-sharing, as we have shown again and again and again, was a primary intelligence failure pre-9/11. This bill goes a long way to fix it.

I am pleased that the bill addresses the development of data mining efforts for fighting terrorism, while maintaining adequate privacy protections for U.S. persons. The defense appropriations conference report, which we have already voted on, terminated DOD's Terrorist Information Awareness program, but it transferred funds and projects from that program to the intelligence community. For these programs, there are restrictions on mining databases containing information on U.S. persons, and I applaud those restrictions. But data mining, properly applied, is an excellent way to isolate who the bad guys are. It is also important to ensure that research and development on data mining tools continues, even while deployment awaits the full development of policies, guidelines, and procedures for use of these tools.

Let me be clear: I do not support deployment without limitations, but I think that R&D continues to be important. Responsible, respected groups like the Markle Foundation Task Force on National Security in the Information Age and the Center for Democracy and Technology, along with scholars at the Brookings Institution and the Heritage Foundation, all have concluded that data mining tools can be enormously beneficial for our national security, and that these operations can be done in a way that preserves privacy and protects civil liberties.

But it will not happen automatically. It will require real work from the administration, especially in view of the hole it dug for itself over the TIA project. The bill tasks the administration to come to grips with the policy issues posed by advanced data mining technology, requiring the administration to report to Congress with proposed modifications to laws and policies, and I hope the administration will embrace this opportunity.

The bill contains a provision to expand the definition of ''financial institution'' in the context of the FBI's authority to issue national security letters which compel the production of financial records without a warrant. The expanded definition closes a potentially significant loophole in the government's ability to track terrorist financing. I agree with the gentleman from Florida (Chairman GOSS) on this point. On the other hand, however, I worry that language in the bill is not as clear as it needs to be that this authority to obtain records only pertains

to the customer's financial relationship with institutions. I would have preferred this clarification to be in the statute. It is in the report language. I would have preferred the report language to be even stronger, and I remain concerned that the expanded definition leaves the potential, hopefully that will never be realized, for abuse in a classic fishing expedition.

The bill authorizes new personal services contracting for the FBI to allow it to more efficiently and flexibly surge capabilities against new missions. These powers granted to the FBI must not become a substitute for hiring full-time employees for the Bureau's long-term strategic needs or lead to other abuses in hiring practices. I spoke earlier this week with FBI Director Mueller and received his assurances that he will personally review this program and be sensitive to potential abuses. It is important to have strong standards and criteria alongside the increased flexibility.

The gentleman from Florida (Chairman GOSS) has said, and I agree, that intelligence community reform, or transformation, must be a central focus of the committee next year.

Issues raised by our Iraq review and the Joint 9/11 Inquiry point to systemic challenges and raise fundamental questions of roles, missions, capabilities, and organization. These include whether the intelligence community should be headed by a Director of National Intelligence; whether the Nation would be best served by a domestic intelligence agency; the shortcomings of budgeting by supplemental; and our committee member, the gentleman from New Jersey (Mr. HOLT), made this point I thought quite effectively in our previous debate on the rule for this conference report. Also, strengthening the quality of HUMINT and other collection on hard targets; the roles and authorities of the Department of Defense in intelligence activities; and the roles and responsibilities of policy officials and intelligence analysts regarding objectivity of intelligence products.

Transforming the IC's approach to language and cultural expertise will also require special attention. I note the work of the gentleman from New Jersey (Mr. HOLT) and the gentleman from New York (Mr. BOEHLERT), two committee members, and strongly support the gentleman from Florida's (Chairman GOSS) proposal for a major initiative focused on building these skill sets.

In conclusion, Mr. Speaker, the best intelligence is key to stopping the insurgency and permitting reconstruction in Iraq today. It is key to addressing threats in Afghanistan today. It is key to countering threats from terrorism in Turkey and elsewhere today, and to addressing challenges in Iran and North Korea today and tomorrow. To produce less than our best intelligence is to protect national security less than is needed.

Mr. Speaker, it is an honor to serve as ranking member of this committee. Our 2004 authorization conference report was approved unanimously by our Members, and I urge its strong support.

Mr. Speaker, I reserve the balance of my time.

Mr. GOSS. Mr. Speaker, I am very pleased to yield 3 minutes to the distinguished gentleman from Nebraska (Mr. BEREUTER), the distinguished vice chairman of the committee who is also chairman of our Subcommittee on Intelligence Policy and National Security. He is indeed a busy man.

Mr. BEREUTER. Mr. Speaker, I rise in strong support of the authorization legislation, and I thank the chairman for yielding me this time.

The conference report takes important steps to strengthen the intelligence community's ability to provide global analysis. I think it is an excellent report and an excellent effort on the part of the chairman, ranking member, and all Members and our staffs.

We are all aware that we are waging an aggressive war against terrorism. In addition, U.S. military forces are fighting the remnants of the former regime of Saddam Hussein. Yet we have global interests, for despite the immediate threats that we face, we must not devote all of our intelligence energies to Iraq and al Qaeda.

Mr. Speaker, I want to focus my remarks on two primary points. The first is related to human intelligence. The gentleman from Nevada (Mr. GIBBONS), I am sure, will cover that subject very well, since it is a primary responsibility of the subcommittee he chairs, so I will move to the second area. This relates to attacking the terrorists' finances. The gentlewoman from California talked about that to some extent just a few minutes ago. The distinguished gentleman from Florida (Mr. GOSS) has been very supportive in the progress that is being made in this legislation through his leadership. I think the important point is what we have done through this legislation within the Treasury Department.

Terrorist networks like al Qaeda obviously cannot function without significant financial backing. These terrorists, supported by (A) a shadowy network of fund-raisers, money lenders and shakedown artists; (B) businesses and charities serving as front organizations; and (C) unscrupulous facilitators and middlemen.

Now, prior to the attacks of September 11, the Treasury Department was not organized or equipped to take steps such as the freezing of terrorist bank accounts or assets. Frankly, it has never been as high a priority in Treasury as it should have been. H.R. 2417, this bill, creates an Office of Intelligence and Analysis within the Department of Treasury headed by an Assistant Secretary and tasked with the receipt, analysis, and dissemination of relevant foreign intelligence and counterintelligence information. In short, the conference report makes the Department of Treasury a real player, which can be an effective partner agency, in the global war on terrorism. This Members extends his appreciation to the chairman and the ranking member of the Committee on Financial Services for working in a constructive manner to include this important provision in our legislation today. This Member also congratulates the staff for the exceptional work here.

I think that the leadership presented by the gentleman from Florida (Mr. GOSS), the chairman, and the distinguished gentlewoman from California (Ms. HARMAN), the ranking member, has been demonstrated in bringing forth a genuinely bipartisan product. The conference report is a very serious effort to improve our intelligence capacity. Each and every member of the committee and its staff dedicated long hours to the drafting of this legislation. Each member recognizes the importance of our actions and responsibilities and things yet to come. This body can justifiably, I believe, be proud of the efforts of the HPSCI in this case and, in particular, the leadership of the gentleman from Florida (Mr. GOSS) and the gentlewoman from California (Ms. HARMAN).

Mr. Speaker, this Member urges strong adoption of the conference report to H.R. 2417.

Together, these endeavors have severely tested the capabilities of our intelligence resources. However, America's interests remain global, and we must not devote all our energies to Iraq and al Qa'ida. The Intelligence Community must continue to provide timely, actionable intelligence on a host of potential threats—from nuclear proliferation threats on the Korean peninsula, to narco-traffickers in the jungles of Colombia, to collapsing regimes in West Africa.

Mr. Speaker, we live in a new world, and face new and more terrible threats. In many ways, information gathering was easier when the threat was the Soviet Union. Frankly, the Intelligence Community has been slow in adapting to this new environment. Our intelligence services did not reach out aggressively to recruit the "human intelligence" sources that could have provided us invaluable information. We lost far too many of the skilled analysts whose job is to provide early warning. H.R. 2417 provides much-needed funding to rebuild a dynamic, wide-ranging, global analytic capability. But we should be under no illusions—it takes years to develop skilled analysts who are able to "connect the dots" and provide our policymakers with timely information.

Ms. HARMAN. Mr. Speaker, it is my pleasure to yield 2½ minutes to the gentleman from Texas (Mr. REYES), a senior member of our committee.

Mr. REYES. Mr. Speaker, I thank the gentlewoman for yielding me this time.

First, Mr. Speaker, I would like to thank the chairman of our committee and ranking member for their commitment to working in a bipartisan manner on the very important work that this committee has to do.

I rise today in strong support of the conference report for H.R. 2417, the Intelligence Authorization Act of 2004. Conferees and staff worked together closely to craft a bill that provides new and better capabilities to fight the war in Iraq and the war on terrorism, as well as to address a range of global intelligence challenges that we, as a country, face today.

I want to highlight two features of this very important bill. The first one is the requirement that the Director of Central Intelligence submit an Iraq Lessons Learned Report to the intelligence committees as soon as possible. Tuesday we debated the merits of the lessons learned in Iraq. I argued that Iraq must not become another Vietnam. We need to know from the intelligence community what has and what has not worked, and what has and what has not gone well in Iraq. Better intelligence is essential to defeating the expanding insurgency that we are seeing there today. I am pleased that the bill underscores the urgency of intelligence lessons learned.

This bill also establishes a pilot project within the intelligence community to enhance the recruitment of individuals with diverse ethnic and cultural backgrounds, skill sets, and language proficiency. The House Permanent Select Committee on Intelligence recently held a rare public hearing on this very issue of diversity. A panel of experts highlighted the capabilities that a diverse workforce bestows upon the intelligence community. It brings added language capability and better understanding of foreign cultures. I am pleased that this bill encourages diversity in the intelligence community.

In a similar vein, this bill also fences a portion of the funds authorized for the community management account until the Director of Central Intelligence submits a report to this committee outlining his plan to improve diversity throughout the intelligence community.

I tried also to include in this bill conference language urging that the Drug Enforcement Agency to make funds available for the El Paso Intelligence Center's Open Connectivity project. That language unfortunately was not included. Nonetheless, I still feel that EPIC has an important role to play in countering terrorism, and I hope that it is recognized for that role in this committee and others in the near future.

Mr. GOSS. Mr. Speaker, I am pleased to yield 3 minutes to the distinguished gentleman from Nevada (Mr. GIBBONS), the chairman of our Subcommittee on Human Intelligence, Analysis and Counterintelligence, and a man who has carried some of the more difficult projects that we have had to deal with in this bill.

Mr. GIBBONS. Mr. Speaker, I rise in strong support of the Intelligence Authorization bill, and I want to thank my friend and colleague, the gentleman from Florida (Mr. GOSS), for granting me this time to speak on it.

This is a very good bill, Mr. Speaker. It represents a lot of hard work by very dedicated staffs on both sides of the aisle. It addresses intelligence needs that this committee has highlighted for many years. The good news is, Mr. Speaker, that some of the most crucial needs of our intelligence community, the human intelligence and analysis, are getting the funding and attention that they deserve. We are fighting a war on terrorism, and I cannot overemphasize how important human intelligence, also known under the acronym of HUMINT, is to the security of the American people and to our national interests.

The satellites of the Cold War were key intelligence collectors, and our current reconnaissance vehicles are even better today than they have ever been in the past. However, in the world we live in right now, an overreliance on overhead photography and other technical programs would be a mistake. They cannot provide America with plans and intentions of terrorists who plot in secret, hide in civilian populations, and communicate with messengers.

□ 1215

What you have to have is HUMINT, collected by professionals possessing foreign language skills, foreign cultural knowledge, and specialized training necessary for success. This committee encourages the enhancement of these critical skills areas. And this bill authorizes essential funding needed to accomplish these goals.

The second crucial area in the war on terrorism is analysis. Our committee has expressed time and again the importance of a well-trained, experienced analytic cadre. Like the HUMINT capability, building a truly professional analytical cadre takes years of investment in people, technology, and training. The critical skill sets and professional cadres are still too thin and still too few in number. We are still paying the price for the mistakes of the mid-1990s. The good news is, Mr. Speaker, that this bill commits great resources to correct those mistakes.

CIA, FBI, Homeland Security, and other intelligence and law enforcement agencies desperately need qualified analysts. It takes years to develop them, but the development is under way. This committee has seen to that. And this bill is a key measure.

In conclusion, I want to emphasize that the bill before you will significantly help the intelligence agencies increase and sharpen their effectiveness, especially against terrorist groups.

I strongly support this measure, Mr. Speaker. I urge its passage and once again thank the chairman and the ranking member for their leadership in this.

Ms. HARMAN. Mr. Speaker, I yield 2 minutes and 10 seconds to the gentleman from Iowa (Mr. BOSWELL), our committee member who is the ranking member on the Subcommittee on Human Intelligence, Analysis and Counterintelligence.

Mr. BOSWELL. Mr. Speaker, I thank the gentleman from Florida (Chairman GOSS) and the gentlewoman from California (Ms. HARMAN), the ranking member, for their leadership and untiring efforts to work together and produce this very meaningful bill. Plus I have never seen better and more dedicated staff than I have seen on this committee, and I appreciate them very much.

It is basic: we have to have the best possible intelligence to enable our troops and protect our Nation again a basic must-do. So I rise in support of H.R. 2417, the Intelligence Authorization Act of Fiscal Year 2004. What is the bottom line of this bill? The bottom line is that it funds important new intelligence capabilities while demanding accountability and improvement in certain areas.

Here are three examples: first, the conference report requires the intelligence community to conduct a review of lessons learned for military operations in Iraq. Based on the committee's reviews so far of prewar intelligence on Iraq, there were some serious deficiencies in collection and analysis that needed to be fixed, must be fixed. The lessons learned provision is essential and will identify new tools and techniques needed.

Second, as the ranking member of the Subcommittee on Human Intelligence, Analysis and Counterintelligence, I want to strengthen HUMINT collection efforts around the world. In our efforts and briefings and in our committee members' oversight trips to Baghdad and other places, members have talked to dozens of intelligence officers who are fighting the war on terrorism and fighting to win the peace in Iraq. I admire their bravery, their patriotism, and their selfless dedication to duty.

This conference report provides them with tools they need to accomplish their mission. It expands language and cultural expertise in the intelligence agencies. It asks the administration to set up a process for reviewing the laws and guidelines associated with data mining. And it supports new tools for sharing information through the Terrorist Threat Integration Center and

with local officials to the Department of Homeland Security and local FBI joint task force on terrorism.

Finally, the conference report includes measures that will strengthen the capabilities of defense human intelligence. Through further transformation and reform, defense HUMINT will become more flexible, agile, readily responsive to the Department of Defense intelligence requirements. This is a good bill that will protect Americans. I am pleased to support it.

Mr. GOSS. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Illinois (Mr. LAHOOD) who is the chairman of our Subcommittee on Terrorism and Homeland Security. And that subcommittee has, indeed, been hard at work.

Mr. LAHOOD. Mr. Speaker, I rise in support of the Intelligence Authorization Act for fiscal year 2004 and thank our chairman, the gentleman from Florida (Mr. GOSS), for yielding me this time.

I want to compliment the gentleman from Florida (Mr. GOSS) for his extraordinary leadership and the outstanding job that he does and also compliment our ranking member, the gentlewoman from California (Ms. HARMAN), for the good work that she does and the way in which both the chairman and the ranking member are able to work together. I too want to compliment our staff. I think they do a terrific job and work long hours on behalf of really tying to improve intelligence gathering and really keeping the Members posted on what is happening.

Never before have we needed or have we demanded so much of crucial importance from our intelligence community. The intelligence community provides the eyes, ears, and analytical brain power necessary to identify and prevent terrorist attacks. The cataclysmic events of September 11, 2001, provide a unique and compelling mandate for strong leadership and constructive change throughout the intelligence community. This bill adds to that impetus for change.

I believe our committee has authored legislation that strives to fully invest in and engage those economic, military, foreign policy, and law enforcement elements of our intelligence community in the war on terrorism. It strives to employ, integrate, and enhance the capability of the intelligence community to track down and destroy terrorist organizations both overseas and within the United States.

For instance, this legislation supports the attack on international financial support for terrorism, supports the unique analytical capabilities of the Office of Foreign Assets Control at the Treasury Department and further develops these capabilities by establishing the Office of Intelligence Analysis within the Treasury Department. The last measure will streamline and centralize the U.S. Government's capability to track terrorist financial networks around the globe.

As chairman of the Subcommittee on Terrorism and Homeland Security, I am acutely aware of the vital need for our intelligence resources to be marshaled not only on the international front but also in our homeland.

In order to defeat terrorism threats to our Nation, all elements of government must communicate and coordinate more effectively among themselves. The conference report supports efforts to encourage the flow of information, measures including FBI efforts to make internal, structural, and technological changes to improve and expand the use of data mining and other cutting-edge analytical tools; authority for the FBI director to enter into contracts for needed services like language skills, intelligence analysis, and other high-value requirements relate to the flow of information not already available; the creation and nurturing of the Terrorism Threat Integration Center as a central office to monitor threats to the Nation; the inauguration of the Department of Homeland Security's office of Information Analysis and Infrastructure Protection to facilitate timely sharing of relevant information with all appropriate Federal and State and, very importantly, local first responder authorities.

Our committees will continue to encourage the intelligence community development of clear policies and guidelines by which no resource is wasted, no credible terrorist threat left undetected, and threats to our homeland continue to diminish.

The House Permanent Select Committee on Intelligence is very proud of the men and women that serve in the war on terrorism. I am convinced that the bill will make them more effective in their efforts to defend our country. I urge our colleagues to support this legislation.

I would be remiss, though, if I did not say something about what has taken place in what I would characterize as the politicizing of the intelligence gathering in the other body. Specifically, the Senate Select Committee on Intelligence has, I believe, tried to use intelligence gathering as a political vehicle for nothing other than political gain against the President and his team. This is wrong and I decry those who want to use the intelligence efforts of this country for political gain.

These political efforts are unprecedented and I hope the embarrassment brought to bear on the Senate Select Committee on Intelligence will put an end to the charade that has taken place.

Mr. Speaker, at this point I will enter into the RECORD the memo that has been made public that came from the Senate Select Committee on Intelligence.

We have carefully reviewed our options under the rules and believe we have identified the best approach. Our plan is as follows:

(1) Pull the majority along as far as we can on issues that may lead to major new disclosures regarding improper or questionable conduct by Administration officials. We are having some success in that regard. For example, in addition to the President's State of the Union speech, the Chairman has agreed to look at the activities of the Office of the Secretary of Defense (e.g. Rumsfeld, Feith and Wolfowitz) as well as Secretary Bolton's office at the State Department. The fact that the Chairman supports our investigations into these offices, and cosigns our requests for information, is helpful and potentially crucial. We don't know what we will find, but our prospects for getting the access we seek is far greater when we have the backing of the Majority. (Note: We can verbally mention some of the intriguing leads we are pursuing).

(2) Assiduously prepare Democratic "additional views" to attach to any interim or final reports the committee may release. Committee rules provide this opportunity and we intend to take full advantage of it. In that regard, we have already compiled all the public statements on Iraq made by senior Administration officials. We will identify the most exaggerated claims and contrast them with the intelligence estimates that have since been declassified. Our additional views will also, among other things, castigate the majority for seeking to limit the scope of the inquiry. The Democrats will then be in a strong position to reopen the question of establishing an independent commission (i.e. the Corzine amendment).

(3) Prepare to launch an Independent investigation when it becomes clear we have exhausted the opportunity to usefully collaborate with the Majority. We can pull the trigger on an independent investigation of the Administration's use of intelligence at any time—but we can only do so once. The best time to do so will probably be next year either:

(A) After we have already released our additional views on an interim report—thereby providing as many as three opportunities to make our case to the public: (1) Additional views on the interim report; (2) announcement of our independent investigation; and (3) additional views on the final investigation; or

(B) Once we identify solid leads the Majority does not want to pursue. We would attract more coverage and have greater credibility in that context than one in which we simply launch an independent investigation based on principled but vague notions regarding the "use" of intelligence.

In the meantime, even without a specifically authorized independent investigation, we continue to act independently when we encounter foot-dragging on the part of the Majority. For example, the FBI Niger investigation was done solely at the request of the Vice Chairman; we have independently submitted written questions to DoD; and we are preparing further independent requests for information.

Summary

Intelligence issues are clearly secondary to the public's concern regarding the insurgency in Iraq. Yet, we have an important role to play in revealing the misleading—if not flagrantly dishonest methods and motives—of the senior Administration officials who made the case for a unilateral, preemptive war. The approach outline above seems to offer the best prospect for exposing the

Administration's dubious motives and motives.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. LATOURETTE). The Chair would remind all Members it is not appropriate during debate to characterize the actions or inactions in the other body.

Ms. HARMAN. Mr. Speaker, I yield 2½ minutes to the gentlewoman from California (Ms. ESHOO), my colleague and classmate, the ranking member on our Subcommittee on Intelligence Policy and National Security.

Ms. ESHOO. Mr. Speaker, I rise in support of this conference report. And I want to express in the beginning of my comments my appreciation for the hard work, the cooperation of all of my colleagues on the committee, of course, our distinguished chairman and, most particularly, the gentlewoman from California (Ms. HARMAN), who I think really leads us so well on our side and really brings such credit to the work that we do. To the staff of our committee, and, certainly, from where I speak, the minority staff; The word ''intelligence'' is used all the time—I think it resides first with them. They are second to none. And I really salute them for the work they do day in and day out.

This legislation was prepared with our minds still focused on the lessons of September 11 and as the drama in Iraq was unfolding. By these yardsticks this conference report reflects important progress in many areas. One of the most significant lessons to emerge from the joint congressional inquiry into the 9/11 tragedy is the need to improve information-sharing through the extension of modern information technology. Sounds like a no-brainer. But what we have found is that simply was not the case.

The Permanent Select Committee on Intelligence made a concerted effort this year to chart a path to bring the information revolution to the intelligence community. So it is imperative for the Congress to sustain the pressure next year and for the executive branch to embrace this vision.

Regarding so-called data mining of government and private sector databases, this is an extraordinarily large issue, and it contains extensive information on U.S. persons. And this conference report strikes what we believe is the right balance between security and privacy protection for the American people. The American people care about this. The conference report authorizes continued development of data mining tools, but it prohibits their use against domestic databases. It calls for the administration to begin defining the policies, the procedures, and the technologies necessary to safeguard this privacy.

I would like to turn just briefly to the problem of prewar intelligence. The intelligence community has to face up to the problems and the shortcomings in its Iraq estimates. That is why I strongly support the conference report's requirement for the intelligence community to report on lessons learned.

I want to again thank the committee, the committee staff, my colleagues, most especially our gifted leader, the vice chairman of the House Permanent Select Committee on Intelligence.

Mr. GOSS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan (Mr. HOEKSTRA) who is chairman of the Subcommittee on Technical and Tactical Intelligence and, obviously, a critical member of the team who has also been one of our world travelers to places that not everybody wants to go to.

Mr. HOEKSTRA. Mr. Speaker, I rise today in support of H.R. 2417 and the conference report to accompany the 2004 intelligence authorization bill.

Mr. Speaker, I am proud to serve as a member of the Permanent Select Committee on Intelligence. It is my pleasure to commend the leadership and direction of the gentleman from Florida (Chairman GOSS) and the ranking member, the gentlewoman from California (Ms. HARMAN), on this nonpartisan bill at a time in this country's history when it is needed most.

This bill addresses the critical need to review the Nation's imagery capabilities and the intelligence community's strategic plan for an imagery architecture. It is imperative that the community sees into the future with a utility of a cohesive imagery structure that focuses on each technical collection system and how it fits uniquely or with intentional redundancy into this broader framework we call an imagery architecture strategy. I think we have a fair spending plan here that provides the support that is needed, yet challenges the community to see more clearly a comprehensive vision of a much-needed cohesive architecture. Just like an architect, we must have a blueprint.

Mr. Speaker, on that note I would also like to express my disappointment that the choices presented to us in this conference report require us to fund a particular classified collection system within this bill. This system does not fit into what we hope will be our Nation's well-conceived architecture. In fact, it is a transgression. It may perpetuate a series of problems.

I would like to commend my colleague, the gentleman from Nevada (Mr. GIBBONS), for his efforts in spearheading a committee campaign to educate all members of the committee on the pros and cons of this program and to praise him for the impact that he had on the authorization for the program in this bill.

Mr. Speaker, the intelligence community is building a number of tools. I believe we need to use them and use them jointly and across services and agencies. I am glad to say that this bill addresses the need for greater emphasis on tasking, processes, exploitation, and dissemination practices within the intelligence community.

□ 1230

These intelligence systems are becoming so proprietary and so complex and so autonomous that neatly networking them is becoming equally as difficult. It is very important that we observe collectively how these systems are used and by whom for greatest benefit. I believe this bill enforces that concern.

Mr. Speaker, H.R. 2417 supports our intelligence community as it supports our country's defense. Most visibly our intelligence community is fully supporting our military and other personnel in Operation Iraqi Freedom, in Operation Enduring Freedom, at Guantanamo Bay and here in homeland security operations. Mr. Speaker, intelligence is our Nation's first line of defense. We needs to support it and our intelligence professionals who continue to do heroic, but unheralded, work around the globe.

Mr. Speaker, I am pleased that this bill properly supports the intelligence community as it proves our best and first line of defense for America. I urge my colleagues to support H.R. 2417.

Ms. HARMAN. Mr. Speaker, how much time remains?

The SPEAKER pro tempore (Mr. LATOURETTE). The gentlewoman from California (Ms. HARMAN) has 13 minutes remaining. The gentleman from Florida (Mr. GOSS) has 11 minutes remaining.

Ms. HARMAN. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey (Mr. HOLT), another committee member.

Mr. HOLT. Mr. Speaker, as many of my colleagues have already done, I would like to compliment the chairman on his commitment to bipartisanship within the committee, not only in the presentation of this bill but in so many of the committee's activities. The two sides may not see eye to eye on every issue, but the two sides do share a commitment to national security.

I especially want to thank the ranking member, the gentlewoman from California (Ms. HARMAN), for her leadership and bipartisanship. She brings to her position a vigorous commitment to the Nation's intelligence.

Mr. Speaker, I rise in support of H.R. 2417. The bill enhances our Nation's intelligence capabilities in several important ways: In all source analysis, in foreign language capabilities, in human intelligence, in counter-terrorism watchlists and in particular programs. It is a step forward in what is I think a long-term transformation of the intelligence community.

The bill is based on a good measure of oversight, but as I spoke earlier today here, it is difficult to provide the kind of full oversight of such a multifaceted and secretive undertaking, but it is essential that we do so.

Intelligence, like law enforcement and policing, is essential to an orderly society; but like policing, it has great potential for misuse, challenging personal rights and civil liberties and abroad it can harm as well as advance our interests.

It is also essential that we, as a committee, support and stand behind the dedicated people and very talented people who sacrifice so much, sometimes even their lives, to keep alive American ideals.

We know that our intelligence is not perfect. We have a particularly good example of that in the intelligence that led up to and into the war with Iraq. I hope the committee will continue to scrutinize the way in which intelligence on Iraq's threat or perceived threat to the United States may have been deficient and to draw lessons for the future. The committee's oversight of this issue will be especially important if the long-term transformation of the intelligence community is to result in better intelligence.

I hope we will continue to move toward more use of understanding of unclassifieds and open sources. There is often, in fact, more useful knowledge in open sources than from the secret sources that the intelligence community sometimes so depends on.

I am disappointed that this bill does not include my proposal to authorize $10 million for two programs designed to increase language proficiency in America. Inadequate language capabilities actually threaten our national security. We must invest more in the creation of a workforce possessing requisite language skills; and to do this we must build greater proficiency throughout the country. We must increase the pool. There is bipartisan agreement on that, I believe, in the committee.

I appreciate the chairman's commitment to finding a comprehensive solution to intelligence community deficiencies, indeed, national deficiencies in our language capabilities. I look forward to doing that with the chairman in the next session on, as in so many things in this committee, a bipartisan basis.

Mr. GOSS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. CUNNINGHAM), a very dedicated member of our committee who is well known for other capabilities as well.

Mr. CUNNINGHAM. Mr. Speaker, I thank the chairman and the ranking member. This is a good bill. It is a bipartisan effort. The members, the people that have been on the committee and the new members I think have done a good job, and especially the staffs. Everybody should vote for this bill. It is good however, I have some concerns that I would like to bring up, not about the bill, but about the intelligence process.

For years, our military has been drawn and cut down in half. If you look at the Air Wings, the number of services, the number of tanks, the number of ships, the number of Marine Corps, the number of Air Wings that we have, it has almost been cut in half, but yet we ask our military to do almost four times what they did during previous years.

Now, how does that effect the intelligence community? Because every time DOD is deployed, our intelligence agents have to deploy with them. We spread them thin. And there are Members in this body and the other body that continually, through their liberal views, choose to cut defense and intel to pay for social programs.

Now, those in many cases are the same Members that I have heard get up on this floor and in the other body talk about, oh, how devastating it is that we do not have enough body armor for our troops or we cannot upgrade Humvees or that George Tenent should be replaced. But in some cases, those same Members have voted to cut the funding necessary to give those individuals the tools they need to do their job, and that is wrong.

You will not see that portion in any report that we have done either in this body or the other body, because I do not think they have got the guts to put it in there. They will not point at themselves, because they won't give our kids and our intel folks the funding that they need.

We have older systems that have been drawn out. In the previous administration, we went into Haiti and Somalia. Those places are the hell holes of the Earth, and they are still there. Look at Kosovo, the number of missions. You know how many tanks we sunk in Kosovo? Five. We destroyed a country, but we had five kills and we wore out our equipment. Guess what? CIA and intel and NSA, they were all involved in that, and we spread them thin. So I would caution the Members who chastise Mr. Tenent or any of the other leadership that we put in those positions because we need to give them the tools to do their job. They are hard working, dedicated individuals, spread to thin.

The other thing that I would bring up that upsets me is that there have been some memos using this committee in the other body as a partisanship tool to take a majority and the White House. That is wrong. During a time of war, Mr. Speaker, that does disservice to this Nation, to this committee and to the American people.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would again remind Members it is not appropriate during the debate to characterize actions or inactions in the other body.

Ms. HARMAN. Mr. Speaker, I yield myself 10 seconds.

I would just point out that Members on our side strongly support the women and men in the field who work in our intelligence community. I assume the prior speaker is aware of that.

We also, to my knowledge, have not produced any memos around here that could be characterized as divisive. We are all pulling in the same direction, and that is, hopefully, to enhance our national security.

Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. HASTINGS), a senior member of our committee and a senior member of the Committee on Rules.

Mr. HASTINGS of Florida. Mr. Speaker, I thank my friend, the ranking member, and she is my friend, for yielding me time.

Mr. Speaker, I regret that the gentleman from California (Mr. CUNNINGHAM), our colleague on the other side who just spoke, has left the room. For I did want to remind him what the ranking member just has said and that is every member of the House Permanent Select Committee on Intelligence vigorously and actively supports the intelligence community in its entirety and fully recognizes the extraordinary and dangerous work that they do on behalf of this great Nation.

I rise in support of this measure. As ranking member of the Subcommittee on Terrorism and Homeland Security, I have had the privilege to meet many talented and dedicated intelligence professionals. I sincerely appreciate the sacrifices they have made to ensure that United States interests both in our homeland and abroad are protected. We must make a continued investment in human resources, our greatest intelligence assets. This bill does that by increasing funds available for language proficiency maintenance and awards initiatives and providing specialized training for collectors and analysts.

I am pleased that this bill also includes a provision similar to one I offered on the House floor. It requires the intelligence community to establish a pilot project to recruit people of diverse ethnic and cultural backgrounds and those proficient in critical foreign languages. Annual statistics, and the committee's November 5 public diversity hearing demonstrate that the intelligence community continues to lag behind the Federal workforce and the private sector in the number of women and minorities in its ranks, especially in core mission areas. Clearly, more must be done to increase diversity across the intelligence community. I believe that this pilot project is another important step in this regard.

Finally, it is important to note that this bill authorizes only part of the operating funds for the intelligence community. A huge portion of intelligence funds were provided in the $87 billion Iraqi counterterrorism supplemental and in the supplementals that proceeded it. I am extremely concerned about our government's increasing overreliance on supplemental appropriations.

Budgeting by supplementals greatly undermines the committees's ability to effectively oversee how funds appropriated by Congress are spent. I fear this trend may lead to less accountability in the budget building and accounting process, a perhaps unintended, but nonetheless unacceptable, consequence.

On balance, this bill does much to enhance our Nation's international security efforts. For this reason, I urge my colleagues to support it. I am prepared at this time to support this measure.

Mr. GOSS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Nebraska (Mr. BEREUTER), the vice chairman of the committee.

Mr. BEREUTER. Mr. Speaker, I thank the chairman for yielding me additional time.

I did want to mention in response to what the gentleman from New Jersey (Mr. HOLT) said about the language issue, I have been charged with the responsibility, with the help of the gentlewoman from California (Ms. ESHOO), for taking on this subject and seeking broadly the sources of information to give us the best product. My hope is that we will have a separate bill on the subject of language training and recruitment before the House some 4 to 6 months after the next session of Congress is convened.

I also wanted to speak further on the HUMIT issue. Our distinguished colleague from Nevada (Mr. GIBBONS) has emphasized the importance of this issue very well, but I want to bring up a couple of other points.

I mentioned, of course, that we are focussed heavily on the terrorist conflicts that create so many problems for us in places like Afghanistan and Iraq. However, we do have global responsibilities. So the intelligence community needs to continue to provide timely, actionable intelligence on a host of potential threats from nuclear proliferation threats on the Korean peninsula, from narcotraffickers in the jungles of Colombia, from collapsing regimes in West Africa.

Mr. Speaker, I would emphasize for our colleagues, and all Americans, that we live in a new world and face new and more terrible threats. In many ways, information gathering was easier when the threat was the Soviet Union. Frankly, the intelligence community has been slow in adapting to this new environment.

In the judgment of this Member, our intelligence service did not reach out aggressively to recruit the human intelligence sources that would have provided us with valuable information.

In our previous authorization bill, we corrected one of the reasons for that failure in asset recruitment. Also, because of budgetary restraints, the intelligence community in the mid-1990s lost far too many of its skilled analysts whose job was to provide early warning. This legislation provides much-needed funding to further rebuild a dynamic, wide-ranging global analytical capability. But we should be under no illusion. It takes years to develop skilled analysts who are able to connect the dots and provide our policy makers with timely information.

□ 1245

Mr. Speaker, we have made a start here. This is good legislation. I urge its support and I thank the chairman for yielding me this time.

Ms. HARMAN. Mr. Speaker, my understanding is there is an additional speaker on the other side, and then the gentleman from Florida (Chairman GOSS) obviously has the right to close. I would reserve our time until all speakers but the chairman have spoken.

Mr. GOSS. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Idaho (Mr. OTTER).

Mr. OTTER. Mr. Speaker, I thank the chairman for this time that he has offered me today.

I rise in deep concern over a provision in this legislation. Like most of my colleagues, I supported H.R. 2417 when it came before the House in June; but after tertiary review, I find that there is a provision in the bill that potentially has long-reaching effects on civil liberties. H.R. 2417 includes a provision that would expand the FBI's power to demand financial records, without a judge's approval, to a large range of businesses, vastly wider than their current authority.

Right now the FBI has the authority to serve subpoenas to traditional financial institutions when investigating terrorism and counterintelligence without having to seek a judge's approval. The law understands the phrase ''financial institutions'' as we do: banks, loan companies, savings associations and credit unions. Currently, these are the types of institutions subject to administrative subpoenas.

The provision in this bill, however, uses a definition of financial institutions to decide what organizations are subject to administrative subpoenas. Under this bill, not only are the traditional financial institutions like banks and credit unions affected but so are pawnbrokers, casinos, vehicle salesmen, real estate agents, telegraph companies, travel agencies, the U.S. Postal Service, just to name but a few.

Winning the war against terrorism is indeed vital, Mr. Speaker, and we must make sure that our law enforcement officials have the tools necessary to engage this war and win these battles. The FBI's need for authority to subpoena these groups in order to track and find and shut down terrorist operations is not in question, and I do not question that. However, under these provisions, the FBI no longer needs a court order to serve such a subpoena on a new and lengthy laundry list of financial institutions. With this legislation, we eliminate the judicial oversight that was built into our system for a reason, to make sure that our precious liberties are protected.

In our fight for our Nation to make the world a safe place, we must not turn our backs on our own freedoms. Expanding the use of administrative subpoenas and threatening our system of checks and balance is a step in the wrong direction.

Ms. HARMAN. Mr. Speaker, how much time remains?

The SPEAKER pro tempore (Mr. LATOURETTE). The gentlewoman from California (Ms. HARMAN) has 7 minutes remaining, and the gentleman from Florida (Mr. GOSS) has 4 minutes remaining.

Ms. HARMAN. Mr. Speaker, I am the concluding speaker on our side, and I yield myself such time as I may consume.

Let me say first that the views of the prior speaker are views I share. I am sad to hear that he will oppose the bill, but I certainly agree that we need to be sure we are narrowing the reach of these national security letters and limiting them only to financial transactions. It is important that we find terrorists.

It is important that we track terrorist financing; but it is, by my lights, risky to fail to include additional language in the bill or the report that would make clear what our intent is. I hope this new authority will not be abused. I will certainly be watching it carefully, and I do appreciate the fact that the prior speaker expanded on what abuses could potentially occur.

Mr. Speaker, first I would like to thank the women and men who work in our intelligence community around the world. I have been to austere places all over the world, and I have met women and men who work in the most dangerous conditions who put our security first, ahead of theirs, and who leave their families at home and take enormous risks for our country. I salute them. I know how dangerous their jobs are. I appreciate what they do every single day.

And particularly, let me say today to our intelligence community in Iraq and in Turkey and places that are under siege, I really appreciate what they are doing. I thank them very much.

I also want to say thank you to the members of this committee. All of them work hard. There is bipartisanship in this committee, and I thank the

gentleman from Florida (Mr. GOSS) for the partnership we have had over some years now.

Let me thank the hardworking staff on a bipartisan basis. Every one of them works enormously hard, and I would just like to recognize the eight minority staffers, most of whom are sitting around me right now: Suzanne Spaulding, the minority chief of staff; Bob Emmett; John Keefe; Beth Larson; Marcel Lettre; Kirk McConnell; Wyndee Parker; and Ilene Romack. Thank you every day for what you do.

Let me just make three concluding points. First, facing tough issues. It is absolutely critical at a time when security risks are expanding around the world that we face tough issues; that Congress face tough issues and ask tough questions; and that the intelligence community, which tries hard but has not always delivered perfect products, face tough issues, go through this lessons learned exercise and learn from wrong judgments that were made or inadequate collection that occurred so that the next products that are prepared by good people can be the best possible products. Please let us face tough issues.

Second of all, I want to make the point that our oversight in this committee on a bipartisan basis requires constructive criticism of the intelligence community. We have done this over the years. Last year, we issued a tough report. The Subcommittee on Terrorism and Homeland Security, of which I was ranking member and Mr. CHAMBLISS, who is now in the other body, was chairman, issued a tough report on some of the problems in intelligence leading up to 9/11. That report was constructive criticism. Some of the recommendations we made have been heeded; some have not. Constructive criticism, asking tough questions are things we properly should do.

Finally, let me suggest again to the intelligence community that it is important to engage in dialogue with this committee. Shrill press releases are not dialogue. Quiet conversations, talking about how we see things, what we think can be improved, why it needs to be improved, will get the job done.

This bill provides many new resources, many, many new resources, and is carefully crafted to suggest best directions for the intelligence community. We have confidence in the people who work there. We are proud of them. We thank them. We are trying to help them do better.

I urge support of this authorization conference report.

Mr. Speaker, I yield back the balance of my time.

Mr. GOSS. Mr. Speaker, I yield myself the remaining time.

I just want to take a few minutes to congratulate my ranking member for the superb job that she has done on her side of the aisle in this conference report and throughout the year. To say she is hardworking and dedicated does not quite get it. I have words here that say her determination is fierce and she is definitely a force to be reckoned with. That does not quite say it either. She is a very valuable asset, and we are very grateful for her energies and suggestions and leadership and the way she goes about her business.

This is her very first conference report as ranking member I think, if I have got my history right; and she obviously was of significant importance in bringing the report through for the authorization bill that the House did, but she was also significantly helpful in the negotiations with the other body which I am not allowed to mention.

I would also like to thank each and every member of HPSCI for their undying dedication to the security of our Nation and the protection of the people of the United States. That is what we do. Each member works very hard learning the business of intelligence, and it is not an easy subject. What they come to understand in that process is that this Nation is far better off with our intelligence professionals than we would be without them. I know sometimes the debate rages about whether intelligence is an appropriate thing for gentlemen to be discussing in a civilized society. Well, I can tell my colleagues we could not exist without it.

The rank-and-file employees of the intelligence community every day, as the gentlewoman has said, protect the very liberties we cherish. They do it day in and day out; and as they go about gathering the secrets and information necessary for our policy-makers to make the very tough decisions they have to make, they incur a lot of risk. The members of the HPSCI understand this pretty clearly. That is because we have been out and about and talking to them. We do travel a lot. We go to the places that not everybody wants to go to. We get into the issues not everybody wants to fool around with. Frankly, that is why it is easy to leave partisanship outside the door of the committee chamber.

Finally, I want to thank committee staff, all HPSCI staff, all sides, both together, including, obviously, Democratic members and Republican members and those who do not want to declare either side who we call our support staff. Without staff support, it is obviously their expertise, their dedication, our committee would not do much of anything.

They do work late hours. I know that occasionally when I work late hours I find them there. I find them occasionally when I come in early I find them there. They do wonderful things for us, and they get very little recognition. I know a lot of the work is tedious and mundane and a lot of it is exciting, and I appreciate their contributions in all of those areas.

The other thing I know for sure is the work space up there leaves a lot to be desired, and I promise we are going to work on a lavatory soon. We do feel the days have come when there is indoor plumbing, and we should acknowledge that on the Permanent Select Committee on Intelligence.

Everybody deserves congratulatory words today, and I want to thank everybody, and I mean that very sincerely.

There is one person on the committee I am going to single out today, though, who serves as the committee's budget director who is entitled, I think, for specific recognition this year. Mike Meermans has served the government for now, I am told, 30 years, in fact something in excess of that. Among other jobs in the United States he served in the United States Air Force, and he has been engaged by the government as an Arab linguist. Mike has been with HPSCI since 1995. This is his 8th year on the committee.

It has been a very trying year for Mike, whose college-age son early in the year was diagnosed with cancer. Throughout his son's course of treatment, Mike was by his side, I know, every step of the way, being a great father, and all the while managing the committee's authorization process, crunching numbers, writing the report language, negotiating with the executive branch and with the other body, and frankly, getting into mysteries in the intelligence community that I find too complex to understand. He did all of this with energy, with fortitude and aplomb. He is the manifestation of the wonderful and professional staff which HPSCI is blessed with and is well served by.

I just wanted to say to Mike that he is appreciated not just for his legislative talents but more so because he is a good guy. He is a nice guy, a great father. His only purpose in serving HPSCI is actually to make America stronger, and this year when he had family duties, he understood those as well and met them.

To his wife, Lois, and their family, especially their son Brian, I thank them for allowing him to work so hard for us, and I am sorry we had to take him away so much of the time. We are better and the Nation is stronger because of him, and their pride in him is very well deserved. We share that pride.

Mike, for you, thank you for all your hard work in years past, this year especially. You made an extremely difficult year for you personally a successful year for the committee. You made it seem routine. We are all extremely happy to hear your son is on the mend and recently received more good news from the doctors. Our prayers for continuous good news are with you. You deserve our gratitude, and we express it here now.

I also want to say that about a year ago we were just packaging up the joint inquiry product. We had an extensive effort with our colleagues in the other body to understand 9/11, what went wrong. We came up with a good report. It was a long one. I think it steered us in some directions that corrections have already been taken. It also created a follow-on commission, the national commission, which is at work now under the leadership of Governor Kean and former member Lee Hamilton, for whom we have great admiration. I think that I should point out to the people in the United States of America that we are part of the review they are doing. We have invited them to conduct oversight of how we do oversight. So the American people can be reassured that there is oversight of the intelligence community, and some of the things we cannot talk about are indeed watched by others.

My time has come to an end. We have had a good year. We look for a better year ahead dealing with capabilities to make sure our country is safer.

Mr. OXLEY. Mr. Speaker, I rise in support of the conference report for H.R. 2417, the Intelligence Authorization Act for Fiscal Year 2004, and to note the Financial Services Committee's interest in three sections of the report. All of the sections seek to improve this country's ability to fight the financing of terrorists, and I wholeheartedly support them.

Section 105 of the report establishes an Office of Intelligence and Analysis within the Department of the Treasury, headed by an Assistant Secretary appointed by the President after consultation with the Director of Central Intelligence. Formation of the office is necessary because the Treasury's Office of Foreign Assets Control and its Financial Crimes Enforcement Network are essential tools in the fight against the funding of terrorism, but today lack access to some "secure" information essential to that effort. Establishment of the office creates a secure channel for that information to flow, as necessary, to FinCEN and OFAC, and for them to send back appropriate information.

Section 374 modernizes the definition of financial institutions that may be served administrative subpoenas, as rigidly controlled by the existing Right to Financial Privacy Act. When that Act was written, banks were really the only "financial Institutions" a terrorist might have used to stash or transfer money. As our efforts to stamp out terror financing have become more successful, a lot of that activity has moved over into other, less-traditional sorts of financial-services businesses—even, for example, to dealers in precious commodities such as gold or diamonds. The USA PATRIOT Act appropriately expanded the definition of "financial institution" to include these other financial-services businesses. This section establishes parity in the definition of "financial institution" between the PATRIOT Act and the RFPA, allowing the judicious use of administrative subpoenas in terror cases to reflect this larger universe of businesses that might be exploited. Here I must note my discomfort that the conference report ignores the Financial Services Committee's request that Section 374 include the right to injunctive relief as provided for in Section 1118 of the Right to Financial Privacy Act.

Section. 376 allows for the "in camera" review of sensitive information that leads to imposition of "special measures" isolating rogue countries or banks, as defined under Sec. 311 of the PATRIOT Act. Under the previous version of Sec 311, there is no ability to protect this sensitive information should it be necessary for the imposition of the "special measures," and that omission argues against use of the powers as effectively as we would like. For example, if the Central Intelligence Agency should have information that a bank were doing business with a terrorist, it quite possibly would be counterproductive to expose the CIA's sources and methods to indict individuals or shut down the bank, but the Treasury's "special measures" under Sec. 311 could effectively isolate the bank if the sensitive information could be used "in camera." This section merely provides protection of that sensitive information that might be used to support the imposition of those measures.

Mr. Speaker, these three sections are all important tools in the fight against terrorism, and I strongly support their inclusion. I regret that Section 1118 was not reference in the report's Section 374, and the Financial Services Committee reserves the right to address that issue later. Meanwhile, I support the conference report and ask for its immediate passage.

Mr. CONYERS. Mr. Speaker, I rise to state my opposition to a provision in this conference report that intrudes on our civil liberties and will do little, if anything, to protect us from terrorism.

I think it is important that law enforcement have the powers it needs to investigate acts of money laundering that are connected to terrorism and espionage, but we must ensure those powers are reasonable and appropriately crafted. Current law already gives the FBI the ability to obtain financial records from various financial institutions, which are defined as banks, savings and loans, thrifts, and credit unions, with little or no judicial oversight. In fact, the government can delay notification to a court that it has sought such records if it merely certifies in writing that it required emergency access to the documents.

Now, the FBI is seeking investigative authorities beyond what are necessary for terrorism and intelligence investigations. Section 374 of the conference report would give the FBI even more unfettered authority by subjecting a broader group of "financial institutions" to the FBI's special investigative authorities. The FBI would be able to seek financial records not only from traditional financial institutions but also from pawnbrokers, travel agencies, car dealers, boat sellers, telegraph companies, and persons engaged in real estate transactions, among others.

The record of the Bush administration demonstrates that this provision is a significant intrusion on our civil liberties that will not be used to protect us from terrorism. In the days after September 11, the administration demanded from Congress expanded powers to root out terrorist activity. Congress granted much of those powers in the form of the USA PATRIOT Act, but the administration has yet to justify how it has used those powers to find the planners of the 2001 attacks or to thwart other, planned attacks. Instead, the administration returns to Congress with requests for more authorities, such as this one, in a grab for power.

For these reasons, I urge my colleagues to vote "no" on this conference report.

Mr. KUCINICH. Mr. Speaker, I stand today strongly opposed to the Conference Report on H.R. 2417, the Intelligence Authorization Act for FY 2004.

Although the House of Representatives recently voted in a bi-partisan and overwhelming fashion to repeal Section 213 of the PATRIOT Act, a provision that threatens Americans' rights by allowing for "sneak and peak searches", it appears the administration is poised to move ahead with further actions that endanger civil liberties by slipping an expanded PATRIOT Act power in the Intelligence Conference Report.

The hidden measure would significantly expand the FBI's power to acquire financial records without judicial oversight from car dealers, pawnbrokers, travel agencies, and many other businesses. Traditional financial institutions like banks and credit unions are already subject to such demands, but this dramatic expansion of government authority will mean that records created by average citizens who purchase cars, plan vacations, or buy gifts will be subject to government seizure and analysis without the important requirements of probable cause or judicial review.

This provision initially appeared in a leaked draft of so-called "PATRIOT II", a proposal the American public and Members on both sides of the aisle in the House and Senate publicly rejected. It is now clear the administration's strategy is to pass PATRIOT II in separate pieces with little public debate and surreptitiously attached to other legislation. This is far from an appropriate or democratic way to handle issues that affect the fundamental liberties and freedoms of Americans.

I urge the administration and the Attorney General to openly and honestly return to Congress to discuss options that curtail, not expand, the PATRIOT Act to make it consistent with the United States Constitution. I also urge my colleagues to vote against the Intelligence Conference Report and this unnecessary and dangerous expansion of the government's assault on civil liberties.

Mr. GOSS. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GOSS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 3182. An act to reauthorize the adoption incentive payments program under part E of title IV of the Social Security Act, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 1904) ''An Act to improve the capacity of the Secretary of Agriculture and the Secretary of the Interior to plan and conduct hazardous fuels reduction projects on National Forest System lands and Bureau of Land Management lands aimed at protecting communities, watersheds, and certain other at-risk lands from catastrophic wildfire, to enhance efforts to protect watersheds and address threats to forest and rangeland health, including catastrophic wildfire, across the landscape, and for other purposes,'' disagreed to by the House and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. COCHRAN, Mr. MCCONNELL, Mr. CRAPO, Mr. DOMENICI, Mr. HARKIN, Mr. LEAHY, and Mr. DASCHLE, to be the conferees on the part of the Senate.

□ 1300

RECESS

The SPEAKER pro tempore (Mr. LATOURETTE). Pursuant to clause 12(a) of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 1 p.m.), the House stood in recess subject to the call of the Chair.

□ 1335

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. LATOURETTE) at 1 o'clock and 35 minutes p.m.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on questions previously postponed. Votes will be taken in the following order:

House Joint Resolution 78, by the yeas and nays;

conference report on H.R. 2417, by the yeas and nays;

motion to instruct on H.R. 1, by the yeas and nays; and

motion to instruct on H.R. 2660, by the yeas and nays.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2004

The SPEAKER pro tempore. The pending business is the vote on the passage of the joint resolution, H.J. Res. 78, on which the yeas and nays are ordered.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The vote was taken by electronic device, and there were—yeas 410, nays 10, not voting 14, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. LATOURETTE) (during the vote). Members are advised there are 2 minutes remaining in this vote.

Mr. TERRY changed his vote from ''nay'' to ''yea.''

□ 1358

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mrs. BLACKBURN. Mr. Speaker, on rollcall No. 648, I was unavoidably detained. Had I been present, I would have voted "yea."

Mr. RUPPERSBERGER. Mr. Speaker, on November 20, 2003, I was attending the funeral of my long time friend and one of my dearest colleagues, Maryland State Delegate Howard P. Rawlings, chairman of the Maryland's House Appropriations Committee. Because of the services, I was unable to make rollcall vote 648.

If I were present, on rollcall vote 648, I would have voted "yea."

CONFERENCE REPORT ON H.R. 2417, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2004

The SPEAKER pro tempore. The pending business is the question of agreeing to the conference report on the bill, H.R. 2417, on which the yeas and nays are ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the conference report.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 264, nays 163, not voting 7, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. LATOURETTE) (during the vote). Members are advised there are 2 minutes remaining in this vote.

□ 1415

Ms. JACKSON-LEE of Texas, Ms. MCCOLLUM, Ms. MCCARTHY of Missouri, Ms. BERKLEY, Messrs. KENNEDY of Rhode Island, BAIRD, ACKERMAN, JEFFERSON, OBEY, HOEFFEL, Mrs. CAPPS, Messers. VAN HOLLEN, WYNN, PENCE, THOMPSON of Mississippi, PALLONE, LANGEVIN, Ms. HOOLEY of Oregon, Mr. TANNER, Ms. LORETTA SANCHEZ of California, Messrs. BISHOP of New York, JONES of North Carolina, MANZULLO, LAMPSON, DINGELL, LEACH, HOLDEN, ROTHMAN, Ms. LINDA T. SÁNCHEZ of California, Messrs. KIND, BALLANCE, MCNULTY, JOHNSON of Illinois, MATSUI, GREEN of Texas, TAYLOR of Mississippi, HILL, GONZALEZ, COOPER, SANDLIN, CASE of Hawaii, ROSS, PRICE of North Carolina, MILLER of North Carolina, ETHERIDGE, Ms. ROYBAL-ALLARD, Mr. SPRATT, Mr. MOORE and Mr. BACA changed their vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MOTION TO INSTRUCT CONFEREES ON H.R. 1, MEDICARE PRESCRIPTION DRUG AND MODERNIZATION ACT OF 2003

The SPEAKER pro tempore. The unfinished business is the question on the motion to instruct conferees on H.R. 1.

The Clerk will designate the motion.

The Clerk designated the motion.

The SPEAKER pro tempore. The question is on the motion to instruct conferees offered by the gentlewoman from Oregon (Ms. HOOLEY) on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 201, nays 222, not voting 11, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. TERRY) (during the vote). Members are advised there are 2 minutes remaining in this vote.

□ 1423

Mr. ROYCE changed his vote from ''yea'' to ''nay.''

So the motion to instruct was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Ms. SLAUGHTER. Mr. Speaker, I was unable to be present for rollcall vote 650. Had I been present, I would have voted ''yea'' on rollcall vote 650.

MOTION TO INSTRUCT CONFEREES ON H.R. 2660, DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2004

The SPEAKER pro tempore. The unfinished business is the question on the motion to instruct conferees on H.R. 2660.

The Clerk will designate the motion.

The Clerk designated the motion.

The SPEAKER pro tempore. The question is on the motion to instruct offered by the gentleman from Michigan (Mr. KILDEE).

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 360, nays 64, not voting 10, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised there are 2 minutes left in this vote.

□ 1430

Mr. TERRY changed his vote from ''nay'' to ''yea.''

So the motion to instruct was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. TERRY). Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken later.

21ST CENTURY NANOTECHNOLOGY RESEARCH AND DEVELOPMENT ACT

Mr. BOEHLERT. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 189) to authorize appropriations for nanoscience, nanoengineering, and nanotechnology research, and for other purposes.

The Clerk read as follows:

S. 189

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''21st Century Nanotechnology Research and Development Act''.

SEC. 2. NATIONAL NANOTECHNOLOGY PROGRAM.

(a) NATIONAL NANOTECHNOLOGY PROGRAM.—The President shall implement a National Nanotechnology Program. Through appropriate agencies, councils, and the National Nanotechnology Coordination Office established in section 3, the Program shall—

(1) establish the goals, priorities, and metrics for evaluation for Federal nanotechnology research, development, and other activities;

(2) invest in Federal research and development programs in nanotechnology and related sciences to achieve those goals; and

(3) provide for interagency coordination of Federal nanotechnology research, development, and other activities undertaken pursuant to the Program.

(b) PROGRAM ACTIVITIES.—The activities of the Program shall include—

(1) developing a fundamental understanding of matter that enables control and manipulation at the nanoscale;

(2) providing grants to individual investigators and interdisciplinary teams of investigators;

(3) establishing a network of advanced technology user facilities and centers;

(4) establishing, on a merit-reviewed and competitive basis, interdisciplinary nanotechnology research centers, which shall—

(A) interact and collaborate to foster the exchange of technical information and best practices;

(B) involve academic institutions or national laboratories and other partners, which may include States and industry;

(C) make use of existing expertise in nanotechnology in their regions and nationally;

(D) make use of ongoing research and development at the micrometer scale to support their work in nanotechnology; and

(E) to the greatest extent possible, be established in geographically diverse locations, encourage the participation of Historically Black Colleges and Universities that are part B institutions as defined in section 322(2) of the Higher Education Act of 1965 (20 U.S.C. 1061(2)) and minority institutions (as defined in section 365(3) of that Act (20 U.S.C. 1067k(3))), and include institutions located in States participating in the Experimental Program to Stimulate Competitive Research (EPSCoR);

(5) ensuring United States global leadership in the development and application of nanotechnology;

(6) advancing the United States productivity and industrial competitiveness through stable, consistent, and coordinated investments in long-term scientific and engineering research in nanotechnology;

(7) accelerating the deployment and application of nanotechnology research and development in the private sector, including startup companies;

(8) encouraging interdisciplinary research, and ensuring that processes for solicitation and evaluation of proposals under the Program encourage interdisciplinary projects and collaborations;

(9) providing effective education and training for researchers and professionals skilled in the interdisciplinary perspectives necessary for nanotechnology so that a true interdisciplinary research culture for nanoscale science, engineering, and technology can emerge;

(10) ensuring that ethical, legal, environmental, and other appropriate societal concerns, including the potential use of nanotechnology in enhancing human intelligence and in developing artificial intelligence which exceeds human capacity, are considered during the development of nanotechnology by—

(A) establishing a research program to identify ethical, legal, environmental, and other appropriate societal concerns related to nanotechnology, and ensuring that the results of such research are widely disseminated;

(B) requiring that interdisciplinary nanotechnology research centers established under paragraph (4) include activities that address societal, ethical, and environmental concerns;

(C) insofar as possible, integrating research on societal, ethical, and environmental concerns with nanotechnology research and development, and ensuring that advances in nanotechnology bring about improvements in quality of life for all Americans; and

(D) providing, through the National Nanotechnology Coordination Office established in section 3, for public input and outreach to be integrated into the Program by the convening of regular and ongoing public discussions, through mechanisms such as citizens' panels, consensus conferences, and educational events, as appropriate; and

(11) encouraging research on nanotechnology advances that utilize existing processes and technologies.

(c) PROGRAM MANAGEMENT.—The National Science and Technology Council shall oversee the planning, management, and coordination of the Program. The Council, itself or through an appropriate subgroup it designates or establishes, shall—

(1) establish goals and priorities for the Program, based on national needs for a set of broad applications of nanotechnology;

(2) establish program component areas, with specific priorities and technical goals, that reflect the goals and priorities established for the Program;

(3) oversee interagency coordination of the Program, including with the activities of the Defense Nanotechnology Research and Development Program established under section 246 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107–314) and the National Institutes of Health;

(4) develop, within 12 months after the date of enactment of this Act, and update every 3 years thereafter, a strategic plan to guide the activities described under subsection (b), meet the goals, priorities, and anticipated outcomes of the participating agencies, and describe—

(A) how the Program will move results out of the laboratory and into application for the benefit of society;

(B) the Program's support for long-term funding for interdisciplinary research and development in nanotechnology; and

(C) the allocation of funding for interagency nanotechnology projects;

(5) propose a coordinated interagency budget for the Program to the Office of Management and Budget to ensure the maintenance of a balanced nanotechnology research portfolio and an appropriate level of research effort;

(6) exchange information with academic, industry, State and local government (including State and regional nanotechnology programs), and other appropriate groups conducting research on and using nanotechnology;

(7) develop a plan to utilize Federal programs, such as the Small Business Innovation Research Program and the Small Business Technology Transfer Research Program, in support of the activity stated in subsection (b)(7);

(8) identify research areas that are not being adequately addressed by the agencies' current research programs and address such research areas;

(9) encourage progress on Program activities through the utilization of existing manufacturing facilities and industrial infrastructures such as, but not limited to, the employment of underutilized manufacturing facilities in areas of high unemployment as production engineering and research testbeds; and

(10) in carrying out its responsibilities under paragraphs (1) through (9), take into consideration the recommendations of the Advisory Panel, suggestions or recommendations developed pursuant to subsection (b)(10)(D), and the views of academic, State, industry, and other appropriate groups conducting research on and using nanotechnology.

(d) ANNUAL REPORT.—The Council shall prepare an annual report, to be submitted to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science, and other appropriate committees, at the time of the President's budget request to Congress, that includes—

(1) the Program budget, for the current fiscal year, for each agency that participates in the Program, including a breakout of spending for the development and acquisition of research facilities and instrumentation, for each program component area, and for all activities pursuant to subsection (b)(10);

(2) the proposed Program budget for the next fiscal year, for each agency that participates in the Program, including a breakout of spending for the development and acquisition of research facilities and instrumentation, for each program component area, and for all activities pursuant to subsection (b)(10);

(3) an analysis of the progress made toward achieving the goals and priorities established for the Program;

(4) an analysis of the extent to which the Program has incorporated the recommendations of the Advisory Panel; and

(5) an assessment of how Federal agencies are implementing the plan described in subsection (c)(7), and a description of the amount of Small Business Innovative Research and Small Business Technology Transfer Research funds supporting the plan.

SEC. 3. PROGRAM COORDINATION.

(a) IN GENERAL.—The President shall establish a National Nanotechnology Coordination Office, with a Director and full-time staff, which shall—

(1) provide technical and administrative support to the Council and the Advisory Panel;

(2) serve as the point of contact on Federal nanotechnology activities for government organizations, academia, industry, professional societies, State nanotechnology programs, interested citizen groups, and others to exchange technical and programmatic information;

(3) conduct public outreach, including dissemination of findings and recommendations of the Advisory Panel, as appropriate; and

(4) promote access to and early application of the technologies, innovations, and expertise derived from Program activities to agency missions and systems across the Federal Government, and to United States industry, including startup companies.

(b) FUNDING.—The National Nanotechnology Coordination Office shall be funded through interagency funding in accordance with section 631 of Public Law 108–7.

(c) REPORT.—Within 90 days after the date of enactment of this Act, the Director of the Office of Science and Technology Policy shall report to the Senate Committee on Commerce, Science, and Transportation, and the House of Representatives Committee on Science on the funding of the National Nanotechnology Coordination Office. The report shall include—

(1) the amount of funding required to adequately fund the Office;

(2) the adequacy of existing mechanisms to fund this Office; and

(3) the actions taken by the Director to ensure stable funding of this Office.

SEC. 4. ADVISORY PANEL.

(a) IN GENERAL.—The President shall establish or designate a National Nanotechnology Advisory Panel.

(b) QUALIFICATIONS.—The Advisory Panel established or designated by the President under subsection (a) shall consist primarily of members from academic institutions and industry. Members of the Advisory Panel shall be qualified to provide advice and information on nanotechnology research, development, demonstrations, education, technology transfer, commercial application, or societal and ethical concerns. In selecting or designating an Advisory Panel, the President may also seek and give consideration to recommendations from the Congress, industry, the scientific community (including the National Academy of Sciences, scientific professional societies, and academia), the defense community, State and local governments, regional nanotechnology programs, and other appropriate organizations.

(c) DUTIES.—The Advisory Panel shall advise the President and the Council on matters relating to the Program, including assessing—

(1) trends and developments in nanotechnology science and engineering;

(2) progress made in implementing the Program;

(3) the need to revise the Program;

(4) the balance among the components of the Program, including funding levels for the program component areas;

(5) whether the program component areas, priorities, and technical goals developed by the Council are helping to maintain United States leadership in nanotechnology;

(6) the management, coordination, implementation, and activities of the Program; and

(7) whether societal, ethical, legal, environmental, and workforce concerns are adequately addressed by the Program.

(d) REPORTS.—The Advisory Panel shall report, not less frequently than once every 2 fiscal years, to the President on its assessments under subsection (c) and its recommendations for ways to improve the Program. The first report under this subsection shall be submitted within 1 year after the date of enactment of this Act. The Director of the Office of Science and Technology Policy shall transmit a copy of each report under this subsection to the Senate Committee on Commerce, Science, and Technology, the House of Representatives Committee on Science, and other appropriate committees of the Congress.

(e) TRAVEL EXPENSES OF NON-FEDERAL MEMBERS.—Non-Federal members of the Advisory Panel, while attending meetings of the Advisory Panel or while otherwise serving at the request of the head of the Advisory Panel away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the government serving without pay. Nothing in this subsection shall be construed to prohibit members of the Advisory Panel who are officers or employees of the United States from being allowed travel expenses, including per diem in lieu of subsistence, in accordance with existing law.

(f) EXEMPTION FROM SUNSET.—Section 14 of the Federal Advisory Committee Act shall not apply to the Advisory Panel.

SEC. 5. TRIENNIAL EXTERNAL REVIEW OF THE NATIONAL NANOTECHNOLOGY PROGRAM.

(a) IN GENERAL.—The Director of the National Nanotechnology Coordination Office shall enter into an arrangement with the National Research Council of the National Academy of Sciences to conduct a triennial evaluation of the Program, including—

(1) an evaluation of the technical accomplishments of the Program, including a review of whether the Program has achieved the goals under the metrics established by the Council;

(2) a review of the Program's management and coordination across agencies and disciplines;

(3) a review of the funding levels at each agency for the Program's activities and the ability of each agency to achieve the Program's stated goals with that funding;

(4) an evaluation of the Program's success in transferring technology to the private sector;

(5) an evaluation of whether the Program has been successful in fostering interdisciplinary research and development;

(6) an evaluation of the extent to which the Program has adequately considered ethical, legal, environmental, and other appropriate societal concerns;

(7) recommendations for new or revised Program goals;

(8) recommendations for new research areas, partnerships, coordination and management mechanisms, or programs to be established to achieve the Program's stated goals;

(9) recommendations on policy, program, and budget changes with respect to nanotechnology research and development activities;

(10) recommendations for improved metrics to evaluate the success of the Program in accomplishing its stated goals;

(11) a review of the performance of the National Nanotechnology Coordination Office

and its efforts to promote access to and early application of the technologies, innovations, and expertise derived from Program activities to agency missions and systems across the Federal Government and to United States industry;

(12) an analysis of the relative position of the United States compared to other nations with respect to nanotechnology research and development, including the identification of any critical research areas where the United States should be the world leader to best achieve the goals of the Program; and

(13) an analysis of the current impact of nanotechnology on the United States economy and recommendations for increasing its future impact.

(b) STUDY ON MOLECULAR SELF-ASSEMBLY.—As part of the first triennial review conducted in accordance with subsection (a), the National Research Council shall conduct a one-time study to determine the technical feasibility of molecular self-assembly for the manufacture of materials and devices at the molecular scale.

(c) STUDY ON THE RESPONSIBLE DEVELOPMENT OF NANOTECHNOLOGY.—As part of the first triennial review conducted in accordance with subsection (a), the National Research Council shall conduct a one-time study to assess the need for standards, guidelines, or strategies for ensuring the responsible development of nanotechnolgy, including, but not limited to—

(1) self-replicating nanoscale machines or devices;

(2) the release of such machines in natural environments;

(3) encryption;

(4) the development of defensive technologies;

(5) the use of nanotechnology in the enhancement of human intelligence; and

(6) the use of nanotechnology in developing artificial intelligence.

(d) EVALUATION TO BE TRANSMITTED TO CONGRESS.—The Director of the National Nanotechnology Coordination Office shall transmit the results of any evaluation for which it made arrangements under subsection (a) to the Advisory Panel, the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science upon receipt. The first such evaluation shall be transmitted no later than June 10, 2005, with subsequent evaluations transmitted to the Committees every 3 years thereafter.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

(a) NATIONAL SCIENCE FOUNDATION.—There are authorized to be appropriated to the Director of the National Science Foundation to carry out the Director's responsibilities under this Act—

(1) $385,000,000 for fiscal year 2005;

(2) $424,000,000 for fiscal year 2006;

(3) $449,000,000 for fiscal year 2007; and

(4) $476,000,000 for fiscal year 2008.

(b) DEPARTMENT OF ENERGY.—There are authorized to be appropriated to the Secretary of Energy to carry out the Secretary's responsibilities under this Act—

(1) $317,000,000 for fiscal year 2005;

(2) $347,000,000 for fiscal year 2006;

(3) $380,000,000 for fiscal year 2007; and

(4) $415,000,000 for fiscal year 2008.

(c) NATIONAL AERONAUTICS AND SPACE ADMINISTRATION.—There are authorized to be appropriated to the Administrator of the National Aeronautics and Space Administration to carry out the Administrator's responsibilities under this Act—

(1) $34,100,000 for fiscal year 2005;

(2) $37,500,000 for fiscal year 2006;

(3) $40,000,000 for fiscal year 2007; and

(4) $42,300,000 for fiscal year 2008.

(d) NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY.—There are authorized to be appropriated to the Director of the National Institute of Standards and Technology to carry out the Director's responsibilities under this Act—

(1) $68,200,000 for fiscal year 2005;

(2) $75,000,000 for fiscal year 2006;

(3) $80,000,000 for fiscal year 2007; and

(4) $84,000,000 for fiscal year 2008.

(e) ENVIRONMENTAL PROTECTION AGENCY.—There are authorized to be appropriated to the Administrator of the Environmental Protection Agency to carry out the Administrator's responsibilities under this Act—

(1) $5,500,000 for fiscal year 2005;

(2) $6,050,000 for fiscal year 2006;

(3) $6,413,000 for fiscal year 2007; and

(4) $6,800,000 for fiscal year 2008.

SEC. 7. DEPARTMENT OF COMMERCE PROGRAMS.

(a) NIST PROGRAMS.—The Director of the National Institute of Standards and Technology shall—

(1) as part of the Program activities under section 2(b)(7), establish a program to conduct basic research on issues related to the development and manufacture of nanotechnology, including metrology; reliability and quality assurance; processes control; and manufacturing best practices; and

(2) utilize the Manufacturing Extension Partnership program to the extent possible to ensure that the research conducted under paragraph (1) reaches small- and medium-sized manufacturing companies.

(b) CLEARINGHOUSE.—The Secretary of Commerce or his designee, in consultation with the National Nanotechnology Coordination Office and, to the extent possible, utilizing resources at the National Technical Information Service, shall establish a clearinghouse of information related to commercialization of nanotechnology research, including information relating to activities by regional, State, and local commercial nanotechnology initiatives; transition of research, technologies, and concepts from Federal nanotechnology research and development programs into commercial and military products; best practices by government, universities and private sector laboratories transitioning technology to commercial use; examples of ways to overcome barriers and challenges to technology deployment; and use of manufacturing infrastructure and workforce.

SEC. 8. DEPARTMENT OF ENERGY PROGRAMS.

(a) RESEARCH CONSORTIA.—

(1) DEPARTMENT OF ENERGY PROGRAM.—The Secretary of Energy shall establish a program to support, on a merit-reviewed and competitive basis, consortia to conduct interdisciplinary nanotechnology research and development designed to integrate newly developed nanotechnology and microfluidic tools with systems biology and molecular imaging.

(2) AUTHORIZATION OF APPROPRIATIONS.—Of the sums authorized for the Department of Energy under section 6(b), $25,000,000 shall be used for each fiscal year 2005 through 2008 to carry out this section. Of these amounts, not less than $10,000,000 shall be provided to at least 1 consortium for each fiscal year.

(b) RESEARCH CENTERS AND MAJOR INSTRUMENTATION.—The Secretary of Energy shall carry out projects to develop, plan, construct, acquire, operate, or support special equipment, instrumentation, or facilities for investigators conducting research and development in nanotechnology.

SEC. 9. ADDITIONAL CENTERS.

(a) AMERICAN NANOTECHNOLOGY PREPAREDNESS CENTER.—The Program shall provide for the establishment, on a merit-reviewed and competitive basis, of an American Nanotechnology Preparedness Center which shall—

(1) conduct, coordinate, collect, and disseminate studies on the societal, ethical, environmental, educational, legal, and workforce implications of nanotechnology; and

(2) identify anticipated issues related to the responsible research, development, and application of nanotechnology, as well as provide recommendations for preventing or addressing such issues.

(b) CENTER FOR NANOMATERIALS MANUFACTURING.—The Program shall provide for the establishment, on a merit reviewed and competitive basis, of a center to—

(1) encourage, conduct, coordinate, commission, collect, and disseminate research on new manufacturing technologies for materials, devices, and systems with new combinations of characteristics, such as, but not limited to, strength, toughness, density, conductivity, flame resistance, and membrane separation characteristics; and

(2) develop mechanisms to transfer such manufacturing technologies to United States industries.

(c) REPORTS.—The Council, through the Director of the National Nanotechnology Coordination Office, shall submit to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science—

(1) within 6 months after the date of enactment of this Act, a report identifying which agency shall be the lead agency and which other agencies, if any, will be responsible for establishing the Centers described in this section; and

(2) within 18 months after the date of enactment of this Act, a report describing how the Centers described in this section have been established.

SEC. 10. DEFINITIONS.

In this Act:

(1) ADVISORY PANEL.—The term ''Advisory Panel'' means the President's National Nanotechnology Advisory Panel established or designated under section 4.

(2) NANOTECHNOLOGY.—The term ''nanotechnology'' means the science and technology that will enable one to understand, measure, manipulate, and manufacture at the atomic, molecular, and supramolecular levels, aimed at creating materials, devices, and systems with fundamentally new molecular organization, properties, and functions.

(3) PROGRAM.—The term ''Program'' means the National Nanotechnology Program established under section 2.

(4) COUNCIL.—The term ''Council'' means the National Science and Technology Council or an appropriate subgroup designated by the Council under section 2(c).

(5) ADVANCED TECHNOLOGY USER FACILITY.—The term ''advanced technology user facility'' means a nanotechnology research and development facility supported, in whole or in part, by Federal funds that is open to all United States researchers on a competitive, merit-reviewed basis.

(6) PROGRAM COMPONENT AREA.—The term ''program component area'' means a major subject area established under section 2(c)(2) under which is grouped related individual projects and activities carried out under the Program.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from

New York (Mr. BOEHLERT) and the gentleman from Texas (Mr. HALL) each will control 20 minutes.

The Chair recognizes the gentleman from New York (Mr. BOEHLERT).

GENERAL LEAVE

Mr. BOEHLERT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on S. 189.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BOEHLERT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S.189, the Nanotechnology and Research Development Act. This bill began its life in the House as H.R. 766, which I introduced with my colleague, the gentleman from California (Mr. HONDA) and which the House passed back in May by the overwhelming margin of 405 to 19.

The text before us today reflects 2 months of negotiations with the Senate to come up with a final version of the bill. The Senate amended S. 189 with the text of that agreement, and it is that compromise we will be sending on to the President today.

This bill is endorsed by a wide variety of high technology and academic organizations including the National Association of Manufacturers, the Semiconductor Industry Association, Intel, IBM, Hewlett-Packard, and the Association of American Universities.

The idea behind this bill is simple yet powerful. The American economy will grow bigger if America's scientists and engineers focus on things that are smaller. The U.S. is the leader in nanotechnology and New York under Governor Pataki is in the front ranks of that world leadership. We must remain in the front as this new field starts remaking the marketplace.

This bill has four salient aspects designed to help ensure continued U.S. leadership: It authorizes the President's National Nanotechnology Initiative; it emphasizes the need for broad interagency participation and stronger interagency coordination, especially in the presentation of program budgets; it underscores the need for interdisciplinary research and for shepherding research from the laboratory to the marketplace; and it ensures that research and public discussion on the societal and ethical consequences of nanotechnology will go on concurrent with, and as part of technology research and development.

The nanotechnology program will be a model of government, industry, university, cooperation, coordination and interdisciplinary research with public involvement.

I wanted to thank the many Members who helped contribute to this bill but particularly to my cosponsor, the gentleman from California (Mr. HONDA) and my partner, the ranking member, the gentleman from Texas (Mr. HALL), as well as the chairman of our Subcommittee on Research, the gentleman from Michigan (Mr. SMITH) and his ranking member, the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

Last but not least, I want to thank my staff who labored so long and hard on this bill and on the many hearings on the subject. Peter Rooney, Dan Byers and Elizabeth Grossman deserve special recognition, but the entire staff of the committee minority and majority has been actively engaged.

Mr. Speaker, I reserve the balance of my time.

Mr. HALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I, of course, rise in support of the Nanotechnology Research and Development Act, Senate 189, which as the chairman has so ably set forth, authorizes the National Nanotechnology Initiative as part of the President's budget request. This interagency research program is going to have enormous consequences for the future of our entire Nation.

S. 189 is a compromise measure worked out with the other body. It is largely based on H.R. 766 which passed the House in May by a vote of 405 to 19. The bipartisan House bill was introduced by Committee on Science chairman, the gentleman from New York (Mr. BOEHLERT) and the gentleman from California (Mr. HONDA) and cosponsored by Members from both sides of the aisle.

I want to acknowledge the leadership of the chairman, the gentleman from New York (Mr. BOEHLERT) and the gentleman from California (Mr. HONDA) in crafting the original version of the legislation. I want to thank the gentleman from New York (Mr. BOEHLERT) for working cooperatively day in and day with Democratic Members in developing the bill and arriving at the final bicameral compromise.

I also want to thank my colleague, the gentleman from California (Mr. HONDA) for his hard work on the bill. His efforts have led to a strengthening of the outside advisory mechanism for this research and also led to a process to help facilitate the transfer of research innovations to commercial applications.

The potential reach and impact of nanotechnology argues for careful attention to how it might affect society, and in particular, attention to potential downsides of the technology.

I believe it is important for the successful development of nanotechnology that problems be addressed from the beginning in a straightforward and open way.

Consequently, I am pleased that the bill imposes requirements to provide understanding of potential problems arising from the nanotechnology applications. I particularly want to compliment my colleague, the gentleman from California (Mr. SHERMAN) and my colleague, the gentleman from Texas (Mr. BELL) for championing provisions to address this issue, including annual reporting requirements to allow Congress to track the agencies' activities that are related to societal and ethical concerns.

This annual report will include a description of the nature of the activities being supported and how the activities relate to the overall objectives of the research initiative. An important goal of the bill is to integrate research on societal and ethical concerns with research and development efforts to advance nanotechnology.

The bill also addresses the need to open lines of communication between the research community and the public to make clear that potential safety risks of nanotechnology are being explored and not ignored.

I want to especially acknowledge the efforts of my colleague, the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON) who introduced provisions that will provide for input from and outreach to the public from such mechanisms as citizen panels and consensus conferences.

Senate 189 authorizes appropriations over 4 years for nanotechnology research and development at five agencies: The National Science Foundation, the Department of Energy, NASA, National Institute of Standards and Technology, and EPA. In addition to setting funding goals, the bill puts in place mechanisms for planning and coordinating and implementation of the interagency research program.

The bill also includes provisions for outside, expert advice to help guide the research program and ensure its relevance to emerging technological opportunities and to the industry. The advisory committee required by the bill is charged to review the goals, content, implementation and administration of the nanotechnology initiative.

Mr. Speaker, we now stand at the threshold of an age in which materials and devices can be fashioned atom by atom. The capability will have enormous consequences for the information industry, for manufacturing, and for medicine and health. Indeed, the scope of this technology is so broad as to leave virtually no product untouched.

The measure before us will help ensure that the Nation maintains a vigorous research effort in a technology area that is emerging as increasingly important for the economy and also for national security. It enjoys widespread support from the research community and industry. I urge my colleagues to support its final passage.

Mr. Speaker, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Speaker, I yield 3 minutes to the gentlewoman from Illinois (Mrs. BIGGERT), the distinguished chair of the Subcommittee on Energy.

Mrs. BIGGERT. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, as an original cosponsor of H.R. 766, the Nanotechnology Research and Development Act that was approved by the House last May, I rise to express my strong support for this compromise legislation negotiated by the House Committee on Science.

I want to commend the chairman of the Committee on Science, the gentleman from New York (Mr. BOEHLERT) for working with the Senate to develop such a comprehensive and forward-looking piece of legislation as S. 189, the 21st Century Nanotechnology Research and Development Act.

Unlike so many other complex scientific concepts, nanotechnology is actually something that we should all be able to grasp. Most Americans learn in grade school and high school that atoms are the building blocks of nature. In the years since I have been in school, incredible machines have allowed to us see every one of those atoms.

The challenge now is to develop the tools, equipment and expertise to manipulate those atoms, and build new materials and new machines, one molecule at a time.

This bill takes up that challenge, ensuring coordination and collaboration among the many Federal agencies engaged in nanotech research. Unlike other research efforts, some of which are undertaken for the sake of science and our understanding of it, the broad and practical applications of nanotechnology, and its benefits, can be described in layman's terms.

Here are just a few benefits: Sensing the presence of unwanted pathogens in blood; improving the efficiency of electricity distribution; dispensing medications; cleaning polluted soil and water, or building the next generation of space craft.

I do not think I am being overly optimistic. Just consider how far we have come since the creation of the first microchip. Sixty percent of Americans now own a personal computer or a laptop, and 90 percent of them use the Internet. The public, private, and nonprofit sectors invested in research that reduced the size of the microchip while increasing its speeds exponentially.

This investment was made because the applications were many and the possibilities endless. After all, microchips are now found in cars, pacemakers, watches, sewing machines, and just about every household appliance.

With all its potential applications, nanotechnology could have an equal, if not greater, impact than the microchip on our lives, our wealth, our health and safety, our environment, and our security at home and abroad.

All levels of government, academia, and the industry recognize the potential of nanotechnology, as well as the benefits of collaborating to realize that potential. Nanotechnology could very well be the catalyst for national competitiveness for the next 50 years. In countless ways, our lives will be better as a result of coordinated investment in nanoscience R&D.

I urge my colleagues to join me in supporting this nanotechnology research and development legislation.

Mr. HALL. Mr. Speaker, I yield 3 minutes to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON), the ranking member on Subcommittee on Research.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I thank the leadership of the committee and the subcommittee. I want to express my appreciation for the camaraderie of which we work together on the committee. I rise together in support of S. 189, the Nanotechnology Research and Development Act.

The emerging fields of nanoscale science, engineering and technology are leading to unprecedented understanding and control over the basic building blocks of properties of all natural and man-made things.

□ 1445

Nanotechnology has the potential for enormous consequences, both technological and societal. This technology could result in new materials with prescribed properties not otherwise possible, information processing that far exceeds our current capabilities, and medical devices that could provide revolutionary advances in health care and dramatically increase our lifespan.

Nanotechnology has a great potential for America's leadership around the world. As America enters the 21st century, it is important that we lead the world in developing and commercializing new technologies and perhaps restore many of the jobs that we have lost.

I am very pleased that this bill includes an amendment that I introduced when we voted on H.R. 766 back in May. This amendment, under program ''activities on societal and ethical concerns,'' requires public input and outreach to the public to be integrated into the program through regular and ongoing public discussions, including citizens panels, consensus conferences, and educational events.

The views of the general public, who will bear the brunt of the consequences, both good and bad, should have input in the planning and execution of the research program. Taxpayers are paying for development of this technology. They have a right to have a voice in the research agenda.

I agree with that assessment that nanotechnology is one of the most promising and exciting fields of science today.

I am proud to be a cosponsor of this legislation and proud to say that I believe that the area which I represent will have some leading research in this area, with Nobel laureates. As I vote for its approval, I would urge my colleagues to do the same.

Mr. BOEHLERT. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan (Mr. SMITH), the chairman of the Subcommittee on Research.

Mr. SMITH of Michigan. Mr. Speaker, first, let me compliment the gentleman from California (Mr. HONDA) and the chairman for introducing this legislation. Nanotechnology is the science of the very small, and I thought I might use a visual aid today. So if my colleagues would take a hair out of their heads and pretend that it is hollow, they could fit 100,000 strands of nano-technology inside that hollow hair. It is amazing technology.

Nanotechnology is exciting to me because it has so much potential for the future. Already today, computers and disk drives contain nanotechnology. Soon, most computers and telecommunications hardware will be based on it. In the not-too-distant future, nanotechnology will begin to transform biology, medicine, military systems, energy systems.

Nanotechnology is poised to become the next great vehicle of growth for the American economy; and like biotechnology was 10, 12, 15 years ago, nanotechnology has reached a critical growth stage. The 21st Century Research and Development Act intensifies Federal support for nanoresearch and experimentation and will prove, I think, critical to unlocking the tremendous potential that nanotechnology presents.

In conclusion, let me just say that nanotechnology holds incredible promise in a wide range of scientific disciplines; and while there are some nanotechnology products on the market today, the industry is very close to achieving several important breakthroughs that include revolutionary new applications in materials science, in manufacturing. So if we are going to stay competitive in the world market, and that means having our standard of living above everybody else, then we are going to have to take advantage of this kind of technology that can improve the way we produce products, but also improve those products that we are selling and allow us to be competitive on a world market.

In conclusion, I would hope everybody would unanimously not only support this bill but the kind of funding that is necessary to make sure that the United States stays on top in nanoresearch.

I thank the chairman for yielding me the time.

Mr. HALL. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. HONDA), who is an original

Democratic cosponsor of the House bill.

Mr. HONDA. Mr. Speaker, I rise in support of S. 189, the 21st Century Nanotechnology Research and Development Act. I thank the distinguished leaders of the Committee on Science, the gentleman from New York (Chairman BOEHLERT) and the gentleman from Texas (Ranking Member HALL) for working with me on the House version of this bipartisan bill, as well as Senators ALLEN and WYDEN for their leadership on the Senate version of this legislation.

I would also like to thank my personal staff and the committee staff for all their hard work in ironing out the differences with the other body that has allowed us to get to where we are today on this important legislation.

Nanotechnology, which is the ability of scientists and engineers to manipulate matter at the level of single atoms and molecules, can be revolutionary because it is an enabling technology and fundamentally changes the way many items are designed and manufactured. Most Members of this body had probably never heard of the word ''nanotechnology'' before we first considered legislation in May, but their support for the bill then and in the following months suggests that they have come to appreciate the impact this field will have.

The long-term, sometimes high-risk nature of the research that will be needed to bring nanotechnology to maturity requires the support of, and significant investment by, the Federal Government. This bill provides three things. It puts the National Technology Initiative into law and authorizes $3.7 billion in spending over the next 4 years for the program.

This investment in the future is critical because experts agree that investing in innovation is the key to a vibrant U.S. manufacturing base and continued generation of new jobs. Nanotechnology is one of the areas of innovation most worthy of investment, as it has the potential to create entirely new industries and radically transform the basis of competition in others.

The bill also contains a number of other provisions to make improvements in our national technology initiative. It requires the creation of research centers, education training efforts, research into the societal and ethical consequence of nanotechnology, and efforts to transfer technology into the marketplace. Importantly, the bill includes a series of coordination offices, advisory committees and regular programming to ensure that taxpayer money is being spent wisely and efficiently.

This is an excellent bill that I am proud to have had the chance to work on, and I urge my colleagues to support it.

Once again, let me again repeat my gratitude and thanks to the leadership of the gentleman from New York (Mr. BOEHLERT), our chairman, and the gentleman from Texas (Mr. HALL), our ranking member.

Mr. BOEHLERT. Mr. Speaker, let me say I want to thank the gentleman from California (Mr. HONDA) for his partnership, and it has been a cooperative effort; and all of the efforts on the Committee on Science reflect that cooperation.

Mr. Speaker, it is my pleasure to yield 3 minutes to the distinguished gentleman from Texas (Mr. BURGESS), who has been a real leader for our side on this issue of nanotechnology.

Mr. BURGESS. Mr. Speaker, I thank my chairman for yielding me time.

It is indeed a pleasure to be here this afternoon to support Senate bill 189, the 21st Century National Nanotechnology Research and Development Act.

Nanotechnology is a very promising future technology. From materials to computers, medicine, defense, energy, the possibilities are limitless. We are moving from an age of miniaturization to an age of self-replication.

The House overwhelmingly approved this bill's companion, H.R. 766, and I am hopeful that the House will once again make a bipartisan commitment to increasing resources for nanotechnology research and development. The development of nanotechnology is not only important to my corner of the country but for every human on the planet.

The National Science Foundation estimates that in a little over a decade nanotechnology will positively impact the global market by approximately $1 trillion. This bill will ensure that the United States continues to be a leader in nanotechnology research.

This bill is especially important to my academic institutions in my district, especially the University of North Texas. Mr. Speaker, as the ranking member knows, everything is bigger in Texas unless it is better to be smaller, in which case everything is smaller in Texas.

Beginning last fall, the University of North Texas began laboratory renovation and equipment purchases for the Department of Material Science, including research space for their Laboratory for Electronic Materials and Devices and the establishment of a nanometrology laboratory, the first in the Nation.

This center, the Center for Advanced Research and Technology, is a unique collaboration between academic and corporate partners in the north Texas area, designed to develop new nanotechnology applications. The development of the nanometrology laboratory will provide remote access by researchers throughout the United States through state-of-the-art materials characterization.

These facility and research capabilities are important to the future competitiveness and the value of American materials worldwide, and this bill will help further those developments.

This comprehensive approach taken by Senate bill 189 to raise the profile of nanometrology and nanotechnology among the general public and increased resources for academic institutions will ensure that our country, America, is the leader in this field for years to come.

Mr. HALL. Mr. Speaker, I yield 3 minutes to the gentlewoman from California (Ms. LOFGREN), a long-time leader in high-tech issues from the Silicon Valley.

Ms. LOFGREN. Mr. Speaker, I am happy to strongly support S. 189, the 21st Century Nanotechnology Research and Development Act.

I represent, as the gentleman from Texas (Mr. HALL) just said, an area, Silicon Valley, that often leads this Nation in fostering cutting-edge research in technology and in manufacturing. Indeed, a great deal of much important research involving nanotechnology is being done right now at NASA Ames Research Park in California.

Mr. Speaker, I would like to take this opportunity to remind us all of the importance of supporting scientific research and its interaction with our society and our economy. With that in mind, Mr. Speaker, S. 189 is an important first step that will ensure that the United States will continue to play a pioneering role in the area of nanotechnology and its revolutionary potential to transform the manufacturing sector in our Nation, not to mention energy, health care, and areas that we can only dream of today.

I congratulate the gentleman from New York (Mr. BOEHLERT) and my Bay Area colleague, the gentleman from California (Mr. HONDA), for their bipartisan efforts in drafting and perfecting and passing H.R. 766 in the House which in large part forms the basis of this bill that we are about to pass.

The future benefits of research in nanotechnology, fusion energy, and other types of research depend on us acting with great foresight. S. 189 represents a great first step on that path; and as my colleague, the gentleman from California (Mr. HONDA), said recently at a nanotechnology conference that he helped organize at NASA Ames Research Park, nanotechnology is the next big thing.

Mr. HALL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BOEHLERT. Mr. Speaker, I have no further requests for time; but before I yield back, I urge everyone to take the enlightened approach and support this very important initiative. I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TERRY). The question is on the motion

offered by the gentleman from New York (Mr. BOEHLERT) that the House suspend the rules and pass the Senate bill, S. 189.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

□ 1500

VETERANS BENEFITS ACT OF 2003

Mr. SMITH of New Jersey. Mr. Speaker, I move to suspend the rules and concur in the Senate amendment to the bill (H.R. 2297) to amend title 38, United States Code, to improve benefits under laws administered by the Secretary of Veterans Affairs, and for other purposes.

The Clerk read as follows:

Senate amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''Veterans Benefits Act of 2003''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. References to title 38, United States Code.

TITLE I—SURVIVOR BENEFITS

Sec. 101. Retention of certain veterans survivor benefits for surviving spouses remarrying after age 57.
Sec. 102. Benefits for children with spina bifida of veterans of certain service in Korea.
Sec. 103. Alternative beneficiaries for National Service Life Insurance and United States Government Life Insurance.
Sec. 104. Payment of benefits accrued and unpaid at time of death.

TITLE II—BENEFITS FOR FORMER PRISONERS OF WAR AND FOR FILIPINO VETERANS

SUBTITLE A—FORMER PRISONERS OF WAR

Sec. 201. Presumptions of service-connection relating to diseases and disabilities of former prisoners of war.

SUBTITLE B—FILIPINO VETERANS

Sec. 211. Rate of payment of benefits for certain Filipino veterans and their survivors residing in the United States.
Sec. 212. Burial benefits for new Philippine Scouts residing in the United States.
Sec. 213. Extension of authority to maintain regional office in the Republic of the Philippines.

TITLE III—EDUCATION BENEFITS, EMPLOYMENT PROVISIONS, AND RELATED MATTERS

Sec. 301. Expansion of Montgomery GI Bill education benefits for certain self-employment training.
Sec. 302. Increase in rates of survivors' and dependents' educational assistance.
Sec. 303. Restoration of survivors' and dependents' education benefits of individuals being ordered to full-time National Guard duty.
Sec. 304. Rounding down of certain cost-of-living adjustments on educational assistance.
Sec. 305. Authorization for State approving agencies to approve certain entrepreneurship courses.
Sec. 306. Repeal of provisions relating to obsolete education loan program.
Sec. 307. Six-year extension of the Veterans' Advisory Committee on Education.
Sec. 308. Procurement program for small business concerns owned and controlled by service-disabled veterans.
Sec. 309. Outstationing of Transition Assistance Program personnel.

TITLE IV—HOUSING BENEFITS AND RELATED MATTERS

Sec. 401. Authorization to provide adapted housing assistance to certain disabled members of the Armed Forces who remain on active duty.
Sec. 402. Increase in amounts for certain adaptive benefits for disabled veterans.
Sec. 403. Permanent authority for housing loans for members of the Selected Reserve.
Sec. 404. Reinstatement of minimum requirements for sale of vendee loans.
Sec. 405. Adjustment to home loan fees.
Sec. 406. One-year extension of procedures on liquidation sales of defaulted home loans guaranteed by the Department of Veterans Affairs.

TITLE V—BURIAL BENEFITS

Sec. 501. Burial plot allowance.
Sec. 502. Eligibility of surviving spouses who remarry for burial in national cemeteries.
Sec. 503. Permanent authority for State cemetery grants program.

TITLE VI—EXPOSURE TO HAZARDOUS SUBSTANCES

Sec. 601. Radiation Dose Reconstruction Program of Department of Defense.
Sec. 602. Study on disposition of Air Force Health Study.
Sec. 603. Funding of Medical Follow-Up Agency of Institute of Medicine of National Academy of Sciences for epidemiological research on members of the Armed Forces and veterans.

TITLE VII—OTHER MATTERS

Sec. 701. Time limitations on receipt of claim information pursuant to requests of Department of Veterans Affairs.
Sec. 702. Clarification of applicability of prohibition on assignment of veterans benefits to agreements requiring payment of future receipt of benefits.
Sec. 703. Six-year extension of Advisory Committee on Minority Veterans.
Sec. 704. Temporary authority for performance of medical disabilities examinations by contract physicians.
Sec. 705. Forfeiture of benefits for subversive activities.
Sec. 706. Two-year extension of round-down requirement for compensation cost-of-living adjustments.
Sec. 707. Codification of requirement for expeditious treatment of cases on remand.
Sec. 708. Technical and clerical amendments.

SEC. 2. REFERENCES TO TITLE 38, UNITED STATES CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—SURVIVOR BENEFITS

SEC. 101. RETENTION OF CERTAIN VETERANS SURVIVOR BENEFITS FOR SURVIVING SPOUSES REMARRYING AFTER AGE 57.

(a) EXCEPTION TO TERMINATION OF BENEFITS UPON REMARRIAGE.—Section 103(d)(2)(B) is amended by striking ''The remarriage after age 55'' and inserting ''The remarriage after age 57 of the surviving spouse of a veteran shall not bar the furnishing of benefits specified in paragraph (5) to such person as the surviving spouse of the veteran. Notwithstanding the previous sentence, the remarriage after age 55''.

(b) COORDINATION OF BENEFITS.—Section 1311 is amended by adding at the end the following new subsection:

''(e) In the case of an individual who is eligible for dependency and indemnity compensation under this section by reason of section 103(d)(2)(B) of this title who is also eligible for benefits under another provision of law by reason of such individual's status as the surviving spouse of a veteran, then, notwithstanding any other provision of law (other than section 5304(b)(3) of this title), no reduction in benefits under such other provision of law shall be made by reason of such individual's eligibility for benefits under this section.''.

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on January 1, 2004.

(d) RETROACTIVE BENEFITS PROHIBITED.—No benefit may be paid to any person by reason of the amendments made by subsections (a) and (b) for any period before the effective date specified in subsection (c).

(e) APPLICATION FOR BENEFITS.—In the case of an individual who but for having remarried would be eligible for benefits under title 38, United States Code, by reason of the amendment made by subsection (a) and whose remarriage was before the date of the enactment of this Act and after the individual had attained age 57, the individual shall be eligible for such benefits by reason of such amendment only if the individual submits an application for such benefits to the Secretary of Veterans Affairs not later than the end of the one-year period beginning on the date of the enactment of this Act.

(f) TECHNICAL CORRECTION.—Section 101(b) of the Veterans Benefits Act of 2002 (Public Law 107–330; 116 Stat. 2821; 38 U.S.C. 103 note) is amended by striking ''during the 1–year period'' and all that follows through ''(c)'' and inserting ''before the end of the one-year period beginning on the date of the enactment of the Veterans Benefits Act of 2003''.

SEC. 102. BENEFITS FOR CHILDREN WITH SPINA BIFIDA OF VETERANS OF CERTAIN SERVICE IN KOREA.

(a) IN GENERAL.—Chapter 18 is amended—

(1) by redesignating subchapter III, and sections 1821, 1822, 1823, and 1824, as subchapter IV, and sections 1831, 1832, 1833, and 1834, respectively; and

(2) by inserting after subchapter II the following new subchapter III:

''SUBCHAPTER III—CHILDREN OF CERTAIN KOREA SERVICE VETERANS BORN WITH SPINA BIFIDA

''§ 1821. Benefits for children of certain Korea service veterans born with spina bifida

''(a) BENEFITS AUTHORIZED.—The Secretary may provide to any child of a veteran of covered service in Korea who is suffering from spina bifida the health care, vocational training and rehabilitation, and monetary allowance required to be paid to a child of a Vietnam veteran who is suffering from spina bifida under subchapter I of this chapter as if such child of a veteran of covered service in Korea were a child of a Vietnam veteran who is suffering from spina bifida under such subchapter.

''(b) SPINA BIFIDA CONDITIONS COVERED.—This section applies with respect to all forms and manifestations of spina bifida, except spina bifida occulta.

''(c) VETERAN OF COVERED SERVICE IN KOREA.—For purposes of this section, a veteran of covered service in Korea is any individual, without regard to the characterization of that individual's service, who—

''(1) served in the active military, naval, or air service in or near the Korean demilitarized zone (DMZ), as determined by the Secretary in consultation with the Secretary of Defense, during the period beginning on September 1, 1967, and ending on August 31, 1971; and

''(2) is determined by the Secretary, in consultation with the Secretary of Defense, to have been exposed to a herbicide agent during such service in or near the Korean demilitarized zone.

''(d) HERBICIDE AGENT.—For purposes of this section, the term 'herbicide agent' means a chemical in a herbicide used in support of United States and allied military operations in or near the Korean demilitarized zone, as determined by the Secretary in consultation with the Secretary of Defense, during the period beginning on September 1, 1967, and ending on August 31, 1971.''.

(b) CHILD DEFINED.—Section 1831, as redesignated by subsection (a) of this section, is amended by striking paragraph (1) and inserting the following new paragraph (1):

''(1) The term 'child' means the following:

''(A) For purposes of subchapters I and II of this chapter, an individual, regardless of age or marital status, who—

''(i) is the natural child of a Vietnam veteran; and

''(ii) was conceived after the date on which that veteran first entered the Republic of Vietnam during the Vietnam era.

''(B) For purposes of subchapter III of this chapter, an individual, regardless of age or marital status, who—

''(i) is the natural child of a veteran of covered service in Korea (as determined for purposes of section 1821 of this title); and

''(ii) was conceived after the date on which that veteran first entered service described in subsection (c) of that section.''.

(c) NONDUPLICATION OF BENEFITS.—Subsection (a) of section 1834, as redesignated by subsection (a) of this section, is amended by adding at the end the following new sentence: ''In the case of a child eligible for benefits under subchapter I or II of this chapter who is also eligible for benefits under subchapter III of this chapter, a monetary allowance shall be paid under the subchapter of this chapter elected by the child.''.

(d) CONFORMING AMENDMENTS.—(1) Section 1811(1)(A) is amended by striking ''section 1821(1)'' and inserting ''section 1831(1)''.

(2) The heading for chapter 18 is amended to read as follows:

''CHAPTER 18—BENEFITS FOR CHILDREN OF VIETNAM VETERANS AND CERTAIN OTHER VETERANS''.

(e) CLERICAL AMENDMENTS.—(1) The table of sections at the beginning of chapter 18 is amended by striking the items relating to subchapter III and sections 1821, 1822, 1823, and 1824 and inserting the following new items:

''SUBCHAPTER III—CHILDREN OF CERTAIN KOREA SERVICE VETERANS BORN WITH SPINA BIFIDA

''1821. Benefits for children of certain Korea service veterans born with spina bifida.

''SUBCHAPTER IV—GENERAL PROVISIONS

''1831. Definitions.

''1832. Applicability of certain administrative provisions.

''1833. Treatment of receipt of monetary allowance and other benefits.

''1834. Nonduplication of benefits.''.

(2) The table of chapters at the beginning of title 38, United States Code, and at the beginning of part II, are each amended by striking the item relating to chapter 18 and inserting the following new item:

''18. Benefits for Children of Vietnam Veterans and Certain Other Veterans .... 1802''.

SEC. 103. ALTERNATIVE BENEFICIARIES FOR NATIONAL SERVICE LIFE INSURANCE AND UNITED STATES GOVERNMENT LIFE INSURANCE.

(a) NATIONAL SERVICE LIFE INSURANCE.—Section 1917 is amended by adding at the end the following new subsection:

''(f)(1) Following the death of the insured and in a case not covered by subsection (d)—

''(A) if the first beneficiary otherwise entitled to payment of the insurance does not make a claim for such payment within two years after the death of the insured, payment may be made to another beneficiary designated by the insured, in the order of precedence as designated by the insured, as if the first beneficiary had predeceased the insured; and

''(B) if, within four years after the death of the insured, no claim has been filed by a person designated by the insured as a beneficiary and the Secretary has not received any notice in writing that any such claim will be made, payment may (notwithstanding any other provision of law) be made to such person as may in the judgment of the Secretary be equitably entitled thereto.

''(2) Payment of insurance under paragraph (1) shall be a bar to recovery by any other person.''.

(b) UNITED STATES GOVERNMENT LIFE INSURANCE.—Section 1952 is amended by adding at the end the following new subsection:

''(c)(1) Following the death of the insured and in a case not covered by section 1950 of this title—

''(A) if the first beneficiary otherwise entitled to payment of the insurance does not make a claim for such payment within two years after the death of the insured, payment may be made to another beneficiary designated by the insured, in the order of precedence as designated by the insured, as if the first beneficiary had predeceased the insured; and

''(B) if, within four years after the death of the insured, no claim has been filed by a person designated by the insured as a beneficiary and the Secretary has not received any notice in writing that any such claim will be made, payment may (notwithstanding any other provision of law) be made to such person as may in the judgment of the Secretary be equitably entitled thereto.

''(2) Payment of insurance under paragraph (1) shall be a bar to recovery by any other person.''.

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on October 1, 2004.

(d) TRANSITION PROVISION.—In the case of a person insured under subchapter I or II of chapter 19 of title 38, United States Code, who dies before the effective date of the amendments made by subsections (a) and (b), as specified by subsection (c), the two-year and four-year periods specified in subsection (f)(1) of section 1917 of title 38, United States Code, as added by subsection (a), and subsection (c)(1) of section 1952 of such title, as added by subsection (b), as applicable, shall for purposes of the applicable subsection be treated as being the two-year and four-year periods, respectively, beginning on the effective date of such amendments, as so specified.

SEC. 104. PAYMENT OF BENEFITS ACCRUED AND UNPAID AT TIME OF DEATH.

(a) REPEAL OF TWO-YEAR LIMITATION ON PAYMENT.—Section 5121(a) is amended by striking ''for a period not to exceed two years'' in the matter preceding paragraph (1).

(b) PAYMENT RECIPIENTS FOR BENEFICIARIES UNDER CHAPTER 18.—Such section is further amended—

(1) by striking ''and'' at the end of paragraph (4);

(2) by redesignating paragraph (5) as paragraph (6); and

(3) by inserting after paragraph (4) the following new paragraph (5):

''(5) Upon the death of a child claiming benefits under chapter 18 of this title, to the surviving parents.''.

(c) TECHNICAL AMENDMENTS.—Such section is further amended—

(1) in the matter preceding paragraph (1), by striking the comma after ''or decisions'';

(2) by striking the semicolon at the end of paragraphs (1), (2), (3), and (4), and at the end of subparagraphs (A) and (B) of paragraph (2), and inserting a period.

(d) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply with respect to deaths occurring on or after the date of the enactment of this Act.

TITLE II—BENEFITS FOR FORMER PRISONERS OF WAR AND FOR FILIPINO VETERANS

Subtitle A—Former Prisoners of War

SEC. 201. PRESUMPTIONS OF SERVICE-CONNECTION RELATING TO DISEASES AND DISABILITIES OF FORMER PRISONERS OF WAR.

Subsection (b) of section 1112 is amended to read as follows:

''(b)(1) For the purposes of section 1110 of this title and subject to the provisions of section 1113 of this title, in the case of a veteran who is a former prisoner of war—

''(A) a disease specified in paragraph (2) which became manifest to a degree of 10 percent or more after active military, naval, or air service shall be considered to have been incurred in or aggravated by such service, notwithstanding that there is no record of such disease during the period of service; and

''(B) if the veteran was detained or interned as a prisoner of war for not less than thirty days, a disease specified in paragraph (3) which became manifest to a degree of 10 percent or more after active military, naval, or air service shall be considered to have been incurred in or aggravated by such service, notwithstanding that there is no record of such disease during the period of service.

''(2) The diseases specified in this paragraph are the following:

''(A) Psychosis.

''(B) Any of the anxiety states.

''(C) Dysthymic disorder (or depressive neurosis).

''(D) Organic residuals of frostbite, if the Secretary determines that the veteran was detained or interned in climatic conditions consistent with the occurrence of frostbite.

''(E) Post-traumatic osteoarthritis.

''(3) The diseases specified in this paragraph are the following:

''(A) Avitaminosis.

''(B) Beriberi (including beriberi heart disease).

''(C) Chronic dysentery.

''(D) Helminthiasis.

''(E) Malnutrition (including optic atrophy associated with malnutrition).

''(F) Pellagra.

''(G) Any other nutritional deficiency.

''(H) Cirrhosis of the liver.

''(I) Peripheral neuropathy except where directly related to infectious causes.

''(J) Irritable bowel syndrome.

''(K) Peptic ulcer disease.''.

Subtitle B—Filipino Veterans

SEC. 211. RATE OF PAYMENT OF BENEFITS FOR CERTAIN FILIPINO VETERANS AND THEIR SURVIVORS RESIDING IN THE UNITED STATES.

(a) RATE OF PAYMENT.—Section 107 is amended—

(1) in the second sentence of subsection (b), by striking ''Payments'' and inserting ''Except as provided in subsection (c), payments''; and

(2) in subsection (c)—

(A) by inserting ''and subchapter II of chapter 13 (except section 1312(a)) of this title'' after ''chapter 11 of this title'';

(B) by striking ''in subsection (a)'' and inserting ''in subsection (a) or (b)''; and

(C) by striking ''of subsection (a)'' and inserting ''of the applicable subsection''.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to benefits paid for months beginning after the date of the enactment of this Act.

SEC. 212. BURIAL BENEFITS FOR NEW PHILIPPINE SCOUTS RESIDING IN THE UNITED STATES.

(a) BENEFIT ELIGIBILITY.—Section 107, as amended by section 211 of this Act, is amended—

(1) in subsection (b)(2)—

(A) by striking ''and'' and inserting a comma; and

(B) by inserting '', 23, and 24 (to the extent provided for in section 2402(8))'' after ''(except section 1312(a))'';

(2) in the second sentence of subsection (b), as so amended, by inserting ''or (d)'' after ''subsection (c)'';

(3) in subsection (d)(1), by inserting ''or (b), as otherwise applicable,'' after ''subsection (a)''; and

(4) in subsection (d)(2), by inserting ''or whose service is described in subsection (b) and who dies after the date of the enactment of the Veterans Benefits Act of 2003,'' after ''November 1, 2000,''.

(b) NATIONAL CEMETERY INTERMENT.—Section 2402(8) is amended by striking ''section 107(a)'' and inserting ''subsection (a) or (b) of section 107''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to deaths occurring on or after the date of the enactment of this Act.

SEC. 213. EXTENSION OF AUTHORITY TO MAINTAIN REGIONAL OFFICE IN THE REPUBLIC OF THE PHILIPPINES.

Section 315(b) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2009''.

TITLE III—EDUCATION BENEFITS, EMPLOYMENT PROVISIONS, AND RELATED MATTERS

SEC. 301. EXPANSION OF MONTGOMERY GI BILL EDUCATION BENEFITS FOR CERTAIN SELF-EMPLOYMENT TRAINING.

(a) DEFINITION OF TRAINING ESTABLISHMENT.—Section 3452(e) is amended by striking ''means any'' and all that follows and inserting ''means any of the following:

''(1) An establishment providing apprentice or other on-job training, including those under the supervision of a college or university or any State department of education.

''(2) An establishment providing self-employment on-job training consisting of full-time training for a period of less than six months that is needed or accepted for purposes of obtaining licensure to engage in a self-employment occupation or required for ownership and operation of a franchise that is the objective of the training.

''(3) A State board of vocational education.

''(4) A Federal or State apprenticeship registration agency.

''(5) A joint apprenticeship committee established pursuant to the Act of August 16, 1937, popularly known as the 'National Apprenticeship Act' (29 U.S.C. 50 et seq.).

''(6) An agency of the Federal Government authorized to supervise such training.''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date that is six months after the date of the enactment of this Act and shall apply to self-employment on-job training approved and pursued on or after that date.

SEC. 302. INCREASE IN RATES OF SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE.

(a) SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE.—Section 3532 is amended—

(1) in subsection (a)—

(A) in paragraph (1), by striking ''at the monthly rate of'' and all that follows and inserting ''at the monthly rate of $788 for full-time, $592 for three-quarter-time, or $394 for half-time pursuit.''; and

(B) in paragraph (2), by striking ''at the rate of'' and all that follows and inserting ''at the rate of the lesser of—

''(A) the established charges for tuition and fees that the educational institution involved requires similarly circumstanced nonveterans enrolled in the same program to pay; or

''(B) $788 per month for a full-time course.'';

(2) in subsection (b), by striking ''$670'' and inserting ''$788''; and

(3) in subsection (c)(2), by striking ''shall be'' and all that follows and inserting ''shall be $636 for full-time, $477 for three-quarter-time, or $319 for half-time pursuit.''.

(b) CORRESPONDENCE COURSES.—Section 3534(b) is amended by striking ''$670'' and inserting ''$788''.

(c) SPECIAL RESTORATIVE TRAINING.—Section 3542(a) is amended—

(1) by striking ''$670'' and inserting ''$788''; and

(2) by striking ''$210'' each place it appears and inserting ''$247''.

(d) APPRENTICESHIP TRAINING.—Section 3687(b)(2) is amended by striking ''shall be $488 for the first six months'' and all that follows and inserting ''shall be $574 for the first six months, $429 for the second six months, $285 for the third six months, and $144 for the fourth and any succeeding six-month period of training.''.

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on July 1, 2004, and shall apply with respect to educational assistance allowances payable under chapter 35 and section 3687(b)(2) of title 38, United States Code, for months beginning on or after that date.

SEC. 303. RESTORATION OF SURVIVORS' AND DEPENDENTS' EDUCATION BENEFITS OF INDIVIDUALS BEING ORDERED TO FULL-TIME NATIONAL GUARD DUTY.

(a) DELIMITING DATE.—Section 3512(h) is amended by inserting ''or is involuntarily ordered to full-time National Guard duty under section 502(f) of title 32,'' after ''title 10,''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as of September 11, 2001.

SEC. 304. ROUNDING DOWN OF CERTAIN COST-OF-LIVING ADJUSTMENTS ON EDUCATIONAL ASSISTANCE.

(a) BASIC EDUCATIONAL ASSISTANCE UNDER MONTGOMERY GI BILL.—Section 3015(h) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(2) by inserting ''(1)'' after ''(h)'';

(3) by striking ''(rounded to the nearest dollar)'';

(4) in subparagraph (B), as so redesignated, by striking ''paragraph (1)'' and inserting ''subparagraph (A)''; and

(5) by adding at the end the following new paragraph:

''(2) Any increase under paragraph (1) in a rate with respect to a fiscal year after fiscal year 2004 and before fiscal year 2014 shall be rounded down to the next lower whole dollar amount. Any such increase with respect to a fiscal year after fiscal year 2013 shall be rounded to the nearest whole dollar amount.''.

(b) SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE.—Section 3564 is amended—

(1) by inserting ''(a)'' before ''With'';

(2) by striking ''(rounded to the nearest dollar)''; and

(3) by adding at the end the following new subsection:

''(b) Any increase under subsection (a) in a rate with respect to a fiscal year after fiscal year 2004 and before fiscal year 2014 shall be rounded down to the next lower whole dollar amount. Any such increase with respect to a fiscal year after fiscal year 2013 shall be rounded to the nearest whole dollar amount.''.

SEC. 305. AUTHORIZATION FOR STATE APPROVING AGENCIES TO APPROVE CERTAIN ENTREPRENEURSHIP COURSES.

(a) APPROVAL OF ENTREPRENEURSHIP COURSES.—Section 3675 is amended by adding at the end the following new subsection:

''(c)(1) A State approving agency may approve the entrepreneurship courses offered by a qualified provider of entrepreneurship courses.

''(2) For purposes of this subsection, the term 'entrepreneurship course' means a non-degree, non-credit course of business education that enables or assists a person to start or enhance a small business concern (as defined pursuant to section 3(a) of the Small Business Act (15 U.S.C. 632(a))).

''(3) Subsection (a) and paragraphs (1) and (2) of subsection (b) shall not apply to—

''(A) an entrepreneurship course offered by a qualified provider of entrepreneurship courses; and

''(B) a qualified provider of entrepreneurship courses by reason of such provider offering one or more entrepreneurship courses.''.

(b) BUSINESS OWNERS NOT TREATED AS ALREADY QUALIFIED.—Section 3471 is amended by inserting before the last sentence the following: ''The Secretary shall not treat a person as already qualified for the objective of a program of education offered by a qualified provider of entrepreneurship courses solely because such person is the owner or operator of a business.''.

(c) INCLUSION OF ENTREPRENEURSHIP COURSES IN DEFINITION OF PROGRAM OF EDUCATION.—Subsection (b) of section 3452 is amended by adding at the end the following: ''Such term also includes any course, or combination of courses, offered by a qualified provider of entrepreneurship courses.''.

(d) INCLUSION OF QUALIFIED PROVIDER OF ENTREPRENEURSHIP COURSES IN DEFINITION OF EDUCATIONAL INSTITUTION.—Subsection (c) of section 3452 is amended by adding at the end the following: ''Such term also includes any qualified provider of entrepreneurship courses.''.

(e) DEFINITION OF QUALIFIED PROVIDER OF ENTREPRENEURSHIP COURSES.—Section 3452 is further amended by adding at the end the following new subsection:

''(h) The term 'qualified provider of entrepreneurship courses' means any of the following entities insofar as such entity offers, sponsors, or cosponsors an entrepreneurship course (as defined in section 3675(c)(2) of this title):

''(1) Any small business development center described in section 21 of the Small Business Act (15 U.S.C. 648).

''(2) The National Veterans Business Development Corporation (established under section 33 of the Small Business Act (15 U.S.C. 657c)).''.

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to courses approved by State approving agencies after the date of the enactment of this Act.

SEC. 306. REPEAL OF PROVISIONS RELATING TO OBSOLETE EDUCATION LOAN PROGRAM.

(a) TERMINATION OF PROGRAM.—The Secretary of Veterans Affairs may not make a loan under subchapter III of chapter 36 of title 38, United States Code, after the date of the enactment of this Act.

(b) DISCHARGE OF LIABILITIES.—Effective as of the date of the transfer of funds under subsection (c)—

(1) any liability on an education loan under subchapter III of chapter 36 of title 38, United States Code, that is outstanding as of such date shall be deemed discharged; and

(2) the right of the United States to recover an overpayment declared under section 3698(e)(1) of such title that is outstanding as of such date shall be deemed waived.

(c) TERMINATION OF LOAN FUND.—(1) Effective as of the day before the date of the repeal under this section of subchapter III of chapter 36 of title 38, United States Code, all monies in the revolving fund of the Treasury known as the ''Department of Veterans Affairs Education Loan Fund'' shall be transferred to the Department of Veterans Affairs Readjustment Benefits Account, and the revolving fund shall be closed.

(2) Any monies transferred to the Department of Veterans Affairs Readjustment Benefits Account under paragraph (1) shall be merged with amounts in that account and shall be available for the same purposes, and subject to the same conditions and limitations, as amounts in that account.

(d) USE OF ENTITLEMENT TO VETERANS EDUCATIONAL ASSISTANCE FOR EDUCATION LOAN PROGRAM.—Section 3462(a) is amended by striking paragraph (2).

(e) REPEAL OF EDUCATION LOAN PROGRAM.—Subchapter III of chapter 36 is repealed.

(f) CONFORMING AMENDMENTS.—(1) Section 3485(e)(1) is amended by striking ''(other than an education loan under subchapter III)''.

(2) Section 3512 is amended by striking subsection (f).

(g) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 36 is amended by striking the items relating to subchapter III and sections 3698 and 3699.

(h) EFFECTIVE DATES.—(1) The amendments made by subsection (d) shall take effect on the date of the enactment of this Act.

(2) The amendments made by subsections (e), (f), and (g) shall take effect 90 days after the date of the enactment of this Act.

SEC. 307. SIX-YEAR EXTENSION OF THE VETERANS' ADVISORY COMMITTEE ON EDUCATION.

(a) MEMBERSHIP.—Subsection (a) of section 3692 is amended in the second sentence by inserting '', to the maximum extent practicable,'' after ''The committee shall also''.

(b) EXTENSION.—Subsection (c) of that section is amended by striking ''December 31, 2003'' and inserting ''December 31, 2009''.

(c) TECHNICAL AMENDMENTS.—That section is further amended—

(1) in subsections (a) and (b), by striking ''chapter 106'' each place it appears and inserting ''chapter 1606''; and

(2) in subsection (b), by striking ''chapter 30'' and inserting ''chapters 30''.

SEC. 308. PROCUREMENT PROGRAM FOR SMALL BUSINESS CONCERNS OWNED AND CONTROLLED BY SERVICE-DISABLED VETERANS.

The Small Business Act (15 U.S.C. 631 et seq.) is amended by redesignating section 36 as section 37 and by inserting after section 35 the following new section:

''SEC. 36. PROCUREMENT PROGRAM FOR SMALL BUSINESS CONCERNS OWNED AND CONTROLLED BY SERVICE-DISABLED VETERANS.

''(a) SOLE SOURCE CONTRACTS.—In accordance with this section, a contracting officer may award a sole source contract to any small business concern owned and controlled by service-disabled veterans if—

''(1) such concern is determined to be a responsible contractor with respect to performance of such contract opportunity and the contracting officer does not have a reasonable expectation that 2 or more small business concerns owned and controlled by service-disabled veterans will submit offers for the contracting opportunity;

''(2) the anticipated award price of the contract (including options) will not exceed—

''(A) $5,000,000, in the case of a contract opportunity assigned a standard industrial classification code for manufacturing; or

''(B) $3,000,000, in the case of any other contract opportunity; and

''(3) in the estimation of the contracting officer, the contract award can be made at a fair and reasonable price.

''(b) RESTRICTED COMPETITION.—In accordance with this section, a contracting officer may award contracts on the basis of competition restricted to small business concerns owned and controlled by service-disabled veterans if the contracting officer has a reasonable expectation that not less than 2 small business concerns owned and controlled by service-disabled veterans will submit offers and that the award can be made at a fair market price.

''(c) RELATIONSHIP TO OTHER CONTRACTING PREFERENCES.—A procurement may not be made from a source on the basis of a preference provided under subsection (a) or (b) if the procurement would otherwise be made from a different source under section 4124 or 4125 of title 18, United States Code, or the Javits-Wagner-O'Day Act (41 U.S.C. 46 et seq.).

''(d) ENFORCEMENT; PENALTIES.—Rules similar to the rules of paragraphs (5) and (6) of section 8(m) shall apply for purposes of this section.

''(e) CONTRACTING OFFICER.—For purposes of this section, the term 'contracting officer' has the meaning given such term in section 27(f)(5) of the Office of Federal Procurement Policy Act (41 U.S.C. 423(f)(5)).''.

SEC. 309. OUTSTATIONING OF TRANSITION ASSISTANCE PROGRAM PERSONNEL.

(a) IN GENERAL.—(1) Chapter 41 is amended by adding at the end the following new section:

''§4113. Outstationing of Transition Assistance Program personnel

''(a) STATIONING OF TAP PERSONNEL AT OVERSEAS MILITARY INSTALLATIONS.—(1) The Secretary—

''(A) shall station employees of the Veterans' Employment and Training Service, or contractors under subsection (c), at each veterans assistance office described in paragraph (2); and

''(B) may station such employees or contractors at such other military installations outside the United States as the Secretary, after consultation with the Secretary of Defense, determines to be appropriate or desirable to carry out the purposes of this chapter.

''(2) Veterans assistance offices referred to in paragraph (1)(A) are those offices that are established by the Secretary of Veterans Affairs on military installations pursuant to the second sentence of section 7723(a) of this title.

''(b) FUNCTIONS.—Employees (or contractors) stationed at military installations pursuant to subsection (a) shall provide, in person, counseling, assistance in identifying employment and training opportunities, help in obtaining such employment and training, and other related information and services to members of the Armed Forces who are being separated from active duty, and the spouses of such members, under the Transition Assistance Program and Disabled Transition Assistance Program established in section 1144 of title 10.

''(c) AUTHORITY TO CONTRACT WITH PRIVATE ENTITIES.—The Secretary, consistent with section 1144 of title 10, may enter into contracts with public or private entities to provide, in person, some or all of the counseling, assistance, information and services under the Transition Assistance Program required under subsection (a).''.

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

''4113. Outstationing of Transition Assistance Program personnel.''.

(b) DEADLINE FOR IMPLEMENTATION.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Labor shall implement section 4113 of title 38, United States Code, as added by subsection (a), and shall have employees of the Veterans' Employment and Training Service, or contractors, to carry out that section at the military installations involved by such date.

(c) ADDITIONAL AMENDMENT.—(1) The second sentence of section 7723(a) is amended by inserting ''and taking into account recommendations, if any, of the Secretary of Labor'' after ''Secretary of Defense''

(2) The amendment made by paragraph (1) shall apply with respect to offices established after the date of the enactment of this Act.

TITLE IV—HOUSING BENEFITS AND RELATED MATTERS

SEC. 401. AUTHORIZATION TO PROVIDE ADAPTED HOUSING ASSISTANCE TO CERTAIN DISABLED MEMBERS OF THE ARMED FORCES WHO REMAIN ON ACTIVE DUTY.

Section 2101 is amended by adding at the end the following new subsection:

''(c)(1) The Secretary may provide assistance under subsection (a) to a member of the Armed Forces serving on active duty who is suffering from a disability described in paragraph (1), (2), or (3) of that subsection if such disability is the result of an injury incurred or disease contracted in or aggravated in line of duty in the active military, naval, or air service. Such assistance shall be provided to the same extent as assistance is provided under that subsection to veterans eligible for assistance under that subsection and subject to the requirements of the second sentence of that subsection.

''(2) The Secretary may provide assistance under subsection (b) to a member of the Armed Forces serving on active duty who is suffering from a disability described in subparagraph (A) or (B) of paragraph (1) of that subsection if such disability is the result of an injury incurred or disease contracted in or aggravated in line of duty in the active military, naval, or air service. Such assistance shall be provided to the same extent as assistance is provided under that subsection to veterans eligible for assistance under that subsection and subject to the requirements of paragraph (2) of that subsection.''.

SEC. 402. INCREASE IN AMOUNTS FOR CERTAIN ADAPTIVE BENEFITS FOR DISABLED VETERANS.

(a) INCREASE IN ASSISTANCE AMOUNT FOR SPECIALLY ADAPTED HOUSING.—Section 2102 is amended—

(1) in the matter preceding paragraph (1) of subsection (a), by striking ''$48,000'' and inserting ''$50,000''; and

(2) in subsection (b)(2), by striking ''$9,250'' and inserting ''$10,000''.

(b) INCREASE IN AMOUNT OF ASSISTANCE FOR AUTOMOBILE AND ADAPTIVE EQUIPMENT FOR CERTAIN DISABLED VETERANS.—Section 3902(a) is amended by striking ''$9,000'' and inserting ''$11,000''.

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply with respect to assistance furnished on or after the date of the enactment of this Act.

SEC. 403. PERMANENT AUTHORITY FOR HOUSING LOANS FOR MEMBERS OF THE SELECTED RESERVE.

Section 3702(a)(2)(E) is amended by striking ''For the period'' and all that follows through ''each'' and inserting ''Each''.

SEC. 404. REINSTATEMENT OF MINIMUM REQUIREMENTS FOR SALE OF VENDEE LOANS.

(a) REINSTATEMENT.—Subsection (a) of section 3733 is amended by adding at the end the following new paragraph:

''(7) During the period that begins on the date of the enactment of the Veterans' Benefits Act of 2003 and ends on September 30, 2013, the Secretary shall carry out the provisions of this subsection as if—

''(A) the references in the first sentence of paragraph (1) to '65 percent' and 'may be financed' were references to '85 percent' and 'shall be financed', respectively;

''(B) the second sentence of paragraph (1) were repealed; and

''(C) the reference in paragraph (2) to 'September 30, 1990,' were a reference to 'September 30, 2013,'.''.

(b) STYLISTIC AMENDMENTS.—Such section is further amended—

(1) by striking ''of this subsection'' after—

(A) ''paragraph (1)'' in subsections (a)(4)(A), (a)(5), (a)(6), and (c)(2); and

(B) ''paragraph (5)'' in subsection (a)(4)(B)(i); and

(2) by striking ''of this paragraph'' each place it appears in subsection (a)(4).

SEC. 405. ADJUSTMENT TO HOME LOAN FEES.

Effective January 1, 2004, paragraph (2) of section 3729(b) is amended to read as follows:

''(2) The loan fee table referred to in paragraph (1) is as follows:

''LOAN FEE TABLE

Type of loan	Active duty veteran	Reservist	Other obligor
(A)(i) Initial loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other initial loan described in section 3710(a) other than with 5-down or 10-down (closed before January 1, 2004)	2.00	2.75	NA
(A)(ii) Initial loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other initial loan described in section 3710(a) other than with 5-down or 10-down (closed on or after January 1, 2004, and before October 1, 2004)	2.20	2.40	NA
(A)(iii) Initial loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other initial loan described in section 3710(a) other than with 5-down or 10-down (closed on or after October 1, 2004, and before October 1, 2011)	2.15	2.40	NA
(A)(iv) Initial loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other initial loan described in section 3710(a) other than with 5-down or 10-down (closed on or after October 1, 2011)	1.40	1.65	NA
(B)(i) Subsequent loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other subsequent loan described in section 3710(a) (closed before January 1, 2004)	3.00	3.00	NA
(B)(ii) Subsequent loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other subsequent loan described in section 3710(a) (closed on or after January 1, 2004, and before October 1, 2011)	3.30	3.30	NA
(B)(iii) Subsequent loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other subsequent loan described in section 3710(a) (closed on or after October 1, 2011 and before October 1, 2013)	2.15	2.15	NA
(B)(iv) Subsequent loan described in section 3710(a) to purchase or construct a dwelling with 0-down, or any other subsequent loan described in section 3710(a) (closed on or after October 1, 2013)	1.25	1.25	NA
(C)(i) Loan described in section 3710(a) to purchase or construct a dwelling with 5-down (closed before October 1, 2011)	1.50	1.75	NA
(C)(ii) Loan described in section 3710(a) to purchase or construct a dwelling with 5-down (closed on or after October 1, 2011)	0.75	1.00	NA
(D)(i) Initial loan described in section 3710(a) to purchase or construct a dwelling with 10-down (closed before October 1, 2011)	1.25	1.50	NA
(D)(ii) Initial loan described in section 3710(a) to purchase or construct a dwelling with 10-down (closed on or after October 1, 2011)	0.50	0.75	NA
(E) Interest rate reduction refinancing loan	0.50	0.50	NA
(F) Direct loan under section 3711	1.00	1.00	NA
(G) Manufactured home loan under section 3712 (other than an interest rate reduction refinancing loan)	1.00	1.00	NA
(H) Loan to Native American veteran under section 3762 (other than an interest rate reduction refinancing loan)	1.25	1.25	NA
(I) Loan assumption under section 3714	0.50	0.50	0.50
(J) Loan under section 3733(a)	2.25	2.25	2.25''.

SEC. 406. ONE-YEAR EXTENSION OF PROCEDURES ON LIQUIDATION SALES OF DEFAULTED HOME LOANS GUARANTEED BY THE DEPARTMENT OF VETERANS AFFAIRS.

Section 3732(c)(11) is amended by striking ''October 1, 2011'' and inserting ''October 1, 2012''.

TITLE V—BURIAL BENEFITS

SEC. 501. BURIAL PLOT ALLOWANCE.

(a) IN GENERAL.—Section 2303(b) is amended—

(1) in the matter preceding paragraph (1), by striking ''a burial allowance under such section 2302, or under such subsection, who was discharged from the active military, naval, or air service for a disability incurred or aggravated in line of duty, or who is a veteran of any war'' and inserting ''burial in a national cemetery under section 2402 of this title''; and

(2) in paragraph (2), by striking ''(other than a veteran whose eligibility for benefits under this subsection is based on being a veteran of any war)'' and inserting ''is eligible for a burial allowance under section 2302 of this title or under subsection (a) of this section, or was discharged from the active military, naval, or air

service for a disability incurred or aggravated in line of duty, and such veteran''.

(b) CONFORMING AMENDMENT.—Section 2307 is amended in the last sentence by striking ''and (b)'' and inserting ''and (b)(2)''.

SEC. 502. ELIGIBILITY OF SURVIVING SPOUSES WHO REMARRY FOR BURIAL IN NATIONAL CEMETERIES.

(a) ELIGIBILITY.—Section 2402(5) is amended by striking ''(which for purposes of this chapter includes an unremarried surviving spouse who had a subsequent remarriage which was terminated by death or divorce)'' and inserting ''(which for purposes of this chapter includes a surviving spouse who had a subsequent remarriage)''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to deaths occurring on or after January 1, 2000.

SEC. 503. PERMANENT AUTHORITY FOR STATE CEMETERY GRANTS PROGRAM.

(a) PERMANENT AUTHORITY.—Subsection (a) of section 2408 is amended—

(1) by striking ''(1)''; and

(2) by striking paragraph (2).

(b) CONFORMING AMENDMENT.—Subsection (e) of such section is amended by striking ''Sums appropriated under subsection (a) of this section'' and inserting ''Amounts appropriated to carry out this section''.

(c) TECHNICAL AMENDMENT TO REPEAL OBSOLETE PROVISION.—Subsection (d)(1) of such section is amended by striking ''on or after November 21, 1997,''.

TITLE VI—EXPOSURE TO HAZARDOUS SUBSTANCES

SEC. 601. RADIATION DOSE RECONSTRUCTION PROGRAM OF DEPARTMENT OF DEFENSE.

(a) REVIEW OF MISSION, PROCEDURES, AND ADMINISTRATION.—(1) The Secretary of Veterans Affairs and the Secretary of Defense shall jointly conduct a review of the mission, procedures, and administration of the Radiation Dose Reconstruction Program of the Department of Defense.

(2) In conducting the review under paragraph (1), the Secretaries shall—

(A) determine whether any additional actions are required to ensure that the quality assurance and quality control mechanisms of the Radiation Dose Reconstruction Program are adequate and sufficient for purposes of the program; and

(B) determine the actions that are required to ensure that the mechanisms of the Radiation Dose Reconstruction Program for communication and interaction with veterans are adequate and sufficient for purposes of the program, including mechanisms to permit veterans to review the assumptions utilized in their dose reconstructions.

(3) Not later than 90 days after the date of the enactment of this Act, the Secretaries shall jointly submit to Congress a report on the review under paragraph (1). The report shall set forth—

(A) the results of the review;

(B) a plan for any actions determined to be required under paragraph (2); and

(C) such other recommendations for the improvement of the mission, procedures, and administration of the Radiation Dose Reconstruction Program as the Secretaries jointly consider appropriate.

(b) ON-GOING REVIEW AND OVERSIGHT.—The Secretaries shall jointly take appropriate actions to ensure the on-going independent review and oversight of the Radiation Dose Reconstruction Program, including the establishment of the advisory board required by subsection (c).

(c) ADVISORY BOARD.—(1) In taking actions under subsection (b), the Secretaries shall jointly appoint an advisory board to provide review and oversight of the Radiation Dose Reconstruction Program.

(2) The advisory board under paragraph (1) shall be composed of the following:

(A) At least one expert in historical dose reconstruction of the type conducted under the Radiation Dose Reconstruction Program.

(B) At least one expert in radiation health matters.

(C) At least one expert in risk communications matters.

(D) A representative of the Department of Veterans Affairs.

(E) A representative of the Defense Threat Reduction Agency.

(F) At least three veterans, including at least one veteran who is a member of an atomic veterans group.

(3) The advisory board under paragraph (1) shall—

(A) conduct periodic, random audits of dose reconstructions under the Radiation Dose Reconstruction Program and of decisions by the Department of Veterans Affairs on claims for service connection of radiogenic diseases;

(B) assist the Department of Veterans Affairs and the Defense Threat Reduction Agency in communicating to veterans information on the mission, procedures, and evidentiary requirements of the Radiation Dose Reconstruction Program; and

(C) carry out such other activities with respect to the review and oversight of the Radiation Dose Reconstruction Program as the Secretaries shall jointly specify.

(4) The advisory board under paragraph (1) may make such recommendations on modifications in the mission or procedures of the Radiation Dose Reconstruction Program as the advisory board considers appropriate as a result of the audits conducted under paragraph (3)(A).

SEC. 602. STUDY ON DISPOSITION OF AIR FORCE HEALTH STUDY.

(a) STUDY REQUIRED.—The Secretary of Veterans Affairs shall, in accordance with this section, carry out a study to determine the appropriate disposition of the Air Force Health Study, an epidemiologic study of Air Force personnel who were responsible for conducting aerial spray missions of herbicides during the Vietnam era.

(b) STUDY THROUGH NATIONAL ACADEMY OF SCIENCES.—Not later than 60 days after the date of the enactment of this Act, the Secretary shall seek to enter into an agreement with the National Academy of Sciences, or another appropriate scientific organization, to carry out the study required by subsection (a).

(c) ELEMENTS.—Under the study under subsection (a), the National Academy of Sciences, or other appropriate scientific organization, shall address the following:

(1) The scientific merit of retaining and maintaining the medical records, other study data, and laboratory specimens collected in the course of the Air Force Health Study after the currently-scheduled termination date of the study in 2006.

(2) Whether or not any obstacles exist to retaining and maintaining the medical records, other study data, and laboratory specimens referred to in paragraph (1), including privacy concerns.

(3) The advisability of providing independent oversight of the medical records, other study data, and laboratory specimens referred to in paragraph (1), and of any further study of such records, data, and specimens, and, if so, the mechanism for providing such oversight.

(4) The advisability of extending the Air Force Health Study, including the potential value and relevance of extending the study, the potential cost of extending the study, and the Federal or non-Federal entity best suited to continue the study if extended.

(5) The advisability of making the laboratory specimens of the Air Force Health Study available for independent research, including the potential value and relevance of such research, and the potential cost of such research.

(d) REPORT.—Not later than 120 days after entering into an agreement under subsection (b), the National Academy of Sciences, or other appropriate scientific organization, shall submit to the Secretary and Congress a report on the results of the study under subsection (a). The report shall include the results of the study, including the matters addressed under subsection (c), and such other recommendations as the Academy, or other appropriate scientific organization, considers appropriate as a result of the study.

SEC. 603. FUNDING OF MEDICAL FOLLOW-UP AGENCY OF INSTITUTE OF MEDICINE OF NATIONAL ACADEMY OF SCIENCES FOR EPIDEMIOLOGICAL RESEARCH ON MEMBERS OF THE ARMED FORCES AND VETERANS.

(a) FUNDING.—(1) The Secretary of Veterans Affairs and the Secretary of Defense shall each make available to the National Academy of Sciences in each of fiscal years 2004 through 2013 the amount of $250,000 for the Medical Follow-Up Agency of the Institute of Medicine of the Academy for purposes of epidemiological research on members of the Armed Forces and veterans.

(2) The Secretary of Veterans Affairs shall make available amounts under paragraph (1) for a fiscal year from amounts available for the Department of Veterans Affairs for that fiscal year.

(3) The Secretary of Defense shall make available amounts under paragraph (1) for a fiscal year from amounts available for the Department of Defense for that fiscal year.

(b) USE OF FUNDS.—The Medical Follow-Up Agency shall use funds made available under subsection (a) for epidemiological research on members of the Armed Forces and veterans.

(c) SUPPLEMENT NOT SUPPLANT.—Amounts made available to the Medical Follow-Up Agency under this section for a fiscal year for the purposes referred to in subsection (b) are in addition to any other amount made available to the Agency for that fiscal year for those purposes.

TITLE VII—OTHER MATTERS

SEC. 701. TIME LIMITATIONS ON RECEIPT OF CLAIM INFORMATION PURSUANT TO REQUESTS OF DEPARTMENT OF VETERANS AFFAIRS.

(a) INFORMATION TO COMPLETE CLAIMS APPLICATIONS.—Section 5102 is amended by adding at the end the following new subsection:

''(c) TIME LIMITATION.—(1) If information that a claimant and the claimant's representative, if any, are notified under subsection (b) is necessary to complete an application is not received by the Secretary within one year from the date such notice is sent, no benefit may be paid or furnished by reason of the claimant's application.

''(2) This subsection shall not apply to any application or claim for Government life insurance benefits.''.

(b) CONSTRUCTION OF LIMITATION ON INFORMATION TO SUBSTANTIATE CLAIMS.—Section 5103(b) is amended—

(1) in paragraph (1), by striking ''if such'' and all that follows through ''application'' and inserting ''such information or evidence must be received by the Secretary within one year from the date such notice is sent''; and

(2) by adding at the end the following new paragraph:

''(3) Nothing in paragraph (1) shall be construed to prohibit the Secretary from making a decision on a claim before the expiration of the period referred to in that subsection.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect as if enacted on November 9, 2000, immediately after the enactment of the Veterans Claims Assistance Act of 2000 (Public Law 106–475; 114 Stat. 2096).

(d) PROCEDURES FOR READJUDICATION OF CERTAIN CLAIMS.—(1) The Secretary of Veterans Affairs shall readjudicate a claim of a qualified claimant if the request for such readjudication is received not later than the end of the one-year period that begins on the date of the enactment of this Act.

(2) For purposes of this subsection, a claimant is qualified within the meaning of paragraph (1) if the claimant—

(A) received notice under section 5103(a) of title 38, United States Code, requesting information or evidence to substantiate a claim;

(B) did not submit such information or evidence within a year after the date such notice was sent;

(C) did not file a timely appeal to the Board of Veterans' Appeals or the United States Court of Appeals for Veterans Claims; and

(D) submits such information or evidence during the one-year period referred to in paragraph (1).

(3) If the decision of the Secretary on a readjudication under this subsection is in favor of the qualified claimant, the award of the grant shall take effect as if the prior decision by the Secretary on the claim had not been made.

(4) Nothing in this subsection shall be construed to establish a duty on the part of the Secretary to identify or readjudicate any claim that—

(A) is not submitted during the one-year period referred to in paragraph (1); or

(B) has been the subject of a timely appeal to the Board of Veterans' Appeals or the United States Court of Appeals for Veterans Claims.

(e) CONSTRUCTION ON PROVIDING RENOTIFICATION.—Nothing in this section, or the amendments made by this section, shall be construed to require the Secretary of Veterans Affairs—

(1) to provide notice under section 5103(a) of such title with respect to a claim insofar as the Secretary has previously provided such notice; or

(2) to provide for a special notice with respect to this section and the amendments made by this section.

SEC. 702. CLARIFICATION OF APPLICABILITY OF PROHIBITION ON ASSIGNMENT OF VETERANS BENEFITS TO AGREEMENTS REQUIRING PAYMENT OF FUTURE RECEIPT OF BENEFITS.

Section 5301(a) is amended—

(1) by inserting ''(1)'' after ''(a)'';

(2) by designating the last sentence as paragraph (2); and

(3) by adding at the end the following new paragraph:

''(3)(A) This paragraph is intended to clarify that, in any case where a beneficiary entitled to compensation, pension, or dependency and indemnity compensation enters into an agreement with another person under which agreement such other person acquires for consideration the right to receive such benefit by payment of such compensation, pension, or dependency and indemnity compensation, as the case may be, except as provided in subparagraph (B), and including deposit into a joint account from which such other person may make withdrawals, or otherwise, such agreement shall be deemed to be an assignment and is prohibited.

''(B) Notwithstanding subparagraph (A), nothing in this paragraph is intended to prohibit a loan involving a beneficiary under the terms of which the beneficiary may use the benefit to repay such other person as long as each of the periodic payments made to repay such other person is separately and voluntarily executed by the beneficiary or is made by preauthorized electronic funds transfer pursuant to the Electronic Funds Transfers Act (15 U.S.C. 1693 et seq.).

''(C) Any agreement or arrangement for collateral for security for an agreement that is prohibited under subparagraph (A) is also prohibited and is void from its inception.''.

SEC. 703. SIX-YEAR EXTENSION OF ADVISORY COMMITTEE ON MINORITY VETERANS.

Section 544(e) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2009''.

SEC. 704. TEMPORARY AUTHORITY FOR PERFORMANCE OF MEDICAL DISABILITIES EXAMINATIONS BY CONTRACT PHYSICIANS.

(a) AUTHORITY.—Using appropriated funds, other than funds available for compensation and pension, the Secretary of Veterans Affairs may provide for the conduct of examinations with respect to the medical disabilities of applicants for benefits under laws administered by the Secretary by persons other than Department of Veterans Affairs employees. The authority under this section is in addition to the authority provided in section 504(b) of the Veterans' Benefits Improvement Act of 1996 (Public Law 104–275; 38 U.S.C. 5101 note).

(b) PERFORMANCE BY CONTRACT.—Examinations under the authority provided in subsection (a) shall be conducted pursuant to contracts entered into and administered by the Under Secretary for Benefits.

(c) EXPIRATION.—The authority in subsection (a) shall expire on December 31, 2009. No examination may be carried out under the authority provided in that subsection after that date.

(d) REPORT.—Not later than four years after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the use of the authority provided in subsection (a). The Secretary shall include in the report an assessment of the effect of examinations under that authority on the cost, timeliness, and thoroughness of examinations with respect to the medical disabilities of applicants for benefits under laws administered by the Secretary.

SEC. 705. FORFEITURE OF BENEFITS FOR SUBVERSIVE ACTIVITIES.

(a) ADDITION OF CERTAIN OFFENSES.—Paragraph (2) of section 6105(b) is amended—

(1) by inserting ''175, 229,'' after ''sections''; and

(2) by inserting ''831, 1091, 2332a, 2332b,'' after ''798,''.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to claims filed after the date of the enactment of this Act.

SEC. 706. TWO-YEAR EXTENSION OF ROUND-DOWN REQUIREMENT FOR COMPENSATION COST-OF-LIVING ADJUSTMENTS.

Sections 1104(a) and 1303(a) are each amended by striking ''2011'' and inserting ''2013''.

SEC. 707. CODIFICATION OF REQUIREMENT FOR EXPEDITIOUS TREATMENT OF CASES ON REMAND.

(a) CASES REMANDED BY BOARD OF VETERANS' APPEALS.—(1) Chapter 51 is amended by adding at the end of subchapter I the following new section:

''§ 5109B. Expedited treatment of remanded claims

''The Secretary shall take such actions as may be necessary to provide for the expeditious treatment by the appropriate regional office of the Veterans Benefits Administration of any claim that is remanded to a regional office of the Veterans Benefits Administration by the Board of Veterans' Appeals.''.

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 5109A the following new item:

''5109B. Expedited treatment of remanded claims.''.

(b) CASES REMANDED BY COURT OF APPEALS FOR VETERANS CLAIMS.—(1) Chapter 71 is amended by adding at the end the following new section:

''§ 7112. Expedited treatment of remanded claims

''The Secretary shall take such actions as may be necessary to provide for the expeditious treatment by the Board of any claim that is remanded to the Secretary by the Court of Appeals for Veterans Claims.''.

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

''7112. Expedited treatment of remanded claims.''.

(c) REPEAL OF SOURCE SECTION.—Section 302 of the Veterans' Benefits Improvement Act of 1994 (Public Law 103–446; 108 Stat. 4658; 38 U.S.C. 5101 note) is repealed.

SEC. 708. TECHNICAL AND CLERICAL AMENDMENTS.

(a) MISCELLANEOUS AMENDMENTS.—(1) Section 103(d) is amended—

(A) in paragraph (4)—

(i) in the matter preceding subparagraph (A), by striking ''this subsection'' and inserting ''paragraph (2)(A) or (3)''; and

(ii) in subparagraph (A), by striking ''paragraph (2)'' and inserting ''paragraph (2)(A)''; and

(B) in paragraph (5), by striking ''Paragraphs (2)'' and inserting ''Paragraphs (2)(A)''.

(2) Section 1729A is amended—

(A) in subsection (b), by striking ''after June 30, 1997,'' in the matter preceding paragraph (1);

(B) in subsection (c), by striking paragraph (3);

(C) by striking subsection (e); and

(D) by redesignating subsection (f) as subsection (e).

(3) Section 1804(c)(2) is amended by striking ''subsection'' and inserting ''section''.

(4) Section 1974(a)(5) is amended by striking ''Secretary of Transportation'' and inserting ''Secretary of Homeland Security''.

(b) AMENDMENTS RELATING TO THE JOBS FOR VETERANS ACT.—(1)(A) Subsection (c)(2)(B)(ii) of section 4102A is amended by striking ''October 1, 2002'' and inserting ''October 1, 2003''.

(B) The amendment made by subparagraph (A) shall take effect as if included in the enactment of section 4(a) of the Jobs for Veterans Act (Public Law 107–288; 116 Stat. 2038).

(2) Subsection (f)(1) of section 4102A is amended by striking ''6 months after the date of the enactment of this section,'' and inserting ''May 7, 2003,''.

(c) AMENDMENTS RELATING TO THE ESTABLISHMENT OF SOCIAL SECURITY ADMINISTRATION AS AN INDEPENDENT AGENCY.—(1) Section 1322 is amended—

(A) in subsection (a), by striking ''Secretary of Health and Human Services'' and all that follows through the period and inserting ''Commissioner of Social Security, and shall be certified by the Commissioner to the Secretary upon request of the Secretary.''; and

(B) in subsection (b)—

(i) by striking ''Secretary of Health and Human Services'' in the first sentence and inserting ''Commissioner of Social Security'';

(ii) by striking ''the two Secretaries'' and inserting ''the Secretary and the Commissioner''; and

(iii) by striking ''Secretary of Health and Human Services'' in the second sentence and inserting ''Commissioner''.

(2) Section 5101(a) is amended by striking ''Secretary of Health and Human Services'' and inserting ''Commissioner of Social Security''.

(3) Section 5317 is amended by striking ''Secretary of Health and Human Services'' in subsections (a), (b), and (g) and inserting ''Commissioner of Social Security''.

(4)(A) Section 5318 is amended—

(i) in subsection (a), by striking ''Department of Health and Human Services'' and inserting ''Social Security Administration''; and

(ii) in subsection (b)—

(I) by striking ''Department of Health and Human Services'' and inserting ''Social Security Administration'';

(II) by striking ''Secretary of Health and Human Services'' the first place it appears and inserting ''Commissioner of Social Security'';

(III) by striking ''Secretary of Health and Human Services'' the second place it appears and inserting ''Commissioner''; and

(IV) by striking ''such Secretaries'' and inserting ''the Secretary and the Commissioner''.

(B)(i) The heading of such section is amended to read as follows:

''§5318. Review of Social Security Administration death information''.

(ii) The item relating to that section in the table of sections at the beginning at chapter 53 is amended to read as follows:

''5318. Review of Social Security Administration death information.''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. SMITH) and the gentleman from Maine (Mr. MICHAUD) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Senate amendment to H.R. 2297 reflects an agreement with the other body on comparable House and Senate bills. The Veterans Benefits Act of 2003 includes almost all of the provisions that were contained in the bill when the House originally considered it, as well as several other worthwhile provisions contained in S. 1136, which the Senate passed on October 31.

Mr. Speaker, the Chairman of our Subcommittee on Benefits, the distinguished gentleman from South Carolina, will describe several of those important provisions, some seven titles in all, approximately 40 provisions, and I will yield to him in just a moment to do so. But let me briefly touch on the benefits this bill contains and who will be affected by it.

Mr. Speaker, many surviving spouses of veterans who die of a service-related cause will qualify for restoration of benefits taken away when they remarry. Former prisoners of war will find it easier to qualify for veterans benefits that they so richly deserve. Disabled veterans who own businesses will find it easier to sell their goods and services to the Federal Government. The surviving children of those killed in the line of duty will now receive a college-assisted payment that is 13 percent higher than the current benefit. Reservists who want to use the VA home loan program will now be charged a lower fee.

Mr. Speaker, following on the heels of our historic enactment of legislation to provide concurrent receipt benefits to over 250,000 severely disabled military retirees, this bill is a further testament to Congress' commitment to aiding those who serve our country in the Armed Forces. There are many other important provisions in this measure, and I do urge my colleagues to review them. And, again, my good friend and colleague, as well as the ranking member, will be going into further detail.

I would especially like to congratulate the Chair and Ranking Member of our Subcommittee on Benefits, the gentleman from South Carolina (Mr. BROWN) and the gentleman from Maine (Mr. MICHAUD) for holding hearings this year on a variety of important issues affecting veterans. I am pleased that their efforts on the subcommittee pulled together in truly bipartisan fashion all of these disparate elements into this omnibus bill to advance the needs of our veterans.

And, again, I always like to thank, because we work hand in glove, my good friend and colleague, the gentleman from Illinois (Mr. EVANS), for his work on this legislation as well.

Mr. Speaker, I reserve the balance of my time.

Mr. MICHAUD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of H.R. 2297, as amended, the Veterans Benefits Act of 2003. I would like to thank the chairman, the gentleman from New Jersey (Mr. SMITH) and the ranking member, the gentleman from Illinois (Mr. EVANS), for their leadership on the full committee and their successful negotiations with the Senate. I also would like to personally thank my good friend, the chairman of the subcommittee, the gentleman from South Carolina (Mr. BROWN), for his leadership and bipartisan spirit shown in considering these bills assigned to our subcommittee. It definitely has been a pleasure working with Chairman BROWN and his staff.

The Veterans Benefits Act of 2003 includes provisions drawn from many bills introduced by Members of both sides of the aisle. Our Nation's servicemembers and veterans have earned and their families deserve all the benefits provided under H.R. 2297 and, indeed, they certainly deserve much, much more.

Mr. Speaker, I am proud to be a sponsor and cosponsor of many of these measures that have been incorporated in H.R. 2297, including provisions aimed to make the home loan benefit for members of the Guard and Reserves permanent, to improve veterans education benefits, enhance self-employment opportunities, and expand employment counseling and job search assistance for servicemembers returning to civilian life after separating from military installations overseas.

H.R. 2297 provides for more equitable and rational treatment for surviving spouses and Filipino World War II veterans, of which I also fully support. It allows former prisoners of war to qualify for certain presumption of service connection and adds sclerosis of the liver to the diseases considered presumptively disabling for POWs. The Gold Star wives will benefit from our efforts to allow them to remarry after age 57 without losing the dependency and indemnity compensation, educational, and home loan benefits that they currently receive. This measure is long overdue and represents substantial progress.

I also support provisions brought forth by the other body which will increase education benefits for the spouses, surviving spouses, and dependent children for totally and permanently disabled and deceased servicemembers.

Mr. Speaker, the provisions in this package will benefit servicemembers and veterans from my State of Maine as well as their families. It will help others all around the country as well. I fully support H.R. 2297, as amended, and urge my colleagues to do the same.

Mr. Speaker, I rise today in strong support of H.R. 2297, as amended, the Veterans Benefits Package of 2003.

I would like to thank Chairman SMITH and Ranking Member LANE EVANS for their leadership on the full committee and their successful negotiations with the Senate.

I would also like to personally thank Chairman BROWN and his staff for the cooperative manner shown in introducing and considering bills assigned to our subcommittee. It has been a pleasure working with him and his staff.

As is the custom of the House Committee on Veterans Affairs, a large number of bills considered by the Subcommittee on Benefits have been included in the Veterans Benefits Act of 2003.

I am pleased that H.R. 2294 which I introduced to extend the Veterans' Advisory Committee on Education is included as section 307 of H.R. 2297, as amended. The Veterans Advisory Committee provides useful information to the Congress and should be continued.

I am also pleased that H.R. 3239 which I introduced to extend the Veterans' Advisory Committee on Minority Veterans is included as section 703 of H.R. 2297, as amended. This committee brings to the attention of the Congress specific issues of concern to African-American, Native America, Hispanic American, and Asian-Pacific Island American veterans. I know that the Native American veterans of Maine, as well as all minority veterans, will continue to benefit from the counsel and advice provided by this committee.

I am original cosponsor of H.R. 761 introduced by our ranking Democratic member of the full committee, LANE EVANS, to permit seriously disabled servicemembers to apply for grants to adapt their homes before being discharged from military service. This provision included as section 401 will enable seriously disabled servicemembers to begin the process of obtaining suitable housing while on active duty.

I joined our Ranking Democratic Member LANE EVANS in introducing H.R. 1257 to make the home loan program of the Department of Veterans Affairs for members of the Select Reserve a permanent program. This provision is included as section 403 of H.R. 2297, as amended. That bill also provided for an equalization of the fees paid by reservists and active duty veterans. Although the fees were not equalized in the final bill, I note that the rates have been reduced to a nominal amount of 0.25 percent above that charged to active duty servicemembers and veterans. As we know, reservists are an integral part of this Nation's total force. Making their home loan benefits permanent and reducing the fees they must pay acknowledges their service in a tangible way.

I am an original cosponsor of H.R. 1460 introduced by Mr. RENZI to provide additional opportunities for service-disabled veterans to contract with the Federal Government. Unfortunately, the record of contracts awarded to service-disabled veterans by Federal agencies is dismal and getting worse. Provisions from H.R. 1460 are included in section 308 of H.R. 2297, as amended. I hope that Federal agencies will take seriously their responsibility to contract with small businesses owned or controlled by service-disabled veterans. Under the provision, the committees expect that the Small Business Administration will accept the determinations of the Secretary of Veterans Affairs with respect to the definition of service-connection.

I joined my good friend and neighbor Mr. BRADLEY in introducing H.R. 2164 to provide an extension in the period of eligibility for educational benefits provided to certain children of disabled and deceased veterans, when those children are called to full time duty in the National Guard. This provision is included in section 303 of H.R. 2297, as amended.

I am an original cosponsor of H.R. 2285 introduced by Mr. SIMPSON to require the Secretary of Labor to provide staffing at overseas locations to servicemembers who are separating from active duty. This provision is included as section 309 of H.R. 2297, as amended. It is unfortunate that the Secretary of Labor has not followed the lead of the Secretary of Veterans Affairs in making these services available at overseas locations. This bill will require the Secretary of Labor to do so.

I joined our chairman on the full committee, CHRIS SMITH, our ranking Democratic member on the full committee. LANE EVANS and our subcommittee chairman, HENRY BROWN, in introducing H.R. 2297 which provided the basis for this larger bill. I appreciate the efforts made by the chairman of the full committee as well as Chairman BROWN to operate in a bipartisan manner.

Although H.R. 3392, introduced by our Democratic Ranking Member LANE EVANS and myself to improve the adjudication of claims for benefits was not considered by the House committee during this session, I note that provisions similar to that bill are included as section 701 of H.R. 2297, as amended.

I am also a cosponsor of many other bills included in H.R. 2297, as amended. As a freshman Member of Congress, I am proud to have been able to introduce and cosponsor legislation which will improve the lives of our Nation's veterans.

The House Committee on Veterans Affairs has a reputation of serving veterans in a bipartisan manner. This bill reflects that spirit of cooperation.

Our Nation's servicemembers and veterans have earned—and their families deserve—all the benefits provided under H.R. 2297, as amended.

Indeed, they deserve so much more.

Mr. Speaker, the provisions in this package will benefit servicemembers and veterans from my State of Maine as well as their families. It will help others around the country as well.

I fully support H.R. 2297, as amended, and urge my colleagues to do the same.

Mr. Speaker, I reserve the balance of my time.

Mr. SMITH of New Jersey. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina (Mr. BROWN), the distinguished chairman of our Subcommittee on Benefits.

Mr. BROWN of South Carolina. Mr. Speaker, I thank the gentleman for yielding me this time, and I am pleased we are here today to consider the Veterans Benefits Act of 2003, a bipartisan effort with no less than 37 substantive provisions.

Mr. Speaker, I would like to highlight five of the provisions of this comprehensive bill which provides more than a billion dollars in improved benefits over 10 years.

Section 101 of the bill is long overdue. After years of trying to find the offsets, we are finally able to bring equity to those surviving spouses who lose their Dependency and Indemnity Compensation upon remarrying later in life. Section 101 would allow a surviving spouse who remarries after age 57 to retain DIC, as well as home loan and educational benefits. The gentleman from Florida (Mr. BILIRAKIS) has championed this cause for almost 15 years now, and I appreciate his dedication.

Small business is the bedrock of our economy. Section 301 of the bill would expand the Montgomery GI bill while authorizing educational assistance benefits for on-the-job training of less than 6 months in various types of self-employment training programs. Similarly, section 305 would allow, for the first time, servicemembers, veterans and certain dependents to enroll in entrepreneurship and pre-entrepreneurship courses offered by the Small Business Development Centers and the Veterans Business Development Corporation. I applaud the gentleman from Arizona (Mr. RENZI) for this provision, as well as provisions giving Federal agencies and departments new discretionary contracting authority to assist service-disabled veteran-owned businesses, another first.

Indeed, we, as a Nation, should accord veterans who become disabled in their service to this Nation a full opportunity to participate in the free enterprise system they have fought so hard to defend.

Section 309 would require the Department of Labor to go where its customers are to provide in-person Transitional Assistance Program services overseas, as VA has done since about 1992. I applaud the gentleman from Idaho (Mr. SIMPSON) and the gentleman from Texas (Mr. REYES) for their longstanding work on this provision.

Lastly, section 402 of the bill increases the adapted housing and automobile allowances for disabled servicemembers. I applaud the chairman of the Senate Committee on Veterans' Affairs, Mr. SPECTER, along with the ranking member, Mr. GRAHAM, for their many excellent contributions to this bill. I also applaud the former ranking member of the Senate Committee on Veterans' Affairs, Mr. ROCKEFELLER, for his continued assistance.

In closing, I commend Chairman SMITH, Ranking Member EVANS, and Subcommittee on Benefits' Ranking Member MICHAUD for their leadership and diligent work on this bill, as well as the support they have given to me my first term as chairman of the Subcommittee on Benefits. I also want to recognize the good folks who make up the committee staff, many of whom put in long hours so we could consider this bill before we adjourned.

I wholeheartedly support H.R. 2297, as amended, and encourage the full House to support it as well.

Mr. MICHAUD. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. EVANS), who has fought for veterans for a number of years.

Mr. EVANS. Mr. Speaker, I want to thank the gentleman for yielding me this time and for his fine work on the Subcommittee on Benefits this year.

We have really defined the impact that we have had by working on a bipartisan basis to achieve this. We have worked on a nonpartisan basis with our chairman, and the ranking members of other subcommittees, such as the gentleman from Maine (Mr. MICHAUD) and the gentleman from South Carolina (Mr. BROWN), have worked with the other body in finalizing this legislation, and I think they deserve a strong salute from veterans across the country.

I am very proud to be an original cosponsor of many of the provisions contained in this act. I am especially pleased for children of veterans who were exposed to herbicides in Korea, and who now are suffering from spina bifida, like a lot of the kids that were exposed in the Vietnam War. We must realize we have an obligation to those children and their families, and I think we have started down that road as well.

The bill recognizes the contributions made by the Guard and Reserve in making their home loan program permanent and reducing the funding fees

that they are charged. I am most pleased we are providing long-term benefits to our Gold Star wives of the Filipino Veterans. This bill also includes important veterans education benefits and extends business opportunities for veterans.

H.R. 2297 is a good bill, and I urge all my colleagues to show their support for our troops and Veterans by voting for it.

Mr. MICHAUD. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. FILNER).

Mr. FILNER. Mr. Speaker, I thank the gentleman for yielding me this time, and we are, of course, supporting H.R. 2297, a bill that incorporates many provisions that have been discussed at the House Committee on Veterans' Affairs and in the Senate Committee on Veterans' Affairs, and it includes provisions that upgrade benefits in many, many areas.

I would suspect, Mr. Speaker, that if this bill was taken one by one in terms of the provisions in there and the health bill that we hope will follow sometime later today, veterans across the Nation would understand that we are really keeping our promise to our Nation's veterans in both our benefits and our health provisions.

I would say to the chairman of the full committee, the gentleman from New Jersey (Mr. SMITH) and to the ranking member, the gentleman from Illinois (Mr. EVANS), the combination of the benefit and the health bill probably represents one of the most productive years in the history of this Congress in terms of veterans' benefits and veterans' health care. So I thank the chairman, and I thank the ranking member for bringing all these provisions together and working so hard and allowing Members from both sides of the aisle to contribute. There are provisions in these bills that represent both Democratic and Republican contributions, and I think that is the way we ought to behave here, and that is what this bill represents.

I just want to add a few comments to what has been stated previously. Two provisions which I helped to write are in the bill. The first involves a cause for which I have been fighting ever since I became a Member of Congress, and it is exceptionally gratifying to see progress on an important issue, and that is restoring the rightful benefits to Filipino World War II veterans.

Many of us know that after being drafted into service by President Franklin Delano Roosevelt, after bravely fighting alongside soldiers from the U.S. mainland, many Filipino veterans were deprived of their promised benefits by the Congress of 1946. In the intervening years, many of these veterans have emigrated to the United States and have become American citizens. This bill will increase the compensation received by one part of the Filipino Armed Forces, and that is the new Filipino Scouts.

They had been given what is called the ''peso rate'' in their disability compensation. That is one-half of what an American soldier would get. And they have been receiving that peso rate since the end of the war, whether they have lived in the United States or in the Philippines. For these that live in the United States, their cost of living is equal to the veterans here, and paying half is just simply not acceptable. Upon the passage of this bill, the widows of the Filipino World War II veterans will also receive the full amount of their DIC benefits, and burial benefits for the new Scouts will also be restored. So this is justice restored after almost 60 years of being denied.

There is another provision which I am pleased to see in this bill, and that involves life insurance policies. The VA currently holds about 4,000 insurance policies, valued at about $23 million, on which payment has not been made because the VA has not been able to locate the identified beneficiary.

What will happen after this bill passes is that the VA can pay secondary benefits if we cannot locate the primary beneficiary. And if no beneficiary files within 4 years, the VA secretary may pay another appropriate relative. It is a shame to have Veterans paying for life insurance throughout their lifetimes only to have their insurance unclaimed. So this will benefit the families of many of our veterans in this country.

□ 1515

Mr. Speaker, these are just two portions of the bill. There are many, many provisions which have been described by my colleagues. Again, I think it is a great advance for veterans to be able to receive the benefits that are in H.R. 2297, so I urge Members to support this bill.

Mr. SMITH of New Jersey. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to thank the gentleman from California (Mr. FILNER) for his kind remarks and also point out that he has been indefatigable in fighting for the Filipino veterans, and thank the gentleman for his hard work, which has been incorporated in this bill.

Mr. Speaker, I yield 2 minutes to the gentlewoman from Florida (Ms. GINNY BROWN-WAITE).

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, I rise today to offer my support for H.R. 2297, the legislation that the Committee on Veterans' Affairs has worked so hard to pass this year. I want to commend the gentleman from New Jersey (Chairman SMITH); the ranking member, the gentleman from Illinois (Mr. EVANS); and the gentleman from South Carolina (Mr. BROWN) for their steadfast leadership on veterans issues.

I also want to recognize the efforts of the gentleman from Arizona (Mr. RENZI) in drafting the Veterans Entrepreneurship Act of 2003, which is included in this legislation. Obviously, this bill will increase the opportunity afforded to veterans who spent their youth serving our country. Federal agencies will have the discretionary authority to sole source contracts for disabled veteran-owned businesses. Additionally, disabled veterans enrolled in school under a VA vocational rehab program will be allowed to declare self-employment as a vocational goal. Certainly this encourages entrepreneurship and business ownership. It clearly establishes a level playing field for those who have been wounded or injured while defending our freedom.

Very important to a lot of widows back home is that it addresses an injustice which has been suffered by military widows whose spouses died while on active duty or of a service-connected condition. They will no longer be denied the benefits earned by their first husband if they choose to remarry later in life. A military spouse already faces a life of sacrifice and hardship and should not be stripped of earned benefits because of a new-found love and companionship. We should not as a government be discouraging people to get married, and this bill corrects that injustice.

In a time of war, it is critically important that our servicemen and -women see that when they return home they will be welcomed by an eternally grateful Nation. This bill helps to express the gratitude that Congress has for our veterans of wars past and present.

Mr. MICHAUD. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. STRICKLAND), who has fought for veterans issues for a number of years.

Mr. STRICKLAND. Mr. Speaker, I thank the gentleman for yielding me this time, and I thank him for his work on this legislation that offers important benefits to very deserving veterans and their families.

There are many excellent provisions in this bill, and we should all support these provisions, including benefits to POWs and Filipino veterans. I would particularly like to thank the gentleman from Illinois (Mr. EVANS) and his staff and the staff of the Committee on Veterans' Affairs for their work in putting an end to lending schemes that target our Nation's veterans.

Recently, I introduced legislation on making this type of predatory lending illegal, and I am happy to have this language incorporated into this legislation. Predatory lenders are preying on veterans by manipulating them into surrendering their veterans benefits for lump sums, lump sums that these lenders then charge interest rates on ranging from 39 to 106 percent. It is embarrassing that companies would prey on

our Nation's veterans and seize the benefits that these veterans have earned through their service to our country. I am grateful that these provisions have been included in this legislation which make it clear that such practices are illegal and that predatory lenders who trick our veterans into surrendering their VA benefits will be in violation of the law.

Again, I would like to thank the gentleman from New Jersey (Mr. SMITH), the chairman of the full committee, and the gentleman from Illinois (Mr. EVANS), our ranking member, for their work; and I would especially like to thank the staffs on both the Republican and Democratic sides who worked so closely together to do those things which can make life better for our veterans.

Mr. SMITH of New Jersey. Mr. Speaker, I reserve the balance of my time.

Mr. MICHAUD. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, in closing, I would like to once again thank the gentleman from New Jersey (Mr. SMITH) and the ranking member, the gentleman from Illinois (Mr. EVANS), for all their work, as well as the chairman of the Subcommittee on Benefits, the gentleman from South Carolina (Mr. BROWN). I think our servicemen, our veterans in this country, can be very proud of the way the Committee on Veterans' Affairs has handled itself this year in a bipartisan manner, looking out for veterans in this country for all the work that they do as well.

I would also like to thank staff on both the Republican and Democratic side for working together in a bipartisan way. The only way we are ever going to move forward and get veterans issues addressed in Congress is by working together in a bipartisan manner. I wish actually some other committees here in Congress would look at the way the Committee on Veterans' Affairs operates and act as bipartisanly.

Mr. Speaker, I yield back the balance of my time.

Mr. SMITH of New Jersey. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank our colleagues on the other side of the aisle, all of the staff who have worked for days, weeks and months on this legislation through the hearing process. There are seven titles and close to 40 provisions in this bill. It is a very comprehensive omnibus bill, and so many Members made a difference in its content.

I would like to say we break a lot of new ground in this legislation, including the legislation dealing with veterans' businesses so that set-asides, sole source procurements, and the benefits accruing thereon will go to veterans themselves. In the past, veterans have gotten so little of the Federal procurement dollars—only 0.13 of 1 percent—which is unconscionable. This legislation now gives discretionary authority government-wide so we can again facilitate these important businesses.

Let me also point out that provision, just like the whole bill which is backed by virtually every veteran service organization in the country—that particular provision—on veterans' businesses has 36 military and veterans organizations backing it from a broad spectrum. From the largest Hispanic organization to the Black Veterans for Social Justice, we have a good cross-spectrum of people backing this provision because our veterans who have served so ably and are disabled are absolutely deserving of this legislation.

I thank the gentleman from Arizona (Mr. RENZI) for his leadership on this particular provision. He actually introduced the bill which is incorporated here in our final product. Mr. RENZI has been a champion of veterans benefits, and I thank him.

Mr. Speaker, I also thank Senator ROCKEFELLER, who was instrumental in encouraging a strong text for this provision. I also thank our counterparts in the Senate, Senator GRAHAM and the chairman of the Committee on Veterans' Affairs, Senator SPECTER, for their work on this legislation and their spirit of cooperation.

Mr. Speaker, I include for the RECORD a joint explanatory statement describing all of the provisions including the compromise agreement that we have reached with the other body.

EXPLANATORY STATEMENT ON SENATE AMENDMENT TO HOUSE BILL, H.R. 2297, AS AMENDED

H.R. 2297, as amended, the Veterans Benefits Act of 2003, reflects a Compromise Agreement reached by the House and Senate Committees on Veterans' Affairs ("the Committees") on the following bills considered in the House and Senate during the 108th Congress: H.R. 1257; H.R. 1460, as amended; H.R. 2297, as amended ("House Bill"); and S. 1132, as amended ("Senate Bill"). H.R. 1257 passed the House on May 22, 2003; H.R. 1460, as amended, passed the House on June 24, 2003; H.R. 2297, as amended, passed the House on October 8, 2003; S. 1132, as amended, passed the Senate on October 31, 2003.

The House and Senate Committees on Veterans' Affairs have prepared the following explanation of H.R. 2297, as amended ("Compromise Agreement"). Differences between the provisions contained in the Compromise Agreement and the related provisions of H.R. 1257, H.R. 1460, as amended, H.R. 2297, as amended, and S. 1132, as amended, are noted in this document, except for clerical corrections, conforming changes made necessary by the Compromise Agreement, and minor drafting, technical, and clarifying changes.

TITLE I: SURVIVOR BENEFITS

RETENTION OF CERTAIN VETERANS SURVIVOR BENEFITS FOR SURVIVING SPOUSES REMARRYING AFTER AGE 57

Current Law

Section 103(d) of title 38, United States Code, prohibits a surviving spouse who has remarried from receiving dependency and indemnity compensation ("DIC") and related housing and education benefits during the course of the remarriage. This benefit may be reinstated in the event the subsequent marriage is terminated. Public Law 107–330 extended to surviving spouses who remarry after age 55 continuing eligibility under the Civilian Health and Medical Program of the Department of Veterans Affairs ("CHAMPVA").

House Bill

Section 6 of H.R. 2297, as amended, would allow a surviving spouse who remarries after attaining age 55 to retain the DIC benefit. Spouses who remarry at age 55 or older prior to enactment of the bill would have one year from the date of enactment to apply for reinstatement of DIC benefits. The amount of DIC would be paid with no reduction of certain other Federal benefits to which the surviving spouse might be entitled.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 101 of the Compromise Agreement would provide that a surviving spouse upon remarriage after attaining age 57 would retain DIC, home loan, and educational benefits eligibility. Surviving spouses who remarried after attaining age 57 prior to enactment of the Compromise Agreement would have one year to apply for reinstatement of these benefits.

BENEFITS FOR CHILDREN WITH SPINA BIFIDA OF VETERANS OF CERTAIN SERVICE IN KOREA

Current Law

Chapter 18 of title 38, United States Code, authorizes the Department of Veterans Affairs ("VA") to provide benefits and services to those children born with spina bifida whose natural parent (before the child was conceived) served in the Republic of Vietnam between January 9, 1962 and May 7, 1975. Benefits and services are authorized due to the association between exposure to dioxin and the incidence of spina bifida in the children of those exposed. Children born with spina bifida whose parent was exposed to dioxin and other herbicides during military service in locations other than the Republic of Vietnam do not qualify for VA benefits and services.

House Bill

Section 12 of H.R. 2297, as amended, would permit children born with spina bifida whose parent (before the child was conceived) served in an area of Korea near the demilitarized zone ("DMZ") between October 1, 1967 and May 7, 1975, to qualify for benefits in the same manner as children whose parent served in the Republic of Vietnam.

Senate Bill

Section 101 of S. 1132, as amended, would permit children with spina bifida whose parent (before the child was conceived) served in or near the DMZ in Korea during the period beginning on January 1, 1967, and ending on December 31, 1969, to qualify for benefits in the same manner as children whose parent served in the Republic of Vietnam. The Senate Bill would require the Secretary of Veterans Affairs to make determinations of exposure to herbicides in Korea in consultation with the Secretary of Defense.

Compromise Agreement

Section 102 of the Compromise Agreement would generally follow the Senate language. However, under the Compromise Agreement, the time period for qualifying service in or near the DMZ is changed to service which occurred during the period beginning on September 1, 1967, and ending on August 31, 1971.

The Committees note that although use of herbicides in Vietnam ceased in 1971, Vietnam-era veterans who served until May 7, 1975, are presumed to have been exposed to residuals. Similarly, even though herbicide use in or near the Korean DMZ ended in 1969, the Committees believe it is appropriate to extend the qualifying service period beyond 1969 to account for residual exposure.

The Committees also note that the Secretary of Defense has identified the following units as those assigned or rotated to areas near the DMZ where herbicides were used between 1968 and 1969: combat brigades of the 2nd Infantry Division (1–38 Infantry, 2–38 Infantry, 1–23 Infantry, 2–23 Infantry, 3–23 Infantry, 3–32 Infantry, 1–9 Infantry, 2–9 Infantry, 1–72 Armor, and 2–72 Armor); Division Reaction Force (4–7th Cavalry, Counter Agent Company); 3rd Brigade of the 7th Infantry Division (1–17th Infantry, 2–17 Infantry, 1–73 Armor and 2–10th Cavalry); and Field Artillery, Signal and Engineer support personnel.

ALTERNATE BENEFICIARIES FOR NATIONAL SERVICE LIFE INSURANCE AND UNITED STATES GOVERNMENT LIFE INSURANCE

Current Law

Section 1917 of title 38, United States Code, gives veterans insured under the VA's National Service Life Insurance (''NSLI'') program the right to designate the beneficiary or beneficiaries of insurance policies maturing on or after August 1, 1946. It also specifies the modes of payment to beneficiaries when an insured dies, and sets forth the procedure to be followed when a beneficiary has not been designated or dies before the insured.

Section 1949 of title 38, United States Code, gives veterans insured under the United States Government Life Insurance (''USGLI'') program the right to change beneficiaries, and sections 1950 through 1952 of title 38 set out the modes of payment to designated beneficiaries and sets forth the procedure to be followed when a beneficiary either has not been designated or dies before the insured.

For the NSLI and USGLI programs, the law does not specify the course of action VA is to take when no beneficiary can be found.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 102 of S. 1132, as amended, would authorize the payment of NSLI and USGLI to alternate beneficiaries, in order of precedence and as designated by the insured veteran, if no claim is made by the primary beneficiary within two years of the insured veteran's death. If four years have elapsed since the death of the insured and no claim has been filed by a person designated by the insured as a beneficiary, section 102 would authorize VA to make payment to a person VA determines to be equitably entitled to such payment.

Compromise Agreement

Section 103 of the Compromise Agreement follows the Senate language.

PAYMENT OF BENEFITS ACCRUED AND UNPAID AT TIME OF DEATH

Current Law

Section 5121 of title 38, United States Code, restricts specified classes of survivors to receiving no more than two years of accrued benefits if a veteran dies while a claim for VA periodic monetary benefits (other than insurance and servicemen's indemnity) is being adjudicated. Public Law 104–275 extended the retroactive payment from one year to two years.

House Bill

Section 6 of H.R. 1460, as amended, would repeal the two-year limitation on accrued benefits so that a veteran's survivor may receive the full amount of award for accrued benefits.

Senate Bill

Section 105 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 104 of the Compromise Agreement contains this provision.

TITLE II: BENEFITS FOR FORMER PRISONERS OF WAR AND FOR FILIPINO VETERANS

Subtitle A—Former Prisoners of War

PRESUMPTIONS OF SERVICE-CONNECTION RELATING TO DISEASES AND DISABILITIES OF FORMER PRISONERS OF WAR

Current Law

Section 1112(b) of title 38, United States Code, specifies a list of 15 disabilities that VA presumes are related to military service for former prisoners of war (''POWs'') who were held captive for not less than 30 days. If a former POW was interned for less than 30 days, he or she must establish that the disability was incurred or aggravated during military service in order for service connection to be granted.

The list in section 1112(b) of title 38, United States Code, does not include cirrhosis of the liver; however, on July 18, 2003, VA published a regulation adding cirrhosis of the liver to the list of conditions presumptively service-connected for former POWs. (68 Fed. Reg. 42,602).

House Bill

Section 11 of H.R. 2297, as amended, would eliminate the 30-day requirement for psychosis, any anxiety states, dysthymic disorders, organic residuals of frostbite and post-traumatic arthritis. Section 11 would also codify cirrhosis of the liver as a disability which is presumptively service-connected for a former POW who was interned for at least 30 days.

Senate Bill

Section 302 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 201 of the Compromise Agreement contains this provision.

Subtitle B—Filipino Veterans

RATE OF PAYMENT OF BENEFITS FOR CERTAIN FILIPINO VETERANS AND THEIR SURVIVORS RESIDING IN THE UNITED STATES

Current Law

Section 107(a) of title 38, United States Code, generally provides that service before July 1, 1946, in the organized military forces of the Government of the Commonwealth of the Philippines, including organized guerilla units (''Commonwealth Army veterans''), may in some circumstances be a basis for entitlement to disability compensation, dependency and indemnity compensation, monetary burial benefits, and certain other benefits under title 38, United States Code, and that payment of such benefits will be at the rate of $0.50 for each dollar authorized. Section 107(b) of title 38, United States Code, generally provides that service in the Philippine Scouts under section 14 of the Armed Forces Voluntary Recruitment Act of 1945 (i.e., service in the ''new Philippine Scouts''), may be a basis for entitlement to disability compensation, DIC, and certain other benefits under title 38, United States Code, but payment of such benefits will be at the rate of $0.50 for each dollar authorized.

House Bill

Section 16 of H.R. 2297, as amended, would provide the full amount of compensation and DIC to eligible members of the new Philippine Scouts, as well as the full amount of DIC paid by reason of service in the organized military forces of the Commonwealth of the Philippines, including organized guerilla units, if the individual to whom the benefit is payable resides in the United States and is either a citizen of the U.S. or an alien lawfully admitted for permanent residence.

Senate Bill

Section 321 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 211 of the Compromise Agreement contains this provision.

BURIAL BENEFITS FOR NEW PHILIPPINE SCOUTS RESIDING IN THE UNITED STATES

Current Law

Section 107 of title 38, United States Code, provides that persons who served in the organized military forces of the Government of the Commonwealth of the Philippines, including organized guerilla units (''Commonwealth Army veterans''), who lawfully reside in the United States are eligible for burial in a VA national cemetery and VA monetary burial benefits at the full-dollar rate if, at the time of death, they are receiving VA disability compensation or would have been receiving VA pension but for their lack of qualifying service.

House Bill

Section 17 of H.R. 2297, as amended, would extend eligibility for burial in a national cemetery to new Philippine Scouts, as well as eligibility for VA burial benefits, to those who lawfully reside in the United States.

Senate Bill

Section 322 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 212 of the Compromise Agreement contains this provision.

EXTENSION OF AUTHORITY TO MAINTAIN REGIONAL OFFICE IN THE REPUBLIC OF THE PHILIPPINES

Current Law

Section 315(b) of title 38, United States Code, authorizes the Secretary of Veterans Affairs to operate a regional office in the Republic of the Philippines until December 31, 2003. Congress last extended this authority in Public Law 106–117.

House Bill

Section 18 of H.R. 2297, as amended, would extend the Secretary's authority to operate a regional office in the Republic of the Philippines through December 31, 2009.

Senate Bill

Section 323 of S. 1132, as amended, would extend the Secretary's authority to operate a regional office in the Republic of the Philippines through December 31, 2008.

Compromise Agreement

Section 213 of the Compromise Agreement follows the House language.

TITLE III: EDUCATION BENEFITS, EMPLOYMENT PROVISIONS, AND RELATED MATTERS

EXPANSION OF MONTGOMERY GI BILL EDUCATION BENEFITS FOR CERTAIN SELF-EMPLOYMENT TRAINING

Current Law

Section 3452(e) of title 38, United States Code, furnishes various legal definitions used in the administration of VA's educational assistance programs. Self-employment training is not included among the current definitions.

House Bill

Section 2 of H.R. 2297, as amended, would expand the Montgomery GI Bill program by authorizing educational assistance benefits for on-job training of less than six months in certain self-employment training programs, to include: (1) an establishment providing apprentice or other on-job training, including programs under the supervision of a college or university or any State department of education; (2) an establishment providing self-employment training consisting of full-time training for less than six months that is needed for obtaining licensure to engage in a self-employment occupation or required for ownership and operation of a franchise; (3) a State board of vocational education; (4) a Federal or State apprenticeship registration agency; (5) a joint apprenticeship committee established pursuant to the National Apprenticeship Act, title 29, United States Code; or (6) an agency of the Federal Government authorized to supervise such training.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 301 of the Compromise Agreement follows the House language.

INCREASE IN RATES OF SURVIVORS' AND DEPENDENTS' EDUCATIONAL ASSISTANCE

Current Law

Chapter 35 of title 38, United States Code, specifies the eligibility criteria, programs of education and training, and payment amounts applicable under VA's Survivors' and Dependents' Educational Assistance (''DEA'') benefits program. Generally, those eligible for DEA benefits are the spouses and dependents of: veterans with total and permanent service-connected ratings; veterans who died as a result of service-related injuries; or servicemembers who died while on active duty. Currently, monthly benefit rates for eligible DEA beneficiaries are $695 for full-time study, $522 for three-quarter-time study, and $347 for half-time study. Monthly DEA benefits are also available for beneficiaries pursuing programs of education on a less-than-half-time basis, through farm cooperative programs, correspondence courses, special restorative training programs, or programs of apprenticeship or other approved on-job training programs.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 104 of S. 1132, as amended, would raise monthly DEA benefits by 13.4 percent over current levels. The new rates would be set at $788 for full-time study, $592 for three-quarter time study, and $394 for half-time study. A 13.4 percent increase would also be made to benefits paid to eligible persons pursuing a program of education on a less than half-time basis, through institutional courses, farm cooperative programs, correspondence courses, special restorative training programs, or programs of apprenticeship or other approved on-job training programs. The increases would take effect on July 1, 2004.

Compromise Agreement

Section 302 of the Compromise Agreement follows the Senate language.

RESTORATION OF SURVIVORS' AND DEPENDENTS' EDUCATION BENEFITS OF INDIVIDUALS BEING ORDERED TO FULL-TIME NATIONAL GUARD DUTY

Current Law

Section 3512(h) of title 38, United States Code, provides for an extension of Survivors' and Dependents' Educational Assistance only to reservists called to active duty after September 11, 2001, for an amount of time equal to that period of full-time duty, plus 4 months.

House Bill

Section 3 of H.R. 2297, as amended, would provide that National Guard members who qualify for survivors' and dependents' education benefits under chapter 35 of title 38, United States Code, and are involuntarily ordered to full-time duty under title 32, United States Code, after September 11, 2001, would have their eligibility extended by an amount of time equal to that period of full-time duty, plus 4 months.

Senate Bill

Section 103 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 303 of the Compromise Agreement contains this provision.

ROUNDING DOWN OF CERTAIN COST-OF-LIVING ADJUSTMENTS ON EDUCATIONAL ASSISTANCE

Current Law

Sections 3015(h) and 3564 of title 38, United States Code, provide for annual cost-of-living adjustments to both the Montgomery GI Bill and Survivors' and Dependents' Educational Assistance programs. Each section specifies that percentage increases be ''rounded to the nearest dollar.''

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 304 of S. 1132, as amended, would require annual percentage adjustments under sections 3015(h) and 3564 to be rounded down to the nearest dollar. This section would first apply to adjustments made at the start of fiscal year 2005.

Compromise Agreement

Section 304 of the Compromise Agreement follows the Senate language. However, the Compromise Agreement specifies that the changes made by the Senate language shall be effective only through September 30, 2013.

AUTHORIZATION FOR STATE APPROVING AGENCIES TO APPROVE CERTAIN ENTREPRENEURSHIP COURSES

Current Law

Section 3675 of title 38, United States Code, establishes requirements for approval of accredited courses offered by educational institutions. Section 3452 of title 38, United States Code, furnishes various legal definitions used in the administration of VA educational assistance programs. Section 3471 of title 38, United States Code, establishes general requirements which must be met by educational institutions before VA may approve applications for educational assistance from veterans or eligible persons. There is no provision in current law authorizing the approval of entrepreneurship courses.

House Bill

Section 2 of H.R 1460, as amended, would allow State approving agencies to approve non-degree, non-credit entrepreneurship courses offered by a Small Business Development Center (''SBDC'') or the National Veterans Business Development Corporation for the training of veterans, disabled veterans, dependent spouses and children of certain disabled or deceased veterans, and members of the National Guard and Selected Reserve. VA would also be prohibited from considering a beneficiary as already qualified for the objective of a program of education offered by a qualified provider of an entrepreneurship course solely because he or she is the owner or operator of a small business.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 305 of the Compromise Agreement follows the House language.

REPEAL OF PROVISIONS RELATING TO OBSOLETE EDUCATION LOAN PROGRAM

Current Law

Subchapter III of chapter 36 of title 38, United States Code, establishes VA's education loan program, states policy regarding eligibility, amount, condition, and interest rates of loans, and establishes a revolving fund and insurance against defaults as part of its administration. This program has been in effect since January 1, 1975.

House Bill

Section 5 of H.R. 2297, as amended, would, effective on the date of enactment, repeal the VA education loan program and waive any existing repayment obligations of a veteran, including overpayments due to default on these loans.

Senate Bill

Section 305 of S. 1132, as amended, contains a comparable provision, but terminates the program 90 days after date of enactment.

Compromise Agreement

Section 306 of the Compromise Agreement follows the Senate language.

SIX-YEAR EXTENSION OF VETERANS' ADVISORY COMMITTEE ON EDUCATION

Current Law

Section 3692 of title 38, United States Code, requires the Secretary of Veterans Affairs to administer a Veterans' Advisory Committee on Education. It requires the Secretary to consult with and seek the advice of the Advisory Committee from time to time with respect to the administration of chapters 30, 32, and 35 of title 38, United States Code, and chapter 1606 of title 10, United States Code. The Advisory Committee's authorization expires on December 31, 2003.

House Bill

Section 4 of H.R. 2297, as amended, would extend, through December 31, 2009, the Veterans' Advisory Committee on Education, as well as amend the language to eliminate the requirement that veterans from certain periods—World War II, Korean conflict era, or post-Korean conflict era—be required to participate as members of the Advisory Committee.

Senate Bill

Section 342 of S. 1132, as amended, would extend the Veterans' Advisory Committee on Education through December 31, 2013, and

maintain the existing membership requirements, as practicable.

Compromise Agreement

Section 307 of the Compromise Agreement follows the Senate language with regard to membership, and the House language with regard to extending the Advisory Committee's authorization date through December 31, 2009.

PROCUREMENT PROGRAM FOR SMALL BUSINESS CONCERNS OWNED AND CONTROLLED BY QUALIFIED SERVICE-DISABLED VETERANS

Current Law

Sections 631 through 657 of title 15, United States Code, establish policies with respect to aid to small businesses. Section 637 specifies Small Business Administration (''SBA'') authorities regarding procurement matters. Section 637(a) specifies SBA authorities with respect to procurement contracts and subcontracts to disadvantaged small business concerns. Section 637(d) establishes policies regarding performance of contracts by small business concerns (''SBC''), as described in title 15, United States Code. Section 637(h) establishes policies regarding award of contracts, procedures other than competitive ones, and exceptions.

House Bill

Section 3 of H.R. 1460, as amended, would provide Federal agencies discretionary authority to create ''sole-source'' contracts for service-disabled veteran-owned and controlled small businesses, up to $5 million for manufacturing contract awards and up to $3 million for non-manufacturing contract awards.

This section would provide Federal agencies discretionary authority to restrict certain contracts to service-disabled veteran-owned and controlled small businesses if at least two such concerns are qualified to bid on the contract.

Section 3 would establish a contracting priority that places restricted and ''sole source'' contracts for service-disabled veteran-owned and controlled small businesses immediately below the priority for socially and economically disadvantaged firms (known as ''8(a)'' program contracts) for all Federal departments and agencies except VA. Such priorities for service-disabled veteran-owned and controlled small businesses would rank above priorities for HUBZone and women-owned businesses. HUBZones are SBCs located in historically underutilized business zones. However, a contracting officer would procure from a source on the basis of a preference provided under any provision of this legislation unless the contracting officer had determined the procurement could be made by a contracting authority having a higher priority. Lastly, procurement could not be made from a source on the basis of preference provided under this legislation if the procurement could otherwise be made from a different source under section 4124 or 4125 of title 18, United States Code, or the Javits-Wagner-O'Day Act.

Section 3 would establish a four-year pilot program in the Department of Veterans Affairs in which service-disabled veteran-owned and controlled small businesses would have the same contracting priority as the 8(a) program.

This section would define ''qualified service-disabled veteran'' as any veteran who (1) has one or more disabilities that are service-connected as defined in section 101(16) of title 38, United States Code, and are rated at 10 percent or more by the Secretary of Veterans Affairs, or (2) is entitled to benefits under section 1151 of title 38, United States Code.

Section 3 would define ''small business concerns owned and controlled by qualified service-disabled veterans'' as (1) one in which not less than 51 percent of which is owned by one or more qualified service-disabled veterans or, in the case of any publicly-owned businesses, not less than 51 percent of the stock of which is owned by one or more qualified service-disabled veterans, and (2) the management and daily business operations of which are controlled by one or more qualified service-disabled veterans or, in the case of a veteran with permanent and severe disability, the spouse or permanent care giver of the veteran.

Section 3 would define the term ''certified small business concerns owned and controlled any qualified service-disabled veterans'' as any small business concern owned and controlled by qualified service-disabled veterans that is certified by the Administrator of the Small Business Administration as being such a concern.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 308 of the Compromise Agreement would provide Federal contracting officials the discretionary authority to award sole source contracts (limited to contracts of up to $5 million for manufacturing and $3 million for non-manufacturing) to SBCs owned and controlled by service-disabled veterans. This section would also provide Federal contracting officials, in certain circumstances, the discretionary authority to award contracts on a restricted competition basis to SBCs owned and controlled by service-disabled veterans. This provision would not supercede any existing procurement preference established under law. Specifically, it would not accord service-disabled veteran small business owners priority over procurement preferences under the Federal Prison Industries, Javits-Wagner-O'Day, SBA 8(a), Women's, or HubZone programs. Rather, the Committees intend the provision to provide Federal contracting officials a means to improve their results with respect to contracting with service-disabled veterans. The Committees note that in 1999, Public Law 106–50 established a 3 percent government-wide goal for procurement from service-disabled veteran-owned small businesses. To date, all Federal agencies fall far short of reaching this procurement goal.The Committees intend that a determination of service-connection by the Secretary of Veterans Affairs would be binding on the SBA for purposes of participation in this program. The Committees also urge the SBA and the Office of Federal Procurement Policy to expeditiously and transparently implement this program, perform outreach, and provide the necessary resources to improve results with respect to SBCs owned and operated by service-disabled veterans.

OUTSTATIONING OF TRANSITION ASSISTANCE PROGRAM PERSONNEL

Current Law

Section 1144 of title 10, United States Code, authorizes the Secretary of Labor to place staff in veterans' assistance offices on military installations, both foreign and domestic, to help transitioning servicemembers obtain civilian jobs.

House Bill

Section 19 of H.R. 2297, as amended, would require the Department of Labor to place staff in veterans' assistance offices where VA staff are located at overseas military installations 90 days after enactment. It would also authorize the Department of Labor to exceed the number of VA locations and place staff in additional locations abroad.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 309 of the Compromise Agreement follows the House language with a technical modification.

TITLE IV: HOUSING BENEFITS AND RELATED MATTERS

AUTHORIZATION TO PROVIDE ADAPTED HOUSING ASSISTANCE TO CERTAIN DISABLED MEMBERS OF THE ARMED FORCES WHO REMAIN ON ACTIVE DUTY

Current Law

Section 2101 of title 38, United States Code, provides for grants to adapt or acquire suitable housing for certain severely disabled veterans, including veterans who are unable to ambulate without assistance. Severely disabled servicemembers who have not yet been processed for discharge from military service, but who will qualify for the benefit upon discharge due to the severity of their disabilities, are not allowed to apply for or receive the grant until they are actually discharged from military service.

House Bill

Section 4 of H.R. 1460, as amended, would permit a member of the Armed Forces to apply for and receive a grant prior to actually being discharged from military service.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 401 of the Compromise Agreement follows the House language.

INCREASE IN AMOUNTS FOR CERTAIN ADAPTIVE BENEFITS FOR DISABLED VETERANS

Current Law

The Secretary of Veterans Affairs is authorized in chapter 21 of title 38, United States Code, to assist eligible veterans in acquiring suitable housing and adaptations with special fixtures made necessary by the nature of the veteran's service-connected disability, and with the necessary land. The maximum amount authorized for a severely disabled veteran is $48,000. The maximum amount authorized for less severely disabled veterans is $9,250.

Section 3902(a) of title 38, United States Code, authorizes the Secretary to pay up to $9,000 to an eligible disabled servicemember or veteran to purchase an automobile (including all state, local, and other taxes).

House Bill

Section 10(a) of H.R. 2297, as amended, would increase the specially adapted housing grants for the most severely disabled veterans from $48,000 to $50,000, and from $9,250 to $10,000 for less severely disabled veterans.

Section 10(b) would increase the specially adapted automobile grant from $9,000 to $11,000.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 402 of the Compromise Agreement follows the House language.

PERMANENT AUTHORITY FOR HOUSING LOANS FOR MEMBERS OF THE SELECTED RESERVE

Current Law

Under section 3702(a)(2)(E) of title 38, United States Code, members of the Selected

Reserve qualify for a VA home loan if the reservist has served for a minimum of six years. Eligibility for reservists under this program is scheduled to expire on September 30, 2009.

House Bill

Section 13 of H.R. 2297, as amended, would make the Selected Reserve home loan program permanent.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 403 of the Compromise Agreement follows the House language.

REINSTATEMENT OF MINIMUM REQUIREMENTS FOR SALE OF VENDEE LOANS

Current Law

Section 3733 of title 38, United States Code, generally establishes property management policies for real property acquired by the Department of Veterans Affairs as a result of a default on a loan that VA has guaranteed.

House Bill

Section 15 of H.R. 2297, as amended, would reinstate the vendee loan program which VA administratively terminated on January 31, 2003. It would increase from 65 percent to 85 percent the maximum number of purchases of real property the Secretary may finance in a fiscal year. It would change the vendee loan program from a discretionary to a mandatory one.

Senate Bill

Section 308 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 404 of the Compromise Agreement contains this provision. However, the Compromise Agreement specifies that the changes made under this provision shall expire after September 30, 2013.

ADJUSTMENT TO HOME LOAN FEES AND UNIFORMITY OF FEES FOR QUALIFYING RESERVE MEMBERS WITH FEES FOR ACTIVE DUTY VETERANS

Current Law

Section 3729(a) of title 38, United States Code, requires that a fee shall be collected from each person (1) obtaining a housing loan guaranteed, insured, or made under chapter 37; and (2) assuming a loan to which section 3714 (concerning loan assumptions) applies. The fee may be included in the loan.

Section 3729(b) of title 38, United States Code, determines the amount of the home loan fees expressed as a percentage of the total amount of the loan guaranteed, insured, or made, or, in the case of a loan assumption, the unpaid principal balance of the loan on the date of the transfer of the property.

Section 3729(b)(2) requires that veterans who served in the Selected Reserve pay 75 basis points more than veterans with active duty service.

House Bill

Section 14 of H.R. 2297, as amended, would make four revisions to the Loan Fee Table. First, it would provide uniformity in the funding fees for VA-guaranteed home loans charged to those who served in the Selected Reserve and veterans with active duty service. Second, beginning in fiscal year 2004, it would increase the fee charged for loans made with no down payment by 15 basis points. Third, it would increase the fee charged for repeated use of the home loan benefit, i.e., for a second or subsequent loan, by 30 basis points for the fiscal year 2004–2011 period and by 90 basis points in fiscal years 2012 and 2013. Fourth, it would replace the existing range of fees for hybrid adjustable rate mortgages under the current pilot program with a flat fee of 1.25 percent.

Senate Bill

Section 307 of S. 1132, as amended, would increase the funding fees for subsequent use of a guaranty by 50 basis points, but only between fiscal years 2005 and 2011.

Compromise Agreement

Section 405 of the Compromise Agreement would follow the House language, except that a funding fee for members of the Selected Reserve would, for initial use of a guaranty, be set 25 basis points higher than applicable funding fees set for veterans with active duty service. Further, for the period January 1, 2004 through September 30, 2004 only, in the case of active-duty veterans making initial loans with zero dollars down, the fee would be increased from 2.15 percent to 2.20 percent. In addition, the Compromise Agreement would not effect a 1.25 percent flat fee for hybrid adjustable rate mortgage loans.

ONE-YEAR EXTENSION OF PROCEDURES ON LIQUIDATION SALES OF DEFAULTED HOME LOANS GUARANTEED BY THE DEPARTMENT OF VETERANS AFFAIRS

Current Law

Section 3732 of title 38, United States Code, defines the procedures for a liquidation sale of a property acquired by VA in the event of a default on a VA-guaranteed home loan. The procedures direct VA to follow a formula, defined in statute, which mandates VA consider losses it might incur when selling properties acquired through foreclosure. Ultimately, after considering the loss VA can make a determination whether to, in fact, acquire the property or simply pay the guaranty on the loan used to purchase the property. The authority for these procedures is currently set to expire on October 1, 2011.

House Bill

The House Bill contains no comparable provision.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 406 of the Compromise Agreement would extend the application of the liquidation sale procedures through October 1, 2012.

TITLE V: BURIAL BENEFITS

BURIAL PLOT ALLOWANCE

Current Law

Veterans who are discharged from active duty service as a result of a service-connected disability, veterans who are entitled to disability compensation or VA pension, and veterans who die in a VA facility are eligible for a $300 VA ''plot allowance'' if they are not buried in a national cemetery. Section 2303(b)(1) of title 38, United States Code, allows state cemeteries to receive the $300 plot allowance payment for the interment of such veterans, and the interment of veterans of any war, if the cemeteries are used solely for the burial of veterans. However, states may not receive a plot allowance for burial of veterans who die as a result of a service-connected disability and whose survivors seek reimbursement of funeral expenses under section 2307 of title 38, United States Code (which currently authorizes a $2,000 funeral expense benefit).

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 201 of S. 1132, as amended, would expand existing law to allow states to receive the $300 plot allowance for the interment of veterans who did not serve during a wartime period and for the interment of veterans who died as a result of service-connected disabilities and whose survivors sought reimbursement of funeral expenses under section 2307 of title 38, United States Code.

Compromise Agreement

Section 501 of the Compromise Agreement follows the Senate language.

ELIGIBILITY OF SURVIVING SPOUSES WHO REMARRY FOR BURIAL IN NATIONAL CEMETERIES

Current Law

Section 2402(5) of title 38, United States Code, prohibits a surviving spouse of a veteran who has remarried from being buried with the veteran spouse in a national cemetery if the remarriage is in effect when the veteran's surviving spouse dies. Public Law 103–466 revised eligibility criteria for burial in a national cemetery to reinstate burial eligibility for a surviving spouse of an eligible veteran whose subsequent remarriage was terminated by death or divorce.

House Bill

Section 7 of H.R. 2297, as amended, would allow the surviving spouse of a veteran to be eligible for burial in a VA national cemetery based on his or her marriage to the veteran, regardless of the status of the subsequent marriage. This eligibility revision would be effective January 1, 2000.

Senate Bill

Section 202 of S. 1132, as amended, contains a similar provision, with the eligibility revision being effective on date of enactment.

Compromise Agreement

Section 502 of the Compromise Agreement follows the House language. Despite the inclusion of an additional group of persons (i.e., remarried spouses) eligible for national cemetery burial under the Compromise Agreement, the Secretary retains the authority under section 2402(6) of title 38, United States Code, to grant or deny national cemetery burial for other persons, or classes of persons, not explicitly granted eligibility in statute. It has come to the Committees' attention that VA's record-keeping system concerning which persons are granted or denied waivers for burial in national cemeteries is, at best, incomplete. Adequate records on burial waivers are necessary to ensure that the Secretary's judgment on waiver cases is being applied uniformly to all applicants. The Committees direct VA to rectify gaps in its waiver-accounting system so that basic information, such as which persons are denied burial waivers and the reasons for the denial, will be available.

PERMANENT AUTHORITY FOR STATE CEMETERY GRANTS PROGRAM

Current Law

Section 2408(a)(2) of title 38, United States Code, authorizes appropriations, through fiscal year 2004, for VA to make grants to States to assist them in establishing, expanding, or improving state veterans' cemeteries.

House Bill

Section 8 of H.R. 2297, as amended, would make the State Cemetery Grants Program permanent.

Senate Bill

Section 203 of S. 1132, as amended, contains a similar provision with an additional technical change.

Compromise Agreement

Section 503 of the Compromise Agreement follows the Senate language.

TITLE VI: EXPOSURE TO HAZARDOUS SUBSTANCES

RADIATION DOSE RECONSTRUCTION PROGRAM OF DEPARTMENT OF DEFENSE

Current Law

Section 3.311 of title 38, Code of Federal Regulations, sets out procedures for the adjudication of claims by VA for benefits premised on a veteran's exposure to ionizing radiation in service. For veterans who claim radiation exposure due to participation in nuclear atmospheric testing from 1945 through 1962, or due to occupation duty in Hiroshima and Nagasaki prior to July 1, 1946, dose data are requested from the Department of Defense (''DOD''). DOD's Defense Threat Reduction Agency (''DTRA'') pays a private contractor to estimate radiation exposure through a process called radiation dose reconstruction.

There is no entity under existing law which provides independent oversight of DTRA's radiation dose reconstruction process.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 331 of S. 1132, as amended, would require VA and DOD to review, and report on the mission, procedures, and administration of the radiation dose reconstruction program. It would also require VA and DOD to establish an advisory board to oversee the program.

Compromise Agreement

Section 601 of the Compromise Agreement follows the Senate language.

STUDY ON DISPOSITION OF AIR FORCE HEALTH STUDY

Current Law

The Air Force Health Study (''AFHS'') was initiated by DOD in 1982 to examine the effects of herbicide exposure and health, mortality, and reproductive outcomes in veterans of Operation Ranch Hand, the activity responsible for aerial spraying of herbicides during the Vietnam Conflict. The study will conclude in 2006.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 332 of S. 1132, as amended, would direct VA to enter into an agreement with the National Academy of Sciences (''NAS'') under which NAS would report on the following: (1) the scientific merit of retaining AFHS data after the Ranch Hand study is terminated; (2) obstacles to retaining the AFHS data which may exist; (3) the advisability of providing independent oversight of the data; (4) the advisability and prospective costs of extending the study and the identity of an entity which would be suited to continue the study; and (5) the advisability of making laboratory specimens from the study available for independent research.

Compromise Agreement

Section 602 of the Compromise Agreement follows the Senate language, but the reporting deadline is extended to 120 days.

FUNDING OF MEDICAL FOLLOW-UP AGENCY OF INSTITUTE OF MEDICINE OF NATIONAL ACADEMY OF SCIENCES FOR EPIDEMIOLOGICAL RESEARCH ON MEMBERS OF THE ARMED FORCES AND VETERANS

Current Law

Public Law 102–585 requires that VA and DOD each contribute $250,000 in annual core funding to the Medical Follow-Up Agency (''MFUA'') for a period of 10 years. MFUA is a panel of the Institute of Medicine which researches military health issues.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 333 of S. 1132, as amended, would mandate VA and DOD funding for MFUA, at current levels, from fiscal year 2004 through 2013.

Compromise Agreement

Section 603 of the Compromise Agreement follows the Senate language.

TITLE VII: OTHER MATTERS

TIME LIMITATIONS ON RECEIPT OF CLAIM INFORMATION PURSUANT TO REQUESTS OF DEPARTMENT OF VETERANS AFFAIRS

Current Law

Section 5102(b) of title 38, United States Code, requires that VA, in cases where it receives an application for benefits that is not complete, notify the applicant of the information that is necessary to complete the application for benefits. Similarly, section 5103(a) of title 38, United States Code, requires that VA, when it receives a complete or a substantially complete application for benefits, notify the applicant of any information or evidence necessary to substantiate the claim. Section 5103(b) of title 38, United States Code, states that if information or evidence requested under section 5103(a) is not received within one year of the date of such notification, no benefit may be paid by reason of that application for benefits.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 310 of S. 1132, as amended, would require that claimants who have submitted an incomplete application under section 5102(b) of title 38, United States Code, and who have been notified that information is required to complete the application, submit the information within one year of the date of notification or else no benefit would be paid by reason of the application. It would also clarify section 5103(b) by stating that that subsection would not be construed to prohibit VA from making a decision on a claim before the expiration of the one-year period. Section 310 would be effective as if enacted on November 9, 2000, immediately after the enactment of the Veterans Claims Assistance Act of 2000.

Compromise Agreement

Section 701 of the Compromise Agreement would follow the Senate language, but would make a further amendment to section 5103(b) of title 38, United States Code, to remove the statutory bar to payment of benefits when information or evidence, requested of the claimant by VA, is not submitted within one year of the notification requesting such information or evidence. If a matter is on appeal and evidence is received beyond the one-year period relating to the original claim, it should be considered.

Section 701(d)(1) of the Compromise Agreement would require VA to readjudicate the original claim when a claimant adequately asserts he or she was misled upon receiving notification from VA of the information or evidence needed to substantiate the claim. However, section 701(d)(4) specifies that the Secretary is not required to identify or readjudicate any claim based upon the authority given to the Secretary under this section when information or evidence was submitted during the one-year period following the notification or when the claim has been the subject of a timely appeal to the Board of Veterans' Appeals or the United States Court of Appeals for Veterans Claims.

CLARIFICATION OF APPLICABILITY OF PROHIBITION ON ASSIGNMENT OF VETERANS BENEFITS TO AGREEMENTS ON FUTURE RECEIPT OF CERTAIN BENEFITS

Current Law

Section 5301 of title 38, United States Code, prohibits the assignment of VA benefits and exempts such benefits from taxation and from the claims of creditors.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 311 of S. 1132, as amended, would clarify current statutory language prohibiting the assignment of benefits and specify that any agreement under which a VA beneficiary might purport to transfer to another person or entity the right to receive direct or indirect payments of compensation, pension, or DIC benefits shall be deemed to be a prohibited assignment. Section 311 would also make it clear that such prohibitory language would not bar loans to VA beneficiaries which might be repaid with funds derived from VA, so long as each periodic payment made under the loan is separately and voluntarily executed by the beneficiary at the time the payment is made.

Compromise Agreement

Section 702 of the Compromise Agreement would follow the Senate language but would modify it to state that payments on loans are explicitly allowed when made by preauthorized electronic funds transfers pursuant to the Electronic Funds Transfers Act (''EFTA''). The EFTA defines a characteristic of these transfers as allowing the beneficiary to direct his or her financial institution to cease payments upon the beneficiary's notice. It is the Committees' intent to ensure that methods of loan repayment would not be limited for disabled veterans. The Compromise Agreement would also eliminate the section that specifies the effective date of the provision. It is the Committees' intent that prohibition against assignment shall be enforced through coordination with appropriate authorities.

SIX-YEAR EXTENSION OF ADVISORY COMMITTEE ON MINORITY VETERANS

Current Law

Section 544 of title 38, United States Code, mandates that VA establish an Advisory Committee on Minority Veterans. The Secretary of Veterans Affairs must, on a regular basis, consult with and seek the advice of the Advisory Committee with respect to issues relating to the administration of benefits for minority group veterans. The Secretary must also consult with and seek the advice of the Committee with respect to reports and studies pertaining to such veterans, and the needs of such veterans for compensation, health care, rehabilitation, outreach, and other benefits and programs administered by VA. The Advisory Committee is required to

submit an annual report providing its assessment of the needs of minority veterans, VA programs designed to meet those needs, and any recommendations the Advisory Committee considers appropriate. The authorization for the Advisory Committee expires on December 31, 2003.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 341 of S. 1132, as amended, would extend the authorization of the Advisory Committee on Minority Veterans until December 31, 2007.

Compromise Agreement

Section 703 of the Compromise Agreement would extend the authorization of the Advisory Committee until December 31, 2009.

TEMPORARY AUTHORITY FOR PERFORMANCE OF MEDICAL DISABILITIES EXAMINATIONS BY CONTRACT PHYSICIANS

Current Law

Section 504 of Public Law 104–275 authorized VA to carry out a contract disability examination pilot program at 10 VA regional offices. The law specifies that VA draw funds for the program from amounts available to the Secretary of Veterans Affairs for compensation and pensions.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 343 of S. 1132, as amended, would authorize VA, using funds subject to appropriation, to contract for disability examinations from non-VA providers at all VA regional offices. Such examinations would be conducted pursuant to contracts entered into and administered by the Under Secretary for Benefits. The Secretary's authority under this section would expire on December 31, 2009. No later than four years after the section's enactment, the Secretary would be required to submit a report assessing the cost, timeliness, and thoroughness of disability examinations performed under this section.

Compromise Agreement

Section 704 of the Compromise Agreement follows the Senate language, but adds a technical modification that would clarify that the authority granted the Secretary under section 704 of the Compromise Agreement is in addition to the authority already granted the Secretary under Section 504 of Public Law 104–275. Thus, it is the Committees' intent that VA's existing contract for disability examinations under the authority of Public Law 104–275 remain in force. It is also the Committees' intent that the Secretary's ability to enter into contracts in the future under the strictures of Section 504 of Public Law 104–275 remain in force as well.

FORFEITURE OF BENEFITS FOR SUBVERSIVE ACTIVITIES

Current Law

Section 6105 of title 38, United States Code, provides that an individual convicted after September 1, 1959, of any of several specified offenses involving subversive activities shall have no right to gratuitous benefits (including the right to burial in a national cemetery) under laws administered by the Secretary of Veterans Affairs. No other person shall be entitled to such benefits on account of such individual.

House Bill

Section 20 of H.R. 2297, as amended, would amend current law to supplement the list of serious Federal criminal offenses for which a veteran's conviction results in a bar to VA benefits, including burial in a national cemetery. The following criminal offenses from title 18, United States Code, would be added: section 175, prohibited activities with respect to biological weapons; section 229, prohibited activities with respect to chemical weapons; section 831, prohibited transactions involving nuclear materials; section 1091, genocide; section 2332a, use of certain weapons of mass destruction; and section 2332b, acts of terrorism transcending national boundaries. All of these offenses, which involve serious threats to national security, were added to title 18, United States Code, after the enactment of the provisions in section 6105 of title 38, United States Code.

Senate Bill

Section 313 of S. 1132, as amended, contains an identical provision.

Compromise Agreement

Section 705 of the Compromise Agreement contains this provision.

TWO-YEAR EXTENSION OF ROUND-DOWN REQUIREMENT FOR COMPENSATION COST-OF-LIVING ADJUSTMENTS

Current Law

Sections 1104(a) and 1303(a) of title 38, United States Code, mandate that yearly cost-of-living adjustments made to rates of compensation and dependency and indemnity compensation be rounded down to the nearest whole dollar amount. This authority expires on September 30, 2011.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 301 of S. 1132, as amended, would extend the round-down authority under sections 1104(a) and 1303(a) through fiscal year 2013.

Compromise Agreement

Section 706 of the Compromise Agreement follows the Senate language.

CODIFICATION OF REQUIREMENT FOR EXPEDITIOUS TREATMENT OF CASES ON REMAND

Current Law

Section 302 of Public Law 103–446 requires the Secretary of Veterans Affairs to provide for the expeditious treatment by the Board of Veterans' Appeals and by regional offices of the Veterans Benefits Administration of claims remanded by the Board of Veterans' Appeals or the United States Court of Appeals for Veterans Claims.

House Bill

The House Bill contains no comparable provision.

Senate Bill

The Senate Bill contains no comparable provision.

Compromise Agreement

Section 707 of the Compromise Agreement would codify the provisions of section 302 of Public Law 103–446. Expedited treatment of decisions of the Board of Veterans' Appeals would be codified in chapter 51 of title 38, United States Code. Expedited treatment of decisions of the United States Court of Appeals for Veterans Claims would be codified in chapter 71 of title 38, United States Code.

LEGISLATIVE PROVISIONS NOT ADOPTED

CLARIFICATION OF NOTICE OF DISAGREEMENT FOR APPELLATE REVIEW OF DEPARTMENT OF VETERANS AFFAIRS ACTIVITIES

Current Law

Claimants for VA benefits who disagree with an initial decision rendered by VA may initiate an appeals process by submitting a written notice of disagreement (''NOD'') within one year after the claimant was notified of the initial decision. Section 7105(b) of title 38, United States Code, states that an NOD ''must be in writing and filed with the activity which entered the determination with which disagreement is expressed.'' Upon the timely filing of an NOD, VA is required to provide appellate review of its initial benefits rating decision.

VA has promulgated regulations to implement section 7105 of title 38, United States Code, which state that ''while special wording is not required, the Notice of Disagreement must be in terms which can be reasonably construed as disagreement with the determination and [expressing a] desire for appellate review.'' 38 CFR § 20.201 (2002).

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 314 of S. 1132, as amended, would clarify section 7105(b) of title 38, United States Code, by requiring that VA deem any written document which expresses disagreement with a VA decision to be an NOD unless VA finds that the claimant has disavowed a desire for appellate review. This section would be effective with respect to documents filed on or after the date of enactment, and with respect to documents filed before the date of enactment and not treated by VA as an NOD pursuant to part 20.201 of title 38, Code of Federal Regulations. Furthermore, a document filed as an NOD after March 15, 2002, and rejected by the Secretary as insufficient would, at VA motion or at the request of a claimant within one year of enactment, be deemed to be an NOD if the document expresses disagreement with a decision and VA finds that the claimant has not disavowed a desire for appellate review.

PROVISION OF MARKERS FOR PRIVATELY MARKED GRAVES

Current Law

Section 502 of Public Law 107–103, the Veterans Education and Benefits Expansion Act of 2001, authorizes VA to furnish a government headstone or marker for the grave of an eligible veteran buried in a non-veterans' cemetery irrespective of whether the grave was already marked with a private marker. The law applies to veterans whose deaths occurred on or after December 27, 2001. Public Law 107–330 extended this authority to include deaths occurring on or after September 11, 2001.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 204 of S. 1132, as amended, would amend the Veterans Education and Benefits Expansion Act of 2001 to authorize VA to furnish a government headstone or marker for the grave of an eligible veteran buried in a private cemetery, irrespective of whether the grave was already marked with a private marker, for deaths occurring on or after November 1, 1990.

TERMINATION OF AUTHORITY TO GUARANTEE LOANS TO PURCHASE MANUFACTURED HOMES AND LOTS

Current Law

Section 3712 of title 38, United States Code, authorizes VA to guarantee loans for the purchase of a manufactured home and a lot on which it is sited.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 306 of S. 1132, as amended, would eliminate VA's authority to guarantee loans to purchase a manufactured home and the lot on which it is sited.

REINSTATEMENT OF VETERANS VOCATIONAL TRAINING PROGRAM FOR CERTAIN PENSION RECIPIENTS

Current Law

Section 1524 of title 38, United States Code, authorized a pilot program of vocational training to certain nonservice-connected pension recipients. The initial pilot program was in place from February 1, 1985, through January 31, 1992. Public Law 102–562 extended the program through December 31, 1995.

House Bill

Section 9 of H.R. 2297, as amended, would reinstate the VA pilot program for five years beginning on the date of enactment to provide vocational training to newly eligible VA nonservice-connected pension recipients. The program would be open to those veterans age 45 years or younger. The Department of Veterans Affairs would be required to ensure that the availability of vocational training is made known through various outreach methods. Not later than two years after the date of enactment, and each year thereafter, the Secretary would be required to submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report on the operation of the pilot program. The report would include an evaluation of the vocational training provided, an analysis of the cost-effectiveness of the training provided, and data on the entered-employment rate of veterans participating in the program.

Senate Bill

The Senate Bill contains no comparable provision.

THREE-YEAR EXTENSION OF INCOME VERIFICATION AUTHORITY

Current Law

Section 5317 of title 38, United States Code, directs VA to notify applicants for needs-based VA benefits that information collected from the applicants may be compared with income-related information obtained by VA from the Internal Revenue Service and the Department of Health and Human Services. The authority of the Secretary of Veterans Affairs to obtain such information expires on September 30, 2008.

Section 6103(l)(7)(D)(viii) of the Internal Revenue Code authorizes the release of income information by the Internal Revenue Service to VA. This authority expires on September 30, 2008.

House Bill

The House Bill contains no comparable provision.

Senate Bill

Section 312 of S. 1132, as amended, would extend until September 30, 2011, the authority of the Secretary to obtain income information under section 5317 of title 38, United States Code, and the authority of the Internal Revenue Service to share income information under section 6103(l)(7)(D)(viii) of the Internal Revenue Code.

Mr. BILIRAKIS. Mr. Speaker, I rise in strong support of H.R. 2297, the Veterans' Benefits Act of 2003. This bill addresses an issue that I have been working on for a number of years. Dependency and Indemnity Compensation (DIC) is the benefit accorded to the surviving dependents of those members of the Armed Forces who died while on active duty or of a service-connected cause.

DIC is the only federal annuity program that does not allow a widow who is receiving compensation to remarry at an older age and retain her annuity. Earlier this year, I reintroduced legislation which provides that the remarriage of the surviving spouse of a veteran after age 55 shall not result in termination of Dependency and Indemnity Compensation.

I was pleased that my legislation was incorporated into H.R. 2297 when it passed the House in October. The bill that we are considering today, which was worked out with the Senate, slightly modifies my original provision to provide that a surviving spouse upon remarriage after age 57 would retain DIC, home loan and educational benefits eligibility. Surviving spouses who remarried after attaining age 57 prior to enactment of the Compromise Agreement would have one year to apply for reinstatement of these benefits.

I think it is a wonderful thing if an older person finds companionship, falls in love and decides to marry. I don't think we should be discouraging such marriages by making them financially burdensome. In these circumstances, it is often the case that both partners are living on fixed incomes. the prospect of one partner losing financial benefits as a result of the marriage is a real disincentive.

Once again, I would like to thank Chairman SMITH, Ranking Member EVANS, Benefits Subcommittee Chairman BROWN and Subcommittee Ranking Member MICHAUD for working with me to include a DIC remarriage provision in H.R. 2297.

I urge my colleagues to support the bill before us today.

Mr. SMITH of New Jersey. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TERRY). The question is on the motion offered by the gentleman from New Jersey (Mr. SMITH) that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 2297.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SMITH of New Jersey. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 2297.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

COMPACT OF FREE ASSOCIATION AMENDMENTS ACT OF 2003

Mr. LEACH. Mr. Speaker, I move to suspend the rules and concur in the Senate amendments to the joint resolution (H.J. Res. 63) to approve the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Federated States of Micronesia'', and the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Republic of the Marshall Islands,'' and otherwise to amend Public Law 99–239, and to appropriate for the purposes of amended Public Law 99–239 for fiscal years ending on or before September 30, 2023, and for other purposes.

The Clerk read as follows:

Senate amendments:

Strike out all after the resolving clause and insert:

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This joint resolution, together with the table of contents in subsection (b) of this section, may be cited as the ''Compact of Free Association Amendments Act of 2003''.

(b) TABLE OF CONTENTS.—The table of contents for this joint resolution is as follows:

Sec. 1. Short title and table of contents.

TITLE I—APPROVAL OF U.S.-FSM COMPACT AND U.S.-RMI COMPACT; INTERPRETATION OF, AND U.S. POLICIES REGARDING, U.S.-FSM COMPACT AND U.S.-RMI COMPACT; SUPPLEMENTAL PROVISIONS

Sec. 101. Approval of U.S.-FSM Compact of Free Association and the U.S.-RMI Compact of Free Association; references to subsidiary agreements or separate agreements.
(a) Federated States of Micronesia.
(b) Republic of the Marshall Islands.
(c) References to the Compact, the U.S.-FSM Compact and the U.S.-RMI Compact; References to Subsidiary Agreements or Separate Agreements.
(d) Amendment, Change, or Termination in the U.S.-FSM Compact, the U.S.-RMI Compact and Certain Agreements.
(e) Subsidiary Agreements Deemed Bilateral.
(f) Entry Into Force of Future Amendments to Subsidiary Agreements.

Sec. 102. Agreements With Federated States of Micronesia.
(a) Law Enforcement Assistance.
(b) Agreement on Audits.

Sec. 103. Agreements With and Other Provisions Related to the Republic of the Marshall Islands.
(a) Law Enforcement Assistance.
(b) EJIT.
(c) Section 177 Agreement.
(d) Nuclear Test Effects.
(e) Espousal Provisions.
(f) DOE Radiological Health Care Program; USDA Agricultural and Food Programs.

TITLE I—APPROVAL OF U.S.-FSM COMPACT AND U.S.-RMI COMPACT; INTERPRETATION OF, AND U.S. POLICIES REGARDING, U.S.-FSM COMPACT AND U.S.-RMI COMPACT; SUPPLEMENTAL PROVISIONS

SEC. 101. APPROVAL OF U.S.-FSM COMPACT OF FREE ASSOCIATION AND THE U.S.-RMI COMPACT OF FREE ASSOCIATION; REFERENCES TO SUBSIDIARY AGREEMENTS OR SEPARATE AGREEMENTS.

(a) FEDERATED STATES OF MICRONESIA.—The Compact of Free Association, as amended with respect to the Federated States of Micronesia and signed by the United States and the Government of the Federated States of Micronesia and set forth in Title II (section 201(a)) of this joint resolution, is hereby approved, and Congress hereby consents to the subsidiary agreements and amended subsidiary agreements listed in section 462 of the U.S.-FSM Compact. Subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the U.S.-FSM Compact, to an effective date for and thereafter to implement such U.S.-FSM Compact.

(b) REPUBLIC OF THE MARSHALL ISLANDS.—The Compact of Free Association, as amended with respect to the Republic of the Marshall Islands and signed by the United States and the Government of the Republic of the Marshall Islands and set forth in Title II (section 201(b)) of this joint resolution, is hereby approved, and Congress hereby consents to the subsidiary agreements and amended subsidiary agreements listed in section 462 of the U.S.-RMI Compact. Subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the U.S.-RMI Compact, to an effective date for and thereafter to implement such U.S.-RMI Compact.

(c) REFERENCES TO THE COMPACT, THE U.S.-FSM COMPACT, AND THE U.S.-RMI COMPACT; REFERENCES TO SUBSIDIARY AGREEMENTS OR SEPARATE AGREEMENTS.—

(1) Any reference in this joint resolution (except references in Title II) to "the Compact" shall be treated as a reference to the Compact of Free Association set forth in title II of Public Law 99–239, January 14, 1986, 99 Stat. 1770. Any reference in this joint resolution to the "U.S.-FSM Compact" shall be treated as a reference to the Compact of Free Association, as amended between the Government of the United States of America and the Government of the Federated States of Micronesia and set forth in Title II (section 201(a)) of this joint resolution. Any reference in this joint resolution to the "U.S.-RMI Compact" shall be treated as a reference to the Compact of Free Association, as amended between the Government of the United States of America and the Government of the Republic of the Marshall Islands and set forth in Title II (section 201(b)) of this joint resolution.

(2) Any reference to the term "subsidiary agreements" or "separate agreements" in this joint resolution shall be treated as a reference to agreements listed in section 462 of the U.S.-FSM Compact and the U.S.-RMI Compact, and any other agreements that the United States may from time to time enter into with either the Government of the Federated States of Micronesia or the Government of the Republic of the Marshall Islands, or with both such governments in accordance with the provisions of the U.S.-FSM Compact and the U.S.-RMI Compact.

(d) AMENDMENT, CHANGE, OR TERMINATION IN THE U.S.-FSM COMPACT AND U.S.-RMI COMPACT AND CERTAIN AGREEMENTS.—

(1) Any amendment, change, or termination by mutual agreement or by unilateral action of the Government of the United States of all or any part of the U.S.-FSM Compact or U.S.-RMI Compact shall not enter into force until after Congress has incorporated it in an Act of Congress.

(2) The provisions of paragraph (1) shall apply—

(A) to all actions of the Government of the United States under the U.S.-FSM Compact or U.S.-RMI Compact including, but not limited to, actions taken pursuant to sections 431, 441, or 442;

(B) to any amendment, change, or termination in the Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(a)(2) of the U.S.-FSM Compact and the Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(a)(5) of the U.S.-RMI Compact;

(C) to any amendment, change, or termination of the agreements concluded pursuant to Compact section 177, and section 215(a) of the U.S.-FSM Compact and section 216(a) of the U.S.-RMI Compact, the terms of which are incorporated by reference into the U.S.-FSM Compact and the U.S.-RMI Compact; and

(D) to the following subsidiary agreements, or portions thereof:

(i) Articles III, IV, and X of the agreement referred to in section 462(b)(6) of the U.S.-RMI Compact:

(ii) Article III and IV of the agreement referred to in section 462(b)(6) of the U.S.-FSM Compact.

(iii) Articles VI, XV, and XVII of the agreement referred to in section 462(b)(7) of the U.S.-FSM Compact and U.S.-RMI Compact.

(e) SUBSIDIARY AGREEMENTS DEEMED BILATERAL.—For purposes of implementation of the U.S.-FSM Compact and the U.S.-RMI Compact and this joint resolution, the Agreement Concluded Pursuant to Section 234 of the Compact of Free Association and referred to in section 462(a)(1) of the U.S.-FSM Compact and section 462(a)(4) of the U.S.-RMI Compact shall be deemed to be a bilateral agreement between the United States and each other party to such subsidiary agreement. The consent or concurrence of any other party shall not be required for the effectiveness of any actions taken by the United States in conjunction with either the Federated States of Micronesia or the Republic of the Marshall Islands which are intended to affect the implementation, modification, suspension, or termination of such subsidiary agreement (or any provision thereof) as regards the mutual responsibilities of the United States and the party in conjunction with whom the actions are taken.

(f) ENTRY INTO FORCE OF FUTURE AMENDMENTS TO SUBSIDIARY AGREEMENTS.—No agreement between the United States and the government of either the Federated States of Micronesia or the Republic of the Marshall Islands which would amend, change, or terminate any subsidiary agreement or portion thereof, other than those set forth in subsection (d) of this section shall enter into force until 90 days after the President has transmitted such agreement to the President of the Senate and the Speaker of the House of Representatives together with an explanation of the agreement and the reasons therefor. In the case of the agreement referred to in section 462(b)(3) of the U.S.-FSM Compact and the U.S.-RMI Compact, such transmittal shall include a specific statement by the Secretary of Labor as to the necessity of such amendment, change, or termination, and the impact thereof.

SEC. 102. AGREEMENTS WITH FEDERATED STATES OF MICRONESIA.

(a) LAW ENFORCEMENT ASSISTANCE.—Pursuant to sections 222 and 224 of the U.S.-FSM Compact, the United States shall provide nonreimbursable technical and training assistance as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the Government of the Federated States of Micronesia to develop and adequately enforce laws of the Federated States of Micronesia and to cooperate with the United States in the enforcement of criminal laws of the United States. Funds appropriated pursuant to section 105(j) of this title may be used to reimburse State or local agencies providing such assistance.

(b) AGREEMENT ON AUDITS.—The Comptroller General (and his duly authorized representatives) shall have the authorities necessary to carry out his responsibilities under section 232 of the U.S.-FSM Compact and the agreement referred to in section 462(b)(4) of the U.S.-FSM Compact, including the following authorities:

(1) GENERAL AUTHORITY OF THE COMPTROLLER GENERAL TO AUDIT.—

(A) The Comptroller General of the United States (and his duly authorized representatives) shall have the authority to audit—

(i) all grants, program assistance, and other assistance provided to the Government of the Federated States of Micronesia under Articles I and II of Title Two of the U.S.-FSM Compact; and

(ii) any other assistance provided by the Government of the United States to the Government of the Federated States of Micronesia.

Such authority shall include authority for the Comptroller General to conduct or cause to be conducted any of the audits provided for in section 232 of the U.S.-FSM Compact. The authority provided in this paragraph shall continue for at least three years after the last such grant has been made or assistance has been provided.

(B) The Comptroller General (and his duly authorized representatives) shall also have authority to review any audit conducted by or on behalf of the Government of the United States. In this connection, the Comptroller General shall have access to such personnel and to such records, documents, working papers, automated data and files, and other information relevant to such review.

(2) COMPTROLLER GENERAL ACCESS TO RECORDS.—

(A) In carrying out paragraph (1), the Comptroller General (and his duly authorized representatives) shall have such access to the personnel and (without cost) to records, documents, working papers, automated data and files, and other information relevant to such audits. The Comptroller General may duplicate any such records, documents, working papers, automated data and files, or other information relevant to such audits.

(B) Such records, documents, working papers, automated data and files, and other information regarding each such grant or other assistance shall be maintained for at least five years after the date such grant or assistance was provided and in a manner that permits such grants, assistance, and payments to be accounted for distinct from any other funds of the Government of the Federated States of Micronesia.

(3) STATUS OF COMPTROLLER GENERAL REPRESENTATIVES.—The Comptroller General and his duly authorized representatives shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions, except insofar as such immunity may be expressly waived by the Government of the United States. The Comptroller General and his duly authorized representatives shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents. Such persons shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations. The privileges, exemptions and immunities accorded under this paragraph are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government of the Federated States of Micronesia.

(4) AUDITS DEFINED.—As used in this subsection, the term ''audits'' includes financial, program, and management audits, including determining—

(A) whether the Government of the Federated States of Micronesia has met the requirements set forth in the U.S.-FSM Compact, or any related agreement entered into under the U.S.-FSM Compact, regarding the purposes for which such grants and other assistance are to be used; and

(B) the propriety of the financial transactions of the Government of the Federated States of Micronesia pursuant to such grants or assistance.

(5) COOPERATION BY FEDERATED STATES OF MICRONESIA.—The Government of the Federated States of Micronesia will cooperate fully with the Comptroller General of the United States in the conduct of such audits as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution.

SEC. 103. AGREEMENTS WITH AND OTHER PROVISIONS RELATED TO THE REPUBLIC OF THE MARSHALL ISLANDS.

(a) LAW ENFORCEMENT ASSISTANCE.—Pursuant to sections 222 and 224 of the U.S.-RMI Compact, the United States shall provide nonreimbursable technical and training assistance as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the Government of the Marshall Islands to develop and adequately enforce laws of the Marshall Islands and to cooperate with the United States in the enforcement of criminal laws of the United States. Funds appropriated pursuant to section 105(j) of this title may be used to reimburse State or local agencies providing such assistance.

(b) EJIT.—

(1) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that the President of the United States shall negotiate with the Government of the Marshall Islands an agreement whereby, without prejudice as to any claims which have been or may be asserted by any party as to rightful title and ownership of any lands on Ejit, the Government of the Marshall Islands shall assure that lands on Ejit used as of January 1, 1985, by the people of Bikini, will continue to be available without charge for their use, until such time as Bikini is restored and inhabitable and the continued use of Ejit is no longer necessary, unless a Marshall Islands court of competent jurisdiction finally determines that there are legal impediments to continued use of Ejit by the people of Bikini.

(2) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that if the impediments described in paragraph (1) do arise, the United States will cooperate with the Government of the Marshall Islands in assisting any person adversely affected by such judicial determination to remain on Ejit, or in locating suitable and acceptable alternative lands for such person's use.

(3) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that paragraph (1) shall not be applied in a manner which would prevent the Government of the Marshall Islands from acting in accordance with its constitutional processes to resolve title and ownership claims with respect to such lands or from taking substitute or additional measures to meet the needs of the people of Bikini with their democratically expressed consent and approval.

(c) SECTION 177 AGREEMENT.—

(1) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in furtherance of the purposes of Article I of the Subsidiary Agreement for Implementation of Section 177 of the Compact, the payment of the amount specified therein shall be made by the United States under Article I of the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of section 177 of the Compact (hereafter in this subsection referred to as

the ''Section 177 Agreement'') only after the Government of the Marshall Islands has notified the President of the United States as to which investment management firm has been selected by such Government to act as Fund Manager under Article I of the Section 177 Agreement.

(2) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in the event that the President determines that an investment management firm selected by the Government of the Marshall Islands does not meet the requirements specified in Article I of the Section 177 Agreement, the United States shall invoke the conference and dispute resolution procedures of Article II of Title Four of the Compact. Pending the resolution of such a dispute and until a qualified Fund Manager has been designated, the Government of the Marshall Islands shall place the funds paid by the United States pursuant to Article I of the Section 177 Agreement into an interest-bearing escrow account. Upon designation of a qualified Fund Manager, all funds in the escrow account shall be transferred to the control of such Fund Manager for management pursuant to the Section 177 Agreement.

(3) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that if the Government of the Marshall Islands determines that some other investment firm should act as Fund Manager in place of the firm first (or subsequently) selected by such Government, the Government of the Marshall Islands shall so notify the President of the United States, identifying the firm selected by such Government to become Fund Manager, and the President shall proceed to evaluate the qualifications of such identified firm.

(4) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that at the end of 15 years after the effective date of the Compact, the firm then acting as Fund Manager shall transfer to the Government of the Marshall Islands, or to such account as such Government shall so notify the Fund Manager, all remaining funds and assets being managed by the Fund Manager under the Section 177 Agreement.

(d) NUCLEAR TEST EFFECTS.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in approving the Compact, the Congress understands and intends that the peoples of Bikini, Enewetak, Rongelap, and Utrik, who were affected by the United States nuclear weapons testing program in the Marshall Islands, will receive the amounts of $75,000,000 (Bikini); $48,750,000 (Enewetak); $37,500,000 (Rongelap); and $22,500,000 (Utrik), respectively, which amounts shall be paid out of proceeds from the fund established under Article I, section 1 of the subsidiary agreement for the implementation of section 177 of the Compact. The amounts specified in this subsection shall be in addition to any amounts which may be awarded to claimants pursuant to Article IV of the subsidiary agreement for the implementation of Section 177 of the Compact.

(e) ESPOUSAL PROVISIONS.—

(1) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that it is the intention of the Congress of the United States that the provisions of section 177 of the Compact of Free Association and the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the ''Section 177 Agreement'') constitute a full and final settlement of all claims described in Articles X and XI of the Section 177 Agreement, and that any such claims be terminated and barred except insofar as provided for in the Section 177 Agreement.

(2) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in furtherance of the intention of Congress as stated in paragraph (1) of this subsection, the Section 177 Agreement is hereby ratified and approved. It is the explicit understanding and intent of Congress that the jurisdictional limitations set forth in Article XII of such Agreement are enacted solely and exclusively to accomplish the objective of Article X of such Agreement and only as a clarification of the effect of Article X, and are not to be construed or implemented separately from Article X.

(f) DOE RADIOLOGICAL HEALTH CARE PROGRAM; USDA AGRICULTURAL AND FOOD PROGRAMS.—

(1) MARSHALL ISLANDS PROGRAM.—Notwithstanding any other provision of law, upon the request of the Government of the Republic of the Marshall Islands, the President (either through an appropriate department or agency of the United States or by contract with a United States firm) shall continue to provide special medical care and logistical support thereto for the remaining members of the population of Rongelap and Utrik who were exposed to radiation resulting from the 1954 United States thermo-nuclear ''Bravo'' test, pursuant to Public Laws 95–134 and 96–205.

(2) AGRICULTURAL AND FOOD PROGRAMS.—

(A) IN GENERAL.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that notwithstanding any other provision of law, upon the request of the Government of the Marshall Islands, for the first fifteen years after the effective date of the Compact, the President (either through an appropriate department or agency of the United States or by contract with a United States firm or by a grant to the Government of the Republic of the Marshall Islands which may further contract only with a United States firm or a Republic of the Marshall Islands firm, the owners, officers and majority of the employees of which are citizens of the United States or the Republic of the Marshall Islands) shall provide technical and other assistance—

(i) without reimbursement, to continue the planting and agricultural maintenance program on Enewetak, as provided in subparagraph (C); and

(ii) without reimbursement, to continue the food programs of the Bikini and Enewetak people described in section 1(d) of Article II of the Subsidiary Agreement for the Implementation of Section 177 of the Compact and for continued waterborne transportation of agricultural products to Enewetak including operations and maintenance of the vessel used for such purposes.

(B) POPULATION CHANGES.—The President shall ensure the assistance provided under these programs reflects the changes in the population since the inception of such programs.

(C) PLANTING AND AGRICULTURAL MAINTENANCE PROGRAM.—

(i) IN GENERAL.—The planting and agricultural maintenance program on Enewetak shall be funded at a level of not less than $1,300,000 per year, as adjusted for inflation under section 218 of the U.S.-RMI Compact.

(ii) AUTHORIZATION AND CONTINUING APPROPRIATION.—There is hereby authorized and appropriated to the Secretary of the Interior, out of any funds in the Treasury not otherwise appropriated, to remain available until expended, for each fiscal year from 2004 through 2023, $1,300,000, as adjusted for inflation under section 218 of the U.S.-RMI Compact, for grants to carry out the planting and agricultural maintenance program.

(3) PAYMENTS.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that payments under this subsection shall be provided to such extent or in such amounts as are necessary for services and other assistance provided pursuant to this subsection. It is the sense of Congress that after the periods of time specified in paragraphs (1) and (2) of this subsection, consideration will be given to such additional funding for these programs as may be necessary.

(g) RONGELAP.—

(1) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that because Rongelap was directly affected by fallout from a 1954 United States thermonuclear test and because the Rongelap people remain unconvinced that it is safe to continue to live on Rongelap Island, it is the intent of Congress to take such steps (if any) as may be necessary to overcome the effects of such fallout on the habitability of Rongelap Island, and to restore Rongelap Island, if necessary, so that it can be safely inhabited. Accordingly, it is the expectation of the Congress that the Government of the Marshall Islands shall use such portion of the funds specified in Article II, section 1(e) of the subsidiary agreement for the implementation of section 177 of the Compact as are necessary for the purpose of contracting with a qualified scientist or group of scientists to review the data collected by the Department of Energy relating to radiation levels and other conditions on Rongelap Island resulting from the thermonuclear test. It is the expectation of the Congress that the Government of the Marshall Islands, after consultation with the people of Rongelap, shall select the party to review such data, and shall contract for such review and for submission of a report to the President of the United States and the Congress as to the results thereof.

(2) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that the purpose of the review referred to in paragraph (1) of this subsection shall be to establish whether the data cited in support of the conclusions as to the habitability of Rongelap Island, as set forth in the Department of Energy report entitled: ''The Meaning of Radiation for Those Atolls in the Northern Part of the Marshall Islands That Were Surveyed in 1978'', dated November 1982, are adequate and whether such conclusions are fully supported by the data. If the party reviewing the data concludes that such conclusions as to habitability are fully supported by adequate data, the report to the President of the United States and the Congress shall so state. If the party reviewing the data concludes that the data are inadequate to support such conclusions as to habitability or that such conclusions as to habitability are not fully supported by the data, the Government of the Marshall Islands shall contract with an appropriate scientist or group of scientists to undertake a complete survey of radiation and other effects of the nuclear testing program relating to the habitability of Rongelap Island. Such sums as are necessary for such survey and report concerning the results thereof and as to steps needed to restore the habitability of Rongelap Island are authorized to be made available to the Government of the Marshall Islands.

(3) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that it is the intent of Congress that such steps (if any) as are necessary to restore the habitability of Rongelap Island and return the Rongelap people to their homeland will be taken by the United States in consultation with the Government of the Marshall Islands and, in accordance with its authority under the Constitution of the Marshall Islands, the Rongelap local government council.

(4) There are hereby authorized and appropriated to the Secretary of the Interior, out of any funds in the Treasury not otherwise appropriated, to remain available until expended, for fiscal year 2005, $1,780,000; for fiscal year 2006,

$1,760,000; and for fiscal year 2007, $1,760,000, as the final contributions of the United States to the Rongelap Resettlement Trust Fund as established pursuant to Public Law 102–154 (105 Stat. 1009), for the purposes of establishing a food importation program as a part of the overall resettlement program of Rongelap Island.

(h) FOUR ATOLL HEALTH CARE PROGRAM.—

(1) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that services provided by the United States Public Health Service or any other United States agency pursuant to section 1(a) of Article II of the Agreement for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the ''Section 177 Agreement'') shall be only for services to the people of the Atolls of Bikini, Enewetak, Rongelap, and Utrik who were affected by the consequences of the United States nuclear testing program, pursuant to the program described in Public Law 95–134 (91 Stat. 1159) and Public Law 96–205 (94 Stat. 84) and their descendants (and any other persons identified as having been so affected if such identification occurs in the manner described in such public laws). Nothing in this subsection shall be construed as prejudicial to the views or policies of the Government of the Marshall Islands as to the persons affected by the consequences of the United States nuclear testing program.

(2) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that at the end of the first year after the effective date of the Compact and at the end of each year thereafter, the providing agency or agencies shall return to the Government of the Marshall Islands any unexpended funds to be returned to the Fund Manager (as described in Article I of the Section 177 Agreement) to be covered into the Fund to be available for future use.

(3) In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that the Fund Manager shall retain the funds returned by the Government of the Marshall Islands pursuant to paragraph (2) of this subsection, shall invest and manage such funds, and at the end of 15 years after the effective date of the Compact, shall make from the total amount so retained and the proceeds thereof annual disbursements sufficient to continue to make payments for the provision of health services as specified in paragraph (1) of this subsection to such extent as may be provided in contracts between the Government of the Marshall Islands and appropriate United States providers of such health services.

(i) ENJEBI COMMUNITY TRUST FUND.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that notwithstanding any other provision of law, the Secretary of the Treasury shall establish on the books of the Treasury of the United States a fund having the status specified in Article V of the subsidiary agreement for the implementation of Section 177 of the Compact, to be known as the ''Enjebi Community Trust Fund'' (hereafter in this subsection referred to as the ''Fund''), and shall credit to the Fund the amount of $7,500,000. Such amount, which shall be ex gratia, shall be in addition to and not charged against any other funds provided for in the Compact and its subsidiary agreements, this joint resolution, or any other Act. Upon receipt by the President of the United States of the agreement described in this subsection, the Secretary of the Treasury, upon request of the Government of the Marshall Islands, shall transfer the Fund to the Government of the Marshall Islands, provided that the Government of the Marshall Islands agrees as follows:

(1) ENJEBI TRUST AGREEMENT.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that the Government of the Marshall Islands and the Enewetak Local Government Council, in consultation with the people of Enjebi, shall provide for the creation of the Enjebi Community Trust Fund and the employment of the manager of the Enewetak Fund established pursuant to the Section 177 Agreement as trustee and manager of the Enjebi Community Trust Fund, or, should the manager of the Enewetak Fund not be acceptable to the people of Enjebi, another United States investment manager with substantial experience in the administration of trusts and with funds under management in excess of $250,000,000.

(2) MONITOR CONDITIONS.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that upon the request of the Government of the Marshall Islands, the United States shall monitor the radiation and other conditions on Enjebi and within one year of receiving such a request shall report to the Government of the Marshall Islands when the people of Enjebi may resettle Enjebi under circumstances where the radioactive contamination at Enjebi, including contamination derived from consumption of locally grown food products, can be reduced or otherwise controlled to meet whole body Federal radiation protection standards for the general population, including mean annual dose and mean 30-year cumulative dose standards.

(3) RESETTLEMENT OF ENJEBI.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in the event that the United States determines that the people of Enjebi can within 25 years of January 14, 1986, resettle Enjebi under the conditions set forth in paragraph (2) of this subsection, then upon such determination there shall be available to the people of Enjebi from the Fund such amounts as are necessary for the people of Enjebi to do the following, in accordance with a plan developed by the Enewetak Local Government Council and the people of Enjebi, and concurred with by the Government of the Marshall Islands to assure consistency with the government's overall economic development plan:

(A) Establish a community on Enjebi Island for the use of the people of Enjebi.

(B) Replant Enjebi with appropriate foodbearing and other vegetation.

(4) RESETTLEMENT OF OTHER LOCATION.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that in the event that the United States determines that within 25 years of January 14, 1986, the people of Enjebi cannot resettle Enjebi without exceeding the radiation standards set forth in paragraph (2) of this subsection, then the fund manager shall be directed by the trust instrument to distribute the Fund to the people of Enjebi for their resettlement at some other location in accordance with a plan, developed by the Enewetak Local Government Council and the people of Enjebi and concurred with by the Government of the Marshall Islands, to assure consistency with the government's overall economic development plan.

(5) INTEREST FROM FUND.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that prior to and during the distribution of the corpus of the Fund pursuant to paragraphs (3) and (4) of this subsection, the people of Enjebi may, if they so request, receive the interest earned by the Fund on no less frequent a basis than quarterly.

(6) DISCLAIMER OF LIABILITY.—In the joint resolution of January 14, 1986 (Public Law 99–239) Congress provided that neither under the laws of the Marshall Islands nor under the laws of the United States, shall the Government of the United States be liable for any loss or damage to person or property in respect to the resettlement of Enjebi by the people of Enjebi, pursuant to the provision of this subsection or otherwise.

(j) BIKINI ATOLL CLEANUP.—

(1) DECLARATION OF POLICY.—In the joint resolution of January 14, 1986 (Public Law 99–239), the Congress determined and declared that it is the policy of the United States, to be supported by the full faith and credit of the United States, that because the United States, through its nuclear testing and other activities, rendered Bikini Atoll unsafe for habitation by the people of Bikini, the United States will fulfill its responsibility for restoring Bikini Atoll to habitability, as set forth in paragraph (2) and (3) of this subsection.

(2) CLEANUP FUNDS.—The joint resolution of January 14, 1986 (Public Law 99–239) authorized to be appropriated such sums as necessary to implement the settlement agreement of March 15, 1985, in The People of Bikini, et al. against United States of America, et al., Civ. No. 84–0425 (D. Ha.).

(3) CONDITIONS OF FUNDING.—In the joint resolution of January 14, 1986 (Public Law 99–239) the Congress provided that the funds referred to in paragraph (2) were to be made available pursuant to Article VI, Section 1 of the Compact Section 177 Agreement upon completion of the events set forth in the settlement agreement referred to in paragraph (2) of this subsection.

(k) AGREEMENT ON AUDITS.—The Comptroller General (and his duly authorized representatives) shall have the authorities necessary to carry out his responsibilities under section 232 of the U.S.-RMI Compact and the agreement referred to in section 462(b)(4) of the U.S.-RMI Compact, including the following authorities:

(1) GENERAL AUTHORITY OF THE COMPTROLLER GENERAL TO AUDIT.—

(A) The Comptroller General of the United States (and his duly authorized representatives) shall have the authority to audit—

(i) all grants, program assistance, and other assistance provided to the Government of the Republic of the Marshall Islands under Articles I and II of Title Two of the U.S.-RMI Compact; and

(ii) any other assistance provided by the Government of the United States to the Government of the Republic of the Marshall Islands.

Such authority shall include authority for the Comptroller General to conduct or cause to be conducted any of the audits provided for in section 232 of the U.S.-RMI Compact. The authority provided in this paragraph shall continue for at least three years after the last such grant has been made or assistance has been provided.

(B) The Comptroller General (and his duly authorized representatives) shall also have authority to review any audit conducted by or on behalf of the Government of the United States. In this connection, the Comptroller General shall have access to such personnel and to such records, documents, working papers, automated data and files, and other information relevant to such review.

(2) COMPTROLLER GENERAL ACCESS TO RECORDS.—

(A) In carrying out paragraph (1), the Comptroller General (and his duly authorized representatives) shall have such access to the personnel and (without cost) to records, documents, working papers, automated data and files, and other information relevant to such audits. The Comptroller General may duplicate any such records, documents, working papers, automated data and files, or other information relevant to such audits.

(B) Such records, documents, working papers, automated data and files, and other information regarding each such grant or other assistance shall be maintained for at least five years after the date such grant or assistance was provided and in a manner that permits such grants, assistance and payments to be accounted for distinct from any other funds of the Government of the Republic of the Marshall Islands.

(3) STATUS OF COMPTROLLER GENERAL REPRESENTATIVES.—The Comptroller General and his duly authorized representatives shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions, except insofar as such immunity may be expressly waived by the Government of the United States. The Comptroller General and his duly authorized representatives shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents. Such persons shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations. The privileges, exemptions and immunities accorded under this paragraph are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government of the Republic of the Marshall Islands.

(4) AUDITS DEFINED.—As used in this subsection, the term ''audits'' includes financial, program, and management audits, including determining—

(A) whether the Government of the Republic of the Marshall Islands has met the requirements set forth in the U.S.-RMI Compact, or any related agreement entered into under the U.S.-RMI Compact, regarding the purposes for which such grants and other assistance are to be used; and

(B) the propriety of the financial transactions of the Government of the Republic of the Marshall Islands pursuant to such grants or assistance.

(5) COOPERATION BY THE REPUBLIC OF THE MARSHALL ISLANDS.—The Government of the Republic of the Marshall Islands will cooperate fully with the Comptroller General of the United States in the conduct of such audits as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution.

(l) KWAJALEIN.—

(1) STATEMENT OF POLICY.—It is the policy of the United States that payment of funds by the Government of the Marshall Islands to the landowners of Kwajalein Atoll in accordance with the land use agreement dated October 19, 1982, or as amended or superseded, and any related allocation agreements, is required in order to ensure that the Government of the United States will be able to fulfill its obligation and responsibilities under Title Three of the U.S.-RMI Compact and the subsidiary agreements concluded pursuant to the U.S.-RMI Compact.

(2) FAILURE TO PAY.—

(A) IN GENERAL.—If the Government of the Marshall Islands fails to make payments in accordance with paragraph (1), the Government of the United States shall initiate procedures under section 313 of the U.S.-RMI Compact and consult with the Government of the Marshall Islands with respect to the basis for the nonpayment of funds.

(B) RESOLUTION.—The United States shall expeditiously resolve the matter of any nonpayment of funds required under paragraph (1) pursuant to section 313 of the U.S.-RMI Compact and the authority and responsibility of the Government of the United States for security and defense matters in or relating to the Marshall Islands. This paragraph shall be enforced, as may be necessary, in accordance with section 105(e).

(3) DISPOSITION OF INCREASED PAYMENTS PENDING NEW LAND USE AGREEMENT.—Until such time as the Government of the Marshall Islands and the landowners of Kwajalein Atoll have concluded an agreement amending or superseding the land use agreement reflecting the terms of and consistent with the Military Use Operating Rights Agreement dated October 19, 1982, any amounts paid by the United States to the Government of the Marshall Islands in excess of the amounts required to be paid pursuant to the land use agreement dated October 19, 1982, shall be paid into, and held in, an interest bearing escrow account in a United States financial institution by the Government of the Republic of the Marshall Islands. At such time, the funds and interest held in escrow shall be paid to the landowners of Kwajalein in accordance with the new land use agreement. If no such agreement is concluded by the date which is five years after the date of enactment of this resolution, then such funds and interest shall, unless otherwise mutually agreed between the Government of the United States of America and the Government of the Republic of the Marshall Islands, be returned to the U.S. Treasury.

(4) NOTIFICATIONS AND REPORT.—

(A) The Government of the Republic of the Marshall Islands shall notify the Government of the United States of America when an agreement amending or superseding the land use agreement dated October 19, 1982, is concluded.

(B) If no agreement amending or superseding the land use agreement dated October 19, 1982 is concluded by the date five years after the date of enactment of this resolution, then the President shall report to Congress on the intentions of the United States with respect to the use of Kwajalein Atoll after 2016, on any plans to relocate activities carried out on Kwajalein Atoll, and on the disposition of the funds and interest held in escrow under paragraph (3).

(5) ASSISTANCE.—The President is authorized to make loans and grants to the Government of the Marshall Islands to address the special needs of the community at Ebeye, Kwajalein Atoll, and other Marshallese communities within the Kwajalein Atoll, pursuant to development plans adopted in accordance with applicable laws of the Marshall Islands. The loans and grants shall be subject to such other terms and conditions as the President, in the discretion of the President, may determine are appropriate.

SEC. 104. INTERPRETATION OF AND UNITED STATES POLICY REGARDING U.S.-FSM COMPACT AND U.S.-RMI COMPACT.

(a) HUMAN RIGHTS.—In approving the U.S.-FSM Compact and the U.S.-RMI Compact, Congress notes the conclusion in the Statement of Intent of the Report of The Future Political Status Commission of the Congress of Micronesia in July, 1969, that ''our recommendation of a free associated state is indissolubly linked to our desire for such a democratic, representative, constitutional government'' and notes that such desire and intention are reaffirmed and embodied in the Constitutions of the Federated States of Micronesia and the Republic of the Marshall Islands. Congress also notes and specifically endorses the preamble to the U.S.-FSM Compact and the U.S.-RMI Compact, which affirms that the governments of the parties to the U.S.-FSM Compact and the U.S.-RMI Compact are founded upon respect for human rights and fundamental freedoms for all. The Secretary of State shall include in the annual reports on the status of internationally recognized human rights in foreign countries, which are submitted to Congress pursuant to sections 116 and 502B of the Foreign Assistance Act of 1961, ''22 U.S.C. 2151n, 2304'' a full and complete report regarding the status of internationally recognized human rights in the Federated States of Micronesia and the Republic of the Marshall Islands.

(b) IMMIGRATION AND PASSPORT SECURITY.—

(1) NATURALIZED CITIZENS.—The rights of a bona fide naturalized citizen of the Federated States of Micronesia or the Republic of the Marshall Islands to enter the United States, to lawfully engage therein in occupations, and to establish residence therein as a nonimmigrant, to the extent such rights are provided under section 141 of the U.S.-FSM Compact and U.S.-RMI Compact, shall not be deemed to extend to any such naturalized citizen with respect to whom circumstances associated with the acquisition of the status of a naturalized citizen are such as to allow a reasonable inference, on the part of appropriate officials of the United States and subject to United States procedural requirements, that such naturalized status was acquired primarily in order to obtain such rights.

(2) PASSPORTS.—It is the sense of Congress that up to $250,000 of the grant assistance provided to the Federated States of Micronesia pursuant to section 211(a)(4) of the U.S.-FSM Compact, and up to $250,000 of the grant assistance provided to the Republic of the Marshall Islands pursuant to section 211(a)(4) of the U.S.-RMI Compact (or a greater amount of the section 211(a)(4) grant, if mutually agreed between the Government of the United States and the government of the Federated States of Micronesia or the government of the Republic of the Marshall Islands), be used for the purpose of increasing the machine-readability and security of passports issued by such jurisdictions. It is further the sense of Congress that such funds be obligated by September 30, 2004 and in the amount and manner specified by the Secretary of State in consultation with the Secretary of Homeland Security and, respectively, with the government of the Federated States of Micronesia and the government of the Republic of the Marshall Islands. The United States Government is authorized to require that passports used for the purpose of seeking admission under section 141 of the U.S.-FSM Compact and the U.S.-RMI Compact contain the security enhancements funded by such assistance.

(3) INFORMATION-SHARING.—It is the sense of Congress that the governments of the Federated States of Micronesia and the Republic of the Marshall Islands develop, prior to October 1, 2004, the capability to provide reliable and timely information as may reasonably be required by the Government of the United States in enforcing criminal and security-related grounds of inadmissibility and deportability under the Immigration and Nationality Act, as amended, and shall provide such information to the Government of the United States.

(4) TRANSITION; CONSTRUCTION OF SECTIONS 141(a)(3) AND 141(a)(4) OF THE U.S.-FSM COMPACT AND U.S.-RMI COMPACT.—The words ''the effective date of this Compact, as amended'' in sections 141(a)(3) and 141(a)(4) of the U.S.-FSM Compact and the U.S.-RMI Compact shall be construed to read, ''on the day prior to the enactment by the United States Congress of the Compact of Free Association Amendments Act of 2003.''.

(c) NONALIENATION OF LANDS.—Congress endorses and encourages the maintenance of the policies of the Government of the Federated States of Micronesia and the Government of the Republic of the Marshall Islands to regulate, in accordance with their Constitutions and laws, the alienation of permanent interests in real property so as to restrict the acquisition of such interests to persons of Federated States of Micronesia citizenship and the Republic of the Marshall Islands citizenship, respectively.

(d) NUCLEAR WASTE DISPOSAL.—In approving the U.S.-FSM Compact and the U.S.-RMI Compact, Congress understands that the Government of the Federated States of Micronesia and the Government of the Republic of the Marshall

Islands will not permit any other government or any nongovernmental party to conduct, in the Republic of the Marshall Islands or in the Federated States of Micronesia, any of the activities specified in subsection (a) of section 314 of the U.S.-FSM Compact and the U.S.-RMI Compact.

(e) IMPACT OF THE U.S.-FSM COMPACT AND THE U.S.-RMI COMPACT ON THE STATE OF HAWAII, GUAM, THE COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS AND AMERICAN SAMOA; RELATED AUTHORIZATION AND CONTINUING APPROPRIATION.—

(1) STATEMENT OF CONGRESSIONAL INTENT.—In reauthorizing the U.S.-FSM Compact and the U.S.-RMI Compact, it is not the intent of Congress to cause any adverse consequences for an affected jurisdiction.

(2) DEFINITIONS.—For the purposes of this title—

(A) the term ''affected jurisdiction'' means American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, or the State of Hawaii; and

(B) the term ''qualified nonimmigrant'' means a person, or their children under the age of 18, admitted or resident pursuant to section 141 of the U.S.-RMI or U.S.-FSM Compact, or section 141 of the Palau Compact who, as of a date referenced in the most recently published enumeration is a resident of an affected jurisdiction. As used in this subsection, the term ''resident'' shall be a person who has a ''residence,'' as that term is defined in section 101(a)(33) of the Immigration and Nationality Act, as amended.

(3) AUTHORIZATION AND CONTINUING APPROPRIATION.—There is hereby authorized and appropriated to the Secretary of the Interior, out of any funds in the Treasury not otherwise appropriated, to remain available until expended, for each fiscal year from 2004 through 2023, $30,000,000 for grants to affected jurisdictions to aid in defraying costs incurred by affected jurisdictions as a result of increased demands placed on health, educational, social, or public safety services or infrastructure related to such services due to the residence in affected jurisdictions of qualified nonimmigrants from the Republic of the Marshall Islands, the Federated States of Micronesia, or the Republic of Palau. The grants shall be—

(A) awarded and administered by the Department of the Interior, Office of Insular Affairs, or any successor thereto, in accordance with regulations, policies and procedures applicable to grants so awarded and administered, and

(B) used only for health, educational, social, or public safety services, or infrastructure related to such services, specifically affected by qualified nonimmigrants.

(4) ENUMERATION.—The Secretary of the Interior shall conduct periodic enumerations of qualified nonimmigrants in each affected jurisdiction. The enumerations—

(A) shall be conducted at such intervals as the Secretary of the Interior shall determine, but no less frequently than every five years, beginning in fiscal year 2003;

(B) shall be supervised by the United States Bureau of the Census or such other organization as the Secretary of the Interior may select; and

(C) after fiscal year 2003, shall be funded by the Secretary of the Interior by deducting such sums as are necessary, but not to exceed $300,000 as adjusted for inflation pursuant to section 217 of the U.S. FSM Compact with fiscal year 2003 as the base year, per enumeration, from funds appropriated pursuant to the authorization contained in paragraph (3) of this subsection.

(5) ALLOCATION.—The Secretary of the Interior shall allocate to the government of each affected jurisdiction, on the basis of the results of the most recent enumeration, grants in an aggregate amount equal to the total amount of funds appropriated under paragraph (3) of this subsection, as reduced by any deductions authorized by subparagraph (C) of paragraph (4) of this subsection, multiplied by a ratio derived by dividing the number of qualified nonimmigrants in such affected jurisdiction by the total number of qualified nonimmigrants in all affected jurisdictions.

(6) AUTHORIZATION FOR HEALTH CARE REIMBURSEMENT.—There are hereby authorized to be appropriated to the Secretary of the Interior such sums as may be necessary to reimburse health care institutions in the affected jurisdictions for costs resulting from the migration of citizens of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau to the affected jurisdictions as a result of the implementation of the Compact of Free Association, approved by Public Law 99–239, or the approval of the U.S.-FSM Compact and the U.S.-RMI Compact by this resolution.

(7) USE OF DOD MEDICAL FACILITIES AND NATIONAL HEALTH SERVICE CORPS.—

(A) DOD MEDICAL FACILITIES.—The Secretary of Defense shall make available, on a space available and reimbursable basis, the medical facilities of the Department of Defense for use by citizens of the Federated States of Micronesia and the Republic of the Marshall Islands who are properly referred to the facilities by government authorities responsible for provision of medical services in the Federated States of Micronesia, the Republic of the Marshall Islands, the Republic of Palau and the affected jurisdictions.

(B) NATIONAL HEALTH SERVICE CORPS.—The Secretary of Health and Human Services shall continue to make the services of the National Health Service Corps available to the residents of the Federated States of Micronesia and the Republic of the Marshall Islands to the same extent and for so long as such services are authorized to be provided to persons residing in any other areas within or outside the United States.

(C) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this paragraph such sums as are necessary for each fiscal year.

(8) REPORTING REQUIREMENT.—Not later than one year after the date of enactment of this joint resolution, and at one year intervals thereafter, the Governors of Guam, the State of Hawaii, the Commonwealth of the Northern Mariana Islands, and American Samoa may provide to the Secretary of the Interior by February 1 of each year their comments with respect to the impacts of the Compacts on their respective jurisdiction. The Secretary of the Interior, upon receipt of any such comments, shall report to the Congress not later than May 1 of each year to include the following:

(A) The Governor's comments on the impacts of the Compacts as well as the Administration's analysis of such impact.

(B) The Administration views on any recommendations for corrective action to eliminate those consequences as proposed by such Governors.

(C) With regard to immigration, statistics concerning the number of persons availing themselves of the rights described in section 141(a) of the Compact during the year covered by each report.

(D) With regard to trade, an analysis of the impact on the economy of American Samoa resulting from imports of canned tuna into the United States from the Federated States of Micronesia, and the Republic of the Marshall Islands.

(9) RECONCILIATION OF UNREIMBURSED IMPACT EXPENSES.—

(A) IN GENERAL.—Notwithstanding any other provision of law, the President, to address previously accrued and unreimbursed impact expenses, may at the request of the Governor of Guam or the Governor of the Commonwealth of the Northern Mariana Islands, reduce, release, or waive all or part of any amounts owed by the Government of Guam or the Government of the Commonwealth of the Northern Mariana Islands (or either government's autonomous agencies or instrumentalities), respectively, to any department, agency, independent agency, office, or instrumentality of the United States.

(B) TERMS AND CONDITIONS.—

(i) SUBSTANTIATION OF IMPACT COSTS.—Not later than 120 days after the date of the enactment of this resolution, the Governor of Guam and the Governor of the Commonwealth of the Northern Mariana Islands shall each submit to the Secretary of the Interior a report, prepared in consultation with an independent accounting firm, substantiating unreimbursed impact expenses claimed for the period from January 14, 1986, through September 30, 2003. Upon request of the Secretary of the Interior, the Governor of Guam and the Governor of the Commonwealth of the Northern Mariana Islands shall submit to the Secretary of the Interior copies of all documents upon which the report submitted by that Governor under this clause was based.

(ii) CONGRESSIONAL NOTIFICATION.—The President shall notify Congress of his intent to exercise the authority granted in subparagraph (A).

(iii) CONGRESSIONAL REVIEW AND COMMENT.—Any reduction, release, or waiver under this Act shall not take effect until 60 days after the President notifies Congress of his intent to approve a request of the Governor of Guam or the Governor of the Commonwealth of the Northern Mariana Islands. In exercising his authority under this section and in determining whether to give final approval to a request, the President shall take into consideration comments he may receive after Congressional review.

(iv) EXPIRATION.—The authority granted in subparagraph (A) shall expire on February 28, 2005.

(10) AUTHORIZATION OF APPROPRIATIONS FOR GRANTS.—There are hereby authorized to the Secretary of the Interior for each of fiscal years 2004 through 2023 such sums as may be necessary for grants to the governments of Guam, the State of Hawaii, the Commonwealth of the Northern Mariana Islands, and American Samoa, as a result of increased demands placed on educational, social, or public safety services or infrastructure related to service due to the presence in Guam, Hawaii, the Commonwealth of the Northern Mariana Islands, and American Samoa of qualified nonimmigrants from the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

(f) FOREIGN LOANS.—Congress hereby reaffirms the United States position that the United States Government is not responsible for foreign loans or debt obtained by the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands.

(g) SENSE OF CONGRESS CONCERNING FUNDING OF PUBLIC INFRASTRUCTURE.—It is the sense of Congress that not less than 30 percent of the United States annual grant assistance provided under section 211 of the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Federated States of Micronesia, and not less than 30 percent of the total amount of section 211 funds allocated to each of the States of the Federated States of Micronesia, shall be invested in infrastructure improvements and maintenance in accordance with section 211(a)(6). It is further the sense of Congress that not less than 30 percent of the United States annual grant assistance provided under section 211 of the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Republic of

the Marshall Islands, shall be invested in infrastructure improvements and maintenance in accordance with section 211(d).

(h) REPORTS AND REVIEWS.—

(1) REPORT BY THE PRESIDENT.—Not later than the end of the first full calendar year following enactment of this resolution, and not later than December 31 of each year thereafter, the President shall report to Congress regarding the Federated States of Micronesia and the Republic of the Marshall Islands, including but not limited to—

(A) general social, political, and economic conditions, including estimates of economic growth, per capita income, and migration rates;

(B) the use and effectiveness of United States financial, program, and technical assistance;

(C) the status of economic policy reforms including but not limited to progress toward establishing self-sufficient tax rates;

(D) the status of the efforts to increase investment including: the rate of infrastructure investment of U.S. financial assistance under the U.S.-FSM Compact and the U.S.-RMI Compact; non-U.S. contributions to the trust funds, and the level of private investment; and

(E) recommendations on ways to increase the effectiveness of United States assistance and to meet overall economic performance objectives, including, if appropriate, recommendations to Congress to adjust the inflation rate or to adjust the contributions to the Trust Funds based on non-U.S. contributions.

(2) REVIEW.—During the year of the fifth, tenth, and fifteenth anniversaries of the date of enactment of this resolution, the Government of the United States shall review the terms of the respective Compacts and consider the overall nature and development of the U.S.-FSM and U.S.-RMI relationships including the topics set forth in subparagraphs (A) through (E) of paragraph (1). In conducting the reviews, the Government of the United States shall consider the operating requirements of the Government of the Federated States of Micronesia and the Government of the Republic of the Marshall Islands and their progress in meeting the development objectives set forth in their respective development plans. The President shall include in the annual reports to Congress for the years following the reviews the comments of the Government of the Federated States of Micronesia and the Government of the Republic of the Marshall Islands on the topics described in this paragraph, the President's response to the comments, the findings resulting from the reviews, and any recommendations for actions to respond to such findings.

(3) BY THE COMPTROLLER GENERAL.—Not later than the date that is three years after the date of enactment of this joint resolution, and every 5 years thereafter, the Comptroller General of the United States shall submit to Congress a report on the Federated States of Micronesia and the Republic of the Marshall Islands including the topics set forth in paragraphs (1) (A) through (E) above, and on the effectiveness of administrative oversight by the United States.

(i) CONSTRUCTION OF SECTION 141(f).—Section 141(f)(2) of the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Federated States of Micronesia and of the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Republic of the Marshall Islands, shall be construed as though, after ''may by regulations prescribe'', there were included the following: '', except that any such regulations that would have a significant effect on the admission, stay and employment privileges provided under this section shall not become effective until 90 days after the date of transmission of the regulations to the Committee on Energy and Natural Resources and the Committee on the Judiciary of the Senate and the Committee on Resources, the Committee on International Relations, and the Committee on the Judiciary of the House of Representatives''.

(j) INFLATION ADJUSTMENT.—As of Fiscal Year 2015, if the United States Gross Domestic Product Implicit Price Deflator average for Fiscal Years 2009 through 2013 is greater than United States Gross Domestic Product Implicit Price Deflator average for Fiscal Years 2004 through 2008 (as reported in the Survey of Current Business or subsequent publication and compiled by the Department of Interior), then section 217 of the U.S.-FSM Compact, paragraph 5 of Article II of the U.S.-FSM Fiscal Procedures Agreement, section 218 of the U.S.-RMI Compact, and paragraph 5 of Article II of the U.S.-RMI Fiscal Procedures Agreement shall be construed as if ''the full'' appeared in place of ''two-thirds of the'' each place those words appear. If an inflation adjustment is made under this subsection, the base year for calculating the inflation adjustment shall be fiscal year 2014.

(k) PARTICIPATION BY SECONDARY SCHOOLS IN THE ARMED SERVICES VOCATIONAL APTITUDE BATTERY (ASVAB) STUDENT TESTING PROGRAM.—In furtherance of the provisions of Title Three, Article IV, Section 341 of the U.S.-FSM and the U.S.-RMI Compacts, the purpose of which is to establish the privilege to volunteer for service in the U.S. Armed Forces, it is the sense of Congress that, to facilitate eligibility of FSM and RMI secondary school students to qualify for such service, the Department of Defense may extend the Armed Services Vocational Aptitude Battery (ASVAB) Student Testing Program (STP) and the ASVAB Career Exploration Program to selected secondary Schools in the FSM and the RMI to the extent such programs are available to Department of Defense Dependent Schools located in foreign jurisdictions.

SEC. 105. SUPPLEMENTAL PROVISIONS.

(a) DOMESTIC PROGRAM REQUIREMENTS.—Except as may otherwise be provided in this joint resolution, all United States Federal programs and services extended to or operated in the Federated States of Micronesia or the Republic of the Marshall Islands are and shall remain subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations applicable to such programs when operating in the United States (including its territories and commonwealths).

(b) RELATIONS WITH THE FEDERATED STATES OF MICRONESIA AND THE REPUBLIC OF THE MARSHALL ISLANDS.—

(1) Appropriations made pursuant to Article I of Title Two and subsection (a)(2) of section 221 of article II of Title Two of the U.S.-FSM Compact and the U.S.-RMI Compact shall be made to the Secretary of the Interior, who shall have the authority necessary to fulfill his responsibilities for monitoring and managing the funds so appropriated consistent with the U.S.-FSM Compact and the U.S.-RMI Compact, including the agreements referred to in section 462(b)(4) of the U.S.-FSM Compact and U.S.-RMI Compact (relating to Fiscal Procedures) and the agreements referred to in section 462(b)(5) of the U.S.-FSM Compact and the U.S.-RMI Compact (regarding the Trust Fund).

(2) Appropriations made pursuant to subsections (a)(1) and (a)(3) through (6) of section 221 of Article II of Title Two of the U.S.-FSM Compact and subsection (a)(1) and (a)(3) through (5) of the U.S.-RMI Compact shall be made directly to the agencies named in those subsections.

(3) Appropriations for services and programs referred to in subsection (b) of section 221 of Article II of Title Two of the U.S.-FSM Compact or U.S.-RMI Compact and appropriations for services and programs referred to in sections 105(f) and 108(a) of this joint resolution shall be made to the relevant agencies in accordance with the terms of the appropriations for such services and programs.

(4) Federal agencies providing programs and services to the Federated States of Micronesia and the Republic of the Marshall Islands shall coordinate with the Secretaries of the Interior and State regarding provision of such programs and services. The Secretaries of the Interior and State shall consult with appropriate officials of the Asian Development Bank and with the Secretary of the Treasury regarding overall economic conditions in the Federated States of Micronesia and the Republic of the Marshall Islands and regarding the activities of other donors of assistance to the Federated States of Micronesia and the Republic of the Marshall Islands.

(5) United States Government employees in either the Federated States of Micronesia or the Republic of the Marshall Islands are subject to the authority of the United States Chief of Mission, including as elaborated in section 207 of the Foreign Service Act and the President's Letter of Instruction to the United States Chief of Mission and any order or directive of the President in effect from time to time.

(6) INTERAGENCY GROUP ON FREELY ASSOCIATED STATES' AFFAIRS.—

(A) IN GENERAL.—The President is hereby authorized to appoint an Interagency Group on Freely Associated States' Affairs to provide policy guidance and recommendations on implementation of the U.S.-FSM Compact and the U.S.-RMI Compact to Federal departments and agencies.

(B) SECRETARIES.—It is the sense of Congress that the Secretary of State and the Secretary of the Interior shall be represented on the Interagency Group.

(7) UNITED STATES APPOINTEES TO JOINT COMMITTEES.—

(A) JOINT ECONOMIC MANAGEMENT COMMITTEE.—

(i) IN GENERAL.—The three United States appointees (United States chair plus two members) to the Joint Economic Management Committee provided for in section 213 of the U.S.-FSM Compact and Article III of the U.S.-FSM Fiscal Procedures Agreement referred to in section 462(b)(4) of the U.S.-FSM Compact shall be United States Government officers or employees.

(ii) DEPARTMENTS.—It is the sense of Congress that 2 of the 3 appointees should be designated from the Department of State and the Department of the Interior, and that U.S. officials of the Asian Development Bank shall be consulted in order to properly coordinate U.S. and Asian Development Bank financial, program, and technical assistance.

(iii) ADDITIONAL SCOPE.—Section 213 of the U.S.-FSM Compact shall be construed to read as though the phrase, ''the implementation of economic policy reforms to encourage investment and to achieve self-sufficient tax rates,'' were inserted after ''with particular focus on those parts of the plan dealing with the sectors identified in subsection (a) of section 211''.

(B) JOINT ECONOMIC MANAGEMENT AND FINANCIAL ACCOUNTABILITY COMMITTEE.—

(i) IN GENERAL.—The three United States appointees (United States chair plus two members) to the Joint Economic Management and Financial Accountability Committee provided for in section 214 of the U.S.-RMI Compact and Article III of the U.S.-RMI Fiscal Procedures Agreement referred to in section 462(b)(4) of the U.S.-RMI Compact shall be United States Government officers or employees.

(ii) DEPARTMENTS.—It is the sense of Congress that 2 of the 3 appointees should be designated from the Department of State and the Department of the Interior, and that U.S. officials of

the Asian Development Bank shall be consulted in order to properly coordinate U.S. and Asian Development Bank financial, program, and technical assistance.

(iii) ADDITIONAL SCOPE.—Section 214 of the U.S.-RMI Compact shall be construed to read as though the phrase, ''the implementation of economic policy reforms to encourage investment and to achieve self-sufficient tax rates,'' were inserted after ''with particular focus on those parts of the framework dealing with the sectors and areas identified in subsection (a) of section 211''.

(8) OVERSIGHT AND COORDINATION.—It is the sense of Congress that the Secretary of State and the Secretary of the Interior shall ensure that there are personnel resources committed in the appropriate numbers and locations to ensure effective oversight of United States assistance, and effective coordination of assistance among United States agencies and with other international donors such as the Asian Development Bank.

(9) The United States voting members (United States chair plus two or more members) of the Trust Fund Committee appointed by the Government of the United States pursuant to Article 7 of the Trust Fund Agreement implementing section 215 of the U.S.-FSM Compact and referred to in section 462(b)(5) of the U.S.-FSM Compact and any alternates designated by the Government of the United States shall be United States Government officers or employees. The United States voting members (United States chair plus two or more members) of the Trust Fund Committee appointed by the Government of the United States pursuant to Article 7 of the Trust Fund Agreement implementing section 216 of the U.S.-RMI Compact and referred to in section 462(b)(5) of the U.S.-RMI Compact and any alternates designated by the Government of the United States shall be United States Government officers or employees. It is the sense of Congress that the appointees should be designated from the Department of State, the Department of the Interior, and the Department of the Treasury.

(10) The Trust Fund Committee provided for in Article 7 of the U.S.-FSM Trust Fund Agreement implementing section 215 of the U.S.-FSM Compact shall be a nonprofit corporation incorporated under the laws of the District of Columbia. To the extent that any law, rule, regulation or ordinance of the District of Columbia, or of any State or political subdivision thereof in which the Trust Fund Committee is incorporated or doing business, impedes or otherwise interferes with the performance of the functions of the Trust Fund Committee pursuant to this joint resolution, such law, rule, regulation, or ordinance shall be deemed to be preempted by this joint resolution. The Trust Fund Committee provided for in Article 7 of the U.S.-RMI Trust Fund Agreement implementing section 216 of the U.S.-RMI Compact shall be a non-profit corporation incorporated under the laws of the District of Columbia. To the extent that any law, rule, regulation or ordinance of the District of Columbia, or of any State or political subdivision thereof in which the Trust Fund Committee is incorporated or doing business, impedes or otherwise interferes with the performance of the functions of the Trust Fund Committee pursuant to this joint resolution, such law, rule, regulation, or ordinance shall be deemed to be preempted by this joint resolution.

(c) CONTINUING TRUST TERRITORY AUTHORIZATION.—The authorization provided by the Act of June 30, 1954, as amended (68 Stat. 330) shall remain available after the effective date of the Compact with respect to the Federated States of Micronesia and the Republic of the Marshall Islands for the following purposes:

(1) Prior to October 1, 1986, for any purpose authorized by the Compact or the joint resolution of January 14, 1986 (Public Law 99–239).

(2) Transition purposes, including but not limited to, completion of projects and fulfillment of commitments or obligations; termination of the Trust Territory Government and termination of the High Court; health and education as a result of exceptional circumstances; ex gratia contributions for the populations of Bikini, Enewetak, Rongelap, and Utrik; and technical assistance and training in financial management, program administration, and maintenance of infrastructure.

(d) SURVIVABILITY.—In furtherance of the provisions of Title Four, Article V, sections 452 and 453 of the U.S.-FSM Compact and the U.S.-RMI Compact, any provisions of the U.S.-FSM Compact or the U.S.-RMI Compact which remain effective after the termination of the U.S.-FSM Compact or U.S.-RMI Compact by the act of any party thereto and which are affected in any manner by provisions of this title shall remain subject to such provisions.

(e) NONCOMPLIANCE SANCTIONS; ACTIONS INCOMPATIBLE WITH UNITED STATES AUTHORITY.—Congress expresses its understanding that the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands will not act in a manner incompatible with the authority and responsibility of the United States for security and defense matters in or related to the Federated States of Micronesia or the Republic of the Marshall Islands pursuant to the U.S.-FSM Compact or the U.S.-RMI Compact, including the agreements referred to in sections 462(a)(2) of the U.S.-FSM Compact and 462(a)(5) of the U.S.-RMI Compact. Congress further expresses its intention that any such act on the part of either such Government will be viewed by the United States as a material breach of the U.S.-FSM Compact or U.S.-RMI Compact. The Government of the United States reserves the right in the event of such a material breach of the U.S.-FSM Compact by the Government of the Federated States of Micronesia or the U.S.-RMI Compact by the Government of the Republic of the Marshall Islands to take action, including (but not limited to) the suspension in whole or in part of the obligations of the Government of the United States to that Government.

(f) CONTINUING PROGRAMS AND LAWS.—

(1) FEDERATED STATES OF MICRONESIA AND REPUBLIC OF THE MARSHALL ISLANDS.—In addition to the programs and services set forth in section 221 of the Compact, and pursuant to section 222 of the Compact, the programs and services of the following agencies shall be made available to the Federated States of Micronesia and to the Republic of the Marshall Islands:

(A) CONTINUATION OF THE PROGRAMS AND SERVICES OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY.—Except as provided in clauses (ii) and (iii), the programs and services of the Department of Homeland Security, Federal Emergency Management Agency shall continue to be available to the Federated States of Micronesia and the Republic of the Marshall Islands to the same extent as such programs and services were available in fiscal year 2003.

(i) Paragraph (a)(6) of section 221 of the U.S.-FSM Compact and paragraph (a)(5) of the U.S.-RMI Compact shall each be construed as though the paragraph reads as follows: ''the Department of Homeland Security, United States Federal Emergency Management Agency.''

(ii) Subsection (d) of section 211 of the U.S.-FSM Compact and subsection (e) of section 211 of the U.S.-RMI Compact shall each be construed as though the subsection reads as follows: ''Not more than $200,000 (as adjusted for inflation pursuant to section 217 of the U.S.-FSM Compact and section 218 of the U.S.-RMI Compact) shall be made available by the Secretary of the Interior to the Department of Homeland Security, Federal Emergency Management Agency to facilitate the activities of the Federal Emergency Management Agency in accordance with and to the extent provided in the Federal Programs and Services Agreement.''

(iii) The Secretary of State, in consultation with the Department of Homeland Security and the Federal Emergency Management Agency, shall immediately undertake negotiations with the Government of the Federated States of Micronesia and the Government of the Republic of the Marshall Islands regarding disaster assistance and shall report to the appropriate committees of Congress no later than June 30, 2004, on the outcome of such negotiations, including recommendations for changes to law regarding disaster assistance under the U.S.-FSM Compact and the U.S.-RMI Compact, and including subsidiary agreements as needed to implement such changes to law. If an agreement is not concluded, and legislation enacted which reflects such agreement, before the date which is five years after the date of enactment of this Joint Resolution, the following provisions shall apply:

''Paragraph (a)(6) of section 221 of the U.S.-FSM Compact and paragraph (a)(5) of section 221 of the U.S.-RMI Compact shall each be construed and applied as if each provision reads as follows:

''The U.S. Agency for International Development shall be responsible for the provision of emergency and disaster relief assistance in accordance with its statutory authorities, regulations and policies. The Republic of the Marshall Islands and the Federated States of Micronesia may additionally request that the President make an emergency or major disaster declaration. If the President declares an emergency or major disaster, the Department of Homeland Security (DHS), the Federal Emergency Management Agency (FEMA) and the U.S. Agency for International Development shall jointly (a) assess the damage caused by the emergency or disaster and (b) prepare a reconstruction plan including an estimate of the total amount of Federal resources that are needed for reconstruction. Pursuant to an interagency agreement, FEMA shall transfer funds from the Disaster Relief Fund in the amount of the estimate, together with an amount to be determined for administrative expenses, to the U.S. Agency for International Development, which shall carry out reconstruction activities in the Republic of the Marshall Islands and the Federated States of Micronesia in accordance with the reconstruction plan. For purposes of Disaster Relief Fund appropriations, the funding of the activities to be carried out pursuant to this paragraph shall be deemed to be necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq).

''DHS may provide to the Republic of the Marshall Islands and the Federated States of Micronesia preparedness grants to the extent that such assistance is available to the States of the United States. Funding for this assistance may be made available from appropriations made to DHS for preparedness activities.''.

(B) TREATMENT OF ADDITIONAL PROGRAMS.—

(i) CONSULTATION.—The United States appointees to the committees established pursuant to section 213 of the U.S.-FSM Compact and section 214 of the U.S.-RMI Compact shall consult with the Secretary of Education regarding the objectives, use, and monitoring of United States financial, program, and technical assistance made available for educational purposes.

(ii) CONTINUING PROGRAMS.—The Government of the United States—

(I) shall continue to make available to the Federated States of Micronesia and the Republic of the Marshall Islands for fiscal years 2004 through 2023, the services to individuals eligible for such services under the Individuals with

Disabilities Education Act (20 U.S.C. 1400 et seq.) to the extent that such services continue to be available to individuals in the United States; and

(II) shall continue to make available to eligible institutions in the Federated States of Micronesia and the Republic of the Marshall Islands, and to students enrolled in such institutions, and in institutions in the United States and its territories, for fiscal years 2004 through 2023, grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070a et seq.) to the extent that such grants continue to be available to institutions and students in the United States.

(iii) SUPPLEMENTAL EDUCATION GRANTS.—In lieu of eligibility for appropriations under part A of title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311 et seq.), title I of the Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.), other than subtitle C of that Act (29 U.S.C. 2881 et seq.) (Job Corps), title II of the Workforce Investment Act of 1998 (20 U.S.C. 9201 et seq.; commonly known as the Adult Education and Family Literacy Act), title I of the Carl D. Perkins Vocational and Technical Education Act of 1998 (20 U.S.C. 2321 et seq.), the Head Start Act (42 U.S.C. 9831 et seq.), and subpart 3 of part A, and part C, of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070b et seq., 42 U.S.C. 2751 et seq.), there are authorized to be appropriated to the Secretary of Education to supplement the education grants under section 211(a)(1) of the U.S.-FSM Compact and section 211(a)(1) of the U.S.-RMI Compact, respectively, the following amounts:

(I) $12,230,000 for the Federated States of Micronesia for fiscal year 2005 and an equivalent amount, as adjusted for inflation under section 217 of the U.S.-FSM Compact, for each of fiscal years 2005 through 2023; and

(II) $6,100,000 for the Republic of the Marshall Islands for fiscal year 2005 and an equivalent amount, as adjusted for inflation under section 218 of the U.S.-RMI Compact, for each of fiscal years 2005 through 2023,

except that citizens of the Federated States of Micronesia and the Republic of the Marshall Islands who attend an institution of higher education in the United States or its territories, the Federated States of Micronesia, or the Republic of the Marshall Islands on the date of enactment of this joint resolution may continue to receive assistance under such subpart 3 of part A or part C, for not more than 4 academic years after such date to enable such citizens to complete their program of study.

(iv) FISCAL PROCEDURES.—Appropriations made pursuant to clause (iii) shall be used and monitored in accordance with an agreement between the Secretary of Education, the Secretary of Labor, the Secretary of Health and Human Services, and the Secretary of the Interior, and in accordance with the respective Fiscal Procedures Agreements referred to in section 462(b)(4) of the U.S.-FSM Compact and section 462(b)(4) of the U.S.-RMI Compact. The agreement between the Secretary of Education, the Secretary of Labor, the Secretary of Health and Human Services, and the Secretary of the Interior shall provide for the transfer, not later than 60 days after the appropriations made pursuant to clause (iii) become available to the Secretary of Education, the Secretary of Labor, and the Secretary of Health and Human Services, from the Secretary of Education, the Secretary of Labor, and the Secretary of Health and Human Services, to the Secretary of the Interior for disbursement.

(v) FORMULA EDUCATION GRANTS.—For fiscal years 2005 through 2023, except as provided in clause (ii) and the exception provided under clause (iii), the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands shall not receive any grant under any formula-grant program administered by the Secretary of Education or the Secretary of Labor, nor any grant provided through the Head Start Act (42 U.S.C. 9831 et seq.) administered by the Secretary of Health and Human Services.

(vi) TRANSITION.—For fiscal year 2004, the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands shall continue to be eligible for appropriations and to receive grants under the provisions of law specified in clauses (ii) and (iii).

(vii) TECHNICAL ASSISTANCE.—The Federated States of Micronesia and the Republic of the Marshall Islands may request technical assistance from the Secretary of Education, the Secretary of Health and Human Services, or the Secretary of Labor the terms of which, including reimbursement, shall be negotiated with the participation of the appropriate cabinet officer for inclusion in the Federal Programs and Services Agreement.

(viii) CONTINUED ELIGIBILITY FOR COMPETITIVE GRANTS.—The Governments of the Federated States of Micronesia and the Republic of the Marshall Islands shall continue to be eligible for competitive grants administered by the Secretary of Education, the Secretary of Health and Human Services, and the Secretary of Labor to the extent that such grants continue to be available to State and local governments in the United States.

(ix) APPLICABILITY.—The Republic of Palau shall remain eligible for appropriations and to receive grants under the provisions of law specified in clauses (ii) and (iii) until the end of fiscal year 2007, to the extent the Republic of Palau was so eligible under such provisions in fiscal year 2003.

(C) The Legal Services Corporation.

(D) The Public Health Service.

(E) The Rural Housing Service (formerly, the Farmers Home Administration) in the Marshall Islands and each of the four States of the Federated States of Micronesia: Provided, That in lieu of continuation of the program in the Federated States of Micronesia, the President may agree to transfer to the Government of the Federated States of Micronesia without cost, the portfolio of the Rural Housing Service applicable to the Federated States of Micronesia and provide such technical assistance in management of the portfolio as may be requested by the Federated States of Micronesia).

(2) TORT CLAIMS.—The provisions of section 178 of the U.S.-FSM Compact and the U.S.-RMI Compact regarding settlement and payment of tort claims shall apply to employees of any Federal agency of the Government of the United States (and to any other person employed on behalf of any Federal agency of the Government of the United States on the basis of a contractual, cooperative, or similar agreement) which provides any service or carries out any other function pursuant to or in furtherance of any provisions of the U.S.-FSM Compact or the U.S.-RMI Compact or this joint resolution, except for provisions of Title Three of the Compact and of the subsidiary agreements related to such Title, in such area to which such Agreement formerly applied.

(3) PCB CLEANUP.—The programs and services of the Environmental Protection Agency regarding PCBs shall, to the extent applicable, as appropriate, and in accordance with applicable law, be construed to be made available to such islands for the cleanup of PCBs imported prior to 1987. The Secretary of the Interior and the Secretary of Defense shall cooperate and assist in any such cleanup activities.

(g) COLLEGE OF MICRONESIA.—Until otherwise provided by Act of Congress, or until termination of the U.S.-FSM Compact and the U.S.-RMI Compact, the College of Micronesia shall retain its status as a land-grant institution and its eligibility for all benefits and programs available to such land-grant institutions.

(h) TRUST TERRITORY DEBTS TO U.S. FEDERAL AGENCIES.—Neither the Government of the Federated States of Micronesia nor the Government of the Marshall Islands shall be required to pay to any department, agency, independent agency, office, or instrumentality of the United States any amounts owed to such department, agency, independent agency, office, or instrumentality by the Government of the Trust Territory of the Pacific Islands as of the effective date of the Compact. There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this subsection.

(i) JUDICIAL TRAINING.—

(1) IN GENERAL.—In addition to amounts provided under section 211(a)(4) of the U.S.-FSM Compact and the U.S.-RMI Compact, the Secretary of the Interior shall annually provide $300,000 for the training of judges and officials of the judiciary in the Federated States of Micronesia and the Republic of the Marshall Islands in cooperation with the Pacific Islands Committee of the Ninth Circuit Judicial Council and in accordance with and to the extent provided in the Federal Programs and Services Agreement and the Fiscal Procedure Agreement, as appropriate.

(2) AUTHORIZATION AND CONTINUING APPROPRIATION.—There is hereby authorized and appropriated to the Secretary of the Interior, out of any funds in the Treasury not otherwise appropriated, to remain available until expended, for each fiscal year from 2004 through 2023, $300,000, as adjusted for inflation under section 218 of the U.S.-FSM Compact and the U.S.-RMI Compact, to carry out the purposes of this section.

(j) TECHNICAL ASSISTANCE.—Technical assistance may be provided pursuant to section 224 of the U.S.-FSM Compact or the U.S.-RMI Compact by Federal agencies and institutions of the Government of the United States to the extent such assistance may be provided to States, territories, or units of local government. Such assistance by the Forest Service, the Natural Resources Conservation Service, the Fish and Wildlife Service, the National Marine Fisheries Service, the United States Coast Guard, and the Advisory Council on Historic Preservation, the Department of the Interior, and other agencies providing assistance under the National Historic Preservation Act (80 Stat. 915; 16 U.S.C. 470–470t), shall be on a nonreimbursable basis. During the period the U.S.-FSM Compact and the U.S.-RMI Compact are in effect, the grant programs under the National Historic Preservation Act shall continue to apply to the Federated States of Micronesia and the Republic of the Marshall Islands in the same manner and to the same extent as prior to the approval of the Compact. Any funds provided pursuant to sections 102(a), 103(a), 103(b), 103(f), 103(g), 103(h), 103(j), 105(c), 105(g), 105(h), 105(i), 105(j), 105(k), 105(l), and 105(m) of this joint resolution shall be in addition to and not charged against any amounts to be paid to either the Federated States of Micronesia or the Republic of the Marshall Islands pursuant to the U.S.-FSM Compact, the U.S.-RMI Compact, or their related subsidiary agreements.

(k) PRIOR SERVICE BENEFITS PROGRAM.—Notwithstanding any other provision of law, persons who on January 1, 1985, were eligible to receive payment under the Prior Service Benefits Program established within the Social Security System of the Trust Territory of the Pacific Islands because of their services performed for the United States Navy or the Government of the Trust Territory of the Pacific Islands prior to

July 1, 1968, shall continue to receive such payments on and after the effective date of the Compact.

(l) INDEFINITE LAND USE PAYMENTS.—There are authorized to be appropriated such sums as may be necessary to complete repayment by the United States of any debts owed for the use of various lands in the Federated States of Micronesia and the Marshall Islands prior to January 1, 1985.

(m) COMMUNICABLE DISEASE CONTROL PROGRAM.—There are authorized to be appropriated for grants to the Government of the Federated States of Micronesia, the Government of the Republic of the Marshall Islands, and the governments of the affected jurisdictions, such sums as may be necessary for purposes of establishing or continuing programs for the control and prevention of communicable diseases, including (but not limited to) cholera, tuberculosis, and Hansen's Disease. The Secretary of the Interior shall assist the Government of the Federated States of Micronesia, the Government of the Republic of the Marshall Islands and the governments of the affected jurisdictions in designing and implementing such a program.

(n) USER FEES.—Any person in the Federated States of Micronesia or the Republic of the Marshall Islands shall be liable for user fees, if any, for services provided in the Federated States of Micronesia or the Republic of the Marshall Islands by the Government of the United States to the same extent as any person in the United States would be liable for fees, if any, for such services in the United States.

(o) TREATMENT OF JUDGMENTS OF COURTS OF THE FEDERATED STATES OF MICRONESIA, THE REPUBLIC OF THE MARSHALL ISLANDS, AND THE REPUBLIC OF PALAU.—No judgment, whenever issued, of a court of the Federated States of Micronesia, the Republic of the Marshall Islands, or the Republic of Palau, against the United States, its departments and agencies, or officials of the United States or any other individuals acting on behalf of the United States within the scope of their official duty, shall be honored by the United States, or be subject to recognition or enforcement in a court in the United States, unless the judgment is consistent with the interpretation by the United States of international agreements relevant to the judgment. In determining the consistency of a judgment with an international agreement, due regard shall be given to assurances made by the Executive Branch to Congress of the United States regarding the proper interpretation of the international agreement.

(p) ESTABLISHMENT OF TRUST FUNDS; EXPEDITION OF PROCESS.—

(1) IN GENERAL.—The Trust Fund Agreement executed pursuant to the U.S.-FSM Compact and the Trust Fund Agreement executed pursuant to the U.S.-RMI Compact each provides for the establishment of a trust fund.

(2) METHOD OF ESTABLISHMENT.—The trust fund may be established by—

(A) creating a new legal entity to constitute the trust fund; or

(B) assuming control of an existing legal entity including, without limitation, a trust fund or other legal entity that was established by or at the direction of the Government of the United States, the Government of the Federated States of Micronesia, the Government of the Republic of the Marshall Islands, or otherwise for the purpose of facilitating or expediting the establishment of the trust fund pursuant to the applicable Trust Fund Agreement.

(3) OBLIGATIONS.—For the purpose of expediting the commencement of operations of a trust fund under either Trust Fund Agreement, the trust fund may, but shall not be obligated to, assume any obligations of an existing legal entity and take assignment of any contract or other agreement to which the existing legal entity is party.

(4) ASSISTANCE.—Without limiting the authority that the United States Government may otherwise have under applicable law, the United States Government may, but shall not be obligated to, provide financial, technical, or other assistance directly or indirectly to the Government of the Federated States of Micronesia or the Government of the Republic of the Marshall Islands for the purpose of establishing and operating a trust fund or other legal entity that will solicit bids from, and enter into contracts with, parties willing to serve in such capacities as trustee, depositary, money manager, or investment advisor, with the intention that the contracts will ultimately be assumed by and assigned to a trust fund established pursuant to a Trust Fund Agreement.

SEC. 106. CONSTRUCTION CONTRACT ASSISTANCE.

(a) ASSISTANCE TO U.S. FIRMS.—In order to assist the Governments of the Federated States of Micronesia and of the Republic of the Marshall Islands through private sector firms which may be awarded contracts for construction or major repair of capital infrastructure within the Federated States of Micronesia or the Republic of the Marshall Islands, the United States shall consult with the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands with respect to any such contracts, and the United States shall enter into agreements with such firms whereby such firms will, consistent with applicable requirements of such Governments—

(1) to the maximum extent possible, employ citizens of the Federated States of Micronesia and the Republic of the Marshall Islands;

(2) to the extent that necessary skills are not possessed by citizens of the Federated States of Micronesia and the Republic of the Marshall Islands, provide on the job training, with particular emphasis on the development of skills relating to operation of machinery and routine and preventative maintenance of machinery and other facilities; and

(3) provide specific training or other assistance in order to enable the Government to engage in long-term maintenance of infrastructure.

Assistance by such firms pursuant to this section may not exceed 20 percent of the amount of the contract and shall be made available only to such firms which meet the definition of United States firm under the nationality rule for suppliers of services of the Agency for International Development (hereafter in this section referred to as ''United States firms''). There are authorized to be appropriated such sums as may be necessary for the purposes of this subsection.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to cover any additional costs incurred by the Government of the Federated States of Micronesia or the Republic of the Marshall Islands if such Governments, pursuant to an agreement entered into with the United States, apply a preference on the award of contracts to United States firms, provided that the amount of such preference does not exceed 10 percent of the amount of the lowest qualified bid from a non-United States firm for such contract.

SEC. 107. PROHIBITION.

All laws governing conflicts of interest and post-employment of Federal employees shall apply to the implementation of this Act.

SEC. 108. COMPENSATORY ADJUSTMENTS.

(a) ADDITIONAL PROGRAMS AND SERVICES.—In addition to the programs and services set forth in section 221 of the U.S.-FSM Compact and the U.S.-RMI Compact, and pursuant to section 222 of the U.S.-FSM Compact and the U.S.-RMI Compact, the services and programs of the following United States agencies shall be made available to the Federated States of Micronesia and the Republic of the Marshall Islands: the Small Business Administration, Economic Development Administration, the Rural Utilities Services (formerly Rural Electrification Administration); the programs and services of the Department of Labor under subtitle C of title I of the Workforce Investment Act of 1998 (29 U.S.C. 2881 et seq.; relating to Job Corps); and the programs and services of the Department of Commerce relating to tourism and to marine resource development.

(b) FURTHER AMOUNTS.—

(1) The joint resolution of January 14, 1986 (Public Law 99–239) provided that the governments of the Federated States of Micronesia and the Marshall Islands may submit to Congress reports concerning the overall financial and economic impacts on such areas resulting from the effect of title IV of that joint resolution upon Title Two of the Compact. There were authorized to be appropriated for fiscal years beginning after September 30, 1990, such amounts as necessary, but not to exceed $40,000,000 for the Federated States of Micronesia and $20,000,000 for the Marshall Islands, as provided in appropriation acts, to further compensate the governments of such islands (in addition to the compensation provided in subsections (a) and (b) of section 111 of the joint resolution of January 14, 1986 (Public Law 99–239) for adverse impacts, if any, on the finances and economies of such areas resulting from the effect of title IV of that joint resolution upon Title Two of the Compact. The joint resolution of January 14, 1986 (Public Law 99–239) further provided that at the end of the initial fifteen-year term of the Compact, should any portion of the total amount of funds authorized in section 111 of that resolution not have been appropriated, such amount not yet appropriated may be appropriated, without regard to divisions between amounts authorized in section 111 for the Federated States of Micronesia and for the Marshall Islands, based on either or both such government's showing of such adverse impact, if any, as provided in that subsection.

(2) The governments of the Federated States of Micronesia and the Republic of the Marshall Islands may each submit no more than one report or request for further compensation under section 111 of the joint resolution of January 14, 1986 (Public Law 99–239) and any such report or request must be submitted by September 30, 2009. Only adverse economic effects occurring during the initial 15-year term of the Compact may be considered for compensation under section 111 of the joint resolution of January 14, 1986 (Public Law 99–239).

SEC. 109. AUTHORIZATION AND CONTINUING APPROPRIATION.

(a) There are authorized and appropriated to the Department of the Interior, out of any funds in the Treasury not otherwise appropriated, to remain available until expended, such sums as are necessary to carry out the purposes of sections 105(f)(1) and 105(i) of this Act, sections 211, 212(b), 215, and 217 of the U.S.-FSM Compact, and sections 211, 212, 213(b), 216, and 218 of the U.S.-RMI Compact, in this and subsequent years.

(b) There are authorized to be appropriated to the Departments, agencies, and instrumentalities named in paragraphs (1) and (3) through (6) of section 221(a) of the U.S.-FSM Compact and paragraphs (1) and (3) through (5) of section 221(a) of the U.S.-RMI Compact, such sums as are necessary to carry out the purposes of sections 221(a) of the U.S.-FSM Compact and the U.S.-RMI Compact, to remain available until expended.

SEC. 110. PAYMENT OF CITIZENS OF THE FEDERATED STATES OF MICRONESIA, THE REPUBLIC OF THE MARSHALL ISLANDS, AND THE REPUBLIC OF PALAU EMPLOYED BY THE GOVERNMENT OF THE UNITED STATES IN THE CONTINENTAL UNITED STATES.

Section 605 of Public Law 107–67 (the Treasury and General Government Appropriations Act, 2002) is amended by striking ''or the Republic of the Philippines,'' in the last sentence and inserting the following: ''the Republic of the Philippines, the Federated States of Micronesia, the Republic of the Marshall Islands, or the Republic of Palau,''.

TITLE II—COMPACTS OF FREE ASSOCIATION WITH THE FEDERATED STATES OF MICRONESIA AND THE REPUBLIC OF THE MARSHALL ISLANDS

SEC. 201. COMPACTS OF FREE ASSOCIATION, AS AMENDED BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE FEDERATED STATES OF MICRONESIA AND BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF THE MARSHALL ISLANDS.

(a) COMPACT OF FREE ASSOCIATION, AS AMENDED, BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE FEDERATED STATES OF MICRONESIA.—The Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Federated States of Micronesia is as follows:

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationship as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the people of the Federated States of Micronesia have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the Federated States of Micronesia in creating and maintaining their close and mutually beneficial relationship through the free and voluntary association of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and budgetary self-reliance of the Federated States of Micronesia; and

Recognizing that their relationship until the entry into force on November 3, 1986 of the Compact was based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the people of the Federated States of Micronesia have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they, through their freely-expressed wishes, have adopted a Constitution appropriate to their particular circumstances; and

Recognizing that the Compact reflected their common desire to terminate the Trusteeship and establish a government-to-government relationship which was in accordance with the new political status based on the freely expressed wishes of the people of the Federated States of Micronesia and appropriate to their particular circumstances; and

Recognizing that the people of the Federated States of Micronesia have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitution and form of government and that the approval of the entry of the Government of the Federated States of Micronesia into the Compact by the people of the Federated States of Micronesia constituted an exercise of their sovereign right to self-determination; and

Recognizing the common desire of the people of the United States and the people of the Federated States of Micronesia to maintain their close government-to-government relationship, the United States and the Federated States of Micronesia:

NOW, THEREFORE, MUTUALLY AGREE to continue and strengthen their relationship of free association by amending the Compact, which continues to provide a full measure of self-government for the people of the Federated States of Micronesia; and

FURTHER AGREE that the relationship of free association derives from and is as set forth in this Compact, as amended, by the Governments of the United States and the Federated States of Micronesia; and that, during such relationship of free association, the respective rights and responsibilities of the Government of the United States and the Government of the Federated States of Micronesia in regard to this relationship of free association derive from and are as set forth in this Compact, as amended.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The people of the Federated States of Micronesia, acting through the Government established under their Constitution, are self-governing.

Article II

Foreign Affairs

Section 121

(a) The Government of the Federated States of Micronesia has the capacity to conduct foreign affairs and shall do so in its own name and right, except as otherwise provided in this Compact, as amended.

(b) The foreign affairs capacity of the Government of the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of its commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting its individual citizens.

(c) The Government of the United States recognizes that the Government of the Federated States of Micronesia has the capacity to enter into, in its own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of its foreign affairs, the Government of the Federated States of Micronesia confirms that it shall act in accordance with principles of international law and shall settle its international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Government of the Federated States of Micronesia for membership or other participation in regional or international organizations as may be mutually agreed.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Government of the Federated States of Micronesia shall consult, in the conduct of its foreign affairs, with the Government of the United States.

(b) In recognition of the foreign affairs capacity of the Government of the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Federated States of Micronesia on matters that the Government of the United States regards as relating to or affecting the Government of the Federated States of Micronesia.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Federated States of Micronesia for travel outside the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact, as amended, or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on November 2, 1986, are, as of that date, no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Government of the Federated States of Micronesia has full authority and responsibility to regulate its domestic and foreign communications, and the Government of the United States shall provide communications assistance as mutually agreed.

(b) On May 24, 1993, the Government of the Federated States of Micronesia elected to undertake all functions previously performed by the Government of the United States with respect to domestic and foreign communications, except for those functions set forth in a separate agreement entered into pursuant to this section of the Compact, as amended.

Section 132

The Government of the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact, as amended, in accordance with the terms of separate agreements entered into pursuant to this section of the Compact, as amended.

Article IV

Immigration

Section 141

(a) In furtherance of the special and unique relationship that exists between the United States and the Federated States of Micronesia, under the Compact, as amended, any person in the following categories may be admitted to, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions (the ''United States'') without regard to paragraph (5) or (7)(B)(i)(II) of section 212(a) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1182(a)(5) or (7)(B)(i)(II):

(1) a person who, on November 2, 1986, was a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on January 1, 1979, and has become and remains a citizen of the Federated States of Micronesia;

(2) a person who acquires the citizenship of the Federated States of Micronesia at birth, on or after the effective date of the Constitution of the Federated States of Micronesia;

(3) an immediate relative of a person referred to in paragraphs (1) or (2) of this section, provided that such immediate relative is a naturalized citizen of the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence, and further provided, that, in the case of a spouse, such spouse has been married to the person referred to in paragraph (1) or (2) of this section for at least five years, and further provided, that the Government of the United States is satisfied that such naturalized citizen meets the requirement of subsection (b) of section 104 of Public Law 99–239 as it was in effect on the day prior to the effective date of this Compact, as amended;

(4) a naturalized citizen of the Federated States of Micronesia who was an actual resident there for not less than five years after attaining such naturalization and who satisfied these requirements as of April 30, 2003, who continues to be an actual resident and holds a certificate of actual residence, and whose name is included in a list furnished by the Government of the Federated States of Micronesia to the Government of the United States no later than the effective date of the Compact, as amended, in form and content acceptable to the Government of the United States, provided, that the Government of the United States is satisfied that such naturalized citizen meets the requirement of subsection (b) of section 104 of Public Law 99–239 as it was in effect on the day prior to the effective date of this Compact, as amended; or

(5) an immediate relative of a citizen of the Federated States of Micronesia, regardless of the immediate relative's country of citizenship or period of residence in the Federated States of Micronesia, if the citizen of the Federated States of Micronesia is serving on active duty in any branch of the United States Armed Forces, or in the active reserves.

(b) Notwithstanding subsection (a) of this section, a person who is coming to the United States pursuant to an adoption outside the United States, or for the purpose of adoption in the United States, is ineligible for admission under the Compact and the Compact, as amended. This subsection shall apply to any person who is or was an applicant for admission to the United States on or after March 1, 2003, including any applicant for admission in removal proceedings (including appellate proceedings) on or after March 1, 2003, regardless of the date such proceedings were commenced. This subsection shall have no effect on the ability of the Government of the United States or any United States State or local government to commence or otherwise take any action against any person or entity who has violated any law relating to the adoption of any person.

(c) Notwithstanding subsection (a) of this section, no person who has been or is granted citizenship in the Federated States of Micronesia, or has been or is issued a Federated States of Micronesia passport pursuant to any investment, passport sale, or similar program has been or shall be eligible for admission to the United States under the Compact or the Compact, as amended.

(d) A person admitted to the United States under the Compact, or the Compact, as amended, shall be considered to have the permission of the Government of the United States to accept employment in the United States. An unexpired Federated States of Micronesia passport with unexpired documentation issued by the Government of the United States evidencing admission under the Compact or the Compact, as amended, shall be considered to be documentation establishing identity and employment authorization under section 274A(b)(1)(B) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1324a(b)(1)(B). The Government of the United States will take reasonable and appropriate steps to implement and publicize this provision, and the Government of the Federated States of Micronesia will also take reasonable and appropriate steps to publicize this provision.

(e) For purposes of the Compact and the Compact, as amended:

(1) the term ''residence'' with respect to a person means the person's principal, actual dwelling place in fact, without regard to intent, as provided in section 101(a)(33) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1101(a)(33), and variations of the term ''residence,'' including ''resident'' and ''reside,'' shall be similarly construed;

(2) the term ''actual residence'' means physical presence in the Federated States of Micronesia during eighty-five percent of the five-year period of residency required by section 141(a)(3) and (4);

(3) the term ''certificate of actual residence'' means a certificate issued to a naturalized citizen by the Government of the Federated States of Micronesia stating that the citizen has complied with the actual residence requirement of section 141(a)(3) or (4);

(4) the term ''nonimmigrant'' means an alien who is not an ''immigrant'' as defined in section 101(a)(15) of such Act, 8 U.S.C. 1101(a)(15); and

(5) the term ''immediate relative'' means a spouse, or unmarried son or unmarried daughter less than 21 years of age.

(f) The Immigration and Nationality Act, as amended, shall apply to any person admitted or seeking admission to the United States (other than a United States possession or territory where such Act does not apply) under the Compact or the Compact, as amended, and nothing in the Compact or the Compact, as amended, shall be construed to limit, preclude, or modify the applicability of, with respect to such person:

(1) any ground of inadmissibility or deportability under such Act (except sections 212(a)(5) and 212(a)(7)(B)(i)(II) of such Act, as provided in subsection (a) of this section), and any defense thereto, provided that, section 237(a)(5) of such Act shall be construed and applied as if it reads as follows: ''any alien who has been admitted under the Compact, or the Compact, as amended, who cannot show that he or she has sufficient means of support in the United States, is deportable'';

(2) the authority of the Government of the United States under section 214(a)(1) of such Act to provide that admission as a nonimmigrant shall be for such time and under such conditions as the Government of the United States may by regulations prescribe;

(3) Except for the treatment of certain documentation for purposes of section 274A(b)(1)(B) of such Act as provided by subsection (d) of this section of the Compact, as amended, any requirement under section 274A, including but not limited to section 274A(b)(1)(E);

(4) Section 643 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104–208, and actions taken pursuant to section 643; and

(5) the authority of the Government of the United States otherwise to administer and enforce the Immigration and Nationality Act, as amended, or other United States law.

(g) Any authority possessed by the Government of the United States under this section of the Compact or the Compact, as amended, may also be exercised by the Government of a territory or possession of the United States where the Immigration and Nationality Act, as amended, does not apply, to the extent such exercise of authority is lawful under a statute or regulation of such territory or possession that is authorized by the laws of the United States.

(h) Subsection (a) of this section does not confer on a citizen of the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, as amended, or to petition for benefits for alien relatives under that Act. Subsection (a) of this section, however, shall not prevent a citizen of the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may be admitted, to lawfully engage in occupations, and reside in the Federated States of Micronesia, subject to the rights of the Government of the Federated States of Micronesia to deny entry to or deport any such citizen or national as an undesirable alien. Any determination of inadmissibility or deportability shall be based on reasonable statutory grounds and shall be subject to appropriate administrative and judicial review within the Federated States of Micronesia. If a citizen or national of the United States is a spouse of a citizen of the Federated States of Micronesia, the Government of the Federated States of Micronesia shall allow the United States citizen spouse to establish residence. Should the Federated States of Micronesia citizen spouse predecease the United States citizen spouse during the marriage, the Government of the Federated States of Micronesia shall allow the United States citizen spouse to continue to reside in the Federated States of Micronesia.

(b) In enacting any laws or imposing any requirements with respect to citizens and nationals of the United States entering the Federated States of Micronesia under subsection (a) of this section, including any grounds of inadmissibility or deportability, the Government of the Federated States of Micronesia shall accord to such citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries.

(c) Consistent with subsection (a) of this section, with respect to citizens and nationals of the United States seeking to engage in employment or invest in the Federated States of Micronesia, the Government of the Federated States of Micronesia shall adopt immigration-related procedures no less favorable than those adopted by the Government of the United States with respect to citizens of the Federated States of Micronesia seeking employment in the United States.

Section 143

Any person who relinquishes, or otherwise loses, his United States nationality or citizenship, or his Federated States of Micronesia citizenship, shall be ineligible to receive the privileges set forth in sections 141 and 142. Any such person may apply for admission to the United States or the Federated States of Micronesia, as the case may be, in accordance with any other applicable laws of the United States or the Federated States of Micronesia relating to immigration of aliens from other countries. The laws of the Federated States of Micronesia or the United States, as the case may be, shall dictate the terms and conditions of any such person's stay.

Article V

Representation

Section 151

Relations between the Government of the United States and the Government of the Federated States of Micronesia shall be conducted in accordance with the Vienna Convention on Diplomatic Relations. In addition to diplomatic missions and representation, the Governments may establish and maintain other offices and designate other representatives on terms and in locations as may be mutually agreed.

Section 152

(a) Any citizen or national of the United States who, without authority of the United States, acts as the agent of the Government of the Federated States of Micronesia with regard to matters specified in the provisions of the Foreign Agents Registration Act of 1938, as amended (22 U.S.C. 611 et seq.), that apply with respect to an agent of a foreign principal shall be subject to the requirements of such Act. Failure to comply with such requirements shall subject such citizen or national to the same penalties and provisions of law as apply in the case of the failure of such an agent of a foreign principal to comply with such requirements. For purposes of the Foreign Agents Registration Act of 1938, the Federated States of Micronesia shall be considered to be a foreign country.

(b) Subsection (a) of this section shall not apply to a citizen or national of the United States employed by the Government of the Federated States of Micronesia with respect to whom the Government of the Federated States of Micronesia from time to time certifies to the Government of the United States that such citizen or national is an employee of the Federated States of Micronesia whose principal duties are other than those matters specified in the Foreign Agents Registration Act of 1938, as amended, that apply with respect to an agent of a foreign principal. The agency or officer of the United States receiving such certifications shall cause them to be filed with the Attorney General, who shall maintain a publicly available list of the persons so certified.

Article VI

Environmental Protection

Section 161

The Governments of the United States and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Government of the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on November 2, 1986 to those of its continuing activities subject to section 161(a)(2), unless and until those controls are modified under sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 et seq., to its activities under the Compact, as amended, and its related agreements as if the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activity requiring the preparation of an Environmental Impact Statement under section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environment of the Federated States of Micronesia: the Endangered Species Act of 1973, as amended, 87 Stat. 884, 16 U.S.C. 1531 et seq.; the Clean Air Act, as amended, 77 Stat. 392, 42 U.S.C. Supp. 7401 et seq.; the Clean Water Act (Federal Water Pollution Control Act), as amended, 86 Stat. 896, 33 U.S.C. 1251 et seq.; Title I of the Marine Protection, Research and Sanctuaries Act of 1972 (the Ocean Dumping Act), 33 U.S.C. 1411 et seq.; the Toxic Substances Control Act, as amended, 15 U.S.C. 2601 et seq.; the Solid Waste Disposal Act, as amended, 42 U.S.C. 6901 et seq.; and such other environmental protection laws of the United States and of the Federated States of Micronesia, as may be mutually agreed from time to time with the Government of the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under section 161(a)(2), written standards and procedures, as agreed with the Government of the Federated States of Micronesia, to implement the substantive provisions of the laws made applicable to U.S. Government activities in the Federated States of Micronesia, pursuant to section 161(a)(3).

(b) The Government of the Federated States of Micronesia shall continue to develop and implement standards and procedures to protect its environment. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Federated States of Micronesia, taking into account its particular environment, shall continue to develop and implement standards for environmental protection substantively similar to those required of the Government of the United States by section 161(a)(3) prior to its conducting activities in the Federated States of Micronesia, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major Federal actions significantly affecting the quality of the human environment, the regulatory regime established under sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact, as amended, and its related agreements from any environmental standard or procedure which may be applicable under sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact, as amended, and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the Government of the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the Government of the Federated States of Micronesia.

(f) The laws of the United States referred to in section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact, as amended, and its related agreements only to the extent provided for in this section.

Section 162

The Government of the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to section 161(a) for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this section.

(b) Actions brought pursuant to this section may be initiated only by the Government of the Federated States of Micronesia.

(c) Administrative agency actions arising under section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706.

(d) The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the United States District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States.

(e) The judicial remedy provided for in this section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by section 161.

(f) In actions pursuant to this section, the Government of the Federated States of Micronesia shall be treated as if it were a United States citizen.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Government of the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations

under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided the Government of the Federated States of Micronesia under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Government of the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact, as amended, or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceased with respect to the Federated States of Micronesia on November 3, 1986, the date the Compact went into effect.

Section 172

(a) Every citizen of the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Government of the Federated States of Micronesia and every citizen of the Federated States of Micronesia shall be considered to be a ''person'' within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701–706, except that only the Government of the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by sections 161 and 162.

Section 173

The Governments of the United States and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact, as amended, and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Federated States of Micronesia pursuant to this Compact, as amended, and its related agreements and by the Government of the Federated States of Micronesia in the United States pursuant to this Compact, as amended, and its related agreements.

Section 174

Except as otherwise provided in this Compact, as amended, and its related agreements:

(a) The Government of the Federated States of Micronesia, and its agencies and officials, shall be immune from the jurisdiction of the court of the United States, and the Government of the United States, and its agencies and officials, shall be immune from the jurisdiction of the courts of the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to November 3, 1986;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the November 3, 1986; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of the Compact shall be adjudicated in the same manner as a claim adjudicated according to section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor courts, which shall have jurisdiction therefore, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Government of the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Federated States of Micronesia in any civil case in which an exception to foreign state immunity is set forth in the Foreign Sovereign Immunities Act (28 U.S.C. 1602 et seq.) or its successor statutes.

Section 175

(a) A separate agreement, which shall come into effect simultaneously with this Compact, as amended, and shall have the force of law, shall govern mutual assistance and cooperation in law enforcement matters, including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners, as well as other law enforcement matters. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188–95, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100–15, shall be applicable to the transfer of prisoners under the separate agreement; and

(b) A separate agreement, which shall come into effect simultaneously with this Compact, as amended, and shall have the force of law, shall govern requirements relating to labor recruitment practices, including registration, reporting, suspension or revocation of authorization to recruit persons for employment in the United States, and enforcement for violations of such requirements.

Section 176

The Government of the Federated States of Micronesia confirms that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

Section 177 of the Compact entered into force with respect to the Federated States of Micronesia on November 3, 1986 as follows:

''(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia, or Palau for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia, resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

''(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

''(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.''

The Compact, as amended, makes no changes to, and has no effect upon, Section 177 of the Compact, nor does the Compact, as amended, change or affect the separate agreement referred to in Section 177 of the Compact including Articles IX and X of that separate agreement, and measures taken by the parties thereunder.

Section 178

(a) The Federal agencies of the Government of the United States that provide the services and related programs in the Federated States of Micronesia pursuant to Title Two are authorized to settle and pay tort claims arising in the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under section 178(a) that cannot be settled under section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Federated States of Micronesia shall, in the separate agreement referred to in section 231, provide for:

(1) the administrative settlement of claims referred to in section 178(a), including designation of local agents in each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to section 178(a).

(d) The provisions of section 174(d) shall not apply to claims covered by this section.

(e) Except as otherwise explicitly provided by law of the United States, neither the Government of the United States, its instrumentalities, nor any person acting on behalf of the Government of the United States, shall be named a party in any action based on, or arising out of, the activity or activities of a recipient of any grant or other assistance provided by the Government of the United States (or the activity or activities of the recipient's agency or any other person or entity acting on behalf of the recipient).

Section 179

(a) The courts of the Federated States of Micronesia shall not exercise criminal jurisdiction over the Government of the United States, or its instrumentalities.

(b) The courts of the Federated States of Micronesia shall not exercise criminal jurisdiction over any person if the Government of the United States provides notification to the Government of the Federated States of Micronesia that such person was acting on behalf of the Government of the United States, for actions taken in furtherance of section 221 or 224 of this amended Compact, or any other provision of law authorizing financial, program, or service assistance to the Federated States of Micronesia.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211 - Sector Grants

(a) In order to assist the Government of the Federated States of Micronesia in its efforts to promote the economic advancement, budgetary self-reliance, and economic self-sufficiency of its people, and in recognition of the special relationship that exists between the Federated States of Micronesia and the United States, the Government of the United States shall provide assistance on a sector grant basis for a period of twenty years in the amounts set forth in section 216, commencing on the effective date of this Compact, as amended. Such grants shall be used for assistance in the sectors of education, health care, private sector development, the environment, public sector capacity building, and public infrastructure, or for other sectors as mutually agreed, with priorities in the education and health care sectors. For each year such sector grant assistance is made available, the proposed division of this amount among these sectors shall be certified to the Government of the United States by the Government of the Federated States of Micronesia and shall be subject to the concurrence of the Government of the United States. In such case, the Government of the United States shall disburse the agreed upon amounts and monitor the use of such sector grants in accordance with the provisions of this Article and the Agreement Concerning Procedures for the Implementation of United States Economic Assistance Provided in the Compact, as Amended, of Free Association Between the Government of the United States of America and the Government of the Federated States of Micronesia (''Fiscal Procedures Agreement'') which shall come into effect simultaneously with this Compact, as amended. The provision of any United States assistance under the Compact, as amended, the Fiscal Procedures Agreement, the Trust Fund Agreement, or any other subsidiary agreement to the Compact, as amended, shall constitute ''a particular distribution . . . required by the terms or special nature of the assistance'' for purposes of Article XII, section 1(b) of the Constitution of the Federated States of Micronesia.

(1) EDUCATION.—United States grant assistance shall be made available in accordance with the plan described in subsection (c) of this section to support and improve the educational system of the Federated States of Micronesia and develop the human, financial, and material resources necessary for the Government of the Federated States of Micronesia to perform these services. Emphasis should be placed on advancing a quality basic education system.

(2) HEALTH.—United States grant assistance shall be made available in accordance with the plan described in subsection (c) of this section to support and improve the delivery of preventive, curative and environmental care and develop the human, financial, and material resources necessary for the Government of the Federated States of Micronesia to perform these services.

(3) PRIVATE SECTOR DEVELOPMENT.—United States grant assistance shall be made available in accordance with the plan described in subsection (c) of this section to support the efforts of the Government of the Federated States of Micronesia to attract foreign investment and increase indigenous business activity by vitalizing the commercial environment, ensuring fair and equitable application of the law, promoting adherence to core labor standards, and maintaining progress toward privatization of state-owned and partially state-owned enterprises, and engaging in other reforms.

(4) CAPACITY BUILDING IN THE PUBLIC SECTOR.—United States grant assistance shall be made available in accordance with the plan described in subsection (c) of this section to support the efforts of the Government of the Federated States of Micronesia to build effective, accountable and transparent national, state, and local government and other public sector institutions and systems.

(5) ENVIRONMENT.—United States grant assistance shall be made available in accordance with the plan described in subsection (c) of this section to increase environmental protection; conserve and achieve sustainable use of natural resources; and engage in environmental infrastructure planning, design construction and operation.

(6) PUBLIC INFRASTRUCTURE.—

(i) U.S. annual grant assistance shall be made available in accordance with a list of specific projects included in the plan described in subsection (c) of this section to assist the Government of the Federated States of Micronesia in its efforts to provide adequate public infrastructure.

(ii) INFRASTRUCTURE AND MAINTENANCE FUND.—Five percent of the annual public infrastructure grant made available under paragraph (i) of this subsection shall be set aside, with an equal contribution from the Government of the Federated States of Micronesia, as a contribution to an Infrastructure Maintenance Fund (IMF). Administration of the Infrastructure Maintenance Fund shall be governed by the Fiscal Procedures Agreement.

(b) HUMANITARIAN ASSISTANCE.—Federated States of Micronesia Program. In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available to the Government of the Federated States of Micronesia, on its request and to be deducted from the grant amount made available under subsection (a) of this section, a Humanitarian Assistance - Federated States of Micronesia (''HAFSM'') Program with emphasis on health, education, and infrastructure (including transportation), projects. The terms and conditions of the HAFSM shall be set forth in the Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Government of the Federated States of Micronesia Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association, as Amended which shall come into effect simultaneously with the amendments to this Compact.

(c) DEVELOPMENT PLAN.—The Government of the Federated States of Micronesia shall prepare and maintain an official overall development plan. The plan shall be strategic in nature, shall be continuously reviewed and updated through the annual budget process, and shall make projections on a multi-year rolling basis. Each of the sectors named in subsection (a) of this section, or other sectors as mutually agreed, shall be accorded specific treatment in the plan. Insofar as grants funds are involved, the plan shall be subject to the concurrence of the Government of the United States.

(d) DISASTER ASSISTANCE EMERGENCY FUND.—An amount of two hundred thousand dollars ($200,000) shall be provided annually, with an equal contribution from the Government of the Federated States of Micronesia, as a contribution to a ''Disaster Assistance Emergency Fund (DAEF).'' Any funds from the DAEF may be used only for assistance and rehabilitation resulting from disasters and emergencies. The funds will be accessed upon declaration by the Government of the Federated States of Micronesia, with the concurrence of the United States Chief of Mission to the Federated States of Micronesia. The Administration of the DAEF shall be governed by the Fiscal Procedures Agreement.

Section 212 - Accountability

(a) Regulations and policies normally applicable to United States financial assistance to its state and local governments, as reflected in the Fiscal Procedures Agreement, shall apply to each sector grant described in section 211, and to grants administered under section 221 below, except as modified in the separate agreements referred to in section 231 of this Compact, as amended, or by United States law. The Government of the United States, after annual consultations with the Federated States of Micronesia, may attach reasonable terms and conditions, including annual performance indicators that are necessary to ensure effective use of United States assistance and reasonable progress toward achieving program objectives. The Government of the United States may seek appropriate remedies for noncompliance with the terms and conditions attached to the assistance, or for failure to comply with section 234, including withholding assistance.

(b) The Government of the United States shall, for each fiscal year of the twenty years during which assistance is to be provided on a sector grant basis under section 211, grant the Government of the Federated States of Micronesia an amount equal to the lesser of (i) one half of the reasonable, properly documented cost incurred during each fiscal year to conduct the annual audit required under Article VIII (2) of the Fiscal Procedures Agreement or (ii) $500,000. Such amount will not be adjusted for inflation under section 217 or otherwise.

Section 213—Joint Economic Management Committee

The Governments of the United States and the Federated States of Micronesia shall establish a Joint Economic Management Committee, composed of a U.S. chair, two other members from the Government of the United States and two members from the Government of the Federated States of Micronesia. The Joint Economic Management Committee shall meet at least once each year to review the audits and reports required under this Title, evaluate the progress made by the Federated States of Micronesia in meeting the objectives identified in its plan described in subsection (c) of section 211, with particular focus on those parts of the plan dealing with

the sectors identified in subsection (a) of section 211, identify problems encountered, and recommend ways to increase the effectiveness of U.S. assistance made available under this Title. The establishment and operations of the Joint Economic Management Committee shall be governed by the Fiscal Procedures Agreement.

Section 214 - Annual Report

The Government of the Federated States of Micronesia shall report annually to the President of the United States on the use of United States sector grant assistance and other assistance and progress in meeting mutually agreed program and economic goals. The Joint Economic Management Committee shall review and comment on the report and make appropriate recommendations based thereon.

Section 215 - Trust Fund

(a) The United States shall contribute annually for twenty years from the effective date of this Compact, as amended, in the amounts set forth in section 216 into a Trust Fund established in accordance with the Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia Implementing Section 215 and Section 216 of the Compact, as Amended, Regarding a Trust Fund (''Trust Fund Agreement''). Upon termination of the annual financial assistance under section 211, the proceeds of the fund shall thereafter be used for the purposes described in section 211 or as otherwise mutually agreed.

(b) The United States contribution into the Trust Fund described in subsection(a) of this section is conditioned on the Government of the Federated States of Micronesia contributing to the Trust Fund at least $30 million, prior to September 30, 2004. Any funds received by the Federated States of Micronesia under section 111 (d) of Public Law 99–239 (January 14, 1986), or successor provisions, would be contributed to the Trust Fund as a Federated States of Micronesia contribution.

(c) The terms regarding the investment and management of funds and use of the income of the Trust Fund shall be set forth in the separate Trust Fund Agreement described in subsection (a) of this section. Funds derived from United States investment shall not be subject to Federal or state taxes in the United States or the Federated States of Micronesia. The Trust Fund Agreement shall also provide for annual reports to the Government of the United States and to the Government of the Federated States of Micronesia. The Trust Fund Agreement shall provide for appropriate distributions of trust fund proceeds to the Federated States of Micronesia and for appropriate remedies for the failure of the Federated States of Micronesia to use income of the Trust Fund for the annual grant purposes set forth in section 211. These remedies may include the return to the United States of the present market value of its contributions to the Trust Fund and the present market value of any undistributed income on the contributions of the United States. If this Compact, as amended, is terminated, the provisions of sections 451 through 453 of this Compact, as amended, shall govern treatment of any U.S. contributions to the Trust Fund or accrued interest thereon.

Section 216 - Sector Grant Funding and Trust Fund Contributions

The funds described in sections 211, 212(b) and 215 shall be made available as follows:

[In millions of dollars]

Fiscal year	Annual Grants Section 211	Audit Grant Section 212(b) (amount up to)	Trust Fund Section 215	Total
2004	76.2	.5	16	92.7
2005	76.2	.5	16	92.7
2006	76.2	.5	16	92.7
2007	75.4	.5	16.8	92.7
2008	74.6	.5	17.6	92.7
2009	73.8	.5	18.4	92.7
2010	73	.5	19.2	92.7
2011	72.2	.5	20	92.7
2012	71.4	.5	20.8	92.7
2013	70.6	.5	21.6	92.7
2014	69.8	.5	22.4	92.7
2015	69	.5	23.2	92.7
2016	68.2	.5	24	92.7
2017	67.4	.5	24.8	92.7
2018	66.6	.5	25.6	92.7
2019	65.8	.5	26.4	92.7
2020	65	.5	27.2	92.7
2021	64.2	.5	28	92.7
2022	63.4	.5	28.8	92.7
2023	62.6	.5	29.6	92.7

Section 217 - Inflation Adjustment

Except for the amounts provided for audits under section 212(b), the amounts stated in this Title shall be adjusted for each United States Fiscal Year by the percent that equals two-thirds of the percent change in the United States Gross Domestic Product Implicit Price Deflator, or 5 percent, whichever is less in any one year, using the beginning of Fiscal Year 2004 as a base.

Section 218 - Carry-Over of Unused Funds

If in any year the funds made available by the Government of the United States for that year pursuant to this Article are not completely obligated by the Government of the Federated States of Micronesia, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Article II

Services and Program Assistance

Section 221

(a) SERVICES.—The Government of the United States shall make available to the Federated States of Micronesia, in accordance with and to the extent provided in the Federal Programs and Services Agreement referred to in section 231, the services and related programs of:

(1) the United States Weather Service;

(2) the United States Postal Service;

(3) the United States Federal Aviation Administration;

(4) the United States Department of Transportation;

(5) the Federal Deposit Insurance Corporation (for the benefit only of the Bank of the Federated States of Micronesia), and

(6) the Department of Homeland Security, and the United States Agency for International Development, Office of Foreign Disaster Assistance.

Upon the effective date of this Compact, as amended, the United States Departments and Agencies named or having responsibility to provide these services and related programs shall have the authority to implement the relevant provisions of the Federal Programs and Services Agreement referred to in section 231.

(b) PROGRAMS.—

(1) With the exception of the services and programs covered by subsection (a) of this section, and unless the Congress of the United States provides otherwise, the Government of the United States shall make available to the Federated States of Micronesia the services and programs that were available to the Federated States of Micronesia on the effective date of this Compact, as amended, to the extent that such services and programs continue to be available to State and local governments of the United States. As set forth in the Fiscal Procedures Agreement, funds provided under subsection (a) of section 211 will be considered to be local revenues of the Government of the Federated States of Micronesia when used as the local share required to obtain Federal programs and services.

(2) Unless provided otherwise by U.S. law, the services and programs described in paragraph (1) of this subsection shall be extended in accordance with the terms of the Federal Programs and Services Agreement referred to in section 231.

(c) The Government of the United States shall have and exercise such authority as is necessary to carry out its responsibilities under this Title and the separate agreements referred to in amended section 231, including the authority to monitor and administer all service and program assistance provided by the United States to the Federated States of Micronesia. The Federal Programs and Services Agreement referred to in amended section 231 shall also set forth the extent to which services and programs shall be provided to the Federated States of Micronesia.

(d) Except as provided elsewhere in this Compact, as amended, under any separate agreement entered into under this Compact, as amended, or otherwise under U.S. law, all Federal domestic programs extended to or operating in the Federated States of Micronesia shall be subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations applicable to such programs and services when operating in the United States.

(e) The Government of the United States shall make available to the Federated States of Micronesia alternate energy development projects, studies, and conservation measures to the extent provided for the Freely Associated States in the laws of the United States.

Section 222

The Government of the United States and the Government of the Federated States of Micronesia may agree from time to time to extend to the Federated States of Micronesia additional United States grant assistance, services and programs, as provided under the laws of the United States. Unless inconsistent with such laws, or otherwise specifically precluded by the Government of the United States at the time such additional grant assistance, services, or programs are extended, the Federal Programs and Services Agreement referred to section 231 shall apply to any such assistance, services or programs.

Section 223

The Government of the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact, as amended, or as may be mutually agreed thereafter.

Section 224

The Government of the Federated States of Micronesia may request, from time to time, technical assistance from the Federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws. If technical assistance is granted pursuant to such a request, the Government of the United States shall provide the technical assistance in a manner which gives priority consideration to the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions, and equivalent consideration to the Federated States of Micronesia with respect to other states in Free Association with the United States. Such assistance shall be made available on a reimbursable or non-reimbursable basis to the extent provided by United States law.

Article III

Administrative Provisions

Section 231

The specific nature, extent and contractual arrangements of the services and programs provided for in section 221 of this Compact, as amended, as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Federated States of Micronesia, and other arrangements in connection with the assistance, services, or programs furnished by the Government of the United States, are set forth in a Federal Programs and Services Agreement which shall come into effect simultaneously with this Compact, as amended.

Section 232

The Government of the United States, in consultation with the Government of the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Further, in accordance with the Fiscal Procedures Agreement described in subsection (a) of section 211, the Comptroller General of the United States shall have such powers and authorities as described in sections 102 (c) and 110 (c) of Public Law 99–239, 99 Stat. 1777–78, and 99 Stat. 1799 (January 14, 1986).

Section 233

Approval of this Compact, as amended, by the Government of the United States, in accordance with its constitutional processes, shall constitute a pledge by the United States that the sums and amounts specified as sector grants in section 211 of this Compact, as amended, shall be appropriated and paid to the Federated States of Micronesia for such period as those provisions of this Compact, as amended, remain in force, subject to the terms and conditions of this Title and related subsidiary agreements.

Section 234

The Government of the Federated States of Micronesia pledges to cooperate with, permit, and assist if reasonably requested, designated and authorized representatives of the Government of the United States charged with investigating whether Compact funds, or any other assistance authorized under this Compact, as amended, have, or are being, used for purposes other than those set forth in this Compact, as amended, or its subsidiary agreements. In carrying out this investigative authority, such United States Government representatives may request that the Government of the Federated States of Micronesia subpoena documents and records and compel testimony in accordance with the laws and Constitution of the Federated States of Micronesia. Such assistance by the Government of the Federated States of Micronesia to the Government of the United States shall not be unreasonably withheld. The obligation of the Government of the Federated States of Micronesia to fulfill its pledge herein is a condition to its receiving payment of such funds or other assistance authorized under this Compact, as amended. The Government of the United States shall pay any reasonable costs for extraordinary services executed by the Government of the Federated States of Micronesia in carrying out the provisions of this section.

Article IV

Trade

Section 241

The Federated States of Micronesia is not included in the customs territory of the United States.

Section 242

The President shall proclaim the following tariff treatment for articles imported from the Federated States of Micronesia which shall apply during the period of effectiveness of this title:

(a) Unless otherwise excluded, articles imported from the Federated States of Micronesia, subject to the limitations imposed under section 503(b) of title V of the Trade Act of 1974 (19 U.S.C. 2463(b)), shall be exempt from duty.

(b) Only tuna in airtight containers provided for in heading 1604.14.22 of the Harmonized Tariff Schedule of the United States that is imported from the Federated States of Micronesia and the Republic of the Marshall Islands during any calendar year not to exceed 10 percent of apparent United States consumption of tuna in airtight containers during the immediately preceding calendar year, as reported by the National Marine Fisheries Service, shall be exempt from duty; but the quantity of tuna given duty-free treatment under this paragraph for any calendar year shall be counted against the aggregated quantity of tuna in airtight containers that is dutiable under rate column numbered 1 of such heading 1604.14.22 for that calendar year.

(c) The duty-free treatment provided under subsection (a) shall not apply to—

(1) watches, clocks, and timing apparatus provided for in Chapter 91, excluding heading 9113, of the Harmonized Tariff Schedule of the United States;

(2) buttons (whether finished or not finished) provided for in items 9606.21.40 and 9606.29.20 of such Schedule;

(3) textile and apparel articles which are subject to textile agreements; and

(4) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel which were not eligible articles for purposes of title V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.) on April 1, 1984.

(d) If the cost or value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of the Federated States of Micronesia, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied for duty assessment purposes toward determining the percentage referred to in section 503(a)(2) of title V of the Trade Act of 1974.

Section 243

Articles imported from the Federated States of Micronesia which are not exempt from duty under subsections (a), (b), (c), and (d) of section 242 shall be subject to the rates of duty set forth in column numbered 1-general of the Harmonized Tariff Schedule of the United States (HTSUS).

Section 244

(a) All products of the United States imported into the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

(b) The provisions of subsection (a) shall not apply to advantages accorded by the Federated States of Micronesia by virtue of their full membership in the Pacific Island Countries Trade Agreement (PICTA), done on August 18, 2001, to those governments listed in Article 26 of PICTA, as of the date the Compact, as amended, is signed.

(c) Prior to entering into consultations on, or concluding, a free trade agreement with governments not listed in Article 26 of PICTA, the Federated States of Micronesia shall consult with the United States regarding whether or how subsection (a) of section 244 shall be applied.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Federated States of Micronesia. Should the Government of the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as the Government of the Federated States of Micronesia deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Federated States of Micronesia, domiciled therein, shall be exempt from estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States, provided that such citizen of the Federated States of Micronesia is neither a citizen nor a resident of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Federated States of Micronesia, the Government of the Federated

States of Micronesia shall have authority to impose tax upon income derived by a resident of the Federated States of Micronesia from sources without the Federated States of Micronesia, in the same manner and to the same extent as the Government of the Federated States of Micronesia imposes tax upon income derived from within its own jurisdiction. If the Government of the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. However, the relief from liability to the United States Government referred to in the preceding sentence means only relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and relief in the form of the exclusion under section 911 of the Internal Revenue Code of 1986. For purposes of this section, the term ''resident of the Federated States of Micronesia'' shall be deemed to include any person who was physically present in the Federated States of Micronesia for a period of 183 or more days during any taxable year.

(b) If the Government of the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in section 254(a).

Section 255

For purposes of section 274(h)(3)(A) of the United States Internal Revenue Code of 1986, the term ''North American Area'' shall include the Federated States of Micronesia.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Federated States of Micronesia and its people from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Federated States of Micronesia, subject to the terms of the separate agreements referred to in sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Government of the Federated States of Micronesia shall refrain from actions that the Government of the United States determines, after appropriate consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Federated States of Micronesia.

(b) The consultations referred to in this section shall be conducted expeditiously at senior levels of the two Governments, and the subsequent determination by the Government of the United States referred to in this section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or overflight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Federated States of Micronesia or the Republic of the Marshall Islands, the Government of the United States shall not store in the Federated States of Micronesia or the Republic of the Marshall Islands any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by section 314(b).

(d) No material or substance referred to in this section shall be stored in the Federated States of Micronesia except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in section 161(e) shall have no effect on the obligations of the Government of the United States under this section or on the application of this subsection.

(f) The provisions of this section shall apply in the areas in which the Government of the Federated States of Micronesia exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Federated States of Micronesia, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval of the Government of the Federated States of Micronesia.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Federated States of Micronesia are set forth in separate agreements, which shall remain in effect in accordance with the terms of such agreements.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Federated States of Micronesia in addition to those for which specific arrangements are concluded pursuant to section 321(a), it may request the Government of the Federated States of Micronesia to satisfy those requirements through leases or other arrangements. The Government of the Federated States of Micronesia shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Federated States of Micronesia. In making any requests pursuant to section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Federated States of Micronesia at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Federated States of Micronesia are set forth in separate agreements, which shall remain in effect in accordance with the terms of such agreements.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact, as amended, and its related agreements, the Government of the United States, exclusively, has assumed and enjoys, as to the Federated States of Micronesia, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of November 2, 1986.

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Federated States of Micronesia. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Federated States of Micronesia.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 (with the exception of any person described in section 141(a)(5) who is not a citizen of the Federated States of Micronesia) shall

be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States as long as such person has resided in the United States for a period of less than one year, provided that no time shall count towards this one year while a person admitted to the United States under the Compact, or the Compact, as amended, is engaged in full-time study in the United States. Any person described in section 141(a)(5) who is not a citizen of the Federated States of Micronesia shall be subject to United States laws relating to selective service.

Section 342

The Government of the United States shall have enrolled, at any one time, at least one qualified student from the Federated States of Micronesia, as may be nominated by the Government of the Federated States of Micronesia, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195.

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to section 342(b) of this Compact, as amended.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Federated States of Micronesia shall continue to maintain a Joint Committee empowered to consider disputes arising under the implementation of this Title and its related agreements.

(b) The membership of the Joint Committee shall comprise selected senior officials of the two Governments. The senior United States military commander in the Pacific area shall be the senior United States member of the Joint Committee. For the meetings of the Joint Committee, each of the two Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, the Joint Committee shall meet annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. The Joint Committee also shall meet promptly upon request of either of its members. The Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree. Upon notification by the Government of the United States, the Joint Committee of the United States and the Federated States of Micronesia shall meet promptly in a combined session with the Joint Committee established and maintained by the Government of the United States and the Republic of the Marshall Islands to consider matters within the jurisdiction of the two Joint Committees.

(d) Unresolved issues in the Joint Committee shall be referred to the Governments for resolution, and the Government of the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Government of the Federated States of Micronesia under Titles One, Two and Four and to the responsibility of the Government of the Federated States of Micronesia to assure the well-being of its people.

Section 353

(a) The Government of the United States shall not include the Government of the Federated States of Micronesia as a named party to a formal declaration of war, without that Government's consent.

(b) Absent such consent, this Compact, as amended, is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Federated States of Micronesia, which arise out of armed conflict subsequent to November 3, 1986, and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) The Government of the United States and the Government of the Federated States of Micronesia are jointly committed to continue their security and defense relations, as set forth in this Title. Accordingly, it is the intention of the two countries that the provisions of this Title shall remain binding as long as this Compact, as amended, remains in effect, and thereafter as mutually agreed, unless earlier terminated by mutual agreement pursuant to section 441, or amended pursuant to Article III of Title Four. If at any time the Government of the United States, or the Government of the Federated States of Micronesia, acting unilaterally, terminates this Title, such unilateral termination shall be considered to be termination of the entire Compact, in which case the provisions of section 442 and 452 (in the case of termination by the Government of the United States) or sections 443 and 453 (in the case of termination by the Government of the Federated States of Micronesia), with the exception of paragraph (3) of subsection (a) of section 452 or paragraph (3) of subsection (a) of section 453, as the case may be, shall apply.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Government of the Federated States of Micronesia, and in view of the existence of the separate agreement regarding mutual security concluded with the Government of the Federated States of Micronesia pursuant to sections 321 and 323, that, even if this Title should terminate, any attack on the Federated States of Micronesia during the period in which such separate agreement is in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Federated States of Micronesia in accordance with its constitutional processes.

(c) As reflected in Article 21(1)(b) of the Trust Fund Agreement, the Government of the United States and the Government of the Federated States of Micronesia further recognize, in view of the special relationship between their countries, that even if this Title should terminate, the Government of the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Federated States of Micronesia or the Republic of the Marshall Islands.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

Pursuant to section 432 of the Compact and subject to subsection (e) of section 461 of the Compact, as amended, the Compact, as amended, shall come into effect upon mutual agreement between the Government of the United States and the Government of the Federated States of Micronesia subsequent to completion of the following:

(a) Approval by the Government of the Federated States of Micronesia in accordance with its constitutional processes.

(b) Approval by the Government of the United States in accordance with its constitutional processes.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Federated States of Micronesia and that Government shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact, as amended, or of its related agreements.

Section 422

In the event the Government of the United States or the Government of the Federated States of Micronesia, after conferring pursuant to section 421, determines that there is a dispute and gives written notice thereof, the two Governments shall make a good faith effort to resolve the dispute between themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Federated States of Micronesia cannot be resolved within 90 days of written notification in the manner provided in section 422, either party to the dispute may refer it to arbitration in accordance with section 424.

Section 424

Should a dispute be referred to arbitration as provided for in section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments which is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this section within 30 days of referral of the dispute to arbitration pursuant to section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) Unless otherwise provided in this Compact, as amended, or its related agreements, the Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four, and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact, as amended. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the Government of the Federated States of Micronesia.

Article III

Amendment

Section 431

The provisions of this Compact, as amended, may be further amended by mutual agreement of the Government of the United States and the Government of the Federated States of Micronesia, in accordance with their respective constitutional processes.

Article IV

Termination

Section 441

This Compact, as amended, may be terminated by mutual agreement of the Government of the Federated States of Micronesia and the Government of the United States, in accordance with their respective constitutional processes. Such mutual termination of this Compact, as amended, shall be without prejudice to the continued application of section 451 of this Compact, as amended, and the provisions of the Compact, as amended, set forth therein.

Section 442

Subject to section 452, this Compact, as amended, may be terminated by the Government of the United States in accordance with its constitutional processes. Such termination shall be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended. Such termination of this Compact, as amended, shall be without prejudice to the continued application of section 452 of this Compact, as amended, and the provisions of the Compact, as amended, set forth therein.

Section 443

This Compact, as amended, shall be terminated by the Government of the Federated States of Micronesia, pursuant to its constitutional processes, subject to section 453 if the people represented by that Government vote in a plebiscite to terminate the Compact, as amended, or by another process permitted by the FSM constitution and mutually agreed between the Governments of the United States and the Federated States of Micronesia. The Government of the Federated States of Micronesia shall notify the Government of the United States of its intention to call such a plebiscite, or to pursue another mutually agreed and constitutional process, which plebiscite or process shall take place not earlier than three months after delivery of such notice. The plebiscite or other process shall be administered by the Government of the Federated States of Micronesia in accordance with its constitutional and legislative processes. If a majority of the valid ballots cast in the plebiscite or other process favors termination, the Government of the Federated States of Micronesia shall, upon certification of the results of the plebiscite or other process, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

(a) Should termination occur pursuant to section 441, economic and other assistance by the Government of the United States shall continue only if and as mutually agreed by the Governments of the United States and the Federated States of Micronesia, and in accordance with the parties' respective constitutional processes.

(b) In view of the special relationship of the United States and the Federated States of Micronesia, as reflected in subsections (b) and (c) of section 354 of this Compact, as amended, and the separate agreement entered into consistent with those subsections, if termination occurs pursuant to section 441 prior to the twentieth anniversary of the effective date of this Compact, as amended, the United States shall continue to make contributions to the Trust Fund described in section 215 of this Compact, as amended.

(c) In view of the special relationship of the United States and the Federated States of Micronesia described in subsection (b) of this section, if termination occurs pursuant to section 441 following the twentieth anniversary of the effective date of this Compact, as amended, the Federated States of Micronesia shall be entitled to receive proceeds from the Trust Fund described in section 215 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement governing the distribution of such proceeds.

Section 452

(a) Should termination occur pursuant to section 442 prior to the twentieth anniversary of the effective date of this Compact, as amended, the following provisions of this Compact, as amended, shall remain in full force and effect until the twentieth anniversary of the effective date of this Compact, as amended, and thereafter as mutually agreed:

(1) Article VI and sections 172, 173, 176 and 177 of Title One;

(2) Sections 232 and 234 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) Should termination occur pursuant to section 442 before the twentieth anniversary of the effective date of the Compact, as amended:

(1) Except as provided in paragraph (2) of this subsection and subsection (c) of this section, economic and other assistance by the United States shall continue only if and as mutually agreed by the Governments of the United States and the Federated States of Micronesia.

(2) In view of the special relationship of the United States and the Federated States of Micronesia, as reflected in subsections (b) and (c) of section 354 of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, the United States shall continue to make contributions to the Trust Fund described in section 215 of this Compact, as amended, in the manner described in the Trust Fund Agreement.

(c) In view of the special relationship of the United States and the Federated States of Micronesia, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, if termination occurs pursuant to section 442 following the twentieth anniversary of the effective date of this Compact, as amended, the Federated States of Micronesia shall continue to be eligible to receive proceeds from the Trust Fund described in section 215 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement.

Section 453

(a) Should termination occur pursuant to section 443 prior to the twentieth anniversary of the effective date of this Compact, as amended, the following provisions of this Compact, as amended, shall remain in full force and effect until the twentieth anniversary of the effective date of this Compact, as amended, and thereafter as mutually agreed:

(1) Article VI and sections 172, 173, 176 and 177 of Title One;

(2) Sections 232 and 234 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to section 443, the Government of the United States and the Government of the Federated States of Micronesia shall promptly consult with regard to their future relationship. Except as provided in subsection (c) and (d) of this section, these consultations shall determine the level of economic and other assistance, if any, which the Government of the United States shall provide to the Government of the Federated States of Micronesia for the period ending on the twentieth anniversary of the effective date of this Compact, as amended, and for any period thereafter, if mutually agreed.

(c) In view of the special relationship of the United States and the Federated States of Micronesia, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, if termination occurs pursuant to section 443 prior to the twentieth anniversary of the effective date of this Compact, as amended, the United States shall continue to make contributions to the Trust Fund described in section 215 of this Compact, as amended, in the manner described in the Trust Fund Agreement.

(d) In view of the special relationship of the United States and the Federated States of Micronesia, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, if termination occurs pursuant to section 443 following the twentieth anniversary of the effective date of this Compact, as amended, the Federated States of Micronesia shall continue to be eligible to receive proceeds from the Trust Fund described in section 215 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement.

Section 454

Notwithstanding any other provision of this Compact, as amended:

(a) The Government of the United States reaffirms its continuing interest in promoting the economic advancement and budgetary self-reliance of the people of the Federated States of Micronesia.

(b) The separate agreements referred to in Article II of Title Three shall remain in effect in accordance with their terms.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact, as amended, only, and without prejudice to the views of the Government of the United States or the Government of the Federated States of Micronesia as to the nature and extent of the jurisdiction of either of them under international law, the following terms shall have the following meanings:

(a) ''Trust Territory of the Pacific Islands'' means the area established in the Trusteeship Agreement consisting of the former administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, section 1, in force on January 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) ''Trusteeship Agreement'' means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) ''The Federated States of Micronesia'' and ''the Republic of the Marshall Islands'' are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) ''Compact'' means the Compact of Free Association Between the United States and the Federated States of Micronesia and the Marshall Islands, that was approved by the United States Congress in section 201 of Public Law 99–239 (Jan. 14, 1986) and went into effect with respect to the Federated States of Micronesia on November 3, 1986.

(e) ''Compact, as amended'' means the Compact of Free Association Between the United States and the Federated States of Micronesia, as amended. The effective date of the Compact, as amended, shall be on a date to be determined by the President of the United States, and agreed to by the Government of the Federated States of Micronesia, following formal approval of the Compact, as amended, in accordance with section 411 of this Compact, as amended.

(f) ''Government of the Federated States of Micronesia'' means the Government established and organized by the Constitution of the Federated States of Micronesia including all the political subdivisions and entities comprising that Government.

(g) ''Government of the Republic of the Marshall Islands'' means the Government established and organized by the Constitution of the Republic of the Marshall Islands including all the political subdivisions and entities comprising that Government.

(h) The following terms shall be defined consistent with the 1998 Edition of the Radio Regulations of the International Telecommunications Union as follows:

(1) ''Radiocommunication'' means telecommunication by means of radio waves.

(2) ''Station'' means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radiocommunication service, or the radio astronomy service.

(3) ''Broadcasting Service'' means a radiocommunication service in which the transmissions are intended for direct reception by the general public. This service may include sound transmissions, television transmissions or other types of transmission.

(4) ''Broadcasting Station'' means a station in the broadcasting service.

(5) ''Assignment (of a radio frequency or radio frequency channel)'' means an authorization given by an administration for a radio station to use a radio frequency or radio frequency channel under specified conditions.

(6) ''Telecommunication'' means any transmission, emission or reception of signs, signals, writings, images and sounds or intelligence of any nature by wire, radio, optical or other electromagnetic systems.

(i) ''Military Areas and Facilities'' means those areas and facilities in the Federated States of Micronesia reserved or acquired by the Government of the Federated States of Micronesia for use by the Government of the United States, as set forth in the separate agreements referred to in section 321.

(j) ''Tariff Schedules of the United States'' means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(k) ''Vienna Convention on Diplomatic Relations'' means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

(a) The Government of the United States and the Government of the Federated States of Micronesia previously have concluded agreements pursuant to the Compact, which shall remain in effect and shall survive in accordance with their terms, as follows:

(1) Agreement Concluded Pursuant to Section 234 of the Compact;

(2) Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association; and

(3) Agreement between the Government of the United States of America and the Federated States of Micronesia Regarding Aspects of the Marine Sovereignty and Jurisdiction of the Federated States of Micronesia.

(b) The Government of the United States and the Government of the Federated States of Micronesia shall conclude prior to the date of submission of this Compact, as amended, to the legislatures of the two countries, the following related agreements which shall come into effect on the effective date of this Compact, as amended, and shall survive in accordance with their terms, as follows:

(1) Federal Programs and Services Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia Concluded Pursuant to Article III of Title One, Article II of Title Two (including Section 222), and Section 231 of the Compact of Free Association, as amended which includes:

(i) Postal Services and Related Programs;

(ii) Weather Services and Related Programs;

(iii) Civil Aviation Safety Service and Related Programs;

(iv) Civil Aviation Economic Services and Related Programs;

(v) United States Disaster Preparedness and Response Services and Related Programs;

(vi) Federal Deposit Insurance Corporation Services and Related Programs; and

(vii) Telecommunications Services and Related Programs.

(2) Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175(a) of the Compact of Free Association, as amended;

(3) Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia on Labor Recruitment Concluded Pursuant to Section 175(b) of the Compact of Free Association, as amended;

(4) Agreement Concerning Procedures for the Implementation of United States Economic Assistance Provided in the Compact of Free Association, as Amended, of Free Association Between the Government of the United States of America and Government of the Federated States of Micronesia;

(5) Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia Implementing Section 215 and Section 216 of the Compact, as Amended, Regarding a Trust Fund;

(6) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Federated States of Micronesia Concluded Pursuant to Sections 211(b), 321 and 323 of the Compact of Free Association, as Amended; and the

(7) Status of Forces Agreement Between the Government of the United States of America and the Government of the Federated States of Micronesia Concluded Pursuant to Section 323 of the Compact of Free Association, as Amended.

Section 463

(a) Except as set forth in subsection (b) of this section, any reference in this Compact, as amended, to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as amended, as such provision was in force on the effective date of this Compact, as amended.

(b) Any reference in Articles IV and Article VI of Title One and Sections 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act, the Administrative Procedure Act or the Immigration and Nationality Act constitutes the incorporation of the language of such provision into this Compact, as amended, as such provision was in force on the effective date of this Compact, as amended, or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

Both the Government of the United States and the Government of the Federated States of Micronesia shall take all necessary steps, of a general or particular character, to ensure, no later than the entry into force date of this Compact, as amended, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact, as amended, or in the case of subsection (d) of section 141, as soon as reasonably possible thereafter.

Section 472

This Compact, as amended, may be accepted, by signature or otherwise, by the Government of the United States and the Government of the Federated States of Micronesia.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association, as amended, which shall enter into force upon the exchange of diplomatic notes by which the Government of the United States of America and the Government of the Federated States of Micronesia inform each other about the fulfillment of their respective requirements for entry into force.

DONE at Pohnpei, Federated States of Micronesia, in duplicate, this fourteenth (14) day of May, 2003, each text being equally authentic.

Signed (May 14, 2003) For the Government of the United States of America:	***Signed (May 14, 2003) For the Government of the Federated States of Micronesia:***

(b) COMPACT OF FREE ASSOCIATION, AS AMENDED, BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF THE MARSHALL ISLANDS.—*The Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Republic of the Marshall Islands is as follows:*

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF THE MARSHALL ISLANDS

Affirming that their Governments and their relationship as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the people of the Republic of the Marshall Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the Republic of the Marshall Islands in creating and maintaining their close and mutually beneficial relationship through the free and voluntary association of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and budgetary self-reliance of the Republic of the Marshall Islands; and

Recognizing that their relationship until the entry into force on October 21, 1986 of the Compact was based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the people of the Republic of the Marshall Islands have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they, through their freely-expressed wishes, have adopted a Constitution appropriate to their particular circumstances; and

Recognizing that the Compact reflected their common desire to terminate the Trusteeship and establish a government-to-government relationship which was in accordance with the new political status based on the freely expressed wishes of the people of the Republic of the Marshall Islands and appropriate to their particular circumstances; and

Recognizing that the people of the Republic of the Marshall Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitution and form of government and that the approval of the entry of the Government of the Republic of the Marshall Islands into the Compact by the people of the Republic of the Marshall Islands constituted an exercise of their sovereign right to self-determination; and

Recognizing the common desire of the people of the United States and the people of the Republic of the Marshall Islands to maintain their close government-to-government relationship, the United States and the Republic of the Marshall Islands:

NOW, THEREFORE, MUTUALLY AGREE to continue and strengthen their relationship of free association by amending the Compact, which continues to provide a full measure of self-government for the people of the Republic of the Marshall Islands; and

FURTHER AGREE that the relationship of free association derives from and is as set forth in this Compact, as amended, by the Governments of the United States and the Republic of the Marshall Islands; and that, during such relationship of free association, the respective rights and responsibilities of the Government of the United States and the Government of the Republic of the Marshall Islands in regard to this relationship of free association derive from and are as set forth in this Compact, as amended.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The people of the Republic of the Marshall Islands, acting through the Government established under their Constitution, are self-governing.

Article II

Foreign Affairs

Section 121

(a) The Government of the Republic of the Marshall Islands has the capacity to conduct foreign affairs and shall do so in its own name and right, except as otherwise provided in this Compact, as amended.

(b) The foreign affairs capacity of the Government of the Republic of the Marshall Islands includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of its commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting its individual citizens.

(c) The Government of the United States recognizes that the Government of the Republic of the Marshall Islands has the capacity to enter into, in its own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of its foreign affairs, the Government of the Republic of the Marshall Islands confirms that it shall act in accordance with principles of international law and shall settle its international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Government of the Republic of the Marshall Islands for membership or other participation in regional or international organizations as may be mutually agreed.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Government of the Republic of the Marshall Islands shall consult, in the conduct of its foreign affairs, with the Government of the United States.

(b) In recognition of the foreign affairs capacity of the Government of the Republic of the Marshall Islands, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Republic of the Marshall Islands on matters that the Government of the United States regards as relating to or affecting the Government of the Republic of the Marshall Islands.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Republic of the Marshall Islands in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Republic of the Marshall Islands undertaken with the assistance or through the agency of the Government of the United States pursuant to this section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Republic of the Marshall Islands in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Republic of the Marshall Islands and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Republic of the Marshall Islands for travel outside the Republic of the Marshall Islands, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact, as amended, or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on October 20, 1986, are, as of that date, no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Government of the Republic of the Marshall Islands has full authority and responsibility to regulate its domestic and foreign communications, and the Government of the United States shall provide communications assistance as mutually agreed.

(b) The Government of the Republic of the Marshall Islands has elected to undertake all functions previously performed by the Government of the United States with respect to domestic and foreign communications, except for those functions set forth in a separate agreement entered into pursuant to this section of the Compact, as amended.

Section 132

The Government of the Republic of the Marshall Islands shall permit the Government of the United States to operate telecommunications services in the Republic of the Marshall Islands to the extent necessary to fulfill the obligations of the Government of the United States under this Compact, as amended, in accordance with the terms of separate agreements entered into pursuant to this section of the Compact, as amended.

Article IV

Immigration

Section 141

(a) In furtherance of the special and unique relationship that exists between the United States and the Republic of the Marshall Islands, under the Compact, as amended, any person in the following categories may be admitted to lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions (the ''United States'') without regard to paragraphs (5) or (7)(B)(i)(II) of section 212(a) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1182(a)(5) or (7)(B)(i)(II):

(1) a person who, on October 21, 1986, was a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on January 1, 1979, and has become and remains a citizen of the Republic of the Marshall Islands;

(2) a person who acquires the citizenship of the Republic of the Marshall Islands at birth, on or after the effective date of the Constitution of the Republic of the Marshall Islands;

(3) an immediate relative of a person referred to in paragraphs (1) or (2) of this section, provided that such immediate relative is a naturalized citizen of the Republic of the Marshall Islands who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence, and further provided, that, in the case of a spouse, such spouse has been married to the person referred to in paragraph (1) or

(2) of this section for at least five years, and further provided, that the Government of the United States is satisfied that such naturalized citizen meets the requirement of subsection (b) of section 104 of Public Law 99–239 as it was in effect on the day prior to the effective date of this Compact, as amended;

(4) a naturalized citizen of the Republic of the Marshall Islands who was an actual resident there for not less than five years after attaining such naturalization and who satisfied these requirements as of April 30, 2003, who continues to be an actual resident and holds a certificate of actual residence, and whose name is included in a list furnished by the Government of the Republic of the Marshall Islands to the Government of the United States no later than the effective date of the Compact, as amended, in form and content acceptable to the Government of the United States, provided, that the Government of the United States is satisfied that such naturalized citizen meets the requirement of subsection (b) of section 104 of Public Law 99–239 as it was in effect on the day prior to the effective date of this Compact, as amended; or

(5) an immediate relative of a citizen of the Republic of the Marshall Islands, regardless of the immediate relative's country of citizenship or period of residence in the Republic of the Marshall Islands, if the citizen of the Republic of the Marshall Islands is serving on active duty in any branch of the United States Armed Forces, or in the active reserves.

(b) Notwithstanding subsection (a) of this section, a person who is coming to the United States pursuant to an adoption outside the United States, or for the purpose of adoption in the United States, is ineligible for admission under the Compact and the Compact, as amended. This subsection shall apply to any person who is or was an applicant for admission to the United States on or after March 1, 2003, including any applicant for admission in removal proceedings (including appellate proceedings) on or after March 1, 2003, regardless of the date such proceedings were commenced. This subsection shall have no effect on the ability of the Government of the United States or any United States State or local government to commence or otherwise take any action against any person or entity who has violated any law relating to the adoption of any person.

(c) Notwithstanding subsection (a) of this section, no person who has been or is granted citizenship in the Republic of the Marshall Islands, or has been or is issued a Republic of the Marshall Islands passport pursuant to any investment, passport sale, or similar program has been or shall be eligible for admission to the United States under the Compact or the Compact, as amended.

(d) A person admitted to the United States under the Compact, or the Compact, as amended, shall be considered to have the permission of the Government of the United States to accept employment in the United States. An unexpired Republic of the Marshall Islands passport with unexpired documentation issued by the Government of the United States evidencing admission under the Compact or the Compact, as amended, shall be considered to be documentation establishing identity and employment authorization under section 274A(b)(1)(B) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1324a(b)(1)(B). The Government of the United States will take reasonable and appropriate steps to implement and publicize this provision, and the Government of the Republic of the Marshall Islands will also take reasonable and appropriate steps to publicize this provision.

(e) For purposes of the Compact and the Compact, as amended:

(1) the term ''residence'' with respect to a person means the person's principal, actual dwelling place in fact, without regard to intent, as provided in section 101(a)(33) of the Immigration and Nationality Act, as amended, 8 U.S.C. 1101(a)(33), and variations of the term ''residence,'' including ''resident'' and ''reside,'' shall be similarly construed;

(2) the term ''actual residence'' means physical presence in the Republic of the Marshall Islands during eighty-five percent of the five-year period of residency required by section 141(a)(3) and (4);

(3) the term ''certificate of actual residence'' means a certificate issued to a naturalized citizen by the Government of the Republic of the Marshall Islands stating that the citizen has complied with the actual residence requirement of section 141(a)(3) or (4);

(4) the term ''nonimmigrant'' means an alien who is not an ''immigrant'' as defined in section 101(a)(15) of such Act, 8 U.S.C. 1101(a)(15); and

(5) the term ''immediate relative'' means a spouse, or unmarried son or unmarried daughter less than 21 years of age.

(f) The Immigration and Nationality Act, as amended, shall apply to any person admitted or seeking admission to the United States (other than a United States possession or territory where such Act does not apply) under the Compact or the Compact, as amended, and nothing in the Compact or the Compact, as amended, shall be construed to limit, preclude, or modify the applicability of, with respect to such person:

(1) any ground of inadmissibility or deportability under such Act (except sections 212(a)(5) and 212(a)(7)(B)(i)(II) of such Act, as provided in subsection (a) of this section), and any defense thereto, provided that, section 237(a)(5) of such Act shall be construed and applied as if it reads as follows: ''any alien who has been admitted under the Compact, or the Compact, as amended, who cannot show that he or she has sufficient means of support in the United States, is deportable;''

(2) the authority of the Government of the United States under section 214(a)(1) of such Act to provide that admission as a nonimmigrant shall be for such time and under such conditions as the Government of the United States may by regulations prescribe;

(3) except for the treatment of certain documentation for purposes of section 274A(b)(1)(B) of such Act as provided by subsection (d) of this section of the Compact, as amended, any requirement under section 274A, including but not limited to section 274A(b)(1)(E);

(4) section 643 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104–208, and actions taken pursuant to section 643; and

(5) the authority of the Government of the United States otherwise to administer and enforce the Immigration and Nationality Act, as amended, or other United States law.

(g) Any authority possessed by the Government of the United States under this section of the Compact or the Compact, as amended, may also be exercised by the Government of a territory or possession of the United States where the Immigration and Nationality Act, as amended, does not apply, to the extent such exercise of authority is lawful under a statute or regulation of such territory or possession that is authorized by the laws of the United States.

(h) Subsection (a) of this section does not confer on a citizen of the Republic of the Marshall Islands the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, as amended, or to petition for benefits for alien relatives under that Act. Subsection (a) of this section, however, shall not prevent a citizen of the Republic of the Marshall Islands from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may be admitted to lawfully engage in occupations, and reside in the Republic of the Marshall Islands, subject to the rights of the Government of the Republic of the Marshall Islands to deny entry to or deport any such citizen or national as an undesirable alien. Any determination of inadmissibility or deportability shall be based on reasonable statutory grounds and shall be subject to appropriate administrative and judicial review within the Republic of the Marshall Islands. If a citizen or national of the United States is a spouse of a citizen of the Republic of the Marshall Islands, the Government of the Republic of the Marshall Islands shall allow the United States citizen spouse to establish residence. Should the Republic of the Marshall Islands citizen spouse predecease the United States citizen spouse during the marriage, the Government of the Republic of the Marshall Islands shall allow the United States citizen spouse to continue to reside in the Republic of the Marshall Islands.

(b) In enacting any laws or imposing any requirements with respect to citizens and nationals of the United States entering the Republic of the Marshall Islands under subsection (a) of this section, including any grounds of inadmissibility or deportability, the Government of the Republic of the Marshall Islands shall accord to such citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries.

(c) Consistent with subsection (a) of this section, with respect to citizens and nationals of the United States seeking to engage in employment or invest in the Republic of the Marshall Islands, the Government of the Republic of the Marshall Islands shall adopt immigration-related procedures no less favorable than those adopted by the Government of the United States with respect to citizens of the Republic of the Marshall Islands seeking employment in the United States.

Section 143

Any person who relinquishes, or otherwise loses, his United States nationality or citizenship, or his Republic of the Marshall Islands citizenship, shall be ineligible to receive the privileges set forth in sections 141 and 142. Any such person may apply for admission to the United States or the Republic of the Marshall Islands, as the case may be, in accordance with any other applicable laws of the United States or the Republic of the Marshall Islands relating to immigration of aliens from other countries. The laws of the Republic of the Marshall Islands or the United States, as the case may be, shall dictate the terms and conditions of any such person's stay.

Article V

Representation

Section 151

Relations between the Government of the United States and the Government of the Republic of the Marshall Islands shall be conducted in accordance with the Vienna Convention on Diplomatic Relations. In addition to diplomatic missions and representation, the Governments may establish and maintain other offices and designate other representatives on terms and in locations as may be mutually agreed.

Section 152

(a) Any citizen or national of the United States who, without authority of the United States, acts as the agent of the Government of the Republic of the Marshall Islands with regard to matters specified in the provisions of the Foreign Agents Registration Act of 1938, as amended (22 U.S.C. 611 et seq.), that apply with respect to an agent of a foreign principal shall

be subject to the requirements of such Act. Failure to comply with such requirements shall subject such citizen or national to the same penalties and provisions of law as apply in the case of the failure of such an agent of a foreign principal to comply with such requirements. For purposes of the Foreign Agents Registration Act of 1938, the Republic of the Marshall Islands shall be considered to be a foreign country.

(b) Subsection (a) of this section shall not apply to a citizen or national of the United States employed by the Government of the Republic of the Marshall Islands with respect to whom the Government of the Republic of the Marshall Islands from time to time certifies to the Government of the United States that such citizen or national is an employee of the Republic of the Marshall Islands whose principal duties are other than those matters specified in the Foreign Agents Registration Act of 1938, as amended, that apply with respect to an agent of a foreign principal. The agency or officer of the United States receiving such certifications shall cause them to be filed with the Attorney General, who shall maintain a publicly available list of the persons so certified.

Article VI

Environmental Protection

Section 161

The Governments of the United States and the Republic of the Marshall Islands declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Republic of the Marshall Islands. In order to carry out this policy, the Government of the United States and the Government of the Republic of the Marshall Islands agree to the following mutual and reciprocal undertakings:

(a) The Government of the United States:

(1) shall, for its activities controlled by the U.S. Army at Kwajalein Atoll and in the Mid-Atoll Corridor and for U.S. Army Kwajalein Atoll activities in the Republic of the Marshall Islands, continue to apply the Environmental Standards and Procedures for United States Army Kwajalein Atoll Activities in the Republic of the Marshall Islands, unless and until those Standards or Procedures are modified by mutual agreement of the Governments of the United States and the Republic of the Marshall Islands;

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 et seq., to its activities under the Compact, as amended, and its related agreements as if the Republic of the Marshall Islands were the United States;

(3) in the conduct of any activity not described in section 161(a)(1) requiring the preparation of an Environmental Impact Statement under section 161(a)(2), shall comply with standards substantively similar to those required by the following laws of the United States, taking into account the particular environment of the Republic of the Marshall Islands; the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 et seq.; the Clean Air Act, as amended, 42 U.S.C. 7401 et seq.; the Clean Water Act (Federal Water Pollution Control Act), as amended, 33 U.S.C. 1251 et seq.; Title I of the Marine Protection, Research and Sanctuaries Act of 1972 (the Ocean Dumping Act), 33 U.S.C. 1411 et seq.; the Toxic Substances Control Act, as amended, 15 U.S.C. 2601 et seq.; the Solid Waste Disposal Act, as amended, 42 U.S.C. 6901 et seq.; and such other environmental protection laws of the United States and the Republic of the Marshall Islands as may be agreed from time to time with the Government of the Republic of the Marshall Islands;

(4) shall, prior to conducting any activity not described in section 161(a)(1) requiring the preparation of an Environmental Impact Statement under section 161(a)(2), develop, as agreed with the Government of the Republic of the Marshall Islands, written environmental standards and procedures to implement the substantive provisions of the laws made applicable to U.S. Government activities in the Republic of the Marshall Islands, pursuant to section 161(a)(3).

(b) The Government of the Republic of the Marshall Islands shall continue to develop and implement standards and procedures to protect its environment. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Republic of the Marshall Islands, taking into account its particular environment, shall continue to develop and implement standards for environmental protection substantively similar to those required of the Government of the United States by section 161(a)(3) prior to its conducting activities in the Republic of the Marshall Islands, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Republic of the Marshall Islands.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major Federal actions significantly affecting the quality of the human environment, the regulatory regime established under sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact, as amended, and its related agreements from any environmental standard or procedure which may be applicable under sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact, as amended, and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the Government of the Republic of the Marshall Islands shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the Government of the Republic of the Marshall Islands.

(f) The laws of the United States referred to in section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact, as amended, and its related agreements only to the extent provided for in this section.

Section 162

The Government of the Republic of the Marshall Islands may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to section 161(a) for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this section.

(b) Actions brought pursuant to this section may be initiated only by the Government of the Republic of the Marshall Islands.

(c) Administrative agency actions arising under section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706.

(d) The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the United States District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States.

(e) The judicial remedy provided for in this section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under section 172(b), which relate to the activities of the Government of the United States and its officers and employees governed by section 161.

(f) In actions pursuant to this section, the Government of the Republic of the Marshall Islands shall be treated as if it were a United States citizen.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Government of the Republic of the Marshall Islands shall be granted access to facilities operated by the Government of the United States in the Republic of the Marshall Islands, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Republic of the Marshall Islands for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Republic of the Marshall Islands under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided the Government of the Republic of the Marshall Islands under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Government of the Republic of the Marshall Islands shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact, as amended, or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceased with respect to the Marshall Islands on October 21, 1986, the date the Compact went into effect.

Section 172

(a) Every citizen of the Republic of the Marshall Islands who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Government of the Republic of the Marshall Islands and every citizen of the Republic of the Marshall Islands shall be considered to be a ''person'' within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701–706, except that only the Government of the Republic of the Marshall Islands may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by sections 161 and 162.

Section 173

The Governments of the United States and the Republic of the Marshall Islands agree to adopt and enforce such measures, consistent with this Compact, as amended, and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Republic of the Marshall Islands pursuant to this Compact, as amended, and its related agreements and by the Government of the Republic of the Marshall Islands in the United States pursuant to this Compact, Compact, as amended, and its related agreements.

Section 174

Except as otherwise provided in this Compact, as amended, and its related agreements:

(a) The Government of the Republic of the Marshall Islands, and its agencies and officials, shall be immune from the jurisdiction of the court of the United States, and the Government of the United States, and its agencies and officials, shall be immune from the jurisdiction of the courts of the Republic of the Marshall Islands.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to October 21, 1986;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of October 21, 1986; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of the Compact shall be adjudicated in the same manner as a claim adjudicated according to section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor courts, which shall have jurisdiction therefore, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Government of the Republic of the Marshall Islands shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Republic of the Marshall Islands in any civil case in which an exception to foreign state immunity is set forth in the Foreign Sovereign Immunities Act (28 U.S.C. 1602 et seq.) or its successor statutes.

Section 175

(a) A separate agreement, which shall come into effect simultaneously with this Compact, as amended, and shall have the force of law, shall govern mutual assistance and cooperation in law enforcement matters, including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners, as well as other law enforcement matters. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186, and 3188–95, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100–15, shall be applicable to the transfer of prisoners under the separate agreement; and

(b) A separate agreement, which shall come into effect simultaneously with this Compact, as amended, and shall have the force of law, shall govern requirements relating to labor recruitment practices, including registration, reporting, suspension or revocation of authorization to recruit persons for employment in the United States, and enforcement for violations of such requirements.

Section 176

The Government of the Republic of the Marshall Islands confirms that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Republic of the Marshall Islands to grant relief from judgments in appropriate cases.

Section 177

Section 177 of the Compact entered into force with respect to the Marshall Islands on October 21, 1986 as follows:

''(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia, (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia, resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

''(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

''(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.''

The Compact, as amended, makes no changes to, and has no effect upon, Section 177 of the Compact, nor does the Compact, as amended, change or affect the separate agreement referred to in Section 177 of the Compact including Articles IX and X of that separate agreement, and measures taken by the parties thereunder.

Section 178

(a) The Federal agencies of the Government of the United States that provide services and related programs in the Republic of the Marshall Islands pursuant to Title Two are authorized to settle and pay tort claims arising in the Republic of the Marshall Islands from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under section 178(a) that cannot be settled under section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Republic of the Marshall Islands shall, in the separate agreement referred to in section 231, provide for:

(1) the administrative settlement of claims referred to in section 178(a), including designation of local agents in each State of the Republic of the Marshall Islands; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to section 178(a).

(d) The provisions of section 174(d) shall not apply to claims covered by this section.

(e) Except as otherwise explicitly provided by law of the United States, this Compact, as amended, or its related agreements, neither the Government of the United States, its instrumentalities, nor any person acting on behalf of the Government of the United States, shall be named a party in any action based on, or arising out of, the activity or activities of a recipient of any grant or other assistance provided by the Government of the United States (or the activity or activities of the recipient's agency or any other person or entity acting on behalf of the recipient).

Section 179

(a) The courts of the Republic of the Marshall Islands shall not exercise criminal jurisdiction over the Government of the United States, or its instrumentalities.

(b) The courts of the Republic of the Marshall Islands shall not exercise criminal jurisdiction over any person if the Government of the United States provides notification to the Government of the Republic of the Marshall Islands that such person was acting on behalf of the Government of the United States, for actions taken in furtherance of section 221 or 224 of this amended

Compact, or any other provision of law authorizing financial, program, or service assistance to the Republic of the Marshall Islands.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211 - Annual Grant Assistance

(a) In order to assist the Government of the Republic of the Marshall Islands in its efforts to promote the economic advancement and budgetary self-reliance of its people, and in recognition of the special relationship that exists between the Republic of the Marshall Islands and the United States, the Government of the United States shall provide assistance on a grant basis for a period of twenty years in the amounts set forth in section 217, commencing on the effective date of this Compact, as amended. Such grants shall be used for assistance in education, health care, the environment, public sector capacity building, and private sector development, or for other areas as mutually agreed, with priorities in the education and health care sectors. Consistent with the medium-term budget and investment framework described in subsection (f) of this section, the proposed division of this amount among the identified areas shall require the concurrence of both the Government of the United States and the Government of the Republic of the Marshall Islands, through the Joint Economic Management and Financial Accountability Committee described in section 214. The Government of the United States shall disburse the grant assistance and monitor the use of such grant assistance in accordance with the provisions of this Article and an Agreement Concerning Procedures for the Implementation of United States Economic Assistance Provided in the Compact, as Amended, of Free Association Between the Government of the United States of America and the Government of the Republic of the Marshall Islands (''Fiscal Procedures Agreement'') which shall come into effect simultaneously with this Compact, as amended.

(1) EDUCATION.—United States grant assistance shall be made available in accordance with the strategic framework described in subsection (f) of this section to support and improve the educational system of the Republic of the Marshall Islands and develop the human, financial, and material resources necessary for the Republic of the Marshall Islands to perform these services. Emphasis should be placed on advancing a quality basic education system.

(2) HEALTH.—United States grant assistance shall be made available in accordance with the strategic framework described in subsection (f) of this section to support and improve the delivery of preventive, curative and environmental care and develop the human, financial, and material resources necessary for the Republic of the Marshall Islands to perform these services.

(3) PRIVATE SECTOR DEVELOPMENT.—United States grant assistance shall be made available in accordance with the strategic framework described in subsection (f) of this section to support the efforts of the Republic of the Marshall Islands to attract foreign investment and increase indigenous business activity by vitalizing the commercial environment, ensuring fair and equitable application of the law, promoting adherence to core labor standards, maintaining progress toward privatization of state-owned and partially state-owned enterprises, and engaging in other reforms.

(4) CAPACITY BUILDING IN THE PUBLIC SECTOR.—United States grant assistance shall be made available in accordance with the strategic framework described in subsection (f) of this section to support the efforts of the Republic of the Marshall Islands to build effective, accountable and transparent national and local government and other public sector institutions and systems.

(5) ENVIRONMENT.—United States grant assistance shall be made available in accordance with the strategic framework described in subsection (f) of this section to increase environmental protection; establish and manage conservation areas; engage in environmental infrastructure planning, design construction and operation; and to involve the citizens of the Republic of the Marshall Islands in the process of conserving their country's natural resources.

(b) KWAJALEIN ATOLL.—

(1) Of the total grant assistance made available under subsection (a) of this section, the amount specified herein shall be allocated annually from fiscal year 2004 through fiscal year 2023 (and thereafter in accordance with the Agreement between the Government of the United States and the Government of the Republic of the Marshall Islands Regarding Military Use and Operating Rights) to advance the objectives and specific priorities set forth in subsections (a) and (d) of this section and the Fiscal Procedures Agreement, to address the special needs of the community at Ebeye, Kwajalein Atoll and other Marshallese communities within Kwajalein Atoll. This United States grant assistance shall be made available, in accordance with the medium-term budget and investment framework described in subsection (f) of this section, to support and improve the infrastructure and delivery of services and develop the human and material resources necessary for the Republic of the Marshall Islands to carry out its responsibility to maintain such infrastructure and deliver such services. The amount of this assistance shall be $3,100,000, with an inflation adjustment as provided in section 218, from fiscal year 2004 through fiscal year 2013 and the fiscal year 2013 level of funding, with an inflation adjustment as provided in section 218, will be increased by $2 million for fiscal year 2014. The fiscal year 2014 level of funding, with an inflation adjustment as provided in section 218, will be made available from fiscal year 2015 through fiscal year 2023 (and thereafter as noted above).

(2) The Government of the United States shall also provide to the Government of the Republic of the Marshall Islands, in conjunction with section 321(a) of this Compact, as amended, an annual payment from fiscal year 2004 through fiscal year 2023 (and thereafter in accordance with the Agreement between the Government of the United States and the Government of the Republic of the Marshall Islands Regarding Military Use and Operating Rights) of $1.9 million. This grant assistance will be subject to the Fiscal Procedures Agreement and will be adjusted for inflation under section 218 and used to address the special needs of the community at Ebeye, Kwajalein Atoll and other Marshallese communities within Kwajalein Atoll with emphasis on the Kwajalein landowners, as described in the Fiscal Procedures Agreement.

(3) Of the total grant assistance made available under subsection (a) of this section, and in conjunction with section 321(a) of the Compact, as amended, $200,000, with an inflation adjustment as provided in section 218, shall be allocated annually from fiscal year 2004 through fiscal year 2023 (and thereafter as provided in the Agreement between the Government of the United States and the Government of the Republic of the Marshall Islands Regarding Military Use and Operating Rights) for a grant to support increased participation of the Government of the Republic of the Marshall Islands Environmental Protection Authority in the annual U.S. Army Kwajalein Atoll Environmental Standards Survey and to promote a greater Government of the Republic of the Marshall Islands capacity for independent analysis of the Survey's findings and conclusions.

(c) HUMANITARIAN ASSISTANCE—REPUBLIC OF THE MARSHALL ISLANDS PROGRAM.—In recognition of the special development needs of the Republic of the Marshall Islands, the Government of the United States shall make available to the Government of the Republic of the Marshall Islands, on its request and to be deducted from the grant amount made available under subsection (a) of this section, a Humanitarian Assistance—Republic of the Marshall Islands (''HARMI'') Program with emphasis on health, education, and infrastructure (including transportation), projects and such other projects as mutually agreed. The terms and conditions of the HARMI shall be set forth in the Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Republic of the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association, as Amended, which shall come into effect simultaneously with the amendments to this Compact.

(d) PUBLIC INFRASTRUCTURE.—

(1) Unless otherwise agreed, not less than 30 percent and not more than 50 percent of U.S. annual grant assistance provided under this section shall be made available in accordance with a list of specific projects included in the infrastructure improvement and maintenance plan prepared by the Government of the Republic of the Marshall Islands as part of the strategic framework described in subsection (f) of this section.

(2) INFRASTRUCTURE MAINTENANCE FUND.—Five percent of the annual public infrastructure grant made available under paragraph (1) of this subsection shall be set aside, with an equal contribution from the Government of the Republic of the Marshall Islands, as a contribution to an Infrastructure Maintenance Fund. Administration of the Infrastructure Maintenance Fund shall be governed by the Fiscal Procedures Agreement.

(e) DISASTER ASSISTANCE EMERGENCY FUND.—Of the total grant assistance made available under subsection (a) of this section, an amount of two hundred thousand dollars ($200,000) shall be provided annually, with an equal contribution from the Government of the Republic of the Marshall Islands, as a contribution to a Disaster Assistance Emergency Fund (''DAEF''). Any funds from the DAEF may be used only for assistance and rehabilitation resulting from disasters and emergencies. The funds will be accessed upon declaration of a State of Emergency by the Government of the Republic of the Marshall Islands, with the concurrence of the United States Chief of Mission to the Republic of the Marshall Islands. Administration of the DAEF shall be governed by the Fiscal Procedures Agreement.

(f) BUDGET AND INVESTMENT FRAMEWORK.—The Government of the Republic of the Marshall Islands shall prepare and maintain an official medium-term budget and investment framework. The framework shall be strategic in nature, shall be continuously reviewed and updated through the annual budget process, and shall make projections on a multi-year rolling basis. Each of the sectors and areas named in subsections (a), (b), and (d) of this section, or other sectors and areas as mutually agreed, shall be accorded specific treatment in the framework. Those portions of the framework that contemplate the use of United States grant funds shall require the concurrence of both the Government of the United States and the Government of the Republic of the Marshall Islands.

Section 212—Kwajalein Impact and Use

The Government of the United States shall provide to the Government of the Republic of the Marshall Islands in conjunction with section 321(a) of the Compact, as amended, and the agreement between the Government of the

United States and the Government of the Republic of the Marshall Islands regarding military use and operating rights, a payment in fiscal year 2004 of $15,000,000, with no adjustment for inflation. In fiscal year 2005 and through fiscal year 2013, the annual payment will be the fiscal year 2004 amount ($15,000,000) with an inflation adjustment as provided under section 218. In fiscal year 2014, the annual payment will be $18,000,000 (with no adjustment for inflation) or the fiscal year 2013 amount with an inflation adjustment under section 218, whichever is greater. For fiscal year 2015 through fiscal year 2023 (and thereafter in accordance with the Agreement between the Government of the United States and the Government of the Republic of the Marshall Islands Regarding Military Use and Operating Rights) the annual payment will be the fiscal year 2014 amount, with an inflation adjustment as provided under section 218.

Section 213 - Accountability

(a) Regulations and policies normally applicable to United States financial assistance to its state and local governments, as set forth in the Fiscal Procedures Agreement, shall apply to each grant described in section 211, and to grants administered under section 221 below, except as modified in the separate agreements referred to in section 231 of this Compact, as amended, or by U.S. law. As set forth in the Fiscal Procedures Agreement, reasonable terms and conditions, including annual performance indicators that are necessary to ensure effective use of United States assistance and reasonable progress toward achieving program objectives may be attached. In addition, the United States may seek appropriate remedies for noncompliance with the terms and conditions attached to the assistance, or for failure to comply with section 234, including withholding assistance.

(b) The Government of the United States shall, for each fiscal year of the twenty years during which assistance is to be provided on a sector grant basis under section 211 (a), grant the Government of the Republic of the Marshall Islands an amount equal to the lesser of (i) one half of the reasonable, properly documented cost incurred during such fiscal year to conduct the annual audit required under Article VIII (2) of the Fiscal Procedures Agreement or (ii) $500,000. Such amount will not be adjusted for inflation under section 218 or otherwise.

Section 214 - Joint Economic Management and Financial Accountability Committee

The Governments of the United States and the Republic of the Marshall Islands shall establish a Joint Economic Management and Financial Accountability Committee, composed of a U.S. chair, two other members from the Government of the United States and two members from the Government of the Republic of the Marshall Islands. The Joint Economic Management and Financial Accountability Committee shall meet at least once each year to review the audits and reports required under this Title and the Fiscal Procedures Agreement, evaluate the progress made by the Republic of the Marshall Islands in meeting the objectives identified in its framework described in subsection (f) of section 211, with particular focus on those parts of the framework dealing with the sectors and areas identified in subsection (a) of section 211, identify problems encountered, and recommend ways to increase the effectiveness of U.S. assistance made available under this Title. The establishment and operations of the Joint Economic Management and Financial Accountability Committee shall be governed by the Fiscal Procedures Agreement.

Section 215 - Annual Report

The Government of the Republic of the Marshall Islands shall report annually to the President of the United States on the use of United States sector grant assistance and other assistance and progress in meeting mutually agreed program and economic goals. The Joint Economic Management and Financial Accountability Committee shall review and comment on the report and make appropriate recommendations based thereon.

Section 216 - Trust Fund

(a) The United States shall contribute annually for twenty years from the effective date of the Compact, as amended, in the amounts set forth in section 217 into a trust fund established in accordance with the Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands Implementing Section 216 and Section 217 of the Compact, as Amended, Regarding a Trust Fund (''Trust Fund Agreement''), which shall come into effect simultaneously with this Compact, as amended. Upon termination of the annual grant assistance under section 211 (a), (d) and (e), the earnings of the fund shall thereafter be used for the purposes described in section 211 or as otherwise mutually agreed.

(b) The United States contribution into the Trust Fund described in subsection (a) of this section is conditioned on the Government of the Republic of the Marshall Islands contributing to the Trust Fund at least $25,000,000, on the effective date of the Trust Fund Agreement or on October 1, 2003, whichever is later, $2,500,000 prior to October 1, 2004, and $2,500,000 prior to October 1, 2005. Any funds received by the Republic of the Marshall Islands under section 111(d) of Public Law 99–239 (January 14, 1986), or successor provisions, would be contributed to the Trust Fund as a Republic of the Marshall Islands' contribution.

(c) The terms regarding the investment and management of funds and use of the income of the Trust Fund shall be governed by the Trust Fund Agreement. Funds derived from United States investment shall not be subject to Federal or state taxes in the United States or any taxes in the Republic of the Marshall Islands. The Trust Fund Agreement shall also provide for annual reports to the Government of the United States and to the Government of the Republic of the Marshall Islands. The Trust Fund Agreement shall provide for appropriate distributions of trust fund proceeds to the Republic of the Marshall Islands and for appropriate remedies for the failure of the Republic of the Marshall Islands to use income of the Trust Fund for the annual grant purposes set forth in section 211. These remedies may include the return to the United States of the present market value of its contributions to the Trust Fund and the present market value of any undistributed income on the contributions of the United States. If this Compact, as amended, is terminated, the provisions of sections 451–453 of the Compact, as amended, and the Trust Fund Agreement shall govern treatment of any U.S. contributions to the Trust Fund or accrued income thereon.

Section 217 - Annual Grant Funding and Trust Fund Contributions

The funds described in sections 211, 212, 213(b), and 216 shall be made available as follows:

[In millions of dollars]

Fiscal year	Annual Grants Section 211	Audit Grant Section 213(b)	Trust Fund Section 216 (a&c)	Kwajalein Impact Section 212	Total
2004	35.2	.5	7	15.0	57.7
2005	34.7	.5	7.5	15.0	57.7
2006	34.2	.5	8	15.0	57.7
2007	33.7	.5	8.5	15.0	57.7
2008	33.2	.5	9	15.0	57.7
2009	32.7	.5	9.5	15.0	57.7
2010	32.2	.5	10	15.0	57.7
2011	31.7	.5	10.5	15.0	57.7
2012	31.2	.5	11	15.0	57.7
2013	30.7	.5	11.5	15.0	57.7
2014	32.2	.5	12	18.0	62.7
2015	31.7	.5	12.5	18.0	62.7
2016	31.2	.5	13	18.0	62.7
2017	30.7	.5	13.5	18.0	62.7
2018	30.2	.5	14	18.0	62.7
2019	29.7	.5	14.5	18.0	62.7
2020	29.2	.5	15	18.0	62.7
2021	28.7	.5	15.5	18.0	62.7
2022	28.2	.5	16	18.0	62.7
2023	27.7	.5	16.5	18.0	62.7

Section 218 - Inflation Adjustment

Except as otherwise provided, the amounts stated in this Title shall be adjusted for each United States Fiscal Year by the percent that equals two-thirds of the percent change in the United States Gross Domestic Product Implicit Price Deflator, or 5 percent, whichever is less in any one year, using the beginning of Fiscal Year 2004 as a base.

Section 219 - Carry-Over of Unused Funds

If in any year the funds made available by the Government of the United States for that year

pursuant to this Article are not completely obligated by the Government of the Republic of the Marshall Islands, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Article II

Services and Program Assistance

Section 221

(a) SERVICES.—The Government of the United States shall make available to the Republic of the Marshall Islands, in accordance with and to the extent provided in the Federal Programs and Services Agreement referred to in Section 231, the services and related programs of:

(1) the United States Weather Service;

(2) the United States Postal Service;

(3) the United States Federal Aviation Administration;

(4) the United States Department of Transportation; and

(5) the Department of Homeland Security, and the United States Agency for International Development, Office of Foreign Disaster Assistance.

Upon the effective date of this Compact, as amended, the United States Departments and Agencies named or having responsibility to provide these services and related programs shall have the authority to implement the relevant provisions of the Federal Programs and Services Agreement referred to in section 231.

(b) PROGRAMS.—

(1) Other than the services and programs covered by subsection (a) of this section, and to the extent authorized by the Congress of the United States, the Government of the United States shall make available to the Republic of the Marshall Islands the services and programs that were available to the Republic of the Marshall Islands on the effective date of this Compact, as amended, to the extent that such services and programs continue to be available to State and local governments of the United States. As set forth in the Fiscal Procedures Agreement, funds provided under subsection (a) of section 211 shall be considered to be local revenues of the Government of the Republic of the Marshall Islands when used as the local share required to obtain Federal programs and services.

(2) Unless provided otherwise by U.S. law, the services and programs described in paragraph (1) of this subsection shall be extended in accordance with the terms of the Federal Programs and Services Agreement.

(c) The Government of the United States shall have and exercise such authority as is necessary to carry out its responsibilities under this Title and the Federal Programs and Services Agreement, including the authority to monitor and administer all service and program assistance provided by the United States to the Republic of the Marshall Islands. The Federal Programs and Services Agreement shall also set forth the extent to which services and programs shall be provided to the Republic of the Marshall Islands.

(d) Except as provided elsewhere in this Compact, as amended, under any separate agreement entered into under this Compact, as amended, or otherwise under U.S. law, all Federal domestic programs extended to or operating in the Republic of the Marshall Islands shall be subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations applicable to such programs and services when operating in the United States.

(e) The Government of the United States shall make available to the Republic of the Marshall Islands alternate energy development projects, studies, and conservation measures to the extent provided for the Freely Associated States in the laws of the United States.

Section 222

The Government of the United States and the Government of the Republic of the Marshall Islands may agree from time to time to extend to the Republic of the Marshall Islands additional United States grant assistance, services and programs, as provided under the laws of the United States. Unless inconsistent with such laws, or otherwise specifically precluded by the Government of the United States at the time such additional grant assistance, services, or programs are extended, the Federal Programs and Services Agreement shall apply to any such assistance, services or programs.

Section 223

The Government of the Republic of the Marshall Islands shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Republic of the Marshall Islands at no cost to the Government of the United States as of the effective date of this Compact, as amended, or as may be mutually agreed thereafter.

Section 224

The Government of the Republic of the Marshall Islands may request, from the time to time, technical assistance from the Federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws. If technical assistance is granted pursuant to such a request, the Government of the United States shall provide the technical assistance in a manner which gives priority consideration to the Republic of the Marshall Islands over other recipients not a part of the United States, its territories or possessions, and equivalent consideration to the Republic of the Marshall Islands with respect to other states in Free Association with the United States. Such assistance shall be made available on a reimbursable or non-reimbursable basis to the extent provided by United States law.

Article III

Administrative Provisions

Section 231

The specific nature, extent and contractual arrangements of the services and programs provided for in section 221 of this Compact, as amended, as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Republic of the Marshall Islands, and other arrangements in connection with the assistance, services, or programs furnished by the Government of the United States, are set forth in a Federal Programs and Services Agreement which shall come into effect simultaneously with this Compact, as amended.

Section 232

The Government of the United States, in consultation with the Government of the Republic of the Marshall Islands, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Further, in accordance with the Fiscal Procedures Agreement described in subsection (a) of section 211, the Comptroller General of the United States shall have such powers and authorities as described in sections 103(m) and 110(c) of Public Law 99–239, 99 Stat. 1777–78, and 99 Stat. 1799 (January 14, 1986).

Section 233

Approval of this Compact, as amended, by the Government of the United States, in accordance with its constitutional processes, shall constitute a pledge by the United States that the sums and amounts specified as grants in section 211 of this Compact, as amended, shall be appropriated and paid to the Republic of the Marshall Islands for such period as those provisions of this Compact, as amended, remain in force, provided that the Republic of the Marshall Islands complies with the terms and conditions of this Title and related subsidiary agreements.

Section 234

The Government of the Republic of the Marshall Islands pledges to cooperate with, permit, and assist if reasonably requested, designated and authorized representatives of the Government of the United States charged with investigating whether Compact funds, or any other assistance authorized under this Compact, as amended, have, or are being, used for purposes other than those set forth in this Compact, as amended, or its subsidiary agreements. In carrying out this investigative authority, such United States Government representatives may request that the Government of the Republic of the Marshall Islands subpoena documents and records and compel testimony in accordance with the laws and Constitution of the Republic of the Marshall Islands. Such assistance by the Government of the Republic of the Marshall Islands to the Government of the United States shall not be unreasonably withheld. The obligation of the Government of the Marshall Islands to fulfill its pledge herein is a condition to its receiving payment of such funds or other assistance authorized under this Compact, as amended. The Government of the United States shall pay any reasonable costs for extraordinary services executed by the Government of the Marshall Islands in carrying out the provisions of this section.

Article IV

Trade

Section 241

The Republic of the Marshall Islands is not included in the customs territory of the United States.

Section 242

The President shall proclaim the following tariff treatment for articles imported from the Republic of the Marshall Islands which shall apply during the period of effectiveness of this title:

(a) Unless otherwise excluded, articles imported from the Republic of the Marshall Islands, subject to the limitations imposed under section 503(b) of title V of the Trade Act of 1974 (19 U.S.C. 2463(b)), shall be exempt from duty.

(b) Only tuna in airtight containers provided for in heading 1604.14.22 of the Harmonized Tariff Schedule of the United States that is imported from the Republic of the Marshall Islands and the Federated States of Micronesia during any calendar year not to exceed 10 percent of apparent United States consumption of tuna in airtight containers during the immediately preceding calendar year, as reported by the National Marine Fisheries Service, shall be exempt from duty; but the quantity of tuna given duty-free treatment under this paragraph for any calendar year shall be counted against the aggregated quantity of tuna in airtight containers that is dutiable under rate column numbered 1 of such heading 1604.14.22 for that calendar year.

(c) The duty-free treatment provided under subsection (a) shall not apply to:

(1) watches, clocks, and timing apparatus provided for in Chapter 91, excluding heading 9113, of the Harmonized Tariff Schedule of the United States;

(2) buttons (whether finished or not finished) provided for in items 9606.21.40 and 9606.29.20 of such Schedule;

(3) textile and apparel articles which are subject to textile agreements; and

(4) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel which were not eligible articles for purposes of title V

of the Trade Act of 1974 (19 U.S.C. 2461, et seq.) on April 1, 1984.

(d) If the cost or value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of the Republic of the Marshall Islands, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied for duty assessment purposes toward determining the percentage referred to in section 503(a)(2) of title V of the Trade Act of 1974.

Section 243

Articles imported from the Republic of the Marshall Islands which are not exempt from duty under subsections (a), (b), (c), and (d) of section 242 shall be subject to the rates of duty set forth in column numbered 1-general of the Harmonized Tariff Schedule of the United States (HTSUS).

Section 244

(a) All products of the United States imported into the Republic of the Marshall Islands shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

(b) The provisions of subsection (a) shall not apply to advantages accorded by the Republic of the Marshall Islands by virtue of their full membership in the Pacific Island Countries Trade Agreement (PICTA), done on August 18, 2001, to those governments listed in Article 26 of PICTA, as of the date the Compact, as amended, is signed.

(c) Prior to entering into consultations on, or concluding, a free trade agreement with governments not listed in Article 26 of PICTA, the Republic of the Marshall Islands shall consult with the United States regarding whether or how subsection (a) of section 244 shall be applied.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Republic of the Marshall Islands. Should the Government of the Republic of the Marshall Islands act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Republic of the Marshall Islands may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as the Government of the Republic of the Marshall Islands deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact, as amended, be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Republic of the Marshall Islands, domiciled therein, shall be exempt from estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States, provided that such citizen of the Republic of the Marshall Islands is neither a citizen nor a resident of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Republic of the Marshall Islands, the Government of the Republic of the Marshall Islands shall have authority to impose tax upon income derived by a resident of the Republic of the Marshall Islands from sources without the Republic of the Marshall Islands, in the same manner and to the same extent as the Government of the Republic of the Marshall Islands imposes tax upon income derived from within its own jurisdiction. If the Government of the Republic of the Marshall Islands exercises such authority as provided in this subsection, any individual resident of the Republic of the Marshall Islands who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Republic of the Marshall Islands shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. However, the relief from liability to the United States Government referred to in the preceding sentence means only relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and relief in the form of the exclusion under section 911 of the Internal Revenue Code of 1986. For purposes of this section, the term ''resident of the Republic of the Marshall Islands'' shall be deemed to include any person who was physically present in the Republic of the Marshall Islands for a period of 183 or more days during any taxable year.

(b) If the Government of the Republic of the Marshall Islands subjects income to taxation substantially similar to that which was imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in section 254(a).

Section 255

For purposes of section 274(h)(3)(A) of the U.S. Internal Revenue Code of 1986, the term ''North American Area'' shall include the Republic of the Marshall Islands.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Republic of the Marshall Islands.

(b) This authority and responsibility includes:

(1) the obligation to defend the Republic of the Marshall Islands and its people from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Republic of the Marshall Islands by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Republic of the Marshall Islands, subject to the terms of the separate agreements referred to in sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Republic of the Marshall Islands the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Government of the Republic of the Marshall Islands shall refrain from actions that the Government of the United States determines, after appropriate consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Republic of the Marshall Islands.

(b) The consultations referred to in this section shall be conducted expeditiously at senior levels of the two Governments, and the subsequent determination by the Government of the United States referred to in this section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Republic of the Marshall Islands shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Republic of the Marshall Islands:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner that would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or overflight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Republic of the Marshall Islands or the Federated States of Micronesia, the Government of the United States shall not store in the Republic of the Marshall Islands or the Federated States of Micronesia any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by section 314(b).

(d) No material or substance referred to in this section shall be stored in the Republic of the Marshall Islands except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in section 161(e) shall have no effect on the obligations of the Government of the United States under this section or on the application of this subsection.

(f) The provisions of this section shall apply in the areas in which the Government of the Republic of the Marshall Islands exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Republic of the Marshall Islands, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval of the Government of the Republic of the Marshall Islands.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Republic of the Marshall Islands are set forth in separate agreements, which shall remain in effect in accordance with the terms of such agreements.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Republic of the Marshall Islands in addition to those for which specific arrangements are concluded pursuant to section 321(a), it may request the Government of the Republic of the Marshall Islands to satisfy those requirements through leases or other arrangements. The Government of the Republic of the Marshall Islands shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Republic of the Marshall Islands. In making any requests pursuant to section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Republic of the Marshall Islands at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Republic of the Marshall Islands are set forth in separate agreements, which shall remain in effect in accordance with the terms of such agreements.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact, as amended, and its related agreements, the Government of the United States, exclusively, has assumed and enjoys, as to the Republic of the Marshall Islands, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of October 20, 1986.

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Republic of the Marshall Islands. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Republic of the Marshall Islands.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 (with the exception of any person described in section 141(a)(5) who is not a citizen of the Republic of the Marshall Islands) shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States as long as such person has resided in the United States for a period of less than one year, provided that no time shall count towards this one year while a person admitted to the United States under the Compact, or the Compact, as amended, is engaged in full-time study in the United States. Any person described in section 141(a)(5) who is not a citizen of the Republic of the Marshall Islands shall be subject to United States laws relating to selective service.

Section 342

The Government of the United States shall have enrolled, at any one time, at least one qualified student from the Republic of the Marshall Islands, as may be nominated by the Government of the Republic of the Marshall Islands, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195.

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to section 342(b) of this Compact, as amended.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Republic of the Marshall Islands shall continue to maintain a Joint Committee empowered to consider disputes arising under the implementation of this Title and its related agreements.

(b) The membership of the Joint Committee shall comprise selected senior officials of the two Governments. The senior United States military commander in the Pacific area shall be the senior United States member of the Joint Committee. For the meetings of the Joint Committee, each of the two Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, the Joint Committee shall meet annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. The Joint Committee also shall meet promptly upon request of either of its members. The Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree. Upon notification by the Government of the United States, the Joint Committee of the United States and the Republic of the Marshall Islands shall meet promptly in a combined session with the Joint Committee established and maintained by the Government of the United States and the Government of the Federated States of Micronesia to consider matters within the jurisdiction of the two Joint Committees.

(d) Unresolved issues in the Joint Committee shall be referred to the Governments for resolution, and the Government of the Republic of the Marshall Islands shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Government of the Republic of the Marshall Islands under Titles One, Two and Four and to the responsibility of the Government of the Republic of the Marshall Islands to assure the well-being of its people.

Section 353

(a) The Government of the United States shall not include the Government of the Republic of the Marshall Islands as a named party to a formal declaration of war, without that Government's consent.

(b) Absent such consent, this Compact, as amended, is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Republic of the Marshall Islands, which arise out of armed conflict subsequent to October 21, 1986, and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) The Government of the United States and the Government of the Republic of the Marshall Islands are jointly committed to continue their security and defense relations, as set forth in this Title. Accordingly, it is the intention of the two countries that the provisions of this Title shall remain binding as long as this Compact, as amended, remains in effect, and thereafter as mutually agreed, unless earlier terminated by mutual agreement pursuant to section 441, or amended pursuant to Article III of Title Four. If at any time the Government of the United States, or the Government of the Republic of the Marshall Islands, acting unilaterally, terminates this Title, such unilateral termination shall be considered to be termination of the entire Compact, as amended, in which case the provisions of section 442 and 452 (in the case of termination by the Government of the United States) or sections 443 and 453 (in the case of termination by the Government of the Republic of the Marshall Islands), with the exception of paragraph (3) of subsection (a) of section 452 or paragraph (3) of subsection (a) of section 453, as the case may be, shall apply.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Government of the Republic of the Marshall Islands, and in view of the existence of the separate agreement regarding mutual security concluded with the Government of the Republic of the Marshall Islands pursuant to sections 321 and 323, that, even if this Title should terminate, any attack on the Republic of the Marshall Islands during the period in which such separate agreement is in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Republic of the Marshall Islands in accordance with its constitutional processes.

(c) As reflected in Article 21(1)(b) of the Trust Fund Agreement, the Government of the United States and the Government of the Republic of the Marshall Islands further recognize, in view of the special relationship between their countries, that even if this Title should terminate, the Government of Republic of the Marshall Islands shall refrain from actions which the Government of the United States determines, after appropriate consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in

or relating to the Republic of the Marshall Islands or the Federated States of Micronesia.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

Pursuant to section 432 of the Compact and subject to subsection (e) of section 461 of the Compact, as amended, the Compact, as amended, shall come into effect upon mutual agreement between the Government of the United States and the Government of the Republic of the Marshall Islands subsequent to completion of the following:

(a) Approval by the Government of the Republic of the Marshall Islands in accordance with its constitutional processes.

(b) Approval by the Government of the United States in accordance with its constitutional processes.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Republic of the Marshall Islands and that Government shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact, as amended, or of its related agreements.

Section 422

In the event the Government of the United States or the Government of the Republic of the Marshall Islands, after conferring pursuant to section 421, determines that there is a dispute and gives written notice thereof, the two Governments shall make a good faith effort to resolve the dispute between themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Republic of the Marshall Islands cannot be resolved within 90 days of written notification in the manner provided in section 422, either party to the dispute may refer it to arbitration in accordance with section 424.

Section 424

Should a dispute be referred to arbitration as provided for in section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments that is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this section within 30 days of referral of the dispute to arbitration pursuant to section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) Unless otherwise provided in this Compact, as amended, or its related agreements, the Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four, and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact, as amended. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the Government of the Republic of the Marshall Islands.

Article III

Amendment

Section 431

The provisions of this Compact, as amended, may be further amended by mutual agreement of the Government of the United States and the Government of the Republic of the Marshall Islands, in accordance with their respective constitutional processes.

Article IV

Termination

Section 441

This Compact, as amended, may be terminated by mutual agreement of the Government of the Republic of the Marshall Islands and the Government of the United States, in accordance with their respective constitutional processes. Such mutual termination of this Compact, as amended, shall be without prejudice to the continued application of section 451 of this Compact, as amended, and the provisions of the Compact, as amended, set forth therein.

Section 442

Subject to section 452, this Compact, as amended, may be terminated by the Government of the United States in accordance with its constitutional processes. Such termination shall be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended. Such termination of this Compact, as amended, shall be without prejudice to the continued application of section 452 of this Compact, as amended, and the provisions of the Compact, as amended, set forth therein.

Section 443

This Compact, as amended, shall be terminated by the Government of the Republic of the Marshall Islands, pursuant to its constitutional processes, subject to section 453 if the people represented by that Government vote in a plebiscite to terminate the Compact. The Government of the Republic of the Marshall Islands shall notify the Government of the United States of its intention to call such a plebiscite, which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by the Government of the Republic of the Marshall Islands in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, the Government of the Republic of the Marshall Islands shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

(a) Should termination occur pursuant to section 441, economic and other assistance by the Government of the United States shall continue only if and as mutually agreed by the Governments of the United States and the Republic of the Marshall Islands, and in accordance with the countries' respective constitutional processes.

(b) In view of the special relationship of the United States and the Republic of the Marshall Islands, as reflected in subsections (b) and (c) of section 354 of this Compact, as amended, and the separate agreement entered into consistent with those subsections, if termination occurs pursuant to section 441 prior to the twentieth anniversary of the effective date of this Compact, as amended, the United States shall continue to make contributions to the Trust Fund described in section 216 of this Compact, as amended.

(c) In view of the special relationship of the United States and the Republic of the Marshall Islands described in subsection (b) of this section, if termination occurs pursuant to section 441 following the twentieth anniversary of the effective date of this Compact, as amended, the Republic of the Marshall Islands shall be entitled to receive proceeds from the Trust Fund described in section 216 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement.

Section 452

(a) Should termination occur pursuant to section 442 prior to the twentieth anniversary of the effective date of this Compact, as amended, the following provisions of this amended Compact shall remain in full force and effect until the twentieth anniversary of the effective date of this Compact, as amended, and thereafter as mutually agreed:

(1) Article VI and sections 172, 173, 176 and 177 of Title One;

(2) Article One and sections 232 and 234 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) Should termination occur pursuant to section 442 before the twentieth anniversary of the effective date of this Compact, as amended:

(1) Except as provided in paragraph (2) of this subsection and subsection (c) of this section, economic and other assistance by the United States shall continue only if and as mutually agreed by the Governments of the United States and the Republic of the Marshall Islands.

(2) In view of the special relationship of the United States and the Republic of the Marshall Islands, as reflected in subsections (b) and (c) of section 354 of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, the United States shall continue to make contributions to the Trust Fund described in section 216 of this Compact, as amended, in the manner described in the Trust Fund Agreement.

(c) In view of the special relationship of the United States and the Republic of the Marshall Islands, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and

the Trust Fund Agreement, if termination occurs pursuant to section 442 following the twentieth anniversary of the effective date of this Compact, as amended, the Republic of the Marshall Islands shall continue to be eligible to receive proceeds from the Trust Fund described in section 216 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement.

Section 453

(a) Should termination occur pursuant to section 443 prior to the twentieth anniversary of the effective date of this Compact, as amended, the following provisions of this Compact, as amended, shall remain in full force and effect until the twentieth anniversary of the effective date of this Compact, as amended, and thereafter as mutually agreed:

(1) Article VI and sections 172, 173, 176 and 177 of Title One;

(2) Sections 232 and 234 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to section 443, the Government of the United States and the Government of the Republic of the Marshall Islands shall promptly consult with regard to their future relationship. Except as provided in subsections (c) and (d) of this section, these consultations shall determine the level of economic and other assistance, if any, which the Government of the United States shall provide to the Government of the Republic of the Marshall Islands for the period ending on the twentieth anniversary of the effective date of this Compact, as amended, and for any period thereafter, if mutually agreed.

(c) In view of the special relationship of the United States and the Republic of the Marshall Islands, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, if termination occurs pursuant to section 443 prior to the twentieth anniversary of the effective date of this Compact, as amended, the United States shall continue to make contributions to the Trust Fund described in section 216 of this Compact, as amended.

(d) In view of the special relationship of the United States and the Republic of the Marshall Islands, as reflected in subsections 354(b) and (c) of this Compact, as amended, and the separate agreement regarding mutual security, and the Trust Fund Agreement, if termination occurs pursuant to section 443 following the twentieth anniversary of the effective date of this Compact, as amended, the Republic of the Marshall Islands shall continue to be eligible to receive proceeds from the Trust Fund described in section 216 of this Compact, as amended, in the manner described in those provisions and the Trust Fund Agreement.

Section 454

Notwithstanding any other provision of this Compact, as amended:

(a) The Government of the United States reaffirms its continuing interest in promoting the economic advancement and budgetary self-reliance of the people of the Republic of the Marshall Islands.

(b) The separate agreements referred to in Article II of Title Three shall remain in effect in accordance with their terms.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact, as amended, only, and without prejudice to the views of the Government of the United States or the Government of the Republic of the Marshall Islands as to the nature and extent of the jurisdiction of either of them under international law, the following terms shall have the following meanings:

(a) ''Trust Territory of the Pacific Islands'' means the area established in the Trusteeship Agreement consisting of the former administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, section 1, in force on January 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) ''Trusteeship Agreement'' means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) ''The Republic of the Marshall Islands'' and ''the Federated States of Micronesia'' are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) ''Compact'' means the Compact of Free Association Between the United States and the Federated States of Micronesia and the Marshall Islands, that was approved by the United States Congress in section 201 of Public Law 99–239 (Jan. 14, 1986) and went into effect with respect to the Republic of the Marshall Islands on October 21, 1986.

(e) ''Compact, as amended'' means the Compact of Free Association Between the United States and the Republic of the Marshall Islands, as amended. The effective date of the Compact, as amended, shall be on a date to be determined by the President of the United States, and agreed to by the Government of the Republic of the Marshall Islands, following formal approval of the Compact, as amended, in accordance with section 411 of this Compact, as amended.

(f) ''Government of the Republic of the Marshall Islands'' means the Government established and organized by the Constitution of the Republic of the Marshall Islands including all the political subdivisions and entities comprising that Government.

(g) ''Government of the Federated States of Micronesia'' means the Government established and organized by the Constitution of the Federated States of Micronesia including all the political subdivisions and entities comprising that Government.

(h) The following terms shall be defined consistent with the 1978 Edition of the Radio Regulations of the International Telecommunications as follows:

(1) ''Radiocommunication'' means telecommunication by means of radio waves.

(2) ''Station'' means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radiocommunication service, or the radio astronomy service.

(3) ''Broadcasting Service'' means a radiocommunication service in which the transmissions are intended for direct reception by the general public. This service may include sound transmissions, television transmissions or other types of transmission.

(4) ''Broadcasting Station'' means a station in the broadcasting service.

(5) ''Assignment (of a radio frequency or radio frequency channel)'' means an authorization given by an administration for a radio station to use a radio frequency or radio frequency channel under specified conditions.

(6) ''Telecommunication'' means any transmission, emission or reception of signs, signals, writings, images and sounds or intelligence of any nature by wire, radio, optical or other electromagnetic systems.

(i) ''Military Areas and Facilities'' means those areas and facilities in the Republic of the Marshall Islands reserved or acquired by the Government of the Republic of the Marshall Islands for use by the Government of the United States, as set forth in the separate agreements referred to in section 321.

(j) ''Tariff Schedules of the United States'' means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(k) ''Vienna Convention on Diplomatic Relations'' means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

(a) The Government of the United States and the Government of the Republic of the Marshall Islands previously have concluded agreements, which shall remain in effect and shall survive in accordance with their terms, as follows:

(1) Agreement Between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact of Free Association;

(2) Agreement Between the Government of the United States and the Government of the Marshall Islands by Persons Displaced as a Result of the United States Nuclear Testing Program in the Marshall Islands;

(3) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding the Resettlement of Enjebi Island;

(4) Agreement Concluded Pursuant to Section 234 of the Compact; and

(5) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association.

(b) The Government of the United States and the Government of the Republic of the Marshall Islands shall conclude prior to the date of submission of this Compact to the legislatures of the two countries, the following related agreements which shall come into effect on the effective date of this Compact, as amended, and shall survive in accordance with their terms, as follows:

(1) Federal Programs and Services Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands Concluded Pursuant to Article III of Title One, Article II of Title Two (including Section 222), and Section 231 of the Compact of Free Association, as Amended, which include:

(i) Postal Services and Related Programs;

(ii) Weather Services and Related Programs;

(iii) Civil Aviation Safety Service and Related Programs;

(iv) Civil Aviation Economic Services and Related Programs;

(v) United States Disaster Preparedness and Response Services and Related Programs; and

(vi) Telecommunications Services and Related Programs.

(2) Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 (a) of the Compact of Free Association, as Amended;

(3) Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands on Labor Recruitment Concluded Pursuant to Section 175 (b) of the Compact of Free Association, as Amended;

(4) Agreement Concerning Procedures for the Implementation of United States Economic Assistance Provided in the Compact, as Amended,

of Free Association Between the Government of the United States of America and the Government of the Republic of the Marshall Islands;

(5) Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands Implementing Section 216 and Section 217 of the Compact, as Amended, Regarding a Trust Fund;

(6) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Republic of the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association, as Amended; and,

(7) Status of Forces Agreement Between the Government of the United States of America and the Government of the Republic of the Marshall Islands Concluded Pursuant to Section 323 of the Compact of Free Association, as Amended.

Section 463

(a) Except as set forth in subsection (b) of this section, any reference in this Compact, as amended, to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as amended, as such provision was in force on the effective date of this Compact, as amended.

(b) Any reference in Article IV and VI of Title One, and Sections 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act, the Administrative Procedure Act or the Immigration and Nationality Act constitutes the incorporation of the language of such provision into this Compact, as amended, as such provision was in force on the effective date of this Compact, as amended, or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

Both the Government of the United States and the Government of the Republic of the Marshall Islands shall take all necessary steps, of a general or particular character, to ensure, no later than the entry into force date of this Compact, as amended, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact, as amended, or, in the case of subsection (d) of section 141, as soon as reasonably possible thereafter.

Section 472

This Compact, as amended, may be accepted, by signature or otherwise, by the Government of the United States and the Government of the Republic of the Marshall Islands.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association, as amended, which shall enter into force upon the exchange of diplomatic notes by which the Government of the United States of America and the Government of the Republic of the Marshall Islands inform each other about the fulfillment of their respective requirements for entry into force.

DONE at Majuro, Republic of the Marshall Islands, in duplicate, this thirtieth (30) day of April, 2003, each text being equally authentic.

Signed (May 14, 2003)	***Signed (May 14, 2003)***
For the Government of the United States of America:	***For the Government of the Federated States of Micronesia:***

Approved_______, 2003.

Strike out the preamble and insert:

Whereas the United States (in accordance with the Trusteeship Agreement for the Trust Territory of the Pacific Islands, the United Nations Charter, and the objectives of the international trusteeship system of the United Nations) fulfilled its obligations to promote the development of the people of the Trust Territory toward self-government or independence as appropriate to the particular circumstances of the Trust Territory and its peoples and the freely expressed wishes of the peoples concerned;

Whereas the United States, the Federated States of Micronesia, and the Republic of the Marshall Islands entered into the Compact of Free Association set forth in title II of Public Law 99–239, January 14, 1986, 99 Stat. 1770, to create and maintain a close and mutually beneficial relationship;

Whereas the United States, in accordance with section 231 of the Compact of Free Association entered into negotiations with the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands to provide continued United States assistance and to reaffirm its commitment to this close and beneficial relationship; and

Whereas these negotiations, in accordance with section 431 of the Compact, resulted in the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Federated States of Micronesia'', and the ''Compact of Free Association, as amended between the Government of the United States of America and the Government of the Republic of the Marshall Islands'', which, together with their related agreements, were signed by the Government of the United States and the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands on May 14, and April 30, 2003, respectively: Now, therefore, be it

Amend the title so as to read: ''A joint resolution to approve the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Federated States of Micronesia, and the Compact of Free Association, as amended, between the Government of the United States of America and the Government of the Republic of the Marshall Islands, and to appropriate funds to carry out the amended Compacts.''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Iowa (Mr. LEACH) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from Iowa (Mr. LEACH).

GENERAL LEAVE

Mr. LEACH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the joint resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of House Joint Resolution 63, legislation that reauthorizes the Compact of Free Association of the Federated States of Micronesia and the Republic of the Marshall Islands.

Mr. Speaker, the text of H.J. Res. 63 which is before us is substantially identical to the extensive bill passed by this body 3 weeks ago. The few changes it incorporates were the result of the bipartisan, bicameral consultations prior to passage in the other body, and in my judgment represent further improvements to this legislative product.

Specifically, these include an amendment to the education section which ensures retention within the islands of eligibility for participation in U.S. special education programs; a modification of the disaster assistance provisions based primarily on a recent proposal from the administration which envisions continuing roles for both the Federal Emergency Management Agency and the U.S. Agency for International Development's Office of Foreign Disaster Assistance; and the inclusion of $5.3 million for the final U.S. contribution to the trust fund established to assist in the resettlement of Rongelap Island, the locale for the U.S. thermonuclear tests in the 1940s and 1950s.

It would be my hope that we could finalize this noncontroversial package today and send it to the President for signature before the end of the session. As my colleagues may be aware, the economic assistance provisions of the current Compact with Micronesia and the Marshall Islands expired in 2001, but were extended for 2 years while the United States renegotiated the expiring provisions with the island countries. These negotiations were only completed this spring, leaving Congress relatively little time to act on a host of difficult substantive and jurisdictional issues before those authorities expired on September 30, 2003. Because Congress was not able to reauthorize the compacts prior to the end of the fiscal year, the basic authorities for U.S. assistance to the islands have been extended temporarily by continuing resolution.

In closing, I would like to thank again the chairmen and ranking members of the Committees on Resources, Education and the Work Force, Budget, Ways and Means, and the Committee on International Relations, particularly the gentleman from California (Mr. LANTOS), for their assistance and cooperation in developing and supporting this important legislation which further advances relations with our stalwart friends in the freely associated states and protects key U.S. interests in the Western Pacific. I urge support for the resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this legislation. I am very pleased that the House is taking final action today on renewal of the Compact of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands.

With final approval of these compacts, the United States will further solidify our relationship with these Western Pacific nations, both of which are close allies and make an ongoing contribution to our national defense.

□ 1530

To understand the importance of renewing the compacts, Mr. Speaker, we must remember our Nation's history in the region. During the Second World War, American soldiers liberated the Pacific, island by island, in brutal and bloody battles. After the war, the United States administered Micronesia and the Marshalls, and we have maintained a vitally important military base on Kwajalein Atoll.

In the 1940s and 1950s, the United States used the Marshall Islands as a nuclear testing ground. The Marshallese people were dramatically affected by these nuclear tests, and entire islands remain uninhabitable, even today. Since the independence of the Marshalls and Micronesia in 1986, the ties between our nations have grown even stronger. When Congress approved the Compact of Free Association in 1986, we received a very good bargain. Funds would flow to the island nations in return for strategic denial and a defense veto. The Kwajalein Army Base is vitally important to American missile tests, and as a listening post to the world. With approval of the compacts, the United States advanced our national security interests. However, our government inadequately monitored the expenditure of funds and ignored the need to promote economic development in the islands.

The compacts before the House today ensure that funds will be well spent in the future, will promote sound economic development, and will focus on the all-important subjects of education and health care. They also establish trust funds for both nations to ensure that they can become self-sufficient in 20 years.

Mr. Speaker, H.J. Res. 63 promotes our Nation's national security interests and furthers our already excellent relationship with the Marshalls and Micronesia. I urge its approval.

Mr. Speaker, I reserve the balance of my time.

Mr. LEACH. Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, it gives me extraordinary pleasure to yield 5 minutes to the gentlewoman from California (Ms. WATSON), our former distinguished Ambassador to Micronesia.

Ms. WATSON. Mr. Speaker, I would like to thank the gentleman from California (Mr. LANTOS), the gentleman from Iowa (Mr. LEACH) and all those who had a very active part in bringing this bill to the floor. I was privileged and honored to represent the United States as the Ambassador to the Federated States of Micronesia, and I have a deep and abiding respect for the island nations who are struggling to build their democracy following the American model. I am pleased that we have advanced the new compact legislation out of Congress to this point.

Although most of the contentious issues in the compact have been addressed, the funding allocated for education still continues to concern me. I visited many of the schools, and I can tell my colleagues that they need a lot of help. We have to take them from the past into the present, and we have to see that they have the technology in their classrooms to make them a part of our new global economy. The RMI and FSM children have only just begun to benefit from the establishment of an integrated education system, and I am very pleased to know that authorization for educational programs is included in the bill.

In my former profession of teaching, I have witnessed the impact of early structured education. Young children are much better equipped to enter the educational system when they are exposed to education at an early age. Our Head Start program over there is the Cadillac program of the island. Everyone clamors to get their children in there whether they qualify or not. The educational appropriations that Chairman REGULA has offered to support is critical to keep these effective programs in place and give these children of these distant Pacific islands an opportunity.

I also strongly support those provisions in this compact that provide for continued Pell Grant eligibility for the FAS. It will bolster the ability of the FAS to cultivate education. If we were to eliminate the Pell Grant assistance, we would have decimated the college system in the Federated States of Micronesia. A large portion of the operating funds for the college are obtained through Pell Grants. When you see these young people able to do 2 years in their college and then come here to the United States and then come back home and lend their expertise to this new emerging government, it really fills your heart with glee, and we should be so proud.

One other important area that I would like to point out is the reinstatement of FEMA assistance. It has been placed back into the compact for infrastructure purposes and major catastrophes. USAID is not equipped to deal with all of the problems that arise on small islands nor do they have the ready response to help in a timely fashion. The FEMA assistance is absolutely critical because being surrounded by water and spread out over a million miles of ocean, we are always in line for some kind of natural catastrophe.

As we move forward with our unique relationship with the Freely Associated States, I hope the United States Congress will continue to be supportive and receptive of the needs of our new democratic friends.

I urge my colleagues to understand the importance of the FAS, and I fully support this piece of legislation.

Mr. LANTOS. Mr. Speaker, I want to thank my friend for her eloquent and powerful statement.

Mr. Speaker, I yield 5 minutes to the distinguished gentlewoman from Guam (Mr. BORDALLO).

Ms. BORDALLO. Mr. Speaker, I thank the gentleman from California (Mr. LANTOS) and the gentleman from Iowa (Mr. LEACH) for this opportunity. I want to take this time to thank the leadership for their work on the Compact of Free Association Amendments Act. This piece of legislation is vital to the Pacific region and so important to the people of Guam. Guam is the closest American neighbor to the Freely Associated States. We have witnessed the progress that the Federated States of Micronesia and the Republic of the Marshall Islands have made under the original compact since 1986. Today this House will approve a renewal of this compact and recommit the United States of America to friendship with steadfast allies in the Pacific. Over the past 2 years, a lot of work has been exerted in renegotiating the terms of the original compact, and today we consider this measure for the final time before it makes its way to the White House. I am pleased that we are able to come to agreement in a bipartisan effort on matters that are so important to the Freely Associated States. Continuation of their eligibility for Pell Grants, Job Corps and programs under the Individuals with Disabilities Education Act is protected by H.J. Res. 63. This legislation also provides for an improved process to address the impact the immigration provisions have on affected U.S. jurisdictions. Annual mandatory funding in the amount of $30 million is provided for by this bill to be shared by Guam, Hawaii, the Commonwealth of the Northern Mariana Islands and American Samoa to help defray costs associated with immigration. The legislation includes my provision for compact-impact reconciliation to address the unreimbursed compact costs over the past 17 years.

I want to recognize the work of the U.S. negotiating teams, most particularly the contributions of the chief U.S. negotiators, Al Stayman in the early phase and Colonel Al Short under the Bush administration. I congratulate the leadership of the Federated States of Micronesia and the Republic of the Marshall Islands for their successful efforts. I want to acknowledge and thank the united efforts of Guam's leaders on the provisions important to our island. Governor Camacho and Speaker Pangelinan traveled thousands of miles to Washington in July to testify before the House Committee on Resources. Additionally, Mr. Speaker, I want to thank the gentlemen from Hawaii (Mr. ABERCROMBIE) and (Mr. CASE) for their efforts. I also want to thank the gentleman from Iowa (Mr. LEACH), the gentleman from Illinois (Mr. HYDE), the gentleman from California (Mr. POMBO), the gentleman from Ohio (Mr. BOEHNER) and the gentleman from

Wisconsin (Mr. SENSENBRENNER) for their leadership in crafting this legislation as well as the gentleman from Iowa (Mr. NUSSLE), the gentleman from Ohio (Mr. REGULA) and the gentleman from California (Mr. THOMAS) for their input on matters under their committee's jurisdictions. I also want to thank the gentleman from California (Mr. LANTOS), the gentleman from West Virginia (Mr. RAHALL), the gentleman from California (Mr. GEORGE MILLER), the gentleman from Michigan (Mr. CONYERS), the gentleman from South Carolina (Mr. SPRATT), the gentleman from Wisconsin (Mr. OBEY), and the gentleman from New York (Mr. RANGEL) for their help in addressing matters of concern as this bill moved through the process, and to thank the staff serving on these committees.

Lastly, Mr. Speaker, I want to make special mention of the work the gentleman from American Samoa (Mr. FALEOMAVAEGA) has put into the legislation. His service is invaluable to this institution and the people of the Pacific islands hold him in high esteem. This is indeed, Mr. Speaker, an historic day for the Pacific islands. I urge adoption of H.J. Res. 63.

Mr. LANTOS. Mr. Speaker, I am very pleased to yield 2 minutes to the distinguished gentleman from Hawaii (Mr. ABERCROMBIE).

Mr. ABERCROMBIE. Mr. Speaker, our colleague and friend from Guam has made manifest in her remarks the debt of gratitude that is owed to many individuals, some of whom are here and are represented, I think, on the whole by our colleagues who are in charge of the bill on the floor.

This is an issue of little note for many Members. It would be easy, I expect, to say that the compact for Micronesia represents an area of forgotten people, but that would be incorrect, Mr. Speaker, because in many instances this is an area of the never noticed. It is something that is difficult for many people in the United States, let alone in the rest of the world, to comprehend that we have here a colonial vestige, a post-World War II anachronism. We have a situation in which responsibility exists for the United States which is scarcely understood, let alone taken into account, not because of design but rather by the default and omission of elementary understanding.

Those of us who live in the Pacific, those of us who are aware of the human dimension that is involved here are particularly grateful to all of the individuals and committee staff members that have been noted by my good friend from Guam. I want to pay particular notice to my chairman on the Committee on Resources, the gentleman from California (Mr. POMBO) who has assumed these duties with this Congress. Some of the other Members mentioned are long familiar with the compact. The gentleman from California has exhibited a particular sensitivity and quest for understanding that I think has aided immeasurably in the accomplishment of dealing with what is, in fact, an unfunded mandate. The compact requires us to meet certain standards and, as has been mentioned by my good friend from Guam, Guam, Hawaii and the Marianas bear the brunt of the financial side of this as well.

Free association means that people are able to travel freely and as a result of this compact, Mr. Speaker, I think we have taken an enormous step forward, and my gratitude and aloha to all those who helped to provide it and get us to this step today. Mahalo to all.

Mr. LANTOS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume. In conclusion, let me thank each of the contributors to today's discussion. Obviously, the gentleman from California (Mr. LANTOS) has played a seminal role in this process; so have the gentlewoman from California (Ms. WATSON), the gentleman from American Samoa (Mr. FALEOMAVAEGA), the gentleman from Hawaii (Mr. ABERCROMBIE), and I would like to note with regard to the gentlewoman from Guam (Ms. BORDALLO), how appreciative we are of her help in this endeavor, and how appreciative I am that she has referenced all the people from the outside that have contributed to the development of this particular agreement.

I might say that Congress has put a slightly modified stamp on what was negotiated by the executive branch. This modified stamp is tilted towards generosity.

□ 1545

This is particularly appropriate because this is the people's body, and we are in the fortunate position of having nothing but feelings of enormous goodwill towards the people of the freely associated states.

This is a tangible agreement, but it is what is intangible that is so much more important. So as we in this House pass this agreement, I would just like to say that I am confident I speak for this entire body when I suggest that we are proud of our friends in the Pacific and we hope to maintain warm relationships for decades and decades to come.

Mr. ABERCROMBIE. Mr. Speaker, I would like to express my wholehearted support for the final passage of H.J. Res. 63, the Compact of Free Association Amendments Act of 2003. Years of negotiations and the cooperative work of many people has brought us to this point, the reauthorization of the Compact by Congress.

For the past 17 years, the United States has had a secure relationship with the Freely Associated States (FAS). The Federated States of Micronesia (FSM) and the Republic of the Marshall Islands (RMI) have been able to transition from a United Nations trusteeship to sovereign governments. At the same time, the United States has had its security and defense interests in the Pacific fulfilled. H.J. Res. 63 will not only allow this critical economic and military relationship to continue, but will improve upon its successes and ensure that FAS citizens get the maximum benefit possible from this agreement.

H.J. Res. 63 extends our military commitments in the Pacific by retaining certain defense rights as well as providing for continued access to Kwajalein Atoll, home of the Ronald Reagan Ballistic Missile Defense Test Site.

This legislation also includes provisions affecting the health, education, and welfare of FAS citizens. They will continue to be eligible for funds from the Pell Grant Program and from the Individuals with Disabilities Education Act, resources which are integral to their development of a competent and effective education system. They will also be eligible for funds to combat the spread of communicable diseases such as tuberculosis, cholera and Hansen's disease. FAS citizens can have complicated and severe health care needs and this grant money will go a long way toward easing these health difficulties.

The Compact also allows FAS citizens to enter the United States and its territories as nonimmigrants. These provisions are being enhanced to include security measures and more dependable passports. In addition, due to the ability to freely migrate, Compact migrants have been entering the United States in ever increasing numbers. This migration is having an enormous impact on the education, health, public safety and social service systems of the areas receiving these compact migrants. These costs have a very tangible impact and collectively, are fast approaching the $100 million per year level. For the State of Hawaii alone, more than $32 million was expended in 2002 in order to support Compact migrants and help ensure their health and well-being.

H.J. Res. 63 addresses this effect by creating a mandatory funding stream of $30 million a year in compensation for Hawaii, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. These areas have borne the brunt of this impact since 1986 and although these funds will be divided among the four jurisdictions, it will be the largest compensation any of these jurisdictions has received to date. In addition, health care providers will also be eligible for the reimbursement of expenses arising from the treatment of Compact migrants. While these funds will surely cover only a portion of the total impact cost, its yearly distribution will undoubtedly have a great effect on the state and territorial departments and agencies that have spent untold resources and labor in providing for the Compact migrants.

The scope of this Compact assures that every FAS citizen will be affected in some way and that is why I applaud the efforts to produce a bipartisan compromise with the input of all affected parties. Chairman POMBO of the House Resources Committee has been especially willing to listen to the voices of people in the Pacific and has bent over backwards to be fair and just. Chairman HYDE,

Chairman BOEHNER and Chairman NUSSLE have also accomplished tremendous work in bringing this bill to the floor. Thanks to their efforts, I have no doubt that our relationship with these Pacific nations will continue to be productive and mutually beneficial. I urge my colleagues to support this important measure.

Mr. FALEOMAVAEGA. Mr. Speaker, I would like to extend my gratitude to Chairman HYDE and Ranking Member LANTOS of the International Relations Committee, Chairman POMBO and Ranking Member RAHALL of the Resources Committee and my good friend, Chairman JIM LEACH of the International Relations Subcommittee on Asia and the Pacific for working so diligently these past several months to address some of the very important concerns raised by the RMI and FSM as it relates to the Compact of Free Association.

The Compacts of Free Association commenced in 1986 between the Federated States of Micronesia and the Republic of the Marshall Islands and the United States. In brief, the United States agrees to provide federal funding to the FSM and RMI and in turn both agree to provide the U.S. with certain defense rights now including use of eleven defense sites on Kwajalein Atoll where the U.S. Department of Defense has established a multi-billion dollar anti-ballistic missile testing facility.

In October 2001, portions of the Compact expired and representatives from the FSM, RMI and the Department of the Interior began negotiating an extension of these provisions. Earlier this year, DOI sent Congress the negotiated product to be considered as the re-authorization of the Compacts of Free Association. However, key provisions, including funding for Pell Grants and FEMA assistance were excluded from the agreement and, over the last several months, my colleagues and I have been working closely with representatives from both the FSM and RMI to address these concerns.

Mr. Speaker, the good people of the Federated States of Micronesia and the Republic of the Marshall Islands are in need of and, indeed, deserve U.S. support and assistance in building local capacity. As you know, education is invaluable to building self-sufficiency and local capacity and ultimately will contribute to bolstering the economy of these developing nations. This is why I am pleased that the bill before us today now provides the Freely Associated States with Pell Grants assistance and also recognizes the importance of FEMA assistance to these islands.

The truth is, the Freely Associated States have made many sacrifices and contributions on behalf of the United States. In fact, the U.S. used the Marshall Islands as a nuclear testing ground and detonated more than 67 nuclear bombs, including the first hydrogen bomb which was 1,000 times more powerful than the bombs dropped on Hiroshima and Nagasaki during World War II. The results were and continue to be devastating.

As a Pacific Islander, I am pleased that H.J. Res 63 acknowledges the contributions and sacrifices made by the FAS and also addresses the needs and concerns of the people of the FSM and RMI. I am also pleased that my colleagues have worked closely with me to make sure that American Samoa's tuna industry was protected in the process of these negotiations. The outcome of H.J. Res 63 will determine our relationship with the FSM and RMI for the next twenty years and will also affect American Samoa's tuna industry for generations to come.

I urge my colleagues to honor our pledge to the people of the FAS to assist them in maintaining a democratic government and supporting the principles that contribute to economic development and self-sufficiency. I also urge my colleagues to support American Samoa's interests by voting yes for H.J. Res 63.

Mr. LEACH. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TERRY). The question is on the motion offered by the gentleman from Iowa (Mr. LEACH) that the House suspend the rules and concur in the Senate amendments to the joint resolution, H.J. Res. 63.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

COMMENDING THE SIGNING OF THE UNITED STATES-ADRIATIC CHARTER

Mr. BEREUTER. Mr. Speaker, I move to suspend the rules and concur in the Senate amendments to the concurrent resolution (H. Con. Res. 209) commending the signing of the United States-Adriatic Charter, a charter of partnership among the United States, Albania, Croatia, and Macedonia.

The Clerk read as follows:

Senate amendments:

(1)Page 3, line 4, after "and" the second time it appears insert: *The Former Yugoslav Republic of*

(2)Page 3, line 8, after "and" insert: *The Former Yugoslav Republic of*

(3)Page 3, line 14, after "and" insert: *The Former Yugoslav Republic of*

(4)Page 3, line 16, after "and" insert: *The Former Yugoslav Republic of*

Amend the preamble as follows:

(5)Page 1, unnumbered line 6, after "and" insert: *The Former Yugoslav Republic of*

(6)Page 2, unnumbered line 4, after "and" insert: *The Former Yugoslav Republic of*

(7)Page 2, unnumbered line 11, strike out all after "Powell," down to an including "Minister" in unnumbered line 13 and insert: *Albania Foreign Minister Ilir Meta, Croatia Foreign Minister Tonino Picula, and The Former Yugoslav Republic of Macedonia Foreign Minister*

(8)Page 2, unnumbered line 15, after "and" the first time it appears insert: *The Former Yugoslav Republic of*

(9)Page 2, unnumbered line 29, strike out all after "Whereas" over to an including "Macedonia" in unnumbered line 2 on page 3 and insert: *75 special forces troops of Albania were sent to Iraq as part of the coalition forces during Operation Iraqi Freedom, 29 special forces troops of The Former Yugoslav Republic of Macedonia were sent to Iraq as part of the post-war stabilization force, and Albania, Croatia, and The Former Yugoslav Republic of Macedonia*

Amend the title so as to read: "Concurrent resolution commending the signing of the United States-Adriatic Charter, a charter of partnership among the United States, Albania, Croatia, and The Former Yugoslav Republic of Macedonia.".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Nebraska (Mr. BEREUTER) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from Nebraska (Mr. BEREUTER).

GENERAL LEAVE

Mr. BEREUTER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. BEREUTER. Mr. Speaker, I yield myself such time as I may consume.

The resolution before the House expresses the support of the Congress for the Adriatic Charter. The charter was signed on May 2 in the Albanian capital of Tirana by Secretary of State Powell and the foreign ministers of Albania, Croatia, and the Former Yugoslav Republic of Macedonia, the three currently remaining NATO aspirant countries which have not yet been accepted for NATO membership.

The resolution, introduced by the distinguished gentleman from New York (Mr. ENGEL), is virtually identical to the one that was agreed to in this Chamber on June 23 by a 381 to 1 vote. When the Senate passed this concurrent resolution in July, it made a minor change in the name of one of the countries being recognized, changing the word "Macedonia," which was used in the Adriatic Charter itself, to "Former Yugoslav Republic of Macedonia," which is the name by which this country is internationally recognized by most countries.

The Adriatic Charter pledges the United States to support efforts by Albania, Croatia, and Macedonia to join Euro-Atlantic institutions like NATO and the European Union.

In this agreement, the three aspirant nations commit themselves to accelerate their democratic reforms, protect human rights, implement market-oriented economic policies, and enhance their mutual cooperation. Also very importantly, under the Adriatic Charter, the United States and these three countries pledge to consult whenever

the security of one of them is threatened. For their part, the aspirant countries promise to continue defense reforms and to undertake steps to enhance border security so they can contribute to regional stability.

Mr. Speaker, this Member urges the House to agree to this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

I rise in strong support of this resolution. First, Mr. Speaker, I want to commend the gentleman from New York (Mr. ENGEL), the gentleman from Nebraska (Mr. BEREUTER), and the gentleman from Florida (Mr. WEXLER) for their leadership on this important resolution and the gentleman from Illinois (Chairman HYDE) for moving it forward so expeditiously.

Mr. Speaker, this resolution celebrates cooperation and forward thinking among the nations of the Balkans, a region that just a few years ago was engulfed in bloody ethnic violence and strife. The United States has an enduring interest in the independence, territorial integrity, and security of Albania, Croatia, and Macedonia. We must make every effort to support their full integration into the community of democratic Euro-Atlantic states.

The Adriatic Charter affirms the commitment of Albania, Croatia, and Macedonia to the values and principles of NATO and to joining the alliance at the earliest possible time. Albania, Croatia, and Macedonia have taken positive steps to advance their integration into Europe and have already contributed to European security and to the peace and security of southeast Europe through the resolution of conflicts in the region. Croatia has announced its intention to join the European Union and is moving steadily in that direction. Albania has been making important progress in its transition to democracy and as a candidate for NATO membership. Both Macedonia and Croatia are also candidates for NATO membership, and all three nations are fully committed to the Membership Action Plan agreed upon by NATO.

Mr. Speaker, the Adriatic Charter is a milestone in this region, where very recently people were skeptical about the fate of democracy and human rights. Many argue that the American emphasis upon democracy in the region was misplaced and that our Nation's efforts would fail. We proved the skeptics wrong.

If the Speaker will allow a personal word, it was not too many years ago that my wife and I were the first American officials to visit Albania, at the time still a communist dictatorship; and the head of Albania asked me to carry a letter to our President asking for the reestablishment of diplomatic relations between Albania and the United States of America. I did so and the rest is history.

Mr. Speaker, I again commend all of my colleagues who have worked so hard on this legislation, and I urge all of my colleagues to support this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. BEREUTER. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from New York (Mr. ENGEL), who has played such a pivotal role in bringing peace and democracy to this whole region.

Mr. ENGEL. Mr. Speaker, I thank my friend and colleague from California for his kind words, and I thank him as always for his help on matters such as these. We all look to him for guidance. I want to thank the gentleman from Nebraska (Mr. BEREUTER), as well, for really being with me every step of the way in bringing this to fruition and the gentleman from Florida (Mr. WEXLER), as well, for working with me on this.

I rise in support of H. Con. Res. 209, which commends the signing of the U.S.-Adriatic Charter. As the author of H. Con. Res. 209, I am honored that the Senate has passed this measure and the House is now considering this important resolution for final passage.

On May 2, 2003, the U.S.-Adriatic Charter was signed in Tirana, Albania, by Secretary of State Colin Powell and the Foreign Ministers of Albania, Croatia, and the Former Yugoslav Republic of Macedonia. As Secretary Powell noted when he signed the document, it is remarkable that the agreement was signed in Albania, a country once known only for its isolation and distance from Western principles.

I can say, Mr. Speaker, as the chairman of the Albanian Issues Caucus in this Congress, I am absolutely delighted that Albania and the United States continue to work closely together and look at this charter as an important step in bringing Albania and the United States even closer together. Today, Tirana is a capital filled with energy as it continues its opening to Europe. Macedonia and Croatia have seen similar changes as well.

Mr. Speaker, as NATO has expanded through other countries of Europe, several Balkan nations in South Central Europe were excluded. They just were not ready for membership at that time. Today, three of those nations, Albania, Croatia, and the Former Yugoslav Republic of Macedonia, are now moving to make the needed changes in reforms so that they can join the North Atlantic structures including NATO. I have long been a strong supporter of Albanian membership in NATO.

The U.S.-Adriatic Charter embodies a commitment by Albania, Croatia, and the Former Yugoslav Republic of Macedonia to the values and principles of NATO and a declaration of their intent to join NATO as soon as they meet alliance standards. I certainly support all of their efforts to advance toward NATO membership, and having Secretary Powell sign the charter puts the United States firmly in support of their efforts to join NATO when they are ready, and as far as I am concerned, sooner rather than later.

By passing this resolution today, as amended in the Senate, and it is a House resolution, Congress adds its voice by ''urging NATO to invite Albania, Croatia, and Macedonia to join NATO as soon as these countries demonstrate the ability to assume the responsibilities of NATO membership.''

H. Con. Res. 209 also welcomes and supports the aspirations of Albania, Croatia, and Macedonia to join the European Union at the earliest opportunity and recognizes that the three countries are making important strides to bring their economic, military, and political institutions into conformance with the standards of NATO and other Euro-Atlantic institutions. Finally, our resolution also commends Secretary Powell for his strong personal support of the resolution, as demonstrated by his travel to the region to sign the document.

Mr. Speaker, as a sponsor of H. Con. Res. 209, I think this is an appropriate forum to publicly thank Albania and the Former Yugoslav Republic of Macedonia for sending forces to fight alongside our troops in Afghanistan. It is my hope that Albania, one of only three European countries to send ground troops to fight in the war, would be high on the Defense Department's list when it considers the realignment of, and new bases for, American forces around the world. I have often thought that Albania is a perfect country for the United States to put new bases into.

Finally, again I would like to thank the gentleman from Nebraska (Mr. BEREUTER), chairman of the Subcommittee on Europe, and his staff for the cooperation and support as we drafted this concurrent resolution, H. Con. Res. 209. I would like to thank the gentleman from Florida (Mr. WEXLER), the ranking member of the subcommittee, for his support; and the Senate for its adoption of the measure; the gentleman from Illinois (Mr. HYDE), our chairman; and the gentleman from California (Mr. LANTOS), our ranking member. All played important roles, and I strongly support this resolution and urge my colleagues to also support it.

Mr. LANTOS. Mr. Speaker, we have no further requests for time, and I yield back the balance of my time.

Mr. BEREUTER. Mr. Speaker, I yield myself such time as I may consume.

I have just a couple of concluding remarks. I would begin by first thanking the distinguished gentleman from New York (Mr. ENGEL) for his initiative in

introducing this legislation in the first place and for working with us to ensure its final action here today.

During the past several weeks, I have had the occasion to have Foreign Ministry leaders of these three countries in my office. No doubt that has happened with a number of us, and I must say that the progress that they are making is very dramatic. And in part that progress is driven by the fact that both the European Union and NATO have formal and informal criteria for membership, and it is pushing them along to make some of the important changes that mean we are going to have peace and stability, economic progress, civilian control of the military, transparency in military budgets, and so on. Those kinds of things that are extremely important.

□ 1600

Most importantly, to move these countries along towards a rule of law and towards democratic institutions.

So, Mr. Speaker, I think we can take some pleasure in their accomplishments and continue to urge them to make all the efforts necessary for membership, because I certainly want to see these three countries become members of the European Union, and especially NATO, as soon as possible.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. TERRY). The question is on the motion offered by the gentleman from Nebraska (Mr. BEREUTER) that the House suspend the rules and concur in the Senate amendments to the concurrent resolution, H. Con. Res. 209.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

SYRIAN ACCOUNTABILITY AND LEBANESE SOVEREIGNTY RESTORATION ACT OF 2003

Ms. ROS-LEHTINEN. Mr. Speaker, I move to suspend the rules and concur in the Senate amendments to the bill (H.R. 1828) to halt Syrian support for terrorism, end its occupation of Lebanon, and stop its development of weapons of mass destruction, and by so doing hold Syria accountable for the serious international security problems it has caused in the Middle East.

The Clerk read as follows:

Senate amendments:

(1)Page 2, strike out lines 8 through 15

(2)Page 2, line 16 strike out [(2)] and insert: *(1)*

(3)Page 2, line 20 strike out [(3)] and insert: *(2)*

(4)Page 3, line 3 strike out [(4)] and insert: *(3)*

(5)Page 3, line 11 strike out [(5)] and insert: *(4)*

(6)Page 3, line 18 strike out [(6)] and insert: *(5)*

(7)Page 4, line 1 strike out [(7)] and insert: *(6)*

(8)Page 4, line 7 strike out [(8)] and insert: *(7)*

(9)Page 4, line 12 strike out [(9)] and insert: *(8)*

(10)Page 4, line 16 strike out [(10)] and insert: *(9)*

(11)Page 4, line 21 strike out [(11)] and insert: *(10)*

(12)Page 5, line 1 strike out [(12)] and insert: *(11)*

(13)Page 5, line 6 strike out [(13)] and insert: *(12)*

(14)Page 5, line 16 strike out [(14)] and insert: *(13)*

(15)Page 5, line 20 strike out [(15)] and insert: *(14)*

(16)Page 6, line 3 strike out [(16)] and insert: *(15)*

(17)Page 6, line 14 strike out [(17)] and insert: *(16)*

(18)Page 6, line 20 strike out [(18)] and insert: *(17)*

(19)Page 6, line 23 strike out [(19)] and insert: *(18)*

(20)Page 7, line 6 strike out [(20)] and insert: *(19)*

(21)Page 7, line 10 strike out [(21)] and insert: *(20)*

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Florida (Ms. ROS-LEHTINEN) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentlewoman from Florida (Ms. ROS-LEHTINEN).

GENERAL LEAVE

Ms. ROS-LEHTINEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Florida?

There was no objection.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, just 2 weeks ago, the Senate amended and overwhelmingly passed H.R. 1828, the Syria Accountability and the Lebanese Sovereignty Restoration Act.

The overwhelming support that the House-passed Syria bill received in the Senate and in the House clearly demonstrates a unity of purpose and an approach to the terrorist regime in Damascus. Even antisanctions advocates in the Senate recognize the serious threat that Syria poses to U.S. national security and to our interests and allies in the region.

This bill seeks to hold Syria accountable for its weapons program, its continued illegal occupation of Lebanon, and its terrorist activities, including its facilitation of attacks against Americans in Iraq.

The Syrian Foreign Minister has been quoted as saying that the requirements of this bill and of the U.S. in

general for Syria to cease and desist on these three fronts are ''unreasonable and unrealistic'' demands. In fact, the Syrian Foreign Minister believes that ''America has too many demands.''

Meanwhile, just a few days ago, on Tuesday of this week, a French news source published an interview with a former member of Saddam Hussein's nefarious Secret Service. This former Saddam agent and current leader of the militias inside Iraq said that Syria is ''definitely'' working alongside Iraqi intelligence and other Saddam loyalists. He said that there is cooperation between Syria and his forces inside Iraq, and that ''It began before the war, through trade, which was only a cover.''

''Armed Syrians,'' he added, ''even joined our Iraqi militia groups. And well before the war, we had forged passports that enabled us to go to that country,'' meaning Syria. He added that this coordination continues to this day.

Thus, regardless of how some will spin it, the Syrian regime has the blood of Americans on its hands, and they must be held responsible for their deaths, as well as those of scores of innocent human beings murdered by Syrian-sponsored terrorists.

Fully implemented, H.R. 1828 would help deny Syria the resources to continue its deplorable activities and will help prevent U.S. complicity in them. It seeks to do so by prohibiting U.S. exports of military, dual-use, and other items, as well as by prohibiting investments in key sectors that provide an economic windfall for the Syrian economy. We have every faith and confidence in President Bush's commitment to use the range of U.S. policy options, including the sanctions provided for in H.R. 1828, to hold Syria accountable for its unacceptable behavior.

As the President and the Secretary of State have clearly stated, Syria is on the wrong side of history. And now, it is time for it to suffer the consequences.

I ask my colleagues to concur with the Senate amendments to the House-passed bill.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this resolution. Mr. Speaker, among the many Members who deserve commendation for the bill before us, I would like to single out for recognition my friend, the gentleman from New York (Mr. ENGEL) who first introduced this bill in the 107th Congress; my good friend, the gentlewoman from Florida (Ms. ROS-LEHTINEN) for her superb chairmanship of the Subcommittee on the Middle East and Central Asia who joined the gentleman from New York (Mr. ENGEL), in initiating this bill in the 108th Congress; and my friend, the gentleman from New York (Mr. ACKERMAN), the ranking member of the Subcommittee on the Middle East and Central Asia, who has been a tireless fighter for tough-minded U.S. policies towards State sponsors of terrorism.

Mr. Speaker, for years, our government has favored Syria over other State sponsors of terrorism. We allow more trade with Syria than with the others, and we maintain normal diplomatic ties with Syria. This legislation, the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003, will end this special treatment, this inequity. It will make our Syria policy more like our policies toward other State sponsors of terrorism. With this legislation, Syria's support for terrorism, as well as Syria's illegal occupation of Lebanon, will become the central focus of our bilateral relations, rather than just an afterthought.

Mr. Speaker, Syrian-sponsored terrorism was responsible for the worst pre-September 11 terrorist incident in American history: the cold-blooded murder of 241 of our Marines by a suicide bomber in Lebanon a few years ago. Now, Syrian behavior is resulting in more American military being killed, this time in Iraq.

Recently, as my colleagues know, I visited Syria and met with President Bashar al-Asad. I warned him that the Syria Accountability Act would soon be on its way to passage unless Syria changed its ways. My words to him were both a prediction and a pledge. Asad understood me perfectly. The Secretary of State, Colin Powell, delivered a very similar message to him one week after my visit.

Yet, Syria's unacceptable and menacing behavior has not changed. Palestinian terrorists still populate Damascus. Hezbollah still occupies the south of Lebanon, its military arsenal regularly replenished, both by arms from Syria and Iran. Lebanon continues to remain under Syria's thumb. There are some 17,000 Syrian occupation troops in Lebanon, and countless additional thousands of Syrian intelligence officers controlling Lebanon. Anti-U.S. incitement continues in the Syrian media. Dissident Syrian parliamentarians and academicians, who want only freedom, languish in prison. Terrorists and Jahadists are allowed to cross the Syrian border into Iraq for the purpose of killing our own fighting men and women.

Mr. Speaker, I wish that this legislation had not been necessary, but the Syrian regime has made it so. Despite warning after warning, it has refused to heed the dictates of common sense. Now, Syria will pay the consequences.

The door to good relations with the United States has been wide open to Syria. Secretary of State Powell, myself, and others beckoned Syria to enter, but the Syrian regime has contemptuously slammed the door shut. Mr. Speaker, even now, as this legislation makes clear, our Nation would welcome good relations with Syria just as soon as the Syrian regime conforms to the minimal norms of civilized international conduct. Until then, I urge my colleagues to support H.R. 1828.

Mr. LANTOS. Mr. Speaker, I am very pleased to yield 7½ minutes to the gentleman from New York (Mr. ENGEL), the originator of this legislation.

Mr. ENGEL. Mr. Speaker, I thank my friend, the gentleman from California (Mr. LANTOS), who has been supportive every step of the way.

It has been a long road. Two years ago, when we sat down in my office and drafted this bill, we could hardly have dreamed the overwhelming support that this bill would have picked up, bipartisan support, I might add, in both the House and the Senate. In the previous Congress, the 107th Congress, I approached the then majority leader, Mr. Armey, about sponsoring this bill with me, and he very graciously agreed to do so. Our sponsors in the other body were Senator SANTORUM and Senator BOXER, and they, in the 108th Congress, continued to be the sponsors of the bill. In the 108th Congress, I spoke with my good friend and the chair of our subcommittee, the gentlewoman from Florida (Ms. ROS-LEHTINEN), and she joined with me in sponsoring this bill in the 108th Congress, and it has been a pleasure to work with her. I want to also thank our chairman, the gentleman from Illinois (Mr. HYDE), and all of the people who have worked so hard to bring this to fruition.

This is a very important bill. Syria is prominently listed by the U.S. State Department as a nation which supports terror. In 1979, the U.S. State Department put forth a list of countries which support terrorism and Syria was a charter member of that list. Syria has been on that State Department list, unabated, for 24 years, and now, in 2003, Syria is the only nation currently on that list with which we have normal diplomatic relations. It never made any sense to me, it still does not, and this bill is an important step in saying to Syria, enough is enough. No longer are you going to get away with supporting terrorism. No longer are you going to get away with your weapons of mass destruction. No longer are you going to get away with your occupation and strangulation of the sovereign nation of Lebanon and, certainly, no longer will we allow you to get away with allowing terrorists to cross over your border into Iraq to do harm to U.S. troops, and weapons crossing over from Syria to Iraq to kill U.S. troops.

□ 1615

Numerous terrorist groups, including Hezbollah, Hamas, and the Palestinian Islamic Jihad, maintain offices or

training camps in Syria or areas of Syrian-occupied Lebanon with impunity under Syrian control and guidance.

Syria is in clear violation of U.N. Security Council Resolution 1373, which directs all states to refrain from providing any form of support for terrorists. Indeed, even after Secretary of State Powell's meeting with President Assad earlier this year, Hamas, Islamic Jihad, and other terrorist groups still remain active in Damascus and all over Syria and Lebanon.

Hezbollah is the group which killed more than 200 U.S. Marines in Beirut 20 years ago. Hezbollah continues to attack and wreak havoc in Israel's northern border. Hezbollah continues to kill American citizens. And yet Syria continues to play these duplicitous games. As General Aoun, the former leader of Lebanon, said, Syria plays a game where she is both the arsonist and the fireman. She starts the fire and then helps to put it out and expects accolades. Syria can no longer throw us crumbs and support terrorism at the same time and expect our accolades. She does not deserve it.

I think it is also interesting to note, Mr. Speaker, that several days ago the bombings in Turkey and Istanbul, and there were other horrible bombings this morning, but the bombing of the two synagogues in Istanbul the other day were carried out by two cousins. And the mastermind of the bombings, a brother of one of the cousins, fled to Syria after the bombings.

Syria, of course, is safe haven for terrorists around the world. Now, not only does Syria undermine regional stability by harboring terrorist groups, its 20,000-strong occupation force has denied Lebanon its internationally guaranteed sovereignty and political independence. As called for in U.N. Security Council Resolution 520, it is time that Lebanon is run by the Lebanese, not by the Assad regime in Damascus.

I cannot tell you how many Lebanese Americans have called me and called my office and commended us for this bill because people of Lebanese descent in this country are tired of seeing the stranglehold on Lebanon by Syria.

I am also concerned about Syrian efforts to field chemical and biological weapons in its development of long-range ballistic missiles. Considering the close ties Syria maintains with terrorist organizations, Syrian weapons of mass destruction programs are of grave concern. At a recent hearing of our Middle East subcommittee, the State Department confirmed that Syria is continuing to permit volunteers and others to enter Iraq from Syria to attack and kill Americans. This is totally unacceptable.

The broad spectrum of organizations which supports H.R. 1828 recognizes Syria as a major destabilizing factor in the region and see this bill as an essential tool to send a clear message to the Assad regime. The bill has 297 bipartisan cosponsors in the House and 76 in the Senate, a majority in both Houses in both parties.

The legislation imposes a variety of penalties upon Syria until it ends its support of terrorism, withdraws its armed forces from Lebanon, halts development of weapons of mass destruction and ballistic missiles, and stops facilitating terrorism in Iraq and stops allowing people to cross the border to do harm to U.S. troops.

This act is a measured and flexible approach to deal with the challenge emanating from Syria. It clearly states that we will not accept Syria's support of terrorism and we call for a free and sovereign Lebanon. This is the right step in America's Middle East policy.

And, finally, I want to say the national security waiver authority in this bill, which was put in by the Senate, is to be taken very seriously by the President; and its provisions are not to be waived except in instances truly affecting the national security interest of the United States.

Let me just say, as Syria is still supporting terrorism, occupying Lebanon, procuring weapons of mass destruction, and permitting guerillas to enter Iraq to attack and kill our troops, I want to say to the White House that any waiver would have to outweigh those most dangerous transgressions.

I find it very hard to imagine what factor would be more important to the national security of the U.S. than those matters. The administration should be aware that any waiver will be given the strictest scrutiny by Congress. And I would hope that the President in signing this bill would understand that the full implementation of this bill ought to be put into effect right away.

Mr. LANTOS. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. PALLONE), my good friend and distinguished colleague.

Mr. PALLONE. Mr. Speaker, I rise today as an original cosponsor of H.R. 1828, the Syria Accountability and Lebanese Sovereignty Restoration Act. I urge all my colleagues to continue their support for this important legislation. The United States must show Syria that there are consequences for supporting terrorism and undermining peace in the region.

H.R. 1828 holds Syria accountable for its continued support of terrorism, occupation of Lebanon, and possession and development of weapons of mass destruction. It gives the President the tools he needs to impose penalties on Syria unless Syria corrects its behavior immediately.

Syria is listed on the State Department's list of countries who harbor and support terrorism. Syria has proven to be a destabilizing force in the Middle East, continuing to develop and stockpile chemical weapons and the missiles to deliver them and remaining the occupying power in Lebanon. Syria offered support to Iraq even as U.S. and coalition forces were engaged in combat and has turned a blind eye to militants who slip across their borders into Iraq to kill American soldiers.

Mr. Speaker, yet Syria is subject to fewer U.S. sanctions than any other country considered a state sponsor of terrorism.

I would like to take this opportunity to commend my colleagues, the gentleman from New York (Mr. ENGEL) and also the gentlewoman from Florida (Ms. ROS-LEHTINEN), for introducing this legislation. I just want to urge my colleagues on a bipartisan basis to fully support and pass this bill as amended in the Senate.

Mr. LANTOS. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. EMANUEL).

Mr. EMANUEL. Mr. Speaker, as a cosponsor of the Syrian Accountability Act, I am proud to rise in strong support of this legislation. It is a remedy for the absence of a consistent, clear, and strong policy towards Syria today. And while we pass this bill today, we are sending a strong signal by passing this bill that Syria will be treated like other state sponsors of terrorist organizations.

Today, over in Iraq the Iraqi council, with the American administration support, buys electricity in a swap deal for energy and oil, inconsistent with both the principles and the values embedded in this policy. On the northern border of Iraq, we have opened up in dialogue with Syria a free trade zone, again inconsistent especially with the policy of this act and the values and the principles embedded here.

It is my hope here we not only send a signal to Syria when it comes to being a state sponsor of terrorism but to the administration that we must have a consistent policy, not one that says as a state sponsor of terrorism that you have penalties but on the other side we will continue to do trade as it relates to electricity, continue to do trade as it relates to opening up a trade zone between Iraq and Syria. If we want to buy electricity, there are sources like Turkey, Jordan, countries that are partners with America.

So it is my hope that we support this bill which is a good first step to sending a signal to Syria that its days of sponsoring terrorism are coming to an end and that the administration should announce a policy that sends a strong, consistent, unambiguous signal we will not do business with states that sponsor terrorism.

Once again, I want to associate myself with my colleagues who have worked so hard on this and for their great work. Again, it crosses both parties because it represents the values of all of those in the House and other

democratic nations in the fight against terrorism.

Mr. LANTOS. Mr. Speaker, I have no additional speakers, and I yield back the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in closing, I would like to take a moment to express my appreciation to those without whom this day would not have been possible. Of course, first and foremost, the gentleman from New York (Mr. ENGEL), with whom it has been a pleasure to work for passage of this bill, the second time we pass it in just a few short weeks. Our impressive leadership here in the House, very particularly our majority leader whose unwavering commitment to U.S. national security and, thus, to this bill, were instrumental in moving this legislation. So thank you to the gentleman from Texas (Mr. DELAY), my distinguished chairman, the gentleman from Illinois (Mr. HYDE) for his support and his assistance throughout this process, the ranking member of the Committee on International Relations, the gentleman from California (Mr. LANTOS) who is always an inspiration to us all, to Tony Haddad and the Lebanese American community whose passion on these issues have served as a source of energy for us all.

And I would also like to pay special thanks to Yleem Poblete, committee staff director of our Subcommittee on the Middle East and Central Asia. This will be the last piece of legislation that she will be handling for our subcommittee because she is awaiting White House approval in a State Department job working with Secretary John Bolton. And I thank Yleem for being a valuable member of my family, my legislative family for many, many years. I remember when Yleem and I first met and she was Miss Teen Florida. That was not so long ago. But she has been a wonderful friend and a part of my family for a long time. And we wish her God speed and much success.

And I would also like to ask my colleagues to reflect on the suffering of the Syrian and Lebanese people today and on the lives and the sacrifice of American, Israeli, and so many other victims of terrorist attacks supported by or facilitated by the Syrian regime. This bill is also for them. We look forward to working closely with President Bush toward expeditious enactment and implementation of this bill.

Time has clearly run out for the Syrian regime. It had a choice to make, and it chose terrorism. That was the wrong choice. We have a choice to make. We have demonstrated it by our overwhelming vote in support of this bill, what our will is with respect to Syria's regime. Let us again send a strong, unequivocal message to this pariah state and concur in the Senate amendment to the Syria Accountability and Lebanese Sovereignty Restoration Act.

Mr. ENGEL. Mr. Speaker, will the gentlewoman yield?

Ms. ROS-LEHTINEN. I yield to the gentleman from New York.

Mr. ENGEL. Mr. Speaker, I want to again personally thank her for being my partner in this bill. This whole Congress, it could not have been done without her. And it was a pleasure to work with her. I want to state that for the record.

I also want to thank the gentleman who is to my left who is my chief of staff, Jason Steinbaum. When I say that we wrote the bill in my office, he is the man who did all the writing. And I want to acknowledge his role and his work and thank him. It is very difficult when you have a concept and then you want to put the concept into writing and then you want to pass it through all the channels that it needs to be passed through. But as you mentioned, our staffs do a magnificent job. We could not do what we do if it were not for the good work of our staff.

Ms. ROS-LEHTINEN. Mr. Speaker, we look forward to working on the Saudi Arabia Accountability Act and the Iran Accountability Act. We have only just begun.

Mr. MCDERMOTT. Mr. Speaker, a little over a month ago, this Act came before the House and I voted for it.

I believe that Syria's occupation of Lebanon and questionable policies toward terrorist groups are reprehensible. I also believe it is important for the Syrian government to realize that Americans of every political stripe (including those who, like me, opposed the U.S. invasion of Iraq) are aware of and disapprove of many of Syria's actions.

I believe it is entirely appropriate for the United States to apply political and economic pressure on Syria to change its policies. However, I have decided to vote against the Syria Accountability Act tonight.

I am concerned about the increasing bellicose statements we have been hearing from London. I am concerned that our President may be setting the stage for the imposition of his vision of democracy in more and more places, and that he may use the many findings, senses of Congress, and statements of policy in this Act to promote actions that are contrary to the best interests of the United States.

This act is filled with nonbinding provisions that build a case against Syria, based on soft intelligence and reasonable, but undocumented, assumptions.

Ultimately, I fear that those provisions could be used to build a case for a military intervention against Syria.

For example, the bill before us contains language that speaks of "hostile actions" by Syria against U.S.-led forces in Iraq as though this is something we firmly know to be true. It is certainly possible that it is true. Yet there is no conclusive evidence as to the role of the Government of Syria in the attacks that have been carried out against our troops in Iraq. It is just this kind of poorly sourced insinuation that I fear might be used to build the case for a preemptive invasion of Syria.

It is unfortunate that the dangerous doctrine of preemption to which President Bush so obdurately subscribes makes members like me, who are truly concerned about wrongdoing by Syria, fearful of supplying the Administration with language like this to wield.

I remember that similar language regarding Iraq was misused by the Administration. We meant to express concerns and admonish the Iraqi government, but our words ended up being used as evidence for military action.

The standard of proof for a House expression of concern is and should be lower than the standard of proof for an invasion—but I don't think any of us can count on the Bush Administration to draw that distinction. Therefore, I must vote "no."

Ms. ROS-LEHTINEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentlewoman from Florida (Ms. ROS-LEHTINEN) that the House suspend the rules and concur in the Senate amendments to the bill, H.R. 1828.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Ms. ROS-LEHTINEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

□ 1630

TAX RELIEF EXTENSION ACT OF 2003

Mr. MCCRERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3521) to amend the Internal Revenue Code of 1986 to extend certain expiring provisions, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3521

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; REFERENCES; ETC.

(a) SHORT TITLE.—This Act may be cited as the ''Tax Relief Extension Act of 2003''.

(b) AMENDMENT OF 1986 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

(c) TABLE OF CONTENTS.—

Sec. 1. Short title; references; etc.

TITLE I—EXTENSION OF CERTAIN EXPIRING PROVISIONS

Sec. 1001. Allowance of nonrefundable personal credits against regular and minimum tax liability.

Sec. 1002. Work opportunity credit.
Sec. 1003. Welfare-to-work credit.
Sec. 1004. Certain expenses of elementary and secondary school teachers.
Sec. 1005. Charitable contributions of computer technology and equipment used for educational purposes.
Sec. 1006. Expensing of environmental remediation costs.
Sec. 1007. 5-year carryback of certain net operating losses.
Sec. 1008. Availability of medical savings accounts.
Sec. 1009. Temporary special rules for taxation of life insurance companies.
Sec. 1010. Qualified zone academy bonds.
Sec. 1011. District of Columbia.
Sec. 1012. Work opportunity credit with respect to New York Liberty Zone.
Sec. 1013. Disclosures relating to terrorist activities.
Sec. 1014. Cover over of tax on distilled spirits.
Sec. 1015. Parity in the application of certain limits to mental health benefits.
Sec. 1016. Combined employment tax reporting project.

TITLE II—PROVISIONS RELATING TO PENSIONS

Sec. 2001. Temporary replacement of 30-year Treasury rate.
Sec. 2002. Funding requirements for defined benefit plans of commercial passenger airlines.

TITLE III—MISCELLANEOUS TRADE AND TECHNICAL CORRECTIONS

Sec. 3001. Short title.

Subtitle A—Tariff Provisions

Sec. 3101. Reference; expired provisions.

CHAPTER 1—TEMPORARY DUTY SUSPENSIONS AND REDUCTIONS

SUBCHAPTER A—NEW DUTY SUSPENSIONS AND REDUCTIONS

Sec. 3111. Bitolylene diisocyanate (todi).
Sec. 3112. 2-methylimidazole.
Sec. 3113. Hydroxylamine free base.
Sec. 3114. Prenol.
Sec. 3115. 1-methylimadazole.
Sec. 3116. Formamide.
Sec. 3117. Michler's ethyl ketone.
Sec. 3118. Vinyl imidazole.
Sec. 3119. Disperse blue 27.
Sec. 3120. Acid black 244.
Sec. 3121. Reactive orange 132.
Sec. 3122. Mixtures of acid red 337, acid red 266, and acid red 361.
Sec. 3123. Vat red 13.
Sec. 3124. 5-methylpyridine-2,3-dicarboxylic acid.
Sec. 3125. 5-methylpyridine-2,3-dicarboxylic acid diethylester.
Sec. 3126. 5-ethylpyridine dicarboxylic acid.
Sec. 3127. (e)-o(2,5-dimethylphenoxy methyl)-2-methoxy-imino-n-methylphenylacetamide.
Sec. 3128. 2-chloro-n-(4′chlorobiphenyl-2-yl) nicotinamide.
Sec. 3129. Vinclozolin.
Sec. 3130. Dazomet.
Sec. 3131. Pyraclostrobin.
Sec. 3132. 1,3-benzenedicarboxylic acid, 5-sulfo-1,3-dimethyl ester sodium salt.
Sec. 3133. Saccharose.
Sec. 3134. (2-benzothiazolythio) butanedioic acid.
Sec. 3135. 60–70 percent amine salt of 2-benzo-thiazolythio succinic acid in solvent.
Sec. 3136. 4-methyl-g-oxo-benzenebutanoic acid compounded with 4-ethylmorpholine (2:1).
Sec. 3137. Mixtures of rimsulfuron, nicosulfuron, and application adjuvants.
Sec. 3138. Mixtures of thifensulfuron methyl, tribenuron methyl and application adjuvants.
Sec. 3139. Mixtures of thifensulfuron methyl and application adjuvants.
Sec. 3140. Mixtures of tribenuron methyl and application adjuvants.
Sec. 3141. Mixtures of rimsulfuron, thifensulfuron methyl and application adjuvants.
Sec. 3142. Vat black 25.
Sec. 3143. Cyclohexanepropanoic acid, 2-propenyl ester.
Sec. 3144. Neoheliopan hydro (2-phenylbenzimidazole-5-sulfonic acid).
Sec. 3145. Sodium methylate powder (na methylate powder).
Sec. 3146. Globanone (cyclohexadec-8-en-1-one).
Sec. 3147. Methyl acetophenone-para (melilot).
Sec. 3148. Majantol (2,2-dimethyl-3-(3-methylphenyl)propanol).
Sec. 3149. Neoheliopan MA (menthyl anthranilate).
Sec. 3150. Allyl isosulfocyanate.
Sec. 3151. Frescolat.
Sec. 3152. Thymol (alpha-cymophenol).
Sec. 3153. Benzyl carbazate.
Sec. 3154. Esfenvalerate technical.
Sec. 3155. Avaunt and steward.
Sec. 3156. Helium.
Sec. 3157. Ethyl pyruvate.
Sec. 3158. Deltamethrin.
Sec. 3159. Asulam sodium salt.
Sec. 3160. Tralomethrin.
Sec. 3161. N-phenyl-n′-(1,2,3-thiadiazol-5-yl)-urea.
Sec. 3162. Benzenepropanoic acid, alpha-2-dichloro-5-{4 (difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1h-1,2,4-triazol-1-yl}-4-fluoro-ethyl ester.
Sec. 3163. (z)-(1rs, 3rs)-3-(2-chloro-3,3,3 triflouro-1-propenyl)-2,2-dimethyl-cyclopropane carboxylic acid.
Sec. 3164. 2-chlorobenzyl chloride.
Sec. 3165. (s)-alpha-hydroxy-3-phenoxybenzeneacetonitrile.
Sec. 3166. 4-pentenoic acid, 3,3-dimethyl-, methyl ester.
Sec. 3167. Terrazole.
Sec. 3168. 2-mercaptoethanol.
Sec. 3169. Bifenazate.
Sec. 3170. A certain polymer.
Sec. 3171. Para ethylphenol.
Sec. 3172. Ezetimibe.
Sec. 3173. P-cresidinesulfonic acid.
Sec. 3174. 2,4 disulfobenzaldehyde.
Sec. 3175. M-hydroxybenzaldehyde.
Sec. 3176. N-ethyl-n-(3-sulfobenzyl)aniline, benzenesulfonic acid, 3[(ethylphenylamino)methyl].
Sec. 3177. Acrylic fiber tow.
Sec. 3178. Yttrium oxides.
Sec. 3179. Hexanedioic acid, polymer with 1,3-benzenedimethanamine.
Sec. 3180. N1-[(6-chloro-3-pyridyl)methyl]-n2-cyano-n1-methylacetamidine.
Sec. 3181. Aluminum tris (o-ethyl phosphonate).
Sec. 3182. Mixture of disperse blue 77 and disperse blue 56.
Sec. 3183. Acid black 194.
Sec. 3184. Mixture of 9,10-anthracenedione, 1,5-dihydroxy-4-nitro-8-(phenylamino)-and disperse blue 77.
Sec. 3185. Copper phthalocyanine substituted with 15 or 16 groups which comprise 8-15 thioaryl and 1-8 arylamino groups.
Sec. 3186. Bags for certain toys.
Sec. 3187. Certain children's products.
Sec. 3188. Certain optical instruments used in children's products.
Sec. 3189. Cases for certain children's products.
Sec. 3190. 2,4-dichloroaniline.
Sec. 3191. Ethoprop.
Sec. 3192. Foramsulfuron.
Sec. 3193. Certain epoxy molding compounds.
Sec. 3194. Dimethyldicyane.
Sec. 3195. Triacetone diamine.
Sec. 3196. Triethylene glycol bis[3-(3-tert-butyl-4-hydroxy-5-methylphenyl) propionate.
Sec. 3197. Certain power weaving textile machinery.
Sec. 3198. Certain filament yarns.
Sec. 3199. Certain other filament yarns.
Sec. 3200. Certain ink-jet textile printing machinery.
Sec. 3201. Certain other textile printing machinery.
Sec. 3203. D-mannose.
Sec. 3204. Benzamide, N-methyl-2-[[3-[(1E)-2-(2-pyridinyl)-ethenyl]-1H-indazol-6-yl)thio]-.
Sec. 3205. 1(2h)-quinolinecarboxylic acid, 4-[[[3,5-bis-(trifluoromethyl)phenyl] methyl](methoxycarbonyl)amino]-2-ethyl- 3,4-dihydro-6-(trifluoromethyl)-, ethyl ester, (2R,4S)-(9CI).
Sec. 3206. Disulfide,bis(3,5-dichlorophenyl)(9C1).
Sec. 3207. Pyridine, 4-[[4-(1-methylethyl)-2-[(phenylmethoxy)methyl]-1H-midazol-1-yl] methyl]-ethanedioate (1:2).
Sec. 3208. Paclobutrazole technical.
Sec. 3209. Paclobutrazole 2SC.
Sec. 3210. Methidathion technical.
Sec. 3211. Vanguard 75 WDG.
Sec. 3212. Wakil XL.
Sec. 3213. Mucochloric acid.
Sec. 3214. Azoxystrobin technical.
Sec. 3215. Flumetralin technical.
Sec. 3216. Cyprodinil technical.
Sec. 3217. Mixtures of lambda-cyhalothrin.
Sec. 3218. Primisulfuron methyl.
Sec. 3219. 1,2-cyclohexanedione.
Sec. 3220. Difenoconazole.
Sec. 3221. Certain refracting and reflecting telescopes.
Sec. 3222. Phenylisocyanate.
Sec. 3223. Bayowet FT-248.
Sec. 3224. P-phenylphenol.
Sec. 3225. Certain rubber riding boots.
Sec. 3226. Chemical RH water-based.
Sec. 3227. Chemical NR ethanol-based.
Sec. 3228. Tantalum capacitor ink.
Sec. 3229. Certain sawing machines.
Sec. 3230. Certain sector mold press manufacturing equipment.
Sec. 3231. Certain manufacturing equipment used for molding.
Sec. 3232. Certain extruders.
Sec. 3233. Certain shearing machines.
Sec. 3234. Thermal release plastic film.
Sec. 3235. Certain silver paints and pastes.
Sec. 3236. Polymer masking material for aluminum capacitors (upicoat).
Sec. 3237. OBPA.
Sec. 3238. Macroporous ion-exchange resin.
Sec. 3239. Copper 8-quinolinolate.
Sec. 3240. Ion-exchange resin.
Sec. 3241. Ion-exchange resin crosslinked with ethenylbenzene, aminophosponic acid.

Sec. 3242. Ion-exchange resin crosslinked with divinylbenzene, sulphonic acid.
Sec. 3243. 3-[(4 amino-3-methoxyphenyl) azo]-benzene sulfonic acid.
Sec. 3244. 2-methyl-5-nitrobenzenesulfonic acid.
Sec. 3245. 2-amino-6-nitro-phenol-4-sulfonic acid.
Sec. 3246. 2-amino-5-sulfobenzoic acid.
Sec. 3247. 2,5 bis [(1,3 dioxobutyl) amino] benzene sulfonic acid.
Sec. 3248. P-aminoazobenzene 4 sulfonic acid, monosodium salt.
Sec. 3249. P-aminoazobenzene 4 sulfonic acid.
Sec. 3250. 3-[(4 amino-3-methoxyphenyl) azo]-benzene sulfonic acid, monosodium salt.
Sec. 3251. ET-743 (ecteinascidin).
Sec. 3252. 2,7-naphthalenedisulfonic acid, 5-[[4-chloro-6-[[2-[[4-fluoro-6-[[5-hydroxy-6-[(4-methoxy-2-sulfophenyl)azo]-7-sulfo-2-naphthalenyl]amino]-1,3,5-triazin-2-yl] amino]-1-methylethyl]amino]-1,3,5-triazin-2-yl]amino]-3-[[4-(ethenylsulfonyl)phenyl]azo]-4-hydrox′-, sodium salt.
Sec. 3253. 1,5-naphthalenedisulfonic acid, 3-[[2-(acetylamino)-4-[[4-[[2-[2-(ethenylsulfonyl)ethoxy]ethyl] amino]-6-fluoro-1,3,5-triazin-2-yl]amino]phenyl]azo]-, disodium salt.
Sec. 3254. 7,7′-[1,3-propanediylbis[imino(6-fluoro-1,3,5-triazine-4,2-diyl)imino[2-[(aminocarbonyl)amino]-4,1-phenylene]azo]]bis-, sodium salt.
Sec. 3255. Cuprate(3-), [2-[[[[3-[[4-[[2-[2-(ethenylsulfony-l)ethoxy]ethyl]amino]-6-fluoro-1,3,5-triazin-2-yl]amino]-2-(hydroxy-.kappa.o)-5-sulfophenyl]azo-.kappa.n2]phenylmethyl]azo-.kappa.n1]-4-sulfobenzoato(5-)-.kappa.o], trisodium.
Sec. 3256. 1,5-naphthalenedisulfonic acid, 2-[[8-[[4-[[3-[[[2-(ethenylsulfonyl) ethyl]amino]carbonyl] phenyl]amino]-6-fluoro-1,3,5-triazin-2-yl]amino]-1-hydroxy-3,6-disulfo-2-naphthalenyl]azo]-, tetrasodium salt.
Sec. 3257. PTFMBA.
Sec. 3258. Benzoic acid, 2-amino-4-[[(2,5-dichlorophenyl) amino]carbonyl]-, methyl ester.
Sec. 3259. Imidacloprid pesticides.
Sec. 3260. Beta-cyfluthrin.
Sec. 3261. Imidacloprid technical.
Sec. 3262. bayleton technical.
Sec. 3263. Propoxur technical.
Sec. 3264. MKH 6561 isocyanate.
Sec. 3265. Propoxy methyl triazolone.
Sec. 3266. Nemacur VL.
Sec. 3267. Methoxy methyl triazolone.
Sec. 3268. Levafix golden yellow E-G.
Sec. 3269. Levafix blue CA/remazol blue CA.
Sec. 3270. Remazol yellow RR gran.
Sec. 3271. Indanthren blue CLF.
Sec. 3272. indanthren yellow F3GC.
Sec. 3273. acetyl chloride.
Sec. 3274. 4-methoxy-phenacychloride.
Sec. 3275. 3-methoxy-thiophenol.
Sec. 3276. Levafix brilliant red E-6BA.
Sec. 3277. Remazol BR. Blue BB 133 percent.
Sec. 3278. Fast navy salt RA.
Sec. 3279. Levafix royal blue E-FR.
Sec. 3280. P-chloroaniline.
Sec. 3281. Esters and sodium esters of parahydroxybenzoic acid.
Sec. 3282. Santolink EP 560.
Sec. 3283. Phenodur VPW 1942.
Sec. 3284. Phenodur PR 612.
Sec. 3285. Phenodur PR 263.
Sec. 3286. Macrynal SM 510 and 516.
Sec. 3287. Alftalat AN 725.
Sec. 3288. RWJ 241947.
Sec. 3289. RWJ 394718.
Sec. 3290. RWJ 394720.
Sec. 3291. 3,4-DCBN.
Sec. 3292. Cyhalofop.
Sec. 3293. Asulam.
Sec. 3294. Florasulam.
Sec. 3295. Propanil.
Sec. 3296. Halofenozide.
Sec. 3297. Ortho-phthalaldehyde.
Sec. 3298. Trans 1,3-dichloropentene.
Sec. 3299. Methacrylamide.
Sec. 3300. Cation exchange resin.
Sec. 3301. Gallery.
Sec. 3302. Necks used in cathode ray tubes.
Sec. 3303. Polytetramethylene ether glycol.
Sec. 3304. Leaf alcohol.
Sec. 3305. Combed cashmere and camel hair yarn.
Sec. 3306. Certain carded cashmere yarn.
Sec. 3307. Sulfur black 1.
Sec. 3308. Reduced vat blue 43.
Sec. 3309. Fluorobenzene.
Sec. 3310. Certain rayon filament yarn.
Sec. 3311. Certain tire cord fabric.
Sec. 3312. Direct black 184.
Sec. 3313. Black 263 stage.
Sec. 3314. Magenta 364.
Sec. 3315. Thiamethoxam technical.
Sec. 3316. Cyan 485 stage.
Sec. 3317. Direct blue 307.
Sec. 3318. Direct violet 107.
Sec. 3319. Fast black 286 stage.
Sec. 3320. Mixtures of fluazinam.
Sec. 3321. Prodiamine technical.
Sec. 3322. Carbon dioxide cartridges.
Sec. 3323. 12-hydroxyoctadecanoic acid, reaction product with *N,N*-dimethyl, 1,3-propanediamine, dimethyl sulfate, quaternized.
Sec. 3324. 40 percent polymer acid salt/polymer amide, 60 percent butyl acetate.
Sec. 3325. 12-hydroxyoctadecanoic acid, reaction product with *N,N*-dimethyl- 1,3-propanediamine, dimethyl sulfate, quaternized, 60 percent solution in toluene.
Sec. 3326. Polymer acid salt/polymer amide.
Sec. 3327. 50 percent amine neutralized phosphated polyester polymer, 50 percent solvesso 100.
Sec. 3328. 1-octadecanaminium, *N,N*-di-methyl-*N*-octadecyl-, (SP-4-2)-[29H,31H-phtha- locyanine-2-sulfonato(3-)-.kappa.n29,.kappa.n30,. Kappa.n31,.kappa. n32]cuprate(1-).
Sec. 3329. Chromate(1-)-bis{1- {(5-chloro–2-hydroxyphenyl) azo}–2-napthal enolato(2-)}-,hydrogen.
Sec. 3330. Bronate advanced.
Sec. 3331. N-cyclohexylthiophthalimide.
Sec. 3332. Certain high-performance loudspeakers.
Sec. 3333. Bio-set injection RCC.
Sec. 3334. Penta amino aceto nitrate cobalt III (coflake 2).
Sec. 3335. Oxasulfuron technical.
Sec. 3336. Certain manufacturing equipment.
Sec. 3337. 4-aminobenzamide.
Sec. 3338. FOE hydroxy.
Sec. 3339. Magenta 364 liquid feed.
Sec. 3340. Tetrakis.
Sec. 3341. Palmitic acid.
Sec. 3342. Phytol.
Sec. 3343. Chloridazon.
Sec. 3344. Disperse orange 30, disperse blue 79:1, disperse red 167:1, disperse yellow 64, disperse red 60, disperse blue 60, disperse blue 77, disperse yellow 42, disperse red 86, and disperse red 86:1.
Sec. 3345. Disperse blue 321.
Sec. 3346. Direct black 175.
Sec. 3347. Disperse red 73 and disperse blue 56.
Sec. 3348. Acid black 132.
Sec. 3349. Acid black 132 and acid black 172.
Sec. 3350. Acid black 107.
Sec. 3351. Acid yellow 219, acid orange 152, acid red 278, acid orange 116, acid orange 156, and acid blue 113.
Sec. 3352. Europium oxides.
Sec. 3353. Luganil brown NGT powder.
Sec. 3354. Thiophanate-methyl.
Sec. 3355. Mixtures of thiophanate-methyl and application adjuvants.
Sec. 3356. Hydrated hydroxypropyl methylcellulose.
Sec. 3357. C 12–18 alkenes, polymers with 4-methyl-1-pentene.
Sec. 3358. Certain 12-volt batteries.
Sec. 3359. Certain prepared or preserved artichokes.
Sec. 3360. Certain other prepared or preserved artichokes.
Sec. 3361. Ethylene/tetrafluoroethylene copolymer (ETFE).
Sec. 3362. Acetamiprid.
Sec. 3363. Certain manufacturing equipment.
Sec. 3364. Triticonazole.
Sec. 3365. Certain textile machinery.
Sec. 3366. 3-sulfinobenzoic acid.
Sec. 3367. Polydimethylsiloxane.
Sec. 3368. Baysilone fluid.
Sec. 3369. Ethanediamide, N- (2-ethoxyphenyl)-N′- (4-isodecylphenyl)-.
Sec. 3370. 1-acetyl-4-(3-dodecyl-2, 5-dioxo-1-pyrrolidinyl)-2,2,6,6-tetramethyl-piperidine.
Sec. 3371. Aryl phosphonite.
Sec. 3372. Mono octyl malionate.
Sec. 3373. 3,6,9-trioxaundecanedioic acid.
Sec. 3374. Crotonic acid.
Sec. 3375. 1,3-benzenedicarboxamide, N, N′-bis-(2,2,6,6-tetramethyl-4-piperidinyl)-.
Sec. 3376. 3-dodecyl-1-(2,2,6,6-tetramethyl-4-piperidinyl)-2,5-pyrrolidinedione.
Sec. 3377. Oxalic anilide.
Sec. 3378. N-methyl diisopropanolamine.
Sec. 3379. 50 percent homopolymer, 3-(dimethylamino) propyl amide, dimethyl sulfate-quaternized 50 percent polyricinoleic acid.
Sec. 3380. Black CPW stage.
Sec. 3381. Fast black 287 NA paste.
Sec. 3382. Fast black 287 NA liquid feed.
Sec. 3383. Fast yellow 2 stage.
Sec. 3384. Cyan 1 stage.
Sec. 3385. Yellow 1 stage.
Sec. 3386. Yellow 746 stage.
Sec. 3387. Black SCR stage.
Sec. 3388. Magenta 3B-OA stage.
Sec. 3389. Yellow 577 stage.
Sec. 3390. Cyan 485/4 stage.
Sec. 3391. Low expansion laboratory glass.
Sec. 3392. Stoppers, lids, and other closures.
Sec. 3393. Triflusulfuron methyl formulated product.
Sec. 3394. Agrumex (o-t-butyl cyclohexanol).
Sec. 3395. Trimethyl cyclo hexanol (1-methyl-3,3-dimethylcyclohexanol-5).
Sec. 3396. Myclobutanil.
Sec. 3397. Methyl cinnamate (methyl-3-phenylpropenoate).

Sec. 3398. Acetanisole (anisyl methyl ketone).
Sec. 3399. Alkylketone.
Sec. 3400. Iprodione 3-(3-5, dicholorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide.
Sec. 3401. Dichlorobenzidine dihydrochloride.
Sec. 3402. Kresoxim-methyl.
Sec. 3403. MKH 6562 isocyanate.
Sec. 3404. Certain rayon filament yarn.
Sec. 3405. Benzenepropanal, 4-(1,1-dimethylethyl)-alpha-methyl.
Sec. 3406. 3,7-dichloro-8-quinoline carboxylic acid.
Sec. 3407. 3-(1-methylethyl)-1h-2,1,3-benzothiadiazin-4(3h)-one 2,2 dioxide, sodium salt.
Sec. 3408. 3,3′,4-4′-biphenyltetracarboxylic dianhydride, oda, odpa, pmda, and 1,3-bis(4-aminophenoxy)benzene.
Sec. 3409. Oryzalin.
Sec. 3410. Tebufenozide.
Sec. 3411. Endosulfan.
Sec. 3412. Ethofumesate.
Sec. 3413. Night vision monoculars.
Sec. 3414. Solvent yellow 163.
Sec. 3415. Railway car body shells for EMU's.
Sec. 3416. Railway passenger coaches.
Sec. 3417. Railway electric multiple unit (EMU) gallery commuter coaches of stainless steel.
Sec. 3418. Snowboard boots.
Sec. 3419. Hand-held radio scanners.
Sec. 3420. Mobile and base radio scanners that are combined with a clock.
Sec. 3421. Mobile and base radio scanners that are not combined with a clock.
Sec. 3422. Certain fine animal hair of kashmir (cashmere) goats not processed.
Sec. 3423. Certain fine animal hair of kashmir (cashmere) goats.
Sec. 3424. Certain r-core transformers.
Sec. 3425. Decorative plates.
Sec. 3426. Bispyribac sodium.
Sec. 3427. Fenpropathrin.
Sec. 3428. Pyriproxyfen.
Sec. 3429. Uniconazole-P.
Sec. 3430. Flumioxazin.
Sec. 3431. Night vision monoculars.
Sec. 3432. 2,4-xylidine.
Sec. 3433. R118118 salt.
Sec. 3434. NMSBA.
Sec. 3435. Certain satellite radio broadcasting apparatus.
Sec. 3436. Acephate.
Sec. 3437. Magnesium aluminum hydroxide carbonate hydrate.
Sec. 3438. Certain footwear.

SUBCHAPTER B—EXISTING DUTY SUSPENSIONS AND REDUCTIONS

Sec. 3451. Extension of certain existing duty suspensions.
Sec. 3452. Effective date.

CHAPTER 2—OTHER TARIFF PROVISIONS

SUBCHAPTER A—LIQUIDATION OR RELIQUIDATION OF CERTAIN ENTRIES

Sec. 3501. Certain tramway cars.
Sec. 3502. Liberty Bell replica.
Sec. 3503. Certain entries of cotton gloves.
Sec. 3504. Certain entries of posters.
Sec. 3505. Certain entries of posters entered in 1999 and 2000.
Sec. 3506. Certain entries of 13–inch televisions.
Sec. 3507. Neoprene synchronous timing belts.
Sec. 3508. Liquidation of certain entries of roller chain.
Sec. 3509. Reliquidation of drawback claim relating to juices entered in April 1993.
Sec. 3510. Reliquidation of drawback claim relating to juices entered in March 1994.
Sec. 3511. Certain entries prematurely liquidated in error.
Sec. 3512. Certain posters entered during 2000 and 2001.
Sec. 3513. Liquidation or reliquidation of certain entries.
Sec. 3514. Certain railway passenger coaches.

SUBCHAPTER B—MISCELLANEOUS PROVISIONS

Sec. 3521. Hair clippers.
Sec. 3522. Tractor body parts.
Sec. 3523. Flexible magnets and composite goods containing flexible magnets.
Sec. 3524. Vessel repair duties.
Sec. 3525. Duty-free treatment for hand-knotted or hand-woven carpets.
Sec. 3526. Duty drawback for certain articles.
Sec. 3527. Unused merchandise drawback.
Sec. 3528. Treatment of certain footwear under Caribbean Basin Economic Recovery Act.
Sec. 3529. Designation of San Antonio International Airport for customs processing of certain private aircraft arriving in the United States.
Sec. 3530. Authority for the establishment of integrated border inspection areas at the United States-Canada border.
Sec. 3531. Designation of foreign law enforcement officers.
Sec. 3532. Amendments to United States insular possession program.
Sec. 3533. Modification of provisions relating to drawback claims.

CHAPTER 3—EFFECTIVE DATE

Sec. 3551. Effective date.

Subtitle B—Other Trade Provisions

CHAPTER 1—MISCELLANEOUS PROVISIONS

Sec. 3601. Termination of application of title IV of the Trade Act of 1974 to Armenia.
Sec. 3602. Modification to cellar treatment of natural wine.
Sec. 3603. Articles eligible for preferential treatment under the Andean Trade Preference Act.
Sec. 3604. Technical amendments.

CHAPTER 2—TECHNICAL AMENDMENTS RELATING TO ENTRY AND PROTEST

Sec. 3701. Entry of merchandise.
Sec. 3702. Limitation on liquidations.
Sec. 3703. Protests.
Sec. 3704. Review of protests.
Sec. 3705. Refunds and errors.
Sec. 3706. Definitions and miscellaneous provisions.
Sec. 3707. Voluntary reliquidations.
Sec. 3708. Effective date.

CHAPTER 3—PROTECTION OF INTELLECTUAL PROPERTY RIGHTS

Sec. 3751. USTR determinations in TRIPS Agreement investigations.

TITLE I—EXTENSION OF CERTAIN EXPIRING PROVISIONS

SEC. 1001. ALLOWANCE OF NONREFUNDABLE PERSONAL CREDITS AGAINST REGULAR AND MINIMUM TAX LIABILITY.

(a) IN GENERAL.—Paragraph (2) of section 26(a) is amended—

(1) by striking ''RULE FOR 2000, 2001, 2002, AND 2003.—'' and inserting ''RULE FOR TAXABLE YEARS 2000 THROUGH 2004.—'', and

(2) by striking ''or 2003,'' and inserting ''2003, or 2004,''.

(b) CONFORMING PROVISIONS.—

(1) Section 904(h) is amended by striking ''or 2003'' and inserting ''2003, or 2004''.

(2) The amendments made by sections 201(b), 202(f), and 618(b) of the Economic Growth and Tax Relief Reconciliation Act of 2001 shall not apply to taxable years beginning during 2004.

(3) The amendments made by section 1346 of the Energy Tax Policy Act of 2003 shall not apply to taxable years beginning during 2004.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2003.

SEC. 1002. WORK OPPORTUNITY CREDIT.

(a) IN GENERAL.—Subparagraph (B) of section 51(c)(4) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2003.

SEC. 1003. WELFARE-TO-WORK CREDIT.

(a) IN GENERAL.—Subsection (f) of section 51A is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to individuals who begin work for the employer after December 31, 2003.

SEC. 1004. CERTAIN EXPENSES OF ELEMENTARY AND SECONDARY SCHOOL TEACHERS.

(a) IN GENERAL.—Subparagraph (D) of section 62(a)(2) (relating to certain trade and business deductions of employees) is amended by striking ''or 2003'' and inserting '', 2003, or 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 2003.

SEC. 1005. CHARITABLE CONTRIBUTIONS OF COMPUTER TECHNOLOGY AND EQUIPMENT USED FOR EDUCATIONAL PURPOSES.

(a) IN GENERAL.—Subparagraph (G) of section 170(e)(6) (relating to special rule for contributions of computer technology and equipment for educational purposes) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 2003.

SEC. 1006. EXPENSING OF ENVIRONMENTAL REMEDIATION COSTS.

(a) IN GENERAL.—Subsection (h) of section 198 (relating to termination) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to expenditures paid or incurred after December 31, 2003.

SEC. 1007. 5-YEAR CARRYBACK OF CERTAIN NET OPERATING LOSSES.

(a) IN GENERAL.—Subparagraph (H) of section 172(b)(1) is amended—

(1) by inserting ''5-YEAR CARRYBACK OF CERTAIN LOSSES.—'' after ''(H)'', and

(2) by striking ''or 2002'' and inserting '', 2002, or 2003''.

(b) TEMPORARY SUSPENSION OF LIMITATION ON ALTERNATIVE MINIMUM TAXABLE INCOME FOR CERTAIN NOL CARRYBACKS.—Subclause (I) of section 56(d)(1)(A)(ii) is amended—

(1) by striking ''or 2002'' and inserting '', 2002, or 2003'', and

(2) by striking ''and 2002'' and inserting '', 2002, or 2003''.

(c) TECHNICAL CORRECTIONS.—

(1) Subparagraph (H) of section 172(b)(1) is amended by striking ''a taxpayer which has''.

(2) Section 102(c)(2) of the Job Creation and Worker Assistance Act of 2002 (Public Law 107–147) is amended by striking ''before January 1, 2003'' and inserting ''after December 31, 1990''.

(3)(A) Subclause (I) of section 56(d)(1)(A)(i) is amended by striking ''attributable to carryovers''.

(B) Subclause (I) of section 56(d)(1)(A)(ii) is amended—

(i) by striking ''for taxable years'' and inserting ''from taxable years'', and

(ii) by striking ''carryforwards'' and inserting ''carryovers''.

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to net operating losses for taxable years ending after December 31, 2002.

(2) TECHNICAL CORRECTIONS.—The amendments made by subsection (c) shall take effect as if included in the amendments made by section 102 of the Job Creation and Worker Assistance Act of 2002.

(3) ELECTION.—In the case of a net operating loss for a taxable year ending during 2003—

(A) any election made under section 172(b)(3) of such Code may (notwithstanding such section) be revoked before April 15, 2004, and

(B) any election made under section 172(j) of such Code shall (notwithstanding such section) be treated as timely made if made before April 15, 2004.

SEC. 1008. AVAILABILITY OF MEDICAL SAVINGS ACCOUNTS.

(a) IN GENERAL.—Paragraphs (2) and (3)(B) of section 220(i) (defining cut-off year) are each amended by striking ''2003'' each place it appears in the text and headings and inserting ''2004''.

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (2) of section 220(j) is amended—

(A) in the text by striking ''or 2002'' each place it appears and inserting ''2002, or 2003'', and

(B) in the heading by striking ''OR 2002'' and inserting ''2002, OR 2003''.

(2) Subparagraph (A) of section 220(j)(4) is amended by striking ''and 2002'' and inserting ''2002, and 2003''.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 2004.

(d) TIME FOR FILING REPORTS, ETC.—

(1) The report required by section 220(j)(4) of the Internal Revenue Code of 1986 to be made on August 1, 2003, shall be treated as timely if made before the close of the 90-day period beginning on the date of the enactment of this Act.

(2) The determination and publication required by section 220(j)(5) of such Code shall be treated as timely if made before the close of the 120-day period beginning on such date. If the determination under the preceding sentence is that 2003 is a cut-off year under section 220(i) of such Code, the cut-off date under such section 220(i) shall be the last day of such 120-day period.

SEC. 1009. TEMPORARY SPECIAL RULES FOR TAXATION OF LIFE INSURANCE COMPANIES.

(a) IN GENERAL.—Subsection (j) of section 809 (relating to reduction in certain deductions of mutual life insurance companies) is amended by striking ''or 2003'' and inserting ''2003, or 2004''.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 2003.

SEC. 1010. QUALIFIED ZONE ACADEMY BONDS.

(a) IN GENERAL.—Paragraph (1) of section 1397E(e) is amended by striking ''and 2003'' and inserting ''2003, and 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to obligations issued after the date of the enactment of this Act.

SEC. 1011. DISTRICT OF COLUMBIA.

(a) DISTRICT OF COLUMBIA ENTERPRISE ZONE.—Subsection (f) of section 1400 is amended by striking ''December 31, 2003'' both places it appears and inserting ''December 31, 2004''.

(b) TAX-EXEMPT ECONOMIC DEVELOPMENT BONDS.—Subsection (b) of section 1400A is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(c) ZERO PERCENT CAPITAL GAINS RATE.—

(1) Section 1400B is amended by striking ''January 1, 2004'' each place it appears and inserting ''January 1, 2005''.

(2) Subsections (e)(2) and (g)(2) of section 1400B are each amended by striking ''2008'' each place it appears in the headings and text and inserting ''2009''.

(3) Subsection (d) of section 1400F is amended by striking ''December 31, 2008'' and inserting ''December 31, 2009''.

(d) FIRST-TIME HOMEBUYER CREDIT.—Subsection (i) of section 1400C is amended by striking ''January 1, 2004'' and inserting ''January 1, 2005''.

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on the date of the enactment of this Act.

(2) TAX-EXEMPT ECONOMIC DEVELOPMENT BONDS.—The amendment made by subsection (b) shall apply to obligations issued after December 31, 2003.

SEC. 1012. WORK OPPORTUNITY CREDIT WITH RESPECT TO NEW YORK LIBERTY ZONE.

(a) IN GENERAL.—Subclause (I) of section 1400L(a)(2)(D)(iv) (defining qualified wages) is amended by striking ''or 2003'' and inserting '', 2003, or 2004''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to work performed after December 31, 2003.

SEC. 1013. DISCLOSURES RELATING TO TERRORIST ACTIVITIES.

(a) IN GENERAL.—Clause (iv) of section 6103(i)(3)(C) and subparagraph (E) of section 6103(i)(7) are both amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) DISCLOSURE OF TAXPAYER IDENTITY TO LAW ENFORCEMENT AGENCIES INVESTIGATING TERRORISM.—Subparagraph (A) of section 6103(i)(7) is amended by adding at the end the following new clause:

''(v) TAXPAYER IDENTITY.—For purposes of this subparagraph, a taxpayer's identity shall not be treated as taxpayer return information.''.

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsection (a) shall apply to disclosures after December 31, 2003.

(2) SUBSECTION (B).—The amendment made by subsection (b) shall take effect as if included in section 201 of the Victims of Terrorism Tax Relief Act of 2001.

SEC. 1014. COVER OVER OF TAX ON DISTILLED SPIRITS.

(a) IN GENERAL.—Paragraph (1) of section 7652(f) is amended by striking ''January 1, 2004'' and inserting ''January 1, 2005''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to articles brought into the United States after December 31, 2003.

SEC. 1015. PARITY IN THE APPLICATION OF CERTAIN LIMITS TO MENTAL HEALTH BENEFITS.

(a) IN GENERAL.—Paragraph (2) of section 9812(f) is amended by striking ''December 31, 2003'' and inserting ''December 31, 2004''.

(b) ERISA.—Section 712(f) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1185a(f)) is amended by striking ''on or after December 31, 2003'' and inserting ''after December 31, 2004''.

(c) PHSA.—Section 2705(f) of the Public Health Service Act (42 U.S.C. 300gg-5(f)) is amended by striking ''on or after December 31, 2003'' and inserting ''after December 31, 2004''.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to benefits for services furnished on or after December 31, 2003.

SEC. 1016. COMBINED EMPLOYMENT TAX REPORTING PROJECT.

(a) IN GENERAL.—Paragraph (1) of section 976(b) of the Taxpayer Relief Act of 1997 (111 Stat. 898) is amended by striking ''for a period ending with the date which is 5 years after the date of the enactment of this Act'' and inserting ''during the period ending before the date that is one year after the date of enactment of the Tax Relief Extension Act of 2003''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to disclosures on or after the date of the enactment of this Act.

TITLE II—PROVISIONS RELATING TO PENSIONS

SEC. 2001. TEMPORARY REPLACEMENT OF 30-YEAR TREASURY RATE.

(a) EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.—

(1) DETERMINATION OF PERMISSIBLE RANGE.—

(A) IN GENERAL.—Clause (ii) of section 302(b)(5)(B) of the Employee Retirement Income Security Act of 1974 is amended by redesignating subclause (II) as subclause (III) and by inserting after subclause (I) the following new subclause:

''(II) SPECIAL RULE FOR YEARS 2004 AND 2005.—In the case of plan years beginning after December 31, 2003, and before January 1, 2006, the term 'permissible range' means a rate of interest which is not above, and not more than 10 percent below, the weighted average of the rates of interest on amounts invested conservatively in long-term investment grade corporate bonds during the 4-year period ending on the last day before the beginning of the plan year. Such rates shall be determined by the Secretary on the basis of one or more indices selected periodically by the Secretary, and the Secretary shall make the permissible range publicly available.''.

(B) SECRETARIAL AUTHORITY.—Subclause (III) of section 302(b)(5)(B)(ii) of such Act, as redesignated by subparagraph (A), is amended—

(i) by inserting ''or (II)'' after ''subclause (I)'' the first place it appears, and

(ii) by striking ''subclause (I)'' the second place it appears and inserting ''such subclause''.

(C) CONFORMING AMENDMENT.—Subclause (I) of section 302(b)(5)(B)(ii) of such Act is amended by inserting ''or (III)'' after ''subclause (II)''.

(2) DETERMINATION OF CURRENT LIABILITY.—Clause (i) of section 302(d)(7)(C) of such Act is amended by adding at the end the following new subclause:

''(IV) SPECIAL RULE FOR 2004 AND 2005.—For plan years beginning in 2004 or 2005, notwithstanding subclause (I), the rate of interest used to determine current liability under this subsection shall be the rate of interest under subsection (b)(5).''.

(3) CONFORMING AMENDMENT.—Paragraph (7) of section 302(e) of such Act is amended to read as follows:

''(7) SPECIAL RULE FOR 2002.—In any case in which the interest rate used to determine current liability is determined under subsection (d)(7)(C)(i)(III), for purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (d)(7)(C)(i)(II).''.

(4) PBGC.—Clause (iii) of section 4006(a)(3)(E) of such Act is amended by adding at the end the following new subclause:

''(V) In the case of plan years beginning after December 31, 2003, and before January 1, 2006, the annual yield taken into account under subclause (II) shall be the annual rate of interest determined by the Secretary of the Treasury on amounts invested conservatively in long-term investment grade corporate bonds for the month preceding the month in which the plan year begins. For purposes of the preceding sentence, the Secretary of the Treasury shall determine such rate of interest on the basis of one or more indices selected periodically by the Secretary, and the Secretary shall make such yield publicly available.''.

(b) INTERNAL REVENUE CODE OF 1986.—

(1) DETERMINATION OF PERMISSIBLE RANGE.—

(A) IN GENERAL.—Clause (ii) of section 412(b)(5)(B) is amended by redesignating subclause (II) as subclause (III) and by inserting after subclause (I) the following new subclause:

''(II) SPECIAL RULE FOR YEARS 2004 AND 2005.—In the case of plan years beginning after December 31, 2003, and before January 1, 2006, the term 'permissible range' means a rate of interest which is not above, and not more than 10 percent below, the weighted average of the rates of interest on amounts invested conservatively in long-term investment grade corporate bonds during the 4-year period ending on the last day before the beginning of the plan year. Such rates shall be determined by the Secretary on the basis of one or more indices selected periodically by the Secretary, and the Secretary shall make the permissible range publicly available.''.

(B) SECRETARIAL AUTHORITY.—Subclause (III) of section 412(b)(5)(B)(ii), as redesignated by subparagraph (A), is amended—

(i) by inserting ''or (II)'' after ''subclause (I)'' the first place it appears, and

(ii) by striking ''subclause (I)'' the second place it appears and inserting ''such subclause''.

(C) CONFORMING AMENDMENT.—Subclause (I) of section 412(b)(5)(B)(ii) is amended by inserting ''or (III)'' after ''subclause (II)''.

(2) DETERMINATION OF CURRENT LIABILITY.—Clause (i) of section 412(l)(7)(C) is amended by adding at the end the following new subclause:

''(IV) SPECIAL RULE FOR 2004 AND 2005.—For plan years beginning in 2004 or 2005, notwithstanding subclause (I), the rate of interest used to determine current liability under this subsection shall be the rate of interest under subsection (b)(5).''.

(3) CONFORMING AMENDMENT.—Paragraph (7) of section 412(m) is amended to read as follows:

''(7) SPECIAL RULE FOR 2002.—In any case in which the interest rate used to determine current liability is determined under subsection (l)(7)(C)(i)(III), for purposes of applying paragraphs (1) and (4)(B)(ii) for plan years beginning in 2002, the current liability for the preceding plan year shall be redetermined using 120 percent as the specified percentage determined under subsection (l)(7)(C)(i)(II).''.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to plan years beginning after December 31, 2003.

(2) LOOKBACK RULES.—For purposes of applying subsections (l)(9)(B)(ii) and (m)(1) of section 412 of the Internal Revenue Code of 1986 and subsections (d)(9)(B)(ii) and (e)(1) of section 302 of the Employee Retirement Income Security Act of 1974 to plan years beginning after December 31, 2003, the amendments made by this section may be applied as if such amendments had been in effect for all prior plan years. The Secretary of the Treasury (or the Secretary's delegate) may prescribe simplified assumptions which may be used in applying the amendments made by this section to such prior plan years.

SEC. 2002. FUNDING REQUIREMENTS FOR DEFINED BENEFIT PLANS OF COMMERCIAL PASSENGER AIRLINES.

(a) INTERNAL REVENUE CODE OF 1986.—Subsection (l) of section 412 (relating to additional funding requirements for plans which are not multiemployer plans) is amended by adding at the end the following new paragraph:

''(12) SPECIAL RULE FOR COMMERCIAL PASSENGER AIRLINES.—In the case of a defined benefit plan established and maintained by a commercial passenger airline, the increased amount under paragraph (1) for plan years beginning after December 27, 2003, and before December 28, 2005, shall be 20 percent of the increased amount under paragraph (1) determined without regard to this paragraph.''.

(b) EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.—Subsection (d) of section 302 of Employee Retirement Income Security Act of 1974 is amended by adding at the end the following new paragraph:

''(12) In the case of a defined benefit plan established and maintained by a commercial passenger airline, the increased amount under paragraph (1) for plan years beginning after December 27, 2003, and before December 28, 2005, shall be 20 percent of the increased amount under paragraph (1) determined without regard to this paragraph.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning after December 27, 2003.

TITLE III—MISCELLANEOUS TRADE AND TECHNICAL CORRECTIONS

SEC. 3001. SHORT TITLE.

This title may be cited as the ''Miscellaneous Trade and Technical Corrections Act of 2003''.

Subtitle A—Tariff Provisions

SEC. 3101. REFERENCE; EXPIRED PROVISIONS.

(a) REFERENCE.—Except as otherwise expressly provided, whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to, or repeal of, a chapter, subchapter, note, additional U.S. note, heading, subheading, or other provision, the reference shall be considered to be made to a chapter, subchapter, note, additional U.S. note, heading, subheading, or other provision of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007).

(b) EXPIRED PROVISIONS.—Subchapter II of chapter 99 is amended by striking the following headings:

9902.29.06	9902.30.65	9902.33.07
9902.29.09	9902.30.90	9902.33.08

Chapter 1—Temporary Duty Suspensions and Reductions

Subchapter A—New Duty Suspensions and Reductions

SEC. 3111. BITOLYLENE DIISOCYANATE (TODI).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

''	9902.01.01	Bitolylene diisocyanate (TODI) (CAS No. 91–97–4) (provided for in subheading 2929.10.20)	Free	No change	No change	On or before 12/31/2006	''.

SEC. 3112. 2-METHYLIMIDAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.02	2-Methylimidazole (CAS No. 693–98–1) (provided for in subheading 2933.29.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3113. HYDROXYLAMINE FREE BASE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.03	Hydroxylamine (CAS No. 7803–49–8) (provided for in subheading 2825.10.00)	0.6%	No change	No change	On or before 12/31/2006	’’.

SEC. 3114. PRENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.04	3-Methyl-2-buten-1-ol (CAS No. 556–82–1) (provided for in subheading 2905.29.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3115. 1-METHYLIMADAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.05	1-Methylimidazole (CAS No. 616–47–7) (provided for in subheading 2933.29.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3116. FORMAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.06	Formamide (CAS No. 75–12–7) (provided for in subheading 2924.19.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3117. MICHLER’S ETHYL KETONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.07	4,4′-Bis-(diethylamino)-benzophenone (CAS No. 90–93–7) (provided for in subheading 2922.39.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3118. VINYL IMIDAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.08	1-Ethenyl-1H-imidazole (CAS No. 1072–63–5) (provided for in subheading 2933.29.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3119. DISPERSE BLUE 27.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.09	Disperse blue 27 (9,10-anthracenedione, 1,8-dihydroxy-4-[[4-(2-hydroxyethyl)phenyl]amino]-5-nitro-) (CAS No. 15791–78–3) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3120. ACID BLACK 244.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.10	Acid black 244 (chromate(2-), [3-(hydroxy-.kappa.O)-4-[[2-(hydroxy-.kappa.O)-1-naphthalenyl]azo-.kappa.N2]-1-naphthalenesulfonato(3-)] [1-[[2-(hydroxy-.kappa.O)-5-[4-methoxyphenyl)-azo]phenyl]azo-.kappa.N2]-2-naphthalene-sulfonato(2-)-.kappa.O]-, disodium) (CAS No. 30785–74–1) (provided for in subheading 3204.12.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3121. REACTIVE ORANGE 132.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.11	Reactive orange 132 (benzenesulfonic acid, 2,2′-[(1-methyl-1,2-ethanediyl)-bis[imino(6-fluoro-1,3,5-triazine-4,2-diyl)imino[2-[(aminocarbonyl)- amino]-4,1-phenylene]azo]]bis[5-[(4-sulfophenyl)azo]-, sodium salt) (CAS No. 149850–31–7) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3122. MIXTURES OF ACID RED 337, ACID RED 266, AND ACID RED 361.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.12	Mixtures of acid red 337 (2-naphthalenesulfonic acid, 6-amino-5-[[2-[(cyclohexylmethylamino)-sulfonyl]phenyl]azo]-4-hydroxy-, monosodium salt) (CAS No. 32846–21–2), acid red 266 (2-naphthalenesulfonic acid, 6-amino-5-[[4-chloro-2-(trifluoromethyl)phenyl]azo]-4-hydroxy-, monosodium salt) (CAS No. 57741–47–6), and acid red 361 (2-naphthalenesulfonic acid, 6-amino-4-hydroxy-5-[[2-(trifluoromethyl)phenyl]azo]-, monosodium salt) (CAS No. 67786–14–5) (provided for in subheading 3204.12.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3123. VAT RED 13.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.13	Vat red 13 ([3,3′-bianthra[1,9-cd]pyrazole]-6,6′(1H,1′H)-dione, 1,1′-diethyl-) (CAS No. 4203–77–4) (provided for in subheading 3204.15.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3124. 5-METHYLPYRIDINE-2,3-DICARBOXYLIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.14	5-Methylpyridine-2,3-dicarboxylic acid (CAS No. 53636–65–0) (provided for in subheading 2933.39.61)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3125. 5-METHYLPYRIDINE-2,3-DICARBOXYLIC ACID DIETHYLESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.15	5-Methylpyridine-2,3-dicarboxylic acid, diethyl ester (CAS No. 112110–16–4) (provided for in subheading 2933.39.61)	1.8%	No change	No change	On or before 12/31/2006	’’.

SEC. 3126. 5-ETHYLPYRIDINE DICARBOXYLIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.16	5-Ethylpyridine-2,3-dicarboxylic acid (CAS No. 102268–15–5) (provided for in subheading 2933.39.61)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3127. (E)-O(2,5-DIMETHYLPHENOXY METHYL)-2-METHOXY-IMINO-N-METHYLPHENYLACETAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.17	(E)-O-(2,5-Dimethylphenoxy- methyl)-2-methoxyimino-N-methylphenylacet-amide (dimoxystrobin) (CAS No. 145451–07–6) (provided for in subheading 2928.00.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3128. 2-CHLORO-N-(4′CHLOROBIPHENYL-2-YL) NICOTINAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.18	2-Chloro-N-(4′-chloro-[1,1′-biphenyl]-2-yl)-nicotinamide (nicobifen) (CAS No. 188425–85–6) (provided for in subheading 2933.39.21)	4.4%	No change	No change	On or before 12/31/2006	’’.

SEC. 3129. VINCLOZOLIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.19	3-(3,5-Dichlorophenyl)-5-ethenyl-5-methyl-2,4-oxazolidinedione (vinclozolin) (CAS No. 50471–44–8) (provided for in subheading 2934.99.12)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3130. DAZOMET.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.20	Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione (CAS No. 533–74–4) (dazomet) (provided for in subheading 2934.99.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3131. PYRACLOSTROBIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.21	Methyl N-(2-[[1-(4-chlorophenyl)-1H-pyrazol-3-yl]oxymethyl]-phenyl) N-methoxy- carbanose (pyra- clostrobin) (CAS No. 175013–18–0) (provided for in subheading 2933.19.23)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3132. 1,3-BENZENEDICARBOXYLIC ACID, 5-SULFO-1,3-DIMETHYL ESTER SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.22	1,3-Benzenedicarboxylic acid, 5-sulfo-1,3-dimethyl ester, sodium salt (CAS No. 3965–55–7) (provided for in subheading 2917.39.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3133. SACCHAROSE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.23	Saccharose to be used other than in food for human consumption and not for nutritional purposes (provided for in subheading 1701.99.50)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3134. (2-BENZOTHIAZOLYTHIO) BUTANEDIOIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:heading:

‘‘	9902.01.25	(Benzothiazol-2-ylthio)succinic acid (CAS No. 95154–01–1) (provided for in subheading 2934.20.40)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3135. 60–70 PERCENT AMINE SALT OF 2-BENZO-THIAZOLYTHIO SUCCINIC ACID IN SOLVENT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.26	(Benzothiazol-2-ylthio)succinic acid (60–70 percent) in solvent (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3136. 4-METHYL-g-OXO-BENZENEBUTANOIC ACID COMPOUNDED WITH 4-ETHYLMORPHOLINE (2:1).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.27	4-Methyl-g-oxo-benzenebutanoic acid compounded with 4-ethylmorpholine (2:1) (CAS No. 171054–89–0) (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3137. MIXTURES OF RIMSULFURON, NICOSULFURON, AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.28	Mixtures of rimsulfuron (N-[[(4,6-dimethoxypyrimidin-2-yl)-amino]carbonyl]-3-(ethylsulfonyl)-2-pyridinesulfonamide (CAS No. 122931–48–0), nicosulfuron (2-(((((4,6-dimethoxypyrimidin-2-yl)-amino)carbonyl)-amino)sulfonyl)-N,N-dimethyl-3-pyridinecarboxamide (CAS No. 111991–09–4), and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3138. MIXTURES OF THIFENSULFURON METHYL, TRIBENURON METHYL AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.29	Mixtures of thifensulfuron methyl (methyl 3-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)- amino]carbonyl]- amino]sulfonyl]- 2-thiophenecar- boxylate (CAS No. 79277–27–3), tribenuron methyl (methyl 2-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)-methylamino]-carbonyl]- amino]sulfonyl]-benzoate) (CAS No. 101200–48–0) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006 ’’.

SEC. 3139. MIXTURES OF THIFENSULFURON METHYL AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.30	Mixtures of thifensulfuron methyl (methyl 3-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)- amino]carbonyl]- amino]sulfonyl]-2-thiophenecarboxylate) (CAS No. 79277–27–3) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3140. MIXTURES OF TRIBENURON METHYL AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.31	Mixtures of tribenuron methyl (methyl 2-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)methylamino]- carbonyl]amino]-sulfonyl]-benzoate) (CAS No. 101200–48–0) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3141. MIXTURES OF RIMSULFURON, THIFENSULFURON METHYL AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.32	Mixtures of rimsulfuron (N-[(4,6-dimethoxypyrimidin-2-yl)-aminocarbonyl]-3-(ethylsulfonyl)-2-pyridinesulfonamide) (CAS No. 122931–48–0); thifensulfuron methyl (methyl 3-[[[[(4-methoxy-6-methyl-1,3,5- triazin-2-yl)-amino]carbonyl]- amino]sulfonyl]-2-thiophenecarboxylate) (CAS No. 79277–27–3); and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3142. VAT BLACK 25.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.33	Anthra[2,1,9-mna]naphth[2,3-h]acridine-5,10,15(16H)-trione, 3-[(9,10-dihydro-9,10-dioxo-1-anthracenyl)- amino]- (Vat black 25) (CAS No. 4395–53–3) (provided for in subheading 3204.15.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3143. CYCLOHEXANEPROPANOIC ACID, 2-PROPENYL ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.34	Cyclohexanepro-panoic acid, 2-propenyl ester (CAS No. 2705–87–5) (provided for in subheading 2916.20.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3144. NEOHELIOPAN HYDRO (2-PHENYLBENZIMIDAZOLE-5-SULFONIC ACID).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.35	2-Phenylbenzimidazole-5-sulfonic acid) (CAS No. 27503–81–7) (provided for in subheading 2933.99.79)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3145. SODIUM METHYLATE POWDER (NA METHYLATE POWDER).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.36	Methanol, sodium salt (CAS No. 124–41–4) (provided for in subheading 2905.19.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3146. GLOBANONE (CYCLOHEXADEC-8-EN-1-ONE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.37	Cyclohexadec-8-en-1-one (CAS No. 3100–36–5) (provided for in subheading 2914.29.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3147. METHYL ACETOPHENONE-PARA (MELILOT).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.38	p-Methyl acetophenone (CAS No. 122–00–9) (provided for in subheading 2914.39.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3148. MAJANTOL (2,2-DIMETHYL-3-(3-METHYLPHENYL)PROPANOL).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.39	2,2-Dimethyl-3-(3-methylphenyl)- propanol (CAS No. 103694–68–4) (provided for in subheading 2906.29.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3149. NEOHELIOPAN MA (MENTHYL ANTHRANILATE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.40	Menthyl anthranilate (CAS No. 134–09–8) (provided for in subheading 2922.49.37)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3150. ALLYL ISOSULFOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.41	Allyl isothiocyanate (CAS No. 57–06–7) (provided for in subheading 2930.90.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3151. FRESCOLAT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.42	5-Methyl-2-(1-methylethyl)-cyclohexyl-2-hydroxypropanoate (lactic acid, menthyl ester) (Frescolat) (CAS No. 59259–38–0) (provided for in subheading 2918.11.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3152. THYMOL (ALPHA-CYMOPHENOL).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.43	Thymol (CAS No. 89–83–8) (provided for in subheading 2907.19.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3153. BENZYL CARBAZATE.

Subchapter II of chapter 99 is amended by inserting in the numerical sequence the following new heading:

‘‘	9902.01.44	Benzyl carbazate (Hydrazine- carboxylic acid, phenylmethyl ester (CAS No. 5331–43–1) (provided for in subheading 2928.00.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3154. ESFENVALERATE TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in the numerical sequence the following new heading:

‘‘	9902.01.45	(S)-Cyano(3-phenoxyphenyl)- methyl (S)-4-chloro-α-(1-methylethyl- benzeneacetate (Esfenvalerate) (CAS No. 66230–04–4) (provided for in subheading 2926.90.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3155. AVAUNT AND STEWARD.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.46	Mixtures of indoxacarb ((S)-methyl 7-chloro-2,5-dihydro-2-[[(methoxycarbonyl)[4- (trifluoromethoxy)-phenyl]amino]carbonyl]indeno- [1,2-e][1,3,4]- oxadiazine-4a-(3H)carboxylate) (CAS No. 173584–44–6) and application adjuvants (provided for in subheading 3808.10.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3156. HELIUM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.47	Helium (provided for in subheading 2804.29.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3157. ETHYL PYRUVATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.48	Ethyl pyruvate (CAS No. 617–35–6) (provided for in subheading 2918.30.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3158. DELTAMETHRIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.49	(S)-α-Cyano-3-phenoxybenzyl (1R,3R)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarb- oxylate (Deltamethrin) (CAS No. 52918–63–5) in bulk or unmixed in forms or packings for retail sale (provided for in subheading 2926.90.30 or 3808.10.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3159. ASULAM SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.50	Mixtures of methyl sulfanilycarbam- ate, sodium salt (Asulam sodium salt) (CAS No. 2302–17–2) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3160. TRALOMETHRIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.52	Tralomethrin (1R,3S)3[(1′RS)- (1′,2′,2′,2′-tetrabromoethyl)]-2,2-dimethylcyclopropanecarboxylic acid, (S)-alpha-cyano-3-phenoxybenzyl ester (CAS No. 66841–25–6) in bulk or in forms or packages for retail sale (provided for in subheading 2926.90.30 or 3808.10.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3161. N-PHENYL-N′-(1,2,3-THIADIAZOL-5-YL)-UREA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.53	N-Phenyl-N′-1,2,3-thiadiazol-5-ylurea (thidiazuron) in bulk or in forms or packages for retail sale (CAS No. 51707–55–2) (provided for in subheading 2934.99.15 or 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3162. BENZENEPROPANOIC ACID, ALPHA-2-DICHLORO-5-[4 (DIFLUOROMETHYL)-4,5-DIHYDRO-3-METHYL-5-OXO-1H-1,2,4-TRIAZOL-1-YL]-4-FLUORO-ETHYL ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.54	alpha-2- Dichloro-5-[4- (difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1H-1,2,4-triazol-1-yl]-4-fluorobenzenepropanoic acid, ethyl ester (carfentazone-ethyl) (CAS No. 128639–02–1) (provided for in subheading 2933.99.22)	4.9%	No change	No change	On or before 12/31/2006	’’.

SEC. 3163. (Z)-(1RS, 3RS)-3-(2-CHLORO-3,3,3 TRIFLOURO-1-PROPENYL)-2,2-DI-METHYL-CYCLOPROPANE CARBOXYLIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.55	(Z)-(1RS,3RS)-3-(2-Chloro-3,3,3-trifluro-1-pro- penyl)-2,2-dimethyl-cyclopropanecarboxylic acid (CAS No. 68127–59–3) (provided for in subheading 2916.20.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3164. 2-CHLOROBENZYL CHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.56	2-Chlorobenzyl chloride (CAS No. 611–19–8) (provided for in subheading 2903.69.70)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3165. (S)-ALPHA-HYDROXY-3-PHENOXYBENZENEACETONITRILE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.57	(S)-alpha-Hydroxy-3-phenoxybenzeneacetonitrile (CAS No. 61826–76–4) (provided for in subheading 2926.90.43)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3166. 4-PENTENOIC ACID, 3,3-DIMETHYL-, METHYL ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.58	4-Pentenoic acid, 3,3-dimethyl-, methyl ester (CAS No. 63721–05–1) (provided for in subheading 2916.19.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3167. TERRAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.59	Etridiazole [5-ethoxy-3- (trichloromethyl)-1,2,4-thiadiazole] (CAS No. 2593–15–9) (provided for in subheading 2934.99.90) and any mixtures (preparations) containing Etridiazole as the active ingredient (provided for in subheading 3808.20.50)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3168. 2-MERCAPTOETHANOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.60	2-Mercaptoethanol (CAS No. 60–24–2) (provided for in subheading 2930.90.90)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3169. BIFENAZATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.61	Bifenazate (Hydrazinecarb- oxylic acid, 2-(4-methoxy-[1,1- biphenyl]-3-yl)-1-methylethyl ester (CAS No. 149877–41–8) (provided for in subheading 2928.00.25)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3170. A CERTAIN POLYMER.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.62	Fluoropolymers containing 95 percent or more by weight of the monomer units tetrafluoroethylene, hexafluoropropylene, and vinylidene fluoride (provided for in subheading 3904.69.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3171. PARA ETHYLPHENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.63	p-Ethylphenol (CAS No. 123–07–9) (provided for in subheading 2907.19.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3172. EZETIMIBE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.64	2-Azetidinone, 1-(4-fluorophenyl)-3-[(3S)-3-(4-fluorophenyl)-3-hydroxypropyl]-4-(4-hydroxyphenyl)-, (3R,4S)-(Ezetimibe) (CAS No. 163222–33–1) (provided for in subheading 2933.79.08)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3173. P-CRESIDINESULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.65	p-Cresidinesulfonic acid (4-amino-5-methoxy-2-methylbenzene- sulfonic acid) (CAS No. 6471–78–9) (provided for in subheading 2922.29.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3174. 2,4 DISULFOBENZALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.66	2,4- Disulfobenzaldehyde (CAS No. 88–39–1) (provided for in subheading 2913.00.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3175. M-HYDROXYBENZALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.67	m-Hydroxybenzal- dehyde (CAS No. 100–83–4) (provided for in subheading 2912.49.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3176. N-ETHYL-N-(3-SULFOBENZYL)ANILINE, BENZENESULFONIC ACID, 3[(ETHYLPHENYLAMINO)METHYL].

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.68	N-Ethyl-N-(3-sulfobenzyl)aniline (benzenesulfonic acid, 3-[(ethylphenylamino)-methyl]-) (CAS No. 101–11–1) (provided for in subheading 2921.42.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3177. ACRYLIC FIBER TOW.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.69	Acrylic fiber tow (polyacrylonitrile tow) consisting of 6 sub-bundles crimped together, each containing 45,000 filaments (plus or minus 0.06) and 2–8 percent water, such acrylic fiber containing by weight a minimum of 92 percent acrylonitrile, not more than 0.1 percent zinc and average filament denier of either 1.48 decitex (plus or minus 0.08) or 1.32 decitex (plus or minus 0.089) (provided for in subheading 5501.30.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3178. YTTRIUM OXIDES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.21	Yttrium oxides having a purity of at least 99.9 percent (CAS No. 1314–36–9) (provided for in subheading 2846.90.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3179. HEXANEDIOIC ACID, POLYMER WITH 1,3-BENZENEDIMETHANAMINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.71	Hexanedioic acid, polymer with 1,3-benzene-dimethanamine (CAS No. 25718–70–1) (provided for in subheading 3908.10.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3180. N1-[(6-CHLORO-3-PYRIDYL)METHYL]-N2-CYANO-N1-METHYLACETAMIDINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.72	(E)-N1-[(6-Chloro-3-pyridyl)methyl]-N2-cyano-N1-methylacetamidine (Acetamiprid) (CAS No. 135410–20–7) whether or not mixed with application adjuvants (provided for in subheading 2933.39.27 or 3808.10.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3181. ALUMINUM TRIS (O-ETHYL PHOSPHONATE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.73	Aluminum tris- (O-ethylphosphon- ate) (CAS No. 39148–24–8) (provided for in subheading 2920.90.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3182. MIXTURE OF DISPERSE BLUE 77 AND DISPERSE BLUE 56.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.74	Mixtures of disperse blue 77 (9,10-anthracenedione, 1,8-dihydroxy-4-nitro-5-(phenylamino)-) (CAS No. 20241–76–3) and disperse blue 56 (9,10-anthracenedione, 1,5-diaminochloro-4,8-dihydroxy-) (CAS No. 12217–79–7) (provided for in subheading 3204.11.35)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3183. ACID BLACK 194.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.75	Acid black 194 (chromate(3-), bis[3-(hydroxy-.kappa.O)-4-[[2-(hydroxy.kappa.O)-1-naphthalenyl]azo- .kappa. N1]-7-nitro-1-naphthalenesulfonato(3-)]-, trisodium) (CAS No. 57693–14–8) (provided for in subheading 3204.12.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3184. MIXTURE OF 9,10-ANTHRACENEDIONE, 1,5-DIHYDROXY-4-NITRO-8-(PHENYLAMINO)-AND DISPERSE BLUE 77.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.76	Mixtures of 9,10-anthracenedione, 1,5-dihydroxy-4-nitro-8-(phenylamino)- (CAS No. 3065–87–0) and 9,10-anthracenedione, 1,8-dihydroxy-4-nitro-5-(phenylamino)-(Disperse blue 77) (CAS No. 20241–76–3) (provided for in subheading 3204.11.35)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3185. COPPER PHTHALOCYANINE SUBSTITUTED WITH 15 OR 16 GROUPS WHICH COMPRISE 8-15 THIOARYL AND 1-8 ARYLAMINO GROUPS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.77	A copper phthalocyanine substituted with 15 or 16 groups which comprise 8-15 thioaryl and 1-8 arylamino groups (provided for in subheading 3204.19.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3186. BAGS FOR CERTAIN TOYS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.78	Bags (provided for in subheading 4202.92.45) for transporting, storing, or protecting goods of headings 9502–9504, inclusive, imported and sold with such articles therein	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3187. CERTAIN CHILDREN’S PRODUCTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.79	Image projectors (provided for in subheading 9008.30.00) capable of projecting images from circular mounted sets of stereoscopic photographic transparencies, such mounts measuring approximately 8.99 cm in diameter	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3188. CERTAIN OPTICAL INSTRUMENTS USED IN CHILDREN'S PRODUCTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.80	Optical instruments (provided for in subheading 9013.80.90) designed for the viewing of circular mounted sets of stereoscopic photographic transparencies, such mounts measuring approximately 8.99 cm in diameter	Free	No change	No change	On or before 12/31/2006	".

SEC. 3189. CASES FOR CERTAIN CHILDREN'S PRODUCTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.81	Cases or containers (provided for in subheading 4202.92.90) specially designed or fitted for circular mounts for sets of stereoscopic photographic transparencies, such mounts measuring approximately 8.99 cm in diameter the foregoing imported and sold with such articles therein	Free	No change	No change	On or before 12/31/2006	".

SEC. 3190. 2,4-DICHLOROANILINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.82	2,4-Dichloroaniline (CAS No. 554–00–7) (provided for in subheading 2921.42.18)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3191. ETHOPROP.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.83	O-Ethyl S,S-dipropyl- phosphorodithioate (Ethoprop) (CAS No. 13194–48–4) (provided for in subheading 2930.90.44)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3192. FORAMSULFURON.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.84	Mixtures of benzamide, 2-[[[[(4,6-dimethoxy-2- pyrimidinyl)- amino] carbonyl]- amino]sulfonyl]-4- (formylamino)-N,N-methyl- (foramsulfuron) (CAS No. 173159–57–4) and application adjuvants (provided for in subheading 3808.30.15).	3%	No change	No change	On or before 12/31/2006	".

SEC. 3193. CERTAIN EPOXY MOLDING COMPOUNDS.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.85	Epoxy molding compounds, of a kind used for encapsulating integrated circuits (provided for in subheading 3907.30.00)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3194. DIMETHYLDICYANE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.86	Dimethyldicyane (2,2′-dimethyl-4,4′-methylenebis- (cyclohexylamine)) (CAS No. 6864–37–5) (provided for in subheading 2921.30.30)	Free	Free	No change	On or before 12/31/2006	".

SEC. 3195. TRIACETONE DIAMINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.87	2,2,6,6-Tetra-methyl-4-pip-eridinamine (Triacetone diamine) (CAS No. 36768–62–4) (provided for in subheading 2933.39.61)	Free	Free	No change	On or before 12/31/2006	".

SEC. 3196. TRIETHYLENE GLYCOL BIS[3-(3-TERT-BUTYL-4-HYDROXY-5-METHYLPHENYL) PROPIONATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

"	9902.01.88	Triethylene glycol bis[3-(3-tert-butyl-4-hydroxy-5-methylphenyl)propionate] (CAS No. 36443–68–2) (provided for in subheading 2918.90.43)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3197. CERTAIN POWER WEAVING TEXTILE MACHINERY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.89	Power weaving machines (looms), shuttle type, for weaving fabrics of a width exceeding 30 cm but not exceeding 4.9 m, entered without off-loom or large loom take-ups, drop wires, heddles, reeds, harness frames, or beams (provided for in subheading 8446.21.50)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3198. CERTAIN FILAMENT YARNS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.90	Synthetic filament yarn (other than sewing thread) not put up for retail sale, single, of decitex sizes of 23 to 850, with between 4 and 68 filaments, with a twist of 100 to 300 turns/m, of nylon or other polyamides, containing 10 percent or more by weight of nylon 12 (provided for in subheading 5402.51.00)	Free	Free	No change	On or before 12/31/2006	".

SEC. 3199. CERTAIN OTHER FILAMENT YARNS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.91	Synthetic filament yarn (other than sewing thread) not put up for retail sale, single, of decitex sizes of 23 to 850, with between 4 and 68 filaments, untwisted, of nylon or other polyamides, containing 10 percent or more by weight of nylon 12 (provided for in subheading 5402.41.90)	Free	Free	No change	On or before 12/31/2006	".

SEC. 3200. CERTAIN INK-JET TEXTILE PRINTING MACHINERY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.92	Ink-jet textile printing machinery (provided for in subheading 8443.51.10)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3201. CERTAIN OTHER TEXTILE PRINTING MACHINERY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.01.93	Textile printing machinery (provided for in subheading 8443.59.10)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3203. D-MANNOSE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following heading:

‘‘	9902.01.94	D-Mannose (CAS No. 3458–28–4) (provided for in subheading 2940.00.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3204. BENZAMIDE, N-METHYL-2-[[3-[(1E)-2-(2-PYRIDINYL)-ETHENYL]-1H-INDAZOL-6-YL)THIO]-.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.95	Benzamide, N-methyl-2-[[3-[(1E)-2-(2-pyridinyl)-ethenyl]-1H-indazol-6-yl)thio]-(CAS No. 319460–85–0) (provided for in subheading 2933.99.79)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3205. 1(2H)-QUINOLINECARBOXYLIC ACID, 4-[[[3,5-BIS-(TRIFLUOROMETHYL) PHENYL] METHYL] (METHOXYCARBONYL) AMINO]-2-ETHYL- 3,4-DIHYDRO-6-(TRIFLUOROMETHYL)-, ETHYL ESTER, (2R,4S)-(9CI).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.96	1(2H)-Quinolinecarboxylic acid, 4-[[[3,5-bis-(trifluoromethyl)- phenyl]methyl]-(methoxycarb- onyl)amino]-2-ethyl-3,4-dihydro-6-(trifluoromethyl)- ethyl ester, (2R,4S)- (CAS No. 262352–17–0) (provided for in subheading 2933.49.26).	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3206. DISULFIDE,BIS(3,5-DICHLOROPHENYL)(9C1).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.97	Bis(3,5-dichlorophenyl) disulfide (CAS No. 137897–99–5) (provided for in subheading 2930.90.29)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3207. PYRIDINE, 4-[[4-(1-METHYLETHYL)-2-[(PHENYLMETHOXY)METHYL]-1H-MIDAZOL-1-YL] METHYL]-ETHANEDIOATE (1:2).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.98	Pyridine, 4-[[4-(1-methylethyl)-2-[(phenylmethoxy)- methyl]-1H-imidazol-1-yl]- methyl]-ethanedioate (1:2) (CAS No. 280129–82–0) (provided for in subheading 2933.39.61)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3208. PACLOBUTRAZOLE TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.99	(RS,3RS)-1-(4-Chlorophenyl)-4,4-dimethyl-2-(1H-1,2,4-triazol-1-yl)pentan-3-ol (paclobutrazol) (CAS No. 76738–62–0) (provided for in subheading 2933.99.22)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3209. PACLOBUTRAZOLE 2SC.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.01	Mixtures of (RS,3RS)-1-(4-chlorophenyl)-4,4-dimethyl-2-(lH-1,2,4-triazol-1-yl)pentan-3-ol (paclobutrazol) (CAS No. 76738–62–0) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3210. METHIDATHION TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.02	S-[(5-Methoxy-2-oxo-1,3,4-thiadiazol-3(2H)-yl)methyl] O,O-dimethyl phosphorodithioate (CAS No. 950–37–8) (provided for in subheading 2934.99.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3211. VANGUARD 75 WDG.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.03	Mixtures of 2-pyrimidinamine, 4-cyclopropyl-6-methyl-N-phenyl-(cyprodinil) (CAS No. 121552–61–2) and application adjuvants (provided for in subheading 3808.20.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3212. WAKIL XL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.04	Mixtures of (R)-2-[(2,6-dimethylphenyl-methoxy)acetyl-amino]propionic acid, methyl ester (mefenoxam) (CAS No. 70630–17–0), 4-(2,2-difluoro-1,3-benzodioxol-4-yl)-1H-pyrrole-3-carbonitrile (fludioxonil) (CAS No. 131341–86–1), and 2-cyano-2-methoxyimino-N-(ethylcarbam-oyl)acetamide (cymoxanil) (CAS No. 57966–95–7) with application adjuvants (the foregoing mixtures provided for in subheading 3808.20.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3213. MUCOCHLORIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.05	2-Butenoic acid, 2,3-dichloro-4-oxo-(mucochloric acid) (CAS No. 87–56–9) (provided for in subheading 2918.30.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3214. AZOXYSTROBIN TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.06	Benzeneacetic acid, (E)-2-[[6-(2-cyanophenoxy)-4-pyrimidinyl]oxy]-alpha-(methoxymethyl- ene)-, methyl ester (pyroxystrobin) (CAS No. 131860–33–8) (provided for in subheading 2933.59.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3215. FLUMETRALIN TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.07	2-Chloro-N-[2,6-dinitro-4-(tri-fluoromethyl)-phenyl]-N-ethyl-6-fluorobenzene-methanamine (flumetralin) (CAS No. 62924–70–3) (provided for in subheading 2921.49.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3216. CYPRODINIL TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.08	2-Pyrimidinamine, 4-cyclopropyl-6-methyl-N-phenyl- (cyprodinil) (CAS No. 121552–61–2) (provided for in subheading 2933.59.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3217. MIXTURES OF LAMBDA-CYHALOTHRIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.09	Mixtures of cyhalothrin (cyclopropanecarboxylic acid, 3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethyl-, cyano(3-phenoxyphenyl)-methyl ester, [1.alpha. (S*),3.alpha. (Z)]-(.+-.)-) (CAS No. 91465–08–6) and application adjuvants (provided for in subheading 3808.10.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3218. PRIMISULFURON METHYL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.10	Benzoic acid, 2-[[[[[4,6-bis-(difluoromethoxy)-2-pyrimidinyl]-amino]carbonyl]- amino]sulfonyl]-, methyl ester (primisulfuron methyl) (CAS No. 86209–51–0) (provided for in subheading 2935.00.75)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3219. 1,2-CYCLOHEXANEDIONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.11	1,2- Cyclohexanedione (CAS No. 765–87–7) (provided for in subheading 2914.29.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3220. DIFENOCONAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.12	1H-1,2,4-Triazole, 1-[[2-[2-chloro-4-(4-chlorophenoxy)-phenyl]-4-methyl-1,3-dioxolan-2-yl]methyl]- (difenoconazole) (CAS No. 119446–68–3) (provided for in subheading 2934.99.12)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3221. CERTAIN REFRACTING AND REFLECTING TELESCOPES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.13	Refracting telescopes with 50 mm or smaller lenses and reflecting telescopes with 76 mm or smaller lenses (provided for in subheading 9005.80.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3222. PHENYLISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.14	Phenylisocyanate (CAS No. 103–71–9) (provided for in subheading 2929.10.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3223. BAYOWET FT-248.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.15	Tetraethylammonium perfluorooctane-sulfonate (CAS No. 56773–42–3) (provided for in subheading 2923.90.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3224. P-PHENYLPHENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.16	p-Phenylphenol (CAS No. 92–69–3) (provided for in subheading 2907.19.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3225. CERTAIN RUBBER RIDING BOOTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.17	Horseback riding boots with soles and uppers of rubber, such boots extending above the ankle and below the knee, specifically designed for horseback riding, and having a spur rest on the heel counter (provided for in subheading 6401.92)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3226. CHEMICAL RH WATER-BASED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.18	Chemical RH water-based (iron toluene sulfonate) (comprising 75 percent water, 25 percent p-toluenesulfonic acid (CAS No. 6192–52–5) and 5 percent ferric oxide (CAS No. 1309–37–1)) (provided for in subheading 2904.10.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3227. CHEMICAL NR ETHANOL-BASED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.19	Chemical NR ethanol-based (iron toluene sulfonate) (comprising 60 percent ethanol (CAS No. 63–17–5), 33 percent p-toluenesulfonic acid (CAS No. 6192–52–5), and 7 percent ferric oxide (CAS No. 1309–37–1)) (provided for in subheading 2912.12.00 or 3824.90.28)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3228. TANTALUM CAPACITOR INK.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.20	Tantalum capacitor ink: graphite ink P7300 of 85 percent butyl acetate, 8 percent graphite, and the remaining balance of non-hazardous resins; and graphite paste P5900 of 92-96 percent water, 1-3 percent graphite (CAS No. 7782–42–5), 0.5-2 percent ammonia (CAS No. 7664–41–7), and less than 1 percent acrylic resin (CAS No. 9003–32–1) (provided for in subheading 3207.30.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3229. CERTAIN SAWING MACHINES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.84.91	Sawing machines certified for use in production of radial tires, designed for off-the-highway use, and for use on a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8465.91.00 or 8466.92.50) –	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3230. CERTAIN SECTOR MOLD PRESS MANUFACTURING EQUIPMENT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.84.89	Sector mold press machines to be used in production of radial tires designed for off-the highway use with a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8477.51.00 or 8477.90.85)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3231. CERTAIN MANUFACTURING EQUIPMENT USED FOR MOLDING.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.84.88	Machinery for molding, or otherwise forming uncured, unvulcanized rubber to be used in production of radial tires designed for off-the-highway use with a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8477.51.00 or 8477.90.85)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3232. CERTAIN EXTRUDERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.84.85	Extruders to be used in production of radial tires designed for off-the-highway use with a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8477.20.00 or 8477.90.85)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3233. CERTAIN SHEARING MACHINES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.84.81	Shearing machines used to cut metallic tissue certified for use in production of radial tires designed for off-the highway use with a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8462.31.00 or 8466.94.85)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3234. THERMAL RELEASE PLASTIC FILM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.26	Thermal release plastic film (with a substrate of polyolefin-based PET/conductive acrylic polymer, release liner of polyethylene terephthalate PET/polysiloxane, pressure sensitive adhesive of acrylic ester-based copolymer, and core of acrylonitrile-butadiene-styrene copolymer) (provided for in subheading 3919.10.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3235. CERTAIN SILVER PAINTS AND PASTES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.27	Mixtures comprising 42 to 52 percent by weight of silver metal, 7.5 to 15 percent by weight of epoxy resin, and solvent (butyl 2-ethoxyethanol acetate); mixtures comprising 53 percent by weight of silver metal, 7 percent by weight of viton resin, and solvent (isoamyl acetate); and paste adhesive preparations comprising 62 percent by weight of silver metal, 8.4 percent by weight of viton resin, and solvent (composed of 1 part butyl 2-ethoxyethanol acetate and 9 parts isoamyl acetate); (all the foregoing provided for in subheading 7115.90.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3236. POLYMER MASKING MATERIAL FOR ALUMINUM CAPACITORS (UPICOAT).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.28	Dispersions (60 percent) of polymide resins in 2,2′-oxydiethanol, dimethyl ether (provided for in subheading 3911.90.35 or 3911.90.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3237. OBPA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.29	10, 10′- Oxybisphenoxarsine (CAS No. 58–36–6) (provided for in subheading 2934.99.18)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3238. MACROPOROUS ION-EXCHANGE RESIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.30	Macroporous ion-exchange resin comprising a copolymer of styrene crosslinked with divinylbenzene, thiol functionalized (CAS No. 113834–91–6) (provided for in subheading 3914.00.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3239. COPPER 8-QUINOLINOLATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.31	Copper 8-quinolinolate (oxine-copper) (CAS No. 10380–28–6) (provided for in subheading 2933.49.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3240. ION-EXCHANGE RESIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.32	Ion-exchange resin comprising a copolymer of styrene crosslinked with divinylbenzene, iminodiacetic acid, sodium form (CAS No. 244203–30–3) (provided for in subheading 3914.00.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3241. ION-EXCHANGE RESIN CROSSLINKED WITH ETHENYLBENZENE, AMINOPHOSPONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.33	Ion-exchange resin comprising a copolymer of styrene crosslinked with ethenylbenzene, aminophosphonic acid, sodium form (CAS No. 125935–42–4) (provided for in subheading 3914.00.60)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3242. ION-EXCHANGE RESIN CROSSLINKED WITH DIVINYLBENZENE, SULPHONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.34	Ion-exchange resin comprising a copolymer of styrene crosslinked with divinylbenzene, sulfonic acid, sodium form (CAS No. 63182–08–1) (provided for in subheading 3914.00.60)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3243. 3-[(4 AMINO-3-METHOXYPHENYL) AZO]-BENZENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.35	3-[(Amino-3-methoxyphenyl)-azo]-benzenesulfonic acid (CAS No. 138–28–3) (provided for in subheading 2927.00.50)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3244. 2-METHYL-5-NITROBENZENESULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.36	2-Methyl-5-nitrobenzenesulfonic acid (CAS No. 121–03–9) (provided for in subheading 2904.90.20)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3245. 2-AMINO-6-NITRO-PHENOL-4-SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.37	2-Amino-6-nitro- phenol-4-sulfonic acid (CAS No. 96–93–5) (provided for in subheading 2922.29.60)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3246. 2-AMINO-5-SULFOBENZOIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.38	2-Amino-5- sulfobenzoic acid (CAS No. 3577–63–7) (provided for in subheading 2922.49.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3247. 2,5 BIS [(1,3 DIOXOBUTYL) AMINO] BENZENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.39	2,5-Bis[(1,3- dioxobutyl)- amino]benzenesulfonic acid (CAS No. 70185–87–4) (provided for in subheading 2924.29.71)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3248. P-AMINOAZOBENZENE 4 SULFONIC ACID, MONOSODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.40	4-[(4-Amino- phenyl)azo]- benezenesulfonic acid, monosodium salt (CAS No. 2491–71–6) (provided for in subheading 2927.00.50)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3249. P-AMINOAZOBENZENE 4 SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.41	4-[(4-Amino- phenyl)azo]- benzenesulfonic acid (CAS No. 104–23–4) (provided for in subheading 2927.00.50)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3250. 3-[(4 AMINO-3-METHOXYPHENYL) AZO]-BENZENE SULFONIC ACID, MONO-SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.42	3-[(4-Amino-3- methoxyphenyl)-azo]benzenesul- fonic acid, monosodium salt (CAS No. 6300–07–8) (provided for in subheading 2927.00.50)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3251. ET-743 (ECTEINASCIDIN).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.43	[6R-(6a,6ab,7b, 13b,14b,16a, 20R*)]-5-Acetyloxy-3′,4′, 6,6a,7,13,14,16-octahydro-6′,8,14-trihydroxy-7′,9-dimethoxy- 4,10,23-trimethylspiro[6, 16-b][3]benzazocine-20,1′(2H)-isoquinolin-19-one (ecteinascidin) (CAS No. 114899–77–3) (provided for in sub-heading 2934.99.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3252. 2,7-NAPHTHALENEDISULFONIC ACID, 5-[[4-CHLORO-6-[[2-[[4-FLUORO-6-[[5-HYDROXY-6-[(4-METHOXY-2-SULFOPHENYL)AZO]-7-SULFO-2-NAPHTHALENYL]AMINO]-1,3,5-TRIAZIN-2-YL] AMINO]-1-METHYLETHYL]AMINO]-1,3,5-TRIAZIN-2-YL]AMINO]-3-[[4-(ETHENYLSULFONYL)PHENYL]AZO]-4-HYDROX′-, SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.02.44	2,7-Naphthalene- disulfonic acid, 5-[[4-chloro-6-[[2-[[4-fluoro-6-[[5-hydroxy-6-[(4-methoxy-2-sulfophenyl)azo]-7-sulfo-2-naphthalenyl]-amino]-1,3,5-triazin-2-yl]- amino]-1-methylethyl]-amino]-1,3,5-triazin-2-yl]-amino]-3-[[4-(ethenylsulfonyl)-phenyl]azo]-4-hydroxy, sodium salt (CAS No. 168113–78-8) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3253. 1,5-NAPHTHALENE DISULFONIC ACID, 3-[[2-(ACETYLAMINO)-4-[[4-[[2-[2-(ETHENYLSULFONYL) ETHOXY] ETHYL] AMINO]-6-FLUORO-1,3, 5-TRIAZIN-2-YL]AMINO] PHENYL]AZO]-, DISODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.45	1,5-Naphthalenedi- sulfonic acid, 3-[[2-(acetylamino)-4-[[4-[[2-[2-(ethenylsulfonyl)- ethoxy]-ethyl]amino]-6-fluoro-1,3,5-triazin-2-yl]-amino]- phenyl]azo]-, disodium salt (CAS No. 98635–31–5) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3254. 7,7′-[1,3-PROPANEDIYLBIS[IMINO(6-FLUORO-1,3,5-TRIAZINE-4,2-DIYL)IMINO[2-[(AMINOCARBONYL)AMINO]-4,1-PHENYLENE]AZO]]BIS-, SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.46	7,7′-[1,3-Propanediylbis- [imino(6-fluoro-1,3,5-triazine-4,2-diyl)imino[2-[(aminocarbonyl)-amino]-4,1-phenylene]azo]]bis-, sodium salt (CAS No. 143683–24–3) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3255. CUPRATE(3-), [2-[[[[3-[[4-[[2-[2-(ETHENYLSULFONYL) ETHOXY] ETHYL]AMINO]-6-FLUORO- 1,3,5-TRIAZIN-2- YL]AMINO]-2- (HYDROXY-.KAPPA.O)- 5-SULFOPHENYL]AZO-.KAPPA.N2] PHENYLMETHYL]AZO-.KAPPA.N1]-4-SULFOBENZOATO(5-)-.KAPPA.O], TRISODIUM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.47	Cuprate(3-), [2-[[[[3-[[4-[[2-[2-(ethenylsulfonyl)- ethoxy]-ethyl]amino]-6-fluoro-1,3,5-triazin-2-yl]-amino]-2-(hydroxy-.kappa.O)-5-sulfophenyl]azo-.kappa.N2]-phenylmethyl]azo-.kappa.N1]-4-sulfobenzoato(5-)-.kappa.O], trisodium (CAS No. 106404–06–2) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3256. 1,5-NAPHTHALENEDI SULFONIC ACID, 2-[[8-[[4-[[3-[[[2-(ETHENYLSULFONYL) ETHYL]AMINO] CARBONYL]PHENYL]AMINO]- 6-FLUORO-1,3,5- TRIAZIN-2-YL]AMINO]- 1-HYDROXY-3,6- DISULFO-2-NAPHTHALENYL]AZO]-, TETRASODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.48	1,5-Naphthalenedi- sulfonic acid, 2-[[8-[[4-[[3-[[[2- (ethenylsulfonyl)- ethyl]-amino]carbonyl]- phenyl]amino]-6-fluoro-1,3,5-triazin-2-yl]amino]-1-hydroxy-3,6-disulfo-2-naphthalenyl]-azo]-, tetrasodium salt (CAS No. 116912-36-8) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3257. PTFMBA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.49	p-(Trifluoro-methyl)benzaldehyde (CAS No. 455–19–6) (provided for in subheading 2913.00.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3258. BENZOIC ACID, 2-AMINO-4-[[(2,5-DICHLOROPHENYL) AMINO]CARBONYL]-, METHYL ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.51	Benzoic acid, 2-amino-4-[[(2,5-dichlorophenyl)- amino]carbonyl]-, methyl ester (CAS No. 59673–82–4) (provided for in subheading 2924.29.71)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3259. IMIDACLOPRID PESTICIDES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.52	Mixtures of imidacloprid (1-[(6-Chloro-3-pyridinyl)methyl]-*N*-nitro-2- imidazolidinimine) (CAS No. 138261–41–3) with application adjuvants (provided for in subheading 3808.10.25)	5.7%	No change	No change	On or before 12/31/2006	’’.

SEC. 3260. BETA-CYFLUTHRIN.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.54	beta-Cyfluthrin (CAS No. 68359–37–5) (provided for in subheading 2926.90.30)	4.3%	No change	No change	On or before 12/31/2006	’’.

SEC. 3261. IMIDACLOPRID TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.55	Imidacloprid (1-[(6-Chloro-3-pyridinyl)methyl]-*N*-nitro-2-imidazolidinimine) (CAS No. 138261–41–3) (provided for in subheading 2933.39.27)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3262. BAYLETON TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.56	Triadimefon (1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4-triazol-1-yl)-2-butanone) (CAS No. 43121–43–3) (provided for in subheading 2933.99.22)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3263. PROPOXUR TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.57	Propoxur (2-(1-methylethoxy)-phenol methyl-carbamate) (CAS No. 114–26–1) (provided for in subheading 2924.29.47)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3264. MKH 6561 ISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.58	A mixture of 30 percent 2-(carbomethoxy)-benzenesulfonyl isocyanate (CAS No. 13330–20–7) and 70 percent xylenes (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3265. PROPOXY METHYL TRIAZOLONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.59	A mixture of 20 percent propoxy-methyltriazolone (3H-1,2,4-triazol-3-one, 2,4- dihydro-4-methyl-5-propoxy-) (CAS No. 1330–20–7) and triazolone (3H-1,2,4-triazol-3-one, 2,4- dihydro-4-methyl-5-propoxy-) (CAS No. 1330–2–7) (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3266. NEMACUR VL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.60	Fenamiphos (ethyl 4-(methylthio)-m-tolyl-isospropylphos- phoramidate) (CAS No. 22224–92–6) (provided for in subheading 2930.90.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3267. METHOXY METHYL TRIAZOLONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.61	2,4-Dihydro-5-methoxy-4-methyl-3*H*-1,2,4-triazol-3-one (CAS No. 135302–13–5) (provided for in subheading 2933.99.97)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3268. LEVAFIX GOLDEN YELLOW E-G.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.62	Reactive yellow 27 (1H-Pyrazole-3-carboxylic acid, 4-[[4-[[(2,3-dichloro-6-quinoxalinyl)carbonyl]amino]-2- sulfophenyl]- azo]-4,5-dihydro-5-oxo-1- (4-sulfophenyl)-, trisodium salt) (CAS No. 75199–00–7) (provided for in subheading 3204.16.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3269. LEVAFIX BLUE CA/REMAZOL BLUE CA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.63	Cuprate(4-), [2-[[3-[[substituted]-1,3,5-triazin-2-yl]amino]-2-hydroxy-5- sulfophenyl]- (substituted)azo], sodium salt (CAS No. 156830–72–7) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3270. REMAZOL YELLOW RR GRAN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.64	Benzenesulfonic- acid, 2-amino-4-(cyanoamino)-6-[(3-sulfo- phenyl)amino]- 1,3,5-triazin-2-yl]amino]-5-[[4-[[2-(sulfoxy)- ethyl]sulfonyl]- phenyl]azo]-, lithium/sodium salt (CAS No. 189574–45–6) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3271. INDANTHREN BLUE CLF.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.65	Vat blue 66 (9,10-Anthra- cenedione, 1,1′-[(6-phenyl-1,3,5- triazine-2,4-diyl)diimino]-bis[3-acetyl-4- amino-) (CAS No. 32220–82–9) (provided for in subheading 3204.15.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3272. INDANTHREN YELLOW F3GC.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.66	Vat yellow 33 ([1,1′-Biphenyl]- 4-carboxamide, 4′,4′′′-azobis[N- (9,10-dihydro-9,10-dioxo-1- anthracenyl)-) (CAS No. 12227–50–8) (provided for in subheading 3204.15.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3273. ACETYL CHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.67	Acetyl chloride (CAS No. 75–36–5) (provided for in subheading 2915.90.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3274. 4-METHOXY-PHENACYCHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.68	4-Methoxyphena- cyl chloride (CAS No. 2196–99–8) (provided for in subheading 2914.70.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3275. 3-METHOXY-THIOPHENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.69	3-Methoxy-thiophenol (CAS No. 15570–12–4) (provided for in subheading 2930.90.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3276. LEVAFIX BRILLIANT RED E-6BA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.70	Reactive red 159 (2,7-naphthalenedisulfonic acid, 5-(benzoylamino)- 3-[[5-[[(5- chloro-2,6-difluoro-4-pyrimidinyl)-amino]methyl]- 1-sulfo-2- naphthalenyl]-azo]-4-hydroxy-, lithium sodium salt) (CAS No. 83400–12–8) (provided for in subheading 3204.16.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3277. REMAZOL BR. BLUE BB 133 PERCENT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.71	Reactive blue 220 (cuprate(4-), [4,5-dihydro-4- [[8-hydroxy-7- [[2-hydroxy-5- methoxy-4-[[2- (sulfoxy)ethyl]- sulfonyl]- phenyl]azo]-6- sulfo-2-naphthal- enyl]azo]-5-oxo- 1-(4-sulfophenyl)-1H-pyrazole-3- carboxylato(6-)]-, sodium) (CAS No. 90341–71–2) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3278. FAST NAVY SALT RA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.72	Benzenediazonium, 4-[(2,6- dichloro-4-nitrophenyl)azo]- 2,5-dimethoxy-, (T-4)-tetra- chlorozincate(2-) (2:1) (CAS No. 63224–47–5) (provided for in subheading 2927.00.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3279. LEVAFIX ROYAL BLUE E-FR.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.73	Reactive blue 224 (ethanol, 2,2′-[[6,13-dichloro-3,10- bis[[2-sulfoxy)- ethyl]amino]-triphenodioxaz-inediyl]bis(sul- fonyl)]bis-, bis(hydrogen sulfate) ester, potassium sodium salt (CAS No. 108692–09–7) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3280. P-CHLOROANILINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.74	p-Chloroaniline (CAS No. 106–47–8) (provided for in subheading 2921.42.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3281. ESTERS AND SODIUM ESTERS OF PARAHYDROXYBENZOIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.75	Methyl 4-hydroxybenzoate (CAS No. 99–76–3); propyl 4-hydroxybenzoate (CAS No. 94–13–3); ethyl 4-hydroxybenzoate (CAS No. 120–47–8); butyl 4-hydroxybenzoate (CAS No. 94–26–8); benzyl 4-hydroxybenzoate (CAS No. 94–18–8); methyl 4-hydroxybenzoate, sodium salt (CAS No. 5026–62–0); propyl 4-hydroxybenzoate, sodium salt (CAS No. 35285–69–9); ethyl 4-hydroxybenzoate, sodium salt (CAS No. 35285–68–8); and butyl 4-hydroxybenzoate, sodium salt (CAS No. 36457–20–2) (all the foregoing provided for in subheading 2918.29.65 or 2918.29.75)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3282. SANTOLINK EP 560.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.76	Phenol-formaldehyde polymer, butylated (CAS No. 96446–41–2) (provided for in subheading 3909.40.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3283. PHENODUR VPW 1942.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.77	Phenol, 4,4′-(1-methylethylidene)bis-, polymer with (chloromethyl)-oxirane and phenol polymer with formaldehyde modified with chloroacetic acid (provided for in subheading 3909.40.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3284. PHENODUR PR 612.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.78	Formaldehyde, polymer with 2-methylphenol, butylated (CAS No. 118685–25–9) (provided for in subheading 3909.40.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3285. PHENODUR PR 263.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.79	Phenol, polymer with formaldehyde (CAS No. 126191–57–9) and urea, polymer with formaldehyde (CAS No. 68002–18–6) dissolved in a mixture of isobutanol and n-butanol (provided for in subheading 3909.40.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3286. MACRYNAL SM 510 AND 516.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.80	Neodecanoic acid, oxiranylmethyl ester, polymer with ethenylbenzene, 2-hydroxyethyl 2-methyl-2-propenoate, methyl 2-methyl-2-propenoate and 2-propenoic acid (CAS No. 98613–27–5) (provided for in subheading 3906.90.50)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3287. ALFTALAT AN 725.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.81	1,3-Benzenedicarboxylic acid, polymer with 1,4-benzenedicarboxylic acid and 2,2-dimethyl-1,3-propanediol (CAS No. 25214–38–4) (provided for in subheading 3907.99.00)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3288. RWJ 241947.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.82	(+)-5-[[6-[(2-Fluorophenyl)- methoxy]-2-naphthalenyl]-methyl]-2,4-thiazolidinedione (CAS No. 161600–01–7) (provided for in subheading 2934.10.10)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3289. RWJ 394718.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.83	1-Propanone, 3-(5-benzofuranyl)-1-[2-hydroxy-6-[[6-O-(methoxycarbonyl-beta-D-glucopyranosyl]-oxy]-4-methylphenyl- (CAS No. 209746–59–8) (provided for in subheading 2932.99.61)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3290. RWJ 394720.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.84	3-(5-Benzofuranyl)-1-[2-β-D-glucopyranosyloxy- 6-hydroxy-4-methylphenyl]-1-propanone (CAS No. 209746–56–5) (provided for in subheading 2932.99.61)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3291. 3,4-DCBN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.85	3,4-Dichlorobenzonitrile (CAS No. 6574–99–8) (provided for in subheading 2926.90.12)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3292. CYHALOFOP.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.86	Propanoic acid, 2-[4-(cyano-2-fluorophenoxy)-phenoxy]butyl ester(2R) (CAS No. 122008–85–9) (provided for in subheading 2926.90.25)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3293. ASULAM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.87	Methyl sulfanilylcarbamate, sodium salt (asulam sodium salt) (CAS No. 2302–17–2) imported in bulk form (provided for in subheading 2935.00.75), or imported in forms or packings for retail sale or mixed with application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3294. FLORASULAM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.88	Mixtures of florasulam ([1,2,4]- triazolo[1,5-c]- pyrimidine-2-sulfonamide, N-(2,6-difluorophenyl)-8-fluoro-5-methoxy-) (CAS No. 145701–23–1) and application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3295. PROPANIL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.89	Propanamide, N-(3,4-dichlorophenyl)- (CAS No. 709–98–8) (provided for in subheading 2924.29.47)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3296. HALOFENOZIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.90	Benzoic acid, 4-chloro-2-benzoyl-2-(1,1-dimethylethyl)- hydrazide (halofenozide) (CAS No. 112226–61–6) (provided for in subheading 2928.00.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3297. ORTHO-PHTHALALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.92	1,2-Benzenedicarboxaldehyde (CAS No. 643–79–8) (provided for in subheading 2912.29.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3298. TRANS 1,3-DICHLOROPENTENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

‘‘	9902.02.93	Mixed cis and trans isomers of 1,3-dichloro-propene (CAS No. 10061–02–6) (provided for in subheading 2903.29.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3299. METHACRYLAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.94	Methacrylamide (CAS No. 79–39–0) (provided for in subheading 2924.19.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3300. CATION EXCHANGE RESIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.95	2-Propenoic acid, polymer with diethenylbenzene (CAS No. 9052–45–3) (provided for in subheading 3914.00.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3301. GALLERY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.96	N-[3-(1-Ethyl-1-methylpropyl)-5-isoxazolyl]-2,6-dimethoxybenzamide (isoxaben) (CAS No. 82558–50–7) (provided for in subheading 2934.99.15)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3302. NECKS USED IN CATHODE RAY TUBES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.02.97	Necks of a kind used in cathode ray tubes (provided for in subheading 7011.20.80)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3303. POLYTETRAMETHYLENE ETHER GLYCOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

"	9902.02.98	Polytetramethylene ether glycol (tetrahydro-3-methylfuran, polymer with tetrahydrofuran) (CAS No. 38640–26–5) (provided for in subheading 3907.20.00)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3304. LEAF ALCOHOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

"	9902.02.99	cis-3-Hexen-1-ol (CAS No. 928–96–1) (provided for in subheading 2905.29.90)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3305. COMBED CASHMERE AND CAMEL HAIR YARN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.01	Yarn of combed cashmere or yarn of camel hair (provided for in subheading 5108.20.60)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3306. CERTAIN CARDED CASHMERE YARN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.02	Yarn of carded cashmere of 6 run or finer (equivalent to 19.35 metric yarn system) (provided for in subheading 5108.10.60)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3307. SULFUR BLACK 1.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.03	Sulfur black 1 (CAS No. 1326–82–5) (provided for in subheading 3204.19.30)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3308. REDUCED VAT BLUE 43.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.04	Reduced vat blue 43 (CAS No. 85737–02–6) (provided for in subheading 3204.15.40)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3309. FLUOROBENZENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.05	Fluorobenzene (CAS No. 462–06–6) (provided for in subheading 2903.69.70)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3310. CERTAIN RAYON FILAMENT YARN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.06	High tenacity multiple (folded) or cabled yarn of viscose rayon (provided for in subheading 5403.10.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3311. CERTAIN TIRE CORD FABRIC.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.07	Tire cord fabric of high tenacity yarn of viscose rayon (provided for in subheading 5902.90.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3312. DIRECT BLACK 184.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.08	Direct black 184 (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3313. BLACK 263 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.09	5-[4-(7-Amino-1-hydroxy-3-sulfo-naphthalen-2-ylazo)-2,5-bis(2-hydroxyethoxy)-phenylazo]isophthalic acid, lithium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3314. MAGENTA 364.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.10	5-[4-(4,5-Dimethyl-2-sulfo-phenylamino)-6-hydroxy-[1,3,5]triazin-2-ylamino]-4-hydroxy-3-(1-sulfonaphthalen-2-ylazo)naphthalene-2,7-disulfonic acid, sodium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3315. THIAMETHOXAM TECHNICAL.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.11	Thiamethoxam (3-[(2-chloro-5-thiazolyl)methyl)- tetrahydro-5-methyl-N-nitro-1,3,5-oxadiazin-4-imine) (CAS No. 153719–23–4) (provided for in subheading 2934.10.90)	2.6%	No change	No change	On or before 12/31/2004	’’.

(b) CALENDAR YEAR 2005.—

(1) IN GENERAL.—Heading 9902.03.11, as added by subsection (a), is amended—

(A) by striking ‘‘2.6%’’ and inserting ‘‘2.54%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2005’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

(c) CALENDAR YEAR 2006.—

(1) IN GENERAL.—Heading 9902.03.11, as added by subsection (a) and amended by this section, is further amended—

(A) by striking ‘‘2.54%’’ and inserting ‘‘3.2%’’; and

(B) by striking ‘‘On or before 12/31/2005’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2006.

SEC. 3316. CYAN 485 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.12	2-[(Hydroxyethyl- sulfamoyl)-sulfophthalocyaninato] copper (II), mixed isomers (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3317. DIRECT BLUE 307.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.14	Direct blue 307 (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3318. DIRECT VIOLET 107.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.16	Direct violet 107 (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3319. FAST BLACK 286 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.17	1,3-Benzenedicarboxylic acid, 5-[[4-[(7-amino-1-hydroxy-3-sulfo-2-naphthalenyl)-azo]-6-sulfo-1-naphthalenyl]-azo]-, sodium salt (CAS No. 201932–24–3) (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3320. MIXTURES OF FLUAZINAM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.18	Mixtures of fluazinam (3-chloro-N-(3-chloro-2,6- dinitro-4-(trifluoromethyl)-phenyl-5-(trifluoromethyl)-2-pyridinamine) (CAS No. 79622–59–6) and application adjuvants (provided for in subheading 3808.20.15)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3321. PRODIAMINE TECHNICAL.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.19	Prodiamine (2,6-dinitro-N1,N1-dipropyl-4-(trifluoromethyl)-1,3-benzenediamine (CAS No. 29091–21–2) (provided for in subheading 2921.59.80)	0.53%	No change	No change	On or before 12/31/2004	”.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.03.19, as added by subsection (a), is amended—

(A) by striking “0.53%” and inserting “Free”; and

(B) by striking “On or before 12/31/2004” and inserting “On or before 12/31/2006”.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3322. CARBON DIOXIDE CARTRIDGES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.20	Carbon dioxide in threaded 12-, 16-, and 25-gram non-refillable cartridges (provided for in subheading 2811.21.00)	Free	Free	No change	On or before 12/31/2006	”.

SEC. 3323. 12-HYDROXYOCTADECANOIC ACID, REACTION PRODUCT WITH N,N-DIMETHYL, 1,3-PROPANEDIAMINE, DIMETHYL SULFATE, QUATERNIZED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.21	12-Hydroxyoctadecanoic acid, reaction product with *N,N*-dimethyl- 1,3-propanediamine, dimethyl sulfate, quaternized (CAS No. 70879–66–2) (provided for in subheading 3824.90.40)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3324. 40 PERCENT POLYMER ACID SALT/ POLYMER AMIDE, 60 PERCENT BUTYL ACETATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.03.22	2-Oxepanone, polymer with aziridine and tetrahydro-2H-pyran-2-one, dodecanoate ester, 40 percent solution in N-butyl acetate (provided for in subheading 3208.90.00)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3325. 12-HYDROXYOCTADECANOIC ACID, REACTION PRODUCT WITH N,N-DIMETHYL- 1,3-PROPANEDIAMINE, DIMETHYL SULFATE, QUATERNIZED, 60 PERCENT SOLUTION IN TOLUENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.23	12-Hydroxyoctadecanoic acid, reaction product with *N,N*-dimethyl- 1,3-propanediamine, dimethyl sulfate, quaternized (CAS No. 70879–66–2), 60 percent solution in toluene (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3326. POLYMER ACID SALT/POLYMER AMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.24	2-Oxepanone, polymer with aziridine and tetrahydro-2H-pyran-2-one, dodecanoate ester (provided for in subheading 3824.90.91)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3327. 50 PERCENT AMINE NEUTRALIZED PHOSPHATED POLYESTER POLYMER, 50 PERCENT SOLVESSO 100.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.25	50 percent amine neutralized phosphated polyester polymer, 50 percent solvesso 100 (CAS Nos. P–99–1218, 64742–95–6, 95–63–6, 108–67–8, 98–82–8, and 1330–20–7) (provided for in subheading 3907.99.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3328. 1-OCTADECANAMINIUM, N,N-DI-METHYL-N-OCTADECYL-, (SP-4-2)-[29H,31H-PHTHALOCYANINE-2-SULFONATO(3-)-.KAPPA.N29,.KAPPA.N30,.KAPPA.N31,.KAPPA.N32]CUPRATE(1-).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.26	1-Octa- decanaminium, *N,N*-dimethyl-*N*-octadecyl-, (Sp-4-2)-[29H,31H-phthalocyanine-2-sulfonato(3-)-.kappa.N29, .kappa.N30, .kappa.N31, .kappa.N32] cuprate(1-) (CAS No. 70750-63-9) (provided for in subheading 3824.90.28)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3329. CHROMATE(1-)-BIS[1-[(5-CHLORO–2-HYDROXYPHENYL)AZO]–2-NAPTHAL ENOLATO(2-)]-,HYDROGEN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.27	Chromate(1-)- bis[1-[(5-chloro-2- hydroxyphenyl)azo]-2- naphthalenolato- (2-)]-, hydrogen (CAS No. 31714–55–3) (provided for in subheading 2942.00.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3330. BRONATE ADVANCED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.29	Mixtures of bromoxynil octanoate (3,5-dibromo-4-hydroxybenzo-nitrile octanoate (CAS No. 1689–99–2) with application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3331. N-CYCLOHEXYLTHIOPHTHALIMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.30	N-Cyclohexylthiophthalimide (CAS No. 17796–82–6) (provided for in subheading 2930.90.24)	3%	No change	No change	On or before 12/31/2006	’’.

SEC. 3332. CERTAIN HIGH-PERFORMANCE LOUDSPEAKERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.85.20	Loudspeakers not mounted in their enclosures (provided for in subheading 8518.29.80), the foregoing which meet a performance standard of not more than 1.5 dB for the average level of 3 or more octave bands, when such loudspeakers are tested in a reverberant chamber	Free	No change	No change	On or before 12/31/2006	".

SEC. 3333. BIO-SET INJECTION RCC.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following heading:

"	9902.03.33	Polymeric apparatus, comprising a removable cap, an injection port attached to an air vent filter and a fixed needle of plastics and a base for attaching the whole to a vial with a 13 mm or 20 mm flange, of a kind used for transferring diluent from a prefilled syringe (without needle) to a vial containing a powdered or lyophilized medicament and, after mixing, transferring the medicament back to the syringe for subsequent administration to the patient (provided for in subheading 3923.50.00)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3334. PENTA AMINO ACETO NITRATE COBALT III (COFLAKE 2).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.34	Mixtures of (acetato)pent-ammine cobalt dinitrate (CAS No. 14854–63–8) with a polymeric or paraffinic carrier (provided for in subheading 3815.90.50)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3335. OXASULFURON TECHNICAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.35	Benzoic acid, 2-[[[[(4,6-dimethyl-2-pyrimidinyl)-amino]carbonyl]-amino]sulfonyl]-, 3-oxetanyl ester (CAS No. 144651–06–9) (provided for in subheading 2935.00.75)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3336. CERTAIN MANUFACTURING EQUIPMENT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.84.83	Machine tools for working wire of iron or steel, certified for use in production of radial tires designed for off-the-highway use and for use on a rim measuring 63.5 cm or more in diameter (provided for in subheading 4011.20.10, 4011.61.00, 4011.63.00, 4011.69.00, 4011.92.00, 4011.94.40, or 4011.99.45), numerically controlled, or parts thereof (provided for in subheading 8463.30.00 or 8466.94.85)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3337. 4-AMINOBENZAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.03.37	4-Aminobenzamide (CAS No. 2835–68–9) (provided for in subheading 2924.29.76)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3338. FOE HYDROXY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.38	N-(4-Fluorophenyl)-2-hydroxy-N-(1-methylethyl)-acetamide (CAS No. 54041–17–7) (provided for in subheading 2924.29.71)	5.2%	No change	No change	On or before 12/31/2006	’’.

SEC. 3339. MAGENTA 364 LIQUID FEED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.39	5-[4-(4,5-Dimethyl-2-sulfo- phenylamino)-6-hydroxy-[1,3,5]triazin-2-ylamino]-4-hydroxy-3-(1-sulfonaphthalen-2-ylazo)naphthalene-2,7-disulfonic acid, sodium ammonium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3340. TETRAKIS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.40	Tetrakis ((2,4-di-tert-butylphenyl)-4,4-biphenylene diphosphonite) (CAS No. 38613–77–3) (provided for in subheading 2835.29.50)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3341. PALMITIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.41	Palmitic acid, with a purity of 90 percent or more (CAS No. 57–10–3) (provided for in subheading 2915.70.00)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3342. PHYTOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.42	3,7,11,15-Tetramethylhexadec-2-en-1-ol (CAS No. 7541–49–3) (provided for in subheading 2905.22.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3343. CHLORIDAZON.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.43	Chloridazon (5-Amino-4-chloro-2- phenyl-3(2H)-pyridazinone) (CAS No. 1698–60–8) put up in forms or packings for retail sale or mixed with application adjuvants (provided for in subheading 3808.30.15)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3344. DISPERSE ORANGE 30, DISPERSE BLUE 79:1, DISPERSE RED 167:1, DISPERSE YELLOW 64, DISPERSE RED 60, DISPERSE BLUE 60, DISPERSE BLUE 77, DISPERSE YELLOW 42, DISPERSE RED 86, AND DISPERSE RED 86:1.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.45	Propanenitrile, 3-[[2-(acetyloxy)- ethyl]-[4-[(2,6-dichloro-4-nitro- phenyl)azo]-phenyl]amino]- (disperse orange 30) (CAS No. 5261–31–4) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006
‘‘	9902.03.46	Acetamide, N-[5-[bis[2-(acetyloxy)-ethyl]amino]-2-[(2-bromo-4,6-dinitrophenyl)- azo]-4-methoxyphenyl]-(disperse blue 79:1) (CAS No. 3618–72–2) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006

‘‘	9902.03.47	Acetamide, N-[5-[bis[2-(acetyloxy)-ethyl]amino]-2-[(2-chloro-4-nitrophenyl)-azo]phenyl]- (disperse red 167:1) (CAS No. 1533–78–4) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.48	1H-Indene-1,3(2H)-dione, 2-(4-bromo-3-hydroxy-2-quinol-inyl)- (disperse yellow 64) (CAS No. 10319–14–9) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.49	9,10-Anthra- cenedione, 1-amino-4-hydroxy-2-phenoxy- (disperse red 60) (CAS No. 17418–58–5) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.50	1H-Naphth[2,3-f]isoindole-1,3,5,10(2H)-tetrone, 4,11-diamino-2-(3-methoxypropyl)-(disperse blue 60) (CAS No. 12217–80–0) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.51	9,10-Anthracenedione, 1,8-dihydroxy-4-nitro-5-(phenylamino)- (disperse blue 77) (CAS No. 20241–76–3) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.52	Benzenesulfonamide, 3-nitro-N-phenyl-4-(phenylamino)- (disperse yellow 42) (CAS No. 5124–25–4) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.53	Benzenesulfonamide, N-(4-amino-9,10-dihydro-3-methoxy-9,10-dioxo-1-anthracenyl)-4-methyl- (disperse red 86) (CAS No. 81–68–5) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.03.54	Benzenesulfonamide, N-(4-amino-9,10-dihydro-3-methoxy-9,10-dioxo-1-anthracenyl)- (disperse red 86:1) (CAS No. 69563–51–5) (provided for in subheading 3204.11.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3345. DISPERSE BLUE 321.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.55	1-Naphthalenamine, 4-[(2-bromo-4,6-dinitrophenyl)- azo]-N-(3-methoxypropyl)- (disperse blue 321) (CAS No. 70660–55–8) (provided for in subheading 3204.11.35)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3346. DIRECT BLACK 175.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.56	Cuprate(4-), [m-[5-[(4,5-dihydro-3-methyl-5-oxo- 1-phenyl-1H-pyrazol-4-yl)azo]-3-[[4′-[[3,6-disulfo-2-hydroxy.kappa.O-1-naphthalenyl]azo-.kappa.N1]-3,3′-di(hydroxy-.kappa.O)[1,1′-biphenyl]-4-yl]azo-.kappa.N1]-4-(hydroxy-.kappa.O)-2,7-naphtha- lenedisulf-onato(8-)]]di-, tetrasodium (direct black 175) (CAS No. 66256–76–6) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3347. DISPERSE RED 73 AND DISPERSE BLUE 56.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

‘‘	9902.03.57	Benzonitrile, 2-[[4-[(2-cyanoethyl)-ethylamino]- phenyl]azo]-5-nitro- (disperse red 73) (CAS No. 16889–10–4) (provided for in subheading 3204.11.10)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.58	9,10-Anthra- cenedione, 1,5-diaminochloro-4,8-dihydroxy- (disperse blue 56) (CAS No. 12217–79–7) (provided for in subheading 3204.11.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3348. ACID BLACK 132.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.59	[3-(Hydroxy-.kappa.O)-4-[[2-(hydroxy-.kappa.O)-1-naphthalenyl]azo-.kappa.N1]-1-naphthal-enesulfonato (3-)]-[1-[[2-(hydroxy-.kappa.O)-5-[(2-methoxyphenyl]-azophenyl]-azo-.kappa.N1]-2-naphthalenolato (2-).kappa.O]-, disodium (acid black 132) (CAS No. 27425–58–7) (provided for in subheading 3204.12.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3349. ACID BLACK 132 AND ACID BLACK 172.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

‘‘	9902.03.59	[3-(Hydroxy- kO)-4- [[2-(hydroxy-.kappa.O)-1-naphthalenyl]azo-.kappa.N1]-1-naphthal-enesulfonato (3)]-[1-[[2-(hydroxy-.kappa.O)-5-[(2-methoxyphenyl)-azo]phenyl]-azo-kappa.N1]-2-naphthalenolato (2-)-.kappa.O]-, disodium (acid black 132) (CAS No. 57693–14–8) (provided for in subheading 3204.12.45)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.60	Chromate(3-), bis[3-(hydroxy- .kappa.O)-4-[[2-(hydroxy-.kappa.O)-1-naphthalenyl]azo-.kappa.N1]-7-nitro-1-naphthal-enesulfonato(3-)]-, trisodium (acid black 172) (CAS No. 57693–14–8) (provided for in subheading 3204.12.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3350. ACID BLACK 107.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.61	Chromate(2-), [1-[[2-(hydroxy-.kappa.O)-3,5-dinitro- phenyl]azo-.kappa.N1]-2-naphthal-enolato(2-)-.kappa.O][3-(hydroxy.kappa.O)-4-[[2 (hydroxy-.kappa.O)-1-naphthalenyl]azo-.kappa.N1]-7- nitro-1-naphthalenesulfonato(3-)]-, sodium hydrogen (acid black 107) (CAS No. 12218–96–1) (provided for in subheading 3204.12.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3351. ACID YELLOW 219, ACID ORANGE 152, ACID RED 278, ACID ORANGE 116, ACID ORANGE 156, AND ACID BLUE 113.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.62	Benzenesulfonic acid, 3-[[3-methoxy-4-[(4-methoxyphenyl)- azo]phenyl]azo]-, sodium salt (acid yellow 219) (CAS No. 71819–57–3) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.63	Benzenesulfonic acid, 3-[[4-[[4-(2-hydroxybut-oxy)phenyl]azo]-5-methoxy-2-methyl-phenyl]azo]-, monolithium salt (acid orange 152) (CAS No. 71838–37–4) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.64	Chromate(1-), bis[3-[4-[[5-chloro-2-(hydroxy.kappa.O)- phenyl]azo-.kappa.N1]-4,5-dihydro-3-methyl-5-(oxo-.kappa.O)-1H-pyrazol-1-yl]benzenesul- fonamidato(2-)]-, sodium (acid red 278) (CAS No. 71819–56–2) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.65	Benzenesulfonic acid, 3-[[4-[(2-ethoxy-5-methylphenyl)- azo]-1-naphthal- enyl]azo]-, sodium salt (acid orange 116) (CAS No. 12220–10–9) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.
‘‘	9902.03.66	Benzenesulfonic acid, 4-[[5-meth- oxy-4-[(4-methoxy- phenyl)azo]-2-methyl-phenyl]azo]-, sodium salt (acid orange 156) (CAS No. 68555–86–2) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.

‘‘	9902.03.67	1-Naphthalene- sulfonic acid, 8-(phenylamino)-5-[[4-[(3- sulfophenyl)- azo]-1-naphthalenyl]-azo]-, disodium salt (acid blue 113) (CAS No. 3351–05–1) (provided for in subheading 3204.12.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3352. EUROPIUM OXIDES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.22	Europium oxides having a purity of at least 99.99 percent (CAS No. 1308–96–7) (provided for in subheading 2846.90.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3353. LUGANIL BROWN NGT POWDER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.76	Acid brown 290 (CAS No. 12234–74–1) (provided for in subheading 3204.12.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3354. THIOPHANATE-METHYL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.77	4,4′-*o*-Phenylenebis-(3-thioallophanic acid), dimethyl ester (thiophanate-methyl) (CAS No. 23564–05–8) (provided for in subheading 2930.90.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3355. MIXTURES OF THIOPHANATE-METHYL AND APPLICATION ADJUVANTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

‘‘	9902.03.79	Mixtures of 4,4′-o-Phenylenebis-(3-thioallophanic acid), dimethyl ester (Thiophanate-methyl) (CAS No. 23564–05–8) and application adjuvants (provided for in subheading 3808.20.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3356. HYDRATED HYDROXYPROPYL METHYLCELLULOSE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.80	2-Hydroxypropyl methyl cellulose (CAS No. 9004–65–3)(provided for in subheading 3912.39.00)	0.4%	No change	No change	On or before 12/31/2006	’’.

SEC. 3357. C 12–18 ALKENES, POLYMERS WITH 4-METHYL-1-PENTENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.86	C 12–18 alkenes, polymers with 4-methyl-1-pentene (CAS No. 68413–03–6) (provided for in subheading 3902.90.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3358. CERTAIN 12-VOLT BATTERIES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.87	12V Lead-acid storage batteries, of a kind used for the auxiliary source of power for burglar or fire alarms and similar apparatus of subheading 8531.10.00 (provided for in subheading 8507.20.80)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3359. CERTAIN PREPARED OR PRESERVED ARTICHOKES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.89	Artichokes, prepared or preserved otherwise than by vinegar or acetic acid, not frozen (provided for in subheading 2005.90.80)	13.8%	No change	No change	On or before 12/31/2006	’’.

SEC. 3360. CERTAIN OTHER PREPARED OR PRESERVED ARTICHOKES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.90	Artichokes, prepared or preserved by vinegar or acetic acid (provided for in subheading 2001.90.25)	7.5%	No change	No change	On or before 12/31/2006	’’.

SEC. 3361. ETHYLENE/TETRAFLUOROETHYLENE COPOLYMER (ETFE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.91	Ethylene-tetra- fluoroethylene copolymers (ETFE) (provided for in subheading 3904.69.50)	4.9%	No change	No change	On or before 12/31/2006	’’.

SEC. 3362. ACETAMIPRID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.92	N1-[(6-Chloro-3-pyridyl)methyl]-N2-cyano-N1-methylacetamidine (CAS No. 135410–20–7) (provided for in subheading 2933.39.27)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3363. CERTAIN MANUFACTURING EQUIPMENT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

‘‘	9902.84.94	Extruders, screw type, suitable for processing polyester thermoplastics in a cast film production line (provided for in subheading 8477.20.00)	Free	No change	No change	On or before 12/31/2006	
	9902.84.95	Casting machinery suitable for processing polyester thermoplastics into a sheet in a cast film production line (provided for in subheading 8477.80.00)	Free	No change	No change	On or before 12/31/2006	
	9902.84.96	Transverse direction orientation tenter machinery, suitable for processing polyester film in a cast film production line (provided for in subheading 8477.80.00)	Free	No change	No change	On or before 12/31/2006	
	9902.84.97	Winder machinery suitable for processing polyester film in a cast film production line (provided for in subheading 8477.80.00)	Free	No change	No change	On or before 12/31/2006	
	9902.84.98	Slitting machinery suitable for processing polyester film in a cast film production line (provided for in subheading 8477.80.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3364. TRITICONAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.99	E-5-(4-Chlorobenzylidene)-2,2-dimethyl-1-(1H-1,2,4-triazol-1-ylmethyl)cyclopentanol. (CAS No.131983–72–7) (provided for in subheading 2933.99.12)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3365. CERTAIN TEXTILE MACHINERY.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.88	Weaving machines (looms), shuttleless type, for weaving fabrics of a width exceeding 30 cm but not exceeding 4.9 m, entered without off-loom or large loom take-ups, drop wires, heddles, reeds, harness frames, or beams (provided for in subheading 8446.30.50)	2.7%	No change	No change	On or before 12/31/2006	’’.

SEC. 3366. 3-SULFINOBENZOIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.01	3-Sulfinobenzoic acid (CAS No. 15451–00–0) (provided for in subheading 2930.90.29)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3367. POLYDIMETHYLSILOXANE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.02	Polydimethylsiloxane (CAS No. 63148–62–9) (provided for in subheading 3910.00.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3368. BAYSILONE FLUID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.03	An alkyl modified polydimethylsiloxane (CAS No. 102782–93–4) (provided for in subheading 3910.00.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3369. ETHANEDIAMIDE, N- (2-ETHOXYPHENYL)-N′- (4-ISODECYLPHENYL)-.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.05	Preparations based on ethanediamide, N-(2-ethoxyphenyl)-N′-(4-isodecylphenyl)- (CAS No. 82493–14–9) (provided for in subheading 3812.30.60)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3370. 1-ACETYL-4-(3-DODECYL-2, 5-DIOXO-1-PYRROLIDINYL)-2,2,6,6-TETRAMETHYL-PIPERIDINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.06	1-Acetyl-4-(3-dodecyl-2,5-dioxo-1-pyrrolidinyl)-2,2,6,6-tetramethylpiperidine (CAS No. 106917–31–1) (provided for in subheading 2933.39.61)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3371. ARYL PHOSPHONITE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.07	Reaction products of phosphorus trichloride with 1,1′-biphenyl and 2,4-bis(1,1-dimethylethyl)phenol (CAS No. 119345–01–6) (provided for in subheading 3812.30.60)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3372. MONO OCTYL MALIONATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.08	mono-2-Ethylhexyl maleate (CAS No. 7423–42–9) (provided for in subheading 2917.19.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3373. 3,6,9-TRIOXAUNDECANEDIOIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.09	3,6,9-Trioxaundecanedioic acid (CAS No. 13887–98–4) (provided for in subheading 2918.90.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3374. CROTONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.10	(E)-2-Butenoic acid (Crotonic acid) (CAS No. 107–93–7) (provided for in subheading 2916.19.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3375. 1,3-BENZENEDICARBOXAMIDE, N, N′-BIS-(2,2,6,6-TETRAMETHYL-4-PIPERIDINYL)-.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.11	1,3-Benzenedicarboxamide, N,N′-bis-(2,2,6,6-tetramethyl-4-piperidinyl)- (CAS No. 42774–15–2) (provided for in subheading 2933.39.61)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3376. 3-DODECYL-1-(2,2,6,6-TETRAMETHYL-4-PIPERIDINYL)-2,5-PYRROLIDINEDIONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.12	3-Dodecyl-1-(2,2,6,6-tetramethyl4-piperidinyl)-2,5-pyrrolidinedione (CAS No. 79720–19–7) (provided for in subheading 2933.39.61)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3377. OXALIC ANILIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.13	Ethanediamide, N-(2-ethoxyphenyl)-N′-(2-ethylphenyl)- (CAS No. 23949–66–8) (provided for in subheading 2924.29.76)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3378. N-METHYL DIISOPROPANOLAMINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.14	1,1′-(Methylamino)dipropan-2-ol (CAS No. 4402–30–6) (provided for in subheading 2922.19.95)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3379. 50 PERCENT HOMOPOLYMER, 3-(DIMETHYLAMINO) PROPYL AMIDE, DIMETHYL SULFATE-QUATERNIZED 50 PERCENT POLYRICINOLEIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.15	Mixture (1:1) of polyricinoleic acid homopolymer, 3-(dimethylamino) propylamide, dimethyl sulfate, quaternized and polyricinoleic acid (provided for in subheading 3824.90.40)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3380. BLACK CPW STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.16	2,7-Naphthalenedisulfonic acid, 4-amino-3-[[4-[[-4-[(2- or 4-amino-4 or 2-hydroxyphenyl)azo]phenyl]amino]-3-sulfophenyl]azo]-5-hydroxy-6-(phenylazo), trisodium salt) (CAS No. 85631–88–5) (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3381. FAST BLACK 287 NA PASTE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.17	1,3-Benzenedicarboxylic acid, 5-[[4-[(7-amino-1-hydroxy-3-sulfo-2-naphthalenyl)azo]-1-naphthalenyl]azo]-, trisodium salt, in paste form (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3382. FAST BLACK 287 NA LIQUID FEED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.18	1,3-Benzenedicarboxylic acid, 5-[[4-[(7-amino-1-hydroxy-3-sulfo-2-naphthalenyl)azo]-1-naphthalenyl]azo]-, trisodium salt, in liquid form (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3383. FAST YELLOW 2 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.19	1,3-Benzenedicarboxylic acid, 5,5′- [[6-(4-morpholinyl)-1,3,5-triazine-2,4-diyl]bis(imino-4,1-phenyleneazo)]bis-, ammonium/sodium/hydrogen salt (direct yellow 173) (provided for in either subheading 3204.14.30 or 3215.19.00.)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3384. CYAN 1 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.21	Copper [29H,31H-phthalo- cyaninato(2-)-N29,N30,N31,N32]-, aminosulfonylsulfo derivatives, tetramethylammonium salts (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3385. YELLOW 1 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.24	1,5-Naphthalenedisulfonic acid, 3,3′- [[6-[(2-hydroxyethyl)amino]-1,3,5-triazine-2,4-diyl]bis[imino(2-methyl-4,1-phenylene)azo]]bis-, tetrasodium salt (CAS No. 50925–42–3) (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3386. YELLOW 746 STAGE.

Subchapter II of chapter 99 of is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.26	1,3-Bipyridirium, 3-carboxy-5′-[(2-carboxy-4-sulfophenyl)azo]-1′,2′-dihydro-6′-hydroxy-4′-methyl-2′-oxo-, inner salt, lithium/sodium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3387. BLACK SCR STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.27	2,7-Naphthalenedi- sulfonic acid, 4-amino-3-[[4-[[-4-[(2 or 4-amino-4 or 2-hydroxyphenyl)-azo]- phenyl]amino]-3-sulfophenyl]- azo]-5-hydroxy-6-(phenylazo)-, trisodium salt (CAS No. 85631–88–5) (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3388. MAGENTA 3B-OA STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.28	2-[[4-Chloro-6-[[8-hydroxy-3,6-disulfonate-7-[(1-sulfo-2-naphthalenyl)azo]-1-naphthalenyl]amino]-1,3,5-triazin-2-yl]amino]-5-sulfobenzoic acid, sodium/lithium salts (CAS No. 12237–00–2) (provided for in subheading 3204.16.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3389. YELLOW 577 STAGE.

(a) Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.29	5-[4-[4-[4-(4,8-Disulfonaphthalen-2-ylazo)-phenylamino]-6-(2-sulfoethylamino)-1,3,5-triazin-2-ylamino]- phenylazo-[isophthalic acid, sodium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3390. CYAN 485/4 STAGE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.30	Copper, [29H,31H-phthalo-cyaninato(2-)-xN29,xN30,xN31,xN32]-aminosulfonyl-[(2-hydroxyethyl)amino]-sulfonylsulfo derivatives, sodium salt (provided for in subheading 3204.14.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3391. LOW EXPANSION LABORATORY GLASS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.32	Laboratory, hygienic, or pharmaceutical glassware, whether or not graduated or calibrated, of low expansion borosilicate glass or alumino-borosilicate glass, having a linear coefficient of expansion not exceeding 3.3 x 10^{-7} per Kelvin within a temperature range of 0 to 300°C (provided for in subheadings 7017.20.00 and 7020.00.60).	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3392. STOPPERS, LIDS, AND OTHER CLOSURES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.33	Stoppers, lids, and other closures of low expansion borosilicate glass or alumino-borosilicate glass, having a linear coefficient of expansion not exceeding 3.3 x 10^{-7} per Kelvin within a temperature range of 0 to 300°C, produced by automatic machine (provided for in subheading 7010.20.20) or produced by hand (provided for in subheading 7010.20.30).	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3393. TRIFLUSULFURON METHYL FORMULATED PRODUCT.

(a) CALENDAR YEARS 2004 AND 2005.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.01	Mixtures of methyl 2-[[[[[4-(dimethylamino)- 6-(2,2,2-trifluoroethoxy)-1,3,5-triazin-2-yl]-amino]carbonyl]-amino]sulfonyl]-3-methylbenzoate (CAS No. 126535–15–7) and application adjuvants (provided for in subheading 3808.30.15)	1%	No change	No change	On or before 12/31/2006	’’.

(b) CALENDAR YEAR 2006.—

(1) IN GENERAL.—Heading 9902.05.01, as added by subsection (a), is amended—

(A) by striking ‘‘1%’’ and inserting ‘‘Free’’; and

(B) by striking ‘‘On or before 12/31/2005’’ and inserting ‘‘On or before 12/31/2007’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2006.

SEC. 3394. AGRUMEX (O-T-BUTYL CYCLOHEXANOL).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.02	o-tert-Butyl-cyclohexanol (CAS No. 13491–79–7) (provided for in subheading 2915.39.45)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3395. TRIMETHYL CYCLO HEXANOL (1-METHYL-3,3-DIMETHYLCYCLOHEXANOL-5).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.03	3,3,5-Trimethyl-cyclohexan-1-ol (CAS No. 116–02–9) (provided for in subheading 2906.19.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3396. MYCLOBUTANIL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.91	alpha-Butyl-alpha-(4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile (myclobutanil) (CAS No. 88671–89–0) (provided for in subheading 2933.99.06)	1.9%	No change	No change	On or before 12/31/2006	’’.

SEC. 3397. METHYL CINNAMATE (METHYL-3-PHENYLPROPENOATE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.04	Methyl cinnamate (methyl-3-phenylpropenoate) (CAS No. 103–26–4) (provided for in subheading 2916.39.20)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3398. ACETANISOLE (ANISYL METHYL KETONE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.05	p-Acetanisole (CAS No. 100–06–1) (provided for in subheading 2914.50.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3399. ALKYLKETONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.53	1-(4-Chlorophenyl)- 4,4-dimethyl-3-pentanone (CAS No. 66346–01–8) (provided for in subheading 2914.70.40)	3.5%	No change	No change	On or before 12/31/2006	’’.

SEC. 3400. IPRODIONE 3-(3-5, DICHOLOROPHENYL)-N-(1-METHYLETHYL)-2,4-DIOXO-1-IMIDAZOLIDINECARBOXAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.01.51	Iprodione (3-(3,5-dicholorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide) (CAS No. 36734–19–7) (provided for in subheading 2933.21.00)	4.1%	No change	No change	On or before 12/31/2006	’’.

SEC. 3401. DICHLOROBENZIDINE DIHYDROCHLORIDE.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.28	3,3′-Dichlorobenzi-dine dihydrochloride (CAS No. 612–83–9) (provided for in subheading 2921.59.80)	6.3% + 0.2 cents/kg	No change	No change	On or before 12/31/2004	’’.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.03.28, as added by subsection (a), is amended—

(A) by striking ‘‘6.3% + 0.2 cents/kg’’ and inserting ‘‘5.1%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3402. KRESOXIM-METHYL.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.03.78	Methyl (E)- methoxyimino- [alpha-(o-tolyloxy)-o-tolyl]- acetate (kresoxim methyl) (CAS No. 143390–89–0) (provided for in subheading 2925.20.60)	3.3%	No change	Free	On or before 12/31/2004	’’.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.03.78, as added by subsection (a), is amended—

(A) by striking ‘‘3.3%’’ and inserting ‘‘2.4%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3403. MKH 6562 ISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.06	2-(Trifluoro- methoxy)-benzenesulfonyl isocyanate (CAS No. 99722–81–3) (provided for in subheading 2930.90.29)	0.7%	No change	No change	On or before 12/31/2006	’’.

SEC. 3404. CERTAIN RAYON FILAMENT YARN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.07	High tenacity single yarn of viscose rayon (provided for in subheading 5403.10.30) with a decitex equal to or greater than 1,000	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3405. BENZENEPROPANAL, 4-(1,1-DIMETHYLETHYL)-ALPHA-METHYL.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.08	Benzenepropanal, 4-(1,1-dimethylethyl)-alpha-methyl- (CAS No. 80–54–6) (provided for in subheading 2912.29.60)	2.3%	No change	Free	On or before 12/31/2004	’’.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.05.08, as added by subsection (a), is amended—

(A) by striking ‘‘2.3%’’ and inserting ‘‘1.7%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3406. 3,7-DICHLORO-8-QUINOLINE CARBOXYLIC ACID.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.09	3,7-Dichloro-8-quinolinecarb-oxylic acid (quinclorac) (CAS No. 84087–01–4) (provided for in subheading 2933.49.30)	3.9%	No change	Free	On or before 12/31/2004	’’.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.05.09, as added by subsection (a), is amended—

(A) by striking ‘‘3.9%’’ and inserting ‘‘3.3%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3407. 3-(1-METHYLETHYL)-1H-2,1,3-BENZOTHIADIAZIN-4(3H)-ONE 2,2 DIOXIDE, SODIUM SALT.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.10	3-(1-Methyl- ethyl)-1H-2,1,3-benzothiadiazin-4(3H)-one-2,2-dioxide, sodium salt (bentazon, sodium salt) (CAS No. 50723–80–3) (provided for in subheading 2934.99.15)	1.8%	No change	Free	On or before 12/31/2004	’’.

(b) CALENDAR YEARS 2005 AND 2006.—

(1) IN GENERAL.—Heading 9902.05.10, as added by subsection (a), is amended—

(A) by striking ‘‘1.8%’’ and inserting ‘‘2.6%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

SEC. 3408. 3,3′,4-4′-BIPHENYLTETRACARBOXYLIC DIANHYDRIDE, ODA, ODPA, PMDA, AND 1,3-BIS(4-AMINOPHENOXY)BENZENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

‘‘	9902.05.11	3,3′,4,4′-Biphenyltetracarboxylic dianhydride (CAS No. 2420–87–3) (provided for in subheading 2917.39.30)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.05.12	4,4′-Oxydianiline (CAS No. 101–80–4) (provided for in subheading 2922.29.80)	1.5%	No change	No change	On or before 12/31/2006	
‘‘	9902.05.13	4,4′-Oxydiphthalic anhydride (CAS No. 1823–59–2) (provided for in subheading 2918.90.43)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.05.14	Pyromellitic dianhydride (CAS No. 89–32–7) (provided for in subheading 2917.39.70)	Free	No change	No change	On or before 12/31/2006	
‘‘	9902.05.15	1,3-Bis(4-aminophenoxy)- benzene (CAS No. 2479–46–1) (provided for in subheading 2922.29.29 or 2922.29.60)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3409. ORYZALIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.16	Oryzalin (benzenesulfonamide, 4-(dipropylamino)-3,5-dinitro-) (CAS No. 19044–88–3) (provided for in subheading 2935.00.95)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3410. TEBUFENOZIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.17	N-tert-Butyl-N′-(4-ethylbenzoyl)-3,5-dimethylbenzoylhydrazide (tebufenozide) (CAS No. 112410–23–8) (provided for in subheading 2928.00.25)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3411. ENDOSULFAN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.18	6,7,8,9,10,10-Hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3-oxide (thiosulfan) (CAS No. 115–29–7) (provided for in subheading 2920.90.10)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3412. ETHOFUMESATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.19	2-Ethoxy-2,3-dihydro-3,3-di-methyl-5-benzofuranyl-methanesulfonate (ethofumesate) (CAS No. 26225–79–6) in bulk or mixed with application adjuvants (provided for in subheading 2932.99.08 or 3808.30.15)	Free	Free	No change	On or before 12/31/2006	’’.

SEC. 3413. NIGHT VISION MONOCULARS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.05.21	Hand-held night vision monoculars, other than those containing a micro-channel plate to amplify electrons or having a photocathode containing gallium arsenide (provided for in subheading 9005.80.60)	Free	Free	No change	On or before 12/31/2006	".

SEC. 3414. SOLVENT YELLOW 163.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.05.27	Solvent yellow 163 (CAS No. 13676–91–0) (provided for in subheading 3204.19.20)	Free	No change	No change	On or before 12/31/2006	".

SEC. 3415. RAILWAY CAR BODY SHELLS FOR EMU'S.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following heading:

"	9902.86.09	Railway car body shells for electric multiple unit (EMU) commuter coaches of stainless steel, the foregoing which are designed for passenger coaches each having an aggregate passenger seating capacity up to 156 (including flip-up seating and wheelchair spaces) on two levels (provided for in subheading 8607.99.50)	Free	No change	No change	On or before 12/31/05	".

SEC. 3416. RAILWAY PASSENGER COACHES.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.86.10	Railway passenger coaches of stainless steel: one cab control and one trailer coach (pursuant to contract), gallery type coaches manufactured to contract specifications, each having an aggregate seating capacity of 130–150 seats (including flip-up seats and wheelchair spaces) on two levels (provided for in subheading 8605.00.00)	Free	No change	No change	On or before 12/31/06	".

SEC. 3417. RAILWAY ELECTRIC MULTIPLE UNIT (EMU) GALLERY COMMUTER COACHES OF STAINLESS STEEL.

Subchapter II of chapter 99 is amended by inserting in the numerical sequence the following new heading:

"	9902.86.11	Railway electric multiple unit (EMU) commuter coaches of stainless steel; the foregoing consisting of two finished EMU gallery-type coaches manufactured to contract specifications each, having an aggregate seating capacity of up to 156 seats (including flip-up seats and wheelchair spaces) on two levels. (provided for in subheading 8603.10.00)	Free	No change	No change	On or before 12/31/06	".

SEC. 3418. SNOWBOARD BOOTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following subheading:

"	9902.64.04	Snowboard boots with uppers of textile materials (provided for in subheading 6404.11.90)	4%	No change	No change	On or before 12/31/06	".

SEC. 3419. HAND-HELD RADIO SCANNERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.23	Electrical radiobroadcast receivers, intended to be hand-held, valued over $40 each, the foregoing designed to receive and monitor publicly transmitted radio communications (provided for in subheading 8527.19.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3420. MOBILE AND BASE RADIO SCANNERS THAT ARE COMBINED WITH A CLOCK.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.24	Electrical radiobroadcast receivers designed to receive and monitor publicly transmitted radio communications, valued at over $40 each, that are combined with a clock, and that are either mounted on a base or designed for use in an automobile or boat (provided for in subheading 8527.32.50)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3421. MOBILE AND BASE RADIO SCANNERS THAT ARE NOT COMBINED WITH A CLOCK.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.02.25	Electrical radiobroadcast receivers designed to receive and monitor publicly transmitted radio communications, valued at over $40 each, that are not combined with a clock, and that are either mounted on a base or designed for use in an automobile or boat (provided for in subheading 8527.39.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3422. CERTAIN FINE ANIMAL HAIR OF KASHMIR (CASHMERE) GOATS NOT PROCESSED.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.51.15	Fine animal hair of Kashmir (cashmere) goats; not processed in any manner beyond the degreased or carbonized condition (provided for in subheading 5102.11.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3423. CERTAIN FINE ANIMAL HAIR OF KASHMIR (CASHMERE) GOATS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.51.16	Fine animal hair of Kashmir (cashmere) goats (provided for in subheading 5102.11.90)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3424. CERTAIN R-CORE TRANSFORMERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.85.04	120 volt/60 Hz electrical transformers (the foregoing and parts thereof provided for in subheading 8504.31.40 or 8504.90.95), with dimensions not exceeding 88 mm by 88 mm by 72 mm but at least 82 mm by 69 mm by 43 mm and each containing a layered and uncut round core with two balanced bobbins, the foregoing rated as less than 40 VA but greater than 32.2 VA with a rating number of R25	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3425. DECORATIVE PLATES.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.04.99	Decorative plates, whether or not with decorative rim or attached sculpture; decorative sculptures, each with plate or plaque attached; decorative plaques each not over 7.65 cm in thickness; architectural miniatures, whether or not put up in sets; all the foregoing of resin materials and containing agglomerated stone, put up for mail order retail sale, whether for wall or tabletop display and each weighing not over 1.36 kg together with their retail packaging (provided for in subheading 3926.40.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3426. BISPYRIBAC SODIUM.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.20	Sodium 2,6-bis[(4,6-dimethoxypyrimidin-2-yl)oxy]benzoate (Bispyribac-sodium) (CAS No. 125401–92–5) (provided for in subheading 2933.59.10)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3427. FENPROPATHRIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.22	α-Cyano-3-phenoxybenzyl 2,2,3,3-tetramethylcycloprop- anecarboxylate (fenpropathrin) (CAS No. 39515–41–8) (provided for in subheading 2926.90.30)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3428. PYRIPROXYFEN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.23	2-[1-Methyl-2-(4-phenoxyphenoxy)ethoxy]pyridine (Pyriproxyfen) (CAS No. 95737–68–1) (provided for in subheading 2933.39.27)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3429. UNICONAZOLE-P.

Subchapter II is amended by inserting in numerical sequence the following new heading:

‘‘	9902.05.24	(E)-(+)-(S)-1-(4-Chlorophenyl)-4,4-dimethyl-2-(1,2,4-triazol-1-yl)-pent-1-ene-3-ol (Uniconazole) (CAS No. 83657–22–1), mixed with application adjuvants (provided for in subheading 3808.30.15)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3430. FLUMIOXAZIN.

Subchapter II is amended by inserting in numerical sequence the following new heading:

“	9902.05.25	2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynl)-2*H*-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1*H*-isoindole-1,3-(2*H*)-dione (Flumioxazin) (CAS No. 103361–09–7) (provided for in subheading 2934.99.15)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3431. NIGHT VISION MONOCULARS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.05.26	Hand-held night vision monoculars, other than those containing a micro-channel plate to amplify electrons or having a photocathode containing gallium arsenide (provided for in subheading 9005.80.40)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3432. 2,4-XYLIDINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.05.28	2,4-Xylidine (CAS No. 95–68–1) (provided for in subheading 2921.49.10)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3433. R118118 SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.05.29	R118118 Salt - benzoic acid, 3-[2-chloro-4-(trifluoromethyl) phenoxy]-(CAS No. 63734–62–3) (provided in subheading 2918.90.20)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3434. NMSBA.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.05.30	4-(Methylsulfonyl)-2-nitrobenzoic acid (CAS No. 110964–79–9) (provided for in subheading 2916.39.45)	0.28%	No change	No change	On or before 12/31/2004	”.

(b) CALENDAR YEAR 2005.—

(1) IN GENERAL.—Heading 9902.29.82, as added by subsection (a), is amended—

(A) by striking ‘‘0.28%’’ and inserting ‘‘0.16%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2005’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

(c) CALENDAR YEARS 2006 THROUGH 2008.—

(1) IN GENERAL.—Heading 9902.29.82, as added by subsection (a) and amended by subsection (b), is further amended—

(A) by striking ‘‘0.16%’’ and inserting ‘‘1.1%’’; and

(B) by striking ‘‘On or before 12/31/2005’’ and inserting ‘‘On or before 12/31/2008’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2006.

SEC. 3435. CERTAIN SATELLITE RADIO BROADCASTING APPARATUS.

(a) CALENDAR YEAR 2004.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.04.35	Reception apparatus for satellite radio broadcasting, other than satellite radio broadcast receivers described in subheading 8527.21.40 (provided in subheading 8527.90.95)	5.2%	No change	No change	On or before 12/31/2004	”.

(b) CALENDAR YEAR 2005.—

(1) IN GENERAL.—Heading 9902.04.35, as added by subsection (a), is amended—

(A) by striking ‘‘5.2%’’ and inserting ‘‘5.4%’’; and

(B) by striking ‘‘On or before 12/31/2004’’ and inserting ‘‘On or before 12/31/2005’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2005.

(c) CALENDAR YEAR 2006.—

(1) IN GENERAL.—Heading 9902.04.35, as added by subsection (a) and amended by this section, is further amended—

(A) by striking ‘‘5.4%’’ and inserting ‘‘5.5%’’; and

(B) by striking ‘‘On or before 12/31/2005’’ and inserting ‘‘On or before 12/31/2006’’.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect on January 1, 2006.

SEC. 3436. ACEPHATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

“	9902.05.31	O,S-Dimethyl acetylphosphoramidothioate (Acephate) (CAS No. 30560–19–1) (provided for in subheading 2930.90.44)	Free	No change	No change	On or before 12/31/2006	”.

SEC. 3437. MAGNESIUM ALUMINUM HYDROXIDE CARBONATE HYDRATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

‘‘	9902.05.32	Magnesium aluminum hydroxide carbonate hydrate (CAS No. 11097–59–9) (provided for in subheading 2842.90.00)	Free	No change	No change	On or before 12/31/2006	’’.

SEC. 3438. CERTAIN FOOTWEAR.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

‘‘	9902.05.35	Footwear consisting of an outer sole affixed to an incomplete or unfinished upper to which additional upper parts or material must be affixed to permit the footwear to be held to the foot, such footwear having a bottom of vulcanized rubber and produced by the hand-laid assembly process or hand made, the foregoing footwear of a type that is not designed to be worn over other footwear (provided for in subheadings 6401.99.30 and 6401.99.60	17%	No change	No change	On or before 12/31/2006	’’.

Subchapter B—Existing Duty Suspensions and Reductions

SEC. 3451. EXTENSION OF CERTAIN EXISTING DUTY SUSPENSIONS.

(a) EXISTING DUTY SUSPENSIONS.—Each of the following headings is amended by striking out the date in the effective period column and inserting ‘‘12/31/2006’’:

(1) Heading 9902.30.90 (relating to 3-amino-2′-(sulfato-ethyl sulfonyl) ethyl benzamide).

(2) Heading 9902.32.91 (relating to MUB 738 INT).

(3) Heading 9902.30.31 (relating to 5-amino-N-(2-hydroxyethyl)-2,3-xylenesulfonamide).

(4) Heading 9902.29.46 (relating to 2-amino-5-nitrothiazole).

(5) Heading 9902.32.14 (relating to 2-methyl-4,6-bis[(octylthio) methyl]phenol).

(6) Heading 9902.32.30 (relating to 4-[[4,6-bis(octylthio)-1,3,5-triazin-2-yl]amino]-2,6-bis(1,1-dimethylethyl)phenol).

(7) Heading 9902.32.16 (relating to calcium bis[monoethyl(3,5-di-tert-butyl-4-hydroxybenzyl) phosphonate]).

(8) Heading 9902.38.69 (relating to nicosulfuron formulated product (‘‘Accent’’)).

(9) Heading 9902.33.63 (relating to DPX–E9260).

(10) Heading 9902.33.59 (relating to DPX–E6758).

(11) Heading 9902.33.61 (relating to carbamic acid (U-9069)).

(12) Heading 9902.29.35 (relating to 1N–N5297).

(13) Heading 9902.28.19 (relating to an ultraviolet dye).

(14) Heading 9902.32.07 (relating to certain organic pigments and dyes).

(15) Heading 9902.29.07 (relating to 4-hexylresorcinol).

(16) Heading 9902.29.37 (relating to certain sensitizing dyes).

(17) Heading 9902.85.42 (relating to certain cathode-ray tubes).

(18) Heading 9902.30.14 (relating to a fluorinated compound).

(19) Heading 9902.29.55 (relating to a certain light absorbing photo dye).

(20) Heading 9902.32.55 (relating to methyl thioglycolate).

(21) Heading 9902.29.62 (relating to chloro amino toluene).

(22) Headings 9902.28.08, 9902.28.09, and 9902.28.10 (relating to bromine-containing compounds).

(23) Heading 9902.32.62 (relating to filter blue green photo dye).

(24) Heading 9902.32.99 (relating to 5-[(3,5-dichlorophenyl)-thio]-4-(1-methylethyl-1)-(4-pyridin lmethyl)-1H-imidazole-2-methanol carbamate).

(25) Heading 9902.32.97 (relating to (2E,4S)-4-(((2R,5S)-2-((4-fluorophenyl)-methyl)-6-methyl-5-((5-methyl-3-isoxazolyl)-carbonyl y)amino)-1,4-dioxoheptyl)-amino)-5-((3S)-2-oxo-3-pyrrolidinyl)-2-pentenoic acid, ethyl ester).

(26) Heading 9902.29.87 (relating to Baytron M).

(27) Heading 9902.39.15 (relating to Baytron P).

(28) Heading 9902.39.30 (relating to certain ion-exchange resins).

(29) Heading 9902.28.01 (relating to thionyl chloride).

(30) Heading 9902.32.12 (relating to DEMT).

(31) Heading 9902.29.03 (relating to p-hydroxybenzoic acid).

(32) Headings 9902.29.83 and 9902.38.10 (relating to iminodisuccinate).

(33) Heading 9902.38.14 (relating to mesamoll).

(34) Heading 9902.38.15 (relating to Baytron C-R).

(35) Heading 9902.29.25 (relating to ortho-phenylphenol (OPP)).

(36) Heading 9902.38.31 (relating to Vulkalent E/C).

(37) Heading 9902.31.14 (relating to desmedipham).

(38) Heading 9902.31.13 (relating to phenmedipham).

(39) Heading 9902.30.16 (relating to diclofop methyl).

(40) Heading 9902.33.40 (relating to R115777).

(41) Heading 9902.29.10 (relating to imazalil).

(42) Heading 9902.29.22 (relating to Norbloc 7966).

(43) Heading 9902.38.09 (relating to Fungaflor 500 EC).

(44) Heading 9902.32.73 (relating to Solvent Blue 124).

(45) Heading 9902.29.73 (relating to 4-amino-2,5-dimethoxy-N-phenylbenzene sulfonamide).

(46) Heading 9902.32.72 (relating to Solvent Blue 104).

(47) Heading 9902.34.01 (relating to sodium petroleum sulfonate).

(48) Heading 9902.29.71 (relating to isobornyl acetate).

(49) Heading 9902.29.70 (relating to certain TAED chemicals).

(50) Heading 9902.29.58 (relating to diethyl phosphorochidothioate).

(51) Heading 9902.29.17 (relating to 2,6-dichloroaniline).

(52) Heading 9902.29.59 (relating to benfluralin).

(53) Heading 9902.29.26 (relating to 1,3-diethyl-2-imidazolidinone).

(54) Heading 9902.29.06 (relating to diphenyl sulfide).

(55) Heading 9902.32.93 (relating to methoxyfenozide).

(56) Heading 9902.32.89 (relating to triazamate).

(57) Heading 9902.29.80 (relating to propiconazole).

(58) Heading 9902.32.92 (relating to β-Bromo-β-nitrostyrene).

(59) Heading 9902.29.61 (relating to quinoline).

(60) Heading 9902.29.25 (relating to 2-phenylphenol).

(61) Heading 9902.29.08 (relating to 3-amino-5-mercapto-1,2,4-triazole).

(62) Heading 9902.29.16 (relating to 4,4-dimethoxy-2-butanone).

(63) Heading 9902.32.87 (relating to fenbuconazole).

(64) Heading 9902.32.90 (relating to diiodomethyl-*p*-tolylsulfone).

(65) Heading 9902.28.16 (relating to propiophenone).

(66) Heading 9902.28.17 (relating to meta-chlorobenzaldehyde).

(67) Heading 9902.28.15 (relating to 4-bromo-2-fluoroacetanilide).

(68) Heading 9902.32.82 (relating to 2,6, dichlorotoluene).

(69) Heading 9902.80.05 (relating to cobalt boron).

(70) Heading 9902.72.02 (relating to ferroboron).

(71) Heading 9902.32.85 (relating to 4,4′ difluorobenzophenone).

(72) Heading 9902.29.34 (relating to certain light absorbing photo dyes).

(73) Heading 9902.29.38 (relating to certain imaging chemicals).

(74) Heading 9902.28.18 (relating to 3,5-dibromo-4-hydoxybenzonitril).

(75) Heading 9902.29.64 (relating to cyclanilide technical).

(76) Heading 9902.29.98 (relating to fipronil technical).

(77) Heading 9902.38.04 (relating to 3,5-dibromo-4-hydoxybenzonitril ester and inerts).

(78) Heading 9902.29.23 (relating to P-nitro toluene-o-sulfonic acid).

(79) Heading 9902.28.20 (relating to ammonium bifluoride).

(80) Heading 9902.39.01 (relating to poly(vinyl chloride) (PVC) self-adhesive sheets.

(81) Heading 9902.32.49 (relating to 11-aminoundecanoic acid).

(b) OTHER MODIFICATIONS.—

(1) CERTAIN CATHODE-RAY TUBES.—Heading 9902.85.41 is amended—

(A) by striking ''1%'' and inserting ''Free''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(2) ETHALFLURALIN.—Heading 9902.30.49 is amended—

(A) by striking ''3.5%'' and inserting ''Free''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(3) DMDS.—Heading 9902.33.92 is amended—

(A) by striking ''2933.59.80'' and inserting ''2933.59.95''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(4) CERTAIN POLYAMIDES.—Heading 9902.39.08 is amended—

(A) by striking ''forms of polyamide-6, polyamide-12, and polyamide-6,12 powders (CAS Nos. 25038–54–4, 25038–74–8, and 25191–04–1) (provided for in subheading 3908.10.00)'' and inserting ''ORGASOL® polyamide powders (provided for in subheading 3908.10.00 or 3908.90.70)''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(5) BUTRALIN.—Heading 9902.38.00 is amended by striking ''3808.31.15'' and inserting ''3808.30.15''.

(6) PRO-JET CYAN 1 RO FEED; PRO-JET FAST BLACK 287 NA PASTE/LIQUID FEED.—

(A) IN GENERAL.—Paragraph (2) in each of sections 1222(c) and 1223(c) of the Tariff Suspension and Trade Act of 2000 are amended by striking ''January 1, 2001'' and inserting ''January 1, 2002''.

(B) EFFECTIVE DATE.—The amendments made by subparagraph (A) shall take effect as if such amendments had been enacted immediately after the enactment of the Tariff Suspension and Trade Act of 2000.

(7) 2-METHYL-4-CHLOROPHENOXYACETIC ACID.—Heading 9902.29.81 is amended—

(A) in the general rate of duty column, by striking ''2.6%'' and inserting ''1.8%''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(8) STARANE F.—Heading 9902.29.77 is amended—

(A) in the general rate of duty column, by striking ''Free'' and inserting ''1.5%''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(9) TRIFLURALIN.—Heading 9902.29.02 is amended—

(A) by striking ''3.3%'' and inserting ''Free''; and

(B) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(10) CERTAIN REDESIGNATIONS.—(A) The second heading 9902.29.02 (as added by section 1144 of the Tariff Suspension and Trade Act of 2000) is amended by redesignating such heading as heading 9902.05.33 and placing such heading in numerical sequence.

(B) The second heading 9902.39.07 (as added by section 1248 of the Tariff Suspension and Trade Act of 2000) by redesignating such heading as heading 9902.05.34 and placing such heading in numerical sequence.

(11) CERTAIN RAILWAY CAR BODY SHELLS.—(A) Heading 9902.86.07 is amended—

(i) in the article description, by striking ''138'' and inserting ''up to 150''; and

(ii) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

(B) Heading 9902.86.08 is amended—

(i) in the article description, by striking ''148'' and inserting ''140''; and

(ii) in the effective period column, by striking the date contained therein and inserting ''12/31/2006''.

SEC. 3452. EFFECTIVE DATE.

Except as otherwise provided in this subchapter, the amendments made by this subchapter apply to goods entered, or withdrawn from warehouse for consumption, on or after January 1, 2004.

Chapter 2—Other Tariff Provisions

Subchapter A—Liquidation or Reliquidation of Certain Entries

SEC. 3501. CERTAIN TRAMWAY CARS.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon proper request filed with the United States Customs Service within 180 days after the date of the enactment of this Act, the Customs Service shall liquidate or reliquidate the entry described in subsection (c) as free of duty.

(b) REFUND OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to a request for a liquidation or reliquidation of the entry under subsection (a) shall be refunded with interest within 180 days after the date on which request is made.

(c) AFFECTED ENTRY.—The entry referred to in subsection (a) is the entry on July 5, 2002, of 2 tramway cars (provided for in subheading 8603.10.00) manufactured in Plzen, Czech Republic, for the use of the city of Portland, Oregon (Entry number 529–0032191–1).

SEC. 3502. LIBERTY BELL REPLICA.

The Secretary of the Treasury shall admit free of duty a replica of the Liberty Bell imported from the Whitechapel Bell Foundry of London, England, by the Liberty Memorial Association of Green Bay and Brown County, Wisconsin, for use by the city of Green Bay, Wisconsin and Brown County, Wisconsin.

SEC. 3503. CERTAIN ENTRIES OF COTTON GLOVES.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon proper request filed with the United States Customs Service within 180 days after the date of the enactment of this Act, the Customs Service—

(1) shall reliquidate each entry described in subsection (c) containing any merchandise which, at the time of original liquidation, had been classified under subheading 6116.92.64 or subheading 6116.92.74; and

(2) shall reliquidate such merchandise under subheading 6116.92.88 at the rate of duty then applicable under such subheading.

(b) REFUND OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to a request for the reliquidation of an entry under subsection (a) shall be refunded with interest within 180 days after the date on which request is made.

(c) AFFECTED ENTRIES.—The entries referred to in subsection (a) are as follows:

Entry number	Date of entry
0397329–2	02/02/00
0395844–2	12/15/99
0394509–2	09/27/99
0393293–4	08/11/99
0391942–8	06/21/99
0389842–4	04/01/99
0387094–4	12/21/98
0386845–0	12/16/98
0385488–0	10/28/98
0384053–3	09/01/98
0382090–7	06/04/98
0381125–5	04/11/98

0265832–4	11/02/94
0264841–6	09/08/94

SEC. 3504. CERTAIN ENTRIES OF POSTERS.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law and subject to the provisions of subsection (b), the United States Customs Service shall, not later than 90 days after the receipt of the request described in subsection (b), liquidate or reliquidate each entry described in subsection (d) containing any merchandise which, at the time of the original liquidation, was classified under subheading 4911.91.20 at the rate of duty that would have been applicable to such merchandise if the merchandise had been liquidated or reliquidated under subheading 4911.91.40 on the date of entry.

(b) REQUESTS.—Reliquidation may be made under subsection (a) with respect to an entry described in subsection (c) only if a request therefor is filed with the Customs Service within 90 days after the date of the enactment of this Act.

(c) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the liquidation or reliquidation of an entry under subsection (a) shall be paid not later than 90 days after the date of such liquidation or reliquidation.

(d) AFFECTED ENTRIES.—The entries referred to in subsection (a) are as follows:

Entry number	Date of entry
F1126496605	09/24/00
F1117735656	10/18/00
90100999235	02/14/01

28100678433	05/18/01
90100999235	04/14/01
90101001700	02/28/01

SEC. 3505. CERTAIN ENTRIES OF POSTERS ENTERED IN 1999 AND 2000.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law and subject to the provisions of subsection (b), the United States Customs Service shall—

(1) not later than 90 days after the receipt of the request described in subsection (b), liquidate or reliquidate each entry described in subsection (c) containing any merchandise which, at the time of the original liquidation, was classified under subheading 4911.91.20 at the rate of duty that would have been applicable to such merchandise if the merchandise had been liquidated or reliquidated under subheading 4911.91.40 on the date of entry; and

(2) within 90 days after such liquidation or reliquidation—

(A) refund any excess duties paid with respect to such entries, including interest from the date of entry; or

(B) relieve the importer of record of any excess duties, penalties, or fines associated with the excess duties.

(b) REQUESTS.—Reliquidation may be made under subsection (a) with respect to any entry described in subsection (c) only if a request therefor is filed with the Customs Service within 90 days after the date of the enactment of this Act.

(c) ENTRIES.—The entries referred to in subsection (a) are as follows:

Entry number	Date of entry
582–0002495–7	September 2, 1999
582–0093847–9	November 19, 1999
582–8905213–4	March 8, 1999
582–2250697–3	February 21, 2000

445–2161190–3	September 6, 1999
445–2163176–0	November 18, 1999
445–2164563–8	January 13, 2000
445–2166869–7	April 12, 2000
445–2162118–3	October 10, 1999
U16–0101858–7	May 2, 2000
182–0167758–2	November 1, 2000

SEC. 3506. CERTAIN ENTRIES OF 13–INCH TELEVISIONS.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law and subject to the provisions of subsection (b), the United States Customs Service shall, not later than 180 days after the receipt of the request described in subsection (b), liquidate or reliquidate each entry described in subsection (d) containing any merchandise which, at the time of the original liquidation, was classified under the following subheadings with respect to which there would have been no duty or a lesser duty if the amendments made by section 1003 of the Miscellaneous Trade and Technical Corrections Act of 1999 had applied to such entry or withdrawal:

(1) Subheading 8528.12.12.
(2) Subheading 8528.12.20.
(3) Subheading 8528.12.62.
(4) Subheading 8528.12.68.
(5) Subheading 8528.12.76.
(6) Subheading 8528.12.84.
(7) Subheading 8528.21.16.
(8) Subheading 8528.21.24.
(9) Subheading 8528.21.55.
(10) Subheading 8528.21.65.
(11) Subheading 8528.21.75.
(12) Subheading 8528.21.85.
(13) Subheading 8528.30.62.
(14) Subheading 8528.30.66.
(15) Subheading 8540.11.24.
(16) Subheading 8540.11.44.

(b) REQUESTS.—Reliquidation may be made under subsection (a) with respect to an entry described in subsection (d) only if a request therefor is filed with the Customs Service within 90 days after the date of the enactment of this Act, and the request contains sufficient information to enable the Customs Service to locate the entry or reconstruct the entry if it cannot be located.

(c) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the liquidation or reliquidation of an entry under subsection (a) shall be paid not later than 180 days after the date of such liquidation or reliquidation.

(d) AFFECTED ENTRIES.—The entries referred to in subsection (a), are as follows:

Entry number	Date of entry	Date of liquidation
110–17072538	11/03/98	09/17/99
110–17091314	11/23/98	10/08/99

SEC. 3509. RELIQUIDATION OF DRAWBACK CLAIM RELATING TO JUICES ENTERED IN APRIL 1993.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, the United States Customs Service shall, not later than 90 days after the date of the enactment of this Act, reliquidate the entry described in subsection (c) at the full amount claimed in such entry.

(b) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the reliquidation under subsection (a) shall be paid by the Customs Service within 90 days after such reliquidation.

(c) AFFECTED ENTRY.—The entry referred to in subsection (a) is as follows:

Entry Number	Date of Entry	Date of Liquidation
032–0001141–3	04/28/93	06/25/99

SEC. 3510. RELIQUIDATION OF DRAWBACK CLAIM RELATING TO JUICES ENTERED IN MARCH 1994.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, the United States Customs Service shall, not later than 90 days after the date of the enactment of this Act, reliquidate the entry described in subsection (c) at the full amount claimed in such entry.

(b) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the reliquidation under subsection (a) shall be paid by the Customs Service within 90 days after such reliquidation.

(c) AFFECTED ENTRY.—The entry referred to in subsection (a) is as follows:

Entry Number	Date of Entry	Date of Liquidation
032–0001138–9	03/30/94	06/25/99

SEC. 3511. CERTAIN ENTRIES PREMATURELY LIQUIDATED IN ERROR.

(a) IN GENERAL.—Notwithstanding sections 514 and 520 of the Tariff Act of 1930 (19 U.S.C. 1514 and 1520), or any other provision of law, the United States Customs Service shall, not later than 90 days after the date of the enactment of this Act, reliquidate those entries described in subsection (c), in accordance with the final decision of the International Trade Administration of the Department of Commerce, and the final results of the administrative reviews, for entries made on or after December 1, 1993, and before April 1, 2001.

(b) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the liquidation or reliquidation of an entry under subsection (a) shall be paid by the Customs Service within 90 days after such liquidation or reliquidation.

(c) ENTRY LIST.—The entries referred to in subsection (a), are as follows:

SEC. 3512. CERTAIN POSTERS ENTERED DURING 2000 AND 2001.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law and subject to the provisions of subsection (b), the United States Customs Service shall, not later than 90 days after the receipt of the request described in subsection (b), liquidate or reliquidate each entry described in subsection (d) containing any merchandise which, at the time of the original liquidation, was classified under subheading 4911.91.20 of the Harmonized Tariff Schedule of the United States at the rate of duty that would have been applicable to such merchandise if the merchandise had been liquidated or reliquidated under subheading 4911.91.40 of the Harmonized Tariff Schedule of the United States on the date of entry.

(b) REQUESTS.—Reliquidation may be made under subsection (a) with respect to an entry described in subsection (d) only if a request therefor is filed with the Customs Service within 90 days after the date of the enactment of this Act.

(c) PAYMENT OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to the liquidation or reliquidation of an entry under subsection (a) shall be paid not later than 90 days after the date of such liquidation or reliquidation.

(d) AFFECTED ENTRIES.—The entries referred to in subsection (a) are as follows:

Entry number	Date of entry
F1126496605	09–24–00
F1117735656	10–18–00

SEC. 3513. LIQUIDATION OR RELIQUIDATION OF CERTAIN ENTRIES.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, and subject to subsection (b), the United States Customs Service shall, not later than 180 days after the receipt of the request described in subsection (b), liquidate or reliquidate each entry described in subsection (d) by applying the column 1 general rate of duty of the Harmonized Tariff Schedule of the United States to each entry that is liquidated or reliquidated, regardless of whether the entry was made under the column 1 special rate of duty of such schedule.

(b) REQUESTS.—Liquidation or reliquidation may be made under subsection (a) with respect to an entry described in subsection (d) only upon a request therefor is filed with the Customs Service.

(c) PAYMENT OF AMOUNTS DUE.—Any amounts due to the United States pursuant to the liquidation or reliquidation of an entry under subsection (a) shall be paid not later than 180 days after the date of such liquidation or reliquidation.

(d) AFFECTED ENTRIES.—The entries referred to in subsection (a), filed at the ports of Laredo, Texas (designated as port of entry 2304), Hidalgo, Texas (designated as port of

entry 2305), and Wilmington, Delaware (designated as port of entry 1103), are as follows:

Entry number	Port of Entry	Date of Entry

SEC. 3514. CERTAIN RAILWAY PASSENGER COACHES.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon proper request filed with the United States Customs Service within 180 days after the date of the enactment of this Act, the Customs Service shall liquidate or reliquidate the entry described in subsection (c) as free of duty.

(b) REFUND OF AMOUNTS OWED.—Any amounts owed by the United States pursuant to a request for a liquidation or reliquidation of the entry under subsection (a) shall be refunded with interest within 180 days after the date on which request is made.

(c) AFFECTED ENTRY.—The entry referred to in subsection (a) is the entry on July 12, 2002, of railway passenger coaches (provided for in subheading 8605.00.00) (Entry number 2210888343–4).

Subchapter B—Miscellaneous Provisions

SEC. 3521. HAIR CLIPPERS.

(a) IN GENERAL.—Heading 8510 of chapter 85 is amended—

(1) by striking subheading 8510.20.00 and inserting the following, with the article description for subheading 8510.20 having the same degree of indentation as the article description for subheading 8510.10.00, and with the article descriptions for subheadings 8510.20.10 and 8510.20.90 having the same degree of indentation as the article description for subheading 8510.90.55:

‘‘	8510.20	Hair clippers:				
	8510.20.10	Hair clippers to be used for agricultural or horticultural purposes	4%	Free (A, CA, E, IL, J, JO, MX)	45%	
	8510.20.90	Other	4%	Free (A, CA, E, IL, J, JO, MX)	45%	’’;

and

(2) by striking subheading 8510.90.30 and inserting the following subheadings and superior text thereto, with such superior text having the same degree of indentation as the article description for subheading 8510.90.55:

‘‘		Parts of hair clippers:				
	8510.90.30	Parts of hair clippers to be used for agricultural or horticultural purposes	4%	Free (A,CA,E, IL,J,JO,MX)	45%	
	8510.90.40	Other parts of hair clippers	4%	Free (A,CA,E, IL,J,JO,MX)	45%	’’.

(b) STAGED RATE REDUCTIONS.—Any staged reduction of a rate of duty proclaimed by the President before the date of the enactment of this Act, that—

(1) would take effect on or after such date of enactment, and

(2) would, but for the amendments made by subsection (a), apply to subheading 8510.20.00 or subheading 8510.90.30 of the Harmonized Tariff Schedule of the United States,

applies to the corresponding rate of duty set forth in subheading 8510.20.10, 8510.20.90, or 8510.90.40 of such Schedule (as added by subsection (a)).

SEC. 3522. TRACTOR BODY PARTS.

(a) CERTAIN TRACTOR PARTS.—Heading 8708 is amended by striking subheading 8708.29.20 and inserting the following subheadings and superior text thereto, with such superior text having the same degree of indentation as the article description for subheading 8708.29.15:

‘‘		Body stampings:				
	8708.29.21	For tractors suitable for agricultural use	Free		Free	
	8708.29.25	Other	2.5%	Free (A, B, CA, E, IL, J, JO, MX)	25%	’’;

(b) STAGED RATE REDUCTIONS.—Any staged reduction of a rate of duty proclaimed by the President before the date of the enactment of this Act, that—

(1) would take effect on or after such date of enactment, and

(2) would, but for the amendment made by subsection (a), apply to subheading 8708.29.20 of the Harmonized Tariff Schedule of the United States,

applies to the corresponding rate of duty set forth in subheading 8708.29.25 of such Schedule (as added by subsection (a)).

SEC. 3523. FLEXIBLE MAGNETS AND COMPOSITE GOODS CONTAINING FLEXIBLE MAGNETS.

Heading 8505 is amended—

(1) by striking subheading 8505.19.00 and inserting the following new subheadings, with the article description for subheadings 8505.19.10, 8505.19.20, and 8505.19.30 having the same degree of indentation as the article description for subheading 8505.11.00:

" 8505.19.10	Flexible magnet	4.9%	Free (A, CA, E, IL, J, JO, MX)	45%	
8505.19.20	Composite goods containing flexible magnet	4.9%	Free (A, CA, E, IL, J, JO, MX)	45%	
8505.19.30	Other	4.9%	Free (A, CA, E, IL, J, MX)	45%	".

(b) STAGED RATE REDUCTIONS.—Any staged reduction of a rate of duty proclaimed by the President before the date of the enactment of this Act, that—

(1) would take effect on or after such date of enactment, and

(2) would, but for the amendment made by subsection (a), apply to subheading 8505.19.00 of the Harmonized Tariff Schedule of the United States,

applies to the corresponding rate of duty set forth in subheadings 8505.19.10, 8505.19.20, and 8505.19.30 of such Schedule (as added by subsection (a)).

SEC. 3524. VESSEL REPAIR DUTIES.

(a) EXEMPTION.—Section 466(h) of the Tariff Act of 1930 (19 U.S.C. 1466(h)) is amended—

(1) in paragraph (1), by striking the comma at the end and inserting a semicolon;

(2) in paragraph (2), by striking ", or" at the end and inserting a semicolon;

(3) in paragraph (3), by striking the period at the end and inserting "; or"; and

(4) by adding at the end the following:

"(4) the cost of equipment, repair parts, and materials that are installed on a vessel documented under the laws of the United States and engaged in the foreign or coasting trade, if the installation is done by members of the regular crew of such vessel while the vessel is on the high seas.

Declaration and entry shall not be required with respect to the installation, equipment, parts, and materials described in paragraph (4).".

(b) AMENDMENT TO HTS.—Subchapter XVIII of chapter 98 of the Harmonized Tariff Schedule of the United States is amended by striking "U.S. Note" and inserting "U.S. Notes" and by adding after U.S. note 1 the following new note:

"2. Notwithstanding the provisions of subheadings 9818.00.03 through 9818.00.07, no duty shall apply to the cost of equipment, repair parts, and materials that are installed in a vessel documented under the laws of the United States and engaged in the foreign or coasting trade, if the installation is done by members of the regular crew of such vessel while the vessel is on the high seas, and declaration and entry shall not be required with respect to such installation, equipment, parts, and materials.".

(c) EFFECTIVE DATE.—The amendments made by this section apply to vessel equipment, repair parts, and materials installed on or after April 25, 2001.

SEC. 3525. DUTY-FREE TREATMENT FOR HAND-KNOTTED OR HAND-WOVEN CARPETS.

(a) AMENDMENT OF THE TRADE ACT OF 1974.—Section 503(b) of the Trade Act of 1974 (19 U.S.C. 2463(b)) is amended by adding at the end the following new paragraph:

"(4) CERTAIN HAND-KNOTTED OR HAND-WOVEN CARPETS.—Notwithstanding paragraph (1)(A), the President may designate as an eligible article or articles under subsection (a) carpets or rugs which are hand-loomed, hand-woven, hand-hooked, hand-tufted, or hand-knotted, and classifiable under subheading 5701.10.16, 5701.10.40, 5701.90.10, 5701.90.20, 5702.10.90, 5702.42.20, 5702.49.10, 5702.51.20, 5702.91.30, 5702.92.00, 5702.99.10, 5703.10.00, 5703.20.10, or 5703.30.00 of the Harmonized Tariff Schedule of the United States.".

(b) CONFORMING AMENDMENT.—Section 503(b)(1)(A) of the Trade Act of 1974 (19 U.S.C. 2463(b)(1)(A)) is amended by striking "Textile" and inserting "Except as provided in paragraph (4), textile".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to any article entered, or withdrawn from warehouse for consumption, on or after the date on which the President makes a designation with respect to the article under section 503(b)(4) of the Trade Act of 1974, as added by subsection (a).

SEC. 3526. DUTY DRAWBACK FOR CERTAIN ARTICLES.

Section 313 of the Tariff Act of 1930 (19 U.S.C. 1313) is amended by adding at the end the following new subsection:

"(y) ARTICLES SHIPPED TO THE UNITED STATES INSULAR POSSESSIONS.—Articles described in subsection (j)(1) shall be eligible for drawback under this section if duty was paid on the merchandise upon importation into the United States and the person claiming the drawback demonstrates that the merchandise has entered the customs territory of the United States Virgin Islands, American Samoa, Wake Island, Midway Islands, Kingman Reef, Guam, Canton Island, Enderbury Island, Johnston Island, or Palmyra Island.".

SEC. 3527. UNUSED MERCHANDISE DRAWBACK.

(a) IN GENERAL.—Section 313(j) of the Tariff Act of 1930 (19 U.S.C. 1313(j)) is amended—

(1) in paragraph (1), by striking "because of its" and inserting "upon entry or"; and

(2) in paragraph (2)—

(A) in the matter preceding subparagraph (A), by striking "because of its" and inserting "upon entry or"; and

(B) in the matter following subparagraph (C)(ii)(II)—

(i) by striking "then upon" and inserting "then, notwithstanding any other provision of law, upon"; and

(ii) by striking "shall be refunded as drawback" and inserting "shall be refunded as drawback under this subsection".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act, and shall apply to any drawback claim filed on or after that date and to any drawback entry filed before that date if the liquidation of the entry is not final on that date.

SEC. 3528. TREATMENT OF CERTAIN FOOTWEAR UNDER CARIBBEAN BASIN ECONOMIC RECOVERY ACT.

Section 213(b) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(b)) is amended as follows:

(1) By amending paragraph (1)(B) to read as follows:

"(B) footwear provided for in any of subheadings 6401.10.00, 6401.91.00, 6401.92.90, 6401.99.30, 6401.99.60, 6401.99.90, 6402.30.50, 6402.30.70, 6402.30.80, 6402.91.50, 6402.91.80, 6402.91.90, 6402.99.20, 6402.99.80, 6402.99.90, 6403.59.60, 6403.91.30, 6403.99.60, 6403.99.90, 6404.11.90, and 6404.19.20 of the HTS that was not designated at the time of the effective date of this title as eligible articles for the purpose of the generalized system of preferences under title V of the Trade Act of 1974;".

(2) In paragraph (3)(A)—

(A) in clause (i), by striking "Subject to clause (ii)" and inserting "Subject to clauses (ii) and (iii)"; and

(B) by adding at the end the following:

"(iii) CERTAIN FOOTWEAR.—Notwithstanding paragraph (1)(B) and clause (i) of this subparagraph, footwear provided for in any of subheadings 6403.59.60, 6403.91.30, 6403.99.60, and 6403.99.90 of the HTS shall be eligible for the duty-free treatment provided for under this title if—

"(I) the article of footwear is the growth, product, or manufacture of a CBTPA beneficiary country; and

"(II) the article otherwise meets the requirements of subsection (a), except that in applying such subsection, 'CBTPA beneficiary country' shall be substituted for 'beneficiary country' each place it appears.".

SEC. 3529. DESIGNATION OF SAN ANTONIO INTERNATIONAL AIRPORT FOR CUSTOMS PROCESSING OF CERTAIN PRIVATE AIRCRAFT ARRIVING IN THE UNITED STATES.

(a) IN GENERAL.—Section 1453(a) of the Tariff Suspension and Trade Act of 2000 is amended by striking "2-year period" and inserting "6-year period".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective as of November 9, 2002.

SEC. 3530. AUTHORITY FOR THE ESTABLISHMENT OF INTEGRATED BORDER INSPECTION AREAS AT THE UNITED STATES-CANADA BORDER.

(a) FINDINGS.—Congress makes the following findings:

(1) The increased security and safety concerns that developed in the aftermath of the terrorist attacks in the United States on September 11, 2001, need to be addressed.

(2) One concern that has come to light is the vulnerability of the international bridges and tunnels along the United States borders.

(3) It is necessary to ensure that potentially dangerous vehicles are inspected prior to crossing these bridges and tunnels; however, currently these vehicles are not inspected until after they have crossed into the United States.

(4) Establishing Integrated Border Inspection Areas (IBIAs) would address these concerns by inspecting vehicles before they gained access to the infrastructure of international bridges and tunnels joining the United States and Canada.

(b) CREATION OF INTEGRATED BORDER INSPECTION AREAS.—

(1) IN GENERAL.—The Commissioner of the Customs Service, in consultation with the

Canadian Customs and Revenue Agency (CCRA), shall seek to establish Integrated Border Inspection Areas (IBIAs), such as areas on either side of the United States-Canada border, in which United States Customs officers can inspect vehicles entering the United States from Canada before they enter the United States, or Canadian Customs officers can inspect vehicles entering Canada from the United States before they enter Canada. Such inspections may include, where appropriate, employment of reverse inspection techniques.

(2) ADDITIONAL REQUIREMENT.—The Commissioner of Customs, in consultation with the Administrator of the General Services Administration when appropriate, shall seek to carry out paragraph (1) in a manner that minimizes adverse impacts on the surrounding community.

(3) ELEMENTS OF THE PROGRAM.—Using the authority granted by this section and under section 629 of the Tariff Act of 1930, the Commissioner of Customs, in consultation with the Canadian Customs and Revenue Agency, shall seek to—

(A) locate Integrated Border Inspection Areas in areas with bridges or tunnels with high traffic volume, significant commercial activity, and that have experienced backups and delays since September 11, 2001;

(B) ensure that United States Customs officers stationed in any such IBIA on the Canadian side of the border are vested with the maximum authority to carry out their duties and enforce United States law;

(C) ensure that United States Customs officers stationed in any such IBIA on the Canadian side of the border shall possess the same immunity that they would possess if they were stationed in the United States; and

(D) encourage appropriate officials of the United States to enter into an agreement with Canada permitting Canadian Customs officers stationed in any such IBIA on the United States side of the border to enjoy such immunities as permitted in Canada.

SEC. 3531. DESIGNATION OF FOREIGN LAW ENFORCEMENT OFFICERS.

(a) MISCELLANEOUS PROVISIONS.—Section 401(i) of the Tariff Act of 1930 (19 U.S.C. 1401(i)) is amended by inserting '', including foreign law enforcement officers,'' after ''or other person''.

(b) INSPECTIONS AND PRECLEARANCE IN FOREIGN COUNTRIES.—Section 629 of the Tariff Act of 1930 (19 U.S.C. 1629) is amended—

(1) in subsection (a), by inserting '', or subsequent to their exit from,'' after ''prior to their arrival in'';

(2) in subsection (c)—

(A) by inserting ''or exportation'' after ''relating to the importation''; and

(B) by inserting ''or exit'' after ''port of entry'';

(3) by amending subsection (e) to read as follows:

''(e) STATIONING OF FOREIGN CUSTOMS AND AGRICULTURE INSPECTION OFFICERS IN THE UNITED STATES.—The Secretary of State, in coordination with the Secretary and the Secretary of Agriculture, may enter into agreements with any foreign country authorizing the stationing in the United States of customs and agriculture inspection officials of that country (if similar privileges are extended by that country to United States officials) for the purpose of insuring that persons and merchandise going directly to that country from the United States, or that have gone directly from that country to the United States, comply with the customs and other laws of that country governing the importation or exportation of merchandise. Any foreign customs or agriculture inspection official stationed in the United States under this subsection may exercise such functions, perform such duties, and enjoy such privileges and immunities as United States officials may be authorized to perform or are afforded in that foreign country by treaty, agreement, or law.''; and

(4) by adding at the end the following:

''(g) PRIVILEGES AND IMMUNITIES.—Any person designated to perform the duties of an officer of the Customs Service pursuant to section 401(i) of this Act shall be entitled to the same privileges and immunities as an officer of the Customs Service with respect to any actions taken by the designated person in the performance of such duties.''.

(c) CONFORMING AMENDMENT.—Section 127 of the Treasury Department Appropriations Act, 2003, is hereby repealed.

(d) EFFECTIVE DATE.—This section, and the amendments made by this section, take effect on the date of the enactment of this Act.

SEC. 3532. AMENDMENTS TO UNITED STATES INSULAR POSSESSION PROGRAM.

(a) PRODUCTION CERTIFICATES.—Additional U.S. Note 5(h) to chapter 91 is amended—

(1) by amending subparagraphs (i) and (ii) to read as follows:

''(i) In the case of each of calendar years 2003 through 2015, the Secretaries jointly, shall—

''(A) verify—

''(1) the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year (including the value of usual and customary health insurance, life insurance, and pension benefits); and

''(2) the total quantity and value of watches and watch movements produced in the insular possessions by that producer and imported free of duty into the customs territory of the United States; and

''(B) issue to each producer (not later than 60 days after the end of the preceding calendar year) a certificate for the applicable amount.

''(ii) For purposes of subparagraph (i), except as provided in subparagraphs (iii) and (iv), the term 'applicable amount' means an amount equal to the sum of—

''(A) 90 percent of the producer's creditable wages (including the value of usual and customary health insurance, life insurance, and pension benefits) on the assembly during the preceding calendar year of the first 300,000 units; plus

''(B) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages (including the value of usual and customary health insurance, life insurance, and pension benefits) on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000; plus

''(C) the difference between the duties that would have been due on each producer's watches and watch movements (excluding digital watches and excluding units in excess of the 750,000 limitation of this subparagraph) imported into the customs territory of the United States free of duty during the preceding calendar year if the watches and watch movements had been subject to duty at the rates set forth in column 1 under this chapter that were in effect on January 1, 2001, and the duties that would have been due on the watches and watch movements if the watches and watch movements had been subject to duty at the rates set forth in column 1 under this chapter that were in effect for such preceding calendar year.''; and

(2) by amending subparagraph (v) to read as follows:

''(v) Any certificate issued under subparagraph (i) shall entitle the certificate holder to secure a refund of duties equal to the face value of the certificate on any articles that are imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.''.

(b) JEWELRY.—Additional U.S. Note 3 to chapter 71 is amended—

(1) by redesignating paragraphs (b), (c), (d), and (e) as paragraphs (c), (d), (e), and (f), respectively;

(2) by inserting after paragraph (a) the following new paragraph:

''(b) Notwithstanding additional U.S. Note 5(h)(ii)(B) to chapter 91, articles of jewelry subject to this note shall be subject to a limitation of 10,000,000 units.''; and

(3) by striking paragraph (f), as so redesignated, and inserting the following:

''(f) Notwithstanding any other provision of law, any article of jewelry provided for in heading 7113 that is assembled in the Virgin Islands, Guam, or American Samoa by a jewelry manufacturer or jewelry assembler that commenced jewelry manufacturing or jewelry assembly operations in the Virgin Islands, Guam, or American Samoa after August 9, 2001, shall be treated as a product of the Virgin Islands, Guam, or American Samoa for purposes of this note and General Note 3(a)(iv) of this Schedule if such article is entered no later than 18 months after such jewelry manufacturer or jewelry assembler commenced jewelry manufacturing or jewelry assembly operations in the Virgin Islands, Guam, or American Samoa.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to goods imported into the customs territory of the United States on or after January 1, 2003.

SEC. 3533. MODIFICATION OF PROVISIONS RELATING TO DRAWBACK CLAIMS.

(a) MERCHANDISE NOT CONFORMING TO SAMPLE OR SPECIFICATIONS.—Section 313(c) of the Tariff Act of 1930 (19 U.S.C. 1313(c)) is amended to read as follows:

''(c) MERCHANDISE NOT CONFORMING TO SAMPLE OR SPECIFICATIONS.—

''(1) CONDITIONS FOR DRAWBACK.—Upon the exportation or destruction under the supervision of the Customs Service of articles or merchandise—

''(A) upon which the duties have been paid,

''(B) which has been entered or withdrawn for consumption,

''(C) which is—

''(i) not conforming to sample or specifications, shipped without the consent of the consignee, or determined to be defective as of the time of importation, or

''(ii) ultimately sold at retail by the importer, or the person who received the merchandise from the importer under a certificate of delivery, and for any reason returned to and accepted by the importer, or the person who received the merchandise from the importer under a certificate of delivery, and

''(D) which, within 3 years after the date of importation or withdrawal, as applicable, has been exported or destroyed under the supervision of the Customs Service,

the full amount of the duties paid upon such merchandise, less 1 percent, shall be refunded as drawback.

''(2) DESIGNATION OF IMPORT ENTRIES.—For purposes of paragraph (1)(C)(ii), drawback may be claimed by designating an entry of

merchandise that was imported within 1 year before the date of exportation or destruction of the merchandise described in paragraph (1) (A) and (B) under the supervision of the Customs Service. The merchandise designated for drawback must be identified in the import documentation with the same eight-digit classification number and specific product identifier (such as part number, SKU, or product code) as the returned merchandise.

''(3) WHEN DRAWBACK CERTIFICATES NOT REQUIRED.—For purposes of this subsection, drawback certificates are not required if the drawback claimant and the importer are the same party, or if the drawback claimant is a drawback successor to the importer as defined in subsection (s)(3).''.

(b) TIME LIMITATION ON EXPORTATION OR DESTRUCTION.—Section 313(i) of the Tariff Act of 1930 (19 U.S.C. 1313(i)), is amended—

(1) by striking ''No'' and inserting ''Unless otherwise provided for in this section, no''; and

(2) by inserting '', or destroyed under the supervision of the Customs Service,'' after ''exported''.

(c) USE OF DOMESTIC MERCHANDISE ACQUIRED IN EXCHANGE FOR IMPORTED MERCHANDISE OF SAME KIND AND QUALITY.—Section 313(k) of the Tariff Act of 1930 (19 U.S.C. 1313(k)), is amended—

(1) by striking ''(k)'' and inserting ''(k)(1)''; and

(2) by adding at the end the following new paragraph:

''(2) For purposes of subsections (a) and (b), the use of any domestic merchandise acquired in exchange for a drawback product of the same kind and quality shall be treated as the use of such drawback product if no certificate of delivery or certificate of manufacture and delivery pertaining to such drawback product is issued, other than that which documents the product's manufacture and delivery. As used in this paragraph, the term 'drawback product' means any domestically produced product, manufactured with imported merchandise or any other merchandise (whether imported or domestic) of the same kind and quality, that is subject to drawback.''.

(d) PACKAGING MATERIAL.—Section 313(q) of the Tariff Act of 1930 (19 U.S.C. 1313(q)), is amended to read as follows:

''(q) PACKAGING MATERIAL.—

''(1) PACKAGING MATERIAL UNDER SUBSECTIONS (c) AND (j).—Packaging material, whether imported and duty paid, and claimed for drawback under either subsection (c) or (j)(1), or imported and duty paid, or substituted, and claimed for drawback under subsection (j)(2), shall be eligible for drawback, upon exportation, of 99 percent of any duty, tax, or fee imposed under Federal law on such imported material.

''(2) PACKAGING MATERIAL UNDER SUBSECTIONS (a) AND (b).—Packaging material that is manufactured or produced under subsection (a) or (b) shall be eligible for drawback, upon exportation, of 99 percent of any duty, tax, or fee imposed under Federal law on the imported or substituted merchandise used to manufacture or produce such material.

''(3) CONTENTS.—Packaging material described in paragraphs (1) and (2) shall be eligible for drawback whether or not they contain articles or merchandise, and whether or not any articles or merchandise they contain are eligible for drawback.

''(4) EMPLOYING PACKAGING MATERIAL FOR ITS INTENDED PURPOSE PRIOR TO EXPORTATION.—The use of any packaging material for its intended purpose prior to exportation shall not be treated as a use of such material prior to exportation for purposes of applying subsection (a), (b), or (c), or paragraph (1)(B) or (2)(C)(i) of subsection (j).''.

(e) LIMITATION ON LIQUIDATION.—Section 504 of the Tariff Act of 1930 (19 U.S.C. 1504) is amended—

(1) by striking subsections (a) and (b) and inserting the following:

''(a) LIQUIDATION.—

''(1) ENTRIES FOR CONSUMPTION.—Unless an entry of merchandise for consumption is extended under subsection (b) of this section or suspended as required by statute or court order, except as provided in section 751(a)(3), an entry of merchandise for consumption not liquidated within 1 year from—

''(A) the date of entry of such merchandise,

''(B) the date of the final withdrawal of all such merchandise covered by a warehouse entry,

''(C) the date of withdrawal from warehouse of such merchandise for consumption if, pursuant to regulations issued under section 505(a), duties may be deposited after the filing of any entry or withdrawal from warehouse, or

''(D) if a reconciliation is filed, or should have been filed, the date of the filing under section 484 or the date the reconciliation should have been filed,

shall be deemed liquidated at the rate of duty, value, quantity, and amount of duties asserted at the time of entry by the importer of record. Notwithstanding section 500(e), notice of liquidation need not be given of an entry deemed liquidated.

''(2) ENTRIES OR CLAIMS FOR DRAWBACK.—
